# TABLE OF CONTENTS

Academic Advising at Oregon State University ........................................ 14
Academic Regulations .............................................................................. 16
Administration ......................................................................................... 24
Admission to Oregon State University ...................................................... 25
Degree Partnership Programs .................................................................. 33
International Admissions ......................................................................... 34
Oregon Transfer Module .......................................................................... 36
Admission to Graduate School ................................................................. 39
Alumni & OSU Foundation ....................................................................... 61
Colleges, Schools, Departments, and Programs ......................................... 62
College of Agricultural Sciences ............................................................... 85

## Agricultural Education and General Agriculture ................................ 86
- Agricultural Education Graduate Major (MS, MAIS) .......................... 90
- Agricultural Education Graduate Minor .............................................. 90
- Agricultural Sciences Minor ................................................................. 90
- Agricultural Sciences Undergraduate Major (BS, HBS) .................. 91
- Comparative International Agriculture Minor .................................. 93
- Leadership Minor .................................................................................. 94

## Animal and Rangeland Sciences ......................................................... 94
- Animal Science Graduate Major (MS, PhD, MAIS) ......................... 102
- Animal Science Graduate Minor ......................................................... 102
- Animal Sciences Minor ....................................................................... 102
- Animal Sciences Undergraduate Major (BS, HBS) ......................... 102
  - Animal Behavior Option .................................................................. 105
  - Animal BioHealth/Pre-Professional Option ................................... 105
  - Animal Production Option ............................................................... 106
  - Equine Option ................................................................................. 106
  - Rangeland Science Option ............................................................... 107
- Rangeland Ecology and Management Graduate Major (MS, PhD, MAIS) .......................................................... 107
- Rangeland Ecology and Management Graduate Minor .................. 107
- Rangeland Ecology and Management Minor ..................................... 107
- Rangeland Sciences Undergraduate Major (BS, HBS) .................. 108
  - Pastoral Systems of the World Option .......................................... 109
  - Sustainable Livestock Ranching Option ........................................... 110
- Rangeland Science Undergraduate Minor .......................................... 110

## Applied Economics ............................................................................ 110
- Applied Economics Graduate Major (MA, MS, PhD, MAIS) .......... 120
- Applied Economics Graduate Minor ................................................. 120
- Environmental Economics and Policy Undergraduate Major (BS, HBS) .......................................................... 120
- Food Economics and Policy Minor ..................................................... 121
- International Agricultural Development Graduate Minor ............ 121
- Natural Resource and Environmental Law and Policy Minor ....... 121
- Resource Economics Minor ............................................................... 122
- Rural Studies Graduate Minor ........................................................... 122

## Botany and Plant Pathology ................................................................. 123
- Botany and Plant Pathology Graduate Major (MA, MS, PhD) ....... 127
- Botany and Plant Pathology Graduate Minor ................................. 128
- Botany Minor .................................................................................... 128
- Botany Undergraduate Major (BS, HBS) ........................................... 128
  - Comprehensive Botany Option ..................................................... 131
  - Customizable Option ..................................................................... 132
  - Ecology, Evolution, and Conservation Option .............................. 132
  - Molecular, Cellular, and Genomic Botany Option ......................... 133
  - Plant Pathology Option ................................................................. 133

## Crop and Soil Science .......................................................................... 133
- Crop and Soil Science Undergraduate Major (BS, HBS) ............... 143
  - Agronomy Option .......................................................................... 143
  - Plant Breeding and Genetics Option .............................................. 145
  - Soil Science Option ........................................................................ 148
- Crop Science Graduate Major (MS, PhD, MAIS) ........................... 150
  - Entomology Graduate Option ....................................................... 150
  - Plant Breeding and Genetics Graduate Option ......................... 151
- Crop Science Graduate Minor ........................................................... 151
- Crop Science Minor ........................................................................... 151
- Soil Science Graduate Major (MS, PhD, MAIS) ............................. 152
- Soil Science Graduate Minor ............................................................ 152
- Soil Science Minor ............................................................................. 152

## Entomology .......................................................................................... 152
- Entomology Graduate Major (MA, MS, PhD) .................................. 154
- Entomology Graduate Minor ............................................................. 154
- Entomology Minor .............................................................................. 154
- Environmental and Molecular Toxicology ........................................ 155
  - Toxicology Graduate Major (MS, PhD) ......................................... 158
  - Toxicology Graduate Minor ......................................................... 158
  - Toxicology Minor ........................................................................... 158

## Fisheries and Wildlife Department ...................................................... 159
Fisheries and Wildlife Administration Graduate Major (PSM) ................................................................. 167
Fisheries and Wildlife Sciences Minor .......................................................... 169
Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS) ................................................................. 170
Fisheries Management Graduate Certificate ......................................................... 175
Fisheries Science Graduate Major (MS, PhD, MAIS) ......................................................... 175
Fisheries Science Graduate Minor .......................................................... 176
Marine Conservation and Management Minor ......................................................... 176
Wildlife Management Graduate Certificate ................................................................. 177
Wildlife Science Graduate Major (MS, PhD, MAIS) ......................................................... 177
Wildlife Science Graduate Minor .......................................................... 178
Food Science and Technology .......................................................... 178
Fermentation Science Minor .......................................................... 181
Food Manufacturing Minor .......................................................... 181
Food Science and Technology Graduate Major (MS, PhD) ......................................................... 182
Food Science and Technology Graduate Minor ......................................................... 182
Food Science and Technology Undergraduate Major (BS, HBS) ................................................................. 182
Enology and Viticulture Option .......................................................... 184
Fermentation Science Option .......................................................... 187
Food Science Option .......................................................... 189
Food Science Minor .......................................................... 192
Food Technology Minor .......................................................... 192
Horticulture .......................................................... 192
Horticulture Graduate Major (MS, PhD, MAIS) ......................................................... 207
Entomology Graduate Option .......................................................... 207
Plant Breeding and Genetics Graduate Option ......................................................... 208
Horticulture Graduate Minor .......................................................... 208
Horticulture Minor .......................................................... 208
Horticulture Undergraduate Major (BS, HBS) ......................................................... 208
Ecological Management of Turf, Landscape & Urban Horticulture Option ......................................................... 210
General Horticulture Option .......................................................... 211
Horticultural Research Option .......................................................... 214
Plant Breeding and Genetics Option .......................................................... 217
Sustainable Horticultural Production .......................................................... 219
Therapeutic Horticulture Option .......................................................... 222
Viticulture and Enology Option .......................................................... 225
Turf and Landscape Management Minor .......................................................... 228
Other Degrees & Programs within the College of Agricultural Sciences ................................................................. 228
Bioenergy Minor .......................................................... 230
Bioresource Research Undergraduate Major (BS, HBS) ......................................................... 231
Animal Reproduction and Development Option ......................................................... 233
Applied Genetics Option .......................................................... 234
Bioenergy Option .......................................................... 234
Bioproducts Option .......................................................... 235
Biotechnology Option .......................................................... 236
Climate and Biosystems Modeling Option ......................................................... 236
Environmental Chemistry Option .......................................................... 237
Food Quality Option .......................................................... 237
Genomics/Bioinformatics Option ......................................................... 237
Pest Biology and Management Option ......................................................... 238
Plant Growth and Development Option ......................................................... 238
Sustainable Ecosystems Option .......................................................... 239
Toxicology Option .......................................................... 239
Water Resources Option .......................................................... 240
Sustainability Minor .......................................................... 240
Sustainability Undergraduate Major (BS, HBS) ......................................................... 242
College of Business .......................................................... 245
Accountancy Undergraduate Major (BS, HBS) ......................................................... 273
Accounting Information Systems Option ......................................................... 277
Dean's Academy Option - Accountancy ......................................................... 278
International Business Option ......................................................... 278
Accounting Certificate .......................................................... 279
Business Graduate Major (MSB) .......................................................... 280
Financial Planning Graduate Option ......................................................... 280
Supply Chain Analytics Graduate Option ......................................................... 280
Business Minor .......................................................... 281
Business Administration and Accountancy Graduate Major (MBAA) ......................................................... 281
Business Administration Graduate Major (MBA, PhD) ......................................................... 283
Accounting Graduate Option .......................................................... 284
Business Analytics Graduate Option ......................................................... 284
Corporate Finance Graduate Option ......................................................... 285
Innovation Management Graduate Option ......................................................... 285
Human Resource Management Graduate Option ......................................................... 286
Marketing Graduate Option .......................................................... 287
Organizational Leadership Graduate Option ......................................................... 287
Research Thesis Graduate Option ......................................................... 288
Strategy, Entrepreneurship, and Innovation Graduate Option ......................................................... 288
Supply Chain and Logistics Management Graduate Option ......................................................... 289
Business Administration Graduate Minor ......................................................... 290
Business Administration Undergraduate Major (BA, BS, HBA, HBS) .......................................................... 290
Dean's Academy Option ................................................. 294
Digital Marketing Option ................................................. 294
Entrepreneurship for Business Majors Option ................. 295
Family Business Option ................................................. 295
General Business Option ................................................. 295
Hospitality Management Option ................................... 295
International Business Option ....................................... 296
Marketing Option .......................................................... 296
Merchandising Management Option .............................. 296
Retail Management Option ........................................... 297
Supply Chain and Logistics Management Option .......... 297
Business Analytics Graduate Certificate .......................... 297
Business and Entrepreneurship Minor ......................... 298
Business Fundamentals Graduate Certificate ........................ 298
Business Information Systems Undergraduate Major (BA, BS, HBA, HBS) ......................................................... 299
Dean's Academy Option ................................................. 303
International Business Option ....................................... 303
Design and Innovation Management Undergraduate Major (BS, HBS) .............................................................. 304
Apparel Design Option .................................................. 308
Dean's Academy Option ................................................. 309
Design Management Option ......................................... 309
Interior Design Option .................................................. 309
Family Business Minor ................................................... 310
Entrepreneurship Minor ................................................ 310
Entrepreneurship and Innovation Management Graduate Minor ................................................................. 312
Finance Minor .............................................................. 312
Finance Undergraduate Major (BA, BS, HBA, HBS) .......... 313
Dean's Academy Option ................................................. 317
International Business Option ....................................... 318
Financial Planning Graduate Certificate ......................... 318
Hospitality Management Undergraduate Major (BA, BS) ...... 319
Innovation Management Undergraduate Major (BA, BS, HBA, HBS) .............................................................. 320
Management Undergraduate Major (BA, BS, HBA, HBS) ...... 320
Dean's Academy Option ................................................. 324
International Business Option ....................................... 324
Marketing Minor .......................................................... 325
Marketing Undergraduate Major (BA, BS, HBA, HBS) .......... 325
Dean's Academy Option ................................................. 330
International Business Option ....................................... 331
Merchandising Management Minor ............................... 331
Merchandising Management Undergraduate Major (BS, HBS) .... 332
Dean's Academy Option ................................................. 336
Professional Sales Minor ............................................... 336
School of Design and Human Environment ...................... 336
Apparel Design Undergraduate Major (BS, HBS) .............. 343
Design and Human Environment Graduate Major (MA, MS, PhD, MAIS) ............................................................ 344
Design and Human Environment Graduate Minor .......... 344
Interior Design Undergraduate Major (BS, HBS) .......... 344
Pre-Interior Design ....................................................... 348
Supply Chain and Logistics Management Graduate Certificate .... 349
College of Earth, Ocean, and Atmospheric Sciences ............ 350
Earth Sciences Minor .................................................... 370
Earth Sciences Undergraduate Major (BS, HBS) ............... 370
Climate Science Option ................................................. 371
Geology Option ........................................................... 372
Ocean Science Option ................................................ 373
Environmental Sciences Minor ....................................... 374
Environmental Sciences Undergraduate Major (BS, HBS) ...... 375
Alternative Energy Option .............................................. 377
Applied Ecology Option ............................................... 378
Aquatic Biology Option ............................................... 379
Conservation, Resources, and Sustainability Option ........... 379
Earth Systems Option ................................................ 380
Environmental Agriculture Option ................................. 381
Environmental Policy and Economics Option ................. 382
Environmental Science Education Option ....................... 383
Environmental Water Resources Option ....................... 384
Geographic Information Science Certificate .................... 384
Geographic Information Science Graduate Certificate ........... 385
Geography and Geospatial Science Undergraduate Major (BS, HBS) ............................................................ 386
Geography Graduate Major (MA, MS, PhD) .................... 391
Geography Graduate Minor .......................................... 391
Geography Minor ........................................................ 391
Geology Graduate Major (MA, MS, PhD, MAIS) ............... 392
Geology Graduate Minor .......................................... 393
Geology Minor .......................................................... 393
Marine Resource Management Graduate Certificate .......... 393
Marine Resource Management Graduate Major (MA, MS) .......... 394
Marine Resource Management Graduate Minor .................... 394
Ocean, Earth and Atmospheric Sciences Graduate Major (MA, MS, PhD, MAIS) ............................................................... 394
Ocean, Earth and Atmospheric Sciences Graduate Minor .......... 395
Oceanography Minor ......................................................... 395
Risk and Uncertainty Quantification in Earth Systems Graduate Minor ................................................................. 396
Sustainability Minor ............................................................ 397
Water Conflict Management and Transformation Graduate Certificate ........................................................... 399
Water Conflict Management and Transformation Graduate Minor ............................................................... 400
College of Education .......................................................... 402
Adult and Higher Education Graduate Major (EDD, EDM, PhD, MAIS) ................................................................. 419
  Community College Leadership Graduate Option ................. 419
  Leadership in Higher Education Graduate Option ................. 420
Adult Education Graduate Minor ............................................. 420
Counseling Graduate Major (MCOUn, PhD) ............................. 420
Clinical Mental Health Counseling Graduate Option ............... 422
Counselor Education Graduate Option .................................. 423
School Counseling Graduate Option .................................... 423
Counseling Graduate Minor .................................................. 423
Education Graduate Major (EDD, EDM, MS, PhD, MAIS) ........ 423
  Advanced Science and Mathematics Education Graduate Option ................................................................. 425
Agricultural Education Graduate Option ................................ 425
Free-Choice Learning Graduate Option .................................. 426
Language Equity and Educational Policy Graduate Option ...... 426
Mathematics Education Graduate Option ............................... 426
PK-12 English to Speakers of Other Languages (ESOL) Graduate Option ................................................................. 426
Science Education Graduate Option ...................................... 427
Science/Mathematics Education Graduate Option ................. 427
Social Justice Education Graduate Option .............................. 427
Education Graduate Minor ................................................... 427
Education Minor ............................................................... 427
Education Undergraduate Major (BA, BS, HBA, HBS) .............. 428
  Advanced Mathematics Teaching Option ......................... 430
  Basic Mathematics Teaching Option ................................. 431
  Biology Teaching Option .................................................. 432
  Chemistry Teaching Option .............................................. 433
  Early Childhood/Elementary Teaching Option .................... 434
Family and Consumer Sciences Teaching Option ..................... 436
Health Teaching Option ................................................... 438
Integrated Science Teaching Option ..................................... 439
Language Arts Teaching Option ......................................... 441
Physics Teaching Option ................................................... 443
Social Studies Teaching Option .......................................... 444
Elementary Education Undergraduate Major (BS, HBS) .......... 447
Mathematics Education Graduate Major (MA, MS, PhD) ........ 450
Mathematics Education Graduate Minor .............................. 450
Pre-Education ............................................................... 450
Science Education Graduate Major (MA, MS, PhD) ............... 450
Science Education Graduate Minor ..................................... 450
Teaching Graduate Major (MAT) .......................................... 450
  Clinically Based Elementary Graduate Option .................. 451
  Elementary Graduate Option ........................................... 451
  Language Arts Graduate Option ..................................... 451
  Mathematics Graduate Option ....................................... 452
  Music Graduate Option ................................................ 452
  Science Graduate Option .............................................. 453
  Social Studies Graduate Option ..................................... 453
College of Education .......................................................... 454
Biological and Ecological Engineering .................................. 457
  Biological and Ecological Engineering Graduate Major (MENG, MS, PhD) ................................................................. 460
  Biological and Ecological Engineering Graduate Minor ........ 460
  Ecological Engineering Undergraduate Major (BS, HBS) .... 460
  Irrigation Engineering Minor .......................................... 465
  Pre-Ecological Engineering ............................................ 465
Other Degrees & Programs within the College of Engineering .... 465
  Humanitarian Engineering Minor .................................... 468
  International Engineering Minor .................................... 469
School of Chemical, Biological and Environmental Engineering .... 470
  Bioengineering Graduate Major (MENG, MS, PhD) ............ 477
  Bioengineering Undergraduate Major (BA, BS, HBA, HBS) ... 478
  Chemical Engineering Graduate Major (MENG, MS, PhD) ... 481
  Chemical Engineering Graduate Minor ............................ 482
  Chemical Engineering Undergraduate Major (BA, BS, HBA, HBS) ................................................................. 482
Environmental Engineering Graduate Major (MENG, MS, PhD, MAIS) ................................................................. 486
Environmental Engineering Graduate Minor ........................ 487
Environmental Engineering Minor ....................................... 487
Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS) ........................................ 488
Pre-Chemical Engineering ............................................... 490
Pre-Environmental Engineering ........................................... 491
Pre-Professional Bioengineering ......................................... 492
School of Civil and Construction Engineering ......................... 493
Architectural Engineering Graduate Major (BS, HBS) ............... 496
Civil Engineering Graduate Major (MENG, MS, PhD, MAIS) ...... 498
Civil Engineering Graduate Minor ...................................... 498
Civil Engineering Undergraduate Major (BA, BS, HBA, HBS) .... 498
Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS) .......................................... 501
Pre-Civil Engineering ..................................................... 504
Pre-Construction Engineering Management ............................ 505
School of Electrical Engineering and Computer Science .......... 506
Computer Science Graduate Major (MA, MENG, MS, PhD, MAIS) .......................................................... 521
Computer Science Graduate Minor ..................................... 522
Computer Science Minor .................................................. 522
Computer Science Undergraduate Major (BA, BS, HBA, HBS) .... 522
Applied Computer Science Option ..................................... 523
Computer Science Double Degree Option ............................. 523
Computer Systems Option ................................................ 524
Electrical and Computer Engineering Graduate Major (MENG, MS, PhD) ...................................................... 525
Electrical and Computer Engineering Graduate Minor ............. 525
Electrical and Computer Engineering Undergraduate Major (BS, HBS) ........................................................... 525
Pre-Computer Science ..................................................... 528
Pre-Electrical and Computer Engineering .............................. 528
School of Mechanical, Industrial, and Manufacturing Engineering ................................................................. 529
Aerospace Engineering Minor ............................................ 546
Energy Systems Engineering Undergraduate Major (BS, HBS) .... 546
Industrial Engineering Graduate Major (MENG, MS, PhD, MAIS) .............................................................. 547
Advanced Manufacturing Graduate Option .......................... 547
Engineering Management Graduate Option ........................... 548
Human Systems Engineering Graduate Option ........................ 548
Information Systems Engineering Graduate Option ................. 548
Manufacturing Systems Engineering Graduate Option ............... 548
Industrial Engineering Graduate Minor ............................... 549
Industrial Engineering Undergraduate Major (BS, HBS) .......... 549
Business Engineering Option .......................................... 552
Manufacturing Engineering Undergraduate Major (BS, HBS) .... 552
Manufacturing Systems Option ......................................... 554
Product Development Option .......................................... 554
Materials Science Graduate Major (MS, PhD) .......................... 555
Materials Science Graduate Minor .................................... 555
Materials Science Minor .................................................. 555
Mechanical Engineering Graduate Major (MENG, MS, PhD) .... 556
Advanced Manufacturing Graduate Option .......................... 556
Design Graduate Option .................................................... 557
Engineering Management Graduate Option .......................... 557
Materials Mechanics Graduate Option ................................ 557
Renewable Energy Graduate Option ................................... 557
Robotics Graduate Option .................................................. 558
Thermal Fluid Sciences Graduate Option .............................. 558
Mechanical Engineering Graduate Minor ............................... 558
Mechanical Engineering Undergraduate Major (BS, HBS) ........ 558
Pre-Energy Systems Engineering ....................................... 559
Pre-Industrial Engineering ............................................... 559
Pre-Manufacturing Engineering ........................................... 560
Pre-Mechanical Engineering ............................................. 561
Robotics Graduate Major (MENG, MS, PhD) .......................... 562
Robotics Graduate Minor .................................................. 563
School of Nuclear Science and Engineering ............................ 563
Medical Physics Graduate Major (MMP, MS, PhD) ................. 570
Nuclear Engineering Graduate Major (MENG, MS, PhD) .......... 570
Nuclear Engineering Graduate Minor ................................... 570
Nuclear Engineering Minor ................................................ 570
Nuclear Engineering Undergraduate Major (BS, HBS) .......... 571
Pre-Nuclear Engineering .................................................... 572
Pre-Radiation Health Physics ............................................. 573
Radiation Health Physics Graduate Major (MHP, MS, PhD) ....... 574
Radiation Health Physics Graduate Minor ............................ 575
Radiation Health Physics Minor .......................................... 575
Radiation Health Physics Undergraduate Major (BS, HBS) ....... 575
Radiation Health Physics - Pre Med Option .......................... 577
College of Forestry .......................................................... 579
Forest Ecosystems and Society ........................................... 580
Forest Ecosystems and Society Graduate Major (MF, MS, PhD, MAIS) ...................................................... 590
Forests and Climate Change Graduate Certificate .................... 591

ACADEMIC ADVISING AT OREGON STATE UNIVERSITY

Academic Advising

OSU recognizes that quality academic advising is integral to the academic development and well-being of students. Quality academic advising includes both the prescriptive elements of advising (assisting with course selection, maintaining curriculum checklists, tracking degree progress and completing degree audits, etc.) and the developmental aspects of advising (major and career decision making, integration in campus and academic cultures, assistance with and referrals surrounding issues affecting a student’s academic success, etc.).

While each college has developed an advising system sensitive to the needs of its academic disciplines and departments, there is consistency in that each also has a head advisor. Undeclared students receive advising through the University Exploratory Studies Program (UESP).

Vision

Oregon State University aspires to be recognized nationally for excellence in academic advising among land grant institutions.

Mission

Oregon State University academic advising is a teaching and learning process dedicated to student success. Academic advising engages students in developing a plan to realize their educational, career and life goals.

Values

The values associated with OSU advising are closely aligned with the stated values of the university.

Accountability: We are committed to providing timely, accurate, and intentional advising.

Diversity: We honor the unique nature and interests of each student. Advising services and delivery methods will be shaped to fit the diverse needs of our campus populations.

Respect: We seek to establish a reciprocal relationship with students based on an ethic of care and shared responsibility.

Social Responsibility: We foster a culture of independent thinking and global awareness so that students make informed, socially responsible choices consistent with their academic, career and life goals.

Integrity: We seek to engage students in a fair and professional process of meaningful self-reflection and authentic inquiry.

Purpose of Academic Advising

Academic Advisors act as interpreters of the OSU learning environment and facilitators to the undergraduate degree experiences. In working toward degree completion, an advisor can help make sense of options, obligations, and opportunities related to student’s academic interests. An advisor can also help students start to think about how undergraduate learning relates to career opportunities. An advisor can help in the decision-making process, especially when the relationship is based on openness, honesty, and trust. Above all, an academic advisor is a person who is invested in helping students create rewarding learning experiences.

For the advising relationship to be effective, students and advisors both need to be engaged in the process. OSU advisors have created this list of Advisor-Advisee Responsibilities to outline the obligations of each:

As an advisee, you should:

- Understand and accept that you are ultimately responsible for your education and your own decisions.
- Initiate a purposeful relationship with your advisor and make appointments when requested and/or when necessary.
- Utilize the technological resources available to you (MyDegrees (https://login.oregonstate.edu/cas/login?service=https%3A%2F%2Fmyosu.oregonstate.edu%3A443%2FcFportal%2Flogin)), OSU Online Catalog and Schedule of Classes (http://catalog.oregonstate.edu/), Baccalaureate Core website (http://oregonstate.edu/main/baccalaureate-core), your college, school, or department website (http://oregonstate.edu/main/academics) to inform yourself about your degree requirements and options.
- Prepare for and be active in your advising session, and ask questions when you have them.
- Work to clarify your personal values, abilities, and goals and share them with your advisor.
- Provide accurate and truthful information when being advised.
- Keep your local address and phone up to date in Online Services and utilize and check your ONID account daily for important information coming from your advisor and the institution.
- Learn and understand OSU's policies, procedures, and requirement as they relate to your academic success and/or degree completion.
- Follow through on plans-of-action identified during advising sessions.
- Be aware of and abide by academic calendar deadlines (http://registrar.oregonstate.edu/osu-academic-calendar).
- Call to cancel appointments that cannot be kept.

Your advisor should:

- Develop a purposeful relationship with and be an advocate for their advisees.
- Inform students of the nature of the advisor/advisee relationship.
- Assist students in defining and developing expressed educational, career, and life plans.
- Provide timely and accurate educational information.
- Promote learning opportunities that will help students define or meet personal goals and plans.
- Assist students in preparing a program that is consistent with their abilities and interests.
- Monitor progress toward educational/career goals.
- Interpret and provide rationale for institutional policies, procedures and requirements.
- Inform inquiring students of campus resources and special services available to them.
- Refer students to those resources that can enhance or supplement their academic or personal experience.

ACADEMIC REGULATIONS

Introduction

These regulations and procedures are published to assist students by providing information that is essential for planning and pursuing their academic programs. Continuing efforts are made each year by the students, faculty, and administration to revise and improve these regulations in order to enhance the quality of the university's programs and the achievement of educational goals.

Every student is responsible for knowing the academic regulations and for observing the procedures that govern him or her relations with Oregon State University. Unless otherwise specified, these regulations apply to both undergraduate and graduate students. Any question regarding these regulations that cannot be answered by a student's academic advisor should be referred directly to the Office of the Registrar (B102 KAd). Additional information regarding Graduate School policies should be addressed to the Office of the Graduate Dean (A300 KAd).

Some students encounter special problems whose proper solution may require deviations from the academic regulations or procedures. Requests for such deviations in the regulations below must be presented to the Office of the Registrar on petition forms, which are available in that office. Petitions received by the registrar will be forwarded to the proper committee or office for review and appropriate action. Requests for deviations from Graduate School policies should be presented by letter to the graduate dean (See the Graduate School section of this catalog).

Other special problems may involve academic issues such as academic freedom in the classroom or evaluations of a student's academic performance. All students should appeal academic grievances first to the instructor of the course and then to the chair or head of the academic unit in which the course is offered. If the situation is not resolved to the student's satisfaction, an undergraduate student should consult with the head advisor of the college in which the course is offered. If the situation is not resolved to the student's satisfaction, a graduate student should consult the dean of the Graduate School and specific academic programs is advised.

a. Nondegree enrollment status for undergraduate students is designed for students who wish to take undergraduate classes, but do not wish to pursue a degree or a specific postbaccalaureate credential. Nondegree undergraduate students are limited to taking a maximum of 8 credits per term. Nondegree Ecampus, International Exchange, credential and certificate students are not limited to 8 credits per term.

b. A maximum of 36 credits attempted as a nondegree undergraduate student may be used to satisfy Baccalaureate degree requirements upon admission as a degree-seeking student. The most recent 36 credits (or all credits if fewer than 36) will be applied to the Baccalaureate requirements.

c. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses but do not wish to pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) taken per term.

d. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. The student should refer to the admission requirements given in the Graduate School section of this catalog. Communication with the Graduate School and specific academic programs is advised.

e. Nondegree students seeking admission to a degree program may do so by filing an undergraduate, postbaccalaureate, or graduate application for admission.

AR 1. Admission for Nondegree Students

a. Nondegree enrollment status for undergraduate students is designed for students who wish to take undergraduate classes, but do not wish to pursue a degree or a specific postbaccalaureate credential. Nondegree undergraduate students are limited to taking a maximum of 8 credits per term. Nondegree Ecampus, International Exchange, credential and certificate students are not limited to 8 credits per term.

b. A maximum of 36 credits attempted as a nondegree undergraduate student may be used to satisfy Baccalaureate degree requirements upon admission as a degree-seeking student. The most recent 36 credits (or all credits if fewer than 36) will be applied to the Baccalaureate requirements.

c. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses but do not wish to pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) taken per term.

d. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. The student should refer to the admission requirements given in the Graduate School section of this catalog. Communication with the Graduate School and specific academic programs is advised.

e. Nondegree students seeking admission to a degree program may do so by filing an undergraduate, postbaccalaureate, or graduate application for admission.

AR 1 revised by Faculty Senate academic year 2012–2013.

AR 2. Credit from a Two-Year Institution (Undergraduate Students)

a. College Transfer Credits: Oregon State University accepts for credit toward a baccalaureate degree all college transfer work completed at an Oregon or other regionally accredited community college up to 124 lower-division quarter credits. For Institutional Requirements for Baccalaureate Degrees, see AR 25. Students are encouraged to work with the relevant academic unit to ensure that transfer credits meet department and college requirements for the degree. It would be unlikely for an individual student to be able to use all 124 credits toward an OSU baccalaureate degree. Transfer credits and grades are not used in calculating the OSU cumulative GPA. Students who hold OSU-approved direct transfer degrees from Oregon or other regionally accredited community colleges (e.g., the Associate of Arts Oregon Transfer) or who have 90 or more credits accepted in transfer will be granted junior standing.¹ Students who hold OSU-approved direct transfer degrees will be considered to have met the Perspectives and Skills (except WIC) areas of the Baccalaureate Core. In addition, they must complete the upper-division Synthesis areas of the core. Students transferring from Oregon or other regionally accredited community colleges who do not hold approved direct transfer degrees ordinarily will be given baccalaureate core credit in the Perspectives and Skills area on a course-by-course basis for work that is judged to be equivalent in content.

b. Transfer of Professional-Technical Credits: a maximum of 12 quarter credits (8 semester credits) of professional-technical course work applicable in an associate's degree or certificate program at a regionally accredited institution can be accepted upon admission to OSU as general elective credit (graded as Pass) and as part of the 124-quarter credit total that can be applied toward a baccalaureate degree.

c. Transfer of Professional-Technical Course Credits through Articulation Agreements: Lower-division OSU credit may be awarded for specific professional-technical community college courses when those courses are validated by articulation agreement with the appropriate OSU department. This may be above the 12 quarter credits of general electives (graded as Pass) allowed when a student is admitted to OSU. Credit will be awarded only upon the recommendation of the appropriate department and college, and approval by the Curriculum Council. Community college professional-technical course work is not equated to upper-division OSU course work. These course credits will count as part of the 124 quarter...
credits defined in paragraph 2a above. OSU departments who have articulation agreements with community colleges regarding community college professional-technical courses shall review the agreements annually and forward a dated list of the articulated community college courses to the Curriculum Council.  

1 Junior standing does not necessarily imply that OSU institutional, college, division, and/or departmental requirements, which are normally satisfied by OSU students prior to their junior year, have been satisfied.

AR 3. Credit from an Unaccredited Institution (Undergraduates)

After three terms of work at Oregon State University satisfactory to the Undergraduate Admissions Committee, a student may request validation of work done in an unaccredited institution of collegiate rank. The committee will consider each petition separately and base its decision on all information available. In some instances, informal examinations by the departments concerned may be required. Credit for transfer of professional-technical work will be awarded in accordance with paragraphs AR 2, b and c.

AR 4. Classifying Students

a. Undergraduate students: A student who has earned at least 45 credits is classified as a sophomore. A student who has earned at least 90 credits is classified as a junior. A student who has earned at least 135 credits is classified as a senior.

b. Postbaccalaureate students: A student holding a baccalaureate degree who is admitted to work toward a second baccalaureate degree or teaching certificate is classified as a postbaccalaureate student.

c. Graduate students: A student who has been admitted to the Graduate School is classified as a graduate student.

AR 5. Transfer from One College to Another (Undergraduate Students)

Registered students may transfer from one college to another at any time. Returning but not-registered students may transfer colleges between the dates of readmission and registration.

AR 6. Change in Credits Scheduled

No change may be made in the number of credits specified for the various courses and published in the OSU Academic Catalog.

AR 7. Maximum and Minimum Registration

1. The minimum number of credits for which a full-time undergraduate student may register is 12, and the maximum is 19, regardless of the method of grading used for the classes selected. (In determining the load for students not normally held responsible for physical education, the credits in activity courses in physical education will be disregarded.) The maximum may be extended:

   a. Up to and including 24 credits when a student has completed in his or her most recent term at least 12 credits in courses other than those graded P/N and S/U with a grade-point average of 3.00 or better or when a student has filed with the registrar a petition approved by his or her advisor and college dean (or head advisor).

   b. Over 24 credits by petition approved by a student's advisor and college dean (or head advisor) and the Academic Requirements Committee and filed with the registrar.

2. The minimum number of credits for a full-time graduate student is 9; the maximum is 16. The maximum can be extended by approval of the dean of the Graduate School.

   a. Degree-seeking graduate students must take a minimum of 3 credits for any term in which they are enrolled.

   b. The following FTE and credit allowances are permitted for graduate students holding an academic appointment.

<table>
<thead>
<tr>
<th>FTE</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>.15 to .29</td>
<td>15</td>
</tr>
<tr>
<td>.30 to .50</td>
<td>12</td>
</tr>
</tbody>
</table>

   Appointees on graduate assistantships are limited to the above credits during each term.

AR 8. Late Registration

Registration is permitted through the second full week of classes each term. Late fees are assessed in accordance with the fee policies stated in the 'Tuition, Fees and Payment' (p. 1963) information in the Academic Catalog.

AR 9. Admission to Class

a. Instructors will receive lists of students in their classes within two days after the opening of the term. Subsequent lists will include the names of later registrants. Students whose names appear on these lists are officially registered; others are to be referred immediately to the Registrar's Office for completion of registration.

b. If it is anticipated that the demand for enrollment in a given course will exceed the maximum number that can be accommodated, the department offering the course may designate it in the Schedule of Classes with the code "NSHD" (no-show-drop). A student who is registered for such a course who attends no meetings of the course during the first five school days of the term will be dropped from the course by the instructor, unless the student has obtained prior permission for absence. If such action is taken, the instructor will send written notice through the department to the Registrar's Office, which in turn will notify the student that the course has been dropped from his or her schedule. Students should not assume they have been dropped unless they receive notification from the Registrar's Office. No fee will be charged.

AR 10. Eligibility

To be eligible to hold office or to participate in any extracurricular activity supervised by Oregon State University, students must meet certain requirements.

1. For student activities, students are responsible for following the Student Life Policy and procedures.

2. For participation in intercollegiate athletics, students must meet all institutional Pac-12 and NCAA requirements. Students should contact the Compliance Office in the Department of Intercollegiate Athletics on all such matters.

AR 11. Adding and Dropping Courses

1. Students may add courses through the second full week of classes each term, depending on the nature of the course and the availability
AR 12. Withdrawal from Individual Classes
Any student may withdraw from a maximum of 12\(^1\) credit bearing classes throughout their undergraduate career\(^2\) at OSU\(^3\). Any student may petition for an exception from this limitation if the justification for withdrawal is clearly associated with circumstances beyond the student’s control. Withdrawal from a class with a W grade begins after the drop deadline, which is the first full week of classes, and continues through the seventh full week of classes. After the seventh full week of classes, students are expected to complete the program attempted and will receive letter grades (A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, S, U, P, or N) for all classes in which enrolled unless they officially withdraw from the term. Procedures for withdrawal from individual classes can be found on the Office of the Registrar website.

AR 13. Withdrawal from the Term
a. Any student is entitled to Withdraw from the Term up to four times without prejudice prior to the beginning of finals week. The student may accomplish this by completing the online withdrawal survey available through online services. Withdrawal from the term prior to the beginning of finals week will result in the grade of W being recorded for each course for which the student is registered.

b. When a student’s academic progress is interrupted by an emergency situation such as serious illness, accident, or death of a family member, and the emergency situation occurs within the last four weeks of the term, and the student submits evidence to the college head advisor, then the student will work with academic advisors, faculty members, student care teams or Ecampus student services, depending on the complexities of the circumstances to determine an appropriate course of action to determine the grades for the term.

c. Undergraduate Planned Educational Leave Program. The Undergraduate Planned Educational Leave Program (PELP) is a voluntary, temporary, planned interruption or pause in a student’s regular, full-time education. Its purpose is to enhance an undergraduate student’s prospect of successful completion of their academic program. The PELP provides one opportunity\(^1\) for a student to arrange a voluntary absence for as many as six consecutive regular academic terms (not including summer terms). The PELP is designed to allow a student to pursue other activities that will assist them in clarifying their educational goals, such as job opportunities and experiences away from campus, military deployment, time to resolve personal or medical problems, or other similar pursuits.

The PELP allows an undergraduate student to temporarily suspend their academic work for a period of time (in accordance with AR 13a and 13b), and resume their studies with minimal procedural difficulties. The PELP $25 non-refundable application fee allows an undergraduate student to maintain their official standing as a student at OSU and reserves the student’s right to keep their original academic catalog\(^2\) active during their absence. Beginning with the 2011–2012 academic year, all OSU undergraduate students\(^3\) are eligible to request leave through the PELP. The university reserves the right to consider a student’s current academic standing and any existing student conduct issues prior to approving the voluntary PELP leave request. Students who withdraw from OSU prior to the 2011–2012 academic year and who are away from campus for four or more consecutive regular academic terms (not including summer terms) must re-enroll with OSU to re-establish their relationship as an OSU student and their academic catalog will be reset to the academic year they return to OSU.

Transcript Notation
A notation of the dates of any approved leave will be indicated on each student’s official transcript.

AR 14. Attendance
Attendance is one of the most important factors in a student’s academic success. Therefore, an instructor may consider attendance as part of a course grade. If attendance is used in determining the student’s grade, how attendance shall be used needs to be defined in the course syllabus by the instructor.

AR 15. Academic Misconduct
Definitions and examples of academic misconduct are outlined in the Code of Student Conduct, Section 4.2.1. (http://studentlife.oregonstate.edu/code)

The administration of the classroom rests with the instructor. When potential academic misconduct comes to the instructor’s attention, the instructor documents the incident and permits the student to provide an explanation. If the matter can be resolved without an academic sanction, no report is necessary. If the instructor believes academic misconduct has occurred and that the violation warrants the application of an academic sanction, the instructor: (a) consults with the unit head, (b) submits an Academic Misconduct Report (AMR) documenting the allegations and indicating the proposed sanction, and (c) informs the student of the action taken. The instructor may recommend any academic sanctions.

Allegations of academic misconduct are reviewed and adjudicated by a college-designated hearing officer (CHO) in accordance with the procedures outlined in the Code of Student Conduct, Section 5.11 (http://studentlife.oregonstate.edu/code). If the student is not a major in the...
college in which the course is offered, the CHO of the college in which the student is a major also receives a copy of the AMR.

Depending upon the severity of the violation, or if a record of previous academic misconduct exists, the college and/or university may impose additional sanctions. Sanctions imposed as a result of academic misconduct may be appealed by the student in accordance with the procedures outlined in the Code of Student Conduct, Section 8. (http://studentlife.oregonstate.edu/code)

AR 16. Finals Week
1. No final, midterm, or comprehensive examinations shall be given during the week preceding final examination week. (Examinations on laboratory work, course material covered by “weekly” or “section” quizzes, television courses, ROTC activities, and physical education activities are allowed.)
2. Course work shall continue up to final week. Final examinations shall be given during finals week in accordance with the finals week schedule. If a final examination is not to be given in a course, this action must be approved by the department with notification to the Registrar’s Office. Requests for changes in the time of final examinations will be submitted to the Registrar’s Office.
3. All student petitions for changes in the time of final examinations must be made using forms available from the Registrar’s Office. (A summary of university final examination policy is printed on the form.) Petitions for changing final examinations are submitted directly to the instructor. Students may forward disapproved petitions through the dean of the college to the Registrar’s Office. Requests to change the assigned final examination time for an entire class must be approved by the Registrar’s Office. Final examinations may not be changed to the week preceding final week without approval of the Academic Requirements Committee.
4. No extracurricular activities or curricular activities other than examinations and final class meetings shall be scheduled during final week.

AR 17. Grades
The grading system consists of twelve basic grades, A, A–, B+, B, B–, C+, C, C–, D+, D, D–, and F. The grade of A denotes exceptional accomplishment; B; superior; C; average; D; inferior; F, failure. Other marks are I, incomplete; W, withdrawal; R, thesis in progress; P, pass; N, no-credit; S, satisfactory; U, unsatisfactory; AUD, audited course; WAU, withdrawal from audited course; NG, no basis for a grade (administratively assigned by the Office of the Registrar, see below); WC, complete withdrawal.

When a requirement of a course has not been completed for reasons acceptable to the instructor and the rest of the academic work is passing, a report of I (incomplete) may be made and additional time granted. The I grade is only granted at the discretion of the instructor. The instructor must submit the grade the student will earn if the missing work is not completed; this is the alternate grade. The alternate grade will become the default grade if the missing work is not completed as part of the contract for completion of the grade. The instructor documents the deficiency and the deadline for completing the missing work. A record of the deficiency shall be kept on file in the unit or department office. The allotted time awarded shall not exceed one calendar year except by petition 1 or the time of the degree conferral, whichever comes first. To remove the I grade, the student must complete the deficiency within the allotted time and the instructor will then submit the appropriate grade. If the student fails to complete the work within the allotted time, the Registrar’s Office will automatically change the I grade on the student’s record to the alternate grade submitted by the instructor at the time the I was given. The alternate grade will be included in the grade point average. Under no circumstances shall a student who earns an A–F grade or an N or U grade have his or her grade changed retroactively to an I grade.

An instructor may move to correct a grade by filing a Change of Grade in the Registrar’s Office. Grade changes for students of a permanently separated instructor will be managed by the department chair of the course involved. Upon permanent separation from the university an instructor’s change of grade will not be accepted by the Office of the Registrar. The Office of the Registrar will routinely review grade changes.

1 A student may petition via the Office of the Registrar for an extension of the one calendar year deadline with the concurrence of the faculty. An approved petition will grant an extension of a single additional term, with a maximum of three total extensions being possible. An approved petition for an extension of time to remove an incomplete will be voided at the time of degree conferral.

AR 18. Alternative Grading Systems
In addition to traditional letter grading (A–F), Oregon State University has adopted two alternative grading systems to be employed in accordance with the provisions outlined below:

a. Satisfactory/Unsatisfactory (S/U)
   1. Undergraduate students may elect to be graded on a Satisfactory/Unsatisfactory (S/U) basis in a course (except P/N courses) under the following conditions:
      a. A maximum of 36 credits of those presented in satisfaction of the baccalaureate degree may have been graded on an S/U basis at Oregon State University.
      b. A student normally elects the option S/U at the time of registration. Changes either to or from S/U grading will be permitted through the end of the seventh full week of any term.
      c. A student must obtain the approval of his or her academic advisor or dean in order to elect to be graded on an S/U basis.
   2. Graduate students may elect to take undergraduate courses on the S/U basis except those courses required for the removal of deficiencies. Graduate courses may also be taken on an S/U basis. (Such courses cannot be used as part of a student’s graduate program. All other provisions of S/U grading apply to graduate students.)
   3. A grade of S (satisfactory) shall be equivalent to grades A, A–, B+, B, B–, C+, C, and C–. A grade of U (unsatisfactory) shall be equivalent to grades D+, D, D–, or F.
   4. Grades of S or U shall have no grade-point equivalents; hence such grades shall not be included in the computation of grade-point averages. The credit of courses in which an S grade is obtained shall be counted toward graduation. Credits shall not be awarded for U grades.
   5. Election of S/U grading for a course shall be known only to the student and the academic advisor. Instructors shall enter on grade forms the traditional letter grade (A–F) earned. Automatic conversion to S grades and to U grades will be made in the Registrar’s Office. Grades of I, or W may be assigned wherever appropriate.
   6. In compliance with Section III of the Statement on Student Rights, Freedoms, and Responsibilities (dated April 28, 1969),
AR 19. Grade Points

Grade points are computed on the basis of:

- 4 points for each credit of A grade,
- 3.7 for each credit of A– grade,
- 3.3 for each credit of B+ grade,
- 3.0 for each credit of B grade,
- 2.7 for each credit of B– grade,
- 2.3 for each credit of C+ grade,
- 2.0 for each credit of C grade,
- 1.7 for each credit of C– grade,
- 1.3 for each credit of D+ grade,
- 1.0 for each credit of D grade,
- 0.7 for each credit of D– grade, and
- 0 for each credit of F.

Marks of I, W, P, N, NG, R, S, U, AUD, WAU, and WC are disregarded in the computation of points. The grade-point average (GPA) is the quotient of total points divided by total credits; total credits are the number of term credits in which grades A, B, C, D, and F are received. Thus a person receiving 1 credit of A, 2 credits of B, 3 credits of C, 4 credits of D, 5 credits of F would have 20 grade points (1 x 4 plus 2 x 3 plus 3 x 2 plus 4 x 1 plus 5 x 0). The grade-point average would be 20 (grade points) divided by 15 (credits) equals 1.33. A C average on 15 credits attempted would require 30 grade points; if the student has 20 points, he or she is 10 grade points deficient.

AR 20. Repeated Courses

If a student repeats an Oregon State University course, the grade from each attempt will appear on the student's academic record but only the second attempt will count toward the student's institutional credits, requirements, and grade-point average. An academic unit may, however, include subsequent attempts after the second attempt to meet individual course degree requirements associated with the baccalaureate core/majors/options/minors/certificates/endorsements. A course may not be repeated on an S/U basis if it was taken previously on a normal grade basis.

AR 21. Honor Roll

At the close of each term, the OSU Registrar publishes a list containing the names of all undergraduate and postbaccalaureate students who for the term have completed at least 12 graded credits with a grade-point average of 3.50 or above.

AR 22. Satisfactory Academic Standing (for Undergraduate Students)

Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings determined for students seeking a baccalaureate degree according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors. Any student who is not on Academic Warning, Academic Probation, or Academic Suspension is in good standing.

1. Academic Warning: Students with a term GPA below 2.0 will be placed on Academic Warning.
2. **Academic Probation:** Students who have attempted 24 or more credits at OSU and have an OSU cumulative GPA below 2.0 will be placed on Academic Probation. Students who attain a cumulative GPA of 2.0 or better are removed from Academic Probation.

3. **Academic Suspension:** Students who are on Academic Probation and have a subsequent term GPA below 2.0 will be placed on Academic Suspension. Academic Suspension is recorded on the student’s academic record. Students who are academically suspended are denied all the privileges of the institution and of all organizations in any way connected to it, including any university-recognized living group.

4. **Reinstatement to the University:** Suspended students will be considered for reinstatement to the university after two years or completion of a minimum of 24 quarter credits of transferable college-level work at an accredited college or university, with a GPA of 2.5 or above.

The Faculty Senate Academic Standing Committee (http://senate.oregonstate.edu/academic-standing-committee) is responsible for enforcement of the above regulations on Satisfactory Academic Standing. Additionally, this committee has discretionary authority to grant exceptions and to develop guidelines for administering these regulations.

---

**AR 23. Special Examination for Credit**

A regularly enrolled student in good standing, either graduate or undergraduate, currently registered at Oregon State University and wishing credit for an OSU course for which a grade has not been previously received, may petition for credit examination under the following conditions:

1. The application for such examination shall be presented on an Official Student Petition and shall bear the approvals of the dean of the student’s college, the dean of the college in which the course is offered, and head of the department in which the course is offered. Petitions for special examination for credit may be approved or denied at the sole discretion of the department/college offering the course.

2. In no case may such examination be based on work used for graduation from high school, or in a foreign language that is the mother tongue of the applicant, or in courses not listed in the Oregon State University Academic Catalog.

3. Grades earned in special examinations shall be submitted and recorded in the same way as for regularly registered courses, and will count with respect to repeating a course as defined in AR 20.

4. A student may not petition for credit by special examination for a course in any term in which the student is or has been enrolled in the course after the add/drop deadline for that term.

5. An examination for credit will not be approved for courses below the level for which college credit has previously been granted.

6. No examination may be taken until the applicant has received a permit from the Registrar’s Office, for which a fee of $80 will be charged.

---

**AR 24. Special Examination for Waiver (Undergraduate Students)**

A student may petition for examination to waive a course under the following conditions:

1. The application for examination to waive a course shall be presented on an Official Student Petition and shall bear the recommendations of the dean of the student’s college, the dean of the college in which the course is offered, and head of the department in which the course is offered. Petitions for special examination for waiver may be approved or denied at its sole discretion by the department/college offering the course.

2. No examination may be taken until the applicant has received a permit from the Registrar’s Office, for which a fee of $80 will be charged.

3. A minimum grade of C (or equivalent) must be attained in an examination for that waiver to be granted.

4. Credit will not be granted for courses waived.

5. This regulation does not invalidate the right of a dean of a college or head of a department to waive a course requirement of their particular college or department, respectively.

---

**AR 25. Institutional Requirements for Baccalaureate Degrees**

a. **Baccalaureate Core:** Each student will complete the following requirements:

1. **Skills Courses (15 credits)**
   - Mathematics, Writing I, and Speech must be taken and completed satisfactorily within the first 45 hours of OSU-generated credits.
   - Writing II must be taken and completed satisfactorily within the first 90 hours of OSU-generated credits.
   - Mathematics (3 credits)
   - Speech (3 credits)
   - Writing I (3 credits)
   - Writing II (3 credits)

2. **Perspectives Courses (24 credits)**
   - Physical science (with lab) (4 credits)
   - Biological science (with lab) (4 credits)
   - Plus choice of second course in either of the above (with lab) (4 credits)
   - Take a minimum of one course in each of the following areas:
Academic Regulations

Western culture (3 credits)
Cultural diversity (3 credits)
Literature and the arts (3 credits)
Social processes and institutions (3 credits)

3. **Difference, Power, and Discrimination Courses (3 credits)**

4. **Synthesis Courses (6 credits)**
   Science, technology, and society (3 credits)
   Contemporary global issues (3 credits)

5. **Writing Intensive Courses, upper division (WIC) (3 credits)**
   The Baccalaureate Core Committee determines which courses will satisfy each of the requirements above. WIC courses will be reviewed by the Writing Advisory Board. The core is governed by the following rules: (1) No more than two courses from any one department may be used by a student to satisfy the Perspectives category of the core. (2) No single course may be used by a student to satisfy more than one subject area of the core even though some courses have been approved in more than one area. (3) Both Synthesis courses may not be taken in the same department.

b. An undergraduate student may be granted a baccalaureate degree with one or more majors.

   c. **Credits**: Minimum 180 earned credits, which must include:

   1. **Credits in upper-division courses**: minimum 60 (exclusive of upper-division physical education activity courses).

   2. **Credits in each major**: minimum 36, including at least 24 in upper-division courses.

   d. **Baccalaureate Degrees**: All students receiving a BA degree shall have proficiency in a second language, including American Sign Language (ASL), equivalent to that attained at the end of the second year sequence with a grade of C– or better as certified by the School of Language, Culture, and Society. Colleges offering both the BA and the BS will have specific requirements distinguishing the two degrees. The college requirements for the two degrees will place comparable demands upon the time and effort of students, and that assessment of comparability will include the foreign language requirement for the BA. Academic units offering both the BA and BS may have specific requirements distinguishing the two degrees.

   e. **Grade-Point Average**: minimum of 2.00 on OSU cumulative grade-point average.

   f. **Academic Residence**:

   1. A minimum of 45 of the last 75 credits, or 150 total credits, must be completed while the student is in academic residence at OSU. "Academic Residence" is defined as OSU courses taken as a degree-seeking student of OSU or courses through one of the following approved special programs: Professional degree programs which require that the student enroll in another institution while finishing the bachelor’s degree at OSU or an international study program sponsored by Oregon State University.

   2. A minimum of 15 upper-division credits used to meet the preceding residency requirement (1) must be taken in each of the student’s majors.

   3. Credits earned by special examination for credit (AR 23) are not considered in academic residence.

   g. **Dean's certification of fulfillment of all requirements of major college**. (For details, see college advisors and deans.)

   h. **Restrictions**: A maximum number of credits may be applied to the Baccalaureate Degree as follows:

   1. Transfer from first professional programs such as Law, Medicine, Pharmacy, and Veterinary Medicine: maximum 48 quarter credits.

   2. Music courses (applied music): maximum 12 credits. (This restriction is not applicable to majors in music.)

   3. Physical activity courses: maximum 11 credits.

   4. Courses graded on an S/U basis at Oregon State University: maximum 36 credits.

   5. Academic Learning Service courses: maximum 15 credits.

   i. **Application for a Degree**: To become a candidate for a degree, a student must have achieved senior standing and must make formal application for the degree. It is recommended that the student file an application with the registrar three terms prior to the term in which he or she wishes to graduate. The student’s deadline to file an application with the registrar is the end of the second week of the term in which he or she expects to complete requirements for a degree. [Approved by Faculty Senate 1/8/09.]

   1. Lists of approved courses may be obtained from advisors. Approved courses are also listed in the OSU Academic Catalog.

   2. Some degree programs may require more than 180 credits.

   3. Unearned credits are those courses for which a grade of F, N, U, I, W, AUD, or WAU are assigned as a final grade for that course. All other grades are calculated as earned credit.

   Faculty Senate revised AR 25f effective academic year 2013–2014.

**AR 26. Concurrent and Subsequent Baccalaureate Degrees**

a. **Concurrent Baccalaureate Degrees**: An undergraduate student may be granted two or more baccalaureate degrees (for example the BA or BS) at the same graduation exercise. The student must:

   1. Complete institutional, college, and departmental requirements for the degree;

   2. Complete, for each additional degree, a minimum of 32 credits more than the requirements of the curriculum requiring the least number of credits; and

   3. Complete each additional 32 credits in residence.

b. **Subsequent Baccalaureate Degree**: A student who has received a previous baccalaureate degree from either OSU or another accredited university may be granted a subsequent baccalaureate degree. The student must:

   1. Complete, for a BA degree, the requirements for foreign language proficiency (AR 25d);

   2. Achieve a minimum of 2.00 on OSU cumulative grade-point average;

   3. Complete requirements of the major college and receive the dean’s certification; and

   4. Meet the requirements for a concurrent degree as specified in AR 26a, if a previous baccalaureate degree has been received from OSU. The additional credits may be taken at any time prior to or subsequent to the granting of a previous OSU baccalaureate degree. Students with a baccalaureate degree from another institution must meet the Academic Residence requirement in AR 25f.

   c. A student seeking a baccalaureate degree under the provisions of either AR 26a or AR 26b also must satisfy the appropriate residence requirements as defined in AR 25f.
AR 27. Subsequent Credentials: Minors, Certificates, Options, and Majors

1. Subsequent Minors and Certificates: A student who has received a previous baccalaureate degree from either OSU or another regionally accredited university or college may be granted a subsequent minor or certificate. The student must:
   a. Complete current requirements for minor or certificate; a minimum of 15 credits in the minor or certificate must be taken in residence and not applied to a previous baccalaureate degree;
   b. Achieve a minimum of 2.0 OSU cumulative grade-point average and a minimum of 2.0 for credits applying toward the minor or certificate;
   c. Receive the dean's approval.

2. Subsequent Options and Majors: A student who has received a previous baccalaureate degree from OSU may be granted a subsequent option or major credential. The student must:
   a. Complete current requirements for option or major; a minimum of 20 upper division credits in the option or major must be taken in residence and not applied to a previous baccalaureate degree;
   b. Achieve a minimum of 2.0 OSU cumulative grade-point average and a minimum of 2.0 for credits applying toward the option or major;
   c. Receive the dean's approval.

AR 28. Substitutions

a. Undergraduate students: Substitutions for institutional requirements as outlined in AR 25, except for baccalaureate core requirements of AR 25a, may be petitioned to the Academic Requirements Committee after approval by the student's dean or college head advisor. Substitutions for baccalaureate core requirements of AR 25a may be presented for consideration to the student's dean or college head advisor. Substitutions or adjustments of college or departmental requirements are also subject to approval by the college or department.

b. Graduate students: Substitutions for institutional requirements or deviations from the normal Graduate School regulations and policies may be made only by obtaining the approval of the dean of the Graduate School following a petition by means of a letter signed by the student and the student's major professor. Action taken on such substitutions or petitions will not be considered as a precedent for any future action.

AR 29. Graduation Exercises

Attendance at graduation exercises is optional for graduating students. In accordance with procedures obtained from the Registrar's Office, the candidate is responsible for declaring whether or not he or she will attend commencement, regardless of the term in which requirements are completed.

AR 30. Auditing Courses

Audit registration permits a student to enroll in a course for no credit and no grade. Course requirements for an audited course will be determined by the course instructor. Audit registration is available to degree and non-degree students. Audit registration is only allowable during the second full week of the term. Those who wish to audit should contact the Office of the Registrar for registration procedures, which will require approval of the course instructor. Audit courses are assessed instructional fees at the same rate as for credit courses. Any changes to an audit registration are subject to the same procedures, deadlines, and special fees as for registration changes to regular courses. Upon completion of an audited course, the designation of AUD will be recorded on the transcript. The designation of WAU will be recorded on the transcript for students who withdraw from an audit course.

AR 31. Academic Fresh Start Policy

An Oregon State University undergraduate student may petition once with the registrar to exclude OSU courses from the calculation of institutional requirements, credits, and grade-point average, under a condition of academic fresh start defined below:

Conditions to qualify:
The student must have an absence from OSU that begins after the end of the student's last term of attendance and exceeds five academic years before re-admittance to a degree program at OSU. Prior to applying for academic fresh start student must, after re-enrolling in the university, have successfully completed a minimum of 24 letter-graded units over two consecutive terms, and earned a grade-point average of at least 2.5 in these terms. The student must also provide a signed letter of recommendation from a current OSU college dean, school director, or department or program chair/head. It may be seconded by the college head advisor or a current faculty member within the discipline the student is currently engaged to complete advocating on the student's behalf for academic fresh start.

Effect of the academic fresh start:

- Upon meeting all of the conditions of qualification, the student may select from one to three contiguous academic terms from previous enrollment at OSU for the application of academic fresh start.
- The grades from all courses taken during the terms that are proposed for academic fresh start will be excluded from meeting institutional requirements and the calculation of institutional units and grade-point average. All grades representing the student's academic history at OSU will appear on the student's academic record (transcript), but all academic fresh start approved courses will be coded as "excluded" similar to a repeated course. Additionally, a comment of "Academic Fresh Start" will be appended to each term that qualifies under academic fresh start.
- All courses excluded under academic fresh start, will also be excluded from the calculation of course repeats defined by AR 20.

1 Valid grades include outstanding I (Incomplete) grades that have not been resolved.
ADMINISTRATION

Oregon State University Administration (http://leadership.oregonstate.edu/administrative-leadership)
President’s Cabinet, Provost’s Council, College Deans

Oregon State University Board of Trustees (http://leadership.oregonstate.edu/trustees)
The Board of Trustees of Oregon State University governs Oregon’s only university with a statewide presence and helps guide OSU’s mission to serve the state and the needs of its citizens in a growing global economy.

Equal Opportunity and Access (http://oregonstate.edu/oei)
The Office of Equal Opportunity and Access represents efforts to join three previously separate areas of focus in order to pursue an integrated agenda: Affirmative Action and Equal Opportunity, Community and Diversity and Women’s Advancement and Gender Equity.

Government Relations (http://oregonstate.edu/government)
The Government Relations Office represents Oregon State University in the governmental process by building and maintaining relationships between the university and various civic, government, and political communities.

Institutional Diversity (https://leadership.oregonstate.edu/diversity)
The Office of Institutional Diversity oversees institutional change actions, initiatives and communications to advance diversity, equity and inclusion throughout all facets of Oregon State University.

Ombuds (http://oregonstate.edu/ombuds)
The University Ombuds Office promotes a civil and inclusive campus community by providing informal, impartial, and confidential conflict management services to all members of the university community.

University Relations and Marketing (http://communications.oregonstate.edu)
The university’s primary communications branch, with marketing that supports student recruitment and raises awareness of OSU’s impact, dissemination of news about teaching, research and faculty and student achievement, the development of a vibrant online presence and hosting university-wide events.
ADMISSION TO OREGON STATE UNIVERSITY

Administration
Oregon State University welcomes all students without regard to race, creed, sex, marital status, sexual preference, age, religion, handicap, or national origin who provide evidence of suitable preparation for course work at the university level.

Office of Admissions
B104 Kerr Administration Bldg.
Oregon State University
Corvallis, OR 97331
541-737-4411
Email: osuadmit@oregonstate.edu
Website: http://admissions.oregonstate.edu/

Information for undergraduate, postbaccalaureate, nondegree undergraduate students is available from the Office of Admissions.

Admission applications are available at http://admissions.oregonstate.edu/apply-choose-application.

World Wide Web: http://admissions.oregonstate.edu/
On-campus: B104 Kerr Administration Bldg.
Telephone: 541-737-4411
Toll free: 800-291-4192
Fax: 541-737-2482
OSU code for SAT, AP, TOEFL, or CLEP reports: 4586
OSU code for ACT reports: 3482

Admission Requirements for First-Year Students
When to Apply
See application deadlines at http://admissions.oregonstate.edu/undergraduate-admission-deadlines.

The application and fee must be submitted electronically by the respective deadline.

The Admission Process
Apply online at http://admissions.oregonstate.edu/apply-choose-application. Applicants are required to use a valid Visa, MasterCard, or Discover credit card to pay the $65 nonrefundable application fee. Request that your high school send your official high school transcript to OSU, and have your official SAT or ACT test scores sent to OSU.

Portfolios, videotapes, essays and personal interviews are generally not required.

Evaluation Process
Admission to Oregon State University is selective and competitive and is based on a holistic review of application materials.

Complete applications are first reviewed to confirm successful completion of the 15 high school subject requirements and GPA earned. There is no minimum SAT or ACT score requirement. However, official scores from one of these tests are required for admission and advising purposes for students applying during their senior year of high school.

Applicants for undergraduate admission are required to complete an "Insight Résumé," a written assessment designed to evaluate students' non-cognitive attributes. These attributes include self-concept, realistic self-appraisal, handling the system, ability to set long-range goals, leadership, connections with a strong support person, community engagement, and nontraditional learning.

Academic performance is not the sole criterion for admission to the university. The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions. Simply qualifying for admission does not guarantee admission.

Go to http://admissions.oregonstate.edu/admission-requirements-0#Notification of status to see when applicants will be notified of their admission status.

Policy Regarding Students' Eligibility to Return to Prior College
Applicants who disclose that they are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission to OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons may be admitted if they meet OSU's minimum academic requirements.

Applicants who are denied admission have the right to appeal that decision, and appeals will be reviewed on a case-by-case basis.

Selection of First-Year Students
OSU's admission requirements promote student success by assessing preparedness and academic potential in the unique context of each student's personal experience. Admission assessment will consider all achievement, both academic and nonacademic, to enroll students with a broad range of characteristics and perspectives. These include, but are not limited to academic achievement, creativity, initiative, motivation, leadership, persistence, service to others, intellectual curiosity, exceptional personal or academic recognition, unusual talent or ability, substantial experience with other cultures, and ability to overcome significant challenges.

The admissions process provides a fair and comprehensive review of all applicants for determining potential success at OSU. It is crucial that applicants carefully complete the application process by providing thorough information. Estimating the likelihood of admission is very difficult without considering the complete application file.
Regular Admission

Initial admission selections are based on a holistic assessment of the criteria listed below.

Strength of Curriculum:
- Quality, quantity, and level of course work throughout the entire high school program, especially course work completed beyond the minimum courses required (See the high school course requirements chart.)
- Advanced placement (AP), international baccalaureate (IB), or college course work completed or in progress
- Strength of the program taken within the context of the high school attended
- Progressively challenging math sequence (including Algebra II), demonstrated by performance

Academic Performance:
- A recommended unweighted high school grade-point average of 3.0 (on a 4.0 scale as calculated by the Office of Admissions)
- Class rank taken in context with academic rigor and size of high school attended
- Performance on standardized tests: SAT or ACT.

Insight Résumé:
- Understanding of you as a unique, contributing individual
- Your accomplishments, perspectives, experiences, and talents
- Your achievements within the context of your social and personal circumstances
- Participation in activities that develop academic, intellectual, and leadership abilities

Insight Résumé scores are also used for scholarship selection, secondary review of applicants who do not meet admission requirements, and compiling baseline data.

Extended Admission (Admission Appeals)

Students not selected for regular admission may appeal via the extended admission process. Extended admission decisions will be determined by the Undergraduate Admissions Committee. In addition to regular admission requirements, students participating in the extended admission review will be asked to provide additional materials for consideration. Please refer to the OSU Admissions website for specifics: http://admissions.oregonstate.edu/admission-appeals-aka-extended-admissions.

High School Course Requirements

This is supposed to be a 3-column table.

<table>
<thead>
<tr>
<th>College Preparatory Subjects</th>
<th>Minimum Units</th>
<th>Grades of C- or higher are required.</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4 years</td>
<td></td>
</tr>
<tr>
<td>Mathematics</td>
<td>3 years</td>
<td>Culminating at the Algebra II level or higher</td>
</tr>
<tr>
<td>Social Studies</td>
<td>3 years</td>
<td></td>
</tr>
<tr>
<td>Science</td>
<td>3 years</td>
<td>One year each of two different sciences (biology, chemistry, physics, etc.) One year of lab strongly recommended.</td>
</tr>
</tbody>
</table>

Alternatives to Subject Requirements

Students unable to fulfill the subject requirements will be eligible for consideration by:

1. Taking SAT II Subject Tests
   Or
2. Successfully completing course work (high school or college transfer) for specific subject deficiencies.

Alternatives should be completed by high school graduation.

Test Requirements

Freshman applicants (except those applying on the basis of GED scores) must submit Scholastic Assessment Test (SAT-Reasoning) or American College Test (ACT) scores. Test scores are used to determine course placement and are considered for applicants not meeting the minimum high school GPA requirement.

Official scores are required.

The institutional code for having most test scores sent to OSU is 4586. The OSU ACT code is 3482.
High School Graduation
Public high school students must graduate from standard high schools.
Private high school students must graduate from accredited high schools.

1 Standard high schools are public high schools that are certified as meeting specified levels of resources, services, and quality established by the Oregon Department of Education.
2 Accredited high schools are those that are reviewed and recognized by a regional entity, such as the Northwest Association of Schools and Colleges, as meeting an appropriate level of academic rigor and support.

Graduates of Nonstandard or Unaccredited High Schools or Home-Schooled Students
Graduates of non-standard or unaccredited high schools, or home-schooled students will be considered for admission based on a holistic assessment using the following:

SAT and/or ACT
OSU requires students applying for admission during their senior year to submit SAT or ACT scores.

OSU prefers, but does not require, the essay portion of the new SAT test that began being administered in March 2016.

Note: Only scores sent electronically from College Board (SAT) and/or ACT will be considered official and used for admission purposes. There is not an advantage to pay extra for "rush" scores from the testing agency, and in some cases may add to the time it will take to process the scores within our office.

The SAT college code for Oregon State University is 4586.
The ACT college code for Oregon State University is 3482.

SAT subject tests
OSU requires students graduating from non-regionally accredited high schools and home-schooled students to provide scores from two SAT subject tests (Math I or II, and a second exam of the student’s choice).

Students who have 12 or more completed college credits in core subject areas (Math, Writing/English, Science) while pursuing their high school diploma will be considered as an alternative to the two SAT subject tests.

Insight Résumé
OSU seeks to look beyond grades and test scores to determine if applicants bring the necessary skills and abilities to be successful here. Your answers to the Insight Résumé, which is part of the OSU application for admission, provides us with:

• Understanding of you as a unique, contributing individual.
• Your accomplishments, perspectives, experiences, and talents.
• Your achievements within the context of your social and personal circumstances.
• Participation in activities that develop academic, intellectual, and leadership abilities.

Additional Factors
• Oregon State is also looking for students who will lend educational and cultural diversity to our campus. We are looking for students who go above and beyond the minimum whether in talent, academic ability or potential. Combined with academic strengths, evidence of these characteristics may be considered in our review of applicants for admission.
• Applicants who are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission at OSU. Applicants who are unable to re-enroll at a previous college or university for academic reasons may be considered for admission if they meet OSU’s minimum academic requirements.

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions.

GED Students
GED students will be considered for admission if they achieve an average GED score of at least:

• 58, if taken prior to January 2002, with no subtest score less than 41
• 580, if taken between January 2002 and December 2013, with no subtest score less than 410
• 680 (total from 4 subject tests), if taken in January 2014 or later, with no subtest score less than 150

Students who take the GED test in the 1996–97 school year and later must pass two years of the same foreign language prior to admission or an approved additional way to meet OSU’s foreign language requirement. Foreign language taken at an unaccredited high school does not qualify. If you have questions pertaining to these guidelines, please contact the OSU Admissions Office regarding your options for completion of this requirement.

Non-cognitive skills and abilities demonstrated via a GED applicant’s Insight Résumé (see above) are also considered in making admission decisions.

Applicants admitted on the basis of GED scores are not required to submit SAT or ACT scores, but scores may be considered if available.

Petition for Admission Consideration
Students not approved for admission may appeal via the extended admission process. Eligible students will be provided with information about the petition procedure. Deadlines are in effect each term for appeals. For additional information, please refer to the OSU Admissions website: http://admissions.oregonstate.edu/admission-appeals-aka-extended-admissions.

Advanced Placement (AP) Credit
Oregon State University awards ungraded credit for achievement on certain College Board Advanced Placement (AP) examinations. Information pertaining to specific AP credit policies is available in high school counseling centers or may be obtained from the OSU Office of Admissions website (http://admissions.oregonstate.edu/?q=credit-opportunities). OSU’s college code is 4586 for those wishing to have their scores sent.

International Baccalaureate Credit
Oregon State recognizes IB achievement by awarding credit to students who score 5 or above on standard and higher level IB exams. OSU also
grants additional benefits for students who complete the full IB diploma with a score of 30 or higher, as follows:

Sophomore Standing, and IB Scholarships are available. Students with a total score on IB exams of 30 or higher may choose to accept the annual, renewable scholarship award of at least $3,000 OR may compete for more substantial awards.

Students must send their official test scores to OSU. The official International Baccalaureate Certificate is required in order to award credit.

Contact your IB coordinator or IB North America to request score reports.

IBO North America
212-696-4464
http://www.ibo.org/

Transfer Admission
When to Apply
Apply online at http://admissions.oregonstate.edu/apply-choose-application. Applicants are required to use a valid Visa, MasterCard, or Discover credit card to pay the $65 nonrefundable application fee. Official transcripts must be sent to OSU from each college or university attended. Please refer to http://admissions.oregonstate.edu/undergraduate-admission-deadlines for application deadlines.

Minimum Requirements for Admission
Consideration
U.S. Citizens and Permanent Residents:

1. Successful completion of no less than 24 quarter (16 semester) graded, transferable credits from (a) regionally accredited U.S. institution(s). Students with fewer than 24 graded transferable quarter hours will be considered on the basis of their high school records and test scores, and must have a 2.25 GPA on all collegiate work attempted.

2. Only college-level, transferable credits are counted in those accepted in the GPA computation (professional-technical course grades are not included).

3. Grade of C– or better earned in the following courses:
   - College-level writing equivalent to WR 121 *ENGLISH COMPOSITION or equivalent.
   - Mathematics equivalent to MTH 111 *COLLEGE ALGEBRA – OR – MTH 105 *INTRODUCTION TO CONTEMPORARY MATHEMATICS
   - Two terms of the same foreign language in college will be required of those high school graduates of the class of 1997 and beyond who did not successfully complete two units (years) of foreign language while in high school. For additional information on how to meet foreign language deficiencies, see http://admissions.oregonstate.edu/sites/admissions.oregonstate.edu/files/dfl-ways_to_meet.pdf.

5. Applicants who are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission at OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons may be admitted - if they meet OSU's minimum academic requirements.

6. Applicants who are denied admission are eligible to appeal that decision, and appeals will be reviewed on a case-by-case basis. Consult with the Office of Admissions for more information on the appeal process.

Please note that meeting the minimum admissions requirements and/or an individual’s academic performance does not guarantee them admission to the university. Applicants’ experiences, actions, and non-cognitive skills are assessed by way of the Insight Résumé. Furthermore, the university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at OSU.

Consideration will be given to applicants with a 2.00 GPA and an Associate of Arts Oregon Transfer (AAOT) degree from an Oregon community college, but admission is not guaranteed.

Evaluation and Transferability of Credit
Only official records are used to evaluate eligibility for admission and transferability of credit.

Official transcripts of all college work attempted must be submitted directly from the Registrar’s Office of each institution.

OSU considers transfer college-level courses successfully completed at colleges or universities regionally accredited by an appropriate accreditation agency. An advanced standing report acknowledging the courses accepted by the university will be sent via email by the Office of Admissions after the advance standing is performed.

Persons transferring to OSU from a community college or two-year institution may have up to 124 quarter credits (83 semester units) accepted toward their bachelor’s degree. One semester credit equals 1.5 quarter credits at OSU.

CLEP
Applicants who want credit for College-Level Examination Program (CLEP) tests should have official test scores sent to Admissions using college code 4586. Additional details are available in the OSU Credit Opportunities brochure and on the OSU Admissions website.

For information on OSU’s acceptance of professional-technical courses, please see Academic Regulation 2 below.

Acceptance of Credit from a Two-Year Institution
(OSU Academic Regulation 2) (p. 16):

Credit From A Two-Year Institution (Undergraduate Students)

a. College Transfer Credits: Oregon State University accepts for credit toward a baccalaureate degree all college transfer work completed
at an Oregon or other accredited community college up to 124 lower-division quarter credits. For Institutional Requirements for Baccalaureate Degrees, see AR 25. Students are encouraged to work with the relevant academic unit to ensure that transfer credits meet department and college requirements for the degree. It would be unlikely for an individual student to be able to use all 124 credits toward an OSU baccalaureate degree. Transfer credits and grades are not used in calculating the OSU cumulative GPA. Students who hold OSU-approved direct transfer degrees from Oregon or other accredited community colleges (e.g., the Associate of Arts Oregon Transfer) or who have 90 or more credits accepted in transfer will be granted junior standing. Students who hold OSU-approved direct transfer degrees will be considered to have met the Perspectives and Skills (except WIC) areas of the Baccalaureate Core. In addition, they must complete the upper-division Synthesis areas of the core. Students transferring from Oregon or other accredited community colleges who do not hold approved direct transfer degrees ordinarily will be given baccalaureate core credit in the Perspectives and Skills area on a course-by-course basis for work that is judged to be equivalent in content.

b. Transfer of Professional-Technical Credits: a maximum of 12 quarter credits (8 semester credits) of professional-technical course work applicable in an associate's degree or certificate program at an accredited institution can be accepted upon admission to OSU as general elective credit (graded as Pass) and as part of the 124-quarter credit total that can be applied toward a baccalaureate degree.

c. Transfer of Professional-Technical Course Credits through Articulation Agreements: Lower-division OSU credit may be awarded for specific professional-technical community college courses when those courses are validated by articulation agreement with the appropriate OSU department. This may be above the 12 quarter credits of general electives (graded as Pass) allowed when a student is admitted to OSU. Credit will be awarded only upon the recommendation of the appropriate department and college, and approval by the Curriculum Council. Community college professional-technical course work is not equated to upper-division OSU course work. These course credits will count as part of the 124 quarter credits defined in paragraph 2a above. OSU departments who have articulation agreements with community colleges regarding community college professional-technical courses shall review the agreements annually and forward a dated list of the articulated community college courses to the Curriculum Council.

Junior standing does not necessarily imply that OSU institutional, college, division, and/or departmental requirements, which are normally satisfied by OSU students prior to their junior year, have been satisfied.

Nondegree Status

Nondegree enrollment status is designed for students who want to take courses but do not want to pursue a degree. In some instances, nondegree students may not meet regular admission requirements. Nondegree students are part-time students who are expected to enroll in no more than 8 credits a term. Students who want to enroll for more than 8 credits a term must apply for regular admission.

Nondegree enrollment status requires no formal admission process and has no requirements for entrance. Nondegree applications should be submitted electronically. Approval is granted for a specific term.

Students who are unable to attend the specific term and want to enroll later should contact the Office of Admissions (undergraduate nondegree) or the Graduate School (graduate nondegree).

Nondegree students are given grades and academic records, and are reviewed according to university standards of good academic progress.

Nondegree students who wish to seek full admission and pursue a degree must do so by submitting an undergraduate, postbaccalaureate or graduate application for admission. In all cases, an admission application fee is required. Successful enrollment as a nondegree student does not guarantee regular admission. Credits earned while enrolled under nondegree undergraduate status will be applied to a student’s record.

Nondegree graduate students who decide to seek admission to a specific degree program during the course of their studies should note that any credits taken as a nondegree student may or may not be applicable for that degree, depending upon a variety of factors, their chosen program, and the policies of the Graduate School. Graduate students are further advised that academic residency must be completed after full admission as a degree-seeking graduate student, regardless of the number of credits previously earned while in nondegree status. Please refer to “Reclassification of Postbaccalaureate Students, Nondegree-Seeking Students, and Graduate Certificate Students (p. 39).”

Nondegree students follow the registration procedures and policies as outlined in the Registration Information Handbook. The Schedule of Classes is available through the Web at https://catalog.oregonstate.edu/course-search/. Registering students are expected to obtain a student identification card through the ID Center in the Kerr Administration Building.

Tuition and fees for nondegree students enrolled in fewer than 9 credits are assessed at resident rates based on undergraduate- or graduate-course level. Payment of the health service fee is optional. Enrollment in excess of 8 credits requires that tuition and fees be assessed at the same rates as regular students and requires full admission as a regular student.

Registration holds in place prior to applying for nondegree status must be satisfied before registration as nondegree student will be allowed.

Academic Regulation 1. Admission for Nondegree Students

1. Nondegree enrollment status for undergraduate students is designed for students who wish to take 8 or fewer credits per term, but do not wish to pursue a degree or a specific postbaccalaureate credential.

2. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses, but do not wish to pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) per term.

3. Credits earned as a nondegree undergraduate student may be used to satisfy degree requirements upon admission as a degree-seeking student.

4. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. Communication with the Graduate School and specific academic programs is advised.

5. Nondegree students seeking admission to a degree program must do so by submitting an undergraduate, postbaccalaureate, or graduate application for admission.
Select a Major
Undergraduates and postbaccalaureate applicants are asked to select a college and a major within that college. The University Exploratory Studies Program is a choice available to undergraduates who are undecided about a major. Students may change their major in consultation with an academic advisor.

Admission of Postbaccalaureate Students
Admission for postbaccalaureate applicants is determined by the department, not by the Office of Admissions.

If you are interested in pursuing postbaccalaureate course work, please consult the major department before applying for admission.

Degree Seeking Postbaccalaureate
Students who would like to earn a subsequent undergraduate degree from OSU or complete prerequisites for a graduate program at OSU may apply for degree seeking postbaccalaureate admission through the Office of Admissions. Applicants for consideration must submit an admission application along with official transcripts of all college work by the application deadline. Generally, applicants must meet the following admission requirements:

• Have a bachelor's degree or equivalent from a regionally accredited institution
• 2.25 accumulated GPA requirements. The GPA is computed on the first baccalaureate degree plus any subsequent credit earned.
• Complete College Algebra and English Composition with a C- or better
• Submit Statement of Objectives of 150 to 200 words with their application
• Academic departments may impose additional requirements
• Nonrefundable $65 application fee

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university.

You cannot earn a postbaccalaureate degree in the same field in which you earned your original degree.

1 Applicants wishing to be considered for admission to multiple programs must submit a new application and fee for each program.

Additional Credentials
Students who want to earn a subsequent major, minor, option, or certificate from OSU may apply for credential enrollment status using the Postbaccalaureate Admission Application. Students must complete the current requirements for a minor or certificate and receive the dean's approval. Students must also achieve a minimum GPA of 2.00 and complete a minimum of 15 credits in residence at OSU. A nonrefundable $65 admission application fee is charged. Students pursuing an additional credential will be categorized as non-degree credentials at OSU and not eligible to receive federal financial aid.

Credential Classifications
• Minor Credential: Additional minor earned after undergraduate work is completed. Baccalaureate work can be completed at OSU or another institution. Students that previously completed a baccalaureate degree from Oregon State or another college cannot enter the same degree program as the degree program they graduated as an undergraduate.
• Major Credential: Additional major earned after undergraduate work is completed at OSU. Major credential must be completed within the same degree program.
• Option Credential: Additional option earned after undergraduate work is completed at OSU. Option credential must be completed within the same degree and major program.
• Certificate: A structured progression of courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. Undergraduate certificates can be earned by students without any prior degree (professionals in a field), or as a credential seeking, graduate student or as an undergraduate student in conjunction with an undergraduate degree. The certificate requirements and pre-requisites are defined at the college level.

International Applicants
International applicants should also refer to the admissions procedures for undergraduate/graduate international students (http://admissions.oregonstate.edu/international) for deadlines, test score requirements, and additional information.

Admission of Subsequent Minor, Credential or Certificate
Students who want to earn a subsequent minor, credential or certificate from OSU may apply for nondegree credential enrollment status. Students must complete the current requirements for a minor, credential or certificate and receive the dean's approval. Students must also achieve a minimum GPA of 2.0 and complete a minimum of 15 credits in residence. A nonrefundable $65 admission application fee is charged.

Admission with Graduate Standing
To be considered for admission to the Graduate School, an applicant must have a baccalaureate degree from an accredited college or university, as well as a scholastic record, background, or other evidence that indicates the ability to do satisfactory graduate work. See Graduate Admission Procedures (p. 39) in this catalog.

Admission of International Students (p. 34)
Admission to Summer Session
Students who wish to begin work on a degree during summer session at OSU must satisfy regular admission requirements and apply by the specified deadlines.

Admission to Professional Programs
Professional programs are accredited according to requirements set by professional societies. These programs often have more rigorous requirements for admission, continuation in the program, and acceptance of transfer credit. Therefore, admission to OSU is separate from admission to a professional program and does not guarantee such admission.

OSU-Cascades Campus
OSU-Cascades provides students personalized instruction and OSU’s excellence in both academics and innovative research, as well as the

OSU-Cascades Campus
OSU-Cascades provides students personalized instruction and OSU’s excellence in both academics and innovative research, as well as the
lifelong advantages of a premier research university. OSU-Cascades is the only baccalaureate and graduate degree granting institution based in Central Oregon. OSU-Cascades expanded to a four-year university when it welcomed its first freshman class in fall 2015.

Born out of a 30-year grassroots effort put forth by Central Oregonians to bring a university to the region the university opened its doors in September 2001 on the COCC campus, offering upper-division and graduate coursework toward bachelor’s and master’s degrees.

After record enrollment growth and demonstrated financial support from the surrounding community, in August 2012 the Oregon University System endorsed OSU-Cascades’ expansion to a four-year university. In July 2013, the Oregon State Legislature approved capital funding that enabled the branch campus to establish its own campus. The branch campus completed the first phase of campus development in 2016.

OSU-Cascades features outstanding faculty in degree programs that reflect Central Oregon’s vibrant economy, abundant natural resources and commitment to sustainability. Sixteen undergraduate majors, 30 minors and options, and three graduate programs include fields such as computer science, energy systems engineering, kinesiology, hospitality management, and tourism and outdoor leadership. Experiential learning options include faculty research, internships and study abroad programs in 80 countries.

OSU-Cascades provides students excellence in academics, practical and experiential learning opportunities, and the lifelong advantages of a premier research university—all on a growing campus community of 1,300 students and faculty.

Degree Partnership Programs – Dual Admission and Enrollment at Designated Community Colleges (p. 33)

Credit for Military Experience

Students are recommended to seek advice from their Academic Advisor prior to transferring in their Military Credits. Oregon State University grants up to 45 credits for military education as recommended by the American Council on Education’s (ACE) Guide to the Evaluation of Educational Experiences in the Armed Services (http://www2.acenet.edu/militaryguide/CourseSearch.cfm). This is in accordance with transfer credit policies at Oregon State University. Students may request evaluation of military credit by furnishing the Office of Admissions with a Joint Services Transcript, Navy SMART transcript, or U.S. Coast Guard transcript. Transcripts may be obtained through these homepages:

- JST (https://jst.doded.mil/official.html) Note: Some browser security settings may raise a caution message before entering these Department of Defense websites.
- Additional informational links to other service pages can be found on the ACE website (http://www.acenet.edu/higher-education/topics/Pages/College-Credit-for-Military-Service.aspx).

Oregon State University will grant 1.00 quarter credit for the course HHS 241 Lifetime Fitness Lab. For HHS 241 credit to be granted, please submit either the DD214 or an official ACE transcript. Credit will also be granted if one of the following military science courses has been completed successfully: Physical Fitness, Physical Education, or Physical Conditioning. To receive credit, please submit an official transcript from the institution.

Oregon State University will assess and award block transfer credit upon review of your military record. An evaluation report showing block transfer credits will be sent to you. Your major college will receive a copy of your evaluation report and the ACE recommendation guideline. For a better understanding of how each college uses the 45-credit block of general elective credits there is a web page on the OSU Veterans website (go to http://studentlife.oregonstate.edu/veterans, click on Current Students, then click on Military Credit) outlining this information. In addition, if you believe a specific military course, training, experience, etc. directly relates to a university course, you can complete a form to petition for Military Credit Course Substitution (http://studentlife.oregonstate.edu/files/petition_for_military_credit_course_substitution.pdf) (go to http://studentlife.oregonstate.edu/veterans, click on Current Students on the right side, then click on Military Credit on the right side of the page).

Any student receiving GI Bill® education benefits while attending Oregon State University is required to obtain transcripts from all previously attended schools and submit them to the school for review of prior credit.

Placement Examinations

High school seniors planning to enter OSU must take the SAT or the ACT. These tests provide academic advisors with valuable information about a student’s educational development, abilities, and aptitudes.

New students are required to take an online Math Placement Test (see http://www.math.oregonstate.edu/mlc-placement-home). Students who enter the university with previous language training from another institution and who wish to continue their study of the language are required to take a language proficiency examination to determine placement level. Please call the OSU School of Language, Culture, and Society at 541-737-4603. Other placement examinations may be required in certain majors.

Registration Procedures

Once admitted to Oregon State University, students are eligible for course registration. Complete registration instructions, procedures, schedules and deadlines are detailed in the Schedule of Classes (https://catalog.oregonstate.edu/course-search) on the Web. A student is officially registered and eligible to attend classes only when all procedures have been completed. Students who make arrangements to pay outstanding university debts and who do not adhere to the agreed upon plan may be dis-enrolled.

In addition to the basic information regarding registration, the Registration Information Handbook is an essential resource to the student for the academic calendar, fee schedule, academic and other student regulations and procedures, final examination schedule, and listing of baccalaureate core courses.

Re-Enrollment

Undergraduate students who wish to re-enroll in the university after an absence may do so providing they were eligible to re-enroll their last term of attendance. Students who have been absent four or more terms, not
including summer terms, should contact the Office of the Registrar to reactivate their records, at which time the current catalog becomes their catalog of record for graduation requirements. The university reserves the right to consider a student's status with respect to voluntary or involuntary leave, as well as any existing student conduct issues when requesting to re-enroll. Students who have been absent less than four terms are still considered active and register following the registration instructions in the current Registration Information Handbook in PDF format in the online catalog at https://catalog.oregonstate.edu/reading-soc/#text. International students who wish to re-enroll after an absence should check in with the Office of International Services (p. 1145) (OIS) to make sure they have the required documents to return.

Re-enrolling students who have attended another college or university since their last term at OSU are required to report that enrollment at the time of re-entry. Official transcripts must be forwarded to the Office of Admissions. Returning students with an OSU cumulative GPA below or very near 2.00 are reminded of the OSU graduation requirement (Academic Regulation 25e (p. 16)), which stipulates 2.00 as the minimum OSU cumulative grade-point average required to earn a baccalaureate degree from OSU.

All re-enrolling students are reminded of their responsibility to update any outdated information, such as address, in their OSU records. Contact the Office of the Registrar to make changes.
DEGREE PARTNERSHIP PROGRAMS

Dual Admission and Enrollment at Designated Community Colleges
Oregon State University offers special Degree Partnership Programs (dual admission and enrollment) with all of Oregon's community colleges:

1. Blue Mountain Community College (http://www.bluecc.edu) in Pendleton
2. Central Oregon Community College (http://www.cocc.edu) in Bend
3. Chemeketa Community College (http://www.chemeketa.edu) in Salem
4. Clackamas Community College (http://www.clackamas.cc.or.us) in Oregon City
5. Clatsop Community College (http://www.clatsopcollege.com) in Astoria
6. Columbia Gorge Community College (http://www.cgcc.edu/admissions) in The Dalles
7. Klamath Community College (http://www.klamathcc.edu/Home) in Klamath Falls
8. Lane Community College (http://www.lanecc.edu) in Eugene
9. Linn-Benton Community College (http://www.linnbenton.edu) in Albany
10. Mt. Hood Community College (http://www.mhcc.edu) in Gresham
11. Oregon Coast Community College (http://www.oregoncoastcc.org) in Newport
12. Portland Community College (http://www.pcc.edu)
13. Rogue Community College (http://www.roguecc.edu) in Medford
14. Southwestern Oregon Community College (http://www.socc.edu) in Coos Bay
15. Tillamook Bay Community College (http://tillamookbaycc.edu) in Tillamook
16. Treasure Valley Community College (http://www.tvcc.cc.or.us) in Ontario
17. Umpqua Community College (http://www.umpqua.edu) in Roseburg

OSU also has Degree Partnership Programs with three of Hawaii's seven community colleges:

1. Hawai'i Community College (http://hawaii.hawaii.edu) in Hilo, Hawaii (Big Island)
2. Kapi'olani Community College (http://www.kapiolani.hawaii.edu) in Honolulu, Oahu
3. Maui College (http://maui.hawaii.edu), University of Hawaii, in Kahului, Maui

These programs provide students with simultaneous access and admission/enrollment status at both OSU and the community college. There is one application process to attend both schools, advising is available at either campus, and the student has the opportunity to access services and participate in college life on both campuses. There is flexibility in scheduling with access to more classes, financial aid is available for qualified students while attending both schools, and admitted students have access to library and computer lab resources at both campuses. For more information on Degree Partnership Programs (dual admission and enrollment), please contact the admissions office at the community college, OSU Degree Partnership Student Program, 541-737-2790, or the University Partnership Programs Web page at http://partnerships.oregonstate.edu/.

International Undergraduates as Nondegree Students

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. and do not have a valid immigration document from an OSU accredited institution in the U.S. or other English speaking country (See list below). Citizens of the following countries: Anguilla, Antigua and Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (English speaking provinces), Cayman Islands, Dominica, Grenada, Ireland, Jamaica, Montserrat, New Zealand, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos, United Kingdom, U.S. Virgin Islands.

For citizens of African countries whose official language is English, waivers will be considered on a case-by-case basis if the medium of instruction is English.

Admission of International Undergraduate Students

International students are admitted to OSU based on meeting the minimum OSU academic requirements, English language proficiency requirements and evidence of funding requirements. All students have a study plan and receive academic advising that is reflective of the specific Undergraduate Pathway program. Students will be required to turn in copies of their immigration documents to move forward. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one’s visa status.

Undergraduate students who wish to enroll with OSU for one or more terms, but who do not plan to complete degree requirements at OSU and will not participate in an established exchange program, should contact International Admissions at intladmit@oregonstate.edu for further information, and before applying.

International students who wish to enroll in Academic English, Undergraduate Pathway or Graduate Pathway programs should contact INTO Oregon State University at intladmit@oregonstate.edu for further information.

Applicants must present proof of English language proficiency, if available, by submitting TOEFL, IELTS or an acceptable alternative, e.g., IGCSE, SAT, ACT, or AP results.

Exceptions to the English proficiency test requirement are:

- Individuals who have completed a bachelor’s degree from a regionally accredited institution in the U.S. or other English speaking country and have a cumulative grade-point average of 2.25, meet minimum OSU academic requirements, English language proficiency requirements and evidence of funding requirements. Visit the Office of International Admissions online at http://international.oregonstate.edu/files/atosu/osu-exchange-partner-institutions.pdf.

- Citizens of the following countries: Anguilla, Antigua and Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (English speaking provinces), Cayman Islands, Dominica, Grenada, Ireland, Jamaica, Montserrat, New Zealand, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos, United Kingdom, U.S. Virgin Islands.

- For citizens of African countries whose official language is English, waivers will be considered on a case-by-case basis if the medium of instruction is English.

INTO OSU Pathway Programs

UNDERGRADUATE PATHWAY

INTO Oregon State University’s Undergraduate Pathway programs combine intensive language study, academic skills development and academic course work in a carefully constructed program designed to move students successfully through one to three terms of undergraduate study in their degree program. Entry requirements vary based on the length of program chosen. All students have a study plan and receive academic advising that is reflective of their specific Undergraduate Pathway program.

Successful completion of Undergraduate Pathway progression requirements allows students to complete one to three terms of undergraduate study and progress to their undergraduate degree at Oregon State University in their respective field of study.

Academic English + Undergraduate Pathway

Academically qualified applicants for Undergraduate Pathway who are unable to provide a language proficiency score (or who provide one that is below the minimum) will begin their program by taking Academic English courses until they complete Level 4 of the program. All students have a study plan and receive academic advising that is reflective of the Academic English + Undergraduate Pathway program.

Academic English + Graduate Pathway

Academically qualified applicants for Graduate Pathway who are unable to provide a language proficiency score (or who provide one that is below the minimum) will begin their program by taking Academic English courses until they complete Level 4 of the program. All students have a study plan and receive academic advising that is reflective of the Academic English + Graduate Pathway program.

GRADUATE PATHWAY

INTO Oregon State University’s Graduate Pathway program is a pre-Master’s program that provides international students a direct path to various graduate degrees at the university. The program gives students the academic foundation, essential language skills and GMAT/GRE test preparation to successfully move on to the Master’s degree. Entry to this program requires satisfactory completion of a four-year undergraduate degree in an appropriate subject with at least a 2.75 GPA or equivalent overall and a minimum of 2.75 GPA for the final year of study and a 70 iBT TOEFL or equivalent test score (some options have higher entry requirements). All students have a study plan and receive academic advising that is reflective of their specific Graduate Pathway program.

Successful completion of Graduate Pathway progression requirements secures students a place in full-time graduate studies at Oregon State University in their respective field of study.

Academic English + Graduate Pathway

Academically qualified applicants for Graduate Pathway who are unable to provide a language proficiency score (or who provide one that is...
below the minimum) will begin their program by taking Academic English
courses until they complete Level 5 of the program. All students have
a study plan and receive academic advising that is reflective of the
Academic English + Graduate Pathway program.

WHEN TO APPLY: INTERNATIONAL UNDERGRADUATE
STUDENTS

The Office of International Admissions recommends that international
undergraduate applicants submit a complete application and supporting
documents preferably 4 to 6 months before the intended term start date.

For information about Admission of International Graduate Students,
please see the Graduate Admissions Requirements (p. 39) section.
OREGON TRANSFER MODULE

The Oregon Transfer Module (OTM) provides a one-year curriculum for students who plan to transfer to a state of Oregon two-year or four-year college/university of higher education. The Oregon Transfer Module is neither a certificate nor a degree; it represents the successful completion of certain general education courses. OTM completion will be noted in the student’s record. The Oregon Transfer Module documents that a student has met a subset of the common general education requirements at all Oregon community colleges and state universities in Oregon.

The Oregon Transfer Module requirements at Oregon State University are:

- 45 lower-division credits—minimum of 12 credits must be OSU course work according to the attached list
- Minimum grade of C– for each course
- Minimum cumulative GPA 2.0 at time Oregon Transfer Module is completed
- Students are allowed 3 S/U credits per full time term or a maximum of 9 S/U credits in the Oregon Transfer Module.

OSU students planning to complete the Oregon Transfer Module must file the OTM Completion Application with the Registrar’s Office. Students should fill out the form when the module is completed or they are in the last term of completion.

Upon successful review by OSU and completion of the Oregon Transfer Module, a notation will be added to the student’s OSU record indicating the module is complete and the date. The notation will appear on the transcript as follows:

“Oregon Transfer Module Completed day-month-year”

ADMISSION TO GRADUATE SCHOOL

Exciting and diverse educational opportunities are offered through the graduate programs of Oregon State University’s 11 colleges which encompass 73 major disciplines and 19 different graduate degree types. A land, sea, space, and sun grant university, OSU enrolls more than 4,400 graduate students, representing more than 70 countries and every state in the nation.

At OSU, maximum opportunity is provided for the integration of graduate instruction and research. The graduate faculty (1,800 members) is selected on the basis of training, experience, research, and evidence of the ability to successfully direct and supervise graduate students.

All study beyond the bachelor’s degree at Oregon State University is conducted through the Graduate School. The establishment of graduate programs and the formulation and direction of individual student programs are responsibilities of the academic unit.

Introduction

Oregon State University has a global reputation for excellence in teaching, research, and engagement.

Oregon State is one of only two land, sea, space and sun grant universities in the nation and is the only university in Oregon to have the Carnegie Classifications for both Very High Research Activity and Community Engagement. OSU is comprised of 11 academic colleges with strengths in natural resources, earth dynamics and sustainability, life sciences, innovation and entrepreneurship, and the arts and sciences. OSU has facilities and/or programs in every county in the state, including 11 regional experiment stations, 35 county extension offices, a branch campus in Bend, a major marine science center in Newport, and a range of programs and facilities in Portland. OSU earned $441 million in external research funding in 2017, a third consecutive year of record-breaking growth.

A dedicated and highly regarded graduate faculty, a well-equipped library, comprehensive special collections, and exceptional research facilities keep Oregon State at the leading edge of graduate education. Linus Pauling, an Oregon State alumnus and the only person to win individual Nobel prizes in two different categories, selected OSU as the repository for his papers.

Research and teaching assistantships are available to allow students the opportunity to work with people who are leaders in their fields while furthering your education. In addition to being outstanding teachers, many OSU faculty members are internationally renowned for their research.

With these strengths in research and teaching, Oregon State produces degree holders who can compete successfully with the best in their fields.

But life isn’t all study and research, and when you’re ready to take a break, you’ll find that Oregon State is the ideal location. Whether you want to be active or relax, attend a sports event or a lecture, go to a concert or a play, you’re likely to find what you want at Oregon State or just a short distance away.

OSU is located in Corvallis, a community of 57,110 people situated in the Willamette Valley between Portland and Eugene. Ocean beaches, lakes, rivers, forests, high desert, the rugged Cascade and Coast Ranges, and the urban amenities of the Portland metropolitan area are all within a 100 mile drive of Corvallis. More than 27,650 undergraduate, 601 first professional, and 4,899 graduate students are enrolled at OSU, including more than 7,600 students of color and 3,500 international students.

The stunning, park-like setting of the OSU campus is comprised of 400 acres of stately buildings, seasonal landscaping and green, open spaces. Housing for many OSU undergraduate and graduate students is provided by residence halls on campus, and cooperatives, sororities, fraternities, and family student housing just off the central campus.

In addition to the main campus, the state owns and leases many acres of forest and farmland that are used by the university for instruction and research. OSU’s Hatfield Marine Science Center at Newport serves as the main coastal facility for Sea Grant, oceanography, and fisheries programs. For many graduate students, study and research through these off-campus facilities means a direct look at the natural resources and characteristics of the Pacific Northwest.

The institution that is now OSU opened in 1858 as Corvallis College, a small academy. College-level study began about 1865, and the first three baccalaureate degrees were awarded in 1870. Graduate programs began a short time later. In 1868, Corvallis College was designated by the Oregon Legislature as the “agricultural college of the state of Oregon.” From 1868 until 1885, the college continued under the direction of the Methodist Episcopal Church but was partly state supported. In 1885, the state of Oregon assumed full control of the institution.

Oregon State granted its first advanced degree (A.M.) in 1876. Residence requirements for the master’s degree were announced in 1897.

Responsibility for graduate study at OSU has changed a number of times over the years. In 1910 it was placed under a standing committee of the faculty. In 1933 all graduate work in the State System of Higher Education was placed in an interinstitutional graduate division. At Oregon State, an associate dean and an institutional graduate council were put in immediate charge of graduate study. The first doctor of philosophy degrees were conferred by Oregon State in 1935. In October 1946, the State Board of Higher Education again gave the institutions direct responsibility for their graduate programs and assigned graduate work at Oregon State to the Graduate School.

The primary aims of the Oregon State University Graduate School are to prepare students to create new knowledge and to assist students in acquiring specialized knowledge in one or more disciplines(s). At the same time, graduate programs may provide the student with the opportunity to acquire an educational background broader than his or her specialty. The Graduate School and graduate programs provide additional opportunities to learn and practice vital professional and leadership skills.

The graduate educational process is designed to help the student attain a high level of scholarship. The student is assisted in developing the skills of assimilation, interpretation, organization, evaluation, and application of knowledge. Such scholarship increases the student’s breadth of learning and prepares him or her for roles of leadership and participation in the broader areas of culture and society. The ideal graduate program permits the student to specialize, but at the same time develop a broad educational base.
The communication of new knowledge to both technical and non-technical audiences is an important part of the educational process. Creating, interpreting, and communicating knowledge are related processes at OSU. The Graduate School provides opportunities for students to develop these skills. Graduate students have the opportunity to distinguish themselves from their peers by taking advantage of a broad range of additional educational offerings. These include professional and leadership skills vital for student success in their future employment.

Mission, Goals, and Values

Preamble
Oregon State University is a comprehensive, public, research-intensive university and a member of the Oregon University System serving as the state’s land, sea, space and sun grant institution—one of only two universities with such designation in the country. OSU programs and faculty are located in every county of the state and are dedicated to investigating the state’s greatest challenges. OSU considers the state of Oregon its campus and works in partnership with the P–12 school system, Oregon community colleges and other OUS institutions to provide access to high quality educational programs. Strong collaborations with industry and state and federal agencies drive OSU’s research enterprise.

Mission
As a land grant institution committed to teaching, research, and outreach and engagement, Oregon State University promotes economic, social, cultural and environmental progress for the people of Oregon, the nation and the world. This mission is achieved by producing graduates competitive in the global economy, supporting a continuous search for new knowledge and solutions, and maintaining a rigorous focus on academic excellence, particularly in the three Signature Areas: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

Vision
To best serve the people of Oregon, Oregon State University will be among the Top 10 land grant institutions in America.

Goals
1. Provide outstanding academic programs that further strengthen our performance and pre-eminence in three Signature Areas of Distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.
2. Provide an excellent teaching and learning environment and achieve student access, persistence, and success through graduation and beyond that matches the best land grant universities in the country.
3. Substantially increase revenues from private fundraising, partnerships, research grants, and technology transfers while strengthening our ability to more effectively invest and allocate resources to achieve success.

OSU Strategic Plan: https://leadership.oregonstate.edu/provost/osu-strategic-plan

Core Values
Accountability. We are committed stewards of the loyalty and good will of our alumni and friends of the human, fiscal, and physical resources entrusted to us.

Diversity. We recognize that diversity and excellence go hand-in-hand, enhancing our teaching, scholarship, and service as well as our ability to welcome, respect, and interact with other people.

Integrity. We practice honesty, freedom, truth, and integrity in all we do.

Respect. We treat each other with civility, dignity, and respect.

Social responsibility. We contribute to society’s intellectual, cultural, spiritual, and economic progress and well-being to the maximum possible extent.

Organization
Graduate School
Graduate work at Oregon State University is administered by the Graduate School. The regulations, policies, and procedures governing graduate education are implemented by the Dean of the Graduate School. The Graduate School oversees admission standards, and degree requirements; enforces current regulations; recommends changes in graduate policy to the Graduate Council; acts on petitions to deviate from existing regulations; and is responsible for the efficient and effective operation of the Graduate School. The Graduate School office is in Heckart Lodge on Jefferson Way near 30th Street on the Corvallis campus. The telephone number is 541-737-4881, and the FAX number is 541-737-3313. The email address is Graduate.School@oregonstate.edu, and the Web address is http://gradschool.oregonstate.edu.

Mission
The Graduate School contributes to OSU’s goal of achieving top ten land grant status by providing leadership in all aspects of graduate education, through advocacy for the critical importance of the graduate enterprise to the university’s mission, and by providing core centralized services to the graduate community. In partnership with the graduate faculty, the Graduate School plays a leadership and advocacy role to ensure that OSU attracts the best graduate students and delivers a compelling and high-quality graduate experience that prepares them to create new ideas and knowledge, to educate others, to make positive impacts on society, and to lead innovation.

Graduate Council
The Graduate Council formulates the basic policy, procedures, and requirements for all graduate work at OSU, within the general authority granted by the State Board of Higher Education. The council establishes admission standards, basic degree requirements, and general policies; approves all graduate faculty members, new programs, and courses; and periodically reviews all existing graduate programs. Graduate Council members are appointed by the Executive Committee of the Faculty Senate, with each academic college having one representative. Major actions of the Graduate Council are referred to the Faculty Senate for review and approval.

Current and past Graduate Council membership and information can be found at: http://senate.oregonstate.edu/graduate-council

Graduate Faculty
Graduate faculty members are chosen from the university faculty based on their academic training, experience, demonstrated potential for scholarship, and evidence of their ability and competency to direct and supervise graduate students in the pursuit of advanced knowledge.
Each graduate faculty member is authorized to perform specific activities within a particular graduate program. The head and academic dean of each unit are responsible for nominating faculty members for these activities, subject to review and approval by the Graduate Council.

Academic Units
An academic unit is the administrative unit responsible for directing and managing a graduate major or minor field of study. An academic unit may be an academic program, department, school, or college, or composite of these. The chief administrative officer of the academic unit is responsible for managing the graduate programs in that unit and is responsible to the dean of the Graduate School for all graduate work performed by the unit.

Academic units have a major role in the success of graduate education. Within the general rules of the Graduate School, the academic units establish and teach courses, maintain a graduate faculty to teach and supervise research, establish their own admission standards and specific graduate certificate and degree requirements, make graduate student appointments, and provide advice and supervision for their graduate students.

Equal Opportunity
Oregon State University, in compliance with state and federal laws and regulations, does not discriminate on the basis of age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status in any of its policies, procedures, or practices. This nondiscrimination policy covers admission and access to, and treatment and employment in, university programs and activities, including but not limited to academic admissions, financial aid, educational services, and employment. Inquiries regarding the university’s equal opportunity policies may be directed to the Office of Equal Opportunity and Access, 541-737-3556 or visit http://eoa.oregonstate.edu/.

Graduate Admissions Requirements
Oregon State University offers admission to applicants whose records demonstrate the highest potential for graduate study and promise for substantial contribution to both their academic professions and to a diverse, global society. The university fosters an environment that welcomes inclusiveness.

Admission decisions are based on many factors, such as the quality of the applicant’s prior academic degree and record of accomplishment, statement of purpose, letters of recommendation from professors or others familiar with the applicant’s academic work, performance in aptitude and achievement tests, relevant work experience, preparation in the proposed field of study, and the connection of the applicant’s academic goals with the faculty’s research interests.

Requirements
The following minimum entrance requirements guide the university and its graduate programs in the consideration of applicants for graduate admission:

- A four-year baccalaureate degree (or international equivalent), a professional degree (such as BPharm, BVsc, MBBS, MD, DVM, DPharm, etc.), or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent baccalaureate degree or equivalent or any subsequent graduate degree from a regionally accredited (US) or recognized (International) college or university, plus all work completed thereafter.

The graduate program may choose to calculate the GPA on the last 90 quarter credits (60 semester credits [last two years on an international record]) of graded undergraduate work on the most recent baccalaureate degree, plus all work completed thereafter, as the basis for admission.

Minimum GPA for admission to only graduate certificate programs is set by the departments that supervise the certificates. Applicants requesting admission to only graduate certificate programs should contact their academic program to learn about minimum GPA and other admission requirements.

OR:
- A four-year baccalaureate degree (or international equivalent), a professional degree, or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, and
- A 45-quarter credit equivalent graduate degree from a regionally accredited (US) or recognized (International) college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent graduate degree.

If the applicant has completed his or her baccalaureate degree in a country that is a signatory of the Bologna Declaration, then:

- A Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the degree, plus all subsequent graded course work.

OR (Other three-year bachelor degree holders):
- A non-Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, and
• A 45-quarter credit equivalent graduate degree from a recognized college or university with
• A cumulative GPA of at least 3.00 on the most recent graduate degree.
• Graduate programs also have the option of validating that specific professional and/or three-year degrees appropriately prepare students for their graduate admission.

International Requirements
All international graduate applicants must meet the following additional requirements:

• Documentation of sufficient financial resources to attend Oregon State University as a graduate student.

AND:

• Documentation of English language proficiency

<table>
<thead>
<tr>
<th>Test</th>
<th>Regular Admission</th>
<th>Transitional Admission-TAP (formerly Conditional Admission-CAP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOEFL Paper based</td>
<td>550</td>
<td>500-547</td>
</tr>
<tr>
<td>Internet (iBT) TOEFL</td>
<td>80 Minimum score of 18 on each section</td>
<td>60-79 Or any sub-score less than 18</td>
</tr>
<tr>
<td>Internet (iBT) TOEFL</td>
<td>80 Minimum score of 22 on Speaking subscore and Minimum score of 18 on all other sections</td>
<td></td>
</tr>
<tr>
<td>IELTS</td>
<td>6.5</td>
<td>6.0</td>
</tr>
</tbody>
</table>

Please note: OSU requires graduate applicants to meet or exceed all five iBT scores to be eligible for full admission. Scores must be no more than two years old at the time of the applicant’s first term of registration.

Waived from English Language Testing
The English language proficiency requirement is waived for applicants who have demonstrated success by achieving an overall GPA greater than 3.0 on a 4.0 scale for two or more semesters/quarters in a rigorous undergraduate or postgraduate program in the U.S. or from one of the following English speaking countries1: Australia, Canada, New Zealand, and United Kingdom.

1 Waivers for applicants in other countries are considered on a case-by-case basis if the medium of instruction is English. The individual program must petition the Graduate School for a waiver. Not all programs will request a waiver. Please contact your proposed graduate program to inquire about their policy.

English Language Exceptions
Individual programs may request exceptions to the minimum English language proficiency requirements. Exceptions to the minimum TOEFL score/sub-score requirements will be considered by the Graduate School Dean on request if:

• Applicant’s GRE Verbal score is greater than 500 (153 – revised GRE) OR
• The chair of the Graduate Program (or designated faculty member)
  • Has personally interviewed the applicant and established a plan for language support for the applicant, if needed, which may include additional English Language Training.

OR
• The Graduate Program arranges for the applicant to complete language training at INTO OSU equivalent to the admission status as designated by the Transitional Admission Program-TAP

Transitional English Admission
Transitional admission based on English language proficiency may be granted to applicants seeking admission to a graduate degree program. University transitional admission of international applicants may be granted only if the applicant is otherwise fully admissible.

Transitional admission for degree-seeking applicants requires:

• On-campus testing of English language proficiency prior to enrollment, and
• Compliance with the subsequently specified plan for English and academic course work during each quarter until such time as the applicant qualifies for regular admission.
• Individual graduate programs may require additional documents such as GRE and GMAT test results or set higher English and academic standards. For detailed information, refer to the website for Graduate Admissions and individual graduate program websites.

Transitional admission based on English language proficiency may not be granted to applicants seeking admission to only a graduate certificate program.

All international applicants seeking graduate teaching assistantships should refer to the International Graduate Teaching Assistant English Language Requirement section of this catalog for more details.

Admission Requirements Continued
Applicants not meeting minimum academic requirements still may be considered for admission with the support of their academic program, plus review and approval by the University Graduate Admissions Committee. For these applicants, decisions may rely more heavily on noncognitive criteria. However, the university encourages those applicants whose overall cumulative undergraduate GPA is less than an equivalent 3.00 on a U.S. 4.00 grading scale to take the GRE.

Applicants whose baccalaureate degrees are awarded by an institution that issues non-graded transcripts will be considered for admission with the support of the program’s written evaluation of the quality of the applicant’s transcript record.

Satisfaction of minimum entrance requirements does not guarantee admission, since the number of qualified applicants far exceeds the number of places available. As a consequence, many well-qualified applicants may not be accommodated.

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions.

Policy Regarding Students' Eligibility to Return to Prior College
Applicants who disclose that they are ineligible to re-enroll at any college or university that they attended within the last seven years for
student conduct reasons will be automatically declined admission to OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons will be admitted only if they meet OSU's minimum academic requirements.

All applicants who are denied admission for conduct reasons have the right to appeal that decision, and appeals will be reviewed on a case-by-case basis.

Application Process
Application forms required for admission to the Graduate School are available electronically at https://oregonstate.Force.com/AppLogin.

The applicant’s proposed academic program will examine material submitted to determine the adequacy of scholastic background and to decide whether departmental facilities are adequate for the expressed aims of the applicant. Upon the positive recommendation of the academic program, the Graduate School will determine whether minimum university requirements for admission have been met and, subsequently, will provide to the applicant formal notification as to the action taken.

Applicants must upload application materials, unless a program specifies differently. Applicants should contact their academic program(s) of interest to determine whether additional admission materials are required beyond those listed below. Applicants seeking admission to only a graduate certificate program must provide items a., b., and c. below and contact their academic programs to determine what other program-specific materials may be required for admission to the graduate certificate program.

a. One electronic version of the graduate application for each major to which the applicant seeks admission.

b. $75 nonrefundable application fee (domestic students); $85 nonrefundable fee (international students). Applying online requires payment by credit card.

c. Transcripts/Academic Records\(^1\) of all previous academic work, undergraduate and graduate. International applicants must provide a certified English translation of academic records in addition to original language records.

\(^1\) Unofficial records but not grade slips/reports, computer printouts, or internal transcripts may be submitted for evaluation and admission purposes.

If admitted, before registering for courses:
1. Applicants from U.S. schools must provide official transcripts from all colleges attended, including final transcripts showing degrees awarded and dates earned.
2. International applicants must provide equivalent documentation from all colleges attended, including final academic records showing degrees awarded and dates earned in the original language plus certified English translations.
3. Three letters of professional reference are required of most applicants applying for admission to a graduate degree program.

If you have a master's degree, please include a letter from your major professor. Applicants applying only to graduate certificate programs are encouraged to consult with their academic program to determine whether this or other materials are required.

e. Certain graduate programs require the GRE of all applicants. Address inquiries regarding GRE requirements to your proposed academic program. See specific Program Information, http://gradschool.oregonstate.edu/programs.

International applicants must also upload the following documents with their application materials:

a. One photocopy of TOEFL or IELTS scores. If admitted, official test scores must be received by the Graduate School prior to the start of the applicant's first term of enrollment.

b. Certification of Finances form with supporting documentation, demonstrating sufficient financial resources for the desired academic program.

Financial documentation is not required at the time of application. If the application is accepted, the Graduate School will contact the applicant via email to request the financial materials.

Note: If you will be taking courses as a distance student through OSU Ecampus and not entering the U.S., we ask that you complete a special certification form. Proof of funding is not required. Please contact graduate admissions to request the form.

Application Deadlines

Department Deadlines
Academic programs establish their own application deadlines, which are often substantially earlier than the general university deadlines described below. In such cases, program deadlines supersede the more general university deadline. Some academic programs also admit applicants for specific terms only (e.g., fall term). Applicants should contact the proposed graduate program for deadlines and any other restrictions. See specific program information, http://gradschool.oregonstate.edu/programs.

In the absence of earlier program deadlines, the following university deadlines exist:

### U.S. Citizens and Permanent Residents
Absolutely no later than 30 days prior to the first day of classes.

### International Applicants
To allow adequate time for students to obtain visas and make travel arrangements, the following deadlines have been established for international applicants:

<table>
<thead>
<tr>
<th>Term</th>
<th>General University Deadline(^1) for International Students Applying from Outside the U.S.</th>
<th>General University Deadline(^1) for International Students Applying from Within the U.S.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>April 1</td>
<td>June 1</td>
</tr>
<tr>
<td>Winter</td>
<td>July 1</td>
<td>September 1</td>
</tr>
<tr>
<td>Spring</td>
<td>October 1</td>
<td>December 1</td>
</tr>
<tr>
<td>Summer</td>
<td>January 1</td>
<td>March 1</td>
</tr>
</tbody>
</table>

\(^1\) Program deadlines supersede this deadline. Please contact program directly for specific program deadline.

