Experiential, International or Service-Learning
Select 0-3 credits

1  Choose 2 courses that focus on a single region of the developing world (e.g., HST 350 *MODERN LATIN AMERICA and ANTH 313 *PEOPLES OF THE WORLD-LATIN AMERICA).
2  Highly encouraged, but not required. Students may fulfill this by taking credits in any discipline listed above involving experiential learning, international exchange, or service learning (e.g., ANTH 409 PRACTICUM, ANTH 410 INTERNSHIP). The OSU Center for Civic Engagement can also help connect students with opportunities.

Total Hours 32

Languages

To develop a sense of linguistic diversity, certificate students must study two languages other than English. End-of-second-year proficiency is required in one language and end-of-first-year proficiency in another language. One of these languages must be outside the Indo-European language family. It is highly recommended that students participate in a study abroad program.

Major Code: C700

Latin American Affairs Certificate

Juan A. Trujillo, Director
36 Kidder Hall
Oregon State University
Corvallis, OR 97331-4603
541-737-3956
Email: jtrujillo@oregonstate.edu

Students earning a Latin American Affairs certificate will have gained a broad knowledge and understanding of the history and current situation in Latin America. The program allows students with majors in any discipline to complement their professional studies; certificates are awarded concurrently with the undergraduate or graduate degree.

Course work is drawn from several departments and schools, primarily in the College of Liberal Arts. Interested students should contact the program director early in their academic careers in order to plan their schedules.

The course of study consists of a minimum of 30 credits: 9 credits of required core courses, and 21 credits of appropriate electives. In addition, the student must have proficiency in Spanish or Portuguese equivalent to that attained by the end of the third-year language sequence, as certified by the School of Language, Culture, and Society, or by placement scores.

The minimum of 30 credits of approved courses must include:

**Major Code: C810**

Queer Studies Graduate Minor

The graduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this graduate option examines homophobia and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of power.

Master's students must complete a total of 20 credits, and doctoral students must complete a total of 24 credits. Students whose primary area is WGSS may use required course work for their program towards an MA or PhD minor in Queer Studies.

The Social Justice minor provides interdisciplinary academic classes in which students think critically about social justice and experiential learning activities in which students engage in the work of social justice. The program addresses local, national and international issues of social justice. A core of theory, case studies, and practice is combined with elective courses from across the College of Liberal Arts that address the following areas: histories, cultures and geographies of dominance; experiences of oppression; theories of justice; policies, institutions, and structures that promote or hinder equity; and collective action or processes of change leading to social justice.

The Social Justice minor is a collaboration of the School of Language, Culture, and Society, the School of History, Philosophy, and Religion, and the School of Public Policy.

The remaining 8 credits may be taken from the Queer Studies electives (any course with the QS prefix) and from approved program courses offered by other departments.

Upper-division Spanish electives, to be approved by the major advisor | 24-33 |

Total credits required for graduation | 180 |

1 These courses must be completed with a B average.
* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

All prospective majors and minors must see a departmental advisor at least once a year.

WLC majors must participate in an OUS and OSU-approved study abroad program or in an approved internship experience in a French-, German-, or Spanish-speaking country or fulfill this requirement as determined by the director.

Students who do not find an OSU-approved program (this includes OUS and other programs run through IDEA and OUS) that fits their academic and/or geographical needs can petition to have a different program approved by a sub-committee of the Study Abroad Advisory Committee. The requirement for petitioning a program must include an academic and/or geographic reason why a student is choosing a program that is not on the approved list.

Major Code: 940

Women, Gender, and Sexuality Studies Certificate

Also available via Ecampus.

The Women, Gender, and Sexuality Studies undergraduate certificate is designed to facilitate the broad interdisciplinary study of gender and women's issues. It emphasizes the diversity of women's experience through a focus on disciplinary-based knowledge about women's lives and relationships in the many schools/departments where courses on gender are taught.

While core course work taught by the Women, Gender, and Sexuality Studies Program is required, students are expected to take the bulk of their elective course work from approved Women, Gender, and Sexuality Studies Program classes offered throughout the different academic units on campus. A total of 27 credits is required for the certificate, with at least 12 of these credits at the upper-division level.

All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus certificate.

**Electives**

Select 17 credits | 17 |

* Baccalaureate Core Course (BCC)

The remaining 17 credits can be taken from elective courses offered by the Women, Gender, and Sexuality Studies Program and from approved program courses offered in any school/department at OSU. However, at least 12 of these 17 credits must consist of approved program courses. An approved program course is one that has a focus on gender and/ or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies Program course. See the electives for the Women, Gender, and Sexuality Studies major.

No more than 3 credits of WGSS 402 INDEPENDENT STUDY and WGSS 410 INTERNSHIP may count toward the Women, Gender, and Sexuality Studies undergraduate certificate.

Major Code: C808

Women, Gender, and Sexuality Studies Graduate Major (MA, PhD, MAIS)

**Graduate Areas of Concentration**

Feminist leadership; gender, rhetoric, and representation; health and gender justice; social justice theory and practice

MA students will take 42-43 credits of course work, including 21 credits of required courses and thesis credit. In addition, students select two courses from cluster area one, one course from each of cluster areas two and three, and 6 elective credit chosen from any of the cluster areas and/ or other WGSS/QS elective courses. Cluster areas include:

1. Women of Color Feminisms/Queer of Color Feminisms
2. Global/Transnational Feminisms
3. Feminist Praxis

MA students must also demonstrate second-year proficiency in a second language.

PhD students will take 27–28 credits of core requirements, as well as 36 dissertation credits, and 12 credits of electives in a concentration specific.
to their area of focus, for a total of 75–76 required credits. No more than two "slash" courses will be accepted toward the degree.

**Electives**

Students must also complete at least 6 elective credits from any of the cluster areas and/or other WGSS/QS elective courses in order to meet the 42-43 minimum credit total.

**Total Hours** 42-43

---

1. All MA students must also take at least two courses from cluster one, Women of Color Feminisms/Queer of Color Feminisms, and at least one course each from the remaining clusters, Global/Transnational Feminisms and Feminist Praxis. WGSS 586/587/588 Global Experience I, II, III together constitute the equivalent of one 3-credit class within the Feminist Praxis cluster. Students must also complete an additional 6 elective credits chosen from any of the cluster areas and/or other WGSS/QS elective courses.

### Second-year proficiency in a second language as demonstrated by:

1. Two years of a college language sequence on the transcript.
2. Scoring at second-year proficiency on a language placement test.
3. Completing the 213 course of a language sequence while enrolled in the MA program.

Women, Gender, and Sexuality Studies Graduate Minor

Graduate Areas of Concentration

Contemporary women’s issues; leadership and community engagement; race, class and gender; sexuality studies; transnational perspectives

Women, Gender, and Sexuality Studies is the multidisciplinary study of gender and women’s lives and experiences. Course work explores women’s realities in such areas as the political and social sciences, health, psychology, history, literature, and the arts. Women, Gender, and Sexuality Studies programs grew out of the women’s movement, involving understandings of discrimination in society and a need to celebrate different women’s strengths, contributions, and forms of resistance.

Women, Gender, and Sexuality Studies can be elected as a primary and/or secondary field for the Master of Arts in Interdisciplinary Studies degree (MAIS) and as a graduate minor. Areas of specialization include contemporary women’s issues; gender, race and class; and global women’s issues. The master’s program requires a thesis or research report (nonthesis option) and the completion of a core curriculum. This curriculum includes an understanding of how issues of gender, race, class, and other differences among women affect their status in Western and global perspectives. It also emphasizes the relationship between theory and strategies for social change. An internship or field placement in an agency that is concerned with gender issues or women’s role and status in society is required and is designed to help students integrate classroom knowledge with practical experience. The graduate program is beneficial for any work experience in which gender is negotiated or women are affected. Women, Gender, and Sexuality Studies graduates are employed in human service agencies and programs, advocacy organizations such as battered women’s shelters and women’s resource centers and community organizing, teaching, business, administration, and cultural work. Many students have used their degree as a preparatory base for doctoral work.

Women, Gender, and Sexuality Studies faculty are drawn from colleges across the university. Many teach Women, Gender, and Sexuality Studies program courses in their home departments and are involved in research projects that give them different perspectives on the challenges in Women, Gender, and Sexuality Studies. These courses and faculty are not listed in this entry. For more information, contact Patti Duncan, Director, Women, Gender, and Sexuality Studies, 252 Waldo Hall, OSU, Corvallis, OR 97331.

Women, Gender, and Sexuality Studies Minor

Also available via Ecampus.

The Women, Gender, and Sexuality Studies minor provides a multidisciplinary exploration of gender and sexuality as they intersect with race, ethnicity, class, culture, nation, and ability. The curriculum incorporates a social activism component, and students are encouraged to consider the ways knowledge and activist engagements help promote social justice in local and global communities.

Students are expected to take the bulk of their course work toward the minor from the core and elective courses offered by the Women, Gender, and Sexuality Studies Program.

A total of 27 credits is required for the minor, with at least 12 credits at the upper-division level.
All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus minor.

Total Hours 27

1. The remaining 7 credits may be taken from Women, Gender, and Sexuality Studies electives and from approved program courses offered in other departments. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies Program course. See the list of WGSS electives and WGSS Program electives for the WGSS major. In addition, WGSS 410 INTERNSHIP may be taken as an elective for the minor. No more than 3 credits of WGSS 402 INDEPENDENT STUDY and WGSS 410 INTERNSHIP may count toward the minor.

* Baccalaureate Core Course (BCC)

---

**Women, Gender, and Sexuality Studies Undergraduate Major (BA, BS, HBA, HBS)**

Also available via Ecampus.

The Women, Gender, and Sexuality Studies major represents multidisciplinary approaches to the study of gender and sexuality, particularly as they intersect with race, ethnicity, class, culture, nation, and ability. The curriculum incorporates feminist social justice theory and research to better understand differences in power and privilege and to contribute to practices that help transform our world. Many classes incorporate a social activism component, and students are encouraged to consider the ways knowledge and activist engagements help promote social justice in local and global communities.

A total of 48 credits is required for the major. 27 credits of required Women, Gender, and Sexuality Studies core courses, and 21 credits of elective courses. Electives may include courses taught in Women, Gender, and Sexuality Studies as well as courses that are taught in other academic units that are approved as Women, Gender, and Sexuality Studies Program courses. These courses have a focus on gender, sexuality, and/or women's issues, and have been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies course. No more than 9 credits of these Women, Gender, and Sexuality Studies Program courses may be used toward the major.

All required course work must be taken on campus and no more than 6 credits of online elective course work can be used toward the on-campus major.

**Total credits required for graduation is 180.**

**Total Hours: 180**

1. College of Liberal Arts BA/BS Requirements:
   - The BA requires second year language proficiency at the college level with C grade or better
   - The BS requires 15 credits in science, computer science, and quantitative studies.

2. With the exception of WIC, courses used to satisfy requirements for the major may not be used to meet baccalaureate or liberal arts core requirements.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Major Code:** 808
School of Psychological Science

The psychology curriculum explores scientific approaches to a wide range of psychological phenomena. Courses meet the needs of students desiring a knowledge of psychology as part of their general education or professional background, planning to secure entry-level jobs in human services occupations, or preparing for graduate study in psychology or related fields. The school offers a major program leading to a BA or BS degree in Psychology, a minor program for undergraduate students with majors in other disciplines, and a PhD program.

Graduates with bachelor degrees in psychology often find entry-level career positions in human services, law enforcement, business, education, management, sales, and also may go on to graduate study in such fields as psychology, counseling, social work, public and business administration, and law.

Undergraduate Programs

Major
• Psychology (p. 844)

Minor
• Contemplative Studies (p. 842)
• Psychology (p. 844)

Graduate Programs

Major
• Psychology (p. 843)

Minor
• Psychology (p. 844)

Kathryn Becker Blease, Director
2950 SW Jefferson Way, Reed Lodge
Oregon State University
Corvallis, OR 97331-5303
541-737-2311
Website: http://liberalarts.oregonstate.edu/school-psychological-science/psychology

Assistant to the Director: Shirley Mann
Academic Advisors: Ashleigh Anderson (Head Advisor), Nathan Walters
Academic Programs Coordinator: Nicole Wolf

Faculty

Professors: Bernieri, Edwards, Lien, McCarley
Associate Professors: Becker Blease, Bogart, Kerr, Sanchez, Sherman
Assistant Professors: Cservenka, Dermody, Macuga
Senior Instructors: Hu
Instructors: Almuaybid, Brown, Connor-Smith, Dilts, Hu, Kleronomos, Lewis, McCullough, OLaughlin, O’Hanlon, Yax

Psychology

PSY 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 201. *GENERAL PSYCHOLOGY. (3 Credits)
Scientific study of behavior and experience. Biological bases of behavior; sensation and perception; conditioning, learning and memory; thinking, problem solving, language, and consciousness; cognitive, personal and social development. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

PSY 202. *GENERAL PSYCHOLOGY. (3 Credits)
Motivation and emotion; personality; measurement of human differences; adjustment, psychopathology and psychotherapy; attitudes and social behavior. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

PSY 301. RESEARCH METHODS IN PSYCHOLOGY. (4 Credits)
Study of scientific methodology in psychology, including experimental and observational techniques. Topics include problem identification and hypothesis formation, research design, application of statistics, collection and interpretation of data, computer usage, and research report writing. Lec/lab.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-] and (ST 351 [D-] or ST 351H [D-])

PSY 330. BRAIN AND BEHAVIOR. (4 Credits)
Introduction to the relationships of the structure and functioning of the human brain to behavior. Information from neuroanatomy, neurochemistry, neurosurgery and neurology is combined with psychological research on both normal and abnormal human behavior. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 340. COGNITION. (4 Credits)
Theories, research and applications concerning cognition. Topics include perception, attention, memory, learning, thinking and language. (SS)
Attributes: LACS – Liberal Arts Social Core

PSY 350. HUMAN LIFESPAN DEVELOPMENT. (4 Credits)
An introduction to physical, social, cognitive and linguistic development with an emphasis on theory and methodology. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 360. SOCIAL PSYCHOLOGY. (4 Credits)
The study of behavior and experience in a social context. Topics include person perception, attribution, attraction and love, attitudes and attitude change, aggression, social influence and group dynamics. Applications of social psychological principles to other fields, e.g., law, health care, etc. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]
Equivalent to: PSY 360H

PSY 360H. SOCIAL PSYCHOLOGY. (4 Credits)
The study of behavior and experience in a social context. Topics include person perception, attribution, attraction and love, attitudes and attitude change, aggression and social influence and group dynamics. Applications of social psychological principles to other fields, e.g., law, health care, etc. (SS)
Attributes: HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]
Equivalent to: PSY 360
PSY 370. PERSONALITY. (4 Credits)
An overview of major theories of personality is followed by an introduction to personality testing and research. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 381. ABNORMAL PSYCHOLOGY. (4 Credits)
Survey of various forms of psychological disorders; theories regarding etiology and treatment. Special emphasis on research approaches to such disorders.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 399. SPECIAL TOPICS. (1-6 Credits)
Equivalent to: PSY 399H
This course is repeatable for 6 credits.

PSY 399H. SPECIAL TOPICS. (1-6 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PSY 399
This course is repeatable for 6 credits.

PSY 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 402. INDEPENDENT STUDY. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 408. WORKSHOP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 410. FIELD EXPERIENCE IN HUMAN SERVICES. (1-16 Credits)
Practicum/internship placement in community human service agencies. Includes regular on-site supervision, relevant readings, projects, and faculty site visits. Graded P/N.
This course is repeatable for 16 credits.

PSY 426. PSYCHOLOGY OF GENDER. (4 Credits)
Survey of theories, life cycles and contemporary problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisites: PSY 202 with D- or better

PSY 432. PHYSIOLOGICAL PSYCHOLOGY. (4 Credits)
Basic vertebrate neurophysiology and neuroanatomy in relation to behavior. Neural and hormonal correlates of sensation, learning, memory and motivation.
Prerequisites: PSY 330 with D- or better

PSY 433. PSYCHOPHARMACOLOGY. (4 Credits)
Drug-brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans.

PSY 434. BRAIN AND BEHAVIOR METHODS. (4 Credits)
Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and PSY 330 [D-]

PSY 437. MOTIVATION. (4 Credits)
Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation.
Prerequisites: (PSY 330 with D- or better or PSY 340 with D- or better) and PSY 301 [D-]

PSY 440. COGNITION RESEARCH. (4 Credits)
Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking. Students will design their own research projects, collect and analyze data, and write a professional report. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 442. PERCEPTION. (4 Credits)
Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision. Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and physiological concepts necessary to interpret research in this field.
Prerequisites: PSY 301 with D- or better and (PSY 330 [D-] or PSY 340 [D-])

PSY 444. LEARNING AND MEMORY. (4 Credits)
Experimental and theoretical work on learning, conditioning, and memory in animals and humans.
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 448. CONSCIOUSNESS. (4 Credits)
Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness.
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 454. COGNITIVE DEVELOPMENT. (4 Credits)
Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed.
Prerequisites: PSY 350 with D- or better

PSY 456. SOCIAL DEVELOPMENT. (4 Credits)
Covers theories and research concerning human social development. Topics include theories of socialization; the development of social relationships; the self-concept; emotion; sex roles; social cognition; prosocial behavior; morality; self-control; and aggression.
Prerequisites: PSY 350 with D- or better

PSY 458. LANGUAGE ACQUISITION. (4 Credits)
Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well as personal uses of language, such as language in thought and reading.
Prerequisites: PSY 350 with D- or better
**PSY 460. *ADVANCED SOCIAL RESEARCH METHODS. (4 Credits)*
Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisites:** PSY 301 with D- or better and PSY 360 [D-]

**PSY 463. JUDGMENT AND DECISION MAKING. (4 Credits)**
Explores ways to improve judgment and decision making through the application of research from cognitive psychology. Emphasis on development of critical thinking skills.

**Prerequisites:** PSY 340 with D- or better

**PSY 464. SOCIAL COGNITION. (4 Credits)**
Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing.

**Prerequisites:** PSY 360 with D- or better

**PSY 465. WOMEN, WEIGHT, AND BODY IMAGE. (4 Credits)**
Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism. CROSSLISTED as WGSS 465.

**Prerequisites:** PSY 360 with D- or better

**PSY 466. *FAT STUDIES. (4 Credits)*
Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566. (Bacc Core Course)

**Attributes:** CPDP – Core, Perspective, Difference/Power/Discrimination

**Prerequisites:** WGSS 223 with D- or better or WGSS 223H with D- or better or WGSS 224 with D- or better or WGSS 240 with D- or better or WGSS 262 with D- or better or WGSS 262H with D- or better or WGSS 270 with D- or better or WGSS 280 with D- or better or WGSS 280H with D- or better or WGSS 321 with D- or better or WGSS 325 with D- or better or WGSS 325H with D- or better or WGSS 340 with D- or better or WGSS 340H with D- or better or WGSS 350 with D- or better or WGSS 360 with D- or better or WGSS 360H with D- or better or WGSS 364 with D- or better or WGSS 364H with D- or better or WGSS 373 with D- or better or WGSS 375 with D- or better or WGSS 380 with D- or better or WGSS 380H with D- or better

**Equivalent to:** WGSS 466

**PSY 467. POLITICAL PSYCHOLOGY. (4 Credits)**
Survey of classic and contemporary perspectives in political psychology. Special focus on how citizens form political judgments. Topics include personality, affect, cognition, group influence, voting, nationalism, and political tolerance.

**Prerequisites:** PSY 360 with D- or better

**PSY 468. THE PSYCHOLOGY OF CLOSE RELATIONSHIPS. (4 Credits)**
Explores the research and theory on the development, maintenance, and dissolution of human relationships. The course will examine various directions to the study of interpersonal relationships, including attachment, evolutionary-biological, cognition, and interdependence. Topics will also include physical attraction, love, friendship, communication, trust, jealousy, and several issues that are specific to troubled dyadic relations.

**Prerequisites:** PSY 360 with D- or better

**PSY 470. *PSYCHOMETRICS AND PSYCHOLOGICAL TESTING. (4 Credits)*
An introduction to psychological measurement is provided with emphasis on the notions of reliability and validity; advanced correlation techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisites:** PSY 301 with D- or better and (PSY 340 [D-] or PSY 370 [D-] or PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-])

**PSY 480. *CLINICAL RESEARCH METHODS. (4 Credits)*
Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisites:** PSY 301 with D- or better and (PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-])

**PSY 482. PSYCHOTHERAPY. (4 Credits)**
Survey of the theory, techniques and research on the major contemporary systems of psychotherapy.

**Prerequisites:** PSY 370 with D- or better or PSY 380 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better

**PSY 483. DEVELOPMENTAL PSYCHOPATHOLOGY. (4 Credits)**
Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions.

**Prerequisites:** PSY 350 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better

**PSY 485. BEHAVIOR MODIFICATION. (4 Credits)**
Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include behavior problems, handicaps, eating disorders, time management, self-control stress management, contingency contracts, and cognitive therapies.

**Prerequisites:** PSY 350 with D- or better or PSY 380 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better

**PSY 486. YOGA AND MENTAL HEALTH. (4 Credits)**
Examines the use of yoga in psychological practice with a particular focus on managing mental and physical illnesses.

**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-]

**PSY 492. CONSERVATION PSYCHOLOGY. (4 Credits)**
Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human well-being. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature.

**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-]
PSY 493. POSITIVE PSYCHOLOGY. (4 Credits)
Psychological theory, research, and interventions directed at how humans can flourish and identify and enhance positive strengths. Topics include positive emotional and cognitive states and processes, prosocial behavior, positive school and work environments, and discovering meaning in life.
Prerequisites: PSY 360 with D- or better or PSY 370 with D- or better

PSY 494. ENGINEERING PSYCHOLOGY. (4 Credits)
Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs.
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 495. PSYCHOLOGY OF MEDITATION. (4 Credits)
Explores the psychological processes of meditation, and requires regular meditation sessions by students. Readings ranging from traditional Eastern philosophy to empirical psychological research journal articles will focus on outcomes and effective methods of meditation practice.
Prerequisites: PSY 201 with D- or better or PSY 202 with D- or better

PSY 496. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY. (4 Credits)
Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation.
Prerequisites: PSY 360 with D- or better or PSY 370 with D- or better

PSY 497. EVOLUTIONARY PSYCHOLOGY. (4 Credits)
Evolutionary approach to the study of psychology. Focus on psychological mechanisms as evolved traits.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 498. HEALTH PSYCHOLOGY. (4 Credits)
Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness.
Prerequisites: PSY 330 with D- or better or PSY 340 with D- or better or PSY 350 with D- or better or PSY 360 with D- or better or PSY 370 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better

PSY 499. SPECIAL TOPICS. (1-16 Credits)
Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus.
Equivalent to: PSY 499H
This course is repeatable for 30 credits.

PSY 499H. SPECIAL TOPICS. (1-16 Credits)
Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus.
Attributes: HNRS – Honors Course Designator
Equivalent to: PSY 499

PSY 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 502. INDEPENDENT STUDY. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PSY 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 506. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 510. FIELD EXPERIENCE IN HUMAN SERVICES. (3-15 Credits)
Practicum/internship placement in community human service agencies. Includes regular on-site supervision, relevant readings, projects, and faculty site visits. Graded P/N.
This course is repeatable for 16 credits.

PSY 514. RESEARCH METHODS I. (4 Credits)
An introduction to the tools and methods that psychologists use to examine the processes that underlie human behavior. Emphasis is on the skills necessary for completing a research study: hypothesis formulation, design criteria, data collection, analysis, interpretation, write-up, and presentation of results. Utilizes a combination of readings, discussions, and class exercises. Course culminates in an independent research project proposal.
Prerequisites: ST 511 with B- or better

PSY 521. ISSUES IN PROFESSIONAL PSYCHOLOGY. (1 Credit)
Professional development seminar focused on professional issues specific to the field of research-based psychology. Includes writing for publication, professional speaking, professional development and leadership, and current professional and research controversies. Each iteration of the course over the academic year will have a different focus. Graded P/N.
This course is repeatable for 3 credits.

PSY 523. ETHICS IN PSYCHOLOGICAL RESEARCH. (1 Credit)
Covers research ethics in psychology. Topics include the history of research-oriented ethical guidelines, ethical principles, working with an IRB, questionable research practices, and fraud. Meets OSU’s Learning Outcome regarding the ethical conduct of research.

PSY 526. PSYCHOLOGY OF GENDER. (4 Credits)
Survey of theories, life cycles and contemporary problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health.

PSY 531. GRADUATE BEHAVIORAL NEUROSCIENCE. (4 Credits)
Neurobiological underpinnings of behavior examining animal and human research on neural structure and function in relation to typical and atypical behavior, including psychiatric disorders.

PSY 533. PSYCHOPHARMACOLOGY. (4 Credits)
Drug-brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans.

PSY 534. BRAIN AND BEHAVIOR METHODS. (4 Credits)
Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article.
PSY 537. MOTIVATION. (4 Credits)
Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation.

PSY 540. COGNITION RESEARCH. (4 Credits)
Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking. Students will design their own research projects, collect and analyze data, and write a professional report.

PSY 541. GRADUATE SEMINAR IN COGNITION. (4 Credits)
Cognitive psychology studies the processes by which human beings notice, encode, remember, and use information. A graduate-level survey that covers the history, methods, important findings, and major theories of the field, with an emphasis on reading and critically analyzing articles from the primary research literature. Topics of interest will include perception and object recognition, attention, working memory, long-term memory, concepts and categorization, and judgment and decision making.

PSY 542. PERCEPTION. (4 Credits)
Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision. Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and physiological concepts necessary to interpret research in this field.

PSY 544. LEARNING AND MEMORY. (4 Credits)
Experimental and theoretical work on learning, conditioning, and memory in animals and humans.

PSY 548. CONSCIOUSNESS. (4 Credits)
Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness.

PSY 551. LIFESPAN DEVELOPMENTAL SCIENCE. (4 Credits)
The study of human change and stability over time. Topics may include, but are not limited to, theories, methodological approaches, and contexts for development, social development, cognitive development, and biopsychosocial processes including temperament and personality, resilience, health, thriving, emotion regulation, and developmental contexts.

PSY 554. COGNITIVE DEVELOPMENT. (4 Credits)
Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed.

PSY 556. SOCIAL DEVELOPMENT. (4 Credits)
Covers theories and research concerning human social development. Topics include theories of socialization, the development of social relationships; the self-concept; emotion; sex roles; social cognition; pro-social behavior; morality; self-control; and aggression.

PSY 558. LANGUAGE ACQUISITION. (4 Credits)
Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well as personal uses of language, such as language in thought and reading.

PSY 560. ADVANCED SOCIAL RESEARCH METHODS. (4 Credits)
Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized.

PSY 561. GRADUATE SOCIAL PSYCHOLOGY. (4 Credits)
A graduate level survey course of the theories, methods, and empirical findings that constitute the field of social psychology. Topics will include, but not be limited to, person perception, social cognition, attitudes, attitude change, persuasion, interpersonal attraction, relationships, small-group processes, altruism, and aggression.

PSY 564. SOCIAL COGNITION. (4 Credits)
Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing.

PSY 565. WOMEN, WEIGHT, AND BODY IMAGE. (4 Credits)
Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism.

PSY 566. FAT STUDIES. (4 Credits)
Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566.

Equivalent to: WGSS 566

PSY 570. PSYCHOMETRICS AND PSYCHOLOGICAL TESTING. (4 Credits)
An introduction to psychological measurement is provided, with emphasis on the notions of reliability and validity; advanced correlational techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement.

PSY 571. GRADUATE PSYCHOMETRICS. (4 Credits)
A graduate level introduction to psychological testing theory and practice, and to ethical, sociopolitical, psychological, and psychometric issues in the use of psychological tests. Particularly emphasizes basic psychometric principles that are important in scale construction, test evaluation, and practical assessment.

Prerequisites: ST 511 with B- or better and ST 512 [B-]

PSY 580. CLINICAL RESEARCH METHODS. (4 Credits)
Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary.

PSY 581. GRADUATE SEMINAR IN CLINICAL RESEARCH AND THEORY. (4 Credits)
Focuses on major concepts, theory, and empirical findings on the causes and treatment of psychological disorders. The seminar emphasizes culture, context, bias, and stigma, as well as application of principles of clinical science to students' graduate program research agendas.

PSY 582. PSYCHOTHERAPY. (4 Credits)
Survey of the theory, techniques and research on the major contemporary systems of psychotherapy.

PSY 583. DEVELOPMENTAL PSYCHOPATHOLOGY. (4 Credits)
Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions.
Contemplative Studies Minor

This minor combines courses from several areas to foster an objective understanding of contemplative practices and philosophies by studying them in the context of psychology, philosophy, religion, history, health, and other academic areas. In addition to coursework, Contemplative Studies will be a useful minor to add to many wellness programs, counseling, and many areas of healthcare. Because of this, Contemplative Studies will be a useful minor to add to many disciplines, including Psychology, HDFSciences, BioHealth Sciences, Education, Digital Communication Arts, and others. Business schools at Harvard, Stanford, University of Virginia, and, increasingly, others, value, teach, research, and promote adding studies in contemplation as an important, complementary education and skill set for leadership, productiveness, effectiveness, and well-being of their graduates in preparing them for a career in business and related fields.

Upon completion of a Minor in Contemplative Studies at Oregon State University, you will be able to:

1. Demonstrate effective application of multiple forms of contemplative practice
2. Articulate the research-based benefits of contemplative practice
3. Articulate the connections between contemporary contemplative practices and their historical contexts
A minor in Contemplative Studies can be earned by satisfactorily completing 27 credits from the following list of courses, which must include 12 upper division credits (300 and 400 level courses).

Check with your own college’s policies to see if the same course can count to meet different degree requirements.

**Psychology Graduate Major (MS, PhD, MAIS)**

**Graduate Areas of Concentration**

Applied cognition, engineering psychology, health psychology

The MS and PhD program is a doctoral program with a master’s degree component that is obtained en route to the PhD. The MS portion of the program assures that students have experience designing and conducting research prior to the dissertation stage. The program has a strong research component, ensuring that graduates have the tools to tackle a variety of applied problems. This entails both classwork in research methods and statistics and a continuing emphasis on student research.

The program’s general focus is on the application of psychological research methods, theories, and principles to solving practical problems. The program has three areas of concentration: applied cognition, engineering psychology, and health psychology.

**Applied cognition** is the application of research on thinking, learning, decision-making, perception, social judgment, and other cognitive processes to applied issues. Examples of relevant application areas include the psychology of teaching and learning, the effects of contemplative practice, and risk perception.

**Engineering psychology** refers to research at the intersection of psychology and technology. Relevant topics include such things as the improvement of technology, human-machine interfaces, transportation, information systems, and work and living environments (as in the Mission of Division 21 of the American Psychological Association).

**Health psychology** concerns the relations between psychological factors (e.g., cognition, motivation, individual and interpersonal behavior, emotion) and human wellness broadly defined (as in the mission of the APA Division 38).

Graduates of the Psychology MS, PhD program will be qualified to define, assess, analyze and evaluate problems in both the private and public sector that are behavior based. Graduates will be trained to apply the scientific method and use evidence-based information to design educational programs, work environments, management teams, information delivery systems, technology-based tools. Additionally, all graduates will be equipped to train the next generation of teachers, researchers, and practitioners in the concentration areas.

**Admission Requirements**

Bachelor’s or Master’s degree from an accredited institution; minimum undergraduate GPA of 3.2/4.0 or graduate GPA of 3.5/4.0; GREs; TOEFL score of at least 600 (paper exam) 250 (computer exam), or 100 (internet exam); three letter of recommendation; personal statement.

The Psychology PhD program requires a minimum of 111 credits, including at least 36 credits of dissertation. The program is organized into core requirements for all students, along with additional work in a concentration area composed of electives, the nature of which is defined primarily by the student’s research focus.

The core requirements are in research methods, professional issues, and basic content in psychology. The required core curriculum provides a critical foundation in quantitative and research methods, core theory in psychological science, ethics, and professional issues.

No more than 15 credits of blanket-numbered classes, excluding dissertation, thesis, or internship credit, may be used towards the 111 credit minimum.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Courses (WIC)

**School of Public Policy**

Policy is about the way we make decisions in both private and public contexts. Faculty and students in the School of Public Policy are interested in a wide variety of decision contexts and are particularly interested in advancing the social and policy-related dimensions of OSU's three areas of distinction: sustainable ecosystems, health and wellness, and economic growth and progress. The School of Public Policy offers undergraduate majors and minors in economics, political science, and sociology, as well as the Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in political science and sociology. School faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

**Undergraduate Programs**

The School of Public Policy offers undergraduate major and minor programs in economics, political science, and sociology.

**Economics Program**

The economics program is an excellent choice for students interested in:
Graduate Programs

The School of Public Policy offers a Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in Political Science and Sociology, and courses applicable toward the graduate degree in Applied Economics. Faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

Master of Public Policy (MPP)

Graduates of the MPP program:

- Are employed at all levels of government as policy analysts, project managers, and managers.
- Work in national and international nongovernmental organizations like the United Nations.
- Pursue further graduate training in law, public administration, public affairs, public policy, and other social science disciplines.

Policy students at OSU focus their studies around environmental and natural resource policy, international policy, social policy, and rural policy, working with strong researchers around campus. Internships with agencies and organizations give policy students real world experience and networks to enhance their classroom education.

PhD in Public Policy

The PhD in Public Policy prepares students for academic or nonacademic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. Like the MPP, the PhD program offers concentrations in energy policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy.

Master of Arts in Interdisciplinary Studies (MAIS)

The MAIS program is designed to meet the particular needs and interests of individual students and features collaborative work in any two or three pertinent departments or schools. Sociology faculty members may serve as advisors to students selecting sociology as either a major field or minor field of concentration.

Graduate Minors

Political Science

Master’s or PhD students interested in adding a Political Science minor should follow the guidelines within their major program in declaring a minor. All students declaring political science as a graduate minor must contact the program coordinator prior to doing so. See the Political Science website http://gradschool.oregonstate.edu/programs/9600 for a listing of requirements for the minor concentration.

Sociology

Master’s or PhD students interested in adding a Sociology minor should follow the guidelines within their major program in declaring a minor. The minimum number of credits for sociology is 15 or higher if required by the major. All students declaring sociology as a graduate minor must contact the program coordinator prior to doing so. See the Sociology website http://liberalarts.oregonstate.edu/spp/sociology/programs/graduate-programs/graduate-minor for a listing of requirements for the minor concentration.
Undergraduate Programs

Majors
- Economics (p. 865)
  - Law, Economics and Policy
  - Managerial Economics
  - Mathematical Economics
- Political Science (p. 871)
  - Environmental and Energy Politics
  - International Affairs
  - Law and Politics
- Social Science (p. 672)
- Sociology (p. 878)
  - Crime and Justice
  - Environmental and Natural Resource Sociology

Options
- Law, Economics and Policy
- Managerial Economics
- Mathematical Economics
- Political Science (p. 871)
- Environmental and Energy Politics
- International Affairs
- Law and Politics

Minors
- Asian Studies (p. 865)
- Economics (p. 865)
- Political Science (p. 869)
- Sociology (p. 877)

Graduate Programs

Major
- Public Policy (p. 877)

Options
- Political Science (p. 868)
- Sociology (p. 877)

Master of Arts in Interdisciplinary Studies
(See http://liberalarts.oregonstate.edu/spp/sociology/programs/master-arts-interdisciplinary-studies-mais)

Faculty

Professors
- Conway, M.
- Edwards, Emerson
- Gallagher, Lach
- Meng, Plaza
- Ray, Steel, C.
- Tremblay, V.
- Tremblay, Warner, Weber

Associate Professors
- Akins, Cramer, Hammer, Henderson, Inderbitzen, Li
- Loges, Ortiz, Pugatch, Schroeder, Solberg, Valls

Assistant Professors
- Bernell, Boudet, Burkhardt, Hurst, Johnston, Jones, Kretschmer, Spalding, Stout, Thompson, Vue

Instructors
- Andersen, Chesbro, Clark, Jerman, M.
- Nelson, C.
- Soltau

Professor Emeriti
- Clinton, Cordray, Färe, Foster, Grosskopf, Lunch, Sahr

Economics Advisor:
- 541-737-2369

ECON 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 201. *INTRODUCTION TO MICROECONOMICS. (4 Credits)
An introduction to microeconomic principles including the study of price theory, economic scarcity, consumer behavior, production costs, the theory of the firm, market structure, and income distribution. Other selected topics may include market failure, international economics, and public finance. (SS) (Bacc Core Course)

Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
ECON 202. *INTRODUCTION TO MACROECONOMICS. (4 Credits)
An introduction to macroeconomic principles including study of the
theories of output determination, consumption, investment, inflation,
unemployment, and fiscal and monetary policy. Other selected topics may
include the study of the international balance of payments, growth and
development, and urban and regional problems. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

ECON 311. INTERMEDIATE MICROECONOMIC THEORY. (4 Credits)
An examination of demand theory, production and cost theory, game
theory, behavioral economics, competitive and imperfectly competitive
markets, and general equilibrium and welfare economics. ECON 311 and
ECON 411 cannot both be taken for credit toward the economics major.
Prerequisites: ECON 201 with D- or better or ECON 201H with D- or better

ECON 315. INTERMEDIATE MACROECONOMIC THEORY. (4 Credits)
An examination of macroeconomic aggregates, income determination,
aggregate demand and supply. The basic macroeconomic models will be
discussed such as Keynesian, Classical, Monetarist, and Neo-Classical.
ECON 315 and ECON 415 cannot both be taken for credit toward the Economics major.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])

ECON 329. INTRODUCTION TO MATHEMATICAL ECONOMICS. (4 Credits)
Mathematical methods of economic analysis. Theory of economic
structure and optimization developed through calculus and linear algebra,
dynamic systems analyzed through integral calculus and difference and
differential equations. The mathematical tools are developed
in conjunction with their application to economic problems. Some
acquaintance with calculus recommended.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])

ECON 330. MONEY AND BANKING. (4 Credits)
Nature and functions of money; functions and operations of depository
institutions; the money market; central banking and monetary policy. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])

ECON 340. INTERNATIONAL ECONOMICS. (4 Credits)
An overview of international economics with an emphasis on current
events and applications, including classical and modern trade theory
and the study of trade and exchange-rate policies. (SS) (See Schedule
Comment regarding Bacc Core status.)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])

ECON 350. FINANCIAL ECONOMICS. (4 Credits)
Discusses how various securities meet the needs of different economic
agents and the efficiency of financial markets in meeting those needs.
Topics include interest rates, valuation, investment risk, trading and
market structure, arbitrage, market efficiency, debt markets, equity
markets, and financial derivatives.
Prerequisites: ECON 201 with D- or better and ECON 202 [D-]

ECON 352. *ENVIRONMENTAL ECONOMICS AND POLICY. (3 Credits)
Provides an overview of the interrelationships between economic activity,
the environment, and public policy. Through case studies, discussion
groups, readings, and group activities, students learn how economists
define and analyze environmental problems and the types of policies they
advocate for managing environmental quality. CROSSTLISTED as AEC 352.
(Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Prerequisites: AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better
Equivalent to: AEC 352

ECON 383. *THE ECONOMICS OF DISCRIMINATION. (4 Credits)
An economic analysis of discrimination, focusing on labor market
inequities for women and minorities. Historical and current trends in
pay, education, and employment disparities, economic explanations for
such disparities, and econometric evidence for wage and employment
discrimination. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination;
LACS – Liberal Arts Social Core
Prerequisites: ECON 201 with C- or better or ECON 201H with C- or better

ECON 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: ECON 399H
This course is repeatable for 16 credits.

ECON 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ECON 399
This course is repeatable for 16 credits.

ECON 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 404. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 411. ADVANCED MICROECONOMIC THEORY. (4 Credits)
Rigorous treatment of optimizing behavior of economic agents and
markets. Examines utility maximization and demand; cost minimization,
profit maximization and supply; perfect competition and monopoly;
imperfect competition and game theory; and general equilibrium, social
welfare and market failure using sophisticated mathematical tools.
Students cannot receive credit toward the major for both ECON 311 and
ECON 411.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-])

ECON 414. BEHAVIORAL ECONOMICS. (4 Credits)
Economic analysis of the effects of social, cognitive, and emotional factors on individual decision making and their implications for market outcomes and policy making. Topics include time inconsistency, decision making under risk, cognitive dissonance, heuristics, social preferences, and experimental economics.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 415. ADVANCED MACROECONOMIC THEORY. (4 Credits)
Macroeconomics as an application of general equilibrium theory. Macroeconomic models are developed taking preferences and technology as primitives. The models' short and long run predictions are analyzed and compared to the data. The welfare implications of fiscal and monetary policy are discussed. ECON 315 and ECON 415 cannot both be taken for credit toward the major.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D] or ECON 202H [D]) and (MTH 241 [D] or MTH 251 [D] or MTH 251H [D])

ECON 420. GAME THEORY. (4 Credits)
Systematically studies strategic interactions among multiple decision makers with applications in economics, politics, sociology, law, computer science, sports, and biology. Topics taught include static, sequential, and repeated games of perfect and imperfect information.
Attributes: LACS – Liberal Arts Social Core
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 423. PRE-ECONOMETRICS. (4 Credits)
Introduction to probability and statistics with an emphasis on estimation and hypothesis testing. Applications to economic models.
Prerequisites: MTH 241 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better

ECON 424. INTRODUCTION TO ECONOMETRICS. (4 Credits)
Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized. ECON 424 and ECON 427 cannot both be taken for credit toward the major. Lec/lab.
Prerequisites: (ECON 311 with C or better or ECON 411 with C or better) and (ST 351 [C] or ST 351H [C] or ECON 423 [C])

ECON 427. INTRODUCTION TO ECONOMETRICS WITH CALCULUS. (4 Credits)
Addresses both the theory and practice of econometrics, including properties of estimators, modeling economic processes, estimation, hypothesis testing, prediction and interpretation of results. Students cannot receive credit toward the major for both ECON 424 and ECON 427. Lec/lab.
Prerequisites: (ECON 311 with C or better or ECON 411 with C or better) and ECON 423 [C]

ECON 428. *INTRODUCTION TO ECONOMIC RESEARCH. (4 Credits)
Basic methods of economic research: concepts and models; data sources, collection, and presentation; hypothesis formulation and testing; policy analysis. Written assignments apply methods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECON 311 with C- or better or ECON 411 with C- or better

ECON 435. PUBLIC ECONOMICS. (4 Credits)
Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy.
Prerequisites: ECON 311 with C- or better or ECON 411 with C- or better

ECON 439. *PUBLIC POLICY ANALYSIS. (4 Credits)
Theory of public problems and decision making. Evaluation of public policy strategies, selected public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 440. ECONOMICS OF GLOBALIZATION. (4 Credits)
Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate—offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance.
Prerequisites: ECON 311 with D- or better

ECON 441. INTERNATIONAL FINANCE THEORY AND POLICY. (4 Credits)
Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions.
Prerequisites: ECON 315 with D- or better

ECON 455. ECONOMIC DEVELOPMENT. (4 Credits)
History, theories and policies for economic development in the Third World of underdeveloped countries. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: ECON 201 with D- or better and ECON 202 [D]

ECON 460. INDUSTRIAL ORGANIZATION THEORY AND POLICY. (4 Credits)
The study of the causes of market structure, the behavior of firms in game theoretic settings, and the welfare implications of competitive and imperfectly competitive markets; United States antitrust and other laws regulating business behavior.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 461. LAW, ECONOMICS, AND REGULATION. (4 Credits)
The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals.
Prerequisites: ECON 201 with D- or better or ECON 201H with D- or better

ECON 462. MANAGERIAL ECONOMICS. (4 Credits)
The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 463. EFFICIENCY AND PRODUCTIVITY ANALYSIS. (4 Credits)
Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software.
Prerequisites: ECON 311 with C or better or ECON 411 with C or better
ECON 466. *ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY. (4 Credits)
Reviews and analyzes the economics and structure of world markets for various traditional energy (e.g., oil, coal, natural gas), as well as renewable energy (wind, geothermal and solar) with the latter focusing on the Pacific Northwest electrical industry structure and regulatory framework. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECON 201 with D- or better or ECON 201H with D- or better

ECON 480. LABOR ECONOMICS AND SOCIAL POLICY. (4 Credits)
Interaction of workers and firms in labor markets, social policy and its effects on labor markets, human capital theory and education policy, discrimination and other sources of wage differentials, immigration, unemployment, inequality.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 491. ECONOMICS OF INEQUALITY. (4 Credits)
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ECON 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 512. MICROECONOMIC THEORY I. (4 Credits)
Economic theories of consumer behavior and demand, production, cost, the firm, supply, and competitive and monopoly market structures.

ECON 513. MICROECONOMIC THEORY II. (4 Credits)
Economic theories of imperfect competition, input markets, general equilibrium and welfare economics.

ECON 514. BEHAVIORAL ECONOMICS. (4 Credits)
Economic analysis of the effects of social, cognitive, and emotional factors on individual decision making and their implications for market outcomes and policy making. Topics include time inconsistency, decision making under risk, cognitive dissonance, heuristics, social preferences, and experimental economics.

ECON 515. MACROECONOMIC THEORY I. (4 Credits)
Determination of income, employment, and prices in classical, Keynesian, monetarist, and new classical macroeconomic models. Theories of consumption, investment, money demand, and money supply. Monetary and fiscal policies, the role of expectations.

ECON 517. MICROECONOMIC THEORY FOR MPP. (4 Credits)
Familiarizes MPP students who do not have a strong background in microeconomics with the material they will need for their future economics course work.

ECON 520. GAME THEORY. (4 Credits)
Systematically studies strategic interactions among multiple decision makers with applications in economics, politics, sociology, law, computer science, sports, and biology. Topics taught include static, sequential, and repeated games of perfect and imperfect information.

ECON 523. STATISTICS FOR ECONOMETRICS. (4 Credits)
Examines mathematical and statistical topics essential for graduate-level econometric analysis, including matrix algebra, probability and distribution theory (emphasizing joint and conditional distributions), statistical inference, and econometric optimization algorithms.

ECON 524. INTRODUCTION TO ECONOMETRICS. (4 Credits)
Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized.

ECON 525. ECONOMETRIC METHODS. (4 Credits)
The use of multiple regression under generalized assumptions, specification problems, an introduction to simultaneous equation estimation, the classical linear model using matrices. Emphasis on the analysis of data and communication of findings.
Prerequisites: ECON 523 with C or better

ECON 526. APPLIED ECONOMETRICS. (4 Credits)
Model building, hypothesis testing, and appropriate estimation procedures including generalized least squares, seemingly unrelated regressions, simultaneous equations, maximum likelihood, and limited dependent variables. Emphasis on applications and interpretation of results.

ECON 535. PUBLIC ECONOMICS. (4 Credits)
Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy.

ECON 539. PUBLIC POLICY ANALYSIS. (4 Credits)
Theory of public problems and decision making. Evaluation of public policy strategies, selected public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation.

ECON 540. ECONOMICS OF GLOBALIZATION. (4 Credits)
Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate—offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance.

ECON 541. INTERNATIONAL FINANCE THEORY AND POLICY. (4 Credits)
Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions.

ECON 555. ECONOMIC DEVELOPMENT. (4 Credits)
History, theories and policies for economic development in the Third World of underdeveloped countries.
ECON 560. INDUSTRIAL ORGANIZATION THEORY AND POLICY. (4 Credits)
The study of the causes of market structure, the behavior of firms in game theoretic settings, and the welfare implications of competitive and imperfectly competitive markets; United States antitrust and other laws regulating business behavior.

ECON 561. LAW, ECONOMICS, AND REGULATION. (4 Credits)
The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals.

ECON 562. MANAGERIAL ECONOMICS. (4 Credits)
The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions.

ECON 563. EFFICIENCY AND PRODUCTIVITY ANALYSIS. (4 Credits)
Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software.

ECON 566. ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY. (4 Credits)
Reviews and analyzes the economics and structure of world markets for various traditional energy (e.g., oil, coal, natural gas), as well as renewable energy (wind, geothermal and solar) with the latter focusing on the Pacific Northwest electrical industry structure and regulatory framework.

ECON 570. MACROECONOMIC THEORY I. (4 Credits)
Introduction to dynamic macroeconomic theory, including a review of Keynesian models, continuous and discrete time programming, Solow, Ramsey, and endogenous growth models, and real business cycle theory.

ECON 580. LABOR ECONOMICS AND SOCIAL POLICY. (4 Credits)
Interaction of workers and firms in labor markets, social policy and its effects on labor markets, human capital theory and education policy, discrimination and other sources of wage differentials; immigration, unemployment, inequality.

ECON 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ECON 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 610. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

Master of Public Policy

PPOL 413. ETHICS IN PUBLIC POLICY. (4 Credits)
Examines ethical dilemmas in public policy, and provides the opportunity to study the ethical theories of Hobbes, Kant, Mill, and Rawls.

PPOL 421. INTRODUCTION TO POLICY RESEARCH. (4 Credits)
Introduction to research design, research ethics, and quantitative and qualitative data collection and analysis. Activities include reading, review questions and exercises, discussion board participation, and data collection, analysis and reporting.

Prerequisites: ECON 201 with D- or better and PS 201 [D-] and SOC 204 [D-]

PPOL 441. ENERGY AND SOCIETY. (4 Credits)
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice.

Attributes: CSST – Core, Synthesis, Science/Technology/Society

PPOL 444. THE POLICY AND LAW OF U.S. COASTAL GOVERNANCE. (4 Credits)
Examines federal and state policy, legislative and judicial protections of public beach access; ownership and use of tide and submerged lands, including the public trust doctrine; wetland conservation; and the Federal Coastal Zone Management Act. This course is intended to equip future environmental and natural resource professionals with a foundation in US coastal management, especially areas where new professionals will be very involved (coastal development, offshore/alternative energy, and sea level rise/storm hazards). The format includes reading, discussion, and student presentations. Readings will be drawn from the textbook; additional readings will be posted on Canvas.

PPOL 447. INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE. (4 Credits)
Environmental decisions include trade-offs. Policy choices for sustainably providing Earth’s eight billion people with food, energy, and water are urgently needed. Policy sectors (such as food) risk outcomes that are not beneficial, and impose long-term costs and potential catastrophic climate burdens. This transdisciplinary course examines emerging integrated policies concerning provision of food, energy, and water and their relationship to climate.

PPOL 448. MARINE POLICY IN THE UNITED STATES. (4 Credits)
Introduces students to the history, rationale, achievements, and gaps in American ocean policy. Students will acquire foundational tools of policy analysis and problem solving, and will synthesize and apply their knowledge creatively in order to propose integrated policy solutions to specific contemporary marine issues.

PPOL 501. RESEARCH AND SCHOLARSHIP. (1-12 Credits)
Graded P/N.
This course is repeatable for 99 credits.

PPOL 505. READING AND CONFERENCE. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 507. SEMINAR. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 510. INTERNSHIP. (1-12 Credits)
Supervised work experience in government, public policy, public affairs or non-profit organizations. Reports and appraisals required. Graded P/N.
This course is repeatable for 12 credits.
PPOL 511. PUBLIC ORGANIZATIONS AND LEADERSHIP. (4 Credits)
Provides an historical overview of developments in, and theories associated with, the organization and control of public organizations. Students will critically examine various influential models of bureaucracy, while also learning about the strengths and weaknesses of emergent forms of bureaucratic organization, including networks, public-private partnerships, collaboration, and governance. The course also explores different theories of leadership, assisting students in the development of their own authentic leadership style, and thinking through the application of such theories and styles to the real world of public organization leadership, especially in the fragmented, decentralized, complex, and uncertain contemporary environment of networks, partnerships, and governance.

PPOL 512. PUBLIC POLICY THEORY. (4 Credits)
Theoretical approaches to the study of the policy process, policy elements, policy tools, (e.g., regulation), and policy typologies.

PPOL 521. UNDERSTANDING SOCIAL RESEARCH. (4 Credits)
Study of basic concepts and principles of qualitative and quantitative social research, including selection of general strategies and specific designs, conceptual and operational measurement, sample selection, data collection, data processing and analysis techniques, interpretation and reporting. Utilizes reports of social research in scholarly journals, popular media, and agency documents. Emphasis on critical evaluation and interpretation.

PPOL 522. CONDUCTING SOCIAL RESEARCH. (4 Credits)
Reviews concepts and principles covered in SOC 415 with emphasis on actual experiences in using techniques of social research and gaining greater depth of knowledge and skill. Assignments involve practicing techniques used in various phases of the research process, including both qualitative field observation and computerized processing and analysis of quantitative information. Individual or group research projects will be required.
Prerequisites: PPOL 521 with C or better

PPOL 523. QUALITATIVE RESEARCH METHODS. (4 Credits)
An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined.

PPOL 524. APPLIED RESEARCH METHODS. (4 Credits)
Application of sociological theory, concepts, and methods. Topics vary but may include program evaluation, social impact assessment, policy analysis, focus group research, survey research, among others.

PPOL 525. MANAGING AND GOVERNING PUBLIC AND NON-PROFIT ORGANIZATIONS. (4 Credits)
Provides students with an introduction to management in public and non-profit organizations. Public and non-profit managers face challenges that are not faced by their counterparts in the private sector. These challenges are often associated with a different legal structure, employee protections, and differences in ethos and motivation. Students will build on knowledge of public administration to examine contemporary issues of public management and public governance and the techniques and challenges of management in practice. Successful completion of the course will equip students to be critically reflective practitioners and scholars of the management of public and non-profit organizations.

PPOL 531. INFLUENCING PUBLIC POLICY: AN INTRODUCTION TO THE DARK ARTS. (4 Credits)
Explores the various tactical and strategic behaviors that individuals and groups use to influence public policy. Focusing on the ethical and pragmatic dimensions of policy consequential tactics and strategy, topics vary but may include policy communication, the use of science and evidence, human cognition and decision-making processes, lobbying, and vote and agenda manipulation.

PPOL 541. ENERGY AND SOCIETY. (4 Credits)
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice.

PPOL 544. COLLABORATIVE GOVERNANCE. (4 Credits)
Explores and develops the norms, rules, institutional design, decision-making dynamic, and politics of collaborative governance arrangements for complex natural resource problem settings. Designed to bring together traditional adversaries, government agencies, and citizens to resolve and improve management of collective public problems, collaborative governance for natural resources is now an important problem-solving tool that is employed in thousands of communities, watersheds, and landscapes around the world.

PPOL 545. INTERNATIONAL MARINE POLICY. (4 Credits)
Explores the institutional, political and legal factors that impact international marine policy with an emphasis on the United Nations Law of the Sea Convention. Additional topics include marine resource exploitation, climate change, and national security issues as they pertain to the world's oceans, coasts, and national policies.
This course is repeatable for 16 credits.

PPOL 546. THE POLICY AND LAW OF UNITED STATES COASTAL GOVERNANCE. (4 Credits)
Examines federal and state policy, legislative and judicial protections of public beach access; ownership and use of tide and submerged lands, including the public trust doctrine; wetland conservation; and the Federal Coastal Zone Management Act. This course is intended to equip future environmental and natural resource professionals with a foundation in US coastal management, especially areas where new professionals will be very involved (coastal development, offshore/alternative energy, and sea level rise/storm hazards). The format includes reading, discussion, and student presentations. Readings will be drawn from the textbook; additional readings will be posted on Canvas.

PPOL 547. INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE. (4 Credits)
Environmental decisions include trade-offs. Policy choices for sustainably providing Earth’s eight billion people with food, energy, and water are urgently needed. Policy sectors (such as food) risk outcomes that are not beneficial, and impose long-term costs and potential catastrophic climate burdens. This transdisciplinary course examines emerging integrated policies concerning provision of food, energy, and water and their relationship to climate.

PPOL 548. MARINE POLICY IN THE UNITED STATES. (4 Credits)
Introduces students to the history, rationale, achievements, and gaps in American ocean and coastal policy. Students will acquire foundational tools of policy problem solving, critique, and analysis, and will synthesize and apply their knowledge creatively to propose integrated policy solutions to specific contemporary marine issues.
PPOL 551. HIGHER EDUCATION POLICY. (4 Credits)
An introduction to policy issues in the area of higher education and exploration of possible tensions within the policy goals of quality, equity, access and outcomes. Students will gain knowledge of the key pieces of legislation and constitutional law governing higher education policy at both federal and state levels, as well as an overview of the relevant research in this area. Begins with a short historical introduction to the U.S. higher education system and concludes with a discussion of its competing demands and functions.

PPOL 552. INTERNATIONAL COMPARATIVE RURAL POLICY. (4 Credits)
Examines and compares the role of rural policy in different cultural, political and administrative contexts at the international, national, state, regional and local levels. The course also provides the opportunity to study the nature and implications of new forms of governance in rural contexts in North America and Europe.

PPOL 599. SPECIAL TOPICS. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 602. INDEPENDENT STUDY. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 603. THESIS. (1-12 Credits)
This course is repeatable for 999 credits.

PPOL 607. SEMINAR. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 609. PRACTICUM. (1-12 Credits)
This course is repeatable for 16 credits.

PPOL 613. ADVANCED POLICY THEORY I. (4 Credits)
First of two-class series introducing a comprehensive review of public policy theory focused on examining theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy.

PPOL 614. ADVANCED POLICY THEORY II. (4 Credits)
Second course in a two-course series providing a comprehensive review of public policy theory. The course examines theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy.

PPOL 621. ADVANCED QUANTITATIVE METHODS. (4 Credits)
Methods used in research in the social sciences, focused on causal inference in public policy contexts. Covers methods used at the frontier of research to estimate the causal effect of policies on outcomes, including instrumental variables, regression discontinuity, and difference-in-differences estimation.

PPOL 622. ADVANCED POLICY ANALYSIS. (4 Credits)
Introduction to advanced quantitative modeling used in policy analysis, with an emphasis on the application of modeling techniques to research papers. Focus is predominantly on counts and zero-truncated modeling, time series, and panel regression.

Prerequisites: ECON 524 with B+ or better and PPOL 522 [B+] or PPOL 621 [C+] or (AEC 523 [C+] and AEC 525 [C+])

PPOL 628. ADVANCED QUALITATIVE METHODS. (4 Credits)
Focus on epistemological approaches, research design, data analysis techniques and critiques of qualitative research, with emphasis on participant observation and interviewing. Culminates in the written and oral presentation of a qualitative research proposal, including preliminary results from fieldwork conducted during the course.

Prerequisites: ANTH 591 with C or better or HDFS 538 with C or better or SOC 518 with C or better

PPOL 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Political Science

PS 110. *GOVERNING AFTER THE ZOMBIE APOCALYPSE. (3 Credits)
Constitution-writing in a post-apocalyptic world. Students write a constitution that addresses issues of difference, power, and discrimination. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

PS 201. *INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS. (4 Credits)
Description and analysis of American politics and government, including such topics as interest groups, parties, elections, media, the presidency, Congress, the Constitution, and the courts. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

PS 204. *INTRODUCTION TO COMPARATIVE POLITICS. (4 Credits)
Major concepts of comparative politics applied to various political settings; the United States, Western Europe, Communist regimes, and developing countries. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

PS 205. *INTRODUCTION TO INTERNATIONAL RELATIONS. (4 Credits)
Analysis of the international system and factors affecting world politics. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

PS 206. *INTRODUCTION TO POLITICAL THOUGHT. (4 Credits)
Introduction to political philosophy. Major ideas and issues of selected political thinkers. (H) (Bacc Core Course)
Attributes: CPWI – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

PS 221. INTRODUCTION TO LAW. (4 Credits)
Overview of American law and the U.S. legal system. Topics include legal concepts from selected substantive areas of law, structures and processes of law, and development of basic legal analytical skills.

PS 299. SPECIAL STUDIES. (1-4 Credits)
PREREQ: Departmental approval required. This course is repeatable for 4 credits.

PS 300. *RESEARCH METHODS. (4 Credits)
Qualitative and quantitative approaches to the study of political phenomena. The role of values, theory, hypothesis, data collection, and analysis in evaluating and conducting political science research. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

PS 311. CONGRESSIONAL POLITICS. (4 Credits)
Congressional politics, both on Capitol Hill and in the district, including campaigns, constituent relations, lobbying, legislating, and the legislature in democratic theory.

PS 312. PRESIDENTIAL POLITICS. (4 Credits)
Office, powers, and politics of the American presidency, with reference to other executive offices in American government; emphasis on the importance and effect of the presidency in American politics.

PS 313. CAMPAIGNS AND ELECTIONS. (4 Credits)
Political parties and elections, the conduct of electoral campaigns, the electorate and voting behavior, electoral system, exercise of the suffrage, extent and consequences of voter participation.
PS 314. INTEREST GROUP POLITICS. (4 Credits)
Interest group formation, resources, strategies, and internal struggles, as well as group influence on elections and politics, in government and policy making, and in relation to democratic theory.

PS 315. *THE POLITICS OF MEDIA. (4 Credits)
Examination of the methods of operation, content and effects of the media in relation to politics and government. Includes analysis of newspaper, radio and television, political advertising, and other forms of political communication. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

PS 317. GENDER AND POLITICS. (4 Credits)
Analyzes the role that gender plays in shaping politics and other aspects of society. The course will cover theories of gender difference, gender-based movements, gender and political office, and gender and public policy. (SS)
Attributes: LACS – Liberal Arts Social Core

PS 321. CONSTITUTIONAL LAW: GOVERNMENT POWERS AND CONSTRAINTS. (4 Credits)
The role of the U.S. Supreme Court in shaping the powers and limitations of the U.S. government. The powers of the three main branches of our government, and cases where the powers of these branches clash with one another or with the powers of the states or rights of the individual.

PS 322. *CONSTITUTIONAL LAW: CIVIL RIGHTS AND LIBERTIES. (4 Credits)
Doctrines pertaining to the First, Second and Fourteenth Amendments, such as freedom of speech, of expression, of the press and of the exercise, the right to bear arms and the prohibition against governmental establishment of religion. Issues of discrimination and the reach of the 14th amendment’s equal protection clause, and the right to privacy. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

PS 323. CONSTITUTIONAL LAW: RIGHTS OF THE ACCUSED. (4 Credits)
The role of the U.S. Supreme Court in shaping the powers and limitations of the U.S. government. The powers of the three main branches of our government, and cases where the powers of these branches clash with one another or with the powers of the states or rights of the individual.

PS 325. *GENDER AND THE LAW. (4 Credits)
Legal status of American women, with emphasis on constitutional law, the 1964 Civil Rights Act and its amendments, and various state laws as they relate to the legal rights of women. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

PS 326. JUDICIAL PROCESS AND POLITICS. (4 Credits)
Study of the operation, processes, behavior and influence of the state and federal judiciaries, as well as current research in the judiciary as it relates to politics.

PS 328. SPORTS AND POLITICS. (4 Credits)
Topics include: Sport’s interactions with formal political institutions, sports law, sports in the international community, sports at the university, sports and gender, sports and labor politics, and sports and race.

PS 331. *STATE AND LOCAL POLITICS. (4 Credits)
Role, organization, and functions of government at the state and local level. Satisfies teaching certification requirement for course work in state and local government. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

PS 341. *EUROPEAN AND EU POLITICS. (4 Credits)
Describes and analyzes the political situation in Europe and the European Union. Special focus is given to issues concerning European security and the European Union, its institutions, politics, and the challenges it faces since the opening of Europe to the East. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

PS 342. THE POLITICS OF CORRUPTION. (4 Credits)
Surveys corruption and how it manifests itself in democracies and centralised states. Topics include theoretical accounts for why corruption occurs, what factors are conducive toward producing corruption, the consequences of corruption, and anti-corruption efforts that have succeeded and failed to rectify corruption.

PS 343. *RUSSIAN POLITICS. (4 Credits)
Brief survey of Russian politics in Tsarist and Soviet periods followed by extensive analysis of Russian politics in the late Soviet period under Gorbachev (1985-91), the collapse of the USSR in 1991, and post-Soviet Russian politics (1992-present). (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity

PS 344. *LATIN AMERICAN POLITICS. (4 Credits)
The key political, social and economic issues in Latin America. Surveys topics of interest in the region such as economic development, democratization, revolution and political leadership from both an historical and contemporary perspective. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity

PS 345. *POLITICS OF DEVELOPING NATIONS. (4 Credits)
Analyzes the concepts of development and modernization. Also focuses on the economic, political, and cultural problems faced by developing nations. (NC) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACN – Liberal Arts Non-Western Core

PS 346. *MIDDLE EAST POLITICS. (4 Credits)
The comparative study of the Middle East and North Africa focusing on the internal political dynamics of countries in the region and the international relations among them. Examines issues of political and economic development in their post-colonial context and analyzes impact of nationalism, political Islam, ethnicity, and globalization. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity

PS 348. *CHINESE POLITICS. (4 Credits)
Examines China’s post-1949 political and economic development. Special attention is given to the reform era from the late 1970s to the present. The course also addresses the impact of the reforms on society and on the country’s relationship with the world. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

PS 349. *BRITISH POLITICS. (4 Credits)
The structure and operation of the British political system, the nature of the political parties and how the governing institutions of the British state have changed over time. The course will also consider how British politics impact upon the culture, politics and institutions of the United States. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
PS 350. *JAPANESE POLITICS. (4 Credits)
Examination of the Japanese political system during the postwar period.
Topics include prewar historical influences, political parties, bureaucracy,
interest groups, policy processes and issues, political economy, foreign
policy, and United States-Japan relations. Attention will also be given to
recent dramatic changes in Japan's political system. (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity

PS 351. AMERICAN FOREIGN POLICY. (4 Credits)
Overview of the role of the United States in the world since World War II
and of the factors influencing the formation of American foreign policy.

PS 354. *INTERNATIONAL ORGANIZATIONS AND GLOBAL POLITICS. (4 Credits)
The role of international law and organizations in global politics.
How sovereign states interact, and what motivates them to commit
to supranational laws and intergovernmental organizations. How
international law has evolved since the early 1900s. Intergovernmental
organizations and treaties, with emphasis on the United Nations, the
International Monetary Fund and the World Bank, the World Trade
Organization, the European Union, and the North Atlantic Treaty
Organization. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

PS 355. INTERNATIONAL POLITICS OF ASIA PACIFIC. (4 Credits)
Examines the most pressing issues facing the region: security and
regional economic integration. The major players, their interests, and their
differing perspectives on regional issues will be analyzed.

PS 361. CLASSICAL POLITICAL THOUGHT. (4 Credits)
Major political theorists from the pre-Socratics through the Scholastics.
(H)
Attributes: LACH – Liberal Arts Humanities Core

PS 362. MODERN POLITICAL THOUGHT. (4 Credits)
Major political theorists from the Renaissance to the mid-nineteenth
century. (H)
Attributes: LACH – Liberal Arts Humanities Core

PS 363. *GENDER AND RACE IN AMERICAN POLITICAL THOUGHT. (4 Credits)
Traditional canon of American political thought scrutinized from vantage
point of feminist and critical race theory scholarship. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

PS 364. CONTEMPORARY POLITICAL THEORY. (4 Credits)
Major issues in contemporary political theory. The specific emphasis of
the course may vary from term to term, focusing on questions related to
theories of justice, theories of democracy, global political theory, or the
work of a single important thinker.

PS 365. AMERICAN POLITICAL THOUGHT. (4 Credits)
Political values and theoretical systems in the American tradition, from
the Puritans to the present.

PS 366. *FROM ATLANTIS TO UTOPIA: THE POLITICS OF THE IDEAL
STATE. (4 Credits)
The search for the ideal state has occupied political philosophy since
antiquity. From Plato's Atlantis story through More's utopia and beyond,
philosophers, writers and filmmakers have pondered how to create a
perfect state with perfect citizens which will stand the test of time. Each
week will combine theoretical reflections from antiquity through post-
modernity with a selection of examples from more or less contemporary
fiction that will ideally already be known to the audience. (Bacc Core
Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

PS 370. *SCIENCE, RELIGION, AND POLITICS. (4 Credits)
Addresses historical interplay between religion and science in Western
culture, then focuses on the perceived conflicts between science and
religion within American socio-political context; illustrates role of politics
as the "playing field" on which social differences contend; requires
students to grapple with viewpoints that differ from their own. Team
taught. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

PS 371. PUBLIC POLICY PROBLEMS. (4 Credits)
The content and the politics of adoption and application of such policy
areas as defense, poverty and welfare, macroeconomics, and regulation.

PS 372. PUBLIC ADMINISTRATION. (4 Credits)
The workings of the modern administrative state, processes and
procedures through which government acts, and the balance between
powerful government, democratic and accountable government, and
efficient government.

PS 374. *SUSTAINABLE LIVING: PRACTICES AND POLICIES. (4 Credits)
Exploration of the role individuals in sustainability practices and policies.
Special focus is given to an examination of how individuals can make
sustainable lifestyle choices in light of policy regulations, technologies,
socio-economic conditions, and cultural values. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

PS 375. *THE CIVIL RIGHTS MOVEMENT AND POLICIES. (4 Credits)
Political and social evolution of the civil rights movement, emphasizing
events 1954-1965, and major contemporary civil rights politics and
policies in the South and the nation. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: PS 375H

PS 375H. *THE CIVIL RIGHTS MOVEMENT AND POLICIES. (4 Credits)
Political and social evolution of the civil rights movement, emphasizing
events 1954-1965, and major contemporary civil rights politics and
policies in the South and the nation. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination;
HNRS – Honors Course Designator
Equivalent to: PS 375

PS 399. CURRENT PROBLEMS IN POLITICS. (1-4 Credits)
Selected issues of recent American and international concern such as
Vietnam, Central America, or similar topical issues. May be repeated for
credit when topic varies.
Equivalent to: PS 399H
This course is repeatable for 16 credits.

PS 399H. CURRENT PROBLEMS IN POLITICS. (1-4 Credits)
Selected issues of recent American and international concern such as
Vietnam, Central America, or similar topical issues. May be repeated for
credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: PS 399
This course is repeatable for 16 credits.

PS 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

PS 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

PS 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

PS 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
PS 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PS 405
This course is repeatable for 16 credits.

PS 406. PROJECTS. (1-16 Credits)
Section 1-5: Reading. Associated with the internship for which credit is
given in PS 410.
This course is repeatable for 16 credits.

PS 407. SEMINAR. (1-16 Credits)
Equivalent to: PS 407H
This course is repeatable for 16 credits.

PS 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PS 407
This course is repeatable for 16 credits.

PS 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

PS 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

PS 410. POLITICAL SCIENCE INTERNSHIP. (1-12 Credits)
Supervised work experience in government- or law-related programs or
other public affairs organizations. Reports and appraisals required. Only 4
credits may be applied to the major.
This course is repeatable for 12 credits.

PS 425. *GENDER AND THE LAW. (4 Credits)
Legal status of American women, with emphasis on constitutional law,
the 1964 Civil Rights Act and its amendments, and various state laws as
they relate to the legal rights of women. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

PS 427. NUCLEAR NONPROLIFERATION AND ARMS CONTROL. (4 Credits)
Examines the history, politics and current challenges involving nuclear
weapons proliferation and arms control.

PS 428. TERRORISM AND GLOBAL SECURITY. (4 Credits)
Examines US and global security in light of the challenges posed by
terrorist organizations.

PS 441. DEMOCRATIZATION. (4 Credits)
Democratization and the factors that encourage and/or erode democratic
stability. Political developments in a wide array of countries, with a
particular focus on the unfolding events in the Middle East. Theories of
what causes authoritarian regimes to collapse and what helps initially
fragile democracies endure or collapse.

PS 446. EAST ASIAN POLITICAL ECONOMY. (4 Credits)
Surveys and analyzes the economic and political development of
China, Japan, South Korea, Taiwan, Hong Kong, and Singapore. Japan
is examined as a developmental model for the East Asian Newly
Industrializing Countries (NICs) and as a major player in the regional
economy. China is examined as a contrasting model in terms of its
changing pattern of economic development and its importance for the
region.

PS 449. *TOPICS IN COMPARATIVE POLITICS. (4 Credits)
Topics in comparative politics not covered in other courses. May be
repeated for credit when topic varies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

PS 454. INTERNATIONAL LAW AND ORGANIZATIONS. (4 Credits)
Theories and historical development of international law and
organizations; the United Nations system.

PS 455. *THE POLITICS OF CLIMATE CHANGE. (4 Credits)
Covers domestic and international political aspects of global climate
change. Topics include local, state, and national activity as well as
roles played by presidents, Congress, the Supreme Court, corporations
and media. International focus on conventions and treaties, tensions
between developed and developing nations and possible national security
impacts. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

PS 457. US-CHINA RELATIONS. (4 Credits)
Historical evolution of US-China relationship. Emphasis on economic ties,
tensions, and conflicts surrounding trade, investment, security, human
rights, political reform, Tibet, and Taiwan.
Equivalent to: PS 557

PS 458. *INTERNATIONAL POLITICAL ECONOMY. (4 Credits)
Examines topics in which politics and economics meet in the
international arena, such as trade, debt, finance, development,
multinational corporations, and globalization. Does not require a
background in economics. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

PS 461. ENVIRONMENTAL POLITICAL THEORY. (4 Credits)
Examines the ways in which political theory enhances our understanding
of environmental issues. Focuses on the political and philosophical
premises of various environmental perspectives, and how different
theories of justice and democracy address issues such as environmental
racism, ecological justice, and global climate change.

PS 462. THEORIES OF LAW. (4 Credits)
Covers some of the main theories and approaches to the nature of law.
What is law? What is its relation, if any, to morality? What is it that judges
do? Questions such as these are explored through reading some of the
classic works on the topic.

PS 470. GLOBAL FOOD POLITICS AND POLICY. (4 Credits)
Examines the politics and policy of global food systems as they relate
to food distribution, production, and consumption. The cultivation
and consumption of food is highly political, and at times, contentious.
Specific focus is given to issues like social justice, GMOs, human health,
environment, and agribusiness.

PS 471. NUCLEAR POLITICS AND POLICY. (4 Credits)
Covers the political and policy implications of nuclear technology,
including both nuclear weapons and civilian applications such as nuclear
energy.

PS 473. US ENERGY POLICY. (4 Credits)
Addresses US energy policy with respect to how the U.S. governs
the production and use of different energy sources, along with the
management of its energy infrastructure. Examines policies currently
in place, as well as proposals for alternatives, while examining the
economic, environmental, national security and energy security
implications of different policy approaches.

PS 475. ENVIRONMENTAL POLITICS AND POLICY. (4 Credits)
Environmental and natural resource issues and policies in national and
regional context, emphasizing public attitudes, elections, Congress,
public policy, and relevant national and state agencies.
PS 476. *SCIENCE AND POLITICS. (4 Credits)
Relationship between science and the political system in political ideas and history, in bureaucratic politics of science policy, and in contemporary scientific disputes. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

PS 477. INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY. (4 Credits)
Analysis of international environmental theory and politics, the development of international environmental regimes, agreements and treaties, and the process of globalization and the quality of the environment.

PS 478. RENEWABLE ENERGY POLICY. (4 Credits)
Renewable energy policy with respect to how the U.S. governs the market development, production and use of different renewable energy sources are addressed.

PS 483. CUBAN CULTURE, POLITICS AND SOCIETY. (4 Credits)
One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ES 483 and WLC 483.
Equivalent to: ES 483, WLC 483

PS 499. SPECIAL TOPICS. (1-16 Credits)
Selected topics in political science of special or current interest not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for 99 credits.

PS 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Independent research project under supervision of graduate faculty. This course is repeatable for 16 credits.

PS 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

PS 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PS 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PS 506. PROJECTS. (1-16 Credits)
Section 1-5: Reading. Associated with the internship for which credit is given in PS 410. Completion of this course is required to receive credit for PS 410. Section 11: MU Field Training, 3 credits. Section 12: ASOSU Field Training, 3 credits, each graded P/N. This course is repeatable for 16 credits.

PS 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

PS 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

PS 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

PS 510. POLITICAL SCIENCE INTERNSHIP. (1-12 Credits)
Supervised work experience in government- or law-related programs or other public affairs organizations. Reports and appraisals required. This course is repeatable for 12 credits.

PS 527. NUCLEAR NONPROLIFERATION AND ARMS CONTROL. (4 Credits)
Examines the history, politics and current challenges involving nuclear weapons proliferation and arms control.

PS 528. TERRORISM AND GLOBAL SECURITY. (4 Credits)

PS 541. DEMOCRATIZATION. (4 Credits)
Democratization and the factors that encourage and/or erode democratic stability. Political developments in a wide array of countries, with a particular focus on the unfolding events in the Middle East. Theories of what causes authoritarian regimes to collapse and what helps initially fragile democracies endure or collapse.

PS 554. INTERNATIONAL LAW AND ORGANIZATIONS. (4 Credits)
Theories and historical development of international law and organizations; the United Nations system.

PS 555. THE POLITICS OF CLIMATE CHANGE. (4 Credits)
Covers domestic and international political aspects of global climate change. Topics include local, state, and national activity as well as roles played by presidents, Congress, the Supreme Court, corporations and media. International focus on conventions and treaties, tensions between developed and developing nations and possible national security impacts.

PS 557. US-CHINA RELATIONS. (4 Credits)

PS 558. INTERNATIONAL POLITICAL ECONOMY. (4 Credits)
Examines topics in which politics and economics meet in the international arena, such as trade, debt, finance, development, multinational corporations, and globalization. Does not require a background in economics.

PS 561. ENVIRONMENTAL POLITICAL THEORY. (4 Credits)
Examines the ways in which political theory enhances our understanding of environmental issues. Focuses on the political and philosophical premises of various environmental perspectives, and how different theories of justice and democracy address issues such as environmental racism, ecological justice, and global climate change.

PS 562. THEORIES OF LAW. (4 Credits)
Covers some of the main theories and approaches to the nature of law. What is law? What is its relation, if any, to morality? What is it that judges do? Questions such as these are explored through reading some of the classic works on the topic.

PS 570. GLOBAL FOOD POLITICS AND POLICY. (4 Credits)
Examines the politics and policy of global food systems as they relate to food distribution, production, and consumption. The cultivation and consumption of food is highly political, and at times, contentious. Specific focus is given to issues like social justice, GMOs, human health, environment and agribusiness.

PS 573. US ENERGY POLICY. (4 Credits)
Addresses US energy policy with respect to how the U.S. governs the production and use of different energy sources, along with the management of its energy infrastructure. Examines policies currently in place, as well as proposals for alternatives, while examining the economic, environmental, national security and energy security implications of different policy approaches.
**PS 575. ENVIRONMENTAL POLITICS AND POLICY.** (4 Credits)
Environmental and natural resource issues and policies in national and regional context, emphasizing public attitudes, elections, Congress, public policy, and relevant national and state agencies.

**PS 576. SCIENCE AND POLITICS.** (4 Credits)
Relationship between science and the political system in political ideas and history, in bureaucratic politics of science policy, and in contemporary scientific disputes.

**PS 577. INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY.** (4 Credits)
Analysis of international environmental theory and politics, the development of international environmental regimes, agreements and treaties, and the process of globalization and the quality of the environment.

**PS 578. RENEWABLE ENERGY POLICY.** (4 Credits)
Renewable energy policy with respect to how the U.S. governs the market development, production and use of different renewable energy sources are addressed.

**PS 583. CUBAN CULTURE, POLITICS AND SOCIETY.** (4 Credits)
One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSTLISTED as ES 583 and WLC 583.
Equivalent to: ES 583, WLC 583

**PS 599. SPECIAL TOPICS.** (0-16 Credits)
This course is repeatable for 16 credits.

**PS 808. WORKSHOP.** (4 Credits)
Principles of public administration, administrative organization and procedures, public relations. It will include collaborative governance, leadership, and other issues.

**Sociology**

**SOC 199. SPECIAL TOPICS.** (1-16 Credits)
This course is repeatable for 16 credits.

**SOC 204. *INTRODUCTION TO SOCIOLOGY.** (3 Credits)
Development and application of sociological concepts and perspectives concerning human groups; includes attention to socialization, culture, organization, stratification, and societies. Consideration of fundamental concepts and research methodology. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

**SOC 205. *INSTITUTIONS AND SOCIAL CHANGE.** (3 Credits)
Sociological study of the dynamic organizational nature of society through analysis of social change and major social institutions such as family, education, religion, the economy, and political systems. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

**SOC 206. *SOCIAL PROBLEMS AND ISSUES.** (3 Credits)
Examination of social problems with particular focus upon U.S. society. Sociological perspectives on definition, description, and analysis of contemporary and recurrent problems in industrialized societies. Investigation of causes and consequences of social problems considered in societal context. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACS – Liberal Arts Social Core

**SOC 241. INTRODUCTION TO CRIME AND JUSTICE.** (3 Credits)
Provides a sociological understanding of criminal justice system institutions and processes. Emphasis is placed on understanding the criminal law; police and policing; courts and the prosecution process; and prisons, jails and corrections.

**SOC 299. SPECIAL TOPICS.** (1-16 Credits)
This course is repeatable for 16 credits.

**SOC 312. *SOCIOLOGY OF THE FAMILY.** (4 Credits)
Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better or SOC 205 with D- or better or SOC 206 with D- or better
Equivalent to: SOC 312H

**SOC 312H. *SOCIOLOGY OF THE FAMILY.** (4 Credits)
Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
Equivalent to: SOC 312

**SOC 313. SOCIOLOGY OF INTIMATE RELATIONSHIPS.** (4 Credits)
Examines the microsociological dynamics of intimate relationships. Perceptions and expectations of intimate relationships are explored. Specific attention will be given to issues, processes, and factors that are involved in the construction and management of intimate relationships in contemporary society.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

**SOC 315. *METHODS I: RESEARCH DESIGN.** (4 Credits)
First in a two-course sequence required of all sociology majors. Students learn to formulate researchable questions, devise measures, select data collection techniques, and examine ethical and practical dilemmas in constructing sociological research. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

**SOC 316. METHODS II: QUANTITATIVE ANALYSIS.** (4 Credits)
Second in a two-course sequence required of all sociology majors. The primary objective is to provide students with the statistical skills necessary to analyze sociological data. Covers the construction and interpretation of contingency tables, basic ideas of probability and statistical inference, and an introduction to correlation and regression.
Prerequisites: (SOC 204 with D- or better or SOC 204H with D- or better) and SOC 315 [C-]
SOC 340. DEVIANT BEHAVIOR AND SOCIAL CONTROL. (4 Credits)
Current perspectives, research and theories of deviant behavior. Review and analysis of various approaches and programs designed to prevent and deal with deviant behavior.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 345. *CRIMES AND VIOLENCE IN INTIMATE RELATIONSHIPS. (4 Credits)
Analyzes the historical, social, political, legal, cultural, and psychological aspects of domestic violence, sexual assault, and stalking. Addresses definitions of the problem, demographics, survivors, perpetrators, witnesses, bystanders, strategies and tactics of abusers and survivors, along with strategies for prevention, intervention, treatment, and social change. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

SOC 350. HEALTH, ILLNESS AND SOCIETY. (4 Credits)
Social and cultural factors in the identification, course, and treatment of illness; analysis of selected health settings and professions.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 355. DEATH AND DYING. (4 Credits)
An overview of cross-cultural and historical attitudes and practices around end of life, death and dying. Assessment of contemporary legal, professional, cultural and technological issues surrounding end of life/death and dying.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 360. *POPULATION TRENDS AND POLICY. (4 Credits)
Basic socio-demographic factors affecting population size, distribution, composition and change; examination of local, national, and international trends, and demographic policy. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

SOC 371. *SOCIAL MEDIA AND EVERYDAY LIFE. (4 Credits)
Examines key concepts, themes, and theories in the study of social media in today’s world. Interconnected themes include communication and the public sphere, self representation, power, and new technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

SOC 381. SOCIAL DIMENSIONS OF SUSTAINABILITY. (4 Credits)
Exploration of the social forces driving current views of sustainability. Specific attention will be given to values and belief systems, as well as social institutions in shaping sustainability issues related to ecologically sound, socially just, and economically viable outcomes.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 399. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
Equivalent to: SOC 399H
This course is repeatable for 16 credits.

SOC 399H. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses.
Attributes: HNRS – Honors Course Designator
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
Equivalent to: SOC 399
This course is repeatable for 16 credits.

SOC 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SOC 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

SOC 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SOC 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

SOC 407. SEMINAR. (1-16 Credits)
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
This course is repeatable for 16 credits.

SOC 410. INTERNSHIP. (1-16 Credits)
Graded P/N.
This course is repeatable for 30 credits.

SOC 412. SOCIOLOGY OF WORK AND FAMILY. (4 Credits)
Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change.

SOC 413. SOCIOLOGICAL THEORY. (4 Credits)
Historical and philosophical foundations of sociological theory; major schools of thought and their major contributors.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 418. QUALITATIVE RESEARCH METHODS. (4 Credits)
An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 422. SOCIOLOGY OF ORGANIZATIONS. (4 Credits)
Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 424. SOCIAL PSYCHOLOGY. (4 Credits)
Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/identity. Contemporary research design, problems, and findings pertinent to social psychology.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 426. *SOCIAL INEQUALITY. (4 Credits)
Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

SOC 430. GENDER AND SOCIETY. (4 Credits)
Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better or SOC 205 with D- or better or SOC 206 with D- or better
SOC 432. SOCIOLOGY OF AGING. (3 Credits)
Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 437. RACE AND ETHNIC RELATIONS. (4 Credits)
Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 438. US IMMIGRATION ISSUES IN THE 21ST CENTURY. (4 Credits)
Provides a critical overview of immigration to the United States from a socio-historic perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 439. WELFARE AND SOCIAL SERVICES. (4 Credits)
Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better or SOC 205 with D- or better or SOC 206 with D- or better

SOC 440. JUVENILE DELINQUENCY. (4 Credits)
Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 441. CRIMINOLOGY AND PENOLOGY. (4 Credits)
Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 442. SOCIOLOGY OF DRUG USE AND ABUSE. (4 Credits)
Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 444. INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION. (4 Credits)
Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects.
Prerequisites: SOC 204 with C or better
Equivalent to: SOC 444H

SOC 444H. INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION. (4 Credits)
Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects.
Attributes: HNRS – Honors Course Designator
Prerequisites: SOC 204 with C or better
Equivalent to: SOC 444

SOC 448. LAW AND SOCIETY. (4 Credits)
An introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions.

SOC 449. LAW, CRIME, AND POLICY. (4 Credits)
Surveys criminal justice policies aimed at enforcing laws, reducing crime, punishing violators, and rehabilitating ex-offenders. Interrogates the behavioral assumptions used in creating and evaluating policies. Examines specific crimes and the policies used to address them.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 450. SOCIOLOGY OF EDUCATION. (4 Credits)
Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 452. SOCIOLOGY OF RELIGION. (4 Credits)
Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 453. SOCIOLOGY OF SPORT. (4 Credits)
Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 454. LEISURE AND CULTURE. (4 Credits)
Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 456. SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT. (4 Credits)
Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 460. THE SOCIOLOGY OF GLOBALIZATION. (4 Credits)
Examines the sociological effect of globalization on Western and non-Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies. (NC)
Attributes: LACN – Liberal Arts Non-Western Core
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
SOC 466. INTERNATIONAL DEVELOPMENT: GENDER ISSUES. (4 Credits)
Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization. (NC)
Attributes: LACN – Liberal Arts Non-Western Core
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 470. COLLECTIVE BEHAVIOR. (4 Credits)
Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 471. SOCIAL MOVEMENTS. (4 Credits)
Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 472. GIVING AND VOLUNTARIISM. (4 Credits)
Examines concepts of donor motivation, giving, charity, voluntarism, philanthropy, and the nonprofit sector through the analysis of gender roles, ethnicity, power, status, and social institutions.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 475. RURAL SOCIOLOGY. (4 Credits)
Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored.
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 480. *ENVIRONMENTAL SOCIOLOGY. (4 Credits)
Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts. (Bacc Core Course)
Attributes: CSST – Core, Synth, Global Issues
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 481. *SOCIETY AND NATURAL RESOURCES. (4 Credits)
Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts. (Bacc Core Course)
Attributes: CSST – Core, Synth, Science/Technology/Society
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better

SOC 499. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
Equivalent to: SOC 499H
This course is repeatable for 16 credits.

SOC 499H. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
Attributes: HNRS – Honors Course Designator
Equivalent to: SOC 499
This course is repeatable for 16 credits.

SOC 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

SOC 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.
SOC 530. GENDER AND SOCIETY. (4 Credits)
Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men.

SOC 532. SOCIOLGY OF AGING. (3 Credits)
Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging.

SOC 537. RACE AND ETHNIC RELATIONS. (4 Credits)
Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined.

SOC 538. US IMMIGRATION ISSUES IN THE 21ST CENTURY. (4 Credits)
Provides a critical overview of immigration to the United States from a socio-historic perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean.

SOC 539. WELFARE AND SOCIAL SERVICES. (4 Credits)
Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts.

SOC 540. JUVENILE DELINQUENCY. (4 Credits)
Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents.

SOC 541. CRIMINOLOGY AND PENOLOGY. (4 Credits)
Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime.

SOC 542. SOCIOLOGY OF DRUG USE AND ABUSE. (4 Credits)
Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs.

SOC 544. INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION. (4 Credits)
Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects.

SOC 548. LAW AND SOCIETY. (4 Credits)
An introduction to scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions.

SOC 549. LAW, CRIME, AND POLICY. (4 Credits)
Surveys criminal justice policies aimed at enforcing laws, reducing crime, punishing violators, and rehabilitating ex-offenders. Interrogates the behavioral assumptions used in creating and evaluating policies. Examines specific crimes and the policies used to address them.

SOC 550. SOCIOLOGY OF EDUCATION. (4 Credits)
Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics.

SOC 552. SOCIOLOGY OF RELIGION. (4 Credits)
Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups.

SOC 553. SOCIOLOGY OF SPORT. (4 Credits)
Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media.

SOC 554. LEISURE AND CULTURE. (4 Credits)
Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources.

SOC 556. SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT. (4 Credits)
Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes.

SOC 560. THE SOCIOLOGY OF GLOBALIZATION. (4 Credits)
Examines the sociological effect of globalization on Western and non-Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies.

SOC 566. INTERNATIONAL DEVELOPMENT: GENDER ISSUES. (4 Credits)
Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization.

SOC 570. COLLECTIVE BEHAVIOR. (4 Credits)
Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs.

SOC 571. SOCIAL MOVEMENTS. (4 Credits)
Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society.

SOC 572. GIVING AND VOLUNTARISM. (4 Credits)
Examines concepts of donor motivation, giving, charity, voluntarism, philanthropy, and the nonprofit sector through the analysis of gender roles, ethnicity, power, status, and social institutions.

SOC 575. RURAL SOCIOLOGY. (4 Credits)
Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored.

SOC 580. ENVIRONMENTAL SOCIOLOGY. (4 Credits)
Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts.
SOC 581. SOCIETY AND NATURAL RESOURCES. (4 Credits)
Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts.

SOC 599. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
This course is repeatable for 16 credits.

SOC 808. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

Asian Studies Minor
The minor program will provide an opportunity for students majoring in fields such as business, engineering, or sciences who will be working in Asia or with Asians. They will gain a significant degree of cultural literacy that will be critical for their professional success. In addition, the program will be an outstanding supplement to a traditional liberal arts major for students with particular interests in Asia, who want to study abroad, or who plan to go on to do graduate work in areas with concentrations in aspects of Asia.

Upper-division courses in economics 15

Total Hours 27

* Baccalaureate Core Course (BCC)

Notes:
- ST 351 INTRODUCTION TO STATISTICAL METHODS serves as a substitute for 4 credits of economics upper-division course work when ECON 424 INTRODUCTION TO ECONOMETRICS is part of the student's program.
- Students cannot receive credit toward the minor for both ECON 311 INTERMEDIATE MICROECONOMIC THEORY and ECON 411 ADVANCED MICROECONOMIC THEORY.
- Students are advised to consult with the Economics advisor before completing their course work.

Minor Code: 885

Economics Undergraduate Major (BA, BS, HBA, HBS)
Also available via Ecampus (http://ecampus.oregonstate.edu).

Businesses want employees who can think, communicate orally, write, and solve problems and who are comfortable with quantitative analysis. The traditional economics major perfectly prepares students to meet these demands.

**Additional Requirements**

Select 19 credits of additional approved economics courses at the 300 level or above, at least 4 credits of which must be in courses numbered 411 or higher

**Total credits required for graduation** 180

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

All students must receive a grade of "C" (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all courses taken toward the Economics major. None of the 51 credits may be taken S/U. Students cannot receive credit toward the major for both ECON 311 INTERMEDIATE MICROECONOMIC THEORY and ECON 411 ADVANCED MICROECONOMIC THEORY, for both ECON 315 INTERMEDIATE MACROECONOMIC THEORY and ECON 415 ADVANCED MACROECONOMIC THEORY, and for both ECON 424 INTRODUCTION TO ECONOMETRICS and ECON 427 INTRODUCTION TO ECONOMETRICS WITH CALCULUS. No more than 4 credits of self-study courses (ECON 401 RESEARCH AND SCHOLARSHIP–ECON 410 INTERNSHIP) may be counted towards the 51 credit requirement.

**Law, Economics and Policy Option Additional Requirements**

Select at least two ECON courses: 7-8

- ECON 414 BEHAVIORAL ECONOMICS
- ECON 435 PUBLIC ECONOMICS
- ECON 439 *PUBLIC POLICY ANALYSIS
- ECON 461 LAW, ECONOMICS, AND REGULATION
- ECON 466 *ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY
- ECON 480 LABOR ECONOMICS AND SOCIAL POLICY

Select two courses from below: 8

- PHL 321 DEDUCTIVE LOGIC
- PS 321 CONSTITUTIONAL LAW: GOVERNMENT POWERS AND CONSTRAINTS
- PS 326 JUDICIAL PROCESS AND POLITICS
- PS 371 PUBLIC POLICY PROBLEMS

Select two additional ECON courses at the 300- or 400-level 7

Total Hours 50-51

* Bacc Core Course
^ Writing Intensive Course (WIC)

- All students must receive a grade of "C" (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all courses taken toward the Law, Economics and Policy option.
- None of the 51 credits may be taken S/U.
- Students cannot receive credit toward the option:
  - for both ECON 311 INTERMEDIATE MICROECONOMIC THEORY and ECON 411 ADVANCED MICROECONOMIC THEORY,
  - for both ECON 315 INTERMEDIATE MACROECONOMIC THEORY and ECON 415 ADVANCED MACROECONOMIC THEORY,
  - and for both ECON 424 INTRODUCTION TO ECONOMETRICS and ECON 427 INTRODUCTION TO ECONOMETRICS WITH CALCULUS.
- No more than 4 credits of self-study courses (ECON 401 RESEARCH AND SCHOLARSHIP–ECON 410 INTERNSHIP) may be counted toward the 51 credit requirement.

Option Code: 889

**Managerial Economics Option**

This option is offered within the following major(s):

- Economics - College of Liberal Arts (p. 865)

Also available via Ecampus.

The Managerial Economics option is an interdisciplinary program which allows students to use business classes toward the requirements of the economics degree. The Managerial Economics option is suited for students interested in pursuing jobs or graduate study in business with a strong economics background.

No more than 4 credits of self-study courses (ECON 401 RESEARCH AND SCHOLARSHIP—ECON 410 INTERNSHIP) may be counted toward the 51 credit requirement.

Option Code: 886

**Political Science Graduate Minor**

**Graduate Areas of Concentration**

American politics, judicial politics, public administration, political theory, state and local government, international relations, comparative politics, gender politics, environmental policy

Graduate work in Political Science may serve as a field of study for a Master of Arts in Interdisciplinary Studies (MAIS) degree or as a minor in other advanced degree programs. The political science program aims to provide a systematic understanding of political processes, institutions, theories, and behavior. Students are encouraged to acquire competence in statistics as aids to analyzing political phenomena.

Students may choose the "generic" graduate minor, which simply requires 16 credits of graduate course work in political science for Master's students and 20 credits for doctoral students. Or, students may choose one of two tracks within the minor: Environmental and Energy Politics; and International Relations. Students pursuing a track may choose any of the political science courses listed for that track. Students may also count one of the non-political science courses listed under the track toward the political science graduate minor.

For the generic graduate minor in political science, no specific courses are required. Master's students must take 16 credits of graduate course work in political science, and PhD students must take 20 credits. Any combination of graduate political science courses will satisfy this requirement, but a maximum of 4 credits from PS 501 RESEARCH AND SCHOLARSHIP—PS 510 POLITICAL SCIENCE INTERNSHIP may be counted toward the minor.

For one of the two tracks, Master's students must choose four (4) courses from the list of courses for the track, at least three (3) being from political science; and PhD students much choose five (5) courses, at least four (4) being from political science. Students may take one non-political science course on the list, and may also count up to 4 credits from PS 501 RESEARCH AND SCHOLARSHIP—PS 510 POLITICAL SCIENCE INTERNSHIP toward the option.

Political Science Minor

Also available via Ecampus.

The Political Science Program offers students the ability to augment their primary major by adding a minor in political science. Because politics and policy are relevant to all disciplines, understanding how your discipline interacts with political systems and policymaking can enhance any program of study and strengthen students’ graduate school applications and resumes for future employment.

The structure of the Political Science minor mirrors that of the major. In both, there is a “general” program of study that provides a wide array of choices among courses, as well as three “tracks” that afford students the opportunity for specialization. All students in the minor must complete at least seven courses (28 credits), of which at least three courses (12 credits) must be taken at Oregon State University. Students must maintain a 2.0 GPA in their OSU courses. In addition, no more than four (4) credits from PS 401 RESEARCH AND SCHOLARSHIP – PS 410 POLITICAL SCIENCE INTERNSHIP may count toward the minor. No more than eight credits may be from courses taken S/U.

Political Science Undergraduate Major (BA, BS, HBA, HBS)

Also available via Ecampus.

Political Science is the systematic study of politics wherever it takes place—in governmental institutions, the international arena, and civil society. Political science majors at Oregon State may choose the general political science major, or one of the three options that focus on law and politics, international affairs, or environmental and energy politics. All political science majors learn to think critically, write clearly and speak persuasively. They learn the ideas of great political thinkers, learn the political fundamentals behind the headlines, and have engaging discussions from all points of view with other students and professors.

Students selecting the Political Science major must complete 52 credits of political science course work, of which at least 36 credits must be upper-division courses. As part of these overall credit totals, Political Science majors must complete:

* Bacc Core Course
^ Writing Intensive Course (WIC)

1. Foundation Courses
The school encourages students to take the foundation courses in their first or second year.

Students who choose to specialize in one of the options for the major are required to take two of the introductory courses as specified for the option and choose the third introductory course.

Few upper-division political science courses have enforced prerequisites, but taking the corresponding intro course is often good preparation (for example, PS 201 *INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS would assist with PS 321 CONSTITUTIONAL LAW: GOVERNMENT POWERS AND CONSTRAINTS).
II. Methods/WIC
The research methods and WIC course. The school encourages students to take the Methods/WIC course late in their second or early in their third year.

III. Upper-Division Subfield Courses
A. For the general major, students must take one course each from at least three of the four subfields.

B. For the options, students choose from a list of courses approved for the option.

IV. Potential for Specialization
Students may choose a general political science major or may choose from one of three transcript-visible options:

1. Environmental and Energy Politics
2. International Affairs
3. Law and Politics

V. Potential for Learning Outside the Classroom.
Political science majors are strongly encouraged to pursue experiential learning and other educational opportunities outside of the classroom, and these experiences can be used to fulfill some political science graduation requirements. Such experiences can include research, thesis writing, projects, or internship. Credits will be placed in the appropriate PS 401 RESEARCH AND SCHOLARSHIP–PS 410 POLITICAL SCIENCE INTERNSHIP designator. A maximum of 8 credits from any combination of PS 401 RESEARCH AND SCHOLARSHIP–PS 410 POLITICAL SCIENCE INTERNSHIP may be applied to the major, although additional credits from courses in this range may be applied to general graduation requirements. Additional experiential learning opportunities include "field schools" and study abroad. Students should discuss all of these opportunities with the political science undergraduate advisor.

VI. Additional Requirements for the Major
- Majors are required to maintain a minimum cumulative 2.00 grade-point average for all political science course work.
- Majors must earn a C– grade or better in PS 300.
- Students must complete the BA or BS requirements specified by the College of Liberal Arts.

Major Code: 960

Environmental and Energy Politics Option
This option is offered within the following major(s):
- Political Science - College of Liberal Arts (p. 871)

The Environmental and Energy Politics option under the Political Science major provides students with the opportunity to focus their undergraduate studies on topics involving:

- Historical and contemporary environmental problems
- Governmental and non-governmental efforts to address problems at the local, state, federal and international levels
- Interactions between key actors and institutions involved in environmental policymaking in the United States and internationally

---

Public Policy Undergraduate Major (BS, HBS)

Also available via Ecampus.

The discipline of public policy is closely connected to the practice of policy and this program ensures that students interact with policy-makers as well as the knowledge-producers who support policy decisions. Graduates of the BSPP will have the skills necessary for understanding the political, economic, and social constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that animate critical policy debates. The Public Policy Major will provide students with a set of research, analytical, and management skills that will be transferable across sectors and across issue areas. The undergraduate program will prepare graduates for a career not only in public service (federal, state, and local government), but also in not-for-profit and for-profit organizations, as well as admissions to competitive graduate programs in a wide range of programs through which they may further broaden their intellectual and practical experience and expertise.

The BSPP is designed with an emphasis on substantive interdisciplinary knowledge about important policy issues, analytic skills, and policy practice. Students will have the opportunity to pursue their individual interests and passion in specialization areas, each of which is supported by a wealth of experience and expertise in both the School of Public Policy and across the OSU campus. In addition, the degree requires a supervised practicum with a public, non-profit, private, or international organization.

Students will apply for the Public Policy Major after completing an equivalent of 90 quarter credits at an accredited university (typically two years of full-time study). Students are encouraged to complete as much of the OSU Baccalaureate core and College of Liberal Arts (CLA) requirements as possible during that time period. Prior to submission of an application, students will be required to take and complete
successfully (GPA of 3.0 or higher) four courses, each of which is a prerequisite for subsequent courses in the program.

1. Students will apply for the Public Policy major after completing an equivalent of 90 quarter credits at an accredited university (typically two years of full-time study). Students will be encouraged to complete as much of the OSU Baccalaureate core and College of Liberal Arts (CLA) requirements as possible during that time period. Prior to submission of an application, students will be required to take and complete successfully (GPA of 3.0 or higher) 4 courses, each of which is a prerequisite for subsequent courses in the Public Policy major.

2. Students are required to take a minimum 20 credits of electives course work, at least 16 credits in the SPP programs (ECON, PS, and SOC) and up to 4 credits from other programs. Individually tailored specializations are possible with approval from the BSPP Coordinator.

Public Policy Graduate Major (MPP, PhD)

Graduate Areas of Concentration

Energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; social policy

Also available via Ecampus at the master’s level only.

Oregon State University offers graduate programs in public policy to students interested in energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy. The degrees are granted by the College of Liberal Arts and provide graduate education for students wishing to develop their interests and careers in the public and nonprofit sectors. The Master of Public Policy (MPP) specifically prepares students for careers in domestic and international organizations or preparation for PhD studies. The PhD in Public Policy prepares students for academic or non-academic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. The degrees are designed to provide individuals with analytic skills, an understanding of public policy processes, and substantive knowledge in a specific policy area.

To see details outlined in a brochure, go http://liberalarts.oregonstate.edu/spp/graduate-programs-public-policy

Major Code: 9570

Sociology Graduate Minor

Graduate Areas of Concentration

Environmental and natural resources, international sociology, social policy

Sociology in the School of Public Policy serves as major and minor fields in the Master of Arts in Interdisciplinary Studies degree program and participates as a minor field in other advanced degree programs. The MAIS program is designed to meet the particular needs and interests of the individual student and features collaborative work in any two other pertinent departments. Further information can be obtained by writing the School of Public Policy, 300 Bexell Hall, OSU, Corvallis, OR 97331-3703.

Minor Code: 9800

Sociology Minor

Also available via Ecampus.

Undergraduate students may elect a Sociology minor to complement course work in their major discipline.

Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward the Sociology minor.

A minimum GPA of 2.00 must be earned in sociology course work.

Sociology Undergraduate Major (BA, BS, HBA, HBS)

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one's education and strengthens the base of understanding from which one can pursue a career or further education.

Two options are currently available for Corvallis campus students — Crime and Justice, and Environmental and Natural Resource Sociology — with the Environmental and Natural Resource option also available for Ecampus students.

Code | Title | Hours
--- | --- | ---
SOC 204 | INTRODUCTION TO SOCIOLOGY (Prereq. to all upper-division sociology courses] Also offered via Ecampus) | 3
SOC 315 | *METHODS I: RESEARCH DESIGN (Also offered via Ecampus.) | 4
SOC 316 | METHODS II: QUANTITATIVE ANALYSIS (Also offered via Ecampus.) | 4
SOC 413 | SOCIOLOGICAL THEORY (Also offered via Ecampus.) | 4

Total Hours 23

1 Internship placement must be in crime, law or related field to count for option. Major paper required for 2+ credits.

Option Code: 995

Environmental and Natural Resource Sociology Option

Also available via Ecampus.

The option is designed to provide students with the ability to apply social science concepts and approaches to better understand and analyze relationships between societies and their bio-physical environment from a sociological perspective. This option has great relevance for sociology students aspiring to careers in natural resource and environmental policy, planning, management, and education, as well as preparation for advanced/graduate programs in criminology, criminal justice, or public policy. Academic internships are available in local criminal justice and social service agencies, offering a unique combination of scholarly analysis and practical experience for students seeking careers in fields such as law, policing, corrections, and social work.

Code | Title | Hours
--- | --- | ---
SOC 241 | INTRODUCTION TO CRIME AND JUSTICE | 23
SOC 340 | DEVIANT BEHAVIOR AND SOCIAL CONTROL |

### School of Writing, Literature and Film

The School of Writing, Literature, and Film offers instruction in literary studies, writing (creative, critical, professional/technical), and critical film studies to students in all disciplines who seek the cultural and intellectual values of the humanities and arts, as well as the broadening influence of humanistic studies, creative expression, cultural studies, and writing for the professions. In addition, the school provides courses for those interested in the major or minor in English, especially for those who plan to teach in the elementary, secondary, or college professions, or who plan to pursue graduate work in English, writing, or film. The Writing minor, which is also offered via Ecampus (http://ecampus.oregonstate.edu/online-degrees/undergraduate/writing), serves students interested in creative writing and/or writing for the scientific and/or technical and professional fields.

### Minor Programs

The minor in English allows students to concentrate in the area of the liberal arts and develop the reading and writing skills often demanded by employers. Students taking a minor in English choose from among three areas: general English studies, English literature, and American literature. The minor in Writing requires a total of 27 credits to be taken as a minimum of 11 credits (3 courses, with at least one at the 300 level).

### Graduate Programs

The School of Writing, Literature, and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be in literature and culture, or rhetoric, writing, and culture. The school also offers the Master of Fine Arts degree in Creative Writing. Graduate work in the school may also be applied to the Master of Arts in Interdisciplinary Studies (MAIS) degree or to minors in other advanced degree programs.

### Undergraduate Programs

An introduction to the study of creative nonfiction as a diverse genre, from journalism to memoir and essay. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ENG 199. SPECIAL STUDIES. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

ENG 200. LIBRARY SKILLS FOR LITERARY STUDY. (1 Credit)
Introduction to library resources for the study of literature. Required for English majors.

ENG 201. *SHAKESPEARE. (4 Credits)
The earlier plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 201H

ENG 201H. *SHAKESPEARE. (4 Credits)
The earlier plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 201

ENG 202. *SHAKESPEARE. (4 Credits)
The later plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 202H

ENG 204. *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 204H

ENG 204H. *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 204

ENG 205. *SURVEY OF BRITISH LITERATURE: RESTORATION TO ROMANTIC ERA. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 205H

ENG 205H. * SURVEY OF BRITISH LITERATURE: RESTORATION TO ROMANTIC ERA. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 205

ENG 206. *SURVEY OF BRITISH LITERATURE: VICTORIAN ERA TO 20TH CENTURY. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
ENG 207. *LITERATURE OF WESTERN CIVILIZATION: CLASSICAL-RENAISSANCE. (4 Credits)
The great plays, poems and fiction of Western civilization. Covers the Classical World: (Greek, Hebrew, Roman) and Western European major authors through the Renaissance. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 208. *LITERATURE OF WESTERN CIVILIZATION: 18TH CENTURY TO PRESENT. (4 Credits)
The great plays, poems and prose of Western civilization from the 18th century Enlightenment through Romanticism and beyond. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 210. *LITERATURES OF THE WORLD: ASIA. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Asia. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ENG 211. *LITERATURES OF THE WORLD: AFRICA. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 211H

ENG 211H. *LITERATURES OF THE WORLD: AFRICA. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ENG 212. *LITERATURES OF THE WORLD: MESO/SOUTH AMERICA, CARIBBEAN. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Meso- and South America and the Caribbean. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ENG 213. *LITERATURES OF THE WORLD: MIDDLE EAST. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 213H

ENG 213H. *LITERATURES OF THE WORLD: MIDDLE EAST. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 213

ENG 214. *LITERATURE OF THE WORLD: EUROPE. (4 Credits)
Representative works of poetry, prose, and drama written by European authors. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture

ENG 215. *CLASSICAL MYTHOLOGY. (4 Credits)
Greek and Roman mythology, its allusions, continuing influences. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 220. *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION. (4 Credits)
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. CROSSLISTED as FILM 220. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220H, FILM 220

ENG 220H. *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION. (4 Credits)
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220H, FILM 220

ENG 221. *AFRICAN-AMERICAN LITERATURE. (4 Credits)
Reading and critical analysis of African-American literature in historical, political, and/or thematic perspective. Content changes from term to term; see Schedule of Classes. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 221H

ENG 222. CHILDREN'S LITERATURE. (4 Credits)
Surveys a variety of genres, including fairy tales, folktales, and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.

ENG 225. THE ART, SCIENCE, AND LITERATURE OF FLY FISHING. (1 Credit)
Designed to rapidly introduce students to some of the major themes and formal devices of literature written about fly fishing. In four days, we will gain a sense of how four different genres—the short story, the novel, poetry, and creative nonfiction—represent and understand this activity.
Corequisites: FW 112, PAC 331
ENG 253. *SURVEY OF AMERICAN LITERATURE: COLONIAL TO 1900. (4 Credits) Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 254. *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT. (4 Credits) Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

Equivalent to: ENG 254H

ENG 254H. *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT. (4 Credits) Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

Equivalent to: ENG 254

ENG 260. *LITERATURE OF AMERICAN MINORITIES. (4 Credits) Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

Equivalent to: ENG 260H

ENG 260H. *LITERATURE OF AMERICAN MINORITIES. (4 Credits) Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

Equivalent to: ENG 260

ENG 275. *THE BIBLE AS LITERATURE. (4 Credits) Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

Equivalent to: ENG 275H

ENG 275H. *THE BIBLE AS LITERATURE. (4 Credits) Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

Equivalent to: ENG 275

ENG 295. *FEMINISM AND THE BIBLE. (3 Credits) Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as PHL 295, WGSS 295, WGSS 295H Attributes: CPLA – Core, Pers, Lit and Arts

Equivalent to: ENG 295H, PHL 295, PHL 295H, WGSS 295, WGSS 295H

ENG 295H. *FEMINISM AND THE BIBLE. (3 Credits) Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as PHL 295, PHL 295H, WGSS 295, WGSS 295H Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator

Equivalent to: ENG 295, PHL 295, PHL 295H, WGSS 295, WGSS 295H

ENG 299. SPECIAL TOPICS. (1-16 Credits) This course is repeatable for 16 credits.

ENG 311. *STUDIES IN BRITISH PROSE. (4 Credits) An introduction to the prose genre in British literature with intensive practice in reading and writing practices for literary study. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC

ENG 312. *STUDIES IN BRITISH DRAMA. (4 Credits) An introduction to the dramatic arts genre in British literature with a special emphasis in reading and writing for literary study. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC

ENG 313. *STUDIES IN BRITISH POETRY. (4 Credits) An introduction to the poetry genre in British literature with intensive practice in reading and writing for literary study. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC

ENG 317. *THE AMERICAN NOVEL: BEGINNINGS TO CHOPIN. (4 Credits) Chronological survey of the novel in America. Covers from the beginnings to Chopin. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 318. *THE AMERICAN NOVEL: MODERNIST PERIOD. (4 Credits) Chronological survey of the novel in America. Covers Modernist Period from Dreiser to Faulkner. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 319. *THE AMERICAN NOVEL: POST-WORLD WAR II. (4 Credits) Chronological survey of the novel in America. Covers Post-World War II: Mailer to the present. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 320. *STUDIES IN PAGE, STAGE, AND SCREEN. (4 Credits) Study of a particular theme, genre, movement, or author through the relations of text and performance. Topics change from term to term and may include content from film, drama, digital sources, and other visual media. (H) (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

This course is repeatable for 8 credits.

ENG 321. *STUDIES IN WORD, OBJECT, AND IMAGE. (4 Credits) Study of a particular theme, genre, movement, or author through the relations of texts to material artifacts and/or static visual objects (e.g., paintings, engravings, printed matter, or photographs). Topics change from term to term. (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts

This course is repeatable for 8 credits.
ENG 322. *STUDIES IN GLOBALISM, TEXT, AND EVENT. (4 Credits)
Study of a particular theme, genre, movement, or author as informed by patterns of globalization, issues in international relations, and/or landmark moments of cultural exchange. Topics change from term to term. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CSGI – Core, Synth, Global Issues
This course is repeatable for 8 credits.

ENG 330. *THE HOLOCAUST IN LITERATURE AND FILM. (4 Credits)
Study of fiction, memoir, and film representing Nazi Holocaust of European Jewry. Reviews history of racial Anti-Semitism and rise of Nazism as context for textual analysis of Holocaust literature. Examines literary and filmic form as productive to social awareness of the roots, events, and aftermath of the Holocaust. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ENG 345. INTRODUCTION TO LITERARY CRITICISM AND THEORY. (4 Credits)
Study and analysis of critical frameworks and methodologies for the interpretation of literature and culture. Required for English majors. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: ENG 200 with C- or better

ENG 360. *NATIVE AMERICAN LITERATURE. (4 Credits)
An introduction to the prose and poetry written by Native Americans of the North American continent. Not offered every year. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ENG 362. *AMERICAN WOMEN WRITERS. (4 Credits)
Study of important literary works of any genre by American women from historical, thematic, or formalist perspectives. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

ENG 374. *MODERN SHORT STORY. (4 Credits)
Survey of the short story from the 19th century to the present. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 374H

ENG 374H. *MODERN SHORT STORY. (4 Credits)
Survey of the short story from the 19th century to the present. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 374

ENG 375. CHILDREN’S LITERATURE. (4 Credits)
Surveys a variety of genres, including fairy tales, folktales, and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.
Equivalent to: ENG 375H

PART I. (4 Credits)
The first course in an interdisciplinary sequence of courses that examines the development and interrelationships of American art and literature from contact to the present. ENG 386 covers Conquest to Civil War. CROSSLISTED as ART 386.
Equivalent to: ART 386

ENG 387. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE:
PART II. (4 Credits)
The second course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ENG 387 covers Civil War to Harlem Renaissance. CROSSLISTED as ART 387.
Equivalent to: ART 387

ENG 388. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE:
PART III. (4 Credits)
The third course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ENG 388 covers Great Depression to Postmodernity. CROSSLISTED as ART 388.
Equivalent to: ART 388

ENG 399. SELECTED TOPICS. (1-16 Credits)
(H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: ENG 399H
This course is repeatable for 16 credits.

ENG 399H. SELECTED TOPICS. (1-16 Credits)
(H)
Attributes: HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 399
This course is repeatable for 16 credits.

ENG 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 406. PROJECTS. (1-16 Credits)
Equivalent to: ENG 406H
This course is repeatable for 16 credits.

