SCHOOL OF HISTORY, PHILOSOPHY, AND RELIGION

History
The School of History, Philosophy, and Religion offers a BA or BS degree in History. Courses provide fundamental background for the social sciences and humanities and are of special value to students of government, education, law, science, journalism, and business. History majors go on to careers in teaching and many jobs benefiting from a liberal arts background.

BA candidates must have proficiency at the second-year college level of a foreign language.

The school also offers a minor program for undergraduates with majors in other fields.

Philosophy
The School of History, Philosophy, and Religion offers a BA or BS degree in Philosophy, a Philosophy minor, an undergraduate and postbaccalaureate certificate in Applied Ethics, an MA in Applied Ethics, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) program with a focus on applied ethics and other areas of philosophy. The school's Program for Ethics, Science, and the Environment (PESE) supports multidisciplinary education and scholarship on ethical and policy issues that are raised by advances in scientific knowledge, biotechnology, and natural resource use.

The Spring Creek Project seeks to bring together the practical wisdom of the environmental sciences, the clarity of philosophical analysis, and the creative, expressive power of the written word, to find new ways to understand and re-imagine our relation to the natural world.

Baccalaureate core courses are taught for students interested in broadening their intellectual horizons, developing their abilities for intellectual criticism, and enlarging their understanding of social, ethical, religious, political, and aesthetic values in contemporary society and world cultures. Many philosophy courses have content that is relevant to the interests of women and minority students.

The school invites non-majors to combine the study of philosophy with their major program by enrolling in the philosophy minor or the Applied Ethics certificate program.

Students interested in philosophy programs should contact or visit the school's undergraduate advisor or director of graduate studies.

History of Science
The School of History, Philosophy, and Religion offers the degrees of Master of Arts (MA), Master of Science (MS) and Doctor of Philosophy (PhD) in History of Science. The History of Science graduate program provides professional training in the interdisciplinary subject of the history of science. The program connects the humanities, social sciences, and natural sciences by studying and interpreting the development of the sciences within particular historical settings and analyzing the changing roles of the sciences within modern cultures. The emphasis in the program is on scientific traditions since the sixteenth century in Europe and North America, in the physical, earth, biological, medical, and social sciences, as well as on environmental history and the history of the environmental sciences.

MA in Applied Ethics Degree
The MA in Applied Ethics provides students skills in moral reasoning and an understanding of the ethical values and dilemmas in today's world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

MAIS Degree
The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, philosophy may be used as a minor. See the graduate section of this catalog for details.