Summer Session Admission
Admission Status

Students may be admitted to the Graduate School under the following categories.

Advanced-Degree Students

1. **Regularly Admitted Graduate Students.** These students have been accepted by the university and by a major program to work toward an advanced degree.

2. **Conditionally Admitted Graduate Students.** Students who have not met the formal admission requirements but whose accomplishments have convinced the University Graduate Admissions Committee and their major program that they have potential for success as advanced degree candidates may be conditionally admitted as follows:
   1. Students from nonaccredited institutions must complete at least one term of satisfactory work at Oregon State, after which they may be admitted with full standing in the Graduate School.
   2. Students whose preparation does not warrant full admission to the Graduate School but who may prove acceptable later must satisfactorily complete specified conditions to demonstrate their ability to carry out graduate-level work.

3. **Transitionally Admitted Graduate Students.** International students who lack minimum English language proficiencies but otherwise meet all other formal admission requirements may be transitonally admitted under the following:
   1. TOEFL total score is in the range of 61 to 79 (iBT).
   2. IELTS total score is 6.0.
   
   Students who score below the minimum on one or more iBT subtests but meet the minimum overall iBT score requirement may be considered for transitional admission. Transitional admission based on English language proficiency may not be granted to students seeking admission to only a graduate certificate program.

4. **Provisionally Admitted Graduate Students.** Students who have met all of the university standards for formal admission but whose academic program or major department may have placed additional restrictions upon their admission may be provisionally admitted. These restrictions may include certain prerequisite courses that must be completed, completion of the GRE or GMAT, submission of additional reference letters or scores, etc.

Condiionally and transitonally admitted students cannot schedule and hold preliminary oral exams or final oral exams for their degree until they have satisfied the requirements of their admission and have been reclassified as regular graduate students.

Provisionally admitted students cannot take the final exam for their degree until they have satisfied their provisions and have been reclassified as regular graduate students.

Credit for graduate courses that students have completed acceptably while registered as conditional, transitional or provisional students may count toward the residence requirement for advanced degrees.

If students fail to satisfactorily complete their conditions or provisions, they will be dismissed from the Graduate School.

Graduate Certificate Students

Students admitted to only a graduate certificate program may be considered for reclassification as degree-seeking graduate students by following the procedure in the section below regarding reclassification.

Nondegree-Seeking Graduate Students

The nondegree-seeking graduate student category may be used by holders of a baccalaureate degree who do not wish to pursue an advanced degree at Oregon State University. Those nondegree-seeking graduate students who wish to be reclassified as degree-seeking graduate students must follow the procedure in the next section.

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. should consult with OSU’s Office of International Services (http://international.oregonstate.edu/ois) (OIS) (email: ois.student@oregonstate.edu (isas.advisor@oregonstate.edu)) before submitting the OSU non-degree application for admission. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one’s visa status.

Graduate international students who wish to enroll as nondegree students with OSU for one or more terms, but who will not participate in an established exchange program, should contact the OIS Office isas.advisor@oregonstate.edu for further information before applying.

International students who plan to enroll with OSU as nondegree exchange students should use the application form that is made available at each partner institution. For a list of exchange partner institutions, go to http://international.oregonstate.edu/sites/international.oregonstate.edu/files/atosu/osu-exchange-partner-institutions.pdf.

Reclassification of Postbaccalaureate Students, Nondegree-Seeking Students, and Graduate Certificate Students

A postbaccalaureate, nondegree-seeking graduate, or graduate certificate student may be considered for status as a regular degree-seeking graduate student under one of the following provisions, depending upon prior academic records:

If the student would have been eligible for graduate admission at the time of entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student, the student is eligible for admission consideration at any time but must submit an application for admission to the appropriate level to begin the process.

If the student, prior to entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student had been denied graduate admission or would have been ineligible for graduate admission, as determined a posteriori by the University Graduate Admissions Committee, the postbaccalaureate, nondegree-seeking graduate, or graduate certificate student must complete option a, b, or c below and reapply or reactivate an application for admission to graduate-level study.

a. complete 24 credits of courses each with a grade of B (3.00) or better, or

b. complete 15 credits of graduate course work involving lecture and textbook instruction, each eligible to transfer into the degree program and with a grade of B (3.00) or better, or

c. complete sufficient credits to bring the cumulative grade-point average (that for the last 90 credits of undergraduate work plus that
for courses taken as part of the 24-credit rule) to 3.00 or better before being eligible to apply for graduate admission.

These courses will normally be regular graduate courses relevant to the specific field, except that seminars and other blanket number graduate courses may not be used. Upper-division undergraduate courses are acceptable, provided that they eliminate specific deficiencies in requirements for entry into an identified graduate program. Lower-division undergraduate courses may not be used. All courses should be carefully selected in consultation with an academic advisor from the graduate field into which the student desires admission.

Completion of 2(a), 2(b) or 2(c) above does not guarantee graduate admission. Reclassification decisions employ the same procedures and requirements as those for admission. Postbaccalaureate, nondegree-seeking graduate, and graduate certificate students who seek reclassification must be acceptable to the program in which they plan to major. The university does not have the capacity to accommodate all who meet the minimum requirements for regular graduate student status; when selecting among students who meet minimum requirements, the university treats students requesting reclassification the same as those applying for admission as regular graduate students.

A postbaccalaureate or nondegree-seeking graduate student may use graduate credit earned in this status toward an advanced degree or graduate certificate if the student is later reclassified as a regular graduate student. This credit cannot be used to satisfy residence requirements for an advanced degree. A graduate certificate student may use graduate credit earned in this status toward an advanced degree if the student is later reclassified as a regular graduate student. In either case, the amount of usable credit will depend on the size of the individual student’s program (e.g., a maximum of 15 graduate credits could be used on a 45-credit master’s program or a maximum of 6 graduate credits may be applied toward an 18-credit graduate certificate.) See section entitled “Transfer Credit” for complete details.

Students should initiate all requests for reclassification at the Graduate School.

Second OSU Master’s Degree
A candidate for a second master’s degree from Oregon State University may request the application of up to 15 credits, appropriate to both programs, from the first master’s degree program to another, subject to the following three requirements:

1. Credits used to satisfy the residency requirements of one master’s degree may not be used to satisfy the residency requirements of another master’s degree.
2. Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.
3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.

Pursuit of the Second PhD
The doctor of philosophy degree is the highest academic degree granted by North American universities. It is a research degree designed to prepare a student to become a scholar; that is, to discover, integrate, and apply knowledge, as well as communicate and disseminate it. The doctor of philosophy degree is to be distinguished from other doctorates such as the MD, JD, or EdD degrees, which are designed for professional training or which focus on applied rather than basic research.

Students may enroll for a second PhD degree if they have previously obtained a PhD from OSU or elsewhere. Concurrent pursuit of dual PhD degrees is not allowed. In the case of a student pursuing a second PhD degree, requirements for the second PhD must be met without overlap with the first PhD degree including, but not limited to: successful completion of a second preliminary exam, a separate thesis with no overlap with the first PhD thesis, a final defense exam for the second PhD, a different major advisor from the first PhD, a thesis committee of different faculty than the first PhD degree (although some, but not complete, overlap between committee members would be acceptable in the case of two PhD degrees from OSU), and all other requirements for the second PhD degree program. Courses from the first PhD degree relevant to the second degree may be allowed to transfer between the two degrees. However, the student’s program of study committee must approve all course transfers, should pay particular attention to the relevancy, overlap, and currency of any courses to be transferred from one PhD degree to another, and are advised to proceed conservatively when approving course transfers from a first PhD to a second PhD degree.

Re-Enrollment
All credential-seeking graduate students will be subject to the continuous enrollment policy. Continuous graduate enrollment refers to the policy of requiring continuous registration of graduate students from original matriculation until all graduate degree requirements are met. Please refer to Registration Requirements under Policies Governing All Graduate Programs for complete details.

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish his/her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission and pay the readmission fee. Readmission is not guaranteed even if the student left in good standing.

International students who wish to re-enroll after an absence should contact the Office of International Services (OIS) to make sure they have the required documents to return to the US.

Graduate Tuition and Fees
The official Graduate Tuition and Fee Schedule can be found on the OSU Business Affairs website: http://fa.oregonstate.edu/business-affairs/tuition-and-fee-information.

Tuition and fees for the next year are usually finalized during the month of July prior to the academic year start.

For information about residency status, visit http://admissions.oregonstate.edu/residency.

Policies Governing All Graduate Programs
Graduate Major
A graduate major is the area of academic specialization in which the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student’s transcript.
Graduate Option
Options are for students of a specific major. An option is one of several distinct variants of course aggregations within a major that focus on an area of study designed to provide a student with specialized knowledge, competence, and skills while sharing a minimum core of courses.

A graduate option consists of a minimum of 12 designated quarter credits of related course work (excluding thesis credits), comprised of course work offered by the sponsoring unit as well as by other academic units. The option may be comprised of specific courses, completion of a designated number of credits from a longer list of alternative courses, or a combination of specific and alternative course lists. Approved options may be added to a graduate program of study, and approved by the faculty advisor(s) and the director of the sponsoring unit. On the program of study, there should be no overlap in course credits between options (the same course cannot be used to satisfy credit requirements in multiple options). When the unit submits the final examination card to validate awarding of the major to the Graduate School, the unit will also validate that the requirements of the option have been completed.

Graduate Area of Concentration
A graduate area of concentration is a subdivision of a major or minor in which a strong graduate program is available. Areas of concentration may be referenced on the student’s program of study, but they are not listed on the student’s transcript.

Graduate Minor
A graduate minor is an academic area that clearly supports the major. Master’s program minors must include a minimum of 15 quarter credits of graduate course work; doctoral minors require a minimum of 18 credits. On a master’s or doctoral program, a minor may be:

1. an academic area available only as a minor,
2. a different major,
3. the same major with a different area of concentration, or
4. an integrated minor.

An integrated minor consists of a series of cognate courses from two or more areas. These courses must be outside the major area of concentration, with most of the courses being outside the major department. The graduate faculty member representing the integrated minor must be from outside the major department. Graduate minors are listed on the student’s transcript.

Concurrent Master’s Degrees
Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree. For additional information, please refer to the Transfer Credit section of this catalog.

Dual Majors
For the MA, MS, EdM, MF, or PhD degree, a student may select two graduate major areas to pursue instead of the traditional single major. Only one degree is awarded, and the student basically must satisfy all degree requirements for majors in both areas. For more details, contact the Graduate School.

Graduate Certificate
A graduate certificate program is a structured progression of graduate-level courses that constitute a coherent body of study with a specific defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university.

Transfer Credit
Students may only transfer course credits from regionally accredited institutions (or equivalently recognized institutions outside the U.S.). Students who wish to transfer graduate credits from other schools must provide transcripts for courses already completed to the Graduate School prior to the submission of a study program. Undergraduate students at OSU may receive credit for graduate courses (500 and 600 level) in excess of the requirements for a baccalaureate degree. Graduate courses taken at OSU while the student was a non-degree graduate student, a post-baccalaureate student, a professional degree-seeking student (PharmD or DVM), or an undergraduate student, are considered transfer courses.

Courses to be transferred must be graduate level. It is the responsibility of the student wishing to transfer the course to provide the necessary documentation to satisfy the OSU guidelines.

All courses on a program of study require final approval by the student’s program of study committee and the Graduate School. Committees are free to deny inclusion of any course if they believe that the earned grade is not sufficient; the course is not appropriate, sufficiently current, sufficiently rigorous based on syllabus content; or for any other reason. To be considered for inclusion on a graduate program of study, OSU courses whether taken as either an enrolled graduate student or pre-graduate admission, must have an earned grade of C or better. To be considered for inclusion on a graduate program of study, courses from another institution (transfer courses) must have an earned grade of B minus or better.

If the transfer credit is from a foreign university, the student must provide copies of the original transcript and an English translation of the transcript, with the courses to be transferred clearly indicated. Grades and credits for the courses must be clearly identified. In some countries, the first university degree, which OSU considers to be equivalent to a baccalaureate degree, may take five years or more to complete. All of the course work toward such a degree is considered a requirement for the first university degree, and hence none of it can be transferred to a graduate certificate or graduate degree at OSU.

Students may not transfer courses graded on a nonstandard basis (e.g., Pass/No Pass, Credit/No Credit, Satisfactory/Unsatisfactory) to their graduate certificate or degree programs unless it can be verified from the registrar of the university offering the course that the grade is equivalent to a B (3.00) or better.

Graduate courses to be transferred from another institution to an OSU master’s degree must not have been used to satisfy the requirements for a bachelor’s degree, master’s degree (or equivalent) or a doctoral degree.

Graduate courses to be transferred from an OSU master’s degree to a second OSU master’s degree must meet the following three requirements:

1. Credits used to satisfy the residency requirements of one master’s degree may not be used to satisfy the residency requirements of another master’s degree.
2. Students who earn two master's degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.

3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.

Up to 15 graduate credits may be transferred toward a 45-credit master's degree. Up to 6 graduate credits may be transferred toward an 18-credit graduate certificate.

Graduate courses to be transferred to a doctoral degree program can be courses that were used to satisfy the graduate course requirements for a graduate certificate or a master's degree (or equivalent). Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee. There is no limit on transfer credit toward the doctoral degree as long as the doctoral residence requirement is satisfied.

Credits earned in fulfillment of a graduate certificate program may be applied to a graduate degree, so long as they meet the appropriate standards for use in the degree and the criteria to transfer credit as defined herein. Courses completed for a degree program may likewise be applied toward a certificate program.

Preparation Required for Graduate Major

Preparation for a graduate major is ordinarily an undergraduate major in the same subject, or a fair equivalent. Preparation for a graduate minor is ordinarily at least one year of upper-division work in addition to foundation courses in the subject.

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, such as practicum courses and internships. The university may find it necessary to evaluate a person's background to determine his or her likelihood of maintaining standards of professional conduct necessary in the academic discipline or profession. An evaluation may consider current performance as well as past experiences and actions that could affect a student’s ability to perform in the particular course or program.

Qualifying Examinations. Some departments and programs require graduate students working for advanced degrees to take oral and/or written examinations in their major and minor fields to determine overall preparation and background. The examination serves as a guidance examination, the results of which are used in setting up the graduate study program. A poor showing in any area may result in a student’s taking undergraduate courses without graduate credit to gain the necessary background to proceed with the graduate program. The examination usually is taken during the first quarter of graduate enrollment.

In lieu of their own qualifying examination, departments and programs may accept a satisfactory showing in the Graduate Record Examination (GRE), or some other standard test. Check with the anticipated major department or program to find out which exams are appropriate.

Registration Requirements

Introduction

Full-time status as a graduate student is defined by Oregon State University as enrollment in 9 credits per term. The maximum load for a full-time graduate student is 16 credits. A student may exceed this limit only with the approval of the Graduate School. Students receiving approval to exceed 16 credits will be assessed a per-credit overload fee.

Full-time status (i.e., a minimum of 9 credits per term) may be sufficient to qualify for purposes of veterans’ benefits, visa requirements, external fellowships, and federal financial aid.

To assure full compliance with visa regulations, international students must consult with the Office of International Services (http://international.oregonstate.edu/ois) (OIS) for additional information about registration requirements.

Continuous Enrollment

I. Minimum Registration

Unless on approved leave of absence (see Section II), all graduate students in graduate degree programs must register continuously for a minimum of 3 graduate credits until their degree is granted or until their status as a credential-seeking graduate student is terminated. This includes students who are taking only preliminary comprehensive or final examinations or presenting terminal projects. Students must register for a minimum of 3 credits and pay fees if they will be using university resources (e.g., facilities, equipment, computing and library services, or faculty or staff time) during any given term, regardless of the student’s location. If degree requirements are completed between terms, the student must have been registered during the preceding term.

Graduate students who have successfully completed all course and noncourse requirements in accordance with diploma deadlines (see the Graduate School website) are not required to register during the subsequent term.

Nonthesis master’s degree students who complete all degree requirements during a term for which they are registered will not be required to register for the subsequent term.

Doctoral and thesis master’s students who fail to meet all deadlines and complete all course and noncourse requirements during the term will be required to register for a minimum of 3 graduate credits during the subsequent term. However, only if library copies of the thesis have been submitted to the Graduate School within the first two weeks of the subsequent term and the thesis is the only outstanding requirement remaining for certification of the student’s graduate degree may an exception to this rule be considered.

Graduate students who use facilities or faculty/staff time during summer session to engage in academic or research activities in support of their thesis/pursuit of degree are required to register for a minimum of 3 credits during the summer session. Graduate students who use facilities or faculty staff time during summer session purely in service to the university and not to engage in academic or research activities in support of their thesis/pursuit of degree are not required to register during the summer session.

Graduate students do not need to submit a Leave of Absence form if they do not enroll in summer term.

It should be noted that graduate assistantship eligibility requires enrollment levels that supersede those contained in this continuous
enrollment policy. Various agencies and offices maintain their own registration requirements that also may exceed those specified by this continuous enrollment policy (e.g., those of the Veterans Administration, Immigration and Naturalization Service for international students, and those required for federal financial aid programs.) Therefore, it is the student's responsibility to register for the appropriate number of credits that may be required for funding eligibility and/or compliance as outlined by specific agency regulations under which they are governed.

II. Leave of Absence

On-leave status is available to students who need to suspend their program of study for good cause. Students who desire a leave of absence will work with their major professor, program administrator, and the Graduate School to arrange authorized leave. Students understand that while on leave they will not use university resources. Graduate faculty members are students’ most important resource at the university and will work closely with graduate students to ensure timely completion of academic goals, understanding of the continuous graduate enrollment policy, and that graduate students enroll each term other than when they are on authorized leave. The Graduate School will assist graduate students and graduate faculty members with administrative procedures related to the continuous graduate enrollment policy. The Graduate School recognizes the diverse circumstances and unpredictable nature of graduate students’ lives and will work in partnership with the graduate community in arranging leaves and responding to unanticipated situations.

A graduate student intending to resume active graduate student status following interruption of his or her study program for one or more terms, excluding summer session, must apply for leave of absence to maintain graduate student standing in his or her degree program. (See Section IV below). Leave of Absence (http://gradschool.oregonstate.edu/forms) form must be received by the Graduate School at least 15 working days prior to the first day of the term involved. The time the student spends in approved on-leave status will be included in any time limits relevant to the degree (See Sections C.1. and C.2. below). Students in on-leave status may not a) use any university facilities, b) make demands upon faculty time, c) receive a fellowship or financial aid, or d) take course work of any kind.

A. Eligibility

Only graduate students in good standing are eligible for leave of absence.

B. Leave of Absence Categories

1. Regular. Regular leave of absence is granted on a term-by-term basis in cases where the student demonstrates good cause (e.g., illness, temporary departure from the university for employment, family issues, financial need, personal circumstances). Students who request a leave of absence must:
   1. be in good standing,
   2. submit the Leave of Absence form (http://gradschool.oregonstate.edu/forms) indicating each term for which leave is requested, and
   3. complete all degree requirements within the time limits established in this catalog.

2. Family and Medical Leave. This leave is different from regular leave in that it is for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. See policy at http://gradschool.oregonstate.edu/sites/gradschool.oregonstate.edu/files/imce/progress/graduate-student-family-and-medical-leave-policy.pdf.

C. Limits

1. Regular Leave of Absence is granted for a specified time period that may not exceed three terms, excluding summer session.

2. Time spent in on-leave status will be included in all time limits pertaining to the student's degree program.

3. Students who matriculate fall term 2016 or later may use unlimited leaves as long as time to degree constraints are met (7 years for master's degrees and graduate certificates; 9 years for doctoral degrees). Leaves of absence may be approved for up to three terms at a time, but must be renewed to retain student status. Failure to renew the leave of absence or register will result in the loss of student status.

4. Family and Medical Leave is available for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. These absences will not be included in time limits pertaining to the student's degree program. Contact the Graduate School for additional details.

D. Approval

Approval of the major professor, department/program chair, and graduate dean are required.

III. Student Fees

Students with approved on-leave status are not required to pay tuition or fees. However, students who must register as per section I, "Minimum Registration," must pay both tuition and student fees.

IV. Unauthorized Break in Registration

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain a leave of absence will relinquish his or her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission and pay the readmission fee. The readmission application must be approved by the student's major professor, department/school/program chair, and graduate dean. Acceptance back into a graduate program is not guaranteed even if the student departed in good standing. The petitioner for readmission will be required to meet university and departmental admission requirements and degree completion requirements that are in effect on the date of readmission. Review of the Application for Graduate Readmission may also result in a change of residency status from resident to nonresident.

V. Appeal

In the case of extraordinarily extenuating circumstances, students may appeal the provisions of the continuous graduate enrollment policy by submitting a detailed request in writing to the dean of the Graduate School.

Implementation of Continuous Enrollment Policy

All graduate students, excluding certificate-only students, including those enrolled prior to fall 2002, are subject to this policy.

All graduate students should be enrolled for a reasonable number of credits sufficient to represent their use of university space, facilities or faculty time.
Registration Requirements for Graduate Assistants
In addition to the above registration requirements, the following requirements apply to graduate teaching assistants (GTA) and graduate research assistants (GRA).

As a condition of their academic appointments, graduate teaching and research assistants are required to register for 3 credits above the minimum full-time load (i.e., a minimum of 12 credits) each term of the appointment during the academic year (fall, winter, and spring). During summer session, a minimum registration of 3 credits is required for graduate assistants. Students are responsible for determining whether the minimum 3-credit summer registration fulfills their individual immigration, financial aid, tax liability or other specific needs. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy enrollment requirements for graduate assistant salary/stipend, tuition remission, salary supplement or health insurance benefits. Tuition charges associated with INTO OSU enrollment are not covered under graduate assistant tuition remission.

Grade Requirement
A grade-point average of 3.00 (a B average) is required: 1) for all courses taken as a degree-seeking graduate student, and 2) for courses included in the graduate degree or graduate certificate program of study. Grades below C (2.00) cannot be used on a graduate program of study. A grade-point average of 3.00 is required before the final oral or written exam may be undertaken. Enforced graduate-level prerequisite courses must be completed with a minimum grade of C.

Policy on Disallowance of Undergraduate Courses in the Calculation of the Final Graduate Student GPA
Calculation of the final cumulative GPA for graduation for a graduate student will include all 500-, 600- and certain 700-level courses determined to be eligible for use on a graduate program of study. Undergraduate (100 to 400 level) courses taken, even if taken while a graduate student, will not be used in the cumulative GPA calculation for graduation. A graduate student is required to attain a 3.0 GPA in all graduate-level course work, both cumulatively and on the program of study, for graduation.

Course Numbers
Graduate Courses
All graduate courses will be designed around well-defined objectives and student learning outcomes, and instructional opportunities should be designed to help students achieve these outcomes. Student learning outcomes encompass the range of student attributes and abilities that students should be able to demonstrate after successful completion of the course.

500-Level Courses
These courses are graduate courses offered primarily in support of graduate certificate or master’s degree programs but which are also available for use on doctoral level degree programs.

Undergraduates of superior scholastic achievement may be admitted to these courses on the approval of the instructor, and they may, if admitted, under some conditions, use a limited number of these courses toward a graduate certificate or a graduate degree program. These courses have one or more of the following characteristics:

1. They require upper-division prerequisites in the discipline.
2. They require an extensive theoretical base in the discipline.
3. They increase or re-examine the existing knowledge or database of the discipline.
4. They present core components or important peripheral components of the discipline at an advanced level.

600-Level Courses
These are graduate courses offered principally in support of doctoral level instructional programs but also are available for use on graduate certificate or master’s level degree programs. In addition to exhibiting the characteristics of 500-level courses, these courses typically require 500-level prerequisites and they build on and increase the information presented in 500-level courses.

700-Level Courses
These are advanced professional or technical courses that may be applied toward a first professional degree (e.g., DVM, PharmD). They make up the bulk of the course work for these professional degree programs. In general, these courses are not considered graduate-level courses, and may not be applied toward graduate certificate, master’s level or doctoral level (PhD or EdD) degree programs. However, selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee and the Graduate School.

800-Level Courses
These courses are in-service courses aimed at practicing professionals in the discipline. These courses have an in-service or retraining focus, and provide the professionals new ways to examine existing situations or new tools to treat existing problems. These courses generally have none of the characteristics of 500-level courses. They are not graduate-level courses, and they may not be applied to graduate certificate or graduate degree programs nor to professional degree programs.

Blanket-Numbered Courses
Blanket-numbered courses have a zero middle digit. Those that carry graduate credit may be repeated up to the maximum totals indicated below.

- Research (501 or 601) is for research that is not part of the thesis. Data obtained from such research should not be incorporated into the thesis.
- Thesis (503 or 603) covers the thesis research and writing. A student may register for thesis credit each term.
- Reading and Conference (505 or 605) and Projects (506 or 606) are used for special work not given under a formal course number.
- Seminar (507 or 607) is used both for departmental seminars and for special group work not given in a formal course.
- Workshop (508 or 608) is usually a special, short-term course covering a variety of topics.
- Practicum (509) is used for courses whose emphasis is the application of academic theory to the work environment.

No more than 9 credits of blanket-numbered courses, other than thesis (or research-in-lieu-of-thesis for nonthesis programs), may be applied toward the minimum 45-credit master’s degree. While internship credit (510) is not considered a blanket-numbered course, no more than 6 credits of internship may be applied toward a 45-credit master’s degree. The internship credit limit is in addition to the 9-credit blank-hour limit.

No more than 15 blanket-numbered credits may be applied toward the minimum 108-credit doctoral program.
No more than 3 credits of blanket-numbered courses in each field of study may be used in the MAIS program; thesis credits or research paper credits are exempt from this limitation.

Blanket-numbered transfer courses will count toward the maximum totals specified above.

Courses Graded on Nonstandard Basis
Graduate students may elect to take courses on an S/U basis only if those courses are not in their graduate certificate or graduate degree program or are not required for the removal of deficiencies. Graduate students may use courses taken at OSU on a P/N basis in their graduate certificate or graduate degree programs.

4xx/5xx Courses
No more than 50% of courses used for a graduate program of study may be the 500-level component of a dual-listed course. Courses bearing dual-listed numbers (400/500) must provide students who are enrolled for 500-level credit with graduate-level learning.

Expectations for learning outcomes in the graduate component of dual listed (400/500 level) courses are the same as for stand-alone 500-level courses. A distinction should be made between learning outcomes for students taking the course for undergraduate credit (400 level) and those taking the course for graduate credit (500 level). In most cases this distinction should include emphasis on developing skills in analysis, synthesis, and/or evaluation for the 500-level credit. The different student learning outcomes should be accompanied by appropriate differences in instructional opportunities and evaluation procedures.

Repeating 4xx/5xx Courses
A graduate student who has taken a 4xx course may not normally include the corresponding 5xx course on his or her graduate program.

Remote Access for Graduate Committee Meetings
It is generally expected that all members of graduate committees should be physically present at all required graduate committee meetings (i.e., program meetings, preliminary examinations, and final examinations). However, it is permissible for the student, and/or committee members to participate from a remote location provided the conditions listed below are met:

a. Advance agreement of the student and all committee members has been obtained;

b. All participants join in with two-way audio and video connections; audio-only connections must be approved by the major professor if the video connection is not possible. When the student is the remote participant, his or her connection must be an audio and video connection;

c. Any visual aids or other materials have been distributed in advance to the remote participants;

d. The committee members participate in the complete meeting, discussion, presentation, and evaluation; and

e. The student is responsible for making arrangements.

Petitions
A student wishing to deviate from normal Graduate School regulations and procedures may submit a request and the reasons for it to the Graduate School in a letter signed by the student and his or her major professor. In reaching a decision, the Graduate School may seek advice from the Graduate Council. The student will be advised of the decision when it has been made. Action taken on a petition will not be considered precedent for future action.

Diploma Application
Graduate students wishing to complete a Diploma Application form (http://gradschool.oregonstate.edu/forms). This form should be submitted prior to taking the final examination, indicating the term the student intends to graduate. Participation in Commencement ceremonies requires earlier submission of this form.

Institutional Review Board Approval of Human Subjects Research
It is Oregon State University policy that the OSU Institutional Review Board (IRB) must review all research that involves human subjects. The results from studies conducted without obtaining IRB review and approval may not be published or widely distributed, nor can such data be used to satisfy master’s thesis or doctoral dissertation requirements.

The requirements for IRB review of research involving human subjects is based upon research ethics and federal law, and the implications of conducting human subjects research without IRB approval are significant. Failure to follow this policy places both the individual and the institution at risk: the individual may be subject to university sanctions and/or incur personal liability for negligence and harm; the university could lose access to federal funding or be forced to cease all human subjects research. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate.edu/irb/.

Institutional Animal Care and Use Committee IACUC
The Oregon State University Institutional Animal Care and Use Committee (IACUC (http://research.oregonstate.edu/iacuc)) requires prior review and approval for all live vertebrate animal use in research, teaching, testing, per the IACUC Scope of Work Policy (http://research.oregonstate.edu/iacuc/policies-guidelines). An eligible principal investigator must be identified in order to submit an ACUP to the committee, per PI Eligibility Policy (http://research.oregonstate.edu/sites/research.oregonstate.edu/files/iacuc/pi_eligibility_policy.pdf). Review leading to approval is accomplished via submission of an Animal Care and Use Protocol form (ACUP (http://research.oregonstate.edu/iacuc/iacuc-forms)) to the IACUC.

The requirements for IACUC review are based on the ethics of animal use, and our assurances to agencies that provide federal oversight, funding, and program accreditation. Implications regarding conduct of animal research without IACUC approval and oversight are significant. Failure to secure and maintain approval can result in the student’s inability to continue research or publish data. In addition, OSU could lose accreditation, lose access to funding and/or be required to pay significant fines. Please contact IACUC@oregonstate.edu for more information.

OSU Scientific Diving and Scientific Boating
Scientific Diving
OSU personnel (graduate or undergraduate students, faculty, staff, approved volunteers) who work underwater as a part of their research must have their diving activity pre-approved by the OSU Diving and Small Boat Safety Officer (DBSO) and the OSU Diving Control Board. OSU is an organizational member of the American Academy of Underwater Sciences (AAUS) and all OSU scientific diving is conducted in accordance with AAUS standards. For more information visit http://
research.oregonstate.edu/diving/ or contact the Diving and Small Boat Safety Office (diving.safety@oregonstate.edu).

**Scientific Boating**

OSU personnel (graduate or undergraduate students, faculty, staff, approved volunteers) who operate vessels (motorboats, personal watercraft, and non-motorized craft) as a part of their research must conduct their activities in accordance with OSU scientific boating standards. For more information visit http://research.oregonstate.edu/boating/ and contact the Diving and Small Boat Safety Office (diving.safety@oregonstate.edu) to ensure that your planned research boating activities are in compliance with OSU standards. OSU is a member of the Scientific Boating Safety Association (SBSA).

**Graduate Work by Faculty Members**

The Faculty as Student policy specifies that one may not simultaneously be an Oregon State University faculty member and an OSU graduate student. This policy pertains to all OSU faculty members (both ranked and professional), is consistent with practices at most universities, and is in keeping with recognized appropriate graduate education practice.

Although faculty members are eligible to enroll for courses at staff fee rates, such course work may not be applied to a graduate certificate or graduate degree without prior approval from the graduate dean.

**Graduate Student Teaching**

**Appointment as Instructor of Record.** For a graduate student to be appointed as the Instructor of Record for a graduate course (including the 500-level component of a slash course):

- The unit/program of employment must be separate and distinct from the unit/program of enrollment.
- The instructor must be appointed to the graduate faculty based on their academic/professional qualification by the unit/program of employment.
- In the event that graduate students from the instructor’s unit/program of enrollment are enrolled in the course, alternative arrangements must be made for evaluating the work of those graduate students.

**Appointment as Teaching Assistant.** For a graduate student to be appointed as the Teaching Assistant for a graduate course (including the 500-level component of a slash course), the Director of the Graduate Program must ensure that potential conflicts of interest are avoided to the maximum extent possible. This may include:

- Making alternative arrangements to evaluate the work of graduate students from the same unit/program as the Teaching Assistant, OR
- Ensuring that the Teaching Assistant has advanced to candidacy status (after prelims) and all graduate students in the class have not advanced to candidacy

If neither of these criteria are met, the program must have a conflict of interest plan approved by the Graduate School.

**Graduate Appointments**

Graduate assistants are represented by the Coalition of Graduate Employees, American Federation of Teachers Local 6069 (CGE). Terms and conditions of employment for service not performed as a requirement for their degrees are prescribed in the collective bargaining agreement (http://hr.oregonstate.edu/policies-procedures/administrators/graduate-employee-cge-contract-resources) between OSU, and CGE. The CGE contract can be found on the OHR website at http://hr.oregonstate.edu/ercc/gradstud.

Persons interested in assistantships should write directly to the department/program concerned.

To qualify for appointment as a graduate assistant the student must:

1. Be a regularly admitted, conditionally admitted, or provisionally admitted graduate student at Oregon State University (i.e., not a graduate nondegree-seeking, postbaccalaureate student, or PharmD or DVM student).
2. Be enrolled as a full-time degree-seeking graduate student at Oregon State University, completing a minimum of 12 credits of instruction each term (3 credits during summer session). Audit registrations, course withdrawals, and enrollment in INTO OSU may not be used to satisfy these minimum enrollment requirements.
3. Be making satisfactory progress toward an advanced degree.

Graduate assistants may be appointed on an academic term basis, an academic-year basis (nine months) or a full-year basis (12 months). No appointment can be for less than .30 FTE or more than .49 FTE per term. A graduate assistant on less than .49 FTE may take on extra duties; however, the total stipend plus salary from all sources at Oregon State University may not exceed the equivalent of .49 FTE for any term.

All graduate assistants are required to provide duties to OSU to justify their stipends. Teaching assistants are expected to provide duties related to the university’s instructional program (e.g., teaching laboratories or discussion sections, grading papers, advising). Research assistants provide duties related to the research function of the university. Whatever the type of appointment, the graduate assistant should be regarded as a student providing service as part of a learning experience rather than as an employee whose education is secondary.

The work schedule and the duties to be performed by the graduate assistant shall be established by the department or program sponsoring the assistantship.

Graduate assistants must register for and complete a minimum of 12 credits of instruction each term except during summer session, when a minimum of 3 credits is required. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy these minimum enrollment requirements. (See section on ‘Registration Requirements for Graduate Assistants’ for complete details.)

Persons interested in assistantships should write directly to the department or program concerned.

**International Graduate Teaching Assistant English Language Requirement**

If the Graduate School determines that an applicant or current student’s native language is not English, the proposed IGTA is required to take the Internet Based TOEFL (iBT) test before being appointed as a graduate teaching assistant.

Potential IGTAs scoring below 22 on the speaking section of the iBT can be appointed, but will be required to undertake further English language training.

If a department wishes to offer a student with an iBT speaking score of 18 to 21 an assistantship, the unit must:
a. Affirm that the graduate student will be enrolled in IEPA 098NC Communication for IGTA (with the unit paying the cost of this training).

b. If at all possible, assign the graduate student assignments (such as paper grading, reagent preparation, etc.) that do not require personal contact with undergraduate students.

c. If (b) above is not possible, and if possible, pair the IGTA in the laboratory or classroom with another TA who is a native speaker of English.

d. Monitor the quality of IGTA performance using student evaluations and the evaluations of the supervising professors. The unit will document for each student the results of their evaluation of the student’s performance as a GTA.

If the unit agrees to meet these conditions, the IGTA appointment can be made.

The scheduling of IEPA 098NC will be coordinated with the units so that students can attend the course and conduct teaching assistantship duties. Please check the OSU online schedule of classes for confirmation of the time and date: https://catalog.oregonstate.edu/course-search/

Students with an iBT speaking score of less than 18 cannot be assigned teaching assistantships.

Students Who Fail to Find a Major Advisor

There are times when students are making satisfactory academic progress, but are unable to complete graduate studies with their initial major professor. Oregon State University has an ethical responsibility to assist such students in identifying a new major professor. The Graduate Council and Faculty Senate policy for establishing major advisors and committees for students in this situation provides guidance and can be obtained by contacting the Graduate School.

Dismissal from Graduate School

Advanced-degree students (regularly, conditionally, and provisionally admitted) are expected to make satisfactory progress toward a specific academic degree. This includes maintaining a GPA of 3.00 or better for all courses taken as a graduate student and for courses included in the graduate program, meeting departmental or program requirements, and participating in a creative activity such as a thesis.

If a student is failing to make satisfactory progress toward an academic degree, as determined by the major department/program or the Graduate School, the student may be dismissed from the Graduate School.

Any doctoral student who fails the preliminary oral examination with a committee recommendation that the student’s work toward this degree be terminated may be dismissed from the Graduate School.

Any student who fails a final oral examination may be dismissed from the Graduate School.

Academic dishonesty and other violations of the Student Conduct Code (http://studentlife.oregonstate.edu/studentconduct) may serve as grounds for dismissal from the Graduate School.

Student Conduct Regulations

Graduate students enrolled at Oregon State University are expected to conform to basic regulations and policies developed to govern the behavior of students as members of the university community. The regulations have been formulated by the Student Conduct Committee, the Student Activities Committee, the university administration, and the State Board of Higher Education. Violations of the regulations subject a student to appropriate disciplinary or judicial action. The regulations and the procedures for disciplinary action and appeal are available via the Office of Student Conduct and Community Standards website at http://studentlife.oregonstate.edu/studentconduct/.

Grievance Procedure

All students desiring to appeal matters relating to their graduate education should request a copy of Grievance Procedures for Graduate Students at Oregon State University from the Graduate School. These procedures are also available on the Web at http://gradschool.oregonstate.edu/progress/grievance-procedures. Graduate assistants whose terms and conditions of employment are prescribed by the collective bargaining agreement (http://hr.oregonstate.edu/sites/hr.oregonstate.edu/files/ercc/gradstud/2014-2016.pdf) between OSU and the Coalition of Graduate Employees, American Federation of Teachers Local 6069 should also refer to that document.

Policies Governing Graduate Certificate Programs

General Requirements

The Graduate Certificate Program at Oregon State University is a structured progression of graduate-level courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university. Students desiring a graduate certificate must be admitted to the university as a credential-seeking graduate student, but are not required to be on track for a specific degree. There is no formal committee requirement for graduate certificates. Certificate students are subject to all general policies governing the courses for the master’s degree, unless specified within the Graduate Catalog.

Graduate Certificate Study Program

The graduate certificate curriculum consists of a minimum of 18 graduate credits, and may include a final project, portfolio, or report for integration of the sequence of course materials. All graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone credits. The remaining credits may be the 500 component of 400/500 slash courses. No final examination is required.

Time Limits

Courses completed no more than seven years prior to the graduate certificate award may be used to satisfy certificate requirements. Students enrolled in certificates without concurrent enrollment in a graduate degree program are not subject to the continuous enrollment policy during the time allowed for certificate completion.

Financial Aid Eligibility

Students enrolled in only graduate certificate programs may qualify for federal loan and work-study financial aid. Students must complete the federal FAFSA form to begin the financial aid application process.
Policies Governing Master's Degree Programs

General Requirements

All master’s degree programs require a minimum of 45 graduate credits including thesis (6 to 12 credits), research-in-lieu-of-thesis (3 to 6 credits), or an integrative capstone experience (3 to 6 credits). Exceptions to this capstone requirement are specified under the degree descriptions that follow these universal master’s degree requirements. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses. General regulations for all master’s programs are cited here, with certain exceptions provided for master’s degrees in the professional areas listed on the following pages.

All master’s students must:

a. Conduct research, produce some other form of creative work, or participate in an integrative capstone experience; and
b. Demonstrate mastery of subject material; and
c. Be able to conduct scholarly or professional activities in an ethical manner

The assessment of these outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

Residence Requirements

The residence requirement for the master’s degree is 30 graduate Oregon State University credits after admission as a degree-seeking graduate student. These 30 graduate credits must appear on the master’s degree program. (This does not include graduate credits taken as a postbaccalaureate or graduate nondegree-seeking student, nor transfer courses.)

Language Requirements

For the master of arts degree, the student must show foreign language proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of “C” (2.00) or better. English is not considered a foreign language for purposes of this requirement. There is no language requirement for the Master of Arts in Interdisciplinary Studies degree. For other master’s degrees, there is no foreign language requirement unless a language is required in the individual student’s program. A student must be enrolled to complete their foreign language requirement before they take the final oral examination for the degree.

Graduate Program of Study

A regular master's degree student must complete a program of study in consultation with an advisor/advisory committee before completing 18 graduate credits. This includes credits earned as a postbaccalaureate, graduate nondegree-seeking student, or graduate student.

Students who wish to transfer credit must submit a Transfer Credit Request form (http://gradschool.oregonstate.edu/forms) before the end of their first year of study.

The final program of study must be submitted to the Graduate School at least 15 weeks prior to the date of the student’s final examination.

Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

If a minor is declared, approximately two-thirds of the work (30 graduate credits) should be listed in the major field and one-third (15 graduate credits) in the minor field. In such cases, the student’s advisory committee must include a member from the minor department.

The program is developed under the guidance of the major professor, and minor professor when a minor is included, and signed by those professors and the chair of the academic unit before filing in the Graduate School. Each candidate's program should include substantial work with at least three faculty members offering graduate instruction. Changes in the program may be made by submitting a Petition for Change in Program form (http://gradschool.oregonstate.edu/forms), available in the Graduate School.

Time Limit

All work toward a master's degree, including transferred credits, coursework, thesis (if required), and all examinations, must be completed within seven years. Time in which the student is on a leave of absence is included in the seven year limit.

Thesis

When scheduling their final oral examinations, thesis option master’s students are required to submit the pretext pages of their thesis to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright, title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional).

It is expected that students will distribute examination copies to all their committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student’s final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, students must upload one PDF copy of the thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School’s website for complete details (http://gradschool.oregonstate.edu/progress/thesis-guide).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master’s thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate.edu/irb/.
The credit allowed for the thesis, including research and preparation of the manuscript, varies from 6 to 12 credits. In certain departments and programs, the MS or MA thesis is optional, to be determined in each case by the department/school/program and the major professor. See departmental descriptions.

Final Examination
Successful completion of a final oral examination is required for all master's degrees with the exception of the following graduate programs:

- EdM students who complete the nonthesis option must take a final written examination;
- MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes;
- MCoun students admitted to the degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery of the MCoun learning outcomes;
- MCoun students admitted to the program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty.

Some departments also require the student to pass a written exam prior to the oral exam.

The final oral examination for master's candidates may, at the discretion of the graduate program, consist of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

For master's candidates whose programs require a thesis, not more than half of the examination period should be devoted to the presentation and defense of the thesis; the remaining time can be spent on questions relating to the student's knowledge of the major field, and minor field if a minor is included in the program of study. Graduate faculty serving on thesis-oriented master's degree programs may contribute to the direction of the student's thesis, will assess the student's thesis and his or her defense of it in the final oral examination, will vote to pass or fail the student, and may sign the thesis when it is in acceptable final form. The examining committee consists of at least four members of the graduate faculty—one from each of the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option A: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option B: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered as Research 501, Reading and Conference 505, or Projects 506.

Master of Arts in Interdisciplinary Studies
The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Most graduate majors or minors may serve as a field for this degree. The current list of approved majors is at http://gradschool.oregonstate.edu/programs. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total program exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty—one from each of the three fields—and a Graduate Council representative. A formal program meeting must be held prior to the completion of 18 graduate credits. A final oral examination is required.

Master of Arts in Teaching (MAT)
The Master of Arts in Teaching is an intensive professional degree program intended to prepare teachers for careers in public school education. Students who successfully complete the MAT can be recommended for the Oregon basic teaching license upon the positive evaluations of the university and public school supervisors.

The professional program in teacher education is full-time and one calendar year in length. Students will enroll with their subject area cohort group and complete the program in one year. Teacher licensure is offered in the following areas:

- Advanced Mathematics Education
- Agricultural Education
- Biology Education
- Chemistry Education
- Elementary Education
- Family and Consumer Sciences Education
- Integrated Science Education
- Language Arts Education (English) — Cascades Campus only
- Music Education
• Physics Education
• Spanish Education

The professional teacher education program begins with a 15-credit professional education core that is foundational to and a prerequisite for the 48-credit Master of Arts in Teaching degree. The 48-credit MAT includes a professional education concentration (3 credits), professional course work in the teaching specialty (18 to 21 credits), a public school professional internship (15 to 18 credits), and a minimum of 9 graduate credits in the subject matter specialization (mathematics, physics, literature, etc.). Because the professional teacher education program is a two-part program, including the professional core and the MAT, future students may plan their programs as either five-year (with a nine-month MAT) or as fifth year programs (with 12 months of graduate study including both the professional core and the MAT).

The MAT degree requires successful completion of a final oral examination.

**Master of Athletic Training**

The Master of Athletic Training (MATRN) degree program consists of a combination of didactic, laboratory and clinical education experiences, from which students in athletic training attain the entry-level educational competencies stipulated by the national accrediting agency for the athletic training profession, the Commission on the Accreditation of Athletic Training Education (CAATE). Graduates are expected to take and pass the certification examination offered by the Board of Certification and embark on careers as Certified Athletic Trainers.

**Master of Business Administration**

The MBA program represents a broad, yet responsive general management education with an entrepreneurial focus that crosses the functional disciplines of business. Its advanced management emphasis and entrepreneurial focus creates practical value-added content for all students, both business and nonbusiness undergraduates, enabling them to solve complex business problems and successfully compete in the business marketplace.

The MBA program is concentrated in length—three academic terms for full-time students with a BA/BS in business or who have completed the foundation courses. Full-time students with no previous business or business-related course work can complete the program in as few as six terms. The MBA degree requires no thesis. MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes.

**Master of Business Administration and Accountancy**

The Master of Business Administration and Accountancy is a one-year master's program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master's degree during their five years of university study required to become a CPA. As an integrated program, the MBAA is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MBAA is also designed to accommodate postbaccalaureate students wishing to prepare for accounting careers.

**Master of Counseling (MCoun)**

Students admitted to the MCoun degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery of the MCoun learning outcomes. Students will specifically address graduate learning outcomes (G.L.O.'s) by describing how they have and/or how they would utilize research/evidence-based counseling practice in their clinical work. Students will be required to describe an ethical dilemma they have faced in their clinical practice to date and include an ethical decision model when describing their ethical decision-making processes. The written project portfolio will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based. A student shall receive a Pass when the grading committee unanimously grades the portfolio as a Pass.

Students admitted to the MCoun degree program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty. The written exam will evaluate all three graduate learning outcomes (G.L.O.'s). Successful completion of the national exam will evidence the candidate's mastery of MCoun subject material covered in the program and assess the candidate's ability to apply research and ethical proficiencies on the exam. The exam will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based.

The minimum passing score for the national exam is defined as one standard deviation below the national mean at the time of administration. Candidates who do not pass the national exam are allowed to take re-examination, but not before the end of the term in which the exam was administered. No more than two re-exams are permitted.

Please contact the College of Education for additional information regarding additional MCoun examination requirements, graduate learning outcomes, and the CACREP national examination.

**Master of Education**

The Master of Education (EdM) is a professional degree requiring a minimum of 45 credits in graduate courses (including a maximum of blanket-numbered courses); additional credits may be required in some areas of concentration. A minimum of 9 additional credits in graduate courses is required for the masters degree in College Student Services Administration (CSSA).

The EdM degree requires successful completion of a final written examination.

A candidate for the EdM degree qualifies for the degree under one of these options:

1. The student submits a thesis that meets all standards for a masters thesis on some applied or professional aspect of education. For the thesis the student receives 6 credits. He or she must complete a major of 24 credits (which may include the 6 thesis credits) and 21 elective credits determined under the direction of an advisor.
2. For adult education, the student completes 30 credits in the major and at least 15 credits in the minor. The minor may be completed either inside education or from approved minors outside education and serves students focusing on training and development and developmental education.
3. The student completes 45 credits with 24 credits in specific courses for the major. No minor is identified. The remaining 21 credits are elective under the direction of an advisor. No thesis or field studies are required. This option is designed primarily for in-service teachers working on standard licensure.
4. The student majors in College Student Services Administration and completes at least 39 credits in the major and 15 credits in a minor for a minimum of 54 credits.
Master of Engineering
The Master of Engineering (MEng) degree is designed to provide students the opportunity to pursue advanced-level study in a field of engineering. The degree is concerned with application of specialized, graduate-level engineering and managerial knowledge to specific engineering disciplines. The degree is a course work-only degree, with the option of substituting research or internship credits for a few courses. No thesis or project is required.

The MEng program requires a minimum of 45 credits. The examining committee consists of a minimum of three members of the graduate faculty in the engineering specialization. A final oral examination is required.

Master of Fine Arts
The Master of Fine Arts is an appropriate terminal degree for those who wish to teach in creative, performing, and studio arts in higher education. The MFA in Creative Writing is a program that helps students define and advance their literary ambitions and develop their skills as artists and teachers. Students will be introduced to three broad areas of knowledge within the field of creative writing that they need in order to become successful writers, editors, or teachers. These areas involve writing, reading, and marketing skills within contemporary literary fiction, poetry, and nonfiction. The degree requires a minimum of 60 credits comprised of 24 credits in creative writing workshops, 24 credits in literature and/or composition and rhetoric and one course emphasizing literary roots, and 12 credits in thesis and/or writing and conference. All MFA candidates are required to complete a thesis, which is to be a sustained piece of imaginative writing of literary merit. A final oral examination is required.

Master of Forestry
The professional Master of Forestry degree is intended for potential administrators and potential professional forestry and natural resource specialists in public and private organizations where persons of broad ability are demanded and a broad technical education is needed. A thesis is not required, but a technical report on an approved topic, correlated with courses in the major field, must be submitted. A final oral examination is required.

Master of Health Physics
The Master of Health Physics degree is designed to be a professional, advanced graduate degree that emphasizes fundamental learning and professional development for those wishing the master’s credential, but not requiring a research focus for their planned profession. The degree directs students toward professional licensing as a certified health physicist in the field of radiation protection. The program will consist of a minimum of 45 graduate credits, with 30 graduate credits in the major, and 15 elective graduate credits. A final oral examination is required.

Master of Medical Physics
The Master of Medical Physics (MMP) degree prepares the graduate for a professional career in applied medical physics, focused on practical hands-on experience. The MMP program is designed as a clinical specialization for individuals with an undergraduate degree in science or engineering, offering areas of concentration in therapeutic radiologic physics or medical health physics. The degree requires a minimum of 45 graduate credits, including 30 graduate credits within the major and 15 elective graduate credits. The program does not require a thesis, however, candidates are required to pass a final oral examination.

Master of Natural Resources
The Master of Natural Resources (MNR) degree is designed to engage university scientists and world-wide natural resource professionals in a process that integrates diverse perspectives to address natural resource challenges at the state, regional, national, and international levels. The program is intended for individuals with at least two years of experience in natural resource disciplines who seek an advanced degree in natural resource management. The MNR curriculum, consisting of 45 credits, is organized into three sections: core (18 credits), area of emphasis (18 credits), and capstone project (9 credits). It is taught as a distance, online curriculum, although it may be possible for some students to work toward the MNR degree while in residence at Oregon State University. The MNR degree is offered as a non-thesis option only. A final oral examination is required.

Master of Public Health
The Master of Public Health (MPH) degree program combines broad training in public health with specific training in one of the specialty options.

The MPH program is designed for persons who already have a bachelor’s degree and who wish to obtain further formal education in the field of public health. Persons with experience in the health field or who have training in a specialized area of health may increase their knowledge regarding population-based health to prepare them for expanded administrative and service careers. Persons who do not have prior experience in health fields may prepare themselves for a broad variety of careers depending upon their choice of specialty option.

The Master of Public Health degree is offered by Oregon State University with graduate options in biostatistics; environmental and occupational health; epidemiology; global health; health management and policy; health promotion and health behavior; physical activity; and public health practice.

The MPH program consists of 12 core credits, plus additional units of required and elective courses, and an internship. Programs are approximately 60 credits in length. All students will be required to take a final oral examination as determined by their specific option.

Master of Public Policy
The Master of Public Policy is a professional degree intended to prepare students for careers in the public, nonprofit, and international sectors and offer training for in-service students desiring professional growth and advancement. The degree is designed to be a generalist program, with an emphasis on analytic skills and policy knowledge. The degree requires a minimum of 62 graduate credits, 44 of which are in the required core. The core curriculum provides an important foundation in statistics, research methods, computer applications, public policy analysis, public administration and ethics, and economics. The remaining 18 credits support the student's preferred area of concentration, consisting of environmental policy, international policy, rural policy, science policy, or social policy. Students with little work experience in public service, the nonprofit sector, or the international context will be required to engage in a supervised internship that will allow them to work closely with experienced mentors who will help them integrate theory with practice and introduce them to a professional network. Students with relevant work experience will substitute course work for internship credits. A final oral examination is required.
Professional Science Master’s Degree (PSM)
The Professional Science Master’s (PSM) allows students to pursue advanced training in science while simultaneously developing workplace skills highly valued by employers. PSM programs consist of two years of academic training in an emerging or interdisciplinary area in science, along with a professional component that includes internships and “cross-training” in workplace skills, such as business, communications, and regulatory affairs. All have been developed in concert with employers and are designed to dovetail into present and future professional career opportunities.

The Professional Science Master’s Degree (PSM) is offered with five graduate majors:

1. Applied Biotechnology [To be terminated, pending approval]
2. Applied Physics [To be terminated, pending approval]
3. Applied Systematics in Botany [To be terminated, pending submission and approval of a proposal.]
4. Environmental Sciences
5. Fisheries and Wildlife Administration

For further information on Environmental Sciences, email: carolyn.fonyo@oregonstate.edu.

For further information on Fisheries and Wildlife, email: fw.gradadvising@oregonstate.edu.

Policies Governing Doctoral Degree Programs

General Requirements

The doctor of philosophy degree is granted primarily for creative attainments. There is no rigid credit requirement; however, the equivalent of at least three years of full-time graduate work beyond the bachelor's degree (at least 108 graduate credits) is required. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

After admission into the doctoral program, a minimum of one full-time academic year (at least 36 graduate credits) should be devoted to the preparation of the thesis. A minimum of 27 regular non-blanket credits must be included on a doctoral program.

By completing the requirements necessary for the PhD, students shall: (a) produce and defend an original significant contribution to knowledge; (b) demonstrate mastery of subject material; and (c) be able to conduct scholarly activities in an ethical manner. Additional program specific learning outcomes, the assessment of all outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

Graduate Program of Study

The student's doctoral program of study is formulated and approved subject to departmental policies at a formal meeting of his or her doctoral committee. The committee is comprised of a minimum of five members of the graduate faculty, including two from the major department and a representative of the Graduate Council. If a minor is declared, it must consist of at least 18 credits (15 credits for an integrated minor) and the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student’s committee.

Doctoral students must complete the program of study in consultation with their advisory committee. This signed plan must be submitted to the Graduate School by the end of the fifth term of study.

The student must be registered for a minimum of 3 credits for the term in which the program meeting is held. When the program is approved by the doctoral committee, the departmental chair, and the dean of the Graduate School, it becomes the obligation of the student to complete the requirements as formulated. Changes in the program may be made by submitting a Petition for Change of Program form (http://gradschool.oregonstate.edu/forms) available in the Graduate School.

Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee.

No more than 15 credits of blanket-numbered courses, other than thesis, may be included in the minimum 108-credit program.

Students who wish to transfer credit must submit a Transfer Credit Request form (http://gradschool.oregonstate.edu/forms) before the end of their first year of study.

Time Limit

Effective beginning with students matriculating fall term 2016, all work toward a doctoral degree, including course work, thesis (if required), and all examinations, must be completed within nine years of the indicated start term on the Departmental Action Form. Extensions of this time limit may be requested by submitting a petition to the Graduate School.

Residence

For the doctoral degree, the residence requirement consists of two parts:

1. a minimum of 36 graduate Oregon State University credits must be completed; and
2. the student must spend at least three terms of full-time graduate academic work (at least 9 credits per term) on campus or at an off-campus site approved by the Graduate School. The latter requirement of three terms of full-time enrollment does not have to take place in consecutive terms.

Adequate fulfillment of the residence requirement shall be determined by the Graduate School.

Language Requirements

The foreign language requirement is determined by the student's doctoral committee, subject to the same approval required for the graduate study program, and is so designated in the official doctoral program. Foreign language requirements must be completed before the oral preliminary examination.

Preliminary Examinations

The student working toward a doctoral degree must pass a comprehensive preliminary examination. The purpose of this exam is to determine the student’s understanding of his or her major and minor fields and also to assess the student’s capability for research. Students must enroll for a minimum of 3 credits during terms in which they undertake departmental written or oral preliminary examinations.
Written Comprehensive Examination
Most programs require a written comprehensive examination to be taken before the oral preliminary examination. If a written examination is required, it must be completed prior to the oral preliminary examination. The content, length, timing, passing standard, and repeatability of this examination are at the discretion of the major department. The general rules and structure of this examination, however, must be provided in writing to all candidates for this examination and a current copy of these guidelines must be on file with the Graduate School. Copies of the written examination (questions and student’s answers) must be available to all members of the student’s doctoral committee at least one week prior to the oral preliminary examination.

Oral Preliminary Examination
The oral preliminary examination is taken near the completion of the student’s course work. The oral examination is conducted by the student’s doctoral committee, and should cover the student’s knowledge in his or her major and minor subjects. The exam may cover the student’s proposed research topic, although no more than one-half the time should be devoted to specific aspects of the proposal. The examination should be scheduled for at least two hours, and the exam date must be scheduled in the Graduate School at least two weeks in advance. If more than one negative vote is recorded by the examining committee, the candidate will have failed the oral examination. No more than two re-examinations are permitted by the Graduate School, although academic units may allow fewer re-examinations.

At least one complete academic term must elapse between the time of the preliminary oral examination and the final oral examination. If more than five years elapse between these two examinations, the candidate will be required to take another preliminary oral examination.

Thesis
Each candidate for the PhD degree must submit a thesis embodying the results of research and giving evidence of originality and ability in independent investigation. The thesis must be a real contribution to knowledge, based on the candidate’s own investigation. It must show a mastery of the literature of the subject and be written in creditable literary form. The preparation of an acceptable thesis will require at least one full-time academic year. The booklet, Thesis Guide: Preparing a Thesis or Dissertation at OSU, is available electronically on the Web at http://gradschool.oregonstate.edu/progress/thesis-guide.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master’s thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate.edu/irb/.

A formal thesis proposal meeting is recommended but not required by the Graduate School; however, it is required for some majors. This meeting should be held with the student’s doctoral committee prior to the start of any substantial doctoral thesis research.

When scheduling their final oral examinations, doctoral students are required to submit the pretext pages of their dissertations to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright (optional), title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies of their thesis to all committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student’s final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, upload one PDF copy of your thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School’s website for complete details (http://gradschool.oregonstate.edu/progress/thesis-guide).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

Final Examination
After completion of or while concurrently registered for all work required by the program, the student must pass a final doctoral examination that may be written in part but must include an oral examination. The final oral examination must be scheduled in the Graduate School office at least two weeks prior to the date of the examination. All incomplete course work appearing on the program of study must be completed prior to scheduling the final oral examination.

The final oral examination consists of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

All members of the student’s graduate committee must approve the scheduling of the final examination.

It is expected that the thesis defense portion of the final oral exam be open to all interested persons and should be limited to one hour. After the open portion of the exam, the examining committee should exclude all other persons and continue with the examination of the candidate’s knowledge of his or her field and the evaluation of the candidate’s performance.

If the department favors a more elaborate presentation, it should be scheduled as a separate seminar. In any case, the time involved for the open presentation may not impinge upon time required for the examining committee to conduct appropriate, iterative oral inquiry with the candidate, to evaluate the candidate’s performance, and to deliberate fully within the time constraints of the scheduled oral examination.

The examining committee consists of the student’s doctoral committee and any additional members, including professors from other institutions, whom the major department may recommend. In the oral examination, the candidate is expected to defend the thesis and show a satisfactory knowledge of his or her field. If more than one negative vote is recorded by the examining committee, the candidate will have failed the examination. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-examinations.

The final oral examination must be taken within five years after the oral preliminary examination. If more than five years elapse, the candidate will be required to take another oral preliminary examination.
Doctor of Education Requirements

The EdD program is a degree program with a major in education. It is intended for the educational professional whose career path is that of educational or teaching specialist, administrator, or other practitioner in the public schools, postsecondary institutions of higher education, or in business and industry. Its focus is on the application of knowledge to learning and teaching environments in public and private settings. The EdD program is designed to prepare educational leaders in community college education, middle-level education, or related educational settings.

A masters’ degree in education or a related field, or equivalent to a master’s degree in postbaccalaureate course work is required for admission. In addition, the College of Education requires the following:

1. minimum professional experience as defined by each program,
2. letter or statement of professional objectives for doctoral study and area of specialization within education,
3. three letters of recommendation, and
4. either the Graduate Record Examination or the Miller Analogies Test.

Applicants to the EdD program must have significant experience in an education or education-related setting such as teaching, school administration, curriculum specialist, instructional specialist, child/youth counselor, supervisor; or in a setting where the primary function is education.

In general, the following requirements are in effect for the EdD:

1. A minimum of 108 credits beyond the baccalaureate degree.
2. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.
3. Completion of the same residence requirements as listed for the PhD degree.
4. A dissertation of no less than 24 credits.
5. A mentored internship in an appropriate work setting for a minimum of 12 credits.
6. A minimum of 48 graduate credits in an area of specialty in education.
7. Completion of 24 credits of core seminars.
8. Completion of the core courses in research.

Procedures and requirements for preliminary and final examinations and thesis are the same as those for the doctor of philosophy degree.

Graduate Fellowships, Scholarships, and Financial Aid

Graduate Fellowships and Scholarships

A number of Oregon State University fellowships and scholarships sponsored by industry, foundations and government agencies are available to students for graduate study in various graduate programs at OSU. For a listing of many these fellowships and scholarships, visit the Scholarship Management System database at https://scholarship.ucsdadm.oregonstate.edu/prod/search_schol.php.

For more information about scholarships and fellowships in the database above, including application instructions, as well as additional opportunities in individual programs, contact the individual program of interest.

Students interested in general information regarding graduate student funding opportunities are encouraged to explore Financing Your Education on the Graduate School's website: http://gradschool.oregonstate.edu/finance.

Graduate Student Employment

Each year, OSU receives grants from federal and state agencies, public and private foundations, and business and industry to support institutional and individual projects. Funding is awarded to the various departments in most academic colleges and to other research organizations on campus, including experiment stations, centers and institutes. Many of these grants include financial support for graduate students. Interested students should direct inquiries and applications to the department concerned.

Graduate students may be employed as Graduate Teaching or Graduate Research assistants by departments on campus. In addition to monthly stipends, graduate assistants appointed at .30 FTE or above are eligible for a tuition and fee subsidy.

In addition to graduate assistantships, graduate students may be appointed to student hourly positions on campus. These appointments are not eligible for a tuition or fee subsidy.

The maximum combined appointment FTE for all jobs on campus is .49 FTE.

For more information on student employment, contact the department of interest or the Office of Human Resources.

Financial Aid for Graduate Students

The OSU Office of Financial Aid and Scholarships administers federal financial aid programs to assist graduate students with meeting the cost of higher education. To determine eligibility for specific federal aid programs at OSU, graduate students are required to complete the Free Application for Federal Student Aid (FAFSA) each year. Graduate students must be degree-seeking or in an approved certificate program and enrolled at least half-time (5 credits) to qualify for financial aid.

Graduate students are not eligible for federal Title IV grants or subsidized loans. Students in graduate certificate programs are only eligible for aid for courses required for their certificate program.

For additional information about Financial Aid for graduate students, visit http://financialaid.oregonstate.edu, or contact the OSU Office of Financial Aid and Scholarships.

Graduate Research Supporting Services

For information on Graduate Student Success, please see the Graduate School’s Graduate Student Success Guide http://gradschool.oregonstate.edu/graduate-student-success.

Information Services, Computers, and Academic Technologies

Information Services supports OSU students by providing accounts, technologies, equipment checkout, printing, computing networks and computing labs. The OSU Computer Helpdesk provides students with technical support for laptops, mobile devices, and campus systems like
Admission to Graduate School

Canvas. If you need in-person support, please visit the Walkup Helpdesk in the Valley Library.

Student employment opportunities are available from a variety of units within IS, including the OSU Computer Helpdesk and Academic Technology, with the greatest opportunities announced just prior to each new term.

**Accounts and Passwords**
http://is.oregonstate.edu/accounts-support

- **Accounts & Technologies Guide for New Students**: This guide is for new OSU students who need to get connected to OSU systems such as email and Canvas. Even if you are already connected to one or more OSU systems, we recommend you go through this guide, just to be sure you’ve covered the bases and know where to get computing help.
- **ONID**: ONID stands for OSU Network ID. It’s a universal computer account available to all OSU students, employees and associates. You use your ONID username and password to access Online Services, Canvas, email, the wireless network and many other university computing services.
- **Google Apps for OSU**: ONID email is accessed via Google Apps for OSU. All OSU students, instructors, and employees may access all the supported core apps: Drive, Mail, Calendar, Site and Groups.
- **Office365 for OSU**: All OSU students, instructors and employees may collaborate using native Microsoft Office tools: Word, Excel, PowerPoint and OneNote.

**Learning Technologies**
http://is.oregonstate.edu/learning-technologies

- Canvas, OSU’s Learning Management System used by both off-campus and on-campus students for classwork.
- Classroom Technology Services
- Event Support
- Technology Consulting
- Computing Labs
- Equipment Loan and Rental
- Standard Printing
- Media Creation
- Virtual Computing Lab

**Software**
http://is.oregonstate.edu/accounts-support/software

- Many software packages are available to students.

**Technical Support**

- OSU Computer Help Documents, http://oregonstate.edu/helpdocs, 24/7 help guides and FAQs
- OSU Service Desk, http://is.oregonstate.edu/service-desk, Monday–Friday support via phone, 541-737-3474, and webform (http://is.oregonstate.edu/webform/contact-osu-service-desk)
- Walkup Helpdesk, in-person support at the Valley Library, Sunday–Friday

  • Materials Science Option (p. 997)
  • Pre-Medicine Option (p. 997)
• Mathematics (p. 997)
  • Actuarial Science Minor (p. 1008)
  • Mathematics Graduate Major (MA, MS, PhD, MAIS) (p. 1008)
  • Mathematics Graduate Minor (p. 1008)
  • Mathematics Minor (p. 1008)
  • Mathematics Undergraduate Major (BS, HBS) (p. 1009)
• Applied and Computational Mathematics Option (p. 1010)
• Mathematical Biology Option (p. 1010)
• Secondary Teaching Emphasis Option (p. 1011)
• Statistics Option (p. 1012)

• Physics (p. 1013)
  • Applied Physics Graduate Major (MS, PSM) (p. 1019)
  • Physics Graduate Major (MA, MS, PhD, MAIS) (p. 1019)
  • Physics Graduate Minor (p. 1020)
  • Physics Minor (p. 1020)
    • Physics Undergraduate Major (BA, BS, HBA, HBS) (p. 1020)
      • Applied Physics Option (p. 1021)
      • Biological Physics Option (p. 1021)
      • Chemical Physics Option (p. 1022)
      • Computational Physics Option (p. 1022)
      • Geophysics Option (p. 1023)
      • Mathematical Physics Option (p. 1024)
      • Optical Physics Option (p. 1024)
      • Physics Teaching/Physics Option (p. 1025)

• School of Life Sciences (p. 1025)
  • Biochemistry and Biophysics (p. 1025)
    • Biochemistry and Biophysics Graduate Major (MA, MS, PhD, MAIS) (p. 1030)
    • Biochemistry and Biophysics Graduate Minor (p. 1030)
    • Biochemistry and Biophysics Undergraduate Major (BS, HBS) (p. 1031)
    • Biochemistry and Molecular Biology Undergraduate Major (BS, HBS) (p. 1034)
      • Advanced Molecular Biology Option (p. 1036)
      • Computational Molecular Biology Option (p. 1036)
      • Pre-Medicine/Biochemistry and Molecular Biology Option (p. 1037)

• Integrative Biology (p. 1037)
  • Biology Minor (p. 1045)
  • Biology Undergraduate Major (BS, HBS) (p. 1046)
    • Ecology Option (p. 1053)
    • Genetics Option (p. 1055)
    • Marine Biology Option (p. 1055)
    • Physiology and Behavior Option (p. 1056)
    • Pre-Dentistry/Biology Option (p. 1057)
    • Pre-Education Biology Option (p. 1058)
    • Pre-Medicine/Biology Option (p. 1059)
    • Pre-Veterinary Medicine Option (p. 1061)
  • Integrative Biology Graduate Major (MS, PhD) (p. 1062)
  • Integrative Biology Graduate Minor (p. 1062)
  • Marine Biology and Ecology Minor (p. 1062)
  • Zoology Undergraduate Major (BS, HBS) (p. 1063)
  • Microbiology (p. 1068)
    • BioHealth Sciences Undergraduate Major (BS, HBS) (p. 1073)
      • Pre-Clinical Laboratory Science Option (p. 1077)
      • Pre-Dentistry Option (p. 1078)
      • Pre-Medicine/Pre-Podiatry Option (p. 1078)
      • Pre-Optometry Option (p. 1079)
  • Pre-Pharmacy Option (p. 1079)
  • Pre-Physical Therapy Option (p. 1080)
  • Pre-Physician Assistant Option (p. 1080)
  • Microbiology Graduate Major (MA, MS, PhD) (p. 1080)
  • Microbiology Graduate Minor (p. 1081)
  • Microbiology Minor (p. 1081)
  • Microbiology Undergraduate Major (BS, HBS) (p. 1082)
    • Aquatic Microbiology Option (p. 1085)
    • Pre-Medicine/Microbiology Option (p. 1085)

• Statistics (p. 1086)
  • Data Analytics Graduate Certificate (p. 1090)
  • Data Analytics Graduate Major (MS) (p. 1090)
  • Statistics Graduate Major (MA, MS, PhD, MAIS) (p. 1090)
  • Statistics Graduate Minor (p. 1092)
  • Statistics Minor (p. 1092)

• College of Veterinary Medicine (p. 1094)
  • Veterinary Medicine - DVM Graduate Major (p. 1102)
  • Interdisciplinary Studies (p. 1144)
  • International Programs (p. 1145)
    • International Studies Undergraduate Major (BA, HBA) (p. 1148)
    • Reserve Officer Training Corps (p. 1151)
      • Aerospace Studies (p. 1151)
        • Aerospace Studies Minor (p. 1154)

  • University Honors College (p. 1160)
  • Accountancy Undergraduate Major (BS, HBS) (p. 273)
  • Adult and Higher Education Graduate Major (EDD, EDM, PhD, MAIS) (p. 419)
  • Agricultural Business Management Undergraduate Major (BS, HBS) (p. 117)
- Agricultural Education Graduate Major (MS, MAIS) (p. 90)
- Agricultural Sciences Undergraduate Major (BS, HBS) (p. 91)
- American Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 667)
- Animal Science Graduate Major (MS, PhD, MAIS) (p. 102)
- Animal Sciences Undergraduate Major (BS, HBS) (p. 102)
- Anthropology Undergraduate Major (BA, BS, HBA, HBS) (p. 815)
- Apparel Design Undergraduate Major (BS, HBS) (p. 343)
- Applied Anthropology Graduate Major (MA, MS, PhD, MAIS) (p. 818)
- Applied Economics Graduate Major (MA, MS, PhD, MAIS) (p. 120)
- Applied Ethics Graduate Major (MA, MAIS) (p. 754)
- Applied Physics Graduate Major (MS, PSM) (p. 1019)
- Applied Visual Arts Undergraduate Major (BFA) (p. 706)
- Architectural Engineering (BS, HBS) (p. 496)
- Art Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 707)
- Athletic Training Graduate Major (MATRN) (p. 943)
- Biochemistry and Biophysics Graduate Major (MA, MS, PhD, MAIS) (p. 1030)
- Biochemistry and Biophysicals Graduate Major (BS, HBS) (p. 1031)
- Biochemistry and Molecular Biology Undergraduate Major (BS, HBS) (p. 1034)
- Bioengineering Graduate Major (MENG, MS, PhD) (p. 477)
- Bioengineering Undergraduate Major (BA, BS, HBA, HBS) (p. 478)
- BioHealth Sciences Undergraduate Major (BS, HBS) (p. 1073)
- Biological and Ecological Engineering Graduate Major (MENG, MS, PhD) (p. 460)
- Biology Undergraduate Major (BS, HBS) (p. 1046)
- Bioresource Research Undergraduate Major (BS, HBS) (p. 231)
- Botany and Plant Pathology Graduate Major (MA, MS, PhD) (p. 127)
- Botany Undergraduate Major (BS, HBS) (p. 128)
- Business Administration and Accounting Graduate Major (MBAA) (p. 281)
- Business Administration Graduate Major (MBA, PhD) (p. 283)
- Business Administration Undergraduate Major (BA, BS, HBA, HBS) (p. 290)
- Business Graduate Major (MSB) (p. 280)
- Business Information Systems Undergraduate Major (BA, BS, HBA, HBS) (p. 299)
- Chemical Engineering Graduate Major (MENG, MS, PhD) (p. 481)
- Chemical Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 482)
- Chemistry Graduate Major (MA, MS, PhD) (p. 987)
- Chemistry Undergraduate Major (BA, BS, HBA, HBS) (p. 988)
- Civil Engineering Graduate Major (MENG, MS, PhD, MAIS) (p. 498)
- Civil Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 498)
- College Student Services Administration Graduate Major (EDM, MS) (p. 819)
- Comparative Health Sciences Graduate Major (MS, PhD) (p. 1136)
- Computer Science Graduate Major (MA, MENG, MS, PhD, MAIS) (p. 521)
- Computer Science Undergraduate Major (BA, BS, HBA, HBS) (p. 522)
- Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS) (p. 501)
- Contemporary Hispanic Studies Graduate Major (MA) (p. 820)
- Counseling Graduate Major (MCOUN, PhD) (p. 420)
- Creative Writing Graduate Major (MFA) (p. 893)
- Crop and Soil Science Undergraduate Major (BS, HBS) (p. 143)
- Crop Science Graduate Major (MS, PhD, MAIS) (p. 150)
- Data Analytics Graduate Major (MS) (p. 1090)
- Design and Human Environment Graduate Major (MA, MS, PhD, MAIS) (p. 344)
- Design and Innovation Management Graduate Major (BS, HBS) (p. 304)
- Digital Communication Arts Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 712)
- Earth Sciences Undergraduate Major (BS, HBS) (p. 370)
- Ecological Engineering Undergraduate Major (BS, HBS) (p. 460)
- Economics Undergraduate Major (BA, BS, HBA, HBS) (p. 865)
- Education Graduate Major (EDD, EDM, MS, PhD, MAIS) (p. 423)
- Education Undergraduate Major (BA, BS, HBA, HBS) (p. 428)
- Electrical and Computer Engineering Graduate Major (MENG, MS, PhD) (p. 525)
- Electrical and Computer Engineering Undergraduate Major (BS, HBS) (p. 525)
- Elementary Education Undergraduate Major (BS) (p. 447)
- Elementary Graduate Option (p. 451)
- Energy Systems Engineering Undergraduate Major (BS, HBS) (p. 546)
- English Graduate Major (MA, MAIS) (p. 893)
- English Undergraduate Major (BA, HBA) (p. 894)
- Entomology Graduate Major (MA, MS, PhD) (p. 154)
- Environmental Arts and Humanities Graduate Major (MA) (p. 670)
- Environmental Economics and Policy Undergraduate Major (BS, HBS) (p. 120)
- Environmental Engineering Graduate Major (MENG, MS, PhD, MAIS) (p. 486)
- Environmental Engineering Undergraduate Major (BS, HBA, HBS) (p. 488)
- Environmental Sciences Graduate Major (BA, BS, HBA, HBS) (p. 488)
- Environmental Sciences Undergraduate Major (MS, PhD, PSM) (p. 1128)
- Environmental Sciences Undergraduate Major (BS, HBS) (p. 375)
- Ethnic Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 822)
- Finance Undergraduate Major (BA, BS, HBA, HBS) (p. 313)
- Fisheries and Wildlife Administration Graduate Major (PSM) (p. 167)
- Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS) (p. 170)
- Fisheries Science Graduate Major (MS, PhD, MAIS) (p. 175)
- Food Science and Technology Graduate Major (MS, PhD) (p. 182)
- Food Science and Technology Undergraduate Major (BS, HBS) (p. 182)
- Forest Ecosystems and Society Graduate Major (MF, MS, PhD, MAIS) (p. 590)
- Forest Engineering - Civil Engineering Undergraduate Major (BS, HBS) (p. 623)
- Forest Engineering Undergraduate Major (BS, HBS) (p. 628)
- French Undergraduate Major (BA, HBA) (p. 824)
- Sustainability Undergraduate Major (BS, HBS) (p. 242)
- Sustainable Forest Management Graduate Major (MF, MS, PhD) (p. 648)
- Teaching Graduate Major (MAT) (p. 450)
- Tourism, Recreation, and Adventure Leadership Undergraduate Major (BS, HBS) (p. 606)
- Toxicology Graduate Major (MS, PhD) (p. 158)
- Veterinary Medicine - DVM Graduate Major (p. 1102)
- Water Resources Engineering Graduate Major (MS, PhD) (p. 1138)
- Water Resources Policy and Management Graduate Major (MS) (p. 1140)
- Water Resources Science Graduate Major (MS, PhD) (p. 1142)
- Wildlife Science Graduate Major (MS, PhD, MAIS) (p. 177)
- Women, Gender, and Sexuality Studies Graduate Major (MA, PhD, MAIS) (p. 832)
- Women, Gender, and Sexuality Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 835)
- Wood Science Graduate Major (MS, PhD, MAIS) (p. 663)
- Zoology Undergraduate Major (BS, HBS) (p. 1063)

- Accounting Graduate Option (p. 284)
- Accounting Information Systems Option (p. 277)
- Adapted Physical Activity Option (p. 946)
- Advanced Biochemistry Option (p. 993)
- Advanced Chemistry Option (p. 993)
- Advanced Manufacturing Graduate Option (p. 547)
- Advanced Manufacturing Graduate Option (p. 556)
- Advanced Mathematics Teaching Option (p. 430)
- Advanced Molecular Biology Option (p. 1036)
- Advanced Science and Mathematics Education Graduate Option (p. 425)
- Advanced Wood Manufacturing Option (p. 654)
- Adventure Leadership Education Option (p. 607)
- Agricultural Education Graduate Option (p. 425)
- Agronomy Option (p. 143)
- Alternative Energy Option (p. 377)
- Animal Behavior Option (p. 105)
- Animal BioHealth/Pre-Professional Option (p. 105)
- Animal Production Option (p. 106)
- Animal Reproduction and Development Option (p. 233)
- Apparel Design Option (p. 308)
- Applied and Computational Mathematics Option (p. 1010)
- Applied Computer Science Option (p. 523)
- Applied Ecology Option (p. 378)
- Applied Genetics Option (p. 234)
- Applied Physics Option (p. 1021)
- Aquatic Biology Option (p. 379)
- Aquatic Microbiology Option (p. 1085)
- Archaeology Option (p. 815)
- Art and Design Option (p. 656)
- Art History Option (p. 707)
- Basic Mathematics Teaching Option (p. 431)
- Biochemistry Option (p. 994)

- Biocultural Option (p. 816)
- Bioenergy Option (p. 234)
- Biological Physics Option (p. 1021)
- Biology Teaching Option (p. 432)
- Biomedical Sciences Graduate Option (p. 1136)
- Bioproducts Option (p. 235)
- Biostatistics Graduate Option (p. 914)

• Plant Breeding and Genetics Option (p. 145)
• Plant Breeding and Genetics Option (p. 217)
• Plant Growth and Development Option (p. 238)
• Plant Pathology Option (p. 133)
• Policy and Management Option (p. 603)
• Pre-Clinical Laboratory Science Option (p. 1077)
• Pre-Dentistry Option (p. 1078)
• Pre-Dentistry/Biology Option (p. 1057)
• Pre-Dietetics Option (p. 954)
• Pre-Education Biology Option (p. 1058)
• Pre-Education Option (p. 669)
• Pre-Medicine Option (p. 997)
• Pre-Medicine/Biochemistry and Molecular Biology Option (p. 1037)
• Pre-Medicine/Biology Option (p. 1059)
• Pre-Medicine/Microbiology Option (p. 1085)
• Pre-Medicine/Pre-Podiatry Option (p. 1078)
• Pre-Optometry Option (p. 1079)
• Pre-Pharmacy Option (p. 1079)
• Pre-Physical Therapy Option (p. 1080)
• Pre-Physician Assistant Option (p. 1080)
• Pre-Therapy and Allied Health Option (p. 947)
• Pre-Veterinary Medicine Option (p. 1061)
• Product Development Option (p. 554)
• Public Health Practice Graduate Option (p. 916)
• Radiation Health Physics - Pre Med Option (p. 577)
• Rangeland Science Option (p. 107)
• Renewable Energy Graduate Option (p. 557)
• Research Thesis Graduate Option (p. 288)
• Retail Management Option (p. 297)
• Robotics Graduate Option (p. 558)
• School Counseling Graduate Option (p. 423)
• Science and Engineering Option (p. 661)
• Science Education Graduate Option (p. 427)
• Science Graduate Option (p. 453)
• Science/Mathematics Education Graduate Option (p. 427)
• Secondary Teaching Emphasis Option (p. 1011)
• Social Justice Education Graduate Option (p. 427)
• Social Studies Graduate Option (p. 453)
• Social Studies Teaching Option (p. 444)
• Soil Science Option (p. 148)
• Statistics Minor (p. 1092)
• Statistics Option (p. 1012)
• Strategy, Entrepreneurship, and Innovation Graduate Option (p. 288)
• Studio Art BFA Option (p. 710)
• Studio Art Option (p. 711)
• Supply Chain Analytics Graduate Option (p. 280)
• Supply Chain and Logistics Management Graduate Option (p. 289)
• Supply Chain and Logistics Management Option (p. 297)
• Sustainable Ecosystems Option (p. 239)
• Sustainable Horticultural Production Option (p. 219)
• Sustainable Livestock Ranching Option (p. 110)
• Sustainable Tourism Management Option (p. 612)
• Theater Arts Option (p. 724)
• Therapeutic Horticulture Option (p. 222)
• Thermal Fluid Sciences Graduate Option (p. 558)
• Toxicology Option (p. 239)
• Urban Forest Landscapes Option (p. 604)
• Viticulture and Enology Option (p. 225)
• Vocal Performance Option (p. 720)
• Water Resources Option (p. 240)
• Wildland Fire Ecology Option (p. 605)
• Actuarial Science Minor (p. 1008)
• Adult Education Graduate Minor (p. 420)
• Aerospace Engineering Minor (p. 546)
• Aerospace Studies Minor (p. 1154)
• Aging Sciences Graduate Minor (p. 967)
• Agricultural Business Management Minor (p. 117)
• Agricultural Education Graduate Minor (p. 90)
• Agricultural Sciences Minor (p. 90)
• Animal Science Graduate Minor (p. 102)
• Animal Sciences Minor (p. 102)
• Anthropology Graduate Minor (p. 814)
• Anthropology Minor (p. 814)
• Applied Anthropology Graduate Minor (p. 819)
• Applied Economics Graduate Minor (p. 120)
• Applied Ethics Graduate Minor (p. 754)
• Applied Journalism Minor (p. 892)
• Art Graduate Minor (p. 707)
• Art History Minor (p. 707)
• Asian Languages and Cultures Minor (p. 819)
• Asian Studies Minor (p. 865)
• Biochemistry and Biophysics Graduate Minor (p. 1030)
• Bioenergy Minor (p. 230)
• Biological and Ecological Engineering Graduate Minor (p. 460)
• Biological Data Sciences Graduate Minor (p. 1134)
• Biology Minor (p. 1045)
• Botany and Plant Pathology Graduate Minor (p. 128)
• Botany Minor (p. 128)
• Business Administration Graduate Minor (p. 290)
• Business and Entrepreneurship Minor (p. 298)
• Business Minor (p. 281)
• Chemical Engineering Graduate Minor (p. 482)
• Chemistry Graduate Minor (p. 987)
• Chemistry Minor (p. 987)
• Civil Engineering Graduate Minor (p. 498)
• Communication Minor (p. 712)
• Community Health Graduate Minor (p. 968)
• Comparative Health Sciences Graduate Minor (p. 1137)
• Comparative International Agriculture Minor (p. 93)
• Computer Science Graduate Minor (p. 522)
• Computer Science Minor (p. 522)
• Contemplative Studies Minor (p. 842)
• Contemporary Hispanic Studies Graduate Minor (p. 821)
• Counseling Graduate Minor (p. 423)
• Creative Writing Graduate Minor (p. 893)
• Crop Science Graduate Minor (p. 151)
• Crop Science Minor (p. 151)
• Design and Human Environment Graduate Minor (p. 344)
• Early Childhood Development and Education Minor (p. 968)
• Earth Sciences Minor (p. 370)
• Economics Minor (p. 865)
• Education Graduate Minor (p. 427)
• Education Minor (p. 427)
• Electrical and Computer Engineering Graduate Minor (p. 525)
• English Graduate Minor (p. 894)
• English Minor (p. 894)
• Entomology Graduate Minor (p. 154)
• Entomology Minor (p. 154)
• Entrepreneurship and Innovation Management Graduate Minor (p. 312)
• Entrepreneurship Minor (p. 310)
• Environmental and Occupational Health Minor (p. 944)
• Environmental Arts and Humanities Graduate Minor (p. 671)
• Environmental Engineering Graduate Minor (p. 487)
• Environmental Engineering Minor (p. 487)
• Environmental Sciences Graduate Minor (p. 1129)
• Environmental Sciences Minor (p. 374)
• Epidemiology Graduate Minor (p. 944)
• Ergonomics Graduate Minor (p. 945)
• Ethnic Studies Graduate Minor (p. 821)
• Ethnic Studies Minor (p. 821)
• Exercise Physiology Minor (p. 945)
• Family Business Minor (p. 310)
• Fermentation Science Minor (p. 181)
• Film Studies Minor (p. 896)
• Finance Minor (p. 312)
• Fisheries and Wildlife Sciences Minor (p. 169)
• Fisheries Science Graduate Minor (p. 176)
• Food Economics and Policy Minor (p. 121)
• Food in Culture and Social Justice Graduate Minor (p. 823)
• Food Manufacturing Minor (p. 181)
• Food Science and Technology Graduate Minor (p. 182)
• Food Science Minor (p. 192)
• Food Technology Minor (p. 192)
• Foreign Languages and Literatures Graduate Minor (p. 824)
• Forestry Minor (p. 633)
• French Minor (p. 824)
• Geography Graduate Minor (p. 391)
• Geography Minor (p. 391)
• Geology Graduate Minor (p. 393)
• Geology Minor (p. 393)
• German Minor (p. 826)
• Gerontology Graduate Minor (p. 970)
• Global Development Studies Minor (p. 827)
• Health Management and Policy Minor (p. 971)
• History Graduate Minor (p. 754)
• History Minor (p. 754)
• History of Science Graduate Minor (p. 755)
• Horticulture Graduate Minor (p. 208)
• Horticulture Minor (p. 208)
• Human Development and Family Sciences Minor (p. 975)
• Human Development and Family Studies Graduate Minor (p. 975)
• Humanitarian Engineering Minor (p. 468)
• Industrial Engineering Graduate Minor (p. 549)
• Integrative Biology Graduate Minor (p. 1062)
• International Agricultural Development Graduate Minor (p. 121)
• International Engineering Minor (p. 469)
• Irrigation Engineering Minor (p. 465)
• Kinesiology Graduate Minor (p. 946)
• Leadership Minor (p. 94)
• Marine Biology and Ecology Minor (p. 1062)
• Marine Conservation and Management Minor (p. 176)
• Marine Resource Management Graduate Minor (p. 394)
• Marketing Minor (p. 325)
• Materials Science Graduate Minor (p. 555)
• Materials Science Minor (p. 555)
• Mathematics Education Graduate Minor (p. 450)
• Mathematics Graduate Minor (p. 1008)
• Mathematics Minor (p. 1008)
• Mechanical Engineering Graduate Minor (p. 558)
• Merchandising Management Minor (p. 331)
• Microbiology Graduate Minor (p. 1081)
• Microbiology Minor (p. 1081)
• Military Science Minor (p. 1156)
• Molecular and Cellular Biology Graduate Minor (p. 1132)
• Music Graduate Minor (p. 716)
• Music Minor (p. 717)
• Music Performance Minor (p. 717)
• Natural Resource and Environmental Law and Policy Minor (p. 121)
• Natural Resources Minor (p. 593)
• Naval Science-U.S. Marine Corps Minor (p. 1158)
• Naval Science-U.S. Navy Minor (p. 1159)
• New Media Communications Minor (p. 720)
• Nuclear Engineering Graduate Minor (p. 570)
• Nuclear Engineering Minor (p. 570)
• Nutrition Graduate Minor (p. 951)
• Nutrition Minor (p. 951)
• Ocean, Earth and Atmospheric Sciences Graduate Minor (p. 395)
• Oceanography Minor (p. 395)
• Pharmaceutical Sciences Graduate Minor (p. 908)
• Philosophy Graduate Minor (p. 758)
• Philosophy Minor (p. 758)
• Photography Minor (p. 721)
• Physics Graduate Minor (p. 1020)
• Physics Minor (p. 1020)
• Political Science Graduate Minor (p. 868)
• Political Science Minor (p. 869)
• Popular Music Studies Minor (p. 721)
• Professional Sales Minor (p. 336)
• Psychology Graduate Minor (p. 844)
• Psychology Minor (p. 844)
• Public Health Graduate Minor (p. 917)
• Public Health Minor (p. 975)
• Queer Studies Graduate Minor (p. 829)
• Queer Studies Minor (p. 829)
• Radiation Health Physics Graduate Minor (p. 575)
• Radiation Health Physics Minor (p. 575)
• Rangeland Ecology and Management Graduate Minor (p. 107)
• Rangeland Ecology and Management Minor (p. 107)
• Rangeland Science Minor (p. 110)
• Religious Studies Minor (p. 760)
• Renewable Materials Minor (p. 653)
• Resource Economics Minor (p. 122)
• Risk and Uncertainty Quantification in Earth Systems Graduate Minor (p. 396)
• Robotics Graduate Minor (p. 563)
• Rural Studies Graduate Minor (p. 122)
• Science Education Graduate Minor (p. 450)
• Social Justice Minor (p. 830)
• Sociology Graduate Minor (p. 877)
• Sociology Minor (p. 877)
• Soil Science Graduate Minor (p. 152)
• Soil Science Minor (p. 152)
• Spanish Minor (p. 831)
• Speech Communication Graduate Minor (p. 723)
• Statistics Graduate Minor (p. 1092)
• Studio Art Minor (p. 724)
• Sustainability Minor (p. 397)
• Sustainability Minor (p. 240)
• Theater Arts Minor (p. 725)
• Tourism, Recreation, and Adventure Leadership Minor (p. 606)
• Toxicology Graduate Minor (p. 158)
• Toxicology Minor (p. 158)
• Turf and Landscape Management Minor (p. 228)
• Water Conflict Management and Transformation Graduate Minor (p. 400)
• Water Resources Engineering Graduate Minor (p. 1139)
• Water Resources Graduate Minor (p. 1142)
• Water Resources Policy and Management Graduate Minor (p. 1141)
• Water Resources Science Graduate Minor (p. 1143)
• Wildlife Science Graduate Minor (p. 178)
• Women, Gender, and Sexuality Studies Graduate Minor (p. 834)
• Women, Gender, and Sexuality Studies Minor (p. 834)
• Wood Science Graduate Minor (p. 664)
• Writing Minor (p. 897)
• 20th Century Studies Certificate (p. 670)
• Accounting Certificate (p. 279)
• Applied Ethics Certificate (p. 753)
• Business Analytics Graduate Certificate (p. 297)
• Business Fundamentals Graduate Certificate (p. 298)
• College and University Teaching Graduate Certificate (p. 1135)
• Data Analytics Graduate Certificate (p. 1090)
• Financial Planning Graduate Certificate (p. 318)
• Fisheries Management Graduate Certificate (p. 175)
• Food in Culture and Social Justice Certificate (p. 822)
• Forests and Climate Change Graduate Certificate (p. 591)
• Geographic Information Science Certificate (p. 384)
• Geographic Information Science Graduate Certificate (p. 385)
• Gerontology Certificate (p. 969)
• Health Management and Policy Graduate Certificate (p. 971)
• Language in Culture Certificate (p. 828)
• Latin American Affairs Certificate (p. 828)
• Marine Resource Management Graduate Certificate (p. 393)
• Medical Humanities Certificate (p. 756)
• Peace Studies Certificate (p. 757)
• Public Health Graduate Certificate (p. 913)
• Religion and Culture Certificate (p. 759)
• Russian Studies Certificate (p. 671)
• Scientific, Technical, and Professional Communication Certificate (p. 722)
• Supply Chain and Logistics Management Graduate Certificate (p. 349)
• Sustainable Natural Resources Graduate Certificate (p. 605)
• Urban Forestry Graduate Certificate (p. 615)
• Water Conflict Management and Transformation Graduate Certificate (p. 399)
• Wildlife Management Graduate Certificate (p. 177)
• Women, Gender, and Sexuality Studies Certificate (p. 832)

2
• 20th Century Studies Certificate (p. 670)

A
• Accountancy Undergraduate Major (BS, HBS) (p. 273)
• Accounting Certificate (p. 279)
• Accounting Graduate Option (p. 284)
• Accounting Information Systems Option (p. 277)
• Actuarial Science Minor (p. 1008)
• Adapted Physical Activity Option (p. 946)
• Adult and Higher Education Graduate Major (EDD, EDM, PhD, MAIS) (p. 419)
• Adult Education Graduate Minor (p. 420)
• Advanced Biochemistry Option (p. 993)
• Advanced Chemistry Option (p. 993)
• Advanced Manufacturing Graduate Option (p. 547)
• Advanced Manufacturing Graduate Option (p. 556)
• Advanced Mathematics Teaching Option (p. 430)
• Advanced Molecular Biology Option (p. 1036)
• Advanced Science and Mathematics Education Graduate Option (p. 425)
• Advanced Wood Manufacturing Option (p. 654)
• Adventure Leadership Education Option (p. 607)
• Aerospace Engineering Minor (p. 546)
• Aerospace Studies Minor (p. 1154)
• Aging Sciences Graduate Minor (p. 967)
• Agricultural Business Management Minor (p. 117)
• Agricultural Business Management Undergraduate Major (BS, HBS) (p. 117)
• Agricultural Education Graduate Major (MS, MAIS) (p. 90)
• Agricultural Education Graduate Minor (p. 90)
• Agricultural Education Graduate Option (p. 425)
• Agricultural Sciences Minor (p. 90)
• Agricultural Sciences Undergraduate Major (BS, HBS) (p. 91)
• Agronomy Option (p. 143)
• Alternative Energy Option (p. 377)
• American Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 667)
• Animal Behavior Option (p. 105)
• Animal BioHealth/Pre-Professional Option (p. 105)
• Animal Production Option (p. 106)
• Animal Reproduction and Development Option (p. 233)
• Animal Science Graduate Major (MS, PhD, MAIS) (p. 102)
• Animal Science Graduate Minor (p. 102)
• Animal Sciences Minor (p. 102)
• Animal Sciences Undergraduate Major (BS, HBS) (p. 102)
• Anthropology Graduate Minor (p. 814)
• Anthropology Minor (p. 814)
• Anthropology Undergraduate Major (BA, BS, HBA, HBS) (p. 815)
• Apparel Design Option (p. 308)
• Apparel Design Undergraduate Major (BS, HBS) (p. 343)
• Applied and Computational Mathematics Option (p. 1010)
• Applied Anthropology Graduate Major (MA, MS, PhD, MAIS) (p. 818)
• Applied Anthropology Graduate Minor (p. 819)
• Applied Computer Science Option (p. 523)
• Applied Ecology Option (p. 378)
• Applied Economics Graduate Major (MA, MS, PhD, MAIS) (p. 120)
• Applied Economics Graduate Minor (p. 120)
• Applied Ethics Certificate (p. 753)
• Applied Ethics Graduate Major (MA, MAIS) (p. 754)
• Applied Ethics Graduate Minor (p. 754)
• Applied Genetics Option (p. 234)
• Applied Journalism Minor (p. 892)
• Applied Physics Graduate Major (MS, PSM) (p. 1019)
• Applied Physics Option (p. 1021)
• Applied Visual Arts Undergraduate Major (BFA) (p. 706)
• Aquatic Biology Option (p. 379)
• Aquatic Microbiology Option (p. 1085)
• Archaeology Option (p. 815)
• Architectural Engineering (BS, HBS) (p. 496)
• Art and Design Option (p. 656)
• Art Graduate Minor (p. 707)
• Art History Minor (p. 707)
• Art History Option (p. 707)
• Art Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 707)
• Asian Languages and Cultures Minor (p. 819)
• Asian Studies Minor (p. 865)
• Athletic Training Graduate Major (MATRN) (p. 943)

B
• Basic Mathematics Teaching Option (p. 431)
• Biochemistry and Biophysics Graduate Major (MA, MS, PhD, MAIS) (p. 1030)
• Biochemistry and Biophysics Graduate Minor (p. 1030)
• Biochemistry and Biophysics Undergraduate Major (BS, HBS) (p. 1031)
• Biochemistry and Molecular Biology Undergraduate Major (BS, HBS) (p. 1034)
• Biochemistry Option (p. 994)
• Biocultural Option (p. 816)
• Bioenergy Minor (p. 230)
• Bioenergy Option (p. 234)
• Bioengineering Graduate Major (MENG, MS, PhD) (p. 477)
• Bioengineering Undergraduate Major (BA, BS, HBA, HBS) (p. 478)
• BioHealth Sciences Undergraduate Major (BS, HBS) (p. 1073)
• Biological and Ecological Engineering Graduate Major (MENG, MS, PhD) (p. 460)
• Biological and Ecological Engineering Graduate Minor (p. 460)
• Biological Data Sciences Graduate Minor (p. 1134)
• Biological Physics Option (p. 1021)
• Biology Minor (p. 1045)
• Biology Teaching Option (p. 432)
• Biology Undergraduate Major (BS, HBS) (p. 1046)
• Biomedical Sciences Graduate Option (p. 1136)
• Bioproducts Option (p. 235)
• Bioresource Research Undergraduate Major (BS, HBS) (p. 231)
• Biostatistics Graduate Option (p. 914)
• Biotechnology Option (p. 236)
• Botany and Plant Pathology Graduate Major (MA, MS, PhD) (p. 127)
• Botany and Plant Pathology Graduate Minor (p. 128)
• Botany Minor (p. 128)
• Botany Undergraduate Major (BS, HBS) (p. 128)
• Business Administration and Accountancy Graduate Major (MBAA) (p. 281)
• Business Administration Graduate Major (MBA, PhD) (p. 283)
• Business Administration Graduate Minor (p. 290)
• Business Administration Undergraduate Major (BA, BS, HBA, HBS) (p. 290)
• Business Analytics Graduate Certificate (p. 297)
• Business Analytics Graduate Option (p. 284)
• Business and Entrepreneurship Minor (p. 298)
• Business Engineering Option (p. 552)
• Business Fundamentals Graduate Certificate (p. 298)
• Business Graduate Major (MSB) (p. 280)
• Business Information Systems Undergraduate Major (BA, BS, HBA, HBS) (p. 299)
• Business Minor (p. 281)
• Business Option (p. 994)

C
• Chemical Engineering Graduate Major (MENG, MS, PhD) (p. 481)
• Chemical Engineering Graduate Minor (p. 482)
• Chemical Engineering Option (p. 994)
• Chemical Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 482)
• Chemical Physics Option (p. 1022)
• Chemistry Education Option (p. 995)
• Chemistry Graduate Major (MA, MS, PhD) (p. 987)
• Chemistry Graduate Minor (p. 987)
• Chemistry Minor (p. 987)
• Chemistry Teaching Option (p. 433)
• Chemistry Undergraduate Major (BA, BS, HBA, HBS) (p. 988)
• Child Development Option (p. 972)
• Civil Engineering Graduate Major (MENG, MS, PhD, MAIS) (p. 498)
• Civil Engineering Graduate Minor (p. 498)
• Civil Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 498)
• Climate and Biosystems Modeling Option (p. 236)
• Climate Science Option (p. 371)
• Clinical Mental Health Counseling Graduate Option (p. 422)
• Clinical Sciences Graduate Option (p. 1137)
• Clinically Based Elementary Graduate Option (p. 451)
• College and University Teaching Graduate Certificate (p. 1135)
• College Student Services Administration Graduate Major (EDM, MS) (p. 819)
• Communication Minor (p. 712)
• Communication Option (p. 723)
• Community College Leadership Graduate Option (p. 419)
• Community Development and Leadership Option (p. 674)
• Community Health Graduate Minor (p. 968)
• Comparative Health Sciences Graduate Major (MS, PhD) (p. 1136)
• Comparative Health Sciences Graduate Minor (p. 1137)
• Comparative International Agriculture Minor (p. 93)
• Comprehensive Botany Option (p. 131)
• Computational Molecular Biology Option (p. 1036)
• Computational Physics Option (p. 1022)
• Computer Science Double Degree Option (p. 523)
• Computer Science Graduate Major (MA, MENG, MS, PhD, MAIS) (p. 521)
• Computer Science Graduate Minor (p. 522)
• Computer Science Undergraduate Major (BA, BS, HBA, HBS) (p. 522)
• Computer Systems Option (p. 524)
• Conservation Law Enforcement Option (p. 597)
• Conservation, Resources, and Sustainability Option (p. 379)
• Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS) (p. 501)
• Contemplative Studies Minor (p. 842)
• Contemporary Hispanic Studies Graduate Major (MA) (p. 820)
• Contemporary Hispanic Studies Graduate Minor (p. 821)
• Corporate Finance Graduate Option (p. 285)
• Counseling Graduate Major (MCOUN, PhD) (p. 420)
• Counseling Graduate Minor (p. 423)
• Counselor Education Graduate Option (p. 423)
• Creative Writing Graduate Major (MFA) (p. 893)
• Creative Writing Graduate Minor (p. 893)
• Crime and Justice Option (p. 878)
• Crop and Soil Science Undergraduate Major (BS, HBS) (p. 143)
• Crop Science Graduate Major (MS, PhD, MAIS) (p. 150)
• Crop Science Graduate Minor (p. 151)
• Crop Science Minor (p. 151)
• Cultural/Linguistic Option (p. 816)
• Customizable Option (p. 132)

D
• Data Analytics Graduate Certificate (p. 1090)
• Data Analytics Graduate Major (MS) (p. 1090)
• Dean’s Academy Option (p. 278)
• Dean’s Academy Option (p. 294)
• Dean’s Academy Option (p. 303)
• Dean’s Academy Option (p. 309)
• Dean’s Academy Option (p. 317)
• Dean’s Academy Option (p. 324)
• Dean’s Academy Option (p. 330)
• Dean’s Academy Option (p. 336)
• Design and Human Environment Graduate Major (MA, MS, PhD, MAIS) (p. 344)
• Design and Human Environment Graduate Minor (p. 344)
• Design and Innovation Management Undergraduate Major (BS, HBS) (p. 304)
• Design Graduate Option (p. 557)
• Design Management Option (p. 309)
• Dietetics Option (p. 951)
• Digital Communication Arts Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 712)
• Digital Marketing Option (p. 294)

E
• Early Childhood Development and Education Minor (p. 968)
• Early Childhood Option (p. 973)
• Early Childhood/Elementary Teaching Option (p. 434)
• Earth Sciences Minor (p. 370)
• Earth Sciences Undergraduate Major (BS, HBS) (p. 370)
• Earth Systems Option (p. 380)
• Ecological Engineering Undergraduate Major (BS, HBS) (p. 460)
• Ecological Management of Turf, Landscape and Urban Horticulture Option (p. 210)
• Ecological Restoration Option (p. 597)
• Ecology Option (p. 1053)
• Ecology, Evolution, and Conservation Option (p. 132)
• Economics Minor (p. 865)
• Economics Undergraduate Major (BA, BS, HBA, HBS) (p. 865)
• Education Graduate Major (EDD, EDM, MS, PhD, MAIS) (p. 423)
• Education Graduate Minor (p. 427)
• Education Minor (p. 427)
• Education Undergraduate Major (BA, BS, HBA, HBS) (p. 428)
• Electrical and Computer Engineering Graduate Major (MENG, MS, PhD) (p. 525)
• Electrical and Computer Engineering Graduate Minor (p. 525)
• Electrical and Computer Engineering Undergraduate Major (BS, HBS) (p. 525)
• Elementary Education Undergraduate Major (BS) (p. 447)
• Elementary Graduate Option (p. 451)
• Energy Systems Engineering Undergraduate Major (BS, HBS) (p. 546)
• Engineering Management Graduate Option (p. 548)
• Engineering Management Graduate Option (p. 557)
• English Graduate Major (MA, MAIS) (p. 893)
• English Graduate Minor (p. 894)
• English Minor (p. 894)
• English Undergraduate Major (BA, HBA) (p. 894)
• Enology and Viticulture Option (p. 184)
• Entomology Graduate Major (MA, MS, PhD) (p. 154)
• Entomology Graduate Minor (p. 154)
• Entomology Graduate Option (p. 150)
• Entomology Graduate Option (p. 207)
• Entomology Minor (p. 154)
• Entrepreneurship and Innovation Management Graduate Minor (p. 312)
• Entrepreneurship for Business Majors Option (p. 295)
• Entrepreneurship Minor (p. 310)
• Environmental Agriculture Option (p. 381)
• Environmental and Energy Politics Option (p. 872)
• Environmental and Natural Resource Sociology Option (p. 878)
• Environmental and Occupational Health Graduate Option (p. 914)
• Environmental and Occupational Health Minor (p. 944)
• Environmental Arts and Humanities Graduate Major (MA) (p. 670)
• Environmental Arts and Humanities Graduate Minor (p. 671)
• Environmental Chemistry Option (p. 237)
• Environmental Chemistry Option (p. 995)
• Environmental Economics and Policy Undergraduate Major (BS, HBS) (p. 120)
• Environmental Engineering Graduate Major (MENG, MS, PhD, MAIS) (p. 486)
• Environmental Engineering Graduate Minor (p. 487)
• Environmental Engineering Minor (p. 487)
• Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 488)
• Environmental Policy and Economics Option (p. 382)
• Environmental Science Education Option (p. 383)
• Environmental Sciences Graduate Major (MA, MS, PhD, PSM) (p. 1128)
• Environmental Sciences Graduate Minor (p. 1129)
• Environmental Sciences Minor (p. 374)
• Environmental Sciences Undergraduate Major (BS, HBS) (p. 375)
• Environmental Water Resources Option (p. 384)
• Epidemiology Graduate Minor (p. 944)
• Epidemiology Graduate Option (p. 915)
• Equine Option (p. 106)
• Ergonomics Graduate Minor (p. 945)
• Ethnic Studies Graduate Minor (p. 821)
• Ethnic Studies Minor (p. 821)
• Ethnic Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 822)
• Exercise Physiology Minor (p. 945)

F
• Family and Consumer Sciences Teaching Option (p. 436)
• Family Business Minor (p. 310)
• Family Business Option (p. 295)
• Fermentation Science Minor (p. 181)
• Fermentation Science Option (p. 187)
• Film Studies Minor (p. 896)
• Finance Minor (p. 312)
• Finance Undergraduate Major (BA, BS, HBA, HBS) (p. 313)
• Financial Planning Graduate Certificate (p. 318)
• Financial Planning Graduate Option (p. 280)
• Fish and Wildlife Conservation Option (p. 598)
• Fisheries and Wildlife Administration Graduate Major (PSM) (p. 167)
• Fisheries and Wildlife Sciences Minor (p. 169)
• Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS) (p. 170)
• Fisheries Management Graduate Certificate (p. 175)
• Fisheries Science Graduate Major (MS, PhD, MAIS) (p. 175)
• Fisheries Science Graduate Minor (p. 176)
• Food Economics and Policy Minor (p. 121)
• Food in Culture and Social Justice Certificate (p. 822)
• Food in Culture and Social Justice Graduate Minor (p. 823)
• Food Manufacturing Minor (p. 181)
• Food Quality Option (p. 237)
• Food Science and Technology Graduate Major (MS, PhD) (p. 182)
• Food Science and Technology Graduate Minor (p. 182)
• Food Science and Technology Undergraduate Major (BS, HBS) (p. 182)
• Food Science Minor (p. 192)
• Food Science Option (p. 189)
• Food Technology Minor (p. 192)
• Foreign Languages and Literatures Graduate Minor (p. 824)
• Forensic Science Option (p. 996)
• Forest Ecosystems and Society Graduate Major (MF, MS, PhD, MAIS) (p. 590)
• Forest Ecosystems Option (p. 599)
• Forest Engineering - Civil Engineering Undergraduate Major (BS, HBS) (p. 623)
• Forest Engineering Undergraduate Major (BS, HBS) (p. 628)
• Forest Management Option (p. 636)
• Forest Operations Management Option (p. 639)
• Forest Restoration and Fire Option (p. 642)
• Forestry Minor (p. 633)
• Forestry Undergraduate Major (BS, HBS) (p. 633)
• Forests and Climate Change Graduate Certificate (p. 591)
• Free-Choice Learning Graduate Option (p. 426)
• French Minor (p. 824)
• French Undergraduate Major (BA, HBA) (p. 824)

G
• General Anthropology Option (p. 817)
• General Business Option (p. 295)
• General Horticulture Option (p. 211)
• Genetics Option (p. 1055)
• Genomics/Bioinformatics Option (p. 237)
• Geographic Information Science Certificate (p. 384)
• Geographic Information Science Graduate Certificate (p. 385)
• Geography and Geospatial Science Undergraduate Major (BS, HBS) (p. 386)
• Geography Graduate Major (MA, MS, PhD) (p. 391)
• Geography Graduate Minor (p. 391)
• Geography Minor (p. 391)
• Geology Graduate Major (MA, MS, PhD, MAIS) (p. 392)
• Geology Graduate Minor (p. 393)
• Geology Minor (p. 393)
• Geology Option (p. 372)
• Geophysics Option (p. 1023)
• German Minor (p. 826)
• German Undergraduate Major (BA, HBA) (p. 826)
• Gerontology Certificate (p. 969)
• Gerontology Graduate Minor (p. 970)
• Global Development Studies Minor (p. 827)
• Global Health Graduate Option (p. 915)
• Graphic Design Undergraduate Major (BFA, HBFA) (p. 714)

H
• Health Management and Policy Graduate Certificate (p. 971)
• Health Management and Policy Graduate Option (p. 915)
• Health Management and Policy Minor (p. 971)
• Health Management and Policy Option (p. 976)
• Health Promotion and Health Behavior Graduate Option (p. 916)
• Health Promotion and Health Behavior Option (p. 976)
• Health Teaching Option (p. 438)
• History Graduate Minor (p. 754)
• History Minor (p. 754)
• History of Science Graduate Major (MA, MS, PhD, MAIS) (p. 755)
• History of Science Graduate Minor (p. 755)
• History Undergraduate Major (BA, BS, HBA, HBS) (p. 755)
• Honors Associate Undergraduate Major (HBA, HBFA, HBS) (p. 1183)
• Honors Scholar Undergraduate Major (HBA, HBFA, HBS) (p. 1183)
• Horticultural Research Option (p. 214)
• Horticulture Graduate Major (MS, PhD, MAIS) (p. 207)
• Horticulture Graduate Minor (p. 208)
• Horticulture Undergraduate Major (BS, HBS) (p. 208)
• Hospitality Management Option (p. 295)
• Hospitality Management Undergraduate Major (BA, BS) (p. 319)
• Human Development and Family Science, General Option (p. 973)
• Human Development and Family Sciences Minor (p. 975)
• Human Development and Family Sciences Undergraduate Major (BS, HBS) (p. 972)
• Human Development and Family Studies Graduate Major (MS, PhD, MAIS) (p. 974)
• Human Development and Family Studies Graduate Minor (p. 975)
• Human Dimensions in Natural Resources Option (p. 600)
• Human Resource Management Graduate Option (p. 286)
• Human Services Option (p. 974)
• Human Systems Engineering Graduate Option (p. 548)
• Humanitarian Engineering Minor (p. 468)

I
• Individualized Specialty Option (p. 601)
• Industrial Engineering Graduate Major (MENG, MS, PhD, MAIS) (p. 547)
• Industrial Engineering Graduate Minor (p. 549)
• Industrial Engineering Undergraduate Major (BS, HBS) (p. 549)
• Information Systems Engineering Graduate Option (p. 548)
• Innovation Management Graduate Option (p. 285)
• Innovation Management Undergraduate Major (BA, BS, HBA, HBS) (p. 320)
• Instrumental Performance Option (p. 718)
• Integrated Conservation Analysis Option (p. 601)
• Integrated Science Teaching Option (p. 439)
• Integrative Biology Graduate Major (MS, PhD) (p. 1062)
• Integrative Biology Graduate Minor (p. 1062)
• Interior Design Option (p. 309)
• Interior Design Undergraduate Major (BS, HBS) (p. 344)
• International Affairs Option (p. 873)
• International Agricultural Development Graduate Minor (p. 121)
• International Business Option (p. 278)
• International Business Option (p. 296)
• International Business Option (p. 303)
• International Business Option (p. 318)
• International Business Option (p. 324)
• International Business Option (p. 331)
• International Engineering Minor (p. 469)
- International Studies Undergraduate Major (BA, HBA) (p. 1148)
- Irrigation Engineering Minor (p. 465)

K
- Kinesiology Graduate Major (MS, PhD, MAIS) (p. 945)
- Kinesiology Graduate Minor (p. 946)
- Kinesiology Undergraduate Major (BS, HBS) (p. 946)

L
- Landscape Analysis Option (p. 602)
- Language Arts Graduate Option (p. 451)
- Language Arts Teaching Option (p. 441)
- Language Equity and Educational Policy Graduate Option (p. 426)
- Language in Culture Certificate (p. 828)
- Latin American Affairs Certificate (p. 826)
- Law and Politics Option (p. 873)
- Law, Economics and Policy Option (p. 866)
- Leadership in Higher Education Graduate Option (p. 420)
- Leadership Minor (p. 94)
- Liberal Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 669)

M
- Management and Marketing Option (p. 659)
- Management Undergraduate Major (BA, BS, HBA, HBS) (p. 320)
- Managerial Economics Option (p. 867)
- Manufacturing Engineering Undergraduate Major (BS, HBS) (p. 552)
- Manufacturing Systems Engineering Graduate Option (p. 548)
- Manufacturing Systems Option (p. 554)
- Marine Biology and Ecology Minor (p. 1062)
- Marine Biology Option (p. 1055)
- Marine Conservation and Management Minor (p. 176)
- Marine Resource Management Graduate Certificate (p. 393)
- Marine Resource Management Graduate Major (MA, MS) (p. 394)
- Marine Resource Management Graduate Minor (p. 394)
- Marketing Graduate Option (p. 287)
- Marketing Minor (p. 325)
- Marketing Option (p. 296)
- Marketing Undergraduate Major (BA, BS, HBA, HBS) (p. 325)
- Master of Adapted Physical Education (MAPE) Graduate Major (p. 949)
- Master of Arts Interdisciplinary Studies (MAIS) Graduate Major (p. 1129)
- Materials Mechanics Graduate Option (p. 557)
- Materials Science Graduate Major (MS, PhD) (p. 555)
- Materials Science Graduate Minor (p. 555)
- Materials Science Minor (p. 555)
- Materials Science Option (p. 997)
- Mathematical Biology Option (p. 1010)
- Mathematical Economics Option (p. 868)
- Mathematical Physics Option (p. 1024)
- Mathematics Education Graduate Minor (p. 450)
- Mathematics Education Graduate Option (p. 426)
- Mathematics Graduate Major (MA, MS, PhD, MAIS) (p. 1008)
- Mathematics Graduate Minor (p. 1008)
- Mathematics Graduate Option (p. 452)
- Mathematics Minor (p. 1008)
- Mathematics Undergraduate Major (BS, HBS) (p. 1009)
- Mechanical Engineering Graduate Major (MENG, MS, PhD) (p. 556)
- Mechanical Engineering Graduate Minor (p. 558)
- Mechanical Engineering Undergraduate Major (BS, HBS) (p. 558)
- Medical Humanities Certificate (p. 756)
- Medical Physics Graduate Major (MMP, MS, PhD) (p. 570)
- Merchandising Management Minor (p. 331)
- Merchandising Management Option (p. 296)
- Merchandising Management Undergraduate Major (BS, HBS) (p. 332)
- Microbiology Graduate Major (MA, MS, PhD) (p. 1080)
- Microbiology Graduate Minor (p. 1081)
- Microbiology Minor (p. 1081)
- Microbiology Undergraduate Major (BS, HBS) (p. 1082)
- Military Science Minor (p. 1156)
- Molecular and Cellular Biology Graduate Major (MS, PhD) (p. 1132)
- Molecular and Cellular Biology Graduate Minor (p. 1132)
- Molecular, Cellular, and Genomic Botany Option (p. 133)
- Music Education Option (p. 718)
- Music Graduate Minor (p. 716)
- Music Graduate Option (p. 452)
- Music Minor (p. 717)
- Music Performance Minor (p. 717)
- Music Production Option (p. 719)
- Music Undergraduate Major (BA, BS, HBA, HBS) (p. 718)

N
- Natural Resource and Environmental Law and Policy Minor (p. 121)
- Natural Resource Education Option (p. 602)
- Natural Resources Graduate Major (MNR) (p. 591)
- Natural Resources Minor (p. 593)
- Natural Resources Undergraduate Major (BS, HBS) (p. 593)
- Nature, Eco, and Adventure Tourism Option (p. 609)
- Naval Science-U.S. Marine Corps Minor (p. 1158)
- Naval Science-U.S. Navy Minor (p. 1159)
- New Media Communications Minor (p. 720)
- Nuclear Engineering Graduate Major (MENG, MS, PhD) (p. 570)
- Nuclear Engineering Graduate Minor (p. 570)
- Nuclear Engineering Minor (p. 570)
- Nuclear Engineering Undergraduate Major (BS, HBS) (p. 571)
- Nutrition and Foodservice Systems Option (p. 952)
- Nutrition and Health Sciences Option (p. 953)
- Nutrition Graduate Major (MS, PhD, MAIS) (p. 950)
- Nutrition Graduate Minor (p. 951)
- Nutrition Minor (p. 951)
- Nutrition Undergraduate Major (BS, HBS) (p. 951)
Ocean Science Option (p. 373)
Ocean, Earth and Atmospheric Sciences Graduate Major (MA, MS, PhD, MAIS) (p. 394)
Ocean, Earth and Atmospheric Sciences Graduate Minor (p. 395)
Oceanography Minor (p. 395)
Optical Physics Option (p. 1024)
Organizational Leadership Graduate Option (p. 287)
Outdoor Recreation Management Option (p. 609)

Pastoral Systems of the World Option (p. 109)
Peace Studies Certificate (p. 757)
Pest Biology and Management Option (p. 238)
Pharmaceutical Sciences Graduate Major (MS, PhD) (p. 908)
Pharmaceutical Sciences Graduate Minor (p. 908)
Pharmacy, Doctor of Pharmacy (4-year) Graduate Major (D PHAR) (p. 908)
Philosophy Graduate Minor (p. 758)
Philosophy Minor (p. 758)
Philosophy Undergraduate Major (BA, BS, HBA, HBS) (p. 758)
Photography and Digital Studio BFA Option (p. 708)
Photography and Digital Studio Option (p. 709)
Photography Minor (p. 721)
Physical Activity Graduate Option (p. 916)
Physics Graduate Major (MA, MS, PhD, MAIS) (p. 1019)
Physics Graduate Minor (p. 1020)
Physics Minor (p. 1020)
Physics Teaching Option (p. 443)
Physics Teaching/Physics Option (p. 1025)
Physics Undergraduate Major (BA, BS, HBA, HBS) (p. 1020)
Physiology and Behavior Option (p. 1056)
Piano Performance Option (p. 720)
PK-12 English to Speakers of Other Languages (ESOL) Graduate Option (p. 426)
Plant Breeding and Genetics Graduate Option (p. 151)
Plant Breeding and Genetics Graduate Option (p. 208)
Plant Breeding and Genetics Option (p. 145)
Plant Breeding and Genetics Option (p. 217)
Plant Growth and Development Option (p. 238)
Plant Pathology Option (p. 133)
Policy and Management Option (p. 603)
Political Science Graduate Minor (p. 868)
Political Science Minor (p. 869)
Political Science Undergraduate Major (BA, BS, HBA, HBS) (p. 871)
Popular Music Studies Minor (p. 721)
Pre-Bioengineering (p. 492)
Pre-Chemical Engineering (p. 490)
Pre-Civil Engineering (p. 504)
Pre-Clinical Laboratory Science Option (p. 1077)
Pre-Computer Science (p. 528)
Pre-Construction Engineering Management (p. 505)
Pre-Dentistry Option (p. 1078)
Pre-Dentistry/Biology Option (p. 1057)
Pre-Dietetics Option (p. 954)
Pre-Ecological Engineering (p. 465)
Pre-Education (p. 450)
Pre-Education Biology Option (p. 1058)
Pre-Education Option (p. 669)
Pre-Electrical and Computer Engineering (p. 528)
Pre-Energy Systems Engineering (p. 559)
Pre-Environmental Engineering (p. 491)
Pre-Forest Engineering (p. 644)
Pre-Forest Engineering-Civil Engineering (p. 645)
Pre-Forestry (p. 646)
Pre-Graphic Design (p. 722)
Pre-Human Development and Family Sciences (p. 971)
Pre-Industrial Engineering (p. 559)
Pre-Interior Design (p. 348)
Pre-Manufacturing Engineering (p. 560)
Pre-Mechanical Engineering (p. 561)
Pre-Medicine Option (p. 997)
Pre-Medicine/Biochemistry and Molecular Biology Option (p. 1037)
Pre-Medicine/Biology Option (p. 1059)
Pre-Medicine/Microbiology Option (p. 1085)
Pre-Medicine/Pre-Podiatry Option (p. 1078)
Pre-Nuclear Engineering (p. 572)
Pre-Nutrition (p. 954)
Pre-Optometry Option (p. 1079)
Pre-Pharmacy Option (p. 1079)
Pre-Physical Therapy Option (p. 1080)
Pre-Physician Assistant Option (p. 1080)
Pre-Public Health (p. 975)
Pre-Radiation Health Physics (p. 573)
Pre-Therapy and Allied Health Option (p. 947)
Pre-Veterinary Medicine Option (p. 1061)
Product Development Option (p. 554)
Professional Sales Minor (p. 336)
Psychology Graduate Major (MS, PhD, MAIS) (p. 843)
Psychology Graduate Minor (p. 844)
Psychology Minor (p. 844)
Psychology Undergraduate Major (BA, BS, HBA, HBS) (p. 844)
Public Health Graduate Certificate (p. 913)
Public Health Graduate Major (MPH, PhD) (p. 914)
Public Health Graduate Minor (p. 917)
Public Health Minor (p. 975)
Public Health Practice Graduate Option (p. 916)
Public Health Undergraduate Major (BS, HBS) (p. 976)
Public Policy Graduate Major (MPP, PhD) (p. 877)
Public Policy Undergraduate Major (BS, HBS) (p. 874)

Queer Studies Graduate Minor (p. 829)
Queer Studies Minor (p. 829)
R
- Radiation Health Physics - Pre Med Option (p. 577)
- Radiation Health Physics Graduate Major (MHP, MS, PhD) (p. 574)
- Radiation Health Physics Graduate Minor (p. 575)
- Radiation Health Physics Minor (p. 575)
- Radiation Health Physics Undergraduate Major (BS, HBS) (p. 575)
- Rangeland Ecology and Management Graduate Major (MS, PhD, MAIS) (p. 107)
- Rangeland Ecology and Management Graduate Minor (p. 107)
- Rangeland Ecology and Management Minor (p. 107)
- Rangeland Science Minor (p. 110)
- Rangeland Science Option (p. 107)
- Rangeland Sciences Undergraduate Major (BS, HBS) (p. 108)
- Religion and Culture Certificate (p. 759)
- Religious Studies Minor (p. 760)
- Religious Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 760)
- Renewable Energy Graduate Option (p. 557)
- Renewable Materials Minor (p. 653)
- Renewable Materials Undergraduate Major (BS, HBS) (p. 653)
- Research Thesis Graduate Option (p. 288)
- Resource Economics Minor (p. 122)
- Retail Management Option (p. 297)
- Risk and Uncertainty Quantification in Earth Systems Graduate Minor (p. 396)
- Robotics Graduate Major (MENG, MS, PhD) (p. 562)
- Robotics Graduate Minor (p. 563)
- Robotics Graduate Option (p. 558)
- Rural Studies Graduate Minor (p. 122)
- Russian Studies Certificate (p. 671)

S
- School Counseling Graduate Option (p. 423)
- Science and Engineering Option (p. 661)
- Science Education Graduate Minor (p. 450)
- Science Education Graduate Option (p. 427)
- Science Graduate Option (p. 453)
- Science/Mathematics Education Graduate Option (p. 427)
- Scientific, Technical, and Professional Communication Certificate (p. 722)
- Secondary Teaching Emphasis Option (p. 1011)
- Social Justice Education Graduate Option (p. 427)
- Social Justice Minor (p. 830)
- Social Science Undergraduate Major (BA, BS) (p. 672)
- Social Studies Graduate Option (p. 453)
- Social Studies Teaching Option (p. 444)
- Sociology Graduate Minor (p. 877)
- Sociology Minor (p. 877)
- Sociology Undergraduate Major (BA, BS, HBA, HBS) (p. 878)
- Soil Science Graduate Major (MS, PhD, MAIS) (p. 152)
- Soil Science Graduate Minor (p. 152)
- Soil Science Minor (p. 152)
- Soil Science Option (p. 148)
- Spanish Minor (p. 831)
- Spanish Undergraduate Major (BA, HBA) (p. 831)
- Speech Communication Graduate Minor (p. 723)
- Speech Communication Undergraduate Major (BA, BS, HBA, HBS) (p. 723)
- Statistics Graduate Major (MA, MS, PhD, MAIS) (p. 1090)
- Statistics Graduate Minor (p. 1092)
- Statistics Minor (p. 1092)
- Statistics Option (p. 1012)
- Strategy, Entrepreneurship, and Innovation Graduate Option (p. 288)
- Studio Art BFA Option (p. 710)
- Studio Art Minor (p. 724)
- Studio Art Option (p. 711)
- Supply Chain Analytics Graduate Option (p. 280)
- Supply Chain and Logistics Management Graduate Certificate (p. 349)
- Supply Chain and Logistics Management Graduate Option (p. 289)
- Supply Chain and Logistics Management Option (p. 297)
- Sustainability Minor (p. 397)
- Sustainability Minor (p. 240)
- Sustainability Undergraduate Major (BS, HBS) (p. 242)
- Sustainable Ecosystems Option (p. 239)
- Sustainable Forest Management Graduate Major (MF, MS, PhD) (p. 648)
- Sustainable Horticultural Production Option (p. 219)
- Sustainable Livestock Ranching Option (p. 110)
- Sustainable Natural Resources Graduate Certificate (p. 605)
- Sustainable Tourism Management Option (p. 612)

T
- Teaching Graduate Major (MAT) (p. 450)
- Theater Arts Minor (p. 725)
- Theater Arts Option (p. 724)
- Therapeutic Horticulture Option (p. 222)
- Thermal Fluid Sciences Graduate Option (p. 558)
- Tourism, Recreation, and Adventure Leadership Minor (p. 606)
- Tourism, Recreation, and Adventure Leadership Undergraduate Major (BS, HBS) (p. 606)
- Toxicology Graduate Major (MS, PhD) (p. 158)
- Toxicology Graduate Minor (p. 158)
- Toxicology Minor (p. 158)
- Toxicology Option (p. 239)
- Turf and Landscape Management Minor (p. 228)

U
- Urban Forest Landscapes Option (p. 604)
- Urban Forestry Graduate Certificate (p. 615)

V
- Veterinary Medicine - DVM Graduate Major (p. 1102)
- Viticulture and Enology Option (p. 225)
- Vocal Performance Option (p. 720)
W

- Water Conflict Management and Transformation Graduate Certificate (p. 399)
- Water Conflict Management and Transformation Graduate Minor (p. 400)
- Water Resources Engineering Graduate Major (MS, PhD) (p. 1138)
- Water Resources Engineering Graduate Minor (p. 1139)
- Water Resources Graduate Minor (p. 1142)
- Water Resources Option (p. 240)
- Water Resources Policy and Management Graduate Major (MS) (p. 1140)
- Water Resources Policy and Management Graduate Minor (p. 1141)
- Water Resources Science Graduate Major (MS, PhD) (p. 1142)
- Water Resources Science Graduate Minor (p. 1143)
- Wildland Fire Ecology Option (p. 605)
- Wildlife Management Graduate Certificate (p. 177)
- Wildlife Science Graduate Major (MS, PhD, MAIS) (p. 177)
- Wildlife Science Graduate Minor (p. 178)
- Women, Gender, and Sexuality Studies Certificate (p. 832)
- Women, Gender, and Sexuality Studies Graduate Major (MA, PhD, MAIS) (p. 832)
- Women, Gender, and Sexuality Studies Graduate Minor (p. 834)
- Women, Gender, and Sexuality Studies Minor (p. 834)
- Women, Gender, and Sexuality Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 835)
- Wood Science Graduate Major (MS, PhD, MAIS) (p. 663)
- Wood Science Graduate Minor (p. 664)
- Writing Minor (p. 897)

Z

- Zoology Undergraduate Major (BS, HBS) (p. 1063)

**COLLEGE OF AGRICULTURAL SCIENCES**

The College of Agricultural Sciences (AgSci) connects people and the environment, helping communities and industries thrive by finding real-world solutions that are both economically and ecologically sustainable. With over 2600 students, 250 professorial faculty, $500,000 in scholarships, and $90 million in research grants and contracts, AgSci is integral to OSU’s standing as a top-tier land-grant university and its international ranking for agriculture and forestry.