ENG 406H. PROJECTS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENG 406
This course is repeatable for 16 credits.

ENG 407. *SEMINAR. (1-16 Credits)
May be repeated as topics vary. CROSSLISTED as AMS 407. (Writing Intensive Core)
Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

ENG 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.
ENG 410. INTERNSHIP IN ENGLISH. (1-16 Credits)
Provides upper-division English majors with supervised, on-the-job work experience, accompanying academic readings. Graded P/N.
This course is repeatable for 16 credits.

ENG 412. STUDIES IN BRITISH THEATER AND SOCIETY. (4 Credits)
Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 416. *POWER AND REPRESENTATION. (4 Credits)
Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core

ENG 417. THE ENGLISH NOVEL: DEFOE THROUGH SCOTT. (4 Credits)
Selected English novels from Defoe through Scott. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 418. THE ENGLISH NOVEL: VICTORIAN PERIOD. (4 Credits)
Selected English novels focusing on those from the Victorian period. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 419. THE ENGLISH NOVEL: 20TH CENTURY. (4 Credits)
Selected English novels of the 20th century. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 420. *STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION. (4 Credits)
Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core

ENG 425. STUDIES IN MEDIEVAL LITERATURE. (4 Credits)
Particular genres, themes, and writers in medieval literature. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 426. STUDIES IN CHAUCER. (4 Credits)
The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 430. STUDIES IN EARLY MODERN LITERATURE. (4 Credits)
Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 433. STUDIES IN THE LONG EIGHTEENTH CENTURY. (4 Credits)
Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g., Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g., Congreve, Wycherly, Gay). Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 434. STUDIES IN ROMANTICISM. (4 Credits)
Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g., Austen, Wollstonecraft, Burke). Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 435. STUDIES IN SHAKESPEARE. (4 Credits)
Shakespeare’s works from a variety of critical and scholarly perspectives. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 436. STUDIES IN VICTORIAN LITERATURE. (4 Credits)
Studies in the literature and contexts of the Victorian period including the works of one or more of the following authors: Yeats, Joyce, Shaw, O’Casey, Gregory, Synge, Bowen, Moore, Behan, O’Brien, Kavanagh, Cronin. Sometimes offered as a study of Joyce’s works alone. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 438. STUDIES IN MODERNISM. (4 Credits)
Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890s to 1940s). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 440. STUDIES IN MODERN IRISH LITERATURE. (4 Credits)
Studies in the literature and contexts of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O’Casey, Gregory, Synge, Bowen, Moore, Behan, O’Brien, Kavanagh, Cronin. Sometimes offered as a study of Joyce’s works alone. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 445. *STUDIES IN NONFICTION. (4 Credits)
Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term: see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 450. STUDIES IN SHORT FICTION. (4 Credits)
Particular writers, movements, and types of short fiction. Topics change from term to term: see Schedule of Classes. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 454. MAJOR AUTHORS. (4 Credits)
Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term; see Schedule of Classes. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 460. STUDIES IN DRAMA. (4 Credits)
Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term; see Schedule of Classes. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
ENG 465. STUDIES IN THE NOVEL. (4 Credits)
Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term; see Schedule of Classes. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 470. STUDIES IN POETRY. (4 Credits)
Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 475. STUDIES IN CRITICISM. (4 Credits)
Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term; see Schedule of Classes. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 16 credits.

ENG 480. STUDIES IN LITERATURE, CULTURE AND SOCIETY. (4 Credits)
Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 482. STUDIES IN AMERICAN LITERATURE, CULTURE, AND THE ENVIRONMENT. (4 Credits)
Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 485. STUDIES IN AMERICAN LITERATURE. (4 Credits)
Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 486. STUDIES IN BRITISH LITERATURE. (4 Credits)
Particular British writers, movements, conventions, genres, and problems. Topics change from term to term; see Schedule of Classes. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 488. LITERATURE AND PEDAGOGY. (4 Credits)
Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 489. WRITING, LITERATURE AND MEDICINE. (4 Credits)
Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts.

ENG 490. HISTORY OF THE ENGLISH LANGUAGE. (4 Credits)
A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 497. INTERNATIONAL WOMEN'S VOICES. (4 Credits)
A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core

ENG 498. WOMEN AND LITERATURE. (4 Credits)
Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language.
This course is repeatable for 8 credits.

ENG 499. SELECTED TOPICS. (1-16 Credits)
(H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 16 credits.

ENG 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ENG 504. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 506. SEMINAR. (1-16 Credits)
May be repeated for credit as topics vary. CROSSLISTED as AMS 507.
Equivalent to: AMS 507
This course is repeatable for 16 credits.

ENG 507. GRADUATE INTERNSHIP IN ENGLISH. (1-2 Credits)
Provides graduate students with supervised, on-the-job work experience and professional development. Graded P/N.
This course is repeatable for 12 credits.

ENG 510. STUDIES IN BRITISH THEATER AND SOCIETY. (4 Credits)
Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary.
This course is repeatable for 8 credits.

ENG 512. STUDIES IN BRITISH THEATER AND SOCIETY. (4 Credits)
Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary.
This course is repeatable for 8 credits.

ENG 514. INTRODUCTION TO GRADUATE STUDIES. (4 Credits)
Introduction to the MA program; theories and methods of English studies. Offered fall term only. Required for first-year MA students.

ENG 515. HISTORY OF THE ENGLISH LANGUAGE. (4 Credits)
A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 517. THE ENGLISH NOVEL: DEFOE THROUGH SCOTT. (4 Credits)
Selected English novels from Defoe through Scott. Not offered every year.

ENG 518. THE ENGLISH NOVEL: VICTORIAN PERIOD. (4 Credits)
Selected English novels focusing on those from the Victorian period.
ENG 519. THE ENGLISH NOVEL: 20TH CENTURY. (4 Credits)
Selected English novels of the 20th century.

ENG 520. STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION. (4 Credits)
Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year.

ENG 525. STUDIES IN MEDIEVAL LITERATURE. (4 Credits)
Particular genres, themes, and writers in medieval literature. Topics change from term to term.
This course is repeatable for 8 credits.

ENG 526. STUDIES IN CHAUCER. (4 Credits)
The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term.
This course is repeatable for 8 credits.

ENG 530. STUDIES IN EARLY MODERN LITERATURE. (4 Credits)
Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance.
This course is repeatable for 8 credits.

ENG 533. STUDIES IN THE LONG EIGHTEENTH CENTURY. (4 Credits)
Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g., Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g., Congreve, Wycherly, Gay). Not offered every term.
This course is repeatable for 8 credits.

ENG 534. STUDIES IN ROMANTICISM. (4 Credits)
Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g., Austen, Wollstonecraft, Burke). Not offered every term.
This course is repeatable for 8 credits.

ENG 535. STUDIES IN SHAKESPEARE. (4 Credits)
Shakespeare's works from a variety of critical and scholarly perspectives. Not offered every term.
This course is repeatable for 8 credits.

ENG 536. STUDIES IN VICTORIAN LITERATURE. (4 Credits)
Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term; see Schedule of Classes.
This course is repeatable for 8 credits.

ENG 538. STUDIES IN MODERNISM. (4 Credits)
Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890's to 1940's). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term.
This course is repeatable for 8 credits.

ENG 540. STUDIES IN MODERN IRISH LITERATURE. (4 Credits)
Studies in the literature and context of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O'Casey, Gregory, Synge, Bowen, Moore, Behan, O'Brien, Kavanaugh, Cronin. Sometimes offered as a study of Joyce's works alone. Topics change from term to term.
This course is repeatable for 8 credits.

ENG 545. STUDIES IN NONFICTION. (4 Credits)
Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term: see Schedule of Classes.
This course is repeatable for 16 credits.

ENG 550. STUDIES IN SHORT FICTION. (4 Credits)
Particular writers, movements, and types of short fiction. Topics change from term to term: see Schedule of Classes. Not offered every year.
This course is repeatable for 8 credits.

ENG 554. MAJOR AUTHORS. (4 Credits)
Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term; see Schedule of Classes. Not offered every year.
This course is repeatable for 8 credits.

ENG 560. STUDIES IN DRAMA. (4 Credits)
Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term; see Schedule of Classes. Not offered every year.
This course is repeatable for 8 credits.

ENG 565. STUDIES IN THE NOVEL. (4 Credits)
Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term; see Schedule of Classes. Not offered every year.
This course is repeatable for 8 credits.

ENG 570. STUDIES IN POETRY. (4 Credits)
Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term; see Schedule of Classes. Not offered every term.
This course is repeatable for 8 credits.

ENG 575. STUDIES IN CRITICISM. (4 Credits)
Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term; see Schedule of Classes. Not offered every year.
This course is repeatable for 16 credits.

ENG 580. STUDIES IN LITERATURE, CULTURE AND SOCIETY. (4 Credits)
Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term.
This course is repeatable for 8 credits.

ENG 582. STUDIES IN AMERICAN LITERATURE, CULTURE, AND THE ENVIRONMENT. (4 Credits)
Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States.
This course is repeatable for 8 credits.

ENG 585. STUDIES IN AMERICAN LITERATURE. (4 Credits)
Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term; see Schedule of Classes. Not offered every term.
This course is repeatable for 8 credits.

ENG 586. STUDIES IN BRITISH LITERATURE. (4 Credits)
Particular British writers, movements, conventions, genres, and problems. Topics change from term to term; see Schedule of Classes. Not offered every year.
This course is repeatable for 8 credits.
Film Studies Courses

FILM 110. *INTRODUCTION TO FILM STUDIES: 1895-1945. (3 Credits)
An introduction to the serious study of world cinema, 1895-1945. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

FILM 125. *INTRODUCTION TO FILM STUDIES: 1945-PRESENT. (3 Credits)
Provides an introduction to the serious study of world cinema, 1945-present. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

FILM 220. *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION. (4 Credits)
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. CROSSLISTED as ENG 220. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220, ENG 220H

FILM 245. *THE NEW AMERICAN CINEMA. (4 Credits)
A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 245, FILM 245H

FILM 245H. *THE NEW AMERICAN CINEMA. (4 Credits)
A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 245, ENG 245H, FILM 245

FILM 255. *WORLD CINEMA PART I: ORIGINS TO 1968. (4 Credits)
A systematic introduction to the arts and history of international cinema, from the invention of the medium in 1895 to the rise of New Wave and Third Cinema in the 1960s. Weekly screenings of films such as Rashomon, Tokyo Story, Pather Parchali, Terra em Transe, and La Noire de. (Bacc Core Course)

Weekly screenings include such films as A Better Tomorrow, Chungking Express, Spirited Away, Oldboy, Bombay, and City of God. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

FILM 265. *FILMS FOR THE FUTURE. (4 Credits)
An interdisciplinary study of film, literary, and philosophical visions of the future. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

FILM 310. *FILM THEORY AND CRITICISM. (4 Credits)
Survey of significant works and movements in film theory and criticism, from classical to contemporary eras. Begins with the question of what distinguishes film from other visual arts, pursuing questions about the ontology of film, medium specificity, and aesthetics. Proceeds with investigations concerning issues of technology, authorship, genre, the avant-garde, gender, race and ethnicity, commercialism, transnationalism, queer theory, and affect. Weekly screenings will supplement class readings, lectures and discussions. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Prerequisites: FILM 110 with C or better or FILM 125 with C or better

FILM 360. INTERNATIONAL FILM FESTIVAL. (3 Credits)
Critical study of a selection of films screened at the Oregon State University’s International Film Festival. Topics include acting, sound, special effects, cinematography. CROSSLISTED as WLC 360.
Equivalent to: WLC 360
This course is repeatable for 9 credits.

FILM 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

FILM 445. DOCUMENTARY FILM STUDIES. (4 Credits)
Examines the worldwide development of documentary filmmaking. We interrogate the nature, form, and function of non-fiction cinematic forms by analyzing diverse films, filmmakers, and theoretical models, while paying attention to social, technological, and aesthetic influences. We study significant modes of documentary including the city symphony, political documentary, direct cinema/cinema verite, and postmodern documentary. Finally, we will pay special attention to the cross-fertilization of non-fiction with other filmmaking modes. Throughout the course, we seek to answer the following questions: How do documentary conventions mark the “Real”? How is documentary film a tool for social change?.

ENG 588. LITERATURE AND PEDAGOGY. (4 Credits)
Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation.

ENG 589. WRITING, LITERATURE AND MEDICINE. (4 Credits)
Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts.

ENG 590. HISTORY OF THE ENGLISH LANGUAGE. (4 Credits)
A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms.

ENG 595. LANGUAGE, TECHNOLOGY, AND CULTURE. (4 Credits)
Explores relationship between literacy, technology, and thought.

ENG 597. INTERNATIONAL WOMEN'S VOICES. (4 Credits)
A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature.

ENG 598. WOMEN AND LITERATURE. (4 Credits)
Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language.
This course is repeatable for 8 credits.

ENG 220, ENG 220H

WLC 360
WR 121. *ENGLISH COMPOSITION. (3 Credits)
Introduction to critical thinking, the writing process, and the forms of expository writing. Intensive writing practice, with an emphasis on revision. The term in which the student takes the course is determined alphabetically; see Schedule of Classes. (Bacc Core Course)
Attributes: CSW1 – Core, Skills, WR I
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Alpha Restriction H to N with a score of 1
Equivalent to: WR 121H

WR 121H. *ENGLISH COMPOSITION. (3 Credits)
Introduction to critical thinking, the writing process, and the forms of expository writing. Intensive writing practice, with an emphasis on revision. The term in which the student takes the course is determined alphabetically; see Schedule of Classes. (Bacc Core Course)

WR 130. FUNDAMENTALS OF GRAMMAR, SYNTAX, AND SENTENCE BUILDING. (1 Credit)
Provides opportunities to improve writing at the sentence level. Focuses on the fundamental elements of the sentence (grammar), the principles and rules of sentence structure (syntax), and techniques for writing meaningful, compelling sentences (sentence building). WR 130 is a hybrid course; students will use online modules, activities, and quizzes to advance understanding of grammar fundamentals and to practice writing, editing, and revising sentences. In-person meetings will emphasize student questions and applying lessons to other academic writing projects. Graded P/N.

WR 199. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

WR 201. *WRITING FOR MEDIA. (3 Credits)
Introduction to newspaper style. Introduction to reporting. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II

WR 214. *WRITING IN BUSINESS. (3 Credits)
Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in business and industry. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1

WR 222. *ENGLISH COMPOSITION. (3 Credits)
Continued practice in expository writing with an emphasis on argumentation and research. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II

WR 224. *INTRODUCTION TO FICTION WRITING. (3 Credits)
Discussion workshop. Student work examined in context of contemporary published work. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
WR 228. *WRITING ABROAD. (3 Credits)
Prepares students to compose thoughtful, nuanced, and journalistically-grounded writing for a Web-based audience based on experiences studying abroad. By reading deeply in the lifestyle and creative nonfiction genres, students will develop strategies for communicating their observations effectively. Instruction follows an editorial model, allowing students to practice the role of editor, freelancer, and designer, all with an eye towards publishing in a course-affiliated online magazine. To achieve success in this course, students must demonstrate knowledge of writing techniques appropriate to the genre and must demonstrate editorial skill.
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better

WR 230. *ESSENTIALS OF ENGLISH GRAMMAR. (3 Credits)
Introduces students to the structure of sentences with a focus on beginning grammar. Students in WR 230 will learn the differences between clauses and phrases, how to recognize subjects and predicates in a variety of sentence types, how to avoid the most common grammatical errors in student writing, and how to use punctuation correctly--and with intention. Students will complete readings, watch videos, participate in discussions, and demonstrate understanding through weekly quizzes. They will also challenge themselves with numerous writing activities, and complete writing analysis projects. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II

WR 239. INTRODUCTION TO WRITING FICTION AND CREATIVE NONFICTION. (3 Credits)
Explores how to write good stories, whether real or imagined. Students will read and write in both genres, identifying the elements that make stories more vivid, more human, and more true. Students will write informal pieces and one longer work in each genre, and will workshop one story or essay. Taught via Ecampus only.

WR 240. *INTRODUCTION TO NONFICTION WRITING. (3 Credits)
Discussion workshop. Student work examined in context of contemporary published work. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better or WR 121H with C- or better
This course is repeatable for 9 credits.

WR 241. *INTRODUCTION TO POETRY WRITING. (3 Credits)
Discussion workshop. Rudiments of mechanics and some background in development of modern poetry. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1

WR 301. *PUBLISHING AND EDITING. (3 Credits)
Invites students to learn about editing and copyediting techniques, broader editorial decisions, and current publishing platforms. Students will learn about scholarly publishing in the U.S. and about how social media and public relations fit into this world. Participants will also explore editing within a rhetorical dimension, considering purpose and audience, as well as conventions of grammar, mechanics, and usage. Students will review a scholarly article reporting on research in editing and/or publishing, as well as develop a publication-ready work of their own. As part of a final project, the class will work toward a collaborative publication. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with D- or better

WR 303. *WRITING FOR THE WEB. (3 Credits)
Concerns the production of instructive, informative, and rhetorically savvy writing for Web-based locations and applications. Helps people find information, get things done, convey their opinions, build communities, and collaborate on complex projects. (Baccalaureate Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with D- or better or WR 121H with D- or better

WR 323. *ENGLISH COMPOSITION. (3 Credits)
Continued practice in writing with an emphasis on the elements of style: diction, tone, precision and economy, emphasis, figurative language. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1

WR 324. *SHORT STORY WRITING. (4 Credits)
Study and writing of the short story. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisites: WR 224 with D- or better
This course is repeatable for 8 credits.

WR 327. *TECHNICAL WRITING. (3 Credits)
Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in scientific and technological fields. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Equivalent to: WR 327H

WR 327H. *TECHNICAL WRITING. (3 Credits)
Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in scientific and technological fields. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; HNRS – Honors Course Designator
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Equivalent to: WR 327

WR 329. WRITING FOR LAW AND LAW SCHOOL. (3 Credits)
Improves the rhetorical and structural sophistication of persuasive writing, and gives practice in writing the law application essay. Provides a thorough review of logical, grammatical, usage, and sentence-level errors.
Prerequisites: WR 121 with C- or better or WR 121H with C- or better

WR 330. *UNDERSTANDING GRAMMAR. (3 Credits)
Advanced study of traditional grammatical forms and conventional grammatical terms with emphasis on the assumptions underlying the structure of traditional grammar. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1

WR 340. CREATIVE NONFICTION WRITING. (4 Credits)
Intermediate study and writing of creative nonfiction.
Prerequisites: WR 240 with D- or better
This course is repeatable for 8 credits.

WR 341. *POETRY WRITING. (4 Credits)
Study and writing of verse. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisites: WR 241 with D- or better
This course is repeatable for 8 credits.
WR 353. WRITING ABOUT PLACES. (3 Credits)
Utilizing personal experience, reading, and research, students study, discuss, and practice the conventions of writing about place far and near, global and local, for various audiences and in a range of formats.
Prerequisites: WR 121 with D- or better

WR 362. *SCIENCE WRITING. (3 Credits)
Students learn and practice the conventions for writing scientific material for a variety of audiences. Involves writing and research assignments, multimedia presentations, lecture, and in-class and online activities.
(Baccalaureate Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisites: WR 121 with C- or better or WR 121H with C- or better

WR 362H. *SCIENCE WRITING. (3 Credits)
Students learn and practice the conventions for writing scientific material for a variety of audiences. Involves writing and research assignments, multimedia presentations, lecture, and in-class and online activities.
(Baccalaureate Core Course)
Attributes: CSW2 – Core, Skills, WR II; HNRS – Honors Course Designator
Prerequisites: WR 121 with C- or better or WR 121H with C- or better
Equivalent to: WR 362

WR 383. FOOD WRITING. (4 Credits)
Students will write about food and food issues for a variety of audiences, including print and digital. Adapting their texts to become increasingly sophisticated critical thinkers and writers who can shape material effectively. Will also address food science and food studies from a historical and cultural background.
Prerequisites: (WR 121 with D- or better or WR 121H with D- or better) and (HC 199 [D-] or PHL 121 [D-] or WR 201 [D-] or WR 214 [D-] or WR 222 [D-] or WR 224 [D-] or WR 241 [D-] or WR 323 [D-] or WR 324 [D-] or WR 327 [D-] or WR 330 [D-] or WR 341 [D-] or WR 362 [D-])

WR 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: WR 399H
This course is repeatable for 16 credits.

WR 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: WR 399
This course is repeatable for 16 credits.

WR 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

WR 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

WR 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

WR 404. WRITING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

WR 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

WR 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

WR 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

WR 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

WR 411. *THE TEACHING OF WRITING. (4 Credits)
Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on students' own writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WR 414. ADVERTISING AND PUBLIC RELATIONS WRITING. (4 Credits)
Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy.
Prerequisites: WR 121 with B or better or WR 121H with B or better

WR 416. ADVANCED COMPOSITION. (4 Credits)
The development of style and voice in both the personal and the academic essay.
This course is repeatable for 8 credits.

WR 420. STUDIES IN WRITING. (4 Credits)
Selected topics in rhetoric and composition.
This course is repeatable for 8 credits.

WR 424. ADVANCED FICTION WRITING. (4 Credits)
Workshop. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisites: WR 324 with D- or better
This course is repeatable for 8 credits.

WR 435. SCIENTIFIC, TECHNICAL, & PROFESSIONAL COMMUNICATION CAPSTONE. (1 Credit)
Students complete a portfolio comprised of material generated throughout previous courses in the Certificate in Scientific, Technical, and Professional Communication. CROSSLISTED as COMM 435.
Equivalent to: COMM 435

WR 440. ADVANCED CREATIVE NONFICTION WRITING. (4-8 Credits)
An advanced course in creative nonfiction writing, centered around workshops of polished material.
Prerequisites: WR 340 with D- or better
This course is repeatable for 8 credits.

WR 441. ADVANCED POETRY WRITING. (4 Credits)
Advanced poetry workshop. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisites: WR 341 with D- or better
This course is repeatable for 8 credits.

WR 448. MAGAZINE ARTICLE WRITING. (4 Credits)
Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching.

WR 449. CRITICAL REVIEWING. (4 Credits)
Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture.

WR 462. *ENVIRONMENTAL WRITING. (4 Credits)
Writing about environmental topics from multiple perspectives. Includes science journalism, research and writing on current scientific issues and controversies, and theories of rhetoric and environmentalism. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: WR 121 with C- or better or WR 121H with C- or better
This course is repeatable for 12 credits.
WR 466. PROFESSIONAL WRITING. (4 Credits)
Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, ethics, and information design. Course readings concern what professional writers do and what theories govern their actions, bridging the gap between real-world problems and academic research.
Prerequisites: WR 121 with D- or better or WR 121H with D- or better

WR 475. RHETORICS OF RACE. (4 Credits)
By exploring the interrelated concepts of race, racialization, and racism, Rhetorics of Race problematizes race as a taken-for-granted phenomenon. Through reading, writing, and discussion, class participants study racial formations as historically specific and analyze contemporary forms of racism in the US. Readings and discussion pay close attention to how rhetoric and discourse have the power to reproduce and challenge white supremacy and race-based oppressions. Emphasizing the intersectionality of oppression—that racism necessarily takes place at intersections with other forms of subordination including sexism, homophobia, ableism, etc.—Rhetorics of Race draws from Lesbian and Gay Feminism, Chicano@ Feminism, and Critical Race Theory.

WR 485. CONTEMPORARY RHETORIC THEORY. (4 Credits)
Familiarizes students with a range of theories that have significantly contributed to or influenced the field of modern and contemporary rhetorical research. The course examines scholars, concepts, and methodologies that are central to contemporary rhetorical theory, while touching on key critical theorists who, although may be considered outside the field of rhetoric studies, impact the ways in which language, persuasion, and communication are currently understood. From this work, students develop their own perspectives and generate evidence-based arguments concerning those same issues.
Prerequisites: WR 121 with C- or better or WR 121H with C- or better

WR 493. *THE RHETORICAL TRADITION AND THE TEACHING OF WRITING. (4 Credits)
Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WR 495. *INTRODUCTION TO LITERACY STUDIES. (4 Credits)
Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WR 497. DIGITAL LITERACY AND CULTURE. (4 Credits)
From pencils to pixels, telegraphs to texts, and semaphores to social networking, Digital Literacy and Culture focuses on the relationships between human expression and the technologies that provide context, meaning, and shape to those expressions.
Prerequisites: WR 121 with C- or better or WR 121H with C- or better

WR 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

WR 500. MFA RESIDENCY. (12 Credits)
Low-Residency Masters of Fine Arts Residency. Required course for graduate students in the Low-Residency Masters of Fine Arts in Creative Writing.
This course is repeatable for 48 credits.

WR 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

WR 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

WR 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

WR 504. WRITING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

WR 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

WR 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

WR 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

WR 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

WR 509. PRACTICUM. (1-16 Credits)
Required practicum for graduate students teaching introduction to poetry writing.
This course is repeatable for 16 credits.

WR 511. THE TEACHING OF WRITING. (4 Credits)
Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on student’s own writing.

WR 512. CURRENT COMPOSITION THEORY. (4 Credits)
Current rhetoric and composition theory and its applications for teachers and writers.

WR 513. LOW-RESIDENCY MFA MENTORSHIP. (5-12 Credits)
Low-Residency Masters of Fine Arts Mentorship. Required course for graduate students in the Low-Residency Masters of Fine Arts in Creative Writing.
This course is repeatable for 36 credits.

WR 514. ADVERTISING AND PUBLIC RELATIONS WRITING. (4 Credits)
Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy.

WR 516. ADVANCED COMPOSITION. (4 Credits)
The development of style and voice in both the personal and the academic essay.
This course is repeatable for 16 credits.

WR 517. TEACHING PRACTICUM: ENGLISH COMPOSITION. (2 Credits)
Required practicum for graduate students teaching English Composition.

WR 518. TEACHING PRACTICUM: WRITING IN BUSINESS. (1 Credit)
Pedagogy practicum for graduate students in the teaching of professional writing and communication. This course is required for GTA’s who will teach WR 214, Writing in Business.
This course is repeatable for 3 credits.

WR 519. TEACHING PRACTICUM: WR 222. (1 Credit)
This practicum prepares graduate teaching assistants to teach Writing 222 (Argumentation). It includes both theoretical and practical components, providing an overview of the curriculum and addressing course development, lesson planning, and pedagogical best practices. The practicum is required for SWLF graduate students with a focus in rhetoric and composition.

WR 520. STUDIES IN WRITING. (4 Credits)
Selected topics in rhetoric and composition.
This course is repeatable for 8 credits.
WR 521. TEACHING PRACTICUM: FICTION WRITING. (1 Credit)
Required practicum for graduate students teaching introduction to fiction writing.
This course is repeatable for 3 credits.

WR 522. TEACHING PRACTICUM: POETRY WRITING. (1 Credit)
Required practicum for graduate students teaching introduction to poetry writing.
This course is repeatable for 3 credits.

WR 523. TEACHING PRACTICUM: NONFICTION WRITING. (1 Credit)
Required practicum for graduate students teaching introduction to nonfiction writing.
This course is repeatable for 3 credits.

WR 524. ADVANCED FICTION WRITING. (4 Credits)
Advanced fiction workshop with an emphasis on developing longer pieces.
This course is repeatable for 24 credits.

WR 525. ADVANCED SCIENTIFIC AND TECHNICAL WRITING. (4 Credits)
Combines scientific and technical writing with science journalism. Students will draw on a data set (preferably their own) to draft a scientific journal article, short grant proposal, magazine article, and letter of inquiry. They will also critically evaluate and edit documents by reviewing classmates’ drafts.

WR 540. ADVANCED NONFICTION WRITING. (4 Credits)
Advanced creative nonfiction workshop with an emphasis on developing longer pieces.
This course is repeatable for 24 credits.

WR 541. ADVANCED POETRY WRITING. (4 Credits)
Advanced poetry workshop.
This course is repeatable for 24 credits.

WR 548. MAGAZINE ARTICLE WRITING. (4 Credits)
Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching.
This course is repeatable for 8 credits.

WR 549. CRITICAL REVIEWING. (4 Credits)
Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture.

WR 562. ENVIRONMENTAL WRITING. (4 Credits)
Writing about environmental topics from multiple perspectives. Includes science journalism, research and writing on current scientific issues and controversies, and theories of rhetoric and environmentalism.
This course is repeatable for 8 credits.

WR 566. PROFESSIONAL WRITING. (4 Credits)
Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, ethics, and information design. Course readings concern what professional writers do and what theories govern their actions, bridging the gap between real-world problems and academic research.

WR 575. RHETORICS OF RACE. (4 Credits)
By exploring the interrelated concepts of race, racialization, and racism, Rhetorics of Race problematizes race as a taken-for-granted phenomenon. Through reading, writing, and discussion, class participants study racial formations as historically specific and analyze contemporary forms of racism in the US. Readings and discussion pay close attention to how rhetoric and discourse have the power to reproduce and challenge white supremacy and race-based oppressions. Emphasizing the intersectionality of oppression—that racism necessarily takes place at intersections with other forms of subordination including sexism, homophobia, ableism, etc.—Rhetorics of Race draws from Queer Black Feminism, Chican@ Feminism, and Critical Race Theory.

WR 585. CONTEMPORARY RHETORIC THEORY. (4 Credits)
Familiarizes students with a range of theories that have significantly contributed to or influenced the field of modern and contemporary rhetorical research. The course examines scholars, concepts, and methodologies that are central to contemporary rhetorical theory, while touching on key critical theorists who, although may be considered outside the field of rhetoric studies, impact the ways in which language, persuasion, and communication are currently understood. From this work, students develop their own perspectives and generate evidence-based arguments concerning those same issues.

WR 593. THE RHETORICAL TRADITION AND THE TEACHING OF WRITING. (4 Credits)
Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing.

WR 595. INTRODUCTION TO LITERACY STUDIES. (4 Credits)
Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling.

WR 597. DIGITAL LITERACY AND CULTURE. (4 Credits)
From pencils to pixels, telegraphs to texts, and semaphores to social networking, Digital Literacy and Culture focuses on the relationships between human expression and the technologies that provide context, meaning, and shape to those expressions.

WR 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 30 credits.

Applied Journalism Minor

The mission of the Applied Journalism minor is to provide the OSU students already invested in journalistic careers with a formal curriculum of classes and interactive media experiences that position contemporary journalism as innovative, rigorous and devoted to upholding stringent ethical standards, in which participants must implement critical thinking skills that account for global cultural awareness and diversity, while acknowledging the media’s multifarious and ever-expanding role in influencing, shaping and informing society and culture.

Applied Journalism course work will not only enable OSU student journalists to produce clear, concise, accurate stories for all types of media, it will encourage them to develop their abilities as journalistic entrepreneurs proficient at mobilizing whatever media forms best circulate that information. Working with academic advisors in their specific majors, participants in the AJ minor will determine how best to articulate their course work in order to serve their individual interests in audio, video, text, graphic and/or web content – with an academic premium placed on threading any/all of these media forms into innovative blends.
The curricular approach of the AJ minor centralizes a critical interface of classroom study and media experience, while the rigorous internship requirement at the center of the curriculum (one credit per term for a minimum of three credits) keeps students immersed in hands-on engagement via the award-winning facilities at Orange Media Network. By practicing their hand at a variety of broadcast, multimedia and print journalism platforms, the deep interface between curriculum and internship will enable participants to find their journalistic “homes,” revealing the media form they’ll focus on when entering the professional world.

The course offerings coordinated by the School of Writing, Literature and Film and the School of Art and Communication will equip participants with a solid command of the bedrock journalistic skills germane to any media form (data gathering, interviewing, drafting, storytelling, time management, document organization and putting every story through a stringent system of editing and fact-checking), while participating in courses like AJ 490, Media Law and Ethics, and Media Studies will build the capacity to create responsible and ethical communities. Participating in our array of classes, along with taking a leadership role in student- and professionally-run media outlets, will truly enable graduates in the Minor to acquire the journalistic skills crucial to obtain stellar careers in the global media industry.

The School of Writing, Literature, and Film offers the Master of Fine Arts degree in Creative Writing (fiction, poetry, nonfiction writing) at the Corvallis campus and a Low-Residency MFA partner program on the OSU-Cascades campus in Bend, Oregon.

The MFA Program in Creative Writing on the OSU Corvallis campus is a two-year, high residency, studio/research program that interweaves literary artistic practice and literary scholarship. Tracks in fiction, nonfiction, and poetry are supported by writing workshops led by nationally known writers, as well as by courses in form, craft, and theory. Intensive mentoring during the thesis year, training in creative writing pedagogy, professional internships, and opportunities for outreach and community engagement produce graduates who are both accomplished creative writers and advocates for the role of literary arts in American culture and society.

OSU-Cascades’s Low-Residency MFA is a two-year program combining writing workshop with studies in craft, literature, and vocation. The program offers intensive 10-day residency sessions in June and November and individualized mentorships by nationally known writers throughout the year. The program’s intensive low-residency format is designed to balance the modern writer's need for both solitude and community, for both self-reliance and responsibility—to give our students the freedom as well as the discipline to write. Our curriculum builds sustainable writing habits, develops skills needed to support a creative livelihood after graduation, and creates an environment for taking imaginative risks.

### Creative Writing Graduate Major

**Graduate Areas of Concentration**

Fiction, poetry, nonfiction writing

The School of Writing, Literature, and Film offers the Master of Fine Arts degree in Creative Writing (fiction, poetry, nonfiction writing) at the Corvallis campus and a Low-Residency MFA partner program on the OSU-Cascades campus in Bend, Oregon.

The MFA Program in Creative Writing on the OSU Corvallis campus is a two-year, high residency, studio/research program that interweaves literary artistic practice and literary scholarship. Tracks in fiction, nonfiction, and poetry are supported by writing workshops led by nationally known writers, as well as by courses in form, craft, and theory. Intensive mentoring during the thesis year, training in creative writing pedagogy, professional internships, and opportunities for outreach and community engagement produce graduates who are both accomplished creative writers and advocates for the role of literary arts in American culture and society.

**Minor Code: 796**

**Graduate Areas of Concentration**

Fiction, poetry, nonfiction writing

### English Graduate Major (MA, MAIS)

**Graduate Areas of Concentration**

Literature and culture; rhetoric, writing, and culture; film and visual studies

The School of Writing, Literature and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be literature and culture; rhetoric, writing, and culture; or film and visual studies. Graduate work in the school may also be applied to a Master of
English Graduate Minor

Arts in Interdisciplinary Studies degree or to minors in other advanced degree programs.

Major Code: 8900

English Graduate Minor

Minor Code: 8900

English Minor

Also available at OSU-Cascades

The minor in English allows students to concentrate in the area of the liberal arts and develop the reading and writing skills often demanded by employers.

There are three options for completing the English minor: General English, the English Literature, and the American Literature.

Students must receive a grade of C – or better in any course applied toward the minor. Such courses cannot be taken with S/U grading.

English Undergraduate Major (BA, HBA)

Undergraduate English majors must attain proficiency in a foreign language, as certified by the School of Language, Culture, and Society, equivalent to that assumed at the end of a second-year language sequence (211/212/213).

A grade of C – or better is required for all courses used to complete major requirements.

Courses taken to satisfy major requirements may not be taken with an S/U grade.

^ Writing Intensive Course (WIC)

The Film Studies minor is designed to give students a coherent introduction to film criticism, theory, and history (what those of us in the
field call "critical studies") as well as more specialized and/or advanced classes in film genres, authors (auteurs), and cultural studies.

**Film Minor Requirements**

- Minimum total credits (including electives): 28
- Minimum total upper-division credits (including electives): 12
- Minimum total credits in FILM classes: 24
- Minimum total upper-division credits in FILM classes: 8

To be selected from:

<table>

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Minor Code:** 268

**Writing Minor**

Also available via Ecampus.

The Writing minor benefits students who wish to learn about, practice and hone their writing skills, primarily to prepare them for their careers and to increase their qualifications for professional positions in a world where communication skills are ever more needed and revered by employers.

Some students with aspirations for graduate, law or medical school studies pursue the Writing minor to better enable themselves to write more proficiently at higher academic levels, where work is more rigorous and written output is expected to be of a very high level. Others engage in the Writing minor for the pure joy of expressing themselves, working with ideas and words, and many publish works in student publications on campus and in external publications. Writing minors may also participate in on-campus and off-campus internships for credit.

Students must receive a grade of C– or better in any course applied toward the minor. Such courses cannot be taken with S/U grading.

The Writing minor requires a minimum of 27 credits, as follows: a minimum of 11 credits from 100- to 300-level writing courses, plus a minimum of 12 credits from 400-level upper-division writing courses, plus one elective upper-division (300/400) 4-credit course in writing or literature.

The Oregon State University College of Pharmacy's Doctor of Pharmacy (PharmD) Program is accredited by the Accreditation Council for Pharmacy Education (http://www.acpe-accredit.org/), 135 S. LaSalle Street, Suite 4100, Chicago, IL 60603-4810, 312-664-3575, 800-533-3606; Fax, 312-664-4652. The PharmD degree is jointly conferred by Oregon State University and Oregon Health & Science University. The Oregon State University College of Pharmacy is a member of the American Association of Colleges of Pharmacy. The College of Pharmacy is dedicated to advancing societal health through leadership in pharmacy education, research, community engagement, and improved patient care.

Faculty
Professors Bearden, Block (Emeritus), Christensen, Kioussi, Kradjan (Emeritus), Leid, Mahmud, Olyaei, Stevens, Williams, Zabriskie
Associate Professors Alani, DeLander, Filtz, Furuno, Hartung, Haxby, Indra, Ishmael-Leid, McGregor, McPhail, Munar, P. Proteau, Singh
Assistant Professors Anderson, Coon, Herink, Irwin, Lee, Morgun, Philmus, S. Ramirez, Sahay, Sikora, Suchy, Sun, Taratula, Zumach
Senior Instructor I Linares
Senior Instructor II Zweber
Instructors Bowers, Russell, Schnabel, Starwalt
Professional Faculty Austin Haney, Beaumont, Clark, Corwin, Mettie, Ostrogorsky, Peters, J. Ramirez

Research Faculty
Professor, Sr. Research Simonson
Assistant Professors, Sr. Research G. Indra, Taratula, Yin, Zielke

College of Pharmacy
A petition from the pharmacists of Oregon led to the establishment of the Department of Pharmacy at Oregon State College in 1898. The department grew steadily and in 1917 became the School of Pharmacy. In 1983, it became the College of Pharmacy.

There are many career options available to individuals having a pharmacy degree. Some graduates are employed in privately owned or chain pharmacies and practice in a community setting while others practice in hospitals or nursing homes. The pharmaceutical industry offers careers in many areas including sales, marketing, public and government relations, manufacturing, and basic research. Pharmacy graduates are also employed in various local, state and federal health agencies, including the U.S. Public Health Service and the Department of Veterans Affairs. Individuals who decide to acquire advanced professional or graduate training may follow a career in research and academics.

College of Pharmacy graduates are eligible for licensure as pharmacists throughout the United States.

Courtesy Faculty and Preceptors
The College of Pharmacy utilizes practicing pharmacists, physicians, and pharmaceutical scientists as lecturers in the professional pharmacy program and in the college's graduate education program. This group includes over 400 pharmacy preceptors. These individuals make a very important and significant contribution to the educational programs of the college.

Pharmacy Information
Professional pharmacy education has advanced both in Oregon and throughout the United States in order to meet the expectations of an evolving health care system. To be eligible for admission to the PharmD program, students must complete the PharmD prerequisites, which will require three to four years of college study. Completion of the pharmacy professional program requires an additional four years.

After completion of the four-year professional pharmacy program, the graduate is eligible to take a licensing exam administered by state boards of pharmacy. After passing the licensing exam and completing required internship training, the graduate is licensed to practice as a registered pharmacist. While time requirements may vary from state to state, most graduates become licensed as pharmacists approximately three months after graduation from Oregon State University.

PharmD Prerequisites
Required PharmD prerequisites may be taken at Oregon State University or any other accredited college or university. The PharmD prerequisites must be completed prior to beginning the professional program.

Required courses must be taken for a letter grade; however, an exception may be made if a course is only offered pass/no pass. The student should make a specific request for waiver of grade requirement directly to the College of Pharmacy Admissions Committee prior to taking the course.

Students from community colleges, other colleges and universities, may transfer to OSU at any time to complete the PharmD prerequisites.

For more information on the prerequisites, please visit our website, http://pharmacy.oregonstate.edu/pharm-d-prerequisites.

Early Assurance Program
The Early Assurance Program is intended to guarantee highly qualified students admitted to Oregon State University the opportunity to enter the
College of Pharmacy

College of Pharmacy Doctor of Pharmacy (PharmD) program after the successful completion of the program prerequisites and the maintenance of certain academic criteria.

Further information on eligibility and the admissions process is available at http://pharmacy.oregonstate.edu.

The Professional Pharmacy Program

Enrollment in the four-year professional program is limited. Students must apply for admission to the professional pharmacy program. Application information and forms are available at http://www.pharmcas.org/. Contact the OSU College of Pharmacy for other information or visit the college website at http://pharmacy.oregonstate.edu/. Students are admitted to the professional program beginning fall term only.

Once admitted to the professional program, each student is assigned a faculty advisor. Students may register only for those courses for which they have completed the stated prerequisite courses. Exceptions are allowed only after approval by the College of Pharmacy’s Academic and Professional Standards Committee. Students will complete the first two years of their course work on the Oregon State University campus. The third professional year will be at the College of Pharmacy Satellite Campus at Oregon Health and Science University in Portland, Oregon. Most students choose to live in the Portland area during the third year. The fourth year will be off-campus at various pharmacy practice sites throughout the state of Oregon and the Northwest, including Hawaii. Contact the college directly for additional information about the PharmD curriculum.

Immunization and vaccination requirements for PharmD students are stricter than for other university students. PharmD students must satisfy all college immunization and vaccination requirements before starting classes and each year in the program. Failure to meet these requirements may delay enrollment.

The four-year professional pharmacy program provides a broad, scientifically based, clinically focused education. Through appropriate selection of professional elective courses in the fourth year, a student may concentrate in such areas as community, institutional, geriatric, or managed care pharmacy; or prepare for graduate study.

The pharmacy profession is experiencing profound changes. These changes include an increased focus toward patient care, in addition to the study of pharmaceutical products. All students will be required to give immunizations (shots), take medical histories from patients, and perform physical examinations. These experiences will involve asking sensitive questions and physically touching other people. Throughout the curriculum, students are assigned to off-campus practice sites where they are supervised by licensed pharmacists who are affiliate faculty members of the college. Practice sites are located primarily throughout Oregon. Completion of practicum courses at these off-campus practice sites in the fourth professional year generally requires up to 40 hours per week at the practice site. Practicum experience may include nights, evenings, and weekends. Practice sites are varied but include community pharmacies, hospitals, long-term care facilities, and outpatient clinics. PharmD students are required to provide their own transportation to sites.

The College of Pharmacy requires all pharmacy students to complete criminal background checks and recommends that all pharmacy students submit to drug screening. Criminal background checks and drug screenings have become standard requirements for employment in a pharmacy and placement in experiential rotations. Criminal background checks and drug screening may also be required for licensure. Students who cannot participate in experiential rotations due to criminal or other activities of concern that are revealed in criminal background checks or drug screenings may be unable to fulfill the requirements of the professional PharmD program. Therefore, it is in everyone’s interest to resolve any issues prior to commitment of resources by the college and by students.

PharmD students must immediately disclose any criminal activity that occurs prior to or while enrolled in the PharmD program. PharmD students must immediately reveal any action taken by a Board of Pharmacy, including but not limited to warning, probation and revocation of licensure. Failure to do so could result in dismissal from the PharmD program.

To become licensed by the state of Oregon to practice pharmacy, an individual must meet at least three criteria:

1. Possess a baccalaureate or PharmD degree in pharmacy from an accredited U.S. college of pharmacy.
2. Pass the North American Pharmacist Licensing Exam (NAPLEX), the Multistate Pharmacy Jurisprudence Examination (MPJE), and
3. Complete the Oregon Board of Pharmacy internship requirements.

Professional Associations

Students are encouraged to join various professional organizations. At OSU, they may choose the following:

NCPA—National Community Pharmacists Association—Open to all students in pharmacy; affiliated with the national parent organization.

Academy of Students of Pharmacy—Open to all students in pharmacy; includes affiliation with the American Pharmaceutical Association and the Oregon State Pharmacists Association.

American Society of Health-System Pharmacists—Open to all students in pharmacy; includes membership in the Oregon Society of Health-System Pharmacists.

Rho Chi—Membership in Beta chapter of Rho Chi, national pharmaceutical honor society, is selective and based on high scholastic achievement.

Phi Delta Chi—Membership in the Beta Iota chapter of this 100-year-old national pharmacy fraternity is limited. Individuals must meet the pledge requirements.

Phi Lamda Sigma—Membership in the Beta Zeta chapter of the national fraternity is limited to qualified individuals who meet requirements for professional development and leadership.

AACCP—American Association of Colleges of Pharmacy.

OSSP—Oregon State Student Pharmacists is an umbrella professional development organization for pharmacy students that includes membership in several national and state professional organizations.

Scholarships and Loans

Information about scholarships and loans is available from the College of Pharmacy website and the Office of Financial Aid and Scholarships, 541-737-2241.
WICHE Program
The College of Pharmacy accepts students supported through the Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Program. This interstate program provides the opportunity for students from the 12 cooperating states to obtain professional training not available in their home states. Residents from the states of Alaska and Nevada are eligible to apply for support in pharmacy.

To apply, the applicant must become "certified" by his or her home state. Applicants must apply to their home offices before October 15 prior to the academic year in which they plan to enroll. State certifying office contact information is available at http://wiche.edu/psep/cert-off.

Admission Standards
Equal Opportunity and Disability Accommodation
The College of Pharmacy, as a part of Oregon State University, is committed to the principle of equality of opportunity. The college does not discriminate on the basis of race, color, creed, religion, national origin, gender, sexual orientation, age, marital status, disability, and disabled veteran or Vietnam-era veteran status. When requested, the college will provide reasonable accommodation to otherwise qualified students with disabilities. Disabled students must work with and be approved by the Disability Access Services office.

Essential Characteristics of Student Pharmacists
The essential characteristics of student pharmacists identified below are drawn from a number of different resources that govern the professional expectations of pharmacists and student pharmacists, including but not limited to the national Pharmacy Code of Ethics, the Oath of a Pharmacist, and the Pledge of Professionalism. Please see Appendices to view these resources. The essential characteristics are intended to ensure that student pharmacists and pharmacists educated at the College of Pharmacy (the "college") have the capacity to meet federal and state regulations and policies that pertain to pharmacy, and to meet or exceed expectations that the public has for professional competence and behavior among pharmacy professionals.

Academic and professional environments present different challenges, but the essential characteristics required to succeed in pharmacy are common to both settings. Students in the college must observe and fulfill the essential characteristics, which have been divided into the following relevant categories: intellectual ability, empathetic and collegial communication skills, psychomotor skills, respect for diversity, high ethical standards, and behavioral and social expectations. Under each category are examples that describe and clarify these essential characteristics.

Intellectual Ability
• Comprehend, interpret and analyze new information
• Reason and carry out evidence-based decision making
• Use critical thinking skills and problem solving to evaluate information from multiple sources and synthesize a plan of action
• Thrive in a rigorous foundational and clinical science-based curriculum
• Participate in self- and programmatic-assessment intended to sustain a continual improvement process
• Be curious and pursue lifelong learning

Empathetic and Collegial Communication Skills
• Formulate concise, accurate synopses of essential information
• Contribute in a meaningful and collaborative manner in group discussions
• Interact constructively with other members of a health care team
• Communicate difficult concepts orally and in writing at an appropriate level for specific patients or audiences
• Listen empathetically and develop rapport
• Appropriately display and interpret nonverbal communication signals
• Communicate fluently in English
• Effectively utilize resources to communicate in non-English languages

Psychomotor Skills
• Participate effectively in preparation and distribution of sterile and non-sterile drug products
• Utilize and analyze information from varied sensory inputs
• Participate in drug administration, including injections
• Carry out tasks required for objective and subjective assessment of patient health
• Discern critical elements of a problem through observation

Respect for Diversity
• Communicate in a manner that respects all individuals
• Proactively seek ways to provide an inclusive environment that addresses unique patient needs
• Provide care without judgment of a patients’ personal choices or situation
• Individualize care with consideration of cultural norms for the patient
• Individualize care with consideration of unique therapeutic needs or challenges

High Ethical Standards
• Maintain confidentiality
• Act with compassion, empathy and altruism
• Accept responsibility and provide leadership
• Abstain from illicit drug use
• Act with integrity and expect the same of professional colleagues

Behavioral and Social Expectations
• Demonstrate a history of appropriate behavior in personal actions
• Perform effectively and display sound judgment while under stress
• Perform appropriately in academic or professional settings
• Address disagreements with tact and avoid public altercations
• Exhibit the capacity to adapt to change readily and adjust responses in dynamic, unpredictable situations
• Accept constructive criticism and adapt behavior

Requirements for Progression
Doctor of Pharmacy (PharmD) students must meet university requirements and standards and adhere to the university Student Conduct Regulations (http://studentlife.oregonstate.edu/)
To advance into the third professional year, students:

1. Must have completed two approved elective courses with a grade of C– or better in graded courses, or with a P in Pass/No Pass (P/N) courses.
2. Must successfully complete a background check during the summer preceding the third professional year.
3. Must maintain a current Oregon Pharmacy Intern License.
4. Must have a current CPR certification from an approved provider.
5. Must have earned a bachelor's degree.
6. Must fulfill the essential characteristics of student pharmacists identified by the college.

To advance into the fourth professional year, students:

1. Must successfully complete all courses that are included in the curriculum of the first three professional years, including electives with a cumulative GPA of 2.00 and a P (Pass) in all P/N (Pass/No Pass) courses.
2. Must have no more than one D grade in pharmacy courses.
3. Must have completed three approved elective courses, one of which must be completed after the second professional year, with a grade of C– or better in graded courses, or with a P in Pass/No Pass (P/N) courses.
4. Must maintain a current Oregon Pharmacy Intern License. (Licensure in additional states may be required for students completing clerkships outside of Oregon.)
5. Must have a current CPR certification from an approved provider.
6. Must be willing to meet site specific requirements for all assigned clerkships outside of Oregon.)
7. Must verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to advanced experiential learning.
8. Must fulfill the essential characteristics of student pharmacists identified by the college.

To graduate with the PharmD degree, students:

1. Must have met all requirements defined for progression through each professional year.
2. Must successfully complete all required and elective advanced clerkships with a passing grade.
3. Must fulfill the essential characteristics of student pharmacists identified by the college.

Student Standing in the College of Pharmacy

The Academic and Professional Standards Committee ("APSC") may, at any time, review a student's standing in the college. APSC is charged with ensuring that students are aware of academic performance or behavior which is not consistent with essential characteristics of student pharmacists and that, therefore, places their completion of the PharmD program at risk. Academic performance and behavioral concerns are often evaluated independently but have equal significance in determining whether a student is meeting the essential characteristics of student pharmacists. Severe, continuing or repeated academic or behavioral problems can result in dismissal from the PharmD program.

APSC, when necessary, provides student standing information to communicate performance deficits, insufficient student progress, and lack of progress in a student addressing academic or behavioral issues.
problems. APSC and the college's director of student services/head advisor provide students guidance regarding what the college expects from a student to increase their opportunities for success in the college. Student performance and progress are evaluated on a case-by-case basis, utilizing the experience of APSC members. APSC uses good faith, informed judgment to determine appropriate recommendations for each student's situation.

The following student standing notifications may be received by students who are demonstrating performance deficits or insufficient progress in the PharmD program:

Warning
Warning status is cautionary and identifies student performance which may place a student’s completion of the PharmD program at risk.

Students are placed on warning status if they have a term core pharmacy GPA of less than 2.5 or receive 2 or more C grades in core or elective professional courses in a term. Students may also be placed on Warning status if they engage in behavior that does not meet the Essential Characteristics of Student Pharmacists.

- The first time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor to discuss their situation.
- The second time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor and develop a holistic action plan for overcoming academic and non-academic barriers to success. They must subsequently execute this action plan.
- The third time students are placed on Warning status, they are automatically placed on Probation.

Probation
Probation status identifies an academic or behavioral concern that places the student’s completion of the PharmD program at serious risk. Probation may be accompanied by a delay in progression at the determination of the APSC.

Students are placed on Probation status if they have a term core pharmacy GPA of less than 2.0 or if they receive a C– or lower grade in any core or elective professional course. A third warning automatically results in Probation.

Student behavior that is a significant departure from the Essential Characteristics of Student Pharmacists will also result in Probation status. Such behavior includes, but is not limited to, violations of Academic Integrity policies, criminal violations, repeated or intentional violation of college policies, or significant breaches of the University Student Conduct Code (see http://studentlife.oregonstate.edu/studentconduct/).

Students on Probation status must follow recommendations of the APSC and the Director of Student Services/Head Advisor. Students on Probation status must meet with the Director of Student Services/Head Advisor following each term to review their progress and standing in the college. Students that successfully fulfill the recommendations prescribed will be removed from Probation status.

Students that fail to follow or are unsuccessful in fulfilling the recommendations will be suspended and evaluated for dismissal from the college. Students who are placed on Probation status for the second time will also be evaluated for dismissal from the college.

Suspension
Students that have failed to make adequate progress, or who have displayed severe or repeated departures from the Essential Characteristics of Student Pharmacists, may be placed on Suspension status. The college will place an indefinite hold on the progression of a student placed on Suspension status until APSC can adequately evaluate whether the student will be allowed to continue in the PharmD program. Students engaged in an appeal of their dismissal from the college will also be placed on Suspension status.

Students placed on Suspension status will not be allowed to progress in the PharmD program. APSC will review the status of a student on Suspension no later than the beginning of the next academic term. After review, ASPC may recommend immediate Dismissal from the college, recommend that the student be continued on Suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student’s Suspension status. If a plan for progression is developed by ASPC, the student will be changed to Probation status. If at any time it becomes evident that the student will not be able to address concerns and graduate within the required five-year window, the student will be dismissed immediately.

Dismissal
Students will be dismissed from the professional program if they are not making adequate academic progress, or if they fail to constructively address professional or behavioral concerns.

Graduate Majors
- Pharmaceutical Sciences (p. 908)
- Pharmacy, Doctor of Pharmacy (p. 908)

Minors
- Pharmaceutical Sciences (p. 908)

Pharmacy
PHAR 201. PHARMACY ORIENTATION. (1 Credit)
Career opportunities in pharmacy including community and institutional practice, government, and industry. Discussion of available educational pathways. Open to non-pharmacy students. Graded P/N.

PHAR 210. TERMINOLOGY OF THE HEALTH SCIENCES. (2 Credits)
Provides the student in any of the health science disciplines or pre-professional studies with a working knowledge of the terminology used in the health sciences. Open to non-pharmacy students.

PHAR 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 405. READING & CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 407. SEMINAR. (1-16 Credits)
One-credit section. Graded P/N.
This course is repeatable for 16 credits.

PHAR 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.
PHAR 505. READING & CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 507. SEMINAR. (1-16 Credits)
One-credit section. Graded P/N.
This course is repeatable for 16 credits.

PHAR 525. FOUNDATIONS OF DRUG ACTION I. (3 Credits)
Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug absorption and distribution, drug design and characterization of drug interactions with specialized cellular components, and drug biotransformation or excretion.

PHAR 526. FOUNDATIONS OF DRUG ACTION II. (3 Credits)
Drug actions in the autonomic nervous system (ANS) provide a template for understanding drug actions throughout the body. This course provides a complete consideration of pharmacologic and medicinal chemistry principles as they relate to drug interactions with the ANS. Treatment options for selected diseases that respond to drugs acting on the ANS are also addressed.

PHAR 527. FOUNDATIONS OF DRUG ACTION III. (3 Credits)
Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug activation of biological response via biochemical or molecular transduction mechanisms, pharmacogenetics and pharmacogenomics, and drug-induced toxicities.

PHAR 537. BIOORGANIC CHEMISTRY. (3 Credits)
A contemporary treatment of the chemistry, enzymology and molecular genetics techniques used in studying major natural products biosynthesis pathways in nature. Offered alternate years.

PHAR 563. CANCER AND CHEMOPREVENTION. (2 Credits)
A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine.

PHAR 571. EXPERIMENTAL APPROACH TO BIOPHARMACEUTICS. (3 Credits)
Experimental protocol, rationale, and procedures in clinical pharmacokinetic, pharmacokinetic, and biopharmaceutical experiments.

PHAR 572. APPLIED BIOPHARMACEUTICS AND PHARMACOKINETICS. (3 Credits)
Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states.

PHAR 573. CURRENT TOPICS IN PHARMACEUTICAL SCIENCES. (1-3 Credits)
Critical evaluation of contemporary pharmaceutics and pharmacokinetics research articles.
This course is repeatable for 9 credits.

PHAR 574. NANOMEDICINE. (3 Credits)
Introduction to the interdisciplinary field of nanomedicine, the use of nanoscale (1-100 nm) phenomena and materials in biomedical applications. Reviews the basic principles of nanotechnology relevant to areas such as diagnostic/molecular imaging, drug delivery, and other novel therapeutics. Topics will be described through both survey of historical developments and the latest scientific developments in the field of nanomedicine.

PHAR 591. PHARMACOLOGY I. (5 Credits)
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacological rationale for therapeutic and toxicologic treatment outcomes.

PHAR 592. PHARMACOLOGY II. (5 Credits)
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes.

PHAR 593. PHARMACOLOGY III. (5 Credits)
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes.

PHAR 601. RESEARCH. (1-16 Credits)
This course is repeatable for 99 credits.

PHAR 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PHAR 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

PHAR 669. INTRODUCTION TO GRANT PROPOSAL WRITING. (2 Credits)
To introduce students to the fundamentals of writing grant proposals to the National Institute of Health (NIH), different funding mechanisms, as well as the grant reviewing process. CROSSTRAITED as VMB 669.
Equivalent to: VMB 669
This course is repeatable for 20 credits.

PHAR 699. SPECIAL TOPICS IN PHARMACEUTICAL SCIENCES. (3 Credits)
This course is repeatable for 99 credits.

PHAR 701. RESEARCH AND SCHOLARSHIP. (1-8 Credits)
Research conducted by professional pharmacy students under faculty supervision.
This course is repeatable for 12 credits.

PHAR 703. THESIS. (1-8 Credits)
Independent study and analysis that culminates in a thesis.
This course is repeatable for 999 credits.

PHAR 705. READING AND CONFERENCE. (1-8 Credits)
May be repeated for credit.
This course is repeatable for 12 credits.

PHAR 706. INTRODUCTION TO HEALTH DISPARITIES. (2 Credits)
An examination of the multifaceted issue of health disparities in the U.S. healthcare system. Marginalized groups with disparities based upon racial/ethnic, gender, sexual preference and identity, disability, physical and mental health, geography and socioeconomics will be examined at the individual, systematic, and institutional levels.

PHAR 707. CAREER PERSPECTIVES AND PROFESSIONAL DEVELOPMENT. (2 Credits)
Students will explore the necessary knowledge, skills, and abilities in order to support professional role formation and ongoing professional development. Students will practice skills related to identifying personal strengths and weaknesses, building self-awareness, creating and maintaining a robust professional development plan, communicating professionally in written and oral formats, participating as a team leader and team member, as well as fine-tuning relationship building skills.
opportunities in senior care pharmacy. Graded P/N.

member of the interdisciplinary senior healthcare team, and employment
medication-related problems in the elderly, the role of the pharmacist as a
introduction to the senior patient, the senior care healthcare environment,

This course is repeatable for 2 credits.

persons with physical and mental disabilities. Graded P/N.

Students develop an understanding of healthcare challenges faced by
PHAR 719. POISONS AND TOXINS. (2 Credits)

examines the issue of prescription drug abuse among the general
PHAR 722. PHARMACY PRACTICE III: PRINCIPLES OF INTEGRATED
PATIENT CARE. (4 Credits)

students will learn to critique and evaluate health-related scientific journal articles using valid established techniques.
PHAR 726. PRINCIPLES OF EVIDENCE-BASED MEDICINE II: DRUG LIT
EVAL. (3 Credits)

students will learn to identify appropriate information resources and will systematically collect, arrange, and analyze pertinent information related to a particular patient or drug product problem.
PHAR 733. PHARMACEUTICS I. (3 Credits)

students develop an in-depth understanding of drug dosage formulation concepts to optimize drug therapy. Approved for use on a graduate program of study.
PHAR 734. PHARMACEUTICS II. (3 Credits)

preformulation and formulation factors affecting the development, production and use of pharmaceutical dosage forms, including ingredients in, and physical, chemical, and biological properties affecting storage, stability, and handling of dosage forms. Lec/lab. Approved for use on a graduate program of study.

PHAR 708. INTRODUCTORY PHARMACY PRACTICE EXPERIENCES:
COMMUNITY CARE I. (2 Credits)

students engage in on-site experience in community pharmacy. Learning is focused on understanding the scope of practice and roles of pharmacy personnel, while demonstrating skills related to safe and legal drug procurement and distribution in the community setting. Students observe patient counseling, develop foundational expertise in OTC and prescription drug products, and conduct medication reviews to identify drug-related problems. In-class patient case discussions are coordinated with patient care topics in other first-year courses and explore legal, ethical and culturally sensitive decision-making. Graded P/N.

PHAR 709. INTRODUCTORY PHARMACY PRACTICE EXPERIENCES:
COMMUNITY CARE II. (2 Credits)

students engage in on-site experience in community pharmacy. Learning is focused on understanding the scope of practice and roles of pharmacy personnel, while demonstrating skills related to safe and legal drug procurement and distribution in the community setting. Students observe patient counseling, develop foundational expertise in OTC and prescription drug products, and conduct medication reviews to identify drug-related problems. In-class patient case discussions are coordinated with patient care topics in other first-year courses and explore legal, ethical and culturally sensitive decision-making. Graded P/N.

PHAR 712. FOUNDATIONS OF PATIENT SAFETY AND INTERPROFESSIONAL PRACTICE. (1 Credit)

Techniques, best practices and opportunities for improving patient safety through interprofessional teamwork. Graded P/N.

PHAR 713. SPANISH FOR PHARMACY PROFESSIONALS. (2 Credits)

For the pharmacy professional with little or no Spanish language background (those with some Spanish language skills would find it beneficial). The course is presented in a video format with in-class facilitator for discussion. Provides basic Spanish grammar instruction but the focus will be on vocabulary and communication in a community pharmacy environment.

PHAR 714. COMPLEMENTARY MEDICINE. (3 Credits)

Covers vitamins and microminerals and their role in biochemical processes, maintaining health and preventing disease. The course also covers the etiology of obesity and treatment modalities. The course builds upon the general background of students in biochemistry and physiology to provide a common baseline of knowledge and allow for integration of concepts required to understand preventive medicine.

PHAR 715. PRESCRIPTION DRUG ABUSE. (2 Credits)

Examines the issue of prescription drug abuse among the general population. Graded P/N.

PHAR 716. HEALTHCARE CHALLENGES FOR PERSONS WITH DISABILITIES. (1 Credit)

Students develop an understanding of healthcare challenges faced by persons with physical and mental disabilities. Graded P/N. This course is repeatable for 2 credits.

PHAR 717. SENIOR CARE PHARMACY. (2 Credits)

Provides an overview of senior care pharmacy practice including an introduction to the senior patient, the senior care healthcare environment, medication-related problems in the elderly, the role of the pharmacist as a member of the interdisciplinary senior healthcare team, and employment opportunities in senior care pharmacy. Graded P/N.

PHAR 718. NATURAL PRODUCT DRUG DEVELOPMENT. (2 Credits)

Overview of the process of drug development, with an emphasis on natural product sources of lead components. Top-selling and mainstay drugs will be researched in literature assignments and discussed to illustrate historical and current drug development paradigms. In addition, future approaches to drug discovery and paradigm shifts to incorporate concepts such as network pharmacology will be explored.

PHAR 719. POISONS AND TOXINS. (2 Credits)

Covers many different types of substances, including common household poisons, poisonous plants and mushrooms, toxic gases/metals, shellfish toxins, and other natural toxins. Aspects of the chemistry and pharmacology of the poisons, antidotes/treatments, and occasional case studies will be covered. Historical examples and current events will also be incorporated into the course materials.

PHAR 720. PHARMACY PRACTICE I-PRINCIPLES OF INTEGRATED PATIENT CARE. (4 Credits)

Pathophysiology of common conditions, self-care therapeutics, clinical data collection and documentation, prescription drug information and education, patient counseling skills, basic pharmacy calculations.

PHAR 721. PHARMACY PRACTICE II. (3 Credits)

Interviewing skills; patient drug, education; nonprescription drugs.

PHAR 722. PHARMACY PRACTICE III: PRINCIPLES OF INTEGRATED PATIENT CARE. (4 Credits)

Pharmacy Practice III continues the progression of topics introduced in Pharmacy Practice I and II. Patient interview and assessment techniques, communication skills, nonprescription products, and compounding techniques are emphasized in the lab. Lec/lab.

PHAR 726. PRINCIPLES OF EVIDENCE-BASED MEDICINE II: DRUG LIT EVAL. (3 Credits)

students will learn to critique and evaluate health-related scientific journal articles using valid established techniques.

PHAR 728. PHARMACY LAW. (2 Credits)

Introduces the student to the federal and state agencies and regulations that govern pharmacy practice and provides students with foundational knowledge and skills to comply with state and federal regulations. Emphasis will be on regulations from the Food and Drug Administration, Drug Enforcement Administration, and Oregon Board of Pharmacy.

PHAR 729. PRINCIPLES OF EVIDENCE-BASED MEDICINE I: INFORMATION SCIENCE. (3 Credits)

Students will learn to identify appropriate information resources and will systematically collect, arrange, and analyze pertinent information related to a particular patient or drug product problem.

PHAR 733. PHARMACEUTICS I. (3 Credits)

Students develop an in-depth understanding of drug dosage formulation concepts to optimize drug therapy. Approved for use on a graduate program of study.

PHAR 734. PHARMACEUTICS II. (3 Credits)

Preformulation and formulation factors affecting the development, production and use of pharmaceutical dosage forms, including ingredients in, and physical, chemical, and biological properties affecting storage, stability, and handling of dosage forms. Lec/lab. Approved for use on a graduate program of study.
PHAR 735. FOUNDATIONS OF DRUG ACTION I. (3 Credits)
Introductory course into actions of chemicals on physiological systems. Concepts encompass drug absorption and distribution, drug design and characterization of drug interactions with specialized cellular components, drug activation of biological response via biochemical or molecular transduction mechanisms, drug-induced toxicities and drug biotransformation or excretion. Approved for use on a graduate program of study.

PHAR 736. FOUNDATIONS II: AUTONOMIC DRUG ACTIONS. (3 Credits)
Drug actions in the autonomic nervous system (ANS) provide a template for understanding drug actions throughout biological systems. Provides a complete consideration of pharmacologic and medicinal chemistry principles as they relate to drug interactions with the ANS. Treatment options for selected diseases that respond to drugs acting on the ANS are also addressed.

PHAR 737. FOUNDATIONS OF DRUG ACTION II. (3 Credits)
Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug activation of biological response via biochemical or molecular transduction mechanisms, pharmacogenetics and pharmacogenomics, and drug-induced toxicities. Approved for graduate credit.

PHAR 738. HEALTHCARE SYSTEMS I. (3 Credits)
Examination of the U.S. healthcare industry and how it relates to pharmacy. Emphasis is given to changing relationships between healthcare systems, patients, providers of care, hospitals, insurers, employers and the government.

PHAR 739. HEALTHCARE SYSTEMS II. (2 Credits)
Examination of the U.S. healthcare industry and the public healthcare system, as they relate to pharmacy. Emphasis is given to changing relationships between healthcare systems, patients, providers of care, hospitals, insurers, employers and the government.

PHAR 740. PHARMACY PRACTICE IV. (3 Credits)
Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab.

PHAR 741. PHARMACY PRACTICE V. (3 Credits)
Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab.

PHAR 742. PHARMACY PRACTICE VI. (3 Credits)
Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab.

PHAR 743. INTRODUCTORY PRACTICE EXPERIENCES: COMMUNITY CARE II. (2 Credits)
Students are assigned to community, institutional and ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N.
Corequisites: PHAR 740, PHAR 752

PHAR 744. INTRODUCTORY PRACTICE EXPERIENCES: AMBULATORY CARE I. (2 Credits)
Students are assigned to institutional or ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N.

PHAR 745. INTRODUCTORY PRACTICE EXPERIENCES: AMBULATORY CARE II. (2 Credits)
Students are assigned to institutional or ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N.

PHAR 746. PHARMACY MANAGEMENT. (3 Credits)
Concepts, principles and fundamentals of pharmacy financial and personnel management. Approved for use on a graduate program of study.

PHAR 747. INFECTIOUS DISEASES AND THEIR TREATMENTS. (3 Credits)
Introduction to infectious disease processes and antimicrobial agents, including general clinical microbiology, and structure and mechanism of action of anti-bacterial, anti-viral, anti-fungal, and anti-parasitic agents.

PHAR 748. DRUG ACTIONS IN IMMUNOLOGY AND INFLAMMATION. (3 Credits)
Review of foundational concepts in immunology, inflammation and tissue repair; and modification of these processes therapeutically through an understanding and application of anti-inflammatory agents and immune system modulators.

PHAR 750. PHARMACOKINETICS/BIOPHARMACEUTICS. (4 Credits)
Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states. Approved for use on a graduate program of study.

PHAR 752. INTEGRATED DRUG STRUCTURE, ACTION, AND THERAPEUTICS I. (7 Credits)
Drug therapy of central nervous system disorders; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations. Approved for use on a graduate program of study.

PHAR 753. INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS II. (7 Credits)
Pulmonary, renal, gastrointestinal, and cardiovascular disorders. Drug therapy of pulmonary and cardiovascular disorders; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations. Approved for use on a graduate program of study.

PHAR 754. INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS III. (6 Credits)
Drug therapy of endocrine disorders, and men's and women's health issues; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations. Approved for use on a graduate program of study.
PHAR 760. INTRODUCTORY PHARMACY PRACTICE EXPERIENCES: HEALTH SYSTEMS. (2 Credits)
Supervised introductory professional education in a variety of pharmacy service settings within a health system. Emphasis will be on gaining familiarity with the provision patient centered care through a variety of pharmacy services (e.g., inpatient pharmacy, transitions of care, acute care clinical services) which will expose students to the issues and disease states affecting the acute patient population, the types of health care providers, and relevant policies and procedures. Graded P/N. This course is repeatable for 6 credits.

PHAR 761. ADVANCED INTEGRATED DRUG THERAPY I. (8 Credits)
Pathophysiologic basis of disease and drug therapy management.

PHAR 762. ADVANCED INTEGRATED DRUG THERAPY II. (8 Credits)
Pathophysiologic basis of disease and drug therapy management.

PHAR 763. PATHOPHYSIOLOGY AND THERAPEUTICS III. (7 Credits)
Pathophysiologic basis of disease and drug therapy management.

PHAR 764. PHARMACY PRACTICE VII. (3 Credits)
Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations.

PHAR 765. PHARMACY PRACTICE VIII. (3 Credits)
Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations.

PHAR 766. PHARMACY PRACTICE IX. (3 Credits)
Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. Lec/lab/rec.

PHAR 767. PRE-APPE READINESS AND COMPLEX CASE ANALYSIS. (3 Credits)
Confidence and competence needed for advanced practice settings are enhanced utilizing a mixture of benchmark assessment tools and small case discussions of complex patient cases. The focus is to assure readiness to integrate into inter-professional collaborative health care settings and serve diverse patient populations. Knowledge, skills, attitudes, and professional values are assessed and developed. Formative and summative feedback delivered through faculty, peer and self-evaluation help guide student preparation for advanced experiences and life-long learning. Graded P/N.

PHAR 768. APPLIED LAW AND ETHICS. (1 Credit)
Student understanding of pharmacy law is assessed, and discussed in the context of pharmacists’ ability to properly respond when legal concepts may not align with ethical decision making in a health profession. Students will apply a framework for ethical decision-making and identify personal strategies to maintain currency in pharmacy law and applied ethical decision making.

PHAR 770. ADVANCED PHARMACOKINETICS. (4 Credits)
A physiologic approach to understanding advanced pharmacokinetic principles. Approved for use on a graduate program of study.

PHAR 773. EBM III: EVIDENCE SYNTHESIS AND DECISION ANALYSIS. (3 Credits)
Covers the principles required for evidence-based medicine, including interpreting and applying results from clinical, humanistic, and economic research to medical decision-making. Approved for use on a graduate program of study.

PHAR 774. PRINCIPLES OF EVIDENCE-BASED MEDICINE IV: DRUG POLICY. (3 Credits)
This three-credit course will cover a variety of topics related to drug policy and drug use management. Population-based strategies to improve drug use will be emphasized along with developing an evidence-based process for evaluating new drugs. A major course project, evaluating a new drug, will focus on application of principles taught in this and previous courses.

PHAR 775. PHARMA-CSI. (2 Credits)
Application of PK, PD, and P’genomic concepts, principles, and equations in computer workshops to solve drug therapy misadventures. Approved for use on a graduate program of study.

PHAR 777. ACUTE MEDICAL EMERGENCIES. (2 Credits)
Drug therapy management in the critically ill patient. Graded P/N.

PHAR 778. ADVANCED ADULT MEDICINE. (2 Credits)
Adult medicine elective utilizes actual patient cases to enhance knowledge of pharmacy and the pharmacologic basis of therapeutics in the setting of adult medicine, emphasizing application or current guidelines and major clinical trials for commonly encountered disease states. Graded P/N.

PHAR 780. COMMUNITY PHARMACY CLERKSHIP. (8 Credits)
Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information. Graded P/N. This course is repeatable for 32 credits.

PHAR 785. AMBULATORY PRIMARY CARE CLERKSHIP. (8 Credits)
Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information to patients and health care professionals. Graded P/N. This course is repeatable for 32 credits.

PHAR 790. GENERAL INTERNAL MEDICINE CLERKSHIP. (8 Credits)
Supervised advanced professional education located in internal medicine inpatient pharmacy practice environment. Emphasis is placed on the application of biomedical and pharmaceutical sciences to direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess, and monitor pharmacotherapy involved in a wide variety of acute and chronic diseases. In addition, students will provide drug information to other health care professionals and patients. Graded P/N. This course is repeatable for 32 credits.
PHAR 792. HOSPITAL/HEALTH SYSTEMS PATIENT CARE CLERKSHIP. (8 Credits)
Supervised advanced professional education located in various hospital or health care systems patient care-oriented settings. Emphasis is placed on application of pharmaceutical sciences and pharmacotherapy to patient care. Graded P/N. This course is repeatable for 24 credits.

PHAR 795. PATIENT CARE ELECTIVE CLERKSHIP. (8 Credits)
Supervised advanced professional education located in various patient care-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to direct and indirect pharmaceutical care. Specialties include but are not limited to geriatrics, pediatrics, infectious disease, oncology, general patient care, nutrition support, nuclear pharmacy, home infusion, critical care, anticoagulation, pain management, etc. Graded P/N. This course is repeatable for 24 credits.

PHAR 797. ELECTIVE CLERKSHIP. (8 Credits)
Supervised advanced professional education located in various pharmacy-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to a variety of environments involving pharmacy. Specialties include but are not limited to managed care, drug information, administration, pharmaceutical research, pharmaceutical industry, professional pharmacy organizations, etc. Graded P/N. This course is repeatable for 24 credits.

PHAR 798. PHARMACY HEALTH ADMINISTRATION. (8 Credits)
Provides students the opportunity to integrate and apply leadership and business principles necessary to operate and manage a pharmacy business or department in a diverse organizational environment. This course is repeatable for 16 credits.

PHAR 799. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Pharmaceutical Sciences Graduate Major (MS, PhD)

Graduate Areas of Concentration
Biopharmaceutics, medicinal chemistry, natural products chemistry, pharmaceutics, pharmacoeconomics, pharmacokinetics, pharmacology, toxicology

The emphasis of most graduate programs is on foundational research investigating drug discovery, chemistry, mechanisms of drug action, molecular biology, genomics, drug metabolism, and dosage form design.

Faculty in the department are involved in identification of new drugs from the ocean and other biological sources, biochemical toxicology, and drug metabolism studies; the design and development of new drug delivery and dosage forms; and studies on the clinical efficacy and distribution of drugs through the body as a function of dosing regimen or dosage form. They are using biochemical and molecular biological techniques to investigate signal transduction pathways mediated by phospholipids and retinoids; electrophysiological approaches to studying ion channel function; and the molecular biology of nuclear receptors and factors regulating gene expression.

Lifelong health and well-being for every person, every family, every community.

College of Public Health and Human Sciences

Inspired by our mission as a leading land grant university, we create synergy in teaching, research, and outreach to develop the next generation of globally minded public health and human sciences professionals. Through interdisciplinary research and innovative curricula, we advance knowledge, policies, and practices that improve population health in communities across Oregon and beyond.

The College of Public Health and Human Sciences offers a comprehensive array of undergraduate and graduate education programs under the public health umbrella.

Our graduates are employed in a wide variety of research, education, service, management, and leadership positions in business, government, industry, education, and agencies related to health, nutrition, education, community development, and family relationships.

The college’s scholarly and creative work improves the lives of individuals, families, and communities. Reflecting the strength and diversity of our faculty and disciplines, this work includes laboratory-based investigations of nutrition and physiology.

Our outreach and engagement initiatives and programs serve individuals, families, professionals, and communities across the campus, Oregon, the nation, and the world. This outreach includes OSU Extension’s Family and Community Health program, active continuing education initiatives ranging from credit and noncredit courses to full degrees, and service programs that serve OSU students, faculty, staff, as well as individuals and families.

Degree Programs

Advanced degrees include the Master of Public Health (MPH), the Master of Science (MS), the Master of Athletic Training (MATRN), the Master of Adapted Physical Education (MAPE) and Doctor of Philosophy (PhD). The MS and PhD degrees are offered in units of the college. Most units also participate in the Master of Arts Interdisciplinary Studies (MAIS) graduate degree program.

Advising

The Office of Academic Advising is a primary source of information for all College of Public Health and Human Sciences undergraduate students. Students receive accurate, thorough, and timely information regarding their degree requirements, academic progress, job opportunities, and campus activities. Professional advisors oversee the undergraduate students within the college. Faculty members also serve a vital role to undergraduates by providing professional and career advice. Faculty members often involve students in research and professional activities that create opportunities for leadership, personal growth, and discovery.

Internships and Practicums

To help prepare students in the College of Public Health and Human Sciences for careers, many of the degree programs include internships and/or practicum experiences as part of their academic programs. These opportunities provide students with invaluable work experience in their field of study and may lead to postgraduate employment. Faculty members help place students and assist in the structure of these experiences. Additional information is available at http://health.oregonstate.edu/internships.

Double Degrees

Undergraduates with majors in the College of Public Health and Human Sciences can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

Scholarships

The College of Public Health and Human Sciences offers a variety of scholarships to deserving students. Many are reserved for students in designated majors or for first-year students. A list of scholarships and application forms are available from the college’s website at http://health.oregonstate.edu/students/current/undergraduate/scholarships.

Additional scholarship information is also available at the OSU Office of Financial Aid and Scholarships.

College Requirements

A grade of C– or higher is required for all courses in a student’s undergraduate program of study.

Public Health Graduate Major (MPH, PhD)

Graduate Areas of Concentration

Biostatistics (MPH only); environmental and occupational health (MPH, PhD); epidemiology (MPH, PhD); health management and policy (MPH only); health policy (PhD only); health promotion and health behavior (MPH, PhD); global health (MPH, PhD); public health practice (MPH only)

The PhD and MPH in public health degree programs are summarized below.

For further information about graduate programs in public health, visit the website at http://health.oregonstate.edu/degrees/graduate/public-health.

The College of Public Health and Human Sciences is accredited by the Council on Education for Public Health (http://ceph.org/accredited) (CEPD).

Doctor of Philosophy (PhD) in Public Health

The PhD in Public Health is for individuals who wish to prepare themselves for careers in university teaching, research, consulting, policy development, or other high-level public health positions. There are currently five areas of concentration offered for the PhD degree:

1. Environmental and occupational health;
2. Epidemiology;
3. Global health;
4. Health policy;
5. Health promotion and health behavior.

A master's degree in a relevant field is required before admission into the PhD program.

The PhD program consists of a minimum of 109 credits, including at least 36 graduate credits devoted to preparation of the thesis. Doctoral students take courses in research and quantitative methods, theory, ethics, and their area of emphasis. Each student and his or her doctoral committee jointly determine the student's specific program of doctoral study. This process allows students to design a course of study uniquely suited to their particular needs and career goals. Further information about these requirements is available in the PhD in Public Health website and PhD handbook at http://health.oregonstate.edu/degrees/graduate/public-health/phd-program.

Master of Public Health (MPH)

The College of Public Health and Human Sciences offers seven options within the MPH degree:

1. Biostatistics
2. Environmental and Occupational Health
3. Epidemiology
4. Global Health
5. Health Management and Policy
6. Health Promotion and Health Behavior
7. Public Health Practice

All MPH students take an integrated core course, H 513, Integrated Approach to Public Health (12 credits), which introduces students to the core knowledge and methods used in public health, including evidence based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.

Other degree requirements vary by option. See handbooks for option-specific degree requirements: http://health.oregonstate.edu/degrees/graduate/public-health/graduate-handbooks.

All MPH students must do a 6-credit internship upon completion of their core and option classes. Upon completion of all required course work and the internship, all MPH students must schedule a final oral examination. Students must receive approval to take the exam from their academic advisors.

Major Code: 7580

Biostatistics Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 914)

The Biostatistics graduate option of the MPH program will train students in statistics applied to public health and healthcare settings. Graduates will be able to work in health departments, medical schools, nongovernmental agencies, and CDC and WHO field programs.

Environmental and Occupational Health Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 914)

The Environmental and Occupational Health graduate option of the MPH program focuses on understanding the impact of environmental and occupational hazards on human health and society, as well as, developing effective interventions that will control and prevent exposure to hazards.
The Epidemiology graduate option of the MPH program is designed primarily for those interested in using their epidemiologic skills in applied settings — international health, health departments, non-governmental agencies, or CDC and WHO field programs, but can also be the basis for doctoral training in epidemiology or a complement to other doctoral or professional training.

### Global Health Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 914)

The Global Health graduate option of the MPH program prepares students for public health leadership roles in international health, with an emphasis on health development for those in middle- and low-income nations. Courses focus on understanding complex issues, problem solving and developing analytical skills to critically view global health issues in order to promote progressive, comprehensive, sustainable and equitable community ownership of health development. As part of this interdisciplinary program, students acquire wide-ranging knowledge of international health while also developing an individually designed specialization.

Health Promotion and Health Behavior Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 914)

In the Health Promotion and Health Behavior graduate option of the MPH program, students will gain an understanding of the role of behavioral and social influences in public health and learn to apply the principles and practices of health promotion and behavior to address current and emerging public health problems.

Physical Activity Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 914)

This option is designed primarily for those future professionals interested in the science of physical activity and its application in populations. The proposed option would prepare physical activity program specialists for a variety of careers that involve developing, implementing, and evaluating community-based programs designed to promote physically active lifestyles. These careers are in state and local health departments, federal agencies, Extension offices, prevention research centers, professional, commercial, and nonprofit organization, worksites and schools.

To complete the proposed MPH degree in the Physical Activity option, students must have a total of at least 60 approved credit hours and successfully complete a final oral exam. These credits include:

Public Health Practice Graduate Option

This option is offered within the following major(s):

Available only via Ecampus.

The Master of Public Health (MPH) program is an existing master's degree program within the College of Public Health and Human Sciences. This non-thesis, practice-based program is designed to train students to be public health practitioners. The full-time option will be two years or six quarters; we are planning to offer students the flexibility of a part-time option, which will run three years in duration. The program is a cohort model, with students entering in fall term. Students will have access to our on-campus MPH Internship Coordinator for support throughout the internship process. Students will be able to add electives such as data analysis modules and other OSU online graduate level courses to enhance their program of study. The MPH culminating experience is beginning a revision process that will bring the curriculum into alignment with the newly revised national accreditation criteria. Students in the online public health practice option will have a comparable culminating experience to on-campus MPH students. Students will be assigned a faculty advisor who will guide them through the program and will also be supported by the MPH Administrative Director who will provide group advising sessions and support throughout the duration of their program.

The Public Health Practice graduate option consists of 60 credits, which includes a six-credit internship, which equates to 200 practice hours.
The Bachelor of Science degree in Public Health is offered through the School of Social and Behavioral Health Sciences (http://health.oregonstate.edu/sbhs).

The School of Biological and Population Health Sciences houses the Masters in Public Health (http://health.oregonstate.edu/degrees/graduate/public-health/mph) options of biostatistics, epidemiology, global health, and environmental and occupational health. Environmental and Occupational Health is also an area of concentration within the Public Health doctoral program (http://health.oregonstate.edu/degrees/graduate/public-health/phd-program).

Master’s and doctoral degrees are available in Nutrition (http://health.oregonstate.edu/degrees/graduate/nutrition) and Kinesiology (http://health.oregonstate.edu/degrees/graduate/kinesiology).

Undergraduate Majors

Kinesiology Major and Option
The Kinesiology major prepares students for careers in physical activity and fitness/wellness such as organizing, directing or managing physical fitness programs; personal trainer; fitness instructor; exercise physiologist; strength and fitness coach; and fitness entrepreneur. The degree can also serve as preparation for applications to a master’s level physical education teacher education program, medical school, a professional program in the allied health professions (e.g. physical or occupational therapy, nursing, physician assistant) or other graduate education. Students interested in entry into professional schools of physical or occupational therapy, nursing, medical school, or physicians’ assistant should take the Pre-Therapy and Allied Health option of the Kinesiology major, which has entry standards that must be met after completion of 90 credits.

Pre-Therapy and Allied Health Option
Students who choose this option prepare for admission into medical school or a professional training program in the allied health professions. Graduates become physical therapists, occupational therapists, physicians, physician assistants, or nurses.

Nutrition Major and Options

Dietetics Option
Dietitians provide guidance to the public regarding nutrition, diet and their relationship to disease. The Dietetics option at OSU is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and prepares students to become Registered Dietitians (RD). This option provides the course work and preparation to enter a supervised dietetic internship, pass the Registered Dietitian Exam and become a leader in the profession. Graduates from OSU’s program consistently exceed the national average for placement into accredited dietetic internships and for passing the RD Exam the first time.

Nutrition and Foodservice Systems Option
This option prepares graduates for professional careers directing foodservice operations that focus on serving healthy menu options and using local ingredients. Foodservice opportunities exist in both non-commercial operations including schools, universities, and healthcare, as well as others in the retail environment; all are striving to meet the consumer demand for healthier food options. This program integrates course work taken at OSU and the Culinary Arts program at Linn-Benton Community College.
Nutrition and Health Sciences Option
This option is designed for students who want to focus on the scientific basis of nutrition for careers in medicine and the health sciences or in nutrition science research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/or health-related research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

Undergraduate Studies
Preparation
Entering first-year and undergraduate transfer students should prepare to enter the College of Public Health and Human Sciences with a strong foundation in the sciences, balanced with good writing and critical thinking skills. Students transferring from other institutions are best prepared for the college curriculum if they have taken chemistry or biology or both.

Admission
Any student who has met the admission requirements of Oregon State University may be admitted to a nutrition or exercise and sport science program of study. To transfer from another OSU college or school, the student must have the approval of the head advisor of the College of Public Health and Human Sciences.

Physical Activity Courses
The Physical Activity Course (PAC) Program is an elective, academic-credit program designed to provide OSU students with the opportunity to learn and engage in a wide variety of physical activities with the goal of promoting health and lifelong participation in physical activity. Students may take any number of PAC credits, but only 11 credits may be counted toward graduation. Successful completion of any PAC section will satisfy the one-credit laboratory requirement of the fitness category of the baccalaureate core. Courses may be repeated for credit and a grade. There is a PAC fee for each class, and some courses have additional fees. All fees are listed in the online Schedule of Classes. Student accounts are billed upon registration. Refunds of the PAC fee are automatic upon dropping or withdrawing from the course and follow university policies as listed in the OSU General Catalog. Some additional fees are refunded through the PAC Office (Langton 123). Social dance classes are listed with a men’s and a women’s section in order help balance the number of students in the traditional lead-and-follow roles within the same class.

Undergraduate Programs
Majors
- Kinesiology (p. 946)
  - Pre-therapy and Allied Health
- Nutrition (p. 951)
Pre-Nutrition (p. 954)
Options
- Pre-Dietetics
- Dietetics
- Nutrition and Health Sciences
- Nutrition and Foodservice Systems

Minors
- Environmental and Occupational Health (p. 944)
- Exercise Physiology (p. 945)
- Nutrition (p. 951)

(Please check with the Office of Academic Advising and Student Support in 106 Women’s Building for minor requirements.)

Public Health

H 100. INTRODUCTION TO PUBLIC HEALTH. (4 Credits)
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Equivalent to: H 100H

H 100H. INTRODUCTION TO PUBLIC HEALTH. (4 Credits)
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 100

H 199. SPECIAL STUDIES. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

H 206. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

H 210. *INTRODUCTION TO THE HEALTH CARE SYSTEM. (3 Credits)
Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

H 220. INTRODUCTION TO HEALTH DATA ANALYSIS. (3 Credits)
Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems.

H 225. *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS. (4 Credits)
Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

H 250. INTRODUCTION TO HEALTH CARE MANAGEMENT. (3 Credits)
Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc.
Prerequisites: H 210 (may be taken concurrently) with C- or better

H 309. PRACTICUM IN HEALTH CARE SERVICES. (3-6 Credits)
Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N.
This course is repeatable for 12 credits.

H 310. HEALTH FIELD EXPERIENCES. (3-6 Credits)
Introductory field experience in a health or health-related worksite. Graded P/N.
Prerequisites: H 210 with C- or better
This course is repeatable for 12 credits.

H 312. *HIV/AIDS AND STIS IN MODERN SOCIETY. (3 Credits)
Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

H 319. INTRODUCTION TO HEALTH POLICY. (3 Credits)
Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative.
Prerequisites: H 210 with C- or better and PS 201 [C-]

H 320. INTRODUCTION TO HUMAN DISEASE. (3 Credits)
Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.

H 333. *GLOBAL PUBLIC HEALTH. (3 Credits)
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

H 344. FOUNDATIONS OF ENVIRONMENTAL HEALTH. (3 Credits)
Introductory course examining environmentally-linked disease, and health effects associated with toxic substances, food quality, pesticides, air, water, and noise pollution, and solid/hazardous wastes.

H 349. PEER HELPER SKILLS DEVELOPMENT. (3 Credits)
Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

H 364. DRUGS, SOCIETY AND HUMAN BEHAVIOR. (3 Credits)
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Prerequisites: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364H

H 364H. DRUGS, SOCIETY AND HUMAN BEHAVIOR. (3 Credits)
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation.
Attributes: HNRS – Honors Course Designator
Prerequisites: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364

H 385. SAFETY AND HEALTH STANDARDS AND LAWS. (3 Credits)
Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and Oregon-OSHA litigation; components of Oregon-OSHA.
H 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: H 399
This course is repeatable for 16 credits.

H 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

H 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

H 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

H 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

H 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

H 407. SEMINAR. (2 Credits)
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Equivalent to: H 407H

H 407H. SEMINAR. (2 Credits)
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 407

H 408. WORKSHOP. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

H 409. PRACTICUM. (1-6 Credits)
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N.
This course is repeatable for 16 credits.

H 410. INTERNSHIP. (1-12 Credits)
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N.
Prerequisites: H 407 with C- or better
This course is repeatable for 24 credits.

H 418. PUBLIC HEALTH ETHICS AND ISSUES. (3 Credits)
Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology.

H 421. MENTAL HEALTH. (3 Credits)
Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders.
Prerequisites: H 225 with C- or better and H 320 [C-]

H 422. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES. (4 Credits)
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.

H 425. FOUNDATIONS OF EPIDEMIOLOGY. (3 Credits)
Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec.
Prerequisites: H 220 with C- or better or ST 201 with C- or better or ST 314 with C- or better or ST 351 with C- or better

H 431. HEALTH CARE MARKETING. (3 Credits)
Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

H 432. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE. (3 Credits)
Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Prerequisites: (ECON 201 with C- or better or ECON 201H with C- or better) and H 210 [C-]

H 434. HEALTH CARE LAW AND REGULATION. (3 Credits)
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: H 210 with C or better and H 250 [C-] and WR 222 [C-]

H 436. ADVANCED TOPICS IN HEALTH CARE MANAGEMENT. (3 Credits)
Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care.
Prerequisites: H 210 with C- or better and H 250 [C-]

H 445. OCCUPATIONAL HEALTH. (3 Credits)
Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

H 448. PUBLIC HEALTH TOXICOLOGY. (3 Credits)
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.
Prerequisites: H 344 with C- or better

H 449. MASS MEDIA AND HEALTH. (3 Credits)
Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns.
Prerequisites: H 225 with C- or better and H 320 [C-]

H 457. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS. (3 Credits)
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Prerequisites: BA 215 with C- or better and H 210 [C-] and H 250 [C-]

H 458. REIMBURSEMENT MECHANISMS. (3 Credits)
Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system.
Prerequisites: H 210 with C- or better
H 461. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE. (3 Credits)
Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined.

H 465. *PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES. (3 Credits)
Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

H 467. LONG-TERM CARE ALTERNATIVES. (3 Credits)
Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 468. FINANCING AND ADMINISTRATION OF LONG-TERM CARE. (3 Credits)
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 474. PUBLIC HEALTH AND VIOLENCE IN SOCIETY. (3 Credits)
Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476. PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS. (4 Credits)
A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion plan. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: H 225 with C- or better and H 320 [C-]

H 477. DIETARY INTERVENTIONS FOR PUBLIC HEALTH. (3 Credits)
A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators.
Prerequisites: NUTR 225 with C- or better

H 480. UNDERGRADUATE EOH SEMINAR. (1 Credit)
Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion. Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N.
This course is repeatable for 2 credits.

H 489. EMERGENCY AND DISASTER MANAGEMENT. (3 Credits)
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491. SELECTED TOPICS. (1-3 Credits)
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Equivalent to: H 491H
This course is repeatable for 6 credits.

H 491H. SPECIAL TOPICS. (1-3 Credits)
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 491
This course is repeatable for 6 credits.

H 494. APPLIED ERGONOMICS. (3 Credits)
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 495. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH. (3 Credits)
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

H 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

H 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

H 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

H 507. SEMINAR. (1-16 Credits)
Section 1. Internship (1). Graded P/N.
This course is repeatable for 16 credits.

H 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

H 509. PRACTICUM. (1-16 Credits)
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N.
This course is repeatable for 16 credits.

H 510. INTERNSHIP. (1-16 Credits)
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N.
This course is repeatable for 16 credits.

H 511. COMMUNITY, CULTURE, AND GLOBAL HEALTH. (3 Credits)
Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.

H 512. INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES. (3 Credits)
Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.
H 513. INTEGRATED APPROACH TO PUBLIC HEALTH. (12 Credits)
An integrated approach to introduce students to the core knowledge and
methods used in public health, including evidence-based approaches
to public health, public health and health care systems, planning and
management to promote health, and policy in public health.

H 514. ENVIRONMENT, SAFETY AND HEALTH SEMINAR. (1 Credit)
One-credit graduate seminar on current topics of interest and importance
to the environmental health and occupational safety field. Critical reading
of research publications, discussion of controversial issues facing ESH
professionals, and/or presentation of current ESH research.
This course is repeatable for 3 credits.

H 515. RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH
SCIENCES. (3 Credits)
Provides an introduction to quantitative research methods and
design. Topics include definition of research problems and questions,
hypothesis generation, research design, sampling, variable definition and
measurement, data collection, and ethical considerations. Also provides a
brief introduction to qualitative and mixed methods.

H 516. RESEARCH METHODS IN GLOBAL HEALTH. (3 Credits)
Overview of research methods used to understand health, illness, health
care, and health-seeking behavior in international settings. Special
emphasis on the use of qualitative and mixed methods in international
health research.

H 518. PUBLIC HEALTH ETHICS AND ISSUES. (3 Credits)
Current ethical issues in public health, including gender and ethnicity in
employment, pharmaceutical controls, product liability, advertising, and
export of high technology.

H 519. DISPLACEMENT, MIGRATION, AND GLOBAL HEALTH. (3 Credits)
Critical examination of health of displaced/migrant populations
with an emphasis on health disparities and social determinants.
Understanding intersections of humanitarianism, migration, vulnerability,
and displacement from a global health perspective.

H 520. HEALTH DISPARITIES. (3 Credits)
Health disparities based on race/ethnicity, culture, social class, and rural/
urban residence, among others; strategies to reduce disparities, promote
health, and prevent disease in diverse populations.

H 521. MENTAL HEALTH. (3 Credits)
Focus upon mental health policy development, in relation to federal and
state government services and regulations, implementation of services.

H 522. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES. (4 Credits)
Epidemiology of the major chronic diseases, risk factors, potential
methods of prevention/intervention, ethical issues, and efficacy
of current methods of prevention and control. Emphasis on adult
populations and public health services, policies, and programs at the
local, state, and federal levels designed to promote healthy aging.

H 523. FOUNDATIONS OF PUBLIC HEALTH. (4 Credits)
Fundamental principles, concepts and tools used in public health
to promote the health of populations. Using a combination of case
study method, lecture and discussion, students will develop a broad
understanding of public health and recognition of how discipline-
specializations address the social, behavioral and environmental
determinants of public health.

H 524. INTRODUCTION TO BIOSTATISTICS. (4 Credits)
Quantitative analysis and interpretation of health data including
probability distributions, estimation of effects, and hypothesis-tests such
as Chi-square, one-way ANOVA, and simple linear regression.

H 525. EPIDEMIOLOGICAL METHODS I. (3 Credits)
Introduction to the concepts and methods of epidemiology. Topics
include measures of population health, screening, study design,
measures of association, and interpretation of epidemiological data.
Prerequisites: H 513 with B- or better or H 535 with B- or better

H 526. EPIDEMIOLOGIC METHODS II. (3 Credits)
Concepts and methods of epidemiological analysis; standardization;
stratified analysis; confounding and its control; planning and conducting
epidemiologic research; role of multivariate analysis in epidemiologic
research.
Prerequisites: H 524 with B- or better and H 525 [B-]

H 527. CRITICAL ASSESSMENT OF INTERNATIONAL HEALTH
PROGRAMS. (3 Credits)
Introduces the critical evaluation framework of assessing international
health development programs, based on self-determination and
community ownership principles. The framework of assessment method
includes three levels: upstream evaluation, midstream evaluation, and
downstream evaluation.

H 528. GLOBAL HEALTH ISSUES. (3 Credits)
Examines major issues in health developments of global significance,
their causes and impacts on international health, and methods and
strategies to address them.

H 529. INTERNATIONAL HEALTH. (3 Credits)
Overview of the epidemiological, economic, political, sociological, and
cultural factors that impact on international health. Special emphasis
on the methods of prevention/intervention utilized in coping with health
problems on an international level.

H 530. HEALTH POLICY ANALYSIS AND POLITICS. (3 Credits)
Examination of current health policy issues affecting health care
programs, services, and organization as well as the role of politics in
public health and health policy. Exploration of processes by which
health policy proposals are generated, promoted, defeated, modified and
implemented.
Prerequisites: H 533 with B- or better or HHS 514 with B- or better

H 532. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE. (3 Credits)
Application of economics principles to the health care field: the demand
for medical care and insurance, health care suppliers, health care
markets.

H 533. HEALTH SYSTEMS ORGANIZATION. (3 Credits)
Examines the nature of health and health care services and reviews the
role of government and the free market on health services. Alternative
ways of organizing, financing, and delivery of health care services are
explored.

H 534. HEALTH CARE LAW AND REGULATION. (3 Credits)
Legal aspects of health care delivery; tort law and its applications;
professional liability and liability insurance; laws relative to health care
institutions, cost controls, antitrust and access.

H 535. INTERPRETING EPIDEMIOLOGIC EVIDENCE. (3 Credits)
Intended for students in the human sciences and allied health fields.
Introduces basic epidemiology concepts. Topics will include measures
of disease frequency, assessing population health, causal logic,
quantifying associations between exposures and health outcomes,
epidemiologic study design, and threats to study validity (random error,
bias, confounding). Examples focus on application of epidemiological
methods to a variety of health-related fields.
H 536. HEALTHCARE ORGANIZATION LEADERSHIP THEORY AND BEHAVIOR. (3 Credits)
Overview of organization theory and behavior in health care organizations. Emphasis is on developing an understanding of the factors and forces that influence the structures, behaviors, and operations of health care delivery organizations. This understanding will be developed through consideration of organizations, their environments, and the roles of individuals working in management.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better

H 537. INJURY EPIDEMIOLOGY. (3 Credits)
An overview of the distribution and determinants of injuries, methodological issues specific to injury epidemiology, and approaches to injury control.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 513 with B- or better

H 538. PUBLIC AND PRIVATE HEALTH INSURANCE. (3 Credits)
Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 540. WATER AND HUMAN HEALTH. (3 Credits)
Critically examine the complex relationship between water quality, human activities, and population health.

H 541. AIR QUALITY AND HUMAN HEALTH. (3 Credits)
Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 542. ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT. (3 Credits)
Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.

H 543. EXPOSURE SCIENCE I. (4 Credits)
Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.

H 544. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY. (3 Credits)
Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health.
Prerequisites: H 525 with C or better

H 545. OCCUPATIONAL HEALTH. (3 Credits)
A broad overview of occupational health including recognizing and preventing risks from toxic chemical, radiation and physical hazards in the workplace.

H 546. PHYSICAL AGENTS AND HUMAN HEALTH. (3 Credits)
Focus on physical agents (heat, noise, vibration, radiation) and health risks associated with these agents. It covers the range and sources of exposure to physical agents, methods of characterizing these exposures, effects on human health, and the regulations/standards that set limits for physical agents. Lec/lab.

H 547. GIS AND PUBLIC HEALTH. (4 Credits)
Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health who have no (or introductory level) knowledge of GIS. Lec/lab.

H 548. PUBLIC HEALTH TOXICOLOGY. (3 Credits)
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.

H 549. MASS MEDIA AND HEALTH. (3 Credits)
Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
Prerequisites: H 571 with C or better

H 550. SOCIAL EPIDEMIOLOGY. (3 Credits)
Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health.
Prerequisites: H 525 with B or better

H 551. APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA. (3 Credits)
Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results.
Prerequisites: H 526 with B- or better and H 560 [B+] and H 580 [B-]

H 552. DISASTER EPIDEMIOLOGY. (3 Credits)
Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 554. EPIDEMIOLOGY OF AGING. (3 Credits)
An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 555. CANCER EPIDEMIOLOGY. (3 Credits)
Introduction to basic concepts and methodology in cancer epidemiology.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 556. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS. (3 Credits)
Theories and methodologies of long-range planning and strategic management in health care organizations.

H 557. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS. (3 Credits)
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
H 558. REIMBURSEMENT MECHANISMS. (3 Credits)
Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature.

H 560. PUBLIC HEALTH SURVEILLANCE. (3 Credits)
An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis.
Prerequisites: H 524 with B- or better and H 525 [B-]

H 562. INFECTIOUS DISEASE EPIDEMIOLOGY. (3 Credits)
Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or H 514 with B- or better

H 563. PHYSICAL ACTIVITY EPIDEMIOLOGY. (3 Credits)
Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 564. COMPUTING TOOLS AND HEALTH DATA ANALYSIS. (3 Credits)
Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed.
Prerequisites: (H 524 with C or better or HDFS 530 with C or better)

H 565. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES. (3 Credits)
Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.

H 566. DATA MINING IN PUBLIC HEALTH. (3 Credits)
An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health.

H 567. LONG-TERM CARE ALTERNATIVES. (3 Credits)
Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 568. FINANCING AND ADMINISTRATION OF LONG-TERM CARE. (3 Credits)
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 569. MATERNAL AND CHILD HEALTH. (3 Credits)
Women's reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 571. PRINCIPLES OF HEALTH BEHAVIOR. (3 Credits)
Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

H 572. COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION. (3 Credits)
History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.

H 573. INTRODUCTION TO MULTILEVEL/HIERARCHICAL MODELS. (3 Credits)
Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks.

H 575. EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS. (3 Credits)
Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program.
Prerequisites: H 513 with B- or better or H 515 with B- or better or HHS 514 with B- or better

H 576. PROGRAM PLANNING/PROPOSAL WRITING IN HEALTH/HUMAN SERVICES. (4 Credits)
Planning and preparing of proposals for program initiation, financing, delivery and evaluation in health-related settings; emphasis on funding sources, community, individual, and organizational support.

H 578. INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I. (3 Credits)
A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis.
Prerequisites: (H 524 with C or better and H 526 [C])

H 580. LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA. (4 Credits)
Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/ lab.
Prerequisites: (H 524 with C or better or HDFS 530 with C or better)

H 581. GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS. (4 Credits)
Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab.

H 582. ANALYSIS OF CORRELATED HEALTH DATA. (3 Credits)
Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations.
Prerequisites: H 581 with C or better
### H 583. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT. (4 Credits)

Studies the design and management principles and practices in the environment, safety and health field.

### H 584. ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS. (3 Credits)

Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability.

**Prerequisites:** (H 524 with C or better or HDFS 530 with C or better)

### H 585. ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW. (3 Credits)

Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals.

### H 586. BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH. (3 Credits)

An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health.

**Prerequisites:** H 581 with C or better

### H 587. TIME TO EVENT ANALYSIS OF HEALTH DATA. (3 Credits)

Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research.

**Prerequisites:** (H 524 with C or better or HDFS 530 with C or better)

### H 588. APPLIED OCCUPATIONAL SAFETY AND HEALTH. (3 Credits)

The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.

### H 589. EMERGENCY AND DISASTER MANAGEMENT. (3 Credits)

Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

### H 590. OCCUPATIONAL ERGONOMICS AND BIOMECHANICS. (3 Credits)

Examines the advanced theories, applications, and contemporary topics of occupational ergonomics and biomechanics. Topics include muscle physiology, work-related musculoskeletal disorders, assessing biomechanical exposure in the workplace, various material handling assessment tools, 3-Dimensional Static Strength Prediction Program, human vibrations, and implementing ergonomic interventions.

### H 591. SELECTED TOPICS. (1-3 Credits)

Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.

*This course is repeatable for 9 credits.*

### H 592. SPATIAL EPIDEMIOLOGY. (3 Credits)

An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining patterns and associations.

**Prerequisites:** H 547 with C or better and H 581 [C]

### H 593. REPRODUCTIVE EPIDEMIOLOGY. (3 Credits)

Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health.

**Prerequisites:** H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

### H 594. APPLIED ERGONOMICS. (3 Credits)

Principles of occupational ergonomics for managing optimal worker performance and well-being.

### H 595. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH. (3 Credits)

Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

### H 596. HEALTHCARE EPIDEMIOLOGY. (3 Credits)

Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic testing, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically.

**Prerequisites:** H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

### H 597. METHODS IN FOODBORNE DISEASE OUTBREAK INVESTIGATION. (3 Credits)

Focuses on the practical basis for developing and implementing methods for foodborne disease outbreak detection, investigation, and control, using recent outbreaks to highlight underlying principles. Biological characteristics of major foodborne disease pathogens, clinical features of the illnesses its causes and epidemiologic presentations of foodborne outbreaks will be reviewed. The implications of these characteristics will be discussed in a problem solving, interactive format that examines theory and practice in the context of recent outbreaks. Strategies to promote timely decision-making will be emphasized.

**Prerequisites:** H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

### H 598. HEALTH POLICY ANALYSIS METHODS. (3 Credits)

Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens. Health services research methods, including data sources for health policy research and health policy literature.

**Prerequisites:** H 513 with B- or better and H 533 [B-]

### H 599. SPECIAL TOPICS. (1-16 Credits)

*This course is repeatable for 24 credits.*

### H 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)

**PREREQ:** Departmental approval required.

*This course is repeatable for 16 credits.*

### H 603. THESIS. (1-16 Credits)

*This course is repeatable for 999 credits.*

### H 605. READING AND CONFERENCE. (1-16 Credits)

*This course is repeatable for 16 credits.*

### H 606. PROJECTS. (1-16 Credits)

*This course is repeatable for 16 credits.*

### H 607. SEMINAR. (1-16 Credits)

*This course is repeatable for 16 credits.*

### H 608. WORKSHOP. (1-16 Credits)

*This course is repeatable for 16 credits.*

### H 610. INTERNSHIP. (1-16 Credits)

*This course is repeatable for 16 credits.*
H 612. DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE. (1 Credit)
Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. 
This course is repeatable for 9 credits.
H 613. INDEPENDENT RESEARCH PROJECT. (1-9 Credits)
Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N. 
This course is repeatable for 9 credits.
H 614. RESEARCH MANUSCRIPT. (4 Credits)
PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.
H 615. ADVANCED EVALUATION AND RESEARCH DESIGN. (3 Credits)
Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors.
H 620. ADVANCED TOPICS IN GLOBAL HEALTH INTERVENTION AND PRACTICE. (3 Credits)
Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decision-making in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored. Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.
H 622. GLOBAL HEALTH SYSTEMS, POLICY AND POLITICS. (3 Credits)
Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.
H 626. GLOBAL HEALTH SYSTEM FINANCE AND STRENGTHENING. (3 Credits)
Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.
H 630. QUANTITATIVE HEALTH POLICY RESEARCH METHODS I. (4 Credits)
Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature. 
Prerequisites: H 524 with B- or better
H 632. APPLIED HEALTH ECONOMICS. (4 Credits)
Advanced doctoral-level quantitative health policy/services research methods emphasizing causal inference when potential endogeneity is present. 
Prerequisites: H 630 with B- or better
H 635. COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE. (3 Credits)
The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.
H 638. PUBLIC AND PRIVATE HEALTH INSURANCE. (3 Credits)
Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method. 
Prerequisites: H 533 with C or better
H 639. COMMUNITY-BASED PARTICIPATORY RESEARCH. (4 Credits)
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion.
H 642. ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT. (3 Credits)
Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.
H 650. REPORTING RESULTS: WRITING FOR EPIDEMIOLOGY. (3 Credits)
Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer. 
Prerequisites: H 526 with B- or better and H 551 [B-] and H 580 [B-]
H 651. ADVANCED EPIDEMIOLOGICAL METHODS. (4 Credits)
Covers advanced topics in epidemiology. Course expands on many of the same topics as H 526, and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models, directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics. 
Prerequisites: H 526 with B- or better and H 581 [B-]
H 652. CAUSAL INFERENCE IN EPIDEMIOLOGY. (3 Credits)
Discussion of the theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics. 
Applied examples will be used for illustration. 
Prerequisites: H 651 with B- or better
H 659. QUANTITATIVE HEALTH POLICY RESEARCH METHODS II. (4 Credits)
Advanced doctoral-level quantitative health policy/services research methods emphasizing health care utilization, expenditures, and outcomes data. 
Prerequisites: H 630 with B- or better
H 662. ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY. (3 Credits)
Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods.
Prerequisites: H 526 with B- or better and H 562 [B-]

H 671. ADVANCED THEORIES OF HEALTH BEHAVIOR. (3 Credits)
Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing).

H 672. ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR. (3 Credits)
Provides an in-depth examination of the use of qualitative methods in health behavior research and practice.

H 673. MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS. (4 Credits)
Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts.

H 675. DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS. (3 Credits)
Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice.

H 676. ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR. (3 Credits)
Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior.
This course is repeatable for 6 credits.

H 681. ADVANCED TOPICS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY. (3 Credits)
Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY: MOVING FROM RESEARCH TO PRACTICE. (3 Credits)
An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering.

H 683. ADVANCED RESEARCH METHODS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH. (3 Credits)
Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.

H 685. RACE, CLASS, CULTURE AND AGING. (4 Credits)
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as HDFS 685.
Equivalent to: HDFS 685

H 699. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

Health and Human Sciences

HHS 231. *LIFETIME FITNESS FOR HEALTH. (2 Credits)
Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness
Equivalent to: HHS 231H

HHS 231H. *LIFETIME FITNESS FOR HEALTH. (2 Credits)
Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness; HNRS – Honors Course Designator
Equivalent to: HHS 231

HHS 241. *LIFETIME FITNESS. (1 Credit)
Assessment, evaluation and practice of physical fitness and health behaviors leading to the development of a personal fitness program. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness

HHS 513. INTEGRATED APPROACH TO PUBLIC HEALTH I. (6 Credits)
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health. This course is the first of a two-part course sequence.

HHS 514. INTEGRATED APPROACH TO PUBLIC HEALTH II. (6 Credits)
An integrated approach to introduce students to the core knowledge and methods used in public health, including; evidence-based approaches to public health; public health and health care systems; planning and management to promote health; and policy in public health. This course is the second of a two part course sequence.
Prerequisites: HHS 513 with B- or better

HHS 517. CASE STUDIES IN PUBLIC HEALTH PRACTICE. (3 Credits)
Case-based learning to illustrate the complexity of public health issues and to demonstrate the need for integrated approaches for developing and implementing successful strategies in public health practice. Students will apply a wide range of knowledge and skills essential to public health practice that relate to outbreak investigation, policy analysis, regulatory decision-making, ethics, program development, program evaluation, research synthesis, screening programs, working with stakeholders, health risk communication, and disaster preparedness.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better

HHS 526. LINEAR REGRESSION IN PUBLIC HEALTH. (2 Credits)
Biostatistical tools for scientific applications in public health using linear regression analysis. Confounding, effect modification, variable selection, assessing model fit, observational studies, and exploratory data analysis. Emphasis on the use of statistical packages for analyzing public health data.
Prerequisites: H 524 with B- or better
This course is repeatable for 4 credits.
HHS 527. LOGISTIC REGRESSION IN PUBLIC HEALTH. (2 Credits)
Biostatistical tools for scientific applications in public health using logistic regression analysis. Confounding, effect modification, variable selection, assessing model fit, exploratory data analysis, and observational studies. Emphasis on the use of statistical packages for analyzing public health data.
Prerequisites: H 524 with B- or better

HHS 537. EVIDENCE-BASED LEADERSHIP IN PUBLIC HEALTH. (3 Credits)
Examines how collaboration differs from working together, and offers opportunities to develop skills for successful and effective group functioning. Students will be challenged to examine personal strengths (and the strengths of others) as they relate to leadership and followership. Explores evidence-based management — identifying and using organizational and scientific data in decision making.
Prerequisites: H 536 with B- or better

HHS 550. COMMUNICATING FOR PUBLIC HEALTH POLICY IMPACT. (3 Credits)
Successful public health professionals communicate clearly and in compelling ways with non-scientific audiences. In this hands-on course, the theory and practice of effective public health communication will be explored, with a focus on advancing a public health policy. Through a selected public health policy topic, students will develop and enhance skills in planning and implementing impactful public health communications, including message development, data visualization, media interviewing, engaging through social media and presenting to policymakers. Professionals in the field, including those in legislative and media roles, will share examples of effective communication and provide constructive feedback on students’ work.

