

ORGANIC FARMING SYSTEMS CERTIFICATE

Available only via Ecampus.

This certificate provides students with technical skills and knowledge in organic farming production and regulation. The program emphasizes organic management of soil health, pests and diseases, weeds, and inputs while also providing understanding of organic regulations, policy, economics, and social implications. "Systems thinking" is utilized and cultivated throughout the courses to help students see interconnections and understand how management decisions influence all dimensions of sustainability (environmental, social, and economic).