Paul Dorres, Manager of Student Information, Scholarships, and Education Abroad, 541-737-5655, paul.dorres@oregonstate.edu

Nick Fleury, Head Advisor, 541-737-5816, nick.fleury@oregonstate.edu (nick.fleury@oregonstate.edu)

Academics within the College of Agricultural Sciences prepare the next generation of scientists, managers, and leaders in the fields of food, agriculture, natural resources, and life sciences. With 14 academic programs, learning is integrated with research and Extension to provide students with inquiry-based, hands-on experiences in laboratories and field locations across Oregon and the world.

Undergraduate students may pursue the following bachelor of science degree programs through the College of Agricultural Sciences:

- Agricultural Business Management
- Agricultural Sciences
- Animal Sciences
- BioResource Research
- Botany
- Crop and Soil Science
- Environmental Economics and Policy
- Fisheries and Wildlife Sciences
- Food Science and Technology
- Horticulture
- Rangeland Sciences
- Sustainability-Degree Double

Graduate students may pursue the following degree programs:

- Agricultural Education (MS)
- Animal Science (MS, PhD)
- Applied Economics (MA, MS, PhD, MAIS)
- Applied Systematics in Botany (PSM)
- Biological and Ecological Engineering (MEng, MS, PhD)
- Botany and Plant Pathology (MA, MS, PhD)
- Crop Science (MS, PhD)
- Entomology (MA, MS, PhD)
- Fisheries and Wildlife Administration (PSM)
- Fisheries Management (Certificate)
- Fisheries Science (MS, PhD)
- Food Science and Technology (MS, PhD)
- Horticulture (MS, PhD)
- Interdisciplinary Studies (MAIS)
- Public Policy (MPP)
- Rangeland Ecology and Management (MS, PhD)
- Soil Science (MS, PhD)
- Toxicology (MS, PhD)
- Water Resources Engineering (MS, PhD)
- Water Resources Policy and Management (MS)
- Water Resources Science (MS, PhD)
- Wildlife Management (Certificate)
- Wildlife Science (MS, PhD)

**Individualized Advising**

Each student is considered an important individual. A student’s study program is developed in personal consultation with an advisor in the department of their major interest. A student’s advisor is the primary resource for advising, obtaining information about registration, and gaining signatures and support for petitions and forms. They are a student’s link to campus support resources, and can help with other advising issues including professional development, leadership opportunities, experiential learning and career based topics or questions. Advisors know how to find help for almost any issue—they are a great place to start when students feel lost.

As early as possible, each student is encouraged to select a subject area and become associated with instructors and other students with similar interests. Initial or early advising is based upon the student’s high school record and placement test scores. When high school preparation is found to be inadequate, the student is encouraged to enroll in courses providing the education, training, and experience necessary to help ensure success at the university level, even though such work may require the student to take one or more additional terms to complete a prescribed four-year curriculum. Students planning to transfer from a community college or another four-year institution are encouraged to contact an advisor to discuss their plan of study as far in advance of transferring as possible.
Opportunities

Internships
College of Agricultural Sciences departments offer academic credit for on-the-job learning experiences that connect student learning objectives. Internships are available (https://agsci.oregonstate.edu/academic-programs/opportunities/internships) in all facets of agriculture and can be paid, unpaid, local, national or international. Details regarding specific departmental requirements are available from departmental advisors. Industries, agencies and students interested in general internship information should contact the Academic Programs Office (https://agsci.oregonstate.edu/academic-programs/contact).

Scholarships
The College of Agricultural Sciences offers a variety of scholarships. Several are reserved for incoming high school or transfer students, and are included in the admissions process (http://admissions.oregonstate.edu/apply-choose-application). Additional information and application forms for college-level scholarships can be found here (https://agsci.oregonstate.edu/academic-programs/scholarships). For information about departmental scholarships, contact each department directly (https://agsci.oregonstate.edu/main/operating-units). For more information about university-level scholarships, contact the Scholarships Office (http://scholarships.oregonstate.edu).

Global
The College of Agricultural Sciences has International Exchange Agreements (https://agsci.oregonstate.edu/academic-programs/opportunities/global-opportunities) with numerous institutions spanning thirteen countries. Students may choose to study abroad via the exchange program with Lincoln University in New Zealand; learn about various regions across the globe by participating in the Exploring World Agriculture class and companion Faculty-led Educational Tour; or encounter cultures and traditions through their peers in the International Agriculture Club.

Research
The College of Agricultural Sciences provides multiple pathways for students to apply their knowledge through research (https://agsci.oregonstate.edu/academic-programs/opportunities/undergraduate-research). Whether you are just starting out, or ready to begin an independent research project (https://agsci.oregonstate.edu/academic-programs/agsci-all-star-ananiya), we have mentors and funding to help you gain research experience.

Undergraduate Minor Programs
Minors (https://agsci.oregonstate.edu/academic-programs/undergraduate-degrees/#minor) are offered through most departments of the College of Agricultural Sciences. Students interested in pursuing a minor must first contact the key advisor (https://agsci.oregonstate.edu/academic-programs/about/advisors) in the area of interest. The minor must consist of a minimum of 27 designated credits of related course work, including at least 12 in upper-division courses.

Graduate Programs
Take your education to the next level with one of our advanced degrees, or broaden your skill-set by completing a graduate certificate. The College of Agricultural Sciences offers a variety of graduate studies (https://agsci.oregonstate.edu/academic-programs/graduate-degrees) both on-campus and online. Our graduate student body includes ARCS® Foundation Scholars, Fulbright Fellows and Fellows supported by NOAA and other organizations or federal agencies. Funding opportunities are available through graduate teaching and research assistant positions. Graduate program requirements, deadlines, and application processes can be found on the Graduate School website (https://gradschool.oregonstate.edu).

Graduation Requirements
To be eligible for a bachelor of science (BS) degree, a student must complete a minimum of 180 credits including:

1. University Baccalaureate Core requirements
2. Courses in agricultural sciences: 36 credits including 24 credits at the upper-division level.

Agricultural Education and General Agriculture
The Department of Agricultural Education and General Agriculture combines two programs: Agricultural Sciences and Agricultural Education.

The Agricultural Sciences Program is an undergraduate studies program that provides maximum flexibility in designing and structuring a course of study to meet the students’ individual needs. Agricultural Sciences should be seriously considered by students desiring programs of study not currently available in any other agricultural subject matter department (such as those involving a minor in communications, recreation, or environmental studies in agriculture); students wishing to pursue two or more areas of specialization (such as students who are returning to farms or ranches and who need substantial background, for example, in animal science, crops, and agricultural business management); students preparing for leadership positions in agriculture that require excellent communication and leadership skills as well as breadth of agricultural background (such as agriculture teachers, lobbyists, commodity liaison persons or extension staff); or students who have not selected a departmental major in the College of Agricultural Sciences but who know they are interested in an agricultural career.

The goal of the Agricultural Sciences Program is to help students identify the agricultural career in which they are most interested and build a course of study that will qualify each student for his or her chosen profession. Advising is of paramount importance in this process and major emphasis is placed on career advising.

The Agricultural Education Program offers course work serving teachers and leaders in agriculture. The MS and MAIS degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their occupational objectives. The Agricultural Education MS degree aligns with an initial teaching license in Oregon.

Three undergraduate minors are available in the Department of Agricultural Education and General Agriculture.

1. The Agricultural Sciences minor is available for undergraduate students who have majored in an area that requires the addition of breadth in agriculture to their major program. The minor provides the appropriate technical agriculture background for students interested in agricultural management, communication, environmental studies, etc.
2. The Comparative International Agriculture minor provides students with formal instruction in international agricultural concepts and
practical experiences through global awareness course work, language immersion via study/research abroad, and/or international fieldwork. The 27-credit curriculum prepares students for successful postbaccalaureate international careers, or those seeking graduate studies in international agriculture programs.

3. The Leadership minor is designed for all undergraduates interested in developing premier leadership, enhancing professional competencies, and fostering the skills necessary to meet the local, national, and international needs of our society. The Leadership minor is centered on leadership theory (education), trait/skill development (training), and application (development). It is designed to allow students to apply the course work in a relevant and relational manner. This minor is also available via Ecampus.

Career Opportunities in Agricultural Sciences

Career opportunities for general agriculture majors are unlimited because of the nature of the program structure. Students can return to home farms or ranches, move into agricultural middle management, become extension staff, move into political lobby positions, work in marketing or international agriculture, become high school teachers of agriculture, or teach agriculture in community colleges. Salaries vary depending on the position a student may strive to achieve.

Undergraduate Studies Curriculum

High school and college transfer students who are admitted to Oregon State University as an undergraduate are eligible to participate in the Agricultural Sciences Program. Agricultural Sciences majors, in consultation with their departmental academic advisor, may plan elective course work to emphasize personal interests, abilities, and career objectives. A leadership and communication area of emphasis is available and is specially designed for those students who will need breadth in their technical agriculture background and excellence in communication and leadership skills. The intent of this area of emphasis within the Agricultural Sciences Program is to prepare agriculture’s future leaders in extension, government, and business. A teacher preparation area of emphasis is available and allows for Initial Teacher Licensure within the baccalaureate degree.

Agricultural Education

AED 313. THEORY AND PRACTICUM III: FIELD. (4 Credits)
Field based experience for students preparing to be agricultural teachers. Focus on teaching models.

AED 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AED 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AED 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AED 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

AED 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AED 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AED 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AED 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AED 510. PROFESSIONAL INTERNSHIP: AGRICULTURE EDUCATION. (1-40 Credits)
A field experience in which the intern will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for 40 credits.

AED 518. EXTENSION COURSE IN TEACHER EDUCATION/PEDAGOGY. (1-3 Credits)
Enables present and prospective teachers of agriculture to continue their professional development on pedagogical topics of current importance. (This course is limited to 9 credits per term.) This course is repeatable for 50 credits.

AED 533. RURAL SURVEY METHODS. (3 Credits)
 Technique, analyzing, interpreting, and using results of survey data; identifying and utilizing community resources; develop and organize agriculture programs to meet community needs.

AED 552. PROGRAM ORGANIZATION AND MANAGEMENT. (3 Credits)
Explores the foundations of vocational education, essential learning skills, advisory committees, and development of a vocational education philosophy. Students will study the elements of educational reform as they apply to specific service areas. Resource analysis, student organizations, and school-to-work transitions will also be studied.

AED 553. APPLIED INSTRUCTIONAL STRATEGIES. (3 Credits)
Helps students in the identification and development of goals, objectives and units. The course includes the development and application of subject area instructional strategies/models, including applied math, writing, communication skills, measurement and evaluation of achievement, and delivery of instruction to at-risk students. Safety is a primary focus.

AED 554. MICRO-TEACHING. (3 Credits)
Planning, presenting and evaluating lessons in a micro-teaching lab. It includes application of content pedagogy strategies, subject matter principles and media technology. Lessons presented on safety.
AED 555. LABORATORY PEDAGOGY. (3 Credits)
Applications of efficient planning, organizing, and teaching skills within the laboratory setting and utilization of laboratory facilities to optimize learning experiences. Laboratory facilities could include a shop, greenhouse, land laboratories/outdoors, agriscience labs, aquaculture, computer lab, field trips, etc.

AED 556. LINK RESEARCH, TEACHING, AND PRACTICE. (3 Credits)
Links research to teaching. Students will work with cooperating teachers to identify and apply research to teaching.

AED 557. ISSUES AND TRENDS IN CURRICULUM AND INSTRUCTION. (3 Credits)
Emphasizes trends related to subject matter curriculum issues unique to agricultural education at the secondary level.

AED 558. IMPROVING AGRICULTURAL SCIENCE AND TECHNOLOGY PROGRAMS. (3 Credits)
Provides impetus toward evaluation and improvement of local programs of agricultural science and technology (AST), such that they better reflect community, regional, and national needs.

AED 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AED 603. DISSERTATION. (1-16 Credits)
Students engage in research and writing related to the completion of their dissertation to fulfill the requirements of the College of Education PhD program.
This course is repeatable for 999 credits.

AED 640. INSTRUMENTATION AND DATA COLLECTION IN SOCIAL SCIENCE. (3 Credits)
Addresses the selection, development, and analysis of various types of quantitative instruments and procedures for collecting research data. The course has a quantitative focus and is oriented toward social science research. Lec/lab.

Agriculture-General

AG 111. INFORMATION TECHNOLOGY IN AGRICULTURE. (3 Credits)
Using information technology in agriculture and agribusiness; practical experience with computer programs applicable to all agricultural disciplines.

AG 199. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

AG 211. SURVEY AND CONSTRUCTION. (3 Credits)
Land measurement and leveling as applied to agricultural uses. Concrete and agricultural building construction including the use of construction power tools, selection of materials and cost estimating.

AG 221. METALS AND WELDING. (3 Credits)
Practices of metal working including the use of metal working machines, metal identification, heat treating and metal properties. Fabrication of metals including arc and oxy-acetylene welding and cutting. Lec/lab.

AG 230. INTRODUCTION TO EXTENSION AND ENGAGEMENT. (3 Credits)
For students interested in pursuing a career with the OSU Extension Service. An introduction to the OSU Extension Service mission, philosophy, history, organization, structure, administration, program areas, Extension program development, Extension teaching and delivery methods, and the involvement and use of volunteers.
This course is repeatable for 6 credits.

AG 301. *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS. (3 Credits)
Designed and presented in partnership with Pacific Northwest Indians and Alaska Natives, focusing on natural ecosystems, differing views, power relationships, policymaking, and gender roles. (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

AG 311. *NATIVE AMERICAN AGRICULTURE. (3 Credits)
Explores Native North American agriculture and land management--prehistory of important domesticates such as maize, historic change, and contemporary issues including modern stereotypes, women in agriculture, cultural survival, and both the physical and spiritual significance of these crops in Native American communities and around the globe past and present. (Bacc Core Course) Attributes: CPCD – Core, Pers, Cult Diversity; CPDP – Core, Perspective, Difference/Power/Discrimination

AG 312. ENGINE THEORY AND OPERATION. (3 Credits)
Engine construction, operational theories and principles, lubrication, fuels and oils, emissions and preventive maintenance are taught through the process of small engine lab activities. Engine efficiency theories and measurement are presented.

AG 318. ACCESSING INFORMATION FOR AGRICULTURAL RESEARCH. (1 Credit)
Designed for students at a distance to develop library skills and improve access to information used to conduct technical agricultural research.

AG 351. *COMMUNICATING AGRICULTURE TO THE PUBLIC. (3 Credits)
Students will explore various outlets for communicating with the public about agriculture using appropriate, professional writing. Additionally, students will articulate their thoughts on controversial issues as well as write feature and editorial pieces promoting positive agricultural practices and people in agriculture. (Bacc Core Course) Attributes: CPSI – Core, Pers, Soc Proc & Inst; CSGI – Core, Synth, Global Issues

AG 391. FARM IMPLEMENTS. (3 Credits)
Power farming implements including operation, maintenance, adjustments, calibration and use are covered. Field trips may be required.

AG 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AG 402. INDEPENDENT STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

AG 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

AG 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AG 406. SPECIAL PROBLEMS. (1-16 Credits)
This course is repeatable for 16 credits.

AG 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AG 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AG 410. INTERNSHIP. (1-16 Credits)
A work internship to give students practical on-the-job preparation in any of the main facets of agriculture or related industries.
This course is repeatable for 16 credits.
AG 412. AG SAFETY AND HEALTH. (3 Credits)
An examination of various hazards associated with agriculture. Control strategies will be explored and prevention methods identified. Hazards examined include machinery, livestock, controlled spaces, pesticides, and other items common to the agricultural workplace. Lec/lab.

AG 421. WRITING IN AGRICULTURE. (3 Credits)
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

AG 425. DEVELOPMENTS IN AGRICULTURAL MECHANICS. (3 Credits)
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology.
This course is repeatable for 45 credits.

AG 435. PROFESSIONAL PRESENTATIONS IN AGRICULTURE. (3 Credits)
Students will learn to effectively create and deliver professional presentations relevant to careers in agriculture and natural resources. This includes developing skills for both formal and informal presentations, using visual aids effectively, and using appropriate strategies to engage various audiences.

AG 492. TECHNOLOGY TRANSFER IN AGRICULTURE. (3 Credits)
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 499. SPECIAL TOPICS. (1-4 Credits)
Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 12 credits.

AG 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AG 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AG 518. EXTENSION COURSE IN TEACHER EDUCATION: TECHNICAL. (1-3 Credits)
Enables present and prospective teachers of agriculture to continue their professional development on technical topics of current importance. This course is repeatable for 9 credits.

AG 521. WRITING IN AGRICULTURE. (3 Credits)
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing.

AG 525. DEVELOPMENTS IN AGRICULTURAL MECHANICS. (3 Credits)
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology.
This course is repeatable for 45 credits.

AG 541. COMMUNITY PROGRAMS IN AGRICULTURE. (3 Credits)
Evaluating agricultural education program effectiveness and technical appropriateness. Development of long-range plans for agricultural programs to meet the technical needs of a community.

AG 592. TECHNOLOGY TRANSFER IN AGRICULTURE. (3 Credits)
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 808. WORKSHOP. (1-4 Credits)
Designed to enhance professionalism and create a knowledge base to increase personal effectiveness. This course will provide a basis for future leadership by synthesizing theoretical knowledge with practical application. Individuals will have the opportunity to explore their own personality, reflect on their leadership ability, and develop the professional skills and networking abilities necessary to become influential leaders in their home, community and profession.
This course is repeatable for 4 credits.

Leadership

LEAD 242. PERSONAL LEADERSHIP DEVELOPMENT. (3 Credits)
Examines content related to leadership traits, styles, and effective leadership tactics. An introductory course designed to create awareness and develop the employability skills necessary for participants to be productive contributors in their school, home, community and profession.

LEAD 342. TEAM AND ORGANIZATIONAL LEADERSHIP. (3 Credits)
Examines the planning, implementation and evaluation of organizations, and challenges students in the development of effective communication, group dynamics, conflict management, teambuilding and problem solving. Students will be challenged to examine their leadership role in their school, community and profession.

LEAD 401. LEADERSHIP RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

LEAD 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

LEAD 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

LEAD 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

LEAD 410. LEADERSHIP INTERNSHIP. (1-16 Credits)
Students apply what they have learned through both the leadership theory and trait/skill development portion of the Leadership minor. This course is repeatable for 16 credits.

LEAD 442. LEADERSHIP SKILLS FOR CAREER SUCCESS. (3 Credits)
Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence.

LEAD 443. LEADERSHIP THROUGH CONVERSATIONS. (3 Credits)
Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.

LEAD 444. LEADERSHIP MINOR CAPSTONE. (2 Credits)
Capstone course for students completing the Leadership minor. Students will reflect on what they have learned through the Leadership minor and how to apply that learning in the context of their future careers.
LEAD 542. LEADERSHIP SKILLS FOR CAREER SUCCESS. (3 Credits)
Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence.

LEAD 543. LEADERSHIP THROUGH CONVERSATIONS. (3 Credits)
Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.

Agricultural Education Graduate Major (MS, MAIS)

Graduate Areas of Concentration
Teacher preparation, leadership, and communication in agriculture

The Department of Agricultural Education and General Agriculture offers course work that serves teachers and leaders in agriculture. The Master of Science and Master of Arts in Interdisciplinary Studies degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension, and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their occupational objectives. A person who completes an Agricultural Education master’s degree is not solely locked into teaching. Potential occupations also include lobbyist, journalist, and Extension work.

Major Code: 1050

Agricultural Education Graduate Minor

Develop a teaching, pedagogical, leadership development in agriculture minor by working with a departmental advisor.

Minor Code: 1050

Agricultural Sciences Minor

The Agricultural Sciences minor is designed for students who have an interest in agricultural sciences. The minor is ideal for students who want to add more exposure and content (broadly) within agriculture to their primary major.

The minor requirements listed below are subject to the following:

- 27 credit minimum (15 required, 12 upper-division electives).
- Courses required for a major and taken in the major department may not count towards this minor.
- Students may not use variable credit courses toward the minor.
- Courses used to fulfill the requirements must be taken for a letter grade.
- Agricultural elective courses for this minor must be upper-division credits.

**Comparative International Agriculture Minor**

The minor provides students with formal instruction in international agricultural concepts and practical experiences through global awareness course work, language immersion via study/research abroad, and/or international fieldwork. The 27-credit curriculum prepares students for successful postbaccalaureate international careers, or those seeking graduate studies in international agriculture programs. Students critically examine current international agricultural issues and/or diversity and communications. To be eligible to apply for this minor, students must have a cumulative 2.0 GPA or higher and be in good standing with Oregon State University. Students must also be in a declared major. Participants in this minor program are able to:

1. Research the major agricultural themes and issues of another nation besides the United States of America.
2. Examine trade information to determine the key elements of agricultural trade agreements between the USA and another country.
3. Analyze the effectiveness of agricultural practices of another nation besides the USA.
4. Investigate the effect of broad social, economic, and environmental forces upon the agricultural industry of another nation besides the USA.

**Course Requirements**

All 27 credits for the minor must be completed with a C or higher grade. Students can complete 12 to 18 upper-division credits and a maximum of 14 lower-division credits.

**Baccalaureate Core Course (BCC)**

**Writing Intensive Course (WIC)**

1. Biology series differ between campus and Ecampus. Campus students may take any Biology in these series. Ecampus students will expect to take BI 204, 205, 206 (Group C).
Leadership Minor

Also offered via Ecampus.

The Leadership minor is designed for all undergraduates interested in developing premier leadership, enhancing professional competencies, and fostering the skills necessary to meet the local, national, and international needs of our society. The Leadership minor is centered on leadership theory (education), trait/skill development (training), and application (development). It is designed to allow students to apply the course work in a relevant and relational manner.

Specifically, the course work focuses on major theories of leadership including contingency, path-goal, leader-member exchange theories as well as transformational, authentic, team, and servant leadership. Within each theory and type of leadership, students will be challenged to consider leadership ethics, leadership culture, gender in leadership, and integration of leadership into personal, civic, and social change. In addition, the elective courses allow students to pursue the development of trait and skill competencies necessary for employment in their chosen field. Students will then have the opportunity to directly apply their learning through a leadership internship, service learning project, or research opportunity.

Writing Intensive Course (WIC)

Minor Code: 477

Animal and Rangeland Sciences

Programs in animal sciences provide up-to-date information on methods of rearing livestock and poultry, that produce meat, milk, eggs, wool, and other animal products. In addition, the department addresses the care of animals that enhance human well-being through companionship, recreation, and human aid such as horses and companion animals.
Essential to this information is knowledge generated from the fields of animal behavior/bioethics, genetics, nutrition, and physiology. The various teaching and research programs explore modern areas of animal biotechnology and data processing and how they apply to present day livestock and poultry production. Study in these areas provides the core around which various curricula leading to the BS degree in Animal Sciences can be developed. To allow students flexibility in course arrangement, three specialized program options are offered.

Increasing demands for livestock and poultry products by a rapidly expanding human population mean potential employment for well-trained individuals in such areas as farm, ranch, feedlot operation; meat, poultry, egg and milk processing, meat grading with the USDA; Federal Cooperative Extension Service, county and 4-H work; sales or technical employment with commercial feed, seed, and chemical companies and pharmaceutical houses; agricultural loan officer; government agency positions at local, state and federal levels; the Peace Corps; animal welfare auditing; as well as in journalism, mass media, and public policy. The expanding support structure for companion animals has created a growing job market for graduates in areas such as animal behavior consultant; veterinary technician (animal nurse); and business management. In addition, students become prepared to go on to advanced studies in animal sciences, veterinary medicine, and education.

Graduate students may pursue research projects through the Agricultural Experiment Station as part of their programs for MS or PhD degrees. Graduate areas of concentration are offered in animal nutrition, dairy production, embryo physiology, endocrinology, ethology, growth and development, livestock management, muscle biology and meat science, nutritional biochemistry, reproductive physiology.

Cooperative Programs
Students transferring after one or two years at a community college should also be able to complete the requirements for a BS after three or two years, respectively.

Rangeland Sciences
Rangeland sciences is one of the family of natural resources professions important to the social, economic, and political development of Oregon, the nation, and the world. It is based upon ecological principles and is concerned with the restoration, improvement, conservation, and use of rangelands. Since range management is practiced on lands producing domestic and wild animals, timber, water, and recreation, concepts of integrated land use are included in the curriculum. A balance of soil, domestic animal, wildlife, ecology, and other biological sciences is realized in the educational program.

The curriculum below includes university and departmental requirements for the BS degree and provides emphasis either in science, management, ecology, or allied disciplines. The BS degree is also offered on the campus of Eastern Oregon University at La Grande through an extension of the OSU Department of Animal and Rangeland Sciences. Facilities for study include classroom and field-oriented educational environments both on-campus and at locations throughout Oregon. Field trips are taken in conjunction with specific courses.

Graduate work leading to MAIS, MS, or PhD degrees may involve research on domestic or wild animals, rangeland nutrition, community ecology, physiology of rangeland plants, rangeland improvement, rangeland watershed, and riparian zone management, rangeland restoration, utilization and management, agroforestry and landscape ecology.

Summer employment with private industry, government agencies, and on range research projects makes possible learning experiences while earning a salary. Employment opportunities include resource management, research, Extension, ranch management, college and university teaching, business and industrial activities related to rangeland resources, and foreign agricultural and resource development assistance.

The Department of Animal and Rangeland Sciences (https://anrs.oregonstate.edu) is accredited by the Society for Range Management. It is recognized throughout the country as one of the leading institutions of rangeland science.

Undergraduate Programs

Majors
- Animal Sciences (p. 102)
  - Options
    - Animal Behavior
    - Animal BioHealth/Pre-Professional
    - Animal Production
    - Equine
    - Rangeland Science
- Rangeland Sciences (p. 108)
  - Options
    - Pastoral Systems of the World (p. 109)
    - Sustainable Livestock Ranching (p. 110)

Minors
- Animal Sciences (p. 102)
- Rangeland Ecology and Management (p. 107)
- Rangeland Sciences (p. 110)

Faculty
Professors Bohnert, Cherian, Downing, Estill, Filley, Pirelli, Kennedy, Rice
Associate Professors Bobe, Deboodt, Hermes, Kutzler, Mata-Gonzalez, Schreder, Williams
Assistant Professors Arispe, Ates, Bionaz, Bouska, Cruickshank, Dinkins, Duggan, Endress, Morris, Northway, Ochoa, Riggs, Schachtschneider, Udell
Senior Instructors Kennedy, Rice
Instructors Gibson, Gusse, Hazzard, Monaco, Mueller, Rosenlicht, Shaver, Sherwood
Faculty Research Assistant Brummer, Corder, Schroeder
Professionals Knudson, Reesman, Spencer
Emeritus Professors Borman, Cheeke, Gamroth, Froman, Johnson, Koong, Males, Menino, Thompson, Weber
Distinguished Professor Emeritus Stormshak

Adjunct Faculty
Kiemnec

Courtesy/Affiliate Faculty
Associate Professor Stringham
Assistant Professors Bates, Boyd, Davies, Ganskopp, George, James, Louhaichi, McLean, Shelley, Svejcar

Animal Science
ANS 121. *INTRODUCTION TO ANIMAL SCIENCES. (4 Credits)
Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: ANS 121H
ANS 121H. *INTRODUCTION TO ANIMAL SCIENCES. (4 Credits)
Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: ANS 121
ANS 207. SOPHOMORE SEMINAR. (2 Credits)
Examination of career opportunities in animal sciences.
ANS 215. BEEF/DAIRY INDUSTRIES. (3 Credits)
Introduction to beef and dairy industries; history, current industry status, and demonstration and practice of basic husbandry skills.
ANS 216. SMALL RUMINANT/SWINE INDUSTRIES. (3 Credits)
Introduction to the small ruminant and swine industries including history, current status and production practices, with demonstration and hands-on experience of basic husbandry practices.
ANS 217. POULTRY INDUSTRIES. (3 Credits)
Familiarization of the organizational structure and marketing arrangement of poultry industries; hands-on managerial techniques, practices and procedures carried out by the poultry industries.
ANS 220. INTRODUCTORY HORSE SCIENCE. (3 Credits)
Introduction to horses, their history, breeds, form and function, performance evaluation, current industry status, and general management.
ANS 223. EQUINE MARKETING. (2 Credits)
Course covers practical concepts of equine marketing. Emphasis on market assessment, targeting buyers, marketing and advertising strategies, hands-on experience in product preparation and presentation, marketing legalities.
ANS 231. LIVESTOCK EVALUATION. (3 Credits)
Focuses on an individual animal's economic merit as compared to a sample group. Visual appraisal, performance data, and carcass merit are stressed. Includes the evaluation of both market and breeding animals. The livestock species of concentration include beef cattle, swine, sheep, and meat goats. Lec/lab.
ANS 251. PRINCIPLES OF ANIMAL FOODS TECHNOLOGY. (3 Credits)
Processing of meat, milk and eggs into human food products. Lec/lab.
ANS 280. COMPANION ANIMAL MANAGEMENT. (4 Credits)
An introduction to the challenges, responsibilities, and benefits of interaction with selected companion animals. Topics covered will provide an overview of the human-animal bond, the position of companion animals in society, ethical issues of pet ownership and potential career opportunities. In addition, the course will serve as an introduction to preventive care and normal behavior of dogs, cats, and selected exotic pets. As the Department of Animal and Rangeland Sciences curriculum offers courses addressing equine care and husbandry, horses will not be discussed in this class.
ANS 302. COMMON DISEASES OF COMPANION ANIMALS. (4 Credits)
An introduction to common diseases of selected companion animals. Emphasis will be placed on identifying predisposing factors, clinical signs, common diagnostic procedures and potential implications for human health. A $10 course fee will be required. Lec/rec.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D+] or BI 212H [D-]) and (BI 213 [D+] or BI 213H [D-]) and CH 121 [D+] and CH 122 [D-] and CH 123 [D-]
ANS 311. PRINCIPLES OF ANIMAL NUTRITION. (3 Credits)
Classification, digestion, absorption, and metabolism of nutrients in animals; consequences of nutritional deficiencies and toxicities.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D+] or BI 212H [D-])
ANS 312. FEEDSTUFFS AND RATION FORMULATION. (4 Credits)
Presents the feedstuffs utilized by domestic animals including their characteristics and processing. Provides instruction in ration formulation and evaluation leading to development of the basic skills required to formulate and evaluate rations for domestic animals. Taught as a distance education course.
ANS 313. APPLIED ANIMAL NUTRITION: FEEDS AND RATION FORMULATION. (4 Credits)
Discusses topics relevant to feedstuff identification and nutrient analysis, feed processing and formulation of balanced animal diets based on nutrient requirements. Provides students hands-on experiences in identifying various feedstuffs and formulating rations based on the nutrient composition of those feedstuffs. Also offered at EOU and through Ecampus.
ANS 314. ANIMAL PHYSIOLOGY. (4 Credits)
Biological basis of animal performance; describes how networks of cells act cooperatively to enable locomotion, provide a stable internal environment, allocate resources, remove metabolic end-products, and counteract microorganisms.
ANS 315. *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE. (3 Credits)
Discussion of contentious issues including role of animal products and human health; use of hormones and antibiotics; new animal biotechnologies; animal rights/welfare; livestock grazing on public lands. (Bacc Core Course).
Attributes: CSST – Core, Synthesis, Science/Technology/Society
ANS 316. REPRODUCTION IN DOMESTIC ANIMALS. (4 Credits)
Anatomy and physiology of mammalian and avian reproductive systems; fertilization, embryonic and fetal development, placentaion and parturition; reproductive technologies. Lec/rec.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (CH 121 [D-] or CH 221 [D-] or CH 231 [D-] or CH 231H [D-])

ANS 317. REPRODUCTION IN DOMESTIC ANIMALS LABORATORY. (1 Credit)
Gross and microscopic anatomy of the reproductive tract; semen collection, evaluation and extension; evaluation of fertilization, embryo and fetal development and placentaion. Lec/lab.
Prerequisites: ANS 316 (may be taken concurrently) with D- or better

ANS 320. PRINCIPLES OF COMPANION ANIMAL NUTRITION. (3 Credits)
Learn about nutrients, the digestive process, and the application of nutritional sciences to the health and wellness of companion animals. Introduction to the metabolic basis and practical preventative management for nutritional diseases in companion animals.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-])

ANS 321. AVIAN EMBRYO. (4 Credits)
Discussion and experimentation involving the development and the environmental requirements for the artificial incubation of avian embryos. Lec/lab. Offered even-numbered years.

ANS 327. APPLIED PHYSIOLOGY OF REPRODUCTION. (5 Credits)
Principles, techniques and recent development in semen collection, evaluation, extension and preservation; artificial insemination, estrus detection and synchronization; pregnancy diagnosis and embryo transfer.
Prerequisites: ANS 316 with D- or better and ANS 317 [D-]

ANS 331. ADVANCED LIVESTOCK EVALUATION. (4 Credits)
Aspects of an individual animal's economic merit are compared to a sample group. Emphasis is placed on beef, swine and sheep. Visual appraisal, performance data and carcass merit are stressed. Designed to prepare students for the intercollegiate livestock judging team. This course is repeatable for 12 credits.

ANS 333. EQUINE STABLE MANAGEMENT. (3 Credits)
Discusses developing a business plan, financial statements, and ratios, budgeting, financial planning, taxation, and employment issues within the current equine industry.
Prerequisites: ANS 220 with D- or better

ANS 335. EQUINE HEALTH AND DISEASE. (3 Credits)
Recognition of common diseases and disorders including their cause, treatment and prevention. Management of internal and external parasites. Recognizing common lameness issues.

ANS 341. ANIMAL BEHAVIOR AND COGNITION. (3 Credits)
Survey, discuss, and explore principles of animal behavior and cognition from a comparative perspective, taking into account the interacting influences of biology, environment, and life experience on the individual and group behavior of animals across species. Aspects of animal cognition, including reasoning, perception, memory and personality, that play an important role in animal behavior will also be addressed.
Prerequisites: BI 102 with D or better or BI 213 with D or better

ANS 351. ADVANCED PRINCIPLES OF ANIMAL FOODS TECHNOLOGY. (4 Credits)
Provides in-depth coverage of both fresh and processed meats and eggs into products suitable for human consumption.

ANS 378. ANIMAL GENETICS. (4 Credits)
Fundamentals of inheritance, principles of genetic segregation, population and quantitative genetics, response to natural selection and artificial manipulation of populations.
Prerequisites: BI 211 with D- or better or BI 212 with D- or better or BI 213 with D- or better

ANS 380. PRINCIPLES OF ANIMAL ANATOMY AND PHYSIOLOGY. (3 Credits)
An introductory course in animal anatomy to provide a foundation for advanced courses in the Animal Science curriculum. Emphasis is on acquisition of a basic knowledge of minute and gross anatomical structures, their operation, and integration. Begins with anatomical nomenclature such as body planes and directional terms then covers the following tissues and organ systems: epithelium, connective tissue, blood and bone marrow, bone/cartilage, muscle tissue, nervous tissue, digestive system, circulatory system, reproductive system, urinary system, and respiratory system.
Prerequisites: (BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D])

ANS 385. FOUNDATIONS OF MAMMALIAN HISTOLOGY. (3 Credits)
Provides a basic knowledge of mammalian microscopic anatomy. Emphasis will be on the appearance, organization and function of minute anatomical structures that can only be observed with the help of a visual enhancer, such as a microscope. Covers basic historical techniques and histology and related functions of the following tissues and organ systems: epithelium, connective tissue, bone/cartilage, blood, muscle tissue, nervous tissue, circulatory system, digestive system, reproductive system, urinary system, respiratory system, immune system, integument, eye and ear. Also covers gametogenesis, fertilization, and early development of the vertebrate embryo. Lec/rec.
Prerequisites: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) and (BI 314 [C-] or BI 314H [C-])

ANS 390. GROSS ANATOMY OF DOMESTIC ANIMALS. (4 Credits)
Provides a foundation for advanced courses in the Animal Sciences curriculum. Emphasis on gaining knowledge of mammalian anatomy. Lectures cover anatomical nomenclature, structure, operation, and integration of major organ systems. The dog is used as the general model while comparative domestic animal anatomy is also covered. Lec/lab.
Prerequisites: (BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D])

ANS 401. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 405. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 410. ANIMAL SCIENCE INTERNSHIP. (1-12 Credits)
On- or off-campus, occupational work experience supervised by the department. Graded P/N.
This course is repeatable for 16 credits.
ANS 415. LIVESTOCK JUDGING TEAM. (3 Credits)
Designed to train students for participation in the intercollegiate livestock judging team.
This course is repeatable for 9 credits.

ANS 420. ETHICAL ISSUES IN ANIMAL AGRICULTURE. (3 Credits)
Students are provided with an opportunity to discuss, debate and write extensively about current, relevant, and controversial social issues dealing with modern animal agriculture. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

ANS 430. EQUINE SYSTEMS I: EXERCISE SCIENCE. (4 Credits)
Seniors and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.

ANS 431. EQUINE SYSTEMS II: NUTRITION. (3 Credits)
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.

ANS 432. EQUINE SYSTEMS III: REPRODUCTION. (4 Credits)
Senior and graduate students explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training of laboratory techniques. Lec/lab.
Prerequisites: ANS 220 with D- or better and ANS 316 [D-]

ANS 433. POULTRY MEAT PRODUCTION SYSTEMS. (3 Credits)
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.

ANS 434. EGG PRODUCTION SYSTEMS. (3 Credits)
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.

ANS 435. APPLIED ANIMAL BEHAVIOR. (3 Credits)
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.

ANS 436. SHEEP PRODUCTION SYSTEMS. (3 Credits)
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.

ANS 439. DAIRY PRODUCTION SYSTEMS. (4 Credits)
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.

ANS 440. DAIRY PRODUCTION SYSTEMS. (3 Credits)
Decision case analysis or special topics in application of dairy management principles.
Prerequisites: ANS 439 with D- or better

ANS 441. TOPICS IN ANIMAL LEARNING. (3 Credits)
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).
Prerequisites: BI 211 with D- or better and BI 212 [D-]

ANS 443. BEEF PRODUCTION SYSTEMS: COW/CALF. (4 Credits)
Fundamentals of nutrition, reproductive physiology, health and care, and financial management of beef cow/calf operations in the western U.S. Discussions will focus on critical management stages and practices common to the beef cow/calf production cycle. Taught at EOU La Grande campus only.

ANS 444. BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT. (4 Credits)
A continuation of the study of beef cattle management. Content will encompass the growth and development of weaned calves through slaughter for consumer beef production, with particular focus on the management of growing and yearling cattle in forage-based (stocker cattle) and drylot (feedlot) systems. Taught at EOU La Grande campus only.

ANS 445. BEEF PRODUCTION SYSTEMS. (4 Credits)
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.

ANS 446. GRAZING LIVESTOCK PRODUCTION. (4 Credits)
Equips non-animal science majors with basic ruminant livestock (beef cattle, sheep and meat goat) production knowledge, so they may communicate and collaborate effectively with livestock producers.
Prerequisites: ANS 121 with D- or better

ANS 452. LIVESTOCK HOUSING AND WASTE MANAGEMENT. (3 Credits)
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization.

ANS 456. COMPANION ANIMAL PRODUCTION SYSTEMS. (3 Credits)
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.
Prerequisites: ANS 313 with D- or better and ANS 316 (may be taken concurrently) [D-] and ANS 378 [D-]

ANS 460. SWINE PRODUCTION SYSTEMS. (4 Credits)
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of swine from conception through farrowing, weaning, and the growing/finishing phases. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.

ANS 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

ANS 501. RESEARCH. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.

ANS 503. THESIS. (1-16 Credits)
Graded P/N. This course is repeatable for 999 credits.

ANS 505. READING AND CONFERENCE. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.
ANS 507. GRADUATE SEMINAR. (1 Credit)
Section 1: Seminar/general for all graduate students. Preparation of effective visual aids. Practice explaining the validity or significance of experimental results to an informed audience. Section 2: Seminar/endocrinology, for graduate students interested in physiology.
This course is repeatable for 99 credits.

ANS 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 509. TEACHING PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 511. DIGESTIVE PHYSIOLOGY AND NUTRITION OF RUMINANT ANIMALS. (4 Credits)
Anatomy and physiology of the ruminant digestive tract including rumen microbiology and digestive processes. Nutritional biochemistry and physiology of ruminants. Feed chemistry, feed intake and principles of ration balancing. Theory of energy and protein metabolism.

ANS 512. MONOGASTRIC AND POULTRY NUTRITION. (3 Credits)
Anatomical differences in digestive tracts of monogastrics; nutritional biochemistry of poultry; practical feeding of avian species; least-cost ration techniques; techniques for determining nutrient needs of monogastrics.

ANS 515. REVIEW OF APPLIED RUMINANT NUTRITION RESEARCH TECHNIQUES. (3 Credits)
Review and discussion and applied techniques and methodology used for ruminant nutrition research.

ANS 530. EQUINE SYSTEMS I: EXERCISE SCIENCE. (4 Credits)
Senior and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.

ANS 531. EQUINE SYSTEMS II: NUTRITION. (3 Credits)
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.

ANS 532. EQUINE SYSTEMS III: REPRODUCTION. (4 Credits)
Designed for seniors and graduate students to explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training in laboratory techniques. Lec/lab.

ANS 533. POULTRY MEAT PRODUCTION SYSTEMS. (3 Credits)
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.

ANS 534. EGG PRODUCTION SYSTEMS. (3 Credits)
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.

ANS 535. APPLIED ANIMAL BEHAVIOR. (3 Credits)
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.

ANS 536. SHEEP PRODUCTION SYSTEMS. (3 Credits)
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.

ANS 538. BIOLOGY OF LACTATION. (3 Credits)
Physiological and environmental factors affecting mammary gland development and function. Offered alternate years.

ANS 539. DAIRY PRODUCTION SYSTEMS. (4 Credits)
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.

ANS 540. DAIRY PRODUCTION SYSTEMS. (3 Credits)
Decision case analysis or special topics in application of dairy management principles.

ANS 541. TOPICS IN ANIMAL LEARNING. (3 Credits)
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).

ANS 543. BEEF PRODUCTION SYSTEMS: COW/CALF. (3 Credits)
Fundamentals of nutrition, reproductive physiology and health programs and their applications in the care and management of beef cattle. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only.

ANS 544. BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT. (3 Credits)
Continuation of the study of beef cattle management. Students will practice decision-making processes using area beef cattle operations as case studies. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only.

ANS 545. BEEF PRODUCTION SYSTEMS. (4 Credits)
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.

ANS 552. LIVESTOCK HOUSING AND WASTE MANAGEMENT. (3 Credits)
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization. Offered alternate years.

ANS 556. COMPANION ANIMAL PRODUCTION SYSTEMS. (3 Credits)
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.

ANS 560. LIPID METABOLISM. (3 Credits)
Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism in various tissues and metabolism of eicosanoids. Offered alternate years.

ANS 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ANS 601. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ANS 603. THESIS. (1-16 Credits)
This course is repeatable for 99 credits.

ANS 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
Rangeland Ecology & Management

RNG 121. INTRODUCTION TO WILDLAND ECOLOGY. (4 Credits)
Ecological principles will be applied to understand contemporary issues related to rangelands, specifically the rangeland biome that comprises over 50% of the Earth’s surface (FAO, SRM, USDA ERS). Topics to be covered fall into the following categories: Fundamentals of Ecology; Animals (wildlife & livestock); Disturbance (e.g., invasive species, fire, mineral extraction, etc.); Ecosystem Goods & Services (e.g., carbon sequestration, watersheds, biodiversity, recreation, etc.). The course will largely focus on U.S. rangelands, however a portion will examine the ecology and issues of international rangelands in Africa, Eurasia, Australia, and South America. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

RNG 299. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: RNG 299H
This course is repeatable for 16 credits.

RNG 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: RNG 299
This course is repeatable for 16 credits.

RNG 341. RANGELAND ECOLOGY AND MANAGEMENT. (3 Credits)
Nature and management of rangelands. Integrated land use with emphasis on plant-animal-soil interactions.

RNG 351. RANGE ECOLOGY I-GRASSLANDS. (3 Credits)
Principles and terminology of grassland ecology. Addresses the spatial-temporal dynamics of structure, function, and process in North American grassland ecosystems. Water, nutrient cycles and energy pathways are explored in context of the variable driving forces of climate (drought), herbivory, and fire.

RNG 352. RANGE ECOLOGY II-SHRUBLANDS. (3 Credits)
Introduces the ecology of shrublands using an autecological approach. Explores the effects of stressors such as temperature, drought, fire, and herbivory on plant morphology, physiology, reproduction, and growth. Covers life histories of common shrubs and descriptions of shrubland communities used to promote understanding of autecological principles.

RNG 353. WILDLAND PLANT IDENTIFICATION. (4 Credits)
Students will learn how to identify approximately 100 plant species found in wildlands of North America and Mexico. Individual plant species ecology, basic plant anatomy and identification characteristics observable only through a microscope or dissecting scope, and how to use a dichotomous key for plant ID will also be covered.

RNG 355. DESERT WATERSHED MANAGEMENT. (4 Credits)
A systems-based understanding of hydrologic processes in arid and semiarid landscapes. The class is focused on gaining knowledge of multiple ecological and hydrological interactions occurring in dryland watersheds and on discussing practical methodology aimed to enhance site productivity and ecosystem resilience. Emphasis is placed on land use effects on watershed function; monitoring of soil, water, and vegetation variables; and methods of rehabilitation of degraded landscapes. The course has a strong experiential learning component through a series of ‘hands-on’ practicums and a field trip to a semiarid location in eastern Oregon. Lec/lab.

RNG 399. SPECIAL TOPICS. (1-16 Credits)
May be repeated for a total of 16 credits.
This course is repeatable for 16 credits.

RNG 403. SENIOR THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 411. ADVANCED PLANT ID. (2 Credits)
Advanced rangeland plant taxonomy.
This course is repeatable for 16 credits.

RNG 421. WILDLAND RESTORATION AND ECOLOGY. (4 Credits)
Emphasis is placed on understanding the ecology of arid and semiarid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.

RNG 430. APPLIED GIS IN RANGELAND SCIENCE. (4 Credits)
Introducing the use of GIS and geospatial information (remote sensing for GIS, GPS, landscape ecology, and cartography principles) in rangeland sciences problem solving and analysis.
Prerequisites: GEO 365 with D- or better or GEOG 360 with D- or better

RNG 441. RANGELAND ANALYSIS. (4 Credits)
Techniques used to describe vegetation in shrublands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods.

RNG 442. RANGELAND-ANIMAL RELATIONS. (4 Credits)
Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiology, and their effects on management of rangeland-animal resources.
RNG 455. RIPARIAN ECODYROLOGY AND MANAGEMENT. (4 Credits)
A systems approach to study ecological and hydrological relationships occurring in riparian ecosystems. The class is focused on gaining knowledge of multiple connections between soil, water, and terrestrial vegetation occurring in riparian systems. Emphasis is placed on land use effects on the riparian ecologic and hydrologic function, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e., fish, wildlife, livestock, aesthetics, recreation, and silviculture).
Prerequisites: RNG 355 with D- or better

RNG 470. PASTORAL SYSTEMS OF THE WORLD. (4 Credits)
Description and evaluation of ecosystems which support grazing animals and pastoralists. Biology, ecology and management of these landscapes will be explored through climate, soils, and plant communities and human-livestock interactions. The historic role of trade and contemporary challenges to the ecological, social and economic sustainability of pastoral systems will be examined.

RNG 490. RANGELAND MANAGEMENT PLANNING. (4 Credits)
Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints necessary for decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.

RNG 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 503. MASTERS THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

RNG 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 507. SEMINAR. (1-2 Credits)
This course is repeatable for 16 credits.

RNG 521. WILDLAND RESTORATION AND ECOLOGY. (4 Credits)
Emphasis is placed on understanding the ecology of arid and semi-arid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.

RNG 541. RANGELAND ANALYSIS. (4 Credits)
Techniques used to describe vegetation in shrub-lands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods.

RNG 542. RANGELAND-ANIMAL RELATIONS. (4 Credits)
Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiology, and their effects on management of rangeland-animal resources.

RNG 555. RIPARIAN ECODYROLOGY AND MANAGEMENT. (4 Credits)
A systems approach to study ecological and hydrological relationships occurring in riparian ecosystems. The class is focused on gaining knowledge of multiple connections between soil, water, and terrestrial vegetation occurring in riparian systems. Emphasis is placed on land use effects on the riparian ecologic and hydrologic function, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e., fish, wildlife, livestock, aesthetics, recreation, and silviculture).

RNG 577. AGROFORESTRY. (3 Credits)
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSTLISTED as FES 477/ FES 577, NR 477.
Equivalent to: FES 577

RNG 590. RANGELAND MANAGEMENT PLANNING. (4 Credits)
Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints necessary for decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.

RNG 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 603. PH.D. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

RNG 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 607. SEMINAR. (1-2 Credits)
This course is repeatable for 16 credits.

RNG 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

RNG 643. WILDLAND PLANT ECOPHYSIOLOGY. (4 Credits)
Emphasizes the physiological ecology of plants living in arid and semi-arid ecosystems. Primary class emphasis will include photosynthesis, respiration, water stress and water use efficiency, stable isotopes, root structure and function, nutrient uptake and stress, and defoliation. Offered every other winter; odd years.

RNG 662. RANGELAND ECOLOGY. (3 Credits)
Studies ecological theory and related resource management implications in rangelands and arid wildlands. Topics include the history and development of rangeland ecology, plant demography, invasive species, plant population dynamics, disturbance theory, succession, vegetation classification and range condition assessments. Offered every other winter, even years.

RNG 670. ECOLOGICAL INVASIVE PLANT MANAGEMENT. (2 Credits)
RNG 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Animal Science Graduate Major (MS, PhD, MAIS)

Graduate Areas of Concentration
Animal nutrition, dairy production (MS only), embryo physiology, endocrinology, growth and development, livestock management (MS only), nutritional biochemistry, reproductive physiology

The Department of Animal and Rangeland Sciences offers graduate work leading to Master of Science and Doctor of Philosophy degrees in Animal Science with concentrations listed above.

Major Code: 1250

Animal Science Graduate Minor

Note: These courses should be taken in consultation with an academic advisor in the Department of Animal and Rangeland Sciences.

Minor Code: 125

Animal Sciences Undergraduate Major (BS, HBS)

Programs in animal sciences provide up-to-date information on methods of rearing livestock and poultry, that produce meat, milk, eggs, wool, and other animal products. In addition, the department addresses the care of animals that enhance human well-being through companionship, recreation, and human aid such as horses and companion animals. Essential to this information is knowledge generated from the fields of animal behavior/bioethics, genetics, nutrition, and physiology. The various teaching and research programs explore modern areas of animal biotechnology and data processing and how they apply to present day livestock and poultry production. Study in these areas provides the core around which various curricula leading to the BS degree in Animal Sciences can be developed. To allow students flexibility in course arrangement, three specialized program options are offered.

Increasing demands for livestock and poultry products by a rapidly expanding human population mean potential employment for well-trained individuals in such areas as farm, ranch, feedlot operation; meat, poultry, egg and milk processing, meat grading with the USDA; Federal Cooperative Extension Service, county and 4-H work; sales or technical employment with commercial feed, seed, and chemical companies and pharmaceutical houses; agricultural loan officer; government agency positions at local, state and federal levels; the Peace Corps; animal welfare auditing; as well as in journalism, mass media, and public policy. The expanding support structure for companion animals has created a growing job market for graduates in areas such as animal behavior consultant; veterinary technician (animal nurse); and business management. In addition, students become prepared to go on to advanced studies in animal sciences, veterinary medicine, and education.

Graduate students may pursue research projects through the Agricultural Experiment Station as part of their programs for MS or PhD degrees. Graduate areas of concentration are offered in animal nutrition, dairy production, embryo physiology, endocrinology, ethology, growth and development, livestock management, muscle biology and meat science, nutritional biochemistry, reproductive physiology.

Cooperative Programs
Students transferring after one or two years at a community college should also be able to complete the requirements for a BS after three or two years, respectively.

Rangeland Resource Management
Rangeland resource management is one of the family of natural resources professions important to the social, economic, and political development of Oregon, the nation, and the world. It is based upon ecological principles and is concerned with the restoration, improvement, conservation, and use of rangelands. Since range management is practiced on lands producing domestic and wild animals, timber, water, and recreation, concepts of integrated land use are included in the curriculum. A balance of soil, domestic animal, wildlife, ecology, and other biological sciences is realized in the educational program.

The curriculum below includes university and departmental requirements for the BS degree and provides emphasis either in science, management, ecology, or allied disciplines. The BS degree is also offered on the campus of Eastern Oregon University at La Grande through an extension of the OSU Department of Animal and Rangeland Sciences. Facilities for study include classroom and field-oriented educational environments both on-campus and at locations throughout Oregon. Field trips are taken in conjunction with specific courses.

Graduate work leading to MAIS, MS, or PhD degrees may involve research on domestic or wild animals, rangeland nutrition, community ecology, physiology of rangeland plants, rangeland improvement, rangeland watershed, and riparian zone management, rangeland restoration, utilization and management, agroforestry and landscape ecology.

Summer employment with private industry, government agencies, and on range research projects makes possible learning experiences while earning a salary. Employment opportunities include resource management, research, Extension, ranch management, college and university teaching, business and industrial activities related to rangeland resources, and foreign agricultural and resource development assistance.

The Department of Animal and Rangeland Sciences is accredited by the Society for Range Management. It is recognized throughout the country as one of the leading institutions of rangeland management.

* Taken either Fall, Winter, or Spring term of the senior year.
Winter

Agriculture Courses: 3
Bacc Core Course-Synthesis Area: 3
Electives: 3-6
Hours: 9-12

Spring

ANS 316: REPRODUCTIVE IN DOMESTIC ANIMALS: 4
ANS 317: REPRODUCTION IN DOMESTIC ANIMALS: 1

Agriculture Courses: 3-6
Electives: 3-6
Hours: 11-17
Total Hours: 168-187

Students need a total of 180 credits (60 must be upper division (300–400 level) to graduate from Oregon State University.

** Bacc Core = Western Culture, Cultural Diversity, Literature & Arts, Social Processes and Institutions, or Difference Power and Discrimination.

Animal Behavior Option

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 102)

The Animal Behavior option will provide students with skills necessary to enter professions or graduate studies related to animal behavior and welfare, service and therapy with animals, or other animal care or industry positions that include a behavior management component. Courses chosen are consistent with accepted curriculum for animal behaviorists and provide a solid foundation to those working towards related certifications.

Animal BioHealth/Pre-Professional Option

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 102)

The Animal BioSciences/Pre-Professional option prepares students for professional careers in veterinary medicine, and animal science teaching and research. Extensive training is provided in the biological and physical sciences, offering an excellent foundation for graduate study.

Requirements include the core curriculum and additional credits as required by the College of Veterinary Medicine. The Animal BioSciences/Pre-Professional option is designed for students interested in fulfilling requirements for admission to the OSU College of Veterinary Medicine. It allows students who are admitted to the college, upon completion of three years of undergraduate study, to apply credit earned during the first year of professional study toward the BS degree in Animal Sciences.

Students choosing not to attend veterinary school after the third year of this program may complete additional requirements to qualify for the BS degree in Animal Sciences.

Select credits from below: 6-7

These courses may be counted in the Upper-Division Animal Sciences courses above.

- ANS 380: PRINCIPLES OF ANIMAL ANATOMY AND PHYSIOLOGY
- ANS 385: FOUNDATIONS OF MAMMALIAN HISTOLOGY
Animal Production Option

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 102)

The Animal Production option will allow students to select a species or production industry that interests them most. This option is for students that want to specialize in breeding, feeding, care, and welfare of animals. Animal production, nutrition, and management classes combined with business and/or applied economics courses provide a solid basis for a career in industry-level positions that pertain to animal management and production.

At least 15 credits in the option must be upper division.

Code  Title  Hours
Required
ANS 231  LIVESTOCK EVALUATION  3
ANS 251  PRINCIPLES OF ANIMAL FOODS TECHNOLOGY  3

Animal Industry
Select one of the following:
ANS 215  BEEF/DAIRY INDUSTRIES  3
ANS 216  SMALL RUMINANT/SWINE INDUSTRIES
ANS 217  POULTRY INDUSTRIES

Animal Learning
Select two of the following:
ANS 341  ANIMAL BEHAVIOR AND COGNITION  6-7
ANS 435  APPLIED ANIMAL BEHAVIOR
ANS 441  TOPICS IN ANIMAL LEARNING
RNG 442  RANGELAND-ANIMAL RELATIONS

Animal Production
Select one of the following:
ANS 433  POULTRY MEAT PRODUCTION SYSTEMS  3-4
ANS 434  EGG PRODUCTION SYSTEMS
ANS 436  SHEEP PRODUCTION SYSTEMS
ANS 439  DAIRY PRODUCTION SYSTEMS
ANS 445  BEEF PRODUCTION SYSTEMS
ANS 460  SWINE PRODUCTION SYSTEMS

Business
Select one of the following:
BA 215  FUNDAMENTALS OF ACCOUNTING  4
BA 230  BUSINESS LAW I
BA 260  INTRODUCTION TO ENTREPRENEURSHIP
Any AEC course applicable to production animal systems

Diet/Nutrition Source
Select one of the following:
CROP 300/ HORT 300  AGROECOSYSTEMS  3-4
CROP 310  FORAGE PRODUCTION
RNG 341  RANGELAND ECOLOGY AND MANAGEMENT

Electives
Select one of the following:
Any upper-division ANS credit not taken above related to production animals
Any FST courses  1
RNG 442  RANGELAND-ANIMAL RELATIONS
RNG 470  PASTORAL SYSTEMS OF THE WORLD
RNG 490  RANGELAND MANAGEMENT PLANNING

Total Hours  28-32

1  FST 212 DAIRY PROCESSING and FST 213 DAIRY PROCESSING LABORATORY for dairy interest

Equine Option

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 102)

The two areas of emphasis within the Equine option are designed to give students direction in regard to their future career and endeavors.

The Management or General Emphasis is designed to prepare those students wanting to not only own horses, but to manage equine facilities, event centers, or to go into areas such as nutrition, pharmaceuticals sales or marketing and promotion.

The Human or Animal Therapy Emphasis is designed to prepare students to go into the area of animal-assisted therapy. Using horses as therapy animals is becoming widely accepted and utilized. For this emphasis, the student not only needs to understand the horse itself but human nature as well.

27 credits with a minimum of 15 credits upper division are required.

Code  Title  Hours
Required
ANS 220  INTRODUCTORY HORSE SCIENCE  3
ANS 333  EQUINE STABLE MANAGEMENT  3
ANS 335  EQUINE HEALTH AND DISEASE  3

Select one of the following:
ANS 341  ANIMAL BEHAVIOR AND COGNITION  3
ANS 435  APPLIED ANIMAL BEHAVIOR
ANS 441  TOPICS IN ANIMAL LEARNING

Group A: Management or General Emphasis
ANS 223  EQUINE MARKETING
ANS 401  RESEARCH
ANS 410  ANIMAL SCIENCE INTERNSHIP  1
BA 215  FUNDAMENTALS OF ACCOUNTING
BA 230  BUSINESS LAW I

Select two of the following (you may take all):
ANS 430  EQUINE SYSTEMS I: EXERCISE SCIENCE  6-7
ANS 431  EQUINE SYSTEMS II: NUTRITION
ANS 432  EQUINE SYSTEMS III: REPRODUCTION

Select a minimum of 9 credits from one of the following groups:
Group A: Management or General Emphasis
ANS 223  EQUINE MARKETING
ANS 401  RESEARCH
ANS 410  ANIMAL SCIENCE INTERNSHIP  1
BA 215  FUNDAMENTALS OF ACCOUNTING
BA 230  BUSINESS LAW I
Option Code: 693

**Rangeland Science Option**

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 102)

Rangeland science is about the study and sustainable management of landscapes across a variety of biomes from the very arid such as deserts to the moderately mesic such as grasslands. Students working in rangeland ecosystems will gain knowledge and skills to bolster their career success.

**Note:** Completion of the Rangeland Ecology and Management minor alone does not qualify students for rangeland conservationist positions with the U.S. Office of Personnel Management (OPM).

28 credits are required for the option; 15 of which must be at the upper-division level.

Total Hours: 27-28

1. Internships must be related to the field of equine management or science
2. *Baccalaureate Core Course
3. *Writing Intensive Course (WIC)

**Option Code: 712**

**Rangeland Ecology and Management Graduate Major (MS, PhD, MAIS)**

**Graduate Areas of Concentration**

Agroforestry, ecology of rangelands, physiology of range plants, range improvement, range nutrition, restoration ecology, riparian zone management, watershed management

The Department of Animal and Rangeland Sciences offers Master of Science and Doctor of Philosophy degrees.

The program integrates plant, soil, and animal sciences to prepare degree candidates for leadership in this professional field. Under the guidance of the rangeland faculty, graduate students study rangeland ecology, physiology of rangeland plants, rangeland nutrition, rangeland improvements, watershed management, restoration ecology, agroforestry, water quality, and riparian zone management. Through the Department of Animal and Rangeland Sciences, range management graduate students have access to greenhouse, field plot, pasture, range, and animal facilities on campus, and at the two Eastern Oregon Agricultural Research Center stations at Union and Burns.

Graduate students in rangeland ecology and management may select courses in complementary areas, including agricultural and resource economics, fisheries and wildlife, botany, soils, statistics, biology forestry, crop science, and animal science. The selection of these complementary areas depends on the interest of the students, their aptitude, and the thesis topic they have chosen. Minors are commonly elected in botany, soils, forage crops, animal nutrition, fisheries and wildlife, agricultural and resource economics, or in an integrated program of study.

**Major Code: 6220**

**Rangeland Ecology and Management Graduate Minor**

**Minor Code: 6220**

**Rangeland Ecology and Management Minor**
RNG 352  RANGECOLOGY II-SHRUBLANDS 3
RNG 421  WILDLAND RESTORATION AND ECOLOGY 4
RNG 442  RANGELAND-ANIMAL RELATIONS 4
RNG 490  RANGELAND MANAGEMENT PLANNING 4

Select 7 additional credits of the following: 7
- Any other RNG course
- ANS 436  SHEEP PRODUCTION SYSTEMS
- ANS 443  BEEF PRODUCTION SYSTEMS: COW/CALF
- BOT 341  PLANT ECOLOGY

Total Hours 28

Note: Completion of the Rangeland Ecology and Management minor alone does not qualify students for rangeland conservationist positions with the U.S. Office of Personnel Management (OPM).

Rangeland Sciences Undergraduate Major (BS, HBS)

Also available at Eastern Oregon University and via Ecampus.

Departmental requirements may be utilized to satisfy baccalaureate core and non-departmental minor requirements.

Pastoral Systems of the World Option

This option is offered within the following major(s):

Rangeland biomes (grasslands, shrublands, deserts and woodland savannas) comprise approximately 50% of the terrestrial surface of the earth. Pastoral cultures and livelihoods remain dominant on rangelands. This option will provide students with an opportunity to not only learn about pastoral systems worldwide, but also social, cultural, economic and political factors of regions worldwide that influence pastoral livelihoods. Students in this option are strongly encouraged to study abroad.

**Student Learning Outcomes**

- Compare and contrast pastoral systems worldwide; and to US ranching systems
- Identify social, cultural, economic, and political factors that affect the success of people living on rangeland landscapes worldwide
- Outline driving components of regional pastoral sustainability efforts to balance ecology and livelihoods
- Design a sustainable grazing management plan for a chosen pastoral system that reflects local social, cultural, economic and political factors.

**Possible Career Paths**

Graduates in this option will be positioned to pursue career paths with international NGOs, the US Foreign Service, United Nations programs, or bring an international pastoral systems perspective to managing livestock grazing in the US.

**International Systems**

Select 6 credits from the following: 6

- AEC 243 | *GLOBAL POVERTY AND SUSTAINABLE DEVELOPMENT |
- ANTH 482 | *ANTHROPOLOGY OF INTERNATIONAL DEVELOPMENT |
- FCSJ 454 | *INTERNATIONAL PERSPECTIVES ON FOOD SYSTEMS |
- GEOG 105 | *GEOGRAPHY OF THE NON-WESTERN WORLD |
- GEOG 203 | *HUMAN ENVIRONMENT GEOGRAPHY |
- GEOG 330 | **GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION |
- GEOG 331 | *POPULATION, CONSUMPTION, AND ENVIRONMENT |
- GEOG 430 | RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT |
- GEOG 432 | *GEOGRAPHY OF FOOD AND AGRICULTURE |
- GEOG 441 | INTERNATIONAL WATER RESOURCES MANAGEMENT |
- PS 345 | *POLITICS OF DEVELOPING NATIONS |
- PS 458 | *INTERNATIONAL POLITICAL ECONOMY |

**Natural Resource Management**

Select 6 credits from the following: 6

- COMM 446 | *COMMUNICATION IN INTERNATIONAL CONFLICT AND DISPUTES |
- FES 355 | MANAGEMENT FOR MULTIPLE RESOURCE VALUES |
Sustainable Livestock Ranching Option

This option is offered within the following major(s):

- Rangeland Sciences (p. 108) - College of (p. 108) Agricultural Sciences (p. 108)

This option will equip students with the knowledge and skills to manage ranching operations that balance delivery of ecosystem goods and services as well as meet ranch enterprise production goals.

**Student Learning Outcomes**

- Evaluate and address ecological disturbance impacts of ranch management.
- Create and trouble-shoot sustainable grazing management plans.
- Design a ranch management plan that balances the delivery of ecosystem goods and services with production goals.

### Code | Title | Hours
--- | --- | ---
**Required Courses**
ANS 313 | APPLIED ANIMAL NUTRITION: FEEDS AND RATION FORMULATION | 4
ANS 446 | GRAZING LIVESTOCK PRODUCTION | 4
FW 462 | ECOSYSTEM SERVICES | 3
RNG 442 | RANGELAND-ANIMAL RELATIONS | 4
**Livestock Management**
ANS 121 | *INTRODUCTION TO ANIMAL SCIENCES | 3
ANS 215 | BEEF/DAIRY INDUSTRIES | 3
ANS 216 | SMALL RUMINANT/SWINE INDUSTRIES | 3
ANS 316 | REPRODUCTION IN DOMESTIC ANIMALS | 3
ANS 317 | REPRODUCTION IN DOMESTIC ANIMALS LABORATORY | 3
ANS 378 | ANIMAL GENETICS | 3
ANS 380 | PRINCIPLES OF ANIMAL ANATOMY AND PHYSIOLOGY | 3
ANS 436 | SHEEP PRODUCTION SYSTEMS | 3
ANS 445 | BEEF PRODUCTION SYSTEMS | 3
RNG 457 | (WILDLIFE HABITAT ANALYSIS 1) | 3
RNG 499 | SPECIAL TOPICS | 3
**General Agriculture**
CROP 310 | FORAGE PRODUCTION | 3
AG 312 | ENGINE THEORY AND OPERATION | 3
AG 391 | FARM IMPLEMENTS | 3
AG 412 | AG SAFETY AND HEALTH | 3
**Business Management**
AEC 211 | AGRICULTURAL AND FOOD MANAGEMENT | 6

Total Hours: 27

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Option Code: 852

### Rangeland Science Minor

Rangeland science is about the study and sustainable management of landscapes across a variety of biomes from the very arid such as deserts to the moderately mesic such as grasslands. Students working in rangeland ecosystems will gain knowledge and skills to bolster their career success.

**Note:** Completion of the Rangeland Ecology and Management minor alone does not qualify students for rangeland conservationist positions with the U.S. Office of Personnel Management (OPM).

**Code | Title | Hours**
--- | --- | ---
RNG 341 | RANGELAND ECOLOGY AND MANAGEMENT | 3
RNG 351 | RANGE ECOLOGY I-GRASSLANDS | 3
or RNG 352 | RANGE ECOLOGY II-SHRUBLANDS | 3
RNG 355 | DESERT WATERSHED MANAGEMENT | 4
RNG 421 | WILDLAND RESTORATION AND ECOLOGY | 4
RNG 441 | RANGELAND ANALYSIS | 4
RNG 490 | RANGELAND MANAGEMENT PLANNING | 4
Select one of the following focus areas: 7-8
**Sustainable Ranching**
ANS 446 | GRAZING LIVESTOCK PRODUCTION | 3
RNG 442 | RANGELAND-ANIMAL RELATIONS | 3
**Pastoral Systems**
ANS 446 | GRAZING LIVESTOCK PRODUCTION | 3
RNG 470 | PASTORAL SYSTEMS OF THE WORLD | 3
**Wildlife Habitat Management**
FW 251 | PRINCIPLES OF FISH AND WILDLIFE CONSERVATION | 3
RNG 456 | (Pending approval) | 3
**Sustainable Rangeland Ecosystem Stewardship**
Any other RNG course or any courses listed under the Sustainable Rangeland Ecosystem Stewardship section of the major program for a total of at least 7 credits.

Total Hours: 29-30

Minor Code: 794

### Applied Economics

The Department of Applied Economics offers the Bachelor of Science degree in Agricultural Business Management and the Bachelor of Science degree in Environmental Economics and Policy. These degrees open doors to exciting careers in the traditional areas of commercial
agriculture, agricultural business management, and agricultural policy, and in the newer career areas of natural resource and environmental management, marine resources, international trade and development, rural growth and change, and environmental and resource law.

The Agricultural Business Management (ABM) major prepares students for unique challenges and opportunities in agricultural business careers. It combines economic and business principles and their application to farms and ranches, companies processing and marketing farm products, and companies supplying goods and services to farmers and other businesses. The curriculum combines skills in marketing, business management, accounting, and economic analysis with a minor appropriate to a student’s professional goals and interests.

Career Opportunities for Undergraduates
Graduates may pursue a number of attractive career opportunities. Agricultural Business Management (ABM) majors may move directly into professional jobs with agribusiness firms, financial and insurance institutions, or manage their own agribusinesses. Opportunities also exist for ABM majors to pursue graduate studies in food and agricultural management, agricultural cooperatives, and sustainable development. Environmental Economics and Policy (EEP) students can serve effectively as members of interdisciplinary teams involved in resource and environmental management, planning, and policy analysis. Government job opportunities include management, planning, and analysis positions with federal, state, and local government agencies. Private company opportunities include similar positions with utility companies, banks, consulting firms, and resource management companies. The EEP degree also provides an excellent foundation for graduate work in economics, as well as law, public policy, and urban planning.

Applied Economics Graduate Program
The Applied Economics Graduate Program offers the MA, MS, and PhD degrees in Applied Economics. Graduates pursue academic, analytical, and policy careers in universities, consulting, trade associations, firms, and government. Core course work consists of microeconomic theory, econometrics, and other quantitative methods. Field (concentration) and elective courses include natural resources and the environment, energy, trade, economic development, marine and coastal resources, transportation, and health care. Program emphasis is on applications to real-world settings, institutions, and problems. Faculty are in the Applied Economics Department; the Colleges of Forestry, Agricultural Sciences, and Liberal Arts; the College of Earth, Ocean, and Atmospheric Sciences; and the School of Public Health and Human Sciences.

Undergraduate Programs
Majors

- Agricultural Business Management (BS, HBS) (p. 117)
- Environmental Economics and Policy (BS, HBS) (p. 120)

Minors

- Agricultural Business Management (p. 117)
- Food Economics and Policy (p. 121)
- Natural Resource and Environmental Law and Policy (p. 121)
- Resource Economics (p. 122) *(Also available via Ecampus.)*

Graduate Programs

Majors

- Applied Economics (MA, MAIS, MS, PhD) (p. 120)

Minors

- Applied Economics (p. 120)
- International Agricultural Development (p. 121)
- Rural Studies (p. 122)

Faculty

Associate Professors Chen, Durham, Langpap, Riggs, Sterns
Assistant Professors Dundas, Kling, Melesse, Streletskaya
Assistant Professors (Sr. Researchers) Bell, Cross, Valdivia
Instructors Brekken, Egelkraut, Fisher, Fleming, Gow, King, Olen, Rahe
Senior Research Assistant Houston
Faculty Research Assistant Olen
Research Associate Brekken
Professional Faculty Radke, Richardson, Sandler
Adjunct Faculty D. Adams, Bernell, Elston, Landkamer, Rosenberg, Talbott
Courtesy Faculty Albers, Barnhart, Doring, McCoy, McGovern, Papenfus, Plantinga, Whittaker
Affiliate Faculty Gwin
Emeritus Faculty R. Adams, Bucciona, Burt, Eleved, Hanna, Johnston, Mc Mullen, Rettig, Sorte, Weber

AEC Graduate Faculty
The Applied Economics Graduate Program currently has 27 faculty members, drawn from three departments and two schools in five colleges.

Applied Economics

AEC 121. DISCOVERING AGRICULTURAL AND RESOURCE ECONOMICS. (1 Credit)
Explore issues, opportunities, and challenges in the dynamic and diverse employment field of agricultural and resource economics.

AEC 199. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for 8 credits.

AEC 211. AGRICULTURAL AND FOOD MANAGEMENT. (4 Credits)
Economic and business principles applied to the management of firms in agricultural and food industries, including farms, ranches and nurseries, agricultural input suppliers, packers, shippers, processors and food manufacturers and distributors; firm-level goal setting, information management and financial analysis.
Prerequisites: AEC 250 with C- or better or AEC 251 with C- or better or AREC 250 with C- or better or ECON 201 with C- or better or ECON 201H with C- or better

AEC 221. AGRICULTURAL AND FOOD MARKETING. (3 Credits)
Organization and functions of agricultural and food markets both domestic and international; market channels and supply chains for various agricultural commodities and food products; role of agribusiness, cooperatives, and government in marketing decisions.
Prerequisites: AEC 250 with D- or better or AEC 251 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better

AEC 240. *RURAL ECONOMICS OF PLACE AND PEOPLE. (3 Credits)
Provides perspective on issues influencing rural communities and economic development in rural America. People, places and natural resources of rural communities play a vital role in economic vitality of the West, yet rural landscapes are changing faster than many urban counterparts. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture

AEC 243. *GLOBAL POVERTY AND SUSTAINABLE DEVELOPMENT. (3 Credits)
Students are introduced to the challenges of eradicating extreme poverty and achieving sustainable economic development in the world. Topics include: the measurement of poverty and inequality; analysis of food security and agricultural development; the role of health and education in economic development; credit markets; risk and insurance; climate change and biodiversity; gender equality; rural-urban and international migration; population growth and development; institutions and economic performance; the political economy of development. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

AEC 250. *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY. (3 Credits)
Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: AEC 250H

AEC 250H. *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY. (3 Credits)
Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: AEC 250

AEC 251. *INTRODUCTION TO AGRICULTURAL AND FOOD ECONOMICS. (3 Credits)
An introductory applied microeconomics course focused on the unique challenges of agricultural and food systems. Topics include rational choice theory, models of supply and demand, and price formation, with particular attention on markets for agricultural and food products. Additional topics include market interdependencies, government policy, the behavior of firms, and market structure within agricultural and food systems. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

AEC 253. *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS. (4 Credits)
A general introduction to federal environmental law and policy in the U.S. Familiarizes students with basic legal institutions and concepts of the American legal system, outlines the transition of environmental policy from its common law roots to its modern administrative law form, and gives an overview of the major federal environmental statutes. Relationships among legal theory and process and economic principles are emphasized. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture

AEC 299. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for 8 credits.

AEC 310. EXPLORING EXPERIENTIAL LEARNING OPPORTUNITIES. (2 Credits)
Provides background and preparation for students’ experiential learning (EL) activities. Students will be shown examples of appropriate EL, how to find and compete for opportunities, and how to establish and define their learning objectives for EL. Resume writing, appropriate conduct in the workplace, as well as writing and oral presentation skills will be covered. A proposal for an EL activity will be prepared and presented to classmates. Graded P/N.

AEC 311. INTERMEDIATE APPLIED ECONOMICS I: PRODUCERS AND CONSUMERS. (4 Credits)
An examination of the theories of consumer behavior and demand, production cost, the firm, supply, and competitive and monopoly market structures.
Prerequisites: (AEC 250 with C- or better or AREC 250 with C- or better or ECON 201 with C- or better or ECON 201H with C- or better) and (MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-])
AEC 313. INTERMEDIATE APPLIED ECONOMICS II: MARKETS, WELFARE & POLICY. (4 Credits)
Complementing the private-decision focus in AEC 311, the present course focuses on the intermediate microeconomic theory of social welfare and public decision-making. Topics include exchange, monopoly, game theory, social welfare, externalities, public goods and choice, asymmetric information, uncertainty, and cost-benefit analysis. Substantial attention will be given to the implications of these theories for real-world problems, especially regarding resource and environmental issues.
Prerequisites: MTH 241 with C- or better or (AEC 311 with C- or better or AREC 311 with D- or better or ECON 311 with C- or better)

AEC 351. *NATURAL RESOURCE ECONOMICS AND POLICY. (3 Credits)
Application of principles of economics to identify the causes, consequences, and ways of dealing with natural resource problems, including problems associated with fisheries, forests, water resources, and land. Conceptual topics and policy applications. Emphasis is on developing students' skill in applying an economic way of thinking about natural resource management. (Bacc Core Course)
Attributes: CSSI – Core, Synth, Global Issues
Prerequisites: (AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better)

AEC 352. *ENVIRONMENTAL ECONOMICS AND POLICY. (3 Credits)
Provides an overview of the interrelationships between economic activity, the environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. CROSSLISTED as ECON 352. (Bacc Core Course)
Attributes: CSSI – Core, Synth, Global Issues
Prerequisites: AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better

AEC 353. *INTRODUCTION TO COASTAL AND MARINE RESOURCE ECONOMICS. (3 Credits)
Introduces tools of economic analysis for understanding coastal and marine resource management. Surveys a selection of current topics in the field, emphasizing innovation in production and stewardship, institutions, and sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisites: MTH 111 with C- or better and (AEC 250 [C] or AREC 250 [C] or ECON 201 [C] or ECON 201H [C])

AEC 372. AGRICULTURAL COOPERATIVES. (3 Credits)
An introduction to and in-depth examination of the agricultural cooperative. Students will gain a working knowledge of the concepts, principles, and terminology of agricultural cooperatives through reference materials, lectures, presentations by guest speakers and a cooperatives tour. Students will consider the strengths and weaknesses of the agricultural cooperative as well as the unique management and operational challenges inherent to this form of business operation.
Prerequisites: AEC 211 with D- or better or AREC 211 with D- or better

AEC 388. AGRICULTURAL LAW. (4 Credits)
Application of legal principles to business decision making in farming, ranching, and the agricultural support industry. Consideration of the obligations arising out of contract, tort, property, water, public land, and natural resource law.

AEC 399. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AEC 399H
This course is repeatable for 8 credits.

AEC 399H. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 399
This course is repeatable for 8 credits.

AEC 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 407. SEMINAR. (1-16 Credits)
Equivalent to: AEC 407H
This course is repeatable for 16 credits.

AEC 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 407
This course is repeatable for 16 credits.

AEC 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 410. INTERNSHIP. (1-6 Credits)
Practical on-the-job training in agricultural business, marketing, commercial agricultural production, or related private or public organizations. Graded P/N.
This course is repeatable for 6 credits.

AEC 421. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET. (4 Credits)
Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas. CROSSLISTED as RS 421.
Equivalent to: RS 421

AEC 432. ENVIRONMENTAL LAW. (4 Credits)
Legal relationships arising out of rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials.

AEC 434. *MEASURING RESOURCE AND ENVIRONMENTAL IMPACTS. (4 Credits)
Examines economic perspectives on the allocation of natural resources and the management of environmental quality, emphasis on the use of economic concepts in the design and evaluation of public policies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: AEC 313 with D- or better or AREC 313 with D- or better
AEC 440. THE ECONOMICS OF BUSINESS ORGANIZATION IN THE FOOD SYSTEM. (4 Credits)
Application of economic analysis to questions related to the choice of an appropriate form of business organization for a wide variety of food system enterprises. Topics include costs of contracting, costs of ownership, enterprise scope and scale, and the dynamics of business ownership and structure. Particular emphasis is given to entrepreneurial enterprises and cooperative businesses in the food system.
Prerequisites: AEC 311 with D- or better or ECON 311 with D- or better

AEC 442. AGRICULTURAL BUSINESS MANAGEMENT. (4 Credits)
Application of economic, financial, and strategic management principles to agricultural business with a focus on a case-study framework for analysis and business decision making for alternative business management strategies.

AEC 444. COMMODITY FUTURES AND OPTIONS MARKETS. (4 Credits)
Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.

AEC 446. INTRODUCTION TO APPLIED ECONOMETRICS. (4 Credits)
Introduces students to applied econometrics: the use of statistical techniques to estimate and test economic relationships. Topics include multiple regression models, multicollinearity, and simultaneous equations. The applications and labs will focus on econometric analysis of real world problems pertaining to issues in environmental, food, and resource economics and policy. Lec/lab.
Prerequisites: AEC 311 with D- or better and ST 351 [D-]

AEC 447. AGRICULTURAL PRICE AND MARKET ANALYSIS. (4 Credits)
Price determination for food and agricultural commodities; development of quantitative economic models that explain and predict prices and other market outcomes. Lec/lab.

AEC 448. ADVANCED TOPICS IN ENVIRONMENTAL AND RESOURCE ECONOMICS. (3 Credits)
Explores advanced applications of environmental and resource economics to selected policy and management concerns in the PNW and globally. Attention will be directed to the methodological underpinnings of environmental and resource policies and instruments using case studies on real world management issues.
Prerequisites: AEC 311 with D- or better and AEC 351 [D-] and AEC 352 [D-]

AEC 452. MARINE ECONOMICS. (3 Credits)
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries.
Prerequisites: AEC 351 with D- or better or AEC 352 with D- or better or AREC 351 with D- or better or AREC 352 with D- or better

AEC 453. CONSERVATION ON PRIVATE LAND. (3 Credits)
Explore and experience the increasingly popular phenomenon of conservation on private land. This exploration includes the explosive growth of land trusts and the use of conservation easements to restrict the use of private land and often promote ecological goals.

AEC 454. RURAL DEVELOPMENT ECONOMICS AND POLICY. (3 Credits)
Learn economic and regional development conceptual frameworks. Explore U.S. rural development and government interventions. Discuss differing popular local strategies for development that emphasize building current assets like local entrepreneurship to attracting resources and incomes from outside the region like amenity migration and tourism.

AEC 460. CAPITAL INVESTMENT ANALYSIS USING AGBIZ LOGIC. (3 Credits)
Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgBiz LogicTM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.

AEC 461. AGRICULTURAL AND FOOD POLICY ISSUES. (4 Credits)
Principles of agricultural and food policy formulation; agricultural adjustment processes; agricultural price and income policies in relation to land use, water, and rural development policies; interrelationships among U.S. and foreign agriculture and trade policies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better and (AEC 300 [D-] or AREC 300 [D-] or AEC 311 [D-] or AREC 311 [D-] or ECON 311 [D-])

AEC 465. AGRICULTURAL AND FOOD FINANCIAL MANAGEMENT. (3 Credits)
Reviews basic financial reporting statements, details accounting and financing practices specific to agricultural and food enterprises, and links these topics to both operational and strategic management decisions for these enterprises.
Prerequisites: (AEC 211 with D- or better or AREC 211 with D- or better) and AEC 311 [D-]

AEC 466. AGRICULTURAL AND FOOD MARKETING MANAGEMENT. (4 Credits)
Principles, trends, issues, barriers, policies, strategies and decisions involved in domestic and international marketing of perishable and storable agricultural commodities and food products from the point of production to the point of consumption. Topics include firm-level marketing concepts, the integration of marketing with firms’ overall strategic management goals, as well as comparative studies across multiple outlets for agricultural and food products, to include local, regional, and global markets.
Prerequisites: AEC 221 with D- or better and (AEC 250 [D-] or AEC 251 [D-] or ECON 201 [D-])

AEC 475. WRITING BUSINESS PLANS: AGRICULTURE/FOOD-RELATED ENTERPRISES. (2 Credits)
Students choose an enterprise and write a comprehensive business plan that describes the business vision, marketing plan, financial projections, risk assessment, and implementation strategy. At the end of term selected students present their plan to a commercial lender.

AEC 499. SPECIAL TOPICS. (1-16 Credits)
Various topics in agricultural and resource economics of special and current interest not covered in other courses. This course is repeatable for 16 credits.

AEC 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.
AEC 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

AEC 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 506. SPECIAL PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 512. MICROECONOMIC THEORY I. (4 Credits)
Fundamental topics in microeconomic theory. Topics include utility maximization and consumer demand, profit maximization and the theory of the firm, and labor and capital markets.

AEC 513. MICROECONOMIC THEORY II. (4 Credits)
Emphasizes principles for microeconomic theory at the master's level. Builds upon the foundations covered in AEC 512, and extends the theory and principles to cover uncertainty, game theory, competitive market equilibrium and welfare analysis, imperfect competition, and market failures. Primary emphasis is on understanding microeconomic theory and the underlying assumptions, and how it is applied to real world settings.
Prerequisites: AEC 512 with C or better

AEC 521. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET. (4 Credits)
Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas. CROSSLISTED as RS 521.
Equivalent to: RS 521

AEC 525. APPLIED ECONOMETRICS. (4 Credits)
General principles of applied econometric research are emphasized, including model building, data analysis, hypothesis testing, and evaluation and interpretation of results. A variety of estimators are applied to real data, including least squares, panel data, simultaneous equations, discrete choice, and limited dependent variable models.

AEC 532. ENVIRONMENTAL LAW. (4 Credits)
Legal relationships arising out of rights to air, water, and rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials.

AEC 534. ENVIRONMENTAL AND RESOURCE ECONOMICS. (3 Credits)
Examines environmental and natural resource issues emphasizing the role of economics in understanding their causes, consequences, and potential solutions (e.g., air, water, fish, forests, climate change, biodiversity). Reviews welfare economics, market failures, externalities, property rights. Covers non-market valuation, innovative market and regulatory policies.

AEC 540. THE ECONOMICS OF BUSINESS ORGANIZATION IN THE FOOD SYSTEM. (4 Credits)
Application of economic analysis to questions related to the choice of an appropriate form of business organization for a wide variety of food system enterprises. Topics include costs of contracting, costs of ownership, enterprise scope and scale, and the dynamics of business ownership and structure. Particular emphasis is given to entrepreneurial enterprises and cooperative businesses in the food system.

AEC 543. INTERNATIONAL TRADE. (4 Credits)
Introduction to the major theories of international trade and to models that are useful for applied policy and regional analysis. Effects of trade and trade policy on consumers, workers, and firms are emphasized.
Prerequisites: AEC 513 with C or better

AEC 544. COMMODITY FUTURES AND OPTIONS MARKETS. (4 Credits)
Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk.
To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.

AEC 546. INTRODUCTION TO APPLIED ECONOMETRICS. (4 Credits)
Introduces students to applied econometrics: the use of statistical techniques to estimate and test economic relationships. Topics include multiple regression models, multicollinearity, and simultaneous equations. The applications and labs will focus on econometric analysis of real world problems pertaining to issues in environmental, food, and resource economics and policy. Lec/lab.

AEC 548. ADVANCED TOPICS IN ENVIRONMENTAL AND RESOURCE ECONOMICS. (3 Credits)
Explores advanced applications of environmental and resource economics to selected policy and management concerns in the PNW and globally. Attention will be directed to the methodological underpinnings of environmental and resource policies and instruments using case studies on real world management issues.

AEC 550. ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (4 Credits)
Presents concepts, theories, and methods used in the economic analysis of environmental and natural resource issues. The emphasis is on the economics of environmental policies and the development of decision rules regarding the efficient use of natural resources.
Prerequisites: AEC 512 with C or better

AEC 551. APPLICATIONS OF ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (4 Credits)
Applies and expands upon concepts, theories, and methods in environmental and natural resource economics introduced in AEC 550. Topics include non-market valuation, discounting, and benefit-cost analysis, as well as the role and importance of institutions, appropriate research methods, and the philosophical basis for normative judgments in economics.
Prerequisites: AEC 550 with C or better or AREC 550 with C or better

AEC 552. MARINE ECONOMICS. (3 Credits)
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. CROSSLISTED as MRM 552.
Equivalent to: MRM 552

AEC 553. CONSERVATION ON PRIVATE LAND. (3 Credits)
Explore and experience the increasingly popular phenomenon of conservation on private land. This exploration includes the explosive growth of land trusts and the use of conservation easements to restrict the use of private land and often promote ecological goals.
AEC 554. RURAL DEVELOPMENT ECONOMICS AND POLICY. (3 Credits)
Learn economic and regional development conceptual frameworks. Explore U.S. rural development and government interventions. Discuss differing popular local strategies for development that emphasize building current assets like local entrepreneurship to attracting resources and incomes from outside the region like amenity migration and tourism.

AEC 560. CAPITAL INVESTMENT ANALYSIS USING AGBIZ LOGIC. (3 Credits)
Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgBiz LogicTM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agriculturists.

AEC 565. AGRICULTURAL AND FOOD FINANCIAL MANAGEMENT. (3 Credits)
Reviews basic financial reporting statements, details accounting and financing practices specific to agricultural and food enterprises, and links these topics to both operational and strategic management decisions for these enterprises.

AEC 566. AGRICULTURAL AND FOOD MARKETING MANAGEMENT. (4 Credits)
Principles, trends, issues, barriers, policies, strategies and decisions involved in domestic and international marketing of perishable and storable agricultural commodities and food products from the point of production to the point of consumption. Topics include firm-level marketing concepts, the integration of marketing with firms' overall strategic management goals, as well as comparative studies across multiple outlets for agricultural and food products, to include local, regional, and global markets.

AEC 599. SPECIAL TOPICS. (0-16 Credits)
Various topics in applied economics of special and current not covered in other courses. May be repeated for credit when topics differ. This course is repeatable for 16 credits.

AEC 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

AEC 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 606. SPECIAL PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AEC 611. ADVANCED MICROECONOMIC THEORY I. (4 Credits)
A rigorous development of the theory of consumption and production, with emphasis on duality.
Prerequisites: AEC 512 with C or better and AEC 513 [C]

AEC 612. ADVANCED MICROECONOMIC THEORY II. (4 Credits)
A rigorous extension of the theory of the consumer and firm to aggregate and heterogeneous populations, decision making under uncertainty, and related game theory concepts.
Prerequisites: AEC 611 with C or better

AEC 613. ADVANCED MICROECONOMIC THEORY III. (4 Credits)
A rigorous development of the theory of competitive equilibrium, market power, public goods, and information.
Prerequisites: AEC 612 with C or better

AEC 625. ADVANCED ECONOMETRICS I. (4 Credits)
Emphasizes the basic theory underlying the main types of estimators used in econometrics, as well as their application in empirical research. Includes derivation, properties, and application of method of moments, maximum likelihood, ordinary and generalized least squares, and instrumental variables estimators, statistical inference and hypothesis testing, and model building and specification analysis. Provides the necessary foundation for estimation techniques covered in AEC 626. Lec/lab.
Prerequisites: AEC 525 with C or better

AEC 626. ADVANCED ECONOMETRICS II. (4 Credits)
Extensions to the generalized linear regression model are considered: discrete choice, limited dependent variable, panel data, and simultaneous equations models, and new solutions to identification problems. Strong applied orientation, emphasizing problems of data measurement, model selection and specification.
Prerequisites: AEC 625 with C or better

AEC 627. COMPUTATIONAL ECONOMICS. (4 Credits)
Covers the numerical analysis of static optimization models and stochastic dynamic models in resource and development economics, emphasizing formulation, solution, and simulation of dynamic optimization, rational expectations, and arbitrage pricing models. Lec/lab.

AEC 640. SUSTAINABLE DEVELOPMENT. (3 Credits)
Surveys research on the quantitative economic analysis of sustainable development, with an emphasis on integrated assessment methods and models and their application to agriculture and rural development policy, agricultural technology impact assessment, and climate change impact assessment.

AEC 643. ADVANCED TOPICS IN DEVELOPMENT ECONOMICS. (3 Credits)
Introduces students to key issues in the economics of development and equips them with the theoretical and empirical tools required to conduct advanced research in these topics.
Prerequisites: AEC 613 with C or better and AEC 626 [C]

AEC 651. ADVANCED NATURAL RESOURCE ECONOMICS. (3 Credits)
Dynamic allocation of scarce exhaustible and renewable natural resources, social versus private decisions; market and non-market considerations; technological change; regulation; dynamics and uncertainty.

AEC 652. ADVANCED ENVIRONMENTAL ECONOMICS. (3 Credits)
Interrelationships of natural resource use and the environment; applied welfare and benefit-cost analysis; externalities and pollution abatement; non-market valuation of resources; property rights, legal and social constraints; policy approaches.
Prerequisites: (AEC 513 with C or better or AREC 513 with C or better) and (AEC 525 [C] or AREC 525 [C])

AEC 653. EMPIRICAL ENVIRONMENTAL AND RESOURCE ECONOMICS. (3 Credits)
Introduces empirical methods at the current frontiers of research in environmental and resource economics. General topics may include the identification of non-market values, revealed and stated preference methods, environmental policy evaluation, equilibrium sorting models, and climate econometrics.
Prerequisites: AEC 513 with C or better and AEC 525 [C]
AEC 699. SPECIAL TOPICS. (1-16 Credits)
Various topics in applied economics of special and current interest not covered in other courses.
This course is repeatable for 16 credits.

Rural Studies
RS 421. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET. (4 Credits)
Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas. CROSSLISTED as AEC 421.
Equivalent to: AEC 421

RS 499. SPECIAL TOPICS. (1-5 Credits)
This course is repeatable for 9 credits.

RS 502. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 9 credits.

RS 512. INTRODUCTION TO RURAL STUDIES. (2 Credits)
Introduces students to the emerging theoretical perspectives, methodologies, and critical themes that define rural studies in the U.S. and elsewhere. It draws primarily from the disciplines of sociology, economics, anthropology, human development and geography, examining how each discipline understands and analyzes rural households and communities.

RS 513. CONTEMPORARY RURAL ISSUES. (2 Credits)
The focus will be on issues confronting rural Oregon. The class will also explore broader U.S. and international rural issues and examine commonalities and differences across cultures and development contexts. Weekly lecturers are drawn from the OSU community and beyond, including public policy makers, rural stakeholders, and nonprofit organizations.

RS 521. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET. (4 Credits)
Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas. CROSSLISTED as AEC 521.
Equivalent to: AEC 521

RS 599. SPECIAL TOPICS. (1-5 Credits)
This course is repeatable for 9 credits.

Agricultural Business Management Minor
Also available via Ecampus.

The Agricultural Business Management minor offers students an opportunity to expand their skill sets and business acumen as they prepare for careers in production agricultural and related industries. This minor emphasizes the development of general skills in business administration and economic analysis relevant to the operations of farms, ranches, nurseries and the businesses that provide inputs, services and market outlets for them. The Agricultural Business Management minor is available to students who are not pursuing the ABM major. Business Administration majors planning to minor in Agricultural Business Management must see both a College of Business advisor and a Department of Applied Economics advisor to discuss certain course restrictions in the minor. Business majors must choose alternate courses to replace the credits that are also in the Business Administration major.

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student’s major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student’s major.

- Agricultural Business Management (ABM) majors may not elect to complete an Agricultural Business Management.
- Environmental Economics and Policy (EEP) majors may not elect to complete a Resource Economics or Natural Resource and Environmental Law and Policy minor

Minor Code: 104

Agricultural Business Management Undergraduate Major (BS, HBS)
The BS in Agricultural Business Management (ABM) degree curriculum blends course work in agricultural economics, business, agricultural sciences, computer science, arts, and humanities so that graduates can respond to the unique challenges and opportunities in agribusiness vocations.

An internship or project is required to integrate course work with business-oriented experiences.

Applied Economics Graduate Major (MA, MS, PhD, MAIS)

Graduate Areas of Concentration

Resource and environmental economics, trade and development, public health economics, and transportation economics (MA, MS only)

The Applied Economics Graduate Program provides students with a strong foundation in economic theory, and quantitative methods while preserving sufficient flexibility to specialize in their areas of interest. The core curriculum includes courses in microeconomic and macroeconomic theory, in quantitative methods, and includes a set of qualifying examinations. Additional course work is required in the areas of concentration, which include: research and environmental economics, trade and development, public health economics, transportation economics, and an open area of concentration. The open area can accommodate students’ interests in applied economic policy, sustainable development, food and climate policy, and marine issues. The hallmark of the Applied Economics Graduate Program is the training of students to understand and utilize economic theories, principles, and methods to examine real-world problems with significant attention to data, institutions, and context.

Since faculty from across campus are members of the graduate faculty in Applied Economics and are potential research advisors, the Applied Economics Graduate Program allows students to work with faculty who most closely match their interests.

These faculty reside in many academic departments at Oregon State University, including the Department of Applied Economics, the School of Public Policy, the Department of Forest Ecosystems and Society, the Department of Forest Resources, Engineering and Management, and the College of Public Health and Human Sciences. Many students are supported by graduate teaching or graduate research assistantships. The Graduate School website also provides information related to financing your graduate education.

For detailed information on the Applied Economics Graduate Program, please review the web page at http://appliedecon.oregonstate.edu/applied-economics/aecgradprogram or contact Dr. Christian Langpap, Director of Admissions, Applied Economics Graduate Program, 213 Ballard Extension Hall, OSU, Corvallis, OR 97331 or phone: 541-737-1473, or email: applied.economics@oregonstate.edu.

Major Code: 1290

Environmental Economics and Policy Undergraduate Major (BS, HBS)

Also available via Ecampus.

The BS degree in Environmental Economics and Policy focuses on the development of strong economic and statistical skills and their use in the analysis while providing flexibility to incorporate interests in the biological, physical or social sciences. They also will focus on course work in environmental sciences, political sciences, and related subject areas with a greater focus on the socioeconomic dimensions of environmental sciences.

Grade Requirements

All EEP majors must complete the core list of courses with a grade of C– or higher.

Major Code: 237

Food Economics and Policy Minor

The Food Economics and Policy minor offers students an opportunity to expand their understanding of the economic and political foundations of contemporary agricultural and food systems. This minor emphasizes the complexity and inter-connectedness of consumer demand and the food system's ability to supply agricultural and food products that meet this demand.

The Food Economics and Policy minor is available to all OSU students except for those who are pursuing the Agricultural Business Management (ABM) major.

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student's major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student's major.

- Agricultural Business Management (ABM) majors may not elect to complete an Agricultural Business Management minor.
- Environmental Economics and Policy (EEP) majors may not elect to complete a Resource Economics or Natural Resource and Environmental Law and Policy minor.

Minor Code: 790

International Agricultural Development Graduate Minor

Social, cultural and economic electives 5
Select a minimum of 21 credits for master's or 25 credits for doctorate

Note: The graduate minor in International Agricultural Development is not available to students who took the undergraduate minor in Comparative International Agriculture at Oregon State University.

Minor Code: 1070

Natural Resource and Environmental Law and Policy Minor

Also available via Ecampus.

The Natural Resource and Environmental Law and Policy minor is available to students who are not pursuing the EEP major.

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student's major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student's major.

- Agricultural Business Management (ABM) majors may not elect to complete an Agricultural Business Management minor.
- Environmental Economics and Policy (EEP) majors may not elect to complete a Resource Economics or Natural Resource and Environmental Law and Policy minor.

Rural Studies Graduate Minor

Rural communities—both in the U.S. and globally—face an extraordinarily complex set of challenges due to sparse settlements and geographic isolation, exacerbated by globalization and technological change in an interdependent urban-rural system. Addressing these challenges requires both the theoretical insights of multiple disciplines and the practical wisdom that derives from engagement in solving actual problems in rural places. Emerging approaches to the study of rural people and places offer opportunities to examine rural issues from the perspective of multiple disciplines and diverse research methods that can capture the complexities at the intersections of place and space. Yet graduate training programs in these new approaches to rural studies are scarce.

Offered through campus and field-based experiential education, the graduate minor in Rural Studies provides students with the skills and competencies needed to understand economic, social, political and cultural dynamics of rural places.

The Rural Studies minor complements and supports other programs at OSU including the Master of Public Policy's concentration in rural policy and other graduate programs where students and faculty engage in rural issues such as applied economics, anthropology, forest ecosystems and society, geosciences, and human development and family sciences.

- RS 502 INDEPENDENT STUDY
- SNR 520 SOCIAL ASPECTS OF SUSTAINABLE NATURAL RESOURCES (Ecampus only)
- SOC 526 SOCIAL INEQUALITY
- SOC 554 LEISURE AND CULTURE
- SOC 556 SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT
- SOC 560 THE SOCIOLOGY OF GLOBALIZATION
- SOC 566 INTERNATIONAL DEVELOPMENT: GENDER ISSUES
- SOC 575 RURAL SOCIOLOGY
- SOC 580 ENVIRONMENTAL SOCIOLOGY
- SOC 581 SOCIETY AND NATURAL RESOURCES

Total Hours 18
Botany and Plant Pathology

Undergraduate Studies

Botany and plant pathology are concerned with the study of plants at all levels of biological organization, from molecular and cellular processes to the global ecosystem. This breadth of field reflects the wide range of issues and problems that confront plant biologists. In addition to addressing fundamental questions in plant biology, plant scientists in the 21st century will be called upon to provide information useful for producing food, fiber, and medicine for an increasing population, and for increasing our understanding of the diversity of plant and ecological systems and their interactions with humans. Students studying botany and plant pathology at OSU receive the basic science background necessary for such contributions, and may choose to focus in a particular area within plant science.

The undergraduate program in the Department of Botany and Plant Pathology is designed for students who wish to receive a BS in Botany degree and for students pursuing degrees in other fields that require a knowledge of plant biology. For example, students who have an undergraduate major in biology or environmental sciences may wish to emphasize botany courses in their upper-division course work.

Completion of the undergraduate curriculum in botany can qualify students for graduate work in various areas of plant biology and plant pathology, and for positions in state and federal agencies, and industries concerned with plants and their products.

Prospective botany majors should obtain a strong background in the biological and physical sciences at the high school level. Specifically recommended are a minimum of three years of high school mathematics, including algebra, geometry, and some exposure to trigonometry; one year of chemistry; one year of biology; one year of physics; and courses designed to develop computer and writing skills. Students without an adequate background in mathematics and science may make up these deficiencies early in their college careers.