HHS 578. EVIDENCE-BASED PUBLIC HEALTH I. (3 Credits)
Evidence-based public health is the process of integrating science-based interventions with community preferences to improve the health of populations. This is the first in a two-course series and provides theoretical and practical bases to identify, implement and evaluate evidence-based research (i.e. programs, surveillance, policies). Students will develop skills to select and adapt evidence-based public health programming for a specific community and/or population.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better

HHS 579. EVIDENCE-BASED PUBLIC HEALTH II. (3 Credits)
Evidence-based public health is the process of integrating science-based interventions with community preferences to improve the health of populations. This is the second in a two-course series. This course applies science and adaptation frameworks learned in the first course to the development of a program plan. This course provides instruction and application of program planning and program evaluation frameworks. Course learning is synthesized through the development of a grant proposal for adapted public-health program plus evaluation plan.
Prerequisites: HHS 575 with B- or better and HHS 578 [B-]

HHS 584. SURVEILLANCE AND FIELD EPIDEMIOLOGY FOR PUBLIC HEALTH. (3 Credits)
A review of public health surveillance systems, and the continuum of communicable disease surveillance into field epidemiology and other responses to identified events.
Prerequisites: H 524 with B- or better or HHS 514 with B- or better

HHS 590. PUBLIC HEALTH LAW. (2 Credits)
Explores the use of law and policy tools to promote access to health and healthy living conditions. Examines the legal powers and duties of government at the federal, state, and local levels to ensure the conditions required for people to be healthy. Discussion of individual rights as limitations on the power of the government to act in furtherance of public health goals.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better

HHS 597. GLOBAL HEALTH SYSTEMS. (3 Credits)
Explores key components of global health systems, using case studies of institutions, processes, and health outcomes.

Kinesiology

KIN 131. INTRODUCTION TO KINESIOLOGY. (1 Credit)
Overview of the field; career opportunities in exercise and sport science and other professions dealing with the discipline of human movement; orientation to support services. Graded P/N.

KIN 132. INTRODUCTION TO THE ALLIED HEALTH PROFESSIONS. (1 Credit)
Overview of allied health professions including physical and occupational therapy, physician assistant, nursing, athletic training and others. Discuss job responsibilities, employment opportunities and educational requirements.

KIN 160. INTRODUCTION TO INJURY MANAGEMENT FOR THE PHYSICALLY ACTIVE. (3 Credits)
Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals).

KIN 194. PROFESSIONAL ACTIVITIES. (1-2 Credits)
Basic movement skills, basic rhythms, track and field.

KIN 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 206. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 230. INTRODUCTION TO ADVENTURE PROGRAMS. (3 Credits)
Foundation course for leadership opportunities in the Adventure Leadership Institute (ALI). Provides overview of history, theoretical foundations, and utilization of adventure programs in education, recreation, and therapy.

KIN 231. HUMAN GROUP DYNAMICS. (3 Credits)
Provides students with the fundamental concepts and theories essential for understanding dynamics that occur in groups in recreation, leisure, and everyday settings.

KIN 232. BACKCOUNTRY LEADERSHIP. (3 Credits)
Prepares students to be leaders in outdoor settings by building the practical and logistical skills needed in the effective delivery of courses and/or trips. Covers the teaching skills and essentials for trip leaders in the wilderness, including trip planning, logistics, risk management, and group interaction in the backcountry.
Prerequisites: (EXSS 230 with C or better or KIN 230 with C or better) and PAC 301 [C] and PAC 303 [C] and PAC 329 [C]
KIN 233. TEACHING TECHNIQUES FOR OUTDOOR ACTIVITIES. (3 Credits)
Gateway course for students pursuing the Level Three Adventure Leadership Certificate. Emphasizes teaching outdoor activities at a professional level. Students work individually with the course instructor to develop, plan and implement an activity course (land or water based) for the Adventure Leadership Institute.
Prerequisites: EXSS 232 with C or better or KIN 232 with C or better

KIN 299. SPECIAL TOPICS. (1-3 Credits)
This course is repeatable for 24 credits.

KIN 301. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 305. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 306. PROJECTS. (1-16 Credits)
This course is repeatable for 36 credits.

KIN 307. SEMINAR. (1-3 Credits)
Section 2: Seminar Pre-Internship (1 credit).
This course is repeatable for 36 credits.

KIN 311. MOTOR BEHAVIOR. (4 Credits)
Underlying mechanisms and factors affecting movement function, skill acquisition, and changes in movement behavior across the lifespan.
Prerequisites: BI 232 with C- or better or BI 332 with C- or better

KIN 312. *SOCIOCULTURAL DIMENSIONS OF PHYSICAL ACTIVITY. (3 Credits)
Physical activity in contemporary society. Relationships with the social processes; interrelationships between physical activity and cultural institutions. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture

KIN 314. INTRODUCTION TO ADAPTED PHYSICAL ACTIVITY. (3 Credits)
Overview of cognitive, neuromuscular, sensory and orthopedic disabilities; understanding accessible physical activity programs for individuals with disabilities.

KIN 321. BIOMECHANICS OF HUMAN MOVEMENT. (4 Credits)
Integration of the physical laws and anatomical structures governing human movement; qualitative analytical processes emphasized.
Prerequisites: (BI 231 with C- or better and BI 241 [C]) or (BI 331 [C] and BI 341 [C]) and (MTH 112 [C] or MTH 251 [C])

KIN 324. EXERCISE PHYSIOLOGY. (4 Credits)
Physiological effects of acute and chronic exercise; factors affecting human performance; exercise training principles.
Prerequisites: (BI 231 with C- or better or BI 333 with C- or better) and (BI 231 [C] or BI 331 [C]) and (CH 121 [C] or CH 231 [C] or CH 231H [C]) and (CH 122 [C] or CH 232 [C] or CH 232H [C]) and (CH 123 [C] or CH 233 [C] or CH 233H [C] or CH 130 [C])

KIN 325. FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION. (3 Credits)
Introduction to lab- and field-based physical fitness assessments and the skills needed to design safe and effective exercise programs for apparently healthy adults. Lec/lab.
Prerequisites: KIN 324 with C- or better or EXSS 324 with C- or better

KIN 333. KINESIOLOGY PRACTICUM. (2 Credits)
Field experience in kinesiology under professional supervision.

KIN 334. KINESIOLOGY PRACTICUM. (2 Credits)
Field experience in kinesiology under professional supervision.
Prerequisites: KIN 333 with C- or better

KIN 335. KINESIOLOGY PRACTICUM. (2 Credits)
Field experience in kinesiology under professional supervision.

KIN 341. NUTRITION FOR EXERCISE. (3 Credits)
Review of the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSLISTED as NUTR 341.
Prerequisites: (KIN 324 with C- or better or EXSS 324 with C- or better) and NUTR 240 [C-]

KIN 343. PRE- THERAPY/ALLIED HEALTH SEMINAR. (1 Credit)
Provides knowledge in professional school preparation and current issues related to the allied health professions.
Prerequisites: (KIN 132 with C or better or BI 109 with C or better) and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C]

KIN 344. PRE- THERAPY/ALLIED HEALTH PRACTICUM. (2 Credits)
Clinical field experiences under the supervision of a licensed professional in the allied health or related setting enhanced with classroom discussion.
Prerequisites: KIN 132 with C or better and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C]
Corequisites: KIN 343

KIN 345. ALLIED HEALTH PRACTICUM. (1-2 Credits)
Field experience under professional supervision in an allied health or related setting. Includes arranged consultations with the instructor to discuss current issues related to the allied health professions.
This course is repeatable for 2 credits.

KIN 353. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM. (2 Credits)
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.

KIN 354. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM. (2 Credits)
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.

KIN 355. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM. (2 Credits)
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.

KIN 360. INJURY MANAGEMENT FOR THE PHYSICALLY ACTIVE. (3 Credits)
Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals) and pre-professional.

KIN 370. PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY. (3 Credits)
Interaction between psychological variables and human motor performance.

KIN 380. THERAPEUTIC MODALITIES. (4 Credits)
Indications, contraindication, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and diseases.

KIN 385. THERAPEUTIC EXERCISE. (4 Credits)
Principles and techniques of therapeutic exercise; rehabilitative activities and programs for musculoskeletal injuries, conditions, and diseases. Lec/ lab.
Prerequisites: KIN 321 with C- or better or EXSS 321 with C- or better
KIN 394. PROFESSIONAL ACTIVITIES: RESISTANCE TRAINING PROGRAM DESIGN. (3 Credits)
Prepares the conceptual basis for optimizing resistance training program designs, exercise routines for all ages and fitness levels, correct exercise technique. Lec/lab.
Prerequisites: KIN 324 with C- or better and KIN 325 [C-]

KIN 395. PROFESSIONAL ACTIVITIES: GROUP FITNESS. (3 Credits)
Application of biomechanical, physiological, psychological and safety principles for the development of group exercise classes in a variety of modes and settings. Lec/lab.
Prerequisites: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])

KIN 396. PROFESSIONAL ACTIVITIES: AQUATICS. (3 Credits)
Aquatic overview; emphasis on underlying hydrodynamic principles; includes safety, survival, stroke mechanics, aquatic exercise, training, games. Lec/lab/activity.

KIN 399. SPECIAL TOPICS. (1-3 Credits)
Equivalent to: KIN 399H
This course is repeatable for 18 credits.

KIN 399H. SPECIAL TOPICS. (1-3 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: KIN 399
This course is repeatable for 18 credits.

KIN 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 410. INTERNSHIP. (1-15 Credits)
Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and - program personnel; supplementary conference, reports and appraisal required.
This course is repeatable for 20 credits.

KIN 422. FACILITATING PHYSICAL ACTIVITY FOR CHILDREN AND YOUTH. (3 Credits)
Students learn skills for facilitating physical activity programs for children and youth in a variety of settings, including information on the benefits of physical activity, program design, implementation and management techniques.
Prerequisites: KIN 311 with C- or better or EXSS 311 with C- or better

KIN 423. QUALITATIVE MOVEMENT ANALYSIS. (3 Credits)
Develop observational skills to perform systematic qualitative analyses of selected physical activity performances and other human movements.
Prerequisites: (KIN 311 with C- or better or EXSS 311 with C- or better) and (KIN 321 [C-] or EXSS 321 [C-])

KIN 425. ANATOMICAL KINESIOLOGY. (4 Credits)
Anatomical aspects of human movement; actions of bones and muscles in motor activities. Application of physical principles to factors governing anatomical function in health and injury.
Prerequisites: EXSS 321 with C- or better or KIN 321 with C- or better

KIN 432. PHYSICAL ACTIVITY ASSESSMENT. (3 Credits)
Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations.

KIN 434. APPLIED MUSCLE PHYSIOLOGY. (3 Credits)
Skeletal muscle structure, function, and metabolism; applications to muscle fatigue, exercise training, inactivity, and aging.
Prerequisites: KIN 324 with C- or better or EXSS 324 with C- or better

KIN 435. PHYSICAL ACTIVITY PROMOTION. (3 Credits)
Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities.
Prerequisites: KIN 370 with C- or better

KIN 437. PHYSICAL ACTIVITY, AGING, AND CHRONIC DISEASE. (4 Credits)
Addresses the consequences of primary and secondary aging from an individual and public health perspective. Physiological changes associated with aging and chronic disease, functional assessment of older adults, and exercise prescription for older adults with and without chronic exercise will be emphasized.
Prerequisites: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])

KIN 444. ADVANCED ADAPTED PHYSICAL ACTIVITY. (3 Credits)
Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities.
Prerequisites: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])

KIN 474. EXERCISE PHYSIOLOGY LAB METHODS. (3 Credits)
Practical experience and projects in exercise physiology lab methods, including measurement of submaximal and maximal oxygen consumption body composition, anaerobic power, and electrocardiography.
Prerequisites: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])

KIN 475. *POWER AND PRIVILEGE IN SPORT. (3 Credits)
Issues of power and privilege in sport including race, gender, sexual orientation, disability and aggression and the consequences of long held society norms and stereotypes. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisites: (KIN 312 with C- or better or EXSS 312 with C- or better)

KIN 481. *ANALYSIS OF CRITICAL ISSUES IN KINESIOLOGY. (3 Credits)
Reading and interpreting current research, and using writing as a tool for learning on a critical issue in kinesiology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

KIN 483. TISSUE INJURY AND REPAIR. (3 Credits)
Mechanics of tissue injury and the body’s response and repair following injury of bone, muscle, tendon, ligament, cartilage and nervous system tissue.
Prerequisites: (BI 231 with C- or better or BI 331 with C- or better) and (BI 241 [C-] or BI 341 [C-]) and (BI 232 [C-] or BI 332 [C-]) and (BI 242 [C-] or BI 342 [C-]) and (BI 233 [C-] or BI 333 [C-]) and (BI 243 [C-] or BI 343 [C-]) or (Z 331 [C-] and Z 332 [C-] and Z 333 [C-] and Z 341 [C-] and Z 342 [C-] and Z 343 [C-])
KIN 490. SCIENTIFIC INQUIRY IN KINESIOLOGY. (4 Credits)
Principles and techniques of organization, administration, interpretation and evaluation of exercise science-related data. Includes human subjects training and certification, research design, and statistical analysis using SPSS and Excel including central tendency, correlation and regression, probability, and inferential statistics (t-tests and ANOVA). Lec/lab.
Prerequisites: KIN 325 with C or better and MTH 112

KIN 499. SELECTED TOPICS. (1-5 Credits)
Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for 24 credits.

KIN 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

KIN 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 507. SEMINAR. (1-16 Credits)
Section 1: Seminar (1). Graduate research seminar that emphasizes student oral presentations of current research topics in exercise and sport science. One credit required for all graduate students. Section 2: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 3: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N. This course is repeatable for 16 credits.

KIN 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 35 credits.

KIN 510. INTERNSHIP. (1-16 Credits)
Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required. This course is repeatable for 26 credits.

KIN 511. INTRODUCTION TO ATHLETIC TRAINING. (4 Credits)
Practice domains include injury and illness prevention and wellness protection, clinical evaluation and diagnosis, immediate and emergency care, treatment and rehabilitation, and organizational and professional health and well-being. Lec/lab.

KIN 512. APPLIED MOTOR LEARNING. (3 Credits)
Application of research and theory to the teaching of motor skills with emphasis on development of instructional strategies related to modeling, knowledge of results, practice, and motivational aspects of learning.

KIN 515. MOTOR CONTROL AND MOVEMENT DYSFUNCTION. (3 Credits)
Contemporary motor control theories and their application to the development of instructional and training programs for individuals with movement disorders caused by neurological disease and/or trauma.

KIN 520. ORTHOPEDIC ASSESSMENT OF UPPER EXTREMITIES. (4 Credits)
Prevention, assessment and management of upper extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab.
Prerequisites: KIN 511 with C or better

KIN 521. ORTHOPEDIC ASSESSMENT OF LOWER EXTREMITIES. (4 Credits)
Prevention, assessment and management of lower extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab.
Prerequisites: KIN 511 with C or better

KIN 522. ORTHOPEDIC ASSESSMENT OF SPINE. (4 Credits)
Prevention, assessment and management of spinal injuries and conditions commonly encountered by the athletic trainer. Lec/lab.
Prerequisites: KIN 520 with C or better and KIN 521

KIN 523. BIOMECHANICS OF MOTOR ACTIVITIES. (3 Credits)
Kinematic and kinetic analysis of volitional human movement with emphasis on analytical techniques and quantitative problem solving.

KIN 525. BIOMECHANICS OF MUSCULOSKELETAL INJURY. (3 Credits)
Mechanical causes and effects of forces applied to the musculoskeletal system, material properties of human tissues, pathomechanics of injury, and degenerative changes across the lifespan. Not offered every year.

KIN 531. PHYSIOLOGY OF PHYSICAL ACTIVITY AND INACTIVITY. (3 Credits)
Physiologic responses to acute and chronic physical activity and inactivity with emphasis on underlying mechanisms and health outcomes.

KIN 532. PHYSICAL ACTIVITY ASSESSMENT. (3 Credits)
Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations.

KIN 533. ENERGETICS AND BIOCHEMISTRY OF EXERCISE. (3 Credits)
Metabolic and energetic responses to acute and chronic physical activity; emphasis on recent research.

KIN 535. PHYSICAL ACTIVITY PROMOTION. (3 Credits)
Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities.

KIN 536. PHYSICAL ACTIVITY IN DIVERSE POPULATIONS. (3 Credits)
Addresses the social, cultural, political, and environmental determinants of physical activity and health among diverse populations. Includes examination of intersecting issues related to race, ethnicity, gender, age, disability, geography, income status, and other societal factors across the lifespan for promoting physical activity through public health strategies.

KIN 544. ADVANCED ADAPTED PHYSICAL ACTIVITY. (3 Credits)
Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities. Lec/lab.

KIN 547. INCLUSION IN PHYSICAL ACTIVITY. (3 Credits)
Effectiveness of physical activity programs provided in inclusive settings. This will include a lifespan/non-categorical approach to program development.

KIN 548. ASSESSMENT AND PROGRAMMING FOR SPECIAL POPULATIONS. (3 Credits)
Use of appropriate assessment procedures for developing effective psychomotor programs for the disabled.

KIN 549. PHYSICAL ACTIVITY FOR PERSONS WITH SEVERE DISABILITIES. (3 Credits)
Plan, develop and implement appropriate physical activity programs, functional program design, assistive technology, instructional strategies, behavior management practices, and data analysis systems that address the needs for psychomotor performance of persons with low incidence disabilities.
KIN 550. HEALTH PROMOTION FOR PEOPLE WITH DISABILITIES. (3 Credits)
Discussion will focus on disability and health, theory driving health promotion program development, guidelines for developing a program for individuals with disabilities, and program evaluation.

KIN 551. CURRENT TRENDS AND ISSUES IN PHYSICAL EDUCATION. (4 Credits)
Current trends and issues in physical education, including curriculum development, professional ethics, instructional practices, and physical activity for the school community.

KIN 553. INSTRUCTIONAL ANALYSIS TECHNIQUES I. (3 Credits)
Introduction to techniques of instructional analysis. Provides in-depth information and training in systematic observation techniques, raw data conversion and inter/intraobserver reliability.

KIN 554. INSTRUCTIONAL ANALYSIS TECHNIQUES II. (3 Credits)
Laboratory/seminar experience to accompany student teaching winter and spring terms. Provides continued application of systematic observation techniques throughout the elementary student teaching experience.

KIN 555. SKILL ANALYSIS AND ASSESSMENT IN K-12. (3 Credits)
Develop proficiency in assessing movement skills, execution of sport techniques, and game play performance. Assessment trends and practices utilized in physical education programs are included.

KIN 556. INSTRUCTIONAL SKILLS I. (3 Credits)
Skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12.

KIN 557. INSTRUCTIONAL SKILLS II. (2 Credits)
Applying and refining skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12.

KIN 558. PHYSICAL EDUCATION CURRICULUM DESIGN AND ORGANIZATION. (3 Credits)
Curricular programs and variations from kindergarten through grade 12, administrative policies and practices.

KIN 559. THE PHYSICAL EDUCATOR AS A PROFESSIONAL. (1 Credit)
Transitioning to teaching, developing a portfolio, certification, obtaining a position, teacher burnout, professionalism, problems of first-year teachers, developing patterns of behavior that lead to a successful career.

KIN 560. MOTIVATION IN PHYSICAL ACTIVITY. (3 Credits)
A social psychological approach to understanding the role of self-perceptions and cognitions in explaining motivated behavior in sport and exercise settings.

KIN 561. PSYCHOSOCIAL FACTORS IN PHYSICAL ACTIVITY. (3 Credits)
A social psychological approach to understanding the role of social interactions and contextual factors in explaining human behavior in sport and exercise settings.

KIN 562. LIFESPAN SPORT AND EXERCISE PSYCHOLOGY. (3 Credits)
Social-psychological issues across the lifespan in the context of sport and exercise.

KIN 564. PROGRAM CAPSTONE AND SYNTHESIS. (3 Credits)
Capstone course in which teacher candidates will review and update their teaching philosophy; showcase their Physical Education master’s portfolio; and develop a plan for professional development.

Prerequisites: KIN 510 with C- or better

KIN 565. EMERGENCY MANAGEMENT OF SPORTS TRAUMA. (3 Credits)
Knowledge and skills related to the specialized care required for serious and/or life-threatening acute athletic related injuries and illnesses. Lec/lab.

Prerequisites: KIN 511 with C or better

KIN 566. GENERAL MEDICAL ASSESSMENT. (3 Credits)
Prevention, assessment and management of general medical conditions commonly encountered by the athletic trainer. Lec/lab.

Prerequisites: KIN 565 with C or better

KIN 567. PHARMACOLOGY IN ATHLETIC TRAINING. (3 Credits)
Pharmacology in sports medicine, topics including, but not limited to, the mechanisms and actions of drugs commonly administered and prescribed in sports medicine environments.

Prerequisites: KIN 566 with C or better

KIN 568. ATHLETIC TRAINING PROGRAM MANAGEMENT. (3 Credits)
Administrative aspects of athletic training program management. Including principles of risk management, strategic and operational planning, medical-legal aspects of athletic healthcare, confidentiality and documentation of patient health information, insurance and third-party reimbursement, personnel issues, and current professional issues.

Prerequisites: KIN 566 with C or better

KIN 569. EVIDENCE-BASED PRACTICE. (3 Credits)
Principles and skills underlying the utilization of evidence to enhance clinical practice decision-making. Includes the development of clinical questions, review and appraisal of relevant literature, and utilization of patient-centered outcome measures.

Prerequisites: KIN 521 with C or better

KIN 573. MEASUREMENT IN HUMAN MOVEMENT. (3 Credits)

KIN 575. RESEARCH IN HUMAN MOVEMENT. (3 Credits)
Investigation and evaluation of research methods applicable to human movement study and professional physical education.

KIN 584. THERAPEUTIC MODALITIES. (4 Credits)
Indications, contraindications, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and conditions commonly encountered by the athletic trainer. Lec/lab.

Prerequisites: KIN 521 with C or better

KIN 585. UPPER EXTREMITY THERAPEUTIC EXERCISE. (4 Credits)
Principles and techniques of therapeutic exercise and manual therapy for the upper extremity, cervical spine, and thoracic spine. Lec/lab.

Prerequisites: KIN 586 with C or better

KIN 586. LOWER EXTREMITY THERAPEUTIC EXERCISE. (4 Credits)
Principles and techniques of therapeutic exercise and manual therapy with a focus on the lower extremity, lumbar spine and ribs.

Prerequisites: KIN 584 with C or better

KIN 599. SPECIAL TOPICS. (1-3 Credits)
Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated when topics differ.

This course is repeatable for 99 credits.

KIN 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.
KIN 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

KIN 607. SEMINAR. (1-16 Credits)
Section 1: Graduate Research (1). Seminar emphasizes student oral presentations of current research topics in exercise and sport science. One credit required of all graduate students. Section 3: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N. This course is repeatable for 16 credits.

KIN 610. PROFESSIONAL INTERNSHIP: PHYSICAL EDUCATION. (1-15 Credits)
Field experience in which the term will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for 25 credits.

KIN 647. CURRENT TOPICS AND RESEARCH IN ADAPTED PHYSICAL ACTIVITY. (3 Credits)
Current trends and critical research issues in adapted physical activity; focus on international and national trends. Topic will be variable.

KIN 699. SPECIAL TOPICS. (1-16 Credits)
Current issues, trends, and topics in KIN research. May be repeated for credit with different topics. This course is repeatable for 25 credits.

**Nutrition**

NUTR 104. ORIENTATION TO THE NUTRITION MAJOR. (1 Credit)
Discuss and explore the academic and professional requirements for successful entry into professional careers in dietetics, foodservice systems management, and human nutrition sciences majors. Identify professional resources, career opportunities, markets and trends in these OSU Nutrition major options. Graded P/N.

NUTR 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

NUTR 216. *FOOD IN NON-WESTERN CULTURE. (3 Credits)
Cultural determinants influencing food habits of humans. Interrelation of eating patterns and socio-cultural, ecological, psychological and economic factors in cross-cultural settings. Roles of men and women in food provision. Lec/rec. (Bacc Core Course) Attributes: CPCS – Core, Pers, Cult Diversity

NUTR 225. GENERAL HUMAN NUTRITION. (3 Credits)
The relationship of food, its nutrients and other components to the promotion of health and fitness with emphasis on the young adult. Current health concerns on a national and international level. This course is for non-majors; NES majors and those in the health sciences should take NUTR 240.

NUTR 235. SCIENCE OF FOODS. (5 Credits)
Composition, functional properties, and structure of foods, including modified ingredients. Principles underlying preparation of food products of standard quality. Lec/lab.
Prerequisites: CH 123 with C- or better or CH 223 with C- or better or ((CH 263 with C- or better or CH 263H with C- or better or CH 273 with C- or better) and (CH 233 [C-] or CH 233H [C-]))

NUTR 240. HUMAN NUTRITION. (3 Credits)
An introductory nutrition course for exercise science, nutrition, dietetics, food science, and health science majors who have taken general chemistry. Concepts of nutrient metabolism and utilization, nutrient deficiencies and toxicities and their relationship to disease prevention and treatment.
Prerequisites: (CH 121 with C- or better or CH 224H with C- or better or (CH 221 with C- or better or CH 231 with C- or better or CH 231H with C- or better))

NUTR 241. APPLICATIONS IN HUMAN NUTRITION. (1 Credit)
Application of nutrition theory from NUTR 240 using a dietary project and hands-on recitation activities. A key focus of the course will be on applying nutrition theory. Rec.
Prerequisites: NUTR 240 (may be taken concurrently) with C- or better

NUTR 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

NUTR 306. PROJECTS. (1-16 Credits)
This course is repeatable for 36 credits.

NUTR 307. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 311. FOODSERVICE PRODUCTION AND PURCHASING. (4 Credits)
Food production, purchasing, facility and materials management in foodservice operations. Quantity production styles, safety and sanitation, service methods and equipment. Lec/lab/rec.
Prerequisites: NUTR 235 with C- or better

NUTR 312. *ISSUES IN NUTRITION AND HEALTH. (3 Credits)
Impact of nutrition as one component of complex environmental, behavioral, social, and genetic factors significant to health promotion. Apply scientific knowledge to current health issues of changing dietary patterns, technological development in food products and nutrition controversies. Recognize economic and public policy implications. Lec/rec. (Bacc Core Course) Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisites: NUTR 225 with C- or better or NUTR 240 with C- or better

NUTR 319. PROMOTING FOOD AND NUTRITION. (3 Credits)
Strategies in promoting products, services or ideas; negotiating, advertising, public policy, consumer service, social marketing, market research, trends and strategies. Lec/lab.
Prerequisites: NUTR 240 with C- or better and NUTR 241 [C-]

NUTR 325. NUTRITION THROUGH THE LIFE CYCLE. (3 Credits)
Nutritional needs and concerns in pregnancy and lactation, infancy, childhood, adolescence, adult and later years.
Prerequisites: (NUTR 240 with C- or better or NUTR 225 with C- or better) and NUTR 241 [C-]

NUTR 341. NUTRITION FOR EXERCISE. (3 Credits)
Review the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSTLISTED as EXSS 341, KIN 341.
Prerequisites: (KIN 324 with C- or better or EXSS 324 with C- or better) and NUTR 240 [C-]
NUTR 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

NUTR 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

NUTR 403. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 405. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 406. SPECIAL PROBLEMS; PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

NUTR 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 408. WORKSHOP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

NUTR 410. FIELD EXPERIENCE. (1-15 Credits)
Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. For advanced students. Applications made and approved term preceding enrollment. Graded P/N.
This course is repeatable for 50 credits.

NUTR 416. CULTURAL ASPECTS OF FOODS. (3 Credits)
Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: NUTR 235 with C- or better

NUTR 417. HUMAN NUTRITION SCIENCE. (4 Credits)
Application of biochemistry and physiology to nutrition of the individual.
Prerequisites: BB 350 with C- or better

NUTR 418. HUMAN NUTRITION SCIENCE. (4 Credits)
Application of biochemistry and physiology to nutrition of the individual.
Prerequisites: NUTR 417 with C- or better

NUTR 423. COMMUNITY NUTRITION. (4 Credits)
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist.
Prerequisites: NUTR 325 with C- or better

NUTR 430. MEDICAL NUTRITION THERAPY I. (4 Credits)
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec.
Prerequisites: (BB 350 with C- or better or (BB 450 with C- or better and BB 451 [C]) and (BI 233 [C] or BI 332 [C]) and (BI 242 [C] or BI 342 [C]) and (BI 233 [C] or BI 333 [C]) and (BI 243 [C] or BI 343 [C]) and NUTR 417 (may be taken concurrently) [C] and NUTR 439 [C]

NUTR 431. MEDICAL NUTRITION THERAPY 2. (4 Credits)
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Prerequisites: NUTR 430 with C- or better

NUTR 432. MEDICAL NUTRITION THERAPY 3. (3 Credits)
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Prerequisites: NUTR 431 with C- or better

NUTR 439. COMMUNICATIONS IN DIETETICS. (3 Credits)
Theory and practice in food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: NUTR 325 with C- or better

NUTR 446. MANAGING FOOD AND NUTRITION SERVICES. (4 Credits)
Overview of organizational structure, functions of managers in food and nutrition service organizations: human and financial resources, regulatory influences, health care organizations, current issues in operations. Lec/rec.
Prerequisites: NUTR 311 with C- or better

NUTR 447. MANAGEMENT OF FOOD SYSTEMS LABORATORY. (3 Credits)
Application of theory in managing a university food service as part of a student team: planning, production, projecting resource needs, evaluation of outcomes and financial goals.

NUTR 499. SPECIAL TOPICS IN DIETETICS. (2-6 Credits)
Current issues, trends, and topics in nutrition and dietetics. May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

NUTR 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 502. INDEPENDENT STUDY. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 503. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

NUTR 505. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 506. SPECIAL PROBLEMS; PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 507. SEMINAR. (1-16 Credits)
1 credit graded P/N.
This course is repeatable for 16 credits.

NUTR 508. WORKSHOP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

NUTR 509. PRACTICUM. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.
Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. CROSSTLISTED as FST 514.

Equivalent to: FST 514

**NUTR 516. CULTURAL ASPECTS OF FOODS. (3 Credits)**
Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab.

**NUTR 517. HUMAN NUTRITION SCIENCE. (4 Credits)**
Application of biochemistry and physiology to nutrition of the individual.

**NUTR 518. HUMAN NUTRITION SCIENCE. (4 Credits)**
Application of biochemistry and physiology to nutrition of the individual.

**Prerequisites:** NUTR 517 with C or better

**NUTR 523. COMMUNITY NUTRITION. (4 Credits)**
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist.

**NUTR 530. MEDICAL NUTRITION THERAPY 1. (4 Credits)**
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec.

**NUTR 531. MEDICAL NUTRITION THERAPY 2. (4 Credits)**
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.

**NUTR 532. MEDICAL NUTRITION THERAPY 3. (3 Credits)**
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.

**NUTR 535. NUTRITION AND EXERCISE: MACRONUTRIENTS AND ENERGY METABOLISM. (3 Credits)**
Current research examining the interrelationship of macronutrients and exercise and energy balance will be reviewed, including their roles in health, disease prevention and exercise performance.

**NUTR 539. COMMUNICATIONS IN DIETETICS. (3 Credits)**
Theory and practice of food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies.

**NUTR 546. FOODSERVICE ORGANIZATIONS. (3 Credits)**
Overview of organizational structure, functions of managers in foodservice organizations: human resources, regulatory influences, health care organizations, current issues in operations. Lec/rec.

**NUTR 550. NUTRITIONAL STATUS. (4 Credits)**
Research studies with emphasis on estimation of nutrient intake and assessment of nutritional status, including biochemical, clinical, epidemiological and anthropometric measures. Interpretation of status indicators.

**NUTR 559. SPECIAL TOPICS IN NUTRITION. (3-6 Credits)**
Current issues, trends, and topics in nutrition and health. May be repeated for credit when topic varies. This course is repeatable for 18 credits.

**NUTR 601. RESEARCH. (1-16 Credits)**
This course is repeatable for 16 credits.

**NUTR 602. INDEPENDENT STUDY. (1-16 Credits)**
Graded P/N. This course is repeatable for 16 credits.

**NUTR 603. THESIS. (1-16 Credits)**
Graded P/N. This course is repeatable for 999 credits.

**NUTR 605. READING AND CONFERENCE. (1-16 Credits)**
Graded P/N. This course is repeatable for 16 credits.

**NUTR 607. SEMINAR. (1-16 Credits)**
Graded P/N. This course is repeatable for 16 credits.

**NUTR 609. PRACTICUM. (1-16 Credits)**
This course is repeatable for 16 credits.

**NUTR 610. INTERNSHIP. (1-16 Credits)**
Graded P/N. This course is repeatable for 16 credits.

**NUTR 617. ADVANCED MACRONUTRIENT METABOLISM. (3 Credits)**
Focuses on human macronutrient metabolism. Macronutrient topics include water, carbohydrate, lipid, amino acid/protein, lipid and carbohydrate and energy metabolism. Emphasis is placed on the integration of metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to macronutrient metabolism and human disease. Offered even years in spring term.

**NUTR 618. ADVANCED MICRONUTRIENT METABOLISM. (3 Credits)**
Focus is on human micronutrient metabolism. Topics include micronutrients (vitamins and minerals), phytochemicals and mammalian metabolism. Emphasis will be placed on the integration of micronutrient/phytochemical metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to micronutrient/phytochemical metabolism and human disease.

**NUTR 699. SPECIAL TOPICS IN NUTRITION RESEARCH. (3-16 Credits)**
Current issues, trends, and topics in nutrition research. May be repeated for credit when topic varies. This course is repeatable for 16 credits.
Physical Activity

PAC 100. ADAPTED PHYSICAL ACTIVITY. (1 Credit)
Individual workout for students with permanent or temporary physical disabilities and for students enrolled in another PAC who sustain an injury.
This course is repeatable for 11 credits.

PAC 102. AQUA AEROBICS. (1 Credit)
Fitness class using a variety of movements in shallow and deep water, mostly in a vertical position. Do not need swimming skills.
This course is repeatable for 11 credits.

PAC 103. DEEP WATER FITNESS. (1 Credit)
Fitness class using a variety of movements in a deep water pool, mostly in a vertical position. Should be comfortable in deep water.
This course is repeatable for 11 credits.

PAC 105. CPR/FIRST AID. (1 Credit)
Introduces cardiac and first aid emergency response procedures. Emphasis placed on safe response, chain of survival, quality CPR (adults, children, infants and team responses), use of an AED, medical emergencies, injury emergencies and environmental emergencies. Students successfully completing the American Heart Association certification requirements will be issued a Heartsaver First Aid and BLS (Basic Life Support) for the Healthcare Provider certification at the end of the course.
This course is repeatable for 11 credits.

PAC 106. BEAVER FIT. (1 Credit)
A conditioning class for those of all fitness levels that focuses on mobility, functional movement, and high-intensity interval training as a means to improve cardiovascular fitness, muscular fitness, and flexibility.
This course is repeatable for 11 credits.

PAC 108. STEP AEROBICS. (1 Credit)
Low-impact, high intensity workout adjustable to all fitness levels utilizing adjustable height benches. Strengthening and flexibility exercises included.
This course is repeatable for 11 credits.

PAC 110. INTRODUCTION TO WHITE WATER KAYAKING. (2 Credits)
Students will learn fundamentals of white water kayaking in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks.
This course is repeatable for 11 credits.

PAC 111. INTRODUCTION TO CANOEING. (2 Credits)
Students will learn fundamentals of canoeing in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks.
This course is repeatable for 11 credits.

PAC 112. LEARNING KAYAK ROLLING BASICS. (2 Credits)
Students learn fundamentals of rolling a kayak in an indoor pool-based environment. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course.
This course is repeatable for 10 credits.

PAC 113. BADMINTON I. (1 Credit)
Singles and doubles skills, practice, rules, strategies and play.
This course is repeatable for 11 credits.

PAC 114. BADMINTON II. (1 Credit)
Intermediate skill development in badminton.
This course is repeatable for 11 credits.

PAC 115. OUTDOOR LIVING SKILLS. (2 Credits)
Educates and introduces students on how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. Classroom and field (lab) experience. Includes one mandatory weekend overnight outing. CROSSLISTED as TRAL 115.
Equivalent to: TRAL 115
This course is repeatable for 4 credits.

PAC 116. BASKETBALL I (MEN/WOMEN). (1 Credit)
Fundamental basketball skills, drills, rules, strategies, and practice. Game play appropriate for the skill level.
Equivalent to: PAC 123
This course is repeatable for 11 credits.

PAC 117. BASKETBALL COMPETITIVE. (1 Credit)
Team play, individual and team skills developed and refined, competitive round robin tournaments.
This course is repeatable for 11 credits.

PAC 118. LABORATORY FOR OUTDOOR LIVING SKILLS. (1 Credit)
Practical field application of concepts learned in TRAL 115/PAC 115, Outdoor Living Skills. Field (lab) experience includes one mandatory weekend overnight. Introduces how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. CROSSLISTED as TRAL 118.
Corequisites: PAC 120
Equivalent to: TRAL 118
This course is repeatable for 2 credits.

PAC 120. MOUNTAIN BIKING. (1 Credit)
Touring trails in Corvallis area; riding techniques, safety, maintenance, environmental concerns. Required equipment: mountain bike, tire repair kit, helmet.
This course is repeatable for 11 credits.

PAC 121. BILLIARDS. (1 Credit)
Skills, technique, strategy, game knowledge as introduction to billiards (pool), a ‘cue’ sport; rules and gaming for variations of pocket billiards; practice and class tournament play.
This course is repeatable for 11 credits.

PAC 122. BODY SCULPTING. (1 Credit)
Fitness workout set to music using lighter resistance training aids such as dumbbells, resistance tubing, bands, and aerobic steps.
This course is repeatable for 11 credits.

PAC 123. BOWLING I. (1 Credit)
Fundamentals of the game including etiquette, spot bowling, natural hook and straight ball delivery, scoring, handicap computation, spare pickup, and error correction. Additional fee; equipment supplied.
This course is repeatable for 11 credits.

PAC 124. BOWLING II. (1 Credit)
Review and refinement of basic fundamentals of bowling. Emphasis on spot bowling, adjusting for lane conditions, choices in equipment, league play, and mental training.
This course is repeatable for 11 credits.
PAC 126. CARDIO KICKBOXING I. (1 Credit)
High intensity group workout set to motivational music and combining
skills and techniques from boxing, kickboxing, and other martial arts.
This course is repeatable for 11 credits.

PAC 129. CARDIO COMBO. (1 Credit)
Combination of aerobic training classes that use music such as Cardio
Kickboxing, Body Sculpture, Sports Conditioning, and/or Step Aerobics.
Actual curriculum may vary with instructors.
Equivalent to: PAC 106
This course is repeatable for 11 credits.

PAC 130. CONDITIONING. (1 Credit)
Total body approach to fitness, cardiorespiratory conditioning, muscular
strength and endurance; flexibility emphasized. May follow a specific
training format, e.g., ROTC section follows Army conditioning format.
This course is repeatable for 11 credits.

PAC 131. SNOWBOARD-SKI CONDITIONING. (1 Credit)
Strength, muscular endurance, flexibility, balance, and cardiovascular
exercises specific to downhill skiing and snowboarding; designed to help
prepare students for participation in these sports.
Equivalent to: PAC 108
This course is repeatable for 11 credits.

PAC 133. DANCE: TAP I. (1 Credit)
Individual and group dance with specialized shoes; basic step
technique and vocabulary; warm up exercises progressing into rhythmic
combinations performed to music; culminates in full routine to music.
This course is repeatable for 11 credits.

PAC 136. DANCE: BALLET I. (1 Credit)
Introduction to basic ballet technique and aesthetics, terminology,
alignment, stretch and strength exercises. No previous dance experience
needed. Additional fee for accompanist.
This course is repeatable for 11 credits.

PAC 137. DANCE: BALLET II. (1 Credit)
Review and practice of beginning ballet technique, introduction of
more advanced stretches, steps, and combinations. Additional fee for
accompanist.
This course is repeatable for 11 credits.

PAC 138. DANCE: BALLET III. (1 Credit)
Intermediate and advanced ballet technique, comprehensive exploration
of the discipline. Additional fee for accompanist.
This course is repeatable for 11 credits.

PAC 139. HIP HOP DANCE. (1 Credit)
Aerobic/energetic experience consisting of a warm-up/conditioning and
choreographic combinations.
This course is repeatable for 11 credits.

PAC 140. DANCE: JAZZ I. (1 Credit)
Introduction to jazz dance, technique, isolations, and combinations.
Different jazz styles are explored. No previous dance experience is
necessary.
This course is repeatable for 11 credits.

PAC 141. DANCE: JAZZ II. (1 Credit)
Intermediate jazz technique, isolations and combinations.
This course is repeatable for 11 credits.

PAC 141. DANCE: MODERN I. (1 Credit)
Introduction to modern dance movement fundamentals. Technique,
stretch, strength, and alignment are included, as well as an appreciation
for movement expression. No previous dance experience needed.
Additional fee for accompanist.
This course is repeatable for 11 credits.

PAC 146. DANCE: MODERN II. (1 Credit)
An intermediate level of modern dance technique and movement
expression. Additional fee for accompanist.
This course is repeatable for 11 credits.

PAC 148. DANCE: CUBAN SALSA I (MEN/WOMEN). (1 Credit)
Foundations of Cuban Salsa (Casino) as well as Rueda de Casino
with focus on musical development and fundamentals of leading and
following in partner dance.
This course is repeatable for 11 credits.

PAC 149. DANCE: CUBAN SALSA II. (1 Credit)
Higher concepts of Cuban Salsa (Casino) as well as Rueda de Casino,
with focus on musical development and fundamentals of leading and
following in partner dance.
This course is repeatable for 11 credits.

PAC 150. CULTURAL WORLD DANCE (MEN/WOMEN). (1 Credit)
Introduction to traditional dance forms from Europe, Israel, North America
and Asia, focusing on movement, cultural heritage, history, and diversity.
This course is repeatable for 11 credits.

PAC 151. COUNTRY LINE DANCE. (1 Credit)
Non-partner dance routines in country western style; musical
interpretation, footwork, and sequencing of 20 different routines.
This course is repeatable for 11 credits.

PAC 152. DANCE: SALSA I. (1 Credit)
Steps and rhythmic accent of Salsa and Merengue style; fundamentals
of leading and following; basic moves and combinations. No prior
experience needed.
Equivalent to: PAC 141
This course is repeatable for 11 credits.

PAC 153. DANCE: SALSA II. (1 Credit)
Intermediate moves, rhythmic accents and step combinations of Salsa;
development of leading and following.
Prerequisites: PAC 152 with C- or better
This course is repeatable for 11 credits.

PAC 154. DANCE: COUNTRY WESTERN I (MEN/WOMEN). (1 Credit)
Focus on traditional Country Western Swing patterns. Emphasizes
fundamentals of leading and following. Also including introduction to
waltz, two-step, cowboy cha-cha and 10-step polka.
This course is repeatable for 11 credits.

PAC 155. DANCE: COUNTRY WESTERN II (MEN/WOMEN). (1 Credit)
Build on CW I with advanced waltz, two-step, and cha-cha patterns;
introduces schottische and East Coast swing.
This course is repeatable for 11 credits.

PAC 156. DANCE: COUNTRY WESTERN III (MEN/WOMEN). (1 Credit)
Advanced two-step patterns and styling with a focus on musical
interpretation; development of leading and following.
Prerequisites: PAC 155 with C- or better
This course is repeatable for 11 credits.
PAC 158. DANCE: BEGINNING SWING (MEN/WOMEN). (1 Credit)
Introduction to single time, double time, and triple time (jitterbug) swing; variations for each style, covering most swing music rhythms. Emphasizes fundamentals of leading and following. Men/women. This course is repeatable for 11 credits.

PAC 159. DANCE: BALLROOM I (MEN/WOMEN). (1 Credit)
Posture and alignment, fundamentals of leading and following, basic steps and variations for waltz, foxtrot, swing, tango, and cha-cha. Men/women. This course is repeatable for 11 credits.

PAC 160. DANCE: BALLROOM II (MEN/WOMEN). (1 Credit)
Additional steps and patterns of popular ballroom dances. Prerequisites: PAC 159 with C- or better. This course is repeatable for 11 credits.

PAC 161. DANCE: BALLROOM III (MEN/WOMEN). (1 Credit)
Styling; additional dances: rhumba, silver fox trot, and Viennese waltz; advanced dance figures for tango and cha-cha. Prerequisites: PAC 160 with C- or better. This course is repeatable for 11 credits.

PAC 162. DANCE: SWING II (MEN/WOMEN). (1 Credit)
Social dancing focused on Twenties-style Charleston; pure Balboa and Balboa-Swing, and Blues Dance. Men/women. This course is repeatable for 11 credits.

PAC 163. DANCE: LATIN I. (1 Credit)
Latin dances including cha-cha, mambo, salsa, rhumba, merengue, bolero, salsa, and paso doble. Emphasis on proper styling and technical execution of each dance; effective leading and following techniques. Prerequisites: PAC 159 with C- or better. This course is repeatable for 11 credits.

PAC 165. DANCE: WEST COAST SWING (MEN/WOMEN). (1 Credit)
Focus on style, technique and many different step patterns of the west coast swing dance. Prerequisites: PAC 154 with C- or better or PAC 159 with C- or better. This course is repeatable for 11 credits.

PAC 166. BALLROOM 2 STEP, HUSTLE (MEN/WOMEN). (1 Credit)
Smooth, romantic social dance that is neither ballroom, Latin, nor swing but a rhythm dance identified as club-style, danced to contemporary ballad-like music. Hustle is fast-paced, swing-related dance to disco beat. Class encompasses intermediate step patterns, technique and styling, stationary, traveling patterns. Prerequisites: PAC 160 with C- or better. Equivalent to: PAC 178. This course is repeatable for 11 credits.

PAC 167. DANCE: LINDY HOP. (1 Credit)
Ballroom dance style based on original eight-count swing dance evolved in Harlem ballrooms during the late 1920s; styling emphasized. Prerequisites: PAC 158 with C- or better or PAC 159 with C- or better. Equivalent to: PAC 179. This course is repeatable for 11 credits.

PAC 168. DANCE: LINDY HOP II (MEN/WOMEN). (1 Credit)
Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation in the Lindy Hop style; development of leading and following. Prerequisites: PAC 167 with C- or better. This course is repeatable for 11 credits.

PAC 169. COOL SHOES, BALLROOM PERFORMANCE (MEN/WOMEN). (2 Credits)
Students learn and perform ballroom dance routines on a intermediate level. This course is a full year commitment ending with a dance concert in the spring. Men/women. This course is repeatable for 12 credits.

PAC 170. DANCE: WEST COAST SWING II (MEN/WOMEN). (1 Credit)
Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation; development of leading and following. Prerequisites: PAC 165 with C- or better. This course is repeatable for 11 credits.

PAC 171. DANCE: NEW SHOES. (1 Credit)
Introduces students to formation ballroom dancing at a beginning level. Dances learned over the course of this term will be determined by the instructor at the beginning of the term. Prerequisites: PAC 159 with D- or better. This course is repeatable for 11 credits.

PAC 172. ROCK SITE MANAGEMENT. (2 Credits)
Students will be introduced to a variety of basic skills, gear and systems that will allow them to safely manage and participate in a single pitch rock climbing environment. This class will present students with various technical skills that will serve as a foundation for future land-based outdoor disciplines. Students will be introduced to gear, such as software (ropes, webbing, harnesses) and hardware (carabiners, friction devices); skills, such as knots, belaying, rappelling; and systems such as anchors, raises, lowers. CROSSTRAIL as TRAL 172. Equivalent to: TRAL 172.

PAC 174. FLAG FOOTBALL. (1 Credit)
Skill instruction and practice; drills; strategies, game play of America football; emphasis on teamwork and sportsmanship in a competitive but non-threatening or stressful environment. This course is repeatable for 11 credits.

PAC 178. FLY FISHING I. (1 Credit)
Casting and fishing techniques, lure making, equipment selection, terminology, and regulation for fishing in Oregon's marine environment. This course is repeatable for 11 credits.

PAC 179. FLY FISHING II. (1 Credit)
Advanced fly casting and fly fishing techniques for trout, fly-tying, equipment selection, basic aquatic organism identification, terminology, and regulations for fishing in Oregon's freshwater environment. Equivalent to: PAC 167. This course is repeatable for 11 credits.

PAC 180. STEELHEAD FISHING. (1 Credit)
Casting and fishing techniques, lure making, equipment selection, terminology, and regulations for fishing in Oregon's marine environment for steelhead. This course is repeatable for 11 credits.

PAC 182. DISC GOLF I. (1 Credit)
Techniques for throwing discs; equipment, knowledge, etiquette, and rules associated with playing a disc golf course; experience playing practice and official disc golf courses. This course is repeatable for 11 credits.

PAC 184. GOLF I. (1 Credit)
Basic fundamental principles in all phases of golf; rules, terminology, etiquette, safety and scoring. Equipment provided. This course is repeatable for 11 credits.
PAC 185. GOLF II. (1 Credit)
Individual practice and course play; skill refinement as continuation of Golf I. Equipment available. Course play expected, additional fee. 
This course is repeatable for 11 credits.

PAC 186. GOLF III. (1 Credit)
Advanced skills, knowledge involved in competitive play. Course play expected, additional fee. 
This course is repeatable for 11 credits.

PAC 188. GYMNASICS. (1 Credit)
Fundamental techniques on vault, bars, beam, and floor. 
This course is repeatable for 11 credits.

PAC 189. GYMNASICS II. (1 Credit)
Build upon previous gymnastics experiences or classes; floor exercise, uneven parallel bars, vault, mini-trampoline and beam apparatus are available. 
This course is repeatable for 11 credits.

PAC 190. KARATE. (1 Credit)
Instruction in traditional Japanese karate basic striking and blocking techniques, kata (forms), philosophy, conditioning, and etiquette. Self-defense applications are also emphasized. 
This course is repeatable for 11 credits.

PAC 192. JUDO I. (1 Credit)
Skill instruction in landing, throwing and grappling for this style of martial arts; etiquette for practice and competition; basic knowledge of vocabulary, rules and scoring. 
This course is repeatable for 11 credits.

PAC 193. JUDO II. (1 Credit)
Intermediate skill instruction in landing, throwing, pins, chokes in Kodokan Judo style; principles of Seiryoku-Zenyou and Jita-Kyouei designed to help individuals become better members of society through training body and mind; instruction for competition knowledge and skills. Judo etiquette for practice and competition expected. 
This course is repeatable for 11 credits.

PAC 194. PILATES. (1 Credit)
Non-impact, invigorating approach to physical conditioning and mind/body awareness; helps develop core body strength, improve posture and balance, and increase muscle endurance, tone, flexibility. 
This course is repeatable for 11 credits.

PAC 195. PILATES II. (1 Credit)
Progression of Joseph Pilates mat exercises; emphasis on intermediate and advanced levels; application of Pilates’ principles to new exercises; use of props; application of principles to daily living. 
This course is repeatable for 11 credits.

PAC 197. PICKLEBALL. (1 Credit)
Fast-paced, self-officiated net game with similarities to tennis, badminton, table tennis, and racquetball. Course covers rules, strategies, technique, preparation for play, and includes extensive active practice and play; played with two, three, or four people. 
This course is repeatable for 11 credits.

PAC 199. SPECIAL TOPICS. (1-3 Credits)
Experimental or new classes. 
This course is repeatable for 11 credits.

PAC 201. RELAXATION. (1 Credit)
Introduction to techniques that promote relaxation of the nervous system. These may include, but are not limited to: meditation, imagery, yoga postures, and self-massage. Students will be encouraged to reflect on how life choices influence their nervous system. 
This course is repeatable for 11 credits.

PAC 202. MEDITATION. (1 Credit)
Examine the application of building simple awareness, how to manage thoughts in productive and compassionate ways, and how to transfer these skills into healthy relationships. Explore strategies for managing mental and physical difficulties including anxiety, pain, and overall stress through experiential learning and personal sharing of experiences. 
This course is repeatable for 11 credits.

PAC 205. ROWING, CREW (MEN/WOMEN). (1 Credit)
Introduction to the sport of rowing; designed for the novice (beginner). Includes basic technique and terminology, related water safety, and development of strength, endurance, and flexibility. 
This course is repeatable for 11 credits.

PAC 212. RUNNING, JOGGING. (1 Credit)
Cardiorespiratory fitness with scenic running routes; training, nutrition, and physiology. Beginning and intermediate level. 
This course is repeatable for 11 credits.

PAC 213. RUNNING: 10K TRAINING. (1 Credit)
Intermediate to advanced conditioning and training program for road racing. 
This course is repeatable for 11 credits.

PAC 214. HALF MARATHON TRAINING. (2 Credits)
Progressive training combining walking, running, core strengthening, interval techniques in preparation for a 13.1 mile (1/2 marathon) event. Open to all levels; may choose to walk, walk/run, or run. 
This course is repeatable for 11 credits.

PAC 215. RUGBY, TOUCH. (1 Credit)
Basic skills of open field rugby; emphasis on ball handling and attacking strategy; rules and history; game play. 
This course is repeatable for 11 credits.

PAC 217. SELF DEFENSE. (1 Credit)
Nonviolent self-defense. Develop self-confidence and skills for assault situations. Conditioning and practical skills. Men and women, all levels. 
This course is repeatable for 11 credits.

PAC 224. TELEMARK SKIING. (1 Credit)
Winter sport that is a cross between cross country and downhill skiing. Requires telemark equipment where the heel is unattached. Class accommodates all levels and practices on the downhill slopes. Additional fee covers bus transportation, lessons, and lift ticket. Rental of equipment is not included. 
This course is repeatable for 11 credits.

PAC 225. DOWNHILL SKIING. (1 Credit)
Travel to area facilities, 1 1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced; racer. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals. 
This course is repeatable for 11 credits.

PAC 227. SNOWBOARDING. (1 Credit)
Travel to area facilities, 1 1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals. 
This course is repeatable for 11 credits.
PAC 229. SOCCER I. (1 Credit)
Basic skills of controlling the ball; conditioning; lead-up games; team play.
This course is repeatable for 11 credits.

PAC 230. SOCCER II. (1 Credit)
Review of basic skills of offense and defense in controlled game play; concepts of team position and play, pressure and attack.
This course is repeatable for 11 credits.

PAC 231. SOCCER III. (1 Credit)
High level soccer skills; team play and transition concepts; set plays and alignments for both offense and defense.
This course is repeatable for 11 credits.

PAC 233. SOCCER: INDOOR. (1 Credit)
Skill instruction and development; strategies and rules for indoor play; game play in indoor gymnasium.
This course is repeatable for 11 credits.

PAC 236. SOFTBALL, WHIFFLEBALL. (1 Credit)
Skills, rules, strategies, practice, and game play of the popular outdoor slow pitch game. Modified softball with whiffleball when play is indoors.
Equivalent to: PAC 262
This course is repeatable for 11 credits.

PAC 242. SCUBA: OPEN WATER. (2 Credits)
Lecture includes physiology, water environment, equipment, and techniques for fundamental SCUBA diving. Laboratory includes practice in techniques, skills, and equipment usage; sessions held in pool and open water. Successful completion leads to PADI certification. Additional fee covers most equipment, texts, certification, and open water dive trip.
This course is repeatable for 11 credits.

PAC 243. SCUBA: ADVANCED OPEN WATER. (1 Credit)
Classroom lecture and laboratory in hypothermics, natural navigation, dive physiology, compass navigation, night and limited visibility procedures, boat diving, search and salvage techniques, deep diving procedures, health for diving, and an introduction to dive rescue. Successful completion of this course can lead to PADI certification. Additional fee.
This course is repeatable for 11 credits.

PAC 244. SCUBA: RESCUE DIVER. (1 Credit)
Techniques, skills, knowledge, and practice in self-rescue and rescue of others in underwater emergencies; may lead to PADI certification; lecture and pool laboratory; open water dive required. Additional fee.
This course is repeatable for 11 credits.

PAC 245. SCUBA SPECIAL TOPICS. (1 Credit)
Specialized courses requiring previous certification in SCUBA. Check the current schedule of classes for more information and prerequisites. Possible classes: altitude diver, night diver, search and recovery, deep diver, underwater navigation, equipment specialist. Additional fee.
This course is repeatable for 11 credits.

PAC 246. DIVER MASTER TRAINING. (2 Credits)
Enter level PADI certification course for preparation to instruct SCUBA; lecture, lab, open water experience; must take two consecutive terms. Additional fee: $160 per term.
This course is repeatable for 11 credits.

PAC 247. SURFING. (1 Credit)
Knowledge and fundamental skills of this aquatic sport including history, terminology, safety precautions, the ocean environment, and equipment. Additional fee.
Equivalent to: PAC 286
This course is repeatable for 11 credits.

PAC 248. SWIM: NON-SWIMMER. (1 Credit)
Skills for self-rescue; fundamental skills in swimming and safety. Designed for people with a fear of water. Recommended S/U grading.
This course is repeatable for 11 credits.

PAC 249. LIFEGUARD TRAINING. (1 Credit)
Trains participants in the skills required to become a lifeguard. Emphasis on professional behavior; water rescues, safe response, quality CPR (adults, children, infants, and team responses), use of an AED and first aid. Students successfully completing the American Red Cross certification requirements will be issued a lifeguarding certification at the end of the course.
This course is repeatable for 11 credits.

PAC 250. SWIM I. (1 Credit)
Swimming concepts, survival and breathing techniques, front crawl and elementary backstroke as minimum instruction.
This course is repeatable for 11 credits.

PAC 252. SWIM II. (1 Credit)
Fitness swimming, swimming strokes and skills.
This course is repeatable for 11 credits.

PAC 253. SWIM TRAINING WORKOUT. (1 Credit)
Competitive skills and strokes; emphasis on training.
This course is repeatable for 11 credits.

PAC 254. COMPETITIVE SWIMMING. (1 Credit)
Prepares students for competitive swimming and emphasizes lifetime aquatic fitness; interval swim workouts designed for speed and endurance; instruction on legal techniques of strokes and turns; culminates in intra-class swim meet; 2,000-3,000 yards/day.
This course is repeatable for 11 credits.

PAC 256. TAIJI, TAI CHI I. (1 Credit)
Introduction to ancient Chinese "internal martial art" based upon concepts of Yin and Yang; detailed slow and relaxed form movements provide benefits to body, mind, and spirit.
This course is repeatable for 11 credits.

PAC 257. TAIJI, TAI CHI II. (1 Credit)
Continuation of study of the Yang-style Taiji form; more in-depth exploration of underlying principles and push-hands exercises.
This course is repeatable for 11 credits.

PAC 260. TENNIS I. (1 Credit)
Introduction to fundamental strokes, singles and doubles play, scoring, and basic concepts in tennis.
This course is repeatable for 11 credits.

PAC 261. TENNIS II. (1 Credit)
Review and refinement of fundamental strokes; volley, lob, return of serve; introduction to singles and doubles strategy.
This course is repeatable for 11 credits.

PAC 262. TEAM HANDBALL/(MEN/WOMEN). (1 Credit)
Fast-paced indoor court game that combines skills and strategies similar to water polo, basketball, soccer and hockey; rules, regulations, strategies, and skills introduced and practiced; requires teamwork, cooperation, and court strategy.
This course is repeatable for 11 credits.
PAC 265. TUMBLING I. (1 Credit)
Technical instruction, progressions, and practice in basic, intermediate, and advanced tumbling skills; emphasis on safety and fitness concepts; floor and mini-trampoline skills; no apparatus instruction.
This course is repeatable for 11 credits.

PAC 266. TUMBLING II. (1 Credit)
Technical instruction, progressions, safety, and practice building upon skills taught in PAC 265, Tumbling I.
This course is repeatable for 11 credits.

PAC 268. TRIATHLON TRAINING. (2 Credits)
Training in swimming, running, and bicycling to prepare for triathlon participation. Strategies, transitioning technique, and weight training information; training plan formation; event planning; culminates in class or community event.
This course is repeatable for 11 credits.

PAC 271. ULTIMATE FRISBEE. (1 Credit)
Fundamentals for the beginning and intermediate player; individual skill development, rules, game play, and strategy.
This course is repeatable for 11 credits.

PAC 273. VOLLEYBALL I. (1 Credit)
Fundamental volleyball skills, drills, rules, strategies, and practice. Game play appropriate for skill level.
This course is repeatable for 11 credits.

PAC 274. VOLLEYBALL II. (1 Credit)
Fundamental skills and knowledge refined; intermediate skills developed, competitive play.
This course is repeatable for 11 credits.

PAC 275. VOLLEYBALL III. (1 Credit)
Skill refinement and development; intense, highly competitive drills and game situations, doubles through sixes play.
This course is repeatable for 11 credits.

PAC 278. FITNESS WALKING. (1 Credit)
Establishment of personal fitness programs through walking with emphasis on technique and aerobic components.
This course is repeatable for 11 credits.

PAC 282. WATER POLO. (1 Credit)
Team game, played in deep water; instruction in skills, drills, strategies, techniques; game play; knowledge of rules and terminology.
This course is repeatable for 11 credits.

PAC 286. WEIGHT TRAINING: CIRCUITS. (1 Credit)
Fast-paced fitness class using stations of resistance training exercises. Designed to improve cardiovascular fitness and muscular endurance more than strength.
This course is repeatable for 11 credits.

PAC 287. WEIGHT TRAINING I. (1 Credit)
Exercise techniques in both free and fixed resistance training equipment; safety procedures, terminology, and principles of exercise.
This course is repeatable for 11 credits.

PAC 288. WEIGHT TRAINING II. (1 Credit)
Intermediate level of weight training in free and fixed weights.
Prerequisites: PAC 287 with C+ or better
This course is repeatable for 11 credits.

PAC 292. WRESTLING. (1 Credit)
Collegiate wrestling fall and winter terms; freestyle and Greco wrestling spring term. All levels.
This course is repeatable for 11 credits.

PAC 293. INTERDISCIPLINARY YOGA. (1 Credit)
Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement.
Equivalent to: PAC 293H
This course is repeatable for 11 credits.

PAC 293H. INTERDISCIPLINARY YOGA. (1 Credit)
Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement.
Attributes: HNRS – Honors Course Designator
Equivalent to: PAC 293
This course is repeatable for 11 credits.

PAC 294. YOGA I. (1 Credit)
Principles and practice of basic yoga postures, techniques of posture alignment, yogi breathing styles and their impact on the body and mind. Students will be exposed to a variety of forms of yoga, as well as basic yoga philosophy.
This course is repeatable for 11 credits.

PAC 295. YOGA II. (1 Credit)
Building off Yoga I, this is an intermediate level course meant to develop a deeper understanding of yoga practice.
Equivalent to: PAC 256
This course is repeatable for 11 credits.

PAC 296. VINYASA YOGA. (1 Credit)
Dynamic flow that connects movement and breath encouraging meditation in motion. May include sustained yoga postures.
This course is repeatable for 11 credits.

PAC 297. YOGATHON. (1 Credit)
Expands on knowledge and skills learned in Yoga I or Fitness Yoga through three to five class sessions, each 3-6 hours; longer sessions provide students with an intensive mental and physical experience centering on the concepts of yoga; includes introductory relaxation and meditation skills.
This course is repeatable for 11 credits.

PAC 298. RESTORATIVE YOGA. (1 Credit)
An emphasis on floor postures, supported postures, and longer holds that cultivate a relationship with ease. Techniques will be used to help students facilitate greater personal awareness. Students will use self-reflection practices for personal well-being.
This course is repeatable for 11 credits.

PAC 299. SPECIAL TOPICS. (1-3 Credits)
Advanced information, skills, practice, and application; experimental and new classes. May have additional fee.
This course is repeatable for 11 credits.

PAC 300. ALI: HIKING LOCAL TRAILS. (1 Credit)
 Covers the fundamentals of hiking as a recreational activity and an outdoor travel skill. Content will cover local trails, place history, hiking techniques, clothing and equipment selection, elemental first aid and safety concerns, leave-no-trace principles, and map basics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.
PAC 301. ALI: CHALLENGE COURSE EXPERIENCE. (1 Credit)
Emphasis on gaining practical experience and understanding of various components that occur in challenge course activities/programs; group dynamic mental and physical challenges; cooperative games and initiatives that promote communication, problem solving skills and leadership; Low and High challenge course activities that promote self-confidence and agility. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 302. ALI: CHALLENGE COURSE PRACTICES AND FACILITATION. (1 Credit)
Covers the set up and facilitation of various challenge course low and high course elements as they pertain to ALI's Challenge Course programming. Students will learn facilitation skills, risk management concepts, operational procedures, and technical rescue skills. A passing grade in this course will result in a certificate of completion from the OSU ALI Challenge Course. PAC courses may not be used to fulfill upper-division requirements.
Prerequisites: PAC 301 with C- or better
This course is repeatable for 11 credits.

PAC 303. ALI: CAMP CRAFT. (1 Credit)
Provides basic front-country camping skills such as packing, trip planning, how to dress for different climates/weather, storm-proofing, knife and axe techniques and safety, stove and kitchen operations, and fire building. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 304. ALI: BACKPACKING. (1 Credit)
Hiking and camping while carrying all gear; tent set-up, camp site selection, operation of single-burner stoves, loading a backpack; water infiltration, navigation, proper hiking technique, energy conservation; leave-no-trace principles in every aspect of the trip and class; includes classroom instruction and required overnight trip. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 307. ALI: RAFTING. (1 Credit)
An introduction to white water rafting. Students will learn the fundamentals of safe rafting, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 308. ALI: CANOEING. (1 Credit)
Designed as an introduction to canoeing. Students learn the fundamentals of safe canoeing, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 311. ALI: STAND UP PADDLEBOARD. (1 Credit)
Covers the curriculum for level 1 and 2 American Canoe Association standup paddle board course skills. Skills include equipment, environmental factors, techniques, preparation and planning, emergency management, and environmental ethics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 313. ALI: CANYONEERING. (1 Credit)
Students will learn the fundamentals of canyoneering, including efficient hiking techniques, safe anchoring, belaying and rappelling techniques, and environmental mitigation skills. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 314. ALI: BOULDERING. (1 Credit)
Introduction to the sport of bouldering, a subset of rock climbing using an indoor climbing facility; emphasis on safety, spotting, climbing movement, training techniques and improvement; provides activities that promote muscular strength and endurance, flexibility, and cardiovascular endurance. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 315. ALI: ROCK CLIMBING I. (1 Credit)
Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at an on-campus indoor climbing center. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 316. ALI: ROCK CLIMBING II. (1 Credit)
Focuses on developing technical climbing skills related to lead climbing and anchor construction. It will include a one day outdoor experience.
Prerequisites: PAC 315 with C- or better
This course is repeatable for 11 credits.

PAC 317. ALI: ROCK CLIMBING III. (1 Credit)
Focuses on developing technical climbing skills in an outdoor setting. The course will include a weekend long outdoor experience and cover skills ranging from building anchors using natural protection, to advanced outdoor movement skills.
Prerequisites: PAC 315 with C- or better and PAC 316 [C-]
This course is repeatable for 11 credits.

PAC 319. ALI: TECHNICAL RAPPELLING. (1 Credit)
Students will learn practice and hone their skills in the art of technical rappelling. Introduces many different styles, techniques and equipment used for rappelling in a variety of situations. Throughout the course, students will be provided with simple to advanced challenges to overcome. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 320. ALI: MOUNTAINEERING I. (1 Credit)
Snow climbing techniques, anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics; classroom instruction and required overnight alpine trip. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 321. ALI: MOUNTAINEERING II. (1 Credit)
Building on skills learned in Mountaineering I; rope team/glacier travel experience, fundamentals of crevasse rescue, advanced snow climbing techniques, safe anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements.
Prerequisites: PAC 320 with C- or better
This course is repeatable for 11 credits.
PAC 322. ALI: ICE CLIMBING. (1 Credit)
Students will learn the fundamentals of ice climbing, including efficient ice climbing techniques, safe anchoring, belaying and rappelling techniques and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 324. ALI: WHITE WATER RESCUE. (1 Credit)
Provides an introduction to white water rescue; students learn the fundamentals of white water rescue, scene management, and the necessary gear to perform rescues. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 325. ALI: WILDERNESS FIRST AID. (1 Credit)
Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements.
Equivalent to: PAC 325H
This course is repeatable for 11 credits.

PAC 325H. ALI: WILDERNESS FIRST AID. (1 Credit)
Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements.
Attributes: HNRS – Honors Course Designator
Equivalent to: PAC 325
This course is repeatable for 11 credits.

PAC 326. ALI: WILDERNESS LIVING TECHNIQUES. (1 Credit)
Basic wilderness living techniques, knowledge and skills needed for a student to be ethical and efficient, and have the ability to survive in the outdoors. Special emphasis is placed on building shelters, water purification, navigation, awareness, fire, self-sufficiency and caring for groups in the wilderness. PAC courses may not be used to fulfill upper-division requirements.
Prerequisites: PAC 303 with D- or better
This course is repeatable for 11 credits.

PAC 327. ALI: ROCK GUIDE SCHOOL. (1 Credit)
Serves as an opportunity to learn the skills for being a rock guide for the ALI. With five days of training and practice in the field at two climbing sites in Oregon, it serves to help students understand the unique challenges of instructing climbing in the outdoor environment. This course may end with Sport Climbing Instructor certification through the Professional Climbing Instructors of America. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 328. ALI: RAFT GUIDE SCHOOL. (1 Credit)
Provides students the skills and guided practice time needed to become competent paddle raft guides. It is a nine-day course that focuses on the development of water reading, raft maneuvering, risk management, and whitewater rescue skills needed by raft guides. Successful completion of the course will result in a certificate of completion from the American Canoe Association (ACA). PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 329. ALI: WILDERNESS FIRST RESPONDER. (2 Credits)
Fundamentals of emergency care in a non-urban environment, including physiology, injury assessment, short-term care, anatomy, and small-group rescues. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 330. ALI: SNOW TRAVEL AND CAMPING. (1 Credit)
An introduction to traveling in the backcountry in adverse weather conditions that often accompany winter. Topics covered include cross country touring, snow shoeing, winter camping techniques, and winter safety considerations including introducing avalanche safety. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 331. THE ART OF FLY FISHING. (1 Credit)
Students will be introduced to fly fishing skills such as casting, knot tying, safety considerations, fly selection, and ways to approach water. There will be a general overview of common places and species to fish in Oregon and other locations. This course combines approximately 30 hours of instruction, online activities, and assignments for 1 credit. PAC courses may not be used to fulfill upper-division requirements.
Corequisites: ENG 225, FW 112
This course is repeatable for 11 credits.

Athletic Training Graduate Major (MATRN)

The Athletic Training graduate major is a two-year program leading to the Master of Athletic Training degree, MATRN.

Upon graduation, students are eligible to sit for the Board of Certification examination. Successful completion of this examination is the prerequisite to obtaining registration as an Athletic Trainer in the state of Oregon.

The clinical education of students in the athletic training program primarily takes place during rotations with various OSU intercollegiate athletic teams, some of the most culturally diverse groups on the OSU campus. This experience helps students develop sensitivity to varying cultures, strategies for overcoming potential cultural barriers to communication, and interpersonal skills that serve them well outside the campus community.

Athletic Training Program Admission Criteria

- Baccalaureate degree program from an accredited university prior to beginning the program.
- Cumulative GPA of 3.0 from the undergraduate degree.
- Three letters of recommendation, with at least one from a certified athletic trainer (ATC).
- Personal statement.
- Meet program technical standards with or without accommodations as required by Commission on Accreditation of Athletic Training Education (CAATE) accreditation standards 64 and 65.
- Minimum of 50 hours of work, volunteering and/or observation under an ATC within two years prior to program application. Documentation of clinical hours must be verifiable on the official program application. **Note:** Hours obtained under the supervision of a physical therapist do not count unless the individual is dual credentialed as an ATC/PT.
Environmental and Occupational Health Minor

Provides undergraduate students with academic and professional experience that will enable them to understand the impact of environmental and occupational hazards on human health and society, as well as developing effective interventions that will control and prevent exposure to hazards. This knowledge will enable them to apply scientific principles and management strategies in the fields of environmental protection, occupational health and safety, and public health.

Ergonomics Graduate Minor

The Graduate Minor in Ergonomics is for masters and doctoral level students who seek additional formal training and mentoring in Ergonomic practice. Students pursuing a Minor in Ergonomics must include at least one Environmental and Occupational Health faculty member on their committee. This faculty member must be engaged in the development of the student's Program of Study and in the case of Doctoral students, their dissertation research; therefore, it is recommended that this faculty member be identified early in the doctoral program.

Kinesiology Graduate Major (MS, PhD, MAIS)

Graduate Areas of Concentration

Biophysical kinesiology, psychosocial kinesiology
The graduate program in kinesiology offers courses and learning experiences in the theoretical and practical study of physical activity (including exercise and sport) for the promotion of optimal health and disease prevention.

Graduate fields in kinesiology include biophysical kinesiology and psychosocial kinesiology.

The MS degree can be completed via a thesis or project. The PhD degree requires the completion of a dissertation. For further information about the graduate program in Kinesiology, visit the school’s website at http://health.oregonstate.edu/bphs.

Major Code: 7700

Adapted Physical Activity Option

This option is offered within the following major(s):

- Kinesiology - College of Public Health and Human Sciences (p. 945)

This graduate option is focused on the development of leadership personnel in the area of disability and will build competencies to serve individuals with disabilities as effective teachers, scholars, and advocates.

The major faculty advisor(s) and a faculty member from the Adapted Physical Activity program must approve the option in Adapted Physical Activity.

Option Code: 7720

Kinesiology Graduate Minor

For more information, see the school advisor.

Minor Code: 7710

Kinesiology Undergraduate Major (BS, HBS)

Available on Corvallis and OSU-Cascades campuses.

The Kinesiology major prepares students for careers in physical activity and fitness/wellness such as organizing, directing or managing physical fitness programs; personal trainer; fitness instructor; exercise physiologist; strength and fitness coach; and fitness entrepreneur. The degree can also serve as preparation for applications to a master’s level physical education teacher education program, medical school, a professional program in the allied health professions (e.g., physical or occupational therapy, nursing, physician assistant) or other graduate education. Students interested in entry into professional schools of physical or occupational therapy, nursing, medical school, or physicians assistant should take the Pre-Therapy and Allied Health option of the Kinesiology major, which has entry standards that must be met after completion of 90 credits.

Pre-Therapy and Allied Health Option

This option is offered within the following major(s):

- Kinesiology - College of Public Health and Human Sciences (p. 946)

This program is designed for students interested in pursuing admission to medical school or a professional program in the allied health professions, such as athletic training, nursing, occupational therapy, physical therapy, or physician assistant.

The Pre-Therapy and Allied Health option requires the completion of one of six professional tracks:

1. Pre-Athletic Training
2. Pre-Medicine
3. Pre-Nursing
4. Pre-Occupational Therapy
5. Pre-Physical Therapy
6. Pre-Physician Assistant

Pre-Therapy and Allied Health is an undergraduate option that may be added to the Kinesiology major once the following admission standards have been met. Students may apply for admission to the PTAH option after completion of 90 credits. Requirements for admission include:

1. Cumulative GPA of 3.0 and,
2. A grade of "C" or better and average GPA of 2.7 or higher in the anatomy and physiology series (BI 231 INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY—BI 233 INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY and BI 241 INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY—BI 243 INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY; or BI 331 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY—BI 333 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY and BI 341 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY—BI 343 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY).

Minimum Grade Policy

A grade of C– or better is required in all courses fulfilling Kinesiology major requirements (Kinesiology Core, Required Supporting Courses, and KIN Courses Beyond the Core).

Repeated Courses Policy

The university’s repeated courses policy will be followed (AR 20). Kinesiology students are allowed at most two attempts to meet individual course degree requirements. Students who do not receive the minimum grade required for a course after two attempts (including courses transferred from other institutions) will not be allowed to have grades earned in subsequent attempts count toward meeting Kinesiology degree requirements. As a result, such students may not be able to complete a degree and/or an option in Kinesiology.

Pre-Therapy and Allied Health is an option with admission standards that may be added to the major:

Students may apply for admission to the PTAH option after completion of 90 credits. Requirements for admission can be found under the catalog listing for the PTAH option.
KIN 423  QUALITATIVE MOVEMENT ANALYSIS
KIN 425  ANATOMICAL KINESIOLOGY (Required for Pre-Athletic Training)
KIN 434  APPLIED MUSCLE PHYSIOLOGY
KIN 437  PHYSICAL ACTIVITY, AGING, AND CHRONIC DISEASE
KIN 444  ADVANCED ADAPTED PHYSICAL Activity
KIN 483  TISSUE INJURY AND REPAIR (Required for Pre-Athletic Training)

Tracks
Select one of the following tracks: 26-55
1. Pre-Athletic Training Track Courses
2. Pre-Medicine Track Courses
3. Pre-Nursing Track Courses
4. Pre-Occupational Therapy Track Courses
5. Pre-Physical Therapy Track Courses
6. Pre-Physician Assistant Science Track Courses

* Baccalaureate Core Course (BCC)

Note: 300- and 400-level KIN courses can count toward fulfilling the KIN Courses Beyond the Core requirements in the Kinesiology major.

All required courses in the Pre-Therapy and Allied Health option must be taken in the normal grading basis, A–F.

Minimum Grade Policy: A grade of C– or better is required in all courses fulfilling the Kinesiology major and PTAH option requirements.

* Baccalaureate Core Course (BCC)

- Students must complete a total of 180 credits required for a degree.
- It is strongly suggested that students examine prerequisite requirements for professional schools and utilize elective credits to meet additional requirements.
- Students may complete foreign language credits as elective credits.

**Option Code: 732**

### Master of Adapted Physical Education (MAPE) Graduate Major

The Master of Adapted Physical Education is a professional preparation program grounded in applied experiences and proficiency. Oregon State University provides a unique approach to training physical educators/
adapted physical educators with a specific emphasis on the health and wellbeing of all students through the promotion of physical activity.

**Non-Thesis (Professional)**

---

**Nutrition Graduate Major (MS, PhD, MAIS)**

**Graduate Areas of Concentration**

**Nutrition**

The School of Biological and Population Health Sciences offers graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees in nutrition. The program of study integrates
multiple disciplines relevant to nutrition, including molecular, biochemical, physiological and clinical nutrition. The overall goal of the program is for the student to gain a "cutting-edge" understanding of contemporary issues in nutrition and apply these concepts to human health.

Research in nutrition is focused on human nutrition and nutrient effects on physiological systems impacting human health. Our research programs seek the discovery of new knowledge, information, techniques and/or interventions that can promote the optimal health of individuals and families in Oregon, nationally, and worldwide. A thesis based on original research is required for the MS and PhD degree programs.

Since nutrition builds upon the natural sciences, entering graduate students should have a strong background in chemistry, physiology, nutrition, statistics, and biochemistry.

Depending upon their concentration, graduates are prepared for positions in academic research and teaching or research and development in industry or government.

Information on the nutrition graduate program graduate fellowships and assistantships is available at the website: http://health.oregonstate.edu/degrees/graduate/nutrition, click on the "Application and Admission Requirements" link.

For additional information about the college and school, visit the website at http://health.oregonstate.edu/.

**Major Code: 466**

**Dietetics Option**

This option is offered within the following major(s):

- Nutrition - College of Public Health and Human Sciences (p. 951)

Meets the Academy of Nutrition and Dietetics’ academic and accreditation requirements.

Before taking the Dietetics option, students must first complete the Pre-Dietetics option.

Students must apply to and be accepted into the Dietetics option in Nutrition. See Pre-Dietetics courses and Dietetics Admission Requirements.
Nutrition and Foodservice Systems Option

This option is offered within the following major(s):

- Nutrition - College of Public Health and Human Sciences (p. 951)

The Nutrition and Foodservice Systems option prepares graduates for professional careers directing foodservice operations that focus on serving healthy menu options and using local ingredients. Foodservice opportunities exist in both non-commercial operations including schools, universities, and healthcare as well as others in the retail environment; all are striving to meet the consumer demand for healthier food options. This program integrates course work taken at OSU and the Culinary Arts program at Linn-Benton Community College.

Please contact Dr. Mary M. Cluskey, 541-737-0960, cluskeym@oregonstate.edu for more information about the Nutrition and Foodservice Systems option.

Credits needed to graduate=180
Upper-division credits needed=60
Maximum S/U credits=36

Note: Departmental courses within major may not be taken S/U.

**Nutrition and Health Sciences Option**

This option is offered within the following major(s):

- Nutrition - College of Public Health and Human Sciences (p. 951)

The Nutrition and Health Sciences option is designed for students who want to focus on the scientific basis of nutrition for careers in medicine and the health sciences or in nutrition science research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/or health-related research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

Pre-Dietetics Option

Terminology of the Health Sciences

This option is offered within the following major(s):

• Nutrition - College of Public Health and Human Sciences (p. 951)

Dietetics Admission Requirements

To be considered for admission to the Dietetics option within the Nutrition major, students must complete the Pre-Dietetics courses listed below with a grade of B– or higher in each of the NUTR courses listed, a grade of C– or higher in each of the other courses listed, and a grade-point average of 3.0 or higher for the listed courses as a whole. Applicants to the Dietetics option must achieve an overall GPA of 3.0 or higher based on completing at least 60 quarter credits [OSU (institutional) and transfer], including the prerequisite courses listed below. At least 12 credits must be taken at OSU.

Information on how to apply for admission to the Dietetics option can be found at the PHHS Advising Office and on the BPHS Nutrition Dietetics Web page at http://health.oregonstate.edu/bphs/dietetics.

Pre-Nutrition

School of Social and Behavioral Health Sciences

The School of Social and Behavioral Health Sciences comprises the fields of health management and policy, health promotion and health behavior, and human development and family sciences. These disciplinary approaches use social and behavioral sciences to improve understanding of the factors that influence the health and well-being of individuals, families, and communities. In addition, these fields develop sound policy, programs, and interventions to improve health and well-being at multiple levels. Finally, through our curricula, we develop the next generation of globally minded public health and human sciences professionals.

The School of Social and Behavioral Health Sciences houses the undergraduate degrees of Human Development and Family Sciences and Public Health. The majors and their options are described below.

The school also houses the MS and PhD in Human Development and Family Studies (see http://health.oregonstate.edu/degrees/graduate/hdfs.)

The school also houses the following concentrations of the Public Health doctoral program: health policy, and health promotion and health behavior, see http://health.oregonstate.edu/degrees/graduate/public-health/phd-program.

Undergraduate Programs

Human Development and Family Sciences Major

The field of human development and family sciences (HDFS) applies an interdisciplinary perspective to understand the development of individuals across the life course and their diverse family, school, and community environments. Students who major in HDFS have diverse and exciting career options in schools and in the helping professions or can pursue advanced academic study in HDFS or related areas.

The School of Social and Behavioral Health Sciences offers a BS in Human Development and Family Sciences with four options:

• Child Development
• Early Childhood (Cascades campus only)
• Human Development and Family Sciences, General
• Human Services

All three options provide students with the prerequisites for graduate programs in human development and family sciences.
Family and Consumer Sciences Teacher Training
Students desiring a license to teach family and consumer sciences (grades 5 through 12) should contact the college’s Office of Student Success in the Women’s Building 105, http://health.oregonstate.edu/success.

Public Health Major
Public health is an exciting and diverse field for those interested in the health and well-being of populations and their environments. Careers in the public and private sectors offer opportunities to work locally, regionally, nationally, and internationally to promote health and prevent disease. Recognizing that multiple and complex factors affect the public’s health, our faculty and students examine environmental issues, access to health care services, health policies, and social and contextual factors as determinants of health.

Students in this major will choose one of the following major options:
- Health Management and Policy
- Health Promotion and Health Behavior

Both options provide students with the prerequisites for graduate programs in public health.

Health Management and Policy Option
This option provides training and skills in the management of public health, health care programs and agencies, and in the analysis of public health policies. The program is appropriate for those who want to manage health programs in a wide range of institutions, both public and private, and is particularly well-suited for students interested in the business aspects associated with the delivery and financing of health services. Students can also receive a certificate of Gerontology.

Health Promotion and Health Behavior Option
This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

Undergraduate Programs
Majors
- Human Development and Family Sciences (p. 972)
  Options
  - Child Development
  - Early Childhood
  - Human Development and Family Sciences, General
  - Human Services
- Public Health (p. 976)
Pre-Public Health (p. 975)
Options
- Health Management and Policy
- Health Promotion and Health Behavior

Minors
- Early Childhood Development and Education (p. 968)
- Health Management and Policy (p. 971)
- Human Development and Family Sciences (p. 975)
- Public Health (p. 975)

Certificate Program
- Gerontology Certificate (p. 969)

Graduate Programs
Majors
- Human Development and Family Studies (p. 974)

Minors
- Aging Sciences (p. 967)
- Community Health (p. 968)
- Gerontology (p. 970)
- Human Development and Family Studies (p. 975)

Certificate
- Health Management and Policy (p. 971)

Faculty
Professors
Aldwin, Arnold, Bourdeau, Bowman, Braverman, Catania, Dawson, Dolcini, Flay, Galloway, Harvey, Hooker, Hosty, Kershaw, Krahn, McClelland, Riportella, Settersten, Thorburn
Associate Professors
Ashton, Bernell, Black, Busler, Cowan, Hart, Jones, Knutz, Lesmeister, Lipscomb (Cascades Campus), Luck, MacTavish, Magaña, Nagele, Rose, Schreiber, Smith, Stawski, Wells, White, Willis, Withee
Assistant Professors
Baggott, K. Davis, W. Davis, Geldhof, Gorman, Hatfield, Irvin, Kothari (Cascades Campus), Li, Mendez-Luck, Mojica, Richards, Rothwell, Sakuma, Yoon
Assistant Professors of Practice
Brody, J. Davis, Etuk, Fonseca, Kraemer, Larson, Walker
Associate Professor of Practice
Hein
Clinical Associate Professor
Volmar
Postdoctoral Scholars and Fellows
Choun, Phipps, Small
Senior Instructors
Brey (Cascades Campus), Elliott, Greaves, Livesay, Mannering, McGraw, Osterland, Roll
Instructors
Chuinard, Crawford, Gilley, Graves, Hedcoth, Johnson, Keller, Lynn (Cascades Campus), Martinez-Alvarez, McDonnell, McKenna, Olvera, O’Rourke, Peters, Snyder, Welinger, Williams
Research Associates
Grobe, Weber
Research Assistants
Karing, Lewis, Tracy

Adjunct Faculty
Edwards, Gallagher, Gunter, Lee, Rodrigues, Sherman, Warner
Public Health

**H 100. INTRODUCTION TO PUBLIC HEALTH. (4 Credits)**
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.

Equivalent to: H 100H

**H 100H. INTRODUCTION TO PUBLIC HEALTH. (4 Credits)**
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.

Attributes: HNRS – Honors Course Designator

Equivalent to: H 100

**H 199. SPECIAL STUDIES. (1-16 Credits)**
PREREQ: Departmental approval required.

This course is repeatable for 16 credits.

**H 206. PROJECTS. (1-16 Credits)**

This course is repeatable for 16 credits.

**H 210. *INTRODUCTION TO THE HEALTH CARE SYSTEM. (3 Credits)**
Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)

Attributes: CPSI – Core, Pers, Soc Proc & Inst

**H 220. INTRODUCTION TO HEALTH DATA ANALYSIS. (3 Credits)**
Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems.

**H 225. *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS. (4 Credits)**
Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)

Attributes: CPSI – Core, Pers, Soc Proc & Inst

**H 250. INTRODUCTION TO HEALTH CARE MANAGEMENT. (3 Credits)**
Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc.

Prerequisites: H 210 (may be taken concurrently) with C- or better

**H 309. PRACTICUM IN HEALTH CARE SERVICES. (3-6 Credits)**
Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N.

This course is repeatable for 12 credits.

**H 310. HEALTH FIELD EXPERIENCES. (3-6 Credits)**
Introductory field experience in a health or health-related worksite. Graded P/N.

Prerequisites: H 210 with C- or better

*This course is repeatable for 12 credits.*
H 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: H 399
This course is repeatable for 16 credits.

H 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

H 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

H 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

H 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

H 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

H 407. SEMINAR. (2 Credits)
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Equivalent to: H 407H

H 407H. SEMINAR. (2 Credits)
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 407

H 408. WORKSHOP. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

H 409. PRACTICUM. (1-6 Credits)
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N.
This course is repeatable for 16 credits.

H 410. INTERNSHIP. (1-12 Credits)
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N.
Prerequisites: H 407 with C- or better
This course is repeatable for 24 credits.

H 418. PUBLIC HEALTH ETHICS AND ISSUES. (3 Credits)
Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology.

H 421. MENTAL HEALTH. (3 Credits)
Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders.
Prerequisites: H 225 with C- or better and H 320 [C]

H 422. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES. (4 Credits)
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.

H 425. FOUNDATIONS OF EPIDEMIOLOGY. (3 Credits)
Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec.
Prerequisites: H 220 with C- or better or ST 201 with C- or better or ST 314 with C- or better or ST 351 with C- or better

H 431. HEALTH CARE MARKETING. (3 Credits)
Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

H 432. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE. (3 Credits)
Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Prerequisites: (ECON 201 with C- or better or ECON 201H with C- or better) and H 210 [C-]

H 434. *HEALTH CARE LAW AND REGULATION. (3 Credits)
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: H 210 with C or better and H 250 [C-] and WR 222 [C-]

H 436. ADVANCED TOPICS IN HEALTH CARE MANAGEMENT. (3 Credits)
Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care.
Prerequisites: H 210 with C- or better and H 250 [C-]

H 445. *OCCUPATIONAL HEALTH. (3 Credits)
Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

H 448. PUBLIC HEALTH TOXICOLOGY. (3 Credits)
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.
Prerequisites: H 344 with C- or better

H 449. MASS MEDIA AND HEALTH. (3 Credits)
Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns.
Prerequisites: H 225 with C- or better and H 320 [C]

H 457. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS. (3 Credits)
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Prerequisites: BA 215 with C- or better and H 210 [C-] and H 250 [C-]

H 458. REIMBURSEMENT MECHANISMS. (3 Credits)
Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system.
Prerequisites: H 210 with C- or better
H 461. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE. (3 Credits)
Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined.

H 465. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES. (3 Credits)
Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

H 467. LONG-TERM CARE ALTERNATIVES. (3 Credits)
Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 468. FINANCING AND ADMINISTRATION OF LONG-TERM CARE. (3 Credits)
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 474. PUBLIC HEALTH AND VIOLENCE IN SOCIETY. (3 Credits)
Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476. PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS. (4 Credits)
A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: H 225 with C- or better and H 320 [C-]

H 477. DIETARY INTERVENTIONS FOR PUBLIC HEALTH. (3 Credits)
A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators.
Prerequisites: NUTR 225 with C- or better

H 480. UNDERGRADUATE EOH SEMINAR. (1 Credit)
Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion. Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N. This course is repeatable for 2 credits.

H 489. EMERGENCY AND DISASTER MANAGEMENT. (3 Credits)
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491. SELECTED TOPICS. (1-3 Credits)
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Equivalent to: H 491H
This course is repeatable for 6 credits.

H 491H. SPECIAL TOPICS. (1-3 Credits)
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 491
This course is repeatable for 6 credits.

H 494. APPLIED ERGONOMICS. (3 Credits)
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 495. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH. (3 Credits)
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

H 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

H 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

H 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

H 507. SEMINAR. (1-16 Credits)
Section 1. Internship (1). Graded P/N. This course is repeatable for 16 credits.

H 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

H 509. PRACTICUM. (1-16 Credits)
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for 16 credits.

H 510. INTERNSHIP. (1-16 Credits)
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for 16 credits.

H 511. COMMUNITY, CULTURE, AND GLOBAL HEALTH. (3 Credits)
Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.

H 512. INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES. (3 Credits)
Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.
H 513. INTEGRATED APPROACH TO PUBLIC HEALTH. (12 Credits)
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.

H 514. ENVIRONMENT, SAFETY AND HEALTH SEMINAR. (1 Credit)
One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for 3 credits.

H 515. RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES. (3 Credits)
Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.

H 516. RESEARCH METHODS IN GLOBAL HEALTH. (3 Credits)
Overview of research methods used to understand health, illness, health care, and health-seeking behavior in international settings. Special emphasis on the use of qualitative and mixed methods in international health research.

H 518. PUBLIC HEALTH ETHICS AND ISSUES. (3 Credits)
Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology.

H 519. DISPLACEMENT, MIGRATION, AND GLOBAL HEALTH. (3 Credits)
Critical examination of health of displaced/migrant populations with an emphasis on health disparities and social determinants. Understanding intersections of humanitarianism, migration, vulnerability, and displacement from a global health perspective.

H 520. HEALTH DISPARITIES. (3 Credits)
Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.

H 521. MENTAL HEALTH. (3 Credits)
Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.

H 522. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES. (4 Credits)
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.

H 523. FOUNDATIONS OF PUBLIC HEALTH. (4 Credits)
Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health.

H 524. INTRODUCTION TO BIOSTATISTICS. (4 Credits)
Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.

H 525. EPIDEMIOLOGICAL METHODS I. (3 Credits)
Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.

Prerequisites: H 513 with B- or better or H 535 with B- or better

H 526. EPIDEMIOLOGIC METHODS II. (3 Credits)
Concepts and methods of epidemiological analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research.

Prerequisites: H 524 with B- or better and H 525 [B-]

H 527. CRITICAL ASSESSMENT OF INTERNATIONAL HEALTH PROGRAMS. (3 Credits)
Introduces the critical evaluation framework of assessing international health development programs, based on self-determination and community ownership principles. The framework of assessment method includes three levels: upstream evaluation, midstream evaluation, and downstream evaluation.

H 528. GLOBAL HEALTH ISSUES. (3 Credits)
Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.

H 529. INTERNATIONAL HEALTH. (3 Credits)
Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.

H 530. HEALTH POLICY ANALYSIS AND POLITICS. (3 Credits)
Examination of current health policy issues affecting health care programs, services, and organization as well as the role of politics in public health and health policy. Exploration of processes by which health policy proposals are generated, promoted, defeated, modified and implemented.

Prerequisites: H 533 with B- or better or HHS 514 with B- or better

H 532. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE. (3 Credits)
Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.

H 533. HEALTH SYSTEMS ORGANIZATION. (3 Credits)
Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.

H 534. HEALTH CARE LAW AND REGULATION. (3 Credits)
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

H 535. INTERPRETING EPIDEMIOLOGIC EVIDENCE. (3 Credits)
Intended for students in the human sciences and allied health fields. Introduces basic epidemiology concepts. Topics will include measures of disease frequency, assessing population health, causal logic, quantifying associations between exposures and health outcomes, epidemiologic study design, and threats to study validity (random error, bias, confounding). Examples focus on application of epidemiological methods to a variety of health-related fields.
H 536. HEALTHCARE ORGANIZATION LEADERSHIP THEORY AND BEHAVIOR. (3 Credits)
Overview of organization theory and behavior in health care organizations. Emphasis is on developing an understanding of the factors and forces that influence the structures, behaviors, and operations of health care delivery organizations. This understanding will be developed through consideration of organizations, their environments, and the roles of individuals working in management.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better

H 537. INJURY EPIDEMIOLOGY. (3 Credits)
An overview of the distribution and determinants of injuries, methodological issues specific to injury epidemiology, and approaches to injury control.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 513 with B- or better

H 538. PUBLIC AND PRIVATE HEALTH INSURANCE. (3 Credits)
Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 540. WATER AND HUMAN HEALTH. (3 Credits)
Critically examine the complex relationship between water quality, human activities, and population health.

H 541. AIR QUALITY AND HUMAN HEALTH. (3 Credits)
Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 542. ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT. (3 Credits)
Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.

H 543. EXPOSURE SCIENCE I. (4 Credits)
Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.

H 544. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY. (3 Credits)
Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health.
Prerequisites: H 525 with C or better

H 545. OCCUPATIONAL HEALTH. (3 Credits)
A broad overview of occupational health including recognizing and preventing risks from toxic chemical, radiation and physical hazards in the workplace.

H 546. PHYSICAL AGENTS AND HUMAN HEALTH. (3 Credits)
Focus on physical agents (heat, noise, vibration, radiation) and health risks associated with these agents. It covers the range and sources of exposure to physical agents, methods of characterizing these exposures, effects on human health, and the regulations/standards that set limits for physical agents. Lec/lab.

H 547. GIS AND PUBLIC HEALTH. (4 Credits)
Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health who have no (or introductory level) knowledge of GIS. Lec/lab.

H 548. PUBLIC HEALTH TOXICOLOGY. (3 Credits)
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.

H 549. MASS MEDIA AND HEALTH. (3 Credits)
Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
Prerequisites: H 571 with C or better

H 550. SOCIAL EPIDEMIOLOGY. (3 Credits)
Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health.
Prerequisites: H 525 with B or better

H 551. APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA. (3 Credits)
Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results.
Prerequisites: H 526 with B- or better and H 560 [B+] and H 580 [B-]

H 552. DISASTER EPIDEMIOLOGY. (3 Credits)
Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 554. EPIDEMIOLOGY OF AGING. (3 Credits)
An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 555. CANCER EPIDEMIOLOGY. (3 Credits)
Introduction to basic concepts and methodology in cancer epidemiology.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 556. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS. (3 Credits)
Theories and methodologies of long-range planning and strategic management in health care organizations.

H 557. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS. (3 Credits)
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
H 558. REIMBURSEMENT MECHANISMS. (3 Credits)
Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature.

H 560. PUBLIC HEALTH SURVEILLANCE. (3 Credits)
An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis.
Prerequisites: H 524 with B- or better and H 525 [B-]

H 562. INFECTIOUS DISEASE EPIDEMIOLOGY. (3 Credits)
Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or H 514 with B- or better

H 563. PHYSICAL ACTIVITY EPIDEMIOLOGY. (3 Credits)
Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 564. COMPUTING TOOLS AND HEALTH DATA ANALYSIS. (3 Credits)
Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed.
Prerequisites: (H 524 with C or better or HDFS 530 with C or better)

H 565. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES. (3 Credits)
Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.

H 566. DATA MINING IN PUBLIC HEALTH. (3 Credits)
An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health.

H 567. LONG-TERM CARE ALTERNATIVES. (3 Credits)
Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 568. FINANCING AND ADMINISTRATION OF LONG-TERM CARE. (3 Credits)
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 569. MATERNAL AND CHILD HEALTH. (3 Credits)
Women's reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 571. PRINCIPLES OF HEALTH BEHAVIOR. (3 Credits)
Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

H 572. COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION. (3 Credits)
History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.

H 573. INTRODUCTION TO MULTILEVEL/HIERARCHICAL MODELS. (3 Credits)
Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks.

H 575. EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS. (3 Credits)
Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program.
Prerequisites: H 513 with B- or better or H 515 with B- or better or HHS 514 with B- or better

H 576. PROGRAM PLANNING/PROPOSAL WRITING IN HEALTH/HUMAN SERVICES. (4 Credits)
Planning and preparing of proposals for program initiation, financing, delivery and evaluation in health-related settings; emphasis on funding sources, community, individual, and organizational support.

H 578. INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I. (3 Credits)
A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis.
Prerequisites: (H 524 with C or better and H 526 [C])

H 580. LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA. (4 Credits)
Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/lab.
Prerequisites: (H 524 with C or better or HDFS 530 with C or better)

H 581. GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS. (4 Credits)
Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab.

H 582. ANALYSIS OF CORRELATED HEALTH DATA. (3 Credits)
Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations.
Prerequisites: H 581 with C or better
H 583. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT. (4 Credits)
Studies the design and management principles and practices in the environment, safety and health field.

H 584. ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS. (3 Credits)
Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability.
Prerequisites: (H 524 with C or better or HDFS 530 with C or better)

H 585. ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW. (3 Credits)
Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals.

H 586. BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH. (3 Credits)
An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health.
Prerequisites: H 581 with C or better

H 587. TIME TO EVENT ANALYSIS OF HEALTH DATA. (3 Credits)
Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research.
Prerequisites: (H 524 with C or better or HDFS 530 with C or better)

H 588. APPLIED OCCUPATIONAL SAFETY AND HEALTH. (3 Credits)
The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.

H 589. EMERGENCY AND DISASTER MANAGEMENT. (3 Credits)
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 590. OCCUPATIONAL ERGONOMICS AND BIOMECHANICS. (3 Credits)
Examines the advanced theories, applications, and contemporary topics of occupational ergonomics and biomechanics. Topics include muscle physiology, work-related musculoskeletal disorders, assessing biomechanical exposure in the workplace, various material handling assessment tools, 3-Dimensional Static Strength Prediction Program, human vibrations, and implementing ergonomic interventions.

H 591. SELECTED TOPICS. (1-3 Credits)
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
This course is repeatable for 9 credits.

H 592. SPATIAL EPIDEMIOLOGY. (3 Credits)
An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining patterns and associations.
Prerequisites: H 547 with C or better and H 581 [C]

H 593. REPRODUCTIVE EPIDEMIOLOGY. (3 Credits)
Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health.
Prerequisites: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 594. APPLIED ERGONOMICS. (3 Credits)
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH. (3 Credits)
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 596. HEALTHCARE EPIDEMIOLOGY. (3 Credits)
Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic testing, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 597. METHODS IN FOODBORNE DISEASE OUTBREAK INVESTIGATION. (3 Credits)
Focuses on the practical basis for developing and implementing methods for foodborne disease outbreak detection, investigation and control, using recent outbreaks to highlight underlying principles. Biological characteristics of major foodborne disease pathogens, clinical features of the illnesses its causes and epidemiologic presentations of foodborne outbreaks will be reviewed. The implications of these characteristics will be discussed in a problem solving, interactive format that examines theory and practice in the context of recent outbreaks. Strategies to promote timely decision-making will be emphasized.
Prerequisites: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 598. HEALTH POLICY ANALYSIS METHODS. (3 Credits)
Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens. Health services research methods, including data sources for health policy research and health policy literature.
Prerequisites: H 513 with B- or better and H 533 [B-]

H 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 24 credits.

H 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

H 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

H 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

H 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

H 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

H 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

H 610. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
H 612. DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE. (1 Credit)
Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health.
This course is repeatable for 9 credits.

H 613. INDEPENDENT RESEARCH PROJECT. (1-9 Credits)
Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N.
This course is repeatable for 9 credits.

H 614. RESEARCH MANUSCRIPT. (4 Credits)
PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

H 615. ADVANCED EVALUATION AND RESEARCH DESIGN. (3 Credits)
Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors.

H 620. ADVANCED TOPICS IN GLOBAL HEALTH INTERVENTION AND PRACTICE. (3 Credits)
Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decision-making in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored. Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.

H 622. GLOBAL HEALTH SYSTEMS, POLICY AND POLITICS. (3 Credits)
Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.

H 626. GLOBAL HEALTH SYSTEM FINANCE AND STRENGTHENING. (3 Credits)
Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.

H 630. QUANTITATIVE HEALTH POLICY RESEARCH METHODS I. (4 Credits)
Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature.
Prerequisites: H 524 with B- or better

H 632. APPLIED HEALTH ECONOMICS. (4 Credits)
Advanced doctoral-level quantitative health policy/services research methods emphasizing causal inference when potential endogeneity is present.
Prerequisites: H 630 with B- or better

H 635. COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE. (3 Credits)
The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

H 638. PUBLIC AND PRIVATE HEALTH INSURANCE. (3 Credits)
Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method.
Prerequisites: H 533 with C or better

H 639. COMMUNITY-BASED PARTICIPATORY RESEARCH. (4 Credits)
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion.

H 642. ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT. (3 Credits)
Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.

H 650. REPORTING RESULTS: WRITING FOR EPIDEMIOLOGY. (3 Credits)
Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer.
Prerequisites: H 526 with B- or better and H 551 [B+] and H 580 [B-]

H 651. ADVANCED EPIDEMIOLOGICAL METHODS. (4 Credits)
Covers advanced topics in epidemiology. Course expands on many of the same topics as H 526, and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models, directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics.
Prerequisites: H 526 with B- or better and H 581 [B-]

H 652. CAUSAL INFERENCE IN EPIDEMIOLOGY. (3 Credits)
Discussion of the theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics. Applied examples will be used for illustration.
Prerequisites: H 651 with B- or better

H 659. QUANTITATIVE HEALTH POLICY RESEARCH METHODS II. (4 Credits)
Advanced doctoral-level quantitative health policy/services research methods emphasizing health care utilization, expenditures, and outcomes data.
Prerequisites: H 630 with B- or better
H 662. ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY. (3 Credits)
Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods.
Prerequisites: H 526 with B- or better and H 562 [B-]

H 671. ADVANCED THEORIES OF HEALTH BEHAVIOR. (3 Credits)
Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing).

H 672. ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR. (3 Credits)
Provides an in-depth examination of the use of qualitative methods in health behavior research and practice.

H 673. MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS. (4 Credits)
Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts.

H 675. DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS. (3 Credits)
Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice.

H 676. ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR. (3 Credits)
Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior. 
This course is repeatable for 6 credits.

H 681. ADVANCED TOPICS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY. (3 Credits)
Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY: MOVING FROM RESEARCH TO PRACTICE. (3 Credits)
An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering.

H 683. ADVANCED RESEARCH METHODS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH. (3 Credits)
Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.

H 685. RACE, CLASS, CULTURE AND AGING. (4 Credits)
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as HDFS 685.
Equivalent to: HDFS 685

H 699. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

Human Development and Family Sciences

HDFS 107. INTRODUCTION TO HUMAN SERVICES. (3 Credits)
An exploration of the human services profession. Emphasis on prevention and early intervention concepts and programs. Development of internship search skills, including an introduction to a wide range of human services organizations.

HDFS 199. SPECIAL PROJECTS. (1-16 Credits)
Special projects designed with instructor Graded P/N. This course is repeatable for 16 credits.

HDFS 209. HUMAN SERVICES PRACTICUM. (4 Credits)
Field experience to learn, primarily through observation, how to apply human service strategies and skills to helping individuals and families served by professional agencies. Supervision by agency and instructor. Requires 90 hours of work on-site. Seminar introduces basic theories and skills through readings, discussion and reflective exercises.
Prerequisites: HDFS 107 with C- or better This course is repeatable for 8 credits.

HDFS 240. *HUMAN SEXUALITY. (3 Credits)
Physiological, psychological, social, and historical influences on sexuality; emphasis on developmental and relationship aspects. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

HDFS 262. INTRODUCTION TO HUMAN SERVICES. (3 Credits)
An exploration of the human services profession. Emphasis on prevention and early intervention concepts and programs. Development of internship search skills, including an introduction to a wide range of human services organizations.

HDFS 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 301. HUMAN SERVICES PRACTICUM. (4-8 Credits)
Field experience to learn, primarily through observation, how to apply human service intervention strategies and skills to helping individuals and families served by professional agencies and organizations. Supervision by agency and instructor. Requires 90 hours of work on-site. Supplementary bi-weekly seminar, readings, and reports. Graded P/N.
Prerequisites: HDFS 262 with C- or better Equivalent to: HDFS 209

HDFS 311. INFANT AND CHILD DEVELOPMENT. (4 Credits)
Research and theory on development from infancy through middle childhood. Discussion of biological, familial, and sociocultural influences. Development of skills in observing children’s behavior.

HDFS 312. PARENTING RESEARCH AND APPLICATION. (4 Credits)
Research and theory regarding parenting and parent education, including parenting styles and practices, discipline, parent-child interactions, attachment, and the family context with an emphasis on professional implications for promoting child health and well-being.
HDFS 313. ADOLESCENT DEVELOPMENT. (4 Credits)
Advanced theories and research on physical, social and psychological
development during adolescence; emphasizes influences of family, peers,
and community.

HDFS 314. ADULT DEVELOPMENT AND AGING. (4 Credits)
Advanced theories and research related to developmental changes and
stability in early, middle, and late adulthood. Gender issues, personality,
cognition, and adaptation.

HDFS 330. FOSTERING LEARNING IN EARLY CHILDHOOD
DEVELOPMENT. (4 Credits)
Development of skills in applying theoretical approaches to observing,
recording, and interpreting the behavior of young children in order to
design interactions that support learning in group settings.
Prerequisites: HDFS 311 with C- or better

HDFS 331. DIRECTED EXPERIENCE IN EARLY CHILDHOOD. (3 Credits)
Placement in early childhood program to focus on guidance techniques,
classroom management, and implementation of curricula, based on
developmental observation, research, and theory. Supplementary weekly
seminar, readings, and reports. Lab/rec. Taught on the OSU-Cascades
campus only.
Prerequisites: (HDFS 311 with C- or better or HDFS 211 with C- or better)
and HDFS 330 [C-]

HDFS 341. FAMILY STUDIES. (4 Credits)
Study of family forms, family formation, and family change over the
human life course is sociohistorical, economic, political, and cultural
context.

HDFS 360. CRITICAL THINKING IN HUMAN DEVELOPMENT AND FAMILY
SCIENCES. (4 Credits)
Explores foundations of critical thinking, especially methods for
sustaining open-minded inquiry and evaluating evidence and arguments.
Current controversies in human development and family policy are
targets of debate.

HDFS 361. APPLIED RESEARCH METHODS. (4 Credits)
Basic research methods as they are applied in human development and
family studies.

HDFS 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 401. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 405. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 406. PROJECTS. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 410. HUMAN SERVICES INTERNSHIP. (6-12 Credits)
Field experience to apply theory and evidence-based practices to
individual, family, and community problems in professional settings.
Supervision by agency and instructor. Requires 300 hours of work on-site.
Seminar includes reflection and constructive criticism processes. Can
be taken across 2 consecutive terms (150 hours each) within the same
agency. Graded P/N.
Prerequisites: HDFS 107 with C- or better and HDFS 209 [P] and
HDFS 462 [C-]
This course is repeatable for 12 credits.

HDFS 430. *STUDENT TEACHING IN EARLY CHILDHOOD DEVELOPMENT
AND EDUCATION. (12 Credits)
Participation in a research-based model early childhood program focused
on student teaching, program development and evaluation; parent
education and administration. Placement to be reserved one year in
advance. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: HDFS 330 with C- or better

HDFS 431. FAMILY, SCHOOL, AND COMMUNITY COLLABORATION. (3 Credits)
Focus on family, school, community environments and interactions for
children from infancy to adolescence. Resources and skills for enhancing
development across these settings are emphasized.
Prerequisites: HDFS 311 with C- or better or HDFS 313 with C- or better

HDFS 432. CHILDREN AND YOUTH WITH SPECIAL NEEDS. (3 Credits)
Developmental, educational, and family issues related to children and
youth with disabilities and giftedness.

HDFS 433. CHILD BEHAVIORAL SUPPORT IN GROUP SETTINGS. (10
Credits)
Students will complete an internship in a Pre-Kindergarten, Kindergarten
or First Grade classroom and will focus on curriculum development,
implementation and evaluation, individualizing for diverse student needs
and communication with students.
Prerequisites: HDFS 311 with C- or better and HDFS 330 [C-] and
HDFS 331 [C-]

HDFS 444. FAMILY VIOLENCE AND NEGLECT. (4 Credits)
Examination of the causes and consequences of family abuse and
neglect, including child abuse, domestic violence and elder abuse.

HDFS 447. *FAMILIES AND POVERTY. (4 Credits)
Examines families in poverty focusing on causes and consequences of
family poverty, including global economic factors, migration patterns,
aborption, and policies and programs for families. Community
service required. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: HDFS 447H

HDFS 447H. *FAMILIES AND POVERTY. (4 Credits)
Examines families in poverty focusing on causes and consequences of
family poverty, including global economic factors, migration patterns,
discrimination, and policies and programs for families. Community
service required. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course
Designator
Equivalent to: HDFS 447
HDFS 460. FAMILY POLICY. (4 Credits)
Family policies aim to protect, promote, and strengthen families by addressing one or more of the five explicit functions families perform: (a) family formation, (b) partner relationships, (c) economic support, (d) childrearing, and (e) caregiving. This course will explore the relationships between family policies and family functioning using state, federal, and international policy examples. By reviewing theoretical frameworks for conceptualizing family policy, students will assess the consequences policies may have for family well-being.

HDFS 461. PROGRAM DEVELOPMENT AND PROPOSAL WRITING. (4 Credits)
Principles of program development and evaluation applied to the development of a proposal for a human services program; analysis of needs and resources, identification of empirically-based strategies, and assessment. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: HDFS 360 with C- or better and HDFS 361 [C-]

HDFS 462. PROFESSIONAL HELPING SKILLS. (4 Credits)
Exploration of collaborative, strengths-based methods to resolve individual, family, and community problems. Application of ethical standards to case study, with emphasis on the values of human dignity and social justice. Development of basic helping skills within an empowerment framework.
Prerequisites: HDFS 262 with C- or better and HDFS 310 [P]

HDFS 465. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES. (3 Credits)
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
Equivalent to: HDFS 465H
This course is repeatable for 18 credits.

HDFS 465H. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES. (3 Credits)
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
Attributes: HNRS – Honors Course Designator
Equivalent to: HDFS 465
This course is repeatable for 18 credits.

HDFS 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: HDFS 499H
This course is repeatable for 16 credits.

HDFS 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HDFS 499
This course is repeatable for 16 credits.

HDFS 501. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 502. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

HDFS 505. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 506. SPECIAL PROBLEMS/SPECIAL PROJECTS. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 510. INTERNSHIP. (3-15 Credits)
This course is repeatable for 16 credits.

HDFS 511. THEORIES OF HUMAN DEVELOPMENT. (4 Credits)
Critical examination of significant theories of human development. Emphasizes evolution of theories and impact on current human development research.

HDFS 516. CHILD DEVELOPMENT. (4 Credits)
Study of theories, concepts, and issues related to physical, cognitive, social, and emotional development in infants and children. Covers family contexts, risk and resilience, nature/nurture issues, critical/sensitive periods, the importance of early experience, and the relationship between basic and applied research.

HDFS 517. ADOLESCENT DEVELOPMENT. (4 Credits)
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development in adolescents. Covers identity formation, family contexts, adolescent sexuality, societal contexts for adolescent development, and risk and resilience processes.

HDFS 518. ADULT DEVELOPMENT AND AGING. (4 Credits)
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development throughout adulthood. Covers life transitions, stress-related growth, optimal aging, wisdom, and developmental methods.

HDFS 519. THE LIFE COURSE. (4 Credits)
Introduces students to key concepts, principles, and controversies in life-course studies. Emphasizes how the nature and rhythm of the life course is structured by time and place. Examines how the lives of individuals and groups are shaped by history, demography, social institutions, states and policies, and culture.

HDFS 529. INTRODUCTORY DATA ANALYSIS WITH SAS. (1 Credit)
Introduction to basic statistical concepts and the use of the SAS software for data analysis. Graded P/N.

HDFS 530. RESEARCH IN HUMAN DEVELOPMENT AND FAMILY SCIENCES I. (4 Credits)
An overview of research design, measurement, sampling and evaluation research. Introduces computer applications for data collection and analysis. Lec/lab.

HDFS 531. APPLIED QUANTITATIVE METHODS I: ANOVA. (4 Credits)
Principles and application of general linear models for categorical predictors and repeated measures designs (e.g., ANOVA).
Prerequisites: HDFS 529 with B- or better

HDFS 532. APPLIED QUANTITATIVE METHODS II: LINEAR REGRESSION. (4 Credits)
Principles and application of general linear models for continuous predictors (e.g., multiple regression).
Prerequisites: HDFS 531 with B- or better

HDFS 533. SOCIAL POLICY AND HUMAN DEVELOPMENT. (4 Credits)
Probes how policies and governments affect human development over the life course. Examines experiences in family, education, work, and health. Families are a central lens for examining effects. Offered alternate years.
Equivalent to: HOEC 533
HDFS 534. SOCIAL PROGRAM AND POLICY EVALUATION. (4 Credits)
Models of evaluation and application of applied research methods to
social programs and policies.
Prerequisites: HDFS 531 with C or better

HDFS 538. QUALITATIVE RESEARCH METHODS I. (4 Credits)
Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical
issues. Includes ethnographic and observational methods, interview,
grounded theory, case study, and participatory approaches.

HDFS 539. QUALITATIVE METHODS II. (4 Credits)
Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical
issues. Includes ethnographic and observational methods, interview,
grounded theory, case study, and participatory approaches. Application of qualitative methods through completion of a qualitative research project. 
Prerequisites: HDFS 538 with C or better

HDFS 541. FAMILY STUDIES. (4 Credits)
Critical survey of current research in family studies with a focus on diverse family structures and processes.

