

CLINICALLY BASED ELEMENTARY GRADUATE OPTION

This option is offered within the following major(s):

- Teaching - College of Education (<http://catalog.oregonstate.edu/college-departments/education/teaching-mat/>)

Available only via Ecampus.

The Clinically Based Elementary option in the Masters of Arts in Teaching (MAT) is a two-year program that features culturally literate education, teaching for social justice, and science and math topics leading to an Oregon preliminary teaching license in multiple subjects (elementary education). This option takes advantage of a partnership between a school district and the College of Education to put teacher candidates in district classrooms. Each term course work includes fully online courses, hybrid courses that are a combination of online and face-to-face learning in local districts, and field practicums in school district classrooms.

Only school districts that have entered into a formal partnership with OSU are available for student placement. Please check with the program lead for a list of participating schools.

Option Code: 2107

Code	Title	Credits