Graduate Studies

The Department of Botany and Plant Pathology offers graduate programs in the following areas of concentration: ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, and systematics.

Students with majors in any one area may incorporate into their programs minors in other areas within the department or in other departments and colleges. Integrated minors, and interdisciplinary programs in plant physiology, molecular and cellular biology, genetics, and environmental sciences are also available.

The MS and PhD degrees offered by the Department of Botany and Plant Pathology require, in addition to course work, research resulting in presentation and defense of a thesis. A nonthesis MS degree also is available. PhD candidates must pass a written and oral preliminary examination upon completion of their course work. In addition, PhD students are required to be a teaching assistant for two quarters.

Inquiries concerning graduate studies can be forwarded to the chairperson of the department’s Graduate Studies Committee (Andrew.Jones@oregonstate.edu (john.fowler@oregonstate.edu)).

Additional details available at http://bpp.oregonstate.edu/content/graduate-programs.

Undergraduate Programs

Major

• Botany (p. 128)
  Options:
  • Comprehensive Botany (p. 131)
  • Customizable (p. 132)
  • Ecology, Evolution, and Conservation (p. 132)
  • Molecular, Cellular, and Genomic Botany (p. 133)
  • Plant Pathology (p. 133)

Minor

• Botany (p. 128)

Graduate Programs

Major

• Botany and Plant Pathology (p. 127)

Minor

• Botany and Plant Pathology (p. 128)

Joseph Spatafora, Department Head

Faculty

Professors Behrenfeld, Ciuffetti, Dolja, Fowler, Ingham, Johnson, Liston, McCune, Mundt, Pscheidt, Spatafora, Stone, Tyler, Wolpert
Associate Professors Chang, Goyer, Jaiswal, Jones, Megraw, Milligan, Ocamb, Parke, Santamaria
Assistant Professors Anderson, Busby, Dung, Frost, Graff, Hagerty, Hardison, KC, LeBoldus, Luh, Naithani, Westberry
Senior Instructor Putnam
Instructors Curtis, Link-Perez, Smyth

Courtesy Faculty

Professors Gent, Grunwald, Loper, Martin, Rothwell, Stockey
Associate Professors Hansen, Kentula, Mahaffee, Pyke, Stockwell, Zasada
Assistant Professors Cronn, Grevstad, Kaye, Meinke, Reichman, Weiland

Adjunct Faculty

Professor Freitag

BOT 101 - BOTANY: A HUMAN CONCERN. (4 Credits)
Introductory botany for non-majors, emphasizing the role of plants in the environment, agriculture and society. Includes molecular approaches to the study of plant function and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
BOT 220. *INTRODUCTION TO PLANT BIOLOGY. (4 Credits)
Introduction to plant biology including an overview of major groups of plants, plant cells and cell types, plant anatomy and architecture, physiology and function, and ecology and the roles of plants in the environment. Laboratory exercises build on lecture themes and provide hands-on learning experiences including field trips. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science

BOT 313. PLANT STRUCTURE. (4 Credits)
The structural components of vascular plants and how plant structure relates to function, development, environment, evolution, and human use of plants. Field trip. Lec/lab.

BOT 321. PLANT SYSTEMATICS. (4 Credits)
Vascular plant classification, diversity, and evolutionary relationships. Lab emphasizes the collection and identification of ferns, gymnosperms, and flowering plants in Oregon. Field trips. Lec/lab.

BOT 322. ECONOMIC AND ETHNOBOTANY: ROLE OF PLANTS IN HUMAN CULTURE. (3 Credits)
Economic and cultural (ethnobotanical) uses of plants and fungi by humans, including domesticated cultivated plants as well as wild-growing plants, and uses of plants and fungi by indigenous cultures. Ecampus course only.

BOT 323. *FLOWERING PLANTS OF THE WORLD. (3 Credits)
Global perspective of plant biodiversity with a focus on evolutionary origins, classification, and evolutionary relationships of the major groups of plants. Development and application of scientific writing and utilization of online information resources in plant evolutionary biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

BOT 324. *FUNGI IN SOCIETY. (3 Credits)
Explores the diverse roles played by fungi in relation to human civilization and the natural environment. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

BOT 325. *INTERSECTIONS BETWEEN PLANTS AND HUMANITY. (3 Credits)
The unique attributes of plants—including aspects of their biochemistry, growth, structure, and physiology—have influenced all aspects of life on earth, from biogeochemical cycles to the rise and expansion of human civilizations. Plants are sources of medicines, stimulants, hallucinogens, fibers and woods, resins and latex, oils and waxes; plants have inspired technological innovation, exploration, and exploitation of people and the environment. This course critically examines the intersections of plants with society and technology by exploring the roles plants have played in both historical and modern contexts. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

BOT 331. PLANT PHYSIOLOGY. (4 Credits)
Survey of physiological processes in plants, including photosynthesis and plant metabolism, mineral nutrition and ion uptake processes, plant cell/water relations, regulation of plant growth and development, and transpiration and translocation. Lec/rec.

BOT 332. LABORATORY TECHNIQUES IN PLANT BIOLOGY. (3 Credits)
Laboratory experiences in the manipulation and observation of physiological processes in plant systems. Analysis and interpretation of physiological data generated in experimentation with plant systems. Training in basic laboratory skills, including the principles and procedures involved in the use of common items of laboratory instrumentation. Lab.

BOT 341. PLANT ECOLOGY. (4 Credits)
Study of higher plants in relation to their environment. The relationship of plant physiology and reproduction to environmental factors; competition and other species interactions; the structure, dynamics and analysis of vegetation. Field trips. Lec/lab.

BOT 350. INTRODUCTORY PLANT PATHOLOGY. (4 Credits)
Symptoms, causal agents, diagnosis, and prevention of plant diseases, with emphasis on fungi, bacteria, nematode, and virus pathogens. Lec/lab.

BOT 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 406. PROJECTS: CURATORIAL ASSISTANT. (1-6 Credits)
Students assist with curatorial projects in the OSU Herbarium. Admission is by application to the Department of Botany & Plant Pathology. This course is repeatable for 6 credits.

BOT 407. SEMINAR. (1 Credit)
Section 1: Departmental seminar. Section 2: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.
Equivalent to: BI 407H, BOT 407H
This course is repeatable for 16 credits.

BOT 407H. SEMINAR. (1 Credit)
Section 1: Departmental seminar. Section 2: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BOT 407
This course is repeatable for 16 credits.

BOT 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 413. FOREST PATHOLOGY. (3 Credits)
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as FOR 413.
Prerequisites: BI 204 with C or better or BI 212 with C or better or BI 212H with C or better or BI 213 with C or better or BI 213H with C or better
Equivalent to: FOR 413

BOT 414. AGROSTOLOGY. (4 Credits)
Classification and identification of grasses, with emphasis on the modern system of grass classification, laboratory practice in keying grass specimens to genus and species. Lec/lab.
BOT 416. AQUATIC BOTANY. (4 Credits)
Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab.

BOT 425. FLORA OF THE PACIFIC NORTHWEST. (3 Credits)
Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab.

BOT 440. FIELD METHODS IN PLANT ECOLOGY. (4 Credits)
Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student’s location, and student projects.

BOT 442. PLANT POPULATION ECOLOGY. (3 Credits)
Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab.

BOT 458. ECOSYSTEMS GENOMICS. (3 Credits)
Genomic approaches used to understand species interactions with a focus on plant-associated microbes. Learning the conceptual framework and computational techniques of genomics to study the ecology of plant-microbe interactions at the ecosystem level.

Prerequisites: BI 311 with D- or better and BI 314 [D-]

BOT 460. FUNCTIONAL GENOMICS. (3 Credits)
Functional genomics describes a set of conceptual approaches and associated laboratory techniques that rely on large-scale DNA sequence datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. This course will provide an overview of these techniques, including a) approaches to predicting protein function based on sequence analysis, b) large-scale genetic approaches to identifying novel genotype-phenotype associations, and c) transcriptomic, proteomic and metabolomic approaches that reveal gene functions by measuring changes in abundance/modification of associated RNA transcripts, proteins and metabolites.

Prerequisites: (BI 311 with C- or better or BI 311H with C- or better) and (BI 314 [C] or BI 314H [C-])

BOT 461. MYCOLOGY. (5 Credits)
A broad taxonomic survey of the fungi. Topics include life histories, systematics, ecology, genetics, and ethnomycology. Participation on field trips and the submission of a specimen collection are required. Lec/lab.

BOT 465. LICHCENOLOGY. (4 Credits)
Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.

BOT 466. BRYOLOGY. (4 Credits)
Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.

BOT 475. COMPARATIVE GENOMICS. (4 Credits)

Prerequisites: (BI 311 with D- or better or CSS 430 with D- or better) and BI 314 [D-]

BOT 476. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES. (3 Credits)
Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences.

BOT 480. PHOTOSYNTHESIS AND PHOTOBIOLOGY. (3 Credits)
Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems.

BOT 488. ENVIRONMENTAL PHYSIOLOGY OF PLANTS. (3 Credits)
Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab.

BOT 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

Equivalent to: BOT 499H
This course is repeatable for 16 credits.

Attributes: HNRS – Honors Course Designator

Equivalent to: BOT 499
This course is repeatable for 16 credits.

BOT 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

BOT 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

BOT 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 507. SEMINAR. (1-16 Credits)
Section 1: Departmental seminar (F, W, S). Section 2: Communication in Ecology (F). Section 3: Community and Habitat Analyses (W). Section 4: Lichens and Bryophytes Research (S). Weekly one-hour meetings for reporting and discussions of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Graded P/N.
This course is repeatable for 16 credits.

BOT 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

BOT 513. FOREST PATHOLOGY. (3 Credits)
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSTLISTED as FOR 513.
Equivalent to: FOR 513

BOT 514. AGROSTOLOGY. (4 Credits)
Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab.
BOT 516. AQUATIC BOTANY. (4 Credits)
Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab.

BOT 525. FLORA OF THE PACIFIC NORTHWEST. (3 Credits)
Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab.

BOT 540. FIELD METHODS IN PLANT ECOLOGY. (4 Credits)
Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student’s location, and student projects.

BOT 542. PLANT POPULATION ECOLOGY. (3 Credits)
Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab.

BOT 543. PLANT COMMUNITY ECOLOGY. (3 Credits)
The structure, diversity, and successional dynamics of terrestrial plant communities; methods of analysis. Lec.

BOT 547. NUTRIENT CYCLING. (3 Credits)
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics will include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as SOIL 547.
Equivalent to: SOIL 547

BOT 550. PLANT PATHOLOGY. (5 Credits)
Causal agents of plant disease, diagnosis, pathogenesis, epidemiology, and disease management principles and strategies. Field trip. Lec/lab/rec.

BOT 552. PLANT DISEASE MANAGEMENT. (4 Credits)
Analysis of host, pathogen, and environmental factors influencing the increase and spread of plant disease. Epidemiological theory will be used as a basis for developing and evaluating principles and concepts of plant disease management. Lec/lab/rec. Offered alternate years.

BOT 553. PLANT DISEASE DIAGNOSIS. (3 Credits)
Diagnosis of plant diseases and identification of causal agents. Laboratory practice in identification techniques. Observation of symptoms exhibited by diseased plants in greenhouse and field locations. Field trips. Lec/lab. Offered alternate years in summer term.

BOT 554. BIOLOGY OF NEMATODES. (4 Credits)
Survey of basic biology and biodiversity of nematodes. Includes taxonomy, identification, life cycles, ecology and pathology, and interaction with other organisms. Lec/lab. Offered alternate years. This course is repeatable for 4 credits.

BOT 556. PHYLOGENETICS. (4 Credits)
Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.

BOT 558. ECOSYSTEMS GENOMICS. (3 Credits)
Genomic approaches used to understand species interactions with a focus on plant-associated microbes. Learning the conceptual framework and computational techniques of genomics to study the ecology of plant-microbe interactions at the ecosystem level.

BOT 560. FUNCTIONAL GENOMICS. (3 Credits)
Functional genomics describes a set of conceptual approaches and associated laboratory techniques that rely on large-scale DNA sequence datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. This course will provide an overview of these techniques, including a) approaches to predicting protein function based on sequence analysis, b) large-scale genetic approaches to identifying novel genotype-phenotype associations, and c) transcriptomic, proteomic and metabolomic approaches that reveal gene functions by measuring changes in abundance/modification of associated RNA transcripts, proteins and metabolites.

BOT 561. MYCOLOGY. (5 Credits)
A broad taxonomic survey of the fungi. Topics include life histories, systematics, ecology, genetics, and ethnomycoology. Participation on field trips and the submission of a specimen collection are required. Lec/lab.

BOT 566. BRYOLOGY. (4 Credits)
Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.

BOT 570. COMMUNITY STRUCTURE AND ANALYSIS. (4 Credits)
Quantitative methods for the analysis of biotic communities, including community concepts, estimation of community composition parameters, theoretical aspects of multivariate methods of analyzing species-importance data, and overview of multivariate tools; hands-on computer analysis of data sets. Lec/lab.

BOT 575. COMPARATIVE GENOMICS. (4 Credits)
Equivalent to: MCB 575

BOT 576. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES. (3 Credits)
Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences. CROSSLISTED as MCB 576.
Equivalent to: MCB 576
Botany and Plant Pathology Graduate Major (MA, MS, PhD)

Graduate Areas of Concentration

Ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, systematics

The Department of Botany and Plant Pathology offers graduate programs leading to the Master of Science, and Doctor of Philosophy degrees in the field of botany and plant pathology.

Within this major field, students may elect to specialize in one of the approved areas of concentration.

The selection of an area of concentration is optional. Students may major in botany and plant pathology without selecting an area of concentration. The approved areas of concentration are described below.

- **Ecology** includes physiological, population, community, ecosystem and global studies in ecology.
- **Genetics** includes molecular, classical and population studies of the genetics of plants, fungi, and plant-associated microorganisms.
- **Genomics and computational biology** include the functional, comparative and structural study of plant, fungal, viral and bacterial genomes and the development and application of biinformatic algorithms and tools used in the analysis of genomic data.
- **Molecular and cellular biology** include studies of molecular and cellular mechanisms active during plant development, molecular aspects of plant-pathogen interactions, and various aspects of gene regulation, signal transduction, and the cytoskeleton.
- **Mycology** includes the systematics, ecology, and population genetics of lichenized and non-lichenized fungi.
- **Plant pathology** includes studies in the areas of bacteriology, nematology, virology, forest pathology, epidemiology of plant diseases, the physiology of parasitism, and the molecular and biochemical basis of plant host-pathogen interactions.
- **Plant physiology** includes investigations of the regulation of plant growth and development, the molecular and physiological basis of plant-microbe interactions, nitrogen metabolism and the nitrogen cycle, and problems in environmental and stress physiology in plant systems.
- **Systematics** includes investigations of the taxonomy, phylogeny, and biogeography of plants, fungi, and lichens.

Students majoring in any one area of concentration may incorporate into their programs minors in other areas within the department or minors in other departments and colleges. Integrated minors, and interdisciplinary programs in plant physiology, molecular and cellular biology, genetics, and environmental sciences are also available.

The MS and PhD degrees offered by the Department of Botany and Plant Pathology require, in addition to course work, research resulting in the presentation and defense of a thesis. A nonthesis MS degree also is available for students with specific career goals. PhD candidates must pass a preliminary examination upon completion of their course work. In addition, PhD students are required to be a teaching assistant for two quarters.

Inquiries concerning graduate studies may be forwarded to the chair of the department's Graduate Studies Committee (Andrew.Jones@oregonstate.edu (john.fowler@oregonstate.edu)).

---

**BOT 580. PHOTOSYNTHESIS AND PHOTOBIOLOGY. (3 Credits)**
Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems.

**BOT 588. ENVIRONMENTAL PHYSIOLOGY OF PLANTS. (3 Credits)**
Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab.

**BOT 590. SELECTED TOPICS IN MYCOLOGY. (1-3 Credits)**
Advanced topics in mycology through analysis of current literature. Detailed study of an aspect of mycology beyond those covered in regular classes. Seminar and discussion format.
This course is repeatable for 16 credits.

**BOT 599. SPECIAL TOPICS. (0-16 Credits)**
This course is repeatable for 16 credits.

**BOT 601. RESEARCH. (1-16 Credits)**
Graded P/N.
This course is repeatable for 16 credits.

**BOT 603. THESIS. (1-16 Credits)**
This course is repeatable for 999 credits.

**BOT 605. READING AND CONFERENCE. (1-16 Credits)**
This course is repeatable for 16 credits.

**BOT 607. SEMINAR. (1 Credit)**
Section 1. Departmental seminar.
This course is repeatable for 16 credits.

**BOT 608. WORKSHOP. (1-16 Credits)**
This course is repeatable for 16 credits.

**BOT 651. MOLECULAR BASIS OF PLANT PATHOGENESIS. (3 Credits)**
Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years.
CROSSLISTED as MCB 651.
Equivalent to: MCB 651

**BOT 658. PLANT DISEASE DYNAMICS. (4 Credits)**
Evaluation of processes affecting the dynamics of plant disease and pathogen populations through analysis of current literature. Students will be expected to conduct extensive reading and analysis of literature and to meet with the instructor for small group discussions. Offered alternate years.

**BOT 691. SELECTED TOPICS-PLANT ECOLOGY. (1-3 Credits)**
Recent advances and developing problems in plant ecology, with critical evaluation of current literature. Topics vary from year to year.
This course is repeatable for 99 credits.

**BOT 692. SELECTED TOPICS: PLANT PATHOLOGY. (1-3 Credits)**
Selected topics concerning plant pathogens and plant disease processes, emphasizing current literature and theory. Topics vary from year to year.
This course is repeatable for 99 credits.

**BOT 699. SPECIAL TOPICS. (1-16 Credits)**
This course is repeatable for 16 credits.
Additional details available at http://bpp.oregonstate.edu/content/graduate-programs.

Select 11-12 credits of additional upper-division BOT courses

**Total Hours:** 26-28

1 Excluding BOT 101 *BOTANY: A HUMAN CONCERN but may include BOT 401 RESEARCH, BOT 405 READING AND CONFERENCE, BOT 407 SEMINAR, BOT 410 INTERNSHIP.

The minor requirements listed above are subject to the following constraints:

Courses required for a major and taken in the major department may not count toward a minor. An individual course may not count toward more than one minor. At least 12 credits of the minor must be upper division.

**Minor Code:** 515

**Botany Undergraduate Major (BS, HBS)**

The required curriculum meets the course requirements of the university and the College of Agricultural Sciences and provides for a broad background in plant science. Completing an option and engaging in an experiential learning activity allows students to fulfill their individual education goals and prepare for career aspirations.

All Botany undergraduate majors are required to do the following:

1. Complete the core curriculum meeting the requirements of the university, College of Agricultural Sciences, and Botany academic requirements.

2. Select and complete the course curriculum of a 21-credit option to obtain advanced scientific background and skills in a particular area of plant science. Students may select a pre-determined botany option from the catalog or create a customized option with approval of a BOT advisor. Course work delivered in the options provides students with advanced knowledge and skills related to the study of plants and plant-like organisms in natural and managed ecosystems and in the laboratory.
   1. Comprehensive Botany
   2. Customizable Option
   3. Ecology, Evolution, and Conservation

3. Participate in an experiential learning and subsequent student seminar. Every Botany major is required to have an experiential learning (EL) component in their curriculum that is not part of a scheduled academic course. The EL component can take many forms but must involve a minimum of 60 hours of work and must have a substantial educational objective that is related to the BOT degree. Academic credit is not required but may be earned by enrolling in research (BOT 401 RESEARCH) or internship (BOT 410 INTERNSHIP). Paid and voluntary positions are both acceptable. To meet the requirement, the student and the EL supervisor must make a written agreement that is approved by a Botany advisor. After completion of the EL project, the student is required to participate in a 1-credit student seminar during Fall term of the senior year (BOT 407 SEMINAR), to reflect on the EL project and to incorporate it into future career planning activities.

BI 204 | *INTRODUCTORY BIOLOGY I |
BI 205 | *INTRODUCTORY BIOLOGY II |
BI 206 | *INTRODUCTORY BIOLOGY III |
Select one of the following: | 4 |
BI 311 | GENETICS |
Select one of the following options: 15

One year of general chemistry

Option A

CH 121  GENERAL CHEMISTRY  
CH 122  *GENERAL CHEMISTRY  
CH 123  *GENERAL CHEMISTRY  

Option B

CH 231  GENERAL CHEMISTRY  
& CH 261  and *LABORATORY FOR CHEMISTRY 231  
CH 232  GENERAL CHEMISTRY  
& CH 262  and *LABORATORY FOR CHEMISTRY 232  
CH 233  GENERAL CHEMISTRY  
& CH 263  and *LABORATORY FOR CHEMISTRY 233  

CH 331  ORGANIC CHEMISTRY  
& CH 332  and ORGANIC CHEMISTRY  

Biochemistry

Select one of the following: 4-7

BB 350  ELEMENTARY BIOCHEMISTRY  
BB 450  GENERAL BIOCHEMISTRY  
& BB 451  and GENERAL BIOCHEMISTRY  

Select 8 credits of the following: 8

MTH 111  *COLLEGE ALGEBRA  
MTH 112  *ELEMENTARY FUNCTIONS  
MTH 231  ELEMENTS OF DISCRETE MATHEMATICS  
MTH 241  *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE  
MTH 245  *MATHMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES  
MTH 251  *DIFFERENTIAL CALCULUS  
MTH 252  INTEGRAL CALCULUS  

Statistics

ST 351  INTRODUCTION TO STATISTICAL METHODS  

Select a minimum of two courses of the following: 7-9

BOT 476  INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES  
CS 161  INTRODUCTION TO COMPUTER SCIENCE I  
CS 162  INTRODUCTION TO COMPUTER SCIENCE II  
GEOG 360  GISCIENCE I: GEOGRAPHIC INFORMATION SYSTEMS AND THEORY  
GEOG 361  GISCIENCE II: ANALYSIS AND APPLICATIONS  
PH 201  *GENERAL PHYSICS  
ST 352  INTRODUCTION TO STATISTICAL METHODS  
ST 411  METHODS OF DATA ANALYSIS  

Others by approval of advisor

Writing Intensive Course

Select one of the following: 3-4

BB 317  *SCIENTIFIC THEORY AND PRACTICE  
or BI 317  *SCIENTIFIC THEORY AND PRACTICE  
BI 371  *ECOLOGICAL METHODS

The Comprehensive Botany option is aimed at the student who wants broadly-based and high-level botanical knowledge and skills appropriate for botany careers and graduate education.

The Comprehensive Botany option requires 16–17 credits of 400-level BOT courses that provide a broad and sophisticated education in the five learning objectives of the botany core: structure, systematics, ecology, physiology, and genomics (list A). These courses cover aquatic botany, a second course in non-vascular plants, plant population ecology, environmental physiology/photobiology, and genome-enabled plant biology. Students choose an additional 4–5 credits of course work with permission of the advisor. These courses may be BOT advanced courses or courses in other departments (e.g., BI, BB, CROP, CSS, HORT, PBG). Up to 3 credits of approved Experiential Learning can also be applied to the option.

---

Note: Students should complete experiential learning activity before the beginning of the Fourth Year.

---

8 Mathematics credits should be taken during the First Year. Path depends on student’s Math Placement score. All students must complete through MTH 112 *ELEMENTARY FUNCTIONS during the First Year. Specific options require high-level math courses.

* Baccalaureate Core Course (BCC)

* Writing Intensive Course (WIC)
Option Code: 931

Customizable Option

This option is offered within the following major(s):

• Botany - College of Agricultural Sciences (p. 128)

The Customizable option is for students who have well-defined educational goals and career aspirations that do not fit easily within the existing options. The Customizable option allows students to have a transcript-visible program of upper-division courses that are tailored to their particular interests and professional objectives.

To create a customizable option, the student must do the following:

1. Define career goals and objectives.
2. Articulate a custom option title that briefly encompasses those professional goals.
3. Work with the botany advisor to create a program of courses for the option. The course program should meet all of these criteria:
   1. minimum of 21 credits, at least 15 being upper division
   2. all program courses must be taken for a grade (no S/U)
   3. courses may not double count with the BOT degree core requirements except for a WIC course or an "additional quantitative skills" course
   4. a maximum of 3 credits of experiential learning units may be applied
   5. up to 9 transfer credits may be applied with advisor approval
4. Plan how the courses will be scheduled, so that the option can be completed in a timely way. Remember that some courses are offered on an alternate year basis.
5. Write a one-page proposal that describes the career goals and outlines how each course in the program will relate to those goals.
6. Fill out a Customizable option form and submit it to your advisor along with your proposal. The advisor will review the plan and either approve it or make recommendations for revision.
7. When the plan is approved (signed), the course program needs to be submitted to MyDegrees. The Customizable option courses will appear below the Major Block under “student program of study”.
8. The Customizable option plan is locked, but can be modified if necessary, in consultation with your advisor.

Option Code: 932

Ecology, Evolution, and Conservation Option

This option is offered within the following major(s):

• Botany - College of Agricultural Sciences (p. 128)

The option in Ecology, Evolution, and Conservation (EEC) combines 4 required advanced BOT undergraduate courses in aspects of ecology, environmental plant physiology, and plant diversity, with at least 3 elective courses drawn from a list of BOT, BI, FES, FW and ST courses covering population dynamics, symbiosis, restoration, and conservation. To encourage students in the option to learn actively and obtain practical skills, up to 3 credits of approved Experiential Learning can be applied to the option. The EEC option courses are all approved electives within the BOT major. The core course requirements of the BOT major are not changed by doing the option, and no additional course credits are required to complete it.

The total requirements of the Botany Core are shown in the university catalog. The BOT core includes courses in ecology, physiology, evolution, systematics, statistics, and genetics that form the general background in this area of botany. Outside of the core courses, The option required courses (A list) include advanced physiology and ecology courses, a WIC course (BOT 323 *FLOWERING PLANTS OF THE WORLD or BI 371 *ECOLOGICAL METHODS) can be used for both WIC and option requirements, and a choice plant diversity courses. The B list electives offer the student a broad range of theoretical, applied, molecular, and quantitative classes.

Molecular, Cellular, and Genomic Botany Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 128)

The option in Molecular, Cellular, and Genomic Botany (MCG) is designed for Botany undergraduates with career interests in molecular, cellular and genomic biology, by providing a curriculum that provides them with specialized knowledge and skills for work and graduate school.

In addition to the general Botany curriculum, the MCG option requires 6 credits of advanced background courses in biochemistry and bio-computing (list A); a choice of two advanced BOT courses in plant genomics and biochemistry (6–7 credits) (list B); and a choice of 3 courses (9 credits) drawn from a menu of advanced BOT, BI, BB courses in cell biology, molecular biology and genomics (lists B and C). To encourage students in the option to learn actively and obtain practical skills, up to 3 credits of approved Experiential Learning can be applied to the option. Other courses may be substituted for list C with approval of a BOT advisor. The required course, BOT 476 INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES, can also be used to fulfill the major requirement for "additional quantitative skills". The core course requirements of the BOT major are not changed by doing the option, and no additional course credits are required to complete it.

Crop and Soil Science Department

The discipline of crop science provides the knowledge and understanding of technologies that contribute directly to improvements in production and quality of food, feed, fiber, seed, energy, and nutraceutical crops for the world. The art and science of plant improvement are key elements in efforts to feed, clothe and provide energy for the world’s ever-growing population. Conventional and molecular tools assist in the development of new genetic strains of food and energy crops. Crop plants play an important role in the future of sustainable food and energy production.

The discipline of soil science provides the basic understanding of the physical, chemical, and biological properties of this important natural resource. Why is soil important? Soil is the fundamental substrate for life on terrestrial landscapes. Soil plays a vital role in sustaining human welfare and assuring future agricultural productivity and environmental stability. An understanding of global and local ecology depends on an awareness of the soil and its properties. Global information and mapping
systems are essential tools for characterizing the landscape and its constituent soils.

Agronomists are crop and soil scientists who work to improve crops and agricultural productivity while effectively managing pests and weeds. Students in crop and soil science explore important contemporary issues faced by our society, including water quality and management, sustainability of different types of crop production, organic crop production, erosion and sedimentation, growing crops for biofuel production, land use and reclamation, genetic modification of crop plants, and soil quality and sustainability. An array of careers is available.

**Career Opportunities**

Careers for crop scientists are available in business, industry, farming, research, agricultural chemical industries, seed production, seed technology, communications, conservation, and education. Positions are available in agricultural experiment stations and extension services, state departments of agriculture, food processing companies, insurance agencies, lending institutions, and commercial firms, both domestic and international, dealing in the processing and sale of farm products, chemicals, and seed.

Careers for soil scientists are available in agriculture, forestry, education, state and federal resource agencies, private consulting, and research. Farms, ranches, and agricultural supply companies employ soil scientists as managers or field representatives. Soil scientists may become teachers of vocational agriculture or environmental education, or they may become county extension agents in agriculture or natural resources. The U.S. Department of Agriculture's Forest Service and Natural Resources Conservation Service often employ soil scientists, as do private consulting firms in environmental engineering and land use planning.

**Academic Advising**

Undergraduate curricula in crop and soil science are flexible enough to provide for the student’s individual professional needs and interests and for a broad-based general education by allowing electives in other colleges throughout the university. Undergraduate advising is a vital part of the program, and the department is well known for excellence in advising. The department has a head advisor who meets with all students each term. Advisors and faculty provide curricular guidance and aid in professional extracurricular activities, career decisions, and job placement.

**Scholarships**

The Department of Crop and Soil Science administers a number of scholarships available only to students majoring in the department. Over $40,000 is given to students each year.

**Student Clubs**

The department supports a Crop Science Club that provides valuable co-curricular professional development, a collegiate Soil Judging Team that participates in both regional and national competitions, the OSU Organic Growers Club that provides hands-on experience in organic production of vegetable crops, and the OSU Bug Club, a student club whose members are actively engaged in insect education outreach to local schools and communities. Graduate students in soil science also have a student club.

**Undergraduate Programs**

**Major**
- Crop and Soil Science (BS, HBS) (p. 143)

**Options**
- Agronomy
- Plant Breeding and Genetics
- Soil Science

**Minors**
- Crop Science (p. 151)
- Soil Science (p. 152)

**Graduate Programs**

**Majors**
- Crop Science (MAIS, MS, PhD) (p. 150)

**Graduate Options**
- Entomology
- Plant Breeding and Genetics
- Soil Science (MAIS, MS, PhD (p. 152))

**Affiliated Interdisciplinary**

**Graduate Major**
- Water Resources Science (MS, PhD) (See Graduate School) (p. 1139)

**Graduate Minors**
- Crop Science (p. 151)
- Soil Science (p. 152)

**Jay Noller, Head**
107 Crop Science

**Faculty**

**Professors** Bottomley, Butler (emeritus), Corp, Dragila, Hannaway, Hayes, Karow (emeritus), Kling (sr. research), Lahna, Machado, Macnab, Mallory-Smith, Myrold, Noller, Rao, Reitz, Ross, Shock, Stephenson, Tuck, Young (emeritus), Zemetra

**Associate Professors** Angima, Baham (emeritus), Bohle, Chastain, Elias (sr. research), Felix, Flowers, Hulting, Kleber, Lutcher, Nonogaki, Parke (sr. research), Rondon, Roseberg, Schrupp (seed certification, emeritus), D. Sullivan, Walenta, Wysocki

**Assistant Professors** N. Anderson, Dreves (sr. research), Leonard (sr. research), Pett-Ridge, C. Sullivan, Townsend (sr. research)

**Senior Instructors** Cassidy, Charlton, Fery, McMorran (seed certification)

**Instructors** Buhrig, Burr (seed certification), A. Hunt, Japhet, Maley, Shafa (seed certification), S. Smith (seed certification), Zielinski (seed certification)

**Courtesy Faculty**

**Professors** Brilman, Brown, Griffith, Olszyk, Peterson

**Associate Professors** Henning, Mueller-Warrant, Riera-Lizaraz, Vales
Assistant Professors: M. Johnson, M. Rogers, Weisbrod

Professional Faculty
Curry, Garay, Lewis, Lundeen

Crop Science

CROP 101. INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE. (1 Credit)
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as ENT 101, SOIL 101.

CROP 199. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE. (1-16 Credits)
Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. 
This course is repeatable for 16 credits.

CROP 200. CROP ECOLOGY AND MORPHOLOGY. (3 Credits)
An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science courses. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance.

CROP 280. INTRODUCTION TO THE COMPLEXITY OF OREGON CROPPING SYSTEMS. (4 Credits)
An introduction to field cropping systems of western Oregon. Provides students with a broad overview of the complexity of cropping systems and the knowledge required to grow and produce a crop--plant physiology, seed biology, plant pathology, soil fertility, entomology, and weed science. Students will observe a crop under different management strategies to enhance understanding of management approaches.

CROP 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS. (4 Credits)
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/ lab/rec. CROSSLISTED as HORT 300.

CROP 310. FORAGE PRODUCTION. (4 Credits)
Importance of, and current production practices for, forage crops. Lec/ lab.

CROP 319. PRINCIPLES OF FIELD CROP PRODUCTION. (3 Credits)
Provides students with an understanding of the basic principles of field crop production—tilage, soil testing, fertilization, variety selection, planting, and in-season crop management. Management practices for wheat, corn and soybean as .

CROP 330. *WORLD FOOD CROPS. (3 Credits)
Origin, production, utilization, and improvement of the world's major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. 
(Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

CROP 340. *PENS AND PLOWS: WRITINGS OF WORKING THE LAND. (3 Credits)
A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. (Bacc Core Course) Taught via Ecampus only.
Attributes: CPWC – Core, Pers, West Culture

CROP 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 403. THESIS. (1-6 Credits)
Independent, original study and preparation of a senior thesis. 
This course is repeatable for 16 credits.

CROP 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: CROP 405H, CSS 405
This course is repeatable for 16 credits.

CROP 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 405, CSS 405H
This course is repeatable for 16 credits.

CROP 407. SEMINAR. (1 Credit)
Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to submit written documentation supporting that seminar.

CROP 410. INTERNSHIP. (1-6 Credits)
Professional work experience previously approved and supervised by the department, written report required. 
This course is repeatable for 12 credits.

CROP 414. PRECISION AGRICULTURE. (4 Credits)
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab. CROSSLISTED as HORT 414.

Equivalent to: HORT 414

CROP 418. TOXIC PLANTS IN PNW PASTURES. (1 Credit)
Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only.

CROP 420. SEED SCIENCE AND TECHNOLOGY. (3 Credits)
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.
CROP 433. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS. (4 Credits)
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as HORT 433/HORT 533.
Prerequisites: BI 102 with D- or better or BI 213 with D- or better or BI 311 with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or PBG 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better

CROP 440. WEED MANAGEMENT. (4 Credits)
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec.

CROP 460. SEED PRODUCTION. (3 Credits)

CROP 463. SEED BIOLOGY. (3 Credits)
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. CROSSLISTED as HORT 463/HORT 563. Lec/lab.
Equivalent to: HORT 463

CROP 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT. (4 Credits)
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as HORT 480/HORT 580.
Equivalent to: HORT 480

CROP 499. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (1-16 Credits)
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: CROP 499H
This course is repeatable for 16 credits.

CROP 499H. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (1-16 Credits)
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 499
This course is repeatable for 16 credits.

CROP 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CROP 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 507. SEMINAR. (1 Credit)
Graded P/N.
This course is repeatable for 99 credits.

CROP 509. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as ENT 509, PBG 509, SOIL 509.
Equivalent to: ENT 509, PBG 509, SOIL 509
This course is repeatable for 9 credits.

CROP 514. PRECISION AGRICULTURE. (4 Credits)
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab.

CROP 520. SEED SCIENCE AND TECHNOLOGY. (3 Credits)
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.

CROP 530. ORGANIC SOIL AND CROP MANAGEMENT. (3 Credits)
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies. CROSSLISTED AS SOIL 530.
Equivalent to: SOIL 530

CROP 533. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS. (4 Credits)
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. CROSSLISTED as HORT 433/HORT 533.

CROP 540. WEED MANAGEMENT. (4 Credits)
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec.

CROP 550. SEED PRODUCTION. (3 Credits)
CROP 563. SEED BIOLOGY. (3 Credits)
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years.
Equivalent to: HORT 563

CROP 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT. (4 Credits)
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged.
Equivalent to: HORT 580

CROP 590. EXPERIMENTAL DESIGN IN AGRICULTURE. (4 Credits)
Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. Lec/rec.

CROP 599. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (0-16 Credits)
Technical knowledge and skills development courses offered in a wide variety of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
This course is repeatable for 16 credits.

CROP 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CROP 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 607. SEMINAR. (1 Credit)
Graded P/N.
This course is repeatable for 99 credits.

CROP 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 609. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: ENT 609, PBG 609, SOIL 609
This course is repeatable for 9 credits.

CROP 660. HERBICIDE SCIENCE. (4 Credits)
Absorption, movement, and mechanism of action in plants; behavior of herbicides in soil. Offered alternate years.

CROP 670. PHYSIOLOGY OF CROP YIELD. (3 Credits)
Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature.

CROP 699. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

Crop and Soil Science

CSS 205. *SOIL SCIENCE. (4 Credits)
Introduction to the chemical, physical and biological nature of soils. Examines the functions of soils as a medium for plant growth, a recycling system for nutrients and wastes, a modifier of atmospheric chemistry, a habitat for soil organisms, a system for water purification, and an engineering medium. Field and laboratory projects provide an understanding of fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec/lab. (Bacc Core Course) Taught via Ecampus only.
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Equivalent to: CSS 305, SOIL 205

CSS 305. PRINCIPLES OF SOIL SCIENCE. (4 Credits)
Origin, formation, classification, physical, chemical, and biological characteristics; ecosystem functions of soils; effects of soil management on agricultural and forest crop production. Field trips. Taught at EOU LaGrande campus only.
Equivalent to: CSS 205

CSS 306. PROBLEM SOLVING: SOIL SCIENCE APPLICATIONS. (1 Credit)
Problem solving for, and in-depth exploration of, Principles of Soil Science (CSS 305). Real-world problems requiring knowledge of soil physical, chemical, and biological properties. Taught at EOU LaGrande campus only.
Corequisites: CSS 305

CSS 315. *NUTRIENT MANAGEMENT AND CYCLING. (4 Credits)
Nutrient forms, transformations, and plant availability as influenced by chemical and biological reactions in soils; soil pH and management of acid and alkaline soils; characteristics and use of fertilizers, soil amendments and organic wastes. Labs include routine soil testing procedures, computer applications for soil fertility management, and field trips. Lec/lab. (Writing Intensive Course) Taught at EOU LaGrande campus only.
Attributes: CWIC – Core, Skills, WIC
Prerequisites: CSS 305 with D- or better

CSS 320. PRINCIPLES OF OIL AND FIBER CROP PRODUCTION. (1 Credit)
An overview of production practices and characteristics of oil seed, essential oil, and fiber crops. Taught at EOU LaGrande campus only.

CSS 321. PRINCIPLES OF CEREAL CROP PRODUCTION. (1 Credit)
An overview of the principles underlying small grain production practices in the Pacific Northwest. Taught at EOU LaGrande campus only.

CSS 322. PRINCIPLES OF POTATO PRODUCTION. (1 Credit)
Principles and practices governing all aspects of potato production, storage and use. Taught at EOU LaGrande campus only.

Plant Breeding and Genetics

PBG 199. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PBG 199H
This course is repeatable for 16 credits.

PBG 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 199
This course is repeatable for 16 credits.
PBG 299. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PBG 299H
This course is repeatable for 16 credits.

PBG 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 403. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

PBG 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: PBG 405H
This course is repeatable for 16 credits.

PBG 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 409. TEACHING PRACTICUM. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 410. INTERNSHIP. (1-12 Credits)
Offered via Ecampus only.
This course is repeatable for 12 credits.

PBG 430. PLANT GENETICS. (3 Credits)
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.

PBG 431. PLANT GENETICS RECITATION. (1 Credit)
Review and demonstration of plant genetics principles.

PBG 441. PLANT TISSUE CULTURE. (4 Credits)
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab.

PBG 450. PLANT BREEDING. (4 Credits)
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.

PBG 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PBG 499H
This course is repeatable for 16 credits.

PBG 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 499
This course is repeatable for 16 credits.

PBG 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 503. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

PBG 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 509. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional materials by assisting in laboratory, recitation, and lectures. CROSSLISTED as ENT 509, CROP 509, SOIL 509.
Equivalent to: CROP 509, ENT 509, SOIL 509
This course is repeatable for 9 credits.

PBG 510. INTERNSHIP. (4 Credits)
Offered via Ecampus only.
This course is repeatable for 12 credits.

PBG 513. PLANT GENETIC ENGINEERING. (3 Credits)
Principles, methods, and recent developments in the genetic engineering of higher plants. Offered alternate years.

PBG 519. CURRENT TOPICS IN PLANT BREEDING AND GENETICS. (2 Credits)
Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as HORT 519.
Equivalent to: HORT 519
This course is repeatable for 12 credits.

PBG 530. PLANT GENETICS. (3 Credits)
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.

PBG 541. PLANT TISSUE CULTURE. (4 Credits)
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab. CROSSLISTED as MCB 541.
Equivalent to: MCB 541

PBG 550. PLANT Breeding. (4 Credits)
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.
PBG 551. BREEDING CLONAL CROPS. (1 Credit)
The overall goal of the course is to gain fundamental knowledge of breeding methods for clonal crops; these methods are different from those used for seed-propagated crops. Specific examples from a wide array of plant species (tree fruits, berries, tree nuts, potato, sweet potato, cassava, cacao) will be provided to illustrate application of the fundamental knowledge.
Prerequisites: PBG 450 with C or better or PBG 550 with C or better

PBG 556. CROP PLANT DOMESTICATION. (2 Credits)
Learning is based on discussion of the contemporary literature on crop plant origins and domestication. The major agronomic and horticultural crops will be covered. Topics include primary centers of domestication, traits altered by domestication, effect of genetic architecture and local ecology on domestication, and importance of genetic diversity to current plant improvement efforts.

PBG 557. PLANTS AND PATENTS. (2 Credits)
Learn about different methods of intellectual property protection in agriculture with a focus on plant patents, plant variety protection and utility patents. The rights, current issues and restrictions that different types of patents allow will be presented through reading the current literature.

PBG 591. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 598. PLANT CHROMOSOME BIOLOGY. (3 Credits)
Exploration of the relationship between chromosome number, structure, and behavior to gene inheritance, organization, and expression. Discussion of chromosome manipulation strategies for genomics research, genetic analysis, and plant breeding.

PBG 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 601. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 603. DISSERTATION. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

PBG 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 609. PRACTICUM IN TEACHING. (1-3 Credits)
developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, ENT 609, SOIL 609
This course is repeatable for 9 credits.

PBG 620. DNA FINGERPRINTING. (1 Credit)
Principles and methods for producing and analyzing DNA fingerprints. Offered even years. CROSSLISTED as MCB 620.

PBG 621. GENETIC MAPPING. (1 Credit)
Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered even years. CROSSLISTED as MCB 621.

PBG 622. MAPPING QUANTITATIVE TRAIT LOCI. (1 Credit)
Principles and methods for mapping genes underlying phenotypically complex traits. Offered even years. CROSSLISTED as MCB 622.

PBG 650. ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS. (3 Credits)
Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S~1~-, and S~2~- family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and family selection experiments. Offered odd years.

PBG 691. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Soil Science

SOIL 101. INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE. (1 Credit)
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as ENT 101, CROP 101.

SOIL 199. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: SOIL 199H
This course is repeatable for 16 credits.

SOIL 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 199
This course is repeatable for 16 credits.

SOIL 205. SOIL SCIENCE. (3 Credits)
Introduction to the chemical, physical and biological nature of soils. Examines how soils function in terms of plant growth, nutrient supply, the global carbon cycle, ecological habitat, and water purification. Community-based learning projects provide hands-on experience with fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec. (Bacc Core Course if taken with SOIL 206 or FOR 206)
Attributes: CPBL – Core, Pers, BioSci Attached Lec; CPPL – Core, Pers, PhySci Attached Lec
Prerequisites: SOIL 206 (may be taken concurrently) with D- or better or FOR 206 (may be taken concurrently) with D- or better

SOIL 206. *SOIL SCIENCE LABORATORY FOR SOIL 205. (1 Credit)
Students will gain hands-on experience with soil science concepts and applications. Laboratory exercises and field trips will help students develop proficiency in the methods/tools for analyzing soil chemistry, biology, morphology, physical properties, and soil forming factors. Skills will be taught in the context of soils’ social, economic, and environmental importance. (Bacc Core Course if taken with SOIL 205)
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Corequisites: SOIL 205

SOIL 299. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: SOIL 299H
This course is repeatable for 16 credits.
SOIL 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 299
This course is repeatable for 16 credits.

SOIL 316. NUTRIENT CYCLING IN AGROECOSYSTEMS. (4 Credits)
Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Labs include soil sampling and testing procedures, data collection on soil and plants, computer applications for soil fertility management, and field trips. Lec/lab.
Prerequisites: (CH 121 with D- or better or CH 231 with D- or better) and (SOIL 205 [C] or CSS 205 [C] or CSS 305 [C])

SOIL 360. SOIL MANAGEMENT FOR ORGANIC PRODUCTION. (3 Credits)
This is a skills-based soil management course that is part lecture and part student-centered learning. Significant class time will be devoted to making field-scale management decisions. The course includes individual and group work, presentation, and discussion. The intent is to prepare students for real-world application of soil management decisions in certified organic systems. Using the National Organic Program as a starting point as well as farm system descriptions with extensive long-term data sets, we will interpret soil nutrient analyses, cover cropping systems, and organic amendments, to design soil management plans for two model cropping systems (annual and perennial).
Prerequisites: (SOIL 205 with C or better and (SOIL 206 [D-] or FOR 206 [C])) or CSS 205 [C]

SOIL 366. ECOSYSTEMS OF WILDLAND SOILS. (3 Credits)
Focuses on soils that occur in relatively undisturbed ecosystems such as forests and rangelands. Topics covered include properties and processes specific to understanding and managing the soil resource in these areas. An overview of US Soil Taxonomy will also be given.
Prerequisites: SOIL 205 with D- or better or CSS 205 with D- or better or CSS 305 with D- or better

SOIL 388. SOIL SYSTEMS AND PLANT GROWTH. (4 Credits)
Introduces soils as providers of critical resources for plant growth. Explains how soils supply water, air, thermal energy and nutrients to plants. Shows that sustainable management of soil resources requires substantial understanding of their role in the functioning of natural, forest, and agricultural systems. Explains controls on soils and availability of individual soil resources and mechanisms making these resources plant-available.
Prerequisites: ([SOIL 205 with D- or better and (SOIL 206 [D-] or FOR 206 [D-] or CR 231 [D-] or CR 232 [D-]) or CSS 205 [D-]) and (BOT 220 [D-] or BI 204 [D-] or BI 205 [D-] or BI 206 [D-]) or (BI 211 [D-] or BI 212 [D-] or BI 213 [D-])]

SOIL 395. *WORLD SOIL RESOURCES. (3 Credits)
The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. Offered via Ecampus only. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC
Prerequisites: CH 121 with D- or better or CH 122 with D- or better or CH 123 with D- or better or CH 201 with D- or better or CH 202 with D- or better or CH 231 with D- or better or CH 231H with D- or better or CH 232 with D- or better or CH 232H with D- or better or CH 233 with D- or better or CH 233H with D- or better

SOIL 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 403. THESIS. (1-16 Credits)
Independent, original study and preparation of a senior thesis. This course is repeatable for 16 credits.

SOIL 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: SOIL 405H
This course is repeatable for 16 credits.

SOIL 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 405
This course is repeatable for 16 credits.

SOIL 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 408. WORKSHOP. (1-16 Credits)
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. This course is repeatable for 16 credits.

SOIL 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 410. INTERNSHIP. (1-6 Credits)
Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for 12 credits.

SOIL 435. ENVIRONMENTAL SOIL PHYSICS. (3 Credits)
Covers principles of soil physical properties and processes as they relate to agricultural, hydrological and environmental problems. Lec/lab. Offered odd years.
Prerequisites: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better

SOIL 445. ENVIRONMENTAL SOIL CHEMISTRY. (3 Credits)
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.

SOIL 455. BIOLOGY OF SOIL ECOSYSTEMS. (4 Credits)
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.

SOIL 466. SOIL MORPHOLOGY AND CLASSIFICATION. (4 Credits)
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.
Prerequisites: SOIL 205 with D- or better or CSS 205 with D- or better or CSS 305 with D- or better
SOIL 468. SOIL LANDSCAPE ANALYSIS. (4 Credits)
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system and landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered even years.
Prerequisites: SOIL 466 (may be taken concurrently) with D- or better or CSS 466 (may be taken concurrently) with D- or better

SOIL 475. SOIL RESOURCE POTENTIALS. (4 Credits)
Course builds on knowledge from introductory pedology, soil chemistry, soil physics and soil biology to practice the evaluation of nutrient availability and soil moisture storage in the rooting space. Results from the application of pedotransfer functions to observations at the pit wall are translated into quantitative, numerical expressions of soil resource potentials. Lec/lab.
Prerequisites: SOIL 435 with D- or better and SOIL 455 [D-] and SOIL 466 [D-]

SOIL 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: SOIL 499H
This course is repeatable for 16 credits.

SOIL 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 499
This course is repeatable for 16 credits.

SOIL 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 503. THESIS/DISSERTATION. (1-16 Credits)
This course is repeatable for 999 credits.

SOIL 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 508. WORKSHOP. (1-16 Credits)
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
This course is repeatable for 16 credits.

SOIL 509. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as ENT 509, CROP 509, PBG 509.
Equivalent to: CROP 509, ENT 509, PBG 509
This course is repeatable for 9 credits.

SOIL 510. INTERNSHIP. (1-6 Credits)
Professional work experience previously approved and supervised by the department, written report required.
This course is repeatable for 6 credits.

SOIL 511. SOIL: A NATURAL AND SOCIETAL RESOURCE. (3 Credits)
Serves degree- and non-degree-seeking graduate learners wanting soil science knowledge but having minimal science background. Understanding soil physical, chemical, and biological properties promotes informed soil management while supporting individual to global societal values. Established curriculum facilitates graduate degrees or certificates, continuing education, professional certification, and self-improvement goals. A highly interactive social media framework supports weekly student-student and instructor-student learning interactions.

SOIL 512. METHODS OF SOIL ANALYSIS - FIELD. (1 Credit)
Recognition and quantitative description of soil properties in agroecosystems. Assessments of soil environments used for crop production in Oregon. Demonstration and practice of volumetric and bulk soil sampling techniques as well as the application of pedotransfer functions. Each participant will be responsible for analyzing at least one soil sample in the chemical level. Five-day duration with four overnight stays at campgrounds. Participants will use their own or borrowed camping equipment.

SOIL 513. PROPERTIES, PROCESSES, AND FUNCTIONS OF SOILS. (4 Credits)
Physical, chemical, biological, and landscape properties; processes of fluid retention and movement, weathering and cation exchange, decomposition and C-N dynamics, erosion and sedimentation; functions of hydrologic regulation, nutrient cycling, environmental protection, ecological habitat.
Equivalent to: CSS 513

SOIL 514. METHODS OF SOIL ANALYSIS - LABORATORY. (2 Credits)
Provide the theoretical background, as well as practical experience needed to plan, select, execute, and interpret soil chemical and physical analyses such as those typically used for nutrient management recommendations. Individual and group activities involve classroom presentations, as well as hands-on work in a teaching laboratory. Samples processed are those collected in SOIL 512, Methods of Soil Analysis - Field. Duration is five full work days.
Prerequisites: SOIL 512 (may be taken concurrently) with C or better

SOIL 515. SOIL FERTILITY MANAGEMENT. (3 Credits)
Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils.

SOIL 523. PRINCIPLES OF STABLE ISOTOPE. (3 Credits)
An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Offered even years.

SOIL 525. MINERAL-ORGANIC MATTER INTERACTIONS. (3 Credits)
Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties.

SOIL 530. ORGANIC SOIL AND CROP MANAGEMENT. (3 Credits)
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies. CROSSLISTED AS CROP 530.
Equivalent to: CROP 530
SOIL 535. SOIL PHYSICS. (3 Credits)
Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Offered fall term in even years.

SOIL 536. VADOSE ZONE HYDROLOGY LABORATORY. (1 Credit)
Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Offered every even year.

SOIL 545. ENVIRONMENTAL SOIL CHEMISTRY. (3 Credits)
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/lab. Offered odd years.

SOIL 547. NUTRIENT CYCLING. (3 Credits)
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as BOT 547.

SOIL 555. BIOLOGY OF SOIL ECOSYSTEMS. (4 Credits)
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.

SOIL 566. SOIL MORPHOLOGY AND CLASSIFICATION. (4 Credits)
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.

SOIL 568. SOIL LANDSCAPE ANALYSIS. (4 Credits)
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered odd years.

Prerequisites: CSS 566 (may be taken concurrently) with C or better or SOIL 566 (may be taken concurrently) with C or better

SOIL 591. SELECTED TOPICS. (1-16 Credits)
Course content and title will change with each offering. This course is repeatable for 16 credits.

SOIL 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 603. THESIS/DISSERTATION. (1-16 Credits)
This course is repeatable for 999 credits.

SOIL 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 609. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.

Equivalent to: CROP 609, ENT 609, PBG 609
This course is repeatable for 9 credits.

SOIL 635. ADVANCED SOIL PHYSICS. (3 Credits)
Explores theoretical development of a key topic in soil physics. Topics may include evaporation from porous media, multiphase fluid movement, soil deformation, and soil salinization, with respect to either historical development, present day understanding or future needs of the field. Course structure incorporates lectures and discussion requiring intensive student participation. Offered odd years.

Prerequisites: CSS 535 with C or better or SOIL 535 with C or better

SOIL 645. SOIL MICROBIAL ECOLOGY. (3 Credits)
An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Offered even years.

SOIL 684. GLOBAL BIOGEOCHEMICAL CYCLES. (4 Credits)
An in-depth treatment of global biogeochemical cycles, focusing on cycles of carbon, oxygen, nitrogen, phosphorus, and sulfur in the atmosphere, hydrosphere, and lithosphere. CROSSLISTED as GEO 684.

Equivalent to: GEO 684

SOIL 691. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Sustainability

SUS 102. *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY. (4 Credits)
An introduction to the science behind critical environmental issues and the biological basis of creating and maintaining sustainable ecosystems. Focus on such questions as: how do we decide what to believe about environmental issues? How do we quantify, restore, and value biodiversity? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

SUS 103. *INTRODUCTION TO CLIMATE CHANGE. (4 Credits)
An introduction to the principles of climate change science with an emphasis on the empirical evidence for climate change. Students will learn critical thinking skills to assess such questions as: How do we determine the processes controlling global warming? How do we predict trends in climate change? How do we calculate and understand uncertainty in these predictions? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science
SUS 304. *SUSTAINABILITY ASSESSMENT. (4 Credits)
Explores theories and application of sustainability assessment techniques and analysis methods. Practical application of globally recognized assessment protocol, including checklists, footprinting, life-cycle analysis and the indicators used to conduct these analyses. Emphasis on ecological and social indicators, although economic indicators are explored. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

SUS 325. *AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH. (3 Credits)
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

SUS 350. *SUSTAINABLE COMMUNITIES. (4 Credits)
Introduction to the concept of sustainable communities from a multidisciplinary perspective. Instructors from a broad array of disciplines and professions. Development of holistic thinking skills and innovative solutions to complex problems. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

SUS 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SUS 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

SUS 420. SOCIAL DIMENSIONS OF SUSTAINABILITY. (3 Credits)
Focuses on the social aspects of sustainability, including how the environment, the economy, social life interact to create the world we live in. Explores how social institutions (school, government, business, family) contribute to sustainability and promote or discourage social and environmental justice at local and global scales. Also offered at OSU-Cascades and via Ecampus.

SUS 499. SPECIAL TOPICS. (3 Credits)
This course is repeatable for 15 credits.

SUS 512. TOPICS IN THE SCIENCE OF SUSTAINABILITY. (4 Credits)
Provides a graduate-level introduction to key concepts and issues in environmental science and sustainability, targeted at business-oriented graduate and post-bacc students who do not have a science background. The course is a core requirement of the Sustainable Business certificate program offered jointly by the College of Business (COB) and the College of Agricultural Sciences’ (CAS) Sustainability Double-Degree (SDD) Program.

SUS 514. SUSTAINABILITY PLANNING AND ASSESSMENT. (4 Credits)
Sustainability is fundamentally about balancing social, economic and ecological systems. This course examines a range of different methodologies for measuring and evaluating performance towards established sustainability criteria and indicators. Students will critically evaluate tools for making sustainable decisions and understand the limitations of individual assessment approaches in different contexts. Specific assessment techniques to be explored include ecological footprinting, sustainable community indicators, greenhouse gas emissions inventories, sustainability checklists, environmental management systems (ISO standards), life-cycle analysis, and business sustainability reporting. Students will leave the course with the fundamental skills required to complete sustainability assessments via globally relevant approaches.

SUS 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

Crop and Soil Science Undergraduate Major (BS, HBS)
The Bachelor of Science degree in Crop and Soil Science requires the choice of one of three options:

1. Agronomy
2. Plant Breeding and Genetics
3. Soil Science

Major Code: 120

Agronomy Option
This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 143)

Students in the Agronomy option will gain the knowledge and skills necessary to be active participants in producing food, feed, fiber, and energy crops for our world. Increased production of field crops—wheat, corn, rice, sorghum, soybeans, forages, cotton, etc.—will be essential to meet the basic needs of the world’s ever-growing population and such production will need to be accomplished in a world of diminishing soil, water, mineral, and petrochemical resources. As an agronomic professional, you will have the knowledge and skill to access the potentials of a given production system and to choose plant materials and plant production practices that will optimize production while minimizing environmental impact. Maximum sustainable production will be your goal and you will need in-depth knowledge of plants, plant genetics, plant pests, soils, soil fertility, production equipment, economics, and politics to achieve this goal. Agronomists work for field crop production companies, as managers of small to large farms and ranches, and as managers of their own farming operations. Agronomists also work for federal, state, or local government agencies as educators, researchers, or field technicians. Others hold teaching, research, or extension positions in universities. Some work for private research laboratories, environmental service companies, insurance companies, or land appraisal firms.

**Total credits required for graduation**: 180

1. 10 or more credits of a structured internship (CROP 410 INTERNSHIP) can be substituted for 6 of the 7–8 General Electives credits and four credits of Electives in Business. This would allow a student to use an entire term for internship work.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

**Grade Requirements**  
Students pursuing the Agronomy option under the Crop and Soil Science major are required to receive a grade of C or better in all CROP, CSS, ENT, HORT, PBG, and SOIL courses required within their major and option.

**Option Code**: 784

**Plant Breeding and Genetics Option**  
This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 143)  
- Horticulture - College of Agricultural Sciences (p. 208)

The Plant Breeding and Genetics (PBG) option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genonicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students’ career goals including graduate school, as well as directly entering public or private sector breeding programs. After completing their degree, students will have gained fundamental knowledge in plant breeding that may be applied in a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

This option is under both the Crop and Soil Science major and the Horticulture major. The option uses the new horticulture major core.

Soil Science Option

This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 143)

The study of soil as a science provides students with a basic understanding of the physical, chemical, and biological properties of this essential natural resource. Soil is the fundamental substrate for life in terrestrial systems. Our food, fiber, and renewable energy are dependent on soils. Our understanding of soils is critical in the successful siting of buildings and construction of roadways and other transportation infrastructure. Our understanding of global and local ecology depends on an awareness of soil and its properties. Soils are the filters of our water and play active roles in storing carbon and other materials that are essential in human existence. As a soil science student, you will explore issues including water quality and management, organic crop production, erosion and sedimentation, land use and reclamation, and soil quality and sustainability. As a soil science professional you will be able to use your knowledge and skills to solve real-world, sustainable living problems in urban, agricultural, forest, rangeland, and other natural systems. Many soil scientists work for the Natural Resource Conservation Service. Some work for other federal, state, or local government agencies as extension educators, researchers, or surveyors. Others hold teaching or research positions in colleges and universities. Soil scientists also work for fertilizer companies, private research laboratories, environmental service companies, insurance companies, and land appraisal firms.

**Entomology Graduate Option**

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 150)
- Horticulture - College of Agricultural Sciences (p. 207)

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching, and extension in the context of understanding the basic biology of insects and, with this knowledge, then working with insects in natural and/or managed environments. The discipline of entomology at Oregon State University covers behavior, ecology, evolution, physiology, systematics, molecular biology, chemical ecology, plant-insect interactions, pollination by honey bees and native bees, biological control, integrated pest management, and insecticide toxicology. Oregon State Entomology addresses insect-related issues in aquatic and terrestrial systems in natural, agricultural, forested, and urban environments. Entomologists collaborate with plant scientists, physiologists, pathologists, soil scientists, geneticists, molecular biologists, and experts in other fields.

Students in the Entomology option will conduct thesis research related to insects under the supervision of an entomologist associated with the graduate faculty in Crops or Horticulture, and take courses that provide knowledge and understanding about insects. After completing their degree, students will have gained fundamental knowledge in entomology that may be applied in agricultural, aquatic, forested, natural, and urban environments.

Plant Breeding and Genetics Graduate Option

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 150)
- Horticulture - College of Agricultural Sciences (p. 207)

The Plant Breeding and Genetics (PBG) graduate option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics graduate option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including further graduate study, as well as direct entry into public or private sector breeding programs. After completing the degree, students will have the fundamental knowledge of plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

* Baccalaureate Core Course (BCC)

Minimum Grade Requirement: Students pursuing a minor in Crop Science are required to receive a grade of C or better in all CROP, CSS, ENT, HORT, PBG, and SOIL courses taken to complete the minor.
Soil Science Graduate Major (MS, PhD, MAIS)

Graduate Areas of Concentration

Environmental soil science, forest soils, nutrient cycling, soil geochemistry, soil conservation and land use, soil fertility and plant nutrition, soil genesis and classification, soil microbiology, soil physics

Faculty research specializations in soil science include ecosystem services, forest soils, management of soil nutrients, mineral-organic matter interactions, soil archeology, soil biogeochemistry, soil microbial ecology, sustainable cropping systems, soil geomorphology, soil genesis, and soil hydrology. Amongst research institutions worldwide, Oregon State campus lands present the most soil diversity for the study of associated problems.

Entomology

Graduate students have the option of obtaining their degree in the specific academic department of their major professor.

Graduate Area of Concentration

Graduate students pursuing an entomology area of concentration have the opportunity to study and conduct research within a number of graduate programs across the university in the Departments of Horticulture, Crop and Soil Science, Fisheries and Wildlife, and Forest Ecosystems and Society. Graduate students obtain their degree within the academic department of their major professor.

Entomologists continue to be at the forefront of basic and applied research in molecular biology, ecology, evolutionary biology, biodiversity, and pest management. The modern fields of physiology, ecology and systematics have their origins in research originally undertaken with insects, and entomologists help lead these disciplines today. Given the unique importance of insects in biodiversity and ecosystem processes, their roles in crop production and public health, and their value as model organisms for the exploration of basic scientific questions, there is demand for graduates who have acquired entomological expertise.

The Entomology Program is a component of the Agricultural Experimentation Station, which has many research facilities for students and staff, including farms, greenhouses, an aquatic insect laboratory, and a forest insect research laboratory. In addition to OSU faculty, state and federal entomologists stationed across the state are available for consultation.
in their fields of specialization. The Oregon State Arthropod Collection has nearly 3,000,000 specimens of insects and mites and is a recognized center for research in insect systematics and biodiversity.

**ENT 101. INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE.** (1 Credit)
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as CROP 101, SOIL 101.

**ENT 300. *PLAGUES, PESTS, AND POLITICS.** (3 Credits)
Integration and interaction of agricultural and public health aspects of entomology in society and history. CROSSLISTED as HORT 330. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: BI 300, HORT 330

**ENT 311. INTRODUCTION TO INSECT PEST MANAGEMENT.** (4 Credits)
Identification, biology and management of injurious and beneficial insects. Concurrent laboratory is designed to provide hands-on experience with identification of insect groups of relevance to agricultural cropping systems. Lec/lab.

**ENT 322. HONEY BEE BIOLOGY AND BEEKEEPING.** (3 Credits)
In this introduction to the fascinating honey bee and its biology, honey bees are used as model organisms to illustrate general principles of biology, entomology, and sociobiology. Students will learn the basics of beekeeping, have an opportunity to manipulate honey bee colonies, and gain hands-on experience, prevailing winter weather permitting.

**ENT 331. *POLLINATORS IN PERIL.** (3 Credits)
Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world. CROSSLISTED as HORT 331. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: HORT 331

**ENT 401. RESEARCH.** (1-16 Credits)
Work on approved problems carried on in the library, laboratory or field. This course is repeatable for 16 credits.

**ENT 403. THESIS.** (1-16 Credits)
This course is repeatable for 16 credits.

**ENT 405. READING AND CONFERENCE.** (1-16 Credits)
Reading and discussions on special topics. This course is repeatable for 16 credits.

**ENT 407. SEMINAR.** (1-2 Credits)
Graded P/N. This course is repeatable for 16 credits.

**ENT 410. INTERNSHIP.** (1-16 Credits)
This course is repeatable for 16 credits.

**ENT 420. INSECT ECOLOGY.** (3 Credits)
Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered on even years.

**ENT 440. ISSUES IN INSECT TOXICOLOGY.** (3 Credits)
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.

**ENT 444. INSECT AGROECOLOGY.** (3 Credits)
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as HORT 444.

**ENT 499. SPECIAL TOPICS.** (1-6 Credits)
Equivalent to: FW 499
This course is repeatable for 6 credits.

**ENT 501. RESEARCH.** (1-16 Credits)
Work on approved problems carried on in the library, laboratory or field. This course is repeatable for 16 credits.

**ENT 503. THESIS.** (1-16 Credits)
This course is repeatable for 999 credits.
ENT 505. READING AND CONFERENCE. (1-16 Credits)
Reading and discussions on special topics.
This course is repeatable for 16 credits.

ENT 507. SEMINAR. (1-2 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ENT 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ENT 509. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSTLISTED as CROP 509, PBG 509, SOIL 509.
Equivalent to: CROP 509, PBG 509, SOIL 509
This course is repeatable for 9 credits.

ENT 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENT 518. CURRENT TOPICS IN ENTOMOLOGY. (2 Credits)
This is a core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSTLISTED as HORT 518.
Equivalent to: HORT 518
This course is repeatable for 12 credits.

ENT 520. INSECT ECOLOGY. (3 Credits)
Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered every year.

ENT 540. ISSUES IN INSECT TOXICOLOGY. (3 Credits)
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.

ENT 542. PRINCIPLES OF INTEGRATED PEST MANAGEMENT: SYSTEMS DESIGN. (4 Credits)
Principles of integrated pest management design focusing on the use of systems analysis as a means to integrate management tactics, environmental and biological monitoring, pest control models, and implementation elements into a cohesive whole. Introduction to integrated pest management on websites. Students will design a hypothetical crop-pest management system. Lec/lab.

ENT 544. INSECT AGROECOLOGY. (3 Credits)
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSTLISTED as HORT 544.
Equivalent to: HORT 544

ENT 599. SPECIAL TOPICS. (1-16 Credits)
Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering.
This course is repeatable for 16 credits.

ENT 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ENT 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ENT 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENT 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ENT 609. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, PBG 609, SOIL 609
This course is repeatable for 9 credits.

ENT 699. SPECIAL TOPICS. (1-16 Credits)
Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering.
This course is repeatable for 16 credits.

Entomology Graduate Major (MA, MS, PhD)

Graduate Areas of Concentration

Entomology

The Entomology Graduate Program offers qualified candidates opportunities for graduate study and research leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. In keeping with traditional areas of strength at the university, a number of major research programs in entomology deal with problems in agriculture, forestry, and environmental quality. Integrated pest management techniques are emphasized in the solution of many of these problems.

There are no specific course requirements for entomology graduate degrees. Each student will work with their major professor and/or graduate committee to establish a program of study.

For additional information on the Entomology Graduate Program, see the program website at http://entomology.oregonstate.edu/.

Major Code: 5350

Entomology Graduate Minor

Minor Code: 5350

Entomology Minor

The Entomology minor is available to all OSU students. A minimum of 27 credits is required, at least 12 of which must be upper-division credits.
Students who wish to enter the program should have a BS degree (or equivalent) in a science related field and are expected to select an MS or PhD curriculum related to their own area of specialization. Students will take a core set of courses and will attend and participate in the toxicology seminar class. Courses in toxicology also may be taken by students in engineering or the basic sciences.

**PhD Preliminary Exam Guidelines**

**Objective**

The overall objective of the preliminary examination for advancement to PhD candidacy should assess whether a graduate student has the capacity and promise to:

1. understand the basic science of environmental and molecular toxicology;
2. be a creative and critical thinker;
3. understand the scientific literature;
4. conduct original and independent research; and
5. communicate the ideas and results of experiments.

Thus, the ideal examination format would select from these characteristics and prepare the student for the selective pressures that will be encountered upon completing the Environmental and Molecular Toxicology PhD degree program. In order to maintain high standards and produce quality graduate students, the examination must be rigorous and challenging. In addition, the exam format should set specific limits on the amount of time that the student dedicates to this process.

**Exam Format**

The preliminary examination format outlined below consists of both oral and written elements. This examination must be completed no later than the end of the eighth academic term (not including summer terms) after entering the program. In most cases, the student would schedule the exam in the fall term of the third year of residence although students entering the program. In most cases, the student would schedule the exam in the fall term of the third year of residence although students may take the exam earlier, after completing at least one year in the program. The examination consists of a written and oral presentation of a research proposal that cannot be closely related to the student’s thesis project. As outlined, the student’s ability to develop, research, and defend original scientific ideas would be evaluated. The student is expected to demonstrate a capacity for critical thinking and a command of the specific field of focus. In addition, the student’s general knowledge of environmental and molecular toxicology would be evaluated.

**Procedural Outline**

**Research Proposal (written/oral)**

1. Student submits outline descriptions (required elements listed below) of two potential research projects. The subject of each project must be chosen by the student based on their knowledge and review of the literature, and must describe original, hypothesis-driven research. The proposed projects cannot have been defined previously in published or unpublished form (i.e., manuscript, abstract, database of funded projects, submitted grant application, etc.), or cannot be known to be in progress. Proposed research also must not be closely related to the thesis research of the student. “Closely related” is defined as any research that conceivably might be part of the student’s thesis or that conceivably might be initiated by the student’s major professor.

**Project outlines (limited to one page each) must include:**

a. Description of an unresolved question relevant to the field of environmental and molecular toxicology. (1–3 sentences)

b. Statement of specific hypothesis to be tested. (1–2 sentences)
c. Description of an experimental approach designed to test the hypothesis, including a minimum of two specific aims, and a statement of the rationale (justification) for the proposed approach. (2–6 sentences)

d. Statement of the significance of the proposed research. (1–2 sentences)

2. The student’s graduate committee reviews both outlines and approves one topic to be developed into a written proposal. The research topic is chosen based on originality, quality, potential significance, and the likelihood of expanding the student’s education and training. Approval of the topic would occur within one week after the outlines are submitted. During this period, the outlines would be returned to the student, and the student would receive feedback from the committee concerning the quality and design of the outlined projects. Major strengths and weaknesses in the experimental design or rationale would be identified.

3. The student develops a written research proposal using the format and topic guidelines of application for the EPA, NIH, NSF, or other appropriate granting agency. The written proposal must be completed and returned to the committee within four weeks after the topic was approved. The scope of the project will be equivalent to that of a "pilot project" proposal and if conducted would be expected to take approximately one year of research time. The proposal is limited in length to 10 pages of double-spaced text (12 point font with 0.5-inch margins), and must include the following elements:

a. **Specific Aims.** State concisely and realistically what the research described in this application is intended to accomplish and what hypothesis is to be tested. Do not exceed one page.

b. **Background and Significance.** Briefly describe the background to the present proposal, critically evaluating the existing literature and specifically identifying gaps, which the project is intended to fill. State concisely the importance of the research described in this application, and relate the specific aims to the long-term objectives. Limited to two pages.

c. **Research Design and Methods.** Discuss in detail the experimental design and procedures to be used to accomplish the specific aims of the project. Describe the protocols to be used and the tentative sequence of investigation. Include the means by which the data will be analyzed and interpreted. Discuss the potential difficulties and limitations of the proposed research and alternative approaches to achieve the aims. Point out any procedures, situations, or materials that may be hazardous to personnel and the precautions to be exercised. Limited to seven pages.

d. **Literature Cited.** Do not scatter literature citations throughout the text. List them at the end of the proposal. All papers cited in the text must be listed in the reference list and vice versa. The list of literature citations at the end of the proposal does not count toward the 10-page limit.

e. **Appendix.** Students may include additional figures in an appendix, limited to five pages. The appendix may not be used to circumvent the page limits of the proposal.

4. The oral exam should be scheduled within two weeks of completion of the written proposal. This deadline can be extended with the approval of the student’s graduate committee.

5. During the exam, the student would present the research plan and defend the experimental approach. The presentation would involve a seminar format with slides/overheads and would be expected to last no longer than 30 minutes. Following the presentation, the student would be judged on the soundness of the hypothesis, their understanding of the subject matter, their ability to defend the proposed experimental design, and their general knowledge of the field of environmental and molecular toxicology. The exam is expected to last approximately two hours and is limited in length to three hours.

**Examination Committee**

The examination committee is the graduate student’s doctoral committee. The doctoral committee consists of a minimum of five members of the graduate faculty, including at least two members of the major department and a representative of the Graduate Council. If a minor is declared, the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student’s committee. The major professor would serve as the chairperson of the committee to oversee the exam. The decision concerning whether the student merits advancement to PhD candidacy would be the responsibility of the examination committee.

**Evaluation**

The basic question for the committee is whether or not they believe the student is adequately prepared to conduct doctoral level research and has a good chance of successfully completing such research. Following a discussion of the student’s performance on the examination, each committee member is then asked to vote on the basic question. It is inappropriate for secret ballots to be used, and secret ballots must be used if requested by any committee member.

If there is one negative vote on this question, the student will **pass**. If there are two or more negative votes on this question, the student will **not pass**.

If the committee decision is that the student has not passed the examination, the committee must then decide whether or not to allow the student to take a **re-examination**. If the majority of the committee votes in favor of a re-examination, the recommendation for re-examination should be recorded. In addition, the committee must set a time interval that must elapse before the re-examination is permitted. If the majority of the committee votes against a re-examination, the recommendation to terminate the student’s work toward this degree should be recorded.

Adjunct/Courtesy/Affiliate Faculty

Allen, Fairbrother, Gold, Ho, Iversen, Kisby, Koop, Lein, Proteau, Simon, Stubbeifield, Turker

**TOX 360. *THE WORLD OF POISONS.* (3 Credits)
Provides a basic understanding of how we are exposed and respond to chemicals, examples of human diseases associated with toxic insult, the role of technology and the interface of society and toxicology in risk perception and legislation. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

**TOX 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.**

**TOX 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.**

**TOX 411. FUNDAMENTALS OF TOXICOLOGY. (3 Credits)
Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations.

Prerequisites: BB 350 (may be taken concurrently) with D- or better or BB 450 (may be taken concurrently) with D- or better or BB 490 (may be taken concurrently) with D- or better

**TOX 429. TOXIC SUBSTANCES IN FOOD. (3 Credits)
Toxicology and epidemiology of human exposures to pesticides and food toxicants.

Prerequisites: BB 350 (may be taken concurrently) with D- or better or BB 450 (may be taken concurrently) with D- or better or BB 490 (may be taken concurrently) with D- or better

**TOX 430. CHEMICAL BEHAVIOR IN THE ENVIRONMENT. (3 Credits)
Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment.

Prerequisites: CH 123 with D- or better or CH 331 with D- or better

**TOX 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK. (3 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/FES 535, FES 435H, MCB 535. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

**TOX 435H. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK. (3 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as BI 435H, FS 435H. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator

Equivalent to: FES 435, TOX 435

**TOX 455. ECOTOXICOLOGY: AQUATIC ECOSYSTEMS. (3 Credits)
Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish.

Prerequisites: CH 331 with D- or better

**TOX 490. ENVIRONMENTAL FORENSIC CHEMISTRY. (3 Credits)
Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations.

**TOX 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

**TOX 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

**TOX 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

**TOX 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

**TOX 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

**TOX 511. FUNDAMENTALS OF TOXICOLOGY. (3 Credits)
Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations.

Prerequisites: BB 550 (may be taken concurrently) with C or better or BB 590 (may be taken concurrently) with C or better

**TOX 512. TARGET ORGAN TOXICOLOGY. (3 Credits)
Examination of toxicological effects of chemicals at organ level. Normal physiology of the organ system is received.

Prerequisites: TOX 511 with C or better

**TOX 513. ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT. (3 Credits)
Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed.

Prerequisites: TOX 411 with D- or better

**TOX 529. TOXIC SUBSTANCES IN FOOD. (3 Credits)
Toxicology and epidemiology of human exposures to pesticides and food toxicants.

Prerequisites: TOX 511 with C or better

**TOX 530. CHEMICAL BEHAVIOR IN THE ENVIRONMENT. (3 Credits)
Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment.
### TOX 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK. (3 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSTLISTED as FES 435/FES 535, FES 435H, MCB 535.
Equivalent to: FES 535, MCB 535

### TOX 554. GENOME ORGANIZATION, STRUCTURE, AND MAINTENANCE. (4 Credits)
How diverse organisms store their individual sets of genetic information (genomes). Evolution of genomes and gene families. Structures of DNA and chromosomes. Biochemical and regulatory pathways that protect cellular genomes against environmental and endogenous damage and ensure transmission of faithful copies to progeny. Remodeling of genomes by recombination and transposition. CROSSTLITED as MCB 554.
Equivalent to: MCB 554

### TOX 555. ECOTOXICOLOGY: AQUATIC ECOSYSTEMS. (3 Credits)
Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish.

### TOX 575. ADVANCED XENOBIOTIC METABOLISM AND DISPOSITION. (2 Credits)
Course will focus on structure, function and regulation of specific proteins that function in uptake, distribution, metabolism, and excretion of drugs and other chemicals that are foreign to the body (xenobiotics). The course will focus on proteins which are termed Phase I and Phase II xenobiotic metabolizing enzymes and xenobiotic transporters. There will be an emphasis on Cytochrome P450 enzymes and hepatic and renal xenobiotic transporter proteins and their key roles in xenobiotic metabolism and excretion.

### TOX 590. ENVIRONMENTAL FORENSIC CHEMISTRY. (3 Credits)
Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations.

### TOX 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

### TOX 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

### TOX 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

### TOX 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

### TOX 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

### TOX 611. TESTING FOR GENOTOXICITY. (4 Credits)
A lab-based course geared toward toxicology, biochemistry, biology, food science, nutrition, pharmacy and MCB students. Introduces principles and methods of several key assays used to screen for DNA damage and mutation. These tests will include the following: (i) Salmonella mutagenicity assay (Ames test), (ii) single cell gel electrophoresis (‘comet’) assay, (iii) micronucleus assay, and (iv) PCR-based single strand conformation polymorphism (SSCP) screening for oncogene/tumor suppressor gene mutation in cancers. This 2-week, intensive lab/lecture class runs Mon-Fri in the LPSC during the first session of summer term. Each day includes laboratory work and a 2-hour lecture covering basic principles of the assays, as well as technical details of the experiment for the day.
Prerequisites: TOX 514 with C or better

### TOX 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

### TOX 808. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

---

### Toxicology Graduate Major (MS, PhD)

#### Graduate Areas of Concentration

Environmental chemistry and ecotoxicology, mechanistic toxicology, molecular and cellular toxicology, neurotoxicology

The Department of Environmental and Molecular Toxicology provides students with a fundamental knowledge of toxicology that prepares them for responsible positions in research and development, academia, government, professional services, or research foundations.

The graduate faculty includes scientists with a special interest in the application of chemistry, biochemistry, molecular biology, pharmacology, pathology, neuroscience, immunology and ecology to problems in toxicology. The concentration in neurotoxicology is an interinstitutional alliance with Oregon Health and Science University (OHSU). Students will be affiliated with and advised by associated faculty.

For the MS, and PhD degrees, students are required to take a core curriculum plus elective courses connected with their particular area of specialization. In addition to completing appropriate course work, students will undertake a thesis research project related to some aspect of toxicology. Participation in the seminar program (a one-hour per week seminar) is mandatory.

Minimal prerequisites for admission include one year each of biology, organic chemistry, physics, and statistics. Students who do not meet all of these requirements may be admitted if their academic record is otherwise outstanding.

Fisheries and Wildlife Department

Fisheries and wildlife prepares students for professional careers in fisheries and wildlife as research scientists, biologists, managers, educators, and administrators. Oregon State University is strategically located for the study of fisheries and wildlife, surrounded by diverse ecosystems including the Pacific Ocean and coastal estuaries, many small and large rivers, valleys, mountains and the high desert. Courses include traditional classroom experiences and laboratories, often enriched by field trips to nearby state fish hatcheries, national forests and wildlife refuges. We also offer experiential learning opportunities at the Hatfield Marine Science Center on the coast in Newport. In addition to our full-time faculty, FW students benefit from courses and mentoring provided by scientists with the Oregon Cooperative Fish and Wildlife Research Unit, Oregon Department of Fish and Wildlife, and several federal research centers.

The undergraduate curriculum is designed to develop a solid background in biology and ecology for our students as the basis for careers in resource science, conservation, and management. However, FW is not simply a biological discipline. Professionals must weigh social considerations when formulating conservation and management strategies and policies. Consequently, biological, social, economic, and political science courses are integrated into the curriculum. The undergraduate curriculum is composed of core courses and a specialization. The core represents the educational foundation for fish and wildlife conservation while the specialization provides each student with an opportunity to build a curriculum to meet specific goals. Our capstone courses emphasize critical thinking in natural resource science and management, as well as science communication and outreach. Students planning to transfer to FW should focus on courses in general biology, general chemistry, physical science, and mathematics during their freshman and sophomore years.

Transfer Students

Because of the technical and professional nature of the college’s curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college’s curricular requirements. In general, equivalent college-level courses successfully completed at an accredited college or university are accepted. OSU students requesting a transfer to the College of Agricultural Sciences’ Department of Fisheries and Wildlife must be a student in good academic standing at the university. Please contact the departmental head advisor at 541-737-1941 for additional information.

Graduate Program

Graduate programs leading to the PSM, MS, or PhD (and participation in the MAIS degree program) permit intensive study in special areas of interest under the guidance of nationally known scientists. Advanced study in fisheries science may be pursued in stream ecology, aquaculture, population dynamics in response to exploitation, ecology of marine and freshwater fishes, taxonomy and systematics, genetics, toxicology, and parasites and diseases of fish. Advanced study in wildlife science can involve almost any invertebrate or vertebrate species, biotic community or habitat. Research emphasis may be placed on population dynamics and utilization, life history and ecology, conservation biology, habitats, nutrition, physiology, behavior, and organization of animal communities. Opportunities exist for work in terrestrial, marine and aquatic systems.

**Fisheries and Wildlife**

**FW 107. ORIENTATION TO FISHERIES AND WILDLIFE.** (1 Credit)  
Information relevant to academic pathways and career planning in the fields of fisheries and wildlife. Graded P/N.

**FW 112. SCIENCE OF FLY FISHING TROUT.** (1 Credit)  
Uses fly fishing as a window into the larger world of science, art, and conservation, and more specifically into the structure and function of freshwater ecosystems. This class requires students to be concurrently registered for The Literature of Fly Fishing for Trout through English (ENG 225), and the Art of Fly Fishing through Physical Activity Courses (PAC 331).  
Corequisites: ENG 225, PAC 331

**FW 113. INTRODUCTION TO MARINE LIFE IN THE SEA-MARINE BIRDS AND MAMMALS.** (1 Credit)  
Introduces first- and second-year undergraduates, teachers and non-degree students to the breadth of marine science course offerings and research at Oregon State University’s Hatfield Marine Science Center located in Newport, Oregon. Using an experiential based format, students collect field data to better understand marine mammals (whales, dolphins and porpoises), seabirds, and their interactions with their environment. Lec/lab. Graded P/N.

**FW 199. SPECIAL STUDIES.** (1-16 Credits)  
Graded P/N.  
Equivalent to: FW 199H  
This course is repeatable for 16 credits.

**FW 199H. SPECIAL STUDIES.** (1-16 Credits)  
Graded P/N.  
Attributes: HNRS – Honors Course Designator  
Equivalent to: FW 199  
This course is repeatable for 16 credits.

**FW 209. CAREER SKILLS IN FISHERIES AND WILDLIFE SCIENCES.** (1 Credit)  
A foundation for life-long career development in fisheries and wildlife sciences. Practice the skills needed to search, apply, and attain internships and jobs. Graded P/N.  
Prerequisites: FW 107 with P or better

**FW 251. PRINCIPLES OF FISH AND WILDLIFE CONSERVATION.** (3 Credits)  
History of conservation and natural resource use; ecological principles, and social and economic limitations of conservation; principles and practices of wildlife and fisheries management; role of research in management.

**FW 255. FIELD SAMPLING OF FISH AND WILDLIFE.** (3 Credits)  
Introduction to sampling populations and communities of vertebrate animals emphasizing sampling design, collection and management of data, and communication of results.

**FW 289. COMMUNICATION SKILLS FOR FISHERIES AND WILDLIFE PROFESSIONALS.** (4 Credits)  
Introduces students to the theoretical and practical dimensions of interpersonal and public communication in a natural resource management field. Lec/rec.

**FW 301. FIELD TECHNIQUES FOR MARINE MAMMAL CONSERVATION.** (1 Credit)  
A laboratory and hands-on experience covering field techniques, computer software for data organization and analyses, and understanding the practical management conservation application for students who are taking or have taken FW/BI 302, Biology and Conservation of Marine Mammals. Taught summer term at HMSC, Newport, OR.  
Prerequisites: BI 302 (may be taken concurrently) with D- or better or FW 302 (may be taken concurrently) with D- or better

**FW 302. BIOLOGY AND CONSERVATION OF MARINE MAMMALS.** (4 Credits)  
An examination of the biology of whales, pinnipeds, and other marine mammals, including general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions; including conservation issues. CROSSTLISTED as BI 302. Taught at Hatfield Marine Science Center OR online through Ecampus.  
Equivalent to: BI 302

**FW 303. SURVEY OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCE.** (3 Credits)  
Concepts underlying geographic information systems, global positioning system, and remote sensing; application to management and research, data quality issues, and case studies. Not a lab/skills class.

**FW 307. SPECIALIZATION DEVELOPMENT.** (1 Credit)  
Students will examine career alternatives, develop career goals, learn what knowledge, skills, and abilities are important for diverse careers in fisheries and wildlife conservation, and develop an academic and lifelong plan for achieving their career goals. This course is intended to assist students in developing a specialization in fisheries and wildlife sciences. Graded P/N.

**FW 311. ORNITHOLOGY.** (3 Credits)  
Survey of the adaptations of birds to a diverse array of habitats. Topics include origins, anatomy, reproductive strategies, migration, flight, behavior, physiology, nutrition, and conservation.
FW 312. SYSTEMATICS OF BIRDS. (2 Credits)
External anatomy, classification of birds of the world, and field identification of birds by sight and song. Field trips required.

FW 315. ICHTHYOLOGY. (3 Credits)
A survey of the diversity of biological adaptations of fishes. Topics include physiological and zoogeographical adaptations, reproduction, evolution, cladogenesis, morphology, behavior, and genetics.

FW 316. SYSTEMATICS OF FISHES. (3 Credits)
Phylogenetic diversity, evolution, relationships and identification of the world's fishes, with particular focus on Oregon fishes. Includes identification, anatomy, use of keys, introduction to the comparative method, systematic theory, taxonomy, field collection and specimen curation. Lec/lab.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 212H [D-] or BI 205 [D-]) and (BI 213 [D-] or BI 213H [D-] or BI 206 [D-])

FW 317. MAMMALOLOGY. (3 Credits)
A survey of the origins, evolution, diversity, and adaptations of mammals to diverse environments. Topics include taxonomy, reproduction, sensory perception, herbivory, population cycles and behavior.

FW 318. SYSTEMATICS OF MAMMALS. (2 Credits)
A survey of the phylogenetic diversity of the mammals in Oregon from a habitat/community perspective. Identifying, using keys, and measuring specimens will be stressed.

FW 320. INTRODUCTORY POPULATION DYNAMICS. (4 Credits)
Principles and concepts of population dynamics related to fish and wildlife populations; methods of estimating abundance, mortality, sustainable harvest levels and extinction risk; hands-on introduction to models for population analysis. Lec/lab.
Prerequisites: BI 370 (may be taken concurrently) with D- or better or BI 370H (may be taken concurrently) with D- or better or BI 371 (may be taken concurrently) with D- or better

FW 321. APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY. (3 Credits)
Perspectives in community and ecosystem ecology, and their use in management of fisheries and wildlife resource systems.
Prerequisites: FW 320 (may be taken concurrently) with D- or better

FW 323. MANAGEMENT PRINCIPLES OF PACIFIC SALMON IN THE NORTHWEST. (3 Credits)
Explores the nature of the salmon problem in the Northwest. Experts from diverse disciplines describe principles of salmon biology, habitat ecology and management, socioeconomic of direct and indirect users, and government policies.

FW 324. *FOOD FROM THE SEA. (3 Credits)
Where does seafood come from, and how does seafood arrive on a plate? How productive are the world's oceans, and can the oceans continue to produce enough to feed (and employ) the masses? How do different cultures, ethnicities, and regions of the world rely upon food from the sea for daily meals? Food from the Sea is an exploration of the cultural, societal, economic, practical, and environmental features of the protein that feeds billions. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

FW 325. *GLOBAL CRISIS IN RESOURCE ECOLOGY. (3 Credits)
Historical and contemporary implications of the impacts of burgeoning human populations on rates and patterns of global ecological change. Changes in ecosystem processes and crises of species extinction in the context of cultural and political institutions. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

FW 326. INTEGRATED WATERSHED MANAGEMENT. (3 Credits)
A comprehensive approach to watershed management, one that includes biophysical, socioeconomic, planning and education related topics. Intended for students interested in the sustainable management of natural resources.

FW 328. WILDLIFE CAPTURE AND IMMOBILIZATION. (2 Credits)
Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations. CROSSLISTED as VMB 328. Lec/lab.
Equivalent to: VMB 328
This course is repeatable for 4 credits.

FW 331. ECOLOGY OF MARINE AND ESTUARINE BIRDS. (4 Credits)
Focusing on how marine and estuarine birds are adapted for life at sea. Topics include morphology, physiology, foraging ecology, and biogeography as well as introductory oceanography. Field trips.

FW 340. *MULITCULTURAL PERSPECTIVES IN NATURAL RESOURCES. (3 Credits)
Explores multicultural influences on development of natural resources in the American West. Effects of diverse social values on changes in the physical landscape and biodiversity. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FW 341. FISH AND WILDLIFE LAW ENFORCEMENT. (2 Credits)
Provides a general background to endangered species biology, and the social and economic implications of the legislation enacted to conserve endangered species (Endangered Species Act, CITES Treaty). (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

FW 345. *GLOBAL CHANGE BIOLOGY. (3 Credits)
Global Change Biology is the study of the impact of climate change on natural systems and actions to mitigate (slow) or adapt to climate change. Global climate change is having dramatic effects on natural resources including fish and wildlife populations and their habitats. Students will gain an understanding of the role that natural ecosystems (oceans, forests, wetlands, grasslands etc.) play in regulating the climate; how land use affects the earth's climate; how climate change will affect fish, wildlife and their habitats; and the role that managers and researchers can play in mitigating and adapting to climate change. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

FW 350. *ENDANGERED SPECIES, SOCIETY AND SUSTAINABILITY. (3 Credits)
Provides a general background to endangered species biology, and the social and economic implications of the legislation enacted to conserve endangered species (Endangered Species Act, CITES Treaty). (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FW 356. *CITIZEN SCIENCE. (3 Credits)
Citizen science involves non-specialists in scientific studies addressing large challenges best solved through collaboration. Citizens contribute data scientists may not otherwise be able to obtain, while improving their understanding of the scientific process, integrating technology into the learning process, and generating new knowledge for society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
FW 360. *ORIGINS OF F&W MANAGEMENT-EVOLUTION, GENETICS, AND ECOLOGY. (3 Credits)
Examines genetics and human interactions with fisheries and wildlife from an ecological and evolutionary perspective. Basic principles of environmental interactions, and how humans interact with other species and their environments in the disciplines commonly recognized as fisheries, wildlife and conservation sciences. (Baccalaureate Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FW 366. ENVIRONMENTAL CONTAMINANTS IN FISH AND WILDLIFE. (3 Credits)
Environmental contamination is an important threat to many fish and wildlife populations and the habitats upon which they rely. The field of ecotoxicology links the ecology of fish and wildlife with toxicology of environmental contaminants, and so spans political, scientific, and public relations realms. Through the pairing of introductory concepts with key case studies, this course provides students with a preparatory framework for understanding toxicological issues of importance for those focused on studying, managing or conserving fish and wildlife populations.
Prerequisites: (BI 204 with D- or better or BI 211 with D- or better or BI 211H with D- or better) and (BI 205 [D-] or BI 212 [D-] or BI 212H [D-])

FW 370. CONSERVATION GENETICS. (4 Credits)
A foundational course in preparation for a degree in Fisheries and Wildlife or other degrees focused on conservation of natural resources. Covers a broad range of topics associated with issues surrounding genetics that working professionals in the biological sciences should be conversant about. One of the most important aspects of the course is the development of problem-solving and critical-thinking skills.
Prerequisites: (BI 211 with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 205 [D-]) and (BI 213 [D-] or BI 206 [D-])

FW 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

FW 403. THESIS. (1-16 Credits)
This course is repeatable for 32 credits.

FW 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FW 407. SEMINAR. (1-16 Credits)
Graded P/N. Taught at Hatfield Marine Science Center.
Equivalent to: FW 407H
This course is repeatable for 16 credits.

FW 407H. SEMINAR. (1-16 Credits)
Graded P/N. Taught at Hatfield Marine Science Center.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 407
This course is repeatable for 16 credits.

FW 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

FW 410. INTERNSHIP. (1-6 Credits)
This course is repeatable for 99 credits.

FW 415. FISHERIES AND WILDLIFE LAW AND POLICY. (3 Credits)
Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources.

FW 419. THE NATURAL HISTORY OF WHALES AND WHALING. (3 Credits)
Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management.

FW 421. AQUATIC BIOLOGICAL INVASIONS. (4 Credits)
An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. CROSSLISTED as BI 421. Taught at Hatfield Marine Science Center OR online through Ecampus.
Equivalent to: BI 421

FW 422. INTRODUCTION TO OCEAN LAW. (3 Credits)
Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.

FW 426. COASTAL ECOLOGY AND RESOURCE MANAGEMENT. (5 Credits)
Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab.

FW 427. PRINCIPLES OF WILDLIFE DISEASES. (4 Credits)
Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations.

FW 434. ESTUARINE ECOLOGY. (4 Credits)
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as OC 434/OC 534.
Equivalent to: OC 434

FW 435. ESTUARINE HYDROLOGY I. (4 Credits)
Examines the relationships between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required; transportation fee charged. OSU Ecampus students are not required to attend field trips. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FW 439. *HUMAN DIMENSIONS OF FISHERIES AND WILDLIFE MANAGEMENT. (3 Credits)
Students build an understanding and appreciation for the role of human dimensions (HD) in fisheries and wildlife management. Students work both independently and in groups on assignments with an HD focus. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FW 445. ECOLOGICAL RESTORATION. (4 Credits)
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. Lec/lab/rec. CROSSLISTED as FES 445.
Equivalent to: FES 445
FW 451. AVIAN CONSERVATION AND MANAGEMENT. (3 Credits)
Identification, classification, life history strategies, ecology and management of upland and migratory birds.

FW 452. BIODIVERSITY CONSERVATION IN MANAGED FORESTS. (3 Credits)
Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSTLISTED as FES 452.
Equivalent to: FES 452

FW 454. *FISHERY BIOLOGY. (4 Credits)
Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: FW 315 with D- or better and FW 320 [D-]

FW 456. FRESHWATER ECOLOGY AND CONSERVATION. (5 Credits)
Physical, chemical, biological, and environmental concepts in continental aquatic systems. Includes techniques related to assessing aquatic resources their management and conservation. Lec/lab.
Prerequisites: BI 370 with D- or better or BI 371 with D- or better

FW 458. MAMMAL CONSERVATION AND MANAGEMENT. (4 Credits)
A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs.

FW 462. ECOSYSTEM SERVICES. (3 Credits)
Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts.

FW 464. MARINE CONSERVATION BIOLOGY. (3 Credits)
Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats.
Prerequisites: BI 370 with D- or better or BI 370H with D- or better

FW 465. MARINE FISHERIES. (4 Credits)
A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered fall term in odd years.

FW 467. ANTARCTIC SCIENCE AND CONSERVATION. (4 Credits)
Explores the history, geology, climate, and ecosystems of Antarctica, with special emphasis on current conservation issues.

FW 469. METHODS IN PHYSIOLOGY AND BEHAVIOR OF MARINE MEGAFANA. (3 Credits)
An in-depth study of marine megafauna (mammals, birds, turtles) with an emphasis on methods and analyses of behavior and physiology for conservation. Lab and field exercises include investigations into the behavior–physiology nexus of diving, migration, thermoregulation, energy expenditure, and mating systems. Research techniques to be explored will include, for example, tracking and remote biotelemetry monitoring technologies, respirometry, genetics, and direct field study observation. Theoretical approaches, field techniques and statistical analyses will help prepare students for a career in fisheries or wildlife science. Lec/lab. Taught at HMSC.

FW 470. *ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN. (3 Credits)
Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FW 471. ENVIRONMENTAL PHYSIOLOGY OF FISHES. (4 Credits)
Principles of the functional biology of fishes with emphasis on environmental interactions and management implications.

FW 473. FISH ECOLOGY. (4 Credits)
Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems. Lec/lab/rec.
Prerequisites: (BI 370 with D- or better or BI 370H with D- or better) and FW 315 [D-]

FW 474. EARLY LIFE HISTORY OF FISH. (4 Credits)
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years.

FW 475. WILDLIFE BEHAVIOR. (4 Credits)

FW 476. FISH PHYSIOLOGY. (4 Credits)
Physiological specializations and adaptations of major groups of fishes.
Prerequisites: FW 315 with D- or better

FW 477. AGE AND GROWTH OF FISH. (3 Credits)
An overview of the terminology, theory, assumptions, limitations, error, and processing and ageing techniques for different types of calcified structures used to age fishes.
Prerequisites: FW 454 with D- or better

FW 479. WETLANDS AND RIPARIAN ECOLOGY. (3 Credits)
Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored.

FW 481. WILDLIFE ECOLOGY. (3 Credits)
Interrelationships of wildlife, environmental change. Predicting and measuring responses of wildlife to altered habitat conditions.
Prerequisites: BI 370 with D- or better or BI 370H with D- or better or BI 371 with D- or better
FW 488. PROBLEM SOLVING IN FISHERIES AND WILDLIFE SCIENCE. (3 Credits)
A capstone course designed to introduce students to the synthesis of scientific information on species, habitats and ecosystems and the use of such data in shaping fisheries and wildlife conservation, management and policy. Includes a group problem-solving project and case studies. For FW majors in their senior year.
Prerequisites: FW 320 with D- or better and FW 321 (may be taken concurrently) [D-]

FW 489. EFFECTIVE COMMUNICATIONS IN FISHERIES AND WILDLIFE SCIENCE. (3 Credits)
Centers on the synthesis and interpretation of data and effective communication of that information in written and oral communication to diverse audiences including scientists, managers, administrators and the general public.

FW 491. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE. (3 Credits)
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as MB 491/MB 591.
Equivalent to: MB 491

FW 493. FIELD METHODS FOR MARINE RESEARCH. (3 Credits)
The primary focus is providing hands-on experience in a small class exploring various field sampling methodologies, research planning logistics, and field operations in estuary and nearshore environments. Topics covered include measurement and collection methods, animal handling techniques, equipment care and handling, sampling strategy, experimental design, data management planning and, if possible, small boat work.

FW 496. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB. (2 Credits)
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as MB 496/MB 596.
Equivalent to: MB 496

FW 497. AQUACULTURE. (3 Credits)
Principles and practices for the aquaculture of fish, shellfish, and algae. (Writing Intensive Course.)
Attributes: CWIC – Core, Skills, WIC

FW 498. AQUACULTURE LABORATORY. (3 Credits)
Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center.

FW 499. SPECIAL TOPICS IN FISHERIES AND WILDLIFE. (0-16 Credits)
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: ENT 499
This course is repeatable for 16 credits.

FW 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

FW 502. TEACHING METHODS IN FISHERIES AND WILDLIFE. (1 Credit)
This is a discussion course designed to help new GTAs and instructors who are learning the trials and tribulations of university-level teaching in our department. This is a great course for students who are interested in hearing more about teaching approaches, grading and assessment, student communication, problem students, and development of teaching

FW 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

FW 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FW 506. PROJECTS. (1-6 Credits)
Projects are synthesis papers or outreach products that are developed with a mentor from campus, a natural resource agency, or the student's place of employment. The purpose of your project is to contribute to the field of study with a product that reflects the principles and applications learned in your classes.
This course is repeatable for 12 credits.

FW 507. SEMINAR. (1-16 Credits)
Selected Topics. Taught at Hatfield Marine Science Center and Corvallis campus.
This course is repeatable for 16 credits.

FW 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

FW 510. PROFESSIONAL INTERNSHIP. (1-16 Credits)
This course is repeatable for 10 credits.

FW 514. PROFESSIONAL DEVELOPMENT: MEETING COMMUNICATIONS. (1 Credit)
Fisheries and wildlife professionals use meetings of scientists, managers and stakeholders to communicate key findings and develop consensus recommendations for policy. This 1-credit experiential learning course will expose students to a scientific or management meeting in their chosen field (fisheries, wildlife, ecology, or conservation biology) and get them to think about how meetings function as well as their content.
This course is repeatable for 3 credits.

FW 515. FISHERIES AND WILDLIFE LAW AND POLICY. (3 Credits)
Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources.

FW 519. THE NATURAL HISTORY OF WHALES AND WHALING. (3 Credits)
Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management.

FW 521. AQUATIC BIOLOGICAL INVASIONS. (4 Credits)
An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center OR online through Ecampus.

FW 522. INTRODUCTION TO OCEAN LAW. (3 Credits)
Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.

FW 523. MONITORING WILDLIFE POPULATIONS AND THEIR HABITATS. (3 Credits)
An overview of monitoring plan design and the conceptual background needed to understand and critique monitoring plans, and have the basic skills to develop and implement a monitoring program as part of an interdisciplinary team.
FW 524. INTRODUCTION TO FISHERIES ASSESSMENT. (3 Credits)
Fisheries management strategies rely on models that predict a population's responses to exploitation. This course introduces approaches commonly used to assess and evaluate the dynamics and status of a population. Provides an overview of the terminology, data requirements, underlying rationale, assumptions, limitations and uncertainty associated with stock assessments.

FW 526. COASTAL ECOCOLOGY AND RESOURCE MANAGEMENT. (5 Credits)
Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab.

FW 527. PRINCIPLES OF WILDLIFE DISEASES. (4 Credits)
Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations.

FW 528. DIVERSITY AND IDENTIFICATION OF LARVAL FISHES. (3 Credits)
Research on early life history stages of fishes has increased considerably in recent years, due to its importance in many research fields, such as fisheries science and oceanography, species conservation, systematics and morphology. Simultaneously, the ability to identify ichthyoplankton has decreased. This course is intended to provide students with an understanding of the evolutionary diversity of ichthyoplankton of the world.

FW 529. ICHTHYOPLANKTON IDENTIFICATION LABORATORY. (2 Credits)
Larval fishes are important in many research fields, and are part of many natural history collections. However, often museums are unable to provide the curatorial needs due to the lack of trained personnel. The lab will provide students with the necessary practical skills to identify larval fishes. Distinctive from the course 528, where students learn about the diversity and evolution of larval fish characters, the laboratory is designed to the identification of larvae from a real collection. Students are encouraged to bring unidentified ichthyoplankton samples or mixed species lots to the course to help with their identification.

FW 534. ESTUARINE ECOLOGY. (4 Credits)
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as OC 434/OC 534.
Equivalent to: OC 534

FW 535. WILDLIFE IN AGRICULTURAL ECOSYSTEMS. (3 Credits)
Examines the relationships between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required; transportation fee charged. OSU Ecampus students are not required to attend field trips.

FW 537. STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT. (2 Credits)
Structured decision making (SDM) is used for making natural resource management and policy decisions. It is an ideal framework for interdisciplinary teams to cooperate and identify the most effective management strategies. Graduate students from diverse backgrounds (natural resources, political science, others) are provided with an understanding of the SDM process.

FW 538. STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT LAB. (2 Credits)
Students who are taking or have taken FW 537 are provided with the understanding of and ability to employ the techniques needed to build models that are used during the structured decision-making process. The laboratory emphasizes the use of graphical models and basic statistical techniques for building decision-making models. Lec/lab.
Prerequisites: FW 537 (may be taken concurrently) with D- or better

FW 540. VERTEBRATE POPULATION DYNAMICS. (4 Credits)
Concepts in population ecology and quantitative approaches to managing wildlife populations; methods of parameter estimation, model structure, assumptions, and analysis, applications to common management issues.

FW 544. QUANTITATIVE DECISION ANALYSIS FOR FISH AND WILDLIFE MANAGEMENT. (4 Credits)
Decision analysis allows decision makers to examine the expected effects of different strategies before implementation; incorporate multiple objectives and values of stakeholders; estimate the relative influence of various sources of uncertainty; and estimate the value of collecting additional data. Quantitatively oriented graduate students in natural resources are provided with an in-depth overview of decision analysis and adaptive management, emphasizing animal population management. Lec/lab.

FW 545. ECOLOGICAL RESTORATION. (4 Credits)
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FES 545.
Equivalent to: FES 545

FW 549. HISTORY OF FISHERIES SCIENCE. (3 Credits)
Studies the development of fisheries science, professionalization of the discipline, patronage, and the political, economic, and social context in which fisheries science operates.

FW 550. TROPHIC CASCADES. (2-3 Credits)
Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. CROSSLISTED as FES 550.
Equivalent to: FES 550

FW 551. AVIAN CONSERVATION AND MANAGEMENT. (3 Credits)
Identification, classification, life history strategies, ecology and management of upland and migratory birds.

FW 552. FOREST WILDLIFE HABITAT MANAGEMENT. (4 Credits)
Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. CROSSLISTED as FES 552.
Equivalent to: FES 552

FW 554. FISHERY BIOLOGY. (4 Credits)
Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management.
FW 556. FRESHWATER ECOLOGY AND CONSERVATION. (5 Credits)
Physical, chemical, biological, and environmental concepts in continental aquatic systems. Includes techniques related to assessing aquatic resources their management and conservation. Lec/lab.

FW 558. MAMMAL CONSERVATION AND MANAGEMENT. (4 Credits)
A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs.

FW 560. PSYCHOLOGY OF ENVIRONMENTAL DECISIONS. (3 Credits)
Natural resource management and conservation programs have one thing in common: to be effective, they must consider how and why humans make decisions. This course approaches this topic from a psychological lens and will cover the psychological processes associated with making individual and group decisions, common biases and heuristics in our decision-making, and how these apply to diverse natural resource management and conservation issues. Students will learn how to take these aspects of human decision making into consideration when participating in or facilitating collaborative environmental programs.

FW 562. ECOSYSTEM SERVICES. (3 Credits)
Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts.

FW 563. CONSERVATION BIOLOGY OF WILDLIFE. (3 Credits)
Overview of the field of conservation biology with emphasis on the relationship to conservation and management of wildlife.

FW 564. MARINE CONSERVATION BIOLOGY. (3 Credits)
Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats.

FW 565. MARINE FISHERIES. (4 Credits)
A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered fall term in odd years.

FW 569. BEHAVIOR AND PHYSIOLOGY OF MARINE MEGAFAUNA. (3 Credits)
An in-depth study of marine megafauna (mammals, birds, turtles) with an emphasis on methods and analyses of behavior and physiology for conservation. Lab and field exercises include investigations into the behavior–physiology nexus of diving, migration, thermoregulation, energy expenditure, and mating systems. Research techniques to be explored will include, for example, tracking and remote biotelemetry monitoring technologies, respirometry, genetics, and direct field study observation. Theoretical approaches, field techniques and statistical analyses will help prepare students for a career in fisheries or wildlife science. Lec/lab. Taught at HMSC.

FW 570. ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN. (3 Credits)
Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. CROSSLISTED as HSTS 470/HSTS 570.

FW 571. ENVIRONMENTAL PHYSIOLOGY OF FISHES. (4 Credits)
Principles of the functional biology of fishes with emphasis on environmental interactions and management implications.

FW 573. FISH ECOLOGY AND CONSERVATION. (4 Credits)
Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems.

FW 574. EARLY LIFE HISTORY OF FISHES. (4 Credits)
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years. CROSSLISTED as OC 574.
Equivalent to: OC 574

FW 575. WILDLIFE BEHAVIOR. (4 Credits)

FW 576. FISH PHYSIOLOGY. (4 Credits)
Physiological specializations and adaptations of major groups of fishes.

FW 579. WETLANDS AND RIPARIAN ECOLOGY. (3 Credits)
Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored.

FW 580. STREAM ECOLOGY. (3 Credits)
Structure and function of stream ecosystems, with emphasis on biological processes; physical and chemical relations; riparian influences and landscape perspectives.

FW 581. WILDLIFE ECOLOGY. (3 Credits)
Interrelationships of wildlife, environment and humans. Evaluation of properties and habitats of wildlife populations.

FW 583. SPECIES RECOVERY PLANNING AND RESTORATION. (3 Credits)
The importance of communication in science is stressed and a broad knowledge of endangered species-related information is provided. Students develop the ability to critically evaluate published information in scientific literature and to present and summarize it as part of the collaborative species recovery planning process with a varied audience of stakeholders.

FW 591. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE. (3 Credits)
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as MB 491/MB 591.
Equivalent to: MB 591

FW 596. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB. (2 Credits)
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as MB 496/MB 596.
Equivalent to: MB 596

FW 597. AQUACULTURE. (3 Credits)
Principles and practices for the aquaculture of fish, shellfish, and algae.
FW 598. AQUACULTURE LABORATORY. (3 Credits)
Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center.

FW 599. SPECIAL TOPICS IN FISHERIES AND WILDLIFE. (0-16 Credits)
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: ENT 499
This course is repeatable for 99 credits.

FW 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

FW 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

FW 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FW 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

FW 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

FW 620. ECOLOGICAL POLICY. (3 Credits)
Policy issues associated with ecosystem management, risk assessment, biological diversity, ecosystem health, sustainability, invasive species, bioregionalism, globalization and transnational factors, and rights, ethics, and morals.

FW 661. ANALYSIS OF ANIMAL POPULATIONS. (5 Credits)
Quantitative methods for estimating parameters (abundance, survival, population stability) of animal populations. Emphasis is on vertebrate animals and statistical methods of hypothesis testing, parameter estimation, and inference testing. Offered odd-numbered years.

FW 699. SPECIAL TOPICS IN FISHERIES AND WILDLIFE. (1-4 Credits)
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
This course is repeatable for 8 credits.

FW 808. WORKSHOP. (1-16 Credits)

Fisheries and Wildlife Administration Graduate Major (PSM)

Also available via Ecampus.

Dr. Bruce Dugger, Associate Department Head, Director of Online Graduate Programs
Dr. Susie Dunham, Graduate Program Coordinator
Email: fw.gradadvising@oregonstate.edu
Website: https://fw.oregonstate.edu/fisheries-and-wildlife/psm-fisheries-wildlife-administration

The Professional Science Master's degree in Fisheries and Wildlife Administration (PSMFWA) provides advanced training for early- and mid-career professionals. It is taught primarily as a distance, online curriculum via Ecampus, although students may choose to work toward the PSMFWA degree while in residence at OSU or at the Hatfield Marine Science Center.

The PSMFWA degree is offered as a non-thesis program only. Students have an advisor and graduate committee to review their program of study, provide career and internship advice, and evaluate a final report based on the internship experience or capstone project.

For additional information about the FW PSM email fw.gradadvising@oregonstate.edu.

The 45-credit PSMFWA curriculum is organized into five main sections:
1. Biophysical sciences core (20 credits)
2. Social sciences core (12 credits)
3. Business communication and management skills core (6 credits)
4. Ethics (1 credit)
5. Internship (6 credits)

Course substitutions must be approved by the program coordinator.

Most of our courses are offered through Ecampus, but some may be offered through Corvallis, Cascades or Hatfield Marine Science Center. Please check course offerings through the online catalog and schedule of classes or consult with the program advisor.

Total Hours: 27-32

1. Double counting is allowed in this section
2. One course may be double counted
3. None of these courses may be double counted
* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Minor Code: 734

**Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS)**

Also available via Ecampus.

The undergraduate curriculum for the Fisheries and Wildlife Sciences BS degree (180 credits) is composed of core courses as well as specializations of 24 credits. The core represents the educational foundation of fish and wildlife conservation, and the specializations provide students with an opportunity to build their curriculum to meet specific goals. Working with faculty in formal and informal settings, students are encouraged to become engaged in designing their own education. The core courses required of all students seeking the BS degree are listed below.

For further information, see the Fisheries and Wildlife website at http://fw.oregonstate.edu/.

**Specializations**

Through the specialization, undergraduate students are encouraged to become engaged in designing their own education. Students work with faculty in formal and informal settings to define career and life goals and then develop a course of study to achieve those goals. Specialization plans should be developed during the junior year and will be presented to the faculty for review and comment. Specializations must contain at least 24 credits and must be upper division with four lower-division credits allowed. No courses included may be taken for a satisfactory/unsatisfactory (S/U) grade. A maximum of two courses may be completed prior to approval of the specialization. Additional upper-division credits taken prior to approval of the specialization may be allowed through petition to advisor. Double counting (when credit is given twice for a course) is not permitted between the specialization and other university or departmental course work except in the following circumstances:

- The writing intensive courses (WIC) may double count with the OSU Baccalaureate Core requirements;
- Students completing their first BS degree may apply 12 credits from the minor towards the specialization (requires approval by advisor in minor department and FW advisor);
- Postbaccalaureate students who are completing their second degree may use a maximum of 12 credits from their first degree towards their specialization (approved by FW advisor).

Specializations are given titles to reflect their content, but titles must not substantially duplicate titles of existing degree programs. Examples of specializations include forest wildlife management, stream ecology, fish and wildlife law enforcement, marine fisheries, aquaculture, avian conservation and management, conservation education and extension, fisheries business, human dimensions of resource management, conservation biology, and many others. Specializations may include typical on-campus courses, special field courses (when college credit is earned), a full term of course work at the Hatfield Marine Science Center in Newport, Oregon, or one or more terms of international exchange. A maximum of 12 credits in any combination of FW 401 RESEARCH and FW 410 INTERNSHIP can be used towards the specialization. Combined with required internships and a capstone course, fisheries and wildlife sciences graduates will be well-prepared to begin professional careers in fish and wildlife conservation, or to continue their education in graduate school. For those students unsure of their professional goals or seeking diversity in course work, a broad specialization may be declared.

Specialization guidelines may be viewed at http://fw.oregonstate.edu/departmen.../curricula-course-offerings.

**Internships**

One of the best avenues to a permanent job in fisheries and wildlife is through a strong internship and temporary employment or volunteer positions. Students are required to complete a minimum of two internships or other approved alternative experiences (one of each type) for their degree. There are two types of internships: exploratory (1–2 credits) and intensive (3–6 credits). Students are encouraged to start gaining professional experience by volunteering or interning with a natural resource agency as early as possible, and no later than their junior
year. This requirement is listed as FW 410 INTERNSHIP, (2 required) (4–6), under the Fisheries and Wildlife Core.