HDFS 546. THEORIES OF FAMILY STUDIES. (4 Credits)
An overview of the major theoretical perspectives used in the study of families. Issues of theory construction and evaluation are also covered. Course goal is to enable the student to apply conceptual frameworks to a particular area of interest.

HDFS 547. FAMILIES AND POVERTY. (3 Credits)
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families.

HDFS 565. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES. (3 Credits)
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for 18 credits.

HDFS 587. SOCIAL GERONTOLOGY. (3 Credits)
An introduction to aging research targeted toward understanding demographics of aging societies, lifespan theories, methods of aging research, psychosocial aging processes, family and caregiving issues, housing and long-term care, and current social policies.

HDFS 601. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 602. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 603. DISSERTATION. (1-16 Credits)
This course is repeatable for 999 credits.

HDFS 605. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 606. SPECIAL PROJECTS. (1-6 Credits)
This course is repeatable for 16 credits.

HDFS 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

HDFS 610. PRACTICUM/INTERNSHIP. (3-15 Credits)
This course is repeatable for 16 credits.

HDFS 616. ADVANCED TOPICS IN CHILD-ADOLESCENT DEVELOPMENT. (3 Credits)
Advanced critical study of theory and research related to specific topics of social, emotional, and cognitive development during infancy, childhood and/or adolescence. This course is repeatable for 6 credits.

HDFS 617. ADVANCED TOPICS IN ADULT DEVELOPMENT AND AGING. (3 Credits)
Advanced critical study of theory and research related to specific topics of social and emotional development and stability in adulthood, including later life. This course is repeatable for 9 credits.

HDFS 630. QUANTITATIVE METHODS IN FAMILY AND INDIVIDUAL DEVELOPMENT. (3 Credits)
Advanced quantitative techniques in human development and family studies. Includes longitudinal designs, structural equation modes. Content varies with each offering. Prerequisites: HDFS 532 with B- or better This course is repeatable for 9 credits.

HDFS 639. COMMUNITY-BASED PARTICIPATORY RESEARCH. (4 Credits)
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotions.

HDFS 665. TEACHING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES. (1 Credit)
Principles and practices of pedagogy in human development and family sciences related to both on-campus and Ecampus instruction. Graded P/ N. This course is repeatable for 6 credits.

HDFS 685. RACE, CLASS, CULTURE AND AGING. (4 Credits)
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as H 685.

Equivalent to: H 685

HDFS 699. SPECIAL TOPICS. (1-4 Credits)
This course is repeatable for 8 credits.

HDFS 808. WORKSHOP. (1-16 Credits)
PREREQ: Application to Early Childhood Leadership Directions. This course is repeatable for 16 credits.

Aging Sciences Graduate Minor

This graduate minor provides interdisciplinary graduate education in the aging sciences through formal course work, research requirements and experiential learning that is aligned with the student’s career goals in aging.

The Aging Sciences minor requires that master’s students select 15 credits from the following courses. Doctoral students must select 18 credits.
### Community Health Graduate Minor

**Graduate Areas of Concentration**

**Community Health**

For more details, contact the School of Social and Behavioral Health Sciences.

**Rick Settersten**, *School Head* 433 Waldo Hall Oregon State University Corvallis, OR 97331 Phone: 541-737-8902 Email: richard.settersten@oregonstate.edu

**Norman Hord**, *School Head* 101 Milam Hall Oregon State University Corvallis, OR 97331 Phone: 541-737-5923 Email: norman.hord@oregonstate.edu

**Minor Code: 3755**

### Early Childhood Development and Education Minor

For Non-HDFS Majors at OSU-Cascades Campus only.

**Gerontology Certificate**

Carolyn Aldwin, Director  
Program on Gerontology  
Waldo Hall 437  
Oregon State University  
Corvallis, OR 97331-5102  
541-737-2024  
Email: carolyn.aldwin@oregonstate.edu  
Website: [http://health.oregonstate.edu/sbhs/gerontology](http://health.oregonstate.edu/sbhs/gerontology)

**Program on Gerontology**

The Program on Gerontology offers an interdisciplinary approach to the study of aging. Because aging involves physiological, sociological, and psychological processes, gerontology education and research is relevant to many disciplines. Career opportunities in gerontology are extremely diverse and include positions in community services, health sciences, nutrition and dietetics, housing, health and physical education, pharmacy, counseling, health care administration, business, public policy, and many other areas.

Recognizing the diversity of relevant disciplines and career opportunities, the OSU Program on Gerontology offers course work in gerontology through 10 schools/departments. The program is administered through the School of Social and Behavioral Health Sciences.

To be considered a gerontology course, at least 50 percent of the course content must address gerontology-related issues.

In addition to gerontology courses, seminars, field study (310/410/510/610), research (401/501/601), and projects (406/506/606) in gerontology are offered through the Gerontology Program. Field study, research, and projects in gerontology may also be available through other schools/departments. Students register for field study, research, or projects credit in the school or department that best meets their needs for supervision given the nature of the experience.

## Graduate Study in Gerontology

OSU offers over 20 graduate-level gerontology courses plus field study and research opportunities. There are three ways to pursue significant graduate work in gerontology at OSU:

1. **Gerontology may be selected as an area of concentration for both master's and doctoral degrees in Human Development and Family Studies.** Students choosing this concentration will select adult development and aging course work and research in their major and may choose an integrated minor in gerontology.

2. **Gerontology is an integrated graduate minor (i.e., courses chosen from a variety of schools/departments) available to graduate students in any major field.** The minor requires 18–36 credits, including HDFS 587 SOCIAL GERONTOLOGY. The balance of the course work is selected from graduate gerontology courses, field study, and/or research.

3. **Gerontology is an area of study in the Master's of Interdisciplinary Studies (MAIS) program.** MAIS students are required to take a minimum of 15 credits in gerontology, including HDFS 587 SOCIAL GERONTOLOGY.

</tbody>
</table>
Field study or field projects in Gerontology — Any Department

In addition to gerontology courses, seminars, field study (310/410/510/610), research (401/501/601), and projects (406/506/606) in gerontology are offered through the Gerontology Program.

Field study is a vital component of the Gerontology Certificate program. Three to six credits of an approved field experience or an approved research or field project are required. No more than six credits of field study will count toward certificate completion. Field Experience or Internships involve professional level work experience in an agency or organization that serves older adults. To be considered a gerontology field placement, at least half of the student’s time must be spent working with or for older individuals.

Ordinarily, nine credits of gerontology course work must be completed prior to beginning field study. Specific requirements for field study are cooperatively developed by the faculty supervisor, student, and a community agency. The type of field study selected should reflect the student’s career interests, as well as the student’s competencies and the community agency’s needs.

Field study in gerontology must be approved by the Program on Gerontology if it is to be used to meet Certificate requirements. Approval forms are available from the Program on Gerontology.

Electives from list of approved Gerontology Courses

Twelve to 15 credits of gerontology electives are required beyond the gerontology core to complete the minimum of 27 credits of gerontology study.

Additional Requirements

1. A grade of "C" or better in all gerontology courses. Overall GPA of 2.5.
2. Formal application to the program; forms available from the program office in 437 Waldo Hall.
3. Certificate requirements fulfilled within five years following graduation. Students who have not completed certificate requirements upon receipt of the degree may continue as special, postbaccalaureate, or graduate students.

Major Code: C437

Gerontology Graduate Minor

Graduate Areas of Concentration

Gerontology

Gerontology refers to the study of aging, and also includes adult development. The existence of large numbers of individuals over the age of 65 is unprecedented in the history of humankind. In the next ten years, the number of older adults is expected to double in developed countries and quadruple in the developing world. This growth will pose major challenges for societies in addressing the health, economic, and social needs of this population.

To address these challenges, students, researchers, and practitioners in the field of aging will need to take a multidisciplinary approach to solving these challenges, which will require an understanding of biological, psychological, sociocultural, and design and engineering factors. Accordingly, we have designed a multidisciplinary minor, drawing upon faculty across campus, which is tailored to individual student needs.

Students are required to have a 3.0 GPA and to have one of the gerontology faculty on their committee. Students must take 18 credits but can decide the classes in conjunction with their committee. Sample classes include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>H 536</td>
<td>HEALTHCARE ORGANIZATION LEADERSHIP THEORY AND BEHAVIOR</td>
<td>3</td>
</tr>
<tr>
<td>H 554</td>
<td>EPIDEMIOLOGY OF AGING</td>
<td>3</td>
</tr>
</tbody>
</table>

Note: Other courses are approved annually by the Gerontology Program.
### Health Management and Policy Graduate Certificate

</tbody>
</table>

Other electives may be chosen with the consent of the student’s advisor.

**Total Hours**: 33-36

---

### Pre-Human Development and Family Sciences

HDFS majors study interdisciplinary research and theory on human development across the lifespan within the contexts of families, school, work, and communities to prepare for careers in schools and helping professions and to pursue advanced academic degrees. The BS in Human Development and Family Sciences can be pursued through one of three required options listed below:

1. Child Development option
2. Human Development and Family Sciences, General
3. Human Services option

See each option in the HDFS overview for detailed information.

**Note**: It is possible to choose more than one option. Students should meet with an advisor in the college’s Office of Student Success in the Women’s Building 105 for additional information.

**Pre-Human Development and Family Sciences Major Code**: 457
Human Development and Family Sciences Undergraduate Major (BS, HBS)

Also available at OSU-Cascades, OSU-Portland and via Ecampus.

HDFS majors study interdisciplinary research and theory on human development across the lifespan within the contexts of families, school, work, and communities to prepare for careers in schools and helping professions and to pursue advanced academic degrees. The BS in Human Development and Family Sciences can be pursued through one of four required options listed below:

1. Child Development
2. Early Childhood (Cascades campus only)
3. Human Development and Family Sciences, General
4. Human Services

See each option in the HDFS overview for detailed information.

Note: It is possible to choose more than one option. Students should meet with an advisor in the college’s Office of Student Success in the Women’s Building 105 for additional information.

Credits Needed to Graduate
180 credits, 60 of which must be upper division. Credits are to include baccalaureate core courses, HDFS core courses, classes required for each option, and electives.

Child Development Option

This option is offered within the following major(s):

- Human Development and Family Sciences - College of Public Health and Human Sciences (p. 972)

The Child Development option prepares students to work directly with children of all ages and their families. This option is a strong foundation for work in a preschool and Head Start classrooms, early intervention, adolescent intervention, parent education and support, or for graduate work in HDFS, psychology, sociology, or education. With additional course work, students can pursue teacher licensure through the OSU College of Education or through other institutions.

COCC Central Oregon Community College

Option Code: 228

Human Development and Family Science, General Option

This option is offered within the following major(s):

•  Human Development and Family Sciences - College of Public Health and Human Sciences (p. 972)

Available only at OSU-Cascades.

This option prepares students to promote lifelong development, learning, and well-being of children and families. Through a focus on the early childhood period from prenatal through age 8 years, students examine dynamics among children, families, schools, communities, and cultures that have lasting impacts throughout life. Practicum and internship experiences prepare students to work directly with children and families in preschools, Head Start programs, child care, early intervention/early childhood special education, or parent and family support. Graduates also create and implement prevention and intervention programs, and pursue graduate study in fields such as education, special education, counseling, human development and family science, psychology, sociology, and social work.

Select one of the following statistics options:

H 220  INTRODUCTION TO HEALTH DATA ANALYSIS (COCC: MTH 243 and MTH 244)

Available on the Corvallis and OSU-Cascades campuses and via Ecampus.

Students majoring in Human Development and Family Sciences learn how people change across the life course within the contexts of families, school, work, and communities. Information from many disciplines is applied to the study of individuals and families, preparing students to fully understand people and to develop skills in critical thinking and in research. Students learn about infants and toddlers, teens and adults of all ages, and families.

On completing the HDFS General option, students are prepared to be involved and effective community members and to improve people’s lives. The HDFS General option is ideal for students interested in the helping professions and also pairs well with a minor or a second major in liberal studies; pre-medicine or pre-nursing; psychology; public health; sociology; Spanish; or women studies, gender, and sexuality studies. It provides exceptional preparation for graduate work in counseling, education, public policy, social work, or human development and family sciences, each of which can lead to a productive, satisfying career.

Human Services Option

This option is offered within the following major(s):

- Human Development and Family Sciences - College of Public Health and Human Sciences (p. 972)

The Human Services option prepares students for entry-level positions in a variety of human services settings including the juvenile justice system, health care settings and hospices, criminal justice agencies, community advocacy groups, the child welfare system, elderly services, children and youth services, substance abuse programs, and many others. Students gain an understanding of the social and human service delivery systems and acquire basic skills to communicate effectively with clients, develop intervention strategies, and solve interpersonal and social problems. At least two internship experiences in human services programs are required for degree completion. Students are prepared to pursue a graduate degree in several areas including counseling, social work, psychology, marriage and family therapy, human development and family sciences, nonprofit administration, public policy, and others.

### Human Services Option

Human Development and Family Studies Graduate Major (MS, PhD, MAIS)

Graduate Areas of Concentration

Human development and family studies

The School of Social and Behavioral Health Sciences offers course work and programs of study in the area of human development and family
studies. The Gerontology Program is also administered by the College of Public Health and Human Sciences through the school. Areas of study and degrees granted are described below.

Human Development and Family Studies offers graduate work leading to master of science and doctor of philosophy degrees. Graduate programs take a multidisciplinary approach, preparing students for college and university teaching and research, as well as development, administration, and evaluation of programs serving individuals and families across the lifespan.

Our research is interdisciplinary with signature themes in

a. transitions across the life course,
b. risk and resilience across the life span, and
c. developmental and family research methods.

Our faculty recognizes the critical importance of culture and gender, diversity, and contemporary global perspectives in the discovery of knowledge. We have research emphases in child development, adolescence, adult development and aging, families, rural communities, and cross-national comparison.

Research is an important focus of the Graduate Program in Human Development and Family Studies. The HDFS faculty includes nationally recognized scholars who are widely published in areas such as families and aging; family communication and conflict; child, adolescent, and adult development; intergenerational family relationships; family structure; and gender. We emphasize both quantitative and qualitative methodology.

For more information, contact the Graduate Program in Human Development and Family Studies, College of Public Health and Human Sciences, 437 Waldo Hall, OSU, Corvallis, OR 97331-5102.

Major Code: 4470

Human Development and Family Studies Graduate Minor

Minor Code: 4470

Human Development and Family Sciences Minor

Students minoring in Human Development and Family Sciences will learn how people change across the life course within the contexts of families, schools, and communities. This minor complements other academic degrees such as education, public health, psychology, sociology, and allied health sciences.

Health Management and Policy Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 976)

The Health Management and Policy option provides training and skills in the management of public health and health care programs and agencies, and in the analysis of public health policies. The program is appropriate for those who want to manage health programs in a wide range of institutions, both public and private, and is particularly well-suited for students interested in the business aspects associated with the delivery and financing of health services. Students can also focus on administration in assisted living facilities, continuing care retirement centers and nursing homes, and receive a Certificate in Gerontology.

Health Promotion and Health Behavior Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 976)

This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them...
with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

COLLEGE OF SCIENCE

The College of Science faculty and students pursue both curiosity-driven, fundamental research to better understand the broader world and use-inspired research to tackle some of the grand challenges of science, engineering, business and education.

We offer internationally recognized undergraduate and graduate programs across the life, physical, mathematical and computational sciences. Specifically, we offer courses of study in biology, biochemistry and biophysics, biohealth sciences, microbiology, zoology, chemistry, physics, mathematics and statistics. We also offer 12 pre-professional programs to prepare students for careers in healthcare or medical professions.

The College of Science is an inclusive, welcoming and intellectually stimulating environment to a diverse community. Working together as one, the College of Science is a nucleus of learning, societal engagement, achievement, and discovery.

Research and instruction in the College of Science are enhanced within a university of outstanding professional schools in engineering, oceanography, agriculture, forestry, and pharmacy. Science students can enrich their degrees with courses from these areas. Students also have opportunities to make original discoveries while working on research with world-class scientists.

Majors
The majors of the College of Science are informally divided into the following groups:

Life Sciences
• Biochemistry and Biophysics, Biochemistry and Molecular Biology, BioHealth Sciences, Biology, Microbiology, Molecular and Cellular Biology (graduate only), Zoology.

Physical Sciences
• Chemistry and Physics

Pre-professional Programs
• BioHealth Sciences

Computational, and Mathematical Sciences
• Mathematics and Statistics (graduate only)

Double Degrees
Undergraduates with majors in the College of Science can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

Pre-Professional Programs
The College of Science offers special programs in health-related fields to help students meet entrance requirements for professional schools in clinical laboratory science, dentistry, medicine, optometry, pharmacy, physical therapy, physician assistant, podiatry, and veterinary medicine.

Curricula in Science
Curricula in science lead to the following degrees: bachelor of arts (BA), bachelor of science (BS), master of arts (MA), master of science (MS), professional science master’s (PSM), and doctor of philosophy (PhD). (See the Graduate School for advanced degree requirements.) The college also participates in the Master of Arts in Interdisciplinary Studies (MAIS) program.

Teacher Certification
All professional teacher education occurs in the College of Education. The following majors in the College of Science are suitable for teaching middle school and high school and have an education option available: biology (pre-education), chemistry (chemistry education), mathematics (secondary teaching emphasis), and physics (physics education).

Certain mathematics courses (MTH 211 *FOUINDATIONS OF ELEMENTARY MATHEMATICS, MTH 212 FOUNDATIONS OF ELEMENTARY MATHEMATICS, MTH 390 FOUNDATIONS OF ELEMENTARY MATHEMATICS) are highly recommended for students who plan to teach elementary or secondary mathematics. See the College of Education section of this catalog for admission to the teacher licensure programs.

Summer Courses for Secondary School Science and Mathematics Teachers
During the summer session, the College of Science offers a number of courses designed especially for high school teachers of science and/or mathematics. For offerings and full descriptions see the Summer Session (http://summer.oregonstate.edu) website.

Scholarships
The College of Science offers a variety of scholarships to currently enrolled College of Science students who have taken at least 28 credits at OSU. For more information and application forms contact the College of Science or see http://www.science.oregonstate.edu/node/108.
Degree Requirements
To graduate with a BS degree in the College of Science, undergraduate students must fulfill the following requirements:

University Baccalaureate Core (48)

College of Science Requirements
(These credits can also fulfill part of the baccalaureate core requirements.)

- Mathematical sciences (12)
- Physical, earth, and/or biological sciences (15) to include a two-term sequence (At least one term in biological science and one term in physical or earth science. Must include a two-term sequence in one of these sciences.)
- Department requirements (see each department)

Some departments also grant a BA degree that requires a full year of a college-level (200-level or above) foreign language and at least 9 credits of College of Liberal Arts electives in addition to credits required for the baccalaureate core. See the department listings for specific requirements.

A minimum 2.00 GPA is required in College of Science majors and minors; (S/U grading is not allowed in science majors or minors).

The curricula are shown for each major; some substitutions can be made with department and college approval. Unless otherwise indicated, the conditions and credits for research, thesis, reading and conference, and seminar are to be arranged with the instructor involved.

Chemistry
The Department of Chemistry offers BS, BA, MS, MA, MAIS, and PhD degrees in Chemistry. The facilities, faculty, and curricular offerings in this department are approved by the American Chemical Society.

Chemistry provides a gateway to many professions. An undergraduate chemistry degree may serve as preparation for professional work in chemistry and related sciences; as a foundation to pursue applied fields including pharmaceutical chemistry, forensics, biotechnology, medicine, chemical processing, electronics, agricultural and food science, oceanography, marketing of scientific equipment or supplies, environmental sciences, and atmospheric science. It may also serve as a core for pre-professional students pursuing graduate work in pure or applied chemistry, and for those seeking positions as research chemists and technical experts in commercial laboratories and chemical industries, positions in local, state, and federal government facilities, and for postgraduate work leading to teaching positions in universities, colleges, community colleges, and high schools.

There are several degree programs available to undergraduate chemistry majors. All curricula involve general, organic, analytical, physical, and inorganic chemistry course work, plus two to three years of laboratory work in chemistry.

All chemistry majors take part or all of Experimental Chemistry, a six-term laboratory course sequence consisting of 22 project-style experiments. This program replaces the traditional separate divisional laboratory courses in chemistry taught at many universities. Students in this Integrated Laboratory Program work on two to five projects per term, each of which includes components of synthesis, analysis, theory and report writing spanning all areas of modern chemistry. One goal of the program is to provide students intensive hands-on experience in modern chemical instrumentation and computers as a foundation for both graduate studies and employment in science after graduation.

Most chemistry majors take advantage of the opportunity to become involved in research projects in the department. Working with a research group is an exciting way to apply ideas and skills acquired in formal course work. Students work closely with a faculty member and research group to set up their projects. Undergraduates also have the opportunity to present their research as a poster at the annual departmental poster session entitled "Chemistry in Action." Scheduling research time is flexible but three hours of work per week are required per credit. Areas of research available are highly varied and include synthesis of new compounds and materials, development and applications of chemical instrumentation, laser spectroscopy, surface science, reaction mechanisms, design and synthesis of polymers and optical materials, environmental chemistry, bioanalytical methods, and nuclear chemistry. Research experience is helpful when considering graduate work in chemistry and provides valuable experience for entering the job market. Students may also obtain valuable experience and credits for internships.

Graduate Studies
The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in analytical chemistry, inorganic chemistry, nuclear and radiation chemistry, organic chemistry, physical chemistry, and solid state chemistry. The major emphasis of the PhD program is on research. A nonthesis master's degree is available. Most graduate students working on a thesis in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

Undergraduate Programs
Major
• Chemistry (p. 988)

Track-One Options
• Advanced Biochemistry (p. 993)
• Advanced Chemistry (p. 993)

Track-Two Options
• Biochemistry (p. 994)
• Business (p. 994)
• Chemistry Education (p. 995)
• Chemical Engineering (p. 994)
• Environmental Chemistry (p. 995)
• Forensic Science (p. 996)
• Materials Science (p. 997)
• Pre-med (p. 997)

Minor
• Chemistry (p. 987)

Graduate Programs
Major
• Chemistry (p. 987)

Minor
• Chemistry (p. 987)

Faculty

Professors Barofsky, Carter, Evans, Gable, Hedberg, Ingle, Keszler, Kong, Lerner, Loveland, Maier, Nibler, Nyman, Remcho, Schuyler, Simonich, Sleight, Subramanian, Thomas, Watson, Westall, White
Associate Professors Beaudry, Blakemore, Cheong, Fang, Ji, Loeser
Assistant Professors Burrows, Dolgos, Koley, Loesgen
Senior Instructors II Haak, Myles, Nafshun, Pastorek, Walker
Senior Instructors I Barth, Gautschi (Cascades), Sleszynski, Weiss
Instructors Knutson, Siler, Wojcinski
Professors of Practice Giordan

Adjunct Faculty
Beckman, Cann, Field, Herman, Hutchinson(UO), Johnson, Darren and Johnson, David (UO), Mahmud, McPhail, Mehl, Paulenova, Proteau, Qiu, Tate, Zabriskie

Chemistry

CH 101. CHEMISTRY IN YOUR WORLD. (3 Credits)
For students who need some additional preparation before enrolling in a general chemistry course. Explores the impact of chemistry on our everyday lives while acquiring the skills it takes to be successful in general chemistry.
Prerequisites: Math Placement - ALEKS with a score of 046 or MTH 095 (may be taken concurrently) with C- or better or MTH 103 (may be taken concurrently) with C- or better or MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or MTH 252 with C- or better or MTH 252H with C- or better

CH 110. ROYGBIV: THE CHEMISTRY OF COLORS. (4 Credits)
An introduction to the concepts of chemistry and the importance of these concepts in understanding color. Lec/lab.
Attributes: CPPS – Core, Pers, Physical Science

CH 121. GENERAL CHEMISTRY. (5 Credits)
A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122, CH 123 are Bacc Core courses.)

CH 122. GENERAL CHEMISTRY. (5 Credits)
A general chemistry sequence intended for majors in fields other than the physical sciences. Lec/lab/rec. (CH 122 and CH 123 are Bacc Core courses.)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: CH 121 with C- or better or (CH 201 with C- or better or (CH 231 with C- or better or CH 231H with C- or better))

CH 123. GENERAL CHEMISTRY. (5 Credits)
A general chemistry sequence intended for majors in fields other than the physical sciences. (CH 122 and CH 123 are Bacc Core courses.) Lec/rec/lab.
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: CH 122 with C- or better or (( (CH 232 with C- or better or CH 232H with C- or better) and (CH 262 [C-] or CH 262H [C-] or CH 272 [C-]) or (CH 202 [C-] and CH 205 [C-]))

CH 124. GENERAL CHEMISTRY. (3 Credits)
A bridge course, allowing students who have taken one term of General Chemistry (CH 121) to complete the equivalent of one full semester of general chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab.
Prerequisites: CH 121 with D- or better

CH 125. GENERAL CHEMISTRY. (2 Credits)
A bridge course, allowing students who also take one term of General Chemistry (CH 123) to complete the equivalent of one full semester of General Chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab. Offered via Ecampus only.
Prerequisites: CH 121 with D- or better and CH 124 [D-]

CH 130. GENERAL CHEMISTRY OF LIVING SYSTEMS. (4 Credits)
Introduction to organic chemistry and the chemistry of biological systems. Organic nomenclature and fundamental reactions, emphasizing topics such as amino acids, proteins, biochemical energy, and nucleic acids (DNA and RNA). Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Lec/lab. Does not count toward a chemistry minor.

CH 140. GENERAL, ORGANIC, AND BIOLOGICAL CHEMISTRY. (6 Credits)
An introduction to general, organic, and biological chemistry. Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Offered via Ecampus only.

CH 199. SPECIAL TOPICS. (1-3 Credits)
This course is repeatable for 3 credits.

CH 201. CHEMISTRY FOR ENGINEERING MAJORS. (3 Credits)
A sequence of selected chemistry topics for pre-engineering students. Lec.
Prerequisites: MTH 111 (may be taken concurrently) with D- or better or MTH 112 (may be taken concurrently) with D- or better or MTH 251 (may be taken concurrently) with D- or better or MTH 251H (may be taken concurrently) with D- or better or MTH 252 (may be taken concurrently) with D- or better or MTH 252H (may be taken concurrently) with D- or better or MTH 254 (may be taken concurrently) with D- or better or MTH 254H (may be taken concurrently) with D- or better or Math Placement - ALEKS with a score of 060

CH 202. CHEMISTRY FOR ENGINEERING MAJORS. (3 Credits)
A sequence of selected chemistry topics for pre-engineering students. Lec.
Prerequisites: CH 121 with C- or better or CH 201 with C- or better or CH 231 with C- or better or CH 231H with C- or better

CH 205. LABORATORY FOR CH 202. (1 Credit)
Three-hour weekly session for the development of laboratory skills in general chemistry for engineers. Lec/lab.
Prerequisites: CH 202 (may be taken concurrently) with D- or better
CH 211. RECAPITULATION FOR CHEMISTRY 201. (1 Credit)
80-minute weekly session for the development of problem-solving skills in general chemistry for engineers. Rec.
Corequisites: CH 201

CH 212. RECAPITULATION FOR CHEMISTRY 202. (1 Credit)
One-hour weekly session for the development of problem-solving skills in general chemistry for engineers. Rec.
Corequisites: CH 202

CH 220. CAREERS IN CHEMISTRY. (1 Credit)
Course for chemistry majors that discusses strategies for success in the study of chemistry and the varied career opportunities available. Topics range from surviving freshman chemistry to courses of advanced classes, study abroad opportunities, internships, getting into and succeeding in graduate school, choices of chemical careers in academia, industry, government, non-governmental organizations, and using chemistry as a foundation for careers in other areas such as law and business. Graded P/N.

CH 231. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231 is a lecture course; CH 261 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisites: MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 254 (may be taken concurrently) with C- or better or MTH 254H (may be taken concurrently) with C- or better or Math Placement - ALEKS with a score of 060
Equivalent to: CH 231H

CH 231H. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231H is a lecture course; CH 261H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisites: MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 254 (may be taken concurrently) with C- or better or MTH 254H (may be taken concurrently) with C- or better or Math Placement - ALEKS with a score of 060
Equivalent to: CH 231

CH 232. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 232 is a lecture course; CH 262 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisites: (CH 231 with C- or better or CH 231H with C- or better) or CH 221 with C- or better
Equivalent to: CH 232H

CH 232H. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 232H is a lecture course; CH 262H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisites: (CH 231 with C- or better or CH 231H with C- or better) or CH 221 with C- or better
Equivalent to: CH 232

CH 233. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233 is a lecture course; CH 263 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisites: (CH 232 with C- or better or CH 232H with C- or better) or CH 222 with C- or better
Equivalent to: CH 233H

CH 233H. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233H is a lecture course; CH 263H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisites: (CH 232 with C- or better or CH 232H with C- or better) or CH 222 with C- or better
Equivalent to: CH 233

CH 261. *LABORATORY FOR CHEMISTRY 231. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231)
Attributes: CPPS – Core, Pers, Physical Science
Corequisites: CH 231
Equivalent to: CH 261H, CH 271

CH 261H. *LABORATORY FOR CHEMISTRY 231H. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Corequisites: CH 231H
Equivalent to: CH 261

CH 262. *LABORATORY FOR CHEMISTRY 232. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: CH 261 with D- or better or CH 261H with D- or better or CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232
Equivalent to: CH 262H, CH 272
CH 262H. *LABORATORY FOR CHEMISTRY 232H. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisites: CH 261 with D- or better or CH 261H with D- or better or CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232H
Equivalent to: CH 262

CH 263. *LABORATORY FOR CHEMISTRY 233. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233
Equivalent to: CH 263H, CH 273

CH 263H. *LABORATORY FOR CHEMISTRY 233H. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisites: CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233H

CH 271. *LABORATORY FOR CH 231 FOR CHEMISTRY MAJORS. (1 Credit)
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 231)
Attributes: CPPS – Core, Pers, Physical Science
Corequisites: CH 231

CH 272. *LABORATORY FOR CH 232 FOR CHEMISTRY MAJORS. (1 Credit)
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 232)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232

CH 273. *LABORATORY FOR CH 233 FOR CHEMISTRY MAJORS. (1 Credit)
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 233)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233

CH 324. QUANTITATIVE ANALYSIS. (4 Credits)
A basic course in modern chemical analysis. Self-paced laboratory. CH 130 does not meet the prerequisites for this course.
Prerequisites: CH 123 with D- or better or CH 223 with D- or better or CH 226H with D- or better or (CH 233 with D- or better or CH 233H with D- or better) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-])

CH 331. ORGANIC CHEMISTRY. (4 Credits)
Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec. CH 130 does not meet the prerequisites for this course.
Prerequisites: CH 123 with C- or better or CH 223 with C- or better or CH 226H with C- or better or ((CH 233 with C- or better or CH 233H with C- or better) and (CH 263 [C-] or CH 263H [C-] or CH 273 [C-]))

CH 332. ORGANIC CHEMISTRY. (4 Credits)
Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec.
Prerequisites: CH 331 with C- or better

CH 334. ORGANIC CHEMISTRY. (3 Credits)
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisites: CH 334 with D- or better

CH 335. ORGANIC CHEMISTRY. (3 Credits)
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisites: CH 335 with D- or better

CH 336. ORGANIC CHEMISTRY. (3 Credits)
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisites: CH 336 with D- or better

CH 337. ORGANIC CHEMISTRY LABORATORY. (4 Credits)
Laboratory course in organic chemistry for nonmajors, designed to supplement CH 331, CH 332 and CH 334, CH 335, CH 336. Lec/lab.
Prerequisites: CH 331 with D- or better and CH 332 [D-] or (CH 334 [D-] and CH 335 [D-] and CH 336 [D-])

CH 361. EXPERIMENTAL CHEMISTRY I. (3 Credits)
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Prerequisites: ((CH 221 with D- or better and CH 222 [D-] and CH 223 [D-]) or (CH 224H [D-]) and CH 225H [D-] and CH 226H [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-]) or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233H [D-]) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-]) and (MH 251 (may be taken concurrently) [D-] or MH 251H (may be taken concurrently) [D-]) and (PH 201 (may be taken concurrently) [D-] or PH 211 (may be taken concurrently) [D-]) and CH 334 (may be taken concurrently) [D-])
Equivalent to: CH 361H
CH 361H. EXPERIMENTAL CHEMISTRY I. (3 Credits)
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CH 221 with D- or better and CH 222 [D-] and CH 223 [D-]) or (CH 224H [D-] and CH 225H [D-] and CH 226H [D-]) or (CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233H [D-]) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-]) and (MTH 251 (may be taken concurrently) [D-] or MTH 251H (may be taken concurrently) [D-]) and (PH 201 (may be taken concurrently) [D-] or PH 211 (may be taken concurrently) [D-] and CH 334 (may be taken concurrently) [D-])
Equivalent to: CH 361

CH 362. EXPERIMENTAL CHEMISTRY I. (3 Credits)
First-term integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Prerequisites: (CH 361 with D- or better or CH 361H with D- or better) and CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362H

CH 362H. EXPERIMENTAL CHEMISTRY I. (3 Credits)
First-term integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CH 361 with D- or better or CH 361H with D- or better) and CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362

CH 374. *TECHNOLOGY, ENERGY, AND RISK. (3 Credits)
Decision-making in a technical, democratic society. Discussion of current issues such as acid rain, toxic organic chemicals in the environment, energy resources, etc. Does not meet the prereq for any other chemistry course. Does not meet requirements for chemistry minor. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

CH 390. ENVIRONMENTAL CHEMISTRY. (3 Credits)
Sources, reactions, transport, effects, and fates of chemical species in water, soil, air, and living environments and the effects of technology thereon.
Prerequisites: CH 331 with D- or better or CH 334 with D- or better

CH 399. SPECIAL TOPICS. (1-16 Credits)
Discussion of special topics in chemistry. This course is repeatable for 99 credits.

CH 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CH 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

CH 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CH 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CH 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

CH 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CH 407

CH 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

CH 411. INORGANIC CHEMISTRY. (3 Credits)
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, and metal-ligand complexes.

CH 412. INORGANIC CHEMISTRY. (3 Credits)
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry.
Prerequisites: CH 411 with D- or better

CH 418. NUCLEAR CHEMISTRY. (3 Credits)
Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation.

CH 421. ANALYTICAL CHEMISTRY. (3 Credits)
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data.

CH 422. ANALYTICAL CHEMISTRY. (3 Credits)
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data.

CH 424. BIOANALYTICAL CHEMISTRY. (3 Credits)
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year.

CH 435. STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS. (3 Credits)
Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules.
Prerequisites: CH 336 with D- or better and (CH 442 [D-] or CH 542 [D-])

CH 440. PHYSICAL CHEMISTRY. (3 Credits)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisites: MTH 254 with D- or better or MTH 254H with D- or better

CH 441. PHYSICAL CHEMISTRY. (3 Credits)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisites: (CH 440 with C- or better or CHE 311 with C- or better) and (MTH 254 [C-] or MTH 254H [C-])

CH 442. PHYSICAL CHEMISTRY. (3 Credits)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisites: (MTH 254 with D- or better or MTH 254H with D- or better) and CH 441 [D-]
CH 450. INTRODUCTORY QUANTUM CHEMISTRY. (3 Credits)
Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year.
Prerequisites: CH 442 with D- or better or CH 542 with D- or better

CH 461. EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken concurrently) [D-]
Equivalent to: CH 461H

CH 461H. EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic and physical chemistry. Lec/Lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken concurrently) [D-]
Equivalent to: CH 461

CH 462. *EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-])
Equivalent to: CH 462H

CH 462H. *EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-])
Equivalent to: CH 462

CH 463. *EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-]) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 463H

CH 463H. *EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-]) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 463

CH 464. *EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464H

CH 464H. *EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464

CH 471. ADVANCED ORGANIC CHEMISTRY. (3 Credits)
Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies.
Prerequisites: CH 336 with D- or better or CH 337 with D- or better

CH 490. COMPUTER PROGRAMMING FOR SCIENTISTS. (3 Credits)
Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry.
Prerequisites: MTH 252 with D- or better or MTH 252H with D- or better

CH 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

CH 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CH 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CH 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CH 507. SEMINAR. (1-16 Credits)
Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. Graded P/N.
This course is repeatable for 16 credits.

CH 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
CH 511. INORGANIC CHEMISTRY. (4 Credits)
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, metal-ligand complexes, sol-gel chemistry and nanotechnology.

CH 512. INORGANIC CHEMISTRY. (4 Credits)
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry.
Prerequisites: CH 511 with C or better

CH 513. SOLID STATE CHEMISTRY. (3-4 Credits)
Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature.
This course is repeatable for 4 credits.

CH 516. RADIOCHEMISTRY. (4 Credits)
Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab.
CROSSLISTED as NSE 516.
Prerequisites: NE 531 with C or better or (RHP 531 with C or better and RHP 536 [C])
Equivalent to: NSE 516
This course is repeatable for 12 credits.

CH 518. NUCLEAR CHEMISTRY. (3 Credits)
Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation.

CH 521. ANALYTICAL CHEMISTRY. (3 Credits)
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data.

CH 522. ANALYTICAL CHEMISTRY. (3 Credits)
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data.

CH 524. BIOANALYTICAL CHEMISTRY. (3 Credits)
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year.

CH 535. STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS. (3 Credits)
Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules.

CH 540. PHYSICAL CHEMISTRY. (3 Credits)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.

CH 541. PHYSICAL CHEMISTRY. (3 Credits)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.

CH 542. PHYSICAL CHEMISTRY. (3 Credits)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.

CH 550. INTRODUCTORY QUANTUM CHEMISTRY. (3 Credits)
Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year.
Prerequisites: CH 542 with C or better

CH 553. CHEMICAL THERMODYNAMICS. (3 Credits)
The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena, and magnetic systems. Not offered every year.

CH 571. ADVANCED ORGANIC CHEMISTRY. (3 Credits)
Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies.

CH 582. CHEMISTRY AND MATERIALS OF BATTERIES AND SUPERCAPACITORS. (3 Credits)
Examines the chemistry and materials currently in use and proposed for future primary and secondary batteries and supercapacitors. After a brief historical review, we will examine in detail the state-of-the-art technologies including lithium-ion, lithium, and sodium-sulfur batteries and electrochemical double-layer capacitors, and future technologies such as metal-air and lithium-sulfur. Class discussions will focus on structure/performance relationships and other issues such as environmental impact, safety and cost. Offered via Ecampus only.

CH 584. INSTRUMENTS AND ONLINE INTERACTIONS IN THE SCIENCES. (3 Credits)
Examine methods and technologies for and incorporating virtual instruments and online interactions into laboratory courses to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in science.

CH 590. COMPUTER PROGRAMMING FOR SCIENTISTS. (3 Credits)
Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry.

CH 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CH 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CH 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CH 607. SEMINAR. (1-16 Credits)
Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs.
This course is repeatable for 16 credits.
CH 614. SELECTED TOPICS IN INORGANIC CHEMISTRY. (4 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in fields such as solid state chemistry, theoretical inorganic chemistry, spectroscopy and magnetism, chemistry of coordination compounds, kinetics and mechanisms of inorganic reactions, acid-base theory and reactions in nonaqueous solvents, organometallic chemistry, and chemistry of the less familiar elements. Not offered every year. This course is repeatable for 8 credits.

CH 615. SELECTED TOPICS IN ORGANIC CHEMISTRY. (4 Credits)
Focus is on cutting edge research topics in inorganic materials chemistry, which will evolve from year-to-year to stay up-to-date. Current journal articles, software programs, and lab demonstrations will be utilized. Students will learn both content of a research area, as well as tools used in the practice.

CH 616. CRYSTALLOGRAPHY AND X-RAY DIFFRACTION. (4 Credits)
Principles of crystallography and x-ray diffraction as applied to the structural characterization of both single crystals, powders, and thin films.

CH 630. ADVANCED ORGANIC CHEMISTRY. (3 Credits)
Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year.

CH 631. ADVANCED ORGANIC CHEMISTRY. (4 Credits)
Carbon-carbon bond forming reactions, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year.

CH 632. ADVANCED ORGANIC CHEMISTRY. (3 Credits)
Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year.

CH 633. HYPOTHESIS, EVIDENCE, AND ARGUMENT IN ORGANIC CHEMISTRY. (2 Credits)
Immerses the student in the tools of scientific method as applied to current research topics in the chemical literature. The student will perform an extensive review of a modern topic in organic chemistry, prepare a written summary and analysis of this literature review and make a public oral presentation and discussion. Prerequisites: CH 632 with C or better This course is repeatable for 4 credits.

CH 636. SELECTED TOPICS IN ORGANIC CHEMISTRY. (3 Credits)
Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year. This course is repeatable for 12 credits.

CH 637. SELECTED TOPICS IN ORGANIC CHEMISTRY. (3 Credits)
Nonsequence courses designed to acquaint students with advances in organic chemistry, specifically focusing on biosynthesis of natural products and enzyme reaction mechanisms. CH 636, CH 637, CH 638 need not be taken in order. This course is repeatable for 12 credits.

CH 638. SELECTED TOPICS IN ORGANIC CHEMISTRY. (3 Credits)
Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year. This course is repeatable for 12 credits.

CH 650 with B- or better

CH 651. QUANTUM MECHANICS OF ATOMS AND MOLECULES. (3 Credits)
Not offered every year.

CH 652. QUANTUM MECHANICS OF MOLECULAR SPECTROSCOPY. (3 Credits)
Not offered every year.

CH 660. SPECTROCHEMICAL ANALYSIS. (3 Credits)
Theoretical concepts and methodology of optical spectrochemical methods of analysis, components of spectrometers, flame and electrothermal atomic spectrophotometry, ICP atomic emission spectrometry, molecular absorption and fluorescence spectrometry.

CH 661. SEPARATIONS: CHROMATOGRAPHY AND RELATED METHODS. (4 Credits)
Theory, instrumentation, and practice of modern separation techniques (gas chromatography, liquid chromatography, electrokinetic separations) and sample preparation methods; handling and interpretation of chromatographic and electrophoretic data.

CH 662. ANALYTICAL ELECTROCHEMISTRY. (4 Credits)
Study of current, voltage and time relationships in electrochemical cells. Offered alternate years.

CH 681. SELECTED TOPICS IN PHYSICAL CHEMISTRY. (3 Credits)
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure dynamics determination (UV-visible, near-IR light sources, x-ray, electron and neutron diffraction), spectroscopy (ultrafast, nonlinear, multidimensional, multiphoton, magnetic resonance, photoelectron), physical chemistry of condensed phase systems (biomolecules, aqueous solution, novel materials, ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules, structural dynamics of complex systems. Need not be taken in order. Not offered every year.

Prerequisites: CH 550 with B- or better This course is repeatable for 12 credits.

CH 681. SELECTED TOPICS IN PHYSICAL CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure dynamics determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year. This course is repeatable for 12 credits.
CH 682. SELECTED TOPICS IN PHYSICAL CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year.
This course is repeatable for 12 credits.

CH 683. SELECTED TOPICS IN ANALYTICAL CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
This course is repeatable for 12 credits.

CH 684. SELECTED TOPICS IN ANALYTICAL CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
This course is repeatable for 12 credits.

CH 685. SELECTED TOPICS IN ANALYTICAL CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
This course is repeatable for 12 credits.

CH 686. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
This course is repeatable for 12 credits.

CH 687. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
This course is repeatable for 12 credits.

CH 688. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY. (2 Credits)
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
This course is repeatable for 12 credits.

CH 692. ENVIRONMENTAL TRANSFORMATION OF ORGANIC COMPOUNDS. (3 Credits)
Chemical, photochemical, and biological transformation reactions of organic compounds in the environment. Test methods and predictive models for determining the persistence of organic compounds in the environment. Offered alternate years.

CH 697. MASS SPECTROMETRY OF ORGANIC COMPOUNDS. (4 Credits)
Physical principles of mass spectrometric instrumentation and interpretation of the mass spectra of organic compounds and biomolecules. Not offered every year.
Chemistry Undergraduate Major (BA, BS, HBA, HBS)

BS Degree in Chemistry

The BS degree in Chemistry features two tracks, each with a chemistry core and a selection of accompanying options. Students in either track or any option with good academic records and letters of recommendation will be well prepared and competitive for continued graduate education in chemistry or related areas.

- **Track One** is well suited for students intending to pursue a graduate degree in chemistry or a closely related area. It provides the most rigorous and complete chemistry background and the most extensive laboratory experience. The curriculum is approved by the American Chemical Society (ACS) and has two options: advanced biochemistry and advanced chemistry. Both options include 6–12 credits of career-supportive electives (CSE) in advanced chemistry or related disciplines. These CSE courses are approved by the advisor and are intended to strengthen the student's background in areas related to career goals. Students choosing the advanced chemistry option must take at least 3 credits in advanced laboratory courses or research. Track-One graduates are eligible for ACS certification by the department chair and can become full members of the ACS without the requirement of work experience.

- **Track Two** is suited for chemistry majors who want to gain extensive experience in a secondary area, target a particular career direction or continue with graduate education in chemistry or related areas. Track Two options include biochemistry, business, chemistry education, chemical engineering, environmental chemistry, forensic science, materials science, and pre-medicine. The multidisciplinary approach of Track Two enhances preparation and opportunities for employment in electronics, polymers, or biotechnology (the biochemistry, chemical engineering, or materials science options), for careers in environmental science (environmental chemistry option), work in crime labs (forensic science option), or teaching in high schools (chemistry education option). The Track Two curriculum is not approved by the American Chemical Society. It consists of a core of chemistry courses (79–81 credits) and a combination of 8 to 11 courses (30–37 credits) that defines each option.

All courses must be taken for a grade (not S/U) and the overall GPA for all chemistry courses must be 2.0 or higher.

### Courses that cannot be used for the minor:

* Baccalaureate Core Course (BCC)

1 A minimum of four upper-division courses of 3 or more credits in at least two areas of chemistry (organic, physical, analytical, inorganic, or nuclear) and including one laboratory course are required.

See [http://chemistry.oregonstate.edu/node/1727](http://chemistry.oregonstate.edu/node/1727) for more details about the Chemistry minor.

**Minor Code: 520**

### BA Degree in Chemistry

The BA degree in Chemistry is appropriate for chemistry students interested in obtaining a broader academic background through a second-language requirement and additional liberal arts courses (9 credits). It also includes 6–12 credits of approved career-supportive electives to allow students to choose courses in advanced chemistry or related disciplines to support their career goals. At least 3 credits are to be in advanced laboratory courses or research. This degree may lead to international opportunities, especially if coupled with the International Degree Program at OSU.

### All Undergraduate Chemistry Degrees

Completion of an option is required to earn a degree in Chemistry.

The baccalaureate core requirements are met by:

<table>

**Total Hours**: 37-38
For any option involving biochemistry courses, it is strongly recommended that students select:

BB 314 CELL AND MOLECULAR BIOLOGY, is also recommended. Prereqs for BB 314 CELL AND MOLECULAR BIOLOGY are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 211</td>
<td>*PRINCIPLES OF BIOLOGY</td>
<td>4</td>

<td>ORGANIC CHEMISTRY</td>
<td>3</td>
</tr>
</tbody>
</table>

BI 212 *PRINCIPLES OF BIOLOGY as the biology course to fulfill the baccalaureate core requirement.

For options in which CH 462 ^EXPERIMENTAL CHEMISTRY II is the recommended WIC course, it is strongly recommended that CH 422 ANALYTICAL CHEMISTRY be taken as a corequisite.

Chemistry offers the following courses through the Honors College (HC). Chemistry students in the HC may substitute these courses for courses in the regular sequences:

<table>

Advanced Biochemistry Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 988)

This track-one option leads to a degree approved by the American Chemical Society. It is designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. It provides a rigorous chemistry foundation with extensive laboratory experience. The mix of advanced courses in the option is modified to emphasize biochemistry principles and laboratory techniques.

Advanced Chemistry Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 988)

This track-one option leads to a degree approved by the American Chemical Society. Designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. This provides the most rigorous and complete chemistry foundation with the most extensive laboratory experience. Undergraduate research is strongly encouraged. Knowledge and skills are developed in organic, analytical, physical and inorganic chemistry. Six advanced laboratory courses are required. Students have a choice of electives that support their career goals.

Biochemistry Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 988)

The Biochemistry option is for students interested in working in biotechnology areas. Students can earn a BS degree in Chemistry in four years while targeting a career direction in biotechnology or preparing for graduate studies in chemistry. This option includes nine courses in biology, biochemistry including lab, and genetics and molecular biology.

The Biochemistry option is designed for the Track-Two BS degree in Chemistry.

- Baccalaureate Core Course

Option Code: 518

Business Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 988)

The Business option is designed for chemists interested in, for example, opening a small business, working in sales and marketing, or as preparation for entering the MBA program at OSU.1 Students earn a BS degree in Chemistry in four years and can also fulfill course work required as part of the minor in Business and Entrepreneurship.2 This option is also a good stepping stone for law school or graduate studies in chemistry. The option includes six courses in accounting, law, finance, organizational systems.

1 Students who complete these business courses and some additional courses may apply upon graduation to the OSU College of Business to be accepted into a 45-credit, three-term MBA program. All students serious about pursuing an OSU MBA should make an appointment with the College of Business MBA advisor, 541-737-3716, http://business.oregonstate.edu/mba/. Students should also take BA 211 FINANCIAL ACCOUNTING and BA 213 MANAGERIAL ACCOUNTING at the undergraduate level.

2 There are additional requirements for the minor in Business and Entrepreneurship. For example, the minor also requires an orientation course, GPA requirements, and academic residency requirements. You are advised to meet with an advisor in the College of Business.

The Business option is designed for the Track-Two BS degree in Chemistry.

</tbody>
</table>

Required Electives

Select one course from among the three following suggested sets: 4

Suggested for emphasis in small business

- BA 362 SOCIAL ENTREPRENEURSHIP AND SOCIAL INITIATIVES
- BA 363 TECHNOLOGY AND INNOVATION MANAGEMENT
- BA 460 VENTURE MANAGEMENT

Suggested for emphasis in sales and marketing

- MRKT 488 PERSONAL SELLING

Suggested for MBA preparation

- BA 357 OPERATIONS MANAGEMENT 1

Total Hours 31-32

1 BA 357 OPERATIONS MANAGEMENT requires a special override from an advisor in the COB because chemistry majors substitute ST 351 INTRODUCTION TO STATISTICAL METHODS or ST 314 INTRODUCTION TO STATISTICS FOR ENGINEERS for BA 276 INTRODUCTION TO STATISTICAL INFERENCE.

* Baccalaureate Core Course

Option Code: 523

Chemical Engineering Option

This option is offered within the following major(s):

...
The Chemical Engineering option offers selected chemical engineering concepts that may enhance career opportunities in areas such as electronics, polymers, and biotechnology, or prepare students for graduate studies in chemistry or related fields. Students can earn a BS degree in Chemistry in four years while targeting a career direction. This option includes nine courses in basic engineering and chemical engineering including mass and fluid transport, reaction engineering, and separations processes.

The Chemical Engineering option is designed for the Track-Two BS degree in Chemistry.

* Baccalaureate Core Course (BCC)

** Note:** Courses in the second endorsement area are to be from a list approved by the College of Education and must be different from those required in the chemistry core. The courses in this option are designed to interface with the Professional Teacher Master of Science Education program for prospective high school teachers through the College of Education at OSU.

### Environmental Chemistry Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 988)

The Environmental Chemistry option is structured to provide a quality foundation for working in government, industrial or university labs studying the behavior of chemicals in the environment. It also is suited to graduate education in chemistry or environmental chemistry. Students can earn a BS degree in Chemistry in four years while targeting their career. This option includes 11 courses in biology, microbiology,
Forensic Science Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 988)

The Forensic Science option is appropriate for students interested in working in a crime lab or pursuing a graduate degree in forensic science or chemistry. Students can earn a BS degree in Chemistry in four years and also take a combination of courses that enhance a chemistry major's background in biology, biochemistry, and related areas that can be important in forensic science.

The Forensic Science option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Forensic Science option as follows:

Materials Science Option

This option is offered within the following major(s):

• Chemistry - College of Science (p. 988)

The Materials Science option is customized to include applied courses in a variety of materials areas to enhance career opportunities in, for example, electronics, polymers and biotechnology. Students can earn a BS degree in Chemistry in four years while preparing for graduate school in chemistry or related areas.

The Materials Science option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Materials Science option:

Pre-Medicine Option

This option is offered within the following major(s):

• Chemistry - College of Science (p. 988)

The Pre-Medicine option is directed at students planning to apply to medical or dental school who also wish to target chemistry as a career pathway. A degree in chemistry provides a strong foundation for many professions and postgraduate degrees in chemistry or related areas. Students can earn a BS degree in Chemistry in four years while also taking Pre-Medicine option courses in biology, biochemistry, and related areas that are important components for application to medical school.

The Pre-Medicine option is designed for the Track-Two BS degree in Chemistry.

Mathematics

The department offers programs leading to the BS, MA, MS, and PhD degrees in Mathematics. Undergraduate minors are offered in Mathematics and Actuarial Science.

Students interested in teaching mathematics at the secondary level should contact a departmental advisor and discuss the Secondary Teaching Emphasis option available under the Mathematics major. Likewise, students interested in careers in the area of financial mathematics or as actuaries should meet with a member of the departmental Actuarial Sciences Committee.

Additional information pamphlets about both the undergraduate and graduate programs are available on the Department of Mathematics website.

Departmental Requirements

The Mathematics major requirements at the upper division comprise about 45 credits of course work. This leaves about 45 credits of free electives that can be used to design a degree program in mathematics that is tailored to each major's particular interests.

Faculty

Professors
Bogley, De Leenheer, Dick, Dray, Escher, Faridani, Finch, Flahive, Higdon, Kevchegov, Osiander, Peszynska, Pohjanpelto, Restrepo, Schmidt, Showalter, Thomann

Associate Professors
Bokil, Dascaliuc, Gibson, Guo, Petsche, Swisher

Assistant Professors
Beisiegel, Cozzi, Dalziel, Koslicki, Lockwood

Adjunct Professors
Batten (ME), Manogue (PH)

Adjunct Associate Professor
Medlock (VBS), Zhang (ECE)

Mathematics

MTH 065. ELEMENTARY ALGEBRA. (3 Credits)
Arithmetic of signed numbers, order of operations, simplifying algebraic expressions, solutions of linear equations, and inequalities. Rules of exponents, addition, subtraction, and multiplication of polynomials, factoring, solution of quadratic equations by factoring, reducing rational expressions. Word problems involving linear equations, graphing of linear equations, inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: Math Placement Test with a score of 05 or Math Placement - ALEKS with a score of 015

MTH 095. INTERMEDIATE ALGEBRA. (3 Credits)
Addition, subtraction, multiplication, and division of rational expressions, long division of polynomials, solutions of fractional equations, applications involving linear equations. Fractional equations, inequalities, literal equations, and variations. Negative and fractional exponents, radicals, solutions of quadratic equations, and complex numbers. Cartesian coordinates, graphs of linear equations and inequalities, distance formula, slope, equations of lines, solutions of systems of linear equations in two unknowns and inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 065 with C- or better or Math Placement Test with a score of 11 or Math Placement - ALEKS with a score of 030

MTH 102. ALGEBRAIC FOUNDATIONS. (3 Credits)
This course is designed primarily for EOP students. They will use various computing technologies to explore realistic and interesting situations in which algebra is used. As they work through explorations, they will work with many of the fundamental ideas of algebra, ideas they will find important in their daily lives.

MTH 103. ALGEBRAIC REASONING. (4 Credits)
Graphing data, functions, rate of change, linear equations, systems of linear equations, linear inequalities, linear functions, absolute value functions, quadratic functions, exponential functions. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 065 with C- or better or Math Placement Test with a score of 11 or Math Placement - ALEKS with a score of 030

MTH 105. *INTRODUCTION TO CONTEMPORARY MATHEMATICS. (3 Credits)
Elementary linear programming, combinatorics, descriptive statistics, elementary probability, exponential growth and decay, examples of major mathematical ideas and models. Lec/rec. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math

MTH 111. *COLLEGE ALGEBRA. (4 Credits)
Polynomial equations and inequalities, polynomial functions and graphs, inverse functions, exponential and logarithmic functions, elementary mathematical modeling and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with a C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 095 with C- or better or MTH 103 with C- or better or Math Placement Test with a score of 17 or Math Placement - ALEKS with a score of 046

MTH 112. *ELEMENTARY FUNCTIONS. (4 Credits)
Triangle trigonometry, circular functions and graphs, trigonometric equations and identities, inverse trigonometric functions, polar coordinates, vectors and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 150X

MTH 150X. PRECALCULUS. (4 Credits)
Trigonometry. Exponential, logarithmic and trigonometric functions. Lec/rec.
Prerequisites: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 112

MTH 199. SPECIAL TOPICS. (1-16 Credits)
Maximum 3 credits per term, 9 credits total. Does not meet university group requirement in physical science.
This course is repeatable for 9 credits.

MTH 211. *FOUNDATIONS OF ELEMENTARY MATHEMATICS. (4 Credits)
Introduction to problem solving, sets, whole numbers, number theory, fractions. Intended primarily for prospective elementary teachers. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 095 with C- or better or MTH 103 with C- or better or MTH 111 with C- or better or MTH 112 with C- or better or Math Placement Test with a score of 17 or Math Placement - ALEKS with a score of 046
MTH 212. FOUNDATIONS OF ELEMENTARY MATHEMATICS. (4 Credits)
Math 212 is the second of a three-term sequence of courses designed to help prepare prospective elementary and middle school teachers. Topics covered include fractions, decimals, percent, ratio and proportion, integers, rational numbers, real numbers, probability and statistics.
Prerequisites: MTH 211 with C- or better

MTH 227. *CALCULUS AND PROBABILITY FOR THE LIFE SCIENCES I. (4 Credits)
Review of exponential and trigonometric functions, including examples of exponential and periodic behavior; discrete probability; examples of biologically motivated difference equations; differentiation of polynomials, exponential and trigonometric functions with applications to optimization. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 111 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075

MTH 228. CALCULUS AND PROBABILITY FOR THE LIFE SCIENCES II. (4 Credits)
Continuation of MTH 227 with more general population growth models. Antidifferentiation, The Fundamental Theorem of Calculus applied to solving continuous growth models. Continuous random variables. Basic linear algebra of small systems sufficient to calculate eigenvalues and eigenvectors and appreciate their use in life science applications. Lec/rec.
Prerequisites: MTH 227 with C- or better or MTH 227X with C- or better

MTH 231. ELEMENTS OF DISCRETE MATHEMATICS. (4 Credits)
Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 212 with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075

MTH 241. *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE. (4 Credits)
Elementary differential calculus of polynomial, logarithmic, and exponential functions and their applications to business, management and social sciences. Lec/rec. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060

MTH 245. *MATHEMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES. (4 Credits)
Techniques of counting, probability and elements of statistics including binomial and normal distributions. Introductory matrix algebra. Elements of linear programming. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060

MTH 251. *DIFFERENTIAL CALCULUS. (4 Credits)
Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisites: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075
Equivalent to: MTH 251H

MTH 251H. *DIFFERENTIAL CALCULUS. (4 Credits)
Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math; HNRS – Honors Course Designator
Prerequisites: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075
Equivalent to: MTH 251

MTH 252. INTEGRAL CALCULUS. (4 Credits)
Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252H

MTH 252H. INTEGRAL CALCULUS. (4 Credits)
Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252

MTH 253. INFINITE SERIES AND SEQUENCES. (4 Credits)
Indeterminate forms. Improper integrals. Sequences and series, especially Taylor’s formula and power series. Applications to numerical estimation with error analysis. Series with complex terms and the Euler identities. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better

MTH 254. VECTOR CALCULUS I. (4 Credits)
Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254H
MTH 254H. VECTOR CALCULUS I. (4 Credits)
Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254

MTH 255. VECTOR CALCULUS II. (4 Credits)
Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255H

MTH 255H. VECTOR CALCULUS II. (4 Credits)
Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255H

MTH 256. APPLIED DIFFERENTIAL EQUATIONS. (4 Credits)
First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler’s identities is highly desirable.) Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256

MTH 256H. APPLIED DIFFERENTIAL EQUATIONS. (4 Credits)
First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler’s identities is highly desirable.) All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256H

MTH 252 with C- or better or MTH 252H with C- or better

MTH 252 with C- or better or MTH 252H with C- or better

MTH 252 with C- or better or MTH 252H with C- or better

MTH 251 with D- or better or MTH 251H with D- or better

MTH 259. SPECIAL TOPICS. (0-16 Credits)
Maximum 3 credits per term, 9 credits total. This course is repeatable for 9 credits.

MTH 306. MATRIX AND POWER SERIES METHODS. (4 Credits)
Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306H

MTH 306H. MATRIX AND POWER SERIES METHODS. (4 Credits)
Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306

MTH 311. ADVANCED CALCULUS. (4 Credits)
Rigorous development of calculus, axiomatic properties of R, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: (MTH 255 with C- or better or MTH 255H with C- or better) and MTH 355 [C-]

MTH 312. ADVANCED CALCULUS. (4 Credits)
Rigorous development of calculus, axiomatic properties of R, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 311 with C- or better and MTH 342 (may be taken concurrently) [C-]
MTH 321. INTRODUCTORY APPLICATIONS OF MATHEMATICAL SOFTWARE. (3 Credits)
An introduction to select mathematical software packages to support problem solving and applications. Topics include using computational resources to solve basic numerical and symbolic problems in mathematics, visualization and presentation of data, creation of simple programming scripts, and applications of basic programming techniques to promote mathematical understanding. The scientific typesetting language LaTeX will also be covered. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: (MTH 252 with C- or better or MTH 252H with C- or better) and (MTH 341 [C-] or MTH 306 [C-] or MTH 306H [C-])

MTH 323. *MATHEMATICAL MODELING. (3 Credits)
A variety of mathematical modeling techniques will be introduced. Students will formulate models in response to practical problems drawn from the literature of ecology, environmental sciences, engineering or other fields. Informal writing assignments in class and formal written presentation of the models will be required. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: MTH 251 with C- or better or MTH 251H with C- or better and MTH 341 [C-]

MTH 333. *FUNDAMENTAL CONCEPTS OF TOPOLOGY. (3 Credits)
Open and closed sets, continuity, compactness, connectedness, winding number, fixed point theorems in the plane. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: MTH 341 with C- or better or MTH 355 with C- or better

MTH 338. *NON-EUCLIDEAN GEOMETRY. (3 Credits)
Introduction to non-Euclidean geometries. Selected topics such as hyperbolic and elliptic geometry, spherical geometry, projective geometry, geometries arising from alternative metrics. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: MTH 341 with C- or better or MTH 355 with C- or better

MTH 341. LINEAR ALGEBRA I. (3 Credits)
Matrix algebra, determinants, systems of linear equations, subspaces, an introductory study of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better

MTH 342. LINEAR ALGEBRA II. (4 Credits)
Abstract (real or complex) vector spaces, linear transformations, inner product spaces, orthogonality, eigenspaces and diagonalization, spectral theorems, singular value decomposition. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 341 with C- or better

MTH 343. INTRODUCTION TO MODERN ALGEBRA. (3 Credits)
Introduction to rings and fields with an emphasis on the integers and polynomial rings; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 341 with C- or better and MTH 355 [C-]

MTH 345. INTRODUCTION TO NUMERICAL ANALYSIS. (3 Credits)
Introduction to the computation of approximate solutions to mathematical problems that cannot be solved by hand: analysis of errors; rootfinding for nonlinear equations in one variable; interpolation of functions; numerical integration. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 253 with C- or better or MTH 306 with C- or better or MTH 306H with C- or better

MTH 355. DISCRETE MATHEMATICS. (3 Credits)
Probability problem solving using concepts developed in calculus. Topics include probability models, discrete and continuous random variables, expectation and variance, the law of large numbers, and the central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 253 with C- or better or MTH 306 with C- or better or MTH 306H with C- or better

MTH 390. FOUNDATIONS OF ELEMENTARY MATHEMATICS. (4 Credits)
Math 390 is the third of a three-term sequence of classes designed to help prepare prospective elementary and middle school teachers. Topics covered include informal geometry, measurement, congruence, similarity, coordinate and transformational geometry.
Prerequisites: MTH 211 with C- or better and MTH 212 [C-]

MTH 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: MTH 399H
This course is repeatable for 16 credits.

MTH 399H. SPECIAL TOPICS. (1-16 Credits)
All courses must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Equivalent to: MTH 399
This course is repeatable for 16 credits.

MTH 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 407. SEMINAR. (3 Credits)
This course is repeatable for 99 credits.

MTH 410. OCCUPATIONAL INTERNSHIP. (3-12 Credits)
Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N.
This course is repeatable for 16 credits.
MTH 411. REAL ANALYSIS. (3 Credits)
Properties of metric spaces and normed spaces, including $l_p$ spaces. Completeness and applications, including fixed point theorems. Compactness. Equicontinuity and the Arzela-Ascoli theorem. Uniform continuity and uniform convergence, including fixed point theorems. 
Prerequisites: MTH 312 with B+ or better and MTH 341 [B+]
This course is repeatable for 18 credits.

MTH 412. REAL ANALYSIS. (3 Credits)
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini's theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces. 
Prerequisites: MTH 411 with C- or better or MTH 511 with C- or better
This course is repeatable for 18 credits.

MTH 413. REAL ANALYSIS. (3 Credits)
Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: MTH 412 with C- or better or MTH 512 with C- or better

MTH 419. MULTIVARIABLE ADVANCED CALCULUS. (3 Credits)
A rigorous development of multivariable advanced calculus, including continuity and compactness in multivariable Euclidean spaces, differentiation and approximation of multivariable functions, the inverse function theorem and the implicit function theorem, integration in several variables. 
Prerequisites: MTH 312 with B or better

MTH 420. MODELS AND METHODS OF APPLIED MATHEMATICS. (3 Credits)
Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 427. INTRODUCTION TO MATHEMATICAL BIOLOGY. (3 Credits)
Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization techniques, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C- or better. 
Prerequisites: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 428. STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY. (3 Credits)
An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation. 
Prerequisites: MTH 341 with C or better and (MTH 361 [C] or MTH 463 [C] or MTH 563 [C])

MTH 430. METRIC SPACES AND TOPOLOGY. (3 Credits)
Fundamental notions of metric space topology. Examples of Euclidean, non-Euclidean and other fundamental metric spaces including the Hilbert Cube and two-dimensional surfaces. Characterization and classification results for metric spaces. Selected applications of topology, possibly including the structure of molecules and/or networks. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: MTH 342 with C- or better or MTH 355 with C- or better

MTH 434. INTRODUCTION TO DIFFERENTIAL GEOMETRY. (3 Credits)
Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 255 with C- or better or MTH 255H with C- or better) and MTH 342 [C-]

MTH 435. DIFFERENTIAL GEOMETRY. (3 Credits)
Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 434 with C- or better or MTH 534 with C- or better)

MTH 437. GENERAL RELATIVITY. (3 Credits)
Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 434 with C- or better or MTH 534 with C- or better)

MTH 440. COMPUTATIONAL NUMBER THEORY. (3 Credits)
Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptography. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 434 with C- or better or MTH 534 with C- or better)

MTH 441. APPLIED AND COMPUTATIONAL ALGEBRA. (3 Credits)
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 343 with C- or better and (MTH 342 [C-] or MTH 440 [C-] or MTH 540 [C-]))

MTH 442. APPLIED AND COMPUTATIONAL ALGEBRA. (3 Credits)
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C- or better. 
Prerequisites: (MTH 441 with C- or better or MTH 541 with C- or better)
MTH 443. ABSTRACT LINEAR ALGEBRA. (3 Credits)
Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 342 with C- or better or MTH 343 with C- or better

MTH 451. NUMERICAL LINEAR ALGEBRA. (3 Credits)
Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 341 with C- or better

MTH 452. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS. (3 Credits)
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 306 [C-] or MTH 306H [C-] or MTH 341 [C-])

MTH 453. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS. (3 Credits)
Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 452 with C- or better or MTH 552 with C- or better

MTH 463. PROBABILITY I. (3 Credits)
An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 312 with C- or better

MTH 464. PROBABILITY II. (3 Credits)
Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: (MTH 463 with C- or better or MTH 563 with C- or better) and MTH 341 [C-]

MTH 465. PROBABILITY III. (3 Credits)
Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 464 with C- or better or MTH 564 with C- or better

MTH 467. ACTUARIAL MATHEMATICS. (3 Credits)
Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 463 with C- or better or MTH 563 with C- or better or ST 421 with C- or better

MTH 468. SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS. (3 Credits)
Systems of two first-order differential equations, phase portraits, linearization and the stability of equilibria, conservative systems, reversible systems, limit cycles and the Poincare-Bendixson Theorem. Additional topics selected from Hamiltonian systems, Hopf bifurcation or Lorenz equations and chaos. MTH 480 and MTH 481 cannot both be taken for credit. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 481. APPLIED ORDINARY DIFFERENTIAL EQUATIONS. (3 Credits)
Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisites: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 253 with C- or better or MTH 253H with C- or better) and MTH 341 [C-] or (MTH 306 [C-] or MTH 306H [C-])

MTH 482. APPLIED PARTIAL DIFFERENTIAL EQUATIONS. (3 Credits)
Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisites: MTH 480 with C- or better or MTH 481 with C- or better or MTH 581 with C- or better

MTH 483. COMPLEX VARIABLES. (3 Credits)
Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisites: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 253 with C- or better or MTH 253H with C- or better) and MTH 341 [C-] or (MTH 306 [C-] or MTH 306H [C-])

MTH 490. INTENSIVE SUMMER RESEARCH IN MATHEMATICS. (12 Credits)
Combination of seminar, lectures, and individual research projects designed to introduce students to research mathematics. This course is repeatable for 99 credits.

MTH 491. ALGEBRA AND GEOMETRIC TRANSFORMATIONS. (3 Credits)
Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 341 with C- or better

MTH 492. ALGEBRA AND GEOMETRIC TRANSFORMATIONS. (3 Credits)
Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tesselations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 491 with C- or better or MTH 591 with C- or better
MTH 493. ALGEBRA AND GEOMETRIC TRANSFORMATIONS. (3 Credits)
Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisites: MTH 492 with C- or better or MTH 592 with C- or better

MTH 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

MTH 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

MTH 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 506. PROJECTS. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.

MTH 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 510. OCCUPATIONAL INTERNSHIP. (3-12 Credits)
Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N. This course is repeatable for 16 credits.

MTH 511. REAL ANALYSIS. (3 Credits)
Properties of metric spaces and normed spaces, including lp spaces. Completeness and applications, including fixed point theorems. Compactness. Equicontinuity and the Arzela-Ascoli theorem. Uniform continuity and uniform convergence, including applications. This course is repeatable for 18 credits.

MTH 512. REAL ANALYSIS. (3 Credits)
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini's theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces. Prerequisites: MTH 511 with C- or better This course is repeatable for 18 credits.

MTH 513. REAL ANALYSIS. (3 Credits)
Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 520. MODELS AND METHODS OF APPLIED MATHEMATICS. (3 Credits)
Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 524. DYNAMICAL SYSTEMS THEORY AND APPLICATIONS. (3 Credits)
Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.

MTH 525. DYNAMICAL SYSTEMS THEORY AND APPLICATIONS. (3 Credits)
Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.

MTH 527. INTRODUCTION TO MATHEMATICAL BIOLOGY. (3 Credits)
Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better.

MTH 528. STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY. (3 Credits)
An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include random drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better.

MTH 531. GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS. (3 Credits)
Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better.
MTH 532. GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS. (3 Credits)
Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 534. INTRODUCTION TO DIFFERENTIAL GEOMETRY. (3 Credits)
Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 535. DIFFERENTIAL GEOMETRY. (3 Credits)
Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 537. GENERAL RELATIVITY. (3 Credits)
Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C or better.

Prerequisites: MTH 434 with C or better or MTH 534 with C or better

MTH 540. COMPUTATIONAL NUMBER THEORY. (3 Credits)
Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptography. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 541. APPLIED AND COMPUTATIONAL ALGEBRA. (3 Credits)
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 542. APPLIED AND COMPUTATIONAL ALGEBRA. (3 Credits)
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 543. ABSTRACT LINEAR ALGEBRA. (3 Credits)
Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 551. NUMERICAL LINEAR ALGEBRA. (3 Credits)
Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 552. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS. (3 Credits)
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 553. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS. (3 Credits)
Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 563. PROBABILITY I. (3 Credits)
An introduction to probability theory; topics covered include the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 564. PROBABILITY II. (3 Credits)
Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 565. PROBABILITY III. (3 Credits)
Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 567. ACTUARIAL MATHEMATICS. (3 Credits)
Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 574. NUMBER SYSTEMS AND OPERATIONS IN K-8 MATHEMATICS. (3 Credits)
Key ideas and topics in number systems, operations, place value, and algorithms critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 575. COMPARING GEOMETRIES IN K-8 MATHEMATICS. (3 Credits)
Key ideas and topics in Euclidean and non-Euclidean geometries critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 576. ALGEBRA AND FUNCTION IN K-8 MATHEMATICS. (3 Credits)
Key ideas and topics in algebra and function concepts critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 578. PROBABILITY AND DATA ANALYSIS IN K-8 MATHEMATICS. (3 Credits)
Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
MTH 581. APPLIED ORDINARY DIFFERENTIAL EQUATIONS. (3 Credits)
Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 582. APPLIED PARTIAL DIFFERENTIAL EQUATIONS. (3 Credits)
Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 583. COMPLEX VARIABLES. (3 Credits)
Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 590. TOPICS IN SECONDARY MATHEMATICS. (3 Credits)
Key ideas and topics in discrete mathematics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 591. ALGEBRA AND GEOMETRIC TRANSFORMATIONS. (3 Credits)
Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 592. ALGEBRA AND GEOMETRIC TRANSFORMATIONS. (3 Credits)
Major results of Euclidean geometry, axioms for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tessellations, isometries and similarities of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 593. ALGEBRA AND GEOMETRIC TRANSFORMATIONS. (3 Credits)
Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 594. NUMBER SYSTEMS AND OPERATIONS IN SECONDARY MATHEMATICS. (3 Credits)
Key ideas and topics in number systems, operations, place value, and algorithms critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 595. COMPARING GEOMETRIES IN SECONDARY MATHEMATICS. (3 Credits)
Key ideas and topics in Euclidean and non-Euclidean geometries critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 596. ALGEBRA AND FUNCTION IN SECONDARY MATHEMATICS. (3 Credits)
Key ideas and topics in algebra and function concepts critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 598. PROBABILITY AND DATA ANALYSIS IN SECONDARY MATHEMATICS. (3 Credits)
Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 599. SPECIAL TOPICS. (0-16 Credits)
Topics may vary.
This course is repeatable for 18 credits.

MTH 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 603. THESIS. (1-16 Credits)
This course is repeatable for 99 credits.

MTH 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MTH 606. SPECIAL PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

MTH 607. SEMINAR. (1-16 Credits)
This course is repeatable for 99 credits.

MTH 611. COMPLEX ANALYSIS. (3 Credits)
Basic theory of analytic functions of a complex variable, including Cauchy’s theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 612. COMPLEX ANALYSIS. (3 Credits)
Basic theory of analytic functions of a complex variable, including Cauchy’s theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 614. FUNCTIONAL ANALYSIS. (3 Credits)
Topological vector spaces, generalized functions, operator theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 619. TOPICS IN ANALYSIS. (1-12 Credits)
This course is repeatable for 12 credits.
MTH 621. PARTIAL DIFFERENTIAL EQUATIONS. (3 Credits)
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 645. ABSTRACT ALGEBRA II. (3 Credits)
Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 649. TOPICS IN ALGEBRA AND NUMBER THEORY. (3 Credits)
This course is repeatable for 27 credits.

MTH 654. NUMERICAL ANALYSIS. (3 Credits)
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 655. NUMERICAL ANALYSIS. (3 Credits)
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 656. NUMERICAL ANALYSIS. (3 Credits)
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 657. TOPICS IN APPLIED MATHEMATICS. (1-12 Credits)
Previous topics have included turbulence, financial mathematics and probability methods in partial differential equations. This course is repeatable for 12 credits.

MTH 658. TOPICS IN MATHEMATICAL MODELING. (1-12 Credits)
Mathematical treatment of topics of current interest in the physical and biological sciences and technology. May be repeated for credit when topic varies. This course is repeatable for 12 credits.

MTH 659. TOPICS IN NUMERICAL ANALYSIS. (1-12 Credits)
This course is repeatable for 12 credits.

MTH 664. PROBABILITY THEORY. (3 Credits)
General theory of probability measures and random variables, including weak convergence, characteristic functions, central limit theory, conditional expectations, martingales. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 665. PROBABILITY THEORY. (3 Credits)
General theory of probability measures and random variables, including weak convergence, characteristic functions, the central limit theorem, and the Brownian motion process. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 669. TOPICS IN STOCHASTIC PROCESSES. (1-12 Credits)
Previous topics have included Markov processes, martingales, branching processes, and stochastic differential equations. This course is repeatable for 12 credits.

MTH 674. DIFFERENTIAL GEOMETRY OF MANIFOLDS. (3 Credits)
Differentiable manifolds, tangent bundles, vector fields and flows, submanifolds, Riemannian metrics, differential forms, integration on manifolds. Selected topics such as foliations, Lie groups, and de Rham cohomology. All courses used to satisfy MTH prerequisites must be completed with C or better.
MTH 675. DIFFERENTIAL GEOMETRY OF MANIFOLDS. (3 Credits)
Differentiable manifolds, connections in linear bundles, Riemannian manifolds and submanifolds. Selected topics such as variational theory of geodesics, harmonic forms, and characteristic classes. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 676. TOPICS IN TOPOLOGY. (3 Credits)
This course is repeatable for 27 credits.

MTH 679. TOPICS IN GEOMETRY. (1-12 Credits)
This course is repeatable for 12 credits.

MTH 680. MODERN APPROACHES TO CALCULUS. (3 Credits)
Alternative approaches to calculus instruction based on the availability of computers and calculators. Applications of symbolic-graphical calculators, spreadsheets, symbolic algebra systems, and graphics packages to the teaching of calculus. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 682. TEACHING AND LEARNING PROBABILITY AND STATISTICS. (3 Credits)
Experimental, activity-based approaches to introductory probability and statistics are explored. Topics include computer simulations, exploratory data analysis, misuses of statistics, and misconceptions of probability. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 684. COMPUTERS AND MATHEMATICS. (3 Credits)
A variety of mathematical problems are investigated with a laboratory approach using microcomputers and a wide variety of software. Problems may be taken from number theory, calculus, geometry, probability, and elementary numerical analysis. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 685. ADVANCED PROBLEM SOLVING. (3 Credits)
Mathematical problem solving using the heuristic approach of George Polya. Problems may be taken from a variety of areas, including number theory, calculus, geometry, probability, abstract and linear algebra. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 689. TOPICS IN MATHEMATICS EDUCATION. (1-12 Credits)
Topics may vary.
This course is repeatable for 12 credits.

MTH 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

### Actuarial Science Minor

A minimum GPA of 2.0 is required in this minor. No course used to fulfill requirements for this minor may be taken S/U.

**Restriction:** The Actuarial Science minor must include 28 credits, at least 12 of which must be upper-division credits.

- Except for MTH 306 MATRIX AND POWER SERIES METHODS and MTH 341 LINEAR ALGEBRA I, upper-division courses used to satisfy a student's major requirements may not also be used to satisfy requirements for the Actuarial Science minor.
- Except for MTH 306 MATRIX AND POWER SERIES METHODS and MTH 341 LINEAR ALGEBRA I, upper-division courses used to satisfy a student's additional minor program may not also be used to satisfy requirements for the Actuarial Science minor.

**Minor Code:** 563

**Mathematics Graduate Major (MA, MS, PhD, MAIS)**

**Graduate Areas of Concentration**

Actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematical biology, mathematics education, number theory, numerical analysis, topology, probability

The Department of Mathematics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Graduate areas of concentration are actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematical biology, mathematics education, number theory, numerical analysis, topology, probability.

For the MS and MA, a thesis, an expository paper, or successful completion of the PhD qualifying examination is required.

**Major Code:** 5600

**Minor Code:** 5600

**Mathematics Minor**

A minimum GPA of 2.0 is required in this minor. No course used to fulfill requirements for this minor may be taken S/U.
**Mathematics Undergraduate Major (BS, HBS)**

The BS degree in Mathematics requires a common core of courses at the lower-division level and junior-level followed by senior-level depth and breadth requirements. The upper-division requirements in the major total 45–50 credits. Thus, a mathematics major has ample opportunity to take further mathematics courses focused toward specific interests and career goals. Programs supporting interdisciplinary interests are strongly encouraged.

The following requirements are specific to the BS degree in Mathematics. Students must also satisfy OSU degree and baccalaureate core requirements.

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

Applied and Computational Mathematics Option

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1009)

The Applied and Computational option offers Mathematics majors an opportunity to concentrate much of their upper-division course work in the area of applied and computational mathematics. This degree option is designed to allow students to focus on applied mathematics, modeling, and computation after completing core junior and lower-division mathematics requirements.

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

The lower-division requirements for the Applied and Computational Mathematics option are the same as those for the Mathematics BS degree. The upper-division requirements are as follows.

### Part D: Electives
Select two additional upper division electives of a mathematical nature \(^2\) 6

Total credits required for graduation 180

1 Mathematics courses at the 400 level are offered in the 6 areas listed. Five 400-level classes satisfying (a) and (b) are required.
   (a) **Depth requirement:** A pair of classes from one of the 6 areas is required. Some exceptions are noted.
   (b) **Breadth requirement:** One course each from 3 of the 5 remaining areas.

2 This includes non-blanket numbered (not X99- or X0X-numbered) upper-division MTH courses, upper-division ST courses, or other courses of a mathematical nature approved by the departmental head advisor. MTH 390 FOUNDATIONS OF ELEMENTARY MATHEMATICS is not allowed.

3 MTH 480 and MTH 481 cannot both be used to satisfy program requirements

\* Baccalaureate Core Course (BCC)
\^ Writing Intensive Course (WIC)

### Major Code: 560

### Applied and Computational Mathematics Option

**Mathematical Biology Option**

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1009)

In addition to the usual required lower-division mathematics courses and the junior core courses, mathematics majors in the Mathematical Biology option have an opportunity to concentrate much of their further course work on applied mathematics, mathematical biology, modeling and computation.

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

### Option Code: 692

### Mathematical Biology Option

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1009)

### Part D: Electives
Select two additional upper-division elective courses of a mathematical nature \(^2\) 6

Total Hours 51-52

1 Either MTH 453 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS or MTH 482 APPLIED PARTIAL DIFFERENTIAL EQUATIONS must be included. (Note: Only one of MTH 480 SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS and MTH 481 APPLIED ORDINARY DIFFERENTIAL EQUATIONS can be used to satisfy requirements for a degree in Mathematics.)

2 This includes non-blanket numbered (not X99- or X0X-numbered) upper-division MTH courses, upper-division ST courses, or other courses of a mathematical nature approved by the departmental head advisor. MTH 390 FOUNDATIONS OF ELEMENTARY MATHEMATICS is not allowed.

\^ Writing Intensive Course (WIC)
BI 212  *PRINCIPLES OF BIOLOGY  4

- MTH 311  ADVANCED CALCULUS  4
- MTH 312  ADVANCED CALCULUS  4
- MTH 341  LINEAR ALGEBRA I  3
- MTH 342  LINEAR ALGEBRA II  4
- MTH 343  INTRODUCTION TO MODERN ALGEBRA  3
- MTH 355  DISCRETE MATHEMATICS  3
- Select one of the following writing intensive courses (WIC):  3
  - MTH 323  *MATHEMATICAL MODELING
  - MTH 333  *FUNDAMENTAL CONCEPTS OF TOPOLOGY
  - MTH 338  *NON-EUCLIDEAN GEOMETRY

**Part B: Required Area Course Work in Mathematics and Statistics**

- MTH 427  INTRODUCTION TO MATHEMATICAL BIOLOGY  3
- MTH 428  STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY  3
- MTH 463  PROBABILITY I  3
- MTH 480  SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS  3
- Select one of the following:  4
  - ST 351  INTRODUCTION TO STATISTICAL METHODS
  - ST 411  METHODS OF DATA ANALYSIS

**Part C: Directed Electives**

- Select one of the following:  3
  - MTH 483  COMPLEX VARIABLES
  - MTH 430  METRIC SPACES AND TOPOLOGY
- Select one of the following:  3
  - MTH 420  MODELS AND METHODS OF APPLIED MATHEMATICS
  - MTH 440  COMPUTATIONAL NUMBER THEORY
  - MTH 441  APPLIED AND COMPUTATIONAL ALGEBRA
  - MTH 464  PROBABILITY II
  - MTH 482  APPLIED PARTIAL DIFFERENTIAL EQUATIONS
- Select one of the following:  3
  - MTH 351  INTRODUCTION TO NUMERICAL ANALYSIS
  - MTH 451  NUMERICAL LINEAR ALGEBRA
  - MTH 452  NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS
- Select one of the following or another upper division life science course approved by a mathematics advisor:  3-4
  - BI 311  GENETICS
  - BI 351  MARINE ECOLOGY
  - BI 370  ECOLOGY
  - BI 445  EVOLUTION
  - BOT 341  PLANT ECOLOGY
  - BOT 442  PLANT POPULATION ECOLOGY
  - BOT 476  INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES
  - CS 446  NETWORKS IN COMPUTATIONAL BIOLOGY
  - FW 320  INTRODUCTORY POPULATION DYNAMICS

**Total Hours**  93-94

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Option Code: 737**

**Secondary Teaching Emphasis Option**

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1009)

Students preparing for careers teaching mathematics at the secondary level may major in mathematics with the following transcript-visible option. This option helps prepare students to pursue a teaching licensure program in their fifth year. Option requirements and a suggested timeline follow.

A grade of at least C− and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

A grade of at least C– and a GPA of 2.25 are required in all upper-division mathematics courses used to fulfill degree requirements.

- Students wanting a stronger background in statistics may substitute ST 421 INTRODUCTION TO MATHEMATICAL STATISTICS for ST 351 INTRODUCTION TO STATISTICAL METHODS.
- Students wanting a stronger background in probability may substitute MTH 463 PROBABILITY I, Probability I, (usually taken in the senior year) for MTH 361 INTRODUCTION TO PROBABILITY.

Option Code: 234

Statistics Option

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1009)

The Statistics option offers Mathematics majors an opportunity to concentrate their senior level course work in the area of statistics and probability after completing core junior and lower-division mathematics requirements. This degree option is designed to allow a focus on the study of the mathematical theory underlying statistics while simultaneously developing expertise in statistical applications.

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

The lower-division requirements for the Statistics option are the same as those for the Mathematics BS degree. The upper-division requirements are as follows.

Undergraduate Degree Programs

The department offers several programs leading to degrees in physics. A basic physics curriculum in the College of Science stresses the detailed and advanced preparation needed for graduate work or employment in physics.

Physics

Physics is the study of the fundamental structure of matter and the interactions of its constituents. Physicists are concerned with the development of concepts needed for a precise description of nature and with experiments to test such concepts.

For students of science and engineering, the study of physics provides the basic foundation needed to understand the complex workings of the material world, from the forces that build atoms to those that build bridges. For students of the liberal arts, the study of physics provides an introduction to modern ideas about the most fundamental and elemental aspects of nature and how those ideas developed in their cultural and historical context. Physics is a basic and indispensable tool in all technical fields, and its development figures prominently in any discussion of the intellectual history of our civilization.

Graduate Degrees

Graduate programs leading to the MA, MS, and PhD are offered, emphasizing theoretical or experimental studies in the areas of atomic physics, computational physics, nuclear physics, particle physics, and solid state physics. The MS degree has both thesis and nonthesis options. Comprehensive written and oral examinations must be passed before the student can become a candidate for an advanced degree.

Careers

A multitude of opportunities exists for students who complete undergraduate degrees in physics. They include employment in technological industries, including electronics, computers, optics, materials science, and aerospace; graduate study leading to an advanced degree in physics or a related area such as mathematics, Earth sciences, computer science, engineering, or astronomy; and degree programs leading to professions such as law or medicine, with specialties in areas in which a physics background is essential.

Preparation

Recommended high school preparation for students who plan to major in physics includes one year each of chemistry and physics and four years of mathematics through analytic geometry. Mathematics preparation is especially important; students who are not ready to start calculus (MTH 251 *DIFFERENTIAL CALCULUS) upon entering may be delayed in their progress toward a degree. Students anticipating transfer to OSU from another institution are encouraged to contact the Department of Physics as early as possible to discuss their placement in the course curricula.

Advising

Each undergraduate student is assigned an advisor who helps select the most appropriate degree program and assists in planning the curriculum. Minor variations in the requirements for degrees are possible, but must be discussed with the advisor and approved at an early stage in curriculum planning. Near the end of the degree program, the advisor can help the student to apply for employment or admission to graduate programs.

Options

Students desiring to combine the study of physics with that of another related subject should consider the options below, or should consult with a Department of Physics advisor about substituting upper-division work in a related field for certain of the upper-division physics requirements. All such substitutions must constitute a coherent program in related areas and must be approved in advance by the Department of Physics.

ST 441 PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS
ST 443 APPLIED STOCHASTIC MODELS

Total Hours 55-56

1 MTH 321 INTRODUCTORY APPLICATIONS OF MATHEMATICAL SOFTWARE can be substituted for one of the two area classes.

^ Writing Intensive Course (WIC)
case, the program must include at least 3 credits of PH 403 *THESIS to satisfy the university’s writing intensive course (WIC) requirements.

Astronomy

The Department of Physics offers an introductory course, PH 104 *DESCRIPTIVE ASTRONOMY. Three online courses (PH 205 *SOLAR SYSTEM ASTRONOMY, PH 206 *STARS AND STELLAR EVOLUTION, PH 207 *GALAXIES, QUASARS, AND COSMOLOGY) and several on-campus special topics courses also are offered. Students who desire careers in astronomy can design a curriculum under the Geophysics option, which includes related course work in geology and in atmospheric sciences. This curriculum would qualify the student for graduate work in astronomy.

Graduation Requirements

All undergraduate students must satisfy the university requirements for graduation (see the description of the OSU Baccalaureate Core in this catalog) and the college requirements (see the description in the College of Science section).

Grades of C– or better must be attained in all courses required for the Physics major. Courses in which a lower grade is received must be repeated until a satisfactory grade is received.

Adjunct Faculty

Herman, Keszler, Kornilovich

Physics

PH 104. *DESCRIPTIVE ASTRONOMY. (4 Credits)

Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science

Equivalent to: PH 104H

PH 104H. *DESCRIPTIVE ASTRONOMY. (4 Credits)

Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course

PH 106. *PERSPECTIVES IN PHYSICS. (4 Credits)

A descriptive and non-mathematical study of the development of physical concepts and their historical and philosophical context. The emphasis is on the origin, meaning, significance, and limitations of these concepts and their role in the evolution of current understanding of the universe. Concepts to be covered include Copernican astronomy. Newtonian mechanics, energy, electricity and magnetism, relativity, and quantum theory. Intended primarily for non-science students. Lec/lab. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science

PH 111. *INQUIRING INTO PHYSICAL PHENOMENA. (4 Credits)

Development of conceptual understandings through investigation of everyday phenomena. Emphasis is on questioning, predicting, exploring, observing, discussing, and writing in physical science contexts. Students document their initial thinking, record their evolving understandings, and write reflections upon how their thinking changed and what fostered their learning. Lec/lab. (Baccalaureate Core Course)

Attributes: CPPS – Core, Pers, Physical Science

PH 199. SPECIAL STUDIES. (1-16 Credits)

One-credit sections are graded pass/no pass. This course is repeatable for 99 credits.

PH 201. *GENERAL PHYSICS. (5 Credits)

Introductory survey course covering a broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science
PH 202. *GENERAL PHYSICS. (5 Credits)
Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 203. *GENERAL PHYSICS. (5 Credits)
Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 205. *SOLAR SYSTEM ASTRONOMY. (4 Credits)
History, laws, and tools of astronomy. Composition, motion, and origin of the sun, planets, moons, asteroids, and comets. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 206. *STARS AND STELLAR EVOLUTION. (4 Credits)
Properties of stars; star formation, evolution, and death; supernovae, pulsars, and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 207. *GALAXIES, QUASARS, AND COSMOLOGY. (4 Credits)
Nature and content of galaxies, properties of quasars, and the cosmic background radiation. Emphasis on the Big-Bang model and its features. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 211. *GENERAL PHYSICS WITH CALCULUS. (4 Credits)
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisites: PH 211 with D- or better

PH 213. *GENERAL PHYSICS WITH CALCULUS. (4 Credits)
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 221. RECITATION FOR PHYSICS 211. (1 Credit)
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec. Graded P/N.
Corequisites: PH 211
Equivalent to: PH 221H

PH 222H. RECITATION FOR PHYSICS 211. (1 Credit)
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec. Graded P/N.
Attributes: CPPS – Core, Pers, Physical Science

PH 223. RECITATION FOR PHYSICS 212. (1 Credit)
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Graded P/N.
Corequisites: PH 212
Equivalent to: PH 222H

PH 223H. RECITATION FOR PHYSICS 212. (1 Credit)
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec. Graded P/N.
Attributes: CPPS – Core, Pers, Physical Science

PH 250. SCIENTIFIC COMPUTING. (3 Credits)
Basic computational tools and techniques for courses in science and engineering. Project approach to problem solving using symbolic and compiled languages with visualization. Basic computer literacy assumed.

PH 259. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PH 313. *ENERGY ALTERNATIVES. (3 Credits)
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: PH 313H
PH 313H. *ENERGY ALTERNATIVES. (3 Credits)
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: PH 313

PH 315. PHYSICS OF CONTEMPORARY CHALLENGES. (3 Credits)
An introduction to thermal and quantum physics in the context of contemporary challenges faced by our society, such as power generation, energy efficiency, and global warming.

PH 331. *SOUND, HEARING, AND MUSIC. (3 Credits)
Basic course in the physics, technology, and societal implications of sound. Intended for students in nontechnical majors. Topics include wave motion, hearing and the perception of sound, noise pollution, music and musical instruments, architectural acoustics, and sound recording and reproduction. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

PH 332. *LIGHT, VISION, AND COLOR. (3 Credits)
Basic physics of light, optical instruments (lenses, telescopes, microscopes), the eye and visual perception, colors, photography, environmental lighting, lasers and holography. For nontechnical majors. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

PH 335. TECHNIQUES OF THEORETICAL MECHANICS. (3 Credits)
Newtonian, Lagrangian, and Hamiltonian classical mechanics. Special relativity with relativistic mechanics.

PH 365. COMPUTATIONAL PHYSICS LAB. (1 Credit)
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisites: PH 213 with C- or better

PH 366. COMPUTATIONAL PHYSICS LAB. (1 Credit)
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisites: PH 213 with C- or better

PH 367. COMPUTATIONAL PHYSICS LAB. (1 Credit)
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisites: PH 213 with C- or better

PH 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PH 399H
This course is repeatable for 16 credits.

PH 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PH 399
This course is repeatable for 16 credits.

PH 401. RESEARCH. (1-16 Credits)
A research project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for 16 credits.

PH 403. *THESIS. (1-16 Credits)
A research project leading to a thesis under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

PH 405. READING AND CONFERENCE. (1-16 Credits)
An independent study project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration.
This course is repeatable for 16 credits.

PH 407. SEMINAR. (1-16 Credits)
Departmental seminars or colloquium. Graded P/N.
Equivalent to: PH 407H
This course is repeatable for 16 credits.

PH 407H. SEMINAR. (1-16 Credits)
Departmental seminars or colloquium.
Attributes: HNRS – Honors Course Designator
Equivalent to: PH 407
This course is repeatable for 16 credits.

PH 409. PHYSICS TEACHING PRACTICUM. (1-6 Credits)
Physics practicum experience for students assisting in Physics courses. Includes training in course content and development of instructional materials. Admission is by application. See the department office in Weniger 301 for details.
This course is repeatable for 6 credits.

PH 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

PH 411. ELECTRONICS. (3 Credits)
Covers how to build and analyze basic circuits. Topics include passive dc and ac circuits including filters, complex impedance, Fourier analysis, operational amplifiers, semiconductor diodes, and transistors.

PH 415. COMPUTER INTERFACING AND INSTRUMENTATION. (3 Credits)
Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments.

PH 422. PARADIGMS IN PHYSICS: STATIC FIeldS. (3 Credits)
Theory of static electric, magnetic, and gravitational potentials and fields using the techniques of vector calculus in three dimensions.

PH 423. PARADIGMS IN PHYSICS: ENERGY AND ENTROPY. (3 Credits)
Thermodynamics and canonical statistical mechanics.

PH 424. PARADIGMS IN PHYSICS: OSCILLATIONS AND WAVES. (3 Credits)
Dynamics of mechanical and electrical oscillation using Fourier series and integrals; time and frequency representations for driven damped oscillators, resonance; one-dimensional waves in classical mechanics and electromagnetism; normal modes.

PH 425. PARADIGMS IN PHYSICS: QUANTUM FUNDAMENTALS. (3 Credits)
Introduction to quantum mechanics through Stern-Gerlach spin measurements. Probability, eigenvalues, operators, measurement, state reduction, Dirac notation, matrix mechanics, time evolution. Quantum behavior of a one-dimensional well.
PH 426. PARADIGMS IN PHYSICS: CENTRAL FORCES. (3 Credits)
Gravitational and electrostatic forces; angular momentum and spherical harmonics, separation of variables in classical and quantum mechanics, hydrogen atom.

PH 427. PARADIGMS IN PHYSICS: PERIODIC SYSTEMS. (3 Credits)
Quantum waves in position and momentum space; Bloch waves in one-dimensional periodic systems, and the reciprocal lattice; coupled harmonic oscillators; phonons.

PH 431. CAPSTONES IN PHYSICS: ELECTROMAGNETISM. (3 Credits)
Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation.

PH 441. CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS. (3 Credits)
Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations.

PH 451. CAPSTONES IN PHYSICS: QUANTUM MECHANICS. (3 Credits)
Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications.

PH 455. ASTROPHYSICS. (3 Credits)
Physics of stars and the cosmos.

PH 461. CAPSTONES IN PHYSICS: MATHEMATICAL METHODS. (3 Credits)
Complex algebra, special functions, partial differential equations, series solutions, complex integration, calculus of residues.

PH 464. SCIENTIFIC COMPUTING II. (3 Credits)
Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.

PH 465. COMPUTATIONAL PHYSICS. (3 Credits)
The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics.

PH 481. PHYSICAL OPTICS. (4 Credits)
Wave propagation, polarization, interference, diffraction, and selected topics in modern optics.

PH 482. OPTICAL ELECTRONIC SYSTEMS. (4 Credits)
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/ECE 582.
Equivalent to: ECE 482

PH 483. GUIDED WAVE OPTICS. (4 Credits)
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/ECE 583.
Equivalent to: ECE 483

PH 495. INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS. (3 Credits)
Elementary particles and forces, nuclear structure and reactions.

PH 499. SPECIAL TOPICS. (1-16 Credits)
Topics vary from year to year. May be repeated for credit. Not offered every year.
This course is repeatable for 16 credits.

PH 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PH 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PH 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PH 507. SEMINAR. (1-16 Credits)
Section 1: Departmental Colloquium. Section 3: Nuclear and Particle Physics. Section 5: Atomic, Molecular, and Optical Physics. Section 7: Solid State Physics. Section 9: Computational Physics. One-credit options are graded P/N.
This course is repeatable for 16 credits.

PH 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

PH 511. ELECTRONICS. (3 Credits)
Covers how to build and analyze basic circuits. Topics include passive dc and ac circuits including filters, complex impedance, Fourier analysis, operational amplifiers, semiconductor diodes, and transistors.

PH 512. ANALOG AND DIGITAL ELECTRONICS. (3 Credits)
Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC.

PH 515. COMPUTER INTERFACING AND INSTRUMENTATION. (3 Credits)
Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments.

PH 531. CAPSTONES IN PHYSICS: ELECTROMAGNETISM. (3 Credits)
Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation.

PH 541. CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS. (3 Credits)
Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations.

PH 551. CAPSTONES IN PHYSICS: QUANTUM MECHANICS. (3 Credits)
Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications.

PH 555. ASTROPHYSICS. (3 Credits)
Physics of stars and the cosmos.

PH 561. MATHEMATICAL PHYSICS. (3 Credits)
Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green's functions; complex analysis.

PH 562. MATHEMATICAL PHYSICS. (3 Credits)
Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green's functions; complex analysis.
PH 631. ELECTROMAGNETIC THEORY. (3 Credits)
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.

PH 633. ELECTROMAGNETIC THEORY. (3 Credits)
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.

PH 632. ELECTROMAGNETIC THEORY. (3 Credits)
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.

PH 581. PHYSICAL OPTICS. (4 Credits)
Wave propagation, polarization, interference, diffraction, and selected topics in modern optics.

PH 582. OPTICAL ELECTRONIC SYSTEMS. (4 Credits)
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/ECE 582.
Equivalent to: ECE 583

PH 583. GUIDED WAVE OPTICS. (4 Credits)
Optical fibers, fiber mode structure and polarization effects, fiber interferometer, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/ECE 583.
Equivalent to: ECE 583

PH 585. ATOMIC, MOLECULAR, AND OPTICAL PHYSICS. (3 Credits)
Atomic and molecular structure, interaction with electromagnetic fields, atomic and molecular spectra, spectroscopic techniques, laser theory, nonlinear optics.

PH 591. BIOLOGICAL PHYSICS. (3 Credits)
Basic physics principles applied to the kinetics and dynamics of molecular and cellular processes. Ion channels, two-state systems, dynamics of molecular motors, cell signalling, and multicellular phenomena.

PH 595. INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS. (3 Credits)
Elementary particles and forces, nuclear structure and reactions.

PH 599. SPECIAL TOPICS. (1-16 Credits)
(See PH 499 for description.)
This course is repeatable for 16 credits.

PH 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PH 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PH 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PH 607. SEMINAR. (1-16 Credits)
Section 1: Departmental Colloquium. Section 3: Nuclear and Particle Physics. Section 5: Atomic, Molecular, and Optical Physics. Section 7: Solid State Physics. Section 9: Computational Physics. One-credit options are graded P/N.
This course is repeatable for 16 credits.

PH 621. DYNAMICS OF SINGLE- AND MULTI-PARTICLE SYSTEMS. (3 Credits)
Introduction to theory of non-linear systems. Chaos in Hamiltonian and dissipative systems. Lyapunov exponents, fractal geometries.

PH 631. ELECTROMAGNETIC THEORY. (3 Credits)
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.
PH 682. ATOMIC, MOLECULAR, OPTICAL PHYSICS, SEMICONDUCTOR OPTICS. (2 Credits)
Linear response theory; polarization effects; interband excitations and emissions; low dimensional systems; excitons; phonons; semiconductor lasers; photovoltaics. Offered alternate years.

PH 683. ATOMIC, MOLECULAR AND OPTICAL PHYSICS, NONLINEAR OPTICS. (2 Credits)
Coherent nonlinear electromagnetic phenomena; harmonic generation and parametric mixing; quantum mechanical description of multi-photon interactions; incoherent multi-photon interactions; coherent nonlinear optical phenomena and spectroscopies. Offered in alternate years.

PH 684. ATOMIC, MOLECULAR AND OPTICAL PHYSICS, ULTRAFAST OPTICS. (2 Credits)
Introduction of ultrafast optical science; short pulse propagation in linear media; pulse stretching and compressing; Q-switching and mode-locking; characterization of femtosecond lasers; coherent optical effects. Offered in alternate years.

PH 699. SPECIAL TOPICS: BIOLOGICAL PHYSICS. (3 Credits)
Topics vary from year to year. Not offered every year. This course is repeatable for 9 credits.

**Applied Physics Graduate Major (MS, PSM)**

To be terminated pending approval of proposal 90296 (https://secure.oregonstate.edu/ap/cps/proposals/view/90296).

Janet Tate, Director
Department of Physics
301 Weniger Hall
Corvallis OR 97331
541-737-1700
Email: tate@physics.oregonstate.edu
Website: http://psm.science.oregonstate.edu/

The worlds of science and business are increasingly interconnected, creating strong demand for individuals who can bridge these two disciplines. The Professional Science Master’s (PSM) in Applied Physics at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates who are leaders in industries dependent on applications of physics either to produce or to exploit contemporary technologies. In Oregon, industries such as semiconductor manufacturing, optical and electronic instrumentation, and software have become the dominant employers, replacing lumbering, fishing and other traditional resource-based industries. Applied physicists study photovoltaic technology, optoelectronics, energy and communication systems, imaging of cells and nanostructures, and many other subjects. An internship providing job experience in a technology-rich environment as well as special training in business management, communications, and ethics to complement core science uniquely qualify PSM Physics graduates for these diverse careers.

The PSM program can usually be completed in two years, based on full-time study and at least 54 credits. The technical curriculum is based on a core of graduate courses in the fundamental subjects of physics. Core physics courses (four courses selected from the following) will cover topics such as electromagnetism, statistical and thermal physics and quantum mechanics:

<table>

**Major Code: 5890**

**Physics Graduate Major (MA, MS, PhD, MAIS)**

**Graduate Areas of Concentration**

*Atomic physics, computational physics, nuclear physics, optical physics, particle physics, physics education, relativity, solid state physics*

The Department of Physics offers courses and research experience leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Advanced-degree candidates may pursue thesis research in experimental, computational, or theoretical AMO (atomic, molecular, and optical) physics, nuclear and particle physics, or solid state physics. Special programs are available for students who are preparing for careers in undergraduate teaching. Thesis and nonthesis
programs are offered that lead to the MS and MA degrees. A written comprehensive examination must be passed prior to the nonthesis master's final oral or the PhD preliminary oral examination. There are no foreign language requirements.

The department maintains a vigorous colloquium program in which well-known physicists present lectures on current research. Students are invited to participate in topical seminars offered regularly in each of the major research areas for the discussion of research results and for studies of specialized subjects at an advanced level.

Fellowships and assistantships are offered to qualified graduate students. A descriptive brochure is available from the Department of Physics.

</table>

Select two of the following:

- PH 431: CAPSTONES IN PHYSICS: ELECTROMAGNETISM
- PH 441: CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS
- PH 451: CAPSTONES IN PHYSICS: QUANTUM MECHANICS

Select 9 credits of approved electives

Total Hours: 15

1 The student must complete 9 credits of approved electives in the College of Liberal Arts and must complete or demonstrate proficiency in the second year of a foreign language.

### Biological Physics Option

This option is offered within the following major(s):

- Physics - College of Science (p. 1020)

The Biological Physics option allows students to focus part of their course load on work in the field of biophysics.

School of Life Sciences

The School of Life Sciences has three departments:

1. Biochemistry and Biophysics (p. 1025)
2. Integrative Biology (p. 1037)
3. Microbiology (p. 1068)

Biochemistry and Biophysics

The Department of Biochemistry and Biophysics is part of the School of Life Sciences.

The Department has world-class faculty, a tradition of interdisciplinary research, teaching excellence and extraordinary laboratories to facilitate undergraduate and graduate learning. The department ranks high nationally and internationally in many research areas of biochemistry and molecular biophysics, including structural biology, genetic code expansion technology, metabolic regulation, signal transduction, protein
chemistry, gene expression, epigenetics, cell cycle control and cell movement and adhesion.

Undergraduate Degrees

Biochemists explore the chemical structure of living matter and the chemical reactions occurring in living cells. Biophysicists use the methods of physical science to study the structure and functions of macromolecules. The Department offers two BS degrees, both accredited by the American Society for Biochemistry and Molecular Biology (ASBMB):

- Biochemistry and Biophysics (BB)
- Biochemistry and Molecular Biology (BMB) with options in Advanced Molecular Biology, Computational Molecular Biology, and Pre-medicine.

Both degrees provide students a foundation in the physical and biological sciences. They are designed to help students prepare for careers in the health sciences, for technical employment at the BS level, or for graduate study in the life sciences. Graduates of the department's programs have found rewarding careers in medicine, dentistry, clinical chemistry, biotechnology, genetics, cell biology, forensic science, pharmacology, physiology, toxicology, and nutrition, as well as in biochemistry or biophysics. Others have used the degree as a springboard to nontechnical careers that benefit from a broad scientific background, including business, industrial property law, journalism, and health care administration. Both majors benefit from the wealth of departmental course offerings and faculty research programs. Because of the interdisciplinary nature of the program, students majoring in Biochemistry and Biophysics and Biochemistry and Molecular Biology cannot seek a dual major or double degree in both majors or in the BioHealth Sciences, Biology, Zoology, and Microbiology majors.

High school students interested in careers in biochemistry or biophysics should prepare for college by taking four years of mathematics and at least one year each of physics, chemistry, and biology. Students transferring from a community college should have completed one year each of the following by the end of the sophomore year, if they plan to graduate in four years' total time: general chemistry, organic chemistry, calculus-based physics, general biology and three semesters or four quarters of calculus, including vector calculus. An excellent advising program is available to undergraduates, and prospective students are encouraged to consult with a departmental advisor or with faculty members working in an area of interest to them. Undergraduate students are also encouraged to participate in research in the laboratory of a faculty member.

Graduate Degrees

The Biochemistry and Biophysics department also oversees an internationally recognized graduate program that offers PhD and MS degrees, including a "4+1" Accelerated Masters Program degree. Faculty in the program include departmental faculty and also a group of affiliate faculty from other departments who have research programs in the molecular life sciences. Graduate program faculty have diverse research expertise including protein and DNA structural biology, redox biology, protein homeostasis, aging, single molecule studies, molecular motors, genetic code expansion, molecular neuroscience, bioinformatics and computational biophysics, metabolic regulation, signal transduction, vitamin D and innate immunity, gene expression, epigenetics, cell cycle control, membrane dynamics and repair, biomineralization, and cell movement and adhesion. Detailed information on the graduate faculty and program is available from the Department of Biochemistry and Biophysics website (http://biochem.science.oregonstate.edu).

Undergraduate Majors

- Biochemistry and Biophysics (p. 1031)
- Biochemistry and Molecular Biology (p. 1034)

Options

- Advanced Molecular Biology
- Computational Molecular Biology
- Pre-Medicine/Biochemistry and Molecular Biology

Graduate Programs

Major

- Biochemistry and Biophysics (p. 1030)

Minor

- Biochemistry and Biophysics (p. 1030)

P. Andrew Karplus, Head
2011 Ag and Life Sciences
Oregon State University
Corvallis, OR 97331-7305
541-737-2769
Email: karplusp@oregonstate.edu
Website: http://biochem.science.oregonstate.edu

Faculty

Professors Ahern, Andrews, Baird, Barbar, Beckman, Freitag, Gombart, Hagen, Karplus, Mehl
Associate Professors Greenwood, Hsu, Johnson, McFadden, Perez
Assistant Professors Hendrix, Nyarko
Senior Instructors Rajagopal, van Zee
Instructor Dalton
Assistant Professor, Senior Research Cooley, Franco
Associate Professor, Senior Research Estevez

Biochemistry and Biophysics

BB 100. THE MOLECULES OF LIFE. (2 Credits)
A brief introduction to molecular biology for nonspecialists. Subjects vary, but have included biochemical basis of the origin of life, biochemical genetics, biochemical aspects of memory and behavior, mutagenesis, bioenergetics and nutrition, and environmental biochemistry.

BB 111. INTRODUCTION TO BIOCHEMISTRY AND BIOPHYSICS RESEARCH. (1 Credit)
Designed to introduce biochemistry and biophysics students to departmental research opportunities and advisors.

BB 314. CELL AND MOLECULAR BIOLOGY. (4 Credits)
Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.

Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])
Equivalent to: BB 314H
**BB 314H. CELL AND MOLECULAR BIOLOGY. (4 Credits)**
Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.

**Attributes:** HNRS – Honors Course Designator

**Prerequisites:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or (BI 213 [C-] [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (BI 213 or be taken concurrently [C-] or CH 334 (may be taken concurrently [C-])))

**Equivalent to:** BB 314

**BB 315. MOLECULAR BIOLOGY LABORATORY. (3 Credits)**
Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.

**CROSSLISTED as BI 315.**

**Prerequisites:** BB 314 with C- or better or BB 314H with C- or better

**Equivalent to:** BB 314

**BB 317. *SCIENTIFIC THEORY AND PRACTICE. (3 Credits)**
Teaches students the practice of biological science. Topics cover scientific theory, communications, and critical evaluation.

**CROSSLISTED as BI 317.**

**Atizes:** CWIC – Core, Skills, WIC

**Prerequisites:** BI 213 with D- or better or BI 213H with D- or better

**Equivalent to:** BI 317

**BB 331. *INTRODUCTION TO MOLECULAR BIOLOGY. (3 Credits)**
Course dealing with the molecular basis of cellular function, with emphasis upon modern developments, and the foundation for practical applications of this knowledge. The course will involve the conceptual background necessary to appreciate the applications of molecular biology. Throughout the course opportunities will be given to discuss public policy issues and questions. What are the moral and practical problems that flow from identification of an individual as being at risk for a late-appearing genetic disorder, such as Huntington’s disease or certain cancers? Does the scientific or public value of knowing the entire DNA sequence of the human genome justify a situation in which individual or small-scale research cannot be supported? What issues arise when the fruits of biological research, mostly publicly funded, are commercialized? Should a novel organism be patented? How can biotechnology be applied to environmental problems? (Bacc Core Course)

**Attributes:** CSST – Core, Synthesis, Science/Technology/Society

**Prerequisites:** CH 122 with D- or better or CH 202 with D- or better or CH 222 with D- or better or CH 225H with D- or better or (CH 232 with D- or better CH 232H with D- or better) or (CH 262 with D- or better or CH 263H with D- or better or CH 264H with D- or better)

**BB 332. *MOLECULAR MEDICINE. (3 Credits)**
Provides students an understanding of medical advances from a rapidly evolving molecular point of view. Advances in knowledge of the human genome arising from DNA sequencing efforts and major leaps in understanding of the regulating cellular growth and division are presented in an easy-to-understand fashion appropriate for students in all majors. Course discussions and assignments will cover implications of advances in molecular medicine from ethical, economic, technical and societal standpoints. The aim of the course is to present technical material in a way that non-scientists will understand and conversely to summarize ethical, economic, and philosophical considerations in a way that the scientists understand the implications of these technologies. (Bacc Core Course)

**Attributes:** CSST – Core, Synthesis, Science/Technology/Society
BB 460. ADVANCED CELL BIOLOGY. (3 Credits)
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology. Offered every other fall in odd years.
Prerequisites: BB 314 with C- or better or BI 314 with C- or better or BI 314H with C- or better or BB 451 with C- or better or BB 492 with C- or better

BB 481. MACROMOLECULAR STRUCTURE. (3 Credits)
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.
Prerequisites: BB 450 with D- or better or BB 490 with D- or better

BB 482. BIOPHYSICS. (3 Credits)
Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
Prerequisites: BB 481 with D- or better and CH 442 [D-]

BB 483. ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE. (3 Credits)
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
Prerequisites: BB 482 with D- or better or BB 582 with D- or better

BB 484. CHROMATIN AND EPIGENETICS. (3 Credits)
An in-depth look at "chromatin" (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of "epigenetic" gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.
Prerequisites: (BI 314 with C- or better or BI 314H with C- or better or BB 314 with C- or better or BB 314H with C- or better) and (BI 315 [C-] or BB 315 [C-] or BB 493 [C-] or BB 493H [C-])

BB 485. APPLIED BIOINFORMATICS. (3 Credits)
The fundamentals of bioinformatics are presented, which will enable an understanding of the software and methods used in answering questions in bioinformatics. The student will gain a working knowledge of the bioinformatics analysis of contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.
Prerequisites: BI 314 with C- or better or BI 314H with C- or better

BB 486. ADVANCED MOLECULAR GENETICS. (3 Credits)
Combines analyses of state-of-the-art primary literature with lectures that give a historical perspective on some of the most important "model" organisms used in biology, i.e. organisms that have been widely used to decipher the general "rules for life" on the planet. These include examples among the bacteria, plants, fungi, worms, flies and mammals.
Prerequisites: (BI 314 with C- or better or BI 314H with C- or better or BB 314 with C- or better) and (BI 315 [C-] or BB 315 [C-] and BB 492 [D-]

BB 490. BIOCHEMISTRY 1: STRUCTURE AND FUNCTION. (3 Credits)
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The first course in the series, BB 490/BB 590, covers how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.
Prerequisites: CH 332 with C- or better or CH 336 with C- or better

BB 491. BIOCHEMISTRY 2: METABOLISM. (3 Credits)
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisites: BB 490 with D- or better or BB 590 with D- or better

BB 492. BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY. (3 Credits)
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisites: (BB 490 with D- or better or BB 590 with D- or better) and (BB 491 [D-] or BB 591 [D-])

BB 493. BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1. (3 Credits)
Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisites: (BB 451 with D- or better or BB 451H with D- or better) or BB 492 with D- or better

BB 494. BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2. (3 Credits)
Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisites: BB 493 with D- or better or BB 593 with D- or better or BB 315 with D- or better or BB 315 with D- or better

BB 496. BIOCHEMISTRY LABORATORY MOLECULAR MODELING. (1 Credit)
Introduces students from biochemistry and related fields to the fundamentals of computer-based analyses of protein structure and to hands-on manipulation of three-dimensional images.
Corequisites: BB 494

BB 497. BASIC NUCLEIC ACID AND PROTEIN SEQUENCE ANALYSIS. (1 Credit)
Techniques in computer-based analyses of nucleic acid and protein sequences. Includes some programming and practical experience with web-based and command-line tools.
Prerequisites: BB 493 (may be taken concurrently) with D- or better or BB 493H (may be taken concurrently) with D- or better or BB 315 (may be taken concurrently) with D- or better
BB 498. ASBMB CERTIFICATION EXAM. (0 Credits)
A comprehensive, standardized test administered by the American Society of Biochemistry and Molecular Biology and used as a direct assessment of the discipline specific knowledge of seniors in the majors administered by the Biochemistry and Biophysics department. A pass will be given to all students who complete the exam. Contact the Biochemistry and Biophysics Program for more information.

