PUBLIC POLICY GRADUATE MAJOR (MPP, PHD)

Graduate Areas of Concentration

Energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; social policy

MPP also available via Ecampus.

Oregon State University offers graduate programs in public policy to students interested in energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy. The degrees are granted by the College of Liberal Arts and provide graduate education for students wishing to develop their interests and careers in the public and nonprofit sectors. The Master of Public Policy (MPP) specifically prepares students for careers in domestic and international organizations or preparation for PhD studies. The PhD in Public Policy prepares students for academic or non-academic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. The degrees are designed to provide individuals with analytic skills, an understanding of public policy processes, and substantive knowledge in a specific policy area.

The Master of Public Policy is a professional degree intended to prepare students for careers in the public, nonprofit, and international sectors and offer training for in-service students desiring professional growth and advancement. The degree is designed to be a generalist program, with an emphasis on analytic skills and policy knowledge. The degree requires a minimum of 62 graduate credits, 44 of which are in the required core. The core curriculum provides an important foundation in statistics, research methods, computer applications, public policy analysis, public administration and ethics, and economics. The remaining 18 credits support the student’s preferred area of concentration, consisting of environmental policy, international policy, rural policy, science policy, or social policy. Students with little work experience in public service, the nonprofit sector, or the international context will be required to engage in a supervised internship that will allow them to work closely with experienced mentors who will help them integrate theory with practice and introduce them to a professional network. Students with relevant work experience will substitute course work for internship credits. A final oral examination is required.