**Specialization**

Select 24 credits

**Total credits required for graduation** 180

1. No more than two courses (or lecture/lab combinations) from any one department may be used by a student to satisfy the Perspectives category of the core.

2. Please reference the baccalaureate core course catalog for a list of approved courses: https://catalog.oregonstate.edu/earning-degrees/bcc/

3. No more than two courses may be selected from one category. (CGI) and (STS) courses can double count with baccalaureate core. (CGI) and (STS) courses cannot be from the same department.

4. Cannot double count with FW Core.

*  Baccalaureate Core Course (BCC)
^  Writing Intensive Course (WIC)

**Major Code:** 733

**Notes:**
- This is a sample plan for first-year entering students on the Corvallis Campus; individual plans will be developed after consultation with our head advisor.
- Ecampus students will consult with their advisor for course planning.
- Year 1: CH 231–CH 233 and CH 261–CH 263 series is optional. WR I and COMM requirement taken this year (COMM 111 or COMM 114).
- Year 2: FW 255: Field Sampling of Fish & Wildlife can be taken any term. WR II requirement taken this year.
- Year 3: ST 351 and 352 can be taken F, W or S. *FW 410: Intensive Internship can be taken any term, usually in summer.
- Year 4: WIC course can double count with other FW requirement.

Fisheries Management Graduate Certificate

Also available via Ecampus.

Current Graduate Students: You must notify the Department of Fisheries and Wildlife of your intention to pursue this certificate. Upon consultation with the certificate program coordinator, you will be given instructions regarding listing courses on your program of study and obtaining the required signature for that form.

For more information, please see our program site at [http://ecampus.oregonstate.edu/online-degrees/graduate/fisheries-management/](http://ecampus.oregonstate.edu/online-degrees/graduate/fisheries-management/), the departmental website at [http://fw.oregonstate.edu](http://fw.oregonstate.edu) or contact the Certificate Program Director Dr. Bruce Dugger and Graduate Program Coordinator Dr. Susie Dunham at [fw.gradadvising@oregonstate.edu](mailto:fw.gradadvising@oregonstate.edu).

The certificate requires:

- A minimum of 5 courses and 18 credits of total course work;
- A Capstone Project (applying knowledge and skills to a fisheries management issue), equivalent in time and effort to a 3-credit course (FW 506 Projects);
- One Core course (FW 554 Fishery Biology);
- A minimum of one course from the Human Dimensions area;
- Two to three courses from the Fisheries Sciences and Management Subject Area
- For further information, please see our website or email: [fw.gradadvising@oregonstate.edu](mailto:fw.gradadvising@oregonstate.edu).

Courses are offered through Corvallis, at Hatfield Marine Science Center, and through Ecampus. Check the course catalog and schedule of classes for location and term offered.

Fisheries Science Graduate Major

(MS, PhD, MAIS)

Graduate Areas of Concentration

Aquaculture, conservation biology, fish genetics, ichthyology, limnology, parasites and diseases, physiology and ecology of marine and freshwater fishes, stream ecology, toxicology, water pollution biology

The Department of Fisheries and Wildlife offers graduate work leading to the Master of Science and Doctor of Philosophy degrees (and participation in the MAIS degree program) with majors in fisheries science.

Fisheries research in graduate studies involves quantitative analyses of marine and freshwater fish populations, water quality, fish systematics, fish and invertebrate physiology, stream ecology, modeling of aquatic ecosystems, land use interactions, endangered species, conservation biology, and aquaculture.
The Oregon Cooperative Fish and Wildlife Research Unit has active research programs funded in part by the Oregon Department of Fish and Wildlife and U.S. Geological Survey. The Agricultural Experiment Station, the Sea Grant program, Forest Science Laboratory and other organizations fund major research projects. The department maintains extensive collections of vertebrate species, maintained by Peter Konstantinidis as curator of vertebrates, with emphasis on larval fishes.

For more information, visit http://fw.oregonstate.edu, or email: fw.gradadvising@oregonstate.edu.

Major Code: 1300

**Fisheries Science Graduate Minor**

**Minor Code:** 1300

**Marine Conservation and Management Minor**

The Marine Conservation and Management minor focuses on marine vertebrates, conservation science, and management of living marine resources. The core is organized around the three main themes in OSU’s strategic plan of healthy planet, healthy economy, and healthy people. The elective section is broken into two groups of courses, one on species and habitats, the other one experiential learning and skills.

A series in the following is a recommended prerequisite to the Marine Conservation and Management minor.

Wildlife Management Graduate Certificate

Also available via Ecampus.

Current Graduate Students: You must notify the Department of Fisheries and Wildlife of your intention to pursue this certificate. Upon consultation with the certificate program coordinator, you will be given instructions regarding listing courses on your program of study and obtaining the required signature for that form.

For more information, please see our program site at https://ecampus.oregonstate.edu/online-degrees/graduate/wildlife-management/, the departmental website at http://fw.oregonstate.edu, or contact Certificate Program Director Dr. Bruce Dugger and Graduate Program Coordinator Dr. Susie Dunham at fw.gradadvising@oregonstate.edu.

The certificate requires:

- A minimum of 5 courses and 18 credits of total course work;
- A Capstone Project (applying knowledge and skills to a wildlife management issue), equivalent in time and effort to a 3-credit course (FW 506 PROJECTS);
- A minimum of one course from the Human Dimensions area;
- Three to four courses from the Wildlife Sciences and Management Subject Area
- For further information, please see our website or email: fw.gradadvising@oregonstate.edu.

Courses are offered through Corvallis, at Hatfield Marine Science Center, and through Ecampus. Check the course catalog and schedule of classes for location and term offered.

Wildlife Science Graduate Major (MS, PhD, MAIS)

Graduate Areas of Concentration

Animal-habitat relationships; behavior; biology of big game and small mammals; conservation biology; community studies; ecology of avian and mammalian predators; ecology of waterfowl and upland gamebirds; effects of parasites, diseases, and environmental contaminants; nutrition; population; population dynamics; reproductive biology; toxicology of pesticides; wildlife ecology; wildlife-forestry interactions; wildlife science

The Department of Fisheries and Wildlife offers graduate work leading to the Master of Science and Doctor of Philosophy degrees (and participation in the MAIS degree program) with majors in wildlife science.

The wildlife graduate program in the Department of Fisheries and Wildlife includes wildlife research concerning the interaction of wildlife with land uses, migratory waterfowl, upland game birds, forest bird communities, endangered species, population dynamics, and conservation biology.

The Oregon Cooperative Fish and Wildlife Research Unit has active research programs funded in part by the Oregon Department of Fish and Wildlife and U.S. Geological Survey. The Agricultural Experiment Station, the Sea Grant program, Forest Science Laboratory and other
organizations fund major research projects. The department maintains extensive collections of vertebrate species, maintained by Peter Konstantinidis as curator of vertebrates, with emphasis on larval fishes.

For more information, visit http://fw.oregonstate.edu, or email: fw.gradadvising@oregonstate.edu.

Major Code: 1750

Wildlife Science Graduate Minor

Minor Code: 1750

Food Science and Technology

Food science and technology concerns the chemistry and engineering necessary to deliver safe, convenient food products from the farm gate to the food marketer. The academic program integrates principles and concepts in the physical, biological, and engineering sciences, and applies them to the scientific and technological aspects of food and beverage processing. The role of the food scientist is to successfully integrate these disciplines to assure an abundant, high quality, and nutritious food supply.

Graduate programs leading to the MS or PhD degree in food science permit intensified study in subject areas of special interest. Research areas in the department include both basic and applied aspects of chemistry/biochemistry, microbiology/biotechnology, sensory analysis, and food engineering. Research in food processing operations covers a number of food commodities such as cereal products, dairy products, fruits, vegetables, meats, seafood, wines and beers.

Departmental facilities include well-equipped laboratories, a pilot plant, a winery, a pilot research brewery, and an artisan cheese-making plant for instruction and research. Research facilities also are available at the Coastal Oregon Marine Experiment Station Seafood Laboratory at Astoria and the Food Innovation Center in Portland, Oregon.

Work Experience and Internships

Because of the educational value of professional work experience, the department strongly encourages students to gain practical work experience during summer and other terms. Students typically work in brewing, wineries, dairy processing, and seasonal fruit and vegetable processing. Students may earn internship credit with prior approval of the department and of the employer. OSU students may also participate in international internship programs.

Scholarships

The College of Agricultural Sciences, the department, the food industry, and the Institute of Food Technologists offer over 25 merit and financial need scholarships to encourage students preparing for careers in the food industry. For more information, contact the department, 541-737-3131, and the Office of Financial Aid and Scholarships, 541-737-2241.

Career Opportunities

Food science graduates have had excellent success in finding positions (median nationwide entry level salary for bachelor of science degree holders is $50,000) in an industry that possesses tremendous variety, mobility and opportunity for advancement. Career opportunities in the food, brewing, distilling, and enology industries include management, research and development, process and production supervision, quality assurance, distribution, sales, marketing, consulting, and trade associations. Governmental agencies employ food scientists for work in regulatory control, research, and the development of food standards.

Graduates of a master’s or doctoral program hold positions in teaching, colleges and university research and extension, and in industry.

Undergraduate Programs

Major

• Food Science and Technology (BS, HBS) (p. 182)

Options

• Enology and Viticulture
• Fermentation Science
• Food Science

Minors

• Fermentation Science (p. 181)
• Food Manufacturing (p. 181)
• Food Science (p. 192)
• Food Technology (p. 192)

Food Science and Technology

FST 101. FOOD SCIENCE ORIENTATION. (1 Credit)
For food science majors. Orientation and academic guidance toward career planning in food science and technology.

FST 199. SPECIAL STUDIES. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

FST 210. FRUIT AND VEGETABLE PROCESSING. (3 Credits)
Lectures, lab activities and plant tours to help majors and non-majors understand traditional and modern fruit and vegetable processing technologies.
FST 212. DAIRY PROCESSING. (2 Credits)
Methods of processing and preserving milk and milk products and related unit operations.

FST 213. DAIRY PROCESSING LABORATORY. (1 Credit)
Laboratory and field work to accompany FST 212. Field trip required.

FST 251. INTRODUCTION TO WINES, BEERS, AND SPIRITS. (3 Credits)
A descriptive introduction to the history, science, sensory, economics, and societal aspects of alcoholic beverages.

FST 260. *FOOD SCIENCE AND TECHNOLOGY IN WESTERN CULTURE. (3 Credits)
Exploring the sciences and technologies of food processing and preservation within the context of their historical, current, and possible future influences on what we eat, the structure of our society, and our day-to-day lives. (Baccalaureate Core Course)
Attributes: CPWC – Core, Pers, West Culture

FST 273. *WINE IN THE WESTERN WORLD. (3 Credits)
A study of wine throughout history, from its accidental discovery and refinement through today, with a focus on the profound role wine plays in agriculture, social rituals, human health, economics, and the ambivalent pursuit of pleasure. (Baccalaureate Core Course)
Attributes: CPWC – Core, Pers, West Culture

FST 315. PILOT PLANT EXPERIENCES. (2 Credits)
Students will be working in one of the FST pilot plants (dairy, vegetables/fruit, brewing, wine making, distilling) and will be assisting with the manufacturing of foods or beverages. Students must have available blocks of time in their schedules to contribute significantly to a production run. Production schedules for each pilot plant will be determined in advance of registration for each term. Not all pilot plants will be available each term. Lab.

FST 360. FOOD SAFETY AND SANITATION. (3 Credits)
Principles, practices, and regulations governing and ensuring the microbiological safety of our food supply through risk assessment, surveillance, and intervention.
Prerequisites: (BI 211 with D- or better or BI 211H with D- or better or BI 212 with D- or better or BI 212H with D- or better or BI 213 with D- or better or BI 213H with D- or better) and (CH 121 [D-] or CH 221 [D-] or CH 221H [D-] or CH 231 [D-] or CH 231H [D-])

FST 370. INDUSTRY PREPARATION/HACCP. (3 Credits)
Assists students in preparation for internships and employment in the food industry by introducing compliance with food safety regulations, HACCP, and audits.

FST 385. *COMMUNICATING FOOD AND FERMENTATION SCIENCE. (3 Credits)
This writing intensive course (WIC) will guide students in the investigation and critical evaluation of literature on a topic of current interest in food or fermentation science, and the development of their ability to write concisely and with precision technical subject matter in this discipline. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: WR 121 with C- or better and FST 360 [D-] and MB 302 (may be taken concurrently) [D-]

FST 399. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: FST 399H
This course is repeatable for 16 credits.

FST 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: FST 399
This course is repeatable for 16 credits.

FST 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

FST 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

FST 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FST 407. SENIOR SEMINAR. (1 Credit)

FST 410. INTERNSHIP. (1-16 Credits)
A work internship to give students practical on-the-job training in the food processing or related industries. Graded P/N.
This course is repeatable for 16 credits.

FST 420. SENSORY EVALUATION OF FOOD. (4 Credits)
Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab.
Prerequisites: (ST 351 with C- or better or ST 411 with C- or better) and (ST 352 (may be taken concurrently) [D-] or ST 412 (may be taken concurrently) [D-])

FST 421. *FOOD LAW. (3 Credits)
Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FST 422. FOOD CHEMISTRY FUNDAMENTALS. (4 Credits)
An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec.
Prerequisites: (BB 350 with D- or better or BB 450 with D- or better or BB 450H with D- or better) and (CH 332 [C-] or CH 336 [C-]) and (MTH 228 [D-] or MTH 228H with D- or better) and (MTH 252 [D-] or MTH 252H with D- or better) and (CH 331 with D- or better or CH 332 [D-] or CH 336 [D-]) and (BB 350 with D- or better or BB 450 with D- or better or BB 450H with D- or better) and (CH 332 [C-] or CH 336 [C-]) and (MTH 228 [D-] or MTH 228H with D- or better) and (MTH 252 [D-] or MTH 252H with D- or better)

FST 423. FOOD ANALYSIS. (4 Credits)
An integrated laboratory/lecture course covering methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab/rec.
Prerequisites: (BB 350 with D- or better or BB 450 with D- or better or BB 450H with D- or better) and (CH 332 [C-] or CH 336 [C-]) and (MTH 228 [D-] or MTH 228H with D- or better) and (MTH 252 [D-] or MTH 252H with D- or better)

FST 424. FOOD LAW. (3 Credits)
Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FST 425. FOOD SYSTEMS CHEMISTRY. (4 Credits)
The chemistry of food components in real-world food systems. Focused on water, proteins, carbohydrates, lipids, and food polymers, their interactions, and the effects of food processing and storage. Integrates writing as a learning tool and means of professional communication. Lec/lab.
Prerequisites: FST 422 with D- or better

FST 430. INNOVATION AND FOOD PRODUCT DEVELOPMENT. (4 Credits)
Provides technical background and hand-on laboratory experience in food product development and food innovation. Lec/lab.
Prerequisites: CH 331 with D- or better and CH 332 [D-] and FST 360 [D-] and FST 421 [D-] and FST 422 [D-]
FST 460. BREWING SCIENCE. (3 Credits)
Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality.
**Prerequisites:** (BI 212 with C- or better or BI 212H with C- or better) and CH 331 [C-] and CH 332 [C-]

FST 461. BREWING ANALYSIS. (3 Credits)
Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab.
**Prerequisites:** FST 460 with D- or better and (MB 303 [D-] or MB 303H [D-])

FST 466. WINE PRODUCTION PRINCIPLES. (3 Credits)
Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines.
**Prerequisites:** (BI 212 with C- or better or BI 212H with C- or better) and CH 331 [C-] and CH 332 [C-]

FST 467. WINE PRODUCTION, ANALYSIS, AND SENSORY EVALUATION. (5 Credits)
An integrated lecture/lab course that focuses on the practical fundamentals of red and white wine production. Students will make wine and monitor its progression from the grape to the bottle using standard chemical, microbial, and sensorial techniques.
**Prerequisites:** FST 466 with D- or better and FST 479 (may be taken concurrently) [D-]

FST 479. FERMENTATION MICROBIOLOGY. (3 Credits)
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
**Prerequisites:** (BI 212 with C- or better or BI 212H with C- or better) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
**Equivalent to:** MB 479

FST 480. TOPICS IN FERMENTATION. (0-2 Credits)
Selected topics in fermentation science will be presented by department faculty and invited outside experts. Topics and format will change each quarter. Students may take the course for 1 or 2 credits as the topics change. Lec/lab.
This course is repeatable for 8 credits.

FST 490. FOOD PROCESSING CALCULATIONS. (2 Credits)
Application of engineering principles to produce safe processed foods meeting consumer expectations for safety and quality. Validate process engineering models by comparing predicted values with new experimental data.
**Prerequisites:** BEE 472 with D- or better and FST 360 [D-]
**Corequisites:** FST 491

FST 491. FOOD PROCESSING CALCULATIONS LABORATORY. (1 Credit)
Experiments in a pilot plant supported by a computer laboratory. Prepare samples of novel process technology products.
**Corequisites:** FST 490

FST 495. FOOD PACKAGING. (2 Credits)
Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, and paperboard.

FST 499. SPECIAL STUDIES. (0-16 Credits)
This course is repeatable for 16 credits.
FST 560. BREWING SCIENCE. (3 Credits)
Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality.

FST 561. BREWING ANALYSIS. (3 Credits)
Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab.

FST 566. WINE PRODUCTION PRINCIPLES. (3 Credits)
Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines.

FST 567. WINE PRODUCTION, ANALYSIS, AND SENSORY EVALUATION. (5 Credits)
An integrated lecture/lab course that focuses on the practical fundamentals of red and white wine production. Students will make wine and monitor its progression from the grape to the bottle using standard chemical, microbial, and sensorial techniques. 
Prerequisites: FST 566 with C or better
Corequisites: FST 579

FST 579. FERMENTATION MICROBIOLOGY. (3 Credits)
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. CROSSLISTED as MB 479/MB 579.
Equivalent to: MB 579

FST 599. SPECIAL STUDIES. (0-16 Credits)
This course is repeatable for 16 credits.

FST 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

FST 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

FST 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FST 607. SEMINAR. (1 Credit)
This course is repeatable for 4 credits.

FST 620. ADVANCED TOPICS IN SENSORY SCIENCE. (2 Credits)
Current and/or advanced subjects in human sensory science. Includes 1) topics in human flavor perception that covers human psychophysics, neuroscience, and related fields, and 2) sensory evaluation techniques and data handling methods that are advanced in nature. Different points of view regarding above topics will be discussed. 
Prerequisites: FST 520 with C or better
This course is repeatable for 4 credits.

FST 628. FLAVOR CHEMISTRY. (3 Credits)
The definition of flavor, analytical methods in flavor chemistry, and mechanisms of odor interaction in food system will be discussed. In addition, an integrated approach will be used to study the flavor chemistry of economically-important agricultural products in the Pacific Northwest such as dairy products, fruits, and alcoholic beverages.

FST 639. FOOD POLYMER SCIENCE. (3 Credits)
Investigates the theoretical principles and structure-function relationships of food macromolecules. The theoretical principles are related, where possible, to observable phenomena during thermal processing and storage of foods.

FST 641. PROCESSING WHEAT AND OTHER SMALL GRAINS: A MOLECULAR VIEW. (3 Credits)
Provides a fundamental overview of wheat and other cereals from the perspective of the molecular level events that are important in milling, baking, and other processes. Uses cereal processing (focused primarily on bread-making) as the vehicle for placing elements of food chemistry, food polymer science, physical chemistry, and rheology into the cohesive framework of a single food category. Students will experience how the sciences of chemistry, physics, engineering, microbiology, biochemistry, nutrition, etc. amalgamate in the production of the selected cereal products. Lec/lab.

FST 666. ADVANCED TOPICS IN ENOLOGY. (3 Credits)
An in-depth investigation of advanced wine processing techniques and wine research, focusing on their impact on production and wine quality. 
Prerequisites: FST 566 with B or better and FST 567 (may be taken concurrently)

Minor Code: 141

Food Manufacturing Minor

The Food Manufacturing minor introduces students to several engineering and operations concepts. A key component of the minor is a three-month manufacturing internship at a food processing facility. Prior to the internship, students will work within the department’s pilot plants, producing at least one of cheese, beer, wine, liquors, or fruit and vegetable products.

Sensory science projects focus on an understanding of the fundamental nature of sensory phenomena and characterization of the sensory attributes of selected products.

Food chemistry research concerns the occurrence, role, formation, stability and analysis of various food constituents. Studies involving flavor chemistry and sensory evaluation aim to identify the flavor-active compounds of a wide variety of foods and beverages. Other studies focus on understanding the functional properties of cereal grains and development of environmentally sustainable chemical and biological processes for converting food wastes and related renewable waste streams into useful byproducts.

Investigations on seafood processing and by-product utilization are being conducted on the campus, and at the Coastal Oregon Marine Experiment Station Seafood Laboratory in Astoria, Oregon.

The Food Innovation Center in Portland, Oregon—OSU’s most unusual agricultural experiment station—provides entrepreneurs advice, testing and feedback on product development, packaging and shelf-life evaluation, sensory and consumer testing, marketing planning and access and business development.

Students desiring to pursue graduate study must have a BS degree or equivalent. Students from related fields of study (chemistry, microbiology, biology, etc.) should have a strong background in the basic sciences and must have earned at least a B (GPA 3.0) average during their last two years of undergraduate study.

**Major Code: 1350**

**Food Science and Technology Graduate Minor**

**Minor Code: 1350**

**Food Science and Technology Undergraduate Major (BS, HBS)**

A bachelor’s degree in Food Science and Technology provides the necessary foundation to pursue any of the many possible food and beverage related career paths. The program integrates principles and concepts in the physical, biological and engineering sciences (including courses in general chemistry, organic chemistry, biology, physics, math and statistics, biochemistry, microbiology, and food engineering) and applies them to the scientific and technical aspects of food and beverage processing. Students who achieve at least a 2.00 GPA in the required foundation courses in chemistry additionally earn a Chemistry minor.

In addition to completing the Food Science and Technology Core, students must select from among three options (areas of concentration):

1. Enology and Viticulture
2. Fermentation Science
3. Food Science

All curricula are approved by the Higher Education Committee of the Institute of Food Technologists, making students eligible for national and Oregon IFT scholarships, as well as providing universal degree recognition within the food industry. Beyond choosing an option, students are able to further customize their studies through a menu of elective credits, facilitating the development of additional expertise in food related
areas such as microbiology, toxicology, nutrition, horticulture, and animal sciences, and crediting formalized career and professional development experiences. Among minors that complement the Food Science and Technology major are Business and Entrepreneurship, Microbiology, and Nutrition.

Grade Requirements

All courses required for completion of the Food Science and Technology major must be passed, graded on the A–F scale. Included are both "core" and "option" courses in FST, as well as supporting courses in math, sciences, and written and oral communication.

1. A C– grade, or better, must be earned in the specified prerequisites for the following courses. (These courses have additional prerequisites, but the C– minimum applies to the prerequisites listed below).

2. Students must earn at least a 2.00 "major" GPA. The major GPA is a cumulative GPA calculated on a list of courses particular to each option. Selected core and option courses are included, as specified in the list accompanying requirements of each option.

Earning the Degree

To earn a Bachelor of Science (BS) degree in Food Science and Technology, postbaccalaureate students must fulfill all of the FST major core requirements, and those of any one of three options: Enology and Viticulture, Fermentation Science, or Food Science (see: http://oregonstate.edu/foodsci/prospective-undergraduate-students).

The Baccalaureate Core (general studies) component of an OSU bachelor’s degree is considered fulfilled by the student’s first degree. Additionally, the university requires that a minimum of 45 credits applied to this degree (32 if the first degree is from OSU) must be completed with Oregon State University course work completed while enrolled in this degree program.

Additional information for prospective postbaccalaureate students is available at the FST undergraduate department website: http://oregonstate.edu/foodsci/home.

Enology and Viticulture Option

Postbaccalaureate Study in FST

Admission

Students holding a bachelor's degree from an accredited institution who are otherwise admissible to Oregon State University (see: http://oregonstate.edu/admissions/main/post-baccalaureate) will be accepted into the Food Science and Technology major upon meeting the following additional criteria:

- All of the following courses (or equivalents) must be completed with a cumulative GPA of 2.25 (4.00 maximum scale). In the case of repeated courses, the second grade earned in the course will be used in the GPA calculation.

Major Code: 135

Enology and Viticulture Option

This option is offered within the following major(s):

- Food Science and Technology - College of Agricultural Sciences (p. 182)

The wine industry in the United States is centered on the West Coast, which produces about 95 percent of our nation's wines. Oregon is third in the nation in terms of the number of wineries and fourth in the nation in total volume of wine produced. The Oregon wine industry is a rapidly growing industry and is becoming increasingly important to the larger Oregon economy.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

The Enology and Viticulture option within the Department of Food Science and Technology prepares students to become successful winemakers. Courses in enology, taught by food science faculty, provide a scientifically-based understanding of wine production. Supporting course work in horticulture, botany and crop and soil science, helps students develop an understanding of the interaction between grape production and winemaking. Graduates in this option will possess the necessary breadth and depth of knowledge and associated practical skills to become independently thinking and successful winemakers.

Fermentation Science Option

This option is offered within the following major(s):

• Food Science and Technology - College of Agricultural Sciences (p. 182)

The Fermentation Science option, one of just a handful of such programs in the nation, is a hands-on applied science addressing the biological, chemical and physical processes of fermented foods, including those used in the production of wine, beer, and spirits, as well as a variety of other fermented foods such as cheese, yogurt, soy sauce, pickles, breads, and fermented vegetables. Graduates enjoy a wide variety of employment opportunities—including some of the nation’s largest wineries and breweries, artisan cheese plants, coffee, soy, and pickle companies, among others. Graduates of the Fermentation Science option can readily cross over from the beverage industry to the food industry with good preparedness.

1 If all three are selected, credits from one course are applied to the Option Electives requirements.
2 Competitive selection and/or departmental approval required.
3 Students may not earn internship credit in all states. Consult with the internship coordinator for a list of eligible states.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Students may complete more than one option. Courses must be selected so that at least 12 credits in each option are counted uniquely toward requirements of that option.

Food Science Option

This option is offered within the following major(s):

- Food Science and Technology - College of Agricultural Sciences (p. 182)

Food scientists belong to one of the world's largest industries—the food industry. From the farm gate to the market, food scientists develop foods and beverages in response to society's needs and demands, working to make foods safe, nutritious, convenient, economical, and tasty. Food scientists look for better ways to select, preserve, process, and package food products, including the ingredients that go into them. Society's focus on food has increased as a heightened awareness of diet, health, and biosecurity (or food safety) has increased worldwide.

Graduates of the Food Science option are typically interested in research and development of new products, food safety, sensory and flavor qualities, quality control or quality assurance. Some even work as freelance food technologists.

Nutrition Courses

Select one of the following:

- NUTR 225 GENERAL HUMAN NUTRITION
- NUTR 240 HUMAN NUTRITION

Food Science and Technology Courses

- FST 420 SENSORY EVALUATION OF FOOD 4
- FST 423 FOOD ANALYSIS 4
- FST 490 FOOD PROCESSING CALCULATIONS 2
- FST 491 FOOD PROCESSING CALCULATIONS LABORATORY 1
- FST 495 FOOD PACKAGING 2
- MB 440 FOOD MICROBIOLOGY 3

Select 3 credits of the following:

- ANS 251 PRINCIPLES OF ANIMAL FOODS TECHNOLOGY 3
- FST 210 FRUIT AND VEGETABLE PROCESSING
- FST 212 DAIRY PROCESSING
FST 213  DAIRY PROCESSING LABORATORY

Food Science Option Electives
Select 7 credits of the following:

AG 407  SEMINAR 2
FST 101  FOOD SCIENCE ORIENTATION
FST 260  *FOOD SCIENCE AND TECHNOLOGY IN WESTERN CULTURE
FST 273  *WINE IN THE WESTERN WORLD
FST 401  RESEARCH 2
FST 410  INTERNSHIP 2,3
FST 430  INNOVATION AND FOOD PRODUCT DEVELOPMENT
FST 460  BREWING SCIENCE
FST 466  WINE PRODUCTION PRINCIPLES
FST 479/MB 479  *FERMENTATION MICROBIOLOGY
FST 480  TOPICS IN FERMENTATION
MB 441  FOOD MICROBIOLOGY LABORATORY
NUTR 216  *FOOD IN NON-WESTERN CULTURE
TOX 429  TOXIC SUBSTANCES IN FOOD

Total Hours 38

1  Complete 3 credits from the 200-level processing courses (an additional 3 credits from this group may be applied to the option electives).
2  Competitive selection and/or departmental approval required.
3  Students may not earn internship credit in all states. Consult with internship coordinator for list of eligible states.
*  Baccalaureate Core Course (BCC)
^  Writing Intensive Course (WIC)

Students may complete more than one option. Courses must be selected so that at least 12 credits in each option are counted uniquely toward requirements of that option.

* Baccalaureate Core Course (BCC)

Horticulture

Horticulture involves the production, genetic improvement, storage, and marketing of fruits, nuts, vegetables, flowers, and vegetable crops; and the design, construction, and management of landscape plantings such as parks, gardens, golf courses, restoration projects, and sports fields. It is a science, an art, an avocation, and a business.

Horticultural and other high-value specialty crops are the largest components of Oregon's agricultural industry. Landscape horticulture is a rapidly expanding service industry in the urban areas of the Pacific.
Northwest and throughout the nation. Excellent and varied career opportunities exist for college graduates in both crop and landscape horticulture.

The undergraduate program provides students with a solid background in the fundamental life and physical sciences, as well as an understanding of the technologies and management systems used in the horticultural industry. Problem-solving and decision-making skills are stressed, as is student involvement. Field trips are an important component of many of the courses.

The program has seven options:

1. Ecological Management of Turf, Landscape & Urban Horticulture
2. General Horticulture (Online)
3. Horticultural Research
4. Plant Breeding and Genetics
5. Sustainable Horticultural Production
6. Therapeutic Horticulture
7. Viticulture and Enology

The Ecological and Sustainable Horticultural Production option prepares students for careers dealing directly or indirectly with the production, breeding, post-harvest handling, marketing, and scientific study of horticultural crops.

The General Horticulture is an online option and is especially recommended for students already working in the horticultural industry, whose careers will benefit from post-secondary education in the horticultural sciences.

The Horticultural Research option prepares students to assist in research or to pursue graduate studies.

The Plant Breeding and Genetics option provides an interdisciplinary approach to applied plant breeding and practical experience in breeding and genetic analysis working in the greenhouse, field, and laboratory.

The Sustainable Horticultural Production option prepares students for careers dealing directly or indirectly with the production, breeding, post-harvest handling, marketing, and scientific study of horticultural crops.

The Therapeutic Horticulture option prepares students to design healing and adapted gardens and to provide therapy programs used to improve the quality of people’s lives.

The Viticulture and Enology option prepares students for careers in Oregon’s growing vineyard and winery industry.

All options allow the student considerable flexibility to pursue a minor or to tailor course work to meet individual goals. Qualified students interested in the business aspects of horticulture are encouraged to pursue a minor in business. All undergraduates are required to complete either an approved internship or an undergraduate research project.

A high school student preparing for the program should follow a well-balanced college preparatory curriculum. Course work in biology, chemistry, and mathematics is strongly recommended. Course work in the social sciences, humanities, arts, and foreign languages is also encouraged, and the student should develop public speaking and writing abilities.

The program was designed to facilitate timely completion of degree requirements by transfer and postbaccalaureate students. Students intending to transfer into the program from a two- or four-year institution should complete as many of the lower-division requirements as possible. Some professional-technical courses from community colleges may be equivalent to lower-division horticulture courses. Equivalent credit can be given for such courses. Contact a departmental advisor for further information.

For additional information about the program, contact one of the undergraduate advisors: Kelly Donegan (head advisor, all options) and Sarah McDonald (advisor for the General Horticulture option).

Undergraduate Program

Major

- Horticulture (BS, HBS) (p. 208)

  Options
  - Ecological Management Turf, Landscape & Urban Horticulture
  - General Horticulture (p. 211) (Online)
  - Horticultural Research (p. 214)
  - Plant Breeding and Genetics (p. 217)
  - Sustainable Horticultural Production (p. 219)
  - Therapeutic Horticulture (p. 222)
  - Viticulture and Enology (p. 225)

Minors

- Entomology (p. 154) (Administered by the Department of Horticulture in the College of Agricultural Sciences.)
- Horticulture (p. 208)
- Turf and Landscape Management (p. 228)

Graduate Programs

Major

- Horticulture (MS, PhD, MAIS) (p. 207)

  Options
  - Entomology
  - Plant Breeding and Genetics

Minor

- Horticulture (p. 208)

Adjunct Faculty
Bondi, Kennedy, Landgren, Stephenson

Crop Science

CROP 101. INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE. (1 Credit)
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSTLISTED as ENT 101, SOIL 101.

CROP 199. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE. (1-16 Credits)
Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for 16 credits.

CROP 200. CROP ECOLOGY AND MORPHOLOGY. (3 Credits)
An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science courses. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance.

CROP 280. INTRODUCTION TO THE COMPLEXITY OF OREGON CROPPING SYSTEMS. (4 Credits)
An introduction to field cropping systems of western Oregon. Provides students with a broad overview of the complexity of cropping systems and the knowledge required to grow and produce a crop—plant physiology, seed biology, plant pathology, soil fertility, entomology, and weed science. Students will observe a crop under different management strategies to enhance understanding of management approaches.

CROP 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS. (4 Credits)
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/ lab/rec. CROSSTLISTED as HORT 300.

CROP 310. FORAGE PRODUCTION. (4 Credits)
Importance of, and current production practices for, forage crops. Lec/ lab.

CROP 319. PRINCIPLES OF FIELD CROP PRODUCTION. (3 Credits)
Provides students with an understanding of the basic principles of field crop production—tillage, soil testing, fertilization, variety selection, planting, and in-season crop management. Management practices for wheat, corn and soybean as .

CROP 330. *WORLD FOOD CROPS. (3 Credits)
Origin, production, utilization, and improvement of the world’s major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. (Bacc Core Course) Attributes: CSGI – Core, Synth, Global Issues

CROP 340. *PENS AND PLOWS: WRITINGS OF WORKING THE LAND. (3 Credits)
A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. (Bacc Core Course) Taught via Ecampus only. Attributes: CPWC – Core, Pers, West Culture

CROP 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CROP 403. THESIS. (1-16 Credits)
Independent, original study and preparation of a senior thesis. This course is repeatable for 16 credits.

CROP 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: CROP 405H, CSS 405
This course is repeatable for 16 credits.

CROP 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 405, CSS 405H
This course is repeatable for 16 credits.

CROP 407. SEMINAR. (1 Credit)
Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to submit written documentation supporting that seminar.

CROP 410. INTERNSHIP. (1-6 Credits)
Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for 12 credits.

CROP 414. PRECISION AGRICULTURE. (4 Credits)
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab. CROSSTLISTED as HORT 414. Equivalent to: HORT 414

CROP 418. TOXIC PLANTS IN PNW PASTURES. (1 Credit)
Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only.

CROP 420. SEED SCIENCE AND TECHNOLOGY. (3 Credits)
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.
CROP 433. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS. (4 Credits)
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as HORT 433/HORT 533.
Prerequisites: BI 102 with D- or better or BI 213 with D- or better or BI 311 with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or PBG 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better
CROP 440. WEED MANAGEMENT. (4 Credits)
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec.
CROP 460. SEED PRODUCTION. (3 Credits)
CROP 463. SEED BIOLOGY. (3 Credits)
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. CROSSLISTED as HORT 463/HORT 563. Lec/lab.
Equivalent to: HORT 463
CROP 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT. (4 Credits)
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as HORT 480/HORT 580.
Equivalent to: HORT 480
CROP 499. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (1-16 Credits)
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: CROP 499H
This course is repeatable for 16 credits.
CROP 499H. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (1-16 Credits)
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 499
This course is repeatable for 16 credits.
CROP 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.
CROP 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.
CROP 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. CROSSTLISTED as HORT 463/HORT 563. Lec/lab.

Equivalent to: HORT 563

CROP 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT. (4 Credits)

Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSTLISTED as HORT 480/HORT 580.

Equivalent to: HORT 580

CROP 590. EXPERIMENTAL DESIGN IN AGRICULTURE. (4 Credits)

Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. Lec/rec.

CROP 599. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (0-16 Credits)

Technical knowledge and skills development courses offered in a wide variety of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for 16 credits.

CROP 601. RESEARCH. (1-16 Credits)

This course is repeatable for 16 credits.

CROP 603. THESIS. (1-16 Credits)

This course is repeatable for 99 credits.

CROP 605. READING AND CONFERENCE. (1-16 Credits)

This course is repeatable for 16 credits.

CROP 606. PROJECTS. (1-16 Credits)

This course is repeatable for 16 credits.

CROP 607. SEMINAR. (1 Credit)

Graded P/N. This course is repeatable for 99 credits.

CROP 608. WORKSHOP. (1-16 Credits)

This course is repeatable for 16 credits.

CROP 609. PRACTICUM IN TEACHING. (1-3 Credits)

Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.

Equivalent to: ENT 609, PBG 609, SOIL 609. This course is repeatable for 9 credits.

CROP 660. HERBICIDE SCIENCE. (4 Credits)

Absorption, movement, and mechanism of action in plants; behavior of herbicides in soil. Offered alternate years.

CROP 670. PHYSIOLOGY OF CROP YIELD. (3 Credits)

Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature.

CROP 699. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE. (1-16 Credits)

This course is repeatable for 16 credits.

Horticulture

HORT 112. INTRODUCTION TO HORTICULTURAL SYSTEMS, PRACTICES AND CAREERS. (2 Credits)

Overview of horticultural systems and practices, with an emphasis on the Pacific Northwest. Exploration of career opportunities in horticulture. Includes viticulture, environmental landscaping, turf management, greenhouse and nursery production, farming, education, and research. Required field trips.

HORT 199. SPECIAL TOPICS. (1-16 Credits)

Equivalent to: HORT 199H

This course is repeatable for 16 credits.

HORT 199H. SPECIAL TOPICS. (1-16 Credits)

Attributes: HNRS – Honors Course Designator

Equivalent to: HORT 199

This course is repeatable for 16 credits.

HORT 212. INTRODUCTION TO ORGANIC AGRICULTURAL SYSTEMS. (4 Credits)

An introduction to organic agricultural systems with a focus on history, regulations, principles and practices, performance, trends, and careers.

HORT 217. *SOCIAL IMPACTS OF SCIENCE. (3 Credits)

Contemporary societies provide funding for scientific research, at the same time they struggle with existing and emerging societal problems. This course will discuss how social problems can be addressed by science and technology, and how the impacts of research are quantified. (Bacc Core Course)

Attributes: CPSI – Core, Pers, Soc Proc & Inst

HORT 226. LANDSCAPE PLANT MATERIALS I: DECIDUOUS HARDWOODS AND CONIFERS. (4 Credits)

Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on deciduous hardwoods and conifers.

HORT 228. LANDSCAPE PLANT MATERIALS II: SPRING FLOWERING TREES AND SHRUBS. (4 Credits)

Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on spring flowering trees and shrubs. Lec/rec.

HORT 251. TEMPERATE TREE FRUIT, BERRIES, GRAPES, AND NUTS. (2 Credits)

Covers fruit and nut crops for temperate zones. Emphasis placed on scientific and common names, plant adaptation, basic morphology, major cultivars, and markets. Offered alternate years.

HORT 255. HERBACEOUS ORNAMENTAL PLANT MATERIALS. (3 Credits)

Identification and culture of herbaceous plants used in the landscape. Offered via Ecampus only.

HORT 260. ORGANIC FARMING AND GARDENING. (3 Credits)

Organic farming and gardening methods are discussed in class and practiced in the field. The philosophical background of organic farming as well as the biological, environmental and social factors involved in organic food production are covered. Emphasis is on hands-on application of scientific principles to create sustainable food production systems. Lec/lab.
HORT 270. INTRODUCTION TO THERAPEUTIC HORTICULTURE. (2 Credits)
An introduction to the history, benefits, and methods of therapeutic horticulture. Surveys program models for vocational, social/recreational, wellness and therapeutic applications of horticulture.

HORT 271. TECHNIQUES AND ADAPTIVE STRATEGIES IN THERAPEUTIC HORTICULTURE. (2 Credits)
An introduction to the characteristics of therapeutic gardens. Survey of year-round, indoor and outdoor therapeutic horticultural programming adaptations, strategies and techniques for different special populations.
Prerequisites: HORT 270 with D- or better

HORT 272. BASIC THERAPEUTIC SKILLS I. (2 Credits)
The assessment and evaluation process in therapeutic horticulture. Development of communication strategies, helping skills, and horticultural skills for therapeutic situations.
Prerequisites: HORT 271 with D- or better

HORT 273. BASIC THERAPEUTIC SKILLS II. (2 Credits)
Assessment and documentation tools in therapeutic horticulture. Treatment issues related to different types of physical and mental issues. Conduct and evaluate therapeutic horticultural activity sessions.
Prerequisites: HORT 272 with D- or better

HORT 274. THERAPEUTIC HORTICULTURAL PROGRAMS FOR OLDER ADULTS/CHILDREN. (2 Credits)
Benefits and applications of therapeutic horticulture to older adults and special needs children.
Prerequisites: HORT 273 with D- or better

HORT 275. THERAPEUTIC GARDEN DESIGN, MAINTENANCE AND PROGRAMMING. (2 Credits)
The history, characteristics and design of the therapeutic garden. The use of the garden in therapeutic horticultural programming.
Prerequisites: HORT 274 with D- or better and HORT 280 [D-]

HORT 285. PERMACULTURE DESIGN AND THEORY: CERTIFICATE COURSE. (4 Credits)
Permaculture design course meets internationally recognized standards for certification. Lectures, hands-on activities, experiential learning, group discussions, readings, student projects and presentations. Two mandatory weekend days. Design intensive, utilizing graphic and verbal presentation skills. Research into other functioning permaculture systems through literature, websites, and as observed on field trips. Lec/lab.
This course is repeatable for 8 credits.

HORT 299. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: HORT 299H
This course is repeatable for 16 credits.

HORT 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 299
This course is repeatable for 16 credits.

HORT 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS. (4 Credits)
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/ rec. CROSSLISTED as CROP 300.
Equivalent to: CROP 300

HORT 301. GROWTH AND DEVELOPMENT OF HORTICULTURAL CROPS. (3 Credits)
Gain fundamental knowledge of plant growth and development of horticultural crops from a micro- to macro-level starting at double fertilization through fruit growth–covering seed-to-seed. The last section specifically examines how environmental factors affect growth and development. Lec/lab.

HORT 303. HORTICULTURAL PROJECTS. (2 Credits)
Student-managed crop production projects with emphasis on container grown, greenhouse crops. Crop scheduling, propagation and planting, selecting temperature and lighting regimes, specifying growth regulator applications, nutrient management, irrigation management, pest monitoring, and problem diagnosis and correction.

HORT 306. INPUTS IN ORGANIC CROPPING SYSTEMS: SOURCING AND EFFICACY. (2 Credits)
Applied course focused on the regulation, sourcing, and efficacy of organic inputs including soil amendments, fertilizers, and pesticides. Gain experience using science-, practice-, and regulation-based information to source and determine effectiveness of inputs in certified organic cropping systems.
Prerequisites: HORT 212 with C- or better and CROP 355 [C-]

HORT 307. ORGANIC SYSTEM PREDICAMENTS. (3 Credits)
Analyze controversial organic agriculture and systems issues while developing critical- and systems-thinking skills. Synthesis of information from diverse sources and application of scientific knowledge will be required to recommend possible solutions to real world organic agriculture predicaments.

HORT 308. WEED MANAGEMENT IN ORGANIC CROPPING SYSTEMS. (3 Credits)
Applied organic weed identification and management course. Learn real-world application of science-, practice-, and regulation-based weed management information while designing and evaluating organic weed management plans for certified organic farming systems.

HORT 311. PLANT PROPAGATION. (4 Credits)
The regeneration of plants from vegetative and reproductive tissue and organs. Horticultural and physiological principles, methods, and techniques for laboratory, greenhouse nursery, field, and orchard.

HORT 314. PRINCIPLES OF TURFGRASS MAINTENANCE. (4 Credits)
Identification and adaptation of common turfgrasses. Physiology of turfgrass growth and response to cultural and environmental stresses. Cultural practices including establishment, general maintenance, and pest control. Field trips required.

HORT 315. SUSTAINABLE LANDSCAPES: MAINTENANCE, CONSERVATION, RESTORE. (4 Credits)
Sustainable care and maintenance practices for non-turf landscape areas. Low input pruning, planting, fertilization, and pest control with an emphasis on IPM. Plant responses to stress, particularly those encountered in the urban environment. Outdoor labs required.

HORT 316. PLANT NUTRITION. (4 Credits)
Basic concepts and principles of plant mineral nutrition that provide a basis for solving practical nutritional problems in horticultural crops. Areas covered include mineral nutrients, nutrient availability in the soil and plant uptake, nutrient deficiencies and toxicities and their causes and remedies, and plant and soil analysis. Lec/lab/rec.
Prerequisites: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better
HORT 318. APLIED ECOLOGY OF MANAGED ECOSYSTEMS. (3 Credits)
Survey of ecological processes in managed ecosystems emphasizing ecological management techniques. Ecosystem services; biodiversity management; weed dynamics; agroecology; urban ecology; restoration and mitigation; landscape management. Field trip required. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

HORT 319. RESTORATION HORTICULTURE. (3 Credits)
As world population increases to some 9 billion plus by 2044, the importance of ecologically sound horticultural practices becomes increasingly apparent. Integration of ecological concepts and theory in management and development of created landscapes is critical for the preservation of many ecological services currently provided by undeveloped areas. Offered via Ecampus only.

HORT 330. PLAGUES, PESTS, AND POLITICS. (3 Credits)
Integration and interaction of agricultural and public health aspects of entomology in society and history. CROSSLISTED as ENT 300. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HORT 331. POLLINATORS IN PERIL. (3 Credits)
Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world. (Bacc Core Course) CROSSLISTED as ENT 331.
Attributes: CSSI – Core, Synth, Global Issues
Equivalent to: ENT 331

HORT 344. INSECT AND DISEASE MANAGEMENT IN ORGANIC CROPPING SYSTEMS. (3 Credits)
A skills-based course on the science, practice, and regulations related to insect and disease management in organic cropping systems.
Prerequisites: BOT 350 with C- or better and ENT 311 [C-]
This course is repeatable for 3 credits.

HORT 349. DIAGNOSING PLANT PROBLEMS. (3 Credits)
Basic principles of problem diagnosis in crop, garden, and landscape plants are covered. Problems caused by cultural and environmental issues, plant diseases, insect pests, and other causes are addressed. Students will gain familiarity with resources for plant problem diagnosis. Offered via Ecampus only.

HORT 350. URBAN FORESTRY. (3 Credits)
Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. CROSSLISTED as FES 350. Offered via Ecampus only.
Equivalent to: FES 350, FOR 350

HORT 351. FLORICULTURE AND GREENHOUSE SYSTEMS. (4 Credits)
For students interested in growing plants in commercial or educational greenhouses. Actively explores the production and scheduling of floriculture crops for various markets. Combines the practical aspects of growing floral crops under environments created by traditional and technologically advanced greenhouses. Greenhouse structures and crop environment manipulation will be emphasized. Students actively manage a floriculture crop and are responsible for developing and implementing production schedules, and for making key decisions on the culture of diverse floral crops.

HORT 358. LANDSCAPE CONSTRUCTION TECHNIQUES. (4 Credits)
Study of landscape construction process from initial site analysis to finished landscape. Techniques used in building hardscape and landscape areas. Field trips required. Lec/lab.

HORT 360. IRRIGATION AND DRAINAGE. (4 Credits)
Familiarizes students with the principles and practices of irrigation and drainage systems. Optimum use of water, irrigation and drainage system design, installation, repairs, and troubleshooting are emphasized. Lec/lab.

HORT 361. PLANT NURSERY SYSTEMS. (4 Credits)
Covers how to grow shrubs and trees, and herbaceous annuals and perennials in nurseries for use in urban landscapes and managed ecosystems such as forestry and restoration. Plant nursery systems are diverse and require intensive management involving a dynamic decision making process. This course actively explores field and container production systems as well as the marketing of plants, an overview of plant growth regulation and post-production handling, the influence of efficient production practices on plant quality, integrating pest management strategies, and natural resource utilization.

HORT 380. SUSTAINABLE LANDSCAPE DESIGN. (3 Credits)
The assessment of design problems/situations, the development of solutions and the communication of those solutions to the client through the design. Specific topics include designing for ecosystem maintenance/enhancement, introduction to computer-aided design (CAD), using color in landscape designs and rendering section/elevation views.

HORT 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: HORT 405H
This course is repeatable for 16 credits.

HORT 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 405
This course is repeatable for 16 credits.

HORT 406. PROJECTS: DATA PRESENTATIONS. (1 Credit)
For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students’ posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. CROSSLISTED as BRR 406.
Equivalent to: BRR 406

HORT 407. SEMINAR. (1 Credit)
Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to attend and evaluate the seminars given by other class members.

HORT 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.
HORT 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 410. INTERNSHIP. (1-12 Credits)
Work internship to acquaint horticulture majors with the practices of the horticulture industry. Under direction of departmental internship committee. Requires approved statement of intent, submission of employer and employee evaluation forms and written report. This course is repeatable for 12 credits.

HORT 411. HORTICULTURE BOOK CLUB. (1 Credit)
Reading and discussion of noteworthy books and associated topics relating to agriculture, society and the environment. This course is repeatable for 2 credits.

HORT 412. CAREER EXPLORATION: INTERNSHIPS AND RESEARCH PROJECTS. (1 Credit)
Provides orientation to the horticulture major internship and research project requirement. Covers procedures for selecting, performing and reporting on an internship or research project. Includes guidance and skill development valuable in the pursuit of horticultural career goals, such as cover letter and resume preparation and interviewing experience.

HORT 414. PRECISION AGRICULTURE. (4 Credits)
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab. CROSSLISTED as CROP 414. Equivalent to: CROP 414

HORT 418. GOLF COURSE MAINTENANCE. (4 Credits)
Basic aspects of golf course maintenance under temperate zone conditions. Lec/lab.

HORT 421. HERBS, SPICES, AND MEDICINAL PLANTS. (3 Credits)
Principles of crop ecology, morphology, chemistry and utilization of natural products of herbs, spices, and medicinal plants (HSMP). Examines the history and importance of HSMP, their historic and modern uses, current market trends, botany, collection in the wild, fundamentals of production systems for HSMP, harvesting, drying, and other postharvest operations, natural products and their uses, regulations and legal concerns of herbal products.

HORT 433. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS. (4 Credits)
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. CROSSLISTED as CROP 433/CROP 533. Prerequisites: BI 102 with D- or better or BI 213 with D- or better or BI 311 with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better Equivalent to: CROP 433, HORT 233

HORT 444. INSECT AGROECOLOGY. (3 Credits)
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 444. Equivalent to: ENT 444

HORT 447. ARBORICULTURE. (4 Credits)
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. CROSSLISTED as FES 447. Offered via Ecampus only. Equivalent to: FES 447

HORT 451. TREE FRUIT PHYSIOLOGY AND CULTURE. (4 Credits)
Plant growth and development in relation to tree fruit production; emphasis on canopy development and pruning theory, flowering and fruit set, and development, dormancy, and cold acclimation. Field trips required.

HORT 452. BERRY AND GRAPE PHYSIOLOGY AND CULTURE. (4 Credits)
Production of wine grapes, caneberrries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years.

HORT 453. GRAPEVINE GROWTH AND PHYSIOLOGY. (3 Credits)
The physiological aspects of grapevine growth and development including dormancy, flowering and fruit set, vegetative growth, fruit development and water relations. Additional topics include taxonomy, morphology and physiological influences of vineyard mesoclimates and microclimate. Lec/lab.

HORT 454. PRINCIPLES AND PRACTICES OF VINEYARD PRODUCTION. (3 Credits)
The relationship of vineyard and canopy management to grapevine physiology and fruit quality. Nutrient/water relations within the soil/vine continuum. Vineyard microclimate, floor management, and pests will also be discussed. Lec/lab. Prerequisites: HORT 301 with D- or better

HORT 455. URBAN FOREST PLANNING, POLICY AND MANAGEMENT. (4 Credits)
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 455. Taught via Ecampus only. Equivalent to: FES 455

HORT 456. PHYSIOLOGY AND PRODUCTION OF BERRY CROPS. (4 Credits)
Physiology and production systems of blueberries, red and black raspberries, blackberries, and other berry crops. Emphasis on plant growth and development; flower and fruit development; cultivars; pruning and training systems; irrigation; harvesting; nutrient management; and conventional and organic production systems. Prerequisites: HORT 301 with D- or better
HORT 463. SEED BIOLOGY. (3 Credits)
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered every even year fall term. CROSSTLISTED as CROP 463/CROP 563. Lec/lab.
Equivalent to: CROP 463

HORT 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT. (4 Credits)
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSTLISTED as CROP 480/CROP 580.
Equivalent to: CROP 480
This course is repeatable for 8 credits.

HORT 481. HORTICULTURE PRODUCTION CASE STUDIES. (4 Credits)
Field-based case studies investigate production issues encountered in horticultural crops; individual and group activities; discussion of processes for troubleshooting, decision-making and management recommendations; assessment of economic, practical and logistical feasibility. Prior knowledge of plant physiology, soils, entomology, and plant nutrition are required. Multiple field trips required. A field trip fee will be charged.
Prerequisites: HORT 301 with D- or better

HORT 485. ADVANCED PERMACULTURE DESIGN TOOLS FOR CLIMATE RESILIENCE. (3 Credits)
Permaculture is a design system for creating sustainable human habitation that enriches the natural world. With climate change, geophysical and social conditions are shifting on the planet. There are specific tools that the permaculture designer can use to assess, analyze and project future climate scenarios and respond to them with resilient design. Climate analogue identification and climate change forecasting provide the basis for a student design project that addresses current and future climatic conditions. Students will complete all design mapping assignments using Google Earth Pro, and tutorials will be provided as a component of the course curriculum.
Prerequisites: HORT 285 with B or better

HORT 495. HORTICULTURAL MANAGEMENT PLANS. (3 Credits)
Develop an integrated management plan for a horticultural enterprise. This course is repeatable for 6 credits.

HORT 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: HORT 499H
This course is repeatable for 16 credits.

HORT 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 499
This course is repeatable for 16 credits.

HORT 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

HORT 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 510. INTERNSHIP. (1-12 Credits)
Offered via Ecampus only.
This course is repeatable for 12 credits.

HORT 511. RESEARCH AND EDUCATIONAL PERSPECTIVES IN HORTICULTURE. (2 Credits)
Introduces beginning graduate students to the faculty in horticulture and provides an in-depth discussion of their research and education programs.

HORT 518. CURRENT TOPICS IN ENTOMOLOGY. (2 Credits)
This is a core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSTLISTED as ENT 518.
Equivalent to: ENT 518
This course is repeatable for 12 credits.

HORT 519. CURRENT TOPICS IN PLANT BREEDING AND GENETICS. (2 Credits)
Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSTLISTED as PBG 519.
Equivalent to: PBG 519
This course is repeatable for 12 credits.

HORT 520. CURRENT TOPICS IN HORTICULTURAL RESEARCH. (2 Credits)
This is a core course in the horticulture graduate program. Students gain an advanced understanding of horticulture science and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to their peers. Instructors, topics and specific learning objectives vary from term to term.
This course is repeatable for 12 credits.

HORT 521. HERBS, SPICES, AND MEDICINAL PLANTS. (3 Credits)
Principles of crop ecology, morphology, chemistry and utilization of natural products of herbs, spices, and medicinal plants (HSMP). Examines the history and importance of HSMP, their historic and modern uses, current market trends, botany, collection in the wild, fundamentals of production systems for HSMP, harvesting, drying, and other postharvest operations, natural products and their uses, regulations and legal concerns of herbal products.

HORT 533. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS. (4 Credits)
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. CROSSTLISTED as CROP 433/CROP 533.
Equivalent to: CROP 533
HORT 544. INSECT AGROECOLOGY. (3 Credits)
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 544.
Equivalent to: ENT 544

HORT 547. ARBORICULTURE. (4 Credits)
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab CROSSLISTED as FES 447.
Equivalent to: FES 547

HORT 552. BERRY AND GRAPE PHYSIOLOGY AND CULTURE. (4 Credits)
Production of wine grapes, caneberrries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years.

HORT 555. URBAN FOREST PLANNING, POLICY AND MANAGEMENT. (4 Credits)
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 555. Taught via Ecampus only.
Equivalent to: FES 555

HORT 556. PHYSIOLOGY AND PRODUCTION OF BERRY CROPS. (4 Credits)
Physiology and production systems of blueberries, red and black raspberries, blackberries, and other berry crops. Emphasis on plant growth and development; flower and fruit development; cultivars; pruning and training systems; irrigation; harvesting; nutrient management; and conventional and organic production systems.

HORT 563. SEED BIOLOGY. (3 Credits)
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered every even year fall term. CROSSLISTED as CROP 463/CROP 563. Lec/lab.
Equivalent to: CROP 563

HORT 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT. (4 Credits)
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/CROP 580.
Equivalent to: CROP 580

HORT 581. HORTICULTURE PRODUCTION CASE STUDIES. (4 Credits)
Field-based case studies investigate production issues encountered in horticultural crops; individual and group activities; discussion of processes for troubleshooting, decision-making and management recommendations; assessment of economic, practical and logistical feasibility. Prior knowledge of plant physiology, soils, entomology, and plant nutrition are required. Multiple field trips required. A field trip fee will be charged.

HORT 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

HORT 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 603. DISSERTATION. (1-16 Credits)
This course is repeatable for 99 credits.

HORT 605. READING & CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

HORT 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Plant Breeding and Genetics

PBG 199. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PBG 199H
This course is repeatable for 16 credits.

PBG 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 199
This course is repeatable for 16 credits.

PBG 299. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PBG 299H
This course is repeatable for 16 credits.

PBG 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 299
This course is repeatable for 16 credits.

PBG 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 403. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

PBG 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: PBG 405H
This course is repeatable for 16 credits.

PBG 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 405
This course is repeatable for 16 credits.
PBG 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 409. TEACHING PRACTICUM. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 410. INTERNSHIP. (1-12 Credits)
Offered via Ecampus only.
This course is repeatable for 12 credits.

PBG 430. PLANT GENETICS. (3 Credits)
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.

PBG 441. PLANT TISSUE CULTURE. (4 Credits)
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab.

PBG 450. PLANT BREEDING. (4 Credits)
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.

PBG 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: PBG 499H
This course is repeatable for 16 credits.

PBG 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 499
This course is repeatable for 16 credits.

PBG 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 503. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

PBG 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 509. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional materials by assisting in laboratory, recitation, and lectures. CROSSLISTED as ENT 509, CROP 509, SOIL 509.
Equivalent to: CROP 509, ENT 509, SOIL 509
This course is repeatable for 9 credits.

PBG 510. INTERNSHIP. (4 Credits)
Offered via Ecampus only.
This course is repeatable for 12 credits.

PBG 513. PLANT GENETIC ENGINEERING. (3 Credits)
Principles, methods, and recent developments in the genetic engineering of higher plants. Offered alternate years.

PBG 519. CURRENT TOPICS IN PLANT BREEDING AND GENETICS. (2 Credits)
Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as HORT 519.
Equivalent to: HORT 519
This course is repeatable for 12 credits.

PBG 530. PLANT GENETICS. (3 Credits)
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.

PBG 541. PLANT TISSUE CULTURE. (4 Credits)
Principles, methods, and applications of plant tissue culture. Laboratory is an important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab.

PBG 550. PLANT BREEDING. (4 Credits)
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.

PBG 551. BREEDING CLONAL CROPS. (1 Credit)
The overall goal of the course is to gain fundamental knowledge of breeding methods for clonal crops; these methods are different from those used for seed-propagated crops. Specific examples from a wide array of plant species (tree fruits, berries, tree nuts, potato, sweet potato, cassava, cacao) will be provided to illustrate application of the fundamental knowledge.

Prerequisites: PBG 450 with C or better or PBG 550 with C or better

PBG 555. CROP PLANT DOMESTICATION. (2 Credits)
Learning is based on discussion of the contemporary literature on crop plant origins and domestication. The major agronomic and horticultural crops will be covered. Topics include primary centers of domestication, traits altered by domestication, effect of genetic architecture and local ecology on domestication, and importance of genetic diversity to current plant improvement efforts.

PBG 557. PLANTS AND PATENTS. (2 Credits)
Learn about different methods of intellectual property protection in agriculture with a focus on plant patents, plant variety protection and utility patents. The rights, current issues and restrictions that different types of patents allow will be presented through reading the current literature.

PBG 559. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
PBG 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 600. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PBG 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 609. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, ENT 609, SOIL 609
This course is repeatable for 9 credits.

PBG 620. DNA FINGERPRINTING. (1 Credit)
Principles and methods for producing and analyzing DNA fingerprints. Offered even years. CROSSLISTED as MCB 620.

PBG 621. GENETIC MAPPING. (1 Credit)
Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered even years. CROSSLISTED as MCB 621.

PBG 622. MAPPING QUANTITATIVE TRAIT LOCI. (1 Credit)
Principles and methods for mapping genes underlying phenotypically complex traits. Offered even years. CROSSLISTED as MCB 622.

PBG 650. ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS. (3 Credits)
Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S~1~, and S~2~ family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and family selection experiments. Offered odd years.

PBG 691. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PBG 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Soil Science

SOIL 101. INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE. (1 Credit)
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as ENT 101, CROP 101.

SOIL 199. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: SOIL 199H
This course is repeatable for 16 credits.

SOIL 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 199
This course is repeatable for 16 credits.

SOIL 205. SOIL SCIENCE. (3 Credits)
Introduction to the chemical, physical and biological nature of soils. Examines how soils function in terms of plant growth, nutrient supply, the global carbon cycle, ecological habitat, and water purification. Community-based learning projects provide hands-on experience with fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec. (Bacc Core Course if taken with SOIL 206 or FOR 206)
Attributes: CPBL – Core, Pers, BioSci Attached Lec; CPPL – Core, Pers, PhySci Attached Lec
Prerequisites: SOIL 206 (may be taken concurrently) with D- or better or FOR 206 (may be taken concurrently) with D- or better

SOIL 206. *SOIL SCIENCE LABORATORY FOR SOIL 205. (1 Credit)
Students will gain hands-on experience with soil science concepts and applications. Laboratory exercises and field trips will help students develop proficiency in the methods/tools for analyzing soil chemistry, biology, morphology, physical properties, and soil forming factors. Skills will be taught in the context of soils' social, economic, and environmental importance. (Bacc Core Course if taken with SOIL 205)
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Corequisites: SOIL 205

SOIL 299. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: SOIL 299H
This course is repeatable for 16 credits.

SOIL 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 299
This course is repeatable for 16 credits.

SOIL 316. NUTRIENT CYCLING IN AGROECOSYSTEMS. (4 Credits)
Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Labs include soil sampling and testing procedures, data collection on soil and plants, computer applications for soil fertility management, and field trips. Lec/lab.
Prerequisites: (CH 121 with D- or better or CH 231 with D- or better) and (SOIL 205 [C] or CSS 205 [C] or CSS 305 [C])

SOIL 360. SOIL MANAGEMENT FOR ORGANIC PRODUCTION. (3 Credits)
This is a skills-based soil management course that is part lecture and part student-centered learning. Significant class time will be devoted to making field-scale management decisions. The course includes individual and group work, presentation, and discussion. The intent is to prepare students for real-world application of soil management decisions in certified organic systems. Using the National Organic Program as a starting point as well as farm system descriptions with extensive long-term data sets, we will interpret soil nutrient analyses, cover cropping systems, and organic amendments, to design soil management plans for two model cropping systems (annual and perennial).
Prerequisites: (SOIL 205 with C or better and (SOIL 206 [C] or FOR 206 [C]) or CSS 205 [C])
SOIL 366. ECOSYSTEMS OF WILDLAND SOILS. (3 Credits)
Focuses on soils that occur in relatively undisturbed ecosystems such as forests and rangelands. Topics covered include properties and processes specific to understanding and managing the soil resource in these areas. An overview of US Soil Taxonomy will also be given.
Prerequisites: SOIL 205 with D- or better or CSS 205 with D- or better

SOIL 388. SOIL SYSTEMS AND PLANT GROWTH. (4 Credits)
Introduces soils as providers of critical resources for plant growth. Explains how soils supply water, air, thermal energy and nutrients to plants. Shows that sustainable management of soil resources requires substantial understanding of their role in the functioning of natural, forest, and agricultural systems. Explains controls on stocks and availabilities of individual soil resources and mechanisms making these resources plant-available.
Prerequisites: ((SOIL 205 with D- or better and (SOIL 206 [D-] or FOR 206 [D-]) or CSS 205 [D-]) and (CH 121 [D-] or CH 231 [D-]) and (BOT 220 [D-] or (BI 204 [D-] or BI 205 [D-] or BI 206 [D-])) or (BI 211 [D-] or BI 212 [D-] or BI 213 [D-]))

SOIL 395. *WORLD SOIL RESOURCES. (3 Credits)
The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. Offered via Ecampus only. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC
Prerequisites: CH 121 with D- or better or CH 122 with D- or better or CH 123 with D- or better or CH 201 with D- or better or CH 202 with D- or better or CH 231 with D- or better or CH 231H with D- or better or CH 232 with D- or better or CH 232H with D- or better or CH 233 with D- or better or CH 233H with D- or better

SOIL 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 403. THESIS. (1-16 Credits)
Independent, original study and preparation of a senior thesis. This course is repeatable for 16 credits.

SOIL 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: SOIL 405H
This course is repeatable for 16 credits.

SOIL 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 405
This course is repeatable for 16 credits.

SOIL 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 408. WORKSHOP. (1-16 Credits)
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
This course is repeatable for 16 credits.

SOIL 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 410. INTERNSHIP. (1-6 Credits)
Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for 12 credits.

SOIL 435. ENVIRONMENTAL SOIL PHYSICS. (3 Credits)
Covers principles of soil physical properties and processes as they relate to agricultural, hydrological and environmental problems. Lec/lab. Offered odd years.
Prerequisites: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better

SOIL 445. ENVIRONMENTAL SOIL CHEMISTRY. (3 Credits)
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.

SOIL 455. BIOLOGY OF SOIL ECOSYSTEMS. (4 Credits)
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.

SOIL 466. SOIL MORPHOLOGY AND CLASSIFICATION. (4 Credits)
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.
Prerequisites: SOIL 205 with D- or better or CSS 205 with D- or better or SOIL 305 with D- or better

SOIL 468. SOIL LANDSCAPE ANALYSIS. (4Credits)
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system and landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered even years.
Prerequisites: SOIL 466 (may be taken concurrently) with D- or better or SOIL 466 (may be taken concurrently) with D- or better

SOIL 475. SOIL RESOURCE POTENTIALS. (4 Credits)
Course builds on knowledge from introductory pedology, soil chemistry, soil physics and soil biology to practice the evaluation of nutrient availability and soil moisture storage in the rooting space. Results from the application of pedotransfer functions to observations at the pit wall are translated into quantitative, numerical expressions of soil resource potentials. Lec/lab.
Prerequisites: SOIL 435 with D- or better and SOIL 455 [D-] and SOIL 466 [D-]

SOIL 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: SOIL 499H
This course is repeatable for 16 credits.

SOIL 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 499
This course is repeatable for 16 credits.

SOIL 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
SOIL 503. THESIS/DISSECTATION. (1-16 Credits)
This course is repeatable for 999 credits.

SOIL 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 508. WORKSHOP. (1-16 Credits)
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
This course is repeatable for 16 credits.

SOIL 509. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as ENT 509, CROP 509, PBG 509.
Equivalent to: CROP 509, ENT 509, PBG 509
This course is repeatable for 9 credits.

SOIL 510. INTERNSHIP. (1-6 Credits)
Professional work experience previously approved and supervised by the department, written report required.
This course is repeatable for 6 credits.

SOIL 511. SOIL: A NATURAL AND SOCIETAL RESOURCE. (3 Credits)
Serves degree- and non-degree-seeking graduate learners wanting soil science knowledge but having minimal science background. Understanding soil physical, chemical, and biological properties promotes informed soil management while supporting individual to global societal values. Established curriculum facilitates graduate degrees or certificates, continuing education, professional certification, and self-improvement goals. A highly interactive social media framework supports weekly student-student and instructor-student learning interactions.

SOIL 512. METHODS OF SOIL ANALYSIS - FIELD. (1 Credit)
Recognition and quantitative description of soil properties in agroecosystems. Assessments of soil environments used for crop production in Oregon. Demonstration and practice of volumetric and bulk soil sampling techniques as well as the application of pedotransfer functions. Each participant will be responsible for analyzing at least one soil sample in the chemical level. Five-day duration with four overnight stays at campgrounds. Participants will use their own or borrowed camping equipment.

SOIL 513. PROPERTIES, PROCESSES, AND FUNCTIONS OF SOILS. (4 Credits)
Physical, chemical, biological, and landscape properties; processes of fluid retention and movement, weathering and cation exchange, decomposition and C-N dynamics, erosion and sedimentation; functions of hydrologic regulation, nutrient cycling, environmental protection, ecological habitat.
Equivalent to: CSS 513

SOIL 514. METHODS OF SOIL ANALYSIS - LABORATORY. (2 Credits)
Provide the theoretical background, as well as practical experience needed to plan, select, execute, and interpret soil chemical and physical analyses such as those typically used for nutrient management recommendations. Individual and group activities involve classroom presentations, as well as hands-on work in a teaching laboratory. Samples processed are those collected in SOIL 512, Methods of Soil Analysis - Field. Duration is five full work days.
Prerequisites: SOIL 512 (may be taken concurrently) with C or better

SOIL 515. SOIL FERTILITY MANAGEMENT. (3 Credits)
Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils.

SOIL 523. PRINCIPLES OF STABLE ISOTOPES. (3 Credits)
An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Offered even years.

SOIL 525. MINERAL-ORGANIC MATTER INTERACTIONS. (3 Credits)
Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties.

SOIL 530. ORGANIC SOIL AND CROP MANAGEMENT. (3 Credits)
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies. CROSSLISTED AS CROP 530.
Equivalent to: CROP 530

SOIL 535. SOIL PHYSICS. (3 Credits)
Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Offered fall term in even years.

SOIL 536. VADOSE ZONE HYDROLOGY LABORATORY. (1 Credit)
Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Offered even years.

SOIL 545. ENVIRONMENTAL SOIL CHEMISTRY. (3 Credits)
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.
SOIL 547. NUTRIENT CYCLING. (3 Credits)
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as BOT 547.

SOIL 555. BIOLOGY OF SOIL ECOSYSTEMS. (4 Credits)
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.

SOIL 556. SOIL MORPHOLOGY AND CLASSIFICATION. (4 Credits)
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.

SOIL 566. SOIL LANDSCAPE ANALYSIS. (4 Credits)
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered odd years.

SOIL 568. SOIL MORPHOLOGY AND CLASSIFICATION. (4 Credits)
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered odd years.

SOIL 591. SELECTED TOPICS. (1-16 Credits)
Course content and title will change with each offering. This course is repeatable for 16 credits.

SOIL 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 603. THESIS/DISSertation. (1-16 Credits)
This course is repeatable for 999 credits.

SOIL 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 609. PRACTICUM IN TEACHING. (1-3 Credits)
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.

Equivalent to: CROP 609, ENT 609, PBG 609
This course is repeatable for 9 credits.

SOIL 635. ADVANCED SOIL PHYSICS. (3 Credits)
Explores theoretical development of a key topic in soil physics. Topics may include evaporation from porous media, multiphase fluid movement, soil deformation, and soil salinization, with respect to either historical development, present day understanding or future needs of the field. Course structure incorporates lectures and discussion requiring intensive student participation. Offered odd years.

Prerequisites: CSS 535 with C or better or SOIL 535 with C or better

SOIL 645. SOIL MICROBIAL ECOLOGY. (3 Credits)
An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Offered even years.

SOIL 684. GLOBAL BIOGEOCHEMICAL CYCLES. (4 Credits)
An in-depth treatment of global biogeochemical cycles, focusing on cycles of carbon, oxygen, nitrogen, phosphorus, and sulfur in the atmosphere, hydrosphere, and lithosphere. CROSSLISTED as GEO 684.

Equivalent to: GEO 684

SOIL 691. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SOIL 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Sustainability

SUS 102. *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY. (4 Credits)
An introduction to the science behind critical environmental issues and the biological basis of creating and maintaining sustainable ecosystems. Focus on such questions as: how do we decide what to believe about environmental issues? How do we quantify, restore, and value biodiversity? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

SUS 103. *INTRODUCTION TO CLIMATE CHANGE. (4 Credits)
An introduction to the principles of climate change science with an emphasis on the empirical evidence for climate change. Students will learn critical thinking skills to assess such questions as: How do we determine the processes controlling global warming? How do we predict trends in climate change? How do we calculate and understand uncertainty in these predictions? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Physical Science

SUS 304. *SUSTAINABILITY ASSESSMENT. (4 Credits)
Explores theories and application of sustainability assessment techniques and analysis methods. Practical application of globally recognized assessment protocol, including checklists, footprinting, life-cycle analysis and the indicators used to conduct these analyses. Emphasis on ecological and social indicators, although economic indicators are explored. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society
The Department of Horticulture offers graduate work leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees. The MS and PhD degrees culminate in original research reported in a thesis and are often pursued by students interested in research related careers, or who wish direct training in research methods.

The Department of Horticulture has strengths and expertise in:

**Breeding, Genetics, and Biotechnology.** Faculty and students explore fundamental questions related to the control and regulation of plant traits using a variety of techniques and tools including molecular biology, genomics and bioinformatics. Faculty and students also apply fundamental knowledge to make genetic improvements to crop plants and to modify plant growth and productivity. Current breeding programs exist in berry, hazelnut and vegetable systems.

**Sustainable Crop Production.** Faculty and students explore basic and applied questions related to the design and management of sustainable and productive horticultural cropping and farming systems. The program integrates a diverse set of disciplines and tools including basic plant sciences, applied crop management, and field experimentation and analysis. Program areas include viticulture and enology, berries and small fruit, tree fruit and nuts, vegetables, nursery and greenhouse production, and entomology.

**Community and Landscape Horticultural Systems.** Faculty and students explore basic and applied questions related to the design and function of urban and community landscapes including golf courses, sports fields, gardens, parks and open space. Program areas include turf and landscape management, community food systems, pollinator ecology, sustainable landscapes, and entomology.

For more information, visit our website at [http://horticulture.oregonstate.edu](http://horticulture.oregonstate.edu) or contact a member of the graduate faculty, John Lambrinos, Graduate Coordinator, Department of Horticulture, 4017 Agricultural and Life Sciences Building, OSU, Corvallis, OR 97331-7304, email: john.lambrinos@oregonstate.edu.

**Major Code: 1450**

### Entomology Graduate Option

This option is offered within the following major(s):
- Crop Science - College of Agricultural Sciences (p. 150)
- Horticulture - College of Agricultural Sciences (p. 207)

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching, and extension in the context of understanding the basic biology of insects and, with this knowledge, then working with insects in natural and/or managed environments. The discipline of entomology at Oregon State University covers behavior, ecology, evolution, physiology, systematics, molecular biology, chemical ecology, plant-insect interactions, pollination by honey bees and native bees, biological control, integrated pest management, and insecticide toxicology. Oregon State Entomology addresses insect-related issues in aquatic and terrestrial systems in natural, agricultural, forested, and urban environments. Entomologists collaborate with plant scientists, physiologists, pathologists, soil scientists, geneticists, molecular biologists, and experts in other fields.

Students in the Entomology option will conduct thesis research related to insects under the supervision of an entomologist associated with the graduate faculty in Crops or Horticulture, and take courses that provide knowledge and understanding about insects. After completing their degree, students will have gained fundamental knowledge in entomology.
that may be applied in agricultural, aquatic, forested, natural, and urban

environments.

**Plant Breeding and Genetics Graduate Option**

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 150)
- Horticulture - College of Agricultural Sciences (p. 207)

The Plant Breeding and Genetics (PBG) graduate option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics graduate option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students’ career goals including further graduate study, as well as direct entry into public or private sector breeding programs. After completing the degree, students will have the fundamental knowledge of plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

Total Hours 12

**Horticulture Graduate Minor**

**Minor Code: 1450**

The Horticulture minor is an effective way for students, including majors outside the College of Agricultural Sciences, to meet their interests. The goals of students minoring in horticulture may vary widely. With just 5 credits in the minor core, students will be able to tailor their additional horticulture course work to personal goals.

Select 22 additional HORT credits (At least 10 must be upper division)

Total Hours 27

Course selection must be approved by the departmental academic advisor.

Students are required to earn a grade of C– or better in all HORT and PBG courses taken to complete the minor.

**Minor Code: 145**

**Horticulture Undergraduate Major (BS, HBS)**

Also available via Ecampus.

**Grade Requirements for Horticulture Major**

Students pursuing a major in horticulture are required to receive a grade of C– or better in all HORT (horticulture) and PBG (plant breeding and genetics) courses that are required for completion of their major and option. If a grade below C– is received in a HORT or PBG course required for their major and option a student will need to re-take the course and receive a grade of C– or better. If the grade below a C– was received for
a course that is part of a group of courses where the student can select which courses to take (i.e., they do not need to take all of the courses, just a specified number of courses or credits) then it would be acceptable for the student to substitute a course for the one that they had received a grade below a C−. For example, in most of our options, a student needs to complete three of four plant identification courses. If a student received a grade lower than a C− in one of the classes, they could either re-take the same course or complete the other three courses with a grade of C− or better.

Grade Requirements for Horticulture Major – Plant Breeding and Genetics Option

Students pursuing an option in Plant Breeding and Genetics, under the Horticulture Major, and under the Crop and Soil Science Major, are required to receive a grade of C− or better in all BOT, CROP, CSS, FOR, HORT, MB, PBG, SOIL and ST courses required within their major and option.

Total credits required for graduation 180

1 Horticultural Research option requires the CH 231 GENERAL CHEMISTRY/CH 261 *LABORATORY FOR CHEMISTRY 231, CH 232 GENERAL CHEMISTRY/CH 262 *LABORATORY FOR CHEMISTRY 232, CH 233 GENERAL CHEMISTRY/CH 263 *LABORATORY FOR CHEMISTRY 233 chemistry series.

2 Plant Breeding and Genetics option requires PBG 403 THESIS or PBG 410 INTERNSHIP and CSS majors only need to complete 3 credits minimum

* Baccalaureate Core Course (BCC)

Major Code: 145
Ecological Management of Turf, Landscape and Urban Horticulture Option

The turf, landscape, and urban horticulture industries are large and diverse, offering careers in golf course and athletic field management; landscape design, construction, management, and ecological restoration; conservation; park, botanical, and public garden management; urban forestry policy and management; research; and consulting.

Turf is the central feature of golf courses, sports fields, parks, cemeteries, and landscapes in cities and neighborhoods throughout the United States. Professional lawn care is a thriving industry in Oregon communities that is complimented by a vibrant sports turf and grass seed industry. This continually growing industry offers more career track jobs than any other area in horticulture.

Students in turf management become golf course superintendents, athletic field and park managers, and lawn care professionals. The program focuses on science, technology, ‘in-field’ hands-on experience, and decision making in real-world settings. Activities stress networking and exposure to multiple work environments to help students integrate quickly into the industry.

In the landscape and urban horticulture program, students will learn about sustainable landscape management, urban forestry, and the ecosystem services provided by the built environment, such as carbon sequestration and climate regulation, temperature modulation, waste decomposition and detoxification, purification of water and air, storm and rainwater management, crop pollination, pest and disease control, nutrient dispersal and cycling, seed dispersal, intellectual and spiritual inspiration, recreational experiences, and scientific discovery.

Landscape professionals design, build, and manage aesthetically pleasing, functional, and environmentally responsible natural spaces where we all live, work, and play. In recent years, the industry has expanded and rapidly become more sophisticated to meet the challenges of today’s urban environment. Consequently, there is great demand for creative, motivated individuals who love the outdoors and enjoy working with plants, soil, water, nature, and people.

1 Meets Synthesis requirements. Each course must be from a different department.

Option Code: 792

General Horticulture Option

This option is offered within the following major(s):
• Horticulture - College of Agricultural Sciences (p. 208)

Via Ecampus (http://ecampus.oregonstate.edu) only.

The online General Horticulture option curriculum is built on a strong foundation in horticultural science. This option is especially recommended for students already working in the horticultural industry or research facilities, whose careers will benefit from post-secondary education in the horticultural sciences. Students learn horticultural principles and practices associated with horticultural production within the context of plant biology, pest management, soils, ecology, and economics with applications in plant nutrition, pest management, business, and marketing. In addition, students are well-informed about Science, Technology and Society.
the latest technology and trends in the field. The option provides sufficiently broad electives for the student to build his or her curriculum to meet specific goals.

Our graduates are skilled in finding and using information, as well as synthesizing information from many sources to solve problems. On-campus students benefit from field and lab experiences, research projects, and internships. Ecampus students will benefit from these same hands-on opportunities. With departmental support, the online student will identify opportunities for field, laboratory, internship, and research experiences, which will be vetted by the Department of Horticulture. Some lab experiences will be in the form of kits that the student will purchase and receive by mail; others will be virtual lab experiences created collaboratively between Department of Horticulture faculty and the curriculum design team in Ecampus.

The internship provides professional-level interaction with growers, managers, field reps, and consultants, and provides hands-on experience. Similarly, the research project familiarizes students with research topics and connects them with researchers in academia, public agencies, and private industry. Mentoring and advising will assist online students in taking advantage of departmental strengths.

The Horticultural Research option is designed for students interested in graduate school and a career in academic or industrial research. It provides an excellent foundation in the natural sciences and horticulture and accommodates the specific interests of each student. Graduates of this program will be critical thinkers, and experienced technical communicators. They will be skilled in finding and using information, as well as synthesizing information from many sources to analyze novel situations and solve problems.

The relationship between the student and the research mentor is a key feature of this program. The mentor will assist the student in choosing upper-division classes that match the student’s interests. Each student also completes a research project under the guidance of his or her mentor and writes an undergraduate thesis. Students can work with horticulture researchers on the OSU campus or at research institutions of their choosing. Our undergraduates have been welcomed at other universities and at local research institutions including the United States Department of Agriculture-Agricultural Research Service laboratories, the National Clonal Germplasm Repository in Corvallis, the Corvallis Plant Materials Center of the National Resources Conservation Service, and the North Willamette Research and Extension Center.

In addition to the required Horticulture major Core courses, students in this proposed option will complete the following courses:

### Code

#### Plant Materials

Select one of the following:

- BOT 313 PLANT STRUCTURE
- BOT 321 PLANT SYSTEMATICS
- BOT 425 FLORA OF THE PACIFIC NORTHWEST
- CROP 200 CROP ECOLOGY AND MORPHOLOGY
- FES 241 DENDROLOGY
- HORT 226 LANDSCAPE PLANT MATERIALS I: DECIDUOUS HARDWOODS AND CONIFERS
- HORT 228 LANDSCAPE PLANT MATERIALS II: SPRING FLOWERING TREES AND SHRUBS
- HORT 251 TEMPERATE TREE FRUIT, BERRIES, GRAPES, AND NUTS
- HORT 255 HERBACEOUS ORNAMENTAL PLANT MATERIALS
- HORT 433/ CROP 433 SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS

#### Ecology

Select one of the following:

- BI 370 ECOLOGY
- BOT 341 PLANT ECOLOGY
- HORT 318 ^APPLIED ECOLOGY OF MANAGED ECOSYSTEMS

#### Technology
Select one of the following:

- HORT 414 / CROP 414: PRECISION AGRICULTURE
- PBG 441: PLANT TISSUE CULTURE

**Horticultural Communication**

- HORT 406/BRR: PROJECTS: DATA PRESENTATIONS
- HORT 407: SEMINAR
- HORT 411: HORTICULTURE BOOK CLUB

Select one of the following Writing Intensive Courses:

- BOT 323: *FLOWERING PLANTS OF THE WORLD
- HORT 318: *APPLIED ECOLOGY OF MANAGED ECOSYSTEMS

**Capstone**

Select one of the following:

- HORT 452: BERRY AND GRAPE PHYSIOLOGY AND CULTURE
- HORT 453: GRAPEVINE GROWTH AND PHYSIOLOGY
- HORT 454: PRINCIPLES AND PRACTICES OF VINEYARD PRODUCTION
- HORT 463 / CROP 463: SEED BIOLOGY
- HORT 481: HORTICULTURE PRODUCTION CASE STUDIES
- PBG 450: PLANT BREEDING

**Advanced Horticultural Science**

- PBG 430: PLANT GENETICS

**Math and Science Foundation**

- MTH 251: *DIFFERENTIAL CALCULUS
- MTH 252: INTEGRAL CALCULUS
- ST 351: INTRODUCTION TO STATISTICAL METHODS

Select 3 of the following courses:

- BB 350: ELEMENTARY BIOCHEMISTRY
- CH 331: ORGANIC CHEMISTRY
- CH 332: ORGANIC CHEMISTRY
- PH 201: *GENERAL PHYSICS
- PH 202: *GENERAL PHYSICS

Select 12 credits of upper-division Horticulture and Life Science courses with approval of research mentor and advisor.

**Ecology and Sustainability Ecosystems Courses**

Meets Synthesis requirements. Each course must be from a different department.

**Contemporary Global Issues**

Select one of the following:

- AEC 351: *NATURAL RESOURCE ECONOMICS AND POLICY
- AEC 352 / ECON 352: *ENVIRONMENTAL ECONOMICS AND POLICY
- BI 301: *HUMAN IMPACTS ON ECOSYSTEMS
- CROP 330: *WORLD FOOD CROPS
- FES 365: *ISSUES IN NATURAL RESOURCES CONSERVATION
- FW 325: *GLOBAL CRISSES IN RESOURCE ECOLOGY
- GEOG 300: *SUSTAINABILITY FOR THE COMMON GOOD
- GEOG 330: **GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION
- HORT 331 / ENT 331: *POLLINATORS IN PERIL

**Science, Technology and Society**

Select one of the following:

- AGRI 411: *INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL
- ANS 315: *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE
- BI 348: *HUMAN ECOLOGY
- BOT 324: *FUNGI IN SOCIETY
- CH 374: *TECHNOLOGY, ENERGY, AND RISK
- ENGR 350: *SUSTAINABLE ENGINEERING
- ENGR 363: *ENERGY MATTERS
- ENSC 479: **ENVIRONMENTAL CASE STUDIES
- FES 435/TOX 435: *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK
- FES 477/NR 477: AGROFORESTRY
- FES 485: *CONSENSUS AND NATURAL RESOURCES
- FST 421: *FOOD LAW
- FW 470: *ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN
- GEOG 300: *SUSTAINABILITY FOR THE COMMON GOOD
- GEOG 340: *INTRODUCTION TO WATER SCIENCE AND POLICY
- HORT 330 / ENT 300: *PLAGUES, PESTS, AND POLITICS
- HST 481: *ENVIRONMENTAL HISTORY OF THE UNITED STATES
- HSTS 421: *TECHNOLOGY AND CHANGE
- NUTR 312: *ISSUES IN NUTRITION AND HEALTH
- PH 313: *ENERGY ALTERNATIVES
- PHL 325: *SCIENTIFIC REASONING
- PS 476: *SCIENCE AND POLITICS
- SOIL 395: *WORLD SOIL RESOURCES
- SUS 304: *SUSTAINABILITY ASSESSMENT

Total Hours: 51-57

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Plant Breeding and Genetics Option

This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 143)
- Horticulture - College of Agricultural Sciences (p. 208)

The Plant Breeding and Genetics (PBG) option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including graduate school, as well as directly entering public or private sector breeding programs. After completing their degree, students will have gained fundamental knowledge in plant breeding that may be applied in a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

This option is under both the Crop and Soil Science major and the Horticulture major. The option uses the new horticulture major core.

Sustainable Horticultural Production Option

Students in the Sustainable Horticultural Production option gain the knowledge and skills necessary to plan and manage horticultural production systems for fruit, nut, vegetable, nursery, and greenhouse crops using environmentally sustainable practices. They come to see horticulture as a way to create and maintain vital and productive agro-ecosystems and understand the role of horticulture within a larger societal context which includes issues of ecology, economics, and politics.

The Sustainable Horticultural Production option stresses active learning, case studies about real-world situations, and integrating ideas and facts from many different subjects. Sustainable Horticultural Production graduates will be active learners, and possess skills prized by employers and useful for establishing their own enterprises. They will have a broad and thorough knowledge of horticulture and the skills and knowledge needed to identify, develop, and practice ecological and sustainable methods. They will be able to think critically. They will be skilled in finding and using information, as well as synthesizing information from many sources to analyze novel situations and solve problems in the field.

Therapeutic Horticulture Option

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (p. 208)

Horticultural therapy is a rapidly growing area of horticulture. The therapeutic benefits of garden environments have been understood and applied since ancient times. Horticultural therapy is recognized as a practical and effective treatment with wide-ranging benefits for people in therapeutic, vocational, and wellness programs. It is now taught and practiced throughout the world in a wide diversity of settings and cultures including mental health, physical rehabilitation, vocational services, corrections, long-term care and hospice, special education, and youth and community services. Horticultural therapists design garden spaces that accommodate people with a wide range of abilities and assist people with physical, emotional or mental disabilities in gaining skills, adaptations, and coping methods that enhance their lives.

Students in the Therapeutic Horticulture option graduate with a strong foundation in horticultural science and practices. In addition, they acquire the skills and knowledge needed to design healing and adapted gardens and to provide therapy programs used to improve the quality of people’s lives.

- Confirm course work requirements for Professional Registration by the American Horticultural Therapy Association (AHTA) at http://ahta.org/professional-registration.

- All course work must have a passing grade of C– or above or a pass for a pass/fail course.

- A 480-hour AHTA approved and supervised internship is also required for Professional Registration by the AHTA.

Viticulture and Enology Option

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (p. 208)

The Oregon winegrape industry has experienced steady growth since its beginning in 1961. Oregon now ranks third nationally in the number of wineries, and fourth in wine production and vineyard acreage. Vineyards and wineries have also become an integral part of the Oregon tourism industry.

The viticulture and enology curriculum addresses the educational needs of students planning to enter the winegrape industry as viticulturists, vineyard managers, consultants and professionals. The curriculum involves active learning, providing case studies about real-world situations, enhancing critical thinking skills through understanding the art and science of vineyard and winery production. Viticulture and enology students will be active learners in a multi-disciplinary major. Upon graduation, they will possess the skills prized by employers as managers with the ability to think critically and troubleshoot in the vineyard and winery. They will have a thorough knowledge of vine physiology, vineyard production, winery production and related topics. They will understand how their actions in the field affect the quality of the finished wine. They will be skilled in finding resources and using information to analyze novel situations and solve problems in the industry.

In addition to the required Horticulture Major Core courses, students in this proposed option will complete the following courses:

<table>

### Business Management

Select one of the following: 3-4

- AEC 211  AGRICULTURAL AND FOOD MANAGEMENT
- AEC 221  AGRICULTURAL AND FOOD MARKETING
- AEC 250  *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY
- AEC 251  *INTRODUCTION TO AGRICULTURAL AND FOOD ECONOMICS
- BA 215   FUNDAMENTALS OF ACCOUNTING
- BA 260   INTRODUCTION TO ENTREPRENEURSHIP
- BA 463   FAMILY ENTERPRISE GOVERNANCE

### Ecology and Sustainability Ecosystems Courses

Meets Synthesis requirements. Each course must be from a different department.

### Contemporary Global Issues

Select one of the following: 3-4

- AEC 351  *NATURAL RESOURCE ECONOMICS AND POLICY
- AEC 352/ ECON 352 *ENVIRONMENTAL ECONOMICS AND POLICY
- BI 301   *HUMAN IMPACTS ON ECOSYSTEMS
- CROP 330  *WORLD FOOD CROPS
- FES 365  *ISSUES IN NATURAL RESOURCES CONSERVATION
- FW 325   *GLOBAL CRISIS IN RESOURCE ECOLOGY
- GEOG 300  *SUSTAINABILITY FOR THE COMMON GOOD
- GEOG 330  **GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION
- HORT 331/ ENT 331 *POLLINATORS IN PERIL
- SUS 350  *SUSTAINABLE COMMUNITIES
- WSE 470  *FORESTS, WOOD, AND CIVILIZATION

### Science, Technology and Society

Select one of the following: 3-4

- AGRI 411  *INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL
- ANS 315  *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE
- BI 348   *HUMAN ECOLOGY
- BOT 324  *FUNGI IN SOCIETY
- CH 374   *TECHNOLOGY, ENERGY, AND RISK
- ENGR 350  *SUSTAINABLE ENGINEERING
- ENGR 363  *ENERGY MATTERS
- ENSC 479  **ENVIRONMENTAL CASE STUDIES
- FES 435/TOX 435 *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK
- FES 477/NR 477 *AGROFORESTRY
- FES 485  *CONSENSUS AND NATURAL RESOURCES
- FST 421  *FOOD LAW
- FW 470/HSTS 470 *ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN
- GEOG 300  *SUSTAINABILITY FOR THE COMMON GOOD
- GEOG 340  *INTRODUCTION TO WATER SCIENCE AND POLICY
- HEST 310  *INTRO TO COMMUNITY ENGAGEMENT AND COMMUNITY-BASED DESIGN
- HORT 330/ ENT 300 *PLAGUES, PESTS, AND POLITICS
- HST 481  *ENVIRONMENTAL HISTORY OF THE UNITED STATES
- HSTS 421  *TECHNOLOGY AND CHANGE
- NUTR 312  *ISSUES IN NUTRITION AND HEALTH
- PH 313   *ENERGY ALTERNATIVES
- PHL 325  *SCIENTIFIC REASONING
- PS 476   *SCIENCE AND POLITICS
- SOIL 395  *WORLD SOIL RESOURCES
- SUS 304  *SUSTAINABILITY ASSESSMENT

### Total Hours: 66-71

  - Water Resources
  - International Studies Undergraduate Major (BA, HBS)
How do our food choices shape our world? Food systems, farm to plate, What is a food system, what does it look like, and how does it work?

Minors
- Bioenergy (p. 230)
- Sustainability (p. 240)

College of Agricultural Science Courses

AGRI 199. SPECIAL TOPICS. (1-3 Credits)
This course is repeatable for 8 credits.

AGRI 299. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. 
This course is repeatable for 8 credits.

AGRI 399. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agricultural science. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. 
This course is repeatable for 8 credits.

AGRI 402. INDEPENDENT STUDIES. (1-16 Credits)
Graded P/N. 
This course is repeatable for 16 credits.

AGRI 407. SEMINAR. (1-16 Credits) 
This course is repeatable for 16 credits.

AGRI 411. *INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL. (3 Credits)
What is a food system, what does it look like, and how does it work? How do our food choices shape our world? Food systems, farm to plate, operate within social, political, economic, and natural environments, at multiple scales. This multidisciplinary course will introduce students to the complex topic of food systems, at different scales and from a variety of perspectives. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

AGRI 438. EXPLORING WORLD AGRICULTURE. (2 Credits)
Global practices of food production are highly diverse. However, there are also many common global issues related to agriculture, food, and natural resources. Speakers with international backgrounds and experiences will present material, as well as student teams who will research a topic of personal interest. In addition, opportunities for global study, internship, and research will be explored.

AGRI 499. SPECIAL TOPICS. (1-4 Credits)
Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. 
This course is repeatable for 8 credits.

AGRI 511. INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL. (3 Credits)
What is a food system, what does it look like, and how does it work? How do our food choices shape our world? Food systems, farm to plate, operate within social, political, economic, and natural environments, at multiple scales. This multidisciplinary course will introduce students to the complex topic of food systems, at different scales and from a variety of perspectives.

Bioresource Research Courses

BRR 100. GREAT EXPERIMENTS IN BIORESOURCE SCIENCES. (1 Credit)
For students interested in BRR and undergraduate research, to introduce the research process and help them start defining research interests and project areas. Faculty describe research projects and experimental approaches, and pose interesting political and ethical questions related to scientific research. Students work with junior and senior student mentors already involved in research projects. Offered fall term. 
This course is repeatable for 2 credits.

BRR 200. DEVELOPING A RESEARCH PROPOSAL: THEORY AND PRACTICE. (1 Credit)
An introduction to conceptual issues for organizing, planning, designing and conducting research in biological and agricultural sciences and natural resources disciplines. Students will master methods and philosophy of research, and then apply them by working in teams to analyze a timely and relevant problem and formulate experimental approaches to address it. 
This course is repeatable for 2 credits.

BRR 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

BRR 325. *ENERGY TECHNOLOGY AND SOCIAL CHANGE. (3 Credits)
Science and technology co-evolve with a prosperous human society. The course discusses key issues surrounding the interaction between social changes and energy technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

BRR 350. INTRODUCTION TO REGIONAL BIOENERGY. (2 Credits)
Field trips to visit regional industry and research facilities will introduce bioenergy core concepts and technologies. Guest lecturers will provide technical background and discuss economic, environmental and socio-cultural sustainability of bioenergy. Course projects will analyze and present each facility in the context of regional bioenergy issues. Lec/lab.

BRR 399. SPECIAL TOPICS. (0-4 Credits)
This course is repeatable for 6 credits.

BRR 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Undergraduate mentored research. Students select a faculty research mentor (from 7 OSU colleges) and complete 14 credits of research. Students follow established guidelines to prepare project proposals, progress reports, and a thesis; learn research methods applicable to their chosen field; gain professional skills and contacts. Students are evaluated on their ability to develop and complete a research project proposal, learn and develop research methodologies, conduct research and trouble-shooting procedures, and demonstrate responsible and ethical participation in the research project. Offered all terms. 
This course is repeatable for 99 credits.
Bioenergy Minor

Bioenergy is renewable energy derived from biomass, including by-products, residues, waste products, and crops and microbes grown specifically for fuel. Development of bioenergy could contribute to long-term environmental and economic sustainability, and help mitigate the climate impact of using fossil fuels. However, developing and establishing bioenergy will require integrating expertise from social, economic, and scientific/technical fields.

The Bioenergy minor is research-based and interdisciplinary, and provides an introduction to bioenergy concepts and issues, along with research experience and professional development. The Bioenergy minor is open to students in majors in science, agricultural sciences, forestry, engineering, earth/ocean/atmospheric sciences, education, social sciences and business, or with permission of the bioenergy adviser. Required classes for the minor present central bioenergy concepts such as life cycle analysis, feedstocks, feedstock conversions, and sustainability; introduce interdisciplinary research and research methods; expose students to regional bioenergy industries and issues; and provide professional skills and training. Each student will do a mentored bioenergy research project with a participating faculty member, industry or extension partner; write a thesis; and present a public seminar. This transcript-visible minor complements existing majors to help students attain their career or graduate/professional school goals in the growing field of bioenergy.

For further information, contact:

Kate Field, Director
Wanda Crannell, Advisor
158 Strand Agriculture Hall
Oregon State University
Corvallis, OR 97331-2911
541-737-2999
E-mail: BRR@oregonstate.edu
Website: http://agsci.oregonstate.edu/brr/

A basic knowledge of chemistry is needed to understand bioenergy core concepts, such as the carbon cycle and pathways of energy conversion. Bioenergy minor students must take CH 122 *GENERAL CHEMISTRY or equivalent. CH 122 *GENERAL CHEMISTRY fulfills Bacc Core requirements and is a prerequisite for WSE 473 BIOENERGY AND ENVIRONMENTAL IMPACT, which is required for the Bioenergy minor.

BRR 403. *THESIS. (4 Credits)
BRR students independently interpret and present their research in writing. Students write the thesis in a style appropriate for submission to a peer-reviewed journal in their chosen scientific discipline. Students receive a letter grade based on their final thesis. Timeliness of reports is factored in student assessments. The student’s faculty mentor and the BRR Director provide a consensus grade when the thesis is completed. Offered all terms. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

BRR 404. WRITING AND CONFERENCE. (1-3 Credits)
Thesis writing for Bioenergy minor and other students. This course is repeatable for 3 credits.

BRR 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

BRR 406. PROJECTS-DATA PRESENTATIONS. (1 Credit)
For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students’ posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. CROSSLISTED as HORT 406.
Equivalent to: HORT 406

BRR 407. SEMINAR. (1 Credit)
For BRR students, to encourage excellence in public speaking. Exposes students to a variety of current seminar topics and provides them with the opportunity to evaluate components of good public seminars. Students receive a grade only after completing a public seminar on their own research (final research seminar). Offered spring term.

BRR 409. PRACTICUM: TEACHING AND PEER MENTORING. (1-2 Credits)
Upper-division BRR students are grouped with lower-division students in BRR 100 to facilitate discussion and encourage dialogue about current research topics. Juniors and seniors Juniors and seniors continue to learn new ways to teach and communicate science issues in written and verbal formats. Offered fall term.
This course is repeatable for 16 credits.

BRR 410. INTERNSHIP. (1-12 Credits)
Supervised internship allowing students to gain off-campus work experience for credit. Under direction and approval of the program director, students will submit a statement of intent, identify employer contact, and provide a written report upon completion. This course is repeatable for 16 credits.

BRR 450. INTERDISCIPLINARY RESEARCH: BIOENERGY FOCUS. (2 Credits)
Bioenergy research presentations and papers introduce scientific inquiry, the research process, research seminars, papers and proposals. Analysis of different disciplines’ approaches to research tools and data sources (e.g., quantitative versus qualitative approaches). Student teams write research proposals. Second core class in the Bioenergy minor.

BRR 499. SPECIAL TOPICS. (2 Credits)
This course is repeatable for 4 credits.
Bioresource Research Undergraduate Major (BS, HBS)

BioResource Research (BRR) is an interdisciplinary biosciences major centered around research aimed at understanding and protecting the planet's biological resources and exploring their novel and sustainable uses. BRR students complete a comprehensive mentored research experience, in a cutting-edge area of agricultural, biological, chemical, environmental, food, or health science. BRR faculty research mentors come from across OSU, as well as from extension stations and state and federal agencies. Each student's upper-division curriculum is individualized based on choice of option and research project. In addition to research expertise, BRR students graduate with a strong background in biosciences, job training, and problem-solving and communication skills. These skills lead to careers in industrial or academic research, natural resource management, and graduate and professional programs in the life sciences and medicine.

Completion of an option is required to earn a degree in Bioresource Research.

Options Curricula

One option specialization is required (more are often possible). Course work for EACH option must total 29 credits.

Total credits required for graduation is 180.

Animal Reproduction and Development Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Animal reproduction and development entails the study of life processes in cells, organs, and whole animals to enhance efficient production of high-quality animals and animal food products. Students use antibody-based assays, molecular genetics, protein chemistry, embryo and tissue culture, electron chemistry, and other modern laboratory techniques in research in areas of animal reproduction, development and growth, preparing them for positions or graduate programs in the bioscience/biomedical/veterinary/agricultural fields.

Total Hours 27-31

* Baccalaureate Core Course (BCC)

Option Code: 127

Applied Genetics Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Applied genetics is directed at changing the genomes of organisms, to increase their utility to humans. Techniques are derived from cytogenetics, molecular biology, and Mendelian and quantitative genetics. Typically, applied geneticists have expertise in one or more related fields of study such as agronomy, biochemistry, botany, entomology, food processing, forestry, microbiology, pathology, physiology, and statistics.

The goals of applied genetics include:
1. improving the quality of food and fiber products,
2. improving the cost efficiency of a given product, and
3. minimizing adverse environmental effects of food or fiber production.

Students in this option will be well prepared for positions in biosciences and agriculture, or in graduate and professional programs.

Bioenergy is renewable energy (e.g., fuel ethanol, hydrogen and biodiesel) derived from biomass, including byproducts, residues, woody waste products, and crops and microbes which are grown specifically for fuel. Development and production of bioenergy could contribute to long-term environmental and economic sustainability. Bioenergy research creates new uses for agricultural and other materials by developing new biochemical processes for the production of sustainable fuels. This area of research involves both science and engineering. Students completing this option will be ready for challenging careers in industry, governmental agencies, consulting companies, and novel start-up companies, or for graduate programs.

Total Hours 24-28

1. background appropriate to the systems that their research concerns (e.g., forests, agricultural crops, microbes);
2. an upper-division laboratory class;
3. appropriate “engineering” course work, broadly defined to include process engineering, ecological engineering, bioinformatics, breeding, or genetic engineering, depending on the student’s choice of research.

**Code**  **Title**  **Hours**

1. **Background Course**
   Select one of the following:
   - CROP 330  *WORLD FOOD CROPS  3
   - FOR 111  INTRODUCTION TO FORESTRY
   - MB 302  GENERAL MICROBIOLOGY

2. **Upper-Division Lab Course**
   Select one of the following:
   - BB 493  BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1
   - BB 494  BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2
   - BOT 332  LABORATORY TECHNIQUES IN PLANT BIOLOGY
   - MB 303  GENERAL MICROBIOLOGY LABORATORY

3. **Engineering Course**
   Select one of the following or another appropriate upper-division course in the area of process or ecological engineering, genomics/bioinformatics, or genetic engineering, approved by research mentor
   - BEE 102  ECOLOGICAL ENGINEERING II
   - BEE 320  BIOSYSTEMS ANALYSIS AND MODELING
   - BOT 475  COMPARATIVE GENOMICS
   - ENGR 350  *SUSTAINABLE ENGINEERING

4. **Specialization and Breadth Courses**
   Select 19–21 credits from above and below, or other upper-division courses approved by research mentor, to total 29
   - AEC 351  *NATURAL RESOURCE ECONOMICS AND POLICY
   - AEC 352  *ENVIRONMENTAL ECONOMICS AND POLICY
   - ECON 201  *INTRODUCTION TO MICROECONOMICS

---

**Bioproducts Option**

This option is offered within the following major(s):  
- Bioresource Research - College of Agricultural Sciences (p. 231)

Bioproducts are biomaterials or biochemicals (e.g., biodegradable plastics and composites, antibiotics, pharmaceuticals and herbicides) produced by conversion processes from plant, animal, or microbial biomass. Development and production of bioproducts contribute to environmental and economic sustainability. Bioproducts research creates new uses for agricultural and other materials by developing new biochemical processes for the production of renewable chemicals and bioproducts. This area of research involves both science and engineering. Students completing this option will be ready for challenging careers in industry, governmental agencies, consulting companies, and novel start-up companies, or for graduate programs.

Students must choose option classes from three categories, to provide:

---

1. Note: Students choosing BEE 221 FUNDAMENTALS OF ECOLOGICAL ENGINEERING may substitute it for BEE 102 ECOLOGICAL ENGINEERING II.
2. * Baccalaureate Core Course (BCC)
3. ^ Writing Intensive Course (WIC)

**Option Code: 767**
Biotechnology Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Biotechnology refers to laboratory-based techniques such as genetic engineering, recombinant DNA, tissue culture, and horizontal gene transfer, to make or modify products, to improve plants or animals, or to develop useful microorganisms. Examples include gene transfer to increase plant yield or disease resistance; cell and tissue culture to clonally propagate plants or animals; manipulation of microorganisms or cultured cells for the production of fermented food and beverages or the development of vaccines; production of antibodies for detection of animal and plant diseases; drug discovery and development. Students will gain laboratory and/or field experience in modern techniques of biotechnology, preparing them for biosciences or biomedical graduate/professional schools or careers in biotechnology.

Substituted Courses

BB 490 BIOCHEMISTRY 1: STRUCTURE AND FUNCTION and BB 491 BIOCHEMISTRY 2: METABOLISM for BB 450 GENERAL BIOCHEMISTRY and BB 451 GENERAL BIOCHEMISTRY.

Specialization and Breadth Courses

Select 13 to 15 credits approved by option faculty and research mentor.

Total Hours: 27-30

Option Code: 116

Climate and Biosystems Modeling Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

The Climate and Biosystems Modeling option applies general systems theory to the analysis of climate, environmental and agricultural systems, and their interactions. Systems theory provides a method of analyzing overall system behavior by examining the relations among—and the behavior of—individual components, and synthesizing these relationships into a mathematical framework that describes the total system. Computer simulation using this mathematical framework can predict and analyze the response to various changes in the inputs to, and/or structure of, the system, providing a powerful tool for the development of comprehensive solutions to problems. Examples of topics for student research could include studying the effects of climate change on vectored disease transmission, marine biodiversity, distributions of crops and crop pathogens, the carbon and nitrogen cycles, and wildfire cycles. The option is flexible; students design personalized programs and may complete a double major or minor if desired. This option will prepare students for challenging careers in governmental regulatory agencies and environmental consulting companies, or for graduate programs.

BRR students interested in climate and/or ecosystem research but not modeling should investigate the Sustainable Ecosystems option.

5. Statistics
Environmental Chemistry Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Environmental chemistry focuses on the basic principles that control the fate of chemicals in the environment. A bewildering variety of chemicals, an inevitable result of modern industrial civilization, are released daily, some of them persist in soil, water, or air. The extent to which these chemicals are a health hazard depends in part on where, how much, and in what form they accumulate. OSU scientists use state-of-the-art methods to detect trace amounts of chemicals in the environment, at levels as low as one part per trillion, and track their movement and transformations. Students will acquire laboratory skills that will be in high demand as the worldwide public concern with environmental quality increases.

Total Hours 36-41

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Pest Biology and Management Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Pest biology and management involves the study of living organisms, such as insects, fungal and bacterial pathogens, vertebrates, and weeds, that limit agricultural productivity. Students with an interest in entomology may study identification, biology and control of insects, including integrated plant protection, biocontrol, and use of beneficial insects. Research approaches range from basic laboratory studies to field experiments. Students will develop research skills in pest biology, development of management strategies, and assessment of pest impact on plants or livestock, preparing them for a variety of regulatory and research positions and graduate programs.

Plant Growth and Development Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Plant growth and development involves the study of the control and coordination of processes in cells, organs, and/or whole plants, including, for example, changes in gene expression in response to environmental conditions such as climate change. Students will develop research skills and knowledge about the regulation of plant growth and development, metabolism, structure and function of macromolecules (i.e., enzymes, storage proteins, and nucleic acids), and whole plant physiology, preparing them for agricultural and biosciences positions or graduate programs.

Sustainable Ecosystems Option
This option is offered within the following major(s):
• Bioresource Research - College of Agricultural Sciences (p. 231)

Sustainable ecosystems research addresses the sustainability of agricultural, forest, rangeland, wildlife, fishery, and native ecosystems. The program aims to define and develop natural and managed ecosystems in which environmental soundness results from the conscious interaction of humans with wildlife and other components of the systems. Innovative links among scientific and humanistic disciplines will bring about increased understanding of the present and future health of natural and managed ecosystems and associated human communities. Sustainable ecosystems research is multidisciplinary: insights from sociology, political science, anthropology, or philosophy may be combined with basic concepts from biology, chemistry, and physics to support research rooted in agricultural, forestry, rangeland management or wildlife management. Students will acquire perspective by choosing among a broad variety of courses, and will participate in field, laboratory, or systems analysis projects, preparing them for graduate/professional schools or research and regulatory positions.

Toxicology Option
This option is offered within the following major(s):
• Bioresource Research - College of Agricultural Sciences (p. 231)

Toxicology concerns potentially hazardous chemicals in food and the environment and their effects on biological life. Toxic chemicals include pesticides such as insecticides and herbicides, industrial waste products, compounds that exist naturally in plants, those that contaminate foods as a result of fungal growth, and even some that are produced in the preparation and cooking of foods. Potential health effects from toxin exposures can range from immediate impairment of breathing or nerve function to chronic diseases, cancer, birth defects, and immune disorders.
Toxicology research focuses on understanding mechanisms of toxicity, human and environmental risks from exposure, and means for reducing risks. Students will acquire laboratory skills in applied biochemistry and molecular, cellular, and organismal biology, preparing them for research or regulatory positions or biosciences/biomedical graduate/professional programs.

Water Resources Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 231)

Water resources research involves the use of science and policy tools to identify contaminants and make assessments of water quality. Students will acquire laboratory skills to detect water contaminants and track their movements and transformations while learning related policy and management concerns. Research areas could include microbial contaminants, the impact of urbanization on water quality, and marine and estuarine water quality and its impact on fisheries and shellfish industries. Option course work covers water sciences and hydrology, environmental policy and management. Students completing this option will be prepared for graduate school or for positions in environmental consulting, research, and natural resource management.

Sustainability Minor

Available on the Corvallis and OSU-Cascades campuses, and via Ecampus.

OSU Main Campus Contact: Ann Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann.Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@osucascades.edu.

The Sustainability minor includes core sustainability courses (5) and tailored elective courses to expand students’ knowledge and experience of their primary major in the context of sustainability principles and frameworks. Courses from a student’s major course of study will not count towards minor requirements. Completion of the Sustainability minor requires 27 credits beyond the 180-credit minimum for graduation.

*Baccalaureate Core Course (BCC)

^Writing Intensive Course (WIC)

Minor Code: 871

**Sustainability Undergraduate Major (BS, HBS)**

Also available via Ecampus.

The Sustainability undergraduate major is a concurrent degree subject to Academic Regulation 26a (p. 16).

**OSU Main Campus Contact:** Ann Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann.Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

**OSU-Cascades Campus Contact:** Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@osucascades.edu.

**Ecological Dimensions of Sustainability**

Select 3 to 4 credits from the following:

| BI 301      | HUMAN IMPACTS ON ECOSYSTEMS                                          | 1     |
| BI 306H     | **ENVIRONMENTAL ECOLOGY                                              |       |
| SUS 102     | *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY            |       |

**Social Dimensions of Sustainability**

Select 3-4 credits from the following:

| SOC 381     | SOCIAL DIMENSIONS OF SUSTAINABILITY                                  |       |

**Economic Dimensions of Sustainability**

Select 3 to 4 credits from the following:

| AEC 250     | *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY                    |       |
| AEC 351     | *NATURAL RESOURCE ECONOMICS AND POLICY                                 |       |
| AEC 352/ECON 352 | *ENVIRONMENTAL ECONOMICS AND POLICY                               |       |
| AEC 434     | *MEASURING RESOURCE AND ENVIRONMENTAL IMPACTS                          |       |

**Practicum**

Select one of the following:

| SUS 401     | RESEARCH                                                              | 3-12  |
### Remaining Elective credits
In addition to the required credits specified above, students must work with the sustainability program advisor to select courses relevant to their discipline and career path interests.

**Total credits required for graduation. See AR 26a.** 32

1. **SUS 102** *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY* recommended
2. Sustainability majors are required to complete a minimum of 3 Practicum credits. Before registering for a practicum, students must get practicum approved by Sustainability Double Degree advisor. Email: Sus.advising@oregonstate.edu
3. Note: **SUS 410 INTERNSHIP** credits may be achieved by participation in an IE3 Global Internship with advisor approval.

* Bacc Core Course (BCC)
* Writing Intensive Course (WIC)

**Classes that can be used to fulfill remaining requirements are listed below.** Students are NOT limited to taking courses within their primary major of study. The Sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustainability-related courses

College of Business

The College of Business provides nationally recognized research-based education that prepares profession-ready graduates who can excel in an innovative knowledge-based economy. The undergraduate and graduate programs in business and the undergraduate program in accounting are all accredited by the Association to Advance Collegiate Schools of Business.

The information below refers only to the undergraduate/graduate business-specific majors offered by the college.

The College of Business offers nine undergraduate degree programs and four graduate degree programs. Curricula lead to bachelor of arts (BA), bachelor of science (BS), masters of accountancy (MAC), master of business administration (MBA), master of science in business (MSB), and doctor of philosophy (PhD) in business administration degrees. For advanced degrees, see the Graduate School section of this catalog.

Students wanting to earn a bachelor of arts degree in the College of Business will need to:

1. Demonstrate proficiency through the second year of a foreign language (foreign language is defined as completing the 213 level of that language with a C or better or getting a signed letter from the School of Language, Culture, and Society that states they have determined the student has that level of proficiency without needing the course work), and

2. Demonstrate cultural awareness by either:
   1. Completing 6 credits of upper-division course work focusing on the culture of regions that commonly use the foreign language in which the student is proficient, or
   2. Successfully complete a study abroad, global internship, or research experience of at least 10 weeks in a non-English speaking foreign country while enrolled at OSU. This experience must be clearly documented for audit purposes.