BB 499. SPECIAL TOPICS. (0-16 Credits)
Topics and credits vary.
This course is repeatable for 16 credits.

BB 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

BB 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

BB 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

BB 507. SEMINAR. (1-2 Credits)
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented.
This course is repeatable for 16 credits.

BB 550. GENERAL BIOCHEMISTRY. (4 Credits)
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.

BB 551. GENERAL BIOCHEMISTRY. (3 Credits)
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.

BB 560. ADVANCED CELL BIOLOGY. (3 Credits)
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology.

BB 581. MACROMOLECULAR STRUCTURE. (3 Credits)
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules--especially proteins and nucleic acids--and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.

BB 582. BIOPHYSICS. (3 Credits)
Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
Prerequisites: BB 581 with C or better

BB 583. ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE. (3 Credits)
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
Prerequisites: BB 582 with C or better

BB 584. CHROMATIN AND EPIGENETICS. (3 Credits)
An in-depth look at "chromatin" (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of "epigenetic" gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.

BB 585. APPLIED BIOINFORMATICS. (3 Credits)
The fundamentals of bioinformatics are presented, which will enable an understanding of the software and methods used in answering questions in bioinformatics. The student will gain a working knowledge of the bioinformatics analysis of contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChiP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.

BB 586. ADVANCED MOLECULAR GENETICS. (3 Credits)
Combines analyses of state-of-the-art primary literature with lectures that give a historical perspective on some of the most important "model" organisms used in biology, i.e. organisms that have been widely used to decipher the general "rules for life" on the planet. These include examples among the bacteria, plants, fungi, worms, flies and mammals.

BB 590. BIOCHEMISTRY 1: STRUCTURE AND FUNCTION. (3 Credits)
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The first course in the series, BB 490/BB 590, covers how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.

BB 591. BIOCHEMISTRY 2: METABOLISM. (3 Credits)
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisites: BB 590 with C or better

BB 592. BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY. (3 Credits)
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisites: BB 590 with C or better and BB 591 [C]
Biochemistry and Biophysics Graduate Major (MA, MS, PhD, MAIS)

Graduate Areas of Concentration

Biochemistry, biophysics

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.

The Department of Biochemistry and Biophysics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Most graduate students are admitted for study toward the PhD.

The PhD program requires course work in biochemistry and biophysics, passing written and oral examinations, participating in the departmental seminar program, and research leading to a doctoral thesis. Although most students in the department receive financial support in the form of research assistantships, all students are expected to participate to a limited degree in the teaching program of the department, regardless of the source of support. In general, financial support is provided for PhD candidates only.

**Biochemistry and Biophysics Undergraduate Major (BS, HBS)**

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.

Accredited by the American Society for Biochemistry and Molecular Biology (https://www.asbmb.org/Accreditation/Schools).

The BS degree in Biochemistry and Biophysics provides a degree path centered on the chemistry and physics of life processes with training that integrates the principles of chemistry, physics, mathematics, biochemistry, genetics, and computer science. Biochemists explore the chemical structure of living matter and the chemical reactions occurring in living cells. Biophysicists use the methods of physical science to study the structure and functions of macromolecules. Biochemistry and Biophysics majors receive excellent training for careers in medicine and related health professions, biotechnology and pharmaceutical industries, or for graduate study in the biochemistry and biophysics. Training in biophysics is especially valuable for students who are interested in drug design.

Students majoring in Biochemistry and Biophysics cannot seek a dual or double major in Biochemistry and Molecular Biology, Biohealth Sciences, Biology, Microbiology or Zoology.

For further information, visit the Department of Biochemistry and Biophysics website (https://biochem.science.oregonstate.edu).

Total credits required for graduation is 180.
CH 361 EXPERIMENTAL CHEMISTRY I and CH 362 EXPERIMENTAL CHEMISTRY I can be taken in the junior year with BB 493 BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, BB 494 BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, BB 496 BIOCHEMISTRY LABORATORY MOLECULAR MODELING, BB 497 BASIC NUCLEIC ACID AND PROTEIN SEQUENCE ANALYSIS being taken in the senior year.

**Biochemistry and Molecular Biology Undergraduate Major (BS, HBS)**

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.

The BS degree in Biochemistry and Molecular Biology provides a degree path centered on the molecular basis of living systems with training in molecular genetics, biochemistry, and cell biology, as well as in rapidly developing areas such as bioinformatics. Majors must select an option either in Advanced Molecular Biology, Computational Molecular Biology, or Pre-medicine/Biochemistry and Molecular Biology. The first two options are designed for students interested in careers in the biotechnology and pharmaceutical industries or graduate work in the molecular life sciences, with the second especially well-suited for students interested in computational aspects of molecular biology. The third option is ideal for students interested in careers in medicine and related health professions. Students majoring in Biochemistry and Molecular Biology cannot seek a double major in Biochemistry and Biophysics, Biology, Biohealth Sciences, Botany, Microbiology or Zoology.

Completion of an option is required to earn a degree in Biochemistry and Molecular Biology.

Students are required to achieve a C– or better in the following courses (or their honors counterparts) required for the Biochemistry and Molecular Biology major:

Advanced Molecular Biology Option

This option is offered within the following major(s):

- Biochemistry and Biophysics - College of Science (p. 1034)

The Advanced Molecular Biology option is designed for students interested in pursuing graduate work in molecular life sciences or entering the workforce in the biotechnology and pharmaceutical industries. It provides advanced training in genomics, epigenetics and other areas of current research in molecular biology, in addition to the core courses in the major. Students are strongly encouraged to participate in undergraduate research, and up to six research credits can be applied to the Upper-division Science Elective requirements. Faculty advisors work with students to help them identify electives, research opportunities, and professional internships that align with their interests.

Computational Molecular Biology Option

This option is offered within the following major(s):

- Biochemistry and Biophysics - College of Science (p. 1034)

The Computational Molecular Biology option is designed for students interested in the interface of molecular biology, computer science, and statistics. It provides strong preparation for graduate school in computational biology as well as the biotechnology and pharmaceutical industry workforce. This option couples the comprehensive core training in biochemistry and molecular biology with advanced course work in mathematics, statistics, computer science, and bioinformatics. Students are strongly encouraged to participate in undergraduate research, and up to six research credits can be applied to the Upper-division Science Elective requirements. Faculty advisors work with students to identify elective courses, undergraduate research opportunities, and professional internships that support their individual interests.

Pre-Medicine/Biochemistry and Molecular Biology Option

This option is offered within the following major(s):

- Biochemistry and Biophysics - College of Science (p. 1034)

Biochemistry and Molecular Biology students interested in a career in medicine should choose this option. It may also be suitable for students interested in some other health professions and these students should first consult with their advisor. In addition to offering a rigorous foundation in biochemistry, molecular and cellular biology, chemistry, and genetics, the Pre-medicine option meets the requirements for most medical schools in the U.S. by providing students with training in psychology, ethics and social sciences. Students have a wide choice of medically relevant electives in areas such as physiology, microbiology, and immunology. Students are strongly encouraged to participate in undergraduate research. Faculty pre-med advisors guide students to integrate undergraduate research and other relevant professional opportunities into their undergraduate experience and to prepare themselves as strong candidates for admission to the professional schools of their interest.

Biology

BI 101. *ENVIRONMENTAL BIOLOGY: ECOLOGY, CONSERVATION, GLOBAL CHANGE. (4 Credits)

Introduction to ecosystems, including biodiversity, species interactions, human impacts, and conservation biology. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 102 or 103. Lec/lab/rec. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

BI 102. *ANIMAL BIOLOGY: GENES, BEHAVIOR AND EVOLUTION OF LIFE. (4 Credits)

Introduction to how genetics shapes life on Earth, including how understandings of DNA and environmental factors are leading to biotechnological advances. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 103. Lec/lab/rec. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

BI 103. *HUMAN BIOLOGY: ANATOMY, PHYSIOLOGY AND DISEASE. (4 Credits)

Introduction to the biology of humans, including aspects of human health and disease. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 102. Lec/lab/rec. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

BI 109. HEALTH PROFESSIONS: MEDICAL. (1 Credit)

Discussion of matters relating to a medical career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education, and related matters. Speakers are included. Graded P/N.

BI 111. INTRODUCTION TO MARINE LIFE IN THE SEA: MARINE HABITATS. (1 Credit)

A field-focused learning experience exploring the varied marine life and habitats on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays and estuaries. Students will also be introduced to the breadth of marine science course offerings and research at Oregon State University’s Hatfield Marine Science Center located in Newport, Oregon. Graded P/N.

BI 150. INTRODUCTION TO MARINE BIOLOGY. (3 Credits)

Survey of marine organisms, the environments they inhabit, and their evolutionary adaptations for thriving in those environments. The course will also highlight current conservation challenges that threaten marine life, such as climate change, overfishing, and pollution.
BI 175. *GENOMES, IDENTITIES AND SOCIETIES. (3 Credits)
DNA’s roles in shaping our senses of identity, individuality, and societal
interconnectivity will be analyzed. New advances in genetic technology
will be explored, along with their potential impacts on society. The
relationships between genetics and discrimination will be examined with
focus on cases from Oregon, America, and the world. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

BI 197. PROFESSIONAL DEVELOPMENT I: HEALTH PROFESSIONS. (1 Credit)
Integrative Biology faculty and other professionals introduce a variety
of human health professions including dentistry, medicine, pharmacy
and others (veterinary medicine students take BI 198). Emphasizes
professional development through exploring relevant social and cognitive
concepts, as well as engaging in experiential learning and networking.
Departmental and campus student success resources are highlighted.
Graded P/N.

BI 198. PROFESSIONAL DEVELOPMENT I: BIOLOGY AND ZOOLOGY. (1 Credit)
Integrative Biology faculty and biology professionals introduce life
science careers outside of human health professions (human health
profession students take BI 197). Emphasizes professional development
through exploring relevant social and cognitive concepts, as well as
engaging in experiential learning and networking. Departmental and
campus student success resources are highlighted. Graded P/N.

BI 199. SELECTED TOPICS. (1-16 Credits)
Field Ecology.
Equivalent to: BI 199H
This course is repeatable for 16 credits.

BI 199H. SELECTED TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 199
This course is repeatable for 16 credits.

BI 204. *INTRODUCTORY BIOLOGY I. (4 Credits)
Foundations of biological sciences including scientific inquiry, genetics,
evolution, and ecology. Significant emphasis throughout on the
application of core concepts to solve human and environmental
problems. Laboratory emphasizes skills in critical thinking, scientific
writing, and experimental design. Not intended for pre-health profession
students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science

BI 205. *INTRODUCTORY BIOLOGY II. (4 Credits)
Fundamental concepts in molecular and cellular biology, beginning with
biomolecules and the origin of life, and ending with genomics. Significant
emphasis throughout on applications of biotechnology to solve human
problems. Laboratory emphasizes skills in critical thinking, scientific
writing, and experimental design. Not intended for pre-health profession
students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisites: CH 121 (may be taken concurrently) with D- or better
or CH 201 (may be taken concurrently) with D- or better or ((CH 231
may be taken concurrently) with D- or better or CH 231H (may be taken
concurrently) with D- or better) and (CH 261 (may be taken concurrently)
[D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken
concurrently) [D-] or CH 271H (may be taken concurrently) [D-])

BI 206. *INTRODUCTORY BIOLOGY III. (4 Credits)
Basic plant and animal physiology from an evolutionary perspective.
Significant emphasis on topics of importance to human society, including
human and plant disease. Laboratory emphasizes skills in critical
thinking, scientific writing, and experimental design. Not intended for pre-
health professional students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisites: CH 121 (may be taken concurrently) with D- or better
or CH 201 (may be taken concurrently) with D- or better or ((CH 231
may be taken concurrently) with D- or better or CH 231H (may be taken
concurrently) with D- or better) and (CH 261 (may be taken concurrently)
[D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken
concurrently) [D-] or CH 271H (may be taken concurrently) [D-])

BI 211. *PRINCIPLES OF BIOLOGY. (4 Credits)
Origins of life, energy transformations, plant and animal diversity. Lec/lab.
(Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BI 211H

BI 211H. *PRINCIPLES OF BIOLOGY. (4 Credits)
Origins of life, energy transformations, plant and animal physiology. Lec/
lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course
Designator
Equivalent to: BI 211

BI 212. *PRINCIPLES OF BIOLOGY. (4 Credits)
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc
Core Course)
Attributes: CPBS – Core, Pers, Biological Science

BI 212H. *PRINCIPLES OF BIOLOGY. (4 Credits)
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc
Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course
Designator
Prerequisites: (CH 121 (may be taken concurrently) with D- or better
or CH 201 (may be taken concurrently) with D- or better or CH 221 (may
be taken concurrently) with D- or better or CH 224H (may be taken
concurrently) with D- or better or ((CH 231 (may be taken concurrently)
with D- or better or CH 231H (may be taken concurrently)) [D-] or CH 261 (may be taken concurrently)
[D-] or CH 271 (may be taken concurrently) [D-])
Equivalent to: BI 212H

BI 213. *PRINCIPLES OF BIOLOGY. (4 Credits)
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core
Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisites: CH 121 with D- or better or CH 201 with D- or better or CH
221 with D- or better or CH 224H with D- or better or ((CH 231 with D-
or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or
CH 271 [D-])
Equivalent to: BI 213H
BI 213H. *PRINCIPLES OF BIOLOGY. (4 Credits)
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisites: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213

BI 231. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY. (3 Credits)
The first of a three-term introductory series. Using a strong gross anatomy focus, course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human nervous, endocrine and integumentary systems. BI 231 is a required prerequisite to BI 232 and BI 233. The BI 241 Lab is optional but prerequisite for either of the subsequent BI 242 or BI 243 lab courses in the series. Lec.

BI 232. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY. (3 Credits)
The second of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human nervous, endocrine and integumentary systems. Lec.
Prerequisites: BI 231 (may be taken concurrently) with C- or better

BI 233. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY. (3 Credits)
The third of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human nervous, endocrine and integumentary systems. Lec.
Prerequisites: BI 231 (may be taken concurrently) with C- or better

BI 241. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY. (2 Credits)
The first of a three-term introductory series. Using the human cadaver (prosection), course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeletal, muscular and integumentary systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisites: BI 231 (may be taken concurrently) with C- or better and BI 232 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 242. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY. (2 Credits)
The second of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisites: BI 231 (may be taken concurrently) with C- or better and BI 232 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 243. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY. (2 Credits)
The third of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisites: BI 231 (may be taken concurrently) with C- or better and BI 233 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 298. PROFESSIONAL DEVELOPMENT FOR BIOLOGISTS II. (1 Credit)
Students will develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/ N.

BI 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

BI 301. *HUMAN IMPACTS ON ECOSYSTEMS. (3 Credits)
Selected human impacts on ecosystems are examined in depth, including air quality, global climate change, management of agricultural and forest resources, and threats to biological diversity. The causes, approaches to investigating, and potential solutions for each issue are discussed from a scientific and social perspective. Adverse effects on ecosystems that result from each environmental problem are examined. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

BI 302. BIOLOGY AND CONSERVATION OF MARINE MAMMALS. (4 Credits)
An examination of the biology of whales, pinnipeds, and other marine mammals, including general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions, including conservation issues. CROSSTLISTED as FW 302. Taught at Hatfield Marine Science Center, OR online through Ecampus.
Equivalent to: FW 302

BI 306. **ENVIRONMENTAL ECOLOGY. (3 Credits)
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSGI – Core, Synth, Global Issues; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Equivalent to: BI 306H

BI 306H. **ENVIRONMENTAL ECOLOGY. (3 Credits)
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSGI – Core, Synth, Global Issues; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Equivalent to: BI 306
BI 309. TEACHING PRACTICUM. (1-6 Credits)
Introductory experience for students assisting with instruction in Biology or Zoology courses. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 311. GENETICS. (4 Credits)
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 311H

BI 311H. GENETICS. (4 Credits)
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 311

BI 315. MOLECULAR BIOLOGY LABORATORY. (3 Credits)
Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab. CROSSLISTED as BB 315.
Prerequisites: BB 314 (may be taken concurrently) with C- or better or BB 314H (may be taken concurrently) with C- or better
Equivalent to: BB 315

BI 317. *SCIENTIFIC THEORY AND PRACTICE. (3 Credits)
Teaches students the practice of biological science. Topics cover scientific theory, communications, and critical evaluation. CROSSLISTED as BB 317. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: BB 317

BI 319. *CRITICAL THINKING AND COMMUNICATION IN THE LIFE SCIENCES. (3 Credits)
Teaches students the practice of biological science. Topics cover scientific theory, written and spoken communications, ethics and critical evaluation. (Writing Intensive Course) CROSSLISTED as Z 319.
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and (ST 351 [D-] or ST 351H [D-]) and ST 352 (may be taken concurrently) [D-]
Equivalent to: Z 319

BI 331. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY. (3 Credits)
The first of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the skeletal, muscular and integumentary systems. Lec.
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and (CH 123 [C-] or (CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-])) and BI 341 (may be taken concurrently) [C-]

BI 332. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY. (3 Credits)
The second of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Lec.
Prerequisites: BI 331 with C- or better and BI 342 (may be taken concurrently) [C-]

BI 333. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY. (3 Credits)
The third part of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the cardiovascular, respiratory, urinary and digestive systems. Lec.
Prerequisites: BI 332 with C- or better and BI 343 (may be taken concurrently) [C-]

BI 341. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY. (2 Credits)
The first of a three-term advanced series. Using the human cadaver (prosection) and physiological data acquisition equipment, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the human skeletal, muscular and integumentary systems. Lab.
Corequisites: BI 331

BI 342. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY. (2 Credits)
The second of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human nervous, endocrine and reproductive systems. Lab.
Corequisites: BI 332

BI 343. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY. (2 Credits)
The third of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human cardiovascular, respiratory, urinary and digestive systems. Lab.
Corequisites: BI 333

BI 345. *INTRODUCTION TO EVOLUTION. (3 Credits)
Elements of evolutionary theory; origin and history of life; evolutionary controversy; origins of species, sex, and humans. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

BI 347. *OCEANS IN PERIL. (3 Credits)
The interactions of society and the marine environment, emphasizing the ecological, biogeochemical, economic, sociological, and political significance of the oceans. Topics of current critical importance will include marine pollution, protecting marine habitats, conserving marine biodiversity, fisheries and aquaculture, ocean energy, biogeochemical change, global warming, ocean acidification, and sea level rise. Lecture (Bacc Core Course).
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisites: BI 101 with C- or better or BI 102 with C- or better or BI 211 with C- or better or BI 211H with C- or better or BI 213 with C- or better or BI 213H with C- or better or BI 204 with C- or better or BI 150 with C- or better
BI 348. *HUMAN ECOLOGY. (3 Credits)
The impact of humans on the environment, emphasizing the political, sociological, and ecological consequences of human population growth. Topics of current critical importance will include global warming trends, destruction of the ozone layer, consequences of pollution, habitat destruction, the loss of biodiversity, and conservation biology. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

BI 351. MARINE ECOLOGY. (3 Credits)
Ecological interactions and principles in different marine habitats. Topics include the organisms (plants, invertebrates, vertebrates) found in major habitats and interactions between organisms. Habitats discussed include coral reefs, rocky shores, kelp forests, near-shore waters, open-ocean waters, and the deep sea. Emphasis is placed on how organism-organism interactions produce varying patterns of distribution, abundance, body size, diversity, stability, and succession.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

BI 352. MARINE ECOLOGY LABORATORY. (2 Credits)
Laboratory and field exposure to many of the organisms and processes discussed in BI 351. Research projects provide students with the opportunity to experience the process by which information about marine ecology is obtained. Field trip fee. Lab fee. Lec/lab.

BI 358. SYMBIOSES AND THE ENVIRONMENT. (3 Credits)
Overview of the diversity of mutualistic symbioses and their roles in the natural environment. Integrative approach, from ecosystem to molecule, to the examination of certain key mutualisms. Lec. Offered alternate years.
Prerequisites: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 370. ECOLOGY. (3 Credits)
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 370H

BI 370H. ECOLOGY. (3 Credits)
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 370

BI 371. *ECOLOGICAL METHODS. (3 Credits)
Experimental design, data collection, analysis and synthesis in ecological studies; local ecosystems emphasized. May have field trip fee. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: BI 370 with D- or better or BI 370H with D- or better

BI 373. *FIELD METHODS IN MARINE ECOLOGY. (3 Credits)
Exposure to research methods used in field studies of the marine rocky intertidal ecosystem. Research projects and writing exercises provide students with hands-on experience of collecting, analyzing, and presenting marine ecological data. Field trip fee. Lab fee. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (BI 351 (may be taken concurrently) with D- or better or BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])

BI 375. FIELD METHODS IN ECOLOGICAL RESTORATION. (4 Credits)
Observation and application of theory and practice in ecological restoration. Using site visits and hands-on research, explores the roles in restoration of fire, local adaptation, disturbance history, natural history, beaver, and soils, including visits to several active and completed restoration projects and overnights in the field. Lab.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

BI 399. SPECIAL TOPICS. (0-16 Credits)
May be repeated for 16 total credits.
This course is repeatable for 16 credits.

BI 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: BI 401H
This course is repeatable for 16 credits.

BI 401H. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 401
This course is repeatable for 16 credits.

BI 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

BI 406. PROJECTS: CURATORIAL ASSISTANT. (1-6 Credits)
Students assist with curatorial projects in OSU biological collections. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 407. SEMINAR. (1 Credit)
Departmental seminar. Graded P/N.
Equivalent to: BI 407H
This course is repeatable for 16 credits.

BI 407H. SEMINAR. (1 Credit)
Departmental seminar. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 407
This course is repeatable for 16 credits.

BI 409. ADVANCED TEACHING PRACTICUM. (1-6 Credits)
Advanced practicum experience for students assisting in Biology or Zoology courses. Includes advanced training in course content and development of instructional materials. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 410. INTERNSHIP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.
BI 420. *VIRUSES IN MODERN SOCIETY. (3 Credits)
Impact of viruses on modern civilization. Molecular mechanisms of viral infectivity. Approaches to the prevention and cure of viral diseases. Role of viruses in agriculture and industry. Offered alternate years. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisites: BI 311 with D- or better or BI 311H with D- or better or BI 314 with D- or better or BI 314H with D- or better

BI 421. AQUATIC BIOLOGICAL INVASIONS. (4 Credits)
An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center. CROSSLISTED as FW 421.
Equivalent to: FW 421

BI 427. PALEOBIOLOGY. (4 Credits)
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or GEO 203 [D-]

BI 445. EVOLUTION. (3 Credits)
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Prerequisites: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445H

BI 445H. EVOLUTION. (3 Credits)
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Attributes: HNRS – Honors Course Designator
Prerequisites: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445

BI 450. *MARINE BIOLOGY AND ECOLOGY. (15 Credits)
A comprehensive lecture and laboratory introduction to the flora and fauna of the marine environment approached from the level of the organism to ecosystem. Ecological patterns and processes characteristic of marine communities will be emphasized. Lec/lab. Taught at Hatfield Marine Science Center, Newport, OR. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])

BI 451. FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM. (4 Credits)
In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. BI 551 student expectations include vasularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.
Prerequisites: ((BI 231 with D- or better and BI 241 [D-] or BI 331 [D-] and BI 341 [D-]) and (BI 232 [D-] and BI 242 [D-]) or (BI 332 [D-] and BI 342 [D-]) and ((BI 233 [D-] and BI 243 [D-]) or (BI 333 [D-] and BI 343 [D-]))

BI 456. PHYLOGENETICS. (4 Credits)
Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.
Prerequisites: (ST 351 with D- or better or ST 351H with D- or better) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-]) and (BI 311 [D-] or BI 311H [D-]) or BI 445 [D-] or BI 445H [D-])

BI 481. BIOGEOGRAPHY. (3 Credits)
Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today’s rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.
Prerequisites: BI 370 with D- or better or BI 370H with D- or better

BI 483. POPULATION BIOLOGY. (3 Credits)
Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.
Prerequisites: (MTH 241 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better or MTH 227 with D- or better) and (ST 351 [D-] or ST 351H [D-]) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-]) and (BI 311 [D-] or BI 311H [D-] or BI 370 [D-] or BI 370H [D-])

BI 485. MONSTER BIOLOGY. (3 Credits)
Scientists seek to explain what exists and why things are. An alternative approach is to ask why things are not. Biological and physical laws are used to critically and rigorously assess why monsters from literature, television and film are not possible in the real world.
Prerequisites: (BI 311 (may be taken concurrently) with D- or better or BI 311H (may be taken concurrently) with D- or better and (BI 370 (may be taken concurrently) [D-] or BI 370H (may be taken concurrently) [D-])

BI 495. DISEASE ECOLOGY. (3 Credits)
An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.
Prerequisites: BI 370 with C- or better or BI 370H with C- or better

BI 498. SENIOR BIOLOGY FIELD TEST. (0 Credits)
A comprehensive, two-hour exam to assess the biological knowledge of Biology and Zoology seniors. Students must complete the exam in their final undergraduate term or during spring term if graduating during summer when it is not offered. A pass will be given to all students who complete the exam. More details at http://ib.oregonstate.edu/advising/MFT-info.

BI 499. SPECIAL TOPICS. (0-16 Credits)
Topics and credits vary.
Equivalent to: BI 499H

BI 499H. SPECIAL TOPICS. (1-16 Credits)
Topics and credits vary.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 499

This course is repeatable for 16 credits.
Zoology

Z 319. *CRITICAL THINKING AND COMMUNICATIONS IN THE LIFE SCIENCES. (3 Credits)*
Teaches students the practice of biological science. Topics cover scientific theory, written and spoken communications, ethics and critical evaluation. (Writing Intensive Course) CROSSLISTED as BI 319.
**Attributes:** CWIC – Core, Skills, WIC
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and (ST 351 [D-] or ST 351H [D-]) and ST 352 (may be taken concurrently) [D-]
**Equivalent to:** BI 319

Z 349. *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION. (3 Credits)*
The earth's biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth's ecosystems, and methods used to conserve biodiversity for future generations. (Bacc Core Course)
**Attributes:** CSGI – Core, Synth, Global Issues

Z 350. ANIMAL BEHAVIOR. (3 Credits)
Concepts of behavior; sensory receptors, internal mechanisms governing responses; learning and habituation; social organization and communication.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 361. INVERTEBRATE BIOLOGY. (3 Credits)
Exploration of the diversity and evolutionary relationships among major invertebrate phyla with an emphasis on morphological features, functional aspects, and life history for each phylum.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 362. INVERTEBRATE BIOLOGY LABORATORY. (2 Credits)
Invertebrate morphology and anatomy of representative invertebrates introduced in Z 361; diversity within phyla. Study is by dissections and both microscopic and macroscopic examination; field trip fee. Lab fee. Lec/ lab.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])

Z 365. BIOLOGY OF INSECTS. (4 Credits)
Introduction to the study of insects, focusing on the biological attributes responsible for the success and dominance of insects. Emphasis on taxonomy, morphology, behavior, ecology, and coevolutionary interrelationships. Required field trips. Lec/ lab.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and Z 361 (may be taken concurrently) [C-]

Z 371. VERTEBRATE BIOLOGY. (3 Credits)
Overview of vertebrate origins and phylogeny integrating several disciplines (anatomy, ecology, genetics, developmental biology, physiology, behavior, and evolution) to explore the structural and functional adaptations and evolutionary history of vertebrates. Lec.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 372. VERTEBRATE BIOLOGY LABORATORY. (2 Credits)
Classification, identification, and natural history of vertebrates. Includes laboratory examination of specimens and frequent field trips (fee charged) emphasizing Oregon fauna. Lab fee.
**Prerequisites:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and Z 371 (may be taken concurrently) [D-]

Z 422. COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY. (5 Credits)
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and (CH 332 (may be taken concurrently) [D-]) or CH 335 (may be taken concurrently) [D-]

Z 423. ENVIRONMENTAL PHYSIOLOGY. (3 Credits)
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
**Prerequisites:** (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 425. EMBRYOLOGY AND DEVELOPMENT. (5 Credits)
**Prerequisites:** BI 311 with D- or better or BI 311H with D- or better or BB 314 with D- or better or BB 314H with D- or better

Z 431. VERTEBRATE PHYSIOLOGY I. (4 Credits)
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in Z 431, Z 432/442 series. Lec/rec.
**Prerequisites:** (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 432. VERTEBRATE PHYSIOLOGY II. (3 Credits)
**Prerequisites:** Z 431 with C- or better

Z 437. VERTEBRATE ENDOCRINOLOGY. (4 Credits)
An exploration of vertebrate endocrinology that examines principles of hormone action, inter- and intracellular signaling mechanisms within endocrine axes, and comparative endocrine physiology, emphasizing concepts of homeostasis and methodologies for evaluating normal and physiological function. Students are provided multiple forums for class participation, in the form of scientific presentations and "mini-reports."
**Prerequisites:** BB 314 with D- or better or BB 314H with D- or better
Z 438. BEHAVIORAL NEUROBIOLOGY. (3 Credits)
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 123 [C-] or CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-])

Z 440. INSECT PHYSIOLOGY. (3 Credits)
Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. The contributions of insect physiology to general physiological principles and bioregulatory methods of insect pest control are discussed.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and CH 123 [C-] or (CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-]))

Z 442. VERTEBRATE PHYSIOLOGY LABORATORY. (2 Credits)
Experiments and exercises in vertebrate physiology covering systems studied in Z 431 and Z 432. Available to Biology majors. Lab fee.

Z 461. MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY. (4 Credits)
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/ lab. Taught at Hatfield Marine Science Center.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 473. HERPETOLOGY. (3 Credits)
World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 474. SYSTEMATIC HERPETOLOGY. (2 Credits)
A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab.

Z 475. INSECT BIODIVERSITY SURVEY. (4 Credits)
Through lectures, laboratories and an intensive field survey, students learn about insect diversity, natural history and evolution, as well as the important role of biological collections in modern biodiversity research. The survey takes place in the two weeks prior to fall term at a remote Pacific Northwest field station. Lec/lab.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 477. AQUATIC ENTOMOLOGY. (4 Credits)
Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab.
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

Z 499. SPECIAL TOPICS. (0-16 Credits)
Topics and credits vary.
Equivalent to: Z 499H
This course is repeatable for 16 credits.

Z 499H. SPECIAL TOPICS. (1-16 Credits)
Topics and credits vary.
Equivalent to: Z 499
This course is repeatable for 16 credits.

Biology Minor
Administered by the Department of Integrative Biology under the School of Life Sciences.

Students majoring in Biochemistry and Biophysics, Biochemistry and Molecular Biology, Biohealth Sciences, Biology, Botany, Microbiology and Zoology cannot declare the Biology minor. The courses below may be shared with other majors outside of those listed above.

The Biology minor includes a required introductory biology sequence with a chemistry prerequisite or corequisite for the second term of each series. A term of organic chemistry, CH 331 ORGANIC CHEMISTRY or CH 334 ORGANIC CHEMISTRY, is required to take BB 314 CELL AND MOLECULAR BIOLOGY and some of the listed physiology courses. A C- or better in the BI 21x or 20x series is required to complete the minor.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Minor Code: 509**

## Biology Undergraduate Major (BS, HBS)

Administered by the Department of Integrative Biology under the School of Life Sciences.

**Also available at OSU-Cascades campus.**

The undergraduate BS degree in Biology is designed for students seeking an interdisciplinary background in the life sciences. The major couples a comprehensive biological, physical and quantitative sciences core with a variety of electives that can be catered to meet specific professional goals. Biology majors receive excellent training for graduate and professional programs.

Corvallis Campus students may choose to complete one transcript-visible option in Ecology (p. 1053), Genetics (p. 1055), Marine Biology (p. 1055), Physiology and Behavior (p. 1056), Pre-Dentistry/Biology (p. 1057), Pre-Education Biology (p. 1058), Pre-Medicine/Biology (p. 1059), or Pre-Veterinary Medicine (p. 1061). Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major and most students can complete the additional course work in four years. Additional information about the Biology Major and Options can be found in MyDegrees or the Integrative Biology (https://ib.oregonstate.edu) website.

Students in the Biology major must complete the following biology courses below with a C− or better to continue on to upper-division Biology (BI) and Zoology (Z) course work.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 211</td>
<td>*PRINCIPLES OF BIOLOGY</td>

<tr>
<td>CH 332</td>
<td>ORGANIC CHEMISTRY</td>
<td>4</td>
</tr>
</tbody>
</table>

Students majoring in Biology cannot seek a dual or double major in Biochemistry and Biophysics, Biochemistry and Molecular Biology, Biohealth Sciences, Microbiology or Zoology.

The major sections and courses within them are arranged in the order they are generally completed. Declaring an option can modify the statistics and elective areas of the major. For further information, see MyDegrees or the Integrative Biology (http://ib.oregonstate.edu) website.

### Physiology
Select one of the following or see option: 3-5 credits
- BOT 331 PLANT PHYSIOLOGY
- BOT 332 LABORATORY TECHNIQUES IN PLANT BIOLOGY
- BOT 488 ENVIRONMENTAL PHYSIOLOGY OF PLANTS
- Z 423 ENVIRONMENTAL PHYSIOLOGY
- Z 425 EMBRYOLOGY AND DEVELOPMENT
- Z 431 VERTEBRATE PHYSIOLOGY I
- Z 440 INSECT PHYSIOLOGY

### Writing Intensive Course (WIC)
Select one of the following or see option: 3-4 credits
- BB 317/BI 317 *SCIENTIFIC THEORY AND PRACTICE
- BI 306 **ENVIRONMENTAL ECOLOGY
- BI 319/Z 319 *CRITICAL THINKING AND COMMUNICATION IN THE LIFE SCIENCES
- BI 371 *ECOLOGICAL METHODS
- BI 373 *FIELD METHODS IN MARINE ECOLOGY
- BOT 323 *FLOWERING PLANTS OF THE WORLD
- HSTS 415 **THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY
- MB 385 *EMERGING INFECTIOUS DISEASES AND EPIDEMICS
- PHL 474 *PHILOSOPHY OF BIOLOGY

### Upper-division Science Electives
Complete an option or select two of the following three tracks: 6-8 credits

#### Track I Integrative Biology Course
Select one of the following:
- BI 358 SYMBOSES AND THE ENVIRONMENT
- BI 375 FIELD METHODS IN ECOLOGICAL RESTORATION (OSU Cascades)
- BI 427 PALEOBIOLOGY
- BI 456 PHYLOGENETICS
- BI 481 BIOGEOGRAPHY
- BI 483 POPULATION BIOLOGY
- BI 485 MONSTER BIOLOGY
- BI 495 DISEASE ECOLOGY
- MB 480 GENERAL PARASITOLOGY
- Z 350 ANIMAL BEHAVIOR
- Z 361 & Z 362 INVERTEBRATE BIOLOGY and INVERTEBRATE BIOLOGY LABORATORY (If not used above)
- Z 371 & Z 372 VERTEBRATE BIOLOGY and VERTEBRATE BIOLOGY LABORATORY (If not used above)
- Z 425 EMBRYOLOGY AND DEVELOPMENT (If not used above)
- Z 437 VERTEBRATE ENDOCRINOLOGY
- Z 438 BEHAVIORAL NEUROBIOLOGY
- Z 461 MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY (Hatfield Marine Science Center [if not used above])

#### Track II Experiential Credits
Select a combination of 3 credits of the following:
- BI 309 TEACHING PRACTICUM (by approval)

### Track III Upper-division Science Elective Course
Select 3 or more credits

</tr>
</tbody>
</table>

### Total credits required for graduation: 180

1. For pre-health students except veterinary medicine
2. Biology students must complete the BI 211 *PRINCIPLES OF BIOLOGY, BI 212 *PRINCIPLES OF BIOLOGY, BI 213 *PRINCIPLES OF BIOLOGY or BI 211H *PRINCIPLES OF BIOLOGY, BI 212H *PRINCIPLES OF BIOLOGY, BI 213H *PRINCIPLES OF BIOLOGY with a C– or better to continue on to take upper-division Biology (BI) and Zoology (Z) course work. These courses are arranged in the order they are generally taken.
3. Biology majors are required to take a comprehensive, two-hour Biology Major Field Test their final OSU term (or spring term if they will graduate in summer) in order to graduate. BI 498 SENIOR BIOLOGY FIELD TEST. For further information, go to http://ib.oregonstate.edu/advising/MFT-info.
4. Declaring an option will alter the elective categories below, and all options automatically clear the Upper-division Science Electives requirement. See the individual options or MyDegrees for details. Biology and Society electives also count as baccalaureate core courses.
5. Select an additional 3+ credit, 300–400 level course from the College of Science (BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, Z) not used to complete other major requirements. Some courses are excluded (see below). Science courses outside of COS and courses and internships completed internationally may be used by Biology Lead Advisor approval. Courses from other majors, minors or Baccalaureate Core Synthesis requirements not used to meet other major requirements may also be used.

### EXCLUDED COURSES: 401–410 credits (except as outlined above or by approval), BB 350 ELEMENTARY BIOCHEMISTRY, BB 490 BIOCHEMISTRY 1: STRUCTURE AND FUNCTION—BB 492 BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, BI 331 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY—BI 333 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, BI 341 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY—BI 343 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, CH 334 ORGANIC CHEMISTRY, CH 335 ORGANIC CHEMISTRY, CH 336 ORGANIC CHEMISTRY, ST 314 INTRODUCTION TO STATISTICS FOR ENGINEERS, Z 361 INVERTEBRATE BIOLOGY/Z 362 INVERTEBRATE BIOLOGY LABORATORY, Z 461 MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY and any 399 or 499 courses not specifically approved by the Biology Lead Advisor.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Major Code:** 509

Select one of the following:

| ST 351 | INTRODUCT TO STATISTICAL METHODS 4 |

**Biology Undergraduate Major (BS, HBS)**
Ecology Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Biology major Ecology option is designed to provide students with a strong background in the theory and applications of ecology and environmental studies. It couples the core biological sciences background from the Biology major with required ecology, conservation, field methods, and environmental policy course work. A variety or upper-division ecology and organismal biology electives can be chosen based on individual interests. Undergraduate research and internship experience are strongly recommended for option students, and three credits can be applied to the Electives. The Ecology option provides excellent preparation for graduate programs in ecology.

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Ecology option course work in four years. Courses used to satisfy the Ecology option requirements also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Elective requirements for the Biology major.

It is recommended that Ecology option students take ST 411 METHODS OF DATA ANALYSIS and ST 412 METHODS OF DATA ANALYSIS in place of ST 352 INTRODUCTION TO STATISTICAL METHODS for the major statistics requirement.

Several Ecology option courses may also be used to satisfy areas of the baccalaureate core, and it is recommended that students take COMM 111 *PUBLIC SPEAKING to complete the Biology major baccalaureate core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

Genetics Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Biology major Genetics option is designed to provide a solid background in genetic theory and methods, as well as their application to evolutionary questions. Option students couple the core biological sciences background from the Biology major with genetics laboratory-intensive course work in addition to electives in the areas of evolutionary genetics and bioinformatics. Undergraduate research or internship experience is strongly recommended for option students, and three credits can be applied to the Upper-division Science Elective requirements. The Genetics option is an excellent way to prepare for graduate programs in genetics and evolutionary biology.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional course work in the Genetics option in four years.

Courses used to satisfy the Genetics option requirements also satisfy the Physiology, Writing Intensive and Upper-division Science Elective requirements for the Biology major.

The statistics courses in the Genetics option also complete half of the Biology major statistics requirement (ST 352 INTRODUCTION TO STATISTICAL METHODS).

It is recommended that Genetics option students take COMM 111 *PUBLIC SPEAKING to complete the Biology major baccalaureate core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

### Writing Intensive Course

Select one of the following:

- BB 317/B 317 *SCIENTIFIC THEORY AND PRACTICE
- BI 319/Z 319 *CRITICAL THINKING AND COMMUNICATION IN THE LIFE SCIENCES

### Evolutionary Genetics Elective

Select one of the following:

- BB 486 ADVANCED MOLECULAR GENETICS
- BI 456 PHYLOGENETICS
- BOT 460 FUNCTIONAL GENOMICS

### Bioinformatics

Select one course from the following:

- BB 485 APPLIED BIOINFORMATICS
- BOT 476 INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES

### Upper-Division Elective

Complete one of the following tracks:

**3 Track I Experiential Learning Credits**

Select any combination of 3 credits of the following:

- BI 401 RESEARCH AND SCHOLARSHIP (by approval)
- BI 410 INTERNSHIP (by approval or international internships approved by the Biology Chief Advisor)

**Track II Science Course**

Select one course

- 3

Total Hours 45-46

1 Following completion of ST 351 INTRODUCTION TO STATISTICAL METHODS.
2 One 3+ credit, 300–400 level course from the College of Science (BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, and Z) may be used to meet this requirement with the exception of the courses listed below as excluded. Students who do not complete BI 315 MOLECULAR BIOLOGY LABORATORY as part of the Genetics option must take a qualifying WIC course which can be used to meet this requirement. Other science courses outside of College of Science and courses taken internationally may be used by biology chief advisor approval. Courses from other majors, minors or baccalaureate core requirements not used to meet requirements above may also be used.

**EXCLUDED COURSES**: 401–410 credits (except as outlined above or by approval), BB 350 ELEMENTARY BIOCHEMISTRY, BB 490 BIOCHEMISTRY 1: STRUCTURE AND FUNCTION—BB 492 BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, BI 331 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY—BI 333 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, BI 341 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY—BI 343 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, CH 334 ORGANIC CHEMISTRY, CH 335 ORGANIC CHEMISTRY, CH 336 ORGANIC CHEMISTRY, ST 314 INTRODUCTION TO STATISTICS FOR ENGINEERS, Z 361 INVERTEBRATE BIOLOGY/Z 362 INVERTEBRATE BIOLOGY LABORATORY, Z 461 MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY and any 399 or 499 courses not specifically approved.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Option Code: 517

Marine Biology Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Marine Biology option is designed to give students a strong background in the biology of marine organisms and their habitats. The core biological sciences background of the Biology major is coupled with field and laboratory course work in marine biology, ecology, conservation,
and oceanography. The option emphasizes research and includes experiential courses completed in residence at the OSU Hatfield Marine Science Center in Newport, Oregon. Additional research or internship experience is strongly recommended for option students, and three credits can be applied to the option electives. The Marine Biology option provides excellent preparation for graduate programs in marine biology. Students completing the Marine Biology option cannot seek the Marine Biology and Ecology minor.

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Marine Biology option course work in four years. At least one term in residence at Hatfield Marine Science Center is required (spring). Courses used to satisfy the Marine Biology option also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course and the Upper-division Science Electives in the Biology major.

The Marine Biology option requires acceptance into the BI 450 *MARINE BIOLOGY AND ECOLOGY course, which is typically taken spring term of junior year at Hatfield Marine Science Center. The course covers marine invertebrates, algae and fishes, as well as sections on marine ecology, conservation and policy. Students apply to, and are accepted, the fall term before the spring they plan to attend. Applications are available in the Integrative Biology office in Cordley Hall 3029.

It is recommended that Marine Biology option students take COMM 111 *PUBLIC SPEAKING to complete the Biology major baccalaureate core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

### Physiology and Behavior Option

**Option Code: 572**

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Biology major Physiology and Behavior option is designed to provide a rigorous foundation in the comparative physiology and behavior of animals. Core biological sciences from the Biology major are coupled with course work in behavior, physiology and organismal biology. Undergraduate research or internship experience is strongly recommended for option students, and three credits can be applied to the electives for the option. The Physiology and Behavior option provides excellent preparation for graduate programs in animal behavior, physiology and other areas of organismal biology.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional course work in the Physiology and Behavior option in four years. Courses used to satisfy the Physiology and Behavior option requirements also satisfy the Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Elective requirements for the Biology major.

Students may pursue either the Physiology and Behavior, Pre-Dental, Pre-Medical or Pre-Veterinary Medicine options with the Biology major—no dual combinations are permitted.

It is recommended that Physiology and Behavior option students take PH 201 *GENERAL PHYSICS-PH 203 *GENERAL PHYSICS. It is also recommended that COMM 111 *PUBLIC SPEAKING be used to complete...
the Biology major Baccalaureate Core communications requirement. Students should also consider taking PSY 202 *GENERAL PSYCHOLOGY, which is optional but required for some of the Psychology elective courses.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

Select 3 or more credits

Total Hours 36-38

Pre-Dentistry/Biology Option
This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Pre-Dentistry/Biology option is designed to meet the requirements for most dental schools in the U.S., but students should consult the requirements for specific schools before they apply because requirements can change. The option couples the comprehensive biological sciences background of the Biology major with human physiology laboratory experiences and important social science requirements. Dedicated health profession advisors work with Pre-Dentistry/Biology option students to integrate essential professional experiences during their time at OSU.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Dentistry/Biology option course work in four years. Students may not complete any combination of the Pre-Medical, Pre-Dental option or Physiology and Behavior options. Completion of the Pre-Dental option requires a 3.0 cumulative GPA in major and option course work. Courses used to satisfy the Pre-Dentistry/Biology option requirements also satisfy the Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Electives requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.

Students may pursue either the Pre-Dentistry, Pre-Veterinary Medicine, Pre-Medicine or Physiology and Behavior options within the Biology major - no combinations of these options are permitted.

Students interested in private practice should also consider taking BA 215 FUNDAMENTALS OF ACCOUNTING or BA 260 INTRODUCTION TO ENTREPRENEURSHIP.
It is recommended that Pre-Dentistry/Biology option students take COMM 218 *INTERPERSONAL COMMUNICATION to complete the Biology major baccalaureate core communications requirement.

The option sections and courses within them are arranged in the order they are generally completed.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Option Code: 713

Pre-Education Biology Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Biology major Pre-Education option is designed to complete the requirements for the Science Education option in the OSU Education master’s degree and other U.S. graduate licensure programs for secondary education. Students should consult the requirements for specific schools before they apply because requirements can change. The option couples the strong background of the Biology major with core science education and science electives, as well as a required practicum experience. Students receive specific education advising to integrate teaching and other essential professional experiences during their time at OSU.

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Education option course work in four years. Courses used to satisfy the Pre-Education option requirements also satisfy the Physics/Computer Science and Quantitive Applications and Upper-division Science Electives requirements in the Biology major.

It is recommended that Pre-Education option students take COMM 111 *PUBLIC SPEAKING to complete the Biology major OSU Baccalaureate Core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

Pre-Medicine/Biology Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Pre-Medicine/Biology option is designed to meet the requirements for most medical schools (Track I) or physician assistant schools (Track II) in the U.S., but students should consult the requirements for specific schools before they apply because requirements can change. The option couples the comprehensive biological sciences background of the Biology major with intensive physiology laboratory experiences and important social science requirements. Dedicated health profession advisors work with Pre-Medicine/Biology option students to integrate essential professional experiences during their time at OSU.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Medicine/Biology option course work in four years. Biology students may obtain a Pre-Medicine option by satisfying the Core and either Track I or Track II below with a 3.0 or higher cumulative GPA in major and option course work. Courses used to satisfy the Pre-Medicine option requirements also satisfy the Biology and Society, Physics/Computer Science and Quantitative Applications, Organismal Biology, Physiology, Writing Intensive Course and Upper-Division Science Electives requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.

Students may pursue either the Pre-Medicine, Pre-Dentistry, Pre-Veterinary Medicine or Physiology and Behavior options within the Biology major—no dual combinations of these options are permitted.

Students interested in private practice should also consider taking BA 215 FUNDAMENTALS OF ACCOUNTING, or BA 260 INTRODUCTION TO ENTREPRENEURSHIP.

It is recommended that Pre-Medicine/Biology option students take COMM 218 *INTERPERSONAL COMMUNICATION, to complete the Biology major baccalaureate core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

Upper-Division Elective
Select one of the following paths: 3

Pre-Physician Experiential Learning Credits
Complete any combination of 3 credits of the following

BI 309 TEACHING PRACTICUM (by approval)
BI 401 RESEARCH AND SCHOLARSHIP (by approval)
BI 409 ADVANCED TEACHING PRACTICUM (by approval)

Pre-Physician Assistant Science Elective Course
Select 3 credits 1

Total Hours 24
Pre-Veterinary Medicine Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1046)

The Biology major Pre-Veterinary Medicine option is designed to meet OSU College of Veterinary Medicine prerequisites and other U.S. veterinary schools, but students should consult the requirements for specific schools before they apply because requirements can change. The Pre-Veterinary Medicine option couples the strong biological sciences background of the Biology major with core animal anatomy and physiology laboratories and animal-focused science electives. Dedicated professional advisors work with Pre-Veterinary Medicine option students to integrate animal handling and other essential professional experiences during their time at OSU.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Veterinary Medicine option course work in four years. Completion of the Pre-Veterinary Medicine option requires a 3.0 cumulative GPA in major and option course work. Courses used to satisfy the Pre-Veterinary Medicine option requirements also satisfy the Physics'Computer Science and Quantitative Applications, Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Elective requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.

Students may pursue either the Pre-Veterinary Medicine, Pre-Dentistry, Pre-Medicine or Physiology and Behavior options within the Biology major—no dual combinations of these options are permitted.

Students interested in private practice should also consider taking BA 215 FUNDAMENTALS OF ACCOUNTING, or BA 260 INTRODUCTION TO ENTREPRENEURSHIP.

It is recommended that Pre-Veterinary Medicine option students take COMM 111 *PUBLIC SPEAKING to complete the Biology major baccalaureate core communications requirement.

The option sections and courses within them are arranged in the order they are generally completed.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

Track II Science Elective Course

Select 3 plus credits ²

Total Hours: 43-46

¹ One 3+ credit, 300-400 level course from the College of Science (BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, and Z) may be used to meet this requirement with the exception of the courses listed below as excluded. Other science courses outside of COS and courses or internships taken internationally may be used by Biology chief advisor approval. Courses from other majors, minors or baccalaureate core requirements not used to meet requirements above may also be used.

² EXCLUDED COURSES: 401–410 credits (except as outlined above or by approval), BB 350 ELEMENTARY BIOCHEMISTRY, BB 490 BIOCHEMISTRY 1: STRUCTURE AND FUNCTION—BB 492 BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, BI 331 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY—BI 333 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, BI 341 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY—BI 343 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, CH 334 ORGANIC CHEMISTRY, CH 335 ORGANIC CHEMISTRY, CH 336 ORGANIC CHEMISTRY, ST 314 INTRODUCTION TO STATISTICS FOR ENGINEERS, Z 361 INVERTEBRATE BIOLOGY/Z 362 INVERTEBRATE BIOLOGY LABORATORY, Z 461 MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY and any 399 or 499 courses not specifically approved.
entered into cooperative research programs in other departments, with the Cascade Mountains and Willamette Valley. Students also have access to the H.J. Andrews Experimental Forest and in natural areas around Newport, the Hatfield Marine Science Center in southeastern Oregon, and at the Oregon Health and Science University in Portland, and with the Primate Research Center in Beaverton.

As part of their training, all students participate in the departmental seminar program, and doctoral students spend at least one year as teaching assistants. Most students are supported by graduate teaching or research assistantships. Students are expected to have broad competency in biology. The master's program leads to a thesis or research report (nonthesis option) on a specific problem; the PhD program emphasizes independent thesis research on a major topic at the forefront of the chosen field.

Major Code: 6300

Integrative Biology Graduate Minor

Minor Code: 6310

Marine Biology and Ecology Minor

Administered by the Department of Integrative Biology under the School of Life Sciences.

Students must complete the core of the minor and either track outlined below. The minor requires one or more terms in residence at Hatfield Marine Science Center, typically during junior year spring (Track II) or summer (Track I). The courses in the Marine Biology and Ecology minor may be shared with major requirements. Students cannot receive any combination of the Biology minor, Marine Biology and Ecology minor or the Marine Biology option. The minor requires the BI 211 *PRINCIPLES OF BIOLOGY, BI 212 *PRINCIPLES OF BIOLOGY or BI 213 *PRINCIPLES OF BIOLOGY series and a term or more of chemistry and ST 351 for required course work. The BI 450 *MARINE BIOLOGY AND ECOLOGY course requires BI 370 ECOLOGY and has enrollment restrictions.

The BI 450 *MARINE BIOLOGY AND ECOLOGY course (see Track II) is taught each spring term at Hatfield Marine Science Center and is by application only. It covers marine invertebrates, algae and fishes, as well as sections on marine ecology, conservation and policy. Students apply to and are accepted the fall term before the spring they plan to attend. Applications are available fall term in the Integrative Biology office in Cordley 3029.

The BI 111 INTRODUCTION TO MARINE LIFE IN THE SEA: MARINE HABITATS is an optional weekend experiential course at Hatfield Marine Science Center that complements the minor, particularly for students with little or no previous marine experience.

</tbody>
</table>

Students must also complete their General Chemistry series and CH 331 ORGANIC CHEMISTRY with a C– in each term to move on to other Chemistry (CH) course work.

Students majoring in Biology, BioHealth Sciences, Fisheries and Wildlife Sciences, or Zoology cannot seek a dual or double major in any combination of these four majors. Zoology majors cannot seek the Biology minor.

Microbiology

The Department of Microbiology is part of the School of Life Sciences. Microbiology is concerned with the forms and activities of bacteria, archaea, fungi, protozoa, and viruses. It plays varied roles in the practical applications of technology and medicine, as well as in the most theoretical problems of biology. Microbiologists are involved in activities as diverse as the study of gene structure, the control of disease, and the industrial processes based on the ability of microorganisms to decompose and synthesize complex organic molecules. Microbiology is one of the most rewarding of professions because it provides the opportunity to be in contact with all the other natural sciences and thus to contribute in many different ways to the betterment of life.

Undergraduate Studies in Microbiology

Many fields of microbiology are available to students and research workers. These include fundamental areas such as the physiology, ecology, and genetics of microorganisms; and the applications of microbiology concerned with soil and water quality, food safety, immunology, and human, animal and plant diseases. Undergraduate studies prepare students for admission to professional schools, graduate programs in microbiology, and for positions in education and as health officers, sanitarians and biotechnicians in private industry, state and federal government.

High school students or community college transferees considering a career in microbiology will find it helpful to have a strong background in mathematics and chemistry. An excellent advising program is available to undergraduates, and prospective students are encouraged to consult with a departmental advisor or with faculty members working in an area of interest to them. Upper-division students are also encouraged to carry out a research project in the laboratory of a faculty member and/or to serve as an undergraduate teaching assistant. Several partial scholarships are available for microbiology majors. For more information, contact a microbiology advisor.

Undergraduate Studies in BioHealth Sciences

Specialized programs are offered to students who wish to pursue careers in health-related fields. Such programs provide excellent academic preparation for students who plan to enter medical, pharmacy, or dental school, and for those choosing careers in physician assistant, physical therapy, optometry, clinical laboratory science, and podiatry. The curricula of the BioHealth Sciences major and accompanying options generally fulfills requirements at the respective professional schools. Because specific requirements vary from school to school, it is the student’s responsibility to check requirements for any school to which the student plans to apply.

Graduate Studies

The Department of Microbiology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. Major fields of study in the program include molecular biology, microbial physiology, genetics, virology, soil and aquatic microbiology, immunology, pathogenic microbiology, and microbial genomes. The department also participates in the Master of Arts in Interdisciplinary Studies program. Students in both the master’s and PhD programs are required to complete a research project leading to a thesis. Students pursuing the PhD degree must

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
complete both written and oral qualifying examinations. Teaching and research assistantships are available.

For additional information, contact the department head or other faculty members conducting research in areas that are of interest.

**Undergraduate Programs**

**Major**
- BioHealth Sciences (p. 1073)
- **Pre-professional Options in Health Sciences**
  - Pre-Clinical Laboratory Science
  - Pre-Dentistry
  - Pre-Medicine/Pre-Podiatry
  - Pre-Optometry
  - Pre-Pharmacy
  - Pre-Physical Therapy
  - Pre-Physician Assistant
- Microbiology (p. 1082)
  - Option
    - Aquatic Microbiology
    - Pre-Medicine/Microbiology

**Minor**
- Microbiology (p. 1081)

**Graduate Programs**

**Major**
- Microbiology (p. 1080)

**Minor**
- Microbiology (p. 1081)

Advising:
Microbiology: 226 Nash Hall, 541-737-4441
BioHealth Sciences: 225 Nash Hall, 541-737-3875

**Faculty**

**Professors** Bartholomew, Bermudez, Dreher, Field, Giovannoni, Kent, Ream, Sarker, Schuster, Trempy

**Emeritus Faculty** Bottomley, Geller, Rohrmann

**Associate Professors** Vega-Thurber, Halsey, Mueller

**Assistant Professors** David, Lowry, Sharpton

**Senior Instructor/Advisor** Bruslind

**Instructor/Advisor** Evans, Massoni

**Biohealth Sciences**

**BHS 107. HEALTH PROFESSIONS: DENTAL. (1 Credit)**
Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.

**BHS 110. BIOHEALTH SCIENCES ORIENTATION. (1 Credit)**
Introduction of incoming BioHealth Sciences students to college life with an emphasis on faculties, facilities, services, and curricula in BHS. Exposure to career opportunities for students interested in the BioHealth Sciences. Graded P/N.

**BHS 199. SPECIAL TOPICS. (1-16 Credits)**
Graded P/N.

**Equivalent to:** GS 199

This course is repeatable for 16 credits.

**BHS 255. ALLIED HEALTH MICROBIOLOGY. (4 Credits)**
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSLISTED as MB 255.

**Attributes:** CPBS – Core, Pers, Biological Science

**BHS 316. PRINCIPLES OF IMMUNOLOGY. (3 Credits)**
Interactions of the innate and adaptive immune responses in the context of infectious diseases, autoimmune diseases, immunodeficiencies and immunotherapies. This course is designed for non-microbiology majors.

**Prerequisites:** MB 230 with C- or better or ((BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-])

**BHS 323. MICROBIAL INFLUENCES ON HUMAN HEALTH. (3 Credits)**
How microorganisms contribute in beneficial and detrimental ways to human health. Emphasis on microbial contributions to cancer, gut health, chronic infection and autoimmune diseases. This course is part of the Writing Intensive Curriculum for the BioHealth Sciences major. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisites:** MB 302 with D- or better or (BB 314 with D- or better or BB 314H with D- or better) or BB 450 with D- or better

**BHS 329. MECHANISMS OF DISEASE: INTRODUCTION TO GENERAL PATHOLOGY. (3 Credits)**
An introduction to basic principles of disease, focused on structural and functional changes of cells, tissues and organs, and their relationships to clinical disease. The emphasis of the course is at the cellular to organ level, but will cover some on molecular mechanisms as pertinent.

**Prerequisites:** (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-])

**BHS 340. HUMAN VIROLOGY. (4 Credits)**
Properties of viruses, their biology, pathogenesis and concern to society. Emphasis on viruses causing human disease. CROSSLISTED as MB 340.

**Prerequisites:** (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or (BI 211 [C-] and BI 212 [C-] and BI 213 [C-])

**Equivalent to:** MB 340

**BHS 401. RESEARCH. (1-16 Credits)**

**Equivalent to:** GS 401

This course is repeatable for 16 credits.
BHS 403. THESIS. (1-16 Credits)
Equivalent to: GS 403
This course is repeatable for 16 credits.

BHS 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: GS 405
This course is repeatable for 16 credits.

BHS 406. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

BHS 407. SEMINAR. (1-16 Credits)
Graded P/N.
Equivalent to: GS 407
This course is repeatable for 16 credits.

BHS 410. SCIENCE INTERNSHIP. (1-12 Credits)
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
Equivalent to: GS 410
This course is repeatable for 12 credits.

BHS 415. ONE HEALTH IN PRACTICE. (3 Credits)
One health is the concept that human, animal and environmental health are all intertwined. Utilizes current one health issues such as disease outbreaks and antimicrobial resistance to encourage students from diverse fields to develop interdisciplinary collaboration and communication skills. CROSSTLISTED as VMB 415.

BHS 499. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies.
Equivalent to: MB 299H
This course is repeatable for 16 credits.

MB 110. ORIENTATION TO MICROBIOLOGY. (1 Credit)
Introduction of incoming microbiology students to college life with an emphasis on faculties, facilities, services, and curricula in microbiology. Exposure to career opportunities in microbiology. Graded P/N.

MB 201. LABORATORY SKILLS. (1-16 Credits)
These credits are designed for students who are doing experiential learning in a research laboratory on campus, performing basic laboratory tasks that are not elevated to the level of an independent research project. Graded P/N.
This course is repeatable for 16 credits.

MB 230. *INTRODUCTORY MICROBIOLOGY. (4 Credits)
Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 230H

MB 230H. *INTRODUCTORY MICROBIOLOGY. (4 Credits)
Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: MB 230

MB 255. *ALLIED HEALTH MICROBIOLOGY. (4 Credits)
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSTLISTED as BHS 255.
Attributes: CPBS – Core, Pers, Biological Science

MB 290. SUCCESS IN MICROBIOLOGY. (1 Credit)
Science skills, science literacy, ethics, and professional development to build a successful career in Microbiology. Learn the process of research, access and analyze primary literature, evaluate user-generated science content, practice professional skills, and identify and plan for experience-building opportunities such as jobs, research and internships. Sophomore standing or higher.

MB 299. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies.
Equivalent to: MB 299H
This course is repeatable for 16 credits.

MB 299H. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 299
This course is repeatable for 16 credits.

MB 302. GENERAL MICROBIOLOGY. (3 Credits)
Emphasis on cytology, physiology, virology, growth and control of growth with coverage of the role of microorganisms in nature, in disease, and as useful tools.
Prerequisites: (CH 332 with C- or better or CH 335 with C- or better) and ((BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C-] or BI 213H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
MB 303. GENERAL MICROBIOLOGY LABORATORY. (2 Credits)
Development of laboratory techniques; exercises designed to reinforce concepts covered in MB 302. MB 302 is a prereq that may be taken prior to or concurrently with MB 303. Lec/lab.
Prerequisites: MB 302 (may be taken concurrently) with D- or better

MB 310. BACTERIAL MOLECULAR GENETICS. (3 Credits)
Introductory concepts of bacterial molecular genetics. Topics include DNA replication, mutation, DNA repair, DNA recombination, transposons, bacteriophages, genetic manipulation, and gene regulation.
Prerequisites: MB 302 with D- or better and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-]) and (BB 450 [D-] or BB 490 [D-]) and (BB 451 (may be taken concurrently) [D-] or BB 491 (may be taken concurrently) [D-])

MB 311. *MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE. (3 Credits)
Scientific writing, laboratory notebook composition, experimental design, and laboratory experiments in bacterial molecular biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (MB 303 with D- or better or MB 303H with D- or better) and MB 310 (may be taken concurrently) [D-]

MB 312. BACTERIAL PHYSIOLOGY AND METABOLISM. (3 Credits)
Molecular structure and function, macromolecular assembly, energy production and use, and cellular growth.
Prerequisites: MB 310 with D- or better and BB 451 [D-]

MB 314. AQUATIC MICROBIOLOGY. (3 Credits)
A survey of the diversity, ecology, and physiology of microbes in aquatic systems, with emphasis on their roles in food webs, chemical cycling, and human health. Provides the background knowledge and quantitative/analytical skills necessary to interpret and critique current and historical research in the fields of general aquatic microbiology.
Prerequisites: (CH 231 with D- or better or CH 231H with D- or better or CH 121 with D- or better) and (CH 232 [D-] or CH 232H [D-] or CH 122 [D-]) and (CH 233 [D-] or CH 233H [D-] or CH 123 [D-])

MB 330. *DISEASE AND SOCIETY. (3 Credits)
Infectious disease has many effects on the development of society, and likewise, human interactions affect the development of disease. The course examines these interactions with a focus on the role of race, class, and economic status in the development of epidemics. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

MB 340. HUMAN VIROLOGY. (4 Credits)
Properties of viruses, their biology, pathogenesis and concern to society. Emphasis on viruses causing human disease. CROSSLISTED as BHS 340.
Prerequisites: (BI 204 with C- or better and BI 205 [C-] or BI 206 [C-]) or (BI 211 [C-] and BI 212 [C-] and BI 213 [C-])
Equivalent to: BHS 340

MB 385. *EMERGING INFECTIOUS DISEASES AND EPIDEMICS. (3 Credits)
Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and BI 213 [D-] or (BI 213H [D-])

MB 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: MB 399H
This course is repeatable for 16 credits.

MB 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 399
This course is repeatable for 16 credits.

MB 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

MB 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

MB 405. READING AND CONFERENCE. (1-16 Credits)
Conference: Instruction in microbiology. This course is repeatable for 16 credits.

MB 406. SPECIAL PROJECTS. (1-16 Credits)
Reading and Conference/instructor in Microbiology. This course is repeatable for 16 credits.

MB 407. SEMINAR. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.

MB 410. OCCUPATIONAL INTERNSHIP. (1-10 Credits)
Supervised work experience at selected cooperating institutions, agencies, laboratories, clinics or companies. Maximum of 10 credits allowed but no more than 3 credits may be used to satisfy microbiology major requirement of 36 credits. Graded P/N.
This course is repeatable for 10 credits.

MB 416. IMMUNOLOGY. (3 Credits)
Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.
Prerequisites: BB 450 with D- or better or BB 490 with D- or better

MB 417. IMMUNOLOGY LABORATORY. (2 Credits)
Laboratory on the applications of current immunological techniques.
Prerequisites: (MB 303 with D- or better or MB 303H with D- or better and MB 416 (may be taken concurrently) [D-])

MB 420. MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY. (3 Credits)
a survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust.
Prerequisites: BB 451 with D- or better

MB 422. AQUATIC MICROBIOLOGY LABORATORY. (2 Credits)
Laboratory analyzing field samples from freshwater and marine systems to examine patterns of microbiological communities.
Prerequisites: MB 303 with D- or better and MB 314 [D-]

MB 430. BACTERIAL PATHOGENESIS. (3 Credits)
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection.
Prerequisites: MB 302 with D- or better and MB 310 [D-] and (BB 451 [D-] or BB 491 [D-])
MB 434. VIROLOGY. (3 Credits)
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease.
Prerequisites: (BB 450 with D- or better or BB 450H with D- or better) and (BB 451 [D-] or BB 451H [D-]) or (BB 490 [D-] and BB 491 [D-] and BB 492 [D-])

MB 435. PATHOGENIC MICROBES LABORATORY. (2 Credits)
Laboratory experiments to illustrate concepts presented in MB 430 and/ or MB 434, focusing on pathogenic microorganisms.
Prerequisites: (MB 303 with D- or better or MB 303H with D- or better) and MB 302 [D-] and (MB 430 (may be taken concurrently) [D-] or MB 434 (may be taken concurrently) [D-])

MB 436. THE HUMAN MICROBIOME. (3 Credits)
Examines the biodiversity, function, and medical importance of the communities of microorganisms that inhabit the human body. A diverse array of topics will be discussed, including how the human microbiome is studied, case studies of specific aspects of the human microbiome, and emerging theories of how the microbiome influences human health.
Prerequisites: BI 314 with D- or better or BB 314 with D- or better or BI 314H with D- or better or MB 302 with D- or better

MB 440. FOOD MICROBIOLOGY. (3 Credits)
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and gerrnicidal treatment during processing, preparing, and distributing food for consumption.
Prerequisites: MB 302 with D- or better

MB 441. FOOD MICROBIOLOGY LABORATORY. (2 Credits)
Laboratory techniques to accompany MB 440/MB 540.
Prerequisites: (MB 303 with D- or better or MB 303H with D- or better) and MB 440 (may be taken concurrently) [D-]

MB 448. MICROBIAL ECOLOGY. (3 Credits)
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life.
Prerequisites: MB 302 with D- or better

MB 456. MICROBIAL GENETICS AND BIOTECHNOLOGY. (3 Credits)
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized.
Prerequisites: MB 302 with D- or better and (BB 450 [D-] or BB 490 [D-]) and (BB 451 [D-] or BB 491 [D-]) and (MB 310 [D-] or BB 492 [D-])

MB 479. FERMENTATION MICROBIOLOGY. (3 Credits)
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
CROSSLISTED as FST 479/FST 579.
Prerequisites: (BI 212 with C- or better or BI 212H with C- or better) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
Equivalent to: FST 479

MB 490. MICROBIOLOGY CAPSTONE EXPERIENCE. (2 Credits)
Capstone experience for microbiology students to practice professional skills necessary to sustain a career in science. Students will work in teams to analyze research data and communicate this analysis, in addition to explore career opportunities and learn how to successfully compete for jobs. Graded P/N.
Prerequisites: MB 302 with D- or better

MB 491. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE. (3 Credits)
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/FW 591.
Equivalent to: FW 491

MB 496. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB. (2 Credits)
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/FW 596.
Equivalent to: FW 496

MB 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

MB 501. RESEARCH. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

MB 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

MB 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MB 507. SEMINAR. (1 Credit)
Graded P/N.
This course is repeatable for 99 credits.

MB 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

MB 511. SCIENTIFIC SKILLS. (1 Credit)
Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.

MB 512. HIGHLIGHTS OF MICROBIOLOGY. (1 Credit)
Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.

MB 513. MICROBIAL SYSTEMS. (3 Credits)
Presentation of a modern view of microbiology through the lens of microbes’ influences on our planet’s habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many cross-disciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.

MB 516. IMMUNOLOGY. (3 Credits)
Basic theory and applications of immunochrometry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.

MB 517. IMMUNOLOGY LABORATORY. (2 Credits)
Laboratory on the applications of current immunological techniques.
MB 520. MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY. (3 Credits)
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust.

MB 530. BACTERIAL PATHOGENESIS. (3 Credits)
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection.

MB 534. Virology. (3 Credits)
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease.

MB 540. FOOD MICROBIOLOGY. (3 Credits)
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption.

MB 541. FOOD MICROBIOLOGY LABORATORY. (2 Credits)
Laboratory techniques to accompany MB 440/MB 540.
Prerequisites: MB 540 (may be taken concurrently) with C or better

MB 548. MICROBIAL ECOLOGY. (3 Credits)
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life.

MB 555. BIOLOGY OF THE PROKARYOTES. (3 Credits)
An integrative graduate course examining bacterial and archaean life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term.

MB 556. MICROBIAL GENETICS AND BIOTECHNOLOGY. (3 Credits)
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized.

MB 579. FERMENTATION MICROBIOLOGY. (3 Credits)
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. CROSSLISTED as FST 479/ FST 579.
Equivalent to: FST 579

MB 580. GENERAL PARASITOLOGY. (3 Credits)
Introduction to parasitology. The course emphasizes medical parasitology, but will cover a broad overview of parasitology, covering important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals.

MB 591. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE. (3 Credits)
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/FW 591.
Equivalent to: FW 591

MB 596. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB. (2 Credits)
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as MB 496/MB 596.
Equivalent to: FW 596

MB 599. SELECTED TOPICS. (0-6 Credits)
This course is repeatable for 24 credits.

MB 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

MB 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

MB 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MB 607. SEMINAR. (1 Credit)
Graded P/N. This course is repeatable for 99 credits.

MB 610. INTERNSHIP. (1-9 Credits)
This course is repeatable for 16 credits.

MB 668. MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION. (4 Credits)
Theoretical and practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.

MB 699. SPECIAL TOPICS. (0-16 Credits)
Lec/lab. This course is repeatable for 16 credits.

BioHealth Sciences Undergraduate Major (BS, HBS)

Administered by the Department of Microbiology under the School of Life Sciences.

The undergraduate BS degree in BioHealth Sciences is designed for students seeking an interdisciplinary background in the life sciences, public health, and social sciences. The major consists of a comprehensive core with a strong biological and physical science foundation combined with a variety of health and social science courses in a unique blend formulated to meet the needs of students interested in a career in the healthcare field. BioHealth Sciences majors receive excellent training for a variety of professional programs.

Students may elect to complete one transcript-visible option in Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Medicine/Pre-Podiatry, Pre-Optometry, Pre-Pharmacy, Pre-Physical Therapy, or Pre-Physician Assistant. An option is not required. Options in the BHS major require additional credits beyond the basic BHS major, although most students can complete the BHS core plus the additional course work in four years.

Students in the BHS major must complete the following with a C– or better:

* Baccalaureate Core Course (BCC)

Select one of the following WIC courses: 3-4
- BHS 323  *MICROBIAL INFLUENCES ON HUMAN HEALTH
- HSTS 417  **HISTORY OF MEDICINE
- MB 385  *EMERGING INFECTIOUS DISEASES AND EPIDEMICS

Health and Social Sciences Core

- H 210  *INTRODUCTION TO THE HEALTH CARE SYSTEM 3
- H 225  *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS 4
- PHAR 210  TERMINOLOGY OF THE HEALTH SCIENCES 2
- PSY 201  *GENERAL PSYCHOLOGY 3
- PSY 202  *GENERAL PSYCHOLOGY 3

Select two of the following Cultural Competency courses: 6-8
- ANTH 240  INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY
- ANTH 345  *BIOLOGICAL AND CULTURAL CONSTRUCTIONS OF RACE
- ANTH 361  *FOOD JUSTICE or FCSJ 361  *FOOD JUSTICE
- ECON 383  *THE ECONOMICS OF DISCRIMINATION
- ES 351  *ETHNIC MINORITIES IN OREGON
- ES 353  *ENVIRONMENTAL RACISM
- HDFS 201  *CONTEMPORARY FAMILIES IN THE U.S.
- MB 330  *DISEASE AND SOCIETY
- PHL 280  *ETHICS OF DIVERSITY
- PSY 426  *PSYCHOLOGY OF GENDER
- PSY 466  *FAT STUDIES or WGSS 461  *FAT STUDIES
- QS 262  *INTRODUCTION TO QUEER STUDIES or WGSS 262  *INTRODUCTION TO QUEER STUDIES
- SOC 426  *SOCIAL INEQUALITY
- SPAN 221 SPANISH FOR MEDICAL PROFESSIONS I
- SPAN 222 SPANISH FOR MEDICAL PROFESSIONS II
- WGSS 414  *SYSTEMS OF OPPRESSION IN WOMEN'S LIVES

Upper-division Science Courses

Select two of the following: 6-8
- BB 331  *INTRODUCTION TO MOLECULAR BIOLOGY
- BB 332  *MOLECULAR MEDICINE
- BB 360  INTRODUCTION TO NEUROSCIENCE
- BB 460  ADVANCED CELL BIOLOGY
- BB 485  APPLIED BIOINFORMATICS
- BI 309  TEACHING PRACTICUM
- BI 409  ADVANCED TEACHING PRACTICUM
- ST 352  INTRODUCTION TO STATISTICAL METHODS
- Z 431  VERTEBRATE PHYSIOLOGY I
- Z 432  VERTEBRATE PHYSIOLOGY II
- Z 437  VERTEBRATE ENDOCRINOLOGY
- Z 438  BEHAVIORAL NEUROBIOLOGY
- UD CH 300–CH 498  2
- UD MB 400–MB 498  3

not to include CH 331, CH 332, CH 334, CH 335, CH 336, CH 337 or CH 374.

not to include MB 416.
Remaining Bacc Core and/or electives to reach the 180 credit requirement

Total credits required for graduation 180

1. This requirement is automatically met if any BHS option is completed.
2. Not to include CH 331 ORGANIC CHEMISTRY, CH 332 ORGANIC CHEMISTRY, CH 334 ORGANIC CHEMISTRY, CH 335 ORGANIC CHEMISTRY, CH 337 ORGANIC CHEMISTRY LABORATORY or CH 374 *TECHNOLOGY, ENERGY, AND RISK.
3. Not to include MB 416 IMMUNOLOGY.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

No more than 3 credits may come from the following courses:

| BB 332 | *MOLECULAR MEDICINE |
| BB 360 | INTRODUCTION TO NEUROSCIENCES |
Clinical laboratory scientists (also known as medical laboratory scientists or medical technologists) perform routine and highly specialized diagnostic procedures in clinical laboratories. They must be certified by the American Society of Clinical Pathologists (ASCP) or the National Certification Agency (NCA). Certification requires 12 to 15 months of training at an accredited professional school of clinical laboratory science. Oregon currently has one such school jointly administered by the Oregon Health and Science University (OHSU) and Oregon Institute of Technology (OIT); Washington and California have several. Most clinical laboratory science schools require a bachelor of science degree for admission to their educational program; however, some schools (notably OHSU/OIT) accept students who have had three years of appropriate college work. Most pre-clinical laboratory science students complete the BS degree in BioHealth Sciences/Pre-CLS option before attending a clinical laboratory science program (4+1 program).

The BioHealth Sciences major combined with the Pre-Clinical Laboratory Science option is designed to meet most or all of the requirements for admission to CLS programs across the U.S. Satisfactory completion of the pre-CLS option facilitates, but does not guarantee, admission to a CLS program; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Clinical Laboratory Science option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Clinical Laboratory Sciences option, MB 416 IMMUNOLOGY will meet the BHS core requirement for an immunology course.

Pre-Clinical Laboratory Science Option

This option is offered within the following major(s):

- PSY 381 ABNORMAL PSYCHOLOGY
- SOC 204 *INTRODUCTION TO SOCIOLOGY
- SOC 206 *SOCIAL PROBLEMS AND ISSUES

Total Hours: 24-25
The BioHealth Sciences major is suited for several students who already have a bachelor’s degree in another subject and wish to combine their training in science with several years of additional study to train them to provide the education and training necessary to practice medicine. A physician is a Doctor of Medicine (MD), trained specifically to diagnose and treat conditions of the body, while a podiatrist is a Doctor of Podiatric Medicine (DPM), trained specifically to diagnose and treat conditions of the foot, ankle, and related structures of the leg.

The BioHealth Sciences major combined with the Pre-Dentistry option facilitates, but does not guarantee, admission to dental schools across the U.S. Satisfactory completion of the Pre-Medicine/Pre-Podiatry option is designed to meet most or all of the requirements for admission to allopathic, osteopathic, or podiatric medical schools across the U.S. Satisfactory completion of the Pre-Medicine/Pre-Podiatry option facilitates, but does not guarantee, admission to any medical school. The BioHealth Sciences major combined with the Pre-Dentistry option facilitates, but does not guarantee, admission to dental schools across the U.S. Satisfactory completion of the Pre-Medicine/Pre-Podiatry option is designed to meet most or all of the requirements for admission to allopathic, osteopathic, or podiatric medical schools across the U.S. Satisfactory completion of the Pre-Medicine/Pre-Podiatry option facilitates, but does not guarantee, admission to any medical school.

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Dentistry option, MTH 251 *DIFFERENTIAL CALCULUS and MTH 252 INTEGRAL CALCULUS will meet the BHS core requirement for two MTH courses at MTH 111 *COLLEGE ALGEBRA or higher. ST 351 INTRODUCTION TO STATISTICAL METHODS, if chosen, will meet the BHS core requirement for a statistics course. BHS 323 *MICROBIAL INFLUENCES ON HUMAN HEALTH, if chosen, will meet the BHS core requirement for a Writing Intensive Course (WIC).

Students may not combine the Pre-Dentistry/BioHealth Sciences option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Dentistry option, MTH 251 *DIFFERENTIAL CALCULUS and MTH 252 INTEGRAL CALCULUS will meet the BHS core requirement for two MTH courses at MTH 111 *COLLEGE ALGEBRA or higher. ST 351 INTRODUCTION TO STATISTICAL METHODS, if chosen, will meet the BHS core requirement for a statistics course. BHS 323 *MICROBIAL INFLUENCES ON HUMAN HEALTH, if chosen, will meet the BHS core requirement for a Writing Intensive Course (WIC).

Students may not combine the Pre-Dentistry/BioHealth Sciences option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

The book, Medical School Admission Requirements, published by the Association of American Medical Colleges (https://www.aamc.org/), lists specific entrance requirements for allopathic (MD) schools. The American Association of Colleges of Osteopathic Medicine (http://www.aacom.org/) lists requirements for osteopathic (DO) schools. The American Association of College of Podiatric Medicine (http://www.aacpm.org/) lists requirements for podiatric (DPM) schools. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

Admission to medical school is very competitive. Students are chosen according to grades, MCAT scores, medical experience, and apparent motivation for medicine. A member of the premedical committee is assigned to each student as an advisor.

Students may not combine the Pre-Medicine/PrePodiatry option with any other option offered with the BioHealth Sciences major (Pre-Physician Assistant, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy).

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Medicine/Pre-Podiatry option, MB 416 IMMUNOLOGY will meet the BHS core requirement for an immunology course, MTH 251 *DIFFERENTIAL CALCULUS and MTH 252 INTEGRAL CALCULUS will meet the BHS core requirement for two MTH courses at MTH 111 *COLLEGE ALGEBRA or higher, and ST 351 INTRODUCTION TO STATISTICAL METHODS will meet the BHS core requirement for a statistics course. PHL 444 *BIOMEDICAL ETHICS, if chosen, will meet the bacc core requirement for a Science, Technology, and Society synthesis course. ANTH 383 *INTRODUCTION TO MEDICAL ANTHROPOLOGY, if chosen,
will meet the bacc core requirement for a Contemporary Global Issues synthesis course.

**Option Code: 775**

### Pre-Optometry Option

**This option is offered within the following major(s):**

- BioHealth Sciences - College of Science (p. 1073)

The Pre-Optometry option is designed to meet most or all of the requirements for admission to optometry programs across the U.S., including OSU's Doctor of Optometry (OD) professional program. Satisfactory completion of the pre-optometry option facilitates, but does not guarantee, admission to optometry school; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Optometry option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Physical Therapy, Pre-Physician Assistant).

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Optometry option, MTH 251 *DIFFERENTIAL CALCULUS and MTH 252 INTEGRAL CALCULUS meet the BHS core requirement of two MTH courses at MTH 111 *COLLEGE ALGEBRA or higher. ST 201 PRINCIPLES OF STATISTICS meets the BHS core requirement for a statistics course.

**Pre-Pharmacy Option**

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1073)

The Pre-Pharmacy/BioHealth Sciences option is designed to meet most or all of the requirements for admission to pharmacy schools across the U.S., including OSU's Doctor of Pharmacy (PharmD) professional program. Satisfactory completion of the pre-pharmacy option facilitates, but does not guarantee, admission to pharmacy school; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Pharmacy/BioHealth Sciences option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Dentistry, Pre-Clinical Laboratory Science, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Pharmacy option, MTH 251 *DIFFERENTIAL CALCULUS will meet the BHS core requirements for one MTH class at MTH 111 *COLLEGE ALGEBRA or higher.

Pre-Physical Therapy Option

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1073)

The BioHealth Sciences major combined with the Pre-Physical Therapy option is designed to meet most or all of the requirements for admission to PT programs across the U.S. Satisfactory completion of the pre-PT option facilitates, but does not guarantee, admission to a PT program; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

Students may not combine the Pre-Physical Therapy option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy).

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Physician Assistant option, ST 201 PRINCIPLES OF STATISTICS meets the BHS core requirement for a statistics course. H 312 *HIV/AIDS AND STIS IN MODERN SOCIETY, if chosen, will meet the bacc core requirement for a synthesis class in the Contemporary Global Issues category.

Option Code: 585

Pre-Physician Assistant Option

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1073)

The BioHealth Sciences major combined with the Pre-Physician Assistant option is designed to meet most or all of the requirements for admission to PA programs across the U.S. Satisfactory completion of the pre-PA option facilitates, but does not guarantee, admission to a PA program. Admission to physician assistant school is very competitive and student selection is based on grades, GRE scores, clinical experiences and more. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

Students may not combine the Pre-Physician Assistant option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy).

Courses may be used to meet requirements for the BHS core and/or bacc core. The BHS core requirement for a statistics course. H 312 *HIV/AIDS AND STIS IN MODERN SOCIETY, if chosen, will meet the bacc core requirement for a synthesis class in the Contemporary Global Issues category.

Option Code: 597

Microbiology Graduate Major (MA, MS, PhD)

Graduate Areas of Concentration

- Environmental microbiology
- Food microbiology
- Genomics
- Immunology
- Microbial ecology
- Microbial evolution
- Parasitology
- Pathogenic microbiology
- Virology

Administered by the Department of Microbiology under the School of Life Sciences.

The Department of Microbiology offers graduate programs leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Major fields of study are diverse and include basic and applied aspects of virology and bacteriology; immunology and pathogenic microbiology; environmental and applied microbiology, and microbial evolution. Students may minor in a variety of related disciplines in the life sciences, such as molecular and cellular biology and biochemistry. Integrated minors are often selected in order to allow students to develop a program that best serves their needs.
The principal objectives of the graduate major in Microbiology are the completion of a comprehensive research project and preparation of a thesis. Student programs and research projects are developed with the major professor and are subject to approval by a committee of graduate faculty members. Microbiology research facilities are excellent and well-equipped.

For more information, write to Jerri Bartholomew, Professor, Department of Microbiology, 220 Nash Hall, OSU, Corvallis OR 97331-3804 or email: jerri.bartholomew@oregonstate.edu.

Students in the Microbiology Graduate Program are required to take the following core sequence of courses during their first year of enrollment in the program:

<table>

**Major Code: 5700**

**Microbiology Graduate Minor**

Administered by the Department of Microbiology under the School of Life Sciences.

**Minor Code: 5700**

**Microbiology Minor**

Also available via Ecampus.

Administered by the Department of Microbiology (https://catalog.oregonstate.edu/college-departments/science/school-life-sciences/microbiology) under the School of Life Sciences.

The Microbiology minor is designed for students from other majors who have an additional interest in the field of microbiology. Student majoring in Biology (BI) or BioHealth Sciences (BHS) cannot declare the Microbiology minor. The courses used for the MB minor may be shared with other majors, options, and minors.

Some of the courses required for the Microbiology minor have additional prerequisites or grade requirements that are separate from the MB minor. At a minimum students will need to take BI 204/205/206 or BI 211/212/213.

**Minor Code: 570**

**Electives**

Choose a total of 23 credits from the classes listed in Category I and Category II below. No more than 9 credits can come from Category II.

**Category I Electives**

Choose 14-23 credits from the list of courses below:

- BHS 316  PRINCIPLES OF IMMUNOLOGY
- BHS 323  *MICROBIAL INFLUENCES ON HUMAN HEALTH
- BHS 329  MECHANISMS OF DISEASE: INTRODUCTION TO GENERAL PATHOLOGY
- BOT 350  INTRODUCTORY PLANT PATHOLOGY
- BOT 461  MYCOLOGY
- MB 310  BACTERIAL MOLECULAR GENETICS
- MB 311  *MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE
- MB 312  BACTERIAL PHYSIOLOGY AND METABOLISM
- MB 314  AQUATIC MICROBIOLOGY
- MB 385  *EMERGING INFECTIOUS DISEASES AND EPIDEMICS
- MB 401  RESEARCH
- MB 406  SPECIAL PROJECTS
- MB 416  IMMUNOLOGY
- MB 417  IMMUNOLOGY LABORATORY
- MB 420  MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY
- MB 434  VIROLOGY
- MB 435  PATHOGENIC MICROBES LABORATORY
- MB 436  THE HUMAN MICROBIOME
- MB 440  FOOD MICROBIOLOGY
- MB 441  FOOD MICROBIOLOGY LABORATORY
- MB 448  MICROBIAL ECOLOGY
- MB 456  MICROBIAL GENETICS AND BIOTECHNOLOGY
- MB 479/FST 479  FERMENTATION MICROBIOLOGY
- MB 480  GENERAL PARASITOLOGY
- MB 491/FW 491  FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE
- MB 496/FW 496  FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB

**Category II Electives**

Choose 0-9 credits from the courses listed below:

- ANS 302  COMMON DISEASES OF COMPANION ANIMALS
- BB 485  APPLIED BIOINFORMATICS
- BI 420  *VIRUSES IN MODERN SOCIETY
- BI 495  DISEASE ECOLOGY
- BOT 324  *FUNGI IN SOCIETY
- BOT 480  PHOTOSYNTHESIS AND PHOTOBIOLOGY
- FST 360  FOOD SAFETY AND SANITATION
- FST 460  BREWING SCIENCE
- FST 461  BREWING ANALYSIS
- H 312  *HIV/AIDS AND STIS IN MODERN SOCIETY
- H 320  INTRODUCTION TO HUMAN DISEASE
- MB 330  *DISEASE AND SOCIETY

**Total Hours**

27-28

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Not more than 3 credits can consist of MB 401 or MB 406. Other blanket courses (MB 403, MB 405, MB 407, MB 410) cannot be used to satisfy the minor requirement. All of these courses must be graded, not taken S/U.

Minor Code: 570

**Microbiology Undergraduate Major (BS, HBS)**

Administered by the Department of Microbiology under the School of Life Sciences.

The undergraduate BS degree in Microbiology (MB) is designed for students seeking a focused education in the field of microbiology. The major consists of a comprehensive core with a strong biological and physical science foundation combined with select fundamental courses in microbiology, followed by the completion of a number of upper division microbiology courses selected by each student based on their specific interests. The Microbiology major integrates a number of laboratory classes, providing students with a wide variety of hands-on experiences. Students can also choose to do microbiology research in a number of laboratories on campus. Microbiology majors receive excellent training for a variety of professional programs, such as medical, dental, and pharmacy programs, as well as graduate school.

The Microbiology major has a built-in Chemistry minor. Students may also elect to complete one transcript-visible option in Pre-Medicine or Aquatic Microbiology. An option is not required. Options in the MB major require additional credits beyond the basic MB major; although most students can complete the MB degree requirements plus the additional course work for either option in four years. The Pre-Medicine option will help prepare a student for taking the standardized test required for medical school application (MCAT), as well as provide an additional perspective in the humanities that is valued by medical programs. The Aquatic Microbiology option takes advantage of an area of expertise by various researchers at OSU, exposing students to both fundamental concepts as well as unique perspectives related to microbiology in both freshwater and ocean systems.

To receive the BS degree in Microbiology, a student must complete all university baccalaureate core requirements plus departmental requirements included in the list below.

- Majors must have 36 credits in microbiology with a minimum GPA of 2.00.
- Majors must receive a C– or better in the following courses:

<table>

**Total credits required for graduation** 180

- MB 401 RESEARCH, MB 403 THESIS, and MB 405 READING AND CONFERENCE cannot account for more than 3 of the required 36 microbiology credits.
- MB 406 SPECIAL PROJECTS can account for an additional 3 microbiology credits.
- Additional credits in these subjects will count toward elective credits.
- All required science courses must be taken for a grade.
- CH 324 QUANTITATIVE ANALYSIS may be taken with S/U grading, however, if taken S/U, the student will not receive a chemistry minor.
- 22 credits must come from the approved 400-level microbiology courses, to include MB 490 MICROBIOLOGY CAPSTONE EXPERIENCE (2 credits) and 2 credits from 400-level laboratory courses.

Aquatic Microbiology Option

This option is offered within the following major(s):

- Microbiology - College of Science (p. 1082)

The Aquatic Microbiology option encompasses a core of oceanography and microbiology courses heavy in coverage of aquatic systems, combined with a selection of elective courses offered by various departments. The option is designed to provide a microbiology major with a detailed understanding of the role that microbes play in aquatic systems and for aquatic organisms, as well as an understanding of aquatic systems in general. The option complements the Marine Studies Initiative, which should stimulate interest in aquatic systems by students across campus.

Courses used to satisfy the Aquatic Microbiology option requirements may also satisfy the Upper-Division Microbiology Electives and Upper-Division Microbiology laboratory requirements in the Microbiology major.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Pre-Medicine/Microbiology Option

This option is offered within the following major(s):

- Microbiology - College of Science (p. 1082)

The Pre-Medicine/Microbiology option for the Microbiology major is designed to meet the current requirements for application to most medical schools in the U.S. (although students are advised to consult the requirements for specific schools before they apply, in the case of changes). Students pursuing a Microbiology degree receive a broad education in microbiological topics. The option focuses some of that education at the 400-level to ensure that students pursuing medicine take microbiology courses of interest to the medical field. In addition, the option adds important social science requirements and medical humanities electives that are not part of the general microbiology degree, but that are important for students pursuing a degree in medicine.

Courses used to satisfy the Pre-Medicine option requirements may also satisfy the Upper-Division Microbiology Electives and Upper-Division Microbiology laboratory requirements in the Microbiology major. Courses may also be used to satisfy areas of the baccalaureate core.

Statistics

The Department of Statistics offers undergraduate service courses and an undergraduate minor, as well as graduate courses and programs leading to the MA, MS, and PhD degrees or to a minor for an advanced degree in other fields. Students planning to major in statistics at the graduate level should have a minimum of mathematics through multivariable calculus, linear algebra, and an upper-division sequence in mathematical statistics.

Survey Research Center

Website: http://stat.oregonstate.edu/src/survey-research-center

Established in 1973, the Oregon State University Survey Research Center (OSU-SRC) provides comprehensive survey services including proposal development, questionnaire design and layout, survey administration and data collection, survey analysis and professional report writing. Our staff offers customized options, working with our clients to determine the best approach to collect survey data based on the study objectives, population of interest, and budgetary concerns. Our past and current clients include federal, state, and local agencies, national non-profit organizations, and OSU-affiliated entities. The OSU-SRC maintains several contracts with clients to provide our services on a recurrent basis, from monthly, annually, to ever few years.

Operating as a center for research in survey methodology, the OSU-SRC routinely conducts experiments using self-administered surveys with an aim to contribute to survey methodology research. The OSU-SRC subsequently publishes related material in scientific journals and presents experimental findings at professional meetings. The OSU-SRC provides expertise using survey best practices to maximize response rates and reduce non-response bias. Various sampling plans are examined for each survey to minimize total survey error. The OSU-SRC also offers consulting for OSU community members on research-based survey design and analysis.

Faculty

Professors Gitelman, Lesser, Pantula, Rojo
Associate Professors Di, Emerson, Madsen, Xue
Assistant Professors Bhattacharyya, Fuentes, D. Jiang, Y. Jiang,
McLaughlin, Mondal, Sharpton, Wickham
Senior Research Associate Newton
Research Associates Nawrocki, Sifneos
Senior Instructor II Kollath
Instructors Jager, Moore

Statistics

ST 199. SPECIAL TOPICS. (3 Credits)
This course can only be taken once unless instructor permission is provided.

ST 201. PRINCIPLES OF STATISTICS. (4 Credits)
Study design, descriptive statistics, the use of probability in statistical arguments, sampling, hypothesis tests and confidence intervals for means and proportions. Lec/rec.
Prerequisites for ST 202: PRINCIPLES OF STATISTICS. (4 Credits)
Comparisons of means and proportions between two populations (t-tests, chi-square tests, nonparametric tests), simple linear regression, correlation. Lec/rec.
Prerequisites: ST 201 with D- or better

ST 314. INTRODUCTION TO STATISTICS FOR ENGINEERS. (3 Credits)
Probability, common probability distributions, sampling distributions, estimation, hypothesis testing, control charts, regression analysis, experimental design.
Prerequisites: MTH 252 with D- or better or MTH 252H with D- or better

ST 351. INTRODUCTION TO STATISTICAL METHODS. (4 Credits)
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Equivalent to: ST 351H

ST 351H. INTRODUCTION TO STATISTICAL METHODS. (4 Credits)
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: ST 351

ST 352. INTRODUCTION TO STATISTICAL METHODS. (4 Credits)
Randomization tests and other nonparametric tests for one- and two-sample inference, simple and multiple linear regression, correlation, one- and two-way analysis of variance, logistic regression. Lec/lab.
Prerequisites: ST 351 with D- or better or ST 351H with D- or better

ST 406. PROJECTS. (1-16 Credits)
Section 1: Projects, graded P/N. Section 2: Teaching Experience, graded P/N. Section 3: Directed Work, graded P/N. This course is repeatable for 16 credits.

ST 407. SEMINAR. (1 Credit)
Attendance at consulting practicum. Graded P/N.

ST 410. INTERNSHIP. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.

ST 411. METHODS OF DATA ANALYSIS. (4 Credits)
Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab.

ST 412. METHODS OF DATA ANALYSIS. (4 Credits)
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab.
Prerequisites: ST 411 with D- or better

ST 413. METHODS OF DATA ANALYSIS. (4 Credits)
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab.
Prerequisites: ST 412 with D- or better

ST 415. DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS. (3 Credits)
Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split-plotting; random effects and variance components.
Prerequisites: ST 352 with D- or better or ST 411 with D- or better or ST 511 with D- or better

ST 421. INTRODUCTION TO MATHEMATICAL STATISTICS. (4 Credits)
Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions.

ST 422. INTRODUCTION TO MATHEMATICAL STATISTICS. (4 Credits)
Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing.
Prerequisites: ST 421 with D- or better

ST 431. SAMPLING METHODS. (3 Credits)
Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods.

ST 435. QUANTITATIVE ECOLOGY. (3 Credits)
Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods.
Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year.
Prerequisites: ST 412 with D- or better or ST 512 with D- or better

ST 439. SURVEY METHODS. (3 Credits)
Survey design, data collection and analysis, general methodology.
Prerequisites: ST 201 with D- or better or ST 351 with D- or better

ST 441. PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS. (4 Credits)
Prerequisites: ST 422 with D- or better or ST 522 with D- or better

ST 443. APPLIED STOCHASTIC MODELS. (3 Credits)
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques.
Prerequisites: ST 421 with D- or better or ST 521 with D- or better

ST 499. SPECIAL TOPICS. (1-4 Credits)
May be repeated for credit. This course is repeatable for 8 credits.

ST 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ST 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ST 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ST 506. PROJECTS. (1-16 Credits)
Section 1: Projects. Section 2: Teaching Experience. Section 3: Directed Work. This course is repeatable for 16 credits.
ST 507. SEMINAR. (1 Credit)
Section 1: Attendance at consulting practicum, 1 credit. Section 3:
Research Seminar, 1 credit. Section 4: Computing Facilities, 1 credit. All
sections graded P/N.
This course is repeatable for 99 credits.

ST 509. CONSULTING PRACTICUM. (2 Credits)
The student provides statistical advice, under faculty guidance, on
university-related research projects.
This course is repeatable for 99 credits.

ST 510. INTERNSHIP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ST 511. METHODS OF DATA ANALYSIS. (4 Credits)
Graphical, parametric and nonparametric methods for comparing two
samples; one-way and two-way analysis of variance; simple linear
regression. Lec/lab.

ST 512. METHODS OF DATA ANALYSIS. (4 Credits)
Multiple linear regression, including model checking, dummy variables,
using regression to fit analysis of variance models, analysis of
covariance, variable selection methods. Lec/lab.
Prerequisites: ST 511 with C or better

ST 513. METHODS OF DATA ANALYSIS. (4 Credits)
Principles of experimental design; randomized block and factorial
designs; repeated measures; categorical data analysis, including
comparison of proportions, tests of homogeneity and independence
in cross-classified frequency tables, Mantel-Haenszel test, logistic
regression, log-linear regression. Introduction to multivariate statistics.
Lec/lab.
Prerequisites: ST 512 with C or better

ST 515. DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS. (3 Credits)
Principles of experimental design; uses, construction and analysis of
completely randomized, randomized block and Latin square designs;
covariates; factorial treatments, split plotting; random effects and
variance components.

ST 516. FOUNDATIONS OF DATA ANALYSIS. (4 Credits)
Foundations of estimation and hypothesis testing; desirable properties
of estimators; maximum likelihood, one- and two-sample problems;
theoretical results are explored through simulations and analysis using R.
Offered via Ecampus only.

ST 517. DATA ANALYTICS I. (4 Credits)
Methods for modeling quantitative data and statistical learning--
simple and multiple linear regression; linear mixed effects models; data
imputation; prediction and cross-validation; scaling up to large datasets.
Simulations and data analysis using R. Offered via Ecampus only.
Prerequisites: ST 516 with C+ or better

ST 518. DATA ANALYTICS II. (4 Credits)
Statistical methods and data analysis techniques for count data.
Topics include tests for tables of counts, logistic regression, log-linear
regression, generalized linear mixed models, and issues for large
datasets. Data analysis in R.
Prerequisites: ST 517 with C+ or better

ST 521. INTRODUCTION TO MATHEMATICAL STATISTICS. (4 Credits)
Probability, random variables, expectation, discrete and continuous
distributions, multivariate distributions.

ST 522. INTRODUCTION TO MATHEMATICAL STATISTICS. (4 Credits)
Sampling distributions, Central Limit Theorem, estimation, confidence
intervals, properties of estimators, and hypothesis testing.
Prerequisites: ST 521 with C or better

ST 525. APPLIED SURVIVAL ANALYSIS. (3 Credits)
Statistical methods for analyzing survival data or time-to-event data,
which may be censored and/or truncated. Specific topics can vary term
to term, and could include Kaplan-Meier estimator; K-sample hypothesis
tests for survival data; Accelerated failure time model; Cox proportional
hazard regression model.
Prerequisites: ST 516 with C or better and ST 517 [C] and ST 518 [C]

ST 531. SAMPLING METHODS. (3 Credits)
Estimation of means, totals and proportions; sampling designs including
simple random, stratified, cluster, systematic, multistage and double
sampling; ratio and regression estimators; sources of errors in surveys;
capture-recapture methods.

ST 535. QUANTITATIVE ECOLOGY. (3 Credits)
Overview of statistical methods that are useful for analyzing ecological
data, including spatial pattern analysis, multivariate techniques, logistic
regression, Bayesian statistics and computer-intensive methods.
Consideration of special topics such as population dynamics, food webs
and ecological indicators. Not offered every year.

ST 537. DATA VISUALIZATION. (3 Credits)
Perceptual principles for displaying data; critique and improvement of
data visualizations; use of color in visualization; principles of tidy data;
strategies for data exploration; select special topics.
Prerequisites: ST 512 with C or better or ST 517 with C or better or ST 552
with C or better

ST 538. MODERN STATISTICAL METHODS FOR LARGE AND COMPLEX
DATA SETS. (3 Credits)
Provides students with the tools and experience to analyze big and
messy data and work effectively in a data science team. Covers the tools
to handle big data and answer statistical questions based on the data.
Includes three big data analysis projects that students work on in groups.
Focuses on proper use of modern data analysis techniques related to
regression, classification and clustering for data coming from a variety of
application fields. R will be the lingua franca.
Prerequisites: ST 512 with C or better or ST 517 with C or better or ST 552
with C or better or ST 412 with C or better

ST 539. SURVEY METHODS. (3 Credits)
Survey design, data collection and analysis, general methodology.

ST 541. PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS.
(4 Credits)
Review of probability, including univariate distributions and limit
theorems. Random-number generation and simulation of statistical
distributions. Bootstrap estimates of standard error. Variance reduction
techniques. Emphasis on the use of computation in statistics using the S-
Plus or MATLAB programming language. Lec/lab.

ST 543. APPLIED STOCHASTIC MODELS. (3 Credits)
Development of stochastic models commonly arising in statistics
and operations research, such as Poisson processes, birth-and-death
processes, discrete-time and continuous-time Markov chains, renewal
and Markov renewal processes. Analysis of stochastic models by
simulation and other computational techniques.
ST 551. STATISTICAL METHODS. (4 Credits)
Properties of t, chi-square and F tests; randomized experiments; sampling distributions and standard errors of estimators, delta method, comparison of several groups of measurements; two-way tables of measurements.

ST 552. STATISTICAL METHODS. (4 Credits)
Simple and multiple linear regression including polynomial regression, indicator variables, weighted regression, and influence statistics, nonlinerar regression and linear models for binary data.
Prerequisites: ST 551 with C or better

ST 553. STATISTICAL METHODS. (4 Credits)
Principles and analysis of designed experiments, including factorial experiments, analysis of covariance, random and mixed effect models.
Lec/lab.
Prerequisites: ST 552 with C or better

ST 555. ADVANCED EXPERIMENTAL DESIGN. (3 Credits)
Designs leading to mixed models including split plots, repeated measures, crossovers and incomplete blocks. Introduction to experimental design in industry including confounding, fractional factorials and response surface methodology. Analysis of unbalanced data.
Prerequisites: ST 553 with C or better

ST 557. APPLIED MULTIVARIATE ANALYSIS. (3 Credits)
Multivariate data structures, linear combinations; principal components, factor and latent structure analysis, canonical correlations, discriminant analysis; cluster analysis, multidimensional scaling. Not offered every year.

ST 558. MULTIVARIATE ANALYTIKS. (3 Credits)
Basics of matrix algebra, principal components analysis, cluster analysis, factor analysis, multidimensional scaling.
Prerequisites: ST 518 with C- or better

ST 559. BAYESIAN STATISTICS. (3 Credits)
Bayesian statistics for data analysis. Characterizations of probability; comparative (Bayesian versus frequentist) inference; prior, posterior and predictive distributions; hierarchical modeling. Computational methods include Markov Chain Monte Carlo for posterior simulation.

ST 561. THEORY OF STATISTICS. (4 Credits)
Distributions of functions of random variables, joint and conditional distributions, sampling distributions, convergence concepts, order statistics. Lec/rec.

ST 562. THEORY OF STATISTICS. (4 Credits)
Sufficiency, exponential families, location and scale families; point estimation: maximum likelihood, Bayes, and unbiased estimators; asymptotic distributions of maximum likelihood estimators; Taylor series approximations.
Prerequisites: ST 561 with C or better

ST 563. THEORY OF STATISTICS. (3 Credits)
Hypothesis testing; likelihood ratio, Bayesian, and uniformly most powerful tests; similar tests in exponential families; asymptotic distributions of likelihood ratio test statistics; confidence intervals.
Prerequisites: ST 562 with C or better

ST 565. TIME SERIES. (3 Credits)
Analysis of serially correlated data in both time and frequency domains. Autocorrelation and partial autocorrelation functions, autoregressive integrated moving average models, model building, forecasting; filtering, smoothing, spectral analysis, frequency response studies. Offered winter term in even years.

ST 566. TIME SERIES ANALYTICS. (3 Credits)
Focuses on statistical and analytical tools for analyzing data that are observed sequentially over time. Specific topics can vary term to term, and could include methods for exploratory time series analysis, linear time series models (ARMA, ARIMA), forecasting, spectral analysis and state-space models. The focus will be on applied problems, though some mathematical statistics is necessary for a solid understanding of the statistical issues. This course is designed for students in Data Analytics MS and Certificate programs.
Prerequisites: ST 516 with C or better and ST 517 [C] and ST 518 [C]

ST 567. SPATIAL STATISTICS. (3 Credits)
The analysis of spatial data. Graphical tools for exploring spatial data, geostatistics, variogram estimation, kriging, areal models, hierarchical spatial models, and spatio-temporal modelling. Offered winter term in odd years.

ST 591. INTRODUCTION TO QUANTITATIVE GENOMICS. (3 Credits)
Provides an overview of how genomic data is generated and analyzed. It focuses on the underlying biological motivation, theoretical concepts, and analytical challenges associated with genomic research, especially the generation of statistics that summarize genomic data. The class is organized as a combination of lectures and group literature review discussions. Students are expected to actively participate in the class. Students from diverse backgrounds, including quantitative, biological, and computations sciences, are encouraged to enroll.

ST 592. STATISTICAL METHODS FOR GENOMICS RESEARCH. (3 Credits)
Lectures include an overview of statistical methods commonly applied in genomics research. Specific methods can vary term to term, and could include cluster analysis, decision trees, dimension reduction tools, regression models, multiple testing adjustment, variable selection methods, etc. Journal clubs include team-based review and presentations of landmark papers in both statistical methodology and genomics research. Research experience includes whole-term collaboration between students from statistics and other disciplines on real projects.

ST 595. CAPSTONE PROJECT. (3 Credits)
Provides an opportunity for students to integrate and apply the analytics skills learned in MS in Data Analytics program to solve real-world problems and to interpret and communicate their results. Student teams will engage in the entire process of solving data science projects in realistic settings, from placing the problem into appropriate statistical framework to applying suitable analytic methods to the problem. Problem solving, written and oral communication skills will be emphasized.
Prerequisites: ST 516 with C or better and ST 517 [C] and ST 518 [C] and ST 558 [C]

ST 599. SPECIAL TOPICS. (1-4 Credits)
May be repeated for credit when topic varies.
This course is repeatable for 16 credits.

ST 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ST 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ST 606. PROJECTS. (1-16 Credits)
Section 1: Projects; Section 2: Teaching Experience, graded P/N; Section 3: Directed Work, graded P/N.
This course is repeatable for 16 credits.
ST 623. GENERALIZED REGRESSION MODELS I. (3 Credits)
Maximum likelihood analysis for frequency data; regression-type models for binomial and Poisson data; iterative weighted least squares and maximum likelihood; analysis of deviance and residuals; overdispersion and quasi-likelihood models; log-linear models for multidimensional contingency tables.
Prerequisites: ST 553 with C or better and ST 563 [C]

ST 625. GENERALIZED REGRESSION MODELS II. (3 Credits)
Parametric methods for the analysis of censored survival data, based mostly on large-sample likelihood theory. Specific topics include the Kaplan-Meier estimator, the log-rank test, partial likelihood, and regression models, including the Cox proportional-hazards model and its generalizations.
Prerequisites: ST 553 with C or better or ST 563 with C or better

ST 651. LINEAR MODEL THEORY. (3 Credits)
Least squares estimation, best linear unbiased estimation, parameterizations, multivariate normal distributions, distributions of quadratic forms, testing linear hypotheses, simultaneous confidence intervals. Offered alternate years.

ST 652. LINEAR MODEL THEORY. (3 Credits)
Advanced topics including classification models, mixed-effects models and multivariate models. Offered alternate years.
Prerequisites: ST 651 with C or better

ST 661. ADVANCED THEORY OF STATISTICS. (3 Credits)
Exponential families, sufficient statistics; unbiased, equivariant, Bayes, and admissible estimation. Offered alternate years.

ST 662. ADVANCED THEORY OF STATISTICS. (3 Credits)
Uniformly most powerful, unbiased, similar, and invariant tests. Offered alternate years.
Prerequisites: ST 661 with C or better

ST 663. ADVANCED THEORY OF STATISTICS. (3 Credits)
First-order and higher-order asymptotics; likelihood ratio, score, and Wald tests; Edgeworth and saddlepoint approximations. Offered alternate years.
Prerequisites: ST 662 with C or better

Statistics Graduate Major (MA, MS, PhD, MAIS)

Graduate Areas of Concentration
Statistics

The Department of Statistics offers Master of Arts, Master of Science, and Doctor of Philosophy degrees in Statistics. Students can concentrate on theory or applications, and programs can be tailored to emphasize such areas of interest as ecology, engineering, forestry, finance, mathematics, or oceanography. The thesis is optional for MS and MA degrees. Statistical consulting is part of the program, enabling the student to gain a deeper appreciation of the need, power, and applicability of statistical tools through exposure to real problems.

MS in Statistics

The MS program is designed to prepare a candidate for a career in industry or government or for further study at the PhD level. Recent MS graduates have found employment with the U.S. Environmental Protection Agency, U.S. Census Bureau, Abt Associates, state of Oregon, Fred Hutchinson Cancer Research Center, Kaiser Permanente, Mayo Clinic, Bureau of Labor Statistics, Department of Veteran’s Affairs, NOAA, MRI Global, and Capital One.
Prerequisites

- Single-variable and multivariable calculus (approximately 4 quarters).
- Linear algebra.
- One or more applied statistics courses (recommended, but not required).

Students who meet all of the requirements except for one or two courses may be granted provisional admission so they can begin their graduate studies while completing the remaining required courses. When the remedial course work is completed the Graduate School will remove the provisional status.

Total Hours: 53

1 Approved courses include all 500- and 600-level courses in the Statistics Department except:

- ST 511 METHODS OF DATA ANALYSIS
- ST 512 METHODS OF DATA ANALYSIS
- ST 513 METHODS OF DATA ANALYSIS
- ST 515 DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS
- ST 521 INTRODUCTION TO MATHEMATICAL STATISTICS
- ST 522 INTRODUCTION TO MATHEMATICAL STATISTICS

Courses with a zero middle digit and courses in other departments may be used only with the consent of the major professor (and minor professor if the course is listed in the minor).

A student intending to pursue the PhD in Statistics should review the mathematics prerequisites and requirements for that program and plan a course of study to satisfy them.

Other Requirements

- Pass written comprehensive exams in statistical methods and in statistical theory. These exams are given each year in September.
- Pass a final oral exam.

PhD in Statistics

The PhD program is designed to prepare a candidate for a career in teaching and research. Recent PhD graduates have found employment with US Geological Survey, Chase Bank, Bureau of Labor Statistics, USDA Forest Service, Weyerhauser, as well as with universities in the U.S. and abroad.

Prerequisites

- Equivalent to the OSU Master's degree in Statistics.
- Pass the MS comprehensive exams in methods and theory.
- Apply for admission to PhD program. (Evaluation is by the entire faculty. The evaluation criteria for admission are: course work, grades, MS comprehensive exam results, and any information you provide in your application giving evidence of capability to do original research.)
- Course work equivalent to MTH 311 ADVANCED CALCULUS and MTH 312 ADVANCED CALCULUS.

Total Hours: 121

Credits completed for an MS degree as well as the 36 or more credits of ST 603 THESIS count toward this total. The specific courses to be taken are decided at a meeting of the PhD committee.

Other Requirements

- Pass the preliminary exam over PhD course work.
- Write a thesis describing the results of original research.
- Pass the final examination over thesis and related material.

