PUBLIC POLICY UNDERGRADUATE MAJOR (BS, HBS)

Also available via Ecampus.

The discipline of public policy is closely connected to the practice of policy and this program ensures that students interact with policymakers as well as the knowledge-producers who support policy decisions. Graduates of the BSPP will have the skills necessary for understanding the political, economic, and social constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that animate critical policy debates. The Public Policy Major will provide students with a set of research, analytical, and management skills that will be transferable across sectors and across issue areas. The undergraduate program will prepare graduates for a career not only in public service (federal, state, and local government), but also in not-for-profit and for-profit organizations, as well as admissions to competitive graduate programs in a wide range of programs through which they may further broaden their intellectual and practical experience and expertise.

The BSPP is designed with an emphasis on substantive interdisciplinary knowledge about important policy issues, analytic skills, and policy practice. Students will have the opportunity to pursue their individual interests and passion in specialization areas, each of which is supported by a wealth of experience and expertise in both the School of Public Policy and across the OSU campus. In addition, the degree requires a supervised practicum with a public, non-profit, private, or international organization.

Students will apply for the Public Policy major after completing an equivalent of 90 quarter credits at an accredited university (typically two years of full-time study). Students are encouraged to complete as much of the OSU Baccalaureate core and College of Liberal Arts (CLA) requirements as possible during that time period. Prior to submission of an application, students will be required to take and complete successfully (GPA of 3.0 or higher) four courses, each of which is a prerequisite for subsequent courses in the program.