The Bachelor of Arts and Bachelor of Science degrees in Business Administration offer options in Dean's Academy, Digital Marketing, Entrepreneurship for Business Majors, Family Business, General Business, Hospitality Management, International Business, Marketing, Merchandising Management, Retail Management, Supply Chain and Logistics Management.

Bachelor of Arts and Bachelor of Science degrees are also available in Business Information Systems, Design and Innovation Management, Finance, Hospitality Management, Management, Marketing, and Merchandising Management. The Accountancy degree is only a Bachelor of Science.

College of Business undergraduate students have the opportunity to participate in student exchange programs around the world. The College of Business encourages experiential learning through its Arthur Stonehill International Exchange Program, InnovationX, Austin Family Business Program, Close to Customer (C2C) Marketing Project, student clubs, and internships.

High School Preparation

The following high school courses are recommended for students planning to enroll in the College of Business: English, four years; mathematics, four years; history and social studies, three years; foreign language, two years; natural science, two years. In addition, competence in microcomputer word processing, spreadsheet, and database software is recommended.

Transfer Students

Students planning to transfer into the College of Business should do so as early as possible. Those planning to transfer from a community college should consult with an advisor at the community college to determine the most appropriate courses to complete prior to transfer. An advisor in the College of Business should also be contacted for advice.

Advising and Experiential Learning

The College of Business has experienced advisors available to assist students in all academic matters, as well as in the areas
of career choice, internships, and other experiential learning opportunities. The resources of the Career Development Center (http://career.oregonstate.edu) and College of Business Career Success Center (http://business.oregonstate.edu/careers) (Austin Hall 102) are available to all students seeking information concerning career development and interviews with visiting firms.

**Concurrent Degrees**

Students who wish to earn an undergraduate degree from the College of Business combined with another OSU degree may enroll in a concurrent degree program. Some degrees must be completed in conjunction with a primary degree (see the International Studies major in International Programs [https://catalog.oregonstate.edu/college-departments/international-programs], the Sustainability major in the Department of Forest Ecosystems and Society [https://catalog.oregonstate.edu/college-departments/forestry/forest-ecosystems-society], or the Education major in the College of Education [https://catalog.oregonstate.edu/college-departments/education] for more information.) The requirements for earning two degrees are listed under Earning a Degree at OSU [https://catalog.oregonstate.edu/earning-degrees]. Students who intend to obtain one of their degrees from the College of Business should see an advisor in the College of Business as soon as possible.

**Minor Programs**

The College of Business offers multiple transcript-visible minor for students majoring in other disciplines. More information may be obtained from the College of Business Advising Office, Austin Hall 122, 541-737-3716.

**The Arthur Stonehill International Business Exchange Program**

The College of Business administers the largest international business exchange program in the state. This opportunity allows qualified students to study abroad in one of 13 carefully selected and approved programs. Successful completion of course work enables students to earn their option in International Business through this one term of study. Current programs are available in Austria, Australia (I.B. option not available here), Chile, Czech Republic, Denmark, Germany, Hong Kong, Netherlands, Norway, Singapore, Spain, Sweden, and Thailand. A one-credit orientation class is required the term prior to departure, and a reflection paper is due upon return. All courses are taught in English and focus on various aspects of international finance, management, and marketing.

**InnovationX Program**

**Audrey Iffert-Saleem, Director**

InnovationX is Oregon State's hub for student entrepreneurs, innovators and changemakers. We support students who have ideas, who have already started a business or who are simply passionate and drawn to innovation. We provide the resources, education and community that can help students capture, share and test ideas and turn them into reality. Please see URL entrepreneurship.oregonstate.edu for more information.

**Austin Family Business Program**

**Sherri Noxel, Director**

Located within the College of Business since 1985, the Austin Family Business Program fosters family businesses through workshops, checklists, videos, academic courses, and internet resources. The program helps business-owning families manage day-to-day operations and plan for future generations.

**C2C Marketing Lab**

**Amanda Terhes, Director**

The C2C Marketing Lab provides professional market research and consulting services in order to provide insight into markets, businesses, and today's consumers.

Our teams are led by marketing faculty who mentor teams of students in the field and in the classroom. In doing that, the C2C Marketing Lab brings faculty expertise and research experience into the business community and provides students with experiential learning opportunities that prepare them for marketing careers. Through these efforts, we support the College of Business, Oregon State University, and Oregon's economic development.

**Graduate Program**

**Master of Business Administration**

The Master of Business Administration program features an innovative, advanced business curriculum that ties together the functional disciplines of business. It is open to both business and non-business undergraduates. Core courses include business law, accounting, finance, operations, management and marketing.

The program provides the knowledge and skills that effective leaders need—preparing graduates to create, build and manage global enterprises that are socially responsible. Sustainable businesses operate deftly to simultaneously meet economic, social and environmental challenges. That's why applied projects are woven into our curriculum—so our graduates are ready to make smart, bold moves that solve complex problems and make a positive impact on the world.

The MBA program is a place for students to pursue their dreams and push their boundaries. Students learn to build and lead teams, integrate disciplines, work under pressure and multitask—the same skills they will rely on when they leave campus.

College of Business Academic and Professional Standards
The standards set forth below apply to all students enrolled in the College of Business (COB) and are in addition to those standards applicable to all students in the university. Students are responsible for satisfying these requirements.

Prerequisite Grade Requirements
A grade of C− or better is required for all classes within a College of Business degree program. A higher grade is required in some classes as noted in the catalog.

Academic Progression Standards
Academic progression standards specify the requirements a student must meet in order to graduate with a degree from the College of Business. OSU has minimum GPA standards. The College of Business (COB) has additional GPA requirements and standards. Students must satisfy both OSU and COB standards to earn their business degree.

The COB Progression Standards require that students:
• Achieve a minimum grade of C− or better in all classes used to complete their degree program.
• Maintain a minimum 2.5 GPA over all course work completed within their degree program.
• Complete over fifty percent of the degree program and discipline course work at OSU.
• Resolve all incomplete (I) grades in any classes within the degree program within one year, or prior to graduation, whichever occurs first.
• Make satisfactory progress toward the completion of the degree program in a timely fashion.

The College of Business degree program includes all COB classes (ACTG, BA, DSGN, FIN, MGMT, MRKT) taken for major and elective credit and non-College classes that are part of the degree requirements (see table
below). Any course used to satisfy COB degree requirements must be taken using the A–F grade mode. The Satisfactory/Unsatisfactory (S/U) grade basis may not be used.

Transfer grades in COB degree program classes may be used to satisfy course work requirements but are not used in the overall COB GPA calculation used to determine graduation. They are, however, used in the All Inclusive Business GPA. Thus, if a course is completed at OSU and must be repeated to earn a higher grade, then the course must be repeated at OSU for the grade to be included in the GPA calculation.

Lower-division classes (100–200 level) completed at any accredited college or university with a grade of C– or higher may be used to satisfy lower-division core requirements, but will not be included in the overall COB GPA calculation. These transfer courses will be used in the All Inclusive Business GPA.

Upper-division classes (300-level and above) completed with a grade of C– or higher at school(s) accredited by the Association to Advance Collegiate Schools of Business may be used to satisfy upper-division core requirements, but will not be included in the overall COB GPA calculation. These transfer courses will be used in the All Inclusive Business GPA.

### Guiding Professional Standards for the College of Business Community

As a member of the College of Business community, you should strive to:
- treat others with honesty, respect, and courtesy;
- maintain the highest levels of academic integrity;
- act in accordance with ethical and social responsibilities;
- foster a professional learning environment; and
- act in a professional manner.

You are also expected to comply with the law as well as all university regulations and policies that apply to you. Those university policies include, but are not limited to, the University Student Conduct Regulations, the university’s Discrimination and Harassment Policies and the university’s Policy on Acceptable Use of Computing Resources. Failure to comply with these laws, regulations, and policies may result in the pursuit of disciplinary action by the college, as detailed further below.

### General Statement on Professional Conduct and Academic Integrity

The Guiding Professional Standards for the College of Business community, subscribed to by all members of the College of Business community, are intended to support and implement the values held by the college. Those values encompass the pursuit of excellence in teaching, learning and scholarship. All members of the College of Business community accept our responsibility to strive to meet those standards and to act in an ethically proper manner in our dealings with others. We dedicate ourselves to create and nurture a culture of innovation, cooperation, diversity and mutual respect within the College of Business while recognizing and pursuing the social responsibilities imposed by these values.

A reputation for personal integrity is valuable in the business and broader world. A good reputation is created through personal behavior and performance over time that is observed by friends, colleagues, and business associates, both superiors and subordinates.

The students, faculty, administrators and staff of the College of Business are committed to fostering and creating a positive, professional learning environment. These goals will be pursued by conduct that is honest, civil, courteous and responsible.

### College of Business Corrective Actions for Failure to Meet Academic or Professional Standards

The College of Business Corrective Actions govern the college’s response to a student’s failure to progress adequately academically in the college or a violation of the law or University regulations and policies that apply to the student, including the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university’s Discrimination and Harassment Policies, or the university’s Policy on Acceptable Use of Computing Resources. As is the case for all students, College of Business students are also subject to the University’s Student Conduct Regulations and the procedures for enforcement of those regulations.

A failure by the student to progress adequately academically or a violation by the student of any of the college or University standards or policies listed in the above paragraph may result in the pursuit of one or more of the actions detailed below, including dismissal of the student from the College. The College will notify a student against whom it pursues such action with information about the effect of the action on
the student's status in the College and information regarding how the student may respond to or appeal the action.

A student against whom the College pursues such action will be issued one of the following notices, depending on the student's academic status or the severity or frequency of the behavior resulting in the action:

**Warning For Academic and Professional Behavior**

"Warning" status is cautionary and is issued for one or more of the following academic reasons:

- Earning a 'D' or 'F' grade in a COB degree program class.
- A small deviation below the minimum 2.50 COB GPA requirement.
- Failure to complete COB degree program coursework in a timely fashion.

A "Warning" may also be issued to identify student behavior, which may place a student's enrollment status in the College at risk. The warning status may be removed following satisfactory resolution of behavioral concerns, as determined by the College.

**Probation for Academic and Professional Behavior**

If a student has larger deviations from the COB academic progression standards than those defined for a warning, or if the student continues to be out of compliance with any of the COB academic progression standards following a Warning, the student may be placed on probation and may be required to take specific action to correct the problem(s).

Student behavior that is a significant departure from the law, College or University regulations and policies that apply to the student may also result in "Probation" status. Such behavior includes, but is not limited to, academic dishonesty, criminal violations, repeated or intentional violation of University policies, or significant breaches of the University Student Conduct Regulations, the University's Policy on Discrimination and Harassment or the University's Policy on Acceptable Use of Computing Resources.

A student on probation status must follow recommendations of the college in order to avoid suspension or dismissal. Students on probation status should meet with an advisor each term to review their progress and standing in the college until the probation status is removed.

Students who successfully fulfill the recommendations will be removed from probation status. Students who fail to follow recommendations from advisors or are unsuccessful in correcting deficiencies will be placed on suspension and evaluated for dismissal from the college.

Probation may also be continued if a student is still out of compliance with academic or behavioral requirements but is taking steps to correct the problem(s) identified.

**Suspension for Academic and Professional Behavior**

A student may be placed on suspension and be evaluated for dismissal from the College if the student does not take steps to become compliant with the College's academic progression standards (such as retaking a class the student has failed), or the student is not making adequate progress in correcting the student's academic problems.

In the event of a second instance of academic dishonesty, the student will be suspended and evaluated for dismissal from the College.

A student placed on suspension status for academic or behavioral reasons will not be allowed to progress in the College.

**Dismissal from the College**

Students placed on Suspension status will be evaluated for Dismissal from the College. The College will review the student's record, including any interim proof of progress. After review, the College may recommend immediate Dismissal from the College, recommend that the student be continued on Suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student's Suspension status. If a plan for progression is developed by the College, the student will be placed on Probation status pending satisfactory progress.

If Dismissed from the College, the student must wait a minimum of one term before reapplying for admission to the College and must meet current criteria for admissions to the College.

If the student was Dismissed and later qualifies for readmission, the student must start in the Pre-Professional program and reapply to the Professional Program when eligible. If the College's academic standards or requirements have changed since the student was last a College of Business major, the student will be subject to the more recent standards or requirements.

**Appeal of Academic or Corrective Status**

Students engaged in an appeal of their Dismissal from the College will remain on Suspension status pending resolution of their appeal.

1. Any student who wishes to challenge the student's academic or corrective status at the College must submit an appeal in writing to the Dean of the College within seven (7) calendar days following the issuance of a notice from the College identifying the student's status. The request for an appeal must include specific justification, including errors, failure to consider all of the evidence presented, or any other action, including any new evidence not known at the time of the original meeting, that may change the outcome. The Dean may refer the issue back to the College's Standing Committee for review, if warranted. Following the review, the Dean will notify the affected student of his or her decision by mail or email.

2. The student may appeal the Dean's decision to the Oregon State University Provost in writing within seven (7) calendar days following the issuance of a decision by the Dean. The Provost's decision on the appeal is the University's final decision.

Assistant Professors Cho, Gerasymenko, Hoehn-Weiss, Joshi, Murnieks
Instructors Cassidy, L. Martin, Mentler, Morris, Noxel, Tripathi

Accounting

ACTG 317. EXTERNAL REPORTING I. (4 Credits)
Examines the theory and practice of financial accounting, the processing and controls phases of the accounting system, and reporting to external parties. Emphasis is placed on the accounting cycle and financial statement structure and content. The emphasis on the accounting cycle includes the processing and tracing of transaction data from source documents to financial statements.
Prerequisites: BA 211 with C or better and BA 213 [C]

ACTG 318. EXTERNAL REPORTING II. (4 Credits)
Continuation from ACTG 317 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.
Prerequisites: ACTG 317 with C or better

ACTG 319. EXTERNAL REPORTING III. (4 Credits)
Continuation from ACTG 318 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.
Prerequisites: ACTG 318 with C or better

ACTG 321. COST MANAGEMENT I. (4 Credits)
Reinforces and builds on the language and concepts of management accounting. Emphasizes different models for product costing and examines their effects on profit planning, budgeting, motivation, and control.
Prerequisites: ACTG 317 with C or better

ACTG 326. ACCOUNTING RESEARCH METHODS AND TOPICS. (2 Credits)
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level, as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level, it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisites: (BA 211 with C or better or BA 211H with C or better) and (BA 213 [C] or BA 213H [C])

ACTG 378. ACCOUNTING INFORMATION MANAGEMENT. (4 Credits)
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/ rec.
Prerequisites: (BA 213 with C or better or BI 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 276 [C])
Equivalent to: ACTG 378H

ACTG 378H. ACCOUNTING INFORMATION MANAGEMENT. (4 Credits)
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/ rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 276 [C])
Equivalent to: ACTG 378
ACTG 379. ACCOUNTING ANALYTICS. (4 Credits)
Covers the analysis of data as it pertains to accounting professionals. The focus includes analytic techniques for decision making and the examination of “big data” involving accounting information. Hands-on experiences will develop skills with select software tools used in data analytics for accounting professionals.
Prerequisites: ACTG 318 with C or better and ACTG 378 [C]

ACTG 414. FORENSIC ACCOUNTING. (2 Credits)
Explores the forensic accountant’s role in today’s economy. Topics covered include fraud detection and fraud investigation techniques, valuation of closely held businesses, lost profits analyses, and various types of litigation support services. Fundamental legal concepts governing expert witness testimony are also examined, and students are required to quantify economic damages in cases.
Prerequisites: ACTG 319 with C or better

ACTG 415. GOVERNMENTAL AND NOT-FOR-PROFIT. (2 Credits)
Introduction to accounting and financial reporting for governmental and not-for-profit organizations. Topics include state, local and federal governmental accounting, including fund accounting and reporting, and accounting for not-for-profit hospitals, universities, and health/welfare organizations.
Prerequisites: ACTG 319 with C or better

ACTG 416. ACCOUNTING RESEARCH AND ANALYSIS. (2 Credits)
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisites: ACTG 319 with C or better

ACTG 417. ADVANCED ACCOUNTING. (4 Credits)
An advanced course in financial accounting theory. Covers corporate combinations, consolidated financial statements, and government and not-for-profit accounting.
Prerequisites: ACTG 319 with C or better

ACTG 418. ACCOUNTING CODES OF PROFESSIONAL CONDUCT AND ETHICAL BEHAVIOR. (2 Credits)
Explores ethical reasoning, integrity, objectivity, independence and other core values as defined by the American Institute of Certified Public Accountants.
Prerequisites: ACTG 319 with C or better

ACTG 419. MULTINATIONAL ACCOUNTING AND ANALYSIS. (2 Credits)
Examines the managerial and financial accounting function from an international perspective. Focuses on the flow of information in multiple currencies and compliance with reporting requirements in the United States, Europe and Japan.
Prerequisites: ACTG 319 with C or better

ACTG 420. IT AUDITING. (4 Credits)
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.
Prerequisites: (ACTG 319 with C or better or BA 372 with C or better) and ACTG 378 [C]

ACTG 422. STRATEGIC COST MANAGEMENT. (4 Credits)
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.
Prerequisites: ACTG 319 with C or better and ACTG 321 [C] and BA 357 [C]

ACTG 424. INTRODUCTION TO TAXATION. (4 Credits)
Meets two major objectives. First, it is a technical introduction to U.S. income tax with emphasis on general and business related topics. Second, it provides a framework for students to launch further study in the tax area. Students will be encouraged to supplement text materials with readings from the Internal Revenue Code and Regulations as well as secondary tax research services.
Prerequisites: ACTG 319 with C or better

ACTG 425. ADVANCED TAXATION. (4 Credits)
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.
Prerequisites: ACTG 325 with C or better or ACTG 424 with C or better

ACTG 427. ASSURANCE AND ATTESTATION SERVICES. (4 Credits)
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.
Prerequisites: ACTG 319 with C or better

ACTG 428. ADVANCED AUDIT ANALYTICS. (4 Credits)
An advanced four-credit course covering audit theory, current audit practice and auditor professional skills. The equivalent of three credits (30 hours) relates to in-class activities, readings, presentations, research and group discussions of relevant advanced audit topics. The equivalent of one credit (10 hours) relates to understanding the use and future of data analytics in the audit profession. Theory, current audit practice and auditor professional skills.
Prerequisites: ACTG 427 with C or better

ACTG 429. TOPICS IN ACCOUNTING. (1-4 Credits)
Analysis of current topics in accounting. Topics will vary from term to term.

ACTG 516. ACCOUNTING RESEARCH AND ANALYSIS. (3 Credits)
Emphasis on financial accounting, tax and auditing research and analysis and communication of conclusions in the context of accounting case studies.

ACTG 517. ADVANCED ACCOUNTING. (4 Credits)
An advanced course in financial accounting theory. Corporate combinations, consolidated financial statements, foreign operations and subsidiaries, partnerships, and sole proprietorships; contemporary issues in financial accounting. Equivalent to: BA 517

ACTG 518. ACCOUNTING THEORY AND PRACTICE I. (3 Credits)
Expands and integrates knowledge of US and international generally accepted accounting principles (GAAP) in a rigorous study of the design, selection, and consequences of various models of financial reporting.
Prerequisites: (ACTG 516 with C or better and ACTG 517 [C])
ACTG 519. ACCOUNTING THEORY AND PRACTICE II. (3 Credits)
Study of the design, selection, and consequences of various models of financial reporting. Research accounting treatments for complex facts and circumstances with ambiguous accounting guidance. Build on financial reporting models to develop in-depth understanding and application of accounting practice.
Prerequisites: ACTG 518 with C or better

ACTG 520. IT AUDITING. (4 Credits)
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.

ACTG 522. STRATEGIC COST MANAGEMENT. (4 Credits)
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.

ACTG 524. INTRODUCTION TO TAXATION. (4 Credits)
Meets two major objectives. First, it is a technical introduction to U.S. income tax with emphasis on general and business related topics. Second, it provides a framework for students to launch further study in the tax area. Students will be encouraged to supplement text materials with readings from the Internal Revenue Code and Regulations as well as secondary tax research services.
Prerequisites: ACTG 528 with C or better

ACTG 525. ADVANCED TAXATION. (4 Credits)
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.

ACTG 527. ASSURANCE AND ATTESTATION SERVICES. (4 Credits)
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.

ACTG 529. TOPICS IN ACCOUNTING. (1-4 Credits)
Analysis of current topics in accounting. Topics will vary from term to term.

ACTG 620. FOUNDATIONS OF ACCOUNTING RESEARCH. (3 Credits)
Introduces first-year doctoral students to accounting research by discussing the development of modern accounting theory, relating it to theories in economics and finance, and exposing students to the different areas of and methodologies used in accounting research. Also begins a survey of classic and contemporary literature in the area of financial accounting research. Specific financial accounting topics may change from quarter to quarter, but sample topics include earnings management, earnings quality, and voluntary disclosure.

ACTG 621. FINANCIAL ACCOUNTING RESEARCH. (3 Credits)
Surveys classic and contemporary research in the area of financial accounting. Specific topics may change from quarter to quarter, but sample topics include the value relevance of accounting information, post earnings announcement drift, the residual income model, analysts’ use accounting information, and market-based assessments of the usefulness and limitations of alternative accounting measurements and disclosures.

ACTG 622. ACCOUNTING, JUDGMENT AND ACCOUNTABILITY. (3 Credits)
Surveys classic and contemporary research in areas related to management, judgment, and accountability in accounting. Specific topics may change from quarter to quarter, but sample topics include research on management incentives and compensation, performance measurement, auditing, corporate governance, and research using behavioral methods.

ACTG 623. TAX RESEARCH. (3 Credits)
Surveys classic and contemporary research in the area of taxation. Specific topics may change from quarter to quarter, but sample topics include tax vs. nontax costs in business decisions, book-tax differences, taxes and financial reporting, multijurisdictional tax issues, and tax avoidance.

Business Administration

BA 101. BUSINESS NOW. (6 Credits)
Presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. Introduces theory and develops basic skills in the areas of management, finance, accounting and marketing. Lec/lab/rec.

BA 140. FINANCIAL LITERACY FOR COLLEGE LIFE. (2 Credits)
Helps you learn the fundamentals of personal finance. It is crucial you are prepared to be prudent managers of your financial resources, enabling you to achieve long- and short-term financial goals and security. In addition, this course will examine how your background experiences, values, goals, and decisions can impact your financial future.

BA 150. EXPLORING ENTREPRENEURSHIP. (1 Credit)
Participants are challenged with economic concepts and projects. Inspirational speakers address key topics concerning all aspects of business and leadership development. Students must be registered for Young Entrepreneurs Business Week Camp to receive credit for the course. Graded P/N.

BA 151. EXPLORING INVESTING. (1 Credit)
Students participating in Investing Week will learn about basic investment vehicles and the principles of evaluating a potential investment. Students will also learn how to understand the financial market system and how it affects their personal and business life. Students will be assigned a role as a junior analyst with Toots, Toots and Peabody, and critically assess the benefits and strengths of individual investment vehicles. Graded P/N.

BA 152. EXPLORING SOCIAL ENTREPRENEURSHIP. (1 Credit)
Provides an immersive experience regarding responsible business practices. In addition, from an entrepreneurial prospective, students have the opportunity to explore ways in which real social change is being conducted worldwide. Graded P/N.

BA 160. B-ENGAGED. (3 Credits)
Understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Opportunity to connect with faculty and peers with common interests in a supportive learning environment.
Equivalent to: BA 160H

BA 160H. B-ENGAGED. (3 Credits)
Understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Opportunity to connect with faculty and peers with common interests in a supportive learning environment.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 160
BA 161. INNOVATION NATION--AWARENESS TO ACTION. (3 Credits)
First course in a two-course sequence. Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Builds a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career.
Equivalent to: BA 161H, BA 167

BA 161H. INNOVATION NATION--AWARENESS TO ACTION. (3 Credits)
First course in a two-course sequence. Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Builds a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 161, BA 167

BA 162. INNOVATION NATION--IDEAS TO REALITY. (3 Credits)
Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market.
Prerequisites: BA 161 with C- or better or BA 161H with C- or better
Equivalent to: BA 162H, BA 168

BA 162H. INNOVATION NATION--IDEAS TO REALITY. (3 Credits)
Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 161 with C- or better or BA 161H with C- or better
Equivalent to: BA 162, BA 168

BA 163. B-ENGAGED. (3 Credits)
The first term is a critical time for college students. B-Engaged helps the student transition to the OSU academic community and college learning expectations. B-Engaged will help the student understand and accomplish college-level academic work and explore OSU resources and options that will enhance his/her college experience and success. Additionally, B-Engaged is the student's opportunity to connect with a faculty member and peers with common interests in a supportive learning environment.
Equivalent to: BA 160, BA 160H

BA 167. LAUNCH PAD I. (3 Credits)
Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Focused on building a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career. BA 167/BA 168 presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. The series introduces theory and develops basic skills in the areas of management, finance, accounting, and marketing. Departmental approval required.
Equivalent to: BA 161, BA 161H

BA 168. LAUNCH PAD II. (3 Credits)
Continues the conversation on self-management, focused on building a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career. BA 167/BA 168 presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. The series introduces theory and develops basic skills in the areas of management, finance, accounting, and marketing. Departmental approval required.
Prerequisites: BA 167 with C- or better
Equivalent to: BA 162, BA 162H

BA 170. BUSINESS INSIGHTS. (2 Credits)
The first term within a new university and/or major is a critical time for college students. Business Insights was developed to help you transition to the OSU College of Business academic community and learning expectations. Business Insights will help you understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Additionally, Business Insights is your opportunity to connect with a faculty member and peers with common interests in a supportive learning environment.
Equivalent to: BA 280

BA 182. FIRST-YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT I. (1 Credit)
BA 182 – BA 184 is a series of three one-credit courses taken during a student’s first year. These courses, along with the respective 2nd to 4th year one-credit courses, are designed to help the student navigate college successfully and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the first-year series provides incoming first-year students with the skills to be successful during college.
BA 182 covers personal development skills; BA 183 covers professional development skills; and BA 184 covers leadership development skills.

BA 183. FIRST-YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT II. (1 Credit)
BA 182 – BA 184 is a series of three one-credit courses taken during a student's first year. These courses, along with the respective 2nd to 4th year one-credit courses, are designed to help the student navigate college successfully and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the first-year series provides incoming first-year students with the skills to be successful during college.
BA 182 covers personal development skills; BA 183 covers professional development skills; and BA 184 covers leadership development skills.

BA 184. FIRST-YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT III. (1 Credit)
BA 182 – BA 184 is a series of three one-credit courses taken during a student’s first year. These courses along with the respective 2nd to 4th year one-credit courses are designed to help the student navigate college successfully and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the first-year series provides incoming first-year students with the skills to be successful during college.
BA 182 covers personal development skills; BA 183 covers professional development skills; and BA 184 covers leadership development skills.

BA 199. SPECIAL STUDIES. (1-6 Credits)
Graded P/N.
This course is repeatable for 12 credits.
BA 210. INTERNSHIP. (1-6 Credits)
Planned and supervised work experience at selected cooperating business firms. Supplementary training, conference, reports, and appraisals. Graded P/N.
This course is repeatable for 16 credits.

BA 211. FINANCIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of external users, principally investors and creditors. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, and asset valuation.
Prerequisites: (MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better) or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: BA 211H

BA 211H. FINANCIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of external users, principally investors and creditors. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, and asset valuation.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 60
Equivalent to: BA 211

BA 213. MANAGERIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 211 with C- or better or BA 211H with C- or better
Equivalent to: BA 213H

BA 213H. MANAGERIAL ACCOUNTING. (4 Credits)
Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 211 with C- or better or BA 211H with C- or better
Equivalent to: BA 213

BA 215. FUNDAMENTALS OF ACCOUNTING. (4 Credits)
Looks at how the accounting model reflects business transactions and events. Students are introduced to both financial and managerial accounting and the creation, interpretation, and analysis of financial statements. In addition, students obtain an understanding of the determination, organization, and management of costs and revenues including management decisions based upon this information.
Equivalent to: BA 315

BA 223. PRINCIPLES OF MARKETING. (4 Credits)
Covers concepts and principles used by marketing professionals. Designed explicitly for business majors, it’s an introduction to the relationships between customers, products, and companies in a competitive and dynamically evolving marketplace.
Prerequisites: ECON 201 with C- or better or ECON 201H with C- or better
Equivalent to: BA 390, BA 390H, BA 460

BA 230. BUSINESS LAW I. (4 Credits)
Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.
Equivalent to: BA 230H, BA 330

BA 230H. BUSINESS LAW I. (4 Credits)
Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 230

BA 233. LEGAL ENVIRONMENT OF BUSINESS. (2 Credits)
Nature and function of law in our business society. Obligations arising out of agency and employment law, contract formation and breach, warranty, crimes and torts.
Equivalent to: BA 233H

BA 233H. LEGAL ENVIRONMENT OF BUSINESS. (2 Credits)
Nature and function of law in our business society. Obligations arising out of agency and employment law, contract formation and breach, warranty, crimes and torts.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 233

BA 240. FINANCE. (4 Credits)
Introduces basic tools of finance and applications of financial theory in use today. These tools include rates of return, the time value of money, those that can be applied to capital budgeting decisions, and the logic and fundamentals of financial statements. It is designed to enhance a student’s approach to financial decision-making and emphasizes quantitative approaches to decision making. This course will also introduce students to equity and debt markets and securities, and serves as a stepping stone to advanced courses in finance.
Prerequisites: (BA 211 with C- or better or BA 211H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 360, BA 360H

BA 240H. FINANCE. (4 Credits)
Introduces basic tools of finance and applications of financial theory in use today. These tools include rates of return, the time value of money, those that can be applied to capital budgeting decisions, and the logic and fundamentals of financial statements. It is designed to enhance a student’s approach to financial decision-making and emphasizes quantitative approaches to decision making. This course will also introduce students to equity and debt markets and securities, and serves as a stepping stone to advanced courses in finance.
Prerequisites: (BA 211 with C- or better or BA 211H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 360, BA 360H

BA 253. PROFESSIONAL DEVELOPMENT. (4 Credits)
Designed to improve the ability of students to describe their accomplishments and sell their ideas in situations like professional networking, company meetings, response to proposals for services, and interviews. It teaches writing skills and workplace integration for new jobs. Particular emphasis is put on verbal communication and preparation for verbal communication. Students will learn to create career plans that require them to research career options and potential employers, and prepare a developmental roadmap that will lead them to success within the chosen profession.
Prerequisites: (BA 101 with C- or better or BA 162 with C- or better or DHE 160 with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-])
Equivalent to: BA 253H, BA 281, BA 281H, BA 353
BA 253H. PROFESSIONAL DEVELOPMENT. (4 Credits)
Designed to improve the ability of students to describe their accomplishments and sell their ideas in situations like professional networking, company meetings, response to proposals for services, and interviews. It teaches writing skills and workplace integration for new jobs. Particular emphasis is put on verbal communication and preparation for verbal communication. Students will learn to create career plans that require them to research career options and potential employers, and prepare a developmental roadmap that will lead them to success within the chosen profession.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 101 with C- or better or BA 162 with C- or better or DHE 160 with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-])
Equivalent to: BA 253, BA 281, BA 281H, BA 353, BA 381

BA 260. INTRODUCTION TO ENTREPRENEURSHIP. (4 Credits)
Topics include evaluating entrepreneurial capabilities, creativity, business plan creation, opportunity assessment and feasibility analysis, business implementation, new product introduction, and seeking funds.
Equivalent to: BA 260H

BA 260H. INTRODUCTION TO ENTREPRENEURSHIP. (4 Credits)
Topics include evaluating entrepreneurial capabilities, creativity, business plan creation, opportunity assessment and feasibility analysis, business implementation, new product introduction, and seeking funds.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 260

BA 270. BUSINESS PROCESS MANAGEMENT. (4 Credits)
Introduces and integrates some core concepts from Operations Management (OM) and Business Information System (BIS) disciplines by introducing a process-oriented view of the flows of materials, information, products and services through and across organizational functions. Helps students to: identify information-bearing events and actors, model and analyze business processes, assess and improve process efficiency, recognize probabilistic components of business processes and understand the interactions between human behavior and process design. Hands-on, case-based assignments allow for practicing some principles and concepts addressed in the course.
Prerequisites: BA 275 with C- or better or BA 275H with C- or better
Equivalent to: BA 302, BA 302H

BA 272. BUSINESS APPLICATION DEVELOPMENT. (4 Credits)
Introduction to business programming with C#.NET. Beginning programming skills and concepts, .NET programming environment, object-oriented and event-oriented models, and console applications.

BA 275. FOUNDATIONS OF STATISTICAL INFERENCE. (4 Credits)
An introductory course on statistical inference with an emphasis on business applications. Coverage includes descriptive statistics, random variables, probability distributions, sampling and sampling distributions, statistical inference for means and proportions using one and two samples, and linear regression analysis.
Prerequisites: MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or Math Placement - ALEKS with a score of 046
Equivalent to: BA 275H, BA 276

BA 275H. FOUNDATIONS OF STATISTICAL INFERENCE. (4 Credits)
An introductory course on statistical inference with an emphasis on business applications. Coverage includes descriptive statistics, random variables, probability distributions, sampling and sampling distributions, statistical inference for means and proportions using one and two samples, and linear regression analysis.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or MTH 111 with C- or better or Math Placement - ALEKS with a score of 046
Equivalent to: BA 275, BA 276

BA 276. INTRODUCTION TO STATISTICAL INFERENCE. (2 Credits)
An introductory level statistics course on data analysis and statistical inference with an emphasis on business applications. Coverage includes descriptive statistics, random variables, probability distributions, sampling and sampling distributions, statistical inference for means and proportions using one and two samples. It serves as a prerequisite to BA 276.
Prerequisites: MTH 245 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: BA 275, BA 275H

BA 280. BUSINESS INSIGHTS. (2 Credits)
Connect with faculty and peers and explore OSU resources designed to enhance your college experience and success. Engage in professional development activities and cultivate the soft skills employers are looking for in their future employees.
Equivalent to: BA 170

BA 281. PROFESSIONAL DEVELOPMENT. (3 Credits)
Designed to give students an early start on the process of career planning and development. The process involves thoughtful self-assessment, career exploration, planning and follow-through with preliminary employment strategies.
Prerequisites: (BA 101 with C- or better and BA 280 [C-]) or BA 162 [C-] or BA 162H [C-]
Equivalent to: BA 253, BA 253H, BA 281H, BA 353

BA 281H. PROFESSIONAL DEVELOPMENT. (3 Credits)
Designed to give students an early start on the process of career planning and development. The process involves thoughtful self-assessment, career exploration, planning and follow-through with preliminary employment strategies.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 101 with C- or better and BA 280 [C-]) or BA 162 [C-] or BA 162H [C-]
Equivalent to: BA 253, BA 253H, BA 281, BA 353, BA 381

BA 282. PERSONAL, PROFESSIONAL AND LEADERSHIP DEVELOPMENT I. (1 Credit)
BA 282, taken during fall term of the second year, helps students develop lifelong skills that are practical, meaningful, and useful. These skills and the understanding developed through this course strengthens the student's ability to adapt career goals to changing market conditions, make good decisions in difficult situations, and set financial goals. CROSSTRASTED as DSGN 282.
Prerequisites: BA 101 with C- or better or BA 162 with C- or better or BA 162H with C- or better
Equivalent to: DSGN 282.
BA 283. PERSONAL, PROFESSIONAL AND LEADERSHIP DEVELOPMENT II. (1 Credit)
BA 283, taken during winter term of the second year, course helps students develop lifelong skills that are practical, meaningful, and useful. These skills and the understanding developed through this course strengthens the student’s ability to adapt career goals to changing market conditions, make good decisions in difficult situations, and set financial goals. CROSSLISTED as DSGN 283.
Prerequisites: BA 101 with C- or better or BA 162 with C- or better or BA 162H with C- or better
Equivalent to: DSGN 283

BA 284. PERSONAL, PROFESSIONAL AND LEADERSHIP DEVELOPMENT III. (1 Credit)
BA 284, taken during spring term of the second year, course helps students develop lifelong skills that are practical, meaningful, and useful. These skills and the understanding developed through this course strengthens the student’s ability to adapt career goals to changing market conditions, make good decisions in difficult situations, and set financial goals. CROSSLISTED as DSGN 282.
Prerequisites: BA 101 with C- or better or BA 162 with C- or better or BA 162H with C- or better
Equivalent to: DSGN 284

BA 290. INTRODUCTION TO CAREERS IN MARKETING. (3 Credits)
Explores marketing through the perspectives of current marketing professionals. Introductory language and principles of marketing are introduced and examined through real world examples. Presents various careers within marketing.

BA 302. BUSINESS PROCESS MANAGEMENT. (4 Credits)
Integrates core concepts from Business Information Systems (BIS) with those of Operations Management and introduces a process-oriented view of the flows of materials, information and services through and across organizations. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. Hands-on, case-based assignments and labs allow students to practice the principles addressed.
Prerequisites: BA 275 with C- or better or BA 276 with C- or better
Equivalent to: BA 270, BA 302H

BA 302H. BUSINESS PROCESS MANAGEMENT. (4 Credits)
Integrates core concepts from Business Information Systems (BIS) with those of Operations Management and introduces a process-oriented view of the flows of materials, information and services through and across organizations. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. Hands-on, case-based assignments and labs allow students to practice the principles addressed.
Prerequisites: BA 275 with C- or better or BA 276 with C- or better
Equivalent to: BA 302

BA 311. THIRD-YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT I. (1 Credit)
BA 311 – BA 313 is a series of three one-credit courses taken during a student’s third year. These courses, along with the respective 1st, 2nd and 4th year one-credit courses, are designed to help students navigate college successfully, and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the third-year series provides students with skills related to team work and team leadership. BA 311 focuses on diversity and inclusion; BA 312 focuses on teamwork and career preparation; and BA 313 focuses on team leadership.

BA 312. THIRD YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT II. (1 Credit)
BA311 – BA313 is a series of three one-credit courses taken during a student’s third year. These courses, along with the respective 1st, 2nd and 4th year one-credit courses, are designed to help students navigate college successfully, and develop lifelong skills that are practical, meaningful and useful. These courses revolve around personal, professional and leadership development, and the third-year series provides students with skills related to team work and team leadership. BA 311 focuses on diversity and inclusion; BA 312 focuses on teamwork and career preparation; and BA 313 focuses on team leadership.

BA 313. THIRD YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT III. (1 Credit)
BA311 – BA313 is a series of three one-credit courses taken during a student’s third year. These courses, along with the respective 1st, 2nd and 4th year one-credit courses, are designed to help students navigate college successfully, and develop lifelong skills that are practical, meaningful and useful. These courses revolve around personal, professional and leadership development, and the third-year series provides students with skills related to team work and team leadership. BA 311 focuses on diversity and inclusion; BA 312 focuses on teamwork and career preparation; and BA 313 focuses on team leadership.

BA 314. SUSTAINABLE BUSINESS OPERATIONS. (4 Credits)
Operations are the processes by which an organization transforms inputs (e.g., labor, material, and knowledge) into outputs (products and services). Operations managers are responsible for designing, running and improving the processes and systems to efficiently accomplish this for production or service businesses. This course focuses on the concepts and tools employed by operations managers to provide their organization a competitive advantage. Topics include statistical tools and quantitative methods (descriptive statistics, probabilities, sampling, interval estimation and hypothesis testing) and operations management concepts (strategies, forecasting, process design, capacity utilization, quality systems, supply chain management, inventory management, resource planning, sustainability and lean systems.)
Prerequisites: MTH 111 with C- or better

BA 315. ACCOUNTING FOR DECISION MAKING. (4 Credits)
Looks at how the accounting model reflects business transactions and events. Students are introduced to both financial and managerial accounting and the creation, interpretation, and analysis of financial statements. In addition, students obtain an understanding of the determination, organization, and management of costs and revenues including management decisions based upon this information.
Equivalent to: BA 230, BA 230H

BA 333. LEGAL AND ETHICAL BUSINESS SOLUTIONS. (2 Credits)
Legal and ethical regulations of U.S. and global business organizations including financial, human resources, operations and marketing functions. Emphasizes legal and ethical strategies for entrepreneurs including business entity selection, raising capital and managing intellectual property.
Prerequisites: (BA 230 with C- or better or BA 233 with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 333H
BA 333H. LEGAL AND ETHICAL BUSINESS SOLUTIONS. (2 Credits)
Legal and ethical regulations of U.S. and global business organizations including financial, human resources, operations and marketing functions. Emphasizes legal and ethical strategies for entrepreneurs including business entity selection, raising capital and managing intellectual property.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 230 with C- or better or BA 233 with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 333

BA 347. INTERNATIONAL BUSINESS. (4 Credits)
Integrated view of international business including current patterns of international business, socioeconomic and geopolitical systems within countries as they affect the conduct of business, major theories explaining international business transactions, financial forms and institutions that facilitate international transactions, and the interface between nation states and the firms conducting foreign business activities.
Prerequisites: ECON 202 with C- or better or ECON 202H with C- or better
Equivalent to: BA 347H

BA 347H. INTERNATIONAL BUSINESS. (4 Credits)
Integrated view of international business including current patterns of international business, socioeconomic and geopolitical systems within countries as they affect the conduct of business, major theories explaining international business transactions, financial forms and institutions that facilitate international transactions, and the interface between nation states and the firms conducting foreign business activities.
Prerequisites: HNRS – Honors Course Designator
Prerequisites: ECON 202 with C- or better or ECON 202H with C- or better
Equivalent to: BA 347

BA 348. INTERNATIONAL EXCHANGE ORIENTATION. (1 Credit)
Consists of large-group sessions as well as small-group break-out sessions for each country individually. It is vital to attend all sessions as valuable information pertaining to your study abroad opportunity will be presented. Graded P/N.

BA 349. IMPACT OF CULTURE ON BUSINESS. (1 Credit)
A requirement of all students participating in a College of Business-approved international exchange program and for completing the College of Business International Business option. The major emphasis is for students to reflect on their experience while studying, living and traveling in a foreign culture and for them to determine how the foreign culture impacts how they would conduct business in that country. Graded P/N.
Prerequisites: BA 348 (may be taken concurrently) with C- or better

BA 351. MANAGING ORGANIZATIONS. (4 Credits)
A systems perspective to understanding the management functions of planning, organizing, leading and controlling. Ethical and diversity issues are addressed as they are relevant in entrepreneurial and established ventures.

BA 352. MANAGING INDIVIDUAL AND TEAM PERFORMANCE. (4 Credits)
Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course.
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])
Equivalent to: BA 352H

BA 352H. MANAGING INDIVIDUAL AND TEAM PERFORMANCE. (4 Credits)
Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course.
Attributes: HNRS – Honors Course Designator
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])
Equivalent to: BA 352

BA 353. *PROFESSIONAL DEVELOPMENT. (4 Credits)
Designed to improve the ability of students to describe their accomplishments and sell themselves in situations like professional networking, company meetings, response to proposals for services, and interviews. Emphasizes writing skills, workplace integration, verbal communication, and preparation of developmental roadmaps that will lead students to success within their chosen profession. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])
Equivalent to: BA 253, BA 253H, BA 281, BA 281H

BA 354. *MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY. (4 Credits)
Introduces contemporary issues that business professionals face making ethical and socially responsible decisions in an increasingly fast-paced, transparent, and global environment. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or HC 199 [C-])
Equivalent to: BA 354H, MGMT 459

BA 354H. *MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY. (4 Credits)
Introduces contemporary issues that business professionals face making ethical and socially responsible decisions in an increasingly fast-paced, transparent, and global environment. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or HC 199 [C-])
Equivalent to: BA 354, MGMT 459
BA 357. OPERATIONS MANAGEMENT. (4 Credits)
Decision making in managing the production of goods and services: product planning, process planning, facility planning, control of quantity, cost and quality. Special emphasis on exponential forecasting, inventory management, work methods, project management, productivity improvement, and international comparisons.
Prerequisites: BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better
Equivalent to: BA 357H

BA 357H. OPERATIONS MANAGEMENT. (4 Credits)
Decision making in managing the production of goods and services: product planning, process planning, facility planning, control of quantity, cost and quality. Special emphasis on exponential forecasting, inventory management, work methods, project management, productivity improvement, and international comparisons.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better
Equivalent to: BA 357

BA 360. INTRODUCTION TO FINANCIAL MANAGEMENT. (4 Credits)
Explore the issues facing a financial manager in new business ventures, small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations.
Prerequisites: (BA 213 with C- or better or BA 213H with C- or better or BA 215 with C- or better or BA 215H with C- or better or BA 315 with C- or better) and (ECON 201 [C-] or ECON 201H [C-] or AEC 250 [C-] or AEC 250H [C-])
Equivalent to: BA 240, BA 360H

BA 360H. INTRODUCTION TO FINANCIAL MANAGEMENT. (4 Credits)
Explore the issues facing a financial manager in new business ventures, small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C- or better or BA 213H with C- or better or BA 215 with C- or better or BA 215H with C- or better or BA 315 with C- or better) and (ECON 201 [C-] or ECON 201H [C-] or AEC 250 [C-] or AEC 250H [C-])
Equivalent to: BA 240, BA 360

BA 362. SOCIAL ENTREPRENEURSHIP AND SOCIAL INITIATIVES. (4 Credits)
The core concepts of entrepreneurship, using entrepreneurship to craft innovative responses to social problems. Entrepreneurial skills are as valuable in the social sector as they are in business. Includes both profit and non-profit firms that have programs designed to create social value.

BA 363. TECHNOLOGY AND INNOVATION MANAGEMENT. (4 Credits)
Introduces students to the fundamentals of managing innovation and technology toward the production of intellectual assets; how innovations are created, evaluated and leveraged within business strategy; and how innovation is managed within various business environments.
Prerequisites: BA 260 with C- or better or BA 260H with C- or better

BA 365. FAMILY BUSINESS MANAGEMENT. (4 Credits)
Focuses on the opportunities and the problems characteristic of family businesses: entrepreneurship, management succession, transfer of ownership, mixing family and business roles, family conflicts, personnel issues, non-family employees, and outside advisors.
Equivalent to: BA 463

BA 367. LAUNCH ACADEMY. (3 Credits)
The Oregon State Launch Academy is an incubator for student entrepreneurs who want to be immersed in an innovative, high-energy environment that promotes the creation, evolution and implementation of business ideas. Launch Academy students earn academic credit for working on their businesses and have access to seed funding, prototyping equipment, co-working space, mentoring and training to help them advance their ideas. Launch Academy students learn about developing new products or services, marketing their ideas, building teams and securing funding, among other critical elements of entrepreneurial success.

BA 368. ADVANCED LAUNCH ACADEMY. (1-3 Credits)
The Oregon State Launch Academy is an incubator for student entrepreneurs who want to be immersed in an innovative, high-energy environment that promotes the creation, evolution and implementation of business ideas. Launch Academy students earn academic credit for working on their businesses and have access to seed funding, prototyping equipment, co-working space, mentoring and training to help them advance their ideas. In BA 368 Advanced Launch Academy students/teams will receive coaching from the instructor to move their business ideas forward. Students will secure and engage mentors, complete and test prototypes of their ideas, market their ideas, and prepare to secure funding for their ideas. Graded P/N.
Prerequisites: BA 367 with C- or better

This course is repeatable for 12 credits.

BA 370. BUSINESS INFORMATION SYSTEMS OVERVIEW. (4 Credits)
Introduce students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, and the development and implementation of information systems. Use relational database models to design a real-world case study.
Prerequisites: BA 270 with C- or better or BA 270H with C- or better or BA 302 with C- or better

BA 371. BUSINESS DATA MANAGEMENT. (4 Credits)
Exploration of business data management technologies including but not limited to relational database modeling, data retrieval, database triggers and stored procedures, NoSQL databases, programmatic database querying.
Prerequisites: BA 272 with C- or better and (ACTG 378 [C-] or BA 370 [C-])

BA 372. BUSINESS INFORMATION SYSTEMS DESIGN AND DEVELOPMENT. (4 Credits)
Logical and physical design of computer-based information systems; tools and techniques that underlie the design processes. Design of an enterprise information system with CASE tools. Alternative approaches to systems design with emphasis on object-orientation. Lec/rec.
Prerequisites: BA 371 with C- or better
BA 375. APPLIED QUANTITATIVE METHODS. (4 Credits)
Introduces students to the basics of data science and data analytics for handling of large-scale databases. It provides an overview of the main data-analytic techniques and topics including data visualization, linear and nonlinear regression analysis, time series analysis and forecasting, classification, and clustering methods.
Prerequisites: BA 275 with C- or better
Equivalent to: BA 375H

BA 375H. APPLIED QUANTITATIVE METHODS. (4 Credits)
Introduces students to the basics of data science and data analytics for handling of large-scale databases. It provides an overview of the main data-analytic techniques and topics including data visualization, linear and nonlinear regression analysis, time series analysis and forecasting, classification, and clustering methods.
Attributes: HNRS – Honors Course Designator
Prerequisites: BA 275 with C- or better
Equivalent to: BA 375

BA 376. APPLIED QUANTITATIVE METHODS. (2 Credits)
An in-depth discussion on advanced quantitative methods most relevant to business students. Topics may include regression analysis, time series and forecasting, design of experiments, simulations, decision analysis, survey data analysis, data mining and computationally intensive statistical methods.
Prerequisites: BA 276 with C- or better

BA 381. PERSONAL AND PROFESSIONAL DEVELOPMENT. (4 Credits)
Designed to help students transition to the OSU and COB communities, identify and employ academic success strategies, and start the process of career planning and development. Teaches students how to set financial goals. Credit may not be received for equivalent courses BA 353 or BA 253.
Prerequisites: BA 101 with C- or better
Equivalent to: BA 253, BA 281, BA 353

BA 390. MARKETING. (4 Credits)
Consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Objective is to develop an understanding of distribution processes, marketing problems, and marketing principles.
Prerequisites: ECON 201 with C- or better or ECON 201H with C- or better or AREC 250 with C- or better
Equivalent to: BA 223, BA 390H

BA 390H. MARKETING. (4 Credits)
Consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Objective is to develop an understanding of distribution processes, marketing problems, and marketing principles.
Attributes: HNRS – Honors Course Designator
Prerequisites: ECON 201 with C- or better or ECON 201H with C- or better or AREC 250 with C- or better
Equivalent to: BA 223, BA 390

BA 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

BA 405. READING AND CONFERENCE. (1-16 Credits)
Supervised individual work in some field of special application and interest. Subjects chosen must be approved by professor in charge. This course is repeatable for 16 credits.

BA 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.
BA 451. SUPPLY AND SOURCING MANAGEMENT. (3 Credits)
Focus on effectively using operations and supply chain management to make sourcing and supply decisions in international business contexts. Topics include purchasing/procurement procedures and policy, supply organization, specifications, sourcing strategy, supplier evaluation, competitive bidding, and e-procurement. Global contexts and environmentally and socially responsible supply management are emphasized.
Prerequisites: BA 357 with C- or better

BA 454. LEAN ENTERPRISE MANAGEMENT AND CAPSTONE. (3 Credits)
Analyze business cases that address global value creation and production/delivery systems. Complete integrated business projects to identify critical operations and supply chain management issues, apply multidisciplinary knowledge, analyze and evaluate alternative solutions and write and present reports recommending firm strategies. International business and cross-cultural competencies are emphasized.
Prerequisites: BA 459 with C- or better and MGMT 457 [C-]

BA 458. INNOVATION AND NEW PRODUCT DEVELOPMENT. (4 Credits)
Strategic management of an organization's system and technologies in support of innovation and new product/service development. Application experience with new product/service development process using problem solving skills, information management, and critical thinking.
Prerequisites: BA 223 with C- or better or BA 223H with C- or better or BA 390 with C- or better or BA 390H with C- or better

BA 459. SERVICE OPERATIONS MANAGEMENT. (3 Credits)
Focus on the management of global service operations including designing and managing systems to coordinate global information and material flows within and between firms in a supply chain. Covers planning operations, evaluating system alternatives, designing and researching global supply networks, examining complex adaptive systems and evaluating value stream synchronization.
Prerequisites: (BA 375 with C- or better or BA 375H with C- or better) and BA 451 [C-]

BA 460. VENTURE MANAGEMENT. (4 Credits)
Entrepreneurial and innovation processes applied to new business start-ups, existing small businesses, and new ventures within larger organizations; new venture planning, project management, and productivity improvement. Cases and projects are used to apply concepts and to develop communication skills.
Prerequisites: (BA 260 with C- or better or BA 260H with C- or better) and (BA 351 [C-] or BA 352 [C-] or BA 352H [C-]) and (BA 223 [C-] or BA 223H [C-] or BA 390 [C-] or BA 390H [C-])

BA 463. FAMILY ENTERPRISE GOVERNANCE. (4 Credits)
Builds on the introductory family business management course to examine the required elements of a successful enterprise, a diversified and multigenerational organization comprised of multiple business lines.
Prerequisites: BA 365 with C- or better

BA 464. NEW VENTURE FINANCING. (4 Credits)
Explore financial issues facing entrepreneurial business ventures: cash flow and budgets, financial analysis, financial statement forecasting, financial controls, asset management, and understanding the funding options at different points in the business life cycle including SBA loans, angel investment, venture capital, bank loans, and going public.
Prerequisites: (BA 260 with C- or better or BA 260H with C- or better) and (BA 240 [C-] or BA 240H [C-] or BA 360 [C-] or BA 360H [C-] or FIN 340 [C-] or FIN 340H [C-])

BA 465. *SYSTEMS THINKING AND PRACTICE. (4 Credits)
Hard and soft system theories examined, methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: BA 465H, ENGR 465, HORT 490

BA 465H. *SYSTEMS THINKING AND PRACTICE. (4 Credits)
Hard and soft systems theories are examined, including methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: BA 465

BA 466. INTEGRATIVE STRATEGIC EXPERIENCE. (4 Credits)
Provides students with an overview of the basic concepts in strategic management. Students learn frameworks and models to understand and analyze a firm’s external environment and internal resources in an effort to create sustainable competitive advantages. Analysis and critique of conventional conceptions of business ethics. Evaluation of ethical issues involving businesses at firm, national, and international levels.
Prerequisites: ((BA 240 with C- or better or BA 240H with C- or better or FIN 340 with C- or better or FIN 340H with C- or better or BA 360 with C- or better or BA 360H with C- or better) and (BA 352 [C-] or BA 352H [C-]) and (BA 357 [C-] or BA 357H [C-]) and (BA 223 [C-] or BA 223H [C-] or BA 390 [C-] or BA 390H [C-]))
Equivalent to: BA 466H

BA 466H. INTEGRATIVE STRATEGIC EXPERIENCE. (4 Credits)
Provides students with an overview of the basic concepts in strategic management. Students learn frameworks and models to understand and analyze a firm’s external environment and internal resources in an effort to create sustainable competitive advantages. Analysis and critique of conventional conceptions of business ethics. Evaluation of ethical issues involving businesses at firm, national, and international levels.
Prerequisites: (BA 340 with C- or better or BA 340H with C- or better or FIN 340 with C- or better or FIN 340H with C- or better or BA 360 with C- or better or BA 360H with C- or better) and (BA 352 [C-] or BA 352H [C-]) and (BA 357 [C-] or BA 357H [C-]) and (BA 223 [C-] or BA 223H [C-] or BA 390 [C-] or BA 390H [C-])
Equivalent to: BA 466

BA 467. NEW VENTURE LABORATORY. (4 Credits)
Enterprise capstone course. Fully develop a business plan including product specs with prototype, financial analysis, market analysis, marketing plan, management structure and proposed financing.
Prerequisites: BA 357 with C- or better and BA 458 [C-]

BA 468. TECHNOLOGY COMMERCIALIZATION. (2-4 Credits)
*Hands on* class in which students will exercise commercialization concepts on recently awarded Oregon State University patents or individual commercialization projects. Students will learn a process and tools to assess the business viability of a technical idea, and to develop the best business approach for commercialization.
Prerequisites: BA 363 with C- or better

This course is repeatable for 8 credits.
BA 478. SUPPLY CHAIN ANALYTICS. (3 Credits)
Explores modeling methods for design, analysis, execution and integration of supply chains. Introduces students to a variety of modeling and optimization techniques for the analysis of strategic, tactical and operational supply chain problems, including demand forecasting, risk analysis, revenue management, distribution and facility location.
Prerequisites: BA 357 with C- or better and BA 375 [C-]

BA 479. BUSINESS TELECOMMUNICATIONS AND NETWORKING. (4 Credits)
Provide a fundamental understanding of the five-layer Internet model and its effects on the business environment. Planning and managing networks in support of enterprise-wide computing. Assignments involve server hardware and software configurations including DNS/DHCP server configurations, addition of clients to a network, and creating/managing user accounts.
Prerequisites: ACTG 378 with C- or better

BA 480. INFORMATION SYSTEMS SECURITY. (4 Credits)
Course emphasis is on security risk mitigation methods and procedures such as access control, identity management, intrusion prevention and detection, network and physical security, etc. These and other topics will be placed in both the operational and strategic context of the business. The course also addresses several IS governance and IS security frameworks within which the various security concepts, aspects, policies and procedures can be viewed and discussed.
Prerequisites: BA 272 with C- or better and ACTG 378 [C-] and BA 479 [C-]

BA 481. INTRODUCTION TO BUSINESS ANALYTICS. (4 Credits)
How organizations can successfully collect, evaluate and apply information for better decision making. Emerging technologies such as transaction processing systems, RFID, weblogs, social networks, website usage, and online communities have the potential to reveal market trends, suppliers' preferences, and competitors' next moves. The success of an organization largely depends on its ability to take advantage of those data sets that are already available to it. The class starts with basic IT strategy concepts for the identification of the opportunities for BI solutions, and ends with hands-on experience using Business Intelligence tools to implement such solutions.
Equivalent to: BA 483

BA 483. BUSINESS ANALYTICS. (4 Credits)
Presents how organizations can successfully "collect, evaluate and apply information" for better decision making. Technologies such as transaction processing systems, RFID, weblogs, social networks, website usage, and online communities have the potential to reveal market trends, suppliers' preferences, and competitors' next moves. The success of an organization largely depends on its ability to take advantage of those data sets that are already available to it.
Prerequisites: BA 371 with C- or better and BA 479 [C-]
Equivalent to: BA 481

BA 487. HOSPITALITY FINANCIAL MANAGEMENT. (4 Credits)
Introduces students to the evaluation of investments in competitive products and services as sustainable strategies for the hospitality industry.
Prerequisites: BA 360 with C- or better and BA 486 [C-]

BA 488. ADVANCED HOSPITALITY MANAGEMENT. (4 Credits)
Designed to provide students with an in-depth understanding of the importance of core competencies in the hospitality industry in terms of overall value addition, competitive methods, and competitive advantage, taking into consideration both present and future effects.
Prerequisites: BA 352 with C- or better
BA 518. ADOPTING THE ENTREPRENEURIAL MINDSET. (3 Credits)
Introduces the fundamentals of entrepreneurship and innovation, and exposes the concepts, practice, and tools of the entrepreneurial world.

BA 528. FINANCIAL AND COST ANALYSIS. (3 Credits)
Analysis of the balance sheet and income statement to determine profitability, risk, and rate of return; preparation of pro forma financial statements; cost measurement for products, projects, jobs, customers, and markets; strategic cost decision making for pricing and resource allocation.

BA 531. BUSINESS LAW - TECHNOLOGY/NEW VENTURES. (3 Credits)
An integrative course on managing legal and ethical issues for new ventures. Focuses on business law for founders of start-up companies including formation of new business entities, protecting intellectual property, workforce management and global issues. Topics presented from an entrepreneurial perspective and include technology law, e-commerce law and government regulation. Students develop skills to identify and resolve legal and ethical issues, deal with administrative agencies, and proactively manage legal liability. Considerations of ethics and corporate responsibility are emphasized.

BA 532. ENVIRONMENTAL LAW, SUSTAINABILITY, AND BUSINESS. (4 Credits)
Explores fundamental business, legal, and policy issues raised by environmental law, sustainable business practices, and clean energy policies, and their impact on business and management practices.

BA 533. BUSINESS LAW FOR MANAGERS. (3 Credits)
Develops knowledge and skills about business law used by managers in global organizations. Topics covered include establishing lawful and ethical business practices; preventing and responding to compliance failures, infringement and other legal threats; effective use of contracts; and resolving disputes through litigation and alternative dispute resolution.

BA 540. CORPORATE FINANCE. (3 Credits)
Emphasizes analytical tools to measure and manage firm value, through corporate strategies such as mergers and acquisitions, leveraged buyouts, international expansion, and new venture development.

BA 543. FINANCIAL MARKETS AND INSTITUTIONS. (3 Credits)
Investigates the five major financial markets: common stock, bond, derivatives, mortgage, and currency. The course examines the agents in each of these markets, the rules of trading, and the rationale of the agents participating in the different markets.

BA 550. ORGANIZATION LEADERSHIP AND MANAGEMENT. (3 Credits)
Organization-wide implementation issues driven by change. Provides a balanced view of the structural and human sides of organization design.

BA 551. SUPPLY AND SOURCING MANAGEMENT. (3 Credits)
Focus on effectively using operations and supply chain management to make sourcing and supply decisions in international business contexts. Topics include purchasing/procurement procedures and policy, supply organization, specifications, sourcing strategy, supplier evaluation, competitive bidding, and e-procurement. Global contexts and environmentally and socially responsible supply management are emphasized.

BA 552. MANUFACTURING AND SERVICE OPERATIONS. (3 Credits)
Focus on the management of global service operations including designing and managing systems to coordinate global information and material flows within and between firms in a supply chain. Covers planning operations, evaluating system alternatives, designing and researching global supply networks, examining complex adaptive systems and evaluating value stream synchronization.

Prerequisites: BA 551 with B- or better and BA 555 [B-]
Equivalent to: BA 559

BA 554. LEAN ENTERPRISE MANAGEMENT AND CAPSTONE. (3 Credits)
Analyze business cases that address global value creation and production/delivery systems. Complete integrated business projects to identify critical operations and supply chain management issues, apply multidisciplinary knowledge, analyze and evaluate alternative solutions and write and present reports recommending firm strategies. International business and cross-cultural competencies are emphasized.

Prerequisites: BA 559 with B- or better and BA 561 [B-]

BA 555. PRACTICAL BUSINESS ANALYSIS. (3 Credits)
Advanced survey of quantitative business methods useful for aiding management decisions. Topics include a review of basic statistics, mathematical programming, business simulation, statistical process control, advanced regression analysis and forecasting.

BA 557. GLOBAL LOGISTICS MANAGEMENT: FUNDAMENTALS AND STRATEGY. (3 Credits)
Students will learn key concepts, basic strategies, and decision-making tools relevant to logistics management, and apply them to real-world logistics problems faced by companies in the context of managing their global supply chains.

Prerequisites: BA 551 with B or better and BA 552 [B] and BA 561 [B]

BA 559. SERVICE OPERATIONS MANAGEMENT. (3 Credits)
Focus on the management of global service operations including designing and managing systems to coordinate global information and material flows within and between firms in a supply chain. Covers planning operations, evaluating system alternatives, designing and researching global supply networks, examining complex adaptive systems and evaluating value stream synchronization.

Prerequisites: BA 551 with B- or better and BA 555 [B-]
Equivalent to: BA 552

BA 560. VENTURE PLANNING. (3 Credits)
Entrepreneurial and innovation processes applied to new business start-ups, existing small businesses, and new ventures within larger organizations; emphasis on venture planning with project management. Lec/rec.

BA 561. SUPPLY CHAIN MANAGEMENT. (3 Credits)
Covers tools and concepts needed to manage the entire supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains.

BA 562. MANAGING PROJECTS. (3 Credits)
Covers tools and concepts used by managers to plan and initiate business projects. Computer applications, cases and a project.

BA 563. FAMILY ENTERPRISE GOVERNANCE. (4 Credits)
Builds on the introductory family business management course to examine the required elements of a successful enterprise, a diversified and multigenerational organization comprised of multiple business lines.
BA 567. SELECTED TOPICS IN MANAGEMENT. (0-4 Credits)
Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. Lec/rec. This course is repeatable for 16 credits.

BA 568. INTEGRATED BUSINESS PROJECT. (3 Credits)
The project requires students to complete a business plan, as a means of directing the development of a business. A business plan can help focus a business idea, chart a course for strategic business development, and facilitate setting objectives and creating evaluative benchmarks of progress. To be taken during the last year of the MBA program.

BA 569. ADVANCED STRATEGIC MANAGEMENT. (3 Credits)
Advanced integrative case-based course on the process of systematically developing and managing firm strategies. Topics are covered from a general management perspective and include setting corporate goals and objectives, analyzing external competitive environments, understanding business models, identifying strategy options, and designing appropriate organization systems and structure for implementation of plans. International and e-business issues are integrated throughout.

BA 570. INNOVATION STRATEGY, IP, AND NPD. (3 Credits)
Enables students who are aspiring entrepreneurs forming new ventures or corporate managers leading existing businesses to understand the fundamental drivers of the success or failure of new products, from the perspective of the strategic management of technological innovation.
Prerequisites: BA 560 with B- or better

BA 571. ADVANCED INFORMATION SYSTEMS. (3 Credits)
The development, implementation and management of information technology applications will be addressed. Topics will address the development and application of technology to support linkages within the organization and outside the organization. Projects will be assigned to illustrate the topics.

BA 572. ADVANCED INFORMATION SYSTEMS. (3 Credits)
Enables students to understand the development, implementation and management of information technology applications will be addressed. Topics will address the development and application of technology to support linkages within the organization and outside the organization. Projects will be assigned to illustrate the topics.

BA 573. DATA ANALYTICS FOR COMPETITIVE ADVANTAGE. (3 Credits)
Case studies, hands-on data analysis experience, and a class project will introduce basic concepts of data analytics, sketch the lifecycle of a data analytics project, and connect analytics to business consequences. Students will use representative analytic tools to support decision making.

BA 574. DATA MANAGEMENT. (3 Credits)
Familiarize students with the major activities involved in collecting and managing data for a data analytics project, including extracting information from relational databases, mapping organizational requirements into a data design, transforming data into information, exploring data warehouse concepts, and exploring basic concepts underlying Hadoop and other noSQL data management and analysis methods.
Prerequisites: BA 573 with C or better

BA 575. DATA EXPLORATION AND VISUALIZATION. (3 Credits)
In this course we concentrate on the initial, exploratory phases of business analytic data analysis. We explore different types of data and the types of analysis they allow; aggregating and disaggregating data and issues of validity with both selecting and collecting data. We also start exploring one or more datasets relating to our Integrated Business Analytics Project (BA 577).
Prerequisites: BA 573 with C or better

BA 576. DATA AND TEXT MINING. (3 Credits)
Examine how data/text analysis technologies can be used to improve decision making. The class covers the fundamental principles and techniques of data mining, text analysis, and uses real-world examples and cases to place data-mining techniques in context. Students will have hands-on experience with data/text mining software.
Prerequisites: BA 574 with C or better and BA 575 [C]

BA 577. INTEGRATED BUSINESS ANALYTICS PROJECT. (3 Credits)
Students will integrate what they have learned to solve industry-sponsored problems. The goal of the class is to provide students with opportunities to design, implement, and evaluate analytic solutions for a real-world enterprise. Student teams will examine the data requirements, technical requirements, and organizational requirements necessary for the success of analytical solutions. The project will give students the experience of leading and managing an analytical team, much as a Chief Analytics Officer (CAO) would be expected to do.
Prerequisites: BA 555 with C or better and BA 574 [C] and BA 575 [C]

BA 578. SUPPLY CHAIN ANALYTICS. (3 Credits)
Explores modeling methods for design, analysis, execution and integration of supply chains. Introduces students to a variety of modeling and optimization techniques for the analysis of strategic, tactical and operational supply chain problems including demand forecasting, risk analysis, revenue management, distribution and facility location.
Prerequisites: BA 555 with B- or better

BA 579. MARKETING MANAGEMENT. (3 Credits)
Provides students with an understanding of how a market-orientation can help firms to profitably deliver value to their targeted customers. Through a combination of lectures, in-class exercises, and case discussions, students will learn how to analyze complex marketing challenges, and make strategic decisions based on established marketing management principles.

BA 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Graded P/N.
This course is repeatable for 32 credits.

BA 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 32 credits.

BA 603. THESIS/DISSERTATION. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

BA 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 32 credits.

BA 607. SEMINAR. (1-16 Credits)
This course is repeatable for 32 credits.

BA 611. TEACHING EFFECTIVENESS. (1-6 Credits)
Provides an overview of a broad range of effective teaching techniques and common issues associated with teaching at the college level (e.g., defining learning outcomes, common pitfalls, assessing of student learning, etc.). This course is repeatable for 6 credits.

BA 612. FOUNDATIONS OF BUSINESS RESEARCH. (3 Credits)
Introduces first-year business doctoral students to concepts fundamental to conducting research in business as a social science. Specific topics may change from quarter to quarter, but sample topics include the academic environment in business, research paradigms, ethics in research, fundamentals of scientific research, constructs, validity, sampling, and analysis and interpretation.
BA 613. SEMINAR IN BUSINESS RESEARCH METHODS. (3 Credits)
Provides first-year business PhD students with an in-depth introduction to the most common research methodologies used by current business faculty across multiple functional disciplines. Specific research methods covered may change from quarter to quarter, but sample topics include use of basic econometric models for analysis of archival data, experimental methodologies, qualitative research techniques, and survey research.

BA 660. FOUNDATIONS OF ENTREPRENEURSHIP RESEARCH. (3 Credits)
Provides a broad overview of the foundations of entrepreneurship research, including theoretical underpinnings of the field as well as some of the common and/or promising approaches to the study of entrepreneurial phenomena.

BA 661. DOCTORAL SEMINAR IN ORGANIZATIONAL THEORY. (3 Credits)
Surveys research on classic and contemporary developments in basic organizational theory.

BA 662. CORPORATE ENTREPRENEURSHIP AND NEW VENTURES. (3 Credits)
Surveys research in the area of corporate entrepreneurship and venturing, focusing on relevant theoretical underpinnings and core concepts in the corporate entrepreneurship, entrepreneurship, and strategy literatures.

BA 663. STRATEGIC MANAGEMENT. (3 Credits)
Surveys research exploring the central question in strategy: Why do some firms outperform others? The course considers a wide variety of foundational and contemporary issues in the field, while specific topics may change from quarter to quarter, sample topics include competitive and cooperative interactions, the resource-based view and firm capabilities, organizational learning and adaptation, and industry evolution.

BA 664. TECHNOLOGY AND INNOVATION MANAGEMENT. (3 Credits)
Surveys research on the management of innovation and technology in organizations, focusing on innovation as an outcome (product, service, technology, practice) and on the process of generation, adoption, and implementation of innovation in organizations.

BA 808. WORKSHOPS. (0-16 Credits)
Workshops aimed at practicing professionals in the discipline. Topics may vary.

Design

DSGN 121. COMPUTER AIDED DESIGN. (3 Credits)
Introduction to the Adobe Creative Suite: Illustrator and Photoshop. Instruction in drawing, image editing, flat illustrations and textile design. Lec/studio.

DSGN 226. SPECIFICATION BUYING. (4 Credits)
Introduction to terminology, assembly process, quality factors, and costs in the development of sewn product specifications. Lec/lab.

DSGN 244. COLOR INNOVATION. (4 Credits)
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Equivalent to: DSGN 244H

DSGN 244H. COLOR INNOVATION. (4 Credits)
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 244
DSGN 287. STUDIO I: DESIGN COMMUNICATION. (4 Credits)
Focuses on design communication through electronic media. Students use AutoCAD, SketchUp, and the Adobe Creative Cloud to create 2D and 3D visualizations and presentations of interiors. Lec/studio.
Equivalent to: DHE 287

DSGN 327. PERFORMANCE APPAREL INNOVATION I. (4 Credits)
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisites: DSGN 226 with C- or better
Equivalent to: DHE 327

DSGN 328. DIGITAL DESIGN FOR APPAREL. (3 Credits)
Computer-aided flat pattern, grading and marker techniques using industry relevant pattern development software.
Prerequisites: DSGN 327 with C- or better
Equivalent to: DHE 328

DSGN 329. SPORTSWEAR INDUSTRY COLLABORATION. (3 Credits)
Industry lead team project. Creation of briefs, sketch, pattern, design textile prints, construct prototypes based on identified consumer and company.
Prerequisites: DSGN 327 with C- or better

DSGN 330. FASHION FORECASTING AND MARKET ANALYSIS. (4 Credits)
Forecasting and market analysis processes applied to fashion goods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: WR 222 with C- or better or WR 323 with C- or better or WR 327 with C- or better

DSGN 333. HISTORY OF CONTEMPORARY FASHION. (4 Credits)
Historic analysis of fashion change in men’s and women’s apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion.
Equivalent to: DHE 233, DHE 463

DSGN 335. APPAREL AND FOOTWEAR VALUE CHAIN. (3 Credits)
Survey of the structure, functions, and current trends within the apparel and footwear value chain.

DSGN 341. DESIGN THINKING AND PROCESS INNOVATION. (4 Credits)
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Equivalent to: DSGN 341H

DSGN 341H. DESIGN THINKING AND PROCESS INNOVATION. (4 Credits)
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 341

DSGN 342. INTRODUCTION TO DESIGN MANAGEMENT. (4 Credits)
Introduces the foundations and concepts of design strategy and creative development.
Prerequisites: DSGN 341 with C- or better

DSGN 343. IDEA VISUALIZATION. (4 Credits)
Focuses on the design process through visual communication of ideation and sketching.
Prerequisites: DSGN 342 with C- or better

DSGN 352. TEXTILES FOR INTERIORS. (4 Credits)
Types, qualities, and maintenance of functional and decorative fabrics for homes and public buildings. Use of specifications, standards, and legislation.
Prerequisites: DSGN 255 with C- or better or DHE 255 with C- or better

DSGN 355. SPECIFICATION AND EVALUATION OF PERFORMANCE MATERIALS. (4 Credits)
Specification of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance. Lec/lab.
Prerequisites: DSGN 255 with C- or better and DSGN 327 [C-]
Equivalent to: DHE 355

DSGN 356. SPECIFICATION AND EVALUATION OF PERFORMANCE MATERIALS. (3 Credits)
Specification of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisites: DSGN 255 with C- or better

DSGN 357. EVALUATION OF PERFORMANCE MATERIALS LABORATORY. (1 Credit)
Evaluation of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisites: DSGN 255 with C- or better and DSGN 327 [C-]
Corequisites: DSGN 356

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 377. RETAIL AND MERCHANDISING. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 383. BUILDING CONSTRUCTION AND MATERIALS. (3 Credits)
An introduction to the manufacture, characteristics, sustainability, and use of construction materials in commercial and residential construction.
Equivalent to: DHE 283

DSGN 387. STUDIO III: ADVANCED DESIGN COMMUNICATION. (4 Credits)
Development of presentation and Building Information Modeling (BIM) skills through various computer programs including Adobe Illustrator, Adobe Photoshop, Sketchup, and Revit Architecture. In-class exercises and take-home assignments.
Prerequisites: DSGN 287 with C- or better
Equivalent to: DHE 387

DSGN 388. STUDIO IV: HOSPITALITY DESIGN. (4 Credits)
Study and design of hospitality spaces in compliance with building codes and industry standards, with emphasis on sustainability, safety, and cultural context.
Prerequisites: DSGN 387 with C- or better

DSGN 394. STUDIO V: LIGHTING DESIGN. (4 Credits)
Lighting design and documentation for residential and small commercial projects. The commercial projects include space planning and lighting design for workspace and retail environments. Lec/Studio.
Prerequisites: DSGN 388 with C- or better or DHE 388 with C- or better

DSGN 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.
DSGN 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

DSGN 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

DSGN 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

DSGN 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

DSGN 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

DSGN 410. FIELD EXPERIENCE. (6-12 Credits)
This course is repeatable for 16 credits.

DSGN 422. DHE FASHION SHOW AND DESIGN EXHIBITION. (1-16 Credits)
Special topics in design and human environment.
This course is repeatable for 16 credits.

DSGN 427. PERFORMANCE APPAREL INNOVATION II. (4 Credits)
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisites: DSGN 327 with C- or better
Equivalent to: DHE 427

DSGN 428. TECHNICAL SPORTSWEAR SIZING AND FIT. (4 Credits)
Development of sizing and grading systems used in sportswear and evaluation of garment fit by use of virtual and physical prototypes.
Prerequisites: DSGN 327 with C- or better
Equivalent to: DHE 428

DSGN 429. FUNCTIONAL DESIGN AND PRODUCT DEVELOPMENT. (4 Credits)
Design processes and research methods used to create functional designs. Students will identify design problems and develop design brief and functional product line for identified target company. Lec/lab.
Prerequisites: DSGN 428 with C- or better
Equivalent to: DHE 429

DSGN 440. DESIGN RESEARCH. (4 Credits)
Surveys design principles, methods and applications in business outcomes. Application of design research is investigated and analyzed in group projects.
Prerequisites: DSGN 343 with C- or better

DSGN 441. SERVICE DESIGN INNOVATION. (4 Credits)
Focuses on the impact that service design has on business enterprises. Creative ideation, critical analysis, and innovative thinking are integrated as foundations for service design outcomes.
Prerequisites: DSGN 440 with C- or better

DSGN 442. MATERIALITY AND MAKING FIELD PROJECT. (4 Credits)
Focuses on material properties and specifications. Students work in the makerspace to design product outcomes.
Prerequisites: DHE 440 with C- or better or DSGN 440 with C- or better

DSGN 464. CONTEMPORARY HISTORY OF INTERIORS AND HOUSING. (3 Credits)
History of interior design from the mid-19th century to the present.
Prerequisites: ART 204 with C- or better or ART 205 with C- or better or ART 206 with C- or better
Equivalent to: DHE 464

DSGN 471. RETAIL PRESENTATION STRATEGIES. (4 Credits)
Provides an overview of, and examines competitive presentation strategies within, retail environments and channels (e.g., in-store, catalog, online, mobile) by integrating the principles and elements of design with sensory marketing.
Prerequisites: DSGN 377 with C- or better and (BA 390 [C-] or BA 390H [C-]) or MRKT 390 [C-])

DSGN 472. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: (BA 215 with C- or better or BA 215H with C- or better) and (DHE 276 [C-] or DSGN 276 [C-])
Equivalent to: DSGN 372

DSGN 473. RETAIL STRATEGIES PRACTICUM. (4 Credits)
Explores the role that retail strategies play within a value delivery network. Looks at how retailing helps deliver value created in manufacturing and in services. Examines how these organizations develop strategies to attract consumers and also how consumers develop strategies to acquire goods and services from retailers. Provides a foundation for students who plan to work in retailing or related disciplines.
Prerequisites: DSGN 377 with C- or better

DSGN 475. *GLOBAL SOURCING OF TEXTILES, APPAREL, AND FOOTWEAR. (4 Credits)
Trade theory and the effects of trade policy, cultural values, and economics on the global production, distribution, and consumption of textiles, apparel, and footwear. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

DSGN 488. STUDIO VI: HEALTHCARE DESIGN. (4 Credits)
Interior design project development with emphasis on healthcare design, contract documents, and building codes.
Prerequisites: DSGN 394 with C- or better or DHE 394 with C- or better

DSGN 495. STUDIO VII: SENIOR THESIS II. (4 Credits)
Individual design project development of programming document and construction drawings.
Prerequisites: DSGN 488 with C- or better

Finance

FIN 340. FINANCE. (4 Credits)
Role and functions of a financial manager in the modern business environment in which a manager operates; formulation of financial objectives and policies; financial analysis, forecasting, planning, and control; asset management; capital budgeting; acquisition of funds through borrowing, stock issue, and by internal means; dividend policy; and international aspects of finance.
Prerequisites: (BA 213 with C- or better or BA 215 with C- or better or BA 215H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: FIN 340H
FIN 340H. FINANCE. (4 Credits)
Role and functions of a financial manager in the modern business environment in which a manager operates; formulation of financial objectives and policies; financial analysis, forecasting, planning, and control; asset management; capital budgeting; acquisition of funds through borrowing, stock issue, and by internal means; dividend policy; and international aspects of finance.
Attributes: HNRS – Honors Course Designator
Prerequisites: (BA 213 with C- or better or BA 215 with C- or better or BA 215H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: FIN 340

FIN 341. INVESTMENTS. (4 Credits)
Risk and reward characteristics of investments; sources of investment information; domestic and international security markets; investment characteristics of common stocks, debt securities, convertible securities, option contracts, and investment companies; real property investment; economic market analysis; technical market analysis; tax aspects of investments; and investment management.
Prerequisites: BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better or FIN 340 with C or better or FIN 340H with C or better

FIN 342. ADVANCED FINANCIAL MANAGEMENT. (4 Credits)
Capital market theory and the valuation of risky assets, capital budgeting, valuing the firm’s securities, capital structure theory, long-term financing alternatives, cost of capital, dividend policy, working capital management, financial analysis and planning, mergers, and takeovers.
Prerequisites: FIN 340 with C- or better or FIN 340H with C- or better or BA 240 with C- or better or BA 240H with C- or better or BA 360 with C- or better or BA 360H with C- or better or FIN 340 with C- or better or FIN 340H with C- or better

FIN 434. CFA PREPARATION. (2-4 Credits)
Provides students with structure and guidance in their preparation for the Chartered Financial Analyst (CFA) Level exam. Students systematically prepare for and are tested on the 18 sections of the exam. This course is repeatable for 4 credits.

FIN 437. APPLIED PORTFOLIO MANAGEMENT. (2 Credits)
Hands-on experience of managing two investment portfolios. Each member in the Oregon State Investment Group (OSIG) should act as a financial analyst to analyze a chosen company by performing the Discounted Cash Flow (DCF) or Residual Income Model (RIM), the relative valuation, and the SWOT analyses. The weekly seminar offers opportunities for students to present their analyses and offer comments and suggestions to other’s presentations.

FIN 438. APPLIED PORTFOLIO MANAGEMENT II. (1 Credit)
Each student will act as a financial analyst to analyze a chosen company using models learned in FIN 437. Provides students with an opportunity to practice security valuation and get familiar with the tools. In addition, this course will focus on various measures of portfolio performance.
Prerequisites: FIN 437 with C- or better or BA 437 with C- or better

FIN 439. APPLIED PORTFOLIO MANAGEMENT III. (1 Credit)
Each student will act as a financial analyst to analyze a chosen company using models learned from FIN 437. Provides students additional opportunity to practice security valuation and strengthen their understanding of the tools. In addition, this course will introduce ways to develop an efficient portfolio.
Prerequisites: FIN 437 with C- or better or BA 437 with C- or better

FIN 440. FIXED INCOME SECURITIES. (4 Credits)
Provides students with intermediate knowledge of fixed income assets, interest rate and interest rate theory, the tools for estimating values, and managing portfolios of fixed income assets. The course can also serve as a partial coverage of material expected of applicants planning on seeking the Certified Financial Analyst designation.
Prerequisites: FIN 341 with C- or better

FIN 441. FINANCIAL INSTITUTIONS. (4 Credits)
Introduction of markets and institutions that form the economic system of trading financial and real assets both domestically and internationally. The introduction of concepts of financial theory, institutional detail, regulatory environments, and the history of financial markets. Topics include legal, ethical, technological, and global issues facing financial managers, markets, and institutions.
Prerequisites: BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better or FIN 340 with C or better or FIN 340H with C or better

FIN 442. FINANCIAL STATEMENT ANALYSIS. (4 Credits)
Student develop the understanding and skill to use financial statements for investment decisions, credit decisions, performance analysis, and forecasting. Three main topic areas: analysis overview, accounting analysis, and financial analysis.
Prerequisites: FIN 342 with C- or better

FIN 443. PORTFOLIO MANAGEMENT. (4 Credits)
An introduction to the construction, revision, and performance evaluation of financial asset portfolios.
Prerequisites: FIN 341 with C- or better or BA 341 with C- or better

FIN 444. FINANCIAL RISK MANAGEMENT. (4 Credits)
Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs.
Prerequisites: FIN 341 with C- or better

FIN 445. INTERNATIONAL FINANCIAL MANAGEMENT. (4 Credits)
International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance.
Prerequisites: FIN 341 with C- or better and FIN 342 [C-] and (FIN 440 [C-] or FIN 442 [C-] or FIN 443 [C-] or FIN 444 [C-] or FIN 499 [C-])

FIN 499. SELECTED TOPICS IN FINANCE. (1-4 Credits)
Examination of the impact of recent advances in finance on contemporary business. Topic will vary from term to term. This course is repeatable for 16 credits.

FIN 542. INVESTMENTS. (3 Credits)
Introduction to the tools and concepts of security analysis and investments; basic security types, including stocks, bonds, options and futures, respective markets and to how these securities are traded; fundamental valuation techniques and theory for stocks and bonds.

FIN 543. PORTFOLIO MANAGEMENT. (4 Credits)
An introduction to the construction, revision, and performance evaluation of financial asset portfolios.
Prerequisites: FIN 542 with C or better
FIN 544. FINANCIAL RISK MANAGEMENT. (4 Credits)
Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs.

FIN 545. INTERNATIONAL FINANCIAL MANAGEMENT. (3 Credits)
International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance.
Prerequisites: BA 540 with B- or better

FIN 546. ADVANCED CORPORATE FINANCE. (3 Credits)
The second course in the Corporate Finance sequence. Examines corporate payout policies and capital structure choices, choices in debt financing, financial planning and working capital management, and valuation of projects using a real-options approach.
Prerequisites: BA 540 with B- or better

FIN 549. MERGERS AND ACQUISITIONS. (3 Credits)
Provides an in-depth examination of the theory and practice of the market for corporate control, primarily focusing on mergers and acquisitions (M&A). The objective of the course is to provide an understanding of how to structure, value, and implement an M&A transaction. Students will be expected to apply the appropriate tools and skills to evaluate M&A transactions.
Prerequisites: FIN 546 with B- or better

FIN 550. FUNDAMENTALS OF FINANCIAL PLANNING. (4 Credits)
Professional conduct and regulation, general financial planning principles, and education planning.

FIN 551. INSURANCE PLANNING AND TAX PLANNING. (4 Credits)
Risk management and insurance planning; tax fundamentals and income tax planning.
Prerequisites: FIN 550 with B- or better

FIN 552. FINANCIAL PLANNING II. (3 Credits)
Retirement planning; qualified and non-qualified retirement plans; IRAs; legal, tax, financial and non-financial aspects of estate planning; trusts; wills; wealth transfers.
Prerequisites: FIN 551 with C or better

FIN 553. FINANCIAL PLANNING III. (6 Credits)
Synthesis and integration of financial planning fundamentals to develop a comprehensive financial plan; client communication.
Prerequisites: FIN 552 with C or better

FIN 640. FOUNDATIONS OF FINANCIAL RESEARCH. (3 Credits)
Provides an in-depth introduction to the foundations of financial research with an emphasis on theoretical developments and empirical research methods. Specific topics may change from quarter to quarter, but sample topics include theory of the firm, capital structure theory, dividend policy, and event study methodology.

FIN 641. CORPORATE FINANCE SEMINAR. (3 Credits)
Survey classic and contemporary research in the area of corporate finance. Specific topics may change from quarter to quarter, but sample topics include capital structure, dividend policy, agency theory, adverse selection and signaling, and non-cooperative games with and without complete information.

FIN 642. CAPITAL MARKETS. (3 Credits)
Surveys research on capital markets. Specific topics may change from quarter to quarter, but sample topics include asset pricing models, efficient markets vs behavioral finance, market volatility, volume, new issues market, and emerging markets.

Hospitality Management

HM 101. INTRODUCTION TO HOSPITALITY. (4 Credits)
Introduction to the food-service, lodging, and tourism components of the hospitality industry, and the essential leadership and management skills necessary for success in the field. Background information, current issues, and future challenges in various segments of the industry are included.

HM 210. HOSPITALITY INTERNSHIP. (3 Credits)
Students are required to complete this internship so that OSU and the sponsoring company can offer a platform from where students can apply the management concepts learned in class and acquire the necessary hands-on experience in a hotel, restaurant/food service and/or tourism industry to eventually qualify for a supervisory of managerial level role.
Prerequisites: HM 101 with C- or better

HM 230. LODGING MANAGEMENT. (4 Credits)
Provides a comprehensive introduction to the management of hotels and lodging properties. Focuses on operations, service, management and financials of the lodging industry.
Prerequisites: HM 101 with C- or better

HM 235. HOSPITALITY LAW AND LABOR RELATIONS. (4 Credits)
Provides insight into the laws and regulations governing the hospitality industry with an emphasis on labor relations and human resources best practices. Addresses the general concepts of tort, contracts, liability, risk management, employment practices, licensing and insurance needs. Explores the legal issues that today’s hospitality professionals face such as privacy, labor laws, the common law system for innkeepers and newer hospitality products in the shared economy such as AirBnB or VRBO.

HM 240. HOSPITALITY COST CONTROL. (4 Credits)
Introduces the basic techniques and control procedures used in the hospitality industry to maximize profit and minimize costs. Examines and discusses methods employed to protect and uphold the investors/owners strategic financial goals. Students will focus on all aspects of hospitality control objectives; from food and beverage costs, purchasing, labor costs, menu pricing, establishing room rates, cash flow, theft and loss prevention, to computer applications. The principles of effective budgeting, important hospitality financial ratios and the factors that determine hospitality profitability will also be reviewed.

HM 310. INTERNSHIP II. (3 Credits)
Hospitality Internship II builds on the knowledge students have gained from their course work internship (HM 210). Students are required to complete this internship in a hotel, restaurant/food service and/or related hospitality sector. In cooperation with OSU and the sponsoring company, students will apply the HM concepts learned in class to a real-world business environment.
HM 320. SERVICE AUTOMATION AND TECHNOLOGY. (4 Credits)
Students discover the basic concepts of hospitality technology and service automation. The hospitality industry continues to see significant changes in all facets of business due to changing customer expectations, new and cheaper technology, and a challenging labor market. The result of these forces has led the hospitality industry to increasingly turn to automation of basic job tasks to stay competitive. Examines new technologies shaping the hospitality industry and how industry leaders are taking advantage of these new technologies to improve efficiency and service.

HM 321. HOSPITALITY TECHNOLOGY LABORATORY. (4 Credits)
Technology is critical to attracting, servicing and retaining hospitality customers. The Hospitality Technology Lab course introduces the student to each facet of technology in the industry. The course provides an opportunity for hands-on practical experience with the latest technology. At the end of the course, the student will have a basic working knowledge of Food 3D printers, hotel property management systems, global distribution systems, booking engines, revenue management solutions and other automation tools like Botlr.

HM 325. ONLINE MARKETING AND REPUTATION MANAGEMENT. (4 Credits)
Students are introduced to Online Internet Marketing techniques in the hospitality industry. The course will focus on online marketing, advertising strategies and the importance of a strong internet presence in order to maximize revenue. The course will show how organizations can encourage & capitalize on customer generated content practices to effectively retain customers and generate recurring revenue streams.

HM 340. VACATION PROPERTY MANAGEMENT. (4 Credits)
The vacation property market is one of the largest segments of the hospitality industry and is forecast to grow further over the next ten years. This course looks at each facet of this market including property development, contracts, management, promotion and financing. The course also explores the additional challenges and opportunities associated with the shared economy such as managing owner relations, homeowner associations, renovations and public policy.

HM 399. SPECIAL TOPICS. (4 Credits)
This course is repeatable for 16 credits.

HM 410. HOSPITALITY INTERNSHIP III. (3 Credits)
Hospitality Internship III builds on the knowledge the students have gained from their course work and their previous internships (HM 210 & HM 310). Students are required to complete this internship in a hotel, restaurant/food service and/or related hospitality sector. In cooperation with OSU and the sponsoring company, students apply the HM concepts learned in class to a real-world environment.
Prerequisites: HM 310 with C- or better

HM 420. REVENUE MANAGEMENT AND PRICING. (4 Credits)
Revenue management is critical to the hospitality industry due to the perishable nature of a service-based product. The fundamental principles and concepts of revenue management covered are capacity management, duration control, demand and revenue forecasting, discounting, overbooking practices, displacement analysis, channel management, and pricing execution.

HM 425. ADVANCED RESTAURANT MANAGEMENT AND OWNERSHIP. (4 Credits)
Covers concept development, design and funding of a new restaurant, and best practices in operations and management of a full-service foodservice operation. Intended for students wishing to develop their knowledge of foodservice entrepreneurialism, creation, operations and management/ownership.

HM 430. SERVICE MANAGEMENT. (4 Credits)
With growing access to information and alternative products, customers can choose where to do business based on the level of service they receive. This course will study and analyze service delivery systems for the hospitality industry with particular emphasis on implementing a consumer driven quality service program. This course will review customer service philosophy and techniques. Quality issues, service design and delivery, customer interaction systems, complaint handling and service recovery are also addressed.

HM 460. HOSPITALITY INVESTMENT AND ASSET MANAGEMENT. (4 Credits)
Covers the principles of hospitality investment and asset management. Provides future hospitality owners/executives with the tools and knowledge to evaluate real estate investments in new hospitality ventures. Tools for financial analysis and assessment, debt and equity financing (public and private), and the use of industry benchmarks are discussed and practiced. Students explore the financial feasibility of a specific hospitality investment while considering financial risk, new income streams, competitor analysis and market forecasting, investment and asset management.

HM 470. *ADVANCED HOSPITALITY. (4 Credits)
Capstone course for the hospitality management degree. Provides students with an in-depth understanding of the importance of core competencies in the hospitality and tourism industry. A broader interpretation of the hospitality industry is gained and the student will discover new and innovative practices within the industry. Students will apply the knowledge gained in this course and the program as a whole to a capstone project with an industry partner. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

Management

MGMT 364. PROJECT MANAGEMENT. (4 Credits)
Covers the tools available to project managers, the human and organizational dimensions in different project environments, some computer applications, cases, and a project.
Prerequisites: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better

MGMT 446. CROSS-CULTURAL MANAGEMENT. (4 Credits)
Provides a comprehensive understanding of cross-cultural management issues including leading culturally diverse workforces and managing diversity in the workplace. Students will not only learn theoretical foundations and best practices to address regarding global work practices, but also learn how to transfer and apply the course materials in this course to their.
Prerequisites: BA 352 with C or better or BA 352H with C or better

MGMT 448. EMPLOYEE RECRUITMENT AND SELECTION. (4 Credits)
Provides an in-depth coverage of best practices pertaining to the process of attracting, selecting, and hiring new employees in modern organizations. Topics that will be emphasized include recruitment tactics, legal issues related to staffing, the criteria organizations use to make hiring decisions, and the strengths and weaknesses of various techniques used to evaluate prospective applicants throughout the selection process. The implications of what we discuss for the organization, the hiring manager, and the job-seeker are considered.
Prerequisites: BA 352 with C or better or BA 352H with C or better
MGMT 499. SELECTED TOPICS IN MANAGEMENT. (1-4 Credits)
Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. This course is repeatable for 16 credits.

MGMT 548. EMPLOYEE RECRUITMENT AND SELECTION. (4 Credits)
Provides an in-depth coverage of best practices pertaining to the process of attracting, selecting, and hiring new employees in modern organizations. Topics that will be emphasized include recruitment tactics, legal issues related to staffing, the criteria organizations use to make hiring decisions, and the strengths and weaknesses of various techniques used to evaluate prospective applicants throughout the selection process. The implications of what we discuss for the organization, the hiring manager, and the job-seeker are considered.

MGMT 549. COMPENSATION MANAGEMENT. (4 Credits)
Students will understand and design methods of compensation aimed at motivating and rewarding employee contributions to the organization. Employee contributions may include behavior, skills and goods/services that employees produce as individuals, teams, business units, projects or organizations. Topics include pay strategies and structures, performance measurement and evaluation, and various non-salary incentives.
Prerequisites: BA 352 with C or better

MGMT 452. LEADERSHIP. (4 Credits)
In-depth study of leadership research, theory and skills. Emphasis on analysis of organizational leadership situations and application of leadership skills in the workplace.
Prerequisites: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better

MGMT 453. HUMAN RESOURCES MANAGEMENT. (4 Credits)
Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management.
Prerequisites: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better

MGMT 455. INFLUENCE AND NEGOTIATION. (4 Credits)
Focuses on analysis, skill development and application of management research to real-life organizational influence, persuasion, negotiation and conflict management situations.
Prerequisites: BA 352 with C or better or BA 352H with C or better

MGMT 456. MANAGEMENT FIELD PRACTICUM. (4 Credits)
An innovative application of key management principles and tools to real-life projects is provided. Students will be responsible for developing, designing, executing, and evaluating projects.
Prerequisites: MGMT 364 with C- or better or BA 364 with C- or better

MGMT 457. SUPPLY CHAIN STRATEGY. (4 Credits)
Covers tools and concepts needed to manage the supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains.
Prerequisites: BA 357 with C- or better or BA 357H with C- or better

MGMT 459. MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY. (4 Credits)
Introduces students to contemporary issues managers face making ethical and socially-responsible decisions in an increasingly competitive, transparent, and global environment. Practical examples and cases, as well as contemporary behavioral ethics research and theory are incorporated throughout the course.
Prerequisites: (BA 352 with C- or better or BA 352H with C- or better)
Equivalent to: BA 354, BA 354H

MGMT 516. ORGANIZATIONAL BEHAVIOR. (3 Credits)
Provides evidence-based study of human behavior within organizations with the goal of applying theories of human behavior to effective organizational administration. Topics include understanding individual differences, employee motivation, job design, the evaluation and motivation of employees, group dynamics and team management, effective communications, conflict management, employee stress, and work-life balance.

MGMT 553. HUMAN RESOURCES MANAGEMENT. (4 Credits)
Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management.

MGMT 555. INFLUENCE AND NEGOTIATION. (4 Credits)
Focuses on analysis, skill development and application of management research to real life organizational influence, persuasion, negotiation and conflict management situations.
Prerequisites: BA 516 with C or better
Equivalent to: MGMT 574

MGMT 559. MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY. (3 Credits)
Introduces students to contemporary issues managers face making ethical and socially-responsible decisions in an increasingly competitive, transparent, and global environment. Practical examples and cases, as well as contemporary behavioral ethics research and theory are incorporated throughout the course.

MGMT 571. ETHICAL LEADERSHIP. (3 Credits)
Students will learn the theoretical paradigms of ethical conduct and decision making and consider the role of business in society.
Prerequisites: BA 550 with C or better

MGMT 572. MANAGING HUMAN RESOURCES. (3 Credits)
Students will learn the theories of human resource management, the legal requirements for human resource practices and the practical skills to execute human resource management activities.

MGMT 574. NEGOTIATIONS. (3 Credits)
Students will learn the theories of negotiation and the techniques to develop an effective negotiation style.
MGMT 575. INTEGRATIVE CAPSTONE I. (3 Credits)
First course in a two-course sequence spanning the final two quarters of the OLMBA program. Students will conduct an extensive analysis of the student’s organization, the industry and external environment, the organization's competitors, internal organization, and business level strategy.
Prerequisites: BA 562 with B or better

MGMT 576. INTEGRATIVE CAPSTONE II. (3 Credits)
Second course in a two-course sequence spanning the final two quarters of the OLMBA program. Students start from the final proposal in MGMT 575 and formulate an integrative project plan through the application of multidisciplinary knowledge.
Prerequisites: MGMT 575 with B or better

MGMT 650. ORGANIZATIONAL BEHAVIOR. (3 Credits)
Surveys research on individual differences, psychological states, and team processes related to work motivation, decision-making and performance.

Marketing

MRKT 390. BUILDING AND MANAGING PRODUCTS, SERVICES, AND BRANDS. (4 Credits)
Covers concepts and principles used by marketing professionals. Designed explicitly for Marketing majors, it is an introduction to the relationships between customers, products, and companies in a competitive and dynamically evolving marketplace.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better

MRKT 396. FUNDAMENTALS OF MARKETING RESEARCH. (4 Credits)
Introduction to the fundamentals of market research. Provides a basic understanding of marketing research and relevant decisions in the process.
Prerequisites: (BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better or ST 202 with C- or better) and (BA 223 [C] or BA 223H [C] or BA 390 [C] or BA 390H [C])

MRKT 484. DIGITAL MEDIA AND MARKETING INTEGRATION. (4 Credits)
Digital media is a necessary component of marketing in today's businesses and non-profit organizations. The digital media industry is changing rapidly and transforming the way businesses connect and communicate with their customers. The number of digital marketing platforms, their strengths, weaknesses, and diversity of delivery make digital marketing an exciting opportunity. This course examines the major digital channels and platforms, implementation considerations, and the associated risks and limitations.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 485. SEARCH ENGINE MARKETING. (4 Credits)
Online visibility is driven by the effectiveness of an organization's Search Engine Optimization (SEO) and Search Engine Marketing (SEM). Search Marketing teaches the fundamentals of SEO and SEM and how they can be integrated into an overall marketing strategy to maximize brand visibility and performance.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 486. CUSTOMER RELATIONSHIP MANAGEMENT. (4 Credits)
An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer life time value, technology solutions that track customer data and employee performance.
Prerequisites: BA 396 with C- or better or MRKT 396 with C- or better

MRKT 488. PERSONAL SELLING. (4 Credits)
An introductory course that focuses on two areas: the principles and theory of personal selling, and on understanding and developing the interpersonal communication skills needed for successful personal selling.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 489. PERSONAL SELLING SKILLS AND TECHNIQUES. (4 Credits)
Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 491. QUALITATIVE RESEARCH METHODS. (4 Credits)
Students will gain an overall understanding of qualitative research and methods such as focus groups, in-depth interviews, and observational research. Explores qualitative research methods through hands-on learning and experiences.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 492. CONSUMER BEHAVIOR. (4 Credits)
Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 493. INTEGRATED MARKETING COMMUNICATIONS. (4 Credits)
Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/ advertising managers in implementing the promotional mix.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 495. RETAIL MANAGEMENT. (4 Credits)
Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-middle management decisions.
Prerequisites: BA 390 with C- or better or BA 390H with C- or better
MRKT 496. MARKETING RESEARCH PRACTICUM. (4 Credits)
Provides the student with practical experience in the collection, analysis and interpretation of primary data.
Prerequisites: MRKT 396 with C or better or BA 396 with C or better

MRKT 497. GLOBAL MARKETING. (4 Credits)
Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market.
Prerequisites: (BA 347 with C- or better and (BA 390 [C-] or BA 390H [C-]))

MRKT 498. SERVICES MARKETING. (4 Credits)
Formulation of strategic and tactical marketing plans for organizations (both profit and not-for-profit) in the service sector of the economy. Projects or cases are used to provide a comprehensive experience.
Prerequisites: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better

MRKT 499. MARKETING STRATEGY. (4 Credits)
Market and competitive analysis for developing overall strategies and tactics to achieve the marketing objectives of the business enterprise. Projects or cases are used to provide a comprehensive experience.
Prerequisites: MRKT 396 with C or better or BA 396 with C or better

MRKT 581. APPLIED QUANTITATIVE MARKETING ANALYSIS. (4 Credits)
Includes a comprehensive presentation of quantitative methods used in marketing management. It is designed to prepare students to use quantitative techniques in making marketing decisions. Topics include ANOVA, regression, discriminant and logit analysis, factor analysis, cluster analysis, and structural equation modeling.
Prerequisites: BA 596 with C or better or MRKT 596 with C or better

MRKT 582. APPLIED QUALITATIVE MARKETING ANALYSIS. (3 Credits)
Explores the uses and application of qualitative research methods to inform and improve marketing decision-making. Students will be introduced to such methods as focus group interviews, individual in-depth interviews, observational research methods, participant observation, and ethnographic immersion. Students will learn appropriate analytic strategies and reporting methodologies.
Prerequisites: BA 596 with C or better or MRKT 596 with C or better

MRKT 584. DIGITAL MEDIA AND MARKETING INTEGRATION. (4 Credits)
Digital media is a necessary component of marketing in today’s businesses and non-profit organizations. The digital media industry is changing rapidly and transforming the way businesses connect and communicate with their customers. The number of digital marketing platforms, their strengths, weaknesses, and diversity of delivery make digital marketing an exciting opportunity. This course examines the major digital channels and platforms, implementation considerations, and the associated risks and limitations.
Prerequisites: BA 516 with B- or better

MRKT 585. SEARCH ENGINE MARKETING. (4 Credits)
Online visibility is driven by the effectiveness of an organization’s Search Engine Optimization (SEO) and Search Engine Marketing (SEM). Search Marketing teaches the fundamentals of SEO and SEM and how they can be integrated into an overall marketing strategy to maximize brand visibility and performance.
Prerequisites: BA 516 with B- or better

MRKT 586. CUSTOMER RELATIONSHIP MANAGEMENT. (4 Credits)
An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer lifetime value, technology solutions that track customer data and employee performance.
Prerequisites: BA 516 with B- or better

MRKT 587. DESIGNING CUSTOMER EXPERIENCES. (3 Credits)
Allows students to explore the process of designing customer experiences in ways that allow firms to successfully deliver value in a complex, dynamic competitive environment. Building on knowledge developed through collaboration, generation of customer insights, and mapping exercises, students will work in teams to design a customer experience for an industry client. Lec/studio.
Prerequisites: BA 590 with B- or better and MRKT 592 [B-]

MRKT 588. PERSONAL SELLING. (4 Credits)
An introductory course that focuses on two areas: the principles and theory of personal selling, and on understanding and developing the interpersonal communication skills needed for successful personal selling.

MRKT 589. PERSONAL SELLING SKILLS DEVELOPMENT. (4 Credits)
Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments.

MRKT 592. CONSUMER BEHAVIOR. (3 Credits)
Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered.
Prerequisites: BA 516 with B- or better

MRKT 593. INTEGRATED MARKETING COMMUNICATIONS. (3 Credits)
Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/ advertising managers in implementing the promotional mix.
Prerequisites: BA 516 with B- or better

MRKT 595. RETAIL MANAGEMENT. (4 Credits)
Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-management decisions.

MRKT 596. MARKETING RESEARCH DESIGN AND METHODS. (3 Credits)
Focuses on articulating research problems, creating appropriate research design to address information needs (i.e., understanding markets, competitors, and customers), ethics (to include IRB training), and the application of diverse data collection methods, including secondary, qualitative, and quantitative methods. Measurement, sampling, and data preparation will also be addressed.

MRKT 597. GLOBAL MARKETING. (4 Credits)
Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market.
MRKT 599. SELECTED TOPICS IN MARKETING. (1-4 Credits)
Concepts and methods in advanced marketing management practice. Latest theoretical developments and quantitative methods in marketing, with particular relevance to managerial applications. Topics will vary from term to term.
This course is repeatable for 16 credits.

MRKT 690. MARKETING AND COMMERCIALIZATION. (3 Credits)
Surveys marketing research related to innovation. Specific topics may change from quarter to quarter, but sample topics include research on marketing strategy, consumer behavior, brand equity, brand management, and product management, each from the perspective of the consumer and the firm.

Accountancy Undergraduate Major
(BS, HBS)
The Accountancy degree at OSU prepares students for high-demand careers in accounting, business and consulting. Our program combines core accounting principles with technology, analytics, qualitative skills, quantitative skills, and critical thinking to help students develop the knowledge and abilities necessary to compete in a rapidly changing business environment. We want our students to be future leaders and key decision makers in their firms, and many recruiters seek our Accountancy majors for internships and full-time positions.

Accountancy students learn the language of business through their interactions with faculty who emphasize both the theoretical and applied aspects of accounting. The faculty in accounting are recognized for their teaching innovations and cutting-edge research. The Accountancy program is ranked in the top 10 universities worldwide for research in accounting systems, and our faculty bring their research and business experience into the classroom. The Accountancy program is also accredited by the AACSB.

Accountancy students must meet all university and college core requirements and progression standards. Students also complete a minimum of 60 credits in upper-division courses (300–400 level) and a minimum of 180 credits to graduate. The Oregon State Board of Accountancy requires a minimum of 225 credits in order to take the Uniform Certified Public Accounting Exam, and the Accountancy program recommends specific courses to complete these hours and prepare for the CPA profession. The Certified Management Accountant program requires 180 credits.

Accountancy students must complete a minimum of 40 credits of Accountancy courses—32 credits in required courses and 8 credits in electives.

Students must also earn a C or better (A– does not qualify for prerequisite credit) in their ACTG classes for graduation and to meet prerequisite requirements. In the first instance of a student earning lower than a C in an ACTG class, the student must repeat the class. In the second instance of a student earning lower than a C in an ACTG class, the student is removed from the Accountancy major and should see an advisor to discuss options.

Accountancy major requirements are divided into two parts—lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division accountancy and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

The standard progression in the accounting major includes the following courses in the third year: ACTG 317 EXTERNAL REPORTING I in the fall term, ACTG 318 EXTERNAL REPORTING II in winter term, and ACTG 319
EXTERNAL REPORTING III in the spring term. ACTG 424 INTRODUCTION TO TAXATION and ACTG 427 ASSURANCE AND ATTESTATION SERVICES are typically completed during a student's fourth year.

**Business Administration Core Curriculum (78–81)**

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

## Accounting Information Systems Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 273)

The Accounting Information Systems (AIS) option prepares students for entry-level positions and successful careers in the information management or information systems auditing fields. The program builds on the business, accounting, and computer skills classes required of all accounting students, and prepares students specifically to apply the information technologies to accounting, auditing, and other business tasks.

The program of study that includes the accounting major and these selected courses has been certified by the Information Systems Audit and Control Association. Graduates of this program qualify for one year of work experience toward the Certified Information Systems Auditor designation.
Dean’s Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (https://catalog.oregonstate.edu/college-departments/business/accountancy-bs-hbs)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Design and Innovation Management - College of Business (p. 304)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)

The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean’s Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean’s Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H B-ENGAGED). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 273)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration...
Students earn this option with a minimum of one term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Code | Title | Hours  
-----|-------|-------
BA 347 | INTERNATIONAL BUSINESS | 4  
BA 348 | INTERNATIONAL EXCHANGE ORIENTATION | 1  
BA 349 | IMPACT OF CULTURE ON BUSINESS | 1  

Select a minimum of 18 credits of business or business-related course work

Total Hours: 24

Completed on an approved international exchange or study abroad program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

Option Code: 190

**Accounting Certificate**

Available on OSU-Cascades Campus.

The Post-Baccalaureate Accounting Certificate program at OSU-Cascades is designed for students who have earned a Bachelor's degree in a non-accounting field. The curriculum supports the preparation for the Uniform Certified Public Accountant (CPA) Examination, and employment in professional accounting (public, private, or governmental).

Students who are interested in applying to the program should meet with the OSU-Cascades Business Advisor, Maribeth Erlich, to review program and application requirements.

maribeth.erlich@osucascades.edu 541-322-2090

**Certificate Program Requirements**

The Post-Baccalaureate Accounting Certificate (PBAC) is designed for students who have earned one or more baccalaureate degrees and who wish to complete course work in preparation for taking the Uniform Certified Public Accountant examination and/or the Certified Management Accountant examination. The PBAC program includes courses in accounting directly related to preparation for the exams, as well as professional preparation for public or industry accounting.

**Application Criteria**

The following requirements must be fulfilled prior to registering for the upper-division accounting courses in the PBAC program. Students must also have earned a baccalaureate degree recognized by the OSU Office of Admissions.

At least 20 of the 36 credits required for the PBAC must be taken in residence at OSU. Any courses transferred from another university must be pre-approved as equivalents and upper division work must be taken from an AACSB accredited business program. A grade of “C” or better is required in each course to remain in the PBAC program.

Total Hours: 36

**Major Code:** C191
Business Graduate Major (MSB)

The MSB provides students a focused exploration of a specific business discipline or topic. The degree program offers two specializations: Financial Planning and Supply Chain Analytics.

Financial Planning encompasses individual wealth management planning including such topics as tax planning, estate planning, insurance, retirement planning, and portfolio allocation. An MSB in Financial Planning leads to a candidate earning a Certified Financial Planning designation.

Supply Chain Analytics is a combination of the disciplines of Supply Chain and Logistics Management and Business Analytics. Supply Chain and Logistics Management develops a solid mastery of international operations, logistics, and supply chain management concepts and methods. Business Analytics leverages advances in software interoperability, data exchange mechanisms and data mining and visualization techniques to better understand their operations, customers, and markets enabling graduates to manage internal operations and global supply chains in the manufacturing and service sectors and in government agencies. The combination of these two disciplines into Supply Chain Analytics is a unique focus on the uses of data management and data analytics to explore the characteristics of supply chains and identify value-enhancing efficiencies.

The MSB requires 45 credit hours of coursework. The curriculum includes:

- Five courses of general business foundational knowledge for 15 credits
- Minimum of 30 credits specific to the desired concentration

**Financial Planning Graduate Option**

This option is offered within the following major(s):
- Business (MSB) - College of Business (p. 280)

This option gives current wealth management professionals a graduate credential and qualify them to seek the Certified Financial Planner designation. Financial Planning focuses on the individual and the discipline around wealth management, tax, estate, retirement, and insurance planning. The role of the financial planner is to both understand the goals and resources of a client and to plan and communicate options for the client to achieve these goals. At many levels, the financial planner is tasked with aiding clients to form a realistic understanding of their economic condition and prospects and to aid in maintaining and building their clients’ economic standing.

**Supply Chain Analytics Graduate Option**

This option is offered within the following major(s):
- Business (MSB) - College of Business (p. 280)

This option targets the efficient allocation of resources marshalled for an economic purpose and to inform this process utilizing the wealth of business data available. Supply Chain Analytics specifically stimulates economic growth and social progress through the optimization of processes throughout the supply chain based on the collection and analysis of substantial data.
Option Code: 2069

Business Minor

Also available at OSU-Cascades and via Ecampus (http://ecampus.oregonstate.edu/online-degrees/undergraduate/minors).

The Business Minor allows students to attain a basic understanding of the fundamentals of business essential to any career path. Students will develop an understanding of the language of business that will enable them to comprehend and communicate financial information, organizational behavior, marketing and operations.

Interested students must view an online orientation, http://business.oregonstate.edu/advising/business-entrepreneurship-minor, and meet requirements stated therein before they can declare the minor.

To earn the minor upon graduation, students must meet all of the following:

- Earn a minimum of C– in each of their minor courses (all courses must be taken A–F grading)
- Complete over 50 percent of their minor with OSU credits
- Have minimum 2.5 GPA (OSU grades) in all required minor course work

For further information, please contact the Office of Student Services, Austin Hall 122, 541-737-3716

Business Administration and Accountancy Graduate Major (MBAA)

The Master of Business Administration and Accountancy is a one-year master’s program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master’s degree during their five years of university study required to become a CPA. As an integrated program, the MBAA is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MBAA is also designed to accommodate postbaccalaureate students wishing to prepare for accounting careers by completing a two-year plan of study.

Summary of Programs in Accountancy
Both the one-year and two-year MBAA programs require 53 total accounting related credits (32 undergraduate accounting credits and 21 graduate accounting credits) and 24 business related total credits in the MBA program.

Business Administration Graduate Major (MBA, PhD)
Also available via Ecampus.

The Master of Business Administration program features an innovative, advanced business curriculum that ties together the functional disciplines of business. It is open to both business and non-business undergraduates. Core courses include business law, accounting, finance, operations, management and marketing.

The program provides the knowledge and skills that effective leaders need—preparing graduates to create, build and manage global enterprises that are socially responsible. Sustainable businesses operate deftly to simultaneously meet economic, social and environmental challenges. That’s why applied projects are woven into our curriculum—so our graduates are ready to make smart, bold moves that solve complex problems and make a positive impact on the world.

The MBA program is a place for students to pursue their dreams and push their boundaries. Students learn to build and lead teams, integrate disciplines, work under pressure and multitask—the same skills they will rely on when they leave campus.

For more information, email OSUMBA@oregonstate.edu or call 541-737-5510

The MBA requires 60 credits of course work, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, and 18 credits within one of the ten available graduate options:

1. Accounting
2. Business Analytics
3. Corporate Finance
5. Innovation Management
6. Marketing
7. Organizational Leadership
8. Research Thesis
9. Strategy, Entrepreneurship and Innovation
10. Supply Chain and Logistics Management

1. Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

**Major Code: 2050**

**Accounting Graduate Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 283)

The primary objective of the accounting option is to train doctoral students for careers as professors at high-quality research-oriented universities. This training includes providing them with a program of course work that will prepare them to conduct quality accounting research, involving them in faculty-sponsored research projects as co-investigators and co-authors, and assimilating them into all aspects of the academic accounting profession (e.g., teaching, research, and service).