Major Code: 6150
### Statistics Graduate Minor

#### MS Minor in Statistics

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</table>

Select one or two of the following:  

- ST 513 METHODS OF DATA ANALYSIS  
- ST 515 DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS  
- ST 531 SAMPLING METHODS  
- ST 535 QUANTITATIVE ECOLOGY  
- ST 557 APPLIED MULTIVARIATE ANALYSIS  
- ST 565 TIME SERIES

Total Hours  

19-23

1 The student and/or minor professor may wish to add one or two additional courses.

### PhD Minor in Statistics

A PhD minor program in statistics should include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ST 521</td>
<td>INTRODUCTION TO MATHEMATICAL STATISTICS</td>
<td>8</td>
</tr>
<tr>

<tr>
<td>ST 511</td>
<td>METHODS OF DATA ANALYSIS</td>
<td>12</td>
</tr>
<tr>
<td>&amp; ST 512</td>
<td>and METHODS OF DATA ANALYSIS</td>
<td></td>
</tr>
<tr>
<td>&amp; ST 513</td>
<td>and METHODS OF DATA ANALYSIS</td>
<td></td>
</tr>
</tbody>
</table>

Select additional statistics courses approved by the minor professor:  

3-6

Total Hours  

23-27

1 If ST 551 STATISTICAL METHODS, ST 552 STATISTICAL METHODS, and ST 553 STATISTICAL METHODS are taken, the additional courses should total at least 3 credits.

2 If ST 511 METHODS OF DATA ANALYSIS, ST 512 METHODS OF DATA ANALYSIS, and ST 513 METHODS OF DATA ANALYSIS are taken, they should total at least 6 credits.

All programs must be approved by the student’s minor professor.

Minor Code: 6150

---

### Statistics Minor

The undergraduate minor in Statistics requires a minimum of 27 credits in statistics, including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ST 201</td>
<td>PRINCIPLES OF STATISTICS</td>
<td>3</td>
</tr>
<tr>
<td>ST 314</td>
<td>INTRODUCTION TO STATISTICS FOR ENGINEERS</td>
<td></td>
</tr>
<tr>
<td>ST 351</td>
<td>INTRODUCTION TO STATISTICAL METHODS</td>
<td></td>
</tr>
<tr>
<td>ST 352</td>
<td>INTRODUCTION TO STATISTICAL METHODS</td>
<td>4</td>
</tr>
<tr>
<td>ST 407</td>
<td>SEMINAR (Attendance at Consulting Practicum)</td>
<td>1</td>
</tr>
<tr>
<td>ST 421</td>
<td>INTRODUCTION TO MATHEMATICAL STATISTICS</td>
<td>8</td>
</tr>
<tr>
<td>&amp; ST 422</td>
<td>and INTRODUCTION TO MATHEMATICAL STATISTICS</td>
<td></td>
</tr>
</tbody>
</table>

Select at least 10 credits of additional approved courses:  

10

Total Hours  

26-27

1 ST 314 INTRODUCTION TO STATISTICS FOR ENGINEERS or ST 351 INTRODUCTION TO STATISTICAL METHODS may be taken in place of ST 201 PRINCIPLES OF STATISTICS.

Approved courses include:

<table>
<thead>
<tr>

^ Writing Intensive Course (WIC)

Other statistics-related courses may be substituted, subject to departmental approval.
Minor Code: 615
COLLEGE OF VETERINARY MEDICINE

The College of Veterinary Medicine at Oregon State University was established in 1975 with three major areas of responsibility—teaching, research, and public service. The college is fully accredited by the American Veterinary Medical Association's Council on Education.

200 Magruder Hall
Oregon State University
Corvallis, OR 97331-4801
DVM Information: 541-737-2098
DVM Degree Email: cvmproginfo@oregonstate.edu
Website: http://vetmed.oregonstate.edu/

Administration
Susan J. Tornquist, Lois Bates Acheson Dean, 541-737-6943,
susan.tornquist@oregonstate.edu
Luiz Bermudez, Head, Department of Biomedical Sciences, 541-737-6532,
luiz.bermudez@oregonstate.edu
Chris Cebra, Chair, Department of Clinical Sciences, 541-737-4456,
chris.cebra@oregonstate.edu
Helio de Morais, Director, Veterinary Teaching Hospital, 541-737-4458,
helio.demorais@oregonstate.edu
Robert Bildfell, Director, Veterinary Diagnostic Laboratory, 541-737-3261,
robert.bildfell@oregonstate.edu

Teaching
The college was established in 1975 and began its professional education program in 1979. Approximately 40 residents of Oregon and 16 nonresident students are selected to enter the OSU College of Veterinary Medicine. These students will complete all four years of their professional education in Corvallis. Completion of the professional program leads to the Doctor of Veterinary Medicine (DVM) degree.

There are two departments supporting the DVM doctoral program: Biomedical Sciences and Clinical Sciences.

Comprehensive research training is provided through graduate programs leading to the MS degree in Comparative Health Sciences.

Post-DVM residency training leading to board eligibility in several clinical disciplines and pathology is also available.

Research
Biomedical research is conducted in the college, supported by federal agencies such as NIH, USDA, DOE, as well as by a number of foundations. Collaboration with the OSU Agricultural Experiment Station, colleges of Pharmacy, Public Health and Human Sciences, Engineering and many other colleges, is part of the program. The research is of economic and public health significance, aimed at improving the health of animals and people.

The college emphasizes research of infectious diseases, such as those caused by Mycobacteria, Chlamydia, Clostridia, Vibrio, Mycoplasma, Cryptosporidium, herpesvirus, respiratory syncytial virus, influenza virus, and HIV-1 virus. Research is also conducted on immunity and nutrition, neuroscience, cancer, cardiovascular diseases, diabetes, reproductive diseases, and diseases of terrestrial and aquatic wildlife.

Public Service
The service programs focus on the diagnosis, prevention, treatment, and control and prevention of animal diseases. The college assists veterinary practitioners, animal owners, and the general public through the Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital.

The Veterinary Diagnostic Laboratory is a full-service facility providing a wide range of animal disease diagnostic testing services to veterinarians, animal owners, and public agencies. The laboratory offers testing and expertise in pathology, clinical pathology, bacteriology, and virology, and is accredited by the American Association of Veterinary Laboratory Diagnosticians.

The Veterinary Teaching Hospital is designed and equipped for diagnosis and medical and surgical treatment of canine, feline, equine, food animal, and camelid patients. Patients are admitted directly from animal owners and through referrals from practicing veterinarians in Oregon and the Pacific Northwest. Imaging (radiology, ultrasonography, fluoroscopy, CAT scan, MRI, and scintigraphy), anesthesiology, pharmacy, intensive care, and other services are available to support the hospital functions.

The Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital serve as learning centers where senior veterinary students and residents study animal disease, diagnosis, treatment, and prevention.

Providing continuing education for veterinarians is also considered a major responsibility of the college. One- to three-day intensive courses of instruction on specific topics are offered periodically.

Career Opportunities in Veterinary Medicine
Opportunities for employment in veterinary medicine are excellent. Nearly 70 percent of the professionally active veterinarians in the United States are engaged in private practice. Some practices are limited to types of animals, such as food animal, equine, or companion animal practices. Others involve specialties such as surgery, ophthalmology, cardiology, or radiology. In addition to private practice, there are numerous teaching and research opportunities in academic, government, and industrial settings. Expanding areas include laboratory animal medicine and public health.

Veterinary Student Expenses
Oregon resident students registered in the College of Veterinary Medicine will pay tuition and fees of approximately $7,106 per term. Students from the WICHE (http://www.wiche.edu/states) states will pay the same fees as Oregon resident students. Nonresident student fees currently are $13,733 per term.

Veterinary students must provide required professional attire, as well as dissection, surgical, and diagnostic instruments, and notes and books.

Occasional field trips are scheduled in the veterinary curriculum. Transportation is provided by the university for required trips, but students must provide their own food and lodging. For optional trips, the student is usually expected to provide transportation, lodging, and food. All other expenses, such as residence hall and living expenses, are the same as for students in other colleges of the university.

Students desiring additional information about veterinary medicine should write to the Office of the Dean, College of Veterinary Medicine, Oregon State University, 200 Magruder Hall, Corvallis, Oregon 97331-4801.
Policy on Laboratory and Duty Hours

During the professional curriculum, several laboratory exercises in the preclinical years require the use of live animals. The exercises are designed to complement didactic lectures and demonstrations through hands-on experience with various species of animals. In all instances, the animals are humanely treated and anesthetized if the procedures are potentially painful.

During the clinical years, animals are used in laboratory exercises in the teaching of basic surgical skills and medical procedures. In most instances, the animals are anesthetized. Strict protocol is enforced regarding the animals’ well-being in exercises requiring post-operative recovery. All use of animals in teaching is approved by the university’s Institutional Animal Care and Use committee.

During the fourth year of the veterinary curriculum, students complete rotations in sections of the Veterinary Teaching Hospital and Veterinary Diagnostic Laboratory. Emergency services are offered to the public on a 24-hour basis, seven days a week. Student assignments in the clinical blocks are demanding, and students are required to spend time at night, weekends, and holidays in the delivery of health care to patients. Hospital operations continue seven days per week, and students are responsible for their assigned tasks regardless of time and day of the week.

DVM and MPH Dual Degree

Students enrolled in the Doctor of Veterinary Medicine (DVM) degree program wishing also to complete a Master’s of Public Health Degree may do so if successfully admitted to the Graduate School and the College of Public Health and Human Sciences (CPHHS). Using pre-approved and cross-listed courses as electives, veterinary students may complete the MPH degree with an additional (5th) year of study.

The CPHHS offers an MPH degree in six tracks: Biostatistics; Epidemiology; Environment, Safety and Health; Health Management and Policy; Health Promotion and Health Behavior; and International Health.

In order to maximize use of elective courses in the dual degree program, it is important that veterinary students enter the dual degree option as early in their studies as possible.

The five core MPH courses are offered through distance education. In consultation with the student’s MPH adviser, internships, culminating activities and senior papers should be coordinated as well. The student’s MPH adviser must approve all veterinary courses counted toward the degree.

For more information, see http://health.oregonstate.edu/degrees/graduate/public-health/mph/dvm-mpw-dual-degree.

Professional Program

• Veterinary Medicine (p. 1102)

Veterinary Medicine Biomedical

VMB 110. PREVETERINARY MEDICINE. (1 Credit)
Introduction to the profession’s role in society. Graded P/N.

VMB 328. WILDLIFE CAPTURE AND IMMOBILIZATION. (2 Credits)
Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations. CROSSLISTED as FW 328. Lec/lab.
Equivalent to: FW 328
This course is repeatable for 4 credits.

VMB 415. ONE HEALTH IN PRACTICE. (3 Credits)
One health is the concept that human, animal and environmental health are all intertwined. The course will utilize current one health issues such as disease outbreaks and antimicrobial resistance to encourage students from diverse fields to develop interdisciplinary collaboration and communication skills. CROSSLISTED as BHS 415.
Equivalent to: BHS 415

VMB 499. SPECIAL TOPICS. (1-16 Credits)
Special studies course to allow different instructors the ability to teach a new class or one time class. Graded P/N.
This course is repeatable for 16 credits.
VMB 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMB 503. THESIS. (1-12 Credits)
This course is repeatable for 999 credits.

VMB 505. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMB 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMB 517. VETERINARY PHYSIOLOGY. (5 Credits)
Physiology of body fluids, muscles, membranes, intermediary metabolism, cardiovascular system, and metabolism.

VMB 518. VETERINARY PHYSIOLOGY. (5 Credits)
Physiology of gastrointestinal, endocrine and reproductive systems.
Prerequisites: VMB 517 with C or better

VMB 519. VETERINARY PHYSIOLOGY. (4 Credits)
Physiology of respiratory and renal systems and acid-base balance.
Prerequisites: VMB 518 with C or better

VMB 521. ANIMAL MODELS. (3 Credits)
Selection/use criteria for models describing animal or human diseases or processes with emphasis on experimental design, validation, transgenic technology, population dynamics, husbandry, and ethics.

VMB 523. ZOONOSES. (3 Credits)
Interactive examination of the molecular basis of diseases that are transmissible between animals and humans. Emphasis on bacterial, viral and parasitic pathogens of animals and humans.

VMB 601. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMB 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

VMB 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

VMB 606. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMB 607. SEMINAR. (1-16 Credits)
One-credit section; VMB 607 Sect. 1. Graded P/N.
This course is repeatable for 16 credits.

VMB 611. VETERINARY GROSS ANATOMY. (4 Credits)
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.

VMB 612. VETERINARY GROSS ANATOMY. (4 Credits)
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.

VMB 613. VETERINARY GROSS ANATOMY. (4 Credits)
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.

VMB 614. VETERINARY MICROSCOPIC ANATOMY. (4 Credits)
Structure and development of cells, tissues, organs, and organ systems of animals.

VMB 615. VETERINARY MICROSCOPIC ANATOMY. (3 Credits)
Structure and development of cells, tissues, organs, and organ systems of animals.

VMB 620. VETERINARY IMMUNOLOGY. (5 Credits)
Clinical and diagnostic aspects of immunological mechanisms, serological reactions; hypersensitivity, allergy, and disorders of the immune system.

VMB 621. GENERAL PATHOLOGY. (4 Credits)
General principles of pathology, cell injury and death, inflammation and tissue repair, abnormalities of cell growth, and structures and mechanisms of disease.

VMB 622. PATHOLOGY LABORATORY. (1 Credit)
Laboratory instruction to complement VMB 621.
Prerequisites: VMB 611 (may be taken concurrently) with C or better

VMB 627. ORNAMENTAL FISH MEDICINE. (2 Credits)
An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. This is a 1-week intensive course held at the Hatfield Marine Science Center in Newport, Oregon. Graded P/N.

VMB 630. MECHANISMS OF DISEASE. (3 Credits)
Cellular and molecular events that contribute to the pathogenesis of disease in animals, including humans. Host interactions with infectious agents and the environment.

VMB 631. MATHEMATICAL MODELING OF BIOLOGICAL SYSTEMS. (3 Credits)
The use of mathematical modeling in biological sciences is studied. A variety of modeling techniques are covered including implementing the methods computationally.

VMB 640. SEMINARS IN LABORATORY ANIMAL MEDICINE. (2 Credits)
Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment of research animals.

VMB 641. SEMINARS IN LABORATORY ANIMAL MEDICINE. (2 Credits)
Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals.

VMB 642. SEMINARS IN LABORATORY ANIMAL MEDICINE. (2 Credits)
Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals.

VMB 651. SELECTED TOPICS IN VETERINARY MEDICINE. (3 Credits)
Topics vary; check Schedule of Classes for particular topics.

VMB 653. VETERINARY VIROLOGY. (4 Credits)
Virology for the professional and graduate student.

VMB 659. VETERINARY BACTERIOLOGY AND MYCOLOGY. (5 Credits)
Veterinary bacteriology and mycology for the veterinary graduate student.

VMB 660. VETERINARY PARASITOLOGY. (5 Credits)
A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered.

VMB 663. VETERINARY DIAGNOSTIC PATHOLOGY. (6 Credits)
Practical hands-on course training students in the diagnostic pathology utilizing case material received at the OSU Veterinary Diagnostic Lab. Graded P/N.
VMB 664. COMPARATIVE MICROSCOPIC PATHOLOGY. (1 Credit)
Case-based discussion course to train participants in the recognition, description, and pathogenesis of a wide variety of disease processes with an emphasis on microscopic features. Graded P/N. 
This course is repeatable for 4 credits.

VMB 665. READINGS IN VETERINARY PATHOLOGY. (1 Credit)
Group discussions of assigned readings central to understanding of veterinary pathology, including recent advances. Graded P/N. 
This course is repeatable for 6 credits.

VMB 666. VETERINARY MEDICINE AND PUBLIC HEALTH. (3 Credits)
Covers aspects of veterinary medicine that affect human health. An understanding of the contribution of the veterinary profession to human (public) health will enable students to play an effective role in this area, regardless of career direction.

VMB 667. VETERINARY EPIDEMIOLOGY. (3 Credits)
A course for veterinary students describing the factors determining the frequency and distribution of diseases, in a defined population of animals for the purpose of establishing programs to prevent and control their development and spread in this population.

VMB 669. INTRODUCTION TO GRANT PROPOSAL WRITING. (2 Credits)
To introduce students to the fundamentals of writing grant proposals to the National Institute of Health (NIH), different funding mechanisms, as well as the grant reviewing process. CROSSLISTED as PHAR 669. 
Equivalent to: PHAR 669
This course is repeatable for 20 credits.

VMB 670. INTRODUCTION TO SYSTEMS BIOLOGY. (2 Credits)
Students will gain a high-level overview of systems biology and bioinformatics, with an emphasis on biomedical applications, integration of "omics" approaches, and biological networks.

VMB 671. MOLECULAR TOOLS. (3 Credits)
Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. CROSSLISTED as MCB 671. 
Equivalent to: MCB 671

VMB 672. MOLECULAR APPROACH TO CANCER. (1 Credit)
Overview of cancer pathogenesis and current molecular techniques to diagnose and treat various neoplasms is provided. Content will include both veterinary and human data and concepts. Discussion/Lab. Graded P/N.

VMB 673. COMPARATIVE IMMUNOLOGY. (3 Credits)
Examines immune system function in animals other than mice and men with a focus on adapting cutting-edge technologies.

VMB 674. VACCINES AND NEW THERAPIES. (3 Credits)
Provides students with a cohesive understanding of the basic research behind the discovery of new therapeutic targets and scientific advancements used in development of vaccines and new therapies.

VMB 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 99 credits.

VMB 701. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

VMB 705. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

VMB 706. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

VMB 709. VETERINARY MEDICINE ORIENTATION. (1 Credit)
An overview of veterinary medicine with emphasis on historical development, current veterinary medical issues, employment opportunities, and professionalism. Graded P/N.

VMB 711. VETERINARY GROSS ANATOMY. (4 Credits)
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.

VMB 712. VETERINARY GROSS ANATOMY. (4 Credits)
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.

VMB 713. VETERINARY GROSS ANATOMY. (4 Credits)
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. Lec/lab.

VMB 714. VETERINARY MICROSCOPIC ANATOMY. (4 Credits)
Structure and development of cells, tissues, organs, and organ systems of animals.

VMB 715. VETERINARY MICROSCOPIC ANATOMY. (3 Credits)
Structure and development of cells, tissues, organs, and organ systems of animals.

VMB 716. VETERINARY NEUROSCIENCES. (4 Credits)
Structural and functional relationships of the nervous system and organs of special sense with emphasis on general clinical application.

VMB 717. VETERINARY PHYSIOLOGY. (5 Credits)
Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation.

VMB 718. VETERINARY PHYSIOLOGY. (5 Credits)
Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation.

VMB 719. VETERINARY PHYSIOLOGY. (4 Credits)
Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. Lec/lab.

VMB 720. VETERINARY IMMUNOLOGY. (5 Credits)
Clinical and diagnostic aspects of immunological mechanisms, serological reactions, hypersensitivity, allergy, and disorders of the immune system. Lec/lab.

VMB 721. VETERINARY PATHOLOGY. (5 Credits)
Basic mechanisms and concepts relating to reaction of cells and tissues to disease, with emphasis on cellular and tissue degeneration, inflammatory reaction, circulatory disturbance and neoplasia. Lec/lab.

VMB 722. RESEARCH READING SKILLS FOR VETERINARY STUDENTS. (1 Credit)
Training in critical evaluation of biomedical and clinical research studies, and understanding of laboratory diagnostic methods.

VMB 723. VETERINARY LEADERSHIP: INCLUSION, REFLECTION, DEVELOPMENT. (1 Credit)
Focusing on diversity and inclusion, self-compassion, and effective interpersonal communication in relationship to fostering leadership in veterinary medicine. Graded P/N.

VMB 724. PET BIRD AND SMALL MAMMAL MEDICINE AND SURGERY. (2 Credits)
Medicine and surgery of pet birds and small animals. Graded P/N.
VMB 727. ORNAMENTAL FISH MEDICINE. (2 Credits)
An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. Graded P/N.

VMB 728. SPECIAL ANIMAL MEDICINE. (4 Credits)
Diagnosis, treatment, and management of special animals, including the common laboratory animals.
This course is repeatable for 8 credits.

VMB 729. LAB ANIMAL/PRIMATE MEDICINE AND SURGERY. (3-12 Credits)
Designed to provide hands-on experience with a variety of laboratory animal species including primates, rodents, ungulates, fish, and reptiles. May be repeated up to 4 times for 3, 6, 9 or 12 credits per term. 12 credits maximum apply toward graduation. Graded P/N.
This course is repeatable for 12 credits.

VMB 730. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
The first of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum.

VMB 731. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
The second of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum.

VMB 732. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
The third of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Graded P/N.

VMB 733. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.
This course is repeatable for 4 credits.

VMB 734. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 735. COMMUNICATIONS FOR VETERINARIANS. (1 Credit)
Communications and problem solving for the third-year veterinary student. Graded P/N.

VMB 736. DIAGNOSTIC CLINICAL PATHOLOGY. (2 Credits)
One week clinical experience in clinical pathology, cytology, urinalysis, clinical chemistry interpretation and hematology. Lec/lab.

VMB 740. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
The first of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum.

VMB 741. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
The second of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum.

VMB 742. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
The third of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Graded P/N.

VMB 743. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.
This course is repeatable for 4 credits.

VMB 744. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 745. COMMUNICATIONS FOR VETERINARIANS. (1 Credit)
Communications and problem solving for the third-year veterinary student. Graded P/N.

VMB 746. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 747. ORNAMENTAL FISH MEDICINE. (2 Credits)
Clinical training in the care of exotic and zoo animal species. Graded P/N.

VMB 750. SYSTEMIC PATHOLOGY I. (4 Credits)
Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host.

VMB 751. SYSTEMIC PATHOLOGY II. (5 Credits)
Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host.

VMB 752. ANIMAL GENOMICS. (1 Credit)
Discussion about the dog and cow genomes, susceptibility to diseases, and the possibilities and techniques for treatment of medical conditions by gene transfer and modification.

VMB 753. VETERINARY VIROLOGY. (4 Credits)
Virology for the professional DVM student.

VMB 754. ADVANCED CLINICAL PATHOLOGY. (1 Credit)
One-week rotation in advanced clinical pathology: cytology, hematology and clinical chemistry interpretation. Graded P/N.
Prerequisites: VMB 736 with C or better

VMB 755. VETERINARY BACTERIOLOGY AND MYCOLOGY. (5 Credits)
Bacteriology and mycology for the professional DVM student.

VMB 756. VETERINARY PARASITOLOGY. (5 Credits)
A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered.

VMB 757. ADVANCED HISTOPATHOLOGY. (2 Credits)
A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. Graded P/N.
Prerequisites: VMB 751 with C or better

VMB 758. BASIC HISTOPATHOLOGY. (1 Credit)
A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. Graded P/N.

VMB 759. VETERINARY CLINICAL PATHOLOGY. (4 Credits)
Clinical pathiology for the professional DVM student.

VMB 760. VETERINARY TOXICOLOGY. (4 Credits)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 761. VETERINARY PHARMACOLOGY. (2 Credits)
Fundamentals of pharmacology as related to veterinary medicine presented in a systems-oriented approach with drug therapy in domestic animals.

VMB 762. VETERINARY PHARMACOLOGY II. (4 Credits)
Fundamentals of pharmacology as related to veterinary medicine presented in a systems-oriented approach with drug therapy in domestic animals.

VMB 763. VETERINARY EPIDEMIOLOGY. (3 Credits)
Examines the application of epidemiology to the field of veterinary medicine and the study of important veterinary public health issues.

VMB 764. VETERINARY EPIDEMIOLOGY. (3 Credits)
Examines the application of epidemiology to the field of veterinary medicine and the study of important veterinary public health issues.

VMB 765. VETERINARY TOXICOLOGY. (4 Credits)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 766. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 767. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 768. VETERINARY INTEGRATED PROBLEM SOLVING. (1 Credit)
A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N.

VMB 769. ANIMAL GENOMICS. (1 Credit)
Discussion about the dog and cow genomes, susceptibility to diseases, and the possibilities and techniques for treatment of medical conditions by gene transfer and modification.

VMB 770. INTERNATIONAL VETERINARY MEDICINE. (2 Credits)
Veterinary students work with veterinarians and domestic animals in international settings. Graded P/N.

VMB 771. INTERNATIONAL VETERINARY MEDICINE. (2 Credits)
Veterinary students work with veterinarians and domestic animals in international settings. Graded P/N.
This course is repeatable for 4 credits.

VMB 772. LABORATORY ANIMAL MEDICINE. (6 Credits)
Clinical experience related to diagnosis, treatment, and management of laboratory animals. Graded P/N.

VMB 773. LABORATORY ANIMAL MEDICINE. (6 Credits)
Clinical experience related to diagnosis, treatment, and management of laboratory animals. Graded P/N.

VMB 774. ADVANCED HISTOPATHOLOGY. (2 Credits)
A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species.

VMB 775. DIAGNOSTIC SERVICES. (2 Credits)
Students will perform service duty in the necropsy area of the Veterinary Diagnostic Laboratory and will perform necropsies on delivered specimens. Other activities.

VETERINARY MEDICINE CLINICAL

VMB 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.
VMC 503. THESIS. (1-12 Credits)
This course is repeatable for 999 credits.

VMC 505. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMC 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMC 509. TEACHING PRACTICUM FOR VETERINARY PROFESSIONAL CURRICULUM. (1-6 Credits)
Provides veterinary specialty residents and graduate students a mentored experience in teaching of veterinary medical students. Experience can be gained with teaching of lecture and/or laboratory courses.
This course is repeatable for 16 credits.

VMC 601. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMC 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

VMC 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

VMC 606. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

VMC 607. SEMINAR. (1-16 Credits)
One-credit section; VMC 607 Sect. 1. Graded P/N.
This course is repeatable for 16 credits.

VMC 632. POSTGRADUATE MEDICINE. (3-7 Credits)
An interactive, practical course on the role of scholarship in clinical medicine, including techniques to develop and conduct research in a clinical setting.
This course is repeatable for 16 credits.

VMC 634. POSTGRADUATE SURGERY. (3-7 Credits)
An interactive, practical course on the role of scholarship in clinical surgery, including techniques to develop and conduct research in a clinical setting.
This course is repeatable for 16 credits.

VMC 637. POSTGRADUATE CARDIOLOGY. (3-7 Credits)
An interactive, practical course on the role of scholarship in clinical cardiology, including techniques to develop and conduct research in a clinical setting.
This course is repeatable for 16 credits.

VMC 651. SELECTED TOPICS IN VETERINARY MEDICINE. (3 Credits)
Topics vary; check Schedule of Classes for particular topics.

VMC 680. VETERINARY MEDICAL PRECEPTORSHIP. (1-16 Credits)
Clinical experience in veterinary medicine for students in the combined DVM-MPH program. Graded P/N.
This course is repeatable for 16 credits.

VMC 682. TOPICS IN INTERNAL MEDICINE. (2-4 Credits)
In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of internal medicine through investigation of primary literature and recent reviews.
This course is repeatable for 16 credits.

VMC 684. TOPICS IN SURGERY. (2-4 Credits)
In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of surgery through investigation of primary literature and recent reviews.
This course is repeatable for 16 credits.

VMC 701. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

VMC 705. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

VMC 706. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

VMC 711. CLINICAL CARDIOLOGY. (1-4 Credits)
A one-week clinical elective rotation in cardiology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. Fourth-year standing in Veterinary Medicine required.
This course is repeatable for 4 credits.

VMC 712. CLINICAL ONCOLOGY. (1-4 Credits)
A one-week clinical elective rotation in clinical oncology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. Fourth-year standing in Veterinary Medicine required.
Prerequisites: VMC 778 with C or better
This course is repeatable for 4 credits.

VMC 714. SMALL ANIMAL DENTISTRY. (1 Credit)
A clinical course designed to provide students with hands-on training in diagnosis, treatment and prophylaxis of dental diseases of dogs and cats.

VMC 715. CASE STUDIES IN SMALL ANIMAL MEDICINE I. (1 Credit)
A case-based course involving diseases and conditions of the endocrine, gastrointestinal and hepatobiliary systems as well as neoplastic and infectious diseases of small animals.

VMC 716. CASE STUDIES IN SMALL ANIMAL MEDICINE II. (1 Credit)
A case-based course involving diseases and conditions of the cardiovascular, respiratory and urogenital systems as well as emergent diseases and conditions.

VMC 717. CASE STUDIES IN SMALL ANIMAL MEDICINE III. (1 Credit)
A case-based course involving diseases and conditions of the dermatologic, neurologic, ophthalmologic, and hemolymphatic systems.

VMC 718. SMALL ANIMAL PREVENTIVE MEDICINE. (2 Credits)
Introductory course to basic concepts in small animal preventive medicine including vaccine immunology, vaccine strategies, internal/external parasite control, nutrition in disease prevention, and wellness programs for dogs and cats.

VMC 719. CLINICAL CARDIOLOGY I. (2 Credits)
Hands-on practical experience in a clinical setting in taking a clinical history, performing a cardiovascular physical examinations, recording electrocardiograms, interpreting thoracic radiographs and echocardiograms, creating problem lists, compiling lists of differential diagnosis, formulating diagnostic and therapeutic plans, discussing treatment options, generating medical records, and discharging patients.

VMC 720. VETERINARY CLINICAL NUTRITION. (2 Credits)
To examine the nutritional needs of many species of veterinary importance. Emphasis is placed on designing feeding programs to optimize health and animal performance.

VMC 721. SMALL ANIMAL CLINICAL NUTRITION. (1 Credit)
Introduction to the concepts of small animal clinical nutrition and is designed for the third-year veterinary student.
VMC 723. ADVANCED FELINE MEDICINE. (2 Credits)
A one-week elective for senior students in the DVM curriculum. The course emphasizes aspects of internal medicine specific to the domestic cat. Graded P/N.

VMC 724. LARGE ANIMAL SURGERY. (6 Credits)
Selected surgical techniques and procedures related to equine and food animal species.

VMC 725. PRINCIPLES OF SURGERY. (4 Credits)
A basic course in the principles and techniques of surgery for the professional veterinary student. Lec/lab. Graded P/N.

VMC 726. SMALL ANIMAL THERIOGENOLOGY. (1 Credit)
Advanced clinical experience in small animal (canine) reproduction. Graded P/N. Prerequisites: VMC 783 with C or better

VMC 727. ADVANCED SMALL ANIMAL SURGERY. (2 Credits)
One-week of additional lectures and laboratories to improve surgical skills and acquire more advanced knowledge of specific surgical conditions. Lec/lab. Graded P/N.

VMC 729. CLINICAL THERIOGENOLOGY. (1 Credit)
Practical and theoretical training in reproductive management and disorders in all species; routine diagnostic and treatment procedures; clinic rounds. This course is repeatable for 3 credits.

VMC 730. SMALL ANIMAL THERIOGENOLOGY. (1 Credit)
Advanced clinical experience in small animal (feline) reproduction. Graded P/N. Prerequisites: VMC 723 with C or better

VMC 731. SMALL ANIMAL EMERGENCY CARE-DOVE LEWIS. (3 Credits)
A two-week clinical rotation at the Dove Lewis Memorial Emergency Clinic in Portland, OR.

VMC 732. CLINICAL LARGE ANIMAL MEDICINE I. (3,6 Credits)
Clinical medicine training in diseases of food animals and horses; clinic rounds and diagnostic procedures. This course is repeatable for 24 credits.

VMC 733. CLINICAL LARGE ANIMAL SURGERY I. (3,6 Credits)
Clinical surgery, treatment, and care of food animals and horses; clinic rounds; training in surgery, lameness, and diagnostic procedures. This course is repeatable for 24 credits.

VMC 735. RURAL VETERINARY PRACTICE I. (3,6 Credits)
Rural practice training in diseases of food animals and horses. Lec/lab. This course is repeatable for 6 credits.

VMC 737. VETERINARY ANESTHESESIOLOGY. (4 Credits)
A three-week rotation in veterinary anesthesiology utilizing patients presented to the veterinary teaching hospital.

VMC 738. INTRODUCTION TO ANIMAL CARE. (3 Credits)
Feeding, housing, breeding and marketing systems related to animal care. This course is repeatable for 6 credits.

VMC 739. VETERINARY MEDICAL ETHICS. (1 Credit)
Introduction of ethics in veterinary medicine, with specific attention to ethical theories, ethical decision making, moral status of animals, professional ethics, and practice issues.

VMC 740. SHEEP AND GOAT MEDICINE AND SURGERY. (3 Credits)
Discussions of economically important sheep and goat diseases, practical surgeries, and a review of nutrition and husbandry. Graded P/N.

VMC 741. LARGE ANIMAL GI SURGERY. (2 Credits)
A one-week course for 4th year veterinary students, with particular interest in gastrointestinal surgery. Graded P/N.

VMC 742. CAMELID MEDICINE AND SURGERY. (4 Credits)
Designed to give students an in-depth introduction to camelid health care via hands-on work, lectures, and discussion sections. Graded P/N.

VMC 743. ADVANCED EQUINE REPRODUCTION. (3 Credits)
A two-week course in advanced clinical experience in equine reproduction. Graded P/N.

VMC 744. ADVANCED LAMENESS IN EQUINE. (3 Credits)
Application of anatomy, lameness examination, nerve and joint anesthesia, diagnostic radiology, ultrasound and nuclear scintigraphy to diagnosis of lameness in horses. Graded P/N.

VMC 745. PRACTICE MANAGEMENT. (2 Credits)
A course in basic personal and business finances, career skills, and legal aspects of veterinary practice. Graded P/N.

VMC 747. VETERINARY ANESTHESIOLOGY II. (3 Credits)
An additional two-week clinical rotation in veterinary anesthesiology utilizing patients presented to the Veterinary Teaching Hospital. Graded P/N.

VMC 748. EQUINE DENTISTRY. (2 Credits)
Utilizing modern, motorized equipment, cadaver specimens, and live hospital and client horses, students will learn and perform modern methods of equine dental prophylaxis and treatment. Graded P/N.

VMC 749. CLINICAL IMAGING II. (3 Credits)
Advanced clinical course for 4th-year veterinary students in which they will assume additional responsibility for performing common radiographic procedures. Graded P/N. Prerequisites: VMC 796 with C or better

VMC 750. EQUINE CLINICAL NUTRITION. (1 Credit)
A one-week course for veterinary students focusing on equine nutrition that can be used in veterinary practice. Graded P/N.

VMC 751. RUMINANT NUTRITION. (2 Credits)
An advanced course in clinical ruminant nutrition dealing with nutritional problems of ruminants that might be encountered by a practicing veterinarian. Graded P/N.

VMC 752. CLINICAL LARGE ANIMAL MEDICINE II. (3-6 Credits)
Additional clinical medicine training. Graded P/N. Prerequisites: VMC 732 with C or better
This course is repeatable for 6 credits.

VMC 753. CLINICAL ONCOLOGY I. (2 Credits)
Teaches students a realistic approach to the diagnosis and treatment of pets with cancer. Students will participate in rounds, case management and medical records keeping.

VMC 754. CLINICAL LARGE ANIMAL SURGERY II. (3,6 Credits)
Additional clinical surgery training. Graded P/N. Prerequisites: VMC 734 with C or better
This course is repeatable for 6 credits.

VMC 755. RURAL VETERINARY PRACTICE II. (3-6 Credits)
One additional rural practice training. Graded P/N. Prerequisites: VMC 735 with C or better
This course is repeatable for 6 credits.

VMC 757. SMALL ANIMAL SURGERY. (6 Credits)
Small animal medicine and surgical techniques and procedures. Graded P/N.

VMC 758. CATTLE PRODUCTION MEDICINE. (3 Credits)
Clinical application of production medicine practices to dairy and beef cattle practice. Graded P/N. Prerequisites: VMC 735 with C or better

VMC 759. LARGE ANIMAL PALPATION. (1 Credit)
A laboratory for additional experience in rectal palpation of large animals, for third-year veterinary students. Graded P/N.
VME 753. ADVANCED CLINICAL CARDIOLOGY. (1 Credit)
An elective course for junior veterinary students detailing diagnosis and management of the common congenital and acquired cardiac diseases of domestic animals.

VME 764. DIAGNOSTIC IMAGING. (4 Credits)
A lecture and laboratory course in diagnostic imaging covering physics or radiography and ultrasonography, radiation safety and image interpretation for small and large animals, presented by body systems.

VME 765. ADVANCED CLINICAL RADIOLOGY. (1 Credit)
An elective advanced radiology case-based course for Year 3 veterinary medicine students that focuses on radiographic findings of commonly encountered clinical disease.

VME 766. CLINICAL SMALL ANIMAL ULTRASONOGRAPHY. (2 Credits)
A 1-week overview of clinical small animal ultrasonography with particular emphasis on material relevant to a general or emergency practitioner. Students will be able to perform a FAST scan to identify peritoneal fluid. Students will listen to didactic lectures in the morning with practical sessions in the afternoon. At the end of the week, pairs of students will make a short presentation based on a literature search on a topic of interest.

VME 768. PRINCIPLES OF ANESTHESIA. (4 Credits)
A basic course in the principles and techniques of surgery and anesthesia for the professional veterinary student. Lec/lab.

VME 769. GENERAL MEDICINE. (2 Credits)
An introduction to medicine with a discussion of the principles of medicine that would be applicable to all species. Physical examination, clinical diagnosis, pathophysiology of signs of disease in domestic animals, therapeutic principles and diagnostic procedures.

VME 770. LARGE ANIMAL MEDICINE I. (4 Credits)
The first of three courses in large animal medicine for third-year professional veterinary students covering diagnosis and treatment of domestic large animals.

VME 771. LARGE ANIMAL MEDICINE II. (4 Credits)
Diagnosis, treatment and control of diseases of large domestic animals, specifically gastrointestinal, hepatobiliary diseases, weight loss, and introduction to production medicine, and some swine diseases.

VME 772. LARGE ANIMAL MEDICINE III. (4 Credits)
Diagnosis, treatment and control of diseases of large domestic animals, specifically central nervous system, mastitis, musculoskeletal, sudden death, skin, and some swine diseases.

VME 773. MEDICINE LABORATORY I. (1 Credit)
Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses.

VME 774. MEDICINE LABORATORY II. (1 Credit)
Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses.

VME 775. CLINICAL SMALL SPORTS MEDICINE AND REHABILITATION. (3 Credits)
Clinical training in small animal rehabilitation in the Veterinary Teaching Hospital.

VME 776. SMALL ANIMAL MEDICINE I. (5 Credits)
A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.

VME 777. SMALL ANIMAL MEDICINE II. (5 Credits)
A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.

VME 778. SMALL ANIMAL MEDICINE III. (5 Credits)
A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.

VME 779. EQUINE SPORTS MEDICINE. (1 Credit)
One-week elective encompassing basic exercise physiology, sport-related injuries, injury rehabilitation, training and nutrition of equine athletes. Graded P/N.

VME 780. VETERINARY MEDICAL PRECEPTORSHIP. (1-16 Credits)
Theory of practice of veterinary medicine in a non-university situation. Graded P/N.

This course is repeatable for 16 credits.

VME 781. SEMINAR IN VETERINARY MEDICINE. (1-16 Credits)
Seminars and case discussions on selected topics by students, staff, and others. Graded P/N.

This course is repeatable for 16 credits.

VME 782. EMERGENCY CARE. (1 Credit)
One-week rotation in the Veterinary Teaching Hospital during non-regular hours. Practice and instruction in caring for critically ill patients.

VME 783. THERIOGENOLOGY I. (4 Credits)
To present the clinical applications of reproductive physiology, anatomy, embryology, pathology and microbiology in domesticated animals.

VME 785. SMALL ANIMAL SURGERY. (7 Credits)
A lecture and laboratory course covering the diagnosis, operative methods, and aftercare of common small animal surgical conditions.

VME 786. ANIMAL BEHAVIOR. (1 Credit)
Diagnosis and treatment of feline, canine and equine problem behaviors including aggression, anxiety, house-soiling and compulsive behaviors.

VME 787. 3RD YEAR CLINICS. (1 Credit)
An introductory clinical experience for third-year veterinary students.

VME 788. BUSINESS APPLICATIONS IN PRIVATE SMALL ANIMAL PRACTICE. (1 Credit)
A hands-on elective course exploring the business of small animal general practice in a case-based approach.

This course is repeatable for 2 credits.

VME 789. PET PRACTICE. (3 Credits)
Additional clinical training in primary care pet practice at a Banfield Pet Hospital. Graded P/N.

This course is repeatable for 6 credits.

VME 790. CLINICAL EXPERIENCE. (1-16 Credits)

This course is repeatable for 48 credits.

VME 791. CLINICAL SMALL ANIMAL MEDICINE. (3,6 Credits)
A clinical rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats.

This course is repeatable for 6 credits.
VMC 792. CLINICAL SMALL ANIMAL MEDICINE II. (3-6 Credits)
A two-week, three-credit clinical elective rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. This course is repeatable for 6 credits.

VMC 793. CLINICAL SMALL ANIMAL SURGERY. (3,6 Credits)
Clinical training in small animal surgery in the Veterinary Teaching Hospital.
Prerequisites: VMC 725 with C or better and VMC 785 [C] This course is repeatable for 6 credits.

VMC 794. OHS SMALL ANIMAL PRIMARY CARE. (4 Credits)
Three-week rotation at OHS to gain experience with an emphasis on surgery, medical case workup, exam room protocol and behavior basics.

VMC 796. CLINICAL IMAGING. (3 Credits)
A clinical course for 4th-year veterinary students in which they will assume primary responsibility for performing common radiographic procedures.

VMC 797. SMALL ANIMAL CRITICAL CARE AND HOSPITAL SERVICE ROTATION. (1 Credit)
A one-week clinical rotation in small animal critical care managing small animal cases in the intensive care unit at the Veterinary Teaching Hospital.

VMC 798. CLINICAL SMALL ANIMAL SURGERY II. (3-6 Credits)
Clinical training in small animal surgery in the College of Veterinary Medicine, Lois B. Acheson Veterinary Teaching Hospital. This course is repeatable for 6 credits.

VMC 799. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Veterinary Medicine - DVM Graduate Major

State of Oregon DVM Licensing Regulations
Oregon Veterinary Medical Examining Board
Requirements
1. Graduate of a veterinary medical school accredited by the AVMA, or if a foreign graduate, have a certificate from ECFVG, PAVE or other equivalency program approved by the board.
2. Passed the NBC/CCT or NAVLE and Juris Prudence exams.
3. If you have less than one year’s U.S. experience, you must obtain an intern permit and practice under the supervision of an Oregon-licensed veterinarian for one year (or the balance of a year).

If you meet the following conditions, you may include a letter requesting a waiver of the CCT. Your letter must cite compliance with each of these requirements:

• Graduate of an accredited veterinary school or earned ECFVG certificate prior to 1991;
• Engaged in five contiguous years of active veterinary clinic practice immediately preceding date of application;
• Have held license(s) in good standing in other US states or provinces since graduation; and
• Have continuing education of at least 10 hours per year during the five years immediately preceding the date of application.

Examinations
Scores must be reported directly to the board from VIVA. If you tested in Oregon, you do not need to request a score transfer.

North American Veterinary Licensing Examination (NAVLE): Administered via computer during two periods in spring and winter. Passing score as established by National Board Examination Committee.

NBE/CCT: Passing score before December 1992 is 75.00 based on 1.5 standard deviations. After December 1992, passing score is the criterion-referenced score of 425.

Jurisprudence Exam: An open-book 40-question test on veterinary laws and rules of Oregon. The exam and regulations will be sent to applicants upon receipt of the license application and $75 fee. A passing score of 95 percent (38 correct answers) is required.

Licensing
Complete and submit the application and fee. The Jurisprudence Exam will be sent to you to complete and return. When you pass the JP exam, you will be sent an activation form. You may not practice in Oregon until you activate your license or intern permit. Complete and send in the activation form, along with the $100 fee. Your permanent license or intern permit will be issued upon receipt of all necessary documentation.

Permanent Licenses: If you have at least one year’s documented veterinary clinical experience, you may activate your permanent license.

Intern Permits: New graduates or veterinarians with less than one year’s experience must obtain an intern permit. This permit expires one year after the date of issue or less if prior experience is documented. Renewal notices are sent approximately six weeks prior to expiration date, at which time interns may activate their permanent license or request another intern permit if one year's experience has not been acquired. Current veterinary school seniors may submit application materials prior to graduation; however an intern permit will not be issued until the board receives either a dean's letter confirming graduation or a diploma copy.

Continuing Education: Active licensees are required to report 30 credits of CE every odd year, i.e., '11, '13, '15, etc.

Preveterinary Curriculum
Typical preveterinary curriculum at Oregon State University follows. Oregon State University courses that will meet the preveterinary academic requirements:

GRADUATE SCHOOL

Exciting and diverse educational opportunities are offered through the graduate programs of Oregon State University’s 11 colleges which encompass 73 major disciplines and 19 different graduate degree types. A land, sea, space, and sun grant university, OSU enrolls more than 4,400 graduate students, representing more than 70 countries and every state in the nation.

At OSU, maximum opportunity is provided for the integration of graduate instruction and research. The graduate faculty (1,800 members) is selected on the basis of training, experience, research, and evidence of the ability to successully direct and supervise graduate students.

All study beyond the bachelor’s degree at Oregon State University is conducted through the Graduate School. The establishment of graduate programs and the formulation and direction of individual student programs are responsibilities of the academic unit.

Introduction

Oregon State University has a global reputation for excellence in teaching, research, and engagement.

Oregon State is one of only two land, sea, space and sun grant universities in the nation and is the only university in Oregon to have the Carnegie Classifications for both Very High Research Activity and Community Engagement. OSU is comprised of 11 academic colleges with strengths in natural resources, earth dynamics and sustainability, life sciences, innovation and entrepreneurship, and the arts and sciences. OSU has facilities and/or programs in every county in the state, including 11 regional experiment stations, 35 county extension offices, a branch campus in Bend, a major marine science center in Newport, and a range of programs and facilities in Portland. OSU earned $441 million in external research funding in 2017, a third consecutive year of record-breaking growth.

A dedicated and highly regarded graduate faculty, a well-equipped library, comprehensive special collections, and exceptional research facilities keep Oregon State at the leading edge of graduate education. Linus Pauling, an Oregon State alumnus and the only person to win individual Nobel prizes in two different categories, selected OSU as the repository for his papers.

Research and teaching assistantships are available to allow students the opportunity to work with people who are leaders in their fields while furthering your education. In addition to being outstanding teachers, many OSU faculty members are internationally renowned for their research.

With these strengths in research and teaching, Oregon State produces degree holders who can compete successfully with the best in their fields.

But life isn't all study and research, and when you're ready to take a break, you'll find that Oregon State is the ideal location. Whether you want to be active or relax, attend a sports event or a lecture, go to a concert or a play, you're likely to find what you want at Oregon State or just a short distance away.

OSU is located in Corvallis, a community of 57,110 people situated in the Willamette Valley between Portland and Eugene. Ocean beaches, lakes, rivers, forests, high desert, the rugged Cascade and Coast Ranges, and the urban amenities of the Portland metropolitan area are all within a 100 mile drive of Corvallis. More than 27,650 undergraduate, 601 first professional, and 4,899 graduate students are enrolled at OSU, including more than 7,600 students of color and 3,500 international students.

The stunning, park-like setting of the OSU campus is comprised of 400 acres of forest and farmland that are used by the university for instruction and research. OSU's Hatfield Marine Science Center at Newport serves as the main coastal facility for Sea Grant, oceanography, and fisheries programs. For many graduate students, study and research through these off-campus facilities means a direct look at the natural resources and characteristics of the Pacific Northwest.

The institution that is now OSU opened in 1858 as Corvallis College, a small academy. College-level study began about 1865, and the first three baccalaureate degrees were awarded in 1870. Graduate programs began a short time later. In 1868, Corvallis College was designated by the Oregon Legislature as the "agricultural college of the state of Oregon." From 1868 until 1885, the college continued under the direction of the Methodist Episcopal Church but was partly state supported. In 1885, the state of Oregon assumed full control of the institution.

Oregon State granted its first advanced degree (A.M.) in 1876. Residence requirements for the master's degree were announced in 1897.

Responsibility for graduate study at OSU has changed a number of times over the years. In 1910 it was placed under a standing committee of the faculty. In 1933 all graduate work in the State System of Higher Education was placed in an interinstitutional graduate division. At Oregon State, an associate dean and an institutional graduate council were put in immediate charge of graduate study. The first doctor of philosophy degrees were conferred by Oregon State in 1935. In October 1946, the State Board of Higher Education again gave the institutions direct responsibility for their graduate programs and assigned graduate work at Oregon State to the Graduate School.

The primary aims of the Oregon State University Graduate School are to prepare students to create new knowledge and to assist students in acquiring specialized knowledge in one or more disciplines(s). At the same time, graduate programs may provide the student with the opportunity to acquire an educational background broader than his or her specialty. The Graduate School and graduate programs provide additional opportunities to learn and practice vital professional and leadership skills.

The graduate educational process is designed to help the student attain a high level of scholarship. The student is assisted in developing the skills of assimilation, interpretation, organization, evaluation, and application of knowledge. Such scholarship increases the student’s breadth of learning and prepares him or her for roles of leadership and participation in the broader areas of culture and society. The ideal graduate program permits the student to specialize, but at the same time develop a broad educational base.

The communication of new knowledge to both technical and non-technical audiences is an important part of the educational process. Creating, interpreting, and communicating knowledge are related processes at OSU. The Graduate School provides opportunities for students to develop these skills. Graduate students have the opportunity...
to distinguish themselves from their peers by taking advantage of a broad range of additional educational offerings. These include professional and leadership skills vital for student success in their future employment.

Mission, Goals, and Values

Preamble
Oregon State University is a comprehensive, public, research-intensive university and a member of the Oregon University System serving as the state’s land, sea, space and sun grant institution—one of only two universities with such designation in the country. OSU programs and faculty are located in every county of the state and are dedicated to investigating the state’s greatest challenges. OSU considers the state of Oregon its campus and works in partnership with the P–12 school system, Oregon community colleges and other OUS institutions to provide access to high quality educational programs. Strong collaborations with industry and state and federal agencies drive OSU’s research enterprise.

Mission
As a land grant institution committed to teaching, research, and outreach and engagement, Oregon State University promotes economic, social, cultural and environmental progress for the people of Oregon, the nation and the world. This mission is achieved by producing graduates competitive in the global economy, supporting a continuous search for new knowledge and solutions, and maintaining a rigorous focus on academic excellence, particularly in the three Signature Areas: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

Vision
To best serve the people of Oregon, Oregon State University will be among the Top 10 land grant institutions in America.

Goals
1. Provide outstanding academic programs that further strengthen our performance and pre-eminence in three Signature Areas of Distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.
2. Provide an excellent teaching and learning environment and achieve student access, persistence, and success through graduation and beyond that matches the best land grant universities in the country.
3. Substantially increase revenues from private fundraising, partnerships, research grants, and technology transfers while strengthening our ability to more effectively invest and allocate resources to achieve success.

OSU Strategic Plan: https://leadership.oregonstate.edu/provost/osu-strategic-plan

Core Values
Accountability. We are committed stewards of the loyalty and good will of our alumni and friends of the human, fiscal, and physical resources entrusted to us.

Diversity. We recognize that diversity and excellence go hand-in-hand, enhancing our teaching, scholarship, and service as well as our ability to welcome, respect, and interact with other people.

Integrity. We practice honesty, freedom, truth, and integrity in all we do.

Respect. We treat each other with civility, dignity, and respect.

Social responsibility. We contribute to society’s intellectual, cultural, spiritual, and economic progress and well-being to the maximum possible extent.

Organization

Graduate School
Graduate work at Oregon State University is administered by the Graduate School. The regulations, policies, and procedures governing graduate education are implemented by the Dean of the Graduate School. The Graduate School oversees admission standards, and degree requirements; enforces current regulations; recommends changes in graduate policy to the Graduate Council; acts on petitions to deviate from existing regulations; and is responsible for the efficient and effective operation of the Graduate School. The Graduate School office is in Heckart Lodge on Jefferson Way near 30th Street on the Corvallis campus. The telephone number is 541-737-4881, and the FAX number is 541-737-3313. The email address is Graduate.School@oregonstate.edu, and the Web address is http://gradschool.oregonstate.edu.

Mission
The Graduate School contributes to OSU’s goal of achieving top ten land grant status by providing leadership in all aspects of graduate education, through advocacy for the critical importance of the graduate enterprise to the university’s mission, and by providing core centralized services to the graduate community. In partnership with the graduate faculty, the Graduate School plays a leadership and advocacy role to ensure that OSU attracts the best graduate students and delivers a compelling and high-quality graduate experience that prepares them to create new ideas and knowledge, to educate others, to make positive impacts on society, and to lead innovation.

Graduate Council
The Graduate Council formulates the basic policy, procedures, and requirements for all graduate work at OSU, within the general authority granted by the State Board of Higher Education. The council establishes admission standards, basic degree requirements, and general policies; approves all graduate faculty members, new programs, and courses; and periodically reviews all existing graduate programs. Graduate Council members are appointed by the Executive Committee of the Faculty Senate, with each academic college having one representative. Major actions of the Graduate Council are referred to the Faculty Senate for review and approval.

Current and past Graduate Council membership and information can be found at: http://senate.oregonstate.edu/graduate-council

Graduate Faculty
Graduate faculty members are chosen from the university faculty based on their academic training, experience, demonstrated potential for scholarship, and evidence of their ability and competency to direct and supervise graduate students in the pursuit of advanced knowledge.

Each graduate faculty member is authorized to perform specific activities within a particular graduate program. The head and academic dean of each unit are responsible for nominating faculty members for these activities, subject to review and approval by the Graduate Council.
Academic Units
An academic unit is the administrative unit responsible for directing and managing a graduate major or minor field of study. An academic unit may be an academic program, department, school, or college, or composite of these. The chief administrative officer of the academic unit is responsible for managing the graduate programs in that unit and is responsible to the dean of the Graduate School for all graduate work performed by the unit.

Academic units have a major role in the success of graduate education. Within the general rules of the Graduate School, the academic units establish and teach courses, maintain a graduate faculty to teach and supervise research, establish their own admission standards and specific graduate certificate and degree requirements, make graduate student appointments, and provide advice and supervision for their graduate students.

Equal Opportunity
Oregon State University, in compliance with state and federal laws and regulations, does not discriminate on the basis of age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status in any of its policies, procedures, or practices. This nondiscrimination policy covers admission and access to, and treatment and employment in, university programs and activities, including but not limited to academic admissions, financial aid, educational services, and employment. Inquiries regarding the university’s equal opportunity policies may be directed to the Office of Equal Opportunity and Access, 541-737-3556 or visit http://eoa.oregonstate.edu/.

Graduate Admissions Requirements
Oregon State University offers admission to applicants whose records demonstrate the highest potential for graduate study and promise for substantial contribution to both their academic professions and to a diverse, global society. The university fosters an environment that welcomes inclusiveness.

Admission decisions are based on many factors, such as the quality of the applicant’s prior academic degree and record of accomplishment, statement of purpose, letters of recommendation from professors or others familiar with the applicant’s academic work, performance in aptitude and achievement tests, relevant work experience, preparation in the proposed field of study, and the connection of the applicant’s academic goals with the faculty’s research interests.

Requirements
The following minimum entrance requirements guide the university and its graduate programs in the consideration of applicants for graduate admission:

• A four-year baccalaureate degree (or international equivalent), a professional degree (such as BPharm, BVsc, MBBS, MD, DVM, DPharm, etc.), or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, with

• A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent baccalaureate degree or equivalent or any subsequent graduate degree from a regionally accredited (US) or recognized (International) college or university, plus all work completed thereafter.

The graduate program may choose to calculate the GPA on the last 90 quarter credits (60 semester credits [last two years on an international record]) of graded undergraduate work on the most recent baccalaureate degree, plus all work completed thereafter, as the basis for admission.

Minimum GPA for admission to only graduate certificate programs is set by the departments that supervise the certificates. Applicants requesting admission to only graduate certificate programs should contact their academic program to learn about minimum GPA and other admission requirements.

OR:

• A four-year baccalaureate degree (or international equivalent), a professional degree, or an appropriate U.S./Canadian alternative degree, from an regionally accredited (US) or recognized (International) college or university, and

• A 45-quarter credit equivalent graduate degree from a regionally accredited (US) or recognized (International) college or university, with

• A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent graduate degree.

If the applicant has completed his or her baccalaureate degree in a country that is a signatory of the Bologna Declaration, then:

• A Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, with

• A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the degree, plus all subsequent graded course work.

OR (Other three-year bachelor degree holders):

• A non-Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, and

• A 45-quarter credit equivalent graduate degree from a recognized college or university, with

• A cumulative GPA of at least 3.00 on the most recent graduate degree.
• Graduate programs also have the option of validating that specific professional and/or three-year degrees appropriately prepare students for their graduate admission.

**International Requirements**

All international graduate applicants must meet the following additional requirements:

• Documentation of sufficient financial resources to attend Oregon State University as a graduate student.

AND:

• Documentation of English language proficiency

<table>
<thead>
<tr>
<th>Test</th>
<th>Regular Admission</th>
<th>Transitional Admission-TAP (formerly Conditional Admission-CAP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOEFL Paper based</td>
<td>550</td>
<td>500-547</td>
</tr>
<tr>
<td>Internet (iBT) TOEFL</td>
<td>80 Minimum score of 18 on each section</td>
<td>60-79 Or any sub-score less than 18</td>
</tr>
<tr>
<td>Internet (iBT) TOEFL Applicants awarded GTA</td>
<td>80 Minimum score of 22 on Speaking sub-score and Minimum score of 18 on all other sections</td>
<td></td>
</tr>
</tbody>
</table>

Please note: OSU requires graduate applicants to meet or exceed all five iBT scores to be eligible for full admission. Scores must be no more than two years old at the time of the applicant’s first term of registration.

**Waived from English Language Testing**

The English language proficiency requirement is waived for applicants who have demonstrated success by achieving an overall GPA greater than 3.0 on a 4.0 scale for two or more semesters/quarters in a rigorous undergraduate or postgraduate program in the U.S. or from one of the following English speaking countries:

1. Australia, Canada, New Zealand, and United Kingdom.

1 Waivers for applicants in other countries are considered on a case-by-case basis if the medium of instruction is English. The individual program must petition the Graduate School for a waiver. Not all programs will request a waiver. Please contact your proposed graduate program to inquire about their policy.

**English Language Exceptions**

Individual programs may request exceptions to the minimum English language proficiency requirements. Exceptions to the minimum TOEFL score/sub-score requirements will be considered by the Graduate School Dean on request if:

• Applicant’s GRE Verbal score is greater than 500 (153 – revised GRE) OR

• The chair of the Graduate Program (or designated faculty member)
  • Has personally interviewed the applicant and established a plan for language support for the applicant, if needed, which may include additional English Language Training, OR

• The Graduate Program arranges for the applicant to complete language training at INTO OSU equivalent to the admission status as designated by the Transitional Admission Program-TAP

**Transitional English Admission**

Transitional admission based on English language proficiency may be granted to applicants seeking admission to a graduate degree program. University transitional admission of international applicants may be granted only if the applicant is otherwise fully admissible.

Transitional admission for degree-seeking applicants requires:

• On-campus testing of English language proficiency prior to enrollment, and

• Compliance with the subsequently specified plan for English and academic course work during each quarter until such time as the applicant qualifies for regular admission.

• Individual graduate programs may require additional documents such as GRE and GMAT test results or set higher English and academic standards. For detailed information, refer to the website for Graduate Admissions and individual graduate program websites.

Transitional admission based on English language proficiency may not be granted to applicants seeking admission to only a graduate certificate program.

All international applicants seeking graduate teaching assistantships should refer to the International Graduate Teaching Assistant English Language Requirement section of this catalog for more details.

**Admission Requirements Continued**

Applicants not meeting minimum academic requirements still may be considered for admission with the support of their academic program, plus review and approval by the University Graduate Admissions Committee. For these applicants, decisions may rely more heavily on noncognitive criteria. However, the university encourages those applicants whose overall cumulative undergraduate GPA is less than an equivalent 3.00 on a U.S. 4.00 grading scale to take the GRE.

Applicants whose baccalaureate degrees are awarded by an institution that issues non-graded transcripts will be considered for admission with the support of the program’s written evaluation of the quality of the applicant’s transcript record.

Satisfaction of minimum entrance requirements does not guarantee admission, since the number of qualified applicants far exceeds the number of places available. As a consequence, many well-qualified applicants may not be accommodated.

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions.

**Policy Regarding Students’ Eligibility to Return to Prior College**

Applicants who disclose that they are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission to
OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons will be admitted only if they meet OSU's minimum academic requirements.

All applicants who are denied admission for conduct reasons have the right to appeal that decision, and appeals will be reviewed on a case-by-case basis.

**Application Process**

Application forms required for admission to the Graduate School are available electronically at https://oregonstate.Force.com/AppLogin.

The applicant’s proposed academic program will examine material submitted to determine the adequacy of scholastic background and to decide whether departmental facilities are adequate for the expressed aims of the applicant. Upon the positive recommendation of the academic program, the Graduate School will determine whether minimum university requirements for admission have been met and, subsequently, will provide to the applicant formal notification as to the action taken.

Applicants must upload application materials, unless a program specifies differently. Applicants should contact their academic program(s) of interest to determine whether additional application materials are required beyond those listed below. Applicants seeking admission to only a graduate certificate program must provide items a., b., and c. below and contact their academic programs to determine what other program-specific materials may be required for admission to the graduate certificate program.

a. One electronic version of the graduate application for each major to which the applicant seeks admission.

b. $75 nonrefundable application fee (domestic students); $85 nonrefundable fee (international students). Applying online requires payment by credit card.

c. Transcripts/Academic Records of all previous academic work, undergraduate and graduate. International applicants must provide a certified English translation of academic records in addition to original language records.

   1 Unofficial records but not grade slips/reports, computer printouts, or internal transcripts may be submitted for evaluation and admission purposes.

If admitted, before registering for courses:

1. Applicants from U.S. schools must provide official transcripts from all colleges attended, including final transcripts showing degrees awarded and dates earned.

2. International applicants must provide equivalent documentation from all colleges attended, including final academic records showing degrees awarded and dates earned in the original language plus certified English translations.

d. Three letters of professional reference are required of most applicants applying for admission to a graduate degree program.

If you have a master’s degree, please include a letter from your major professor. Applicants applying only to graduate certificate programs are encouraged to consult with their academic program to determine whether this or other materials are required.

e. Certain graduate programs require the GRE of all applicants. Address inquiries regarding GRE requirements to your proposed academic program. See specific Program Information, http://gradschool.oregonstate.edu/programs.

**International applicants must also upload the following documents with their application materials:**

a. One photocopy of TOEFL or IELTS scores. If admitted, official test scores must be received by the Graduate School prior to the start of the applicant’s first term of enrollment.

b. Certification of Finances form with supporting documentation, demonstrating sufficient financial resources for the desired academic program.

Financial documentation is not required at the time of application. If the application is accepted, the Graduate School will contact the applicant via email to request the financial materials.

**Note:** If you will be taking courses as a distance student through OSU Ecampus and not entering the U.S., we ask that you complete a special certification form. Proof of funding is not required. Please contact graduate admissions to request the form.

**Application Deadlines**

**Department Deadlines**

Academic programs establish their own application deadlines, which are often substantially earlier than the general university deadlines described below. In such cases, program deadlines supersede the more general university deadline. Some academic programs also admit applicants for specific terms only (e.g., fall term). Applicants should contact the proposed graduate program for deadlines and any other restrictions. See specific program information, http://gradschool.oregonstate.edu/programs.

In the absence of earlier program deadlines, the following university deadlines exist:

**U.S. Citizens and Permanent Residents**

Absolutely no later than 30 days prior to the first day of classes.

**International Applicants**

To allow adequate time for students to obtain visas and make travel arrangements, the following deadlines have been established for international applicants:

<table>
<thead>
<tr>
<th>Term</th>
<th>General University Deadline 1 for International Students Applying from Outside the U.S.</th>
<th>General University Deadline 1 for International Students Applying from Within the U.S.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>April 1</td>
<td>June 1</td>
</tr>
<tr>
<td>Winter</td>
<td>July 1</td>
<td>September 1</td>
</tr>
<tr>
<td>Spring</td>
<td>October 1</td>
<td>December 1</td>
</tr>
<tr>
<td>Summer</td>
<td>January 1</td>
<td>March 1</td>
</tr>
</tbody>
</table>

1 Program deadlines supersede this deadline. Please contact program directly for specific program deadline.

**Summer Session Admission**

Admission Status
Students may be admitted to the Graduate School under the following categories.

Advanced-Degree Students
1. Regularly Admitted Graduate Students. These students have been accepted by the university and by a major program to work toward an advanced degree.
2. Conditionally Admitted Graduate Students. Students who have not met the formal admission requirements but whose accomplishments have convinced the University Graduate Admissions Committee and their major program that they have potential for success as advanced degree candidates may be conditionally admitted as follows:
   1. Students from nonaccredited institutions must complete at least one term of satisfactory work at Oregon State, after which they may be admitted with full standing in the Graduate School.
   2. Students whose preparation does not warrant full admission to the Graduate School but who may prove acceptable later must satisfactorily complete specified conditions to demonstrate their ability to carry out graduate-level work.
3. Transitionally Admitted Graduate Students. International students who lack minimum English language proficiencies but otherwise meet all other formal admission requirements may be transitonally admitted under the following:
   1. TOEFL total score is in the range of 61 to 79 (iBT).
   2. IELTS total score is 6.0.
   Students who score below the minimum on one or more iBT subtests but meet the minimum overall iBT score requirement may be considered for transitional admission. Transitional admission based on English language proficiency may not be granted to students seeking admission to only a graduate certificate program.
4. Provisionally Admitted Graduate Students. Students who have met all of the university standards for formal admission but whose academic program or major department may have placed additional restrictions upon their admission may be provisionally admitted. These restrictions may include certain prerequisite courses that must be completed, completion of the GRE or GMAT, submission of additional reference letters or scores, etc.

Graduate Certificate Students
Students admitted to only a graduate certificate program may be considered for reclassification as degree-seeking graduate students by following the procedure in the section below regarding reclassification.

Nondegree-Seeking Graduate Students
The nondegree-seeking graduate student category may be used by holders of a baccalaureate degree who do not wish to pursue an advanced degree at Oregon State University. Those nondegree-seeking graduate students who wish to be reclassified as degree-seeking graduate students must follow the procedure in the next section.

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. should consult with OSU's Office of International Services (http://international.oregonstate.edu/ois) (email: ois.student@oregonstate.edu (isas.advisor@oregonstate.edu)) before submitting the OSU non-degree application for admission. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one's visa status.

Graduate international students who wish to enroll as nondegree students with OSU for one or more terms, but who will not participate in an established exchange program, should contact the OIS Office isas.advisor@oregonstate.edu for further information before applying.

International students who plan to enroll with OSU as nondegree exchange students should use the application form that is made available at each partner institution. For a list of exchange partner institutions, go to http://international.oregonstate.edu/sites/international.oregonstate.edu/files/atosu/osu-exchange-partner-institutions.pdf.

Reclassification of Postbaccalaureate Students, Nondegree-Seeking Students, and Graduate Certificate Students
A postbaccalaureate, nondegree-seeking graduate, or graduate certificate student may be considered for status as a regular degree-seeking graduate student under one of the following provisions, depending upon prior academic records:

If the student would have been eligible for graduate admission at the time of entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student, the student is eligible for admission consideration at any time but must submit an application for admission to the appropriate level to begin the process.

If the student, prior to entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student, had been denied graduate admission or would have been ineligible for graduate admission, as determined a posteriori by the University Graduate Admissions Committee, the postbaccalaureate, nondegree-seeking graduate, or graduate certificate student must complete option a, b, or c below and reapply or reactivate an application for admission to graduate-level study.

a. complete 24 credits of courses each with a grade of B (3.00) or better, or
b. complete 15 credits of graduate course work involving lecture and textbook instruction, each eligible to transfer into the degree program and with a grade of B (3.00) or better, or
c. complete sufficient credits to bring the cumulative grade-point average (that for the last 90 credits of undergraduate work plus that
for courses taken as part of the 24-credit rule) to 3.00 or better before being eligible to apply for graduate admission.

These courses will normally be regular graduate courses relevant to the specific field, except that seminars and other blanket number graduate courses may not be used. Upper-division undergraduate courses are acceptable, provided that they eliminate specific deficiencies in requirements for entry into an identified graduate program. Lower-division undergraduate courses may not be used. All courses should be carefully selected in consultation with an academic advisor from the graduate field into which the student desires admission.

Completion of 2(a), 2(b) or 2(c) above does not guarantee graduate admission. Reclassification decisions employ the same procedures and requirements as those for admission. Postbaccalaureate, nondegree-seeking graduate, and graduate certificate students who seek reclassification must be acceptable to the program in which they plan to major. The university does not have the capacity to accommodate all who meet the minimum requirements for regular graduate student status; when selecting among students who meet minimum requirements, the university treats students requesting reclassification the same as those applying for admission as regular graduate students.

A postbaccalaureate or nondegree-seeking graduate student may use graduate credit earned in this status toward an advanced degree or graduate certificate if the student is later reclassified as a regular graduate student. This credit cannot be used to satisfy residence requirements for an advanced degree. A graduate certificate student may use graduate credit earned in this status toward an advanced degree if the student is later reclassified as a regular graduate student. In either case, the amount of usable credit will depend on the size of the individual student’s program (e.g., a maximum of 15 graduate credits could be used on a 45-credit master’s program or a maximum of 6 graduate credits may be applied toward an 18-credit graduate certificate.) See section entitled "Transfer Credit" for complete details.

Students should initiate all requests for reclassification at the Graduate School.

Second OSU Master’s Degree
A candidate for a second master’s degree from Oregon State University may request the application of up to 15 credits, appropriate to both programs, from the first master’s degree program to another, subject to the following three requirements:

1. Credits used to satisfy the residency requirements of one master’s degree may not be used to satisfy the residency requirements of another master’s degree.
2. Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.
3. Such credit will be granted only if the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student’s transcript.

Pursuit of the Second PhD
The doctor of philosophy degree is the highest academic degree granted by North American universities. It is a research degree designed to prepare a student to become a scholar; that is, to discover, integrate, and apply knowledge, as well as communicate and disseminate it. The doctor of philosophy degree is to be distinguished from other doctorates such as the MD, JD, or EdD degrees, which are designed for professional training or which focus on applied rather than basic research.

Students may enroll for a second PhD degree if they have previously obtained a PhD from OSU or elsewhere. Concurrent pursuit of dual PhD degrees is not allowed. In the case of a student pursuing a second PhD degree, requirements for the second PhD must be met without overlap with the first PhD degree including, but not limited to: successful completion of a second preliminary exam, a separate thesis with no overlap with the first PhD thesis, a final defense exam for the second PhD, a different major advisor from the first PhD, a thesis committee of different faculty than the first PhD degree (although some, but not complete, overlap between committee members would be acceptable in the case of two PhD degrees from OSU), and all other requirements for the second PhD degree program. Courses from the first PhD degree relevant to the second degree may be allowed to transfer between the two degrees. However, the student’s program of study committee must approve all course transfers, should pay particular attention to the relevancy, overlap, and currency of any courses to be transferred from one PhD degree to another, and are advised to proceed conservatively when approving course transfers from a first PhD to a second PhD degree.

Re-Enrollment
All credential-seeking graduate students will be subject to the continuous enrollment policy. Continuous graduate enrollment refers to the policy of requiring continuous registration of graduate students from original matriculation until all graduate degree requirements are met. Please refer to Registration Requirements under Policies Governing All Graduate Programs for complete details.

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish his/her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission and pay the readmission fee. Readmission is not guaranteed even if the student left in good standing.

International students who wish to re-enroll after an absence should contact the Office of International Services (OIS) to make sure they have the required documents to return to the US.

Graduate Tuition and Fees
The official Graduate Tuition and Fee Schedule can be found on the OSU Business Affairs website: http://fa.oregonstate.edu/business-affairs/ tuition-and-fee-information.

Tuition and fees for the next year are usually finalized during the month of July prior to the academic year start.

For information about residency status, visit http://admissions.oregonstate.edu/residency.

Policies Governing All Graduate Programs
Graduate Major
A graduate major is the area of academic specialization in which the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student’s transcript.
Graduate Option

Options are for students of a specific major. An option is one of several distinct variants of course aggregations within a major that focus on an area of study designed to provide a student with specialized knowledge, competence, and skills while sharing a minimum core of courses.

A graduate option consists of a minimum of 12 designated quarter credits of related course work (excluding thesis credits), comprised of course work offered by the sponsoring unit as well as by other academic units. The option may be comprised of specific courses, completion of a designated number of credits from a longer list of alternative courses, or a combination of specific and alternative course lists. Approved options may be added to a graduate program of study, and approved by the faculty advisor(s) and the director of the sponsoring unit. On the program of study, there should be no overlap in course credits between options (the same course cannot be used to satisfy credit requirements in multiple options). When the unit submits the final examination card to validate awarding of the major to the Graduate School, the unit will also validate that the requirements of the option have been completed.

Graduate Area of Concentration

A graduate area of concentration is a subdivision of a major or minor in which a strong graduate program is available. Areas of concentration may be referenced on the student’s program of study, but they are not listed on the student’s transcript.

Graduate Minor

A graduate minor is an academic area that clearly supports the major. Master’s program minors must include a minimum of 15 quarter credits of graduate course work; doctoral minors require a minimum of 18 credits. On a master’s or doctoral program, a minor may be:

1. an academic area available only as a minor,
2. a different major,
3. the same major with a different area of concentration, or
4. an integrated minor.

An integrated minor consists of a series of cognate courses from two or more areas. These courses must be outside the major area of concentration, with most of the courses being outside the major department. The graduate faculty member representing the integrated minor must be from outside the major department. Graduate minors are listed on the student’s transcript.

Concurrent Master’s Degrees

Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree. For additional information, please refer to the Transfer Credit section of this catalog.

Dual Majors

For the MA, MS, EdM, MF, or PhD degree, a student may select two graduate major areas to pursue instead of the traditional single major. Only one degree is awarded, and the student basically must satisfy all degree requirements for majors in both areas. For more details, contact the Graduate School.

Graduate Certificate

A graduate certificate program is a structured progression of graduate-level courses that constitute a coherent body of study with a specific defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university.

Transfer Credit

Students may only transfer course credits from regionally accredited institutions (or equivalently recognized institutions outside the U.S.). Students who wish to transfer graduate credits from other schools must provide transcripts for courses already completed to the Graduate School prior to the submission of a study program. Undergraduate students at OSU may receive credit for graduate courses (500 and 600 level) in excess of the requirements for a baccalaureate degree. Graduate courses taken at OSU while the student was a non-degree graduate student, a post-baccalaureate student, a professional degree-seeking student (PharmD or DVM), or an undergraduate student, are considered transfer courses.

Courses to be transferred must be graduate level. It is the responsibility of the student wishing to transfer the course to provide the necessary documentation to satisfy the OSU guidelines.

All courses on a program of study require final approval by the student’s program of study committee and the Graduate School. Committees are free to deny inclusion of any course if they believe that the earned grade is not sufficient; the course is not appropriate, sufficiently current, sufficiently rigorous based on syllabus content; or for any other reason. To be considered for inclusion on a graduate program of study, OSU courses whether taken as either an enrolled graduate student or pre-graduate admission, must have an earned grade of C or better. To be considered for inclusion on a graduate program of study, courses from another institution (transfer courses) must have an earned grade of B minus or better.

If the transfer credit is from a foreign university, the student must provide copies of the original transcript and an English translation of the transcript, with the courses to be transferred clearly indicated. Grades and credits for the courses must be clearly identified. In some countries, the first university degree, which OSU considers to be equivalent to a baccalaureate degree, may take five years or more to complete. All of the course work toward such a degree is considered a requirement for the first university degree, and hence none of it can be transferred to a graduate certificate or graduate degree at OSU.

Students may not transfer courses graded on a nonstandard basis (e.g., Pass/No Pass, Credit/No Credit, Satisfactory/Unsatisfactory) to their graduate certificate or degree programs unless it can be verified from the registrar of the university offering the course that the grade is equivalent to a B (3.00) or better.

Graduate courses to be transferred from another institution to an OSU master’s degree must not have been used to satisfy the requirements for a bachelor’s degree, master’s degree (or equivalent) or a doctoral degree.

Graduate courses to be transferred from an OSU master’s degree to a second OSU master’s degree must meet the following three requirements:

1. Credits used to satisfy the residency requirements of one master’s degree may not be used to satisfy the residency requirements of another master’s degree.
2. Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.

3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.

Up to 15 graduate credits may be transferred toward a 45-credit master’s degree. Up to 6 graduate credits may be transferred toward an 18-credit graduate certificate.

Graduate courses to be transferred to a doctoral degree program can be courses that were used to satisfy the graduate course requirements for a graduate certificate or a master’s degree (or equivalent). Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee. There is no limit on transfer credit toward the doctoral degree as long as the doctoral residence requirement is satisfied.

Credits earned in fulfillment of a graduate certificate program may be applied to a graduate degree, so long as they meet the appropriate standards for use in the degree and the criteria to transfer credit as defined herein. Courses completed for a degree program may likewise be applied toward a certificate program.

### Preparation Required for Graduate Major

Preparation for a graduate major is ordinarily an undergraduate major in the same subject, or a fair equivalent. Preparation for a graduate minor is ordinarily at least one year of upper-division work in addition to foundation courses in the subject.

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, such as practicum courses and internships. The university may find it necessary to evaluate a person’s background to determine his or her likelihood of maintaining standards of professional conduct necessary in the academic discipline or profession. An evaluation may consider current performance as well as past experiences and actions that could affect a student’s ability to perform in the particular course or program.

**Qualifying Examinations.** Some departments and programs require graduate students working for advanced degrees to take oral and/or written examinations in their major and minor fields to determine overall preparation and background. The examination serves as a guidance examination, the results of which are used in setting up the graduate study program. A poor showing in any area may result in a student’s taking undergraduate courses without graduate credit to gain the necessary background to proceed with the graduate program. The examination usually is taken during the first quarter of graduate enrollment.

In lieu of their own qualifying examination, departments and programs may accept a satisfactory showing in the Graduate Record Examination (GRE), or some other standard test. Check with the anticipated major department or program to find out which exams are appropriate.

### Registration Requirements

#### Introduction

Full-time status as a graduate student is defined by Oregon State University as enrollment in 9 credits per term. The maximum load for a full-time graduate student is 16 credits. A student may exceed this limit only with the approval of the Graduate School. Students receiving approval to exceed 16 credits will be assessed a per-credit overload fee.

Full-time status (i.e., a minimum of 9 credits per term) may be sufficient to qualify for purposes of veterans’ benefits, visa requirements, external fellowships, and federal financial aid.

To assure full compliance with visa regulations, international students must consult with the Office of International Services (http://international.oregonstate.edu/ois) (OIS) for additional information about registration requirements.

#### Continuous Enrollment

1. **Minimum Registration**

Unlesss on approved leave of absence (see Section II), all graduate students in graduate degree programs must register continuously for a minimum of 3 graduate credits until their degree is granted or until their status as a credential-seeking graduate student is terminated. This includes students who are taking only preliminary comprehensive or final examinations or presenting terminal projects. Students must register for a minimum of 3 credits and pay fees if they will be using university resources (e.g., facilities, equipment, computing and library services, or faculty or staff time) during any given term, regardless of the student’s location. If degree requirements are completed between terms, the student must have been registered during the preceding term.

Graduate students who have successfully completed all course and noncourse requirements in accordance with diploma deadlines (see the Graduate School website) are not required to register during the subsequent term.

Nonthesis master’s degree students who complete all degree requirements during a term for which they are registered will not be required to register for the subsequent term.

Doctoral and thesis master’s students who fail to meet all deadlines and complete all course and noncourse requirements during the term will be required to register for a minimum of 3 graduate credits during the subsequent term. However, only if library copies of the thesis have been submitted to the Graduate School within the first two weeks of the subsequent term and the thesis is the only outstanding requirement remaining for certification of the student’s graduate degree may an exception to this rule be considered.

Graduate students who use facilities or faculty/staff time during summer session to engage in academic or research activities in support of their thesis/pursuit of degree are required to register for a minimum of 3 credits during the summer session. Graduate students who use facilities or faculty staff time during summer session purely in service to the university and not to engage in academic or research activities in support of their thesis/pursuit of degree are not required to register during the summer session.

Graduate students do not need to submit a Leave of Absence form if they do not enroll in summer term.

It should be noted that graduate assistantship eligibility requires enrollment levels that supersede those contained in this continuous...
II. Leave of Absence

On-leave status is available to students who need to suspend their program of study for good cause. Students who desire a leave of absence will work with their major professor, program administrator, and the Graduate School to arrange authorized leave. Students understand that while on leave they will not use university resources.

Graduate faculty members are students' most important resource at the university and will work closely with graduate students to ensure timely completion of academic goals, understanding of the continuous graduate enrollment policy, and that graduate students enroll each term other than when they are on authorized leave. The Graduate School will assist graduate students and graduate faculty members with administrative procedures related to the continuous graduate enrollment policy. The Graduate School recognizes the diverse circumstances and unpredictability of graduate students' lives and will work in partnership with the graduate community in arranging leaves and responding to unanticipated situations.

A graduate student intending to resume active graduate student status following interruption of his or her study program for one or more terms, excluding summer session, must apply for leave of absence to maintain graduate student standing in his or her degree program. (See Section IV below). Leave of Absence (http://gradschool.oregonstate.edu/forms) form must be received by the Graduate School at least 15 working days prior to the first day of the term involved. The time the student spends in approved on-leave status will be included in any time limits relevant to the degree (See Sections C.1. and C.2. below). Students in on-leave status may not a) use any university facilities, b) make demands upon faculty time, c) receive a fellowship or financial aid, or d) take course work of any kind.

A. Eligibility

Only graduate students in good standing are eligible for leave of absence.

B. Leave of Absence Categories

1. Regular. Regular leave of absence is granted on a term-by-term basis in cases where the student demonstrates good cause (e.g., illness, temporary departure from the university for employment, family issues, financial need, personal circumstances). Students who request a leave of absence must:
   1. be in good standing,
   2. submit the Leave of Absence form (http://gradschool.oregonstate.edu/forms) indicating each term for which leave is requested, and
   3. complete all degree requirements within the time limits established in this catalog.

2. Family and Medical Leave. This leave is different from regular leave in that it is for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. See policy at http://gradschool.oregonstate.edu/sites/gradschool.oregonstate.edu/files/imce/progress/graduate-student-family-and-medical-leave-policy.pdf.

C. Limits

1. Regular Leave of Absence is granted for a specified time period that may not exceed three terms, excluding summer session.

2. Time spent in on-leave status will be included in all time limits pertaining to the student's degree program.

3. Students who matriculate fall term 2016 or later may use unlimited leaves as long as time to degree constraints are met (7 years for master's degrees and graduate certificates; 9 years for doctoral degrees). Leaves of absence may be approved for up to three terms at a time, but must be renewed to retain student status. Failure to renew the leave of absence or register will result in the loss of student status.

4. Family and Medical Leave is available for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. These absences will not be included in time limits pertaining to the student's degree program. Contact the Graduate School for additional details.

D. Approval

Approval of the major professor, department/program chair, and graduate dean are required.

III. Student Fees

Students with approved on-leave status are not required to pay tuition or fees. However, students who must register as per section I, "Minimum Registration," must pay both tuition and student fees.

IV. Unauthorized Break in Registration

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain a leave of absence will relinquish his or her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission and pay the readmission fee. The readmission application must be approved by the student's major professor, department/school/program chair, and graduate dean. Acceptance back into a graduate program is not guaranteed even if the student departed in good standing. The petitioner for readmission will be required to meet university and departmental admission requirements and degree completion requirements that are in effect on the date of readmission. Review of the Application for Graduate Readmission may also result in a change of residency status from resident to nonresident.

V. Appeal

In the case of extraordinarily extenuating circumstances, students may appeal the provisions of the continuous graduate enrollment policy by submitting a detailed request in writing to the dean of the Graduate School.

Implementation of Continuous Enrollment Policy

All graduate students, excluding certificate-only students, including those enrolled prior to fall 2002, are subject to this policy.

All graduate students should be enrolled for a reasonable number of credits sufficient to represent their use of university space, facilities or faculty time.
Registration Requirements for Graduate Assistants

In addition to the above registration requirements, the following requirements apply to graduate teaching assistants (GTA) and graduate research assistants (GRA).

As a condition of their academic appointments, graduate teaching and research assistants are required to register for 3 credits above the minimum full-time load (i.e., a minimum of 12 credits) each term of the appointment during the academic year (fall, winter, and spring). During summer session, a minimum registration of 3 credits is required for graduate assistants. Students are responsible for determining whether the minimum 3-credit summer registration fulfills their individual immigration, financial aid, tax liability or other specific needs. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy enrollment requirements for graduate assistant salary/stipend, tuition remission, salary supplement or health insurance benefits. Tuition charges associated with INTO OSU enrollment are not covered under graduate assistant tuition remission.

Grade Requirement

A grade-point average of 3.00 (a B average) is required: 1) for all courses taken as a degree-seeking graduate student, and 2) for courses included in the graduate degree or graduate certificate program of study. Grades below C (2.00) cannot be used on a graduate program of study. A grade-point average of 3.00 is required before the final oral or written exam may be undertaken. Enforced graduate-level prerequisite courses must be completed with a minimum grade of C.

Policy on Disallowance of Undergraduate Courses in the Calculation of the Final Graduate Student GPA

Calculation of the final cumulative GPA for graduation for a graduate student will include all 500-, 600- and certain 700-level courses determined to be eligible for use on a graduate program of study. Undergraduate (100 to 400 level) courses taken, even if taken while a graduate student, will not be used in the cumulative GPA calculation for graduation. A graduate student is required to attain a 3.0 GPA in all graduate-level course work, both cumulatively and on the program of study, for graduation.

Course Numbers

Graduate Courses

All graduate courses will be designed around well-defined objectives or student learning outcomes, and instructional opportunities should be designed to help students achieve these outcomes. Student learning outcomes encompass the range of student attributes and abilities that students should be able to demonstrate after successful completion of the course.

500-Level Courses

These courses are graduate courses offered primarily in support of graduate certificate or master’s degree programs but which are also available for use on doctoral level degree programs.

Undergraduates of superior scholastic achievement may be admitted to these courses on the approval of the instructor, and they may, if admitted, under some conditions, use a limited number of these courses toward a graduate certificate or a graduate degree program. These courses have one or more of the following characteristics:

1. They require upper-division prerequisites in the discipline.
2. They require an extensive theoretical base in the discipline.

600-Level Courses

These are graduate courses offered principally in support of doctoral level instructional programs but also are available for use on graduate certificate or master’s level degree programs. In addition to exhibiting the characteristics of 500-level courses, these courses typically require 500-level prerequisites and they build on and increase the information presented in 500-level courses.

700-Level Courses

These are advanced professional or technical courses that may be applied toward a first professional degree (e.g., DVM, PharmD). They make up the bulk of the course work for these professional degree programs. In general, these courses are not considered graduate-level courses, and may not be applied toward graduate certificate, master's level or doctoral level (PhD or EdD) degree programs. However, selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee and the Graduate School.

800-Level Courses

These courses are in-service courses aimed at practicing professionals in the discipline. These courses have an in-service or retraining focus, and provide the professionals new ways to examine existing situations or new tools to treat existing problems. These courses generally have none of the characteristics of 500-level courses. They are not graduate-level courses, and they may not be applied to graduate certificate or graduate degree programs nor to professional degree programs.

Blanket-Numbered Courses

Blanket-numbered courses have a zero middle digit. Those that carry graduate credit may be repeated up to the maximum totals indicated below.

- **Research** (501 or 601) is for research that is not part of the thesis. Data obtained from such research should not be incorporated into the thesis.
- **Thesis** (503 or 603) covers the thesis research and writing. A student may register for thesis credit each term.
- **Reading and Conference** (505 or 605) and **Projects** (506 or 606) are used for special work not given under a formal course number.
- **Seminar** (507 or 607) is used both for departmental seminars and for special group work not given in a formal course.
- **Workshop** (508 or 608) is usually a special, short-term course covering a variety of topics.
- **Practicum** (509) is used for courses whose emphasis is the application of academic theory to the work environment.

No more than 9 credits of blanket-numbered courses, other than thesis (or research-in-lieu-of-thesis for nonthesis programs), may be applied toward the minimum 45-credit master’s degree. While internship credit (510) is not considered a blanket-numbered course, no more than 6 credits of internship may be applied toward a 45-credit master’s degree. The internship credit limit is in addition to the 9-credit blanket-hour limit.

No more than 15 blanket-numbered credits may be applied toward the minimum 108-credit doctoral program.
No more than 3 credits of blanket-numbered courses in each field of study may be used in the MAIS program; thesis credits or research paper credits are exempt from this limitation.

Blanket-numbered transfer courses will count toward the maximum totals specified above.

Courses Graded on Nonstandard Basis
Graduate students may elect to take courses on an S/U basis only if those courses are not in their graduate certificate or graduate degree program or are not required for the removal of deficiencies. Graduate students may use courses taken at OSU on a P/N basis in their graduate certificate or graduate degree programs.

4xx/5xx Courses
No more than 50% of courses used for a graduate program of study may be the 500-level component of a dual-listed course. Courses bearing dual-listed numbers (400/500) must provide students who are enrolled for 500-level credit with graduate-level learning.

Expectations for learning outcomes in the graduate component of dual listed (400/500 level) courses are the same as for stand-alone 500-level courses. A distinction should be made between learning outcomes for students taking the course for undergraduate credit (400 level) and those taking the course for graduate credit (500 level). In most cases this distinction should include emphasis on developing skills in analysis, synthesis, and/or evaluation for the 500-level credit. The different student learning outcomes should be accompanied by appropriate differences in instructional opportunities and evaluation procedures.

Repeating 4xx/5xx Courses
A graduate student who has taken a 4xx course may not normally include the corresponding 5xx course on his or her graduate program.

Remote Access for Graduate Committee Meetings
It is generally expected that all members of graduate committees should be physically present at all required graduate committee meetings (i.e., program meetings, preliminary examinations, and final examinations). However, it is permissible for the student, and/or committee members to participate from a remote location provided the conditions listed below are met:

a. Advance agreement of the student and all committee members has been obtained;
b. All participants join in with two-way audio and video connections; audio-only connections must be approved by the major professor if the video connection is not possible. When the student is the remote participant, his or her connection must be an audio and video connection;
c. Any visual aids or other materials have been distributed in advance to the remote participants;
d. The committee members participate in the complete meeting, discussion, presentation, and evaluation; and
e. The student is responsible for making arrangements.

Petitions
A student wishing to deviate from normal Graduate School regulations and procedures may submit a request and the reasons for it to the Graduate School in a letter signed by the student and his or her major professor. In reaching a decision, the Graduate School may seek advice from the Graduate Council. The student will be advised of the decision when it has been made. Action taken on a petition will not be considered precedent for future action.

Diploma Application
Graduate students wishing a printed diploma must complete a Diploma Application form (http://gradschool.oregonstate.edu/forms). This form should be submitted prior to taking the final examination, indicating the term the student intends to graduate. Participation in Commencement ceremonies requires earlier submission of this form.

Institutional Review Board Approval of Human Subjects Research
It is Oregon State University policy that the OSU Institutional Review Board (IRB) must review all research that involves human subjects. The results from studies conducted without obtaining IRB review and approval may not be published or widely distributed, nor can such data be used to satisfy master’s thesis or doctoral dissertation requirements.

The requirements for IRB review of research involving human subjects is based upon research ethics and federal law, and the implications of conducting human subjects research without IRB approval are significant. Failure to follow this policy places both the individual and the institution at risk: the individual may be subject to university sanctions and/or incur personal liability for negligence and harm; the university could lose access to federal funding or be forced to cease all human subjects research. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate.edu/irb/.

Institutional Animal Care and Use Committee IACUC
The Oregon State University Institutional Animal Care and Use Committee (IACUC (http://research.oregonstate.edu/iacuc)) requires prior review and approval for all live vertebrate animal use in research, teaching, testing, per the IACUC Scope of Work Policy (http://research.oregonstate.edu/iacuc/policies-guidelines). An eligible principal investigator must be identified in order to submit an ACUP to the committee, per PI Eligibility Policy (http://research.oregonstate.edu/sites/research.oregonstate.edu/files/iacuc/pi_eligibility_policy.pdf). Review leading to approval is accomplished via submission of an Animal Care and Use Protocol form (ACUP (http://research.oregonstate.edu/iacuc/iacuc-forms)) to the IACUC.

The requirements for IACUC review are based on the ethics of animal use, and our assurances to agencies that provide federal oversight, funding, and program accreditation. Implications regarding conduct of animal research without IACUC approval and oversight are significant. Failure to secure and maintain approval can result in the student’s inability to continue research or publish data. In addition, OSU could lose accreditation, lose access to federal funding or be forced to cease all human subjects research. For more information, please send an email to iacuc@oregonstate.edu or visit the IACUC website at http://research.oregonstate.edu/iacuc.

OSU Scientific Diving and Scientific Boating
Scientific Diving
OSU personnel (graduate or undergraduate students, faculty, staff, approved volunteers) who work underwater as a part of their research must have their diving activity pre-approved by the OSU Diving and Small Boat Safety Officer (DBSO) and the OSU Diving Control Board. OSU is an organizational member of the American Academy of Underwater Sciences (AAUS) and all OSU scientific diving is conducted in accordance with AAUS standards. For more information visit http://
research.oregonstate.edu/diving/ or contact the Diving and Small Boat Safety Office (diving.safety@oregonstate.edu).

**Scientific Boating**
OSU personnel (graduate or undergraduate students, faculty, staff, approved volunteers) who operate vessels (motorboats, personal watercraft, and non-motorized craft) as a part of their research must conduct their activities in accordance with OSU scientific boating standards. For more information visit http://research.oregonstate.edu/boating/ and contact the Diving and Small Boat Safety Office (diving.safety@oregonstate.edu) to ensure that your planned research boating activities are in compliance with OSU standards. OSU is a member of the Scientific Boating Safety Association (SBSA).

**Graduate Work by Faculty Members**
The Faculty as Student policy specifies that one may not simultaneously be an Oregon State University faculty member and an OSU graduate student. This policy pertains to all OSU faculty members (both ranked and professional), is consistent with practices at most universities, and is in keeping with recognized appropriate graduate education practice.

Although faculty members are eligible to enroll for courses at staff fee rates, such course work may not be applied to a graduate certificate or graduate degree without prior approval from the graduate dean.

**Graduate Student Teaching**

**Appointment as Instructor of Record.** For a graduate student to be appointed as the Instructor of Record for a graduate course (including the 500-level component of a slash course):

- The unit/program of employment must be separate and distinct from the unit/program of enrollment.
- The instructor must be appointed to the graduate faculty based on their academic/professional qualification by the unit/program of employment.
- In the event that graduate students from the instructor’s unit/program of enrollment are enrolled in the course, alternative arrangements must be made for evaluating the work of those graduate students.

**Appointment as Teaching Assistant.** For a graduate student to be appointed as the Teaching Assistant for a graduate course (including the 500-level component of a slash course), the Director of the Graduate Program must ensure that potential conflicts of interest are avoided to the maximum extent possible. This may include:

- Making alternative arrangements to evaluate the work of graduate students from the same unit/program as the Teaching Assistant, OR
- Ensuring that the Teaching Assistant has advanced to candidacy status (after prelims) and all graduate students in the class have not advanced to candidacy

If neither of these criteria are met, the program must have a conflict of interest plan approved by the Graduate School.

**Graduate Appointments**
Graduate assistants are represented by the Coalition of Graduate Employees, American Federation of Teachers Local 6069 (CGE). Terms and conditions of employment for service not performed as a requirement for their degrees are prescribed in the collective bargaining agreement (http://hr.oregonstate.edu/policies-procedures/administrators/graduate-employee-cge-contract-resources) between OSU, and CGE. The CGE contract can be found on the OHR website at http://hr.oregonstate.edu/ercc/gradstud.

Persons interested in assistantships should write directly to the department/program concerned.

To qualify for appointment as a graduate assistant the student must:

1. Be a regularly admitted, conditionally admitted, or provisionally admitted graduate student at Oregon State University (i.e., not a graduate nondegree-seeking, postbaccalaureate student, or PharmD or DVM student).
2. Be enrolled as a full-time degree-seeking graduate student at Oregon State University, completing a minimum of 12 credits of instruction each term (3 credits during summer session). Audit registrations, course withdrawals, and enrollment in INTO OSU may not be used to satisfy these minimum enrollment requirements.
3. Be making satisfactory progress toward an advanced degree.

Graduate assistants may be appointed on an academic term basis, an academic-year basis (nine months) or a full-year basis (12 months). No appointment can be for less than .30 FTE or more than .49 FTE per term. A graduate assistant on less than .49 FTE may take on extra duties; however, the total stipend plus salary from all sources at Oregon State University may not exceed the equivalent of .49 FTE for any term.

All graduate assistants are required to provide duties to OSU to justify their stipends. Teaching assistants are expected to provide duties related to the university’s instructional program (e.g., teaching laboratories or discussion sections, grading papers, advising). Research assistants provide duties related to the research function of the university. Whatever the type of appointment, the graduate assistant should be regarded as a student providing service as part of a learning experience rather than as an employee whose education is secondary.

The work schedule and the duties to be performed by the graduate assistant shall be established by the department or program sponsoring the assistantship.

Graduate assistants must register for and complete a minimum of 12 credits of instruction each term except during summer session, when a minimum of 3 credits is required. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy these minimum enrollment requirements. (See section on ’Registration Requirements for Graduate Assistants’ for complete details.)

Persons interested in assistantships should write directly to the department or program concerned.

**International Graduate Teaching Assistant English Language Requirement**
If the Graduate School determines that an applicant or current student’s native language is not English, the proposed IGTA is required to take the Internet Based TOEFL (iBT) test before being appointed as a graduate teaching assistant.

Potential IGTAs scoring below 22 on the speaking section of the iBT can be appointed, but will be required to undertake further English language training.

If a department wishes to offer a student with an iBT speaking score of 18 to 21 an assistantship, the unit must:
a. Affirm that the graduate student will be enrolled in IEPA 098NC Communication for IGTA(s) (with the unit paying the cost of this training).

b. If at all possible, assign the graduate student assignments (such as paper grading, reagent preparation, etc.) that do not require personal contact with undergraduate students.

c. If (b) above is not possible, and if possible, pair the IGTA in the laboratory or classroom with another TA who is a native speaker of English.

d. Monitor the quality of IGTA performance using student evaluations and the evaluations of the supervising professors. The unit will document for each student the results of their evaluation of the student’s performance as a GTA.

If the unit agrees to meet these conditions, the IGTA appointment can be made.

The scheduling of IEPA 098NC will be coordinated with the units so that students can attend the course and conduct teaching assistantship duties. Please check the OSU online schedule of classes for confirmation of the time and date: https://catalog.oregonstate.edu/course-search/

Students with an iBT speaking score of less than 18 cannot be assigned teaching assistantships.

Students Who Fail to Find a Major Advisor

There are times when students are making satisfactory academic progress, but are unable to complete graduate studies with their initial major professor. Oregon State University has an ethical responsibility to assist such students in identifying a new major professor. The Graduate Council and Faculty Senate policy for establishing major advisors and committees for students in this situation provides guidance and can be obtained by contacting the Graduate School.

Dismissal from Graduate School

Advanced-degree students (regularly, conditionally, and provisionally admitted) are expected to make satisfactory progress toward a specific academic degree. This includes maintaining a GPA of 3.00 or better for all courses taken as a graduate student and for courses included in the graduate program, meeting departmental or program requirements, and participating in a creative activity such as a thesis.

If a student is failing to make satisfactory progress toward an academic degree, as determined by the major department/program or the Graduate School, the student may be dismissed from the Graduate School.

Any doctoral student who fails the preliminary oral examination with a committee recommendation that the student’s work toward this degree be terminated may be dismissed from the Graduate School.

Any student who fails a final oral examination may be dismissed from the Graduate School.

Academic dishonesty and other violations of the Student Conduct Code (http://studentlife.oregonstate.edu/studentconduct) may serve as grounds for dismissal from the Graduate School.

Student Conduct Regulations

Graduate students enrolled at Oregon State University are expected to conform to basic regulations and policies developed to govern the behavior of students as members of the university community. The regulations have been formulated by the Student Conduct Committee, the Student Activities Committee, the university administration, and the State Board of Higher Education. Violations of the regulations subject a student to appropriate disciplinary or judicial action. The regulations and the procedures for disciplinary action and appeal are available via the Office of Student Conduct and Community Standards website at http://studentlife.oregonstate.edu/studentconduct/.

Grievance Procedure

All students desiring to appeal matters relating to their graduate education should request a copy of Grievance Procedures for Graduate Students at Oregon State University from the Graduate School. These procedures are also available on the Web at http://gradschool.oregonstate.edu/progress/grievance-procedures. Graduate assistants whose terms and conditions of employment are prescribed by the collective bargaining agreement (http://hr.oregonstate.edu/sites/hr.oregonstate.edu/files/ercc/gradstud/2014-2016.pdf) between OSU and the Coalition of Graduate Employees, American Federation of Teachers Local 6069 should also refer to that document.

Policies Governing Graduate Certificate Programs

General Requirements

The Graduate Certificate Program at Oregon State University is a structured progression of graduate-level courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university. Students desiring a graduate certificate must be admitted to the university as a credential-seeking graduate student, but are not required to be on track for a specific degree. There is no formal committee requirement for graduate certificates. Certificate students are subject to all general policies governing the courses for the master’s degree, unless specified within the Graduate Catalog.

Graduate Certificate Study Program

The graduate certificate curriculum consists of a minimum of 18 graduate credits, and may include a final project, portfolio, or report for integration of the sequence of course materials. All graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone credits. The remaining credits may be the 500 component of 400/500 slash courses. No final examination is required.

Time Limits

Courses completed no more than seven years prior to the graduate certificate award may be used to satisfy certificate requirements. Students enrolled in certificates without concurrent enrollment in a graduate degree program are not subject to the continuous enrollment policy during the time allowed for certificate completion.

Financial Aid Eligibility

Students enrolled in only graduate certificate programs may qualify for federal loan and work-study financial aid. Students must complete the federal FAFSA form to begin the financial aid application process.
Policies Governing Master’s Degree Programs

General Requirements

All master’s degree programs require a minimum of 45 graduate credits including thesis (6 to 12 credits), research-in-lieu-of-thesis (3 to 6 credits), or an integrative capstone experience (3 to 6 credits). Exceptions to this capstone requirement are specified under the degree descriptions that follow these universal master’s degree requirements. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses. General regulations for all master’s programs are cited here, with certain exceptions provided for master’s degrees in the professional areas listed on the following pages.

All master’s students must:

a. Conduct research, produce some other form of creative work, or participate in an integrative capstone experience; and
b. Demonstrate mastery of subject material; and
c. Be able to conduct scholarly or professional activities in an ethical manner

The assessment of these outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

Residence Requirements

The residence requirement for the master’s degree is 30 graduate Oregon State University credits after admission as a degree-seeking graduate student. These 30 graduate credits must appear on the master’s degree program. (This does not include graduate credits taken as a postbaccalaureate or graduate nondegree-seeking student, nor transfer courses.)

Language Requirements

For the master of arts degree, the student must show foreign language proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of “C” (2.00) or better. English is not considered a foreign language for purposes of this requirement. There is no language requirement for the Master of Arts in Interdisciplinary Studies degree. For other master’s degrees, there is no foreign language requirement unless a language is required in the individual student’s program. A student must be enrolled to complete their foreign language requirement before they take the final oral examination for the degree.

Graduate Program of Study

A regular master’s degree student must complete a program of study in consultation with an advisor/ advisory committee before completing 18 graduate credits. This includes credits earned as a postbaccalaureate, graduate nondegree-seeking student, or graduate student.

Students who wish to transfer credit must submit a Transfer Credit Request form (http://gradschool.oregonstate.edu/forms) before the end of their first year of study.

The final program of study must be submitted to the Graduate School at least 15 weeks prior to the date of the student’s final examination.

Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

If a minor is declared, approximately two-thirds of the work (30 graduate credits) should be listed in the major field and one-third (15 graduate credits) in the minor field. In such cases, the student’s advisory committee must include a member from the minor department.

The program is developed under the guidance of the major professor, and minor professor when a minor is included, and signed by those professors and the chair of the academic unit before filing in the Graduate School. Each candidate’s program should include substantial work with at least three faculty members offering graduate instruction. Changes in the program may be made by submitting a Petition for Change in Program form (http://gradschool.oregonstate.edu/forms), available in the Graduate School.

Time Limit

All work toward a master’s degree, including transferred credits, coursework, thesis (if required), and all examinations, must be completed within seven years. Time in which the student is on a leave of absence is included in the seven year limit.

Thesis

When scheduling their final oral examinations, thesis option master’s students are required to submit the pretext pages of their thesis to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright, title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional).

It is expected that students will distribute examination copies to all their committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student’s final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, students must upload one PDF copy of the thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School’s website for complete details (http://gradschool.oregonstate.edu/progress/thesis-guide).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master’s thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate.edu/irb/.
The credit allowed for the thesis, including research and preparation of the manuscript, varies from 6 to 12 credits. In certain departments and programs, the MS or MA thesis is optional, to be determined in each case by the department/school/program and the major professor. See departmental descriptions.

Final Examination
Successful completion of a final oral examination is required for all master’s degrees with the exception of the following graduate programs:

- EdM students who complete the nonthesis option must take a final written examination;
- MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes;
- MCoun students admitted to the degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery of the MCoun learning outcomes;
- MCoun students admitted to the program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty.

Some departments also require the student to pass a written exam prior to the oral exam.

The final oral examination for master's candidates may, at the discretion of the graduate program, consist of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

For master's candidates whose programs require a thesis, not more than half of the examination period should be devoted to the presentation and defense of the thesis; the remaining time can be spent on questions relating to the student’s knowledge of the major field, and minor field if a minor is included in the program of study. Graduate faculty serving on thesis-oriented master’s degree programs may contribute to the direction of the student's thesis, will assess the student's thesis and his or her defense of it in the final oral examination, will vote to pass or fail the student, and may sign the thesis when it is in acceptable final form. The examining committee consists of at least four members of the graduate faculty—one from each of the three fields of study. The examining committee might also include a fourth member who is not a member of the graduate faculty. The fourth member must be appointed by the graduate faculty—two in the major field and one in the minor field if a minor is included. When a minor is not included, the third member may be from the graduate faculty at large.

Master of Arts in Interdisciplinary Studies
The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Most graduate majors or minors may serve as a field for this degree. The current list of approved majors is at http://gradschool.oregonstate.edu/programs. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total program exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty—one from each of the three fields—and a Graduate Council representative. A formal program meeting must be held prior to the completion of 18 graduate credits. A final oral examination is required.

Two options under the program:

- **Option A**: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

- **Option B**: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered as Research 501, Reading and Conference 505, or Projects 506.

Master of Arts in Teaching (MAT)
The Master of Arts in Teaching is an intensive professional degree program intended to prepare teachers for careers in public school education. Students who successfully complete the MAT can be recommended for the Oregon basic teaching license upon the positive evaluations of the university and public school supervisors.

The professional program in teacher education is full-time and one calendar year in length. Students will enroll with their subject area cohort group and complete the program in one year. Teacher licensure is offered in the following areas:

- Advanced Mathematics Education
- Agricultural Education
- Biology Education
- Chemistry Education
- Elementary Education
- Family and Consumer Sciences Education
- Integrated Science Education
- Language Arts Education (English) — Cascades Campus only
- Music Education
• Physics Education
• Spanish Education

The professional teacher education program begins with a 15-credit professional education core that is foundational to and a prerequisite for the 48-credit Master of Arts in Teaching degree. The 48-credit MAT degree requires successful completion of a final oral examination.

Master of Athletic Training
The Master of Athletic Training (MATRN) degree program consists of a combination of didactic, laboratory and clinical education experiences, from which students in athletic training attain the entry-level educational competencies stipulated by the national accrediting agency for the athletic training profession, the Commission on the Accreditation of Athletic Training Education (CAATE). Graduates are expected to take and pass the certification examination offered by the Board of Certification and embark on careers as Certified Athletic Trainers.

Master of Business Administration
The MBA program represents a broad, yet responsive general management education with an entrepreneurial focus that crosses the functional disciplines of business. Its advanced management emphasis and entrepreneurial focus creates practical value-added content for all students, both business and nonbusiness undergraduates, enabling them to solve complex business problems and successfully compete in the business marketplace.

The MBA program is concentrated in length—three academic terms for full-time students with a BA/BS in business or who have completed the foundation courses. Full-time students with no previous business or business-related course work can complete the program in as few as six terms. The MBA degree requires no thesis. MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes.

Master of Business Administration and Accountancy
The Master of Business Administration and Accountancy is a one-year master's program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master's degree during their five years of university study required to become a CPA. As an integrated program, the MBAA is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MBAA is also designed to accommodate postbaccalaureate students wishing to prepare for accounting careers.

Master of Counseling (MCoun)
Students admitted to the MCoun degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery of the MCoun learning outcomes. Students will specifically address graduate learning outcomes (G.L.O.'s) by describing how they have and/or how they would utilize research/evidence-based counseling practice in their clinical work. Students will be required to describe an ethical dilemma they have faced in their clinical practice to date and include an ethical decision model when describing their ethical decision-making processes. The written project portfolio will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based. A student shall receive a Pass when the grading committee unanimously grades the portfolio as a Pass.

Students admitted to the MCoun degree program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty. The written exam will evaluate all three graduate learning outcomes (G.L.O.'s). Successful completion of the national exam will evidence the candidate's mastery of MCoun subject material covered in the program and assess the candidate's ability to apply research and ethical proficiencies on the exam. The exam will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based.

The minimum passing score for the national exam is defined as one standard deviation below the national mean at the time of administration. Candidates who do not pass the national exam are allowed to take re-examination, but not before the end of the term in which the exam was administered. No more than two re-exams are permitted.

Please contact the College of Education for additional information regarding additional MCoun examination requirements, graduate learning outcomes, and the CACREP national examination.

Master of Education
The Master of Education (EdM) is a professional degree requiring a minimum of 45 credits in graduate courses (including a maximum of blanket-numbered courses); additional credits may be required in some areas of concentration. A minimum of 9 additional credits in graduate courses is required for the masters degree in College Student Services Administration (CSSA).

The EdM degree requires successful completion of a final written examination.

A candidate for the EdM degree qualifies for the degree under one of these options:

1. The student submits a thesis that meets all standards for a masters thesis on some applied or professional aspect of education. For the thesis the student receives 6 credits. He or she must complete a major of 24 credits (which may include the 6 thesis credits) and 21 elective credits determined under the direction of an advisor.
2. For adult education, the student completes 30 credits in the major and at least 15 credits in the minor. The minor may be completed either inside education or from approved minors outside education and serves students focusing on training and development and developmental education.
3. The student completes 45 credits with 24 credits in specific courses for the major. No minor is identified. The remaining 21 credits are elective under the direction of an advisor. No thesis or field studies are required. This option is designed primarily for in-service teachers working on standard licensure.
4. The student majors in College Student Services Administration and completes at least 39 credits in the major and 15 credits in a minor for a minimum of 54 credits.
Master of Engineering
The Master of Engineering (MEng) degree is designed to provide students the opportunity to pursue advanced-level study in a field of engineering. The degree is concerned with application of specialized, graduate-level engineering and managerial knowledge to specific engineering disciplines. The degree is a course work-only degree, with the option of substituting research or internship credits for a few courses. No thesis or project is required.

The MEng program requires a minimum of 45 credits. The examining committee consists of a minimum of three members of the graduate faculty in the engineering specialization. A final oral examination is required.

Master of Fine Arts
The Master of Fine Arts is an appropriate terminal degree for those who wish to teach in creative, performing, and studio arts in higher education. The MFA in Creative Writing is a program that helps students define and advance their literary ambitions and develop their skills as artists and teachers. Students will be introduced to three broad areas of knowledge within the field of creative writing that they need in order to become successful writers, editors, or teachers. These areas involve writing, reading, and marketing skills within contemporary literary fiction, poetry, and nonfiction. The degree requires a minimum of 60 credits comprised of 24 credits in creative writing workshops, 24 credits in literature and/or composition and rhetoric and one course emphasizing literary roots, and 12 credits in thesis and/or writing and conference. All MFA candidates are required to complete a thesis, which is to be a sustained piece of imaginative writing of literary merit. A final oral examination is required.

Master of Forestry
The professional Master of Forestry degree is intended for potential administrators and potential professional forestry and natural resource specialists in public and private organizations where persons of broad ability are demanded and a broad technical education is needed. A thesis is not required, but a technical report on an approved topic, correlated with courses in the major field, must be submitted. A final oral examination is required.

Master of Health Physics
The Master of Health Physics degree is designed to be a professional, advanced graduate degree that emphasizes fundamental learning and professional development for those wishing the master’s credential, but not requiring a research focus for their planned profession. The degree directs students toward professional licensing as a certified health physicist in the field of radiation protection. The program will consist of a minimum of 45 graduate credits, with 30 graduate credits in the major, and 15 elective graduate credits. A final oral examination is required.

Master of Medical Physics
The Master of Medical Physics (MMP) degree prepares the graduate for a professional career in applied medical physics, focused on practical hands-on experience. The MMP program is designed as a clinical specialization for individuals with an undergraduate degree in science or engineering, offering areas of concentration in therapeutic radiologic physics or medical health physics. The degree requires a minimum of 45 graduate credits, including 30 graduate credits within the major and 15 elective graduate credits. The program does not require a thesis, however, candidates are required to pass a final oral examination.

Master of Natural Resources
The Master of Natural Resources (MNR) degree is designed to engage university scientists and world-wide natural resource professionals in a process that integrates diverse perspectives to address natural resource challenges at the state, regional, national, and international levels. The program is intended for individuals with at least two years of experience in natural resource disciplines who seek an advanced degree in natural resource management. The MNR curriculum, consisting of 45 credits, is organized into three sections: core (18 credits), area of emphasis (18 credits), and capstone project (9 credits). It is taught as a distance, online curriculum, although it may be possible for some students to work toward the MNR degree while in residence at Oregon State University. The MNR degree is offered as a non-thesis option only. A final oral examination is required.

Master of Public Health
The Master of Public Health (MPH) degree program combines broad training in public health with specific training in one of the specialty options.

The MPH program is designed for persons who already have a bachelor’s degree and who wish to obtain further formal education in the field of public health. Persons with experience in the health field or who have training in a specialized area of health may increase their knowledge regarding population-based health to prepare them for expanded administrative and service careers. Persons who do not have prior experience in health fields may prepare themselves for a broad variety of careers depending upon their choice of specialty option.

The Master of Public Health degree is offered by Oregon State University with graduate options in biostatistics; environmental and occupational health; epidemiology; global health; health management and policy; health promotion and health behavior; physical activity; and public health practice.

The MPH program consists of 12 core credits, plus additional units of required and elective courses, and an internship. Programs are approximately 60 credits in length. All students will be required to take a final oral examination as determined by their specific option.

Master of Public Policy
The Master of Public Policy is a professional degree intended to prepare students for careers in the public, nonprofit, and international sectors and offer training for in-service students desiring professional growth and advancement. The degree is designed to be a generalist program, with an emphasis on analytic skills and policy knowledge. The degree requires a minimum of 62 graduate credits, 44 of which are in the required core. The core curriculum provides an important foundation in statistics, research methods, computer applications, public policy analysis, public administration and ethics, and economics. The remaining 18 credits support the student’s preferred area of concentration, consisting of environmental policy, international policy, rural policy, science policy, or social policy. Students with little work experience in public service, the nonprofit sector, or the international context will be required to engage in a supervised internship that will allow them to work closely with experienced mentors who will help them integrate theory with practice and introduce them to a professional network. Students with relevant work experience will substitute course work for internship credits. A final oral examination is required.
Professionals Science Master's Degree (PSM)

The Professional Science Master's (PSM) allows students to pursue advanced training in science while simultaneously developing workplace skills highly valued by employers. PSM programs consist of two years of academic training in an emerging or interdisciplinary area in science, along with a professional component that includes internships and "cross-training" in workplace skills, such as business, communications, and regulatory affairs. All have been designed in concert with employers and are designed to dovetail into present and future professional career opportunities.

