ENTOMOLOGY GRADUATE OPTION

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (http://catalog.oregonstate.edu/college-departments/agricultural-sciences/horticulture/horticulture-ms-phd-mais)

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching, and extension in the context of understanding the basic biology of insects and, with this knowledge, then working with insects in natural and/or managed environments. The discipline of entomology at Oregon State University covers behavior, ecology, evolution, physiology, systematics, molecular biology, chemical ecology, plant-insect interactions, pollination by honey bees and native bees, biological control, integrated pest management, and insecticide toxicology. Oregon State Entomology addresses insect-related issues in aquatic and terrestrial systems in natural, agricultural, forested, and urban environments. Entomologists collaborate with plant scientists, physiologists, pathologists, soil scientists, geneticists, molecular biologists, and experts in other fields.

Students in the Entomology option will conduct thesis research related to insects under the supervision of an entomologist associated with the graduate faculty in Crops or Horticulture, and take courses that provide knowledge and understanding about insects. After completing their degree, students will have gained fundamental knowledge in entomology that may be applied in agricultural, aquatic, forested, natural, and urban environments.

Course Credits

Select 9 credits of the following:

- ENT 507    SEMINAR
- ENT 520    INSECT ECOLOGY
- ENT 540    ISSUES IN INSECT TOXICOLOGY
- ENT 599    SPECIAL TOPICS
- IB 540     INSECT PHYSIOLOGY
- IB 575     INSECT BIODIVERSITY SURVEY
- IB 577     AQUATIC ENTOMOLOGY

Total Hours 12

Option Code: 5333