**Option Code: 2058**

**Business Analytics Graduate Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 283)

Also available via Ecampus.

The MBA Business Analytics graduate option supports a rapidly-growing interest from organizations that need people who can integrate data sets and tools to address opportunities and risks. The information value of both in-house and third-party data sets can now be leveraged using powerful emerging technologies. Increasingly organizations leverage advances in software interoperability, data exchange mechanisms and data mining and visualization techniques to better understand their operations, customers, and markets. This trend has become known as ‘data mining,’ ‘business analytics,’ ‘business intelligence’ or, nowadays, ‘big data’.

Candidates with an undergraduate business major or minor can complete an MBA with business analytics in nine intensive months as full-time students. Other college graduates can take core-1 courses over the summer and join the cohort in the fall. Part-time students can complete the MBA over a longer time frame. A final capstone project and oral exam demonstrate a student’s ability to apply learned concepts.

The Business Analytics graduate option requires 60 credits of course work, including 15 credits of Core-1 courses, 27 credit hours of Core-2
courses, 15 credits within the Business Analytics graduate option, and 3 credits for an elective.

Select 3 credits

Total Hours 60

1 Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

Option Code: 2059

**Corporate Finance Graduate Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 283)

The Corporate Finance graduate option, within the Master of Business Administration (MBA) program, will provide training for students in financial issues at the firm level. These issues include the process by which companies raise capital, decide on a capital structure, implement hedging strategies, and develop governance structures. The option culminates in a capstone course in the market for corporate control where students will develop the ability to conduct analyses and valuation of transactions in this market. Graduates from this program will be well-suited for careers in traditional corporate finance settings, as well as in investment banking.

Candidates with an undergraduate business major or minor may be able to complete an MBA with a Corporate Finance graduate option in nine intensive months as full-time students. Other college graduates can take Core-1 courses over the summer and join the cohort in the fall. Part-time students can complete the MBA over a longer time frame.

The Corporate Finance graduate option requires 60 credits of coursework, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 15 credits within the Corporate Finance graduate option, and 3 credits of elective credit.

1 Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

Option Code: 2063

**Innovation Management Graduate Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 283)

Also available via Ecampus.

The Innovation Management graduate option, within the Master of Business Administration (MBA) program, emphasizes innovation, technology commercialization, and entrepreneurship to prepare graduates to assume leadership roles in emerging businesses. This MBA graduate option provides the student background, tools and experiential learning in the management of innovative business and technical concepts. A core element of the Innovation Management graduate
option is the completion of a self-paced experiential project based on development/analysis of an innovative business or technical concept.

**Length:** The MBA curriculum can be completed within an intensive one-year timeframe. Part-time students, taking six to nine credits per quarter, can complete the program in two years on campus or in Portland.

**Learning Outcomes:**

- Develop a research-driven, investor-ready lean canvas business model and plan to take an innovative idea to market

1 Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

**Option Code: 2062**

**Human Resource Management Graduate Option**

Human Resource Managers are tasked with finding and attracting diverse and global talent, creating fair and safe workplaces for all employees, developing and maintaining employees through their career stages, and helping people thrive in changing work environments. OSU’s Human Resource Management graduate option focuses on evidence-based and analytics-driven practices and includes course work that spans the traditional functions of the HR office, including best practices related to recruiting, hiring, on-boarding, compensation, and benefits.

Candidates with an undergraduate business major or minor may be able to complete an MBA with a Human Resource Management graduate option in nine intensive months as full-time students. Other college graduates can take Core-1 courses over the summer and join the cohort in the fall. Part-time students can complete the MBA over a longer time frame.

The Human Resource Management graduate option within the MBA degree program requires 60 credits of course work, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 18 credits within the Human Resource Management graduate option.

Marketing Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 283)

Also available through Ecampus.

Marketing is the science of identifying, measuring, and satisfying the demand of a market and is the key driver of firm strategy and the marketing perspective requires managers to consider every interaction the customer has with the company. Marketing students learn to incorporate customer insights and innovative problem-solving to develop and communicate marketing strategy in the digital age. OSU's Marketing MBA emphasizes marketing theory and application, strategic thinking, and sustainable and ethical decision-making. The Marketing (MRKT) option prepares students for careers in digital marketing and multinational marketing at entities including Fortune 500 companies and other for-profit businesses, government, and non-governmental entities with “in-house” market research departments.

This option requires 60 credit hours of coursework including 15 credit hours of Business Foundations (Core 1) coursework, 27 credit hours of general MBA coursework (Core 2), and 18 credit hours of marketing coursework. Students will complete a comprehensive option capstone project in MRKT 592.

Organizational Leadership Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 283)

Also available via Ecampus. (http://ecampus.oregonstate.edu)

The Organizational Leadership graduate option, within the Master of Business Administration (MBA) program, is designed to serve leaders and professionals from any industry. The program will be delivered on the Corvallis campus, and in Portland as an online/hybrid program in partnership with OSU Ecampus. The number of in-person sessions required for each individual online/hybrid course will depend on the courses learning objectives, with in-person sessions delivered in the Collaborative Life Sciences facility in Portland.

Key Benefits:

- Flexible and affordable program that helps prepare students for leadership roles in established and emerging business organizations.
- Online/hybrid classes blend face-to-face and online sessions to maximize learning and flexibility.
- Management and leadership course content similar to educational content provided in top ranking executive MBA programs.

Length: Part-time students, taking at most two courses per academic quarter, can complete the program in 21 months.

Learning Outcomes: Upon completion of this graduate degree option, graduates will be able to:

- Understand, analyze, and apply ethics frameworks to facilitate corporate social responsibility and ethical decision making (MGMT 559 MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY).
- Understand, analyze, and apply human resource management information to facilitate executive level strategic decision making (MGMT 572 MANAGING HUMAN RESOURCES).
- Understand, analyze, and apply classical and modern leadership theories and techniques to facilitate leadership effectiveness. (BA 550 ORGANIZATION LEADERSHIP AND MANAGEMENT,
MGMT 559 MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY).

• Understand, analyze and apply negotiation techniques toward attainment of organizational objectives. (MGMT 574 NEGOTIATIONS).

The Organizational Leadership graduate option requires 60 credits of course work, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 12 credits within the Organizational Leadership graduate option, and 6 credits for the Integrative Capstone Experience.

Research Thesis Graduate Option

This option is offered within the following major(s):

• Business Administration - College of Business (p. 283)

The Research Thesis graduate option, within the Master of Business Administration (MBA) program, is intended to offer students and College of Business faculty with joint research interests, an opportunity to engage in research as part of the student’s MBA program. Students can design, execute, and report on business research problems and their solutions. These may include an analysis of existing academic literature and the formulation of research questions and research plans. Students may also collect and analyze data and report on research findings in both an oral and written format.

The Research Thesis graduate option requires a minimum of 46 credits of course work, including 33 credits of general MBA courses and a minimum of 13 credits within the Research Thesis graduate option.

Strategy, Entrepreneurship, and Innovation Graduate Option

This option is offered within the following major(s):

• Business Administration - College of Business (p. 283)

Graduate option for the PhD in Business Administration.

The primary objective of the Strategy, Entrepreneurship and Innovation option is to train doctoral students for careers as professors at high-quality research-oriented universities. This training includes providing them with a program of course work that will prepare them to conduct quality research in strategy and entrepreneurship as well as management and marketing, involving them in faculty-sponsored research projects as co-investigators and co-authors, and assimilating them into all aspects of academics related to innovation and commercialization (e.g., teaching, research, and service).

Learning Outcomes: Graduates will acquire a solid mastery of global supply chain and international operations management concepts and methods.

- Effectively use concepts of operations and supply chain management and qualitative and quantitative methods to make appropriate decisions in international business contexts that include new and unfamiliar situations.
- Design appropriate management plans for global supply chains that are lawful, ethical and environmentally and socially responsible.
- Develop a global outlook that reflects changes experienced and anticipated by firms and industries and understand the requirements for effective change management in global operations and supply chains.

Length: The MBA curriculum can be completed within an intensive one-year time frame. Part-time students, taking six to nine credits per quarter, can complete the program in two years on campus or in Portland.

The SCLM graduate option requires 60 credits of course work, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 15 credits within the SCLM graduate option, and 3 credits from a list of electives.

Select one of the following:

- BA 531 | BUSINESS LAW - TECHNOLOGY/NEW VENTURES       | 3     |
- BA 562 | MANAGING PROJECTS                            |       |
- BA 573 | DATA ANALYTICS FOR COMPETITIVE ADVANTAGE      |       |

Total Hours 60
Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

### Business Administration Graduate Minor

Persons interested in the MBA program should write to: Graduate Business Programs, College of Business, Austin Hall 326, OSU, Corvallis, OR 97331-2603, or email: osumba@bus.oregonstate.edu.

### Business Administration Undergraduate Major (BA, BS, HBA, HBS)

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Business Administration major requirements are divided into two parts—lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

1. 10 credits from the lower-division business core satisfy University General Education Requirements
2. Options and minors are available to provide specializations

### Business Administration Core Curriculum (78–81)

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

1. MTH 241 *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE; ECON 201 *INTRODUCTION TO MICROECONOMICS/ECON 202 *INTRODUCTION TO MACROECONOMICS; WR 222 *ENGLISH COMPOSITION, WR 323 *ENGLISH COMPOSITION or WR 327 *TECHNICAL WRITING; and COMM 111 *PUBLIC SPEAKING, COMM 114 *ARGUMENT AND CRITICAL DISCOURSE or COMM 218 *INTERPERSONAL COMMUNICATION meet the University’s Baccalaureate Core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU.)
2. Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.
3. Options are designed to allow students to extend their professional preparation beyond the introductory level in one or more areas. Some options need to be started in the third year, while others can be completed all during the fourth year. See an academic advisor for more information.

* Baccalaureate Core Course (BCC)
Option
Options are designed to allow students to extend their professional preparation beyond the introductory level in one or more areas. There are 11 options available to the Business Administration major:

1. Dean's Academy
2. Digital Marketing (Ecampus only)
3. Entrepreneurship for Business Majors (Corvallis campus only)
4. Family Business (Corvallis campus and Ecampus)
5. General Business (Available at OSU Cascades campus and Ecampus)
6. Hospitality Management (OSU Cascades campus only)
7. International Business (requires participation in study abroad program)
8. Marketing (Ecampus only)
9. Merchandising Management (Corvallis campus only)
10. Retail Management (Ecampus only)
11. Supply Chain and Logistics Management (Corvallis campus and Ecampus)

Some options need to be started in the third year, while others can be completed all during the fourth year. See an academic advisor for more information.

Dean’s Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (https://catalog.oregonstate.edu/college-departments/business/accountancy-bs-hbs)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Design and Innovation Management - College of Business (p. 304)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)

The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean’s Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean’s Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

Digital Marketing Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 290)

Offered via Ecampus only.

The Digital Marketing option, within the Business Administration (BA) undergraduate major, offers students a focus that includes acquiring a solid mastery of digital marketing strategy, planning, design, and evaluation.

The Digital Marketing Option requires a total of 24 credits beyond the undergraduate business core.

Entrepreneurship for Business Majors Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 290)

The Entrepreneurship for Business Majors option prepares students to establish their own business, to operate in growing businesses, to become involved in family-owned businesses, or to work with innovative divisions within larger organizations. The program combines classroom study with case analysis to provide students with the knowledge and skills necessary for success.

Family Business Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 290)

Family businesses are the dominant form of economic organization within the state of Oregon and the Pacific Northwest. It is vital to understand the dynamics within a family business to arm family members and non-family consultants and executives with the knowledge they need to help the family firm succeed.

The curriculum of the Family Business option is intended to prepare students for leadership positions within a family firm. With a focus on entrepreneurship, it offers students the opportunity to develop their entrepreneurial talents while providing a solid foundation on the risks and challenges facing a family firm, including finances, legal issues, marketing and succession planning. The curriculum will prepare future family business leaders to balance the well-being of the business, the family, and individuals, as they address the challenges and opportunities which inevitably arise, day to day and during succession.

The Family Business option requires a total of 24 credits beyond the undergraduate business core.

Total Hours 24

Option Code: 201

Hospitality Management Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 290)

Available only at OSU-Cascades Campus and via Ecampus.

Course work within the Hospitality Management Option is aimed at developing the students’ knowledge of strategic thinking and its application to the hospitality industry. We define the hospitality industry as including all organizations that provide overnight accommodations and/or food service, to include hotels, destination resorts, hospitals, residence halls, cruise ships, etc.

The proposed courses were selected based on research on workforce development needs, feedback from industry partners/advisors and how these courses would compliment the existing business major curriculum. Input from prospective and existing students in the Hospitality Management Degree was also considered. Specifically, the decision to offer the option through Ecampus was primarily driven from this feedback.

Students graduating from the program are required to possess knowledge of forces in the hospitality industry's environment that drive change. Furthermore, they should be able to assess the impact of these forces on the hospitality industry, which will enable them to appreciate the cause and effect relationship between the forces that drive change and the firms within the industry. This, in essence, will provide students with the tools to be effective leaders in the hospitality industry.
International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 273)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business

Retail Management Option

This option is offered within the following major(s):

• Business Administration - College of Business (p. 290)

Offered via Ecampus only.

The Retail Management option covers management and marketing strategies for the retail industry. The program includes all the steps required to bring the customers into the store and fulfill their buying needs. A retail store manager is responsible for ensuring that a store operates efficiently and profitably and that its employees perform adequately. They are responsible for a store’s sales and employee schedule, resolving problems that arise in the store and coordinating a store’s activities.

All courses in the Retail Management option are offered via Ecampus.

Supply Chain and Logistics Management Option

This option is offered within the following major(s):

• Business Administration - College of Business (p. 290)

Also available via Ecampus.

The Supply Chain and Logistics Management (SCLM) option, within the Business Administration (BA) undergraduate major, offers students an alternative focus that includes acquiring a solid mastery of international operations and supply chain and logistics management concepts and methods.

This undergraduate option prepares graduates for operations, logistics, procurement and supply chain management in the service and manufacturing industries. In the past two decades, the loss of manufacturing jobs in the U.S. triggered attrition of innovation capabilities across many sectors of the economy contributing to the current anemic economic recovery. The U.S. needs a professionally-trained workforce that is able to manage internal operations and global supply chains in the manufacturing and service sectors and in government agencies. Well-trained operations and supply chain managers are also needed in global companies that operate outside the U.S., including companies that operate in the Asia-Pacific Rim.

Entry Requirements: Admission to professional-school for this option requires earning a 2.50 cumulative GPA in pre-business course work and all pre-business course work either completed with a grade of C– or better or registered to complete.

The Supply Chain and Logistics Management option requires a total of 24 credits beyond the undergraduate business core.

Business Analytics Graduate Certificate

Available on Corvallis campus and via Ecampus.

Today’s organizations—businesses, corporations, nonprofits and others—want to better utilize available information in operational, tactical, and strategic decision making. The information value of both in-house and third party data sets can now be leveraged using powerful emerging technologies. Increasingly organizations leverage advances in software interoperability, data exchange mechanisms and data mining.
and visualization techniques to better understand their operations, customers, and markets. This trend has become known as ‘data mining,’ ‘business analytics,’ ‘business intelligence’ or, nowadays, ‘big data.’

This certificate is targeted at three types of professionals:

- Managers seeking to expand the use of data analytics within their organizations.
- Information systems professionals charged with marshaling available organizational data for analytical processes.
- Business analytics professionals performing data analysis to support decision making, strategy formation, and operational improvement.

**Business and Entrepreneurship Minor**

*Also available at OSU-Cascades and via Ecampus.*

The Business and Entrepreneurship minor teaches students to recognize business opportunities, equips them with skills to secure funding, and provides insight on how to manage the commercialization of the business opportunity. Fundamental business classes are combined with those designed to specifically address the challenges of launching a new venture or an idea within an existing organization. With an innovative curriculum taught by dedicated professors, the Business and Entrepreneurship minor provides a fundamental stepping stone on the road to identifying and commercializing business opportunities in any type of organization.

Interested students must view an online orientation, http://business.oregonstate.edu/advising/business-entrepreneurship-minor and meet requirements stated therein before they can declare the minor.

**Total Hours**: 31-36

**Note**: Registration access to these substitutes is generally not allowed for minors. However, some students may have access to them via Honors College or previous status as a business major.

To earn the minor upon graduation, students must meet all of the following:

- Earn a minimum of C– in each of their minor courses (all courses must be taken A–F grading)
- Complete over 50 percent of their minor with OSU credits
- Have minimum 2.5 GPA (OSU grades) in all required minor course work

For further information, please contact the Office of Student Services, Austin Hall 122, 541-737-3716.

**Minor Code**: 574

**Business Fundamentals Graduate Certificate**

The BFGC program provides a means for individuals with undergraduate degrees in fields other than business to gain exposure to, and understanding of, basic functional business skills. Skills acquired in this program can expand performance and career opportunities in both non-profit and for-profit organizations. The curriculum can be completed in as little as one summer, or on a part time basis.

Business Information Systems Undergraduate Major (BA, BS, HBA, HBS)

The Business Information Systems (BIS) curriculum teaches you to harness technology to help organizations achieve a competitive advantage in today’s rapidly changing environment.

You will gain a firm foundation in business administration and learn to analyze, develop and manage information systems. Depending on your skills and interests you might become a business process analyst, IT project manager, application specialist, data modeler, systems analyst, software quality tester, developer or database administrator, or choose from other technology-oriented business careers.

You will not just learn theory. You have plenty of opportunities to build, troubleshoot, refine and manage information systems through targeted exercises in real-world projects. Projects sponsored by outside companies help you learn to bring together people, business processes, and information technology.

Business Information Systems (BIS) major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division BIS and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

**Second Year**

All students should complete the following courses:

#### BA 280
- **Business Insights**
  (Transfer students only)

#### BA 281
- **Professional Development**
  3

#### BA 282
- **Personal, Professional and Leadership Development**
  1

#### BA 283
- **Personal, Professional and Leadership Development**
  1

#### BA 284
- **Personal, Professional and Leadership Development**
  1

- Students who transfer from another college or university into the business information systems major who have completed all lower-division business core course work should complete the following course:

#### BA 381
- **Personal and Professional Development**

All second-year students should also complete:

- **BA 211**
  - **Financial Accounting**
  - **Managerial Accounting**

**Third Year**

All students should complete the following courses:

#### ACTG 378
- **Accounting Information Management**

#### BA 272
- **Business Application Development**

#### BA 311
- **Third-Year Personal Professional Leadership Development I**

#### BA 312
- **Third-Year Personal Professional Leadership Development II**

#### BA 313
- **Third-Year Personal Professional Leadership Development III**

#### BA 347
- **International Business**

#### BA 352
- **Managing Individual and Team Performance**

#### BA 357
- **Operations Management**

#### BA 354
- **Managing Ethics and Corporate Social Responsibility**

#### BA 371
- **Business Data Management**

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean's Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

### Option Code: 754

**International Business Option**

This option is offered within the following major(s):

- Accountancy - College of Business (p. 273)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business
Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Select a minimum of 18 credits of business or business related course work.

Total Hours: 24

1. Completed on an approved international exchange or study abroad program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

Option Code: 190

Design and Innovation Management Undergraduate Major (BS, HBS)

This degree allows students to tailor their Design and Innovation Management major to meet their career needs; students will choose one of three options available under the major:

1. Apparel Design,
2. Interior Design
3. Design Management.

Within the Design and Innovation Management major, we have completed a curricular redesign of our Apparel Design option. With an emphasis on outdoor and performance wear, and an integration of business principles, graduates are well poised to enter the apparel industry that dominates the Pacific Northwest. All students will follow the common design core designed to be completed in two years and provides a comprehensive foundation of design concepts.

The Design and Innovation Management major requirements are divided into two parts—lower-division and upper-division. The lower-division design core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division design curricula. The lower-division design core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Admission to the studio design options is competitive and is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each studio option may be limited to the number of students who can be served by the faculty and facilities of that option. Therefore students should strive to meet the minimum eligibility standards of their particular option of choice as well as those of the College of Business itself.

To apply and be considered for admission, all students seeking admission to a studio option must meet the following requirements:

- Be declared as a Design and Innovation Management major.
- Have a minimum OSU cumulative GPA of 2.5, and a minimum cumulative GPA of 2.5 in all lower-division Design and Innovation Management course work.
- Have completed and received a C– or better in ALL courses within the lower-division design core and option specific course work by the end of spring term before applying.

Students who have completed their lower-division design courses at a college or university other than OSU must be admitted to the design and innovation management major their first term and apply to the studio options during the normal selection process (typically at the end of spring term each year).

Admission into the studio options requires completion of DSGN 226, Specification Buying (for apparel design) or DSGN 287, Studio I: Design Communication (for interior design), and submission of a portfolio. The portfolio will expect students to submit work that demonstrates competency in fundamental design skills and concepts.

The following courses are recommended for students who need to further develop those design skills:

<table>

Design Program Requirements (180)

Design Core Curriculum (66-87)
The design core curriculum provides students with a broad overview of design thinking and processes.

Option (24-45)
Options are designed to allow students to extend their professional preparation beyond the introductory level in one or more areas. There are three options available to the Design and Innovation Management major:

1. Apparel Design (45 credits beyond design core)
2. Design Management (24 credits beyond design core)
3. Interior Design (35 credits beyond design core)

All options need to be started in the third year. See an academic advisor for more information.

University General Requirements 1

Unrestricted Electives 18-39

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests.

Minor (27) 2

The ART, COMM, ECON, MTH, and WR classes above meet the university’s baccalaureate core requirements for Mathematics, Social Processes and Institutions, Writing II, Speech, Western Culture, Literature and Arts, and Science, Technology and Society. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU.)

2 Students are encouraged to choose a university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

Design and Innovation Management

Total credits required for graduation is 180.

### Apparel Design Option

This option is offered within the following major(s):

- Design and Innovation Management - College of Business (p. 304)

The apparel design program focuses on market and consumer driven design. The program is designed to prepare students to be professionally ready for jobs in the athletic and outdoor industry. Graduates of the program will be literate in the business of fashion, design, production and marketing.

After completing the lower-division design core, students apply for acceptance into the Apparel Design option.

Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (https://catalog.oregonstate.edu/college-departments/business/accountancy-bs-hbs)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Design and Innovation Management - College of Business (p. 304)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean's Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

Option Code: 780

Design Management Option

This option is offered within the following major(s):

- Design and Innovation Management - College of Business (p. 304)

The Design Management option instructs students on how to develop innovation-driven design strategies to implement into brand and service/product development strategies. This option unites the perspectives of design and integrative thinking, sustainability, entrepreneurship, and management.

Family Business Minor

Family businesses are the dominant form of economic organization within the state of Oregon and the Pacific Northwest. It is vital to understand the dynamics within a family business to arm family members and non-family consultants and executives with the knowledge they need to help the family firm succeed.

The Family Business minor is intended to prepare students for leadership positions within a family firm. With a focus on entrepreneurship, it offers students the opportunity to develop their entrepreneurial talents while providing a solid foundation on the risks and challenges facing a family firm, including finances, legal issues, marketing and succession planning. The curriculum will prepare future family business leaders to balance the well-being of the business, the family and individuals, as they address the challenges and opportunities which inevitably arise, day to day and during succession.

To earn the minor upon graduation, students must meet all of the following:

- Earn a minimum of C– in each of their minor courses (all courses must be taken A–F grading)
- Complete over 50 percent of their minor with OSU credits
- Have minimum 2.5 GPA (OSU grades) in all required minor course work

Entrepreneurship Minor

The Entrepreneurship minor teaches you to recognize business opportunities, equips you with skills to secure funding, and provides insight on how to manage the commercialization of the business opportunity. Fundamental business classes are combined with those designed to specifically address the challenges of launching a new venture or an idea within an existing organization. With an innovative curriculum taught by dedicated professors, the Entrepreneurship minor provides a fundamental stepping-stone on the road to identifying and commercializing business opportunities in any type of organization.

Entrepreneurship and Innovation Management Graduate Minor

The graduate minor in Entrepreneurship and Innovation Management emphasizes innovation, technology commercialization, and entrepreneurship to prepare graduate students to create research-driven, investor-ready lean canvas business models and plans to take an innovative idea to market.

Only non-COB graduate students are eligible to complete the Entrepreneurship and Innovation Management graduate minor.

The Entrepreneurship and Innovation Management graduate minor requires 15 credits of course work for Master's programs and 18 credits of course work for Doctoral programs.

**Total Hours**: 15

*Doctoral students* take one additional graduate course from the College of Business as an elective (3 credits).

### Minor Code: 2066

Finance Minor

The College of Business Finance Minor allows students to expand their field of study and specialize within a quantitative and applied business discipline. The minor is best-suited for students with either a current quantitative major, or a strong interest in working with numbers. Within the minor students may pursue either a general finance, corporate finance, or investment specialization. The minor will offer potential opportunities for students who wish to leverage their existing major and distinguish themselves for employment within many business settings, including a corporation, non-profit, or start-up.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Financial managers engage in many activities designed to ensure the efficient use of an individual's or organization's capital resources. The finance field involves the management of funds in our economic system. Because financial managers deal with other people's money, finance is a career choice for individuals who enjoy working with people and who desire challenging assignments.

The BS/BA in finance has been accepted into the Chartered Financial Analyst® (CFA) Institute University Recognition Program (http://www.cfainstitute.org/community/university/Pages/recognition_program_for_universities.aspx). This status is granted to institutions whose degree program or programs incorporate at least 70 percent of the CFA Program Candidate Body of Knowledge (CBOK), which provides students with a solid grounding in the CBOK and positions them well for the CFA exams.

Finance major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division finance and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

---

### Finance Undergraduate Major (BA, BS, HBA, HBS)

The goal of the finance program at OSU is to prepare students for careers in institutional finance, which includes careers in banking, brokerage, insurance and other fields.

Individuals entering a career with a financial institution have many opportunities open to them. Many who go into banking select career paths in either operations or lending. Within the lending area, finance majors can specialize in installment credit lending to consumers of durable goods, mortgage lending to home builders and buyers, or commercial lending to help finance the growth of businesses.

Men and women entering the securities industry find careers as stock and bond brokers, security analysts or portfolio managers. Individuals choosing the area of insurance typically enter company operations through either claims or underwriting positions. Those with sales positions can choose to work either with corporations or individuals as a client base. In addition, many decide to work for the government as finance personnel in charge of revenue and expenditure programs.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Dean's Academy Option**

This option is offered within the following major(s):

- Accountancy - College of Business (https://catalog.oregonstate.edu/college-departments/business/accountancy-bs-hbs)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Design and Innovation Management - College of Business (p. 304)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
To earn the Dean’s Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 273)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Hospitality Management
Undergraduate Major (BA, BS)

The undergraduate curriculum in hospitality management provides students with the knowledge necessary to become leaders, executives and owners in the hospitality industry. The course work provides students with skills in service, operations management, hospitality technology, food and beverage operations as well as basic business fundamentals in marketing and accounting.

Major Code: 291
Innovation Management Undergraduate Major (BA, BS, HBA, HBS)

The Innovation Management major is a double-degree program. It can only be added to a primary OSU non-business major. See Academic Regulation 26a (https://catalog.oregonstate.edu/regulations).

Graduates of the IMDD program will gain expertise in developing new ideas and inventions and learn how to take these ideas through the innovation and commercialization process. The intent is to build upon the "technical" skills developed by students in their primary major while giving them the tools to become more productive and innovative members of the organizations where they will work. It will provide students with a foundation in business basics, such as marketing and accounting, while also building students' expertise in the innovation and commercialization process.

This major is limited to 45 qualified students per year. Interested students should consult with the College of Business Advising Office, Austin Hall 122, 541-737-3716, for more detail about the declaration requirements and process.

A College of Business GPA of 2.50 (OSU grades only) and a minimum grade of C– or above is required in all completed BA course work that is relevant to the degree program. Students may not S/U courses in this major.

A College of Business GPA of 3.00 (OSU grades only) and a minimum grade of C– or above is required in all completed BA course work that is relevant to the degree program. Students may not S/U courses in this major.

Students obtain a solid grounding in the management of systems, personnel, and quality. The integrative focus of the program also provides excellent preparation for graduate-level studies in law, urban and regional planning, public services administration, and health care administration.

Management is the process of planning, organizing, leading and controlling all that encompasses human, material and financial resources in an organizational environment. A management degree means that you have learned the concepts of getting things done through others within organizations.

Management major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division finance and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

### Code | Title | Hours
---|---|---
BA 215 | **FUNDAMENTALS OF ACCOUNTING** | 4
BA 260 | **INTRODUCTION TO ENTREPRENEURSHIP** | 4

**Total credits required for graduation** | **180**

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)

Management Undergraduate Major (BA, BS, HBA, HBS)

The management curriculum helps prepare students for careers as managers and supervisors in goods-producing and service enterprises.
Experiential Learning should be aligned with the career goals of the student. Select one of the following experiential activities:

- Professional internship: Complete BA 410 BUSINESS INTERNSHIP with minimum of 4 credits
- Research project: Complete BA 403 THESIS or BA 405 READING AND CONFERENCE; or BA 407 SEMINAR with minimum of 4 credits
- International experience: Complete an international study abroad or exchange that transfers a minimum of 4 academic credits to OSU.
- Mentoring: Complete the Introduction to Mentoring and Coaching Seminar series (minimum of 4 credits). This series requires participation in mentor activities.
- Experiential learning/entrepreneurship (solving specific problems of local businesses or non-profit organizations): Complete BA 406 PROJECTS with a minimum of 4 credits.

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean's Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H B-ENGAGED). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

**Option Code: 754**

### International Business Option

**This option is offered within the following major(s):**

- Accountancy - College of Business (p. 273)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as...

---

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Students must earn this option with one term of study abroad through an approved international exchange or study abroad program. Courses in these programs are taught in English.

Option Code: 190

Marketing Minor

The Marketing minor provides students with marketing skills and leadership training. Opportunities exist for individuals with marketing skills in a wide variety of positions and career options, including advertising and communications, brand management, market research, sales, retail management, purchasing management and more.

Marketing is the process of "creating, communicating, delivering, and exchanging offerings that have value for customers, clients, partners, and society at large" (American Marketing Association). Marketing consists of a sequence of activities: identifying customer needs, developing goods and services to satisfy those needs, communicating information about products, services, or ideas to potential customers, and distributing to products customers.

Marketing Undergraduate Major (BA, BS, HBA, HBS)

The marketing curriculum provides students with technical marketing skills and leadership training. Opportunities exist for marketing graduates in a wide variety of organizations, including manufacturing firms, service firms, retailers, wholesalers, advertising agencies, the communications media and government agencies. Career options (http://business.oregonstate.edu/marketing/marketing-career-options) include sales, advertising, retailing, brand management, logistics management, market research, purchasing management and more.

The heart of marketing is matching supply and demand in a complex, advanced economy. Marketing consists of a sequence of activities: identifying customer needs, developing goods and services to satisfy those needs, communicating information about products to potential customers, and distributing the products to customers. In small firms, a few people must carry out all the marketing functions or activities. Large corporations, on the other hand, tend to hire people with specific potential or skills to fill more specialized job requirements.

Marketing major requirements are divided into two parts — lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division finance and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Business Administration Core Curriculum

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior,
marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

### Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (https://catalog.oregonstate.edu/college-departments/business/accountancy-bs-hbs)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Design and Innovation Management - College of Business (p. 304)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)
The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean's Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H B-ENGAGED). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

**Option Code: 754**

### International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 273)
- Business Administration - College of Business (p. 290)
- Business Information Systems - College of Business (p. 299)
- Finance - College of Business (p. 313)
- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

<table>
<thead>
<tr>

<tr>
<td>BA 348</td>
<td>INTERNATIONAL EXCHANGE ORIENTATION</td>
<td>1</td>
</tr>
<tr>
<td>BA 349</td>
<td>IMPACT OF CULTURE ON BUSINESS</td>
<td>1</td>
</tr>
</tbody>
</table>

Select a minimum of 18 credits of business or business related course work.

**Total Hours: 24**

1. Completed on an approved international exchange or study abroad program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

**Option Code: 190**

### Merchandising Management Minor

This program suspended per proposal 94292, July 13, 2015.

The Merchandising Management minor emphasizes the merchandising of textile products such as apparel, outdoor gear, and home furnishings.

The following are prerequisites for upper-division courses in the minor:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 215</td>
<td>FUNDAMENTALS OF ACCOUNTING (or equivalent)</td>
<td>4</td>

<td>4</td>
</tr>
</tbody>
</table>

Select a minimum of 8 credits of the following:
Merchandising Management Undergraduate Major (BS, HBS)

Students in the Merchandising Management program prepare for a variety of positions centered on researching, planning, and executing customer-right assortments of products and services. Graduates from this program can be found working for apparel, footwear, and hardline manufacturers as merchants who assist retailers in building product assortments, as product development coordinators who work with merchants and designers, as demand planners who predict what and how much needs to be produced for a given season, and as product creation support. They can also be found working for retailers as buyers and planners who work together to identify the right quantities and the right products to include in assortments, as merchants who work with buyers and design teams, as in-store merchandisers, and as store managers.

Merchandising Management major requirements are divided into two parts—lower-division and upper-division. The lower-division design core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division merchandising curricula. The lower-division design core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

**University General Requirements**

**Unrestricted Electives**

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests.

**Minor**

1. The ART, COMM, ECON, MTH, and WR classes above meet the university’s baccalaureate core requirements for Mathematics, Social Processes and Institutions, Writing II, Speech, Western Culture, Literature and Arts, and Science, Technology and Society. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU (p. 1743).)
2. Students are encouraged to choose a university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

---

1. 21 credits from lower-division merchandising management major satisfy University General Education Requirements

---

2. 7 credits from upper-division merchandising management major satisfy University General Education Requirements

- Management - College of Business (p. 320)
- Marketing - College of Business (p. 325)
- Merchandising Management - College of Business (p. 332)

The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean’s Academy option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Pre-admission directly into professional school and your desired business major and abbreviated professional school application.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

To earn the Dean’s Academy option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H B-ENGAGED). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

Professional Sales Minor

The Professional Sales minor provides students with skills necessary for success in a sales career, and more broadly, skills useful for building mutually beneficial professional relationships. The ability to sell—that is, the ability to effectively communicate the value of an idea, product, service, or person, and to create win-win situations—is vital to success in a wide variety of positions and career options, including for-profit industry, non-profit organizations, government, and more. Further, many high-level executives and organization leaders start their careers as salespeople and rise to the top of their professions by effectively using sales skills.

Professional selling is the process of initiating, developing, and enhancing customer relationships, and meeting needs by creating, communicating, and delivering value. It consists of a sequence of activities, including: prospecting for potential customers, gaining an understanding of customer needs, communicating the value of an offering as a means of satisfying those needs, earning commitment from a customer, and maintaining and enhancing long-term customer relationships.

School of Design and Human Environment

School of Design and Human Environment

The School of Design and Human Environment offers undergraduate instruction in the areas of apparel design, interiors/residential design, housing studies, and merchandising management. Advanced courses prepare students for positions in retailing of apparel and textile products, design and development of sewn products for manufacturers and retailers, housing design and policy, design of commercial and residential environments, and for graduate work leading to research and college and university teaching.

Graduate Studies

The school offers the MS, MA, MAIS, and PhD degrees. Areas of emphasis for the MS and MA degrees include cultural/historic aspects of the near environment, human behavior and the near environment, design in the near environment, merchandising management and textiles. Areas of
emphasis for the PhD degree include cultural/historic aspects of the near environment, design in the near environment, and human behavior and the near environment.

Pre-Professional Studies Admission Requirements

To be considered for admission to the professional majors of Apparel Design, Merchandising Management, and Interior Design (Interior Design option and Housing Studies option), a student must earn a minimum GPA and complete a list of designated courses. Application information is available in the College of Business Advising Office in Austin Hall 122, http://business.oregonstate.edu/advising.

Undergraduate Programs

Majors

- Apparel Design (p. 343)
- Design and Innovation Management (p. 304)
- Interior Design (p. 344) (renamed "Design and Innovation Management")

Graduate Programs

Major

- Design and Human Environment (MA, MAIS, MS, PhD) (p. 344)

Minor

- Design and Human Environment (p. 344)

Minjeong Kim, Associate Dean

Faculty

Professors Burns, Marks
Associate Professors Chen, Kim, Lee, Mullet, Pedersen, Read
Assistant Professor Tural
Senior Instructors Burnett, Egan
Instructors Cluver, Gallagher, Scranton, Vong

Design and Human Environment

DHE 160. DESIGN PERSPECTIVES. (4 Credits)
Overview of how design reflects and shapes social, cultural, and temporal values and contexts across many different areas of design specialization. Areas to be explored include design processes, principles, and problem solving.

DHE 161. DESIGN EXPLORATIONS. (4 Credits)
Introduction to principles and theories of design through iterative development and making of project work. Topics include basic design terminology, design principles, and materiality. Lec/studio.

Prerequisites: DHE 160 with C- or better

DHE 170. INTRODUCTION TO THE TEXTILE AND APPAREL INDUSTRY. (4 Credits)
Overview of industry sectors involved in the planning, creation, production, merchandising, distribution, and consumption of textile, apparel, and related products. Overview of various career options within the industry.

DHE 180. INTRODUCTION TO SINGLE FAMILY HOUSING. (3 Credits)
Critical examination of single family housing. Considers space planning fundamentals. Introduces construction principles and methods. Develops a working knowledge of methods used to communicate architectural ideas.

DHE 181. INTRODUCTION TO INTERIOR DESIGN. (3 Credits)
Introduction to the interior design profession including space planning fundamentals, design process, color, sustainability, and human-centered design.

DHE 187. INTRODUCTION TO DESIGN COMMUNICATION. (0-3 Credits)
Fundamentals of design communication including drafting, lettering, illustrative sketching, perspective, and orthographic projections. Lec/studio.

Prerequisites: DHE 180 with C- or better

DHE 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 227. APPAREL DESIGN AND PRODUCTION 1. (4 Credits)
Terminology, construction techniques and processes used to produce apparel. Development of production patterns and specifications with analysis of apparel construction related to equipment, cost, quality, end use and customer needs.

DHE 233. HISTORY OF CONTEMPORARY FASHION. (4 Credits)
Examination of fashion change in apparel from 1890 to the present. Recognition of style variations. Influence of socio-cultural factors.

Prerequisites: DHE 170 with C- or better
Equivalent to: DHE 463

DHE 242. INTRODUCTION TO SOFTGOODS MERCHANDISING. (4 Credits)
Overview of merchandising functions within the apparel industry, as well as how these functions interact with industry sectors involved in the planning, creation, production, distribution, and sale of apparel and related products. Wholesale and retail assortment planning. Basic merchandising mathematics. Excel skill development.

Equivalent to: DHE 271, DHE 276

DHE 262. HUMAN-CENTERED RESEARCH IN DESIGN AND MERCHANDISING. (4 Credits)
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context.

Prerequisites: DHE 161 with C- or better

DHE 263. HUMAN-CENTERED DESIGN THEORIES AND STRATEGIES. (4 Credits)
Overview of perception, semantics, and information design theories and strategies within a human-centered context.

DHE 270. *APPEARANCE, POWER AND SOCIETY. (4 Credits)
Survey of the cultural, sociological, psychological, economic, and aesthetic influences on appearance and power. (Bacc Core Course)

Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
DHE 271. INTRODUCTION TO RETAIL BUYING. (3 Credits)
Introduction to soft goods retailing with a focus on the role of the retail buyer. Fundamental retailing and merchandising concepts, sustainable and socially responsible decision-making related to retail buying, basic merchandising mathematics, and Excel skill development. Lec/lab. 
Equivalent to: DHE 242, DHE 276

DHE 276. INTRODUCTION TO MERCHANDISING MANAGEMENT. (4 Credits)
Overview of merchandising functions within the textile and apparel industry. Fundamental merchandising concepts. Merchandising mathematics related to pricing and re-pricing, the profit and loss statement, and performance evaluation. Excel skill development. Lec/lab. 
Prerequisites: DHE 170 with C- or better
Equivalent to: DHE 242, DHE 271, DSGN 276

DHE 281. DRAWING AND SKETCHING INTERIORS. (4 Credits)
Build technical drawing skills, observational and perspective drawing, as well as imagination and creativity. Working knowledge of visual methods for communicating design concepts and describing interior spaces. 
Prerequisites: DHE 280 with D- or better
Equivalent to: DSGN 281

DHE 283. BUILDING CONSTRUCTION AND MATERIALS. (3 Credits)
Introduction to the manufacture, characteristics and use of construction materials used in contract and residential construction, including environmentally friendly materials. 
Equivalent to: DSGN 383

DHE 287. STUDIO I: DESIGN COMMUNICATION. (4 Credits)
Design communication through electronic media: 2D and 3D visualizations and presentations of interior space. Lec/studio. 
Prerequisites: DHE 187 with C- or better
Equivalent to: DSGN 287

DHE 288. ENVIRONMENTAL BUILDING SYSTEMS. (3 Credits)
Lighting, heating, ventilating, air conditioning, and acoustical systems in residential and commercial buildings. Includes sustainable building principles. 
Prerequisites: DHE 283 with C- or better and DHE 287 [C-]

DHE 289. STUDIO II: RESIDENTIAL SPACE PLANNING. (4 Credits)
Utilization of space planning principles in the design of residences. Includes rendering, perspective drawing, graphic communication techniques, and model building. 
Prerequisites: DHE 287 with C- or better

DHE 299. SPECIAL TOPICS. (1-16 Credits) 
This course is repeatable for 16 credits.

DHE 300. FIELD EXPERIENCE ORIENTATION AND DEVELOPMENT. (1-2 Credits)
Exploration of career choices, goals, and field experience opportunities; preparation in planning, obtaining, and completing an internship. Graded P/N. Section 1: Apparel Design. Section 2: Interior Design and Housing Studies. Section 3: Merchandising Management. Section 4: Graphic Design. 
This course is repeatable for 3 credits.

DHE 310. FIELD EXPERIENCE. (1-12 Credits)
Integration and application of academic preparation in an on-the-job work situation with supervision by personnel at the participating site and university faculty. Application must be made prior to participation. Section 1: Merchandising Management (1-12) Section 2: Interior Design (1-12) Section 3: Apparel Design (1-12) Section 4: Graphic Design (1-12) 
Graded P/N. 
Prerequisites: DHE 245 with C- or better and DHE 277 [C-]
Equivalent to: DSGN 410
This course is repeatable for 16 credits.

DHE 321. ILLUSTRATION, PORTFOLIO, AND DESIGN DEVELOPMENT. (3 Credits)
Techniques in technical drawing, fashion illustration, and portfolio development; use of computer-aided design applications in the design of apparel. 
Prerequisites: DHE 245 with C- or better and DHE 277 (C-)

DHE 326. SEWN PRODUCT DEVELOPMENT. (5 Credits)
Materials, assembly process, quality factors, and costs in the development of sewn textile products; consideration of consumer product expectations and intended end-use. Lec/lab. 
Prerequisites: DHE 250 (may be taken concurrently) with C- or better or DHE 255 (may be taken concurrently) with C- or better
Equivalent to: DHE 476

DHE 327. APPAREL DESIGN AND PRODUCTION 2. (4 Credits)
Terminology, construction techniques and processes used to produce apparel. Development of production patterns and specifications. Development of original apparel designs. 
Prerequisites: DHE 227 with C- or better
Equivalent to: DSGN 327

DHE 328. COMPUTER-AIDED PATTERN DEVELOPMENT. (3 Credits)
Computer-aided flat pattern, grading and marker techniques using pattern development software. 
Equivalent to: DSGN 328

DHE 330. FASHION FORECASTING AND MARKET ANALYSIS. (4 Credits)
Forecasting and market analysis processes applied to fashion goods. (Writing Intensive Course) 
Attributes: CWIC – Core, Skills, WIC 
Prerequisites: DHE 233 with C- or better and WR 121 [C-] and WR 222 [C-]
Equivalent to: DHE 370, DSGN 330

DHE 334. FASHION HISTORY AND SOCIETY. (4 Credits)
The influence of society, culture, geography, fashion, and technology on the design and consumption of dress, Late Middle Ages to 1899. 
Prerequisites: DHE 330 with C- or better
Equivalent to: DHE 461

DHE 355. TEXTILE PERFORMANCE AND EVALUATION. (4 Credits)
Analysis and evaluation of textile materials and final products in relation to end use. Performance properties and serviceability testing, product specifications and industrial standards. Lec/lab. 
Prerequisites: DHE 255 with C- or better
Equivalent to: DHE 453, DSGN 355

DHE 360. COLLABORATIVE STUDIO. (4 Credits)
Examines a variety of collaborative methodologies and situations. Students will work across disciplines to solve complex collaborative projects. The projects will be both client based and hypothetical. Lec/ studio. 
Prerequisites: DHE 262 with C- or better and DHE 263 [C-]
DHE 366. CROSS CULTURAL ASPECTS OF THE NEAR ENVIRONMENT. (4 Credits)
Sociocultural study of the function and design of clothing, housing, interiors, and textiles. Cultural diversity; impact of cross-cultural contact; ethnicity.
Equivalent to: DHE 437

DHE 370. *TEXTILE AND APPAREL MARKET ANALYSIS. (4 Credits)
Organization, operation, and merchandising activities of the domestic textile and apparel industries. Analysis of the marketing process and the product/service mix of textile and apparel manufacturers. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: DHE 277 (may be taken concurrently) with C- or better
Equivalent to: DSGN 330, DSGN 330

DHE 376. RETAIL MERCHANISE PLANNING AND PRESENTATION. (4 Credits)
Organization, operation, and competitive strategies of soft goods retailers. Planning, procurement, and promotion of merchandise assortments and inventory management.
Prerequisites: DHE 276 with C- or better and BA 215 [C-]
Equivalent to: DSGN 472

DHE 387. STUDIO III: ADVANCED DESIGN COMMUNICATION. (4 Credits)
Development of illustrative sketching, perspective drawing, concept model construction, and presentation materials.
Prerequisites: DHE 289 with C- or better
Equivalent to: DSGN 387

DHE 389. STUDIO IV. KITCHEN AND BATH DESIGN. (4 Credits)
Kitchen and bath planning in compliance with building codes and industry standards, with emphasis on resource conservation, safety, and special needs. This course utilizes both CAD and hand drafting.
Prerequisites: DHE 387 with C- or better

DHE 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 403. THESIS. (1-16 Credits)
Equivalent to: DSGN 403
This course is repeatable for 16 credits.

DHE 406. PROJECTS. (1-16 Credits)
Equivalent to: DSGN 406
This course is repeatable for 16 credits.

DHE 427. DRAPING. (4 Credits)
Garment design based on manipulation of fabric on a body form; emphasis on the interrelationships between fabric, garment design, and the human form.
Prerequisites: DHE 321 with C- or better and DHE 327 [C-]
Equivalent to: DSGN 427

DHE 428. APPAREL PRODUCTION PROCESSES. (4 Credits)
Production pattern-making, pattern grading, marker making, garment specifications, and cost analysis. Apparel assembly processes; analysis of equipment capabilities and production processes.
Prerequisites: DHE 327 with C- or better
Equivalent to: DSGN 428

DHE 429. ADVANCED APPAREL DESIGN. (4 Credits)
Design processes and research methods used to develop apparel designs. Students will identify design problems and implement appropriate methods to develop apparel products.
Prerequisites: DHE 321 (may be taken concurrently) with C- or better and DHE 327 (may be taken concurrently) [C-] and DHE 427 (may be taken concurrently) [C-] and DHE 428 (may be taken concurrently) [C-]
Equivalent to: DSGN 429

DHE 437. CONSUMER BEHAVIOR AND CULTURE. (4 Credits)
Global and cultural consumer behavior, globalization and cross-cultural marketing related to soft goods merchandising and retailing.
Prerequisites: DHE 334 with C- or better
Equivalent to: DHE 366

DHE 443. STUDIO VI: COMMERCIAL DESIGN. (4 Credits)
Commercial design, space planning and specifications for facilities such as retail, hospitality, healthcare, public institutions and offices.
Prerequisites: DHE 389 with C- or better

DHE 445. STUDIO VII: ADVANCED COMMERCIAL DESIGN. (4 Credits)
Interior design project development with emphasis on design of hospitality environments. Application of knowledge of space planning, building codes, and specifications to projects. Studio work includes concept sketches, schematic drawings, contract documents, sample boards, and models.
Prerequisites: DHE 443 with C- or better

DHE 453. PRODUCT QUALITY ASSURANCE. (4 Credits)
Analysis and evaluation of textile materials and final products in relation to end use. Performance properties and serviceability testing, product specifications and industrial standards. Lec/lab.
Prerequisites: DHE 255 with C- or better
Equivalent to: DHE 355

DHE 461. HISTORY OF THE NEAR ENVIRONMENT I. (4 Credits)
History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the ancient world to the Renaissance. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence.
Equivalent to: DHE 334

DHE 462. *HISTORY OF THE NEAR ENVIRONMENT II. (4 Credits)
History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the Renaissance to 1899. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: DHE 334

DHE 463. HISTORY OF CONTEMPORARY FASHION. (4 Credits)
Historic analysis of fashion change in men's and women's apparel from 1899 to the present. The influence of social and cultural factors upon Euro-American fashion.
Equivalent to: DHE 233

DHE 464. CONTEMPORARY HISTORY OF INTERIORS AND HOUSING. (3 Credits)
History of housing and interior design from the mid-19th century until the present.
Prerequisites: DHE 461 with C- or better or DHE 462 with C- or better
Equivalent to: DSGN 464
DHE 470. RETAIL MERCHANDISING. (4 Credits)
Organization, operation, and competitive strategies of soft goods retailers. Planning, procurement, pricing, and promotion of merchandise assortments and inventory management.
Prerequisites: DHE 370 with C- or better

DHE 472. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles. Lec/rec.
Prerequisites: DHE 271 with C- or better and DHE 470 [C-] and (BA 215 [C-] or BA 215H [C-])
Equivalent to: DSGN 472

DHE 475. *GLOBAL SOURCING OF TEXTILES, APPAREL, AND FOOTWEAR. (4 Credits)
Trade theory and the effects of trade policy, cultural values, and economics on the global production, distribution, and consumption of textiles, apparel, and footwear. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: DSGN 475

DHE 476. LINE PLANNING AND PRODUCT DEVELOPMENT. (4 Credits)
Overview of the merchandising function within branded apparel companies and private label retailers.
Prerequisites: DHE 376 with C- or better
Equivalent to: DHE 326

DHE 481. *PROFESSIONAL PRACTICE IN HOUSING AND INTERIOR DESIGN. (3 Credits)
Ethical, business, and legal aspects of the design profession. Development of written documents, schedules, specifications, and other materials typical of the profession. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: DHE 389 with C- or better

DHE 488. STUDIO VI: HEALTHCARE DESIGN. (4 Credits)
Interior design project development with emphasis on healthcare design, contract documents, and building codes.
Prerequisites: DHE 394 with C- or better
Equivalent to: DSGN 488

DHE 490. STUDY TOUR. (1-6 Credits)
Planned study tour with specific professional focus.
This course is repeatable for 16 credits.

DHE 499. SPECIAL TOPICS IN DESIGN AND HUMAN ENVIRONMENT. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

DHE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 528. APPAREL PRODUCTION PROCESSES. (4 Credits)
Production pattern-making, pattern grading, marker making, garment specifications, and cost analysis. Apparel assembly processes; analysis of equipment capabilities and production processes.

DHE 529. ADVANCED APPAREL DESIGN. (4 Credits)
Design processes and research methods used to develop apparel designs. Students will identify design problems and implement appropriate methods to develop apparel products. Lec/studio.

DHE 561. HISTORY OF THE NEAR ENVIRONMENT I. (4 Credits)
History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the ancient world to the Renaissance. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence.

DHE 562. HISTORY OF THE NEAR ENVIRONMENT II. (4 Credits)
History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the Renaissance to 1899. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence.

DHE 563. HISTORY OF CONTEMPORARY FASHION. (4 Credits)
Historic analysis of fashion change in men’s and women’s apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion.

DHE 564. CONTEMPORARY HISTORY OF INTERIORS AND HOUSING. (3 Credits)
History of housing and interior design from the mid-19th century until the present.

DHE 566. RESEARCH IN THE CROSS CULTURAL ASPECTS OF THE NEAR ENVIRONMENT. (3 Credits)
Examines the research methods used to study the cultural aspects of the near environment. Case studies concerning cultural variation in the design and use of fabric, clothing and adornment, housing.

DHE 572. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DHE 570 (may be taken concurrently) with C or better

DHE 582. AESTHETIC AND PERCEPTUAL THEORIES OF THE NEAR ENVIRONMENT. (2 Credits)
Aesthetic aspects from the philosophical and theoretical bases formulated in art, art history, and psychology as applied to the near environment.

DHE 585. HUMAN BEHAVIOR AND THE NEAR ENVIRONMENT. (3 Credits)
Application of concepts and theories from cultural anthropology, sociology, psychology, and social psychology to the study of clothing and interiors. The significance of the near environment in the dynamics of social interaction.

DHE 594. RESEARCH METHODS IN DESIGN AND HUMAN ENVIRONMENT. (3 Credits)
Introduction to theory and research design in Design and Human Environment. Includes sampling, measurement, data collection (both qualitative and quantitative) and data analysis.
DHE 599. SPECIAL TOPICS IN DESIGN AND HUMAN ENVIRONMENT. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

DHE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 609. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 610. INTERNSHIP/WORK EXPERIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

DHE 690. THEORY DEVELOPMENT. (3 Credits)
Critical analysis of scientific explanation, research, theory, and paradigms. Focus on theory development, particularly within the area of the near environment.

Design

DSGN 121. COMPUTER AIDED DESIGN. (3 Credits)
Introduction to the Adobe Creative Suite: Illustrator and Photoshop. Instruction in drawing, image editing, flat illustrations and textile design. Lec/studio.

DSGN 226. SPECIFICATION BUYING. (4 Credits)
Introduction to terminology, assembly process, quality factors, and costs in the development of sewn product specifications. Lec/lab.

DSGN 244. COLOR INNOVATION. (4 Credits)
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Equivalent to: DSGN 244H

DSGN 244H. COLOR INNOVATION. (4 Credits)
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 244

DSGN 255. TEXTILES. (4 Credits)

DSGN 276. INTRODUCTION TO MERCHANDISING MANAGEMENT. (4 Credits)
Provides the introductory knowledge necessary to prepare students for working in the retail industry. Introduces students to the retail industry including basic terminology, industry history, and to merchandising management decisions. Prepares students for more advanced knowledge acquired in the Merchandising Management concentration.
Equivalent to: DHE 276

DSGN 271. DRAWING AND SKETCHING. (4 Credits)
Designed for both beginning drawers and those wanting to improve their skills. Focuses exclusively on hand drawing skills with an emphasis on technical drawing skills, observational and perspective drawing, as well as imagination and creativity. Students develop a working knowledge of visual methods for communicating design concepts. Class format includes a combination of quick drawing activities, demonstrations, lectures, critiques, and work time on drawing assignments. Throughout the term students are introduced to the drawings of several prominent designers and artists.
Equivalent to: DHE 271

DSGN 281. PERSONAL, PROFESSIONAL, AND LEADERSHIP DEVELOPMENT I. (1 Credit)

DSGN 282. PERSONAL, PROFESSIONAL, AND LEADERSHIP DEVELOPMENT II. (1 Credit)

DSGN 283. PERSONAL, PROFESSIONAL, AND LEADERSHIP DEVELOPMENT III. (1 Credit)

DSGN 284. PERSONAL, PROFESSIONAL, AND LEADERSHIP DEVELOPMENT IV. (1 Credit)

DSGN 285. PERSONAL, PROFESSIONAL, AND LEADERSHIP DEVELOPMENT V. (1 Credit)

DSGN 286. PERSONAL, PROFESSIONAL, AND LEADERSHIP DEVELOPMENT VI. (1 Credit)

DSGN 287. STUDIO I: DESIGN COMMUNICATION. (4 Credits)
Focuses on design communication through electronic media. Students use AutoCAD, SketchUp, and the Adobe Creative Cloud to create 2D and 3D visualizations and presentations of interiors. Lec/studio.
Equivalent to: DHE 287

DSGN 327. PERFORMANCE APPAREL INNOVATION I. (4 Credits)
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisites: DSGN 226 with C- or better
Equivalent to: DHE 327
DSGN 328. DIGITAL DESIGN FOR APPAREL. (3 Credits)
Computer-aided flat pattern, grading and marker techniques using industry relevant pattern development software.
Prerequisites: DSGN 327 with C- or better
Equivalent to: DHE 328

DSGN 329. SPORTSWEAR INDUSTRY COLLABORATION. (3 Credits)
Industry lead team project. Creation of briefs, sketch, pattern, design textile prints, construct prototypes based on identified consumer and company.
Prerequisites: DSGN 327 with C- or better

DSGN 330. *FASHION FORECASTING AND MARKET ANALYSIS. (4 Credits)
Forecasting and market analysis processes applied to fashion goods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: WR 222 with C- or better or WR 323 with C- or better or WR 327 with C- or better

DSGN 333. HISTORY OF CONTEMPORARY FASHION. (4 Credits)
Historic analysis of fashion change in men's and women's apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion.
Equivalent to: DHE 233, DHE 463

DSGN 335. APPAREL AND FOOTWEAR VALUE CHAIN. (3 Credits)
Survey of the structure, functions, and current trends within the apparel and footwear value chain.

DSGN 341. DESIGN THINKING AND PROCESS INNOVATION. (4 Credits)
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Equivalent to: DSGN 341H

DSGN 341H. DESIGN THINKING AND PROCESS INNOVATION. (4 Credits)
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 341

DSGN 342. INTRODUCTION TO DESIGN MANAGEMENT. (4 Credits)
Introduces the foundations and concepts of design strategy and creative development.
Prerequisites: DSGN 341 with C- or better

DSGN 343. IDEA VISUALIZATION. (4 Credits)
Focuses on the design process through visual communication of ideation and sketching.
Prerequisites: DSGN 342 with C- or better

DSGN 352. TEXTILES FOR INTERIORS. (4 Credits)
Types, qualities, and maintenance of functional and decorative fabrics for homes and public buildings. Use of specifications, standards, and legislation.
Prerequisites: DSGN 255 with C- or better or DHE 255 with C- or better

DSGN 355. SPECIFICATION AND EVALUATION OF PERFORMANCE MATERIALS. (4 Credits)
Specification of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance. Lec/lab.
Prerequisites: DSGN 255 with C- or better and DSGN 327 [C-]
Equivalent to: DHE 355

DSGN 356. SPECIFICATION AND EVALUATION OF PERFORMANCE MATERIALS. (3 Credits)
Specification of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisites: DSGN 255 with C- or better

DSGN 357. EVALUATION OF PERFORMANCE MATERIALS LABORATORY. (1 Credit)
Evaluation of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisites: DSGN 255 with C- or better and DSGN 327 [C-]
Corequisites: DSGN 356

DSGN 357. EVALUATION OF PERFORMANCE MATERIALS LABORATORY. (1 Credit)
Evaluation of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisites: DSGN 255 with C- or better and DSGN 327 [C-]
Corequisites: DSGN 356

DSGN 357. EVALUATION OF PERFORMANCE MATERIALS LABORATORY. (1 Credit)
Evaluation of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisites: DSGN 255 with C- or better and DSGN 327 [C-]
Corequisites: DSGN 356

DSGN 362. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 363. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 365. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 367. RETAIL AND MERCHANDISING. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 368. RETAIL AND MERCHANDISING. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 369. RETAIL AND MERCHANDISING. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 370. RETAIL AND MERCHANDISING. (4 Credits)
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisites: DSGN 276 with C or better

DSGN 372. MERCHANDISE PLANNING AND CONTROL. (4 Credits)
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.

### Apparel Design Undergraduate Major (BS, HBS)

We are excited to announce that the curricular redesign of our apparel design degree program is complete. With an emphasis on outdoor and performance wear, graduates are well poised to enter the apparel industry that dominates the pacific northwest. Students interested in apparel design should see the Design and Innovation Management major (p. 304) to view the degree requirements. Apparel Design is an option within this major.

Interior Design Undergraduate Major (BS, HBS)

Renamed "Design and Innovation Management" per proposal #100333 (https://secure.oregonstate.edu/ap/cps/proposals/view/100333). The Interior Design major (458) will be terminated via proposal.

The Interior Design major is a professional program. Entering students are designated as Pre-Interior Design majors (major code 454).

Design major requirements are divided into two parts. The first part (the pre-design major), usually taken in the first two years, must be completed before formal admission into the major. The second part (Professional School) is usually taken in the last two years after formal admission into the Design major.

2 8 credits from design major satisfy University General Education Requirements

Design Curriculum

The Design major is a professional program offered through the College of Business.
Pre-Design Program

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate design degree program offered by the College of Business (COB) are designated as pre-design majors. The pre-design program requires completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division design curricula. These courses must be completed before the student is eligible for admission to the professional design program. The pre-design course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Professional Design Program

Admission to the professional design program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic option may be limited to the number of students who can be served by the faculty and facilities of that option. Therefore students should strive to meet the minimum eligibility standards of their particular option of choice as well as those of the College of Business itself. Additional information on the pre-school process and current competitive GPA levels for each option can be found on the Pre-School Competitive GPA section of the College of Business Advising website.

To apply and be considered for admission, all pre-professional students must meet the following requirements:

- Be declared as a Pre-Design major.
- Have a minimum OSU cumulative GPA of 2.5, and a minimum cumulative GPA of 2.5 in all Pre-Design course work.
- Have completed and received a C– or better in ALL courses within the Pre-Design major by the end of spring term before applying.

Students who have completed their pre-design courses at a college or university other than OSU must be admitted to pre-design their first term and apply for the professional program during their first term of attendance.

Admission into the Interior Design option requires completion of DSGN 287 STUDIO I: DESIGN COMMUNICATION and submission of a portfolio. The portfolio will expect students to submit work that demonstrates competency in both two-dimensional and three-dimensional design. The following courses are recommended for students who need to further develop those skills:

<table>

Written and Oral Communication

- Select one of the following: 3
  - COMM 111  *PUBLIC SPEAKING
  - COMM 114  *ARGUMENT AND CRITICAL DISCOURSE
  - COMM 218  *INTERPERSONAL COMMUNICATION

- Select one of the following: 3
  - WR 222  *ENGLISH COMPOSITION
  - WR 323  *ENGLISH COMPOSITION
  - WR 327  *TECHNICAL WRITING

Unrestricted Electives

Select 32-35 credits 2

| Minor选 27 credits 3 | 27 |

1 Options are designed to allow students to extend their professional preparation beyond the introductory level in one or more areas. All options need to be started in the third year. See academic advisor for more information.

2 Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests.

3 Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

* Baccalaureate Core Course (BCC)
  The ART, COMM, ECON, MTH, and WR classes above meet the university’s baccalaureate core requirements for Mathematics, Social Processes and Institutions, Writing II, Speech, Western Culture, Literature and Arts, and Science, Technology and Society. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU [http://catalog.oregonstate.edu/ChapterDetail.aspx?key=6].)

Pre-Interior Design

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate design degree program offered by the College of Business (COB) are designated as pre-design majors. The pre-design program requires completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division design curricula. These courses must be completed before the student is eligible for admission to the professional design program. The pre-design course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

First Year

Students entering OSU on the Corvallis campus as their first college experience are required to participate in Innovation Nation, the College of Business Living-Learning Community (LLC). These students will complete a three-course sequence during their first year.

Students who transfer to OSU from another academic institution will complete BA 101 BUSINESS NOW and BA 170 BUSINESS INSIGHTS

All other students, including students completing their degree via OSU Ecampus and current OSU students who are changing their major to design, will complete BA 101 BUSINESS NOW

Course | Title | Hours
--- | --- | ---
First Year |  | 
Select one of the following options: | 6-9
Option 1: First time students |  | 
BA 160 | ENGAGED | 
BA 161 | NATION—AWARENESS! TO ACTION | 
BA 162 | NATION—IDEAS TO REALITY | 
Option 2: Transfer students |  | 
BA 101 | BUSINESS NOW | 
BA 170 | BUSINESS INSIGHTS | 
Option 3: All other students |  | 
BA 101 | BUSINESS NOW |
ART 101 *INTRODUCTION TO THE VISUAL ARTS 3

Select one of the following: 3

COMM 111 *PUBLIC SPEAKING
COMM 114 *ARGUMENT AND CRITICAL DISCOURSE
COMM 218 *INTERPERSONAL COMMUNICATION

MTH 111 *COLLEGE ALGEBRA 4

WR 121 *ENGLISH COMPOSITION 3

General Baccalaureate Core courses 17
Electives 1 5-8

Hours 41-47

Second Year

Select one of the following: 3

ART 206 *INTRODUCTION TO WESTERN ART: NEOCLASSICISM TO CONTEMPORARY
ART 205 *INTRODUCTION TO WESTERN ART: GOTHIC TO BAROQUE
ART 204 *INTRODUCTION TO WESTERN ART: PREHISTORY TO THE HIGH MIDDLE AGES

BA 215 FUNDAMENTALS OF ACCOUNTING 4
BA 253 PROFESSIONAL DEVELOPMENT 4
DHE 221 DRAWING AND SKETCHING INTERIORS 3
DHE 281 4

DSGN 244 COLOR INNOVATION 4
DSGN 255 TEXTILES 4
ECON 201 *INTRODUCTION TO MICROECONOMICS 4
ST 201 PRINCIPLES OF STATISTICS 4

Select one of the following: 3

WR 222 *ENGLISH COMPOSITION

WR 323 *ENGLISH COMPOSITION
WR 327 *TECHNICAL WRITING

Baccalaureate core, minor courses, or unrestricted electives 8

Students interested in Interior Design select the following:

DHE 287 STUDY I: DESIGN COMMUNICATION

Hours 45
Total Hours 86-92

Students entering design programs should have basic art and illustration skills. ART 115 2-D CORE STUDIO and ART 117 3-D CORE STUDIO are highly recommended elective courses.

* Baccalaureate Core Course (BCC)

Pre-Interior Design Major Code: 454

Supply Chain and Logistics Management Graduate Certificate

The SCLM certificate program provides a means for individuals to acquire a solid mastery of international operations and supply chain and logistics management concepts and methods. This graduate certificate prepares individual for operations, logistics and supply chain management in the service and manufacturing industries. In the past two decades, the loss of manufacturing jobs in the U.S. triggered attrition of innovation capabilities across many sectors of the economy contributing to the current anemic economic recovery. The U.S. needs a professionally-trained workforce that is able to manage internal operations and global supply chains in the manufacturing and service sectors and in government agencies. Well trained operations and supply chain managers are also needed in global companies that operate outside the U.S., including companies that operate in the Asia-Pacific Rim.

College of Earth, Ocean, and Atmospheric Sciences (CEOAS)

The College of Earth, Ocean, and Atmospheric Sciences (CEOAS) has a three-fold mission: to pursue basic and applied research; educate and train undergraduate and graduate students; and to extend information to society about Earth, oceans and atmosphere, including their interactions and the interrelationships with humans and ecosystems.

The college prepares students for professional careers and enables faculty to seek out new ideas and innovative approaches to the complex issues of planetary-scale science.

Please see http://ceoas.oregonstate.edu/ for more information about the college.

History

In 2011, the College of Earth, Ocean, and Atmospheric Sciences was created by the merger of the College of Oceanic and Atmospheric Sciences (COAS), the Department of Geosciences and the Environmental Sciences Undergraduate Program in the College of Science. The college is at the heart of a new research and education enterprise organized around the interdisciplinary sciences of the Earth, ocean, and atmosphere. It spans the natural science disciplines and creates strong linkages with the social sciences both within the college as well as around the university.

The college is Oregon’s principal source of expert knowledge about the Earth, ocean, and the atmosphere, especially in the Pacific Northwest region, which has long been the focus of major research efforts by OSU researchers. It conducts the only comprehensive oceanographic and atmospheric research programs in Oregon, as well as major programs in geology, geography, and geospatial studies. Today, research activities of the college extend throughout the world and to all oceans. Its graduates hold professional and leadership positions in science, resource management, education, regulatory agencies, and the private sector in the United States and internationally.

The new college has celebrated 100 years of excellence in the Geology program while establishing new degree options in ocean and climate science. The college has diversified and increased general education courses and offers certificates in geospatial studies and water conflict management and transformation. The college fosters experiential learning through labs, field, and shipboard experiences.

Faculty

Professors Barnes, Barth, Becker, Benoit-Bird, Bloomer, Brook, Campana, Cianelli, Clark, Colwell, Conway, Crump, Davis, de Silva, Dever, Dilles, Egbert, Goldfinger, Goñi, Graham, Haggerty, Hales, Haller, Harris, Harte, Jones, Kent, Koppers, Kosro, Letelier, Lyle, Matano, Marinelli, Meigs, Mellinger, Mix, Mote, Moum, Nabelek, Nash, Nielsen, Nolin, Noone, Özkhan-Haller, Reimers, Samelson, Schultz, Skyllingstad, Smyth, Spitz, Torres, Trehu, Wheatcroft, Wolf

Associate Professors Carlson, Corcoran, de Szeoke, Gosnell, Haley, Kirby, Kurapov, Lancaster, Lerczak, Matsumoto, Ruggiero, Santelmann, Schmittner, Shearman, Shell, Stoner, Tepley, Tufillaro, Waldbusser, White

Assistant Professors Bernard, Buizert, Copeman, Creveling, Durland, Fehrenbacher, Fram, Haxel, Hutchings, Jarvis, Juranek, Kennedy, McKay, O'Neill, Rupp, Shiel, Shroyer, Thurber, Tilt, Van Den Hoek, Wettstein, Wilson, Wrathall, Zhao

Senior Instructors L. Becker, Cook, Hommel, K. Yalcin

Instructors Hyrapiet, Keller, Milstein, Nelson, R. Yalcin

Academic Advisors Chuinard (head advisor), Gaid, Lieuallen, Menn

Experiential Learning Coordinator Cardinal-Lanier
Emeriti

Please see the college website at http://ceoas.oregonstate.edu for updated listings that include adjunct faculty, research faculty, courtesy faculty, and research associates.

Requirements for Undergraduate Programs in the College

The University Baccalaureate Core requirements are explained in a separate section, "Earning a Degree at Oregon State University". The major and option requirements are explained below. If you want to add a minor program or certificate, you will also need to complete the requirements for that minor or certificate. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog.

Academic Advising

Undergraduates within CEOAS are assigned a professional advisor based on the student’s major program of study. Advisors help to monitor academic progress through the degree programs, assist students with defining goals within the major, help in navigating university policies and regulations, and provide referrals to campus-wide resources. Faculty within CEOAS are involved as mentors for undergraduates—to guide students on professional and career-related decisions and to help connect students with research opportunities.

Internships and Experiential Learning

CEOAS places a strong emphasis in gaining experience outside of the classroom and offers specialized support to all students for internships and undergraduate research through a designated experiential learning coordinator available to all undergraduates within the college.

Teacher Education

The Earth Sciences and Environmental Sciences majors provide excellent scientific preparation for teaching middle school and high school science. All professional teacher licensure certification occurs in the College of Education.

Double Degrees

Undergraduates with majors in CEOAS can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

College Undergraduate Graduation Requirements

Along with fulfilling the university-level, baccalaureate core, and major requirements for BS degrees within CEOAS, students must meet the following college requirements:

- A grade of at least C– minus is required for all upper-division (300 level and above) courses taken to fulfill major requirements.
- A minimum 2.00 GPA in major requirement courses (excluding baccalaureate core and electives) is required for all CEOAS majors.
- "S/U" grading is not allowed for courses taken to fulfill major requirements.

Requirements for Admission to the Graduate Programs in the College

1. A bachelor’s degree with a major (40 quarter credits or more) in a relevant discipline (see individual program requirements) such as physics, mathematics, chemistry, biology, geology, atmospheric science, computer science, or engineering. Geography and Marine Resource Management applicants also have a bachelor’s degree in the social or political sciences, geography, economics, business administration, or fisheries.
2. A minimum cumulative grade-point average of 3.00 on a 4.00 scale for the last 90 quarter credits of undergraduate work.
3. A solid foundation in prerequisites (see individual program requirements).
4. Graduate Record Examination (GRE) scores (general).
5. Three letters of recommendation.
6. For TOEFL requirements, please see the OSU Admissions Web pages for graduate requirements and contact the CEOAS Student Services Office for specific information.

Early January is the deadline to apply for the following fall term admission. Early application is strongly recommended.

Master’s Programs

All students in College of Earth, Ocean, and Atmospheric Sciences graduate majors must satisfy the minimum program requirements (45 credits including 6 credits of thesis) established by the Graduate School. Some graduate credits earned at other institutions may be approved for inclusion in the program. The Marine Resource Management graduate program requires additional course work credits. Please contact the Student Services for more information.

A two-hour, final oral examination is required for completion of the master’s program (thesis option only).

Doctor of Philosophy Program

The content of PhD programs, other than core requirements, is determined by individual students and their committees. Specific university requirements are formulated by the Graduate School. Approximately 80 credits of courses in the graduate major (including the core courses and 30 to 35 credits of thesis) are usually included in the major. The dissertation is based on an original investigation in some area of the graduate major.

One year of courses taken as a part of a master’s program is normally transferable into the PhD program.
Undergraduate Programs

Majors
- Earth Sciences (p. 370)
- Environmental Sciences (p. 375)
- Geography and Geospatial Science (p. 386)

Minors
- Earth Sciences (p. 370)
- Environmental Sciences (p. 374)
- Geography (p. 391)
- Geology (p. 393)
- Oceanography (p. 395)

Certificates
- Geographic Information Science (p. 384)

Graduate Programs

Majors
- Geography (p. 391)
- Geology (p. 392)
- Marine Resource Management (p. 394)
- Ocean, Earth and Atmospheric Sciences (p. 394)

Minors
- Geography (p. 391)
- Geology (p. 393)
- Marine Resource Management (p. 394)
- Ocean, Earth and Atmospheric Sciences (p. 395)
- Risk and Uncertainty Quantification in Earth Systems (p. 396)
- Water Conflict Management and Transformation (p. 400)

Certificates
- Geographic Information Science (p. 385)
- Water Conflict Management and Transformation (p. 399)
- Marine Resource Management (p. 393)

Atmospheric Sciences

ATS 201. *CLIMATE SCIENCE. (4 Credits)
Physical laws governing the Earth’s climate and their interactions with chemical and biological processes on land and in the atmosphere, oceans, and cryosphere. Past, present, and potential future climate changes due to natural and human causes are assessed using a variety of observations, models, and laboratory exercises. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

ATS 295. OBSERVING CLIMATE. (3 Credits)
One-week course taught during Spring Break at field sites near Corvallis, with ten hours of preparatory meetings on campus. Make and analyze observations of properties of the atmosphere, ocean, biosphere, and cryosphere that reflect processes relevant to regional and global climate. Serves as an introduction to upper-division course work in climate science. Field trip(s) required; transportation fee charged. Lec/lab.
Prerequisites: ATS 201 with C- or better or ATS 320 with C- or better

ATS 301. CLIMATE DATA ANALYSIS. (4 Credits)
Quantitative methods to characterize the physical climate system and detect change. Interpret data based on source timescale, and statistics; communicate conclusions and uncertainties regarding past climate and future changes.
Prerequisites: ATS 201 with C- or better and ST 351 [C-]

ATS 310. METEOROLOGY. (4 Credits)
The study of the atmosphere, in particular atmospheric phenomena that we experience as weather. Key physical concepts in meteorology are introduced and explored. The physics of the atmosphere necessary to understand why atmospheric phenomena occur and how these are forecast is discussed. Meteorological data from observations and models will be analyzed to explore concepts introduced in the context of the weather we experience. Lec/Lab.
Prerequisites: (MTH 251 with C- or better or MTH 251H with C- or better) and (PH 201 [D-] or PH 201H [D-] or PH 211 [D-] or PH 211H [D-]) and (PH 202 (may be taken concurrently) [D-] or PH 202H (may be taken concurrently) [D-] or PH 212 (may be taken concurrently) [D-] or PH 212H (may be taken concurrently) [D-] or CH 121 (may be taken concurrently) [D-] or CH 231 (may be taken concurrently) [D-] or CH 231H (may be taken concurrently) [D-])

ATS 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: ATS 399H
This course is repeatable for 12 credits.

ATS 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ATS 399
This course is repeatable for 12 credits.

ATS 401. RESEARCH. (1-16 Credits)
This course is repeatable for 24 credits.

ATS 403. THESIS. (1-16 Credits)
This course is repeatable for 24 credits.

ATS 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ATS 406. PROJECTS. (1-16 Credits)
This course is repeatable for 24 credits.

ATS 407. SEMINAR. (1 Credit)
One-credit sections. Graded P/N.
This course is repeatable for 12 credits.
ATS 408. WORKSHOP. (0-12 Credits)
May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

ATS 410. INTERNSHIP. (1-12 Credits)
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 48 credits.

ATS 411. THERMODYNAMICS AND CLOUD MICROPHYSICS. (4 Credits)
Thermodynamic processes in the atmosphere, and an introduction to cloud microphysics. Offered annually.
Prerequisites: (MTH 254 with D- or better or MTH 254H with D- or better) and PH 213 [D-]

ATS 412. ATMOSPHERIC RADIATION. (3 Credits)
Radiative transfer in the earth and planetary atmospheres, absorption and scattering of sunlight, absorption and emission of terrestrial radiation, absorption and scattering cross sections for molecules, cloud droplets and aerosols. Applications include enhancement of photochemical reaction rates in clouds, remote sensing, and the earth's radiation budget, radiative-convective equilibrium, radiative forcing due to changes in atmospheric composition and climate change.
Prerequisites: (MTH 254 with D- or better or MTH 254H with D- or better) and (MTH 256 [D] or MTH 256H [D-]) and PH 213 [D-]

ATS 413. ATMOSPHERIC CHEMISTRY. (3 Credits)
Principles of atmospheric chemistry; chemical fundamentals, sampling principles, sources, reactions, scavenging, and deposition of sulfur, nitrogen, ozone, and carbon compounds. Atmospheric aerosol size distribution, mechanics, optics, and scavenging. Offered annually.

ATS 417. WEATHER SYSTEM DYNAMICS AND FORECASTING. (4 Credits)
Dynamics of weather systems and basic forecasting methods. Mid-latitude storm formation and structure; basic dynamical equations and applications to real-time weather; map analysis; description and interpretation of weather prediction models; forecasting methods; Pacific NW weather. Lec/Lab.
Prerequisites: ATS 310 with C- or better or ME 311 with C- or better or ME 311H with C- or better or BEE 311 with C- or better or CE 311 with C- or better

ATS 420. PRINCIPLES OF CLIMATE: PHYSICS OF CLIMATE AND CLIMATE CHANGE. (4 Credits)
Physics of climate past, present and future. Covers radiative processes, thermodynamics, and dynamics, as well as the paleoclimate record and mechanisms driving this variability. Current modes of climate variability (e.g., ENSO) will also be surveyed. Climate models, ranging from 0- to 3-dimensional, will be examined and projections for the future assessed.

ATS 421. CLIMATE MODELING. (4 Credits)
Numerical models of the physics, chemistry, biology, and geology of the climate system. A range of climate models from a simple, single equation to complex state-of-the-science systems used for future projections. Theoretical concepts will be linked to practical applications through hands-on programming exercises and data analysis. Lec/lab.

ATS 475. PLANETARY ATMOSPHERES. (3 Credits)
Origin and evolution of planetary atmospheres; vertical structure of atmospheres; hazes and clouds; atmospheric motions and general circulation. Presentation of recent observations and current research issues, focusing on Venus, Earth, Mars, Jupiter, Saturn, and Titan. Emphasis on comparative aspects and simple models.
Prerequisites: (MTH 254 with D- or better or MTH 254H with D- or better) and PH 213 [D-]

ATS 499. SPECIAL TOPICS. (0-4 Credits)
This course is repeatable for 12 credits.

ATS 501. RESEARCH. (1-16 Credits)
This course is repeatable for 24 credits.

ATS 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ATS 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ATS 506. PROJECTS. (1-16 Credits)
This course is repeatable for 72 credits.

ATS 507. SEMINAR. (1 Credit)
One-credit sections. Graded P/N.
This course is repeatable for 48 credits.

ATS 508. WORKSHOP. (0-12 Credits)
May be repeated when topic varies.
This course is repeatable for 12 credits.

ATS 511. THERMODYNAMICS AND CLOUD MICROPHYSICS. (4 Credits)
Thermodynamic processes in the atmosphere, and an introduction to cloud microphysics. Offered annually.

ATS 512. ATMOSPHERIC RADIATION. (3 Credits)
Radiative transfer in the earth and planetary atmospheres, absorption and scattering of sunlight, radiation, absorption and emission of terrestrial absorption and scattering cross sections for molecules, cloud droplets and aerosols. Applications include enhancement of photochemical reaction rates in clouds, remote sensing, and the earth's radiation budget, radiative-convective equilibrium, radiative forcing due to changes in atmospheric composition and climate change.

ATS 513. ATMOSPHERIC CHEMISTRY. (3 Credits)
Principles of atmospheric chemistry; chemical fundamentals, sampling principles, sources, reactions, scavenging, and deposition of sulfur, nitrogen, ozone, and carbon compounds. Atmospheric aerosol size distribution, mechanics, optics, and scavenging. Offered annually.

ATS 515. ATMOSPHERIC DYNAMICS I. (4 Credits)
Derivation of equations governing atmospheric motions; shallow atmosphere approximation and the primitive equations. Simple balanced flows; vertical motion, circulation, vorticity and potential vorticity; Ekman layer dynamics; prototypical atmospheric waves; geostrophic adjustment; quasi-geostrophic motions; analysis of structure of synoptic-scale systems; baroclinic instability. Offered alternate years.

ATS 516. ATMOSPHERIC DYNAMICS II. (4 Credits)
Review of basic equations; scale analysis and approximations. Turbulence and boundary layers. Dry and moist convection; convective storms. Frontogenesis; symmetric instability; internal gravity waves and mountain waves; differentially heated circulations including sea breezes. Slope flows and urban circulations. Offered alternate years.
Prerequisites: ATS 515 with C or better

ATS 517. WEATHER SYSTEM DYNAMICS AND FORECASTING. (4 Credits)
Dynamics of weather systems and basic forecasting methods. Mid-latitude storm formation and structure; basic dynamical equations and applications to real-time weather; map analysis; description and interpretation of weather prediction models; forecasting methods; Pacific NW weather. Lec/Lab.
Prerequisites: OEAS 530 with C- or better
ATS 520. PRINCIPLES OF CLIMATE: PHYSICS OF CLIMATE AND CLIMATE CHANGE. (4 Credits)
Physics of climate past, present and future. Covers radiative processes, thermodynamics, and dynamics, as well as the paleoclimate record and mechanisms driving this variability. Current models of climate variability (e.g., ENSO) will also be surveyed. Climate models, ranging from 0- to 3-dimensional, will be examined and projections for the future assessed.

ATS 521. CLIMATE MODELING. (4 Credits)
Numerical models of the physics, chemistry, biology, and geology of the climate system. A range of climate models from a simple, single equation to complex state-of-the-science systems used for future projections. Theoretical concepts will be linked to practical applications through hands-on programming exercises and data analysis. Lec/lab.

ATS 546. EXPERIMENTAL ENERGY AND GAS EXCHANGE. (4 Credits)
Experimental methods to quantify the atmospheric carbon dioxide, water, methane, heat, momentum, and radiative exchange at the vegetation-land-ocean-air interface. Techniques include bulk and gradient approaches, and eddy covariance. The central activity consists of student teams designing and conducting a field experiment, analyzing and interpreting observations, and presenting results. Lec/lab/discussion/activity.

ATS 564. INTERACTIONS OF VEGETATION AND ATMOSPHERE. (3 Credits)
Quantitative treatment of radiation, heat, mass, and momentum exchange between vegetation and atmosphere; forest, natural and agricultural ecosystem examples. Physical and biological controls of carbon dioxide and water vapor exchange; remote sensing of canopy processes; models of stand-scale evaporation, photosynthesis and respiration; landscape and regional scale exchanges; vegetation and planetary boundary layer coupling; vegetation in global climate models.

ATS 575. PLANETARY ATMOSPHERES. (3 Credits)
Origin and evolution of planetary atmospheres; vertical structure of atmospheres; hazes and clouds; atmospheric motions and general circulation. Presentation of recent observations and current research issues, focusing on Venus, Earth, Mars, Jupiter, Saturn, and Titan. Emphasis on comparative aspects and simple models.

ATS 590. SPECIAL TOPICS. (0-4 Credits)
May be repeated when topic varies. This course is repeatable for 12 credits.

ATS 601. RESEARCH. (1-16 Credits)
This course is repeatable for 36 credits.

ATS 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ATS 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ATS 606. PROJECTS. (1-16 Credits)
This course is repeatable for 84 credits.

ATS 607. SEMINAR. (1 Credit)
One-credit sections. Graded P/N. This course is repeatable for 48 credits.

ATS 608. WORKSHOP. (0-12 Credits)
May be repeated when topic varies. This course is repeatable for 12 credits.

ATS 615. LARGE-SCALE INTERACTIONS OF THE OCEAN AND ATMOSPHERE. (3 Credits)
Ocean-atmosphere circulations in the time-mean and seasonal cycles, equatorial wave modes, ENSO, Madden-Julian oscillation, teleconnections and atmospheric bridges, mid-latitude air-sea interactions, Pacific and Atlantic decadal variability, the North Atlantic oscillation/Arctic oscillation. Prerequisites: ATS 515 with C or better or OC 670 with C or better

ATS 690. SELECTED TOPICS. (0-4 Credits)
May be repeated for credit when topic varies. This course is repeatable for 12 credits.

Environmental Sciences

ENSC 101. ENVIRONMENTAL SCIENCES ORIENTATION. (1 Credit)
Introduction to the Environmental Sciences Program and related professional and educational opportunities. Recommended for all freshman and first-year transfer environmental sciences majors, but open to all students interested in learning about career options in the environmental sciences. Graded P/N.

ENSC 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 24 credits.

ENSC 402. INDEPENDENT STUDIES. (1-16 Credits)
This course is repeatable for 24 credits.

ENSC 403. THESIS. (1-16 Credits)
This course is repeatable for 24 credits.

ENSC 405. READING AND CONFERENCE. (1-12 Credits)
This course is repeatable for 16 credits.

ENSC 406. PROJECTS. (1-16 Credits)
This course is repeatable for 24 credits.

ENSC 407. SEMINAR. (1-16 Credits)
Equivalent to: ENSC 407H
This course is repeatable for 12 credits.

ENSC 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENSC 407
This course is repeatable for 12 credits.

ENSC 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 12 credits.

ENSC 410. ENVIRONMENTAL SCIENCE INTERNSHIP. (1-12 Credits)
Supervised practical experience working with professionals at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for 48 credits.

ENSC 479. **ENVIRONMENTAL CASE STUDIES. (3 Credits)
Improves students’ ability to ask questions, gather and synthesize information, and communicate ideas on environmental topics. Instruction and information necessary for the course is entirely Web based. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC

ENSC 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
ENSC 503. THESIS. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 999 credits.

ENSC 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 508. WORKSHOP. (1-16 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

ENSC 510. INTERNSHIP. (1-12 Credits)
This course is repeatable for 12 credits.

ENSC 515. ENVIRONMENTAL PERSPECTIVES AND METHODS. (3 Credits)
Unique perspective or method each quarter. Possibilities include: remote sensing, modeling over a range of scales in time, space, and levels of system organization; and risk analysis.

ENSC 520. ENVIRONMENTAL ANALYSIS. (3 Credits)
Develop analytical thinking, explore analytical approaches, enhance writing skills, and gain experience in oral communication about environmental issues.

ENSC 599. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ENSC 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ENSC 699. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Geosciences

GEO 100. *NATURAL DISASTERS: HOLLYWOOD VERSUS REALITY. (4 Credits)
Introduction to natural hazards, as seen through the lens of popular media. Course will explore the causes and consequences of natural disasters via in-class exercises and activities designed to develop students’ skills in scientific analysis and problem solving. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 101. *THE SOLID EARTH. (4 Credits)
Solid earth processes and materials. Earthquakes, volcanoes, earth structure, rocks, minerals, ores. Solid earth hazard prediction and planning. Geologic time. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 199. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

GEO 201. *PHYSICAL GEOLOGY. (4 Credits)
Study of earth’s interior. Tectonic processes and their influence on mountains, volcanoes, earthquakes, minerals, and rocks. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 202. *EARTH SYSTEMS SCIENCE. (4 Credits)
Surficial processes (glaciers, rivers), climate, soils, vegetation, and their interrelationships. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 203. *EVOLUTION OF PLANET EARTH. (4 Credits)
History of earth and life as interpreted from fossils and the rock record. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 211. *ENVIRONMENTAL GEOLOGY. (4 Credits)
Introductory geology emphasizing geologic hazards (volcanoes, earthquakes, landslides, flooding), geologic resources (water, soil, air, mineral, energy), and associated environmental problems and mitigation strategies. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 295. INTRODUCTION TO FIELD GEOLOGY. (3 Credits)
Two-week course taught in the fall program in various locations throughout the west. Collect field data to make geological maps, cross-sections, columns, and reports. Serves as an introduction to upper-level course work for Geology degree. Lec/lab.
Prerequisites: GEO 201 with C- or better

GEO 305. *LIVING WITH ACTIVE CASCADE VOLCANOES. (3 Credits)
The impact of volcanic activity on people, infrastructure, and natural resources; how and why volcanic activity in the Cascade Range occurs; volcano monitoring and hazard assessment. Field trip required, transportation fee charged. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

GEO 306. *MINERALS, ENERGY, WATER, AND THE ENVIRONMENT. (3 Credits)
Geologic occurrences, environmental consequences, and future of non-renewable earth resources, including metals, materials, oil, soil, and groundwater. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

GEO 307. *NATIONAL PARK GEOLOGY AND PRESERVATION. (3 Credits)
National parks as classrooms to study geological processes and the importance of preserving natural landscapes. Field trip(s) required; transportation fee charged. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: GEO 307H

GEO 307H. *NATIONAL PARK GEOLOGY AND PRESERVATION. (3 Credits)
National parks as classrooms to study geological processes and the importance of preserving natural landscapes. Field trip(s) required; transportation fee charged. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEO 307

GEO 308. *GLOBAL CHANGE AND EARTH SCIENCES. (3 Credits)
Study of global change over different time scales during the history of the earth, with emphasis on evolution of its atmosphere, plate tectonics, paleoclimates, and mass extinctions. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
GEO 309. *ENVIRONMENTAL JUSTICE. (3 Credits)
Technical and social issues surrounding the unequal exposure to environmental hazards based on race and the environmental justice movement that has grown to address charges of such environmental racism. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisites: WR 121 with C- or better or WR 121H with C- or better

GEO 310. EARTH MATERIALS I: MINERALOGY. (4 Credits)
Principles of crystal morphology, and structure. Characteristics, identification, and origins of minerals. Lec/lab.
Prerequisites: GEO 201 with D- or better or GEO 221 with D- or better and ((CH 121 with D- or better or (CH 231 with D- or better and CH 261 [D-]) or (CH 231H [D] and CH 261H [D-]))

GEO 315. EARTH MATERIALS II: PETROLOGY. (4 Credits)
Origin, identification and classification of igneous, sedimentary, and metamorphic rocks. Field trip(s) required, transportation fee charged. Lec/lab.
Prerequisites: GEO 310 with D- or better

GEO 322. SURFACE PROCESSES. (4 Credits)
Examination of surficial processes and terrestrial landforms of the earth, including slopes, rivers, glaciers, deserts, and coastlines. Field trip(s) required, transportation fee charged. Lec/lab.
Prerequisites: (GEO 102 with D- or better or GEO 102H with D- or better or GEO 202 with D- or better and MTH 251 [C-] or MTH 251H [C-]) and (PH 201 with D- or better and PH 201H [D-] or PH 211 with D- or better and PH 211H [D-])

GEO 340. STRUCTURAL GEOLOGY. (4 Credits)
Analysis of geometry and kinematics of geologic structures including brittle and ductile faults, folds, joints, deformation fabrics. Field trip(s) required, transportation fee charged. Lec/lab.
Prerequisites: GEO 201 with D- or better

GEO 352. *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE. (4 Credits)
Provides an overview of the geology of Oregon in the context of the Pacific Northwest including tectonic setting, geologic features and landscapes, as well as topics and concepts of interest to society in general. Lessons will include discussion of the relationship between people and the landscape, incorporating the concept of ethnographic landscapes--geologic structures, natural resources and geologic hazards that are part of the identity of a place. Emphasizes written and graphic communication skills. Field trip required, transportation fee charged. Lec/lab. (Bacc core course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: GEO 352

GEO 352H. *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE. (4 Credits)
Provides an overview of the geology of Oregon in the context of the Pacific Northwest including tectonic setting, geologic features and landscapes, as well as topics and concepts of interest to society in general. Lessons will include discussion of the relationship between people and the landscape, incorporating the concept of ethnographic landscapes--geologic structures, natural resources and geologic hazards that are part of the identity of a place. Emphasizes written and graphic communication skills. Field trip required, transportation fee charged. Lec/lab. (Bacc core course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEO 352

GEO 356

GEO 357. STRATIGRAPHY AND SEDIMENTOLOGY. (4 Credits)
Basic principles of sedimentology and stratigraphy. Stratigraphy is largely concerned with classifying and interpreting the origin of sedimentary rocks. Stratigraphy provides formal rules and strategies for organizing sedimentary (and other) rocks into a temporal framework. Reconstruction of Earth history with various approaches centered on paleoclimatology, paleogeography, paleoceanography, and tectonics. Lec/lab.
Prerequisites: GEO 201 with C- or better and GEO 203 [C-]

GEO 380. *EARTHQUAKES IN THE PACIFIC NORTHWEST. (3 Credits)
Earthquake hazards in the Northwest; responses to reducing earthquake risk at state, local, and personal levels. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

GEO 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: GEO 399H
This course is repeatable for 16 credits.

GEO 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: GEO 399
This course is repeatable for 16 credits.

GEO 400. FIELD TRIPS. (1-16 Credits)
Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. Graded P/N.
This course is repeatable for 48 credits.

GEO 401. RESEARCH. (1-16 Credits)
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEO 403. THESIS. (1-16 Credits)
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEO 405. READING AND CONFERENCE. (1-16 Credits)
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEO 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 12 credits.

GEO 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 12 credits.

GEO 410. INTERNSHIP. (1-15 Credits)
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 48 credits.

GEO 412. IGNEOUS PETROLOGY. (4 Credits)
Petrogenesis of igneous rocks. Petrographic analysis using polarizing microscopes. Field trip may be required, transportation fee charged. Lec/lab.
Prerequisites: GEO 315 with D- or better
GEO 415. EARTH MATERIALS III: PETROGRAPHY. (4 Credits)
Microscopic-based study of minerals and igneous, sedimentary and metamorphic rocks. Representation and interpretation of geological processes based on microscopic observation. Lec/lab.
Prerequisites: GEO 201 with D- or better and GEO 310 [D-] and GEO 315 [D-]

GEO 427. VOLCANOLOGY. (4 Credits)
A survey of volcanoes: their distribution, forms, composition, eruptive products, eruptive styles, and associated phenomena. Field trip may be required; transportation fee charged. Offered alternate years. Lec/lab.

Attributes: CWIC – Core, Skills, WIC
Prerequisites: GEO 315 with D- or better

GEO 430. GEOCHEMISTRY. (4 Credits)
Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Field trip(s) may be required; transportation fees charged. Lec/rec.
Prerequisites: GEO 315 (may be taken concurrently) with D- or better and ((CH 121 with D- or better and CH 122 [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-]))

GEO 431. ENVIRONMENTAL GEOCHEMISTRY. (3 Credits)
An introduction to natural processes at and near the earth's surface, as well as an examination of the impact of human activities on the natural environment. Study includes discussion of the sources, transformations, transport, and fate of contaminants. Field trip(s) required; transportation fee charge.
Prerequisites: (CH 121 with D- or better and CH 122 [D-] and CH 123 [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 233 [D-] or CH 233H [D-]))

GEO 432. APPLIED GEOMORPHOLOGY. (3 Credits)
Effect of landform processes upon human activity; consequences of resource management strategies on erosional balance within landscape; identification of mitigation of natural hazards; role of geomorphic process studies in environmental planning. Taught as seminar, themes TBA. Field trip(s) may be required; transportation fee charged.

GEO 433. COASTAL GEOMORPHOLOGY. (3 Credits)
Morphodynamic approach to coastal landforms, processes and evolution including the impacts and response of humans to coastal change.
Prerequisites: (PH 211 with D- or better or PH 211H with D- or better) and (PH 212 [D-] or PH 212H [D-]) and GEO 322 [D-]

GEO 440. ECONOMIC GEOLOGY. (4 Credits)
Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Lec/lab.
Prerequisites: GEO 315 with D- or better

GEO 461. GEOLgy OF EARTHQUAKES. (3 Credits)
Tectonics of the present day as based on surface geology, geodesy, seismicity, and crustal structure; description of active faults and folds; use of neotectonics in evaluation of earthquake hazard. Field trip(s) may be required; transportation fee charged. Offered alternate years.
Prerequisites: GEO 340 with D- or better

GEO 463. GEOPHYSICS AND TECTONICS. (4 Credits)
Geophysical observations as constraints on geologic interpretation. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

GEO 481. GLACIAL GEOLOGY. (4 Credits)
Mass balance of glaciers, physics of glacial flow, processes of glacial erosion and deposition, glacial meltwater, glacial isostasy and eustasy, and Quaternary stratigraphy. Field trip(s) may be required; transportation fee charged. Lec/lab. Offered alternate years.

GEO 484. INTRODUCTION TO BIOGEOCHEMISTRY. (3 Credits)
Interdisciplinary course, applying concepts from chemistry, physics, biology and geology to Earth systems including terrestrial, ocean and freshwater environments; water and energy cycles; carbon, nitrogen, phosphorus and sulfur cycles; biogeochemical cycles through Earth history.
Prerequisites: (PH 211 with D- or better and CH 231 [D-] or CH 232 [D-] or CH 233 [D-] or CH 261 [D-] or CH 262 [D-])

GEO 486. QUATERNARY PALEOCLIMATOLOGY. (3 Credits)
Introduction to geochronology, climate proxies, climate forcing, and climate modeling applied to paleoclimate problems. Emphasis on Quaternary climate history.
Prerequisites: (GEO 202 with D- or better or GEO 203 with D- or better) and (CH 122 [D-] or CH 222 [D-] or ((CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]))

GEO 487. HYDROGEOLOGY. (4 Credits)
Prerequisites: MTH 252 with D- or better or MTH 252H with D- or better

GEO 488. QUATERNARY STRATIGRAPHY OF NORTH AMERICA. (3 Credits)
Stratigraphic principles applied to Quaternary deposits. Survey Quaternary dating methods. Proxy records of glaciation and climate change. Quaternary stratigraphy of North America, emphasizing stratigraphic records of ice sheets, glaciers, and pluvial lakes. Offered alternate years.

GEO 495. ADVANCED FIELD GEOLOGY. (6 Credits)
Six-week summer program in central Oregon. Collect field data to make geological maps, cross-sections, columns, and reports. Fee charged.
Prerequisites: GEO 295 with C- or better and GEO 315 [C-] and GEO 340 [C-] and GEO 370 [C-]

GEO 497. FIELD MAPPING OF ORE DEPOSITS. (3 Credits)
Eight-day field trip over spring vacation to a mineral district in the western United States, emphasizing detailed mapping of outcrops, trenches, and underground workings. Students prepare final maps and a report suitable for presentation to management or publication during spring term. Transportation fee charged. Not offered every year.

GEO 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

GEO 500. FIELD TRIPS. (1-16 Credits)
Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. Graded P/N.
This course is repeatable for 48 credits.

GEO 501. RESEARCH. (1-16 Credits)
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.
GEO 503. THESIS. (1-16 Credits)
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged.
This course is repeatable for 999 credits.

GEO 505. READING AND CONFERENCE. (1-16 Credits)
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged.
This course is repeatable for 16 credits.

GEO 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 48 credits.

GEO 510. INTERNSHIP. (1-15 Credits)
Pre-career professional experience under joint faculty and employer supervision. May not be used to meet minimum credit hour requirements for graduate degrees in geosciences. Graded P/N.
This course is repeatable for 16 credits.

GEO 512. IGNEOUS PETROLOGY. (4 Credits)
 Petrogenesis of igneous rocks. Petrographic analysis using polarizing microscopes. Field trip may be required, transportation fee charged. Lec/lab.

GEO 516. INTERPRETATION OF GEOLOGIC MAPS. (3 Credits)
Development of skills in formulating geologic problems, using geologic maps, and developing solutions by the scientific method.

GEO 518. GEOSCIENCE COMMUNICATION. (3 Credits)
Professional development of the skills of technical editing and writing for geoscientists. Practice the craft of presentation development and delivery, and the broader issues of problem development, and manuscript and proposal writing specific to geoscience graduate students.

GEO 527. VOLCANOLOGY. (4 Credits)
A survey of volcanoes: their distribution, forms, composition, eruptive products, eruptive styles, and associated phenomena. Field trip may be required; transportation fee charged. Offered alternate years. Lec/lab.

GEO 530. GEOCHEMISTRY. (4 Credits)
Principles of geochemistry applied to problems of earth science. Field trip(s) may be required; transportation fees charged. Offered alternate years. Lec/lab.

GEO 531. ENVIRONMENTAL GEOCHEMISTRY. (3 Credits)
An introduction to natural processes at and near the earth's surface, as well as an examination of the impact of human activities on the natural environment. Study includes discussion of the sources, transformations, transport, and fate of contaminants. Field trip(s) required; transportation fee charged.

GEO 532. APPLIED GEOMORPHOLOGY. (3 Credits)
Effect of landform processes upon human activity; consequences of resource management strategies on erosional balance within landscape; identification of mitigation of natural hazards; role of geomorphic process studies in environmental planning. Taught as seminar, themes TBA. Field trip(s) may be required; transportation fee charged.
Equivalent to: GEOG 549

GEO 533. COASTAL GEOMORPHOLOGY. (3 Credits)
Morphodynamic approach to coastal landforms, processes and evolution including the impacts and response of humans to coastal change.

GEO 535. GEOCHEMICAL ANALYSIS TECHNIQUES. (3 Credits)
An introduction to the theory, techniques and instrumentation used for the chemical analysis of earth materials, with emphasis on analysis of solid earth material samples (predominantly, but not restricted to, rocks). Includes discussions of laboratory safety, relevant statistical approaches, basic physical and chemical principles of analysis, sample preparation techniques and data processing and reporting. Course also includes a large component of hands-on experience with instrumentation available in-house in the College of Earth, Ocean, and Atmospheric Sciences. Lec/lab.
Prerequisites: GEO 530 with C or better

GEO 536. STRUCTURAL AND NEOTECTONIC FIELD METHODS. (3 Credits)
Field-intensive mapping experience emphasizing a topical issue in active tectonics, neotectonics, earthquake geology, or structural geology. One-week field trip required, transportation fee charged. Weekly discussions during quarter. Offered alternate years.

GEO 537. TECTONIC GEOMORPHOLOGY. (3 Credits)
Exploration of linkages between patterns of erosion, crustal deformation, and landscape evolution from geomorphic, geologic, geophysical, and modeling perspectives. Field trip required; transportation fee charged. Offered alternate years.

GEO 540. ECONOMIC GEOLOGY. (4 Credits)
Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Lec/lab.

GEO 550. COASTAL HAZARDS: PROCESSES, RESPONSE, AND ADAPTATION. (3 Credits)
Coastal hazards and the associated risks they pose to rapidly expanding coastal communities. Examination of coastal hazards from a trans-disciplinary perspective including the physical processes, the coastal response, and coastal adaptation/management options for dealing with the hazards. Emphasizes probabilistic and other user-inspired approaches for assessing coastal vulnerability to the various hazards.

GEO 561. GEOLOGY OF EARTHQUAKES. (3 Credits)
Tectonics of the present day as based on surface geology, geodesy, seismicity, and crustal structure; description of active faults and folds; use of neotectonics in evaluation of earthquake hazard. Field trip(s) may be required; transportation fee charged. Offered alternate years.

GEO 563. GEOPHYSICS AND TECTONICS. (4 Credits)
Geophysical observations as constraints on geologic interpretation. Lec/lab.

GEO 561. GLACIAL GEOLOGY. (3 Credits)
Mass balance of glaciers, physics of glacial flow, processes of glacial erosion and deposition, glacial meltwater, glacial isotasy and eustasy, and Quaternary stratigraphy. Field trip(s) may be required; transportation fee charged. Lec/lab. Offered alternate years.

GEO 565. QUATERNARY PALEOClimatology. (3 Credits)
Introduction to geochronology, climate proxies, climate forcing, and climate modeling applied to paleoclimate problems. Emphasis on Quaternary climate history.

GEO 588. QUATERNARY STRATIGRAPHY OF NORTH AMERICA. (3 Credits)
Stratigraphic principles applied to Quaternary deposits. Survey Quaternary dating methods. Proxy records of glaciation and climate change. Quaternary stratigraphy of North America, emphasizing stratigraphic records of ice sheets, glaciers, and pluvial lakes. Offered alternate years.
GEO 597. FIELD MAPPING OF ORE DEPOSITS. (3 Credits)
Eight-day field trip over spring vacation to a mineral district in the western United States, emphasizing detailed mapping of outcrops, trenches, and underground workings. Students prepare final maps and a report suitable for presentation to management or publication during spring term. Transportation fee charged. Not offered every year.

GEO 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 24 credits.

GEO 600. FIELD TRIPS. (1-16 Credits)
Participation in group field trips that are not part of any other course. Transportation fee charged. Students may prepare guide for trips. Faculty sponsors must be arranged. Graded P/N. This course is repeatable for 84 credits.

GEO 601. RESEARCH. (1-16 Credits)
This course is repeatable for 36 credits.

GEO 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

GEO 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

GEO 606. PROJECTS. (1-16 Credits)
This course is repeatable for 84 credits.

GEO 607. SEMINAR. (1-16 Credits)
Graded P/N. This course is repeatable for 48 credits.

GEO 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 24 credits.

GEO 622. IGNEOUS PETROLOGY. (3 Credits)
Controls on the distribution of major and trace elements; theory, applications, and examples. Field trip(s) may be required; transportation fee charged. Offered alternate years.

GEO 633. GEOCHRONOLOGY AND ISOTOPE GEOLOGY. (3 Credits)
Measurements of cosmic and geologic time by radioactive decay. Use of radiogenic and stable isotopic tracers in geology. Offered alternate years.

GEO 684. GLOBAL BIOGEOCHEMICAL CYCLES. (4 Credits)
An in-depth treatment of global biogeochemical cycles, focusing on cycles of carbon, oxygen, nitrogen, phosphorus, and sulfur in the atmosphere, hydrosphere, and lithosphere. Crosslisted as SOIL 684. Equivalent to: SOIL 684

GEO 691. MASS AND HEAT TRANSPORT IN THE ENVIRONMENT. (4 Credits)
Quantitative treatment of processes affecting transport in lakes, streams, and groundwater: advection; diffusion; dispersion. Lec/lab. Offered alternate years.

GEO 694. TOPICS IN ORE GENESIS. (1-3 Credits)
In-depth examination of published research on selected mineral deposits to build an understanding of environments and processes of ore formation. Offered alternate years. This course is repeatable for 6 credits.

GEO 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 24 credits.

Geography

GEOG 100. *CLIMATE JUSTICE. (3 Credits)
Unequal distribution of social, economic and political power that creates winners and losers from climate change. Case studies of climate-change-related environmental degradation, conflict, conservation, climate denial, renewable energy, and investment. Concepts and actions to promote climate justice. Lec/rec. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

GEOG 102. *PHYSICAL GEOGRAPHY. (4 Credits)
Processes that shape the earth’s surface. Weathering, mass movement, landforms, river systems, groundwater, biogeography, human effects on the landscape. Use of maps and imagery. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEOG 103. *HUMAN GEOGRAPHY. (3 Credits)
Introduction to how human activity affects or is influenced by the earth’s surface, including languages, religions, migration, development, and resources. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

GEOG 105. *GEOGRAPHY OF THE NON-WESTERN WORLD. (3 Credits)
An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economies in Africa, the Middle East, and Asia. Lec/lab/rec. (Bacc Core Course)
Equivalent course is GEO 105.
Attributes: CPWC – Core, Pers, West Culture; LACS – Liberal Arts Social Core

GEOG 106. *GEOGRAPHY OF THE WESTERN WORLD. (3 Credits)
An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economics in Europe and Russia, Australia and Oceania, and the Americas. Lec/rec. (SS) (Bacc Core Course)
Equivalent course is GEO 106.
Attributes: CPCD – Core, Pers, Cult Diversity

GEOG 199. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

GEOG 201. *FOUNDATIONS OF GEOSPATIAL SCIENCE AND GIS. (4 Credits)
Basic physical science principles underlying geospatial technologies such as GPS, mobile devices, and online mapping and navigation tools used in GIS, remote sensing, and geovisualization. Concepts and applications in government, business, and the environment. (Bacc Core Course)
Equivalent course is GEO 301.
Attributes: CPPS – Core, Pers, Physical Science

GEOG 203. *HUMAN-ENVIRONMENT GEOGRAPHY. (3 Credits)
How human societies manage resources, physical limits to sustainability, role of science in the use and management of resources, and how societal resource use adversely affects other societies, in human history and across spatial scales. Lec/rec. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

GEOG 240. *CLIMATE CHANGE, WATER AND SOCIETY. (3 Credits)
Introduction to social, ecological and economic impacts of climate change induced water problems in various geographic regions and cultures. Approaches to climate change mitigation and adaptation in various parts of the world. (Bacc Core Course)
Equivalent course is GEO 204.
Attributes: CPSI – Core, Pers, Soc Proc & Inst
GEOG 250. *LAND USE PLANNING FOR SUSTAINABLE COMMUNITIES. (3 Credits)
Overview of the history and current practices of land use and community planning. Use basic geospatial tools to assess land use patterns and planning practices. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

GEOG 251. *GEOGRAPHY OF DISASTER MANAGEMENT. (3 Credits)
Introduction to the geographic concepts and processes for effective disaster management, including response, recovery, mitigation and preparedness. Risk assessment and evidence-based best practices to prepare and respond to emergencies in a variety of geographic contexts. (Bacc Core Course) Equivalent course is GEO 205.
Attributes: CPSI – Core, Pers, Soc Proc & Inst

GEOG 295. INTRODUCTION TO GEOGRAPHIC FIELD RESEARCH. (3 Credits)
Two-week course taught in the fall program in various locations throughout the west. Collect and analyze data associated with both human and physical geography. Field trip required, transportation fee charged. Lec/lab. Equivalent course is GEO 296.

GEOG 299. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

GEOG 300. *SUSTAINABILITY FOR THE COMMON GOOD. (3 Credits)
Geography of human relationships to the earth's systems with an emphasis on individual impacts and collective efforts to achieve environmental sustainability. Lec/rec. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society; LACN – Liberal Arts Non-Western Core

GEOG 311. *GEOGRAPHY OF AFRICA. (3 Credits)
An introduction to the physical, historical, cultural, political, and development geography of Africa south of the Sahara. (NC) (Bacc Core Course) Equivalent course is GEO 325.
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

GEOG 313. *GEOGRAPHY OF ASIA. (3 Credits)
Geographic analysis of Asia's lands and peoples. Emphasis on regional physical environments, resources and development potentials, population trends, and international importance to the United States. Offered every other year. (NC) (Bacc Core Course) Equivalent course is GEO 327.
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

GEOG 314. *GEOGRAPHY OF LATIN AMERICA. (3 Credits)
Focuses on the diverse landscapes, peoples and cultural traditions of Latin America, a vast region extending from the United States-Mexican border to the southern tip of South America. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

GEOG 323. *CLIMATOLOGY. (4 Credits)
Systematic analysis of global and regional climates. Physical principles of climate, climate classifications, and distribution and characteristics of climate regimes. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: GEOG 102 with D- or better or GEO 202 with D- or better or GEO 102 with D- or better

GEOG 324. GEOGRAPHY OF LIFE: SPECIES DISTRIBUTIONS AND CONSERVATION. (4 Credits)
Plant, animal, and biotic community distribution and dynamics. Effect of climate, tectonics, disturbance on extinction, speciation, and succession. Field trip(s) required; transportation fee charged. Lec/lab. Equivalent course is GEO 324.

GEOG 330. **GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION. (3 Credits)
Introduction to the geography of global wealth and inequality with a focus on contemporary development, underdevelopment, and globalization problems in Asian, African, Caribbean, Latin American, and Pacific Island countries. (Bacc Core Course) (Writing Intensive Course) Equivalent course is GEO 330.
Attributes: CSGI – Core, Synth, Global Issues; CWIC – Core, Skills, WIC
Prerequisites: GEOG 105 with D- or better or GEOG 106 with D- or better or GEO 105 with D- or better or GEO 106 with D- or better

GEOG 331. *POPULATION, CONSUMPTION, AND ENVIRONMENT. (3 Credits)
An examination of population patterns and trends, emphasizing historical growth and more recent demographic changes; using geographic tools to understand patterns of spatial distribution, to use and analyze data sources, and to gain experience interpreting and displaying data about population structure and dynamics; and developing the ability to evaluate the relationship between population, consumption, resources, and quality of life. Patterns of consumption, as individuals and societies will be examined and different future scenarios will be examined with reference to environmental, social and economic sustainability. (Bacc Core Course) Equivalent course is GEO 350.
Attributes: CSGI – Core, Synth, Global Issues

GEOG 340. *INTRODUCTION TO WATER SCIENCE AND POLICY. (3 Credits)
Policy and science of the hydrologic cycle. Emphasis on interaction between water's natural time-space fluctuations and human uses. (Bacc Core Course) Equivalent course is GEO 335 and SOIL 335.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: GEOG 340H

GEOG 340H. *INTRODUCTION TO WATER SCIENCE AND POLICY. (3 Credits)
Policy and science of the hydrologic cycle. Emphasis on interaction between water's natural time-space fluctuations and human uses. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEOG 340

GEOG 350. *GEOGRAPHY OF NATURAL HAZARDS. (3 Credits)
Introduction to the geography of risk, natural hazards, and disasters, focusing on concepts of vulnerability, adaptation and resilience of human society in the Pacific Northwest and globally. Equivalent course is GEO 304.
Attributes: CSGI – Core, Synth, Global Issues

GEOG 360. GISCIENCE I: GEOGRAPHIC INFORMATION SYSTEMS AND THEORY. (4 Credits)
Fundamentals of spatial data, geographic information systems (GIS), and introductory spatial analysis, programming, and modeling. Equivalent course is GEO 365 and GEO 465.
GEOG 361. GISCIENCE II: ANALYSIS AND APPLICATIONS. (4 Credits)
Applications-based course. Development and conduct of geospatial analyses using various spatial data structures, techniques and models. Students acquire, clean, integrate, manipulate, visualize and analyze geospatial data through laboratory work. Lec/lab. Equivalent course is GEO 480.
Prerequisites: GEOG 360 with C- or better and MTH 112 [C-] and (ST 201 [C-] or ST 351 [C-])

GEOG 370. GEOVISUALIZATION: CARTOGRAPHY. (4 Credits)
Basic cartographic principles. Design, compilation, and construction of maps. Equivalent course is GEO 360.
Prerequisites: GEOG 201 with D- or better or GEO 301 with D- or better

GEOG 371. GEOVISUALIZATION: WEB MAPPING. (4 Credits)
Current developments in Internet mapping and advanced cartographic skills applied to web-based maps. Techniques of Internet mapping and principles of web-based cartography, including multimedia, animation, 3D visualization, and user interface design. Lec/lab.
Prerequisites: GEOG 201 with D- or better or GEO 301 with D- or better

GEOG 399. SPECIAL STUDIES. (1-16 Credits)
Equivalent to: GEOG 399H
This course is repeatable for 16 credits.