The Professional Science Master's Degree (PSM) is offered with five graduate majors:

1. Applied Biotechnology [To be terminated, pending approval]
2. Applied Physics [To be terminated, pending approval]
3. Applied Systematics in Botany [To be terminated, pending submission and approval of a proposal.]
4. Environmental Sciences
5. Fisheries and Wildlife Administration

For further information on Environmental Sciences, email: carolyn.fonyo@oregonstate.edu.

For further information on Fisheries and Wildlife, email: fw.gradadvising@oregonstate.edu.

Policies Governing Doctoral Degree Programs

General Requirements

The doctor of philosophy degree is granted primarily for creative attainments. There is no rigid credit requirement; however, the equivalent of at least three years of full-time graduate work beyond the bachelor's degree (at least 108 graduate credits) is required. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

After admission into the doctoral program, a minimum of one full-time academic year (at least 36 graduate credits) should be devoted to the preparation of the thesis. A minimum of 27 regular non-blanket credits must be included on a doctoral program.

By completing the requirements necessary for the PhD, students shall:
(a) produce and defend an original significant contribution to knowledge;
(b) demonstrate mastery of subject material; and
(c) be able to conduct scholarly activities in an ethical manner. Additional program specific learning outcomes, the assessment of all outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

Graduate Program of Study

The student's doctoral program of study is formulated and approved subject to departmental policies at a formal meeting of his or her doctoral committee. The committee is comprised of a minimum of five members of the graduate faculty, including two from the major department and a representative of the Graduate Council. If a minor is declared, it must consist of at least 18 credits (15 credits for an integrated minor) and the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student's committee.

Doctoral students must complete the program of study in consultation with their advisory committee. This signed plan must be submitted to the Graduate School by the end of the fifth term of study.

The student must be registered for a minimum of 3 credits for the term in which the program meeting is held. When the program is approved by the doctoral committee, the departmental chair, and the dean of the Graduate School, it becomes the obligation of the student to complete the requirements as formulated. Changes in the program may be made by submitting a Petition for Change of Program form (http://gradschool.oregonstate.edu/forms) available in the Graduate School.

Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student's graduate committee.

No more than 15 credits of blanket-numbered courses, other than thesis, may be included in the minimum 108-credit program.

Students who wish to transfer credit must submit a Transfer Credit Request form (http://gradschool.oregonstate.edu/forms) before the end of their first year of study.

Time Limit

Effective beginning with students matriculating fall term 2016, all work toward a doctoral degree, including course work, thesis (if required), and all examinations, must be completed within nine years of the indicated start term on the Departmental Action Form. Extensions of this time limit may be requested by submitting a petition to the Graduate School.

Residence

For the doctoral degree, the residence requirement consists of two parts:

1. a minimum of 36 graduate Oregon State University credits must be completed; and
2. the student must spend at least three terms of full-time graduate academic work (at least 9 credits per term) on campus or at an off-campus site approved by the Graduate School. The latter requirement of three terms of full-time enrollment does not have to take place in consecutive terms.

Adequate fulfillment of the residence requirement shall be determined by the Graduate School.

Language Requirements

The foreign language requirement is determined by the student's doctoral committee, subject to the same approval required for the graduate study program, and is so designated in the official doctoral program. Foreign language requirements must be completed before the oral preliminary examination.

Preliminary Examinations

The student working toward a doctoral degree must pass a comprehensive preliminary examination. The purpose of this exam is to determine the student's understanding of his or her major and minor fields and also to assess the student's capability for research. Students must enroll for a minimum of 3 credits during terms in which they undertake departmental written or oral preliminary examinations.
Written Comprehensive Examination
Most programs require a written comprehensive examination to be taken before the oral preliminary examination. If a written examination is required, it must be completed prior to the oral preliminary examination. The content, length, timing, passing standard, and repeatability of this examination are at the discretion of the major department. The general rules and structure of this examination, however, must be provided in writing to all candidates for this examination and a current copy of these guidelines must be on file with the Graduate School. Copies of the written examination (questions and student’s answers) must be available to all members of the student’s doctoral committee at least one week prior to the oral preliminary examination.

Oral Preliminary Examination
The oral preliminary examination is taken near the completion of the student’s course work. The oral examination is conducted by the student’s doctoral committee, and should cover the student’s knowledge in his or her major and minor subjects. The exam may cover the student’s proposed research topic, although no more than one-half the time should be devoted to specific aspects of the proposal. The examination should be scheduled for at least two hours, and the exam date must be scheduled in the Graduate School at least two weeks in advance. If more than one negative vote is recorded by the examining committee, the candidate will have failed the oral examination. No more than two re-examinations are permitted by the Graduate School, although academic units may allow fewer re-examinations.

At least one complete academic term must elapse between the time of the preliminary oral examination and the final oral examination. If more than five years elapse between these two examinations, the candidate will be required to take another preliminary oral examination.

Thesis
Each candidate for the PhD degree must submit a thesis embodying the results of research and giving evidence of originality and ability in independent investigation. The thesis must be a real contribution to knowledge, based on the candidate’s own investigation. It must show a mastery of the literature of the subject and be written in creditable literary form. The preparation of an acceptable thesis will require at least one full-time academic year. The booklet, Thesis Guide: Preparing a Thesis, available electronically on the Web at http://gradschool.oregonstate.edu/progress/thesis-guide.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master’s thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate.edu/irb/.

A formal thesis proposal meeting is recommended but not required by the Graduate School; however, it is required for some majors. This meeting should be held with the student’s doctoral committee prior to the start of any substantial doctoral thesis research.

When scheduling their final oral examinations, doctoral students are required to submit the pretext pages of their dissertations to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright (optional), title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies of their thesis to all committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student’s final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, upload one PDF copy of your thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School’s website for complete details (http://gradschool.oregonstate.edu/progress/thesis-guide).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

Final Examination
After completion of or while concurrently registered for all work required by the program, the student must pass a final doctoral examination that may be written in part but must include an oral examination. The final oral examination must be scheduled in the Graduate School office at least two weeks prior to the date of the examination. All incomplete coursework appearing on the program of study must be completed prior to scheduling the final oral examination.

The final oral examination consists of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

All members of the student’s graduate committee must approve the scheduling of the final examination.

It is expected that the thesis defense portion of the final oral exam be open to all interested persons and should be limited to one hour. After the open portion of the exam, the examining committee should exclude all other persons and continue with the examination of the candidate’s knowledge of his or her field and the evaluation of the candidate’s performance.

If the department favors a more elaborate presentation, it should be scheduled as a separate seminar. In any case, the time involved for the open presentation may not impinge upon time required for the examining committee to conduct appropriate, iterative oral inquiry with the candidate, to evaluate the candidate’s performance, and to deliberate fully within the time constraints of the scheduled oral examination.

The examining committee consists of the student’s doctoral committee and any additional members, including professors from other institutions, whom the major department may recommend. In the oral examination, the candidate is expected to defend the thesis and show a satisfactory knowledge of his or her field. If more than one negative vote is recorded by the examining committee, the candidate will have failed the examination. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-examinations.

The final oral examination must be taken within five years after the oral preliminary examination. If more than five years elapse, the candidate will be required to take another oral preliminary examination.
Doctor of Education Requirements
The EdD program is a degree program with a major in education. It is intended for the educational professional whose career path is that of educational or teaching specialist, administrator, or other practitioner in the public schools, postsecondary institutions of higher education, or in business and industry. Its focus is on the application of knowledge to learning and teaching and in public and private settings. The EdD program is designed to prepare educational leaders in community college education, middle-level education, or related educational settings.

A masters’ degree in education or a related field, or equivalent to a master’s degree in postbaccalaureate course work is required for admission. In addition, the College of Education requires the following:

1. minimum professional experience as defined by each program,
2. letter or statement of professional objectives for doctoral study and area of specialization within education,
3. three letters of recommendation, and
4. either the Graduate Record Examination or the Miller Analogies Test.

Applicants to the EdD program must have significant experience in an education or education-related setting such as teaching, school administration, curriculum specialist, instructional specialist, child/youth counselor, supervisor; or in a setting where the primary function is education.

In general, the following requirements are in effect for the EdD:

1. A minimum of 108 credits beyond the baccalaureate degree.
2. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.
3. Completion of the same residence requirements as listed for the PhD degree.
4. A dissertation of no less than 24 credits.
5. A mentored internship in an appropriate work setting for a minimum of 12 credits.
6. A minimum of 48 graduate credits in an area of specialty in education.
7. Completion of 24 credits of core seminars.
8. Completion of the core courses in research.

Procedures and requirements for preliminary and final examinations and thesis are the same as those for the doctor of philosophy degree.

Graduate Fellowships, Scholarships, and Financial Aid
Graduate Fellowships and Scholarships
A number of Oregon State University fellowships and scholarships sponsored by industry, foundations and government agencies are available to students for graduate study in various graduate programs at OSU. For a listing of many these fellowships and scholarships, visit the Scholarship Management System database at https://scholarship.ucsadm.oregonstate.edu/prod/search_schol.php.

For more information about scholarships and fellowships in the database above, including application instructions, as well as additional opportunities in individual programs, contact the individual program of interest.

Students interested in general information regarding graduate student funding opportunities are encouraged to explore Financing Your Education on the Graduate School's website: http://gradschool.oregonstate.edu/finance.

Graduate Student Employment
Each year, OSU receives grants from federal and state agencies, public and private foundations, and business and industry to support institutional and individual projects. Funding is awarded to the various departments in most academic colleges and to other research organizations on campus, including experiment stations, centers and institutes. Many of these grants include financial support for graduate students. Interested students should direct inquiries and applications to the department concerned.

Graduate students may be employed as Graduate Teaching or Graduate Research assistants by departments on campus. In addition to monthly stipends, graduate assistants appointed at .30 FTE or above are eligible for a tuition and fee subsidy.

In addition to graduate assistantships, graduate students may be appointed to student hourly positions on campus. These appointments are not eligible for a tuition or fee subsidy.

The maximum combined appointment FTE for all jobs on campus is .49 FTE.

For more information on student employment, contact the department of interest or the Office of Human Resources.

Financial Aid for Graduate Students
The OSU Office of Financial Aid and Scholarships administers federal financial aid programs to assist graduate students with meeting the cost of higher education. To determine eligibility for specific federal aid programs at OSU, graduate students are required to complete the Free Application for Federal Student Aid (FAFSA) each year. Graduate students must be degree-seeking or in an approved certificate program and enrolled at least half-time (5 credits) to qualify for financial aid. Graduate students are not eligible for federal Title IV grants or subsidized loans. Students in graduate certificate programs are only eligible for aid for courses required for their certificate program.

For additional information about Financial Aid for graduate students, visit http://financialaid.oregonstate.edu, http://financialaid.oregonstate.edu/sites/financialaid.oregonstate.edu/files/grad_students_.pdf, or contact the OSU Office of Financial Aid and Scholarships.

Graduate Research Supporting Services
For information on Graduate Student Success, please see the Graduate School's Graduate Student Success Guide http://gradschool.oregonstate.edu/graduate-student-success.

Information Services, Computers, and Academic Technologies
Information Services supports OSU students by providing accounts, technologies, equipment checkout, printing, computing networks and computing labs. The OSU Computer Helpdesk provides students with technical support for laptops, mobile devices, and campus systems like...
Canvas. If you need in-person support, please visit the Walkup Helpdesk in the Valley Library.

Student employment opportunities are available from a variety of units within IS, including the OSU Computer Helpdesk and Academic Technology, with the greatest opportunities announced just prior to each new term.

**Accounts and Passwords**

http://is.oregonstate.edu/accounts-support

- **Accounts & Technologies Guide for New Students**: This guide is for new OSU students who need to get connected to OSU systems such as email and Canvas. Even if you are already connected to one or more OSU systems, we recommend you go through this guide, just to be sure you’ve covered the bases and know where to get computing help.
- **ONID**: ONID stands for OSU Network ID. It’s a universal computer account available to all OSU students, employees and associates. You use your ONID username and password to access Online Services, Canvas, email, the wireless network and many other university computing services.
- **Google Apps for OSU**: ONID email is accessed via Google Apps for OSU. All OSU students, instructors, and employees may access all the supported core apps: Drive, Mail, Calendar, Site and Groups.
- **Office365 for OSU**: All OSU students, instructors and employees may collaborate using native Microsoft Office tools: Word, Excel, PowerPoint and OneNote.

**Learning Technologies**

- Walkup Helpdesk, in-person support at the Valley Library, Sunday–Friday

**Student Employment**

(Oppunities subject to availability)
ENSC 405. READING AND CONFERENCE. (1-12 Credits)
This course is repeatable for 16 credits.

ENSC 406. PROJECTS. (1-16 Credits)
This course is repeatable for 24 credits.

ENSC 407. SEMINAR. (1-16 Credits)
Equivalent to: ENSC 407H
This course is repeatable for 12 credits.

ENSC 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENSC 407
This course is repeatable for 12 credits.

ENSC 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 12 credits.

ENSC 410. ENVIRONMENTAL SCIENCE INTERNSHIP. (1-12 Credits)
Supervised practical experience working with professionals at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
This course is repeatable for 48 credits.

ENSC 479. **ENVIRONMENTAL CASE STUDIES. (3 Credits)
Improves students’ ability to ask questions, gather and synthesize information, and communicate ideas on environmental topics. Instruction and information necessary for the course is entirely Web based. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC

ENSC 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 503. THESIS. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 999 credits.

ENSC 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 508. WORKSHOP. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

ENSC 510. INTERNSHIP. (1-12 Credits)
This course is repeatable for 12 credits.

ENSC 515. ENVIRONMENTAL PERSPECTIVES AND METHODS. (3 Credits)
Unique perspective or method each quarter. Possibilities include: remote sensing, modeling over a range of scales in time, space, and levels of system organization; and risk analysis.

ENSC 520. ENVIRONMENTAL ANALYSIS. (3 Credits)
Develop analytical thinking, explore analytical approaches, enhance writing skills, and gain experience in oral communication about environmental issues.

ENSC 599. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

Environmental Sciences Graduate Major (MA, MS, PhD, PSM)

Graduate Areas of Concentration
Biogeochemistry, ecology, environmental education, natural resources, quantitative analysis, social science, water resources

Also available via Ecampus (PSM degree only).

The Environmental Sciences Graduate Program provides curricula leading to MA, MS and PhD degrees in Environmental Sciences. The curriculum integrates thinking across disciplines, especially life, physical, and social sciences. Environmental science explores natural processes on earth and their alteration by human activity. OSU has exceptional strength in many of the disciplines, including science, agriculture, forestry, engineering, public health, liberal arts, social science, and oceanography and atmospheric science. Strength in these disciplines allows the ES Graduate Program to provide high-quality interdisciplinary education for environmental scientists and continuing postgraduate educational opportunities to scientists who are already active in the field. The degrees administered by the program are OSU’s contribution to the Joint-Campus Graduate Program in Environmental Sciences, Studies, and Policy, which links environmental graduate programs among the major research universities in Oregon.

The ES Graduate Program develops scientists who will be able to analyze and understand environmental systems, predict environmental change, and participate in the management of the environment. Each student completing a major in the ES Graduate Program will perform research and complete a thesis, dissertation, or research project. Each student will complete a core of ES graduate courses that will integrate concepts across the physical sciences, life sciences, and social sciences. Each student will also develop depth in a carefully designed, interdisciplinary area of concentration or track. Tracks that are currently available include ecology, biogeochemistry, social science, quantitative analysis, water resources, and environmental education. Methods and numerical skill courses, electives, and thesis or non-thesis project credits comprise the remainder of a student’s program.

Students in the ES Graduate Program may choose advisors from faculty members already appointed at OSU, as well as other scientists who apply and are accepted in the environmental sciences graduate faculty. The Environmental Sciences Graduate Program fosters interdisciplinary education and seeks connections between institutions.

For more information, contact Carolyn Fonyo Boggess, Interim Director, Environmental Sciences Graduate Program, Oregon State University, Corvallis, OR 97331-2904, or email: esgp@oregonstate.edu.
Professional Science Master’s Degree in Environmental Science
Also available via Ecampus.

The Professional Science Master’s degree in Environmental Sciences (PSM@ENSC) provides advanced training for early- and mid-career professionals with a need for expertise in environmental sciences. Preferably applicants would have at least two years of experience working in the environmental field, but this is not mandatory for admission. The PSM@ENSC degree is offered as a non-thesis Master’s degree program with an internship. Students have an advisor and graduate committee to review their program of study, provide career and internship advice, and evaluate a final report based on the internship experience.

**Master of Arts Interdisciplinary Studies (MAIS) Graduate Major**

**Graduate Areas of Concentration**

Selected from three fields offering graduate majors and minors

The Master of Arts in Interdisciplinary Studies (MAIS) degree program is designed to permit students to formulate programs that integrate work from three separate disciplines. Breadth of study is important in designing the program. A research paper or thesis offers the opportunity to integrate the three disciplines.

Any graduate major or minor may serve as a discipline or field for this degree. Two of the three fields may be from one department if the areas of concentration within these two fields are different. Program participation varies from year to year.

Graduate programs that are participating in this degree are listed in the Graduate School website at http://gradschool.oregonstate.edu/programs.

**Admission**

The applicant must satisfy university admission requirements at the graduate level and must gain acceptance at the point of admission by the departments offering the fields that will make up the program.
Administration

The Graduate School will handle general administration and recordkeeping. Students with general questions about the MAIS degree are encouraged to confer with the director of the MAIS graduate program.

The student should select a committee in consultation with the department/school chair of the emphasized field or with his or her designated representative. With the advice of the committee chair, the student will select a committee member from each of the remaining two fields. The student will select the fourth committee member, a Graduate Council representative, from a list of names to be obtained in the Graduate School office. All members of the committee must be on the graduate faculty.

Before the completion of 18 credits of graduate course work, the student must file the official program form, approved by the committee. Program planning meetings are required, and the student has the responsibility for arranging the committee meetings necessary in the planning of the program. In the event that the student subsequently desires to change one or more disciplines on his or her program, the student must file a change in degree program with the Graduate School and schedule another program meeting in order to gain committee approval.

The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Any graduate major or minor may serve as a field for this degree. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total program exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty—one from each of the three fields—and a Graduate Council representative. A formal program meeting must be held prior to the completion of 18 graduate credits. A final oral examination is required.

There are two options under the program:

Option A: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option B: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered as Research 501, Reading and Conference 505, or Projects 506.

Major Code: 9900

Molecular and Cellular Biology

The Molecular and Cellular Biology Program provides students with comprehensive interdisciplinary training in molecular and cellular biology while reserving sufficient flexibility for students to specialize in their areas of interest. The elements of the core curriculum include courses in molecular genetics and cell structure and function, bioinformatics and genomics, scientific skills and ethics, along with research rotations with individual faculty members. Additional course work is custom-tailored to the individual student's interests and needs. Each program requires 36 units of graduate-level course work, participation in seminar programs, two quarters of supervised teaching experience, written and oral preliminary examinations, supervision by an individual committee of five faculty members, and presentation of a thesis containing the results of publishable original research.

The program also offers access to all of the participating faculty as potential research advisors. Students do three research rotations in the first year and select their advisor from over 90 faculty members in the 20 participating departments in seven colleges. Therefore, the MCB Program lowers interdisciplinary barriers and allows the students to select the advisors that most closely match their interests after they have been on campus for one or more terms.

Affiliate Faculty

Over ninety faculty members drawn from 20 departments in seven colleges participate in the MCB program.

Molecular and Cellular Biology

MCB 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 99 credits.

MCB 503. THESIS. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 999 credits.

MCB 505. READING AND CONFERENCE. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 99 credits.

MCB 507. SEMINAR. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 99 credits.

MCB 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 99 credits.

MCB 509. PRACTICUM. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 99 credits.
MCB 510. INTERNSHIP. (1-16 Credits)
PREREQ: Departmental approval required. This course is repeatable for 99 credits.

MCB 511. RESEARCH PERSPECTIVES IN MOLECULAR AND CELLULAR BIOLOGY. (3 Credits)
Provides graduate students with an in-depth exposure to faculty members at OSU involved in molecular and cellular biology and their specific fields of research.

MCB 525. TECHNIQUES IN MOLECULAR AND CELLULAR BIOLOGY. (3 Credits)
An intensive laboratory course introducing modern methods for the manipulation of cellular macromolecules. Recombinant DNA technology, protein chemistry, and in situ hybridization methods presented in a format that emphasizes experimental continuity. The course requires two weeks of intensive full-time involvement.

MCB 530. INTRODUCTION TO POPULATION GENETICS. (3 Credits)
Genetic polymorphisms, inbreeding, genetic drift, population subdivision and gene flow, mutation and selection. Emphasis on applied rather than theoretical questions. Offered alternate years.

MCB 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK. (3 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSTHISTED as FES 435/FES 535, FES 435H, TOX 435/TOX 535, TOX 435H.
Equivalent to: FES 435, TOX 535

MCB 541. PLANT TISSUE CULTURE. (4 Credits)
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. CROSSTHISTED as PBG 441/PBG 541.
Equivalent to: PBG 541

MCB 554. GENOME ORGANIZATION, STRUCTURE, AND MAINTENANCE. (4 Credits)
How diverse organisms store their individual sets of genetic information (genomes). Evolution of genomes and gene families. Structures of DNA and chromatin. Biochemical and regulatory pathways that protect cellular genomes against environmental and endogenous damage and ensure transmission of faithful copies to progeny. Remodeling of genomes by recombination and transposition. CROSSTHISTED as TOX 554.
Equivalent to: TOX 554

MCB 555. GENOME EXPRESSION AND REGULATION. (4 Credits)
Prokaryotic and eukaryotic systems will be used to describe recent advances in understanding transcriptional and posttranscriptional control mechanisms. Topics include: microbial, yeast and mouse model systems; transcriptional control mechanisms; RNA processing, silencing and microRNAs; protein synthesis and posttranslational modification; microarray- and mass spectrometry-based expression genomics.

MCB 556. CELL AND DEVELOPMENTAL BIOLOGY. (4 Credits)
Examination of molecular and structural elements in eukaryotic cells and their relationship to function and development. Topics include nuclear organization, membranes, organelles, intracellular sorting, cell energetics, cell signaling, cell motility, cell division cycle, and developmental processes of selected model organisms. Critical reading and writing skills will be emphasized.

MCB 557. SCIENTIFIC SKILLS AND ETHICS. (3 Credits)
Offers instruction, guest lectures and case-study based discussions of ethical issues relevant to scientists on topics such as mentoring, best practices of conducting research, research misconduct and compliance, intellectual property, peer review, ethical use of animal and human subjects and managing conflicts of interest. Training in the preparation and presentation of scientific seminars and grant writing.

MCB 553. CANCER AND CHEMOPREVENTION. (2 Credits)
A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine.

MCB 575. COMPARATIVE GENOMICS. (4 Credits)
Equivalent to: BOT 576

MCB 576. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES. (3 Credits)
Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences. CROSSTHISTED as BOT 476/BOT 576.
Equivalent to: BOT 576

MCB 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

MCB 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

MCB 603. THESIS. (1-16 Credits)
This course is repeatable for 99 credits.

MCB 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MCB 609. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

MCB 610. INTERNSHIP. (1-9 Credits)
Laboratory rotation. This course is repeatable for 16 credits.

MCB 620. DNA FINGERPRINTING. (1 Credit)
Principles and methods for producing and analyzing DNA fingerprints. Offered alternate years. CROSSTHISTED as PBG 620.
Equivalent to: PBG 620

MCB 621. GENETIC MAPPING. (1 Credit)
Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered alternate years. CROSSTHISTED as PBG 621.
Equivalent to: PBG 621

MCB 622. MAPPING QUANTITATIVE TRAIT LOCI. (1 Credit)
Principles and methods for mapping genes underlying phenotypically complex traits. Offered alternate years. CROSSTHISTED as PBG 622.
Equivalent to: PBG 622
MCB 637. MOLECULAR HOST-MICROBE INTERACTIONS. (3 Credits)
Lecture and discussion-based presentation of the molecular bases for interactions between organisms. Addresses bacterial, algal, and fungal symbionts of eukaryotes and considers pathogenesis, commensalism, and mutualism. A focus on the evolution of host-microbe interactions is included.

MCB 651. MOLECULAR BASIS OF PLANT PATHOGENESIS. (3 Credits)
Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years. CROSSLISTED as BOT 651.
Equivalent to: BOT 651

MCB 662. HORMONE ACTION. (3 Credits)
Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. CROSSLISTED as ANS 662.
Prerequisites: BB 451 with C or better or BB 551 with C or better or BB 492 with C or better or BB 592 with C or better

MCB 671. MOLECULAR TOOLS. (3 Credits)
Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. CROSSLISTED as VMB 671.
Equivalent to: VMB 671

MCB 699. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

Molecular and Cellular Biology Graduate Major (MS, PhD)

Graduate Areas of Concentration

Bioinformatics, biotechnology, cell biology, developmental biology, genome biology, molecular biology, molecular pathogenesis, molecular virology, plant molecular biology, structural biology

MCB doctoral students do research rotations in three laboratories during the first year, and then carry out their thesis research in subsequent years under the direction of a member of the MCB faculty. The MCB Program lowers interdisciplinary barriers and allows each individual the opportunity to select the most suitable advisor and committee.

Graduation Education

GRAD 402. INDEPENDENT STUDY. (1-16 Credits)
Lab/Field trip fee.
This course is repeatable for 16 credits.

GRAD 420. GRADUATE SCHOOL PREPARATION. (1 Credit)
Applying for graduate or professional school can be a daunting task. How and where to apply, how to choose an advisor, what to look for in a school, and how to obtain funding are hurdles to overcome during the application process. Supplemental materials will be provided as part of the course materials.

Major Code: 9950
**GRAD 430. INTRODUCTION TO SCIENTIFIC DIVING.** (4 Credits)  
Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips.

**GRAD 499. SPECIAL TOPICS.** (4 Credits)  
Graduate school preparation.

**GRAD 502. INDEPENDENT STUDY.** (1-16 Credits)  
Lab/Field trip fee.  
This course is repeatable for 16 credits.

**GRAD 505. READING AND CONFERENCE.** (1-16 Credits)  
Reading and discussions on special topics. Graded P/N.  
This course is repeatable for 16 credits.

**GRAD 506. PROJECTS.** (1-16 Credits)  
Graded P/N.  
This course is repeatable for 16 credits.

**GRAD 509. PRACTICUM.** (1-16 Credits)  
Graded P/N.  
This course is repeatable for 16 credits.

**GRAD 511. DESIGNING A PATH FOR SUCCESS.** (1 Credit)  
Graduate student learners will be oriented onto paths that will help lead them toward degree completion and success. Students will receive foundational knowledge about graduate school requirements, effective mentor/mentee relationships, financing their education, research integrity and professional conduct, innovation and commercialization, and other soft skills essential for their progress through their graduate program.  
Equivalent to: WGSS 511, WGSS 512, WGSS 513

**GRAD 512. CURRENT ISSUES IN HIGHER EDUCATION.** (3 Credits)  
Explores current, work-relevant issues in higher education nationally. Development of plan to stay current with important issues.

**GRAD 513. PROFESSIONAL DEVELOPMENT IN COLLEGE AND UNIVERSITY TEACHING.** (1-3 Credits)  
Self-directed learning experience, providing structure and context for professional development opportunities in teaching, such as workshops, seminars, webinars, symposia, and other relevant programming. Designed to encourage and reward continuing investment in the development of knowledge and skill sets as educators. Consists of participating in self-selected teaching-related programming (in-person or online), as well as reading, writing, and reflecting on your chosen experiences.  
This course is repeatable for 3 credits.

**GRAD 520. RESPONSIBLE CONDUCT OF RESEARCH.** (2 Credits)  
Covers 10 topics in responsible conduct of research: ethical decision making; human subjects; animal welfare; data acquisition, sharing and ownership; research misconduct; conflicts of interest; authorship; peer review; mentor/Trainee responsibilities; and collaborative science. Weekly writing assignments. Useful to all students who conduct scholarly activity. Provides transcript-visible training in research ethics relevant to the Graduate Learning Outcome established by Faculty Senate to be able to conduct scholarly and professional activities in an ethical manner.

**GRAD 521. RESEARCH DATA MANAGEMENT.** (2 Credits)  
Careful examination of all aspects of research data management best practices. Designed to prepare students to exceed funder mandates for performance in data planning, documentation, preservation and sharing in an increasingly complex digital research environment. Open to students of all disciplines.

**GRAD 522. PREPARING AN IRB SUBMISSION.** (1 Credit)  
Workshop-style course resulting in applications that are ready for IRB review. Ethical issues in research will be discussed. Students will draft all submission materials outside of class and participate in the critique of each other’s protocols and consent forms. IRB approval will not be granted as part of this class. Graded P/N.

**GRAD 530. INTRODUCTION TO SCIENTIFIC DIVING.** (4 Credits)  
Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips.

**GRAD 542. THE INCLUSIVE CLASSROOM: DIFFERENCE, POWER AND DISCRIMINATION.** (3 Credits)  
An examination of multidisciplinary scholarship on difference, power, and discrimination; critical pedagogies; and curriculum transformation. Discussions of theory and research are coupled with practical hands-on opportunities for students to develop and hone their teaching and course development skills. CROSSTLISTED as WGSS 542.  
Equivalent to: WGSS 542

**GRAD 550. INTRODUCTION TO ONLINE COURSE DEVELOPMENT AND FACILITATION.** (2 Credits)  
Prepares students to develop and teach distance courses. Students explore practical aspects of course development and facilitation: a brief history of distance education and pedagogical theory; course design principles; engagement of adult learners; active learning; and investigation of how online instruction, in addition to offering flexibility and convenience, also offers distinct pedagogical benefits. Open to students in all disciplines.

**GRAD 560. THEORIES OF TEACHING AND LEARNING IN HIGHER EDUCATION.** (3 Credits)  
Examination and analysis of theories and research related to teaching and learning in higher education contexts with emphasis on theoretical applications for GTAs, instructors, and other who teach in the college and university classroom.

**GRAD 561. COURSE DESIGN AND METHODS FOR COLLEGE & UNIVERSITY TEACHING.** (3 Credits)  
Exploration of research and research-based practices related to teaching and learning in higher education contexts with emphasis on theoretical applications for GTAs, instructors, and others who teach in the college and university classroom.

**Prerequisites:** GRAD 560 with C or better

**GRAD 570. TRANSLATING RESEARCH TO INNOVATION.** (2 Credits)  
Lens of the Market® Stage 1: Research2Innovation is a course that provides teams of STEM professionals (university students, post docs and faculty, National Lab scientists and engineers or corporate R&D scientists and engineers) with a rapid introduction to the vocabulary, skills, tools, and road map needed for scientists and engineers to engage in successfully translating their research into innovations. The course utilizes the student’s own research as the basis for the study.
GRAD 571. TRANSLATING INNOVATION TO MARKET I. (4 Credits)

Uses the team's platform diagram from GRAD 570 to perform a deeper analysis into a set of three market/application pairs. Teams will develop a Star Market analysis using a decision matrix consisting of a set of market-aligned questions and a rubric to determine the potential value for their innovation. This information is parametrized by a market hypothesis consisting of a value proposition and differentiators and a set of aligned value chains.

Prerequisites: GRAD 570 with C or better

GRAD 599. SPECIAL TOPICS. (1-16 Credits)

This course is repeatable for 99 credits.

GRAD 605. READING AND CONFERENCE. (1-16 Credits)

Reading and discussions on special topics. Graded P/N. This course is repeatable for 16 credits.

GRAD 606. PROJECTS. (1-16 Credits)

Graded P/N. This course is repeatable for 16 credits.

GRAD 607. CAPSTONE SEMINAR. (3 Credits)

Provides a culminating experience required for all graduate students pursuing the Graduate Certificate in College and University Teaching. Students are recommended to choose their courses from the following lists, depending on their prior preparation as an undergraduate.

Prerequisites: GRAD 560 with C or better and GRAD 561 [C]

Biological Data Sciences Graduate Minor

The graduate minor in Biological Data Sciences will familiarize MS and PhD graduate students in the life sciences with research concepts and methodologies in quantitative sciences, and those in the quantitative sciences with research concepts and methodologies in life sciences. The disciplinary learning goals of the minor are by nature foundational. Thus, for example, students with advanced expertise in life sciences would receive foundational training in computer science, statistics and/or mathematics. Students with advanced expertise in computer science would receive foundational training in life science, statistics and, if needed, mathematics. A capstone collaborative problem-solving course will be required by all students. Students may complete all the course work in a single year (encouraged), or may choose spread the courses out over several years. With approval by the director of the minor, students may receive credit for courses taken for their major.

The minor is open to both MS and PhD students. PhD students must complete at least 15 credits. Some courses span more than one focal area; these courses may not be counted towards two focal areas simultaneously.

Some courses that are electives in an MS or PhD major may also be counted towards the BLDS minor. For example, a PhD student in Molecular and Cellular Biology (MCB) may select "MCB 576 Introduction to Computing in the Life Sciences" as an elective for their MCB requirements, and also as computer science credit for the BLDS minor.

Required by all Students:

</tbody>
</table>

Students who do not complete an ethics and professionalism class as part of their PhD major must take MCB 557 SCIENTIFIC SKILLS AND ETHICS or an equivalent course.

Students are recommended to choose their courses from the following lists, depending on their prior preparation as an undergraduate. Equivalent or more advanced courses may be substituted after consultation with the BLDS director. Some courses require prerequisites. Some courses span more than one focal area; such courses can be counted towards one or other of those focal areas, but not both.

### College and University Teaching Graduate Certificate

**Also available via Ecampus.**

The 18-credit graduate certificate in College and University Teaching is designed to provide advanced course work and experiential learning opportunities to current graduate students who plan to pursue careers in teaching and instruction in higher education settings or who plan to pursue careers that require similar skill sets in facilitation.

Core courses focus on educational/learning theory and instructional strategies for working with adult learners. The specialized course work includes student-selected course work, workshops, and/or other approved experiences appropriate to the student’s field of study. The supervised teaching internship will allow students to engage in supervised field experiences to practice and refine instructional skills.
The capstone teaching portfolio will provide a culminating professional development experience for students.

For further information, Jessica Beck, Assistant Dean of Graduate Student Development, 413 Learning Innovation Center, 541-737-8576, jessica.beck@oregonstate.edu; website: http://gradschool.oregonstate.edu/graduate-certificate-college-and-university-teaching.

The general structure of the certificate is:

**Comparative Health Sciences Graduate Major (MS, PhD)**

The Comparative Health Sciences graduate major is an interdisciplinary program administered by the Graduate School. Participating colleges include Veterinary Medicine, Public Health and Human Sciences, Pharmacy, and the Graduate School.

For further information about the graduate major, see the proposal at https://secure.oregonstate.edu/ap/cps/proposals/view/84096 and contact the Graduate School and College of Veterinary Medicine.

MS degree students complete a total of 45 graduate credits, including 12 thesis credits.

PhD degree students complete a total of 108 graduate credits beyond the bachelor’s or professional (DVM, MD) degree, including at least 36 credits of non-blanket course work.

All students complete the core curriculum and at least two electives for a total of 12 credits.

### Comparative Health Sciences Graduate Minor

**Minor Code: 9310**

**Water Resources Engineering Graduate Areas of Concentration**

Groundwater engineering, surface water engineering, watershed engineering

A graduate major or minor in Water Resources Engineering for the master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in groundwater engineering, surface water engineering, or watershed engineering. Seminars, courses, and reading and conference courses in water resources engineering are offered by the Water Resources Graduate Program.

The graduate major or minor options are structured around courses designed to broaden the student’s education in one of the above areas of concentration. University departments and schools that offer courses related to water resources engineering include the departments of Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Chemistry; Crop and Soil Science; Geosciences; Mathematics; Rangeland Ecology and Management; Statistics; the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

Water Resources Policy

WRP 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

WRP 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

WRP 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

WRP 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

WRP 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

WRP 509. PRACTICUM. (1-16 Credits)
This non-traditional class explores tools, models and concepts in the collaborative decision-making process in water resources. Emphasis is on group projects and self-directed practical application of community-based natural resources. This course is repeatable for 16 credits.

WRP 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

WRP 517. WRITING IN WATER RESOURCES. (4 Credits)
An intensive summer course to develop proficiency in writing at a graduate level for the wide range of writing tasks common to water resource professionals. Students will complete individual in-class writing assignments and collaborate on a draft of a technical report. While it is designed for students in the Water Cooperation and Peace joint degree program (many of whom will be international students) the course will also be useful for other students. Lec/rec.

WRP 521. WATER CONFLICT MANAGEMENT AND TRANSFORMATION. (3 Credits)
Examines ways to work effectively in contentious water situations. Explores conflict tolerance, prevention, management, and transformation through collaborative structures as well as through models of negotiation and dialogue.
WREP 523. ENVIRONMENTAL WATER TRANSACTIONS. (3 Credits)
Covers the theory and practice of using water rights transactions to reallocate water rights to environmental purposes. Different transactional techniques and contexts appropriate to their use are presented through case studies primarily from the western United States, with some reference to the use transactions in other countries such as Australia.

WREP 524. SOCIOTECHNOLOGICAL ASPECTS OF WATER RESOURCES. (3 Credits)
Core curriculum, graduate-level course in the Water Resources Graduate Program focusing on an interdisciplinary approach to water resources research that integrates the human and the technological dimensions of water resource issues. It is comprised of lecture and discussion sessions with guest lectures by visiting seminar speakers.

WREP 544. MANAGING NATURAL RESOURCES FOR CLIMATE ADAPTATION. (3 Credits)
Students will work through series of case studies in resource management to identify strategies and approaches that promote or prevent resilience in resource management. Students participate in discussions and hands-on activities in addition to the lectures and will prepare daily reflections, a final reflection and a final essay due one week after the end of the classroom sessions. This course will use a lecture and discussion format, and draw from the international expertise of the instructor and guest lecturers.

WREP 548. CONDUCTING COLLABORATIVE PROJECTS. (3 Credits)
Focuses on development of the abilities needed to complete a directed water-related collaborative project, delivered through experiential learning. The course specifically addresses development of collaborative skills needed to work in interdisciplinary teams. The course activities are centered around a collaborative project on which students will be conducting research, collecting data synthesizing information; and providing classmates with constructive peer-review. Lec/rec.

WREP 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

WREP 808. WORKSHOP. (1-4 Credits)
Examines ways to work effectively in contentious water situations. Explores conflict tolerance, prevention, management, and transformation through collaborative structures as well as through models of negotiation and dialogue.
This course is repeatable for 4 credits.

This course is repeatable for 16 credits.
WRS 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 532. APPLIED FIELD PROBLEMS. (3 Credits)
Introduces graduate students to real-world water resources problems and approaches to solving them. Students will assess and analyze the various constraints and limitations to integrated water management that often cannot be adequately simulated in classroom exercises. They will acquire the practical tools necessary to become effective water resources professionals in a rapidly changing world.

WRS 536. FUNDAMENTALS OF HYDROLOGY. (3 Credits)
Teaches students from a non-technical background in the Water Cooperation and Peace program the fundamentals of hydrology. Students will be introduced to hydrology and the hydrological cycle at the graduate level with a focus on key concepts. Students will apply these concepts to understanding of real world problems in the associated course, WRS 532, Applied Field Problems. Lec/lab.

WRS 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

WRS 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 610. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

WRS 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Water Resources Graduate Minor

Graduate Areas of Concentration

Hydrology, Water Quality, Water Resources Planning and Management

A Water Resources graduate minor for the master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in hydrology, water quality, or water resources planning and management. The first two options are technically oriented while the third gives added socioeconomic emphasis. Seminars, readings, and conferences are offered by Water Resources Graduate Program.

The graduate minor options are structured around core groups of courses and complementary courses designed to broaden the student’s education. University departments and schools that offer courses related to water resources include the departments of Applied Economics; Anthropology; Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Business Administration; Chemistry; Crop and Soil Science; Entomology; Fisheries and Wildlife; Forest Engineering; Forest Resources; Mathematics; Microbiology; Public Health; Rangeland Ecology and Management; Statistics; and Zoology; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; School of Public Policy; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

Minor Code: 3990

Water Resources Science Graduate Major (MS, PhD)

Graduate Areas of Concentration

Water Resources Science

A graduate major in Water Resources Science for master of science and doctor of philosophy degree programs is offered with specialization in hydrology or geochemistry. Seminars, readings, and conferences are offered by the Water Resources Graduate Program.

The graduate major options are structured around courses designed to broaden the student’s education in water resources science, specifically in hydrology or geochemistry. University departments and schools that offer courses related to water resources science include the departments of Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Chemistry; Crop and Soil Science; Entomology; Fisheries and Wildlife; Geosciences; Mathematics; Microbiology; Rangeland Ecology and Management; Statistics; and Zoology; and the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; the School of Public Policy; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

Minor Code: 3530
In an increasingly complex world, solutions to issues of emerging societal importance often require crossing traditional boundaries. Recognizing that students will need information from many available sources, Oregon State University offers a variety of undergraduate and graduate opportunities for interdisciplinary exploration and enrichment.

Interdisciplinary programs depend fundamentally upon the existence of strong disciplinary programs and place significant responsibility upon students to integrate and synthesize information.

Because there are so many choices of subjects and so many ways to approach a given interest, it is crucial that students obtain guidance in order to understand the advantages and the limitations of particular disciplinary and interdisciplinary alternatives. Students are encouraged to contact the individuals identified at the beginning of each certificate, department, and degree listing for more information and advice.
INTERNATIONAL PROGRAMS

The Division of International Programs plays a leadership and collaborative role in the university's comprehensive internationalization strategy by advancing international education for U.S. and international students, scholars and faculty; furthering the integration of global learning in OSU's teaching, research and outreach; and promoting OSU as a premier international research university through partnerships and regional initiatives. The division is led by the vice provost for International Programs, and includes the Office of International Services (OIS), International Degree (ID), OSU Global Opportunities (OSU GO), and International Scholar and Faculty Services (ISFS).

The division works collaboratively with INTO Oregon State University, the university center that offers a range of English language programs including preparatory programs for international students aiming to enter OSU at both graduate and undergraduate levels via pathway programs, rather than via direct admission. As part of this collaboration, the vice provost has oversight responsibilities for INTO OSU Academic Programs and International Admissions.

Office of International Services (OIS)
Grace Atebe, Director
University Plaza
1600 SW Western Blvd., Suite 130
Oregon State University
Corvallis, Oregon 97333
541-737-6310
grace.atebe@oregonstate.edu
Website: http://international.oregonstate.edu/ois/

The Office of International Services (formerly International Student Advising and Services, and International Scholar and Faculty Services) collaborates with campus and community partners to support the success and retention of all OSU international visitors from approximately 100 different countries. This includes over 500 international faculty and staff, and over 4,000 students in degree, exchange and INTO OSU (English Language and academic preparation (Pathway) programs). OIS is responsible for all international student and scholar immigration related advising, orientation, cultural, financial, scholarships, travel, employment, personal or academic related matters. OIS manages select merit and need based financial scholarships for international students including the International Cultural Service Program (ICSP).

OIS also maintains the regulatory compliance and integrity of OSU's international student and international employee visa programs. Through trainings, workshops and consultation, the unit serves as a liaison and resource to OSU colleges and departments, as well as community groups to enhance understanding of student and scholar immigration regulations and cross cultural competency.

Undergraduate Major
• International Studies (BA, HBA) (Major code 910)

The International Degree is Oregon State University's unique double-degree program. It allows any interested undergraduate student the opportunity to explore the international dimensions of any primary major. International Degree students complete Advanced Proficiency in a Second Language, Four additional Baccalaureate Core Courses in International Studies, an International Experience, and a Senior Thesis.

As an International Degree participant, you will earn two degrees. The first degree, the primary degree, will be your chosen major in any department on campus. The International Degree, or concurrent degree, will be in International Studies in your primary degree department.

For example, if your primary degree is a BS in Environmental Sciences, then the International Degree would be a BA in International Studies in Environmental Sciences.

Admission Requirements to the International Degree Program

1. A minimum 2.75 cumulative GPA after completing at least 32 credits of college-level courses and good standing within your department, college and the university. The dean of your college may give you special consideration if you fall below this minimum. See the International Degree office for more information about this process.
2. Proficiency in a foreign language equivalent to that attained by the end of a second-year language sequence at OSU\(^1\). This may be met in one of the following ways:
   1. Successful completion of four or more years of consecutive study of the same foreign language at the high school level preceding admission to Oregon State University;
   2. Completion of the AP College Board test in a foreign language with a score of 4 or 5;
   3. Completion of the third term of a second-year foreign language sequence at OSU or another accredited university with a GPA of 3.0 or better. This course must constitute a minimum of 4 quarter or 3 semester credits.
   4. Completion of one term of a third-year foreign language course (i.e., any course designated 311, 312 or 313) at OSU or another accredited university with a GPA of 3.0 or better. This course must constitute a minimum of 3 quarter or 2 semester credits.
   5. An international student whose native language is not English who wishes to use English to satisfy the foreign language entrance requirement will have satisfied the requirement upon admission to OSU.
3. Meet any additional requirements established by your major department or college.

\(^1\) You may be admitted to the program as a pre-International Degree student if you meet all the requirements listed above except for the two-year language requirement.
Special Notes about Admission

If you change majors after admission to the International Degree Program, you will have to reapply for admission to the International Degree Program in your new department.

If you are pursuing two degrees besides the International Degree, you only need to apply for the International Degree in one department. The choice of departments is up to you, but you should consult your advisors before determining where to apply.

General International Degree Requirements

1. You must successfully complete all departmental, college, and institutional requirements for your primary degree.
2. You must also complete a minimum of 32 credits in residence beyond the minimum 180 to 204 credits required for most primary degrees. Courses taken through an OSU-sponsored program abroad are considered in-residence credits. Depending on the level of previous foreign language study and experience abroad, you could take anywhere from a minimum of 32 additional credits to a maximum range of 70-plus additional credits to complete the degree.
3. Additional International Degree requirements may be established for your primary degree, so check with your major advisor or the International Degree contact in your department to make sure that you know what they are and that you are able to complete them. When you meet with your advisor, have a transcript in hand.
4. As is currently true for all degrees, your academic dean will verify that you have completed the International Degree requirements. The graduation audit will be done along with and in the same fashion as for your primary degree by your major department. Confirmation of the International Degree will be appropriately noted on your transcripts, and you will receive separate diplomas.

Specific International Degree Requirements

1. You must demonstrate advanced level achievement or proficiency in a foreign language in one of the approved ways. Typically, this requirement is met by completing the third term of a fourth-year language sequence at OSU. Students must take language courses for letter grades and earn a cumulative GPA of 3.0. Exceptions may be considered only by petition (see International Degree office for details). To find out about additional ways to demonstrate advanced proficiency, contact the International Degree office.
2. You must successfully complete a minimum of four courses selected from the baccalaureate core curriculum, with the approval of your departmental International Degree advisor. These courses are in addition to the university’s baccalaureate core requirements. The International Degree course requirements from the baccalaureate core are as follows:
   • One course selected from the Western Culture category (3–4 credits);
   • Two courses selected from the Cultural Diversity category (6–8 credits);
   • One course selected from the Western Culture, Cultural Diversity, or Contemporary Global issues categories (3–4 credits). Note: Not all four courses may focus on the same culture or language. For example, you cannot take all four of the additional baccalaureate core courses focusing on Spanish speaking countries/peoples.
   • To see the entire baccalaureate core list go to https://catalog.oregonstate.edu/earning-degrees/bcc/
3. The third requirement of the degree is to spend a minimum of 10 weeks in a country where your International Degree language is spoken and be engaged in a study abroad program, an international internship or an international research project.
4. The final requirement for the degree is to prepare a rigorous and integrative senior thesis, which demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. Requirements for the senior thesis include successful completion of INTL 407 SEMINAR: INTERNATIONAL ISSUES: Introduction to Thesis for 1 credit, and 3 to 6 credits of 403 (Thesis) in your department.

Graduation Language Requirements

Students must demonstrate advanced level achievement or proficiency in a single foreign language in one of the following ways:

• Completion of a fourth-year foreign language sequence (designated 411, 412, 413) at OSU with a minimum 3.00 GPA cumulative in all foreign language courses. Courses must be taken for a letter grade and may not be graded S/U.
• Completion of a fourth-year foreign language sequence at another accredited university with a minimum 3.00 GPA, in a program in which the combined third-year and fourth-year language courses constitute a minimum of 18 quarter or 12 semester credits.
• Completion of a minimum of 9 quarter (6 semester) credits with a minimum 3.00 GPA, at Oregon State University or another accredited university, of any 400-level course work (in any discipline) taught in a foreign language, if approved by the student's primary degree department or school.
• Demonstration of end of fourth-year level proficiency in a foreign language by successful completion of an achievement test administered by the School of Language, Culture, and Society at OSU.
• Demonstration of fourth-year level proficiency in a foreign language as evidenced by an oral proficiency test administered by a certified foreign language proficiency tester that is approved by the OSU School of Language, Culture, and Society.
• For languages not offered at OSU, the requirement may also be completed by a minimum of nine-month residency (study, research, work), after fulfilling the foreign language entrance requirement, in a country in which the language is spoken.
• Completion of a minimum of one term international internship using the target language after completion of a third-year language sequence (311, 312, 313) at OSU with a cumulative GPA of 3.0 or above.

Experience Abroad

Students must spend a minimum of 10 weeks in another country where the language used to meet the International Degree requirement is spoken and be engaged in one of the following:

• A study abroad program offered by OSU, another university, or a program designed by the student. Programs administered by other universities or those designed by students must be approved by the International Degree Program and the student’s primary department. Currently OSU has university-sponsored programs in over 70 countries.
• An international internship or work program that receives academic credit, such as the IE3 Global Internship Program offered by OSU.
• A pre-approved research project abroad.
• Previous international experience, such as the Peace Corps, approved by the primary academic department and the International Degree Program.
Senior Thesis
The final requirement for the degree is to prepare a rigorous and integrative senior thesis that demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. This thesis places your academic discipline in an international context, often in a comparative fashion. Because it fulfills the writing intensive course requirement for the International Degree, it will involve multiple drafts and revisions. The final product will represent polished, formal writing, in a format appropriate to your academic field.

Dual Thesis Requirements
You may write one thesis to meet the International Degree requirement and the thesis requirement in your department. If you will complete a senior thesis to meet another academic requirement in your primary degree, it is important to consult with academic advisors in your major as well as in the International Degree office.

• Example: If you are in the University Honors College, you will work with both the Honors College and the International Degree office to ensure that you fulfill both sets of requirements.

Thesis proposal: A copy of the thesis proposal form will be on file in the International Degree Program office. The topic will evolve as you work, and may change substantially, but identifying an appropriate advisor and developing a proposal form are crucial steps in your progress toward completion of the thesis requirement of the International Degree. If your thesis ideas change significantly, it is important to file a revised proposal with the International Degree Program office.

Thesis credit: Before graduating, you will spend two to three terms working on the thesis and will receive credits through your major department. You will register for a minimum of 3 thesis credits under the department prefix appropriate to your major (403), with your thesis advisor as the professor of record. These credits may be distributed over multiple terms, and you may receive an incomplete for the credits taken during the earlier term(s) until you have finished your thesis work. You will register for these credits during the year you plan to complete your thesis work, as incomplete grades should be removed within 12 months. Please note that credits for which you receive an incomplete do not count toward credits satisfactorily completed during that term. If you receive financial aid, you should plan ahead to ensure that this does not affect your aid eligibility.

• Example: If you are a sociology major, you would register for a minimum of 3 credits of SOC 403 THESIS. If you are a mathematics major, you would register for MTH 403 THESIS. Some departments already have a thesis course listed in the schedule of classes, but other departments may ask the registration schedule desk to set up a CRN for that course number during the term(s) for which you wish to register for thesis credit.

These credits may be graded or pass/no pass. If you and your advisor agree that the scope of your thesis warrants additional credit, and your college and department’s policies allow it, you may register for additional credits. The suggested maximum is 6 credits.

Colleges, departments, or advisors may elect to set different requirements for thesis credits that meet the needs of their programs. In this case, the requirements or preferences of the college/department take precedence over general International Degree requirements.

Requirements for the Senior Thesis Include:

Thesis class: As a part of your program, you will enroll in the 1-credit class INTL 407 SEMINAR: INTERNATIONAL ISSUES, Seminar: International Issues: Introduction to Thesis, offered on a pass/no pass grading basis. The course is offered twice a year during fall and winter terms. It is designed to help you define and focus your areas of interest, get an overview of research methods, develop your thesis ideas, identify a suitable advisor in your major department who will assist you throughout the process, complete a thesis proposal form, and develop a realistic and effective timetable for completion. During this course, you will receive a copy of the guide, Preparing a Senior Thesis. Note: If you are also a student in the University Honors College, you may enroll in either the UHC thesis class or the International Degree program’s thesis class.

Final thesis: This represents polished, formal writing. Theses average 30 to 50 pages, but to ensure fulfillment of the WIC requirement, even a thesis with a nonverbal component such as art, music, or photography must include a minimum of 8 to 10 pages of formal writing and place the thesis in the appropriate historical/cultural context by incorporating and documenting outside sources.

• Example: A graphic arts student who interned in Russia compared contemporary posters in the U.S. and Russia, and displayed examples. He also wrote an analysis of his findings.

Presentation: When your thesis is complete, you will make a public presentation of your work. The format may vary depending on your topic and your own preferences, but you will present your thesis to a group including your advisor, other interested faculty in your department, representatives of the International Degree program, and other guests whom you may want to invite.

Final copies of the log and thesis must be turned in to your major department and the International Degree office two weeks prior to the date that grades are due for graduating seniors for the term you plan to graduate. This is usually a week before finals week.

Additional College and Departmental Requirements

Foreign Language Majors
To earn the International Degree you must complete the second foreign language required of a language major through the fourth-year level. You must also spend two 10-week periods abroad, one in each of the countries where the two languages you are studying are spoken. For example, if you are a German major and have decided to take Russian as your second foreign language, you must complete the 400-level Russian course and study abroad in both Germany and Russia.

Additionally, you may not complete major/minor requirements without taking upper-division courses in the OSU School of Language, Culture, and Society even if you complete the hour requirements abroad.

College of Forestry Majors
As part of the four additional baccalaureate core courses required for the International Degree, you must take FE 456 *INTERNATIONAL FORESTRY/FOR 456 *INTERNATIONAL FORESTRY.

Scholarships
In support of the overseas learning experience, the International Degree Program has funds available to assist students traveling abroad and to assist with costs associated with research for your thesis. These are awarded on a competitive basis. Please talk to the International Degree office for more information.
International Studies Undergraduate Major (BA, HBA)

Also available at OSU-Cascades.

The International Degree is Oregon State University's unique double-degree program. It allows any interested undergraduate student the opportunity to explore the international dimensions of any primary major. International Degree students complete Advanced Proficiency in a Second Language, Four additional Baccalaureate Core Courses in International Studies, an International Experience, and a Senior Thesis.

As an International Degree participant, you will earn two degrees. The first degree, the primary degree, will be your chosen major in any department on campus. The International Degree, or concurrent degree, will be in International Studies in your primary degree department.

For example, if your primary degree is a BS in Environmental Sciences, then the International Degree would be a BA in International Studies in Environmental Sciences.

To find out about additional ways to demonstrate advanced proficiency, contact the International Degree office.

2. You must successfully complete a minimum of four courses selected from the baccalaureate core curriculum, with the approval of your departmental International Degree advisor. These courses are in addition to the university’s baccalaureate core requirements. The International Degree course requirements from the baccalaureate core are as follows:
   a. One course selected from the Western Culture category (3–4 credits);
   b. Two courses selected from the Cultural Diversity category (6–8 credits);
   c. One course selected from the Western Culture, Cultural Diversity, or Contemporary Global issues categories (3–4 credits). Note: Not all four courses may focus on the same culture or language. For
example, you cannot take all four of the additional baccalaureate core courses focusing on Spanish speaking countries/peoples.

- To see the entire baccalaureate core list go to https://catalog.oregonstate.edu/earning-degrees/bcc/

3. The third requirement of the degree is to spend a minimum of 10 weeks in a country where your International Degree language is spoken and be engaged in a study abroad program, an international internship or an international research project.

4. The final requirement for the degree is to prepare a rigorous and integrative senior thesis, which demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. Requirements for the senior thesis include successful completion of INTL 407 SEMINAR: INTERNATIONAL ISSUES: Introduction to Thesis for 1 credit, and 3 to 6 credits of 403 (Thesis) in your department.

Graduation Language Requirements

Students must demonstrate advanced level achievement or proficiency in a single foreign language in one of the following ways:

- Completion of a fourth-year foreign language sequence (designated 411, 412, 413) at OSU with a minimum 3.00 GPA cumulative in all foreign language courses. Courses must be taken for a letter grade and may not be graded S/U.
- Completion of a fourth-year foreign language sequence at another accredited university with a minimum 3.00 GPA, in a program in which the combined third-year and fourth-year language courses constitute a minimum of 18 quarter or 12 semester credits.
- Completion of a minimum of 9 quarter (6 semester) credits with a minimum 3.00 GPA, at Oregon State University or another accredited university, of any 400-level course work (in any discipline) taught in a foreign language, if approved by the student’s primary degree department or school.
- Demonstration of end of fourth-year level proficiency in a foreign language by successful completion of an achievement test administered by the School of Language, Culture, and Society at OSU.
- Demonstration of fourth-year level proficiency in a foreign language as evidenced by an oral proficiency test administered by a certified foreign language proficiency tester that is approved by the OSU School of Language, Culture, and Society.
- For languages not offered at OSU, the requirement may also be completed by a minimum of nine-month residency (study, research, work), after fulfilling the foreign language entrance requirement, in a country in which the language is spoken.
- Completion of a minimum of one term international internship using the target language after completion of a third-year language sequence (311, 312, 313) at OSU with a cumulative GPA of 3.0 or above.

Experience Abroad

Students must spend a minimum of 10 weeks in another country where the language used to meet the International Degree requirement is spoken and be engaged in one of the following:

- A study abroad program offered by OSU, another university, or a program designed by the student. Programs administered by other universities or those designed by students must be approved by the International Degree Program and the student’s primary department. Currently OSU has university-sponsored programs in over 70 countries.
- An international internship or work program that receives academic credit, such as the IE3 Global Internship Program offered by OSU.
- A pre-approved research project abroad.
- Previous international experience, such as the Peace Corps, approved by the primary academic department and the International Degree Program.

Senior Thesis

The final requirement for the degree is to prepare a rigorous and integrative senior thesis that demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. This thesis places your academic discipline in an international context, often in a comparative fashion. Because it fulfills the writing intensive course requirement for the International Degree, it will involve multiple drafts and revisions. The final product will represent polished, formal writing, in a format appropriate to your academic field.

Dual Thesis Requirements

You may write one thesis to meet the International Degree requirement and the thesis requirement in your department. If you will complete a senior thesis to meet another academic requirement in your primary degree, it is important to consult with academic advisors in your major as well as in the International Degree office.

- Example: If you are in the University Honors College, you will work with both the Honors College and the International Degree office to ensure that you fulfill both sets of requirements.

Thesis proposal: A copy of the thesis proposal form will be on file in the International Degree Program office. The topic will evolve as you work, and may change substantially, but identifying an appropriate advisor and developing a proposal form are crucial steps in your progress toward completion of the thesis requirement of the International Degree. If your thesis ideas change significantly, it is important to file a revised proposal with the International Degree Program office.

Thesis credit: Before graduating, you will spend two to three terms working on the thesis and will receive credits through your major department. You will register for a minimum of 3 thesis credits under the department prefix appropriate to your major (403), with your thesis advisor as the professor of record. These credits may be distributed over multiple terms, and you may receive an incomplete for the credits taken during the earlier term(s) until you have finished your thesis work. You will register for these credits during the year you plan to complete your thesis work, as incomplete grades should be removed within 12 months. Please note that credits for which you receive an incomplete do not count toward credits satisfactorily completed during that term. If you receive financial aid, you should plan ahead to ensure that this does not affect your aid eligibility.

- Example: If you are a sociology major, you would register for a minimum of 3 credits of SOC 403 THESIS. If you are a mathematics major, you would register for MTH 403 THESIS. Some departments already have a thesis course listed in the schedule of classes, but other departments may ask the registration schedule desk to set up a CRN for that course number during the term(s) for which you wish to register for thesis credit.
These credits may be graded or pass/no pass. If you and your advisor agree that the scope of your thesis warrants additional credit, and your college and department’s policies allow it, you may register for additional credits. The suggested maximum is 6 credits.

Colleges, departments, or advisors may elect to set different requirements for thesis credits that meet the needs of their programs. In this case, the requirements or preferences of the college/department take precedence over general International Degree requirements.

Requirements for the Senior Thesis

**Thesis class:** As a part of your program, you will enroll in the 1-credit class INTL 407 SEMINAR: INTERNATIONAL ISSUES, Seminar: International Issues: Introduction to Thesis, offered on a pass/no pass grading basis. The course is offered twice a year during fall and winter terms. It is designed to help you define and focus your areas of interest, get an overview of research methods, develop your thesis ideas, identify a suitable advisor in your major department who will assist you throughout the process, complete a thesis proposal form, and develop a realistic and effective timetable for completion. During this course, you will receive a copy of the guide, Preparing a Senior Thesis. **Note:** If you are also a student in the University Honors College, you may enroll in either the UHC thesis class or the International Degree Program’s thesis class.

**Final thesis:** This represents polished, formal writing. Theses average 30 to 50 pages, but to ensure fulfillment of the WIC requirement, even a thesis with a nonverbal component such as art, music, or photography must include a minimum of 8 to 10 pages of formal writing and place the thesis in the appropriate historical/cultural context by incorporating and documenting outside sources.

- **Example:** A graphic arts student who interned in Russia compared contemporary posters in the U.S. and Russia, and displayed examples. He also wrote an analysis of his findings.

**Presentation:** When your thesis is complete, you will make a public presentation of your work. The format may vary depending on your topic and your own preferences, but you will present your thesis to a group including your advisor, other interested faculty in your department, representatives of the International Degree program, and other guests whom you may want to invite.

Final copies of the log and thesis must be turned in to your major department and the International Degree office two weeks prior to the date that grades are due for graduating seniors for the term you plan to graduate. This is usually a week before finals week.

**Additional College and Departmental Requirements**

**Foreign Language Majors**
To earn the International Degree you must complete the second foreign language required of a language major through the fourth-year level. You must also spend two 10-week periods abroad, one in each of the countries where the two languages you are studying are spoken. For example, if you are a German major and have decided to take Russian as your second foreign language, you must complete the 400-level Russian course and study abroad in both Germany and Russia.

Additionally, you may not complete major/minor requirements without taking upper-division courses in the OSU School of Language, Culture, and Society even if you complete the hour requirements abroad.

**College of Forestry Majors**
As part of the four additional baccalaureate core courses required for the International Degree, you must take FE 456 *INTERNATIONAL FORESTRY/FOR 456 *INTERNATIONAL FORESTRY.

**Scholarships**
In support of the overseas learning experience, the International Degree Program has funds available to assist students traveling abroad and to assist with costs associated with research for your thesis. These are awarded on a competitive basis. Please talk to the International Degree office for more information.

Major Code: 910
RESERVE OFFICER TRAINING CORPS

For more than a century, military training has been offered at Oregon State University. Fulfilling a provision of the Morrill Act of 1862, which gave Corvalis College its first public support, an Army Cadet Corps was organized in 1873.

ROTC at Oregon State is made up of the departments of Military Science, Naval Science, and Aerospace Studies. In 1917, the Department of Military Science became responsible for all military training under the National Defense Act of 1916. This act expanded and standardized the training of Army officers by colleges and universities and established the Reserve Officer Training Corps (ROTC). During World War II, OSU became known as the “West Point of the West” for commissioning more officers than any other nonmilitary academy in the nation. At the end of World War II, the secretary of the Navy commissioned the Department of Naval Science (NROTC) on this campus to provide the training of both Navy and Marine Corps officers. On July 1, 1949, the U.S. Air Force activated an AFROTC unit that today is called the Department of Aerospace Studies. OSU is now one of 48 colleges and universities that offer education for all three military departments.

Originally, two years of military science and tactics were required of all able-bodied male students, but since 1962, ROTC has been voluntary. Since 1965, two-year programs have been available for students who have finished two years of college but have not taken ROTC previously.

As opportunities for women to serve as officers in the armed forces grow, opportunities for women to participate in ROTC programs expand. Women have long been eligible to take ROTC course work for credit. Since 1970, they have been enrolled as cadets in Air Force ROTC and, since 1973, have also been enrolled as cadets and midshipmen in the Army and Navy ROTC programs.

Mission and Objectives

The ROTC selects and prepares young men and women, through a program of instruction coordinated with the student’s normal academic curriculum, for commissioning and service as officers in the regular and reserve components of the Army, Navy, Air Force, and Marine Corps.

Uniforms and Allowances

Students in each of the units receive uniforms to be worn at drill periods and on special occasions. Travel to and from any summer camps or cruises is paid. While at camp or on a cruise, the members receive food and quarters at government expense in addition to basic pay. (See the individual sections for further information on the various camps and cruises.) Those selected for the scholarship programs receive tuition, books, and fees plus $300 to $500 a month subsistence pay for up to 40 months.

Flight Training

Eligible Army, Navy, Marine Corps, and Air Force ROTC students may be selected for flight training upon their successful completion of the program and commissioning.

How to Enroll

See the Army (https://catalog.oregonstate.edu/college-departments/rotc/military-science), Navy (https://catalog.oregonstate.edu/rotc/clinical-science), or Air Force (https://catalog.oregonstate.edu/college-departments/rotc/aerospace-studies) sections of this catalog for enrollment details for the various ROTC programs. All three departments have staff available throughout the year during normal school hours to answer any inquiries regarding the ROTC programs.

Aerospace Studies

The Air Force Reserve Officers Training Corps (AFROTC) program, offered by the Department of Aerospace Studies, provides college-level education to prepare interested men and women for commissioning as second lieutenants in the United States Air Force while simultaneously completing any university undergraduate or graduate degree. The program emphasizes leadership, managerial skills, and the development of each student's sense of personal integrity, honor, and individual responsibility.

Aerospace Studies courses are open to all university students and are taught by Air Force officers. Detachment 685 (Aerospace Studies) offers a Minor in Aerospace Leadership for graduating students/cadets. If students desire a career as an Air Force officer, they must complete all AFROTC requirements. University students who attend academic classes only as a special student (there is no stipend for special students) can receive elective credit for the course(s). Except for cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses (GMC) and may drop the courses at any time within the limits of university course-drop policies.

The U.S. Air Force’s mission is to "Fly, Fight and Win in Air, Space and Cyberspace." Whether a student’s interest lies in flying advanced aircraft, operating sophisticated outer space systems, defending America’s cyberspace infrastructure, researching and developing state-of-the-art technology, or working as a language interpreter, defense intelligence officer, medical or legal professional, the Aerospace Studies Department can guide students to exciting and challenging opportunities.

AFROTC Scholarships

If students qualify, scholarship opportunities are available. A variety of full and partial scholarships are available, and certain scholarships have specific requirements. High school students must apply online by December 1, the year before they begin college in order to compete for a scholarship while still in high school. Students will find application procedures and forms at http://www.afrotc.com/.

Air Force ROTC scholarships cover up to 100% of tuition, laboratory fees, and incidental expenses. ROTC scholarship students will also receive $600 annually for textbooks and a monthly tax-free stipend of up to $500. Students must apply and be accepted into the AFROTC program and agree to accept an Air Force officer commission and service commitment upon graduation.

For details on Air Force scholarships, contact the AFROTC Detachment, McAlexander Fieldhouse, Room 303, (541)737-3291, (800)633-7382 or email: afrotc@oregonstate.edu. Website: http://flyingbeavs.com/ or http://www.afrotc.com/.

Allowances, Uniforms, Textbooks

Students on an Air Force ROTC scholarship or enrolled in the ROTC Professional Officer Course are paid a monthly stipend of up to $500.
Uniforms and textbooks for all Aerospace Studies courses are provided by the Air Force.

**Four- or Three-Year Program**

The four-or three-year program consists of the General Military Course: six quarters of lower-division Air Force Studies classes, including a laboratory each term, and the Professional Officer Course: six quarters of upper-division Air Force Studies classes, including a laboratory each term. Four- or three-year cadets attend four weeks of expeditious summer field training (AS 304 FIELD TRAINING) prior to their junior year of college.

If you’re already in college, it’s not too late to experience the benefits of joining Air Force ROTC. There are numerous options for you even if you start after your freshman year. Previous military experience—ROTC, academy, or military service—may allow the Professor of Aerospace Studies to waive all or part of the General Military Course (first-year and sophomore years) for students enrolled in the four-year AFROTC program. This program provides an opportunity for students who did not enter ROTC previously. Entry is on a competitive basis and the accelerated three-year program is available to students who join their sophomore year. Selectees attend mandatory six-week summer field training session (AS 304 FIELD TRAINING) two summers before commissioning with a bachelor’s, master’s or doctorate degree. Applicants must have one year remaining in college after the five-week field training. The curriculum includes AS 304 FIELD TRAINING (five-week field training); six quarters of upper-division Air Force Studies classes, including a laboratory each term.

Students may enter the first-year class during the fall, winter, or spring term. Sophomore students may take the first-year and sophomore level courses concurrently. Prior to enrolling in the last two years of the program, the Professional Officer Course, the student must meet AFROTC qualification standards and requirements.

**Accelerated (Two-Year) Program**

Specially qualified students are eligible for two-year ROTC scholarships. These scholarships provide up to full college tuition, required fees, textbook allowance, and pay the recipient $250-400 per academic month. The two-year program is available for eligible candidates who can complete all AFROTC requirements and their two years from their entrance into the AFROTC program. Cadets will complete the entire Professional Officer Course in two years. A condensed General Military Course curriculum must be completed within the first year as well. Cadets will attend a standard summer Field Training session prior to the start of their senior year. Potential applicants are considered on a case by case basis. Veterans, active duty personnel, and graduate students are encouraged to inquire about special accelerated programs designed for them. One and two-year programs are also open for Law Students and graduate Law Programs. Students already attending law school wishing to serve as Air Force Judge Advocate Generals (JAGs) may apply for the program through the Air Force JAG website. Officer training will be provided by the AFROTC detachment at an accelerated pace to meet Air Force recruiting goals.

A highly selective one-year program is available for specially selected eligible candidates who can complete all AFROTC requirements and their degree in one year from their entrance into the AFROTC program. Cadets will complete the entire Professional Officer Course (POC) in one year. A condensed General Military Course (GMC) curriculum must be completed within the first 1.5 terms. Cadets will attend a standard Field Training session prior to the start of their senior year. Potential applicants are considered on a case by case basis pending departmental approval. To allow for appropriate vetting, applicants must contact the department prior to the end of their junior year. Please contact the Air Force ROTC department for more information.

**General Military Course (GMC)**

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, two hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn or winter quarters. Sophomore students may enter at the start of summer quarter. A four-week field training course, normally taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students may receive pay and travel costs for field training.

**Professional Officer Course (POC)**

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive tax-free monthly subsistence stipends. They are furnished text books and uniforms. Junior- and senior-level classes consist of three hours of academic classes, two hours of leadership laboratory and two hours of physical fitness per week.

**Commitments**

Students in the four-year program incur no obligation during their first two years in AFROTC unless on scholarship. The student agrees to accept a commission, if offered, only after enrolling in AS 311 LEADERSHIP FUNDAMENTALS, TEAM BUILDING AND PROBLEM SOLVING. High school scholarship students incur a commitment at the beginning of their sophomore year. Upon accepting their commissions, students incur a four-year commitment; pilots incur a 10-year obligation after completion of pilot training; combat systems officers and air battle managers incur a six-year obligation after initial training. Graduates pursuing medical school incur a four-year commitment after medical school.

**Standards**

Cadets must be U.S. citizens of sound physical condition, maintain academic standards and high moral character. Air Force physical fitness standards must be met prior to attending field training and commissioning.

Cadets must be commissioned as Air Force officers prior to age 30.

**Further Educational Opportunities**

After completion of AFROTC requirements, advanced degrees may be sought by delaying active duty commitments. Some commissioned officers continue advanced studies through fully-funded Air Force Institute of Technology or other DoD-sponsored programs.

**Field Training**

Under the Air Force ROTC program, one summer field training session is required, normally after the AS 200 year. Successful completion of field training is required for all cadets prior to membership in the Professional Officer Course. Students are paid varying amounts during field training.
Undergraduate Programs

Minor
- Aerospace Studies (p. 1154)

Aerospace Studies

AS 111. FOUNDATIONS OF THE AIR FORCE PART I. (1 Credit)
The introduction to the Air Force mission and organization. Featured topics include Air Force dress and appearance stand standards; military customs and courtesies, Air Force heritage, overview of the Department of the Air Force, and Air Force core values. Basic oral and written communication will be assessed.

AS 112. FOUNDATIONS OF THE AIR FORCE PART II. (1 Credit)
Second part of the introduction to the Air Force mission and organization. Featured topics include Air Force career opportunities, Air Force benefits, military communication skills, Air Force installations, and look at the basic characteristics of war. Basic oral and written communication will be assessed.

AS 113. FOUNDATIONS OF THE AIR FORCE PART III. (1 Credit)
Third part of the introduction of what the Air Force is about and what the Air Force has to offer. Featured topics include basic leadership, team building, interpersonal skills, diversity in the Air Force, and the oath of office and commissioning. Basic oral and written communication will be assessed.

AS 120. LEADERSHIP LABORATORY. (1 Credit)
Cadets learn officership, leadership, drill and ceremony, and customs and courtesies. Lab. Graded P/N.

AS 211. THE EVOLUTION OF AIR AND SPACE POWER 1860-1945. (1 Credit)
Study of the development of air power, concepts, and doctrine from its beginnings to the end of World War II. Historical examples examined include balloons, dirigibles, Wright Brother’s first flight, and the role of air power in World War I and II. Oral and written communication skills will be assessed.

AS 212. THE EVOLUTION OF AIR AND SPACE POWER 1945-1990. (1 Credit)
Study of the development of air power, concepts, and doctrine during the Cold War. Historical examples examined include the Berlin Airlift, nuclear deterrence, and the role of air power employment in the Korean and Vietnam conflicts. Oral and written communication skills will be assessed.

AS 213. THE EVOLUTION OF AIR AND SPACE POWER 1991-2025. (1 Credit)
Study of the factors contributing to the development of air power, concepts, and doctrine from the Persian Gulf War in 1990 to the present and beyond. Historical examples examined include the air campaigns used in the Gulf War, Kosovo crisis, Operations Enduring Freedom, Iraqi Freedom, and the Global War on Terrorism. Oral and written communication skills will be assessed.

AS 220. LEADERSHIP LABORATORY. (1 Credit)
Cadets are placed in element leadership positions in order to know and comprehend the Air Force concepts of command, discipline, tradition, and courtesies. Lab. Graded P/N.

AS 299. SPECIAL TOPICS IN AIR FORCE STUDIES. (1-16 Credits)
Supervised individual work.

AS 304. FIELD TRAINING. (6 Credits)
Four-week field training supplements campus courses in developing leadership and discipline. Mission, organization, and functions of an Air Force base; marksmanship, survival, and physical training; aircrew and aircraft indoctrination; orientation on specific opportunities in career fields. Conducted at an Air Force base. Graded P/N.

AS 311. LEADERSHIP FUNDAMENTALS, TEAM BUILDING AND PROBLEM SOLVING. (3 Credits)
Emphasis on leadership and management fundamentals, team building and problem solving. Case studies are used to examine leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Unique exercises will be utilized to emphasize team building and problem solving. Oral and written communication skills will be assessed.

AS 312. EFFECTIVE SUPERVISION AND GROUP CONFLICT MANAGEMENT. (3 Credits)
Emphasis on leadership and management fundamentals, team building and problem solving. Case studies are used to examine leadership and management situations, and group conflict management will be utilized. Oral and written communication skills will be assessed.

AS 313. LEADERSHIP, ETHICS, AIR FORCE CORE VALUES AND ACCOUNTABILITY. (3 Credits)
Emphasis on leadership ethics, leadership core values, leadership accountability, and professional knowledge. Unique case studies on leadership ethics and accountability will be utilized. Oral and written communication skills will be assessed.

AS 320. LEADERSHIP LABORATORY. (1 Credit)
Cadets are placed in line and staff leadership positions as a preparation for Air Force active duty. Cadet responsibilities include planning, organizing, directing, and controlling the activities of the cadet corps. Lab. Graded P/N.

AS 405. READING AND CONFERENCE. (1-16 Credits)
Supervised individual work.
Aerospace Studies Minor

The Department of Air Force Studies offers a minor open to any OSU student. Students gain a broad exposure to the concepts of aerospace power, leadership, and management, and general military studies. A student cannot use a course for this minor that is being used for their major.

Military Science (AROTC)

The Military Science program is intended for students with the characteristics and attributes of a “scholar-athlete-leader.” The program is specifically designed to give college students on-campus instruction and experience in the art of organizing, motivating, and leading others. It includes instruction in leadership to develop self-discipline, physical stamina, and professional bearing.

All courses offered by the Department of Military Science are fully accredited and applicable toward fulfilling academic requirements for graduation. The university offers each eligible student the opportunity to compete for a commission as an officer in the United States Army while earning a college degree. There are both basic and advanced programs with multiple entry points which can be tailored to a student’s needs. Merit scholarship opportunities exist for students in any approved academic discipline, particularly in computer science, engineering, math, and science. Uniforms and books are provided free of charge. There are multiple opportunities for cadets to attend funded internships, training with Army units, multi-week trips to foreign countries across the world, Airborne, and Air Assault Training.

Basic Program

The basic program is voluntary and is open to all students, comprising the 1- and 2-credit, lower-division courses listed below, and is normally completed during the freshman and sophomore years. Students may also satisfy the advanced program prerequisites or accelerate their progress through previous military experience or by completing MS 214 MILITARY SCIENCE: LEADER’S TRAINING COURSE (LTC) (6 credits) held at Fort Knox, Kentucky during the summer. No military obligation is incurred for
undergraduate scholarship to be awarded to selected students who are enrolled in a full-time program of instruction in the Army, Army Reserve, or Army National Guard. Delays in reporting to active duty may also be granted for up to four years of service if the student is accepted into the Active Army Reserve or Army National Guard. If the student chooses to enter the Reserve, the commitment is eight years, usually four years active duty and four years reserve forces duty, including eight years of reserve forces duty. This requirement may be satisfied by eight years of reserve forces duty or enrollment in the simultaneous membership program (SMP) or a combination of active duty and reserve forces duty in the USAR or ARNG. A student must have a cumulative college GPA of 2.50, SAT score of 920+ or ACT of 19+, no criminal record, and be of good moral character. The scholarship pays full tuition, $1,200 per year for books, and a stipend of $300 to $500 per month while the student is in school. For an application, contact the Department of Military Science at 541-737-3511.

Simultaneous Membership Program (SMP)
The Simultaneous Membership Program (SMP) is a voluntary program that allows ROTC students to join the Army National Guard and Army Reserve. Upon graduation from basic training and advanced training, students are eligible for the G.I. Bill, which, combined with tuition assistance, is worth over $18,000 per year as a full-time student. Upon degree completion, students earn a commission in the active Army, Army National Guard or Army Reserve.

Service Obligation and Academic Delay
Current laws and regulations require each advanced program graduate to accept a commission upon graduation and to fulfill an eight-year military commitment. This may be satisfied by eight years of reserve forces duty in the USAR or ARNG or by a combination of active duty and reserve forces duty, usually four years active duty and four years reserve forces duty.

Delays in reporting to active duty may also be granted for up to four years to selected students who are enrolled in a full-time program of instruction leading to an acceptable advanced degree.

Military Science
MS 111. MILITARY SCIENCE I: INTRODUCTION TO ARMY LEADERSHIP AND ROTC. (1 Credit)
Introduction to ROTC, and its relationship to the U.S. Army. Role of the army officer, including leadership and management fundamentals. Introduction to land navigation. Lec/lab.

MS 112. MILITARY SCIENCE I: INTRODUCTION TO BASIC MILITARY SKILLS. (1 Credit)
Basic small unit tactics; land navigation; how to read a topographical map and use a magnetic compass; includes practical exercises. Graded A-F only.

MS 113. MILITARY SCIENCE I: INTRODUCTION TO TACTICAL LEADERSHIP. (1 Credit)
Customs and traditions of the U.S. Army; unit organization and missions. Types of careers available to army officers. Practical exercises. Lec/lab.

MS 130. MILITARY PHYSICAL CONDITIONING. (1 Credit)
Prepares military science cadets and university students to excel in the Army Physical Fitness Test (APFT). (Bacc Core Course) Attributes: CSFT – Core, Skills, Fitness
This course is repeatable for 11 credits.

MS 211. MILITARY SCIENCE II: FOUNDATIONS OF LEADERSHIP I. (2 Credits)
An examination of effective leadership. Development of interpersonal skills using practical exercises and case studies. Graded A-F only. Lec/lab.

MS 212. MILITARY SCIENCE II: FUNDAMENTALS OF LEADERSHIP II. (2 Credits)
History of the American soldier from 1775 to 1919; weaponry and tactics of the American Army. Use of battle analysis and war gaming included.

MS 213. MILITARY SCIENCE II: FUNDAMENTALS OF MILITARY OPERATIONS. (2 Credits)
Basic U.S. Army tactics at the individual, team, and squad levels. Integration of military skills in offensive and defensive operations. Graded A-F only. Lec/lab.

MS 214. MILITARY SCIENCE: LEADER’S TRAINING COURSE (LTC). (6 Credits)
Four weeks of classroom and field training at Fort Knox, Kentucky. Can substitute for the first two years of the ROTC program.
MS 311. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY ORGANIZATION. (3 Credits)
Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander’s estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Graded A-F only. Lec/lab.

MS 312. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY ORGANIZATIONS. (3 Credits)
Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander’s estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Graded A-F only. Lec/lab.

MS 313. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY ORGANIZATIONS. (3 Credits)
Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander’s estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Graded A-F only. Lec/lab.

MS 314. MILITARY SCIENCE: LEADER DEVELOPMENT AND ASSESSMENT COURSE. (6 Credits)
Practical and theoretical instruction and training in soldier skills for four weeks. Practical leadership application and experience in a military environment.
Prerequisites: MS 311 with D- or better and MS 312 [D-] and MS 313 [D-]

MS 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MS 411. MILITARY SCIENCE IV: ADAPTIVE LEADERSHIP. (3 Credits)
Train, mentor and evaluate underclass cadets. Learn duties and responsibilities of Army staff office and apply processes. Execute and assess battalion training events. Understand and employ risk management process and use soldier fitness program to reduce and manage stress. Graded A-F only. Lec/lab.

MS 412. MILITARY SCIENCE IV: PREPARATION FOR OFFICERSHIP. (3 Credits)
Recent military history, national defense policy and its application in current world events. Includes military law; law of land warfare; small-unit administration; and ethics and professionalism with emphasis on applied leadership, management techniques, and ethical decision making. Designed to assist the future army officer with the transition from student to junior officer leader. Graded A-F only. Lec/lab.

MS 413. MILITARY SCIENCE IV: PREPARATION FOR OFFICERSHIP. (3 Credits)
Recent military history, national defense policy and its application in current world events. Includes military law; law of land warfare; small-unit administration; and ethics and professionalism with emphasis on applied leadership, management techniques, and ethical decision making. Designed to assist the future army officer with the transition from student to junior officer leader. Graded A-F only. Lec/lab.

Military Science Minor

Also available at OSU-Cascades.

The Department of Military Science offers a minor which is open to any OSU student.

At least 18 of the 27 credits required in the minor must be military science courses.

History
can compete nationally for a two-year scholarship by March of their 22nd year. Sophomores not enrolled in the NROTC program must have a minimum SAT score of 530 verbal, 520 math or a minimum ACT score of 22. Additionally, you must be physically qualified by Naval or Marine Corps standards and have a grade-point average of at least 2.0. Scholarship recipients must not be less than 17 years old by September 1 of their first year of college and no more than 23 years old that same year. Additionally, you must be a citizen of the United States or become a citizen before entering the advanced course.

For more information about Naval ROTC scholarship opportunities, visit http://www.nrotc.navy.mil/ or contact your local Navy-Marine Corps recruiting office. For specific information about OSU NROTC opportunities, visit http://nrotc.oregonstate.edu/ or call the unit at 541-737-5620 or 541-737-6289.

**College Program**

Students who are not awarded a national scholarship and are accepted to OSU can still participate in Naval ROTC through the college program by applying through the OSU Department of Naval Science. College program midshipmen participate in all aspects of the NROTC program and may be eligible for a scholarship provided they have been active in the program for a minimum of one academic term. To be competitive, a student should not have less than a B (3.0) grade-point average, meet aptitude and physical fitness standards, and receive a favorable recommendation from the professor of naval science. If selected, students receive the same benefits as national scholarship recipients.

College program midshipmen who are not awarded a scholarship must be selected for “advanced standing” status before beginning their junior year to remain in the NROTC program. If selected for “advanced standing” students receive a monthly subsistence allowance of $350 their junior year and $400 their senior year. College program midshipmen receive a commission upon graduation and have the same professional opportunities as scholarship midshipmen to select careers in all warfare areas of the Navy and Marine Corps. For specific information about the college program, visit http://nrotc.oregonstate.edu/ or call the unit at 541-737-5620 or 541-737-6289.

Any university student may take naval science courses for credit. However, such students are classified as naval science students and are not enrolled in the NROTC program.

**Naval Science Minor Requirements**

NROTC candidates applying for any of the NROTC programs must:

1. be a citizen of the United States or become a citizen before entering the advanced course;
2. be accepted for admission or enrolled in the university;
3. be at least 17 years of age upon enrollment and under 25 years (27 for the college program) on June 30 of the calendar year in which they wish to enter the program.
4. be physically qualified in accordance with the standards established by the Department of the Navy;
5. possess a satisfactory record of moral integrity and have potential officer characteristics;
6. have no moral obligations or personal convictions preventing them from conscientiously bearing arms and supporting and defending the Constitution of the United States against all enemies foreign and domestic.

**Status and Curriculum**

Students enrolled in the NROTC program are not on active duty. They wear the uniform only for drills, on special occasions, and during the summer training periods.
The program of study fits into curricula leading to baccalaureate degrees. Additionally, Naval Science-U.S. Navy minor scholarship students must complete three terms of calculus by the end of their sophomore year and three terms of calculus-based physics by the end of their junior year.

**Undergraduate Programs**

**Minors**
- Naval Science-U.S. Marine Corps (p. 1158)
- Naval Science-U.S. Navy (p. 1159)

**Captain Trey Sisson**, USN (US Navy)
Commanding Officer
104 Naval Science
Oregon State University
Corvallis, OR 97331-5401
541-737-6289
Website: http://nrotc.oregonstate.edu/

**Faculty**

**Professors** Captain Trey Sisson (USN, Commanding Officer), Commander Reidy (USN, Executive Officer)

**Assistant Professors** Captain Davis (USMC), Lieutenant Frantz (USN), Lieutenant Hill (USN), Lieutenant Lopez (USN)

**Instructor** Gunnery Sergeant LeBlanc (USMC)

**Naval Science**

**NS 111. INTRO TO NAVAL SCIENCE. (3 Credits)**
Naval organization and administration; organization of the Navy or Marine Corps, the Navy and Marine Corps as a career, responsibilities and commitments as an officer in the Navy or Marine Corps.

**NS 112. U.S. NAVAL HISTORY I. (3 Credits)**
A study of U.S. seapower and maritime affairs from the American Revolution through 1900. Lec/lab.

**NS 113. U.S. NAVAL HISTORY II. (3 Credits)**
A study of U.S. seapower and maritime affairs from 1900 through present day. Lec/lab.
Prerequisites: NS 112 with D- or better

**NS 211. LEADERSHIP AND MANAGEMENT. (5 Credits)**
Overview of the principles, philosophies, and methodologies of effective Naval leadership with emphasis on moral, ethical actions with respect to the principles of authority, responsibility, and accountability as they apply to military organizations.

**NS 212. NAVAL ENGINEERING. (5 Credits)**
Propulsion, basic engineering systems theory, and concepts application in modern ship and jet propulsion. Course will include auxiliary systems, theory and design of shipboard auxiliaries, ship design, and damage control/safety procedures. Offered every other winter term.
Prerequisites: NS 111 with D- or better

**NS 311. NAVIGATION. (5 Credits)**
Introduction to navigation including piloting, dead reckoning, and voyage planning. Course includes nautical rules of the road, maneuvering board, relative motion, and shipboard external communications.

**NS 312. NAVIGATION. (5 Credits)**
Theory of shiphandling, communications, shipboard evolutions, heavy weather, case study discussions.
Prerequisites: NS 311 with D- or better

**NS 321. EVOLUTION OF WARFARE I. (3 Credits)**
The art and concepts of warfare from the beginning of recorded history to present (the Age of Napoleon).

**NS 322. EVOLUTION OF WARFARE II. (3 Credits)**
The art and concepts of warfare post-WWI (from the beginning of the Industrial Revolution) to present, the current world political situation and U.S. foreign policy and their effects on the Naval services, and forecast for the future.
Prerequisites: NS 321 with D- or better

**NS 323. NAVAL SCIENCE III: MARINE CORPS OPTION. (3 Credits)**
Preparation for officer candidates’ school and practical field exercises. For U.S. Marine Corps candidates option.
Prerequisites: NS 322 with D- or better

**NS 405. READING AND CONFERENCE. (1-16 Credits)**
To prepare midshipmen returning from a leave of absence from the Naval ROTC program for commissioning and entrance into the fleet.
This course is repeatable for 16 credits.

**NS 411. NAVAL WEAPONS SYSTEMS. (5 Credits)**
Introduction to the theory and development of U.S. Naval weapons systems, current weapons systems types, platforms, and employment. Course will include naval weapons systems types, launch platforms, characteristics and employment.
Prerequisites: NS 111 with D- or better

**NS 413. LEADERSHIP AND ETHICS. (4 Credits)**
Junior Officer administrative responsibilities with emphasis on moral and ethical decision making of Naval leaders.
Prerequisites: NS 211 with C- or better

**NS 421. FUNDAMENTALS OF MANEUVER WARFARE I. (3 Credits)**
Maneuver warfare from the beginning of recorded history to WW II. Broad aspects of warfare and their interactions with maneuver warfare doctrine. Focus on the United States Marine Corps as the premier maneuver warfare fighting institution. Historical influences on current tactical, operational, and strategic implications of maneuver warfare practices. Provides professional development for future United States Marine Corps officers. Case studies.

**NS 422. FUNDAMENTALS OF MANEUVER WARFARE II. (3 Credits)**

**Naval Science-U.S. Marine Corps Minor**

The Department of Naval Science offers two minors. Naval Science-U.S. Navy and the Naval Science-U.S. Marine Corps which are open to ROTC students and may include students not pursuing a commission through the ROTC program.

UNIVERSITY HONORS COLLEGE

Students who complete the requirements of the Oregon State University Honors College receive OSU's most prestigious academic recognition for undergraduates: an honors baccalaureate degree (HBA, HBFA or HBS) in their major, jointly awarded by the Honors College and the colleges of their major.

Oregon State University
450 Learning Innovation Center (LInc)
Corvallis, OR
97331-2221
541-737-6400
FAX 541-737-6401
Email: Honors.College@oregonstate.edu
Website: http://honors.oregonstate.edu

Administration
Toni Doolen, Dean, 541-737-5974, toni.doolen@oregonstate.edu
Tara Williams, Associate Dean, 541-737-6412, tara.williams@oregonstate.edu
Ben Mason, Assistant Dean, 541-737-6419, ben.mason@oregonstate.edu

The Honors College is about enrichment: How high can you dream? The Honors College provides challenging curricula, personal attention, and enhanced learning experiences in general education and in the student’s primary academic interest. The Honors College offers courses consisting of small groups taught by OSU's finest faculty, specifically selected for their undergraduate teaching abilities. Through seminars, colloquia, and their own thesis research, students enjoy the benefits of a small college within a large, diverse, and comprehensive university.

Both a four-year and a two-year track are available. The two-year track is designed for transfer students or for students already enrolled at OSU. Interested students should contact the Honors College for information.

The Honors College, in cooperation with University Housing and Dining Services, maintains an honors living-learning community in West and Sackett Residence Halls.

Majors and Degrees
Students enrolled in the Honors College can pursue any one of OSU's wide range of undergraduate majors. Students who complete the requirements of the Honors College receive OSU's most prestigious undergraduate academic recognition: an honors baccalaureate degree in their major, jointly awarded by the Honors College and the colleges in which their major is located.

Honors Courses
See the Schedule of Classes each term under Honors College (HC) and under departmental listings for courses with an H suffix. The HC publishes its own schedule, which is available each term in the HC office and on the HC website. Honors courses change annually; many are offered under departmental designators.

See the HC website for additional information, http://honors.oregonstate.edu.

Admission
To be considered for admission, high school applicants must have a minimum of a 3.75 cumulative unweighted high school GPA (students who don't meet the GPA minimum can qualify with a test score of 1300 SAT or 27 ACT). Honors College admission is competitive, and decisions are based on grade-point averages, SAT or ACT scores, and responses to an essay question that reveal the student's ability to think deeply and creatively.

Entering first-year students interested in beginning the HC fall term should submit an application by either November 1 or February 1. HC applicants must also apply for admission to OSU by that time. Admission decisions are made approximately 45 days after the submission deadlines. A response to the current year HC essay question is required.

Transfer or advanced-standing applicants should submit an application by March 15th and will be notified no later than April 30th. On-campus visits are encouraged.

Degree Requirements
The honors degree is jointly awarded by the Honors College (HC) and by the colleges of the student’s major. Therefore, additional credit requirements beyond the total required by the colleges of the student’s major must be completed. HC students must satisfy all university and major requirements, as well as honors requirements. A student who completes a 30-credit track of Honors College courses will be designated an Honors Scholar. A student who completes a 15-credit track will be designated as an Honors Associate. In either instance successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote HC course work.

Many honors classes satisfy dual requirements; please check details with an Honors College advisor. For students in majors that require a senior thesis project, the honors thesis requirements may complement those majors.

Retention Criteria
All HC students must maintain a 3.25 cumulative OSU GPA and make satisfactory progress toward fulfilling the requirements of the HC and their major. Progress in three key areas—GPA, course work, and thesis—will be reviewed every fall, winter, and spring term. Students below, or at risk of falling below, the specified 3.25 cumulative OSU GPA will be notified to come in for advising. Students who do not meet retention expectations may be removed from the college. If removed, a student has the right to petition for reinstatement.

All students must maintain contact with Honors College advisors through regularly scheduled appointments.

Undergraduate Programs
Majors
- Honors Associate (p. 1183)
- Honors Scholar (p. 1183)
Honors College Courses

ACTG 378H. ACCOUNTING INFORMATION MANAGEMENT. (4 Credits)
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 275 [C])
Equivalent to: ACTG 378

AEC 250H. *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY. (3 Credits)
Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: AEC 250

AEC 399H. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 399
This course is repeatable for 8 credits.

AEC 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 407
This course is repeatable for 16 credits.

ALS 199H. SPECIAL TOPICS. (0-3 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ALS 199
This course is repeatable for 9 credits.

ANS 121H. *INTRODUCTION TO ANIMAL SCIENCES. (4 Credits)
Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: ANS 121

ANTH 251H. *LANGUAGE IN THE USA. (3 Credits)
Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ANTH 251

ANTH 311H. *PEOPLES WORLD-NORTH AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 311

ANTH 312H. *PEOPLES WORLD-EUROPE. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course)
Attributes: CPW – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: ANTH 312

ANTH 313H. *PEOPLES OF THE WORLD-LATIN AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 313

ANTH 314H. *PEOPLES OF THE WORLD-MIDDLE EAST. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 314

ANTH 315H. *PEOPLES OF THE WORLD-AFRICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 315
ANTH 318H. *PEOPLES OF THE WORLD—CHINA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPTD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Prerequisites: ANTH 110 with D- or better or ANTH 210 with D- or better
Equivalent to: ANTH 318

ANTH 374H. *ANTHROPOLOGY AND GLOBAL HEALTH. (3 Credits)
An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critical and evidence-based perspective on complex global health issues. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: ANTH 374

ANTH 380H. *CULTURES IN CONFLICT. (3 Credits)
Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACN – Liberal Arts Social Core
Prerequisites: ANTH 110 with D- or better
Equivalent to: ANTH 380

ANTH 383H. *INTRODUCTION TO MEDICAL ANTHROPOLOGY. (3 Credits)
Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: ANTH 383

ANTH 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 405H. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 407H. SEMINAR. (1-3 Credits)
This course is repeatable for 16 credits.

ANTH 432H. *DOMESTICATION, URBANIZATION, AND THE RISE OF CIVILIZATION. (4 Credits)
Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ANTH 432

ANTH 447H. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS. (4 Credits)
The Arctic is on the frontline of today’s most pressing problems. This course uses Arctic perspectives to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course)
Attributes: CPTD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: ANTH 447

ART 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ATS 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 12 credits.

BA 160H. B-ENGAGED. (3 Credits)
Understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Opportunity to connect with faculty and peers with common interests in a supportive learning environment.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 160

BA 161H. INNOVATION NATION—AWARENESS TO ACTION. (3 Credits)
First course in a two-course sequence. Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today’s global market. Builds a foundation of entrepreneurial knowledge and gaining a competitive edge While becoming aware of your role in managing your own career.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 161, BA 167

BA 162H. INNOVATION NATION—IDEAS TO REALITY. (3 Credits)
Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today’s global market.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 161 with C- or better or BA 161H with C- or better
Equivalent to: BA 162, BA 168
BA 211H. FINANCIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of external users, principally investors and creditors. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, and asset valuation.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 60
Equivalent to: BA 211

BA 213. MANAGERIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 211 with C- or better or BA 211H with C- or better
Equivalent to: BA 213H

BA 213H. MANAGERIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 211 with C- or better or BA 211H with C- or better
Equivalent to: BA 213

BA 230H. BUSINESS LAW I. (4 Credits)
Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 230

BA 233H. LEGAL ENVIRONMENT OF BUSINESS. (2 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 233

BA 253H. PROFESSIONAL DEVELOPMENT. (4 Credits)
Designed to give students an early start on the process of career planning and development. The process involves thoughtful self-assessment, career exploration, planning and follow-through with preliminary employment strategies.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 101 with C- or better or BA 280 [C-]) or BA 162 [C-] or BA 162H [C-]
Equivalent to: BA 253, BA 253H, BA 281, BA 353, BA 381

BA 333H. LEGAL AND ETHICAL BUSINESS SOLUTIONS. (2 Credits)
Legal and ethical regulations of U.S. and global business organizations including financial, human resources, operations and marketing functions. Emphasizes legal and ethical strategies for entrepreneurs including business entity selection, raising capital and managing intellectual property.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 230 with C- or better or BA 233 with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 333

BA 347H. INTERNATIONAL BUSINESS. (4 Credits)
Integrated view of international business including current patterns of international business, socioeconomic and geopolitical systems within countries as they affect the conduct of business, major theories explaining international business transactions, financial forms and institutions that facilitate international transactions, and the interface between nation states and the firms conducting foreign business activities.
Attributes: HNRS – Honors Course Designator
Prerequisites: ECON 202 with C- or better or ECON 202H with C- or better
Equivalent to: BA 347

BA 352H. MANAGING INDIVIDUAL AND TEAM PERFORMANCE. (4 Credits)
Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course.
Attributes: HNRS – Honors Course Designator
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])
Equivalent to: BA 352
BA 354H. *MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY. (4 Credits)
Introduces contemporary issues that business professionals face making ethical and socially responsible decisions in an increasingly fast-paced, transparent, and global environment. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or HC 199 [C-])
Equivalent to: BA 354, MGMT 459

BA 357H. OPERATIONS MANAGEMENT. (4 Credits)
Decision making in managing the production of goods and services: product planning, process planning, facility planning, control of quantity, cost and quality. Special emphasis on exponential forecasting, inventory management, work methods, project management, productivity improvement, and international comparisons.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better
Equivalent to: BA 357

BA 360H. INTRODUCTION TO FINANCIAL MANAGEMENT. (4 Credits)
Explore the issues facing a financial manager in new business ventures, small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C- or better or BA 213H with C- or better or BA 215 with C- or better or BA 215H with C- or better or BA 315 with C- or better) and (ECON 201 [C-] or ECON 201H [C-] or AEC 250 [C-] or AEC 250H [C-])
Equivalent to: BA 240, BA 360

BA 375H. APPLIED QUANTITATIVE METHODS. (4 Credits)
Introduces students to the basics of data science and data analytics for handling of large-scale databases. It provides an overview of the main data-analytic techniques and topics including data visualization, linear and nonlinear regression analysis, time series analysis and forecasting, classification, and clustering methods.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 275 with C- or better
Equivalent to: BA 375

BA 390H. MARKETING. (4 Credits)
Consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Objective is to develop an understanding of distribution processes, marketing problems, and marketing principles.
Attributes: HNRS – Honors Course Designator
Prerequisites: ECON 201 with C- or better or ECON 201H with C- or better or AREC 250 with C- or better
Equivalent to: BA 223, BA 390

BA 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 407
This course is repeatable for 16 credits.

BA 465H. *SYSTEMS THINKING AND PRACTICE. (4 Credits)
Hard and soft systems theories are examined, including methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: BA 465

BB 314H. CELL AND MOLECULAR BIOLOGY. (4 Credits)
Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])
Equivalent to: BB 314

BB 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 399
This course is repeatable for 16 credits.

BB 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 405
This course is repeatable for 16 credits.

BB 407H. BIOCHEMISTRY/BIOPHYSICS SEMINAR. (1-16 Credits)
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics.
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 407
This course is repeatable for 99 credits.

BEE 407H. SEMINAR. (1-16 Credits)
Departmental seminars. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BEE 407
This course is repeatable for 16 credits.

BEE 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BEE 499
This course is repeatable for 16 credits.

BI 199H. SELECTED TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 199
This course is repeatable for 16 credits.

BI 211H. *PRINCIPLES OF BIOLOGY. (4 Credits)
Origins of life, energy transformations, plant and animal physiology. Lec/ lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: BI 211
BI 212H. *PRINCIPLES OF BIOLOGY. (4 Credits)
Cell biology; organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisites: (CH 121 (may be taken concurrently) with D- or better or
CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or (CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-])
Equivalent to: BI 212

BI 213H. *PRINCIPLES OF BIOLOGY. (4 Credits)
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisites: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or (CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-])
Equivalent to: BI 213

BI 306H. **ENVIRONMENTAL ECOLOGY. (3 Credits)
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSGI – Core, Synth, Global Issues; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Equivalent to: BI 306

BI 311H. GENETICS. (4 Credits)
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 311

BI 370H. ECOLOGY. (3 Credits)
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 370

BI 401H. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 401
This course is repeatable for 16 credits.

BI 407H. SEMINAR. (1 Credit)
Departmental seminar. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 407
This course is repeatable for 16 credits.

BI 445H. EVOLUTION. (3 Credits)
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Attributes: HNRS – Honors Course Designator
Prerequisites: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445

BI 499H. SPECIAL TOPICS. (1-16 Credits)
Topics and credits vary.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 499
This course is repeatable for 16 credits.

BOT 407H. SEMINAR. (1 Credit)
Section 1: Departmental seminar. Section 3: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BOT 407
This course is repeatable for 16 credits.

BOT 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: BOT 499
This course is repeatable for 16 credits.

CBEE 101H. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION. (3 Credits)
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/rec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: CBEE 101

CBEE 102H. ENGINEERING PROBLEM SOLVING AND COMPUTATIONS. (3 Credits)
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: CBEE 102

CBEE 211H. MATERIAL BALANCES AND STOICHIOMETRY. (3 Credits)
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: CBEE 211
CBEE 212H. ENERGY BALANCES. (3 Credits)
Energy balances, therмophysical and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CBE 211 with C or better or CBEE 211H with C or better) and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: CBEE 212

CBEE 414H. *PROCESS ENGINEERING LABORATORY. (3 Credits)
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: CBEE 414

CCE 321H. CIVIL AND CONSTRUCTION ENGINEERING MATERIALS. (4 Credits)
Highway materials; aggregate, concrete and asphalt. Standard test methods.
Attributes: HNRS – Honors Course Designator
Prerequisites: CBEE 211 with C or better or CBEE 211H with C or better
Corequisites: CHE 311, CHE 333, CHE 333H
Equivalent to: CCE 321

CE 299H. SPECIAL TOPICS. (1-4 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 299

CE 407H. SEMINAR. (1-3 Credits)
Understanding complexity and systems thinking.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 407

This course is repeatable for 16 credits.

CH 231H. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231H is a lecture course; CH 261H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisites: CH 232 with C or better or CH 232H with C or better or CH 222 with C or better
Corequisites: CH 231H
Equivalent to: CH 261

CH 232H. GENERAL CHEMISTRY. (4 Credits)
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 232H is a lecture course; CH 263H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisites: (CH 232 with C or better or CH 232H with C or better) or CH 222 with C or better
Corequisites: CH 232H
Equivalent to: CH 262

CH 261H. *LABORATORY FOR CHEMISTRY 231H. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231H)
Attributes: CPPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Corequisites: CH 231H
Equivalent to: CH 261

CH 262H. *LABORATORY FOR CHEMISTRY 232H. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232H)
Attributes: CPPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Corequisites: CH 262H
Equivalent to: CH 262

CH 263H. *LABORATORY FOR CHEMISTRY 233H. (1 Credit)
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233H)
Attributes: CPPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Corequisites: CH 263H
Equivalent to: CH 263

CH 361H. EXPERIMENTAL CHEMISTRY I. (3 Credits)
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((CH 221 with D or better and CH 222 [D]) or CH 222H [D]) and CH 223 [D] or CH 224H [D] and CH 225H [D] or CH 226H [D]) or ((CH 231 [D] or CH 231H [D]) and (CH 261 [D] or CH 261H [D] or CH 271 [D]) and (CH 232 [D] or CH 232H [D]) and (CH 262 [D] or CH 262H [D] or CH 272 [D] or CH 233 [D] or CH 233H [D]) and (CH 263 [D] or CH 263H [D]) and (MTH 251 (may be taken concurrently) [D] or MTH 251H (may be taken concurrently) [D]) and (PH 201 (may be taken concurrently) [D]) and (PH 211 (may be taken concurrently) [D]) and CH 334 (may be taken concurrently) [D])
Equivalent to: CH 361
CH 362H. EXPERIMENTAL CHEMISTRY I. (3 Credits)
First-level integrated laboratory course for majors in chemistry and
related disciplines, covering experimental techniques of analytical,
inorganic, organic and physical chemistry. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CH 361 with D- or better or CH 361H with D- or better) and
CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362

CH 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CH 407
This course is repeatable for 16 credits.

CH 461H. EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and
related disciplines, covering experimental techniques of analytical,
inorganic and physical chemistry. Lec/Lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better)
and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken
concurrently) [D-]
Equivalent to: CH 461

CH 462H. EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and
related disciplines, covering experimental techniques of analytical,
inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive
Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better)
and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-]
or CH 461H [D-])
Equivalent to: CH 462

CH 463H. EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and
related disciplines, covering experimental techniques of analytical,
inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive
Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better)
and (CH 324 [D-] or CH 461 [D-]) and CH 442 (may be taken
concurrently) [D-]
Equivalent to: CH 463

CH 464H. EXPERIMENTAL CHEMISTRY II. (3 Credits)
Second-level integrated laboratory course for majors in chemistry and
related disciplines, covering experimental techniques of analytical,
inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive
Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (CH 362 with D- or better or CH 362H with D- or better)
and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464

CHE 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 199

CHE 331H. TRANSPORT PHENOMENA I. (4 Credits)
Fundamentals and application of momentum and energy transfer
phenomena to fluid flow for the design of industrial chemical engineering
equipment.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better)
and (CBEE 212 (may be taken concurrently) [C] or CBEE 212H (may be
taken concurrently) [C])
Equivalent to: CHE 331

CHE 332H. TRANSPORT PHENOMENA II. (3 Credits)
A unified treatment using control volume and differential analysis of heat
transfer, prediction of heat transport properties, and introduction to heat
transfer operations.
Attributes: HNRS – Honors Course Designator
Prerequisites: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332

CHE 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 405
This course is repeatable for 16 credits.

COMM 111H. *PUBLIC SPEAKING. (3 Credits)
Public communication as it relates to informative and persuasive
discourse. The theory and practice of public speaking in informative and
persuasive contexts. Lec/rec. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech; HNRS – Honors Course
Designator
Equivalent to: COMM 111

COMM 114H. ARGUMENT AND CRITICAL DISCOURSE. (3 Credits)
Examination of argumentation as a part of human interaction and
investigation. The course emphasizes the processes by which people
give reasons to gain adherence and to justify beliefs and actions. The
course includes readings, writing, and presentations concerned with the
nature of arguments, processes of arguing, and argument criticism. Lec/
rec. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech; HNRS – Honors Course
Designator
Equivalent to: COMM 114

CROP 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 405, CSS 405H
This course is repeatable for 16 credits.

CROP 499H. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE.
(1-16 Credits)
Technical knowledge and skills development courses offered in a wide
array of course formats. Topics vary from term to term and year to year.
May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 499
This course is repeatable for 16 credits.

CS 160H. COMPUTER SCIENCE ORIENTATION. (3 Credits)
Introduction to the computer science field and profession. Team problem
solving. Introduction to writing computer programs. Approaches to
teaching course topics vary across sections. Lec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 160
CS 321H. INTRODUCTION TO THEORY OF COMPUTATION. (3 Credits)
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Attributes: HNRS – Honors Course Designator
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321

CS 325H. ANALYSIS OF ALGORITHMS. (4 Credits)
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Attributes: HNRS – Honors Course Designator
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325

CS 407H. SEMINAR. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 407
This course is repeatable for 16 credits.

CS 419H. SELECTED TOPICS IN COMPUTER SCIENCE. (1-5 Credits)
Topics of special and current interest not covered in other courses.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 419
This course is repeatable for 99 credits.

DSGN 244H. COLOR INNOVATION. (4 Credits)
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 244

DSGN 341H. DESIGN THINKING AND PROCESS INNOVATION. (4 Credits)
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 341

ECE 322H. ELECTRONICS I. (3 Credits)
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.
Attributes: HNRS – Honors Course Designator
Prerequisites: ENGR 203 with C- or better
Equivalent to: ECE 322

ECON 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ECON 399
This course is repeatable for 16 credits.

ED 216H. *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY. (3 Credits)
Introduction to the historical, social, philosophical, political, legal and economic foundations of education in Oregon, the United States, and other countries in order to provide a framework from which to analyze contemporary educational and environmental issues in various schools, communities, and workplaces. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ED 216

ED 408H. WORKSHOP. (1-3 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ED 408
This course is repeatable for 16 credits.

ENG 104H. *INTRODUCTION TO LITERATURE: FICTION. (3 Credits)
Study of fiction for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 104

ENG 106H. *INTRODUCTION TO LITERATURE: POETRY. (3 Credits)
Study of poetry for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 106

ENG 201H. *SHAKESPEARE. (4 Credits)
The earlier plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 201

ENG 202H. *SHAKESPEARE. (4 Credits)
The later plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 202

ENG 204H. *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 204

ENG 205H. *SURVEY OF BRITISH LITERATURE: RESTORATION TO ROMANTIC ERA. (4 Credits)
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 205

ENG 211H. *LITS OF THE WORLD: AFRICA. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 211
ENG 213H. *LITERATURES OF THE WORLD: MIDDLE EAST. (4 Credits)
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)
Attributes: CPDP – Core, Perspectives, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220, FILM 220

ENG 220H. *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION. (4 Credits)
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspectives, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 221

ENG 221H. *AFRICAN-AMERICAN LITERATURE. (4 Credits)
Reading and critical analysis of African-American literature in historical, political, and/or thematic perspective. Content changes from term to term; see Schedule of Classes. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 222
This course is repeatable for 8 credits.

ENG 254H. *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT. (4 Credits)
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 254

ENG 260H. *LITERATURE OF AMERICAN MINORITIES. (4 Credits)
Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspectives, Difference/Power/Discrimination; CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 260

ENG 275H. *THE BIBLE AS LITERATURE. (4 Credits)
Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 275

ENG 295H. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as PHL 295, PHL 295H, WGSS 295, WGSS 295H.
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: ENG 295, PHL 295, PHL 295H, WGSS 295, WGSS 295H

ENG 374H. *MODERN SHORT STORY. (4 Credits)
Survey of the short story from the 19th century to present. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 374

ENG 375H. CHILDREN'S LITERATURE. (4 Credits)
Surveys a variety of genres, including fairy tales, folktales and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENG 375

ENG 399H. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENG 406H. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENGR 112H. INTRODUCTION TO ENGINEERING COMPUTING. (3 Credits)
Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 112

ENGR 201H. ELECTRICAL FUNDAMENTALS I. (3 Credits)
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 251 with C or better or MTH 251H with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: ENGR 201

ENGR 211H. STATICS. (3 Credits)
Analysis of forces induced in structures and machines by various types of loading. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: ENGR 211

ENGR 212H. DYNAMICS. (3 Credits)
Kinematics, Newton’s laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENGR 211 with C or better or ENGR 211H with C or better) and (PH 211 [C] or PH 211H [C])
Equivalent to: ENGR 212

ENGR 213H. STRENGTH OF MATERIALS. (3 Credits)
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: ENGR 211 with C or better or ENGR 211H with C or better
Equivalent to: ENGR 213
ENGR 299H. SPECIAL TOPICS. (0-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 299
This course is repeatable for 16 credits.

ENGR 350H. *SUSTAINABLE ENGINEERING. (3 Credits)
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 350

ENGR 363H. *ENERGY MATTERS. (3 Credits)
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 363

ENGR 391H. ENGINEERING ECONOMICS AND PROJECT MANAGEMENT. (3 Credits)
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 391

ENGR 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 399
This course is repeatable for 16 credits.

ENGR 407H. SEMINAR. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 407
This course is repeatable for 16 credits.

ENGR 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 499
This course is repeatable for 16 credits.

ENSC 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENSC 407
This course is repeatable for 12 credits.

ENVE 299H. SPECIAL TOPICS. (0-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENVE 299
This course is repeatable for 16 credits.

ENVE 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENVE 407
This course is repeatable for 16 credits.

ES 221H. *SURVEY OF AFRICAN AMERICAN STUDIES I. (3 Credits)
An interdisciplinary survey of the African American experience beginning with pre-colonial Africa and ending with World War I. (H) (NC) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ES 221

ES 241H. *INTRODUCTION TO NATIVE AMERICAN STUDIES. (4 Credits)
A survey of Native American cultures and history, both prior to and following contact with Europeans. Introduces the key contemporary issues and questions in the field of Native American studies. (H) (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ES 241

ES 353H. *ENVIRONMENTAL RACISM. (4 Credits)
Introduces environmental racism, the unequal impact of environmental harm on communities of color and indigenous peoples. Presents empirical evidence and theoretical frames, and explores efforts by government, residents, and activists to combat it. Considers questions of environmental justice via social structure, public access, open space, indigeneity, food, and media. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ES 353

ES 355H. *RACE, SPACE, AND DIFFERENCE. (4 Credits)
A hands-on approach to exploring how we make space, and why geography is always infused with markers of social identity and exercises of power. Will practice "reading" space and landscapes, and learn how notions of race and other forms of "difference" shape space and (vice versa) to produce experiences of inclusion, exclusion, cooperation, and conflict. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ES 355

ES 357H. *FARMWORKER JUSTICE MOVEMENTS. (4 Credits)
Justice movements for farmworkers have a long and storied past in the annals of US history. This course begins with the 1960s Chicano civil rights era struggles for social justice. Focus on the varied strategies of four farmworker justice movements: United Farm Workers, Farm Labor Organizing Committee, Pineros y Campesinos Unidos Noroeste, and the Coalition of Immokalee Workers. The course is structured around the question of the movement and its various articulations. Course covers central themes and strategies that comprise the core of farmworker movements but is designed to allow students to explore other articulations they find relevant. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ES 357

ES 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ES 399
This course is repeatable for 16 credits.
FES 240H. *FOREST BIOLOGY. (4 Credits)
Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: FES 240

FILM 245H. *THE NEW AMERICAN CINEMA. (4 Credits)
A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 245, ENG 245H, FILM 245

FILM 452H. *STUDIES IN FILM. (4 Credits)
Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term; see Schedule of Classes. Lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 452, FILM 452
This course is repeatable for 8 credits.

FIN 340H. FINANCE. (4 Credits)
Role and functions of a financial manager in the modern business environment in which a manager operates; formulation of financial objectives and policies; financial analysis, forecasting, planning, and control; asset management; capital budgeting; acquisition of funds through borrowing, stock issue, and by internal means; dividend policy; and international aspects of finance.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C- or better or BA 215 with C- or better or BA 215H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: FIN 340

FOR 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: FOR 399
This course is repeatable for 16 credits.

FR 499H. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year.
Attributes: HNRS – Honors Course Designator
Equivalent to: FR 499
This course is repeatable for 9 credits.

FST 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: FST 399
This course is repeatable for 16 credits.

FW 199H. SPECIAL STUDIES. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 199
This course is repeatable for 16 credits.

FW 407H. SEMINAR. (1-16 Credits)
Graded P/N. Taught at Hatfield Marine Science Center.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 407
This course is repeatable for 16 credits.

GEO 307H. *NATIONAL PARK GEOLOGY AND PRESERVATION. (3 Credits)
National parks as classrooms to study geological processes and the importance of preserving natural landscapes. Field trip(s) required; transportation fee charged. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEO 307

GEO 352H. *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE. (4 Credits)
Provides an overview of the geology of Oregon in the context of the Pacific Northwest including tectonic setting, geologic features and landscapes, as well as topics and concepts of interest to society in general. Lessons will include discussion of the relationship between people and the landscape, incorporating the concept of ethnographic landscapes–geologic structures, natural resources and geologic hazards that are part of the identity of a place. Emphasizes written and graphic communication skills. Field trip required, transportation fee charged. Lec/lab. (Bacc core course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEO 352

GEO 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: GEO 399
This course is repeatable for 16 credits.

GEG 340H. *INTRODUCTION TO WATER SCIENCE AND POLICY. (3 Credits)
Policy and science of the hydrologic cycle. Emphasis on interaction between water’s natural time-space fluctuations and human uses. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEOG 340

GEOG 399H. SPECIAL STUDIES. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: GEOG 399
This course is repeatable for 16 credits.

H 100H. INTRODUCTION TO PUBLIC HEALTH. (4 Credits)
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 100

H 364H. DRUGS, SOCIETY AND HUMAN BEHAVIOR. (3 Credits)
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulatory compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual’s value orientation.
Attributes: HNRS – Honors Course Designator
Prerequisites: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364

H 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: H 399
This course is repeatable for 16 credits.
This course is repeatable for 16 credits.

**HC 409. PRACTICUM. (1-16 Credits)**

Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HC 491

This course is repeatable for 6 credits.

**HC 199. *HONORS WRITING. (3 Credits)**

Through a range of assignments, texts, and guest speakers, Honors College students will develop critical thinking skills and a strategy for writing in their discipline. (Bacc Core Course)

**Attributes:** CSW2 – Core, Skills, WR II; HNRS – Honors Course Designator

**Prerequisites:** WR 121 with D- or better or WR 121H with D- or better

**HC 299H. SPECIAL TOPICS. (1-16 Credits)**

Selected topics for Honors College students.

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 399. SELECTED TOPICS. (1-16 Credits)**

Upper-division special topics for Honors College students.

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 402. INDEPENDENT STUDY. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 403. THESIS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 404. WRITING AND CONFERENCE. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 405. READING AND CONFERENCE. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 406. PROJECTS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 407. SEMINAR. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 18 credits.

**HC 408. WORKSHOP. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 409. PRACTICUM. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HC 499. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

This course is repeatable for 16 credits.

**HDFS 447H. *FAMILIES AND POVERTY. (4 Credits)**

Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)

**Attributes:** CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator

**Equivalent to:** HDFS 447

**HDFS 465H. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES. (3 Credits)**

Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HDFS 465

This course is repeatable for 18 credits.

**HDFS 499H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HDFS 499

This course is repeatable for 16 credits.

**HHS 231H. *LIFETIME FITNESS FOR HEALTH. (2 Credits)**

Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)

**Attributes:** CSFT – Core, Skills, Fitness; HNRS – Honors Course Designator

**Equivalent to:** HHS 231

**HORT 199H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HORT 199

This course is repeatable for 16 credits.

**HORT 299H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HORT 299

This course is repeatable for 16 credits.

**HORT 405H. READING AND CONFERENCE. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HORT 405

This course is repeatable for 16 credits.

**HORT 499H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** HORT 499

This course is repeatable for 16 credits.

**HST 105H. *WORLD HISTORY II: MIDDLE AND EARLY MODERN AGES. (3 Credits)**

A survey of the historical development of several world civilizations roughly from the 8th century to the late 18th century. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. (H) (Bacc Core Course)

**Attributes:** CSFT – Core, Skills; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core

**Equivalent to:** HST 105
HST 106H. *WORLD HISTORY III: THE MODERN AND CONTEMPORARY WORLD. (3 Credits)
A survey of the historical development of several world civilizations from the 18th century to the contemporary period. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 106

HST 201H. *HISTORY OF THE UNITED STATES. (4 Credits)
Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers pre-Columbian and colonial origins to 1820. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HST 201

HST 202H. *HISTORY OF THE UNITED STATES. (4 Credits)
Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1820 to 1920. HST 202H and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HST 202

HST 203H. *HISTORY OF THE UNITED STATES. (4 Credits)
Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1920 to present. HST 202H and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HST 203

HST 210H. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as PHL 210H, REL 210H. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: HST 210, PHL 210, PHL 210H, REL 210, REL 210H

HST 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HST 299
This course is repeatable for 16 credits.

HST 317H. *WHY WAR: A HISTORICAL PERSPECTIVE. (4 Credits)
An inquiry into the origins of mass violence. Theory and case studies are used to suggest possible causes of international war, civil war, revolution, and genocide. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 317

HST 324H. *ANCIENT JEWISH HISTORY. (4 Credits)
History of Judaism from the Second Temple through the early Rabbinic period (539 BCE–200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and Greco-Roman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as REL 324H.
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: HST 324, REL 324

HST 350H. *MODERN LATIN AMERICA. (4 Credits)
History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 350, REL 350

HST 365H. *THE CIVIL RIGHTS MOVEMENT IN THE MODERN U.S.. (4 Credits)
An exploration of the "long civil rights movement" among African Americans and their allies during the 20th century United States, with attention to the structure of racial inequality, movement philosophies and strategies, white allies and opponents, relationships to other freedom movements, and the movement's legacies. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: HST 365

HST 382H. *HISTORY OF AFRICA. (4 Credits)
History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Nineteenth and Twentieth century Africa. (H) (NC) (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 382

HST 385H. *THE ARAB-ISRAELI CONFLICT. (4 Credits)
Examination of the origins of the Arab-Israeli conflict and subsequent efforts to find a lasting solution. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 385
HST 386H. *MODERN IRAN: REVOLUTION AND ITS AFTERMATH. (4 Credits)
The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: HST 386

HST 390H. **MIDEAST WOMEN: IN THEIR OWN WORDS. (4 Credits)
The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: HST 390

HST 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
Attributes: HNRS – Honors Course Designator
Equivalent to: HST 399

HST 407H. *SEMINAR. (5 Credits)
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Equivalent to: HST 407

HST 415H. **SELECTED TOPICS. (4 Credits)
Selected topics of special or current interest not covered in other courses. (H)
Attributes: HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 415

HST 425H. *THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history, other episodes of mass murder in the 20th century. Not offered every year. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 425, REL 425

HST 430H. THE HISTORY OF SEXUALITY. (4 Credits)
The history of human sexuality from ancient Greece to the present. (H) (SS)
Attributes: HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 430

HST 465H. *AMERICAN DIPLOMATIC HISTORY. (4 Credits)
American diplomatic relations from 1898 to the present. HST 464/ HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 465

HST 499H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
Attributes: HNRS – Honors Course Designator
Equivalent to: HST 499

HSTS 415H. **THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY. (4 Credits)
Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. (H) (SS) (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 415

HSTS 419H. **STUDIES IN SCIENTIFIC CONTROVERSY: METHODS AND PRACTICES. (4 Credits)
Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries. (H) (SS) (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 419

KIN 399H. SPECIAL TOPICS. (1-3 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: *KIN 399

KIN 400H. *HISTORY OF PSYCHOTHERAPY. (4 Credits)
The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HSTS 440

MB 230H. *INTRODUCTORY MICROBIOLOGY. (4 Credits)
Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: MB 230

MB 299H. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 299

ME 299H. SPECIAL STUDIES. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 299

This course is repeatable for 16 credits.
ME 311H. INTRODUCTION TO THERMAL-FLUID SCIENCES. (4 Credits)
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as NSE 311H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENG 112 with C or better or ENGR 112H with C or better) and (MTH 254 with C or better or MTH 254H with C or better)
Equivalent to: ENGR 112, ENGR 112H, ME 311, NSE 311, NSE 311H

ME 312H. THERMODYNAMICS. (4 Credits)
Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as NSE 312H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (ENGR 212 with C or better or ENGR 212H with C or better)
Equivalent to: ME 312, NSE 312, NSE 312H

ME 317H. INTERMEDIATE DYNAMICS. (4 Credits)
Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((ENG 212 with C or better or ENGR 212H with C or better) and (MTH 256 with C or better or MTH 256H with C or better))
Equivalent to: ME 317

ME 331H. INTRODUCTORY FLUID MECHANICS. (4 Credits)
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as NSE 331H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 254 with C or better or MTH 254H with C or better) and (ENG 212 with C or better or ENGR 212H with C or better)
Equivalent to: ME 331, NSE 331, NSE 331H

ME 332H. HEAT TRANSFER. (4 Credits)
A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as NSE 332H.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((MTH 256 with C or better or MTH 256H with C or better) and (MTH 256 with C or better or MTH 256H with C or better))
Equivalent to: ME 332, NSE 332, NSE 332H

ME 337H. MECHANICAL ENGINEERING METHODS. (3 Credits)
Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENG 112 with C or better or ENGR 112H with C or better) and (MTH 256 with C or better or MTH 256H with C or better)
Equivalent to: ME 373

ME 382H. INTRODUCTION TO DESIGN. (4 Credits)
Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: ENGR 248 with C or better and ME 250 (may be taken concurrently) [C]
Equivalent to: ME 382

ME 383H. MECHANICAL COMPONENT DESIGN. (4 Credits)
Failure analysis and design of machine components. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: ME 316 with C or better and ME 250 (may be taken concurrently) [C]
Equivalent to: ME 383

ME 405H. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 9 credits.
Equivalent to: ME 405

ME 422H. MECHANICAL VIBRATIONS. (4 Credits)
Dynamic response of single and multiple degree-of-freedom systems.
Attributes: HNRS – Honors Course Designator
Prerequisites: ME 317 with C or better or ME 317H with C or better
Equivalent to: ME 422

ME 430H. SYSTEMS DYNAMICS AND CONTROL. (4 Credits)
Attributes: HNRS – Honors Course Designator
Prerequisites: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 with C or (ENGR 212H [C])))
Equivalent to: ECE 451, ME 430

ME 452H. THERMAL AND FLUIDS SCIENCES LABORATORY. (4 Credits)
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 with C or (ENGR 212H [C])))
Equivalent to: ME 452

ME 499H. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.
Attributes: HNRS – Honors Course Designator

MIME 101H. INTRODUCTION TO MIME. (3 Credits)
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: MIME 101
MTH 251H. *DIFFERENTIAL CALCULUS. (4 Credits)
Differential calculus for engineers and scientists. Rates of change: the
derivative, velocity, and acceleration. The algebraic rules of differential
calculus and derivatives of polynomial, rational, and trigonometric
functions. Maximum-minimum problems, curve sketching, and other
applications. Antiderivatives and simple motion problems. Lec/rec. All
courses used to satisfy MTH prerequisites must be completed with C- or
better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math; HNRS – Honors Course Designator
Prerequisites: MTH 112 with C- or better or MTH 150X with C- or better or
Math Placement Test with a score of 33 or Math Placement - ALEKS with
a score of 075
Equivalent to: MTH 251

MTH 252H. INTEGRAL CALCULUS. (4 Credits)
Definite integrals, elementary applications to area, force, and work.
Integral tables and basic techniques of integration, calculus of
logarithmic and exponential functions, polar coordinates, applications to
areas, volumes, force, work, and growth and decay problems. All courses
used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252

MTH 254H. VECTOR CALCULUS I. (4 Credits)
Vectors, vector functions, and curves in two and three dimensions.
Surfaces, partial derivatives, gradients, and directional derivatives.
Multiple integrals in rectangular, polar, cylindrical, and spherical
coordinates. Physical and geometric applications. Lec/rec. All courses
used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254

MTH 255H. VECTOR CALCULUS II. (4 Credits)
Brief review of vector functions, space curves, gradients, and directional
derivatives. Introduction to vector analysis: vector fields, divergence, curl,
line integrals, surface integrals, conservative fields, and the theorems of
Gauss and Stokes with applications to force, work, mass, and charge. All
courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255

MTH 256H. APPLIED DIFFERENTIAL EQUATIONS. (4 Credits)
First order linear and nonlinear equations, and second order linear
equations. Applications to electric circuits and mechanical oscillators.
Introduction to the Laplace transform and higher order equations.
Solution methods and applications appropriate for science and
engineering. (Familiarity with complex numbers and Euler’s identities is
highly desirable.) All courses used to satisfy MTH prerequisites must be
completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256

MTH 306H. MATRIX AND POWER SERIES METHODS. (4 Credits)
Introduction to matrix algebra, determinants, systematic solution to linear
systems, and eigenvalue problems. Convergence and divergence of series
with emphasis on power series, Taylor series expansions, convergence
tests for power series, and error estimates for truncated series used
in practical approximations. Lec/rec. All courses used to satisfy MTH
prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306

MTH 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

MUS 101H. *MUSIC APPRECIATION I: SURVEY. (3 Credits)
Dealing primarily with the Western classical tradition, the course focuses
on developing perceptive listening skills through the study of musical
forms and styles. For non-majors. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 101

MUS 102H. *MUSIC APPRECIATION II: PERIODS AND GENRES. (3 Credits)
A study of the masterworks of a single era (such as Baroque, classic,
romantic, twentieth century) or a genre (such as orchestra, chamber,
opera, musical theatre). See Schedule of Classes for topic being offered.
For non-majors. Need not be taken in order. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 102

MUS 108H. *MUSIC CULTURES OF THE WORLD. (3 Credits)
Survey of the world’s music with attention to musical styles and cultural
contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America.
(See Schedule of Classes for subject being offered.) For non-majors. (NC)
(Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: MUS 108

NR 499H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

NSE 311H. INTRODUCTION TO THERMAL-FLUID SCIENCES. (4 Credits)
Basic concepts of fluid mechanics, thermodynamics and heat transfer
are introduced. Conservation of mass, energy, moment and the second
law of thermodynamics are included. CROSSLISTED as ME 311H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better)
and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 311H, NSE 311
**NSE 312H. THERMODYNAMICS. (4 Credits)**

Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312H.

**Attributes:** HNRS – Honors Course Designator

**Prerequisites:** (NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better or ME 311 with C or better or ME 311H with C or better) and (MTH 256 [C] or MTH 256H [C])

**Equivalent to:** ME 312, ME 312H, NSE 312

**NSE 331H. INTRODUCTORY FLUID MECHANICS. (4 Credits)**

Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331H.

**Attributes:** HNRS – Honors Course Designator

**Prerequisites:** (MTH 254 with C or better or MTH 254H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 212 [C] or ENGR 212H [C] and (ENGRI 311 [C] or ENGRI 311H [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])

**Equivalent to:** ME 331, ME 331H, NSE 331

**NSE 332H. HEAT TRANSFER. (4 Credits)**

A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332H.

**Attributes:** HNRS – Honors Course Designator

**Prerequisites:** (MTH 256 with C or better or MTH 256H with C or better) and (MTH 255 [C] or MTH 255H [C]) and (ENGR 212 [C] or ENGR 212H [C] and (ENGRI 311 [C] or ENGRI 311H [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])

**Equivalent to:** ME 332, ME 332H, NSE 332

**OC 399H. SPECIAL TOPICS IN OCEANOGRAPHY. (1-4 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** OC 399

This course is repeatable for 16 credits.

**OC 407H. SEMINAR. (1-3 Credits)**

Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** OC 407

This course is repeatable for 12 credits.

**PAC 293H. INTERDISCIPLINARY YOGA. (1 Credit)**

Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PAC 293

This course is repeatable for 11 credits.

**PAC 325H. ALI: WILDERNESS FIRST AID. (1 Credit)**

Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PAC 325

This course is repeatable for 11 credits.

**PAX 415H. TOPICS IN PEACE STUDIES. (1-16 Credits)**

Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PAC 415

This course is repeatable for 16 credits.

**PBG 199H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PBG 199

This course is repeatable for 16 credits.

**PBG 299H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PBG 299

This course is repeatable for 16 credits.

**PBG 405H. READING AND CONFERENCE. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PBG 405

This course is repeatable for 16 credits.

**PBG 499H. SPECIAL TOPICS. (1-16 Credits)**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PBG 499

This course is repeatable for 16 credits.

**PH 104H. *DESCRIPTIVE ASTRONOMY. (4 Credits)**

Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)

**Attributes:** CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator

**Equivalent to:** PH 104

This course is repeatable for 16 credits.

**PH 221H. RECITATION FOR PHYSICS 211. (1 Credit)**

One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PH 221

This course is repeatable for 11 credits.

**PH 222H. RECITATION FOR PHYSICS 212. (1 Credit)**

One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PH 222

This course is repeatable for 11 credits.

**PH 223H. RECITATION FOR PHYSICS 213. (1 Credit)**

One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** PH 223
PHL 313H. *ENERGY ALTERNATIVES. (3 Credits)
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: PHL 313

PHL 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
Attributes: HNRS – Honors Course Designator
Equivalent to: PHL 399

PHL 407H. SEMINAR. (1-16 Credits)
Departmental seminars or colloquium.
Attributes: HNRS – Honors Course Designator
Equivalent to: PHL 407

PHL 160H. *QUESTS FOR MEANING: WORLD RELIGIONS. (4 Credits)
A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as REL 160.
Attributes: CPWD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 160, REL 160, REL 160H

PHL 205H. *ETHICS. (4 Credits)
Introduction to ethical theory and to the evaluation of ethical issues in society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. Lec/rec. (H) (Bacc Core Course)
Attributes: CPWD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 205

PHL 210H. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210H, REL 210H. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: HST 210, HST 210H, PHL 210, REL 210, REL 210H

PHL 251H. *KNOWERS, KNOWING, AND THE KNOWN. (4 Credits)
An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: PHL 251

PHL 275H. *INTRODUCTION TO DISABILITY STUDIES. (4 Credits)
Introduces core concepts and themes in the multidisciplinary field of disability studies. Analyzes disability as a product of discriminatory, oppressive, and inaccessible built environments and societies. Explores disability pride, culture, and community as alternatives to medical and charity models of disability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: PHL 275

PHL 280H. *ETHICS OF DIVERSITY. (4 Credits)
Uses moral philosophy to examine difference-based discrimination and prejudice in the human community. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: PHL 280

PHL 295H. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, ENG 295H, WGS 295, WGS 295H.
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: ENG 295, ENG 295H, PHL 295, WGS 295, WGS 295H

PHL 306H. *PHILOSOPHY AND THE ARTS. (4 Credits)
Major philosophical theories about art and its meaning, from ancient to modern times. How philosophers have understood beauty, the imagination, art and knowledge, art and pleasure, art and emotion. Offered every other year. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 306

PHL 371H. *PHILOSOPHIES OF CHINA. (4 Credits)
A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course)
Attributes: CPWD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Non-Western Core
Equivalent to: PHL 371, REL 371

PHL 399H. SPECIAL TOPICS IN PHILOSOPHY. (1-4 Credits)
Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every term.
Attributes: HNRS – Honors Course Designator
Equivalent to: PHL 399

PHL 407H. *SEMINAR. (1-16 Credits)
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Equivalent to: PHL 407

PHL 430H. HISTORY OF BUDDHIST PHILOSOPHY. (4 Credits)
Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC)
Attributes: HNRS – Honors Course Designator; LACH – Liberal Arts Non-Western Core
Equivalent to: PHL 430, REL 430
PS 375H. *THE CIVIL RIGHTS MOVEMENT AND POLICIES. (4 Credits)
Political and social evolution of the civil rights movement, emphasizing events 1954-1965, and major contemporary civil rights politics and policies in the South and the nation. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: PS 375

PS 399H. CURRENT PROBLEMS IN POLITICS. (1-4 Credits)
Selected issues of recent American and international concern such as Vietnam, Central America, or similar topical issues. May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: PS 399
This course is repeatable for 16 credits.

PS 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PS 405
This course is repeatable for 16 credits.

PS 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PS 407
This course is repeatable for 16 credits.

PSY 360H. SOCIAL PSYCHOLOGY. (4 Credits)
The study of behavior and experience in a social context. Topics include person perception, attribution, attraction and love, attitudes and attitude change, aggression and social influence and group dynamics. Applications of social psychological principles to other fields, e.g., law, health care, etc. (SS)
Attributes: HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]
Equivalent to: PSY 360

PSY 399H. SPECIAL TOPICS. (1-6 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PSY 399
This course is repeatable for 6 credits.

PSY 499H. SPECIAL TOPICS. (1-16 Credits)
Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus.
Attributes: HNRS – Honors Course Designator
Equivalent to: PSY 499

QS 262H. *INTRODUCTION TO QUEER STUDIES. (3 Credits)
Centering itself on activism and scholarship, this course examines homophobia’s and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as WGSS 262H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 262, WGSS 262, WGSS 262H
REL 434H. *WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (NC) (Bacc Core Course) CROSSLISTED as PHL 443H.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 443, PHL 443H, REL 443

REL 444H. *BIO MEDICAL ETHICS. (4 Credits)
Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 444, PHL 444H, REL 444

RNG 299H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOC 312H. *SOCI OLOGY OF THE FAMILY. (4 Credits)
Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course)
Attributes: CPD – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
Equivalent to: SOC 312

SOC 399H. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses.
Attributes: HNRS – Honors Course Designator
Prerequisites: SOC 204 with D- or better or SOC 204H with D- or better
Equivalent to: SOC 399
This course is repeatable for 16 credits.

SOC 444H. INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION. (4 Credits)
Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects.
Attributes: HNRS – Honors Course Designator
Prerequisites: SOC 204 with C or better
Equivalent to: SOC 444

SOC 499H. SPECIAL TOPICS. (1-16 Credits)
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
Attributes: HNRS – Honors Course Designator
Equivalent to: SOC 499
This course is repeatable for 16 credits.
SOIL 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 199
This course is repeatable for 16 credits.

SOIL 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 299
This course is repeatable for 16 credits.

SOIL 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 405
This course is repeatable for 16 credits.

SOIL 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 405
This course is repeatable for 16 credits.

ST 351H. INTRODUCTION TO STATISTICAL METHODS. (4 Credits)
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: ST 351

TA 147H. *INTRODUCTION TO THE THEATRE. (3 Credits)
Origins, history, nature, elements, and style of theatre production; function of artists and craftpersons of the theatre. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACF – Liberal Arts Fine Arts Core
Equivalent to: TA 147

TA 250H. WORKSHOP. THEATRE ARTS. (1-3 Credits)
Practical experience in performance, technical theatre, or design. Maximum for 6 credits may be applied toward graduation.
Attributes: HNRS – Honors Course Designator
Equivalent to: TA 250
This course is repeatable for 6 credits.

TA 360H. *MULTICULTURAL AMERICAN THEATRE. (3 Credits)
Examines the rich panorama of multicultural-American theatre (e.g., African-American, gay and lesbian, Hispanic, Asian American). (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: TA 360

TA 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: TA 407
This course is repeatable for 16 credits.

TA 416H. TOPICS IN THEATRE ARTS. (3 Credits)
Lectures and explorations of theories, issues, methods, problems, and applications in theatre arts. Concentrated work in a variety of selected theatre topics. Offered as demand and staffing allow.
Attributes: HNRS – Honors Course Designator
Equivalent to: TA 416
This course is repeatable for 12 credits.

TOX 435H. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK. (3 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as BI 435H, FS 435H. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: TOX 435

WGSS 223H. *INTRODUCTION TO WOMEN, GENDER, AND SEXUALITY STUDIES. (3 Credits)
Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Equivalent to: WGSS 223

WGSS 230H. *WOMEN IN THE MOVIES. (3 Credits)
Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 230

WGSS 235H. *WOMEN IN WORLD CINEMA. (3 Credits)
Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: WGSS 235

WGSS 240H. *GENDER AND SPORT. (3 Credits)
Focuses on sport as a gendered institution. Drawing from cultural, psychosocial, and political perspectives, the course examines intersections of gender with age, sexual orientation, social class, gender identity, race and ethnicity and politics. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: WGSS 240

WGSS 262H. *INTRODUCTION TO QUEER STUDIES. (3 Credits)
Centering itself on activism and scholarship, this course examines homophobia’s and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as QS 262H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 262, QS 262H, WGSS 262

WGSS 280H. *WOMEN WORLDWIDE. (3 Credits)
Focuses on women’s experiences throughout the world and examines women’s issues and status cross-culturally. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: WGSS 280
WGSS 295H. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, ENG 295H, PHL 295, PHL 295H.
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: ENG 295, ENG 295H, PHL 295, PHL 295H, WGSS 295

WGSS 325H. *DISNEY: GENDER, RACE, EMPIRE. (3 Credits)
Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 325

WGSS 340H. *GENDER AND SCIENCE. (3 Credits)
Analyzes the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. (SS) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Equivalent to: WGSS 340

WGSS 360H. *MEN AND MASCULINITIES. (3 Credits)
Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written and creative work. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: WGSS 360

WGSS 364H. *TRANSGENDER POLITICS. (3 Credits)
Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as QS 364H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 364, QS 364H, WGSS 364

WGSS 399H. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES. (1-6 Credits)
Current topics in women, gender, and sexuality. May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: WGSS 399
This course is repeatable for 12 credits.

WGSS 400H. *GENDER AND TRANSNATIONAL ACTIVISMS. (3 Credits)
Focuses on social constructions of gender in global context. It explores the comparative realities of various gendered struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminist activism. (NC) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Prerequisites: WS 223 with D- or better or WS 223H with D- or better or WS 224 with D- or better or WGSS 223 with D- or better or WGSS 224 with D- or better
Equivalent to: WGSS 480

WGSS 495H. *GLOBAL FEMINIST THEOLOGIES. (3 Credits)
Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: WGSS 495

WGSS 496H. *FEMINIST THEOLOGIES IN THE UNITED STATES. (4 Credits)
Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 496

WLC 221H. *MASTERPIECES OF GERMAN CINEMA. (3 Credits)
An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: WLC 221

WLC 230H. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS. (3 Credits)
An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France’s European vocation, and social conflict today. Conducted in English. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: WLC 230

WLC 231H. *GERMAN DICTATORSHIPS: NAZIS AND COMMUNISTS. (3 Credits)
Introduction to the two best-known dictatorships in German society, National Socialism of the Third Reich from 1933-1945 and Socialism in the German Democratic Republic from 1949-1989 via the study of visual media (feature films, documentaries, newsreels, etc.) and other primary and secondary sources. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
WLC 261H. *MASTERPIECES GERMAN CINEMA. (3 Credits)
An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: WLC 261

WLC 320H. *FRANCOPHONE CULTURES IN FILM. (3-9 Credits)
An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students’ analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course)
Attributes: CP CD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: WLC 320
This course is repeatable for 9 credits.

WLC 429H. *FRENCH SOCIETY THROUGH ITS CINEMA. (3 Credits)
An examination of French society through its own cinema. Via the screening and study of films from the various periods of French history, students will delve into the heart of French society and will discover the socio-historical, political, economic and cultural context. (Bacc Core Course)
Attributes: CP WC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: WLC 429

WLC 499H. SPECIAL TOPICS. (1-16 Credits)
Submitted thesis
Attributes: HNRS – Honors Course Designator
Equivalent to: WR 399
This course is repeatable for 16 credits.

WR 362H. *SCIENCE WRITING. (3 Credits)
Students learn and practice the conventions for writing scientific material for a variety of audiences. Involves writing and research assignments, multimedia presentations, lecture, and in-class and online activities. (Baccalaureate Core Course)
Attributes: CSW 2 – Core, Skills, WR II; HNRS – Honors Course Designator
Prerequisites: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Equivalent to: WR 362

WSE 470H. *FORESTS, WOOD, AND CIVILIZATION. (3 Credits)
Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: WSE 470

Honors Associate Undergraduate Major (HBA, HBFA, HBS)
The honors degree is jointly awarded by the Honors College and by the college of the student’s major. Therefore additional credit requirements beyond the total required by the colleges of the student’s major must be completed. HC students must satisfy all university and major requirements, as well as honors requirements. A student who completes a 15-credit track will be designated as an Honors Associate. Successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote HC course work. Interested students please contact the Honors College at 541-737-6400 or email honors.college@oregonstate.edu.

The requirements for the Honors Associate track include:

- Honors colloquia (minimum 6 credits)
- Honors electives (minimum 6 credits)
- Thesis/Research/Projects (minimum 3 credits)
- At least 12 honors credits must be upper division.
- Submitted thesis
- Total credits required for graduation is 180.

Major Code: 012

Honors Scholar Undergraduate Major (HBA, HBFA, HBS)
The honors degree is jointly awarded by the Honors College and by the college of the student’s major. Therefore additional credit requirements beyond the total required by the colleges of the student’s major must be completed. HC students must satisfy all university and major requirements, as well as honors requirements. A student who completes a 30-credit track of Honors College courses will be designated an Honors Scholar. Successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote HC course work. Interested students please contact the Honors College at 541-737-6400 or email honors.college@oregonstate.edu.

The requirements for the Honors Scholar track include:

- Honors baccalaureate core courses (minimum 6 credits)
- Honors colloquia (minimum 6 credits)
- Honors electives (minimum 12 credits)
- Thesis/Research/Projects (minimum 6 credits)
- At least 12 honors credits must be upper division.
- Submitted thesis
- Total credits required for graduation is 180.

Major Code: 011
COURSE DESCRIPTIONS

A

- Academic Learning Services (ALS) (p. 1201)
- Accounting (ACTG) (p. 1204)
- Adult Ed & Higher Ed Leadership (AHE) (p. 1207)
- Aeronautical & Astronaut. Eng. (AAE) (p. 1210)
- Aerospace Studies (AS) (p. 1211)
- Agricultural Education (AED) (p. 1213)
- Agricultural Sci, College of (AGRI) (p. 1214)
- Agriculture-General (AG) (p. 1215)
- American Sign Language (ASL) (p. 1217)
- American Studies Program (AMS) (p. 1218)
- Animal Sciences (ANS) (p. 1219)
- Anthropology (ANTH) (p. 1224)
- Applied Economics (AEC) (p. 1236)
- Applied Journalism (AJ) (p. 1242)
- Arabic (ARAB) (p. 1243)
- Art (ART) (p. 1244)
- Asian Languages and Culture (ASN) (p. 1251)
- Atmospheric Sciences (ATS) (p. 1252)

B

- Baccalaureate Core Courses (p. 1188)
- Biochemistry and Biophysics (BB) (p. 1255)
- BioHealth Sciences (BHS) (p. 1259)
- Biological & Ecological Engr (BEE) (p. 1260)
- Biological Engineering (BIOE) (p. 1263)
- Biology (BI) (p. 1265)
- Bioresource Research (BRR) (p. 1271)
- Botany and Plant Pathology (BOT) (p. 1272)
- Business Administration (BA) (p. 1276)

C

- Chem, Bio, Enviro Engineering (CBEE) (p. 1288)
- Chemical Engineering (CHE) (p. 1290)
- Chemistry (CH) (p. 1293)
- Chinese (CHN) (p. 1301)
- Civil and Construction Engr (CCE) (p. 1302)
- Civil Engineering (CE) (p. 1304)
- College Student Services Admin (CSSA) (p. 1311)
- Communication (COMM) (p. 1312)
- Computer Science (CS) (p. 1318)
- Construction Engineering Mngmt (CEM) (p. 1325)
- Counseling (COUN) (p. 1327)
- Crop & Soil Science (CSS) (p. 1331)
- Crop Science (CROP) (p. 1332)

D

- Design (DSGN) (p. 1335)
- Design and Human Environment (DHE) (p. 1338)

E

- Economics (ECON) (p. 1342)
- Education (ED) (p. 1346)
- Electrical & Computer Engineer (ECE) (p. 1353)
- Energy Systems Engineering (ESE) (p. 1359)
- Engineering Science (ENGR) (p. 1360)
- English (ENG) (p. 1363)

## Baccalaureate Core Courses

The Baccalaureate Core (Bacc Core) Curriculum represents what the OSU faculty believes is the foundation for students’ further understanding of the modern world. Informed by natural and social sciences, arts, and humanities, the Bacc Core requires students to think critically and creatively, and to synthesize ideas and information when evaluating major societal issues. Importantly, the Bacc Core promotes understanding of interrelationships among disciplines in order to increase students’ capacities as ethical citizens of an ever-changing world.

No single course may be used by a student to satisfy more than one subject area of the Core even though some courses have been approved in more than one area. See AR 25 (a) (5).

### Skill Courses (15)

To support students’ success in all courses, the following first-year Skills courses are to be taken and completed satisfactorily within the first 45 hours of OSU-generated credits:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Writing I</td>
<td>3</td>
</tr>
<tr>
<td>WR 121</td>
<td>ENGLISH COMPOSITION (must earn at least C-)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Mathematics (approved list below)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Speech (approved list below)</td>
<td>3</td>
</tr>
</tbody>
</table>

To prepare for the upper-division Writing Intensive Course in the major, the following Skills course is to be taken and completed satisfactorily within the first 90 hours of OSU-generated credits:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Writing II (approved list below)</td>
<td>3</td>
</tr>
</tbody>
</table>

For transfer students with sophomore standing or above, Writing II and Speech must be completed within the first 45 hours of OSU-generated credits. These requirements apply to all students, whether full time or part time.

### Fitness (3)

Select HHS 231, plus a 1-credit course listed below or any PAC course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>LIFETIME FITNESS FOR HEALTH</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>LIFETIME FITNESS</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>LIFETIME FITNESS</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>MILITARY PHYSICAL CONDITIONING</td>
<td>1</td>
</tr>
</tbody>
</table>

### Mathematics (3)

<table>
<thead>
<tr>

### Perspectives Courses (24)

No more than two courses (or lecture/lab combinations) from any one department may be used by a student to satisfy the Perspectives category of the core. GEO courses listed under Physical Science are considered to be from a different department than GEO courses listed under any other Perspective category. Choose one Biological Science lecture/lab combination, one Cultural Diversity, one Literature and the Arts, one Physical Science lecture/lab combination, one Social Processes
and Institutions, one Western Culture, plus one additional lecture/lab combination from either Physical Science or Biological Science.

**Biological Science (Lecture/Lab) (4 or 8)**

ACADEMIC LEARNING SERVICES (ALS)

ALS 102. COLLEGE READING. (3 Credits)
Provides students with specific strategies for learning through reading. The primary focus of the course is to prepare students to function successfully in subsequent university course work. Emphasis is placed on the demonstration and practice of a study-reading process.

ALS 107. CAMP ORIENTATION. (1-3 Credits)
Assists students of migrant worker background to develop successful skills adaptive to the culture of higher education.

ALS 108. ONLINE LEARNING SUCCESS. (2 Credits)
A comprehensive orientation for distance learners. The course will address topics such as success strategies for online learning, Ecampus resources, how to engage in the campus community, time management, OSU library resources, academic integrity and more. Graded P/N.

ALS 109. TRIO-SSS FIRST-YEAR STUDENT SUCCESS. (2 Credits)
For TRIO-SSS students. Designed to ease their transition to college by providing technological and academic skills, as well as knowledge of resources and the information necessary to be successful students and productive citizens. Students will also learn the importance of self-reliance and the skills necessary to be self-sufficient.

ALS 114. CAREER DECISION MAKING. (2 Credits)
Students will become knowledgeable about the world of work and career development theories using career assessment, literature, media, and computer resources. Lec/rec.

ALS 116. ACADEMIC SUCCESS. (2 Credits)
Assessment and development of strategies for succeeding in university-level academics. Topics include time management, goal setting, critical thinking, note taking, and study skills. Graded P/N.

ALS 140. INTRODUCTION TO UNIVERSITY READING AND WRITING. (3 Credits)
Students will strengthen their ability to comprehend and analyze a variety of texts. They will also improve the unity and coherence of their writing as well as develop techniques for writing in an academic setting. Students will focus on strategic reading and content analysis; comparing and contrasting ideas; considering different points of view; and linking cause and effect relationships. In addition, students will be introduced to concepts regarding academic accountability and using outside sources in their writing.

Corequisites: ALS 181

ALS 141. INTRODUCTION TO UNIVERSITY LISTENING AND SPEAKING. (3 Credits)
Students will improve their ability to understand main ideas, important details, and implied meanings of authentic academic speech. They will listen to audio and video lectures, participate in in-class discussions, improve their note-taking skills, and conduct basic research that they will present in formal and informal in-class presentations.

Corequisites: ALS 181

ALS 143. INTO OSU BUSINESS GRADUATE STUDENT SUCCESS. (2 Credits)
Successfully completing graduate level studies in the United State presents challenges to a student on many levels, including personal, social, academic and language skills. This course provides MBA Graduate Pathway students with cultural and business-specific support to supplement the Pathway program's content and language-focused courses. In addition, it supports students in developing essential culturally specific soft skills while working towards progression from the Pathway to full MBA graduate admission. Graded P/N.

ALS 145. INTO OSU STEM GRADUATE STUDENT SUCCESS. (2 Credits)
Successfully completing graduate level studies in the United State presents challenges to a student on many levels, including personal, social, academic and language skills. This course provides STEM field Graduate Pathway students with cultural and STEM-specific support to supplement the Pathway program's content and language-focused courses. In addition, it supports students in developing essential culturally specific soft skills while working towards progression from the Pathway to full graduate admission in their respective graduate programs.

ALS 150. INTO OSU ACADEMIC READING AND WRITING 5. (3 Credits)
Designed to provide international and/or immigrant students substantive practice in reading and writing English at the advanced level. Students are expected to read, understand and discuss a variety of academic readings from the natural and physical sciences, the social sciences, the humanities and literature. Students will work on reading skills; vocabulary acquisition; library and research skills; paraphrasing and summarizing; and the organization, style and development of essays.

ALS 151. INTO OSU ACADEMIC LISTENING AND SPEAKING 5. (3 Credits)
Skill building to develop and improve comprehension and note-taking of lectures in an academic format. Students required to give individual and group presentations including informational, argumentative, and persuasive presentations. Instruction is given in cross-cultural communications styles, non-verbal communication, questioning techniques, and clarifying information.

ALS 161. INTO OSU ACADEMIC LISTENING AND SPEAKING 6. (3 Credits)
Skill building to develop and improve comprehension and note-taking of lectures in an academic format. Students required to give individual and group presentations. Instruction is given in cross-cultural communication styles, non-verbal communication, questioning techniques, and clarifying information.

Prerequisites: ALS 150 with D- or better and ALS 151 [D-] or (ALS 150 [D-] and ALS 151 [D-])

ALS 162. INTO OSU READING AND WRITING IN ACADEMIC CONTENT AREAS. (3 Credits)
Provides advanced practice in reading and writing with academic texts and is designed to help students move into college work. Assignments include extensive information searches, writing bibliographies, critiques of articles/readings, practice with essay exams, and a short research paper.

Prerequisites: ALS 150 with D- or better and ALS 151 [D-] or (ALS 150 [D-] and ALS 151 [D-])
ALS 165. INTO OSU ACADEMIC STEM LISTENING AND SPEAKING. (3 Credits)
Helps students develop comprehension of university-level academic material, engage in classroom discussions, and make academic presentations. Comprehension topics include note-taking skills and understanding organizational structures and signals used by university academic lecturers and discussions in STEM-related fields. Presentation skill development activities prepare students for COMM 111 and COMM 218, focusing on incorporating outside research from library sources (such as academic journals, newspapers, magazines, and textbooks) and working together with other students. Emphasis on group participation, equal sharing of group projects, self-evaluation, and critiques of the presentation styles of peers and lecturers.

ALS 166. INTO OSU ACADEMIC STEM READING AND WRITING. (3 Credits)
Emphasizes reading and writing skills required for graduate-level STEM majors at the university, focusing on a wide range of reading skills and strategies that include critically analyzing academic journal articles, synthesizing ideas, vocabulary expansion, and vocabulary acquisition skills. Reading and vocabulary study are centered on a range of STEM fields and student interests. Written work focuses on writing critical reactions to readings through synthesizing multiple sources and developing coherent arguments. Students develop skills of summarizing, paraphrasing, utilizing appropriate grammar, customizing their writing style to their audience, and increasing familiarity with library and online resources.

ALS 173. INTO OSU ADVANCED BUSINESS LISTENING AND SPEAKING. (3 Credits)
Focuses on developing comprehension of graduate-level business material and the ability to critically think and engage in classroom discussions, as well as making academic presentations. Comprehension topics include note-taking skills, organizational structures, and interpersonal communication cues used by business professionals. Communication and presentation skill development prepare students for the demands of BA 512, which focuses on comprehending lectures and analyzing content. Focuses on group participation, equal sharing of group projects, self-evaluation, opinion giving, and presentation styles. Students also will work on incorporating outside research from library sources, such as academic journals, newspapers, magazines, and textbooks.

ALS 174. INTO OSU ADVANCED BUSINESS READING AND WRITING. (3 Credits)
Emphasizes development of reading, writing and critical thinking skills needed for progression into the MBA program. Written work focuses on writing critical reactions to readings, summarizing, paraphrasing and synthesizing information and increasing familiarization with library and online resources. Additionally, the course gives attention to a range of reading skills and strategies, including vocabulary expansion and vocabulary acquisition skills. Students will develop business vocabulary and knowledge of key business concepts by reading and analyzing real-world business case studies and writing case briefs.

ALS 176. INTO OSU ADVANCED STEM READING AND WRITING. (3 Credits)
Emphasizes reading, writing and critical thinking skills required for success in graduate STEM classes. Written work focuses on writing about in-class experiments that replicate real-world procedures in STEM fields. Develops summary skills, with an emphasis on technical report writing, and develops skills in writing about procedures and recommendations. Focuses on improving reading comprehension of authentic STEM texts found in reports, articles and published papers. Students will develop skills in using STEM-focused online databases. Finally, teamwork and revision are essential components of the course.

ALS 181. INTO OSU ESL BRIDGE. (2 Credits)
This course acts as a "bridge" for international students enrolled in specific OSU courses. It supports the understanding of OSU course assignments and vocabulary, and helps to build language skills needed to fulfill assignments. Classroom activities include, but are not limited to, discussions, in-class exercises, vocabulary games and exercises, and work in Canvas. Graded P/N. This course is repeatable for 8 credits.

ALS 190. BEST ORIENTATION. (1-5 Credits)
Focuses on study skills, time management and college success strategies specifically targeted to improve the academic performance of first-year student athletes at Oregon State University. Covers study strategies, time management, note taking, test preparation, critical reading, OSU's campus resources, and online learning platforms. Students practice these skills in an accompanying baccalaureate core class. Provides first-year student athletes with a summer introduction to college along with strategies for balancing athletics and academics at the Division I level. This course is repeatable for 5 credits.

ALS 199. SPECIAL TOPICS. (0-3 Credits)
May be graded A-F or P/N. Equivalent to: ALS 199H
This course is repeatable for 9 credits.

ALS 199H. SPECIAL TOPICS. (0-3 Credits)
Graded P/N. Attributes: HNRS – Honors Course Designator Equivalent to: ALS 199
This course is repeatable for 9 credits.

ALS 210. HOW TO BE SUCCESSFUL IN YOUR INTERNSHIP SEARCH. (2 Credits)
Internship preparation course designed to provide students with the fundamental tools to find and secure an internship. Topics will include internship search strategies, resumes, cover letters, and interviewing. Guest speakers will provide additional insight into these topics from the perspective of employers and students with prior internship experience. Reflection on student’s interests, values, and goals will also be integrated into the course.

ALS 277. SUPPLEMENTAL INSTRUCTION (SI) PEDAGOGY. (2 Credits)
Develops and strengthens your knowledge of collaborative and active learning and prepares you for a position as an SI Leader. Focuses on learning theories which inform our work; effective pedagogy for planning and leading study tables; and strategies for developing professional relationships with faculty, students, and coworkers. Through a variety of exercises including reading, reflection, observation, activity design, and facilitation, you will develop skills needed to succeed as a peer educator. Graded P/N.
ALS 295. LAST YEAR EXPERIENCE. (2 Credits)
An introduction and analysis of post-college skill sets including the study of personal finance, career search techniques, communication skills, self-exploration and organizational integration.

ALS 298. AVOIDING PLAGIARISM. (2 Credits)
Intellectual property is highly valued in the US. Violating intellectual property rights is considered to be a significant offense, especially in higher education. Successful university students must learn intellectual property and scholarly communication conventions, including definitions of plagiarism, its significance, and ways to avoid it. To guide students in conducting scholarly conversations, this course addresses formal expectations of academic communication, including proper source integration in academic writing and community expectations and ethics surrounding attribution. Effective integration and attribution of sources empowers students to become responsible and successful participants and contributors in academic conversations.

ALS 299. SPECIAL TOPICS. (1-3 Credits)
Graded P/N.
This course is repeatable for 9 credits.
ACCOUNTING (ACTG)

ACTG 317. EXTERNAL REPORTING I. (4 Credits)
Examines the theory and practice of financial accounting, the processing and controls phases of the accounting system, and reporting to external parties. Emphasis is placed on the accounting cycle and financial statement structure and content. The emphasis on the accounting cycle includes the processing and tracing of transaction data from source documents to financial statements.
Prerequisites: BA 211 with C or better and BA 213 [C]

ACTG 318. EXTERNAL REPORTING II. (4 Credits)
Continuation from ACTG 317 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.
Prerequisites: ACTG 317 with C or better

ACTG 319. EXTERNAL REPORTING III. (4 Credits)
Continuation from ACTG 318 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.
Prerequisites: ACTG 318 with C or better

ACTG 321. COST MANAGEMENT I. (4 Credits)
Reinforces and builds on the language and concepts of management accounting. Emphasizes different models for product costing and examines their effects on profit planning, budgeting, motivation, and control.
Prerequisites: ACTG 317 with C or better

ACTG 326. ACCOUNTING RESEARCH METHODS AND TOPICS. (2 Credits)
Covers the theory of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level, as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level, it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisites: (BA 211 with C or better or BA 211H with C or better) and (BA 213 [C] or BA 213H [C])

ACTG 378. ACCOUNTING INFORMATION MANAGEMENT. (4 Credits)
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/ rec.
Prerequisites: (BA 213 with C or better or BI 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 276 [C])
Equivalent to: ACTG 378H

ACTG 378H. ACCOUNTING INFORMATION MANAGEMENT. (4 Credits)
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/ rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 276 [C])
Equivalent to: ACTG 378

ACTG 379. ACCOUNTING ANALYTICS. (4 Credits)
Covers the analysis of data as it pertains to accounting professionals. The focus includes analytic techniques for decision making and the examination of “big data” involving accounting information. Hands-on experiences will develop skills with select software tools used in data analytics for accounting professionals.
Prerequisites: ACTG 318 with C or better and ACTG 378 [C]

ACTG 414. FORENSIC ACCOUNTING. (2 Credits)
Explores the forensic accountant’s role in today’s economy. Topics covered include fraud detection and fraud investigation techniques, valuation of closely held businesses, lost profits analyses, and various types of litigation support services. Fundamental legal concepts governing expert witness testimony are also examined, and students are required to quantify economic damages in cases.
Prerequisites: ACTG 319 with C or better

ACTG 415. GOVERNMENTAL AND NOT-FOR-PROFIT. (2 Credits)
Introduction to accounting and financial reporting for governmental and not-for-profit organizations. Topics include state, local and federal governmental accounting, including fund accounting and reporting, and accounting for not-for-profit hospitals, universities, and health/welfare organizations.
Prerequisites: ACTG 319 with C or better

ACTG 416. ACCOUNTING RESEARCH AND ANALYSIS. (2 Credits)
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisites: ACTG 319 with C or better

ACTG 417. ADVANCED ACCOUNTING. (4 Credits)
An advanced course in financial accounting theory. Covers corporate combinations, consolidated financial statements, and government and not-for-profit accounting.
Prerequisites: ACTG 319 with C or better

ACTG 418. ACCOUNTING CODES OF PROFESSIONAL CONDUCT AND ETHICAL BEHAVIOR. (2 Credits)
Explores ethical reasoning, integrity, objectivity, independence and other core values as defined by the American Institute of Certified Public Accountants.
Prerequisites: ACTG 319 with C or better
ACTG 419. MULTINATIONAL ACCOUNTING AND ANALYSIS. (2 Credits)
Examinines the managerial and financial accounting function from an international perspective. Focuses on the flow of information in multiple currencies and compliance with reporting requirements in the United States, Europe and Japan.
Prerequisites: ACTG 319 with C or better

ACTG 420. IT AUDITING. (4 Credits)
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.
Prerequisites: (ACTG 319 with C or better or BA 372 with C or better) and ACTG 378 [C]

ACTG 422. STRATEGIC COST MANAGEMENT. (4 Credits)
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.
Prerequisites: ACTG 319 with C or better and ACTG 321 [C] and BA 357 [C]

ACTG 424. INTRODUCTION TO TAXATION. (4 Credits)
Meets two major objectives. First, it is a technical introduction to U.S. income tax with emphasis on general and business related topics. Second, it provides a framework for students to launch further study in the tax area. Students will be encouraged to supplement text materials with readings from the Internal Revenue Code and Regulations as well as secondary tax research services.
Prerequisites: ACTG 319 with C or better

ACTG 425. ADVANCED TAXATION. (4 Credits)
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.
Prerequisites: ACTG 325 with C or better or ACTG 424 with C or better

ACTG 427. ASSURANCE AND ATTESTATION SERVICES. (4 Credits)
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.
Prerequisites: ACTG 319 with C or better

ACTG 428. ADVANCED AUDIT ANALYTICS. (4 Credits)
An advanced four-credit course covering audit theory, current audit practice and auditor professional skills. The equivalent of three credits (30 hours) relates to in-class activities, readings, presentations, research and group discussions of relevant advanced audit topics. The equivalent of one credit (10 hours) relates to understanding the use and future of data analytics in the audit profession. Theory, current audit practice and auditor professional skills.
Prerequisites: ACTG 427 with C or better

ACTG 429. TOPICS IN ACCOUNTING. (1-4 Credits)
Analysis of current topics in accounting. Topics will vary from term to term.

ACTG 516. ACCOUNTING RESEARCH AND ANALYSIS. (3 Credits)
Emphasis on financial accounting, tax and auditing research and analysis and communication of conclusions in the context of accounting case studies.

ACTG 517. ADVANCED ACCOUNTING. (4 Credits)
An advanced course in financial accounting theory. Corporate combinations, consolidated financial statements, foreign operations and subsidiaries, partnerships, and sole proprietorships; contemporary issues in financial accounting.
Equivalent to: BA 517

ACTG 518. ACCOUNTING THEORY AND PRACTICE I. (3 Credits)
Expands and integrates knowledge of US and international generally accepted accounting principles (GAAP) in a rigorous study of the design, selection, and consequences of various models of financial reporting.
Prerequisites: (ACTG 516 with C or better and ACTG 517 [C])

ACTG 519. ACCOUNTING THEORY AND PRACTICE II. (3 Credits)
Study of the design, selection, and consequences of various models of financial reporting. Research accounting treatments for complex facts and circumstances with ambiguous accounting guidance. Build on financial reporting models to develop in-depth understanding and application of accounting practice.
Prerequisites: ACTG 518 with C or better

ACTG 520. IT AUDITING. (4 Credits)
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.

ACTG 522. STRATEGIC COST MANAGEMENT. (4 Credits)
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.

ACTG 524. INTRODUCTION TO TAXATION. (4 Credits)
Meets two major objectives. First, it is a technical introduction to U.S. income tax with emphasis on general and business related topics. Second, it provides a framework for students to launch further study in the tax area. Students will be encouraged to supplement text materials with readings from the Internal Revenue Code and Regulations as well as secondary tax research services.
Prerequisites: BA 528 with C or better

ACTG 525. ADVANCED TAXATION. (4 Credits)
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.

ACTG 527. ASSURANCE AND ATTESTATION SERVICES. (4 Credits)
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.

ACTG 529. TOPICS IN ACCOUNTING. (1-4 Credits)
Analysis of current topics in accounting. Topics will vary from term to term.

ACTG 620. FOUNDATIONS OF ACCOUNTING RESEARCH. (3 Credits)
Introduces first-year doctoral students to accounting research by discussing the development of modern accounting theory, relating it to theories in economics and finance, and exposing students to the different areas of and methodologies used in accounting research. Also begins a survey of classic and contemporary literature in the area of financial accounting research. Specific financial accounting topics may change from quarter to quarter, but sample topics include earnings management, earnings quality, and voluntary disclosure.
ACTG 621. FINANCIAL ACCOUNTING RESEARCH. (3 Credits)
Surveys classic and contemporary research in the area of financial accounting. Specific topics may change from quarter to quarter, but sample topics include the value relevance of accounting information, post earnings announcement drift, the residual income model, analysts’ use accounting information, and market-based assessments of the usefulness and limitations of alternative accounting measurements and disclosures.

ACTG 622. ACCOUNTING, JUDGMENT AND ACCOUNTABILITY. (3 Credits)
Surveys classic and contemporary research in areas related to management, judgment, and accountability in accounting. Specific topics may change from quarter to quarter, but sample topics include research on management incentives and compensation, performance measurement, auditing, corporate governance, and research using behavioral methods.

ACTG 623. TAX RESEARCH. (3 Credits)
Surveys classic and contemporary research in the area of taxation. Specific topics may change from quarter to quarter, but sample topics include tax vs. nontax costs in business decisions, book-tax differences, taxes and financial reporting, multijurisdictional tax issues, and tax avoidance.
ADULT ED & HIGHER ED LEADERSHIP (AHE)

AHE 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 407. SEMINAR. (1-16 Credits)
Equivalent to: UEXP 407
This course is repeatable for 16 credits.

AHE 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 410. INTERNSHIP/WORK EXPERIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 501. RESEARCH. (1-16 Credits)
Equivalent to: CSSA 501
This course is repeatable for 16 credits.

AHE 502. INDEPENDENT STUDY. (1-16 Credits)
Equivalent to: CSSA 502
This course is repeatable for 16 credits.

AHE 503. THESIS. (1-16 Credits)
Equivalent to: CSSA 503
This course is repeatable for 999 credits.

AHE 505. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: CSSA 505
This course is repeatable for 16 credits.

AHE 506. PROJECTS. (1-16 Credits)
Equivalent to: CSSA 506
This course is repeatable for 16 credits.

AHE 507. SEMINAR. (1-5 Credits)
Equivalent to: CSSA 507
This course is repeatable for 16 credits.

AHE 508. WORKSHOP. (1-3 Credits)
Equivalent to: CSSA 508
This course is repeatable for 16 credits.

AHE 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 510. INTERNSHIP. (1-18 Credits)
By special permission and arrangement.
This course is repeatable for 18 credits.

AHE 517. EDUCATION AND WORK. (3 Credits)
Issues related to work in the U.S. and other countries. The role of public, private, corporate, government, military and other education and training programs in meeting changing individual, corporate, and social work-related needs.

AHE 520. MULTICULTURAL ISSUES IN HIGHER EDUCATION. (3 Credits)
Developing understanding, knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.
Equivalent to: CSSA 520

AHE 521. INSTRUCTIONAL TECHNOLOGY I. (1 Credit)
Explores technologies used in distance education to deliver content and facilitate active learning through learner creation of digital portfolios and artifacts using online tools and apps.

AHE 522. INSTRUCTIONAL TECHNOLOGY II. (1 Credit)
An overview of best practices in digital-age learning design, including implementation of backward design principles.
Prerequisites: AHE 522 with C or better

AHE 523. INSTRUCTIONAL TECHNOLOGY III. (1 Credit)
Students will develop the knowledge and skills needed to design and create complete online teachings/courses within a learning management system.
Prerequisites: (AHE 522 with C or better and AHE 523 [C])

AHE 525. INSTRUCTIONAL TECHNOLOGY IV. (1 Credit)
Learners will research and demonstrate how to use a current innovative instructional technology, as well as develop skills in understanding trends and preparing for future innovations in instructional technology.
Prerequisites: (AHE 522 with C or better and AHE 523 [C] and AHE 524 [C])

AHE 531. INSTRUCTIONAL DESIGN. (4 Credits)
Designed for instructors, trainers, managers, organizational consultants or others who are responsible for the development of programs and courses in community colleges, the workplace or other settings. Using systems concepts and methods, students will learn to design learner-centered instructional programs and courses.

AHE 532. PROGRAM EVALUATION. (4 Credits)
Assessing outcomes in college curriculum and workplace training programs from a systems perspective and evaluation of program effectiveness. Particular emphasis on formative and summative evaluation, frameworks for program evaluation, quantitative and qualitative methods and analysis, communicating and reporting evaluation findings, and the ethics and standards of evaluation practice.

AHE 533. NEEDS ASSESSMENT AND RESEARCH. (4 Credits)
Introduces workplace learning needs assessment (WLNA) and research principles and practices for individual and collaborative learning groups.
Prerequisites: AHE 553 with C or better

AHE 534. ORGANIZATIONS AND SYSTEMS THEORY. (4 Credits)
Introduces principles and practices underlying individual and collaborative work group learning. Participants will learn how to create an environment that promotes effective and efficient workplace learning.

AHE 547. INSTRUCTIONAL STRATEGIES FOR ADULT LEARNERS. (4 Credits)
Exploration of and practice using instructional strategies to enhance adult learning. Acquisition of an instructional strategy tool kit as well as a method for evaluating adult learning events.
This course is repeatable for 60 credits.
AHE 549. ETHICAL AND PROFESSIONAL ISSUES. (4 Credits)
Focuses on issues facing professionals working with adult learners as well as ethical issues relevant to the practice and scholarship in the field. Combines instruction in inquiry-based teaching methods and learning theory with work in professional settings, such as for-profit and non-profit organizations and government agencies.

AHE 553. ADULT LEARNING & DEVELOPMENT. (4 Credits)
Introduce participants to key theories, orientations, models, and principles of learning and development in adulthood.

AHE 557. LEADERSHIP DEVELOPMENT AND HUMAN RELATIONS. (4 Credits)
Exploration of multiple theories of leadership in different organizational contexts; synthesize theory with experience to construct a personal framework for leadership practice.

AHE 575. EDUCATIONAL FINANCE. (3 Credits)
Finance, budgeting and accounting for sources of revenue; deferral, state and local financing, budgeting and accounting models, practical experience combined with examination of theory, trends and issues. Focus in either public schools, community colleges or higher education through practical experience.

AHE 582. LEGAL ISSUES IN HIGHER EDUCATION. (3 Credits)
A comprehensive presentation and discussion of the law governing administration within community colleges and college/universities with a special emphasis on student services administration.

AHE 599. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: CSSA 599
This course is repeatable for 16 credits.

AHE 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

AHE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 609. PRACTICUM CLINICAL EXPERIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 610. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.

AHE 611. QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH I. (3 Credits)
Foundational course to methods and statistics used in quantitative educational research. Examines data analysis, statistical procedures, and interpretation of results within postsecondary environments.

AHE 612. RESEARCH PERSPECTIVES IN EDUCATION. (3 Credits)
Research perspectives, how they are influenced by worldviews, and how these worldviews influence research.

AHE 613. RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION. (3 Credits)
Critical analysis of scholarly studies in education from a variety of research perspectives.

AHE 614. ADVANCED RESEARCH METHODS IN EDUCATION. (1-3 Credits)
Selected topics in research methods as appropriate for research perspectives in education. May be repeated. This course is repeatable for 6 credits.

AHE 615. RESEARCH ISSUES. (3 Credits)
A core course in the College of Education's doctoral program that focuses on research issues. Prerequisites: AHE 612 with C or better and AHE 613 [C] and AHE 614 [C]

AHE 616. QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH II. (3 Credits)
Develop conceptual and practical understanding of research and evaluation in higher education. Course topics include basic statistics, survey design, data analysis, and assessment issues. As an advanced statistics course, students will have the opportunity to apply concepts and gain direct research experience by conducting an original research project. Prerequisites: AHE 611 with C or better

AHE 618. QUALITATIVE ANALYSIS IN EDUCATIONAL RESEARCH. (3 Credits)
Introduces learners to a variety of qualitative research perspectives and methodologies. Participants will examine these approaches by critiquing a scholarly article containing qualitative methods; formulating qualitative questions; writing a short proposal; collecting, coding, and analyzing data; and writing a final synthesis paper.

AHE 621. LEADERSHIP IN STUDENT SERVICES. (3 Credits)
Exploration of significant issues in design and delivery of student services in community college and higher education settings. Group discussion, model building, problem posing, issues analysis, and theory applications are employed. Students will reflect on current and future practices in student services, including emerging approaches to leadership.

AHE 638. HISTORY OF HIGHER EDUCATION. (3 Credits)
Surveys American higher education across 200-plus years of American history, with a specific emphasis in this section on the American community college.

AHE 640. HIGHER EDUCATION ADMINISTRATION. (3 Credits)
Current leadership and management theories and models, systems of organization, patterns of internal and external governance, and issues in institutional planning and advancement in higher education.

AHE 643. ORGANIZATION THEORY-HIGHER EDUCATION. (3 Credits)
An introduction to organizational theory (OT). The texts allow us to explore how systems thinking is applied to our world, and how we can use it to better understand the nature of human social engagement. Both OT and living systems theories are deeply associated with improvement and change theories in higher education settings and business.

AHE 645. ETHICAL PRACTICE. (3 Credits)
Reviews major ethical theories with an emphasis on practical applications related to community college professional practice.

AHE 653. INSTRUCTIONAL LEADER I. (3 Credits)
A core course in the College of Education's doctoral program. Introduces major theories, theorists, and theoretical principles that will assist the learner in the understanding and development of systemic frameworks for instructional leadership.
AHE 672. RESEARCH PERSPECTIVES IN FOUR-YEAR HIGHER EDUCATION. (3 Credits)
An overview of the extensive research related to four-year colleges and universities, with an emphasis on the role of research in understanding and interpreting the nature of higher education. Explore research epistemologies, theories, and approaches related to social science and higher education, and how these ideas influence worldview and subsequent research. Identify a significant research topic/problem statement which will carry forward into the second year research courses in moving toward the dissertation topic for research related to four-year higher education.

AHE 673. RESEARCH INTERPRETATION IN FOUR-YEAR HIGHER EDUCATION. (3 Credits)
Critical analysis and interpretation of journal articles and scholarly research related to a problem statement in four-year higher education organization, learning, and/or leadership. Refinement of Sections I (Research Focus and Problem Statement) and II (Manuscript and Literature Review) of a Dissertation Proposal in four-year higher education.
Prerequisites: AHE 672 with C or better

AHE 674. ADVANCED RESEARCH METHODS IN FOUR-YEAR HIGHER EDUCATION. (3 Credits)
Identification and evaluation of an appropriate quantitative or qualitative study focused on four-year higher education. This includes a requirement that students demonstrate the ability to analyze and interpret data associated with their research question(s) as identified in their research proposal and that they outline the methodology that will be used to answer their research question(s)/proposal.
Prerequisites: AHE 673 with C or better

AHE 675. FOUR-YEAR HIGHER EDUCATION RESEARCH ISSUES. (3 Credits)
Finalize a dissertation proposal related to a research question on four-year education institutions that reflects research epistemologies, theories and approaches. Develop a dissertation draft for review by the student’s dissertation committee outlining: (a) Purpose of the student’s study and its significance within the context of research on four-year colleges and universities, (b) Review of related literature on the specific topic of the dissertation, and (c) Design of the dissertation study.
Prerequisites: AHE 674 with C or better

AHE 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 805. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 808. WORKSHOP. (1-4 Credits)
This course is repeatable for 16 credits.
AERONAUTICAL & ASTRONAUT. ENG. (AAE)

AAE 210. INTRODUCTION TO AEROSPACE ENGINEERING. (3 Credits)
Topics will include the engineering fundamentals of aeronautics and astronautics, including an introduction to aerodynamics, propulsion, structures, orbital mechanics and mission planning. Current industry practices in aerospace vehicle specifications, manufacturing, flight testing and certification will be presented.
Prerequisites: ENGR 211 with C or better

AAE 412. SPACE SYSTEMS ENGINEERING. (4 Credits)
Introduction to space systems engineering. Topics will include the fundamentals of astronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized.
Prerequisites: (ME 317 with C or better or ME 317H with C or better) and (ME 373 [C] or ME 373H [C])

AAE 512. SPACE SYSTEMS ENGINEERING. (4 Credits)
Introduction to space systems engineering. Topics will include the fundamentals of astronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized.
AEROSPACE STUDIES (AS)

AS 111. FOUNDATIONS OF THE AIR FORCE PART I. (1 Credit)
The introduction to the Air Force mission and organization. Featured topics include Air Force dress and appearance stand standards; military customs and courtesies, Air Force heritage, overview of the Department of the Air Force, and Air Force core values. Basic oral and written communication will be assessed.

AS 112. FOUNDATIONS OF THE AIR FORCE PART II. (1 Credit)
Second part of the introduction to the Air Force mission and organization. Featured topics include Air Force career opportunities, Air Force benefits, military communication skills, Air Force installations, and look at the basic characteristics of war. Basic oral and written communication will be assessed.

AS 113. FOUNDATIONS OF THE AIR FORCE PART III. (1 Credit)
Third part of the introduction of what the Air Force is about and what the Air Force has to offer. Featured topics include basic leadership, team building, interpersonal skills, diversity in the Air Force, and the oath of office and commissioning. Basic oral and written communication will be assessed.

AS 120. LEADERSHIP LABORATORY. (1 Credit)
Cadets learn officerhood, leadership, drill and ceremony, and customs and courtesies. Lab. Graded P/N. This course is repeatable for 3 credits.

AS 211. THE EVOLUTION OF AIR AND SPACE POWER 1860-1945. (1 Credit)
Study of the development of air power, concepts, and doctrine from its beginnings to the end of World War II. Historical examples examined include balloons, dirigibles, Wright Brother’s first flight, and the role of air power in World War I and II. Oral and written communication skills will be assessed.

AS 212. THE EVOLUTION OF AIR AND SPACE POWER 1945-1990. (1 Credit)
Study of the development of air power, concepts, and doctrine during the Cold War. Historical examples examined include the Berlin Airlift, nuclear deterrence, and the role of air power employment in the Korean and Vietnam conflicts. Oral and written communication skills will be assessed.

AS 213. THE EVOLUTION OF AIR AND SPACE POWER 1991-2025. (1 Credit)
Study of the factors contributing to the development of air power, concepts, and doctrine from the Persian Gulf War in 1990 to the present and beyond. Historical examples examined include the air campaigns used in the Gulf War, Kosovo crisis, Operations Enduring Freedom, Iraqi Freedom, and the Global War on Terrorism. Oral and written communication skills will be assessed.

AS 220. LEADERSHIP LABORATORY. (1 Credit)
Cadets are placed in line and staff leadership positions as a preparation for Air Force active duty. Cadet responsibilities include planning, organizing, directing, and controlling the activities of the cadet corps. Lab. Graded P/N. This course is repeatable for 10 credits.

AS 299. SPECIAL TOPICS IN AIR FORCE STUDIES. (1-16 Credits)
Supervised individual work. This course is repeatable for 99 credits.

AS 304. FIELD TRAINING. (6 Credits)
Four-week field training supplements campus courses in developing leadership and discipline. Mission, organization, and functions of an Air Force base; marksmanship, survival, and physical training; aircrew and aircraft indoctrination; orientation on specific opportunities in career fields. Conducted at an Air Force base. Graded P/N.

AS 311. LEADERSHIP FUNDAMENTALS, TEAM BUILDING AND PROBLEM SOLVING. (3 Credits)
Emphasis on leadership and management fundamentals, team building and problem solving. Case studies are used to examine leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Unique exercises will be utilized to emphasize team building and problem solving. Oral and written communication skills will be assessed.

AS 312. EFFECTIVE SUPERVISION AND GROUP CONFLICT MANAGEMENT. (3 Credits)
Emphasis on situational leadership, group conflict management, effective supervision, professional knowledge, and communicative skills required of an Air Force officer. Unique case studies on leadership and management situations, and group conflict management will be utilized. Oral and written communication skills will be assessed.

AS 313. LEADERSHIP, ETHICS, AIR FORCE CORE VALUES AND ACCOUNTABILITY. (3 Credits)
Emphasis on leadership ethics, leadership core values, leadership accountability, and professional knowledge. Unique case studies on leadership ethics and accountability will be utilized. Oral and written communication skills will be assessed.

AS 320. LEADERSHIP LABORATORY. (1 Credit)
Cadets are placed in line and staff leadership positions as a preparation for Air Force active duty. Cadet responsibilities include planning, organizing, directing, and controlling the activities of the cadet corps. Lab. Graded P/N. This course is repeatable for 3 credits.

AS 405. READING AND CONFERENCE. (1-16 Credits)
Supervised individual work. This course is repeatable for 16 credits.

AS 411. NATIONAL SECURITY AFFAIRS. (3 Credits)
Emphasis on the needs for national security, evolution of American defense strategy, policy, and organization. Examination of methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues will also be addressed. Refinement of oral and written communication skills will be assessed.

AS 412. WORLD REGIONAL CULTURAL STUDIES. (3 Credits)
Study key transnational issues and religious or ethnic factors that shape the environment Air Force professionals must operate in. Emphasis will be on national security perspective of Africa, South Asia, East Asia, Latin America, Europe, Middle East and former Soviet Republics in transition. Refinement of oral and written communication skills will be assessed.

AS 413. PREPARATION FOR ACTIVE DUTY. (3 Credits)
Emphasis on current military issues, evaluation systems, military commission, and risk management. Final preparation for the Air Force professional before commissioning. Refinement of oral and written communication skills will be emphasized.
AS 420. LEADERSHIP LABORATORY. (1 Credit)
The senior-level Leadership Laboratory program places cadets in command, line, and staff positions as a preparation for commissioned Air Force service. Cadet responsibilities include planning, organizing, directing, coordinating, and controlling leadership laboratory and the activities of the cadet corps. Lab. Graded P/N. This course is repeatable for 6 credits.
Agricultural Education (AED)

AED 313. THEORY AND PRACTICUM III: FIELD. (4 Credits)
Field based experience for students preparing to be agricultural teachers. Focus on teaching models.

AED 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AED 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AED 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AED 503. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

AED 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AED 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AED 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AED 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AED 510. PROFESSIONAL INTERNSHIP: AGRICULTURE EDUCATION. (1-40 Credits)
A field experience in which the intern will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for 40 credits.

AED 518. EXTENSION COURSE IN TEACHER EDUCATION/PEDAGOGY. (1-3 Credits)
Enables present and prospective teachers of agriculture to continue their professional development on pedagogical topics of current importance. (This course is limited to 9 credits per term.) This course is repeatable for 50 credits.

AED 533. RURAL SURVEY METHODS. (3 Credits)
Technique; analyzing, interpreting, and using results of survey data; identifying and utilizing community resources; develop and organize agriculture programs to meet community needs.

AED 552. PROGRAM ORGANIZATION AND MANAGEMENT. (3 Credits)
Explores the foundations of vocational education, essential learning skills, advisory committees, and development of a vocational education philosophy. Students will study the elements of educational reform as they apply to specific service areas. Resource analysis, student organizations, and school-to-work transitions will also be studied.

AED 554. MICRO-TEACHING. (3 Credits)
Planning, presenting and evaluating lessons in a micro-teaching lab. It includes application of content pedagogy strategies, subject matter principles and media technology. Lessons presented on safety.

AED 555. LABORATORY PEDAGOGY. (3 Credits)
Applications of efficient planning, organizing, and teaching skills within the laboratory setting and utilization of laboratory facilities to optimize learning experiences. Laboratory facilities could include a shop, greenhouse, land laboratories/outdoors, agriscience labs, aquaculture, computer lab, field trips, etc.

AED 556. LINK RESEARCH, TEACHING, AND PRACTICE. (3 Credits)
Links research to teaching. Students will work with cooperating teachers to identify and apply research to teaching.

AED 557. ISSUES AND TRENDS IN CURRICULUM AND INSTRUCTION. (3 Credits)
Emphasizes trends related to subject matter curriculum issues unique to agricultural education at the secondary level.

AED 558. IMPROVING AGRICULTURAL SCIENCE AND TECHNOLOGY PROGRAMS. (3 Credits)
Provides impetus toward evaluation and improvement of local programs of agricultural science and technology (AST), such that they better reflect community, regional, and national needs.

AED 559. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AED 603. DISSERTATION. (1-16 Credits)
Students engage in research and writing related to the completion of their dissertation to fulfill the requirements of the College of Education PhD program. This course is repeatable for 999 credits.

AED 640. INSTRUMENTATION AND DATA COLLECTION IN SOCIAL SCIENCE. (3 Credits)
Addresses the selection, development, and analysis of various types of quantitative instruments and procedures for collecting research data. The course has a quantitative focus and is oriented toward social science research. Lec/lab.
AGRICULTURAL SCI, COLLEGE OF (AGRI)

AGRI 199. SPECIAL TOPICS. (1-3 Credits)
This course is repeatable for 8 credits.

AGRI 299. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 8 credits.

AGRI 399. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural science. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 8 credits.

AGRI 402. INDEPENDENT STUDIES. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

AGRI 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AGRI 411. *INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL. (3 Credits)
What is a food system, what does it look like, and how does it work? How do our food choices shape our world? Food systems, farm to plate, operate within social, political, economic, and natural environments, at multiple scales. This multidisciplinary course will introduce students to the complex topic of food systems, at different scales and from a variety of perspectives. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

AGRI 438. EXPLORING WORLD AGRICULTURE. (2 Credits)
Global practices of food production are highly diverse. However, there are also many common global issues related to agriculture, food, and natural resources. Speakers with international backgrounds and experiences will present material, as well as student teams who will research a topic of personal interest. In addition, opportunities for global study, internship, and research will be explored.

AGRI 499. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 8 credits.

AGRI 511. INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL. (3 Credits)
What is a food system, what does it look like, and how does it work? How do our food choices shape our world? Food systems, farm to plate, operate within social, political, economic, and natural environments, at multiple scales. This multidisciplinary course will introduce students to the complex topic of food systems, at different scales and from a variety of perspectives.

AGRI 520. INTRODUCTION TO ORGANIC FOOD PRODUCTION. (3 Credits)
History of organic farming, advantages and disadvantages, review of long-term studies comparing organic and conventional production systems, a review of the federal organic production guidelines, methods and applications for organic production facilities, crop nutrition, compost and manure utilization, organic amendments, organic field crop production, organic gardening, organic livestock production, weed and pest control in organic systems, and marketing of organic produce.

AGRI 599. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural science. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 8 credits.
AGRICULTURE-GENERAL (AG)

AG 111. INFORMATION TECHNOLOGY IN AGRICULTURE. (3 Credits)
Using information technology in agriculture and agribusiness; practical experience with computer programs applicable to all agricultural disciplines.

AG 199. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

AG 211. SURVEY AND CONSTRUCTION. (3 Credits)
Land measurement and leveling as applied to agricultural uses. Concrete and agricultural building construction including the use of construction power tools, selection of materials and cost estimating.

AG 221. METALS AND WELDING. (3 Credits)
Practices of metal working including the use of metal working machines, metal identification, heat treating and metal properties. Fabrication of metals including arc and oxy-acetylene welding and cutting. Lec/lab.

AG 230. INTRODUCTION TO EXTENSION AND ENGAGEMENT. (3 Credits)
For students interested in pursuing a career with the OSU Extension Service. An introduction to the OSU Extension Service mission, philosophy, history, organization, structure, administration, program areas, Extension program development, Extension teaching and delivery methods, and the involvement and use of volunteers. This course is repeatable for 6 credits.

AG 301. *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS. (3 Credits)
Designed and presented in partnership with Pacific Northwest Indians and Alaska Natives, focusing on natural ecosystems, differing views, power relationships, policymaking, and gender roles. (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

AG 311. *NATIVE AMERICAN AGRICULTURE. (3 Credits)
Explores Native North American agriculture and land management--prehistory of important domesticates such as maize, historic change, and contemporary issues including modern stereotypes, women in agriculture, cultural survival, and both the physical and spiritual significance of these crops in Native American communities and around the globe past and present. (Bacc Core Course) Attributes: CPDC – Core, Pers, Cult Diversity; CPDP – Core, Perspective, Difference/Power/Discrimination

AG 312. ENGINE THEORY AND OPERATION. (3 Credits)
Engine construction, operational theories and principles, lubrication, fuels and oils, emissions and preventive maintenance are taught through the process of small engine lab activities. Engine efficiency theories and measurement are presented.

AG 318. ACCESSING INFORMATION FOR AGRICULTURAL RESEARCH. (1 Credit)
Designed for students at a distance to develop library skills and improve access to information used to conduct technical agricultural research.

AG 351. *COMMUNICATING AGRICULTURE TO THE PUBLIC. (3 Credits)
Students will explore various outlets for communicating with the public about agriculture using appropriate, professional writing. Additionally, students will articulate their thoughts on controversial issues as well as write feature and editorial pieces promoting positive agricultural practices and people in agriculture. (Bacc Core Course) Attributes: CPSI – Core, Pers, Soc Proc & Inst; CSGI – Core, Synth, Global Issues

AG 391. FARM IMPLEMENTS. (3 Credits)
Power farming implements including operation, maintenance, adjustments, calibration and use are covered. Field trips may be required.

AG 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AG 402. INDEPENDENT STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

AG 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

AG 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AG 406. SPECIAL PROBLEMS. (1-16 Credits)
This course is repeatable for 16 credits.

AG 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AG 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AG 410. INTERNSHIP. (1-16 Credits)
A work internship to give students practical on-the-job preparation in any of the main facets of agriculture or related industries. This course is repeatable for 16 credits.

AG 412. AG SAFETY AND HEALTH. (3 Credits)
An examination of various hazards associated with agriculture. Control strategies will be explored and prevention methods identified. Hazards examined include machinery, livestock, controlled spaces, pesticides, and other items common to the agricultural workplace. Lec/lab.

AG 421. *WRITING IN AGRICULTURE. (3 Credits)
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC

AG 425. DEVELOPMENTS IN AGRICULTURAL MECHANICS. (3 Credits)
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology. This course is repeatable for 9 credits.

AG 435. PROFESSIONAL PRESENTATIONS IN AGRICULTURE. (3 Credits)
Students will learn to effectively create and deliver professional presentations relevant to careers in agriculture and natural resources. This includes developing skills for both formal and informal presentations, using visual aids effectively, and using appropriate strategies to engage various audiences.

AG 492. TECHNOLOGY TRANSFER IN AGRICULTURE. (3 Credits)
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 499. SPECIAL TOPICS. (1-4 Credits)
Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for 12 credits.

AG 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AG 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.
AG 518. EXTENSION COURSE IN TEACHER EDUCATION: TECHNICAL. 
(1-3 Credits) 
Enables present and prospective teachers of agriculture to continue their 
professional development on technical topics of current importance. 
This course is repeatable for 9 credits.

AG 521. WRITING IN AGRICULTURE. (3 Credits) 
Students will synthesize their knowledge in various areas of agricultural 
sciences and analyze how current issues impact the agriculture industry, 
explore careers in agriculture, and develop their written communication 
skills. Students will share their ideas and demonstrate their learning 
primarily in writing.

AG 525. DEVELOPMENTS IN AGRICULTURAL MECHANICS. (3 Credits) 
Emphasis on the development of instructional units for agricultural 
instruction programs. Wide applications to agricultural mechanization 
and biotechnology. 
This course is repeatable for 45 credits.

AG 541. COMMUNITY PROGRAMS IN AGRICULTURE. (3 Credits) 
Evaluating agricultural education program effectiveness and technical 
appropriateness. Development of long-range plans for agricultural 
programs to meet the technical needs of a community.

AG 592. TECHNOLOGY TRANSFER IN AGRICULTURE. (3 Credits) 
Examination of processes by which formal and informal agricultural 
instruction programs influence the introduction and acceptance of 
technology in agriculture. An emphasis in the international arena will 
be maintained. The focus throughout the course will be on the role of a 
professional change agent working with technological change.

AG 808. WORKSHOP. (1-4 Credits) 
Designed to enhance professionalism and create a knowledge base to 
increase personal effectiveness. This course will provide a basis for 
future leadership by synthesizing theoretical knowledge with practical 
application. Individuals will have the opportunity to explore their own 
personality reflect on their leadership ability, and develop the professional 
skills and networking abilities necessary to become influential leaders in 
their home, community and profession. 
This course is repeatable for 4 credits.
AMERICAN SIGN LANGUAGE (ASL)

ASL 111. FIRST-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A beginning course to learn the basics of American Sign Language. The course focuses on the ASL language and its uses of syntax, grammar, vocabulary, facial expressions and deaf culture.

ASL 112. FIRST-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of ASL 111 with the development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, and ASL 113. 
Prerequisites: ASL 111 with D- or better

ASL 113. FIRST-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of ASL 111 and ASL 112 with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, and ASL 113.
Prerequisites: ASL 112 with D- or better

ASL 211. SECOND-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of the first-year ASL courses with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, and ASL 213.
Prerequisites: ASL 113 with D- or better

ASL 212. SECOND-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of the second-year ASL series with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, and ASL 213.
Prerequisites: ASL 211 with D- or better

ASL 213. SECOND-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of the second-year ASL series with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, and ASL 213.
Prerequisites: ASL 212 with D- or better
AMERICAN STUDIES
PROGRAM (AMS)

AMS 311. TOPICS IN AMERICAN STUDIES. (4 Credits)
Selected topics, changed annually, that investigate American ideas,
regions, events, or periods. Fulfills the requirement for an integrated
course in the major. May be repeated as topics vary. Open to nonmajors.
This course is repeatable for 99 credits.

AMS 350. *AMERICAN CULTURE AND THE VIETNAM EXPERIENCE. (4
Credits)
Examines through literature, film, and popular media the effects of the
Vietnam War on American culture. Taught at OSU-Cascades only. (Bacc
Core Course)
Attributes: CSGI – Core, Synth, Global Issues

AMS 405. READING AND CONFERENCE. (1-16 Credits)
Independent, individual studies supervised by the director, members of
the American Studies Board, or assigned professors, as arranged by the
student and the director.
This course is repeatable for 16 credits.

AMS 406. PROJECTS. (1-16 Credits)
Studies of American culture and society centered around topical events
or cultural programs of current interest in American studies.
This course is repeatable for 16 credits.

AMS 407. ^SEMINAR. (1-16 Credits)
May be repeated for credit as topics vary. (Writing Intensive Course)
CROSSLISTED as ENG 407/ENG 507.
Attributes: CWIC – Core, Skills, WIC
Equivalent to: ENG 407
This course is repeatable for 16 credits.

AMS 410. AMERICAN STUDIES INTERNSHIP. (1-16 Credits)
Supervised and evaluated work in a variety of professional fields to
enhance students’ career preparation; arranged at the initiative of the
student one semester in advance.
This course is repeatable for 16 credits.

AMS 507. SEMINAR. (1-16 Credits)
May be repeated for credit as topics vary. CROSSLISTED as ENG 407/
ENG 507.
Equivalent to: ENG 507
This course is repeatable for 16 credits.
ANIMAL SCIENCES (ANS)

ANS 121. *INTRODUCTION TO ANIMAL SCIENCES. (4 Credits)
Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: ANS 121H

ANS 121H. *INTRODUCTION TO ANIMAL SCIENCES. (4 Credits)
Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: ANS 121

ANS 207. SOPHOMORE SEMINAR. (2 Credits)
Examination of career opportunities in animal sciences.

ANS 215. BEEF/DAIRY INDUSTRIES. (3 Credits)
Introduction to beef and dairy industries; history, current industry status, and demonstration and practice of basic husbandry skills.

ANS 216. SMALL RUMINANT/SWINE INDUSTRIES. (3 Credits)
Introduction to the small ruminant and swine industries including history, current status and production practices, with demonstration and hands-on experience of basic husbandry practices.

ANS 217. POULTRY INDUSTRIES. (3 Credits)
Familiarization of the organizational structure and marketing arrangement of poultry industries; hands-on managerial techniques, practices and procedures carried out by the poultry industries.

ANS 220. INTRODUCTORY HORSE SCIENCE. (3 Credits)
Introduction to horses, their history, breeds, form and function, performance evaluation, current industry status, and general management.

ANS 223. EQUINE MARKETING. (2 Credits)
Course covers practical concepts of equine marketing. Emphasis on market assessment, targeting buyers, marketing and advertising strategies, hands-on experience in product preparation and presentation, marketing legalities.

ANS 231. LIVESTOCK EVALUATION. (3 Credits)
Focuses on an individual animal's economic merit as compared to a sample group. Visual appraisal, performance data, and carcass merit are stressed. Includes the evaluation of both market and breeding animals. The livestock species of concentration include beef cattle, swine, sheep, and meat goats. Lec/lab.

ANS 251. PRINCIPLES OF ANIMAL FOODS TECHNOLOGY. (3 Credits)
Processing of meat, milk and eggs into human food products. Lec/lab.

ANS 280. COMPANION ANIMAL MANAGEMENT. (4 Credits)
An introduction to the challenges, responsibilities, and benefits of interaction with selected companion animals. Topics covered will provide an overview of the human-animal bond, the position of companion animals in society, ethical issues of pet ownership and potential career opportunities. In addition, the course will serve as an introduction to preventive care and normal behavior of dogs, cats, and selected exotic pets. As the Department of Animal and Rangeland Sciences curriculum offers courses addressing equine care and husbandry, horses will not be discussed in this class.

ANS 302. COMMON DISEASES OF COMPANION ANIMALS. (4 Credits)
An introduction to common diseases of selected companion animals. Emphasis will be placed on identifying predisposing factors, clinical signs, common diagnostic procedures and potential implications for human health. A $10 course fee will be required. Lec/rec.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) and CH 121 [D-] and CH 122 [D-] and CH 123 [D-]

ANS 311. PRINCIPLES OF ANIMAL NUTRITION. (3 Credits)
Classification, digestion, absorption, and metabolism of nutrients in animals; consequences of nutritional deficiencies and toxicities.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-])

ANS 312. FEEDSTUFFS AND RATION FORMULATION. (4 Credits)
Presents the feedstuffs utilized by domestic animals including their characteristics and processing. Provides instruction in ration formulation and evaluation leading to development of the basic skills required to formulate and evaluate rations for domestic animals. Taught as a distance education course.

ANS 313. APPLIED ANIMAL NUTRITION: FEEDS AND RATION FORMULATION. (4 Credits)
Discusses topics relevant to feedstuff identification and nutrient analysis, feed processing and formulation of balanced animal diets based on nutrient requirements. Provides students hands-on experiences in identifying various feedstuffs and formulating rations based on the nutrient composition of those feedstuffs. Also offered at EOU and through Ecampus.

ANS 314. ANIMAL PHYSIOLOGY. (4 Credits)
Biological basis of animal performance; describes how networks of cells act cooperatively to enable locomotion, provide a stable internal environment, allocate resources, remove metabolic end-products, and counteract microorganisms.

ANS 315. *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE. (3 Credits)
Discussion of contentious issues including role of animal products and human health; use of hormones and antibiotics; new animal biotechnologies; animal rights/welfare; livestock grazing on public lands. (Bacc Core Course).
Attributes: CSST – Core, Synthesis, Science/Technology/Society

ANS 316. REPRODUCTION IN DOMESTIC ANIMALS. (4 Credits)
Anatomy and physiology of mammalian and avian reproductive systems; fertilization, embryonic and fetal development, placentation and parturition; reproductive technologies. Lec/rec.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (CH 121 [D-] or CH 221 [D-] or CH 231 [D-] or CH 231H [D-])

ANS 317. REPRODUCTION IN DOMESTIC ANIMALS LABORATORY. (1 Credit)
Gross and microscopic anatomy of the reproductive tract; semen collection, evaluation and extension; evaluation of fertilization, embryo and fetal development and placentation. Lec/lab.
Prerequisites: ANS 316 (may be taken concurrently) with D- or better

ANS 320. PRINCIPLES OF COMPANION ANIMAL NUTRITION. (3 Credits)
Learn about nutrients, the digestive process, and the application of nutritional sciences to the health and welfare of companion animals. Introduction to the metabolic basis and practical preventative management for nutritional diseases in companion animals.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-])
ANS 321. AVIAN EMBRYO. (4 Credits)
Discussion and experimentation involving the development and the environmental requirements for the artificial incubation of avian embryos. Lec/lab. Offered even-numbered years.

ANS 327. APPLIED PHYSIOLOGY OF REPRODUCTION. (5 Credits)
Principles, techniques and recent development in semen collection, evaluation, extension and preservation; artificial insemination, estrus detection and synchronization; pregnancy diagnosis and embryo transfer.
Prerequisites: ANS 316 with D- or better and ANS 317 [D-]

ANS 331. ADVANCED LIVESTOCK EVALUATION. (4 Credits)
Aspects of an individual animal's economic merit are compared to a sample group. Emphasis is placed on beef, swine and sheep. Visual appraisal, performance data and carcass merit are stressed. Designed to prepare students for the intercollegiate livestock judging team.
This course is repeatable for 12 credits.

ANS 333. EQUINE STABLE MANAGEMENT. (3 Credits)
Discusses developing a business plan, financial statements, and ratios, budgeting, financial planning, taxation, and employment issues within the current equine industry.
Prerequisites: ANS 220 with D- or better

ANS 335. EQUINE HEALTH AND DISEASE. (3 Credits)
Recognition of common diseases and disorders including their cause, treatment and prevention. Management of internal and external parasites. Recognizing common lameness issues.

ANS 341. ANIMAL BEHAVIOR AND COGNITION. (3 Credits)
Survey, discuss, and explore principles of animal behavior and cognition from a comparative perspective, taking into account the interacting influences of biology, environment, and life experience on the individual and group behavior of animals across species. Aspects of animal cognition, including reasoning, perception, memory and personality, that play an important role in animal behavior will also be addressed.
Prerequisites: BI 102 with D or better or BI 213 with D or better

ANS 351. ADVANCED PRINCIPLES OF ANIMAL FOODS TECHNOLOGY. (4 Credits)
Provides in-depth coverage of both fresh and processed meats and eggs into products suitable for human consumption.

ANS 378. ANIMAL GENETICS. (4 Credits)
Fundamentals of inheritance, principles of genetic segregation, population and quantitative genetics, response to natural selection and artificial manipulation of populations.
Prerequisites: BI 211 with D- or better or BI 212 with D- or better or BI 213 with D- or better

ANS 380. PRINCIPLES OF ANIMAL ANATOMY AND PHYSIOLOGY. (3 Credits)
An introductory course in animal anatomy to provide a foundation for advanced courses in the Animal Science curriculum. Emphasis is on acquisition of a basic knowledge of minute and gross anatomical structures, their operation, and integration. Begins with anatomical nomenclature such as body planes and directional terms then covers the following tissues and organ systems: epithelium, connective tissue, blood and bone marrow, bone/cartilage, muscle tissue, nervous tissue, digestive system, circulatory system, reproductive system, urinary system, and respiratory system.
Prerequisites: (BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D])

ANS 385. FOUNDATIONS OF MAMMALIAN HISTOLOGY. (3 Credits)
Provides a basic knowledge of mammalian microscopic anatomy. Emphasis will be on the appearance, organization and function of minute anatomical structures that can only be observed with the help of a visual enhancer, such as a microscope. Covers basic histological techniques and histology and related functions of the following tissues and organ systems: epithelium, connective tissue, bone/cartilage, blood, muscle tissue, nervous tissue, circulatory system, digestive system, reproductive system, urinary system, respiratory system, immune system, integument, eye and ear. Also covers gametogenesis, fertilization, and early development of the vertebrate embryo. Lec/rec.
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and (BI 314 [C-] or BI 314H [C-])

ANS 390. GROSS ANATOMY OF DOMESTIC ANIMALS. (4 Credits)
Provides a foundation for advanced courses in the Animal Science curriculum. Emphasis on gaining knowledge of mammalian anatomy. Lectures cover anatomical nomenclature, structure, operation, and integration of major organ systems. The dog is used as the general model while comparative domestic animal anatomy is also covered. Lec/lab.
Prerequisites: (BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D])

ANS 401. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 405. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 410. ANIMAL SCIENCE INTERNSHIP. (1-12 Credits)
On- or off-campus, occupational work experience supervised by the department. Graded P/N.
This course is repeatable for 16 credits.

ANS 415. LIVESTOCK JUDGING TEAM. (3 Credits)
Designed to train students for participation in the intercollegiate livestock judging team.
This course is repeatable for 9 credits.

ANS 420. ETHICAL ISSUES IN ANIMAL AGRICULTURE. (3 Credits)
Students are provided with an opportunity to discuss, debate and write on- or off-campus, occupational work experience supervised by the department. Graded P/N.
This course is repeatable for 9 credits.

ANS 430. EQUINE SYSTEMS I: EXERCISE SCIENCE. (4 Credits)
Seniors and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.

ANS 431. EQUINE SYSTEMS II: NUTRITION. (3 Credits)
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.
ANS 432. EQUINE SYSTEMS III: REPRODUCTION. (4 Credits)
Senior and graduate students explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training of laboratory techniques. Lec/lab.
Prerequisites: ANS 220 with D- or better and ANS 316 [D-]

ANS 433. POULTRY MEAT PRODUCTION SYSTEMS. (3 Credits)
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.

ANS 434. EGG PRODUCTION SYSTEMS. (3 Credits)
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.

ANS 435. APPLIED ANIMAL BEHAVIOR. (3 Credits)
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.

ANS 436. SHEEP PRODUCTION SYSTEMS. (3 Credits)
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.

ANS 439. DAIRY PRODUCTION SYSTEMS. (4 Credits)
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.

ANS 440. DAIRY PRODUCTION SYSTEMS. (3 Credits)
Decision case analysis or special topics in application of dairy management principles.
Prerequisites: ANS 439 with D- or better

ANS 441. TOPICS IN ANIMAL LEARNING. (3 Credits)
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).
Prerequisites: BI 211 with D- or better and BI 212 [D-]

ANS 443. BEEF PRODUCTION SYSTEMS: COW/CALF. (4 Credits)
Fundamentals of nutrition, reproductive physiology, health care, and financial management of beef cow/calf operations in the western U.S. Discussions will focus on critical management stages and practices common to the beef cow/calf production cycle. Taught at EOU La Grande campus only.

ANS 444. BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT. (4 Credits)
A continuation of the study of beef cattle management. Content will encompass the growth and development of weaned calves through slaughter for consumer beef production, with particular focus on the management of growing and yearling cattle in forage-based (stocker cattle) and drylot (feedlot) systems. Taught at EOU La Grande campus only.

ANS 445. BEEF PRODUCTION SYSTEMS. (4 Credits)
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.

ANS 446. GRAZING LIVESTOCK PRODUCTION. (4 Credits)
Equips non-animal science majors with basic ruminant livestock (beef cattle, sheep and meat goat) production knowledge, so they may communicate and collaborate effectively with livestock producers.
Prerequisites: ANS 121 with D- or better

ANS 452. LIVESTOCK HOUSING AND WASTE MANAGEMENT. (3 Credits)
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization.

ANS 456. COMPANION ANIMAL PRODUCTION SYSTEMS. (3 Credits)
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.
Prerequisites: (ANS 313 with D- or better and ANS 316 (may be taken concurrently) [D-] and ANS 378 [D-])

ANS 460. SWINE PRODUCTION SYSTEMS. (4 Credits)
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of swine from conception through farrowing, weaning, and the growing/finishing phases. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.

ANS 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

ANS 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 503. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

ANS 505. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 507. GRADUATE SEMINAR. (1 Credit)
Section 1: Seminar/general for all graduate students. Preparation of effective visual aids. Practice explaining the validity or significance of experimental results to an informed audience. Section 2: Seminar/ endocrinology, for graduate students interested in physiology. This course is repeatable for 99 credits.

ANS 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 509. TEACHING PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 511. DIGESTIVE PHYSIOLOGY AND NUTRITION OF RUMINANT ANIMALS. (4 Credits)
Anatomy and physiology of the ruminant digestive tract including rumen microbiology and digestive processes. Nutritional biochemistry and physiology of ruminants. Feed chemistry, feed intake and principles of ration balancing. Theory of energy and protein metabolism.
ANS 512. MONOGASTRIC AND POULTRY NUTRITION. (3 Credits)
Anatomical differences in digestive tracts of monogastrics; nutritional biochemistry of poultry; practical feeding of avian species; least-cost ration techniques; techniques for determining nutrient needs of monogastrics.

ANS 515. REVIEW OF APPLIED RUMINANT NUTRITION RESEARCH TECHNIQUES. (3 Credits)
Review and discussion and applied techniques and methodology used for ruminant nutrition research.

ANS 530. EQUINE SYSTEMS I: EXERCISE SCIENCE. (4 Credits)
Senior and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.

ANS 531. EQUINE SYSTEMS II: NUTRITION. (3 Credits)
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.

ANS 532. EQUINE SYSTEMS III: REPRODUCTION. (4 Credits)
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd numbered years.

ANS 534. EGG PRODUCTION SYSTEMS. (3 Credits)
Fundamental applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.

ANS 535. APPLIED ANIMAL BEHAVIOR. (3 Credits)
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.

ANS 536. SHEEP PRODUCTION SYSTEMS. (3 Credits)
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.

ANS 538. BIOLOGY OF LACTATION. (3 Credits)
Physiological and environmental factors affecting mammary gland development and function. Offered alternate years.

ANS 539. DAIRY PRODUCTION SYSTEMS. (4 Credits)
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.

ANS 540. DAIRY PRODUCTION SYSTEMS. (3 Credits)
Decision case analysis or special topics in application of dairy management principles.

ANS 541. TOPICS IN ANIMAL LEARNING. (3 Credits)
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).

ANS 543. BEEF PRODUCTION SYSTEMS: COW/CALF. (3 Credits)
Fundamentals of nutrition, reproductive physiology and health programs and their applications in the care and management of beef cattle. Overnight field trip with extra fee charged. Lec/lab. Taught at EOU La Grande campus only.

ANS 544. BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT. (3 Credits)
Continuation of the study of beef cattle management. Students will practice decision-making processes using area beef cattle operations as case studies. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only.

ANS 545. BEEF PRODUCTION SYSTEMS. (4 Credits)
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.

ANS 552. LIVESTOCK HOUSING AND WASTE MANAGEMENT. (3 Credits)
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization. Offered alternate years.

ANS 556. COMPANION ANIMAL PRODUCTION SYSTEMS. (3 Credits)
Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism in various tissues and metabolism of eicosanoids. Offered alternate years.

ANS 560. LIPID METABOLISM. (3 Credits)
Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism in various tissues and metabolism of eicosanoids. Offered alternate years.

ANS 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 601. RESEARCH. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.

ANS 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ANS 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 607. GRADUATE SEMINAR. (1 Credit)
This course is repeatable for 99 credits.

ANS 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 609. TEACHING PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 662. HORMONE ACTION. (3 Credits)
Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. Offered every other year, winter term. CROSSLISTED as MCB 662.

Prerequisites: BB 551 with C or better or BB 592 with C or better
ANS 673. BIOLOGY OF MAMMALIAN REPRODUCTION. (4 Credits)
Physiological, neuroendocrine, endocrine and environmental factors that regulate reproduction of mammals. Offered alternate years.

ANS 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
ANTHROPOLOGY (ANTH)

ANTH 101. *INTRODUCTION TO ANTHROPOLOGY. (3 Credits)
Located at the intersection of the humanities and the sciences, anthropology strives for a holistic understanding of the human condition. This course introduces students to the basic concepts, theories and methods of anthropology, including its four main sub-fields: archaeology, biological anthropology, cultural anthropology, and linguistic anthropology. The course is driven by fundamental questions, including: What is culture? How do anthropologists study human populations, both past and present? How can this field help us better understand contemporary human problems? (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

ANTH 110. *INTRODUCTION TO CULTURAL ANTHROPOLOGY. (3 Credits)
Investigates cultural adaptation and change in different environmental and historical contexts. Compares the means by which cultures solve common human problems. Shows similarities and differences throughout the world in systems of values, family, religion, economics, and politics. Students are asked to consider future cultural conditions. Uses a video format. (SS) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

ANTH 159. *LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION. (4 Credits)
Students in this course will unpackage language, race and racism—as well as the intersections between those ideas—as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ES 159 and WLC 159.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 159, WLC 159

ANTH 199. SPECIAL STUDIES. (1-3 Credits)
This course is repeatable for 3 credits.

ANTH 208. *WESTERN CULTURE STUDY ABROAD. (3 Credits)
Overseas study of the history and contemporary form of important features of Western culture. Based on at least 10 weeks of studying abroad. CROSSLISTED as LING 208. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: LING 208

ANTH 209. *CULTURAL DIVERSITY STUDY ABROAD. (3 Credits)
Overseas study of non-Western cultures. Based on at least 10 weeks of studying abroad. CROSSLISTED as LING 209. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: LING 209

ANTH 210. *COMPARATIVE CULTURES. (3 Credits)
Compares the cultures originating in Asia, Africa, and precolonial Australia, Oceania, and North and South America. Introduces method and theory for comparative cultural analysis from historical, ethnographic, and indigenous viewpoints. Considers the contribution and influences of minority and ethnic groups on the mainstream culture in nation states. Summarizes the characteristics of cultures in the major world culture areas. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity

ANTH 230. TIME TRAVELERS. (3 Credits)
Introduction to the historical developments of modern archaeology. The often romanticized public image of archaeology will be contrasted with scientific reality. The nature of archaeological data, modern field methods, analytical techniques, and theoretical background will be reviewed in order to illustrate how the unwritten record of human cultural behavior is deciphered. (SS)
Attributes: LACS – Liberal Arts Social Core

ANTH 240. INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY. (3 Credits)
An investigation of the origin of modern people (Homo sapiens) in a historical context; review of key discoveries and current research on the relationships between humans and other primates; exploration of contrasting views of humanity. (SS)
Attributes: LACS – Liberal Arts Social Core

ANTH 251. *LANGUAGE IN THE USA. (3 Credits)
Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ANTH 251H

ANTH 251H. *LANGUAGE IN THE USA. (3 Credits)
Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ANTH 251

ANTH 261. *FOOD IN AMERICAN CULTURE. (3 Credits)
Fosters understanding of the meanings of foods and foodways in American culture. Uses food as a lens to explore general topic areas such as work, family, ecology, and identity. Critically examines core issues that shape and have shaped American culture. (Bacc Core Course) (SS) CROSSLISTED as FCSJ 261.
Attributes: CPWC – Core, Pers, West Culture; LACS – Liberal Arts Social Core
Equivalent to: FCSJ 261

ANTH 284. *PRIMATE ADAPTATION AND EVOLUTION. (4 Credits)
Introduces students to our closest living relatives, the primates. Uses theories and concepts from evolutionary biology to explore the diverse anatomical and behavioral adaptations of different primate species. Also explores the relationships between anatomy, behavior, and ecology on the individual and community level. Provides an evolutionary and ecological framework with which to view primates (including humans) and all living organisms. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science

ANTH 311. *PEOPLES OF THE WORLD-NORTH AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 311H
ANTH 311H. *PEOPLES WORLD-NORTH AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 311

ANTH 312. *PEOPLES WORLD-EUROPE. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: ANTH 312H

ANTH 312H. *PEOPLES WORLD-EUROPE. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: ANTH 312

ANTH 313. *PEOPLES OF THE WORLD-LATIN AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 313H

ANTH 313H. *PEOPLES OF THE WORLD-LATIN AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 313

ANTH 314. *PEOPLES OF THE WORLD-MIDDLE EAST. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 314H

ANTH 314H. *PEOPLES OF THE WORLD-MIDDLE EAST. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 314

ANTH 315. *PEOPLES OF THE WORLD-AFRICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 315H

ANTH 315H. *PEOPLES OF THE WORLD-AFRICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 315

ANTH 316. *PEOPLES OF THE WORLD-SOUTH AND SOUTHEAST ASIA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

ANTH 317. *PEOPLES OF THE WORLD-PACIFIC. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

ANTH 318. *PEOPLES OF THE WORLD-CHINA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPDC – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 318H
ANTH 318. *PEOPLES OF THE WORLD-CHINA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Prerequisites: ANTH 110 with D- or better or ANTH 210 with D- or better
Equivalent to: ANTH 318

ANTH 319. *PEOPLES OF THE WORLD-JAPAN AND KOREA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

ANTH 330. *EVOLUTION OF PEOPLE, TECHNOLOGY, AND SOCIETY. (3 Credits)
Overview of the evolution and prehistory of the human species, including the development and interaction of human biology, technology, and society. (SS) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACN – Liberal Arts Social Core

ANTH 331. MESOAMERICAN PREHISTORY. (3 Credits)
Explores the archaeology and prehistory of Mesoamerica from Paleolithic through the Olmec, Maya, Zapotec, and Aztec cultures to the Spanish Conquest. Themes include the transition to settled agriculture, emergence of social inequality and political authority, the role of the natural environment, and the rich cultural heritage of Mesoamerican civilizations.
Attributes: LACN – Liberal Arts Non-Western Core

ANTH 332. ARCHAEOLOGICAL INFERENCE. (4 Credits)
In this course on archaeological inference, or the thought process of forming our understanding about the past, we will take a guided tour of the main stages of archaeological research design and try our hand at making archaeological inferences. We begin by learning about the basic conceptual problems in the study of the past, then, we engage with the theories and models used to address them, and finally we apply this knowledge in hands-on analytical activities during the laboratory sessions with archaeological artifacts. Lec/lab.
Prerequisites: ANTH 230 with D- or better

ANTH 345. *BIOLOGICAL AND CULTURAL CONSTRUCTIONS OF RACE. (3 Credits)
The social, cultural, and historical context of human biological diversity in the United States. Students become acquainted with primary resources relating to biological diversity within the modern human species and will offer a critical perspective on racial/ethnic categorization of that diversity. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

ANTH 350. LANGUAGE, CULTURE AND SOCIETY. (4 Credits)
An examination of the communicative functions of language and the role of language in the construction of social relations. Covers the origins, structure, and diversity of language. Explores the relationships between language and thought and the use of linguistic models in the study of culture. (SS)
Attributes: LACN – Liberal Arts Social Core

ANTH 352. *ANTHROPOLOGY, HEALTH, AND ENVIRONMENT. (3 Credits)
Major threats to human health are increasingly linked to global environmental changes. This course engages medical and environmental anthropological research to critically explore the values, meanings and ideologies associated with ecological and public health issues in given localities throughout the world. (Bacc Core Course)
Attributes: CSIG – Core, Synth, Global Issues

ANTH 361. *FOOD JUSTICE. (4 Credits)
Contemporary food systems are examined from a cultural and social justice perspective. The human right to food as recognized by the United Nations serves as the justice grounding point. Impediments to realizing the right to food will be examined in national and international contexts. (Bacc Core Course) (SS) CROSSTLISTED as FCSJ 361.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACN – Liberal Arts Social Core
Equivalent to: FCSJ 361

ANTH 360. *ANTHROPOLOGICAL THEORIES. (4 Credits)
Foundational theories, approaches, and concepts are explored and used as a means to understanding how anthropologists past and present use theory. Students compare and contrast prominent theories, analyze current events and situations, and write a major research paper using anthropological sources.
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ANTH 110 with D- or better

ANTH 371. RESEARCH METHODS IN CULTURAL ANTHROPOLOGY. (4 Credits)
Designed for anthropology majors, this course involves students in learning about and practicing anthropological research methods. Students practice ethnographic fieldwork by conducting participant observation and interviews, writing fieldnotes, analyzing real-life material for cultural values and power differences, and writing up a research paper.
Prerequisites: ANTH 110 with D- or better

ANTH 372. *SOCIAL NETWORKS AND SOCIETY. (3 Credits)
Introduces the foundational theory and concepts of social network analysis (SNA) and explores practical applications of SNA in environmental science, public health, business, politics, education, and public life. Also explores how the Internet, social media, and other information and communication technologies are affecting social networks and culture in the 21st century. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

ANTH 373. APPROACHES TO SOCIAL JUSTICE. (3 Credits)
Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSTLISTED as ES 373, WGSS 373, WL 373.
Equivalent to: ES 373, WGSS 373, WLC 373
ANTH 374. *ANTHROPOLOGY AND GLOBAL HEALTH. (3 Credits)
An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critical and evidence-based perspective on complex global health issues. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Equivalent to: ANTH 374H

ANTH 374H. *ANTHROPOLOGY AND GLOBAL HEALTH. (3 Credits)
An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critical and evidence-based perspective on complex global health issues. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: ANTH 399

ANTH 383. *INTRODUCTION TO MEDICAL ANTHROPOLOGY. (3 Credits)
Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: ANTH 383H

ANTH 383H. *INTRODUCTION TO MEDICAL ANTHROPOLOGY. (3 Credits)
Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: ANTH 383

ANTH 380. *CULTURES IN CONFLICT. (3 Credits)
Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Equivalent to: ANTH 380H

ANTH 380H. *CULTURES IN CONFLICT. (3 Credits)
Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Prerequisites: ANTH 110 with D- or better
Equivalent to: ANTH 380

ANTH 384. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: ANTH 399H
This course is repeatable for 16 credits.

ANTH 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 399
This course is repeatable for 16 credits.

ANTH 401. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 402. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 403. SEMINAR. (1-3 Credits)
This course is repeatable for 16 credits.

ANTH 405. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 405H. READING AND CONFERENCE. (1-6 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 405
This course is repeatable for 16 credits.

ANTH 406. PROJECTS. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 407. SEMINAR. (1-3 Credits)
Equivalent to: ANTH 407H
This course is repeatable for 16 credits.

ANTH 407H. SEMINAR. (1-3 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 407
This course is repeatable for 16 credits.

ANTH 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 410. INTERNSHIP. (1-16 Credits)
Opportunities for students at junior and first-term senior class levels to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members.
This course is repeatable for 16 credits.

ANTH 420. WORLD CULTURES--TOPICS. (4 Credits)
In-depth study of world cultures. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. Includes three hours of lecture and one hour of seminar. Cannot be taken if student is taking or has completed the 300-level course in the same geographical area. Graded P/N.

ANTH 421. ANALYSIS OF LITHIC TECHNOLOGIES. (4 Credits)
Covers the principles, procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric hunter-gatherers.
Prerequisites: ANTH 230 with D- or better
ANTH 422. HISTORIC MATERIALS ANALYSIS. (3 Credits)
Introduction to the analytical and descriptive methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects.
Prerequisites: ANTH 230 with D- or better

ANTH 423. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY. (4 Credits)
Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.

ANTH 424. SETTLEMENT ARCHAEOLOGY. (4 Credits)
Explores the evolution of the theoretical underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of.

ANTH 425. CERAMIC ANALYSIS IN ARCHAEOLOGY. (4 Credits)
Provides fundamental practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/ lab.
Prerequisites: ANTH 230 with D- or better

ANTH 430. TOPICS IN ARCHAEOLOGY. (1-4 Credits)
Recent advances in archaeology and their application to special fields of study. Topics vary from term to term.
Prerequisites: ANTH 230 with D- or better or ANTH 330 with D- or better This course is repeatable for 99 credits.

ANTH 432. *DOMESTICATION, URBANIZATION, AND THE RISE OF CIVILIZATION. (4 Credits)
Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ANTH 432H

ANTH 432H. *DOMESTICATION, URBANIZATION, AND THE RISE OF CIVILIZATION. (4 Credits)
Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ANTH 432

ANTH 433. FIRST AMERICANS, LAST FRONTIERS. (4 Credits)
The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago.
Attributes: LACN – Liberal Arts Non-Western Core

ANTH 434. NORTH AMERICA AFTER THE ICE AGE. (4 Credits)
The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention.

ANTH 435. CULTURAL RESOURCES: POLICY AND PROCEDURES. (4 Credits)
Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field techniques and strategies to implement legislation.
Prerequisites: ANTH 230 with D- or better

ANTH 436. NORTHWEST PREHISTORY. (4 Credits)
Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones within the Northwest; comparisons of the cultural development through prehistoric times of the Columbia Plateau, intermontane and coastal zones of Oregon, Washington, and British Columbia. Special emphasis on the theories of origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest.

ANTH 437. GEOARCHAEOLOGY. (4 Credits)
Provides an introduction to geoarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems.
Prerequisites: ANTH 230 with D- or better

ANTH 438. ARCHAEOLOGY FIELD SCHOOL. (10-12 Credits)
Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management.

ANTH 439. ARCHAEOLOGY OF FORAGERS. (4 Credits)
Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term.
Prerequisites: ANTH 240 with D- or better or ANTH 330 with D- or better This course is repeatable for 16 credits.

ANTH 440. TOPICS IN PHYSICAL ANTHROPOLOGY. (1-4 Credits)
Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term.
Prerequisites: ANTH 240 with D- or better or ANTH 330 with D- or better This course is repeatable for 16 credits.

ANTH 441. HUMAN EVOLUTION. (4 Credits)
The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/ lab.
Prerequisites: (ANTH 110 with D- or better and ANTH 240 [D-])

ANTH 442. HUMAN ADAPTABILITY. (4 Credits)
Prerequisites: ANTH 240 with D- or better

ANTH 443. HUMAN OSTEOLOGY LAB. (4 Credits)
Identification and analysis of human skeletal materials in an archaeological context.
Prerequisites: ANTH 240 with D- or better
ANTH 444. NUTRITIONAL ANTHROPOLOGY. (4 Credits)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSTLISTED as FCSJ 444.
Prerequisites: ANTH 240 with C or better or ANTH 330 with C or better
Equivalent to: FCSJ 444

ANTH 446. FORENSIC ANTHROPOLOGY. (4 Credits)
Concepts and practices in the use of anthropology in legal matters and police cases, especially involving identification of human remains.
Prerequisites: ANTH 443 with D- or better

ANTH 447. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS. (4 Credits)
The Arctic is on the frontline of today's most pressing global problems. This course uses Arctic perspectives to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: ANTH 447H

ANTH 447H. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS. (4 Credits)
The Arctic is on the frontline of today's most pressing global problems. This course uses Arctic perspectives to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: ANTH 447

ANTH 448. EVOLUTIONARY MEDICINE. (4 Credits)
Evolutionary medicine is founded on the idea that many challenges to human health can be accounted for by discords between contemporary environments and those under which humans evolved. This course examines ways anthropologists may help to reframe questions about diseases within long-term, evolutionary contexts.