GEOG 399H. SPECIAL STUDIES. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: GEOG 399
This course is repeatable for 16 credits.

GEOG 400. FIELD TRIPS. (1-16 Credits)
Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged.
This course is repeatable for 48 credits.

GEOG 401. RESEARCH. (1-16 Credits)
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEOG 403. THESIS. (1-16 Credits)
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEOG 405. READING AND CONFERENCE. (1-16 Credits)
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged.
This course is repeatable for 16 credits.

GEOG 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

GEOG 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

GEOG 410. INTERNSHIP. (1-16 Credits)
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 16 credits.

GEOG 423. SNOW HYDROLOGY. (3 Credits)
Fundamentals of snow hydrology. Physical principles of snow formation, snowpack accumulation, energy balance, snowcover-climate interactions, snow metamorphism, snowpack ablation, snowpack/snowmelt chemistry, remote sensing of snow, avalanches, field methods, snowmelt/runoff modeling techniques, and watershed processes. Equivalent course is GEO 483.

GEOG 424. HYDROLOGY FOR WATER RESOURCES MANAGEMENT. (3 Credits)
A quantitative introduction to surface and subsurface hydrology with a focus on decision making for the water resource professional.
Prerequisites: MTH 251 with C- or better

GEOG 430. RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT. (3 Credits)
Causes and consequences of conflict over natural resource management at local to global scales; principles for managing social-ecological systems for resilience. Field trip(s) may be required; transportation fee charged. Equivalent course is GEO 420.

GEOG 431. GLOBAL RESOURCES AND DEVELOPMENT. (3 Credits)
Examines resource development issues and strategies in the Global South. Issues and strategies from agriculture, forestry, fisheries, energy, wildlife management, mineral development, land use, and health are examined. Equivalent course is GEO 426.

GEOG 432. GEOGRAPHY OF FOOD AND AGRICULTURE. (3 Credits)
Overview of food and agriculture in relation to production and consumption regions as a basis for distinguishing different types of food and agricultural systems. Local and global examination of the geographic aspects of breeding, location in agricultural systems, and adaptation in agro-ecosystems using field study, explorations of literature, and lecture. Field trip required, transportation fee charged. (Bacc Core Course) Equivalent course is GEO 449.
Attributes: CSST – Core, Synthesis, Science/Technology/Society

GEOG 440. WATER RESOURCES MANAGEMENT IN THE UNITED STATES. (3 Credits)
An investigation of the various approaches to water resources geography within the U.S. Explores the disciplines that address water resources management, their tools, and their limitations. Topics include engineering, law, economics, risk assessment, game theory, conflict resolution, and the fine arts. Equivalent course is GEO 425.

GEOG 441. INTERNATIONAL WATER RESOURCES MANAGEMENT. (3 Credits)
An investigation of the various approaches to water resources geography at the international level. Explores the interaction between water science and policy through issues of current "hydropolitics" and water resources development. Topics include water quality, dams and development, conflict and cooperation, climate change, and water institutions. Equivalent course is GEO 424.

GEOG 450. LAND USE IN THE AMERICAN WEST. (3 Credits)
Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation. Equivalent course is GEO 423.
GEOG 451. PLANNING PRINCIPLES AND PRACTICES FOR RESILIENT COMMUNITIES. (4 Credits)
Applies GIS skills and techniques to determine and analyze future land uses. Determine suitable land uses that incorporate community goals, site constraints and minimize use conflicts. Regulatory and market-based implementation strategies for land uses will also be discussed. Lec/lab. Equivalent course is GEO 452.
Prerequisites: GEOG 360 with C- or better or GEOG 560 with C- or better or GEO 365 with C- or better or GEO 465 with C- or better

GEOG 452. SUSTAINABLE SITE PLANNING. (3 Credits)
Use of geographic concepts and techniques in site planning to create sustainable management reports for local sites. Inventory of environmental characteristics and human uses, conceptual design for future uses of the site, principles of green infrastructure and sustainable building practices. Local field trip required, transportation fee charged. Equivalent course is GEO 451.

GEOG 462. GISCIENCE III: PROGRAMMING FOR GEOSPATIAL ANALYSIS. (4 Credits)
Introduction to the extension of geographic information systems (GIS) through programming. No prior programming experience is expected. Teaches a pragmatic approach to design and write programs for geospatial analysis. Equivalent course is GEO 578.
Prerequisites: GEOG 361 with C- or better or GEOG 561 with C- or better or GEO 480 with C- or better

GEOG 463. GISCIENCE IV: SPATIAL MODELING. (4 Credits)
Introduction to spatial simulation models representing attraction, segregation, individual entities, and processes of spread, applied to contemporary problems in human and physical geography.
Prerequisites: GEOG 462 with C- or better or GEOG 562 with C- or better or GEO 578 with C- or better

GEOG 464. GEOSPATIAL PERSPECTIVES ON INTELLIGENCE, SECURITY, AND ETHICS. (3 Credits)
Applications and implications of geospatial science (GIS, remote sensing, and spatial analysis) in intelligence, human, environmental, and ethical domains. Concepts and practices of ethics in geospatial science, including data access, management, visualization, and decision-making. Equivalent course is GEO 567.
Prerequisites: GEOG 360 with C- or better or GEOG 560 with C- or better or GEO 365 with C- or better or GEO 465 with C- or better

GEOG 472. GEOVISUALIZATION: GEOVISUAL ANALYTICS. (3 Credits)
Concepts and techniques underlying the production of maps by computer. Practical experience with a variety of computer mapping packages. Lec/lab. Equivalent course is GEO 445.
Prerequisites: GEOG 370 with C- or better or GEOG 371 with C- or better or GEO 360 with C- or better

GEOG 480. REMOTE SENSING I: PRINCIPLES AND APPLICATIONS. (4 Credits)
Fundamentals of satellite remote sensing and image analysis. Topics include physical principles of remote sensing from the ultraviolet to the microwave, sensors and sensor technology, and environmental applications of remote sensing through image analysis. Lec/lab. Equivalent course is GEO 444.
Prerequisites: GEOG 201 with C- or better or GEO 301 with C- or better

GEOG 481. REMOTE SENSING II: DIGITAL IMAGE PROCESSING. (4 Credits)
Digital analysis of remote sensor data. Image display enhancement, classification, and rectification principles. Practical experience with an image processing system. Equivalent course is GEO 466.
Prerequisites: GEOG 480 with C- or better or GEOG 580 with C- or better or GEO 444 with C- or better or GEO 544 with C- or better and (ST 202 [D-] or ST 352 [D-])

GEOG 495. FIELD GEOGRAPHY OF OREGON I. (3 Credits)
Designed as a capstone experience. Challenges students to assess the origins of the physical features of a landscape, and evaluate the impacts of features on the area’s human geography, and vice versa. Three weekend field trips required, transportation fee charged. Equivalent course is GEO 435.
Prerequisites: GEOG 295 with C- or better or GEO 295 with C- or better

GEOG 499. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

GEOG 500. FIELD TRIPS. (1-16 Credits)
Participation in group field trips that are not a part of any other course. Transportation fee charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. This course is repeatable for 48 credits.

GEOG 501. RESEARCH. (1-16 Credits)
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged. This course is repeatable for 24 credits.

GEOG 503. THESIS. (1-16 Credits)
Independent, original study that culminates in a thesis. Faculty sponsor must be prearranged. This course is repeatable for 999 credits.

GEOG 505. READING AND CONFERENCE. (1-16 Credits)
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for 16 credits.

GEOG 507. SEMINAR. (1-16 Credits)
Graded P/N. This course is repeatable for 16 credits.

GEOG 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

GEOG 510. INTERNSHIP. (1-15 Credits)
Pre-career professional experience under joint faculty and employer supervision. Graded P/N. This course is repeatable for 16 credits.

GEOG 511. HISTORY AND PHILOSOPHY OF GEOGRAPHY. (3 Credits)
The historical development of research traditions in the discipline of geography. This includes an examination of changes in conceptual structures and current trends. Equivalent course is GEO 515.

GEOG 512. SOCIAL-ECOLOGICAL SYSTEMS. (3 Credits)
Exploration of critical debates surrounding theories associated with social-ecological systems, resilience, vulnerability, adaptation, social learning, transformation, adaptive governance. Equivalent course is GEO 554.
GEOG 523. SNOW HYDROLOGY. (3 Credits)
Fundamentals of snow hydrology. Physical principles of snow formation, snowpack accumulation, energy balance, snowcover-climate interactions, snow metamorphism, snowpack ablation, snowpack/snowmelt chemistry, remote sensing of snow, avalanches, field methods, snowmelt/runoff modeling techniques, and watershed processes. Equivalent course is GEO 583.

GEOG 524. HYDROLOGY FOR WATER RESOURCES MANAGEMENT. (3 Credits)
A quantitative introduction to surface and subsurface hydrology with a focus on decision making for the water resource professional.

GEOG 530. RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT. (3 Credits)
Causes and consequences of conflict over natural resource management at local to global scales; principles for managing social-ecological systems for resilience. Field trip(s) may be required; transportation fee charged. Equivalent course is GEO 520.

GEOG 531. GLOBAL RESOURCES AND DEVELOPMENT. (3 Credits)
Examines resource development issues and strategies in the Global South. Issues and strategies from agriculture, forestry, fisheries, energy, wildlife management, mineral development, land use, and health are examined. Equivalent course is GEO 526.

GEOG 532. GEOGRAPHY OF FOOD AND AGRICULTURE. (3 Credits)
Overview of food and agriculture in relation to production and consumption regions as a basis for distinguishing different types of food and agricultural systems. Local and global examination of the geographic aspects of breeding, location in agricultural systems, and adaptation in agro-ecosystems using field study, explorations of literature, and lecture. Field trip required, transportation fee charged. Equivalent course is GEO 549.

GEOG 540. WATER RESOURCES MANAGEMENT IN THE UNITED STATES. (3 Credits)
An investigation of the various approaches to water resources geography within the U.S. Explores the disciplines that address water resources management, their tools, and their limitations. Topics include engineering, law, economics, risk assessment, game theory, conflict resolution, and the fine arts. Equivalent course is GEO 525.

GEOG 541. INTERNATIONAL WATER RESOURCES MANAGEMENT. (3 Credits)
An investigation of the various approaches to water resources geography at the international level. Explores the interaction between water science and policy through issues of current "hydropolitics" and water resources development. Topics include water quality, dams and development, conflict and cooperation, climate change, and water institutions. Equivalent course is GEO 524.

GEOG 546. ADVANCED LANDSCAPE AND SEASCAPE ECOLOGY. (4 Credits)
Pattern-process interactions in large scale ecological and physical systems, including terrestrial, aquatic, and marine/ocean ecosystems. Principles of pattern-process interactions from genetic to community levels of ecological organization applied to design of conservation reserves. Hypothesis testing, field techniques, spatial models/statistics, GIS/remote sensing. Lec/lab. Equivalent course is GEO 546.

GEOG 550. LAND USE IN THE AMERICAN WEST. (3 Credits)
Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation. Equivalent course is GEO 523.

GEOG 551. PLANNING PRINCIPLES AND PRACTICES FOR RESILIENT COMMUNITIES. (4 Credits)
Applies GIS skills and techniques to determine and analyze future land uses. Determine suitable land uses that incorporate community goals, site constraints and minimize use conflicts. Regulatory and market-based implementation strategies for land uses will also be discussed. Lec/lab. Equivalent course is GEO 552.
Prerequisites: GEOG 360 with C or better or GEOG 560 with C or better

GEOG 552. SUSTAINABLE SITE PLANNING. (3 Credits)
Use of geographic concepts and techniques in site planning to create sustainable management reports for local sites. Inventory of environmental characteristics and human uses, conceptual design for future uses of the site, principles of green infrastructure and sustainable building practices. Local field trip required, transportation fee charged. Equivalent course is GEO 551.

GEOG 560. GISCIENCE I: INTRODUCTION TO GEOGRAPHIC INFORMATION SCIENCE. (4 Credits)
Introduction to modern spatial data processing, development, and functions of geographic information systems (GIS); theory, concepts and applications of geographic information science (GIScience). Equivalent course is GEO 565.

GEOG 561. GISCIENCE II: ANALYSIS AND APPLICATIONS. (4 Credits)
Applications-based course. Development and conduct of geospatial analyses using various spatial data structures, techniques and models. Students acquire, clean, integrate, manipulate, visualize and analyze geospatial data through laboratory work. Lec/lab. Equivalent course is GEO 580.
Prerequisites: GEOG 560 with C or better

GEOG 562. GISCIENCE III: PROGRAMMING FOR GEOSPATIAL ANALYSIS. (4 Credits)
Introduction to the extension of geographic information systems (GIS) through programming. No prior programming experience is expected. Teaches a pragmatic approach to design and write programs for geospatial analysis. Equivalent course is GEO 578.
Prerequisites: GEOG 361 with C or better or GEOG 561 with C or better

GEOG 563. GISCIENCE IV: SPATIAL MODELING. (4 Credits)
Introduction to spatial simulation models representing attraction, segregation, individual entities, and processes of spread, applied to contemporary problems in human and physical geography.
Prerequisites: GEOG 462 with C or better or GEOG 562 with C or better

GEOG 564. GEOSPATIAL PERSPECTIVES ON INTELLIGENCE, SECURITY, AND ETHICS. (3 Credits)
Applications and implications of geospatial science (GIS, remote sensing, and spatial analysis) in intelligence, human, environmental, and ethical domains. Concepts and practices of ethics in geospatial science, including data access, management, visualization, and decision-making. Equivalent course is GEO 567.
Prerequisites: GEOG 360 with C or better or GEOG 560 with C or better

GEOG 565. SPATIO-TEMPORAL VARIATION IN ECOLOGY AND EARTH SCIENCE. (4 Credits)
Objectives and techniques of spatial and temporal analysis. Point patterns, geostatistics, spectral analysis, wavelet analysis, interpolation, and mapping. Equivalent course is GEO 541.

GEOG 566. ADVANCED SPATIAL STATISTICS AND GISCIENCE. (4 Credits)
Provides advanced graduate students from a variety of disciplines in earth science and ecology the opportunity to structure and conduct spatio-temporal analyses using available software tools and their own datasets for their graduate research. Equivalent course is GEO 584.
GEOG 571. GEOVISUALIZATION: WEB MAPPING. (4 Credits)  
Overview of methods and applications in interactive, dynamic cartographic visualization. Design and construction of customized user interfaces to geographic information. Lec/lab. Equivalent course is GEO 568.

GEOG 572. GEOVISUALIZATION: GEOVISUAL ANALYTICS. (3 Credits)  
Concepts and techniques underlying the production of maps by computer. Practical experience with a variety of computer mapping packages. Lec/lab. Equivalent course is GEO 545.

GEOG 580. REMOTE SENSING I: PRINCIPLES AND APPLICATIONS. (4 Credits)  
Fundamentals of satellite remote sensing and image analysis. Topics include physical principles of remote sensing from the ultraviolet to the microwave, sensors and sensor technology, and environmental applications of remote sensing through image analysis. Lec/lab. Equivalent course is GEO 566.

Prerequisites: GEOG 580 with C or better

GEOG 581. REMOTE SENSING II: DIGITAL IMAGE PROCESSING. (4 Credits)  
Digital analysis of remote sensor data. Image display enhancement, classification, and rectification principles. Practical experience with an image processing system. Equivalent course is GEO 556.

GEOG 595. FIELD GEOGRAPHY OF OREGON II. (3 Credits)  
Designed to introduce students to the widest possible range of topics on all aspects of Oregon geography within a limited time, then turn that experience into a viable research proposal. While physical processes are the primary topic, resource and environmental effects are stressed. Field trip required, transportation fee charged. Equivalent course is GEO 544.

GEOG 596. FIELD RESEARCH IN GEOMORPHOLOGY AND LANDSCAPE ECOLOGY. (3 Credits)  
Natural history interpretation of disturbance and recovery processes and management implications in forest-stream landscapes of western Oregon. Course consists of field experience and several seminars. Transportation and lodging fee charged. Equivalent course is GEO 548.

GEOG 599. SPECIAL STUDIES. (1-16 Credits)  
This course is repeatable for 24 credits.

GEOG 600. FIELD TRIPS. (1-16 Credits)  
Participation in group field trips that are not a part of any other course. Transportation fee charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. This course is repeatable for 48 credits.

GEOG 601. RESEARCH. (1-16 Credits)  
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged. This course is repeatable for 36 credits.

GEOG 603. THESIS. (1-16 Credits)  
Independent, original study that culminates in a thesis Faculty sponsor must be prearranged. This course is repeatable for 999 credits.

GEOG 605. READING AND CONFERENCE. (1-16 Credits)  
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for 16 credits.

GEOG 607. SEMINAR. (1-16 Credits)  
Graded P/N. This course is repeatable for 16 credits.

GEOG 608. WORKSHOP. (1-16 Credits)  
This course is repeatable for 16 credits.

GEOG 699. SPECIAL STUDIES. (1-16 Credits)  
This course is repeatable for 24 credits.

**Geophysics**

GPH 501. RESEARCH. (1-16 Credits)  
Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for 24 credits.

GPH 503. THESIS. (1-16 Credits)  
Thesis research and writing. This course is repeatable for 999 credits.

GPH 505. READING AND CONFERENCE. (1-16 Credits)  
Independent reading and library research on specialized topics in geophysics, guided by discussions with supervising faculty. A written report may be required. This course is repeatable for 16 credits.

GPH 507. SEMINAR. (1-16 Credits)  
This course is repeatable for 48 credits.

GPH 601. RESEARCH. (1-16 Credits)  
Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for 36 credits.

GPH 603. THESIS. (1-16 Credits)  
Thesis research and writing. This course is repeatable for 999 credits.

GPH 605. READING AND CONFERENCE. (1-16 Credits)  
Independent reading and library research on specialized topics in geophysics guided by discussions with supervising faculty. A written report may be required. This course is repeatable for 16 credits.

GPH 607. SEMINAR. (1-16 Credits)  
This course is repeatable for 48 credits.

GPH 630. ELEMENTS OF SEISMOLOGY. (4 Credits)  
Survey of basic concepts in global seismology: world seismicity; elastic structure of the earth; seismic wave paths in the earth; locating earthquakes; earthquake focal mechanisms, magnitudes, stress drop, energy; stress and strain, elasticity, wave equation, plane waves in homogeneous and layered media, surface waves, free oscillations; ray theory; seismometry; earthquake prediction. Laboratory exercises include interpretation and analysis of seismograms from global seismic networks.

GPH 632. CRUSTAL SEISMOLOGY. (3 Credits)  
Structure of the earth's crust and upper mantle from seismic reflection and large offset (refraction, wide-angle reflection) data. Methods of data collection, data processing theory and practice, modeling and interpretation techniques, correlation of seismic results with laboratory measurements of rock properties, and regional case studies.

Prerequisites: GPH 630 with C or better
GPH 640. GEODESY. (4 Credits)
Physical and observational geodesy, including the Earth’s gravity field and potential and determination of the Earth’s geoid. Interpretation of geoid, geoid anomalies, and isostatic compensation. Gravity, point-position and remote sensing geodetic measurement techniques, including GPS, InSAR, VLBI, leveling, triangulation/trilateration, and low-Earth orbit gravity satellite missions are covered as are geodetic reference frames. Offered alternate years.

GPH 641. ELECTROMAGNETIC METHODS IN GEOPHYSICS. (3 Credits)
Survey of electromagnetic (EM) methods in geophysics. Review of electromagnetic theory, Maxwell’s equations in the quasi-static limit, the diffusion of EM fields in a layered conductor, qualitative discussion of EM fields in 2- and 3-D conductors. EM techniques, including DC resistivity, magnetotellurics, controlled source EM, induced polarization, and long-period magnetometer array methods. Applications to exploration, to basic research on crustal structure and to studies of upper-mantle conductivity.

GPH 642. EARTH MAGNETISM. (3 Credits)
Geomagnetism and magnetic potential: general morphology and secular change; internal and external sources; principles of paleomagnetism, including field and laboratory procedures; origin of remnant magnetism in rocks and the controlling physical and chemical processes; the origin of the Earth’s magnetic field.

GPH 650. GEOPHYSICAL INVERSE THEORY. (4 Credits)
Survey of the theory and applications of inverse methods currently used in the geophysical sciences for the interpretation of inaccurate and inadequate data. Backus-Gilbert inverse theory, resolution, regularization methods (such as damped least squares) for linear and non-linear problems, stochastic inversion, and extremal models. Applications to seismic, gravity, magnetic and electromagnetic data.

GPH 651. GEODYNAMICS I. (3 Credits)
Application of the techniques of continuum mechanics to geological problems. Thermal and subsidence history of the lithosphere; stress and strain in the earth; elasticity and flexure of the lithosphere; gravitational compensation. Lec. Offered odd years on Corvallis campus in fall term (subject to change).

GPH 665. GEOPHYSICAL FIELD TECHNIQUES. (3 Credits)
Instrumentation, field methods and interpretation of gravimetric, magnetic, electrical and seismic prospecting techniques. Students will be required to collect, reduce, analyze, and interpret data.

GPH 689. SPECIAL TOPICS IN GEOPHYSICS. (1-4 Credits)
Special topics of current interest in geophysics, not covered in detail in other courses. May be repeated on different topics for credit. This course is repeatable for 16 credits.

Marine Resource Management

MRM 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Graded P/N.
This course is repeatable for 24 credits.

MRM 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

MRM 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

MRM 506. PROJECTS. (1-16 Credits)
This course is repeatable for 72 credits.

MRM 507. SEMINAR. (1-16 Credits)
This course is repeatable for 48 credits.

MRM 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 24 credits.

MRM 510. INTERNSHIP. (1-9 Credits)
Planned and supervised resource management experience with selected cooperating governmental agencies, private organizations, or business firms. Supplementary conferences, reports and evaluations. Graded P/N. This course is repeatable for 16 credits.

MRM 525. SPECIAL TOPICS IN MARINE RESOURCE MANAGEMENT. (1-4 Credits)
Subjects of current interest in marine resource management not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for 24 credits.

MRM 530. PRINCIPLES AND PRACTICE OF MARINE RESOURCE MANAGEMENT. (3 Credits)
Introduces learners to the core concepts/skills required for guiding the management of the interactions between human and natural marine systems. Particular attention is given to the concept and framework of Ecosystem-Based Management, the goal of which is to conserve, maintain and restore ecosystem functions to promote the economic and ecological sustainability of marine ecosystems and human communities that depend on the services they provide. Tomorrow’s marine resource managers must be capable of identifying, requesting, analyzing, synthesizing, and combining natural and social science with experiential knowledge and human/social capital to generate meaningful policy and management recommendations and strategies.

MRM 534. OCEANS IN CRISIS. (3 Credits)
Explores the state of the world’s oceans and coasts, whether or not they are indeed in crisis, and what, if any management responses can be reasonably expected to halt and restore our oceans.

MRM 535. RIGHTS-BASED FISHERIES MANAGEMENT. (3 Credits)
Clear, appropriate and enforceable fishing entitlements and responsibilities are a cornerstone of sustainable fisheries management. Rights-based management tools such as dedicated access privileges, community quotas, co-management and cost recovery will be explored as ways of promoting individual and collective responsibility for sustainable fisheries management. High seas fisheries will also be addressed.

MRM 552. MARINE ECONOMICS. (3 Credits)
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. CROSSLISTED as AEC 552. Equivalent to: AEC 552

MRM 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 24 credits.

Oceanography

OC 103. *EXPLORING THE DEEP GEOGRAPHY OF THE WORLD’S OCEANS. (4 Credits)
Introduces non-science students to the oceans, including marine geology and chemistry, ocean currents, coastal and biological processes. Field trip required, transportation fee charged. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

OC 199. SPECIAL TOPICS IN OCEANOGRAPHY. (1-4 Credits)
Introduction to topics of current interest in oceanography for lower-division undergraduates. May be repeated for credit when topic varies. This course is repeatable for 16 credits.
OC 201. *OCEANOGRAPHY. (4 Credits)
Plate tectonics and the geological structure of ocean basins; physical and chemical properties of seawater; Earth's energy budget; large-scale circulation of the atmosphere and ocean; marine sediment properties and transport; Earth history recorded in marine sediments; the carbon cycle in the atmosphere and sea; and the ecology of pelagic and benthic systems. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

OC 295. INTRODUCTION TO FIELD OCEANOGRAPHY. (3 Credits)
One-week course taught during Spring Break at Hatfield Marine Science Center, with ten hours of preparatory meetings on the Corvallis campus. Collect oceanographic data and samples from ships and coastal marine habitats and conduct preliminary analysis of data and samples. Serves as an introduction to upper-division course work in ocean science. Field trip(s) required; transportation fee charged.
Prerequisites: OC 201 with D- or better or OC 332 with D- or better or OC 332H with D- or better

OC 332. COASTAL OCEANOGRAPHY. (3 Credits)
Physics, geology, biology and hydrology of coastal oceans. How coastal waters respond to forcing by heating, cooling, winds, tides, waves, rain, evaporation, river runoff and freezing. Geography and geology of coastlines: erosion and deposition processes, beach dynamics. Coastal equilibrium cells as sources and sinks of sediment. Rocky shore, beach, mudflat, estuarine, and coastal biotic communities; animal migrations. Law of the Sea rights and responsibilities of coastal states. Fisheries and mariculture in coastal seas. Pollution and coastal ocean resources. Using a matrix to define environmental problems; pathways that pollutants take through the coastal ecosystem. Offered annually.

OC 333. OCEANS, COASTS, AND PEOPLE. (3 Credits)
Contemporary issues related to human interactions with the oceans and coastal zones, including living and energy resources, geohazards and impacts of global change. Content presented in lectures, readings and group discussions, with project oral presentations.

OC 334. *POLAR OCEANOGRAPHY. (3 Credits)
Explores the physical, chemical and biological oceanography of the Arctic and Antarctic and examines the impacts of man's activities both directly through resource utilization, and indirectly through climate change. Introduction to polar oceanography through a series of lectures, interactive classes, written assignments and a case study. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: OC 201 with D- or better

OC 399. SPECIAL TOPICS IN OCEANOGRAPHY. (1-4 Credits)
Equivalent to: OC 399H
This course is repeatable for 16 credits.

OC 399H. SPECIAL TOPICS IN OCEANOGRAPHY. (1-4 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: OC 399
This course is repeatable for 16 credits.

OC 401. RESEARCH PROJECTS. (1-16 Credits)
Field and laboratory research in oceanography for undergraduates, resulting in a written report.
This course is repeatable for 24 credits.

OC 403. THESIS. (1-16 Credits)
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged. Graded P/N.
This course is repeatable for 24 credits.

OC 405. READING AND CONFERENCE. (1-4 Credits)
Independent library research and reading in specialized topics in oceanography for undergraduates, guided by discussions in conferences with faculty. A written report may be required.
This course is repeatable for 16 credits.

OC 407. SEMINAR. (1-3 Credits)
Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required.
Equivalent to: OC 407H
This course is repeatable for 12 credits.

OC 407H. SEMINAR. (1-3 Credits)
Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required.
Attributes: HNRS – Honors Course Designator
Equivalent to: OC 407
This course is repeatable for 12 credits.

OC 410. INTERNSHIP. (1-16 Credits)
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 48 credits.

OC 430. PRINCIPLES OF PHYSICAL OCEANOGRAPHY. (4 Credits)
Fundamental principles of physical oceanography; conservation of mass, heat, momentum and vorticity; equations governing motion in the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Descriptive oceanography; application of the fundamental principles to the ocean; examination of the major current systems; water mass analysis. Offered annually.

OC 433. COASTAL AND ESTUARINE OCEANOGRAPHY. (3 Credits)
Circulation of the coastal ocean including continental shelf circulation, upwelling, coastal jets, upwelling cells as sources and sinks of sediment. Rocky shore, beach, mudflat, estuarine, and coastal biotic communities; animal migrations. Law of the Sea rights and responsibilities of coastal states. Fisheries and mariculture in coastal seas. Pollution and coastal ocean resources. Using a matrix to define environmental problems; pathways that pollutants take through the coastal ecosystem. Offered annually.

OC 434. ESTUARINE ECOLOGY. (4 Credits)
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration management, and impacts of climate. Field trip required, transportation fee charged. CROSSTLISTED as FW 434/534. Offered on Corvallis campus via interactive video from HMSC campus.

OC 440. BIOLOGICAL OCEANOGRAPHY. (4 Credits)
An advanced examination of the ocean as an ecosystem with emphasis on the processes affecting the production and structure of oceanic communities. Starting with the physical and chemical characteristics of the ocean environment, lectures and labs examine the flow of energy and matter from primary producers through primary consumers up to higher trophic levels. Microbial and benthic processes are examined. Current topics, such as hypoxia, ocean acidification and harmful algal blooms are discussed. Lec/lab.
Prerequisites: OC 201 with C- or better
OC 449. ECOLOGICAL THEORIES IN BIOLOGICAL AND FISHERIES OCEANOGRAPHY DATA. (4 Credits)
Students will learn the ecological theories applied in fisheries oceanography research and analytical techniques used to quantify fisheries oceanography processes. The lecture and lab sessions will be presented in the context of fundamental ecological research, including effects of environmental and climate variability on production and distribution of species and communities. A specific emphasis is toward analyses of large spatio-temporal data. Lec/Lab.

Prerequisites: (MTH 252 with C or better or MTH 252H with C or better or MTH 228 with C or better) and (ST 351 [C] or ST 351H [C]) and (OC 440 (may be taken concurrently) [C] or BI 370 [C] or BI 370H [C])

OC 450. CHEMICAL OCEANOGRAPHY. (4 Credits)
Chemical properties and processes in the oceans. Composition, origin and evolution of sea water; thermodynamic and kinetic predictions for reactions in sea water; major and minor element reservoirs and fluxes; vertical and horizontal transport of materials; isotopic clocks and tracers; nutrients; chemical processes and fluxes across major marine interfaces, including estuaries, atmosphere, sediments, suspended particles and hydrothermal systems. Lec/Lab.

Prerequisites: CH 122 with D- or better or CH 232 with D- or better or CH 232H with D- or better

OC 460. GEOLOGICAL OCEANOGRAPHY. (3 Credits)
Structure of ocean basins, plate tectonics and sea floor spreading, marine sedimentation, history of ocean basins, and analyses of geological and geophysical data. Offered annually.

OC 499. SPECIAL TOPICS IN OCEANOGRAPHY. (0-4 Credits)
Subjects of current interest in oceanography, not covered in depth in other courses. May be repeated for credit when topic varies.

This course is repeatable for 16 credits.

OC 501. RESEARCH. (1-16 Credits)
Original research work that will not be part of the data used in a thesis. Graded P/N.

This course is repeatable for 24 credits.

OC 503. THESIS. (1-16 Credits)
Thesis research and writing.

This course is repeatable for 999 credits.

OC 505. READING AND CONFERENCE. (1-16 Credits)
Independent reading and library research on specialized topics in oceanography, guided by discussions with supervising faculty. A written report may be required.

This course is repeatable for 16 credits.

OC 506. PROJECTS. (1-16 Credits)
This course is repeatable for 72 credits.

OC 507. SEMINAR. (1-3 Credits)
Student presentations and discussions of current research literature or personal research results. Original research presentations by visiting scientists, OSU faculty and graduate students presenting final thesis results. Other sections and specific topics by arrangement.

This course is repeatable for 48 credits.

OC 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 24 credits.

OC 512. BASIC MATLAB FOR ENVIRONMENTAL SCIENTISTS AND ENGINEERS. (2 Credits)
MATLAB desktop environment will be introduced and basic programming and data analysis skills will be developed, with an emphasis on writing optimized routines to analyze data sets utilizing matrix algebra and vectorization of functions. Basic graphics and visualization will be covered, including two-dimensional and three-dimensional graphing, contouring and movies.

OC 515. OREGON COAST MATH CAMP. (3 Credits)
Selected topics from differential calculus, integral calculus, ordinary and partial differential equations, statistics, linear algebra and vector calculus. Two-week course taught at Hatfield Marine Science Center in Newport, Oregon, before fall term begins. Graded P/N.

OC 521. APPLICATIONS IN OCEAN ECOLOGY AND BIOGEOCHEMISTRY. (4 Credits)
Methodological underpinnings of marine ecology and biogeochemistry. Students will learn about both new and traditional methods of seawater analysis and biological rate determinations. They will evaluate methods by analyzing observations and samples, and assessing the interpretive effectiveness of approaches. Lec/lab.

Prerequisites: OEAS 540 with C or better
Corequisites: OC 522, OC 523

OC 522. OCEAN BIOGEOCHEMICAL DYNAMICS. (4 Credits)
Examines what keeps ocean systems in balance, and determines their response to perturbation. The course relies on connections between physical transport and biogeochemical reaction rates and energetics, taught from the perspective of key ocean biogeochemical cycles.

Corequisites: OC 521, OC 523

OC 523. OCEAN ECOLOGICAL DYNAMICS. (4 Credits)
Major characteristics of ocean biota and ocean ecosystems. Main themes will be centered on the bioenergetics of marine systems at levels ranging from the individual to ocean biomes, and on how ocean biota facilitates diverse marine biogeochemical processes. Lec/rec.

OC 528. MICROPROBE ANALYSIS. (3 Credits)
Theory and application of electron microprobe analysis to problems in geology, engineering, chemistry, physics, and biology.

OC 533. COASTAL AND ESTUARINE OCEANOGRAPHY. (3 Credits)
Circulation of the coastal ocean including continental shelf circulation, upwelling, coastal jets, undercurrents, coastal-trapped waves. Fundamentals of surface waves and tides; tsunamis, wind generation, breaking waves; shallow-water processes and beach morphology. Offered alternate years.

OC 534. ESTUARINE ECOLOGY. (4 Credits)
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as FW 434/ FW 534.

Equivalent to: FW 534
OC 549. ECOLOGICAL THEORIES IN BIOLOGICAL AND FISHERIES OCEANOGRAPHY DATA. (4 Credits)
Students will learn the ecological theories applied in fisheries oceanography research and analytical techniques used to quantify fisheries oceanography processes. The lecture and lab sessions will be presented in the context of fundamental ecological research, including effects of environmental and climate variability on production and distribution of species and communities. A specific emphasis is toward analyses of large spatio-temporal data. Lec/Lab.

OC 561. IGNEOUS AND TECTONIC PROCESSES IN THE OCEAN. (3 Credits)
An integrated view of the igneous and tectonic processes responsible for the formation and evolution of the ocean basins. The course is organized by tectonic environment including ridge crest, ridge flank, ocean basins, seamounts, and active and passive margins.

OC 562. SEDIMENTARY PROCESSES IN THE OCEAN BASINS. (3 Credits)
An integrated view of sediment processes in the ocean basins from a source to sink perspective, with a special emphasis on the interpretation of the historical record.

OC 574. EARLY LIFE HISTORY OF FISHES. (4 Credits)
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years. CROSSLISTED as FW 574.
Equivalent to: FW 574

OC 599. SPECIAL TOPICS IN OCEANOGRAPHY. (0-4 Credits)
Subjects of current interest in oceanography, not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for 12 credits.

OC 601. RESEARCH. (1-16 Credits)
Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for 36 credits.

OC 603. THESIS. (1-16 Credits)
Thesis research and writing. This course is repeatable for 999 credits.

OC 605. READING AND CONFERENCE. (1-16 Credits)
Independent reading and library research on specialized topics in oceanography, guided by discussions with supervising faculty. A written report may be required. This course is repeatable for 16 credits.

OC 606. PROJECTS. (1-16 Credits)
This course is repeatable for 84 credits.

OC 607. SEMINAR. (1-3 Credits)
Student presentations and discussion of current research literature or personal research results. Original research presentations by visiting scientists, OSU faculty and graduate students presenting final thesis results. Other sections and specific topics by arrangement. This course is repeatable for 48 credits.

OC 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 24 credits.

OC 630. OCEAN WAVE MECHANICS I. (3 Credits)
Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiching, and storm surge. CROSSLISTED as CE 630. Lec/lab.
Equivalent to: CE 630

OC 631. OCEAN WAVE MECHANICS II. (3 Credits)
Second in the sequence of ocean engineering wave mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. CROSSLISTED as CE 631.
Prerequisites: CE 630 with C or better or OC 630 with C or better
Equivalent to: CE 631

OC 634. LONG WAVE MECHANICS. (3 Credits)
Theory of long waves. Depth-integrated Euler’s equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSLISTED as CE 634.
Prerequisites: OC 630 with C or better and CE 631 [C]
Equivalent to: CE 634

OC 635. APPLIED MODELING OF NEARSHORE PROCESSES. (4 Credits)
An introduction to numerical modeling of the nearshore ocean, providing hands-on experience with state-of-the-art numerical models for wave propagation, nearshore circulation, plameform shoreline evolution and bathymetric profile evolution. Focuses on review of model requirements, detailed study of several specific models for several domains of interest, application to coastal phenomena, interpretation of model results. Lec/ lab. Offered alternate years. CROSSLISTED as CE 635.
Equivalent to: CE 635

OC 646. PHYSICAL/BIOLOGICAL INTERACTIONS IN THE UPPER OCEAN. (4 Credits)
Variability in physical oceanic processes in the upper ocean and relationship to spatial and temporal variations in biomass, growth rates, and other biological patterns in the organisms of ocean surface waters. The relationship between variability in ocean physical phenomena and ecosystem dynamics, including the requirements of sampling design for upper ocean ecological studies. Time and space scales of physical and biological phenomena in the upper ocean. Offered alternate years. Offered alternate years, typically fall term.
Prerequisites: OEAS 530 with C or better and OEAS 540 [C]

OC 649. SPECIAL TOPICS IN BIOLOGICAL OCEANOGRAPHY. (1-4 Credits)
Special topics of current interest in biological oceanography not covered in detail in other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 657. SEDIMENT BIOGEOCHEMISTRY. (3 Credits)
An overview of early diagenetic processes in marine sediments and the interdisciplinary approaches used to quantify material transformations at the seafloor.

OC 659. SPECIAL TOPICS IN CHEMICAL OCEANOGRAPHY. (1-4 Credits)
Special topics of current interest in chemical oceanography not covered in detail by other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 660. PALEOCEANOGRAPHY. (3 Credits)
Large-scale changes in the oceanic and atmospheric system, as recorded in marine sediments, and their implications for understanding global environment changes. Chemical, physical, and biological proxies for oceanic and atmospheric processes in the geologic record period. Evidence for changing global climate at time scales longer than the historical record; the oceanic history of the Late-Cenozoic ice ages, long term evolution of climate change patterns, catastrophic global environmental events, and application of quantitative models to the past. Current research topics in paleoceanography. Offered alternate years.
OC 662. NEARSHORE HYDRODYNAMICS. (3 Credits)
Briefly reviews wave processes in the nearshore, and concentrates on the wave-averaged circulation with an eye towards it potential effects on bathymetric change.

OC 664. NEARSHORE SEDIMENT TRANSPORT. (3 Credits)
To study the dynamics of a nearshore wave field propagating over a shoaling bathymetry, the response of sediments and morphology to those motions, emergent morphology due to the coupled system, anthropogenic influences and mitigation.

OC 666. ISOTOPIC MARINE GEOCHEMISTRY. (3 Credits)
Radiogenic and light stable isotopes and application to composition and evolution of the suboceanic mantle, petrogenesis of the oceanic crust, sediment provenance and sedimentary processes, geochronology, seawater chemical dynamics and paleoclimatology. Offered alternate years.

OC 668. THEORETICAL PETROLOGY. (3 Credits)

OC 669. SPECIAL TOPICS IN GEOLOGICAL OCEANOGRAPHY. (1-4 Credits)
Subjects of current interest in geological oceanography not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 670. FLUID DYNAMICS. (4 Credits)
Fundamentals of fluid dynamics: conservation laws of mass, momentum, and energy; inviscid and viscous flows; boundary layers; vorticity dynamics; irrotational and potential flow. Offered annually.

OC 671. GEOPHYSICAL FLUID DYNAMICS. (4 Credits)
Dynamics of rotating and stratified fluids, potential vorticity, geostrophic motion; inviscid shallow-water theory, Poincare, Kelvin, and Rossby waves; geostrophic adjustment, quasigeostrophic approximation, Ekman layers, two-layer and continuously stratified models. Offered annually. Prerequisites: OC 670 with C or better

OC 672. THEORY OF OCEAN CIRCULATION. (4 Credits)
Theory of steady and time-dependent large-scale circulation in ocean basins. Effects of earth’s curvature: the beta-plane approximation. The wind-driven Sverdrup circulation, western boundary currents, eastern boundary upwelling; the effects of friction. Linear theory and nonlinear theory; inertial gyres. Effects of buoyancy forcing; heating, cooling, evaporation, precipitation; density stratification. Wind- and buoyancy-forced circulation in the thermocline; ventilation. Potential vorticity conservation and homogenization. Offered annually. Prerequisites: OC 670 with C or better and OC 671 [C]

OC 673. DESCRIPTIVE PHYSICAL OCEANOGRAPHY. (4 Credits)
Fundamental mass, force, and energy balances of the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation; vorticity; air-sea fluxes of heat, salt, moisture and momentum. Application of these balances through descriptive examination of the ocean-global heat budget; surface current systems; abyssal circulation. Study of variability on a variety of time and space scales. Instrumentation and platforms used for observing the ocean. Offered annually. Prerequisites: OC 530 with C or better or OC 670 with C or better or ATS 515 with C or better

OC 674. TURBULENCE. (4 Credits)
Governing equations, turbulent kinetic energy, vorticity dynamics; turbulent transports of mass and momentum; statistical description of turbulent flows, spectral dynamics; turbulent boundary layers, planetary boundary layers in the atmosphere and ocean, convective mixed layers, stable boundary layers; deep ocean turbulence. Offered alternate years. Prerequisites: OC 670 with C or better

OC 675. NUMERICAL MODELING IN OCEAN CIRCULATION. (4 Credits)
Review of theoretical models of ocean circulation, including shallow water, barotropic, quasigeostrophic, and primitive equation models; adjustment times, internal length and time scales; the role of advection, bathymetry, and coastlines; global models, basin models, regional models and models of jets, eddies and boundary currents. Review of numerical techniques and problems specific to ocean modeling. Local facilities are used to develop models on remote supercomputers. Prerequisites: OC 670 with C or better

OC 676. INVERSE MODELING AND DATA ASSIMILATION. (4 Credits)
Survey of methods for combining oceanographic observations and observing systems with numerical models of ocean circulation. Topics include: finite-dimensional least squares theory with inequality constraints; optimal interpolation; the representation theory of smoothing; the Kalman smoother and filter; gradient descent methods for minimization; spatial and temporal regularity of filters and smoothers; linear theory of array design; nonlinear optimization, practical assimilation methods.

OC 677. OCEAN REMOTE SENSING. (4 Credits)
Theory and applications of satellite remote sensing observations of the ocean with emphasis on strengths and limitations in the measurements. Topics include review of electricity and magnetism, absorption and scattering in the atmosphere (radiative transfer), satellite orbital mechanics, measurements of ocean color, infrared remote sensing, microwave radiometry, scatterometry, and satellite altimetry. Offered alternate years.

OC 679. SPECIAL TOPICS IN PHYSICAL OCEANOGRAPHY. (1-4 Credits)
Subjects of current interest in physical oceanography, not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 680. STABILITY OF GEOPHYSICAL FLUID FLOWS. (4 Credits)
Linear perturbation analysis applied to geophysical flows. These methods provide both quantitative and conceptual insight into the formative stages of turbulent flow. Emphasis is on practical numerical methods for the solution of differential eigenvalue problems. Examples are drawn from a wide range of geophysical flow instabilities, based in part upon student interests. Prerequisites: OC 670 with C or better

OC 681. GEOPHYSICAL WAVES. (4 Credits)
Fundamentals of wave dynamics applied to geophysical fluids. Hyperbolic waves–linear and nonlinear; characteristics; shock waves. Dispersive waves–linear waves, dispersion relations, group velocity; isotropic and anisotropic dispersion; nonlinear solitary waves. Application to geophysical waves–surface gravity, capillary, internal gravity, Kelvin, planetary, coastal. Offered alternate years. Prerequisites: OC 670 with C or better

OC 682. DATA ANALYSIS IN THE TIME AND SPACE DOMAINS. (4 Credits)
Theory of classical and modern techniques for analysis of data in the time and space domains with applications to real oceanographic and atmospheric data. Topics include correlation analysis, regression analysis, EOF analysis, objective mapping, interpolation, filtering, sampling errors, and confidence tests. Offered alternate years.
OC 683. DATA ANALYSIS IN THE FREQUENCY AND WAVE NUMBER DOMAINS. (4 Credits)
Theory of classical and modern techniques for analysis of data in the frequency and wavenumber domains with applications to real oceanographic and atmospheric data. Topics include sampling theory, one-dimensional autospectral analysis, multidimensional autospectral analysis, coherence and phase analysis, bi-spectral analysis, wavelet analysis, and confidence tests. Offered alternate years.

OC 691. PROPOSAL WRITING. (3 Credits)
Teaches the use of NSF Fastlane. Includes a discussion of ethics and fairness in reviewing, a review of real proposals by faculty, a simulated NSF funding panel, and then development of a real proposal, for review purposes. This will relate directly to the student's current thesis or project. The course enables graduate students from all disciplines to develop rigorous, well thought-out proposals. It should be taken early enough in the program so that the proposal process contributes to their research progress.

OC 808. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

Ocean, Earth, and Atmospheric Sciences

OEAS 500. CASCADIA FIELD TRIP. (2-4 Credits)
A field course to various locations within the Cascade volcanic arc, Coast Range and Oregon Coast. Introduction to the range of physical and biological science topics to be covered in OEAS 520, OEAS 530 and OEAS 540 in field settings; the linkages between these topics, and their impact on humans, with case examples. Students will practice math skills, and collect samples and data to be used in laboratory sessions in the later courses. Offered annually. Transportation fee charged. Graded P/N.
This course is repeatable for 4 credits.

OEAS 511X. PROFESSIONAL INSTRUCTION IN CEOAS. (1 Credit)
Provides graduate teaching assistants and potential teaching assistants in the College of Earth, Ocean, and Atmospheric Sciences with an introduction to effective instruction techniques, including the expectations of instructors, teaching pedagogy, use of technology, ethical instruction, inclusivity in the classroom and other topics.

OEAS 520. THE SOLID EARTH. (4 Credits)
Movement of mass and energy within the Earth and into/out of its outer surface, expressed as plate tectonics, earthquakes, heat flow, volcanoes, geomagnetic field; composition, structure, hydrology and aging of ocean crust; lithosphere creation, recycling and mantle overturn. Marine sedimentation, sources and transport, continental weathering, tectonics-climate interactions, glacial history and sea level response. Geohazards, storm events, beach and estuary processes. Offered annually. Lec/lab.

OEAS 530. THE FLUID EARTH. (4 Credits)
Fundamental principles of fluid circulation in the atmosphere and ocean. Atmospheric chemistry, radiation, thermodynamics, and dynamics. Conservation of mass, heat, momentum and vorticity in the ocean; equations governing motion; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Air-sea fluxes and global circulation models; climate change. Offered annually. Lec/lab.

OEAS 540. THE BIOGEOCHEMICAL EARTH. (4 Credits)
Integrating fundamental concepts in biological and chemical oceanography to understand energy and material transformations in estuarine, coastal and open ocean habitats. Topics include structure and function of marine ecosystems, biogeochemical cycles, and human impacts. Offered annually. Lec/lab.

Earth Sciences Minor

Also offered via Ecampus.

The Earth Sciences minor is designed for students who have a broad interest in Earth Sciences. Earth Science majors and Environmental Sciences majors are restricted from taking this minor. Students must complete a minimum of 14 unique credits in the minor that do not fulfill requirements of other majors/minors/options/certificates. Students cannot S/U minor requirements.

Minor Code: 835

Earth Sciences Undergraduate Major (BS, HBS)

The Earth Sciences major program is among the nation’s premier undergraduate programs, serving students with a broad range of interests and career aspirations. The program engages in science and in critical
societal issues facing the region, the nation, and the international community.

The Earth Sciences major offers three options: Climate Science, Geology, and Ocean Science. The degree emphasizes hands-on learning through laboratory and field, or shipboard, experiences and undergraduate research and internships. The separate options provide preparation for careers with climate, geological or marine science emphasis and are also suited for students interested in careers in environmental science, science education, and in graduate studies.

The Geology option includes the topics covered by the test for the state Geologist Practice Examination conducted by the Board of Geologist Examiners (http://www.oregon.gov/osbge/Pages/index.aspx).

Earth Sciences Options

Select one of the following: 61-81

- Climate Science
- Geology
- Ocean Science

Total credits required for graduation 180

* Baccalaureate Core Course

** Major Code: 834

** Climate Science Option

This option is offered within the following major(s):

- Earth Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 370)

Students completing the Climate Science option will be prepared for a variety of careers in different areas related to climate, including:

1. research and technical fields,
2. outreach, education, and communication, and
3. policy and economics.

All students will gain skills in the areas of basic science, data collection and analysis, in addition to a rigorous curriculum in climate science. A broad set of electives will allow students to pursue additional course work to prepare them in their specific areas of interest. Some students may choose to pursue advanced degrees in related disciplines, whereas others will enter the job market directly.

Chemistry

Select one of the following:

- CH 122 | *GENERAL CHEMISTRY                        |
- CH 232 | GENERAL CHEMISTRY                         |
| & CH 262 | and *LABORATORY FOR CHEMISTRY 232        |

Physics

Select one of the following options:

Option A

- PH 202 | *GENERAL PHYSICS                          |
- PH 203 | *GENERAL PHYSICS                          |

Option B

- PH 212 & PH 222 | *GENERAL PHYSICS WITH CALCULUS and RECITATION FOR PHYSICS 212 |
- PH 213 & PH 223 | *GENERAL PHYSICS WITH CALCULUS and RECITATION FOR PHYSICS 213 |

Calculus

- MTH 252 | INTEGRAL CALCULUS                         |
- MTH 254 | VECTOR CALCULUS I                         |

Experiential Learning

Select 6 credits of the following:

- ATS 401 | RESEARCH                                  |
- ATS 403 | THESIS                                    |
- ATS 410 | INTERNSHIP                                |

Electives

Select at least one course in Climate Impacts, Adaptation, or Mitigation:

- CH 374 | *TECHNOLOGY, ENERGY, AND RISK              |
- ENGR 363 | *ENERGY MATTERS                           |
Geology Option

This option is offered within the following major(s):

- Earth Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 370)

The Geology option is suitable for students interested in careers in applied geology, environmental sciences, science education, and in research. The Geology option includes the topics covered by the test for the state Geologist Practice Examination conducted by the Board of Geologist Examiners (http://www.oregon.gov/osbge/Pages/index.aspx).

Total Hours: 80-81

1 Students taking PH 211 *GENERAL PHYSICS WITH CALCULUS in this option are required to take PH 221 RECITATION FOR PHYSICS 211 concurrently

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

Option Code: 836

Geology Option
Ocean Science Option

This option is offered within the following major(s):

- Earth Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 370)

Because of its interdisciplinary scope and quantitative rigor, the Ocean Science option is suitable for students interested in careers in all aspects of marine science, environmental sciences, science education, and in advanced graduate studies in a range of subjects.

Total Hours: 80
The program must contain at least 6 credits of experiential learning that may include an internship, research or senior thesis. Combinations of these are allowed (e.g., 3 credits of internship or 3 credits of research). Students are urged to work with advisors and the program head at an early stage of their study to plan their experiential learning.

### Environmental Sciences Minor

*Also available via Ecampus.*

Courses taken in the "Humans and the Environment" section of the Environmental Sciences minor must be unique to the minor and cannot be used to satisfy major or other minor requirements. Course substitutions must be selected in consultation with an environmental sciences advisor. Substitutions must cover material in the same course category (natural environmental systems or humans and the environment) at a similar or higher level. Credits must sum to a minimum of 27.

Environmental Sciences
An Environmental Sciences undergraduate degree provides a rigorous education that can lead to helping to understand and resolve some of today's most challenging scientific and policy issues—including global climate change, pollution, biodiversity conservation, sustainability, and balancing resource use and preservation. To help reach these objectives, the Bachelor of Science in Environmental Sciences offers an interdisciplinary approach to environmental problem solving. As an Environmental Sciences major, a student completes course work in four general areas:

1. OSU's general education courses (the baccalaureate core)
2. Basic science and math
3. Environmental sciences and humanities core
4. A specialization area

In addition, each student completes a minimum of 3 credits of experiential learning as an internship, research, study abroad, or field course. The BS degree in Environmental Sciences provides excellent training for a variety of careers—including work with federal, state, and local agencies, industry, non-profits, and education—or for graduate school. Students can pursue the BS degree either at the Corvallis campus or online through OSU Ecampus.

Major Curriculum
The Environmental Sciences major requires credits in seven categories: 48 credits of baccalaureate core; 51–53 credits of basic science and math; 27–36 credits of environmental sciences and humanities; 27–31 credits of specialization; 3 credits writing intensive course; 3 credits minimum of experiential learning; and 4–53 credits of elective courses (depends on the number of baccalaureate core electives that will also meet requirements of the major).

Baccalaureate Core
The university baccalaureate core course (BCC) requirement is met with 48 credits and a writing intensive course (WIC). The environmental sciences student satisfies the general education requirement by selecting 27 unrestricted credits from the general list of approved courses and 21 credits from a restrictive list of BCC courses, which simultaneously satisfy requirements for the Environmental Sciences major. The WIC and Synthesis requirements are satisfied by courses taken as part of the environmental sciences core curriculum.

RNG 490  RANGELAND MANAGEMENT PLANNING

The program must contain at least one course, internship, or research experience that provides opportunities for hands-on experience in design and collection of observations in the physical, biological or social environment. Students are urged to work with advisors at an early stage in their study to identify courses or experiences that are appropriate.

This requirement can be met by completing an approved certificate, option, or minor from a participating program in the environmental or closely related sciences, or working with advisors to develop an innovative course cluster to analyze environmental systems.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Specialization Area
Approved Certificates:
  • Geographic Information Science

Approved Options (All options under the Environmental Sciences major):
  • Alternative Energy
  • Applied Ecology (EC)
  • Aquatic Biology (EC)
  • Conservation, Resources, and Sustainability (EC)
  • Earth Systems (EC)
  • Environmental Agriculture (EC)
  • Environmental Policy and Economics (EC)
  • Environmental Science Education
  • Environmental Water Resources (EC)

Note: EC Available via Ecampus

Major Code: 657

Alternative Energy Option
This option is offered within the following major(s):
  • Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 375)

The Alternative Energy option draws from a variety of disciplines that offer courses in energy-related topics, not engineering. Students in this option will be well-informed about energy alternatives for work in urban and regional planning, city government, NGOs promoting energy alternatives to fossil fuels sources, power companies working with the public, policy-making in the energy field, and law school with an aim toward environmental law.

Code  Title                        Hours

Alternative Energy Core
Take a minimum of 9 credits from the courses below: 9
BRR 325  *ENERGY TECHNOLOGY AND SOCIAL CHANGE
BRR 350  INTRODUCTION TO REGIONAL BIOENERGY
BRR 450  INTERDISCIPLINARY RESEARCH: BIOENERGY FOCUS
ENGR 363  *ENERGY MATTERS
PH 313  *ENERGY ALTERNATIVES
PS 473  US ENERGY POLICY

Electives 18
Choose from the list below or additional core courses to total at least 27 credits:

**Total Hours:** 27

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)

**Option Code:** 842

**Applied Ecology Option**

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 375)

**Also available via ecampus** (http://ecampus.oregonstate.edu).

The Applied Ecology option is for Environmental Sciences students who seek to orient their studies around ecology. This is applied ecology and therefore includes geographic methods for measuring and data collection in ecological change. Students seeking a concentration in policy and management are encouraged to consider the Conservation, Resources, and Sustainability option.

**Code** | **Title** | **Hours**

**Aquatic Biology Option**

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 375)

Also available via Ecampus (http://ecampus.oregonstate.edu).

The Aquatic Biology option under the Environmental Sciences major offers students considerable depth in aquatic biology with course work possibilities that emphasize ecology in fresh, estuarine, and marine (saltwater) environments.

- **Resource Management and Policy**
  - Select at least three of the following: 9-12
    - AEC 351 *NATURAL RESOURCE ECONOMICS AND POLICY
    - AEC 352 *ENVIRONMENTAL ECONOMICS AND POLICY
      - or ECON 352 *ENVIRONMENTAL ECONOMICS AND POLICY
    - AEC 432 ENVIRONMENTAL LAW
### Earth Systems Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 375)

Also available via Ecampus (http://ecampus.oregonstate.edu).

With the Earth Systems option, students will obtain a solid base in the sciences and they would be able to apply that base in an integrative way in order to build a strong knowledge traditionally referred to as natural history.

#### Code Title Hours

Environmental Agriculture Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences

Also available Via Ecampus (http://ecampus.oregonstate.edu).

The Environmental Agriculture option has a core of agricultural sciences courses and includes a variety of course possibilities in the areas of agricultural ecology and production, as well as societal issues related to agriculture and environmental science.

**Code** | **Title** | **Hours**
--- | --- | ---
SOIL 205 | SOIL SCIENCE and *SOIL SCIENCE LABORATORY FOR SOIL 205 or SOIL 395 *WORLD SOIL RESOURCES | 3-4

Environmental Agriculture Core

Select a minimum of 6-8 credits of the following: 6-8

- AGRI 411 *INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL
- ANS 121 *INTRODUCTION TO ANIMAL SCIENCES
- CROP 280 INTRODUCTION TO THE COMPLEXITY OF OREGON CROPPING SYSTEMS
- CROP 300 CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS
  - or HORT 300 CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS
  - or CROP 200 CROP ECOLOGY AND MORPHOLOGY
- ENT 311 INTRODUCTION TO INSECT PEST MANAGEMENT
- HORT 260 ORGANIC FARMING AND GARDENING
- HORT 301 GROWTH AND DEVELOPMENT OF HORTICULTURAL CROPS
- HORT 318 *APPLIED ECOLOGY OF MANAGED ECOSYSTEMS

Ecology and Production

Select a minimum of 9 credits of the following: 9

- AGRI 438 EXPLORING WORLD AGRICULTURE
- ANS 215 BEEF/DAIRY INDUSTRIES
- ANS 216 SMALL RUMINANT/Swine INDUSTRIES
- ANS 217 POULTRY INDUSTRIES
- BEE 439 IRRIGATION PRINCIPLES AND PRACTICES
- BOT 313 PLANT STRUCTURE
- BOT 350 INTRODUCTORY PLANT PATHOLOGY
- CROP 310 FORAGE PRODUCTION
- CROP 319 PRINCIPLES OF FIELD CROP PRODUCTION
- CROP 440 WEED MANAGEMENT
- ENT 322 HONEY BEE BIOLOGY AND BEEKEEPING
Environmental Policy and Economics Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 375)

Also available via Ecampus (https://ecampus.oregonstate.edu).

The Environmental Conservation and Sustainability option is for students interested in environmental law, policy and advocacy.

### Code | Title | Hours
--- | --- | ---
**Environmental Policy and Economics Core** |  |  
AEC 351 | *NATURAL RESOURCE ECONOMICS AND POLICY | 3
or AEC 352 | *ENVIRONMENTAL ECONOMICS AND POLICY |  
or ECON 352 | *ENVIRONMENTAL ECONOMICS AND POLICY |  
PS 201 | *INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS | 4
PS 475 | ENVIRONMENTAL POLITICS AND POLICY | 4

### Electives
Select a minimum of 16 credits of the following: 

#### Economics
- AEC 311 INTERMEDIATE APPLIED ECONOMICS I: PRODUCERS AND CONSUMERS
- AEC 313 INTERMEDIATE APPLIED ECONOMICS II: MARKETS, WELFARE & POLICY
- AEC 353 *INTRODUCTION TO COASTAL AND MARINE RESOURCE ECONOMICS
- AEC 434 *MEASURING RESOURCE AND ENVIRONMENTAL IMPACTS
- AEC 448 ADVANCED TOPICS IN ENVIRONMENTAL AND RESOURCE ECONOMICS
- AEC 452 MARINE ECONOMICS
- AEC 454 RURAL DEVELOPMENT ECONOMICS AND POLICY
- AEC 461 *AGRICULTURAL AND FOOD POLICY ISSUES
- ECON 311 *INTRODUCTION TO ECONOMIC RESEARCH
- ECON 428 PUBLIC POLICY ANALYSIS
- ECON 447 *PUBLIC POLICY ANALYSIS
- ECON 466 *ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY

#### Policy
- AEC 432 ENVIRONMENTAL LAW
- AEC 452 MARINE ECONOMICS
- FOR 460 *FOREST POLICY
- FOR 462 NATURAL RESOURCE POLICY AND LAW
- FW 415 FISHERIES AND WILDLIFE LAW AND POLICY
- FW 422 INTRODUCTION TO OCEAN LAW
- PPOL 441 *ENERGY AND SOCIETY
- PPOL 446 THE POLICY AND LAW OF U.S. COASTAL GOVERNANCE
- PPOL 447 INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE
- PPOL 448 MARINE POLICY IN THE UNITED STATES
- PS 311 CONGRESSIONAL POLITICS
- PS 314 INTEREST GROUP POLITICS
- PS 315 *THE POLITICS OF MEDIA
- PS 331 *STATE AND LOCAL POLITICS

---

Select a minimum of 6 credits of the following: 

- AEC 372 AGRICULTURAL COOPERATIVES
- AEC 442 AGRICULTURAL BUSINESS MANAGEMENT
- ANS 315 *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE
- ANTH 361 *FOOD JUSTICE
- ANTH 486 ANTHROPOLOGY OF FOOD
- CROP 330 *WORLD FOOD CROPS
- ENT 331 *POLLINATORS IN PERIL
  or HORT 331 *POLLINATORS IN PERIL
- FES 435 *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK
  or TOX 435 *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK
- GEOG 432 *GEOGRAPHY OF FOOD AND AGRICULTURE
- HORT 319 RESTORATION HORTICULTURE (Ecampus only)
- HORT 330 *PLAGUES, PESTS, AND POLITICS
  or ENT 300 *PLAGUES, PESTS, AND POLITICS
- SUS 350 *SUSTAINABLE COMMUNITIES

---

Total Hours: 24-27

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Option Code: 849
The Environmental Science Education option in Environmental Sciences prepares students for entry into OSU’s Education Double Degree Program or the MS Professional Teacher Education Program. Environmental Sciences students preparing to teach in secondary school can choose either to pursue a state endorsement in Integrated Science (to teach any middle school science class or high school environmental science, earth science, or another course that is not biology, chemistry, or physics) or Biology, for all secondary biology classes. Students should consult the Content Mastery Sheets for these subjects that are provided by the OSU College of Education. The courses required are subject to change.

Environmental Science Education Core

Practicum Experience
Select 3 credits of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SED 406</td>
<td>PROJECTS</td>
<td>3</td>
</tr>
<tr>
<td>ED 309</td>
<td>FIELD PRACTICUM</td>
<td></td>
</tr>
<tr>
<td>ED 409</td>
<td>PRACTICUM/CLINICAL EXPERIENCE</td>
<td></td>
</tr>
</tbody>
</table>

Education Courses
Select 6 credits of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED 216</td>
<td>*PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY</td>
<td></td>
</tr>
<tr>
<td>ED 219</td>
<td>CIVIL RIGHTS AND MULTICULTURAL ISSUES IN EDUCATION</td>
<td></td>
</tr>
<tr>
<td>SED 412</td>
<td>TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE</td>
<td></td>
</tr>
<tr>
<td>SED 413</td>
<td>INQUIRY IN SCIENCE AND SCIENCE EDUCATION</td>
<td></td>
</tr>
</tbody>
</table>

Human Development Course
Select 3-4 credits of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED 253</td>
<td>LEARNING ACROSS THE LIFESPAN</td>
<td>3-4</td>

</tbody>
</table>

Environmental Sciences students seeking an endorsement in Integrated Science must select the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CH 231</td>
<td>GENERAL CHEMISTRY</td>
<td></td>
</tr>
<tr>
<td>CH 232</td>
<td>GENERAL CHEMISTRY</td>
<td></td>
</tr>
</tbody>
</table>

Environmental Sciences students seeking an endorsement in Biology must select the following:
In consultation with your advisor, select additional upper-division science courses from Atmospheric Sciences (ATS), Biochemistry and Biophysics (BB), Botany (BOT), Geology (GEO), History of Science (HSTS), Microbiology (MB), Oceanography (OC) or Zoology (Z).

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Special Course Requirements by Program:**

Environmental Sciences students preparing to teach in secondary school can choose either to pursue a state endorsement in Integrated Science (to teach any middle school science class or high school environmental science, earth science, or another course at is not biology, chemistry, or physics) or Biology, for all secondary biology classes. Students should consult the Content Mastery Sheets for these subjects that are provided by the OSU College of Education. The courses required are subject to change.

**Environmental Water Resources Option**

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 375)

Also available via Ecampus (http://ecampus.oregonstate.edu).

The Environmental Sciences BS with the option in Water Resources provides a solid science base for domestic and international work related to water.

The option requires a minimum of 27 credits from the three categories below.

Email: kuuipo.walsh@oregonstate.edu
Website: http://ceoas.oregonstate.edu/giscience

Oregon State University offers an undergraduate and graduate certificate in Geographic Information Science. Geographic Information Science (GIScience) is a discipline that combines theory and principles underlying:

- geospatial data collection (remotely sensed imagery from satellites, aircraft, and drones, social media, telemetry, GPS, etc.);
- technologies to manage, analyze, and visualize geospatial data (geographic information systems);
- computational, statistical, and mathematical methods to analyze and model geospatial data (machine learning, Big Data, spatial statistics, spatial modeling, geovisual analytics, etc.);
- digital cartography and geovisualization (the science and practice of creating maps); and
- cognitive, social, and environmental implications of GIScience (professional ethics, privacy, digital divide, etc.).

The OSU GIScience certificate can help lead to certification as a nationally-recognized geographic information systems (GIS) professional (GISP). GIS professionals are in high demand for jobs in government,
NGOs, and the private sector, and have rewarding careers in natural resource management, online and interactive mapping, business, planning, and many others.

analysis, land use planning and cartography/geographic information systems/remote sensing.

The program has an applied orientation, placing emphasis on the application of geographic information science to environmental and resource utilization and problem solution. Master’s degree candidates may elect a thesis or nonthesis option. No foreign language is required for the MS degree. One foreign language is required for the PhD degrees.

Contact Program Director Julia Jones, 541-737-1224, jonesj@geo.oregonstate.edu, for additional information.

Major Code: 5450

Geography Graduate Minor

A Geography graduate minor consists of a minimum of 15 credits of Geography graduate course work, including courses in physical geography and resource geography. A student interested in Geographic Information Science should pursue the Graduate Certificate in Geographic Information Science.

Contact Program Director Julia Jones, 541-737-1224, jonesj@geo.oregonstate.edu, for additional information.

Minor Code: 5450

Geography Minor

Also available via Ecampus.

The Geography minor will allow interested non-majors to explore:

- how the Earth works,
- the people who live on its surface,
- the value of accessing and properly using geographic information, and
- how to bring concepts of relative location, pattern, and spatial process to bear on key societal questions.

The minor consists of 14 credits of core courses and at least 13 credits of elective courses for a total of 27 credits. Students must complete a minimum of 14 unique credits in the minor that do not fulfill requirements of majors, minors, options or certificates.

Geology Graduate Major (MA, MS, PhD, MAIS)

Graduate Areas of Concentration
Solid Earth processes and history (volcanology, igneous petrology, economic geology); surface Earth processes and history (Earth system history, hydrogeology and hydrology, geomorphology and surface processes, climate and biogeochemical cycles)

Geology is the study of the materials, processes, and history of the solid Earth and its fluid envelopes. Geology is an integrative field, drawing on mathematics, chemistry, physics and biology to understand the interactions of the lithosphere, biosphere, atmosphere and hydrosphere. Studies in geology commonly combine observations and measurements from field, laboratory, and computational studies. Geology plays an important role in decisions about resource use, slope stability and the safety of building projects, natural hazards standards, mineral exploration and extraction, the basic workings of the Earth, and the understanding of the effects and rates of natural and human-induced change in the environment.

Most graduate research in the geology program includes field study. An approved field course of at least 9 quarter credits or equivalent experience is prerequisite to candidacy for a graduate degree. No foreign language is required.

Contact Program Director Ed Brook, 541-737-8197, brooke@geo.oregonstate.edu, for additional information.

Students who seek training in a combination of field and laboratory techniques applying a variety of scientific problems will find very few places with the number of opportunities or the variety of facilities that are available at Oregon State. Research in the department falls under three broad areas: Solid Earth Processes and History; Surface Earth Processes and History; and Human Interaction with the Earth.

Programs of study in the Geology graduate major lead to the Master of Science or Master of Arts and Doctor of Philosophy degrees

Master of Science (MS) and Master of Arts (MA) Degrees

The master’s degree requires successful completion of at least 45 credits of appropriate courses including a thesis. The thesis presents a written summary of research findings and conclusions. All master’s programs include a final oral examination. Each graduate program is supervised by a committee of at least three members of the graduate faculty who collaborate with the student in developing a program of study and research leading to the final oral examination. The examination is conducted and approved by the student’s graduate committee.

The MA degree requires a foreign language proficiency equivalent to that attained at the end of a second-year university course in that language with a grade of C (2.00) or better.

Doctor of Philosophy (PhD) Degree

The doctor of philosophy (PhD) degree is granted for proven ability in research and mastery of an area within the discipline of geology. This is demonstrated through successful performance in at least 108 credits of appropriate course work and research. The pursuit of the PhD also requires passing qualifying exams that advance a student to candidacy.
The doctoral program includes original research in a major topic in one of the department's areas of specialization submitted as a dissertation that is presented and defended orally. A committee of at least four members of the graduate faculty assist the major professor in supervising and examining the PhD student. PhD candidates must complete at least three of four consecutive terms with at least 36 credits taken on the OSU campus.

Graduate Minor

Advanced degree programs in geology may include an optional minor subject area. It may be in a single discipline or an integrated grouping of courses organized around a theme. In developing minors, students commonly combine courses from several campus departments.

Major Code: 5500

Geology Graduate Minor

Contact Program Director Ed Brook, 541-737-8197, brooke@geo.oregonstate.edu, for additional information.

Minor Code: 5500

Geology Minor

The undergraduate Geology minor provides a means for students majoring in physics, chemistry, civil engineering, forest engineering, and related fields to develop a strong geology background as part of their program.

Students must complete a minimum of 14 unique credits in the minor that do not fulfill requirements of majors, minors, options or certificates.

Marine Resource Management Graduate Certificate

The management of our marine resources encompasses both biophysical and human dimensions. Marine management professionals need to understand these dimensions, utilizing both physical and social sciences to tackle challenging issues, and effectively communicate best management practices to scientists, decision makers, and stakeholders.

The Marine Resource Management graduate certificate offers a blend of science- and management-oriented courses that prepare participants (professionals, decision-makers, and graduate students) to become leaders in marine resource management.

Certificate Overview and Requirements

- Completion of core courses in marine policy and law,
- Two courses from the human dimensions area, and
- Two courses from the ocean and coastal science area.

Course Examples

- Ocean Law
- Rights-Based Fisheries Management
- Ecological Policy
- Physical Oceanography
- Marine Pollution

Current graduate students must notify the Marine Resource Management program of their intention to pursue this certificate. Upon consultation with MRM faculty, they will be given instructions regarding listing courses on their programs of study and obtaining the required signature for that form.

Professionals and other students must notify the Marine Resources Management program of their intention to pursue this certificate.

Contact Robert Allan, 541-737-1340, rallan@coas.oregonstate.edu, for more information.

Total Hours 18

Other courses may be substituted upon approval of the certificate director.

Note: The Marine Resource Management graduate certificate is not eligible for federal financial aid if it is not part of a master's degree-seeking program. The certificate is not eligible if taken as a stand-alone program. The MRM graduate certificate is eligible for federal financial aid if it is part of a master's degree-seeking program.

Major Code: CG07

Marine Resource Management Graduate Major (MA, MS)

Graduate Areas of Concentration

Marine resource management

Marine Resource Management (MRM) is a science-based, interdisciplinary master's program based in College of Earth, Ocean, and Atmospheric Sciences (CEOAS). The program provides students with the interdisciplinary training necessary to function confidently and effectively in professional resource management positions. Marine and coastal issues are technically and politically complex, involving many interests, perspectives and stakeholders. To deal effectively with these issues, marine resource managers need a broad-based background in both physical and social sciences. Graduates from the program are trained to bridge the gap between science and policy.

The program offers two tracks, professional and a thesis:

Professional track students develop a project and defend a report on that work, based on either an internship or a research project.

Thesis track students are expected to produce a more extensive and rigorous piece of original work and analysis, and must meet additional requirements set by the Graduate School and advisor. Applicants must meet the general admission requirements of the college.

More than 40 faculty members from CEOAS, other university departments, and outside institutions participate in MRM. These partnerships include departments of Fisheries and Wildlife, Applied Economics, and Anthropology; the School of Public Policy; Sea Grant Extension specialists; and scientists and management professionals from state and federal agencies. The program consists of required courses in oceanography, atmospheric science, and marine law. Typical elective courses include resource economics, fisheries science, political science, anthropology, sociology, and communications. Each program of study is adjusted to the needs of the individual. Applicants must meet the general admission requirements of the college.

Contact Flaxen Conway, 541-737-1339, fconway@coas.oregonstate.edu, for more information.

Major Code: 6550

Marine Resource Management Graduate Minor

Contact Robert Allan, 541-737-1340, rallan@coas.oregonstate.edu, for more information.

Minor Code: 6550

Ocean, Earth and Atmospheric Sciences Graduate Major (MA, MS, PhD, MAIS)

Graduate Areas of Concentration

Atmospheric sciences, geological oceanography, geophysics, ocean ecology and biogeochemistry, physical oceanography

Ocean, Earth and Atmospheric Sciences (OEAS) is an interdisciplinary graduate major that first introduces students to the elements of the Earth system and the processes of mass and energy flow among them through a set of core/breadth courses:

<table>

</tbody>
</table>

Students then pursue focused graduate course work and research in the following concentration areas, directed by their program committee.

OEAS Concentration Areas

Atmospheric Sciences

The atmospheric sciences are concerned with dynamics, physics and processes, including the interactions of the atmosphere with soil physics, hydrology and oceanic circulation. The atmospheric sciences concentration in the College of Earth, Ocean, and Atmospheric Sciences prepares students for careers in teaching and research through advanced study and participation in research projects directed by faculty members. MA, MS and PhD degrees are offered.

Applicants should have an undergraduate degree in physics, mathematics, engineering, chemistry or atmospheric science, with
strength in mathematics. All applicants should have completed one year each of chemistry and physics with calculus, and courses in vector calculus and in differential equations.

Students perform thesis research on a wide range of problems including the study of global climate change, clouds and the earth’s radiation budget, the structure and dynamics of turbulent flows, air-sea interaction, planetary atmospheres, the optimal use and economic value of weather and climate forecasts, and the study of acid rain and its effects on terrestrial ecosystems. In addition to theoretical, numerical, and observational methods of analysis, approximately one-fourth of the research projects either use or are developing methods for obtaining meteorological information from satellites.

Opportunities exist for PhD candidates to conduct some of their thesis research in Europe or at the National Center for Atmospheric Research. Most research projects involve collaboration with other scientists, either on the Oregon State University campus or at major domestic or international research centers.

Geophysics

Geophysics is concerned with physical processes within and on Earth, especially the internal physical constitution of the planet, and seismic, gravitational, geothermal, geoelectrical, geomagnetic phenomena and their relation to geological processes. The geophysics concentration offers graduate work toward MA, MS, and PhD degrees. Candidates should have an undergraduate degree in physics, mathematics, engineering, geology, or geophysics. Mathematics through differential equations is required and mathematical physics is desirable. Graduate Record Exam scores are required of all applicants. Opportunities for research exist on a wide range of geophysical problems in marine and continental regimes, emphasizing experimental, applied, and theoretical aspects.

Oceanography

Oceanography, the application of the sciences to the study of the oceans, is an interdisciplinary environmental science concerned with all processes: biological, chemical, geological, and physical, as well as the interactions between the ocean. The College of Earth, Ocean, and Atmospheric Sciences graduate major offers MA, MS, and PhD degrees with a concentration in oceanography.

For all areas in oceanography, applicants should have a strong quantitative background and an undergraduate degree in a relevant field of science or engineering and one year each of chemistry, physics, and calculus. Prior background in oceanography is not essential.

In geological oceanography (marine geology), a broad range of geological processes that influence the ocean is studied. Fields of interest include plate tectonics and the structure of the ocean basins, igneous petrology and geochemistry, paleoceanography and paleoclimatology, and coastal sedimentary processes. Candidates show strength in one or more of these fields: earth science, chemistry, physics, biology or mathematics.

Physical oceanography research covers the physical processes in the sea, exchange of energy and momentum at the air-sea interface, and the transmission and absorption of energy in the sea (e.g., light, heat, and sound). Circulation, tides, waves, heat content and density distributions are some of the other phenomena of particular interest. Candidates should have an undergraduate major in physics, mathematics, or engineering.

Electives

Select 10-11 credits of the following: ¹ 10-11

Ocean and Climate Science

ATS 420  PRINCIPLES OF CLIMATE: PHYSICS OF CLIMATE AND CLIMATE CHANGE
ATS 421  CLIMATE MODELING
GEO 433  COASTAL GEOMORPHOLOGY
OC 334  ^POLAR OCEANOGRAPHY
OC 433  COASTAL AND ESTUARINE OCEANOGRAPHY
OC 434  ESTUARINE ECOLOGY
or FW 434  ESTUARINE ECOLOGY

Biological Science

BI 370  ECOLOGY
BI 421  AQUATIC BIOLOGICAL INVASIONS
or FW 421  AQUATIC BIOLOGICAL INVASIONS
FW 426  COASTAL ECOLOGY AND RESOURCE MANAGEMENT (Taught at HMSC)
FW 497  ^AQUACULTURE (Taught at HMSC)
Z 461  MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY (Taught at HMSC)

Total Hours 26-29

¹ Select from the listed courses (or the two other 400-level courses above) to bring the credit total to 27. Courses are grouped by focus area, but students may choose courses from one or more areas.

^ Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Risk and Uncertainty Quantification in Earth Systems Graduate Minor

Marine and coastal scientific and management issues are technically and socially complex, involving many forms of science, interests, perspectives, and stakeholders. There is much uncertainty in modeling forecast and policy outcomes associated with climate change and global markets. This interdisciplinary graduate minor will provide students with knowledge and skills to quantify and communicate risk and uncertainty derived from the analyses of large data in earth system science.

The graduate minor focuses on marine science and resource management, yet will be relevant to students from a variety of fields. Students will extend their ability to perceive and solve problems in a transdisciplinary context related to statistical inference, uncertainty quantification, risk analyses, earth system science, and social systems. Students will also acquire professional skills in communication and collaboration. The world is changing. Join us in becoming more resilient. The graduate minor is open to all OSU graduate students.

Learning Goals

Social Systems

The “social or human system” component is one of the key elements of a coupled natural human system. Specifically, it encompasses the social, cultural, economic, management, and policy aspects of the system, and how they interact with each other and with their environment. Disciplinary approaches to the human system include anthropology, sociology, policy, economics, etc. The goal of the “social systems” training component of the graduate R&U minor is to learn about social science methods, theory and/or applications as they relate to a marine, coupled natural human system. Risk and Uncertainty graduate minor students are expected to complete the requirements by taking at least one course in this area. The course must allow students to: (1) Recognize the perspective of the particular discipline or area of study, (2) Understand and respect the various methodological approaches used in the social sciences (qualitative and/or quantitative), their possibilities and limitations, and how these may be best integrated to the earth systems, big data or R&U component of the minor, (3) Explain and extract the scalar nature of the course material, whether it is related to cultural, social, institutional, management, or policy aspects of a system, (4) Critically assess gaps or opportunities for inclusion of social, cultural, or economic elements of a natural system, and vice versa.

Risk and Uncertainty

The goal of the risk and uncertainty quantification training component of the graduate R&U minor is to understand and acquire mastery of some of the fundamental mathematical/computational and statistical methods for quantifying uncertainty and analyzing risk for decision making. NRT (National Research Traineeship) students seeking the graduate minor are expected to acquire (mathematical/computational/statistical) tools that can be used to describe and assess risk and uncertainty in problems related to the marine, coupled natural human system. Students have options to choose from a variety of courses dealing with the mathematical foundations of risk and uncertainty involving mathematical techniques in (i) decision making under uncertainty, (ii) ruin probabilities, (iii) measures of variability, (iv) probabilities of rare events and large deviations, (v) Monte Carlo simulation, (vi) optimization and dynamic programming, (vii) stochastic models in biology pertaining to spread of disease and related phenomena. Students are expected to acquire experience in a combination of computational, simulation and/or theoretical approaches. NRT students with a social science or human dimension component will be expected to understand and become literate and conversant in the quantitative aspects of risk and uncertainty quantification.

Earth Systems

Students will develop an integrated understanding of the Earth System, including biological, physical and geological mechanisms that affect Earth climate, species dynamics and interactions, elemental cycles and ecosystem services. The emphasis will be on understanding the linkages between physics, biology, geology, and chemistry from a system theory perspective, and on how these linkages affect Earth’s biogeochemical processes. Disciplinary components of the Earth System module include biological, chemical and physical oceanography, biogeochemistry, geology, climate and atmospheric sciences, and ecology.

Big Data

Issues surrounding massive data sets (“big” data) are intertwined with data-enabled science and engineering. The goals of the big data training component are for students

1. to acquire computational and data-management skills necessary for handling and processing large data sets, and
2. to assess the value of information obtained from big data with respect to such issues as observation bias, signal versus noise, spurious relationships, and incidental endogeneity.

Much of the training in big data management and processes is acquired through hands-on experiences. Specific components of the big data module include handling and processing massive datasets; being able to identify and articulate the limitations of big data sets; implementing classification, clustering and/or network analyses as appropriate.

Graduate PhD students are required to complete at least 18 credits, MS students complete 15 credits.

All students complete the professional development requirement (6 credits).

Additional credits are taken from these four following specializations:

1. Big Data and Uncertainty Quantification
2. Risk Analyses
3. Earth Systems
4. Social Systems

Mentoring Requirements

There must be a minor professor in the student’s committee. The minor professor is in any of the fields where course designators fall but must not be from the student’s major.

Classes for Minor

Graduate PhD students are required to complete at least 18 credits, MS students are required to complete at least 15 credits for the minor.

PhD students take one course from each of the four remaining areas: Big data and Uncertainty Quantification, Risk Analyses, Earth Systems, and Social Systems.
MS students take one course in Social Systems and one in Earth Systems and choose one course from either Big Data and Uncertainty Quantification or Risk Analysis.

**Sustainability Minor**

Available on the Corvallis and OSU-Cascades campuses, and via Ecampus.

**OSU Main Campus Contact:** Ann Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann.Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

**OSU-Cascades Campus Contact:** Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@osucascades.edu.

The Sustainability minor includes core sustainability courses (5) and tailored elective courses to expand students’ knowledge and experience of their primary major in the context of sustainability principles and frameworks. Courses from a student’s major course of study will not count towards minor requirements. Completion of the Sustainability minor requires 27 credits beyond the 180-credit minimum for graduation.

### Water Conflict Management and Transformation Graduate Certificate

**Lynette de Silva, Director**  
Program in Water Conflict Management and Transformation  
Oregon State University  
College of Earth, Ocean, and Atmospheric Sciences  
256 Wilkinson Hall  
Corvallis, OR 97331  
Phone: 541-737-7013  
Fax: 541-737-1200  
Email: desilval@geo.oregonstate.edu  
Web: http://transboundarywaters.science.oregonstate.edu/

Also available via Ecampus.

The graduate certificate in Water Conflict Management and Transformation is an 18-credit interdisciplinary program. It is designed to provide graduate students, non-degree students, water professionals and decision-makers with the required specialized resources and skills to address the water demands and challenges of the 21st Century, in Oregon, across the United States and internationally.

The curriculum centers around case-based, interactive course and field work to provide an in-depth look at water conflict, conflict transformation, and prevention issues and strategies across four distinct and overlapping themes:

- Water Governance
- Water and Ecosystems
- Water and Society
- Water and Economics

Each theme incorporates several topics critical to understanding water conflicts.

The curriculum for the graduate certificate in Water Conflict Management and Transformation is as follows:

Minor Code: 871
Advisor guidance and approval is required for each student’s certificate program of study. All students seeking a graduate certificate are subject to all general policies governing the courses for the master’s degree. As such, these students will be required to take a minimum of 50% graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

Non-degree students, and those requiring additional information and advising should contact Lynette de Silva at desilval@geo.oregonstate.edu.

Major Code: CG06

Water Conflict Management and Transformation Graduate Minor

Graduate Areas of Concentration

Water conflict management and transformation

The graduate minor in Water Conflict Management and Transformation is designed to accommodate the needs of professionals and graduate students. It offers an integrative approach that explicitly integrates human and policy dimensions of water resources within the framework of scientific and technological solutions. The graduate minor is a flexible, coherent program that offers critical and underemphasized skills essential to preventing and resolving water conflicts. It helps facilitate dialogue on critical water issues across diverse values and perspectives, and it serves OSU students, citizens and officials in Oregon, the United States and internationally.

The curriculum centers around case-based, interactive course and fieldwork to provide an in-depth look at water conflict, conflict transformation, and prevention issues and strategies across four distinct and overlapping themes: water governance, water and ecosystems, water and society, and water and economics. Each theme incorporates several topics critical to understanding water conflicts. A highlight of the minor is the capstone course coupled with an intersession practicum working with watershed councils, landowners, and agencies in Northeast Oregon; and a guided and critiqued project in which two teams take on, for example, the roles of Jordan and Israel to negotiate a treaty for water resource allocation in a simulated water negotiation. These techniques will hone student skills, understanding and thought development. Students will also take part in fieldwork in a watershed or basin at risk of, or in, water conflict.

Through this minor, students will learn about and practice conflict transformation skills, explore what new institutional networks and relationships are needed, and how these can be achieved through role-playing, in-class exercises, and guest lectures. Students will also be introduced to leadership skills for guiding this type of change.

Contact Lynette de Silva, 541-737-7013, desilval@geo.oregonstate.edu, for additional information.

All students seeking a graduate minor are subject to all general policies governing the courses for the master’s degree. As such, these students will be required to take a minimum of 50 percent graduate stand-alone course.
courses. The remaining credits may be the 500-component of 400/500 slash courses.

COLLEGE OF EDUCATION

The College of Education develops multiculturally competent researchers, scholars, learning leaders and practitioners who make a difference by promoting innovation, social justice, and lifelong learning with a focus on STEM and cultural and linguistic diversity. Our research and professional preparation foster scholarship, intellectual stimulation, openness, flexibility, and a sense of community.

College of Education

The College of Education offers an undergraduate Education Double Degree and graduate degrees and programs to prepare teachers, counselor educators, and other educational professionals for careers in schools, community colleges, business and industry, and other postsecondary settings. In addition, there are electives for undergraduate students who wish to explore education as a career choice.

All programs reflect research-based approaches to education and counseling developed by university faculty, pre-kindergarten through adult teachers and administrators, counselors and leaders from business and industry. Students gain experience through extensive internships in their field of study.

Authorization and Accreditation

The College of Education is authorized by the State Board of Higher Education to offer teacher education and counseling programs and by the Oregon Teacher Standards and Practices Commission (TSPC) to recommend teacher and counselor candidates for initial licensure.

The Teacher Standards and Practices Commission (TSPC) listing of endorsements that OSU is authorized to approve is on the Web at http://www.tspc.state.or.us/program_list.asp.

All teacher education programs are fully accredited by the Council for the Accreditation of Educator Preparation (CAEP) and by the Oregon Teacher Standards and Practices Commission. Counselor education programs are fully accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Applicants for teacher and counselor licensure must meet TSPC requirements in effect at the time of admission to a licensure program. Licensure rules are regulated by TSPC and may change. Students should consult regularly with their advisor.

Advising

Early and continuous advising is an important aspect of an education in both the undergraduate and graduate programs in the College of Education. Students pursuing an undergraduate degree shall meet with a professional academic advisor in the centralized advising office, while graduate students shall be assigned a faculty advisor. Students pursuing the undergraduate Double Degree in Education are urged to declare their interest to Undergraduate Student Services in Furman 104. Students should also declare a “pre-education” major once they have entered their sophomore year and passed at least one course in the Undergraduate Major Pre-Education Level 1 requirements. It is important for undergraduates to work concurrently with both the College of Education academic advisor and the academic advisor for their primary degree to ensure knowledge of academic progress, degree requirements, and educational opportunities in their chosen field.

Scholarships

The College of Education offers a variety of scholarships and fellowships to deserving students. A listing of the many opportunities can be found at http://education.oregonstate.edu/education-scholarships-and-fellowships. Students who have declared their major in education are encouraged to contact student services in Furman 104 to receive an application. Consider applying for scholarships during winter term each year. Additional state and private scholarship information are available at the OSU Office of Financial Aid and Scholarships.

Faculty

Professors Buxton, Crisp, Dierking, Ng, Storksdieck
Associate Professors Ciechanowski, Dykeman, Elliott, Kibler, Rowe, Rubel
Assistant Professors Arellano, Colomer, Giamellaro, Reese, Tevis, Thompson
Emeritus Faculty
Copa, Courtney, Duvall, Falk, Flick, Higgins, Moule, Niess, Russ-Eft, Sanchez, Stern, Ward, Winograd

Program Leads
McKiel, Nyman, Pitcher, Platt, Schuetz, Schulz, Wright

Undergraduate Programs

Majors
- Education (p. 428)
  Pre-Education (p. 450)
  Options:
  - Advanced Mathematics Teaching (p. 430)
  - Basic Mathematics Teaching (p. 431)
  - Biology Teaching (p. 432)
  - Chemistry Teaching (p. 433)
  - Early Childhood/Elementary Teaching (p. 434)
  - Family and Consumer Sciences Teaching (p. 436)
  - Health Teaching (p. 438)
  - Integrated Science Teaching (p. 439)
  - Language Arts Teaching (p. 443)
  - Social Studies Teaching (p. 444)
  - Elementary Education (p. 447)

Minors
- Education (p. 427)

Graduate Programs

Majors
- Adult and Higher Education (p. 419)
  Options:
  - Community College Leadership (p. 419)
  - Leadership in Higher Education (p. 420)
- Counseling (p. 420)
  Options:
  - Clinical Mental Health Counseling (p. 422)
  - Counselor Education
  - School Counseling (p. 423)
- Education (p. 423)
  Options:
  - Advanced Science and Mathematics Education (p. 425)
  - Agricultural Education (p. 425)
  - Free-Choice Learning (p. 426)
  - Language Equity and Educational Policy (p. 426)
  - Mathematics Education (p. 426)
  - PK-12 English to Speakers of Other Language (ESOL) (p. 426)
  - Science Education (p. 427)
  - Science/Mathematics Education (p. 427)
  - Social Justice Education (p. 427)
- Teaching (p. 450)
  Options:
  - Clinically Based Elementary (p. 451)
  - Elementary (p. 451)
  - Language Arts (p. 451)
  - Mathematics (p. 452)
  - Music (p. 452)
  - Science (p. 453)
  - Social Studies (p. 453)

Minors
- Adult Education (p. 420)
- Counseling (p. 423)
- Education (p. 427)
- Mathematics Education (p. 450)
- Science Education (p. 450)

Adult Education and Higher Education Leadership

AHE 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 407. SEMINAR. (1-16 Credits)
Equivalent to: UEXP 407
This course is repeatable for 16 credits.

AHE 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 410. INTERNSHIP/WORK EXPERIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 501. RESEARCH. (1-16 Credits)
Equivalent to: CSSA 501
This course is repeatable for 16 credits.

AHE 502. INDEPENDENT STUDY. (1-16 Credits)
Equivalent to: CSSA 502
This course is repeatable for 16 credits.

AHE 503. THESIS. (1-16 Credits)
Equivalent to: CSSA 503
This course is repeatable for 999 credits.

AHE 505. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: CSSA 505
This course is repeatable for 16 credits.

AHE 506. PROJECTS. (1-16 Credits)
Equivalent to: CSSA 506
This course is repeatable for 16 credits.
AHE 507. SEMINAR. (1-5 Credits)
Equivalent to: CSSA 507
This course is repeatable for 16 credits.

AHE 508. WORKSHOP. (1-3 Credits)
Equivalent to: CSSA 508
This course is repeatable for 16 credits.

AHE 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 510. INTERNSHIP. (1-18 Credits)
By special permission and arrangement.
This course is repeatable for 18 credits.

AHE 517. EDUCATION AND WORK. (3 Credits)
Issues related to work in the U.S. and other countries. The role of public, private, corporate, government, military and other education and training programs in meeting changing individual, corporate, and social work-related needs.

AHE 520. MULTICULTURAL ISSUES IN HIGHER EDUCATION. (3 Credits)
Developing understanding, knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.
Equivalent to: CSSA 520

AHE 522. INSTRUCTIONAL TECHNOLOGY I. (1 Credit)
Explores technologies used in distance education to deliver content and facilitate active learning through learner creation of digital portfolios and artifacts using online tools and apps.

AHE 523. INSTRUCTIONAL TECHNOLOGY II. (1 Credit)
An overview of best practices in digital-age learning design, including implementation of backward design principles.
Prerequisites: AHE 522 with C or better

AHE 524. INSTRUCTIONAL TECHNOLOGY III. (1 Credit)
Students will develop the knowledge and skills needed to design and create complete online teachings/courses within a learning management system.
Prerequisites: (AHE 522 with C or better and AHE 523 [C])

AHE 525. INSTRUCTIONAL TECHNOLOGY IV. (1 Credit)
Learners will research and demonstrate how to use a current innovative instructional technology, as well as develop skills in understanding trends and preparing for future innovations in instructional technology.
Prerequisites: (AHE 522 with C or better and AHE 523 [C] and AHE 524 [C])

AHE 531. INSTRUCTIONAL DESIGN. (4 Credits)
Designed for instructors, trainers, managers, organizational consultants or others who are responsible for the development of programs and courses in community colleges, the workplace or other settings. Using systems concepts and methods, students will learn to design learner-centered instructional programs and courses.

AHE 532. PROGRAM EVALUATION. (4 Credits)
Assessing outcomes in college curriculum and workplace training programs from a systems perspective and evaluation of program effectiveness. Particular emphasis on formative and summative evaluation, frameworks for program evaluation, quantitative and qualitative methods and analysis, communicating and reporting evaluation findings, and the ethics and standards of evaluation practice.

AHE 533. NEEDS ASSESSMENT AND RESEARCH. (4 Credits)
Introduces workplace learning needs assessment (WLNA) and research principles and practices for individual and collaborative learning groups.
Prerequisites: AHE 553 with C or better

AHE 534. ORGANIZATIONS AND SYSTEMS THEORY. (4 Credits)
Introduces principles and practices underlying individual and collaborative work group learning. Participants will learn how to create an environment that promotes effective and efficient workplace learning.

AHE 547. INSTRUCTIONAL STRATEGIES FOR ADULT LEARNERS. (4 Credits)
Exploration of and practice using instructional strategies to enhance adult learning. Acquisition of an instructional strategy tool kit as well as a method for evaluating adult learning events.
This course is repeatable for 60 credits.

AHE 549. ETHICAL AND PROFESSIONAL ISSUES. (4 Credits)
Focuses on issues facing professionals working with adult learners as well as ethical issues relevant to the practice and scholarship in the field. Combines instruction in inquiry-based teaching methods and learning theory with work in professional settings, such as for-profit and non-profit organizations and government agencies.

AHE 553. ADULT LEARNING & DEVELOPMENT. (4 Credits)
Introduce participants to key theories, orientations, models, and principles of learning and development in adulthood.

AHE 557. LEADERSHIP DEVELOPMENT AND HUMAN RELATIONS. (4 Credits)
Exploration of multiple theories of leadership in different organizational contexts; synthesize theory with experience to construct a personal framework for leadership practice.

AHE 575. EDUCATIONAL FINANCE. (3 Credits)
Finance, budgeting and accounting for sources of revenue; deferral, state and local financing, budgeting and accounting models, practical experience combined with examination of theory, trends and issues. Focus in either public schools, community colleges or higher education through practical experience.

AHE 582. LEGAL ISSUES IN HIGHER EDUCATION. (3 Credits)
A comprehensive presentation and discussion of the law governing administration within community colleges and college/universities with a special emphasis on student services administration.

AHE 599. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: CSSA 599
This course is repeatable for 16 credits.

AHE 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 603. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 609. PRACTICUM CLINICAL EXPERIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 610. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.
AHE 611. QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH I. (3 Credits)
Foundational course to methods and statistics used in quantitative educational research. Examines data analysis, statistical procedures, and interpretation of results within postsecondary environments.

AHE 612. RESEARCH PERSPECTIVES IN EDUCATION. (3 Credits)
Research perspectives, how they are influenced by worldviews, and how these worldviews influence research.

AHE 613. RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION. (3 Credits)
Critical analysis of scholarly studies in education from a variety of research perspectives.

AHE 614. ADVANCED RESEARCH METHODS IN EDUCATION. (1-3 Credits)
Selected topics in research methods as appropriate for research perspectives in education. May be repeated. This course is repeatable for 6 credits.

AHE 615. RESEARCH ISSUES. (3 Credits)
A core course in the College of Education’s doctoral program that focuses on research issues.
Prerequisites: AHE 612 with C or better and AHE 613 [C] and AHE 614 [C]

AHE 616. QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH II. (3 Credits)
Develop conceptual and practical understanding of research and evaluation in higher education. Course topics include basic statistics, survey design, data analysis, and assessment issues. As an advanced statistics course, students will have the opportunity to apply concepts and gain direct research experience by conducting an original research project.
Prerequisites: AHE 611 with C or better

AHE 618. QUALITATIVE ANALYSIS IN EDUCATIONAL RESEARCH. (3 Credits)
Introduces learners to a variety of qualitative research perspectives and methodologies. Participants will examine these approaches by critiquing a scholarly article containing qualitative methods; formulating qualitative questions; writing a short proposal; collecting, coding, and analyzing data; and writing a final synthesis paper.

AHE 621. LEADERSHIP IN STUDENT SERVICES. (3 Credits)
Exploration of significant issues in design and delivery of student services in community college and higher education settings. Group discussion, model building, problem posing, issues analysis, and theory applications are employed. Students will reflect on current and future practices in student services, including emerging approaches to leadership.

AHE 638. HISTORY OF HIGHER EDUCATION. (3 Credits)
Surveys American higher education across 200-plus years of American history, with a specific emphasis in this section on the American community college.

AHE 640. HIGHER EDUCATION ADMINISTRATION. (3 Credits)
Current leadership and management theories and models, systems of organization, patterns of internal and external governance, and issues in institutional planning and advancement in higher education.

AHE 643. ORGANIZATION THEORY-HIGHER EDUCATION. (3 Credits)
An introduction to organizational theory (OT). The texts allow us to explore how systems thinking is applied to our world, and how we can use it to better understand the nature of human social engagement. Both OT and living systems theories are deeply associated with improvement and change theories in higher education settings and business.

AHE 645. ETHICAL PRACTICE. (3 Credits)
Reviews major ethical theories with an emphasis on practical applications related to community college professional practice.

AHE 653. INSTRUCTIONAL LEADER I. (3 Credits)
A core course in the College of Education’s doctoral program. Introduces major theories, theorists, and theoretical principles that will assist the learner in the understanding and development of systemic frameworks for instructional leadership.

AHE 672. RESEARCH PERSPECTIVES IN FOUR-YEAR HIGHER EDUCATION. (3 Credits)
An overview of the extensive research related to four-year colleges and universities, with an emphasis on the role of research in understanding and interpreting the nature of higher education. Explore research epistemologies, theories, and approaches related to social science and higher education, and how these ideas influence worldview and subsequent research. Identify a significant research topic/problem statement which will carry forward into the second year research courses in moving toward the dissertation topic for research related to four-year higher education.

AHE 673. RESEARCH INTERPRETATION IN FOUR-YEAR HIGHER EDUCATION. (3 Credits)
Critical analysis and interpretation of journal articles and scholarly research related to a problem statement in four-year higher education organization, learning, and/or leadership. Refinement of Sections 1 (Research Focus and Problem Statement) and II (Manuscript and Literature Review) of a Dissertation Proposal in four-year higher education.
Prerequisites: AHE 672 with C or better

AHE 674. ADVANCED RESEARCH METHODS IN FOUR-YEAR HIGHER EDUCATION. (3 Credits)
Identification and evaluation of an appropriate quantitative or qualitative study focused on four-year higher education. This includes a requirement that students demonstrate the ability to analyze and interpret data associated with their research question(s) as identified in their research proposal and that they outline the methodology that will be used to answer their research question(s)/proposal.
Prerequisites: AHE 673 with C or better

AHE 675. FOUR-YEAR HIGHER EDUCATION RESEARCH ISSUES. (3 Credits)
Finalize a dissertation proposal related to a research question on four-year education institutions that reflects research epistemologies, theories and approaches. Develop a dissertation draft for review by the student’s dissertation committee outlining: (a) Purpose of the student’s study and its significance within the context of research on four-year colleges and universities, (b) Review of related literature on the specific topic of the dissertation, and (c) Design of the dissertation study.
Prerequisites: AHE 674 with C or better

AHE 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 805. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

AHE 808. WORKSHOP. (1-4 Credits)
This course is repeatable for 16 credits.
Counseling

COUN 421. PERSONAL GROWTH AND WELLNESS IN THE MODERN WORLD. (3 Credits)
Explores social and emotional adjustment, growth, and wellness within current social contexts. Examines challenges to wellness and the role of normal development, self-help, and the helping professions in the growth process.

COUN 441. INTRODUCTION TO PROFESSIONAL COUNSELING. (3 Credits)
Provides students with an overview of the counseling profession that includes the history and philosophical foundations of the profession and roles and functions of professional counselors. The course content will critically engage the privilege and responsibility of the counseling profession in a multicultural society.

COUN 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

COUN 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

COUN 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

COUN 505. READING AND CONFERENCE. (1-3 Credits)
This course is repeatable for 16 credits.

COUN 506. PROJECTS. (1-3 Credits)
This course is repeatable for 16 credits.

COUN 507. SEMINAR. (1-3 Credits)
This course is repeatable for 16 credits.

COUN 508. WORKSHOP (1-16 Credits)
This course is repeatable for 16 credits.

COUN 509. PRACTICUM. (1-16 Credits)
Designed to develop competencies in basic skills, facilitative dimensions, and counseling process. Self-critique, peer-critique, and supervisor-critique of videotaped interview. Written self-critique, oral case presentation and charting skills are learned. Graded P/N.

COUN 510. INTERNSHIP. (1-18 Credits)
The internship is the culminating field experience of the MS in Counseling program. It is designed to provide students with an on-site placement in a public or private mental health or school setting that will create the necessary bridge between training and professionalism. Students are expected to perform per the expectations of other full-time employees and counseling staff at the internship site. Graded P/N.

COUN 513. COUNSELING PRE-PRACTICUM. (3 Credits)
Designed to develop competencies in basic counseling skills and processes. Self-critique, peer-critique, and supervisor-critique of videotaped interviews with peer clients. A pass requires at least B level work. Graded P/N.

COUN 514. PRACTICUM IN COUNSELING. (1-3 Credits)
Designed to develop competencies in basic skills, facilitative dimensions, and counseling process. Self-critique, peer-critique, and supervisor-critique of videotaped interview. Written self-critique, oral case presentation and charting skills are learned. A pass requires at least B level work. Graded P/N.

COUN 515. COUNSELING INTERNSHIP. (1-15 Credits)
The internship is the culminating field experience of the MS in Counseling program. It is designed to provide the student with an on-site placement in a public or private mental health or school setting that will create the necessary bridge between training and professionalism. Graded P/N. This course is repeatable for 24 credits.

COUN 530. FUNDAMENTALS OF COUNSELING. (3 Credits)
Exploration of basic helping processes appropriate in a variety of settings. Designed for students planning on working in a human service profession, such as counseling, teaching, nursing, medicine, law. A variety of skills and techniques are demonstrated and practiced through videotape and role play, and review of ethical standards of conduct.

COUN 531. DEVELOPMENTAL PERSPECTIVES IN COUNSELING. (3 Credits)
A study of affective, behavioral, cognitive, physical, and moral development for human growth and maturation. Theories of personality and learning that affect normal and non-normal development. Relationship of understanding human development to the counseling profession.

COUN 532. SOCIAL AND CULTURAL PERSPECTIVES IN COUNSELING. (3 Credits)
Social and cultural factors effecting counseling. Includes studies of change, ethnic groups, subcultures, changing roles of women, sexism, urban and rural societies, population patterns, cultural mores, use of leisure time, and differing life patterns.

COUN 533. ADDICTIVE BEHAVIOR COUNSELING. (3 Credits)
Techniques for addictive behavior assessment and counseling. Specific addictions covered include substance abuse, gambling, and eating disorders.

COUN 536. APPLIED PSYCHOPHARMACOLOGY FOR COUNSELORS. (3 Credits)
Acquaints counseling students with the fundamentals of psychotropic drugs. Basics of pharmacology, adverse effects, indications, and drug interactions will be discussed. Boundaries of practice and practical issues of assessment and referral will be covered. The overall aim of the course is to provide information about psychopharmacology to the non-medical mental health care provider so that she or he can be a more informed member of the mental health care team. This course does not purport to prepare the student to be any part of the pharmacological prescriptive process. That is the purview of the medically trained person.

COUN 540. NEW VISION SCHOOL COUNSELING: ACADEMIC ACHIEVEMENT. (3 Credits)
Participants will be able to implement research-based educational practices in: 1. Individual and group academic achievement counseling. 2. Consulting with parents, teachers, and schools regarding academic achievement. 3. Utilizing culturally competent practices in addressing academic achievement issues. 4. Applying the appropriate legal and ethical guidelines to work in the academic domain.

COUN 541. THE COUNSELING PROFESSION. (3 Credits)
Provides the foundation for becoming a counselor and explores the psychological and philosophical ramifications of the counselor in a changing world. Topics will include values in counseling, ethical and legal issues in counseling, research in counseling, and maintaining a professional identity.
COUN 546. LEADERSHIP OF SCHOOL COUNSELING PROGRAMS. (3 Credits)
Designed to prepare school counselors to lead teams in the development and implementation of comprehensive school counseling programs. Principles of leadership, system change, and advocacy are introduced. State and National Comprehensive School Counseling models are examined.

COUN 548. SPECIAL EDUCATION ISSUES IN COUNSELING. (3 Credits)
Addresses various educational disability categories, the fundamentals of special education law, the special education assessment process, the special education definition of emotional/behavioral disorders, and the counselor's role in supporting children with special emotional needs.

COUN 550. FOUNDATIONS OF MENTAL HEALTH COUNSELING. (3 Credits)
Addresses the foundations of mental health counseling: (1) historical, philosophical, societal, cultural, economic, and political dimensions of, and current trends in, the mental health movement; (2) roles, functions, preparation standards, credentialing, licensure and professional identity of mental health counselors, (3) policies, laws, legislation, recognition, reimbursement, right-to-practice, and other issues relevant to mental health counseling.

COUN 551. THEORY AND TECHNIQUES OF COUNSELING I. (3 Credits)
Basic concepts and facilitative skills of helping relationships. Introduction and overview of counseling theories and their related processes and techniques.

COUN 552. THEORY AND TECHNIQUES OF COUNSELING II. (3 Credits)
Continued development of the theories and techniques of counseling including identification of the counseling process. Emphasis on personality development and affective, behavioral and cognitive approaches.

COUN 556. INTRODUCTION TO RESEARCH METHODS IN COUNSELING. (3 Credits)
An introductory course for master's level students. Explains basic evaluation, quantitative and qualitative research methods in the counseling profession; action research and the fundamental statistical procedures used in the interpretation and use of research studies.

COUN 557. APPRAISAL OF THE INDIVIDUAL. (3 Credits)
Development of framework for understanding the individual; methods for data gathering and assessment; individual and group testing; case study approaches; observational, sociometric, and environmental procedures; study of individual differences. Ethnic, cultural, and sex factors are emphasized.

COUN 558. LIFESTYLE AND CAREER DEVELOPMENT. (3 Credits)
Major theoretical approaches to career development; available resources for educational and occupational assessment; procedures to enhance career exploration, planning and placement. Emphasis is on the decision-making process and issues of career counseling with special populations.

COUN 559. GROUP COUNSELING PROCEDURES. (3 Credits)
A conceptual and experiential introduction to group dynamics. Group counseling approaches and models; issues of group leadership; styles of leadership and group facilitation skills. Consideration is given to group counseling goals, composition, phases and research.

COUN 571. GROUP COUNSELING PROCEDURES. (3 Credits)
An overview of the major theoretical approaches to family counseling will be covered. Through the use of readings, demonstrations, and videos the student will become familiar with systems foundations, the history of family counseling, family roles, interaction patterns, and decision-making processes.

COUN 577. APPLIED PSYCHOPATHOLOGY AND PSYCHODIAGNOSTICS. (3 Credits)
Addresses the principles of diagnosis of psychopathology and the use of current diagnostic tools, including the current edition of the Diagnostic and Statistical Manual (DSM). Includes psychiatric terminology, treatment, current research, cross cultural impact, ethical implications, and goal planning related to mental health processes and case management.

COUN 578. CRISIS, TRAUMA, AND GRIEF COUNSELING. (3 Credits)
The theory and pragmatics of crisis, trauma and grief counseling are addressed.

COUN 579. TRAUMA-INFORMED COUNSELING. (3 Credits)
Trauma-informed counseling methods for promoting client wellness and resilience are addressed.

COUN 581. CROSS-CULTURAL COUNSELING. (3 Credits)
Cognitive and experimental study of social and psychological variables influencing the cross-cultural counseling relationship. Social and psychological experiences of selected subcultures. Relevant assessment instruments and current literature, methods and outcome studies.

COUN 582. MULTICULTURAL COUNSELING II. (3 Credits)
Further explores multicultural counseling by studying in-depth the experience of specific student populations and their unique strengths and needs. Students will gain understanding of the specialized school programs and state and national regulations that support a variety of learners as well as the theories and research related to language acquisition to support ELL and bilingual students in the PK-12 system. Students will engage in authentic experiences and assignments to enrich their understanding of sub-populations of students and their families to enhance their cultural responsiveness with those specific groups of learners.

COUN 581 with C or better

COUN 587 with C or better
COUN 599. SPECIAL TOPICS. (1-4 Credits)  
This course is repeatable for 90 credits.

COUN 601. RESEARCH. (1-16 Credits)  
This course is repeatable for 16 credits.

COUN 602. INDEPENDENT STUDY. (1-16 Credits)  
This course is repeatable for 16 credits.

COUN 603. THESIS. (1-16 Credits)  
This course is repeatable for 999 credits.

COUN 605. READING AND CONFERENCE. (1-16 Credits)  
This course is repeatable for 16 credits.

COUN 606. PROJECTS. (1-16 Credits)  
This course is repeatable for 16 credits.

COUN 607. SEMINAR. (1-16 Credits)  
This course is repeatable for 16 credits.

COUN 608. WORKSHOP. (1-16 Credits)  
This course is repeatable for 16 credits.

COUN 609. PRACTICUM IN COUNSELING. (1-12 Credits)  
Specialized counseling experiences supervised by a professional.  
Emphasis is on development of advanced skills in counseling specific to  
a population.  
This course is repeatable for 16 credits.

COUN 610. INTERNSHIP IN COUNSELING. (1-15 Credits)  
Designed to provide experiences in development of teaching and  
and supervision skills in preparation as a counselor educator and supervisor.  
This course is repeatable for 15 credits.

COUN 612. RESEARCH PERSPECTIVES IN EDUCATION. (3 Credits)  
Research perspectives, how they are influenced by worldviews, and how  
these worldviews influence research.

COUN 613. RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION. (3 Credits)  
Critical analysis of scholarly studies in education from a variety of  
research perspectives.

COUN 614. ADVANCED RESEARCH METHODS IN EDUCATION. (1-3 Credits)  
Selected topics in research methods as appropriate for research  
perspectives in education.  
This course is repeatable for 6 credits.

COUN 616. UNIVERSITY LEVEL INSTRUCTIONAL THEORY AND METHODS. (3 Credits)  
Addresses general university level instructional theory and methods as  
well as pedagogy specific to counselor education.

COUN 617. ADVANCED COUNSELOR SUPERVISION. (3 Credits)  
Advanced theory and techniques in counselor supervision.  
Pedagogical issues in training supervisors are addressed.

COUN 618. PRACTICUM IN COUNSELING. (1-12 Credits)  
Specialized counseling experiences supervised by a professional.  
Emphasis is on development of advanced skills in counseling specific to  
a population.  
This course is repeatable for 16 credits.

COUN 619. INTERNSHIP IN COUNSELING. (1-12 Credits)  
Designed to provide experiences in development of teaching and  
and supervision skills in preparation as a counselor educator and supervisor.  
This course is repeatable for 16 credits.

COUN 621. ADVANCED TOPICS IN EDUCATION. (3 Credits)  
Advanced critical study of theory and research related to specific topics  
of counseling and counselor education.  
This course is repeatable for 18 credits.

COUN 632. ADVANCED COUNSELING THEORY. (3 Credits)  
The goal of this course is to develop in each student an advanced level of  
understanding and skill in emergent counseling models.

COUN 633. ADVANCED COUNSELING PRACTITIONER I. (3 Credits)  
Assists the advanced counseling practitioner with their knowledge and  
skills in training, leadership, and writing.

COUN 634. ADVANCED COUNSELING PRACTITIONER II. (3 Credits)  
Addresses the theory, science, pragmatics and pedagogy of evidence-based practices in professional counseling.

COUN 662. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS I. (3 Credits)  
Part I of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education.  
Topics addressed in course I include application of the following in counselor education research: (1) data scales and scale transformation, (2) frequency distributions and histograms, (3) measures of central position, (4) variability, (5) characteristics of data curves, (6) normality, (7) measures of variability, (8) the statistical hypothesis, (9) statistical errors (Type I/Type II), (10) power analysis, and (11) statistical correlation.

COUN 663. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS II. (3 Credits)  
Part II of a three-part course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education.  
Topics addressed in course II include application of the following in counselor education research: (1) a review of the dependent variable, normal curve, Type I and Type II errors, power analysis, and criteria for selecting statistical tools, (2) significance tests, including Chi-square t-test, one-factor analysis of variance, multiple comparison tests (L.S.D. and Tukey’s HSD), two-factor analysis of variance, statistical interaction (ordinal and disordinal), linear regression, factor analysis, and analysis of covariance.

COUN 664. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS III. (3 Credits)  
Part III of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education.  
Topics addressed in course III include application of the following in counselor education research: (1) multiple regression, (2) path analysis, (3) confirmatory factor analysis, analysis, (4) logistic regression, (5) reliability and generalizability theory, (6) cluster analysis, (7) structural equation modeling, and (8) single subject designs.

COUN 665. PUBLICATION METHODS IN COUNSELOR EDUCATION. (3 Credits)  
Teaches doctoral students how to write theses, grant reports, peer-reviewed journal articles, and textbook chapters.

COUN 667. ADVANCED ASSESSMENT IN COUNSELING. (3 Credits)  
Explores current issues in the use of assessment in counseling, best practices in instrument development, and best practices in assessment pedagogy.
COUN 668. ADVANCED CAREER DEVELOPMENT AND CONSULTATION IN COUNSELING. (3 Credits)
An advanced course surveying past, current, and possible future technical and philosophical perspectives concerning career development and counseling. Issues in consultation, social change theory, and advocacy action planning are also reviewed in light of their impact on future counseling practitioners. Pedagogical methods for presenting current issues in career development, consultation, social change theory and advocacy action planning are a major focus of the class.

COUN 671. ADVANCED GROUP COUNSELING. (3 Credits)
Provides learning experiences beyond the entry level in group counseling. Theoretical and pedagogical innovations in this area are discussed.

COUN 681. ADVANCED DIVERSITY AND SOCIAL JUSTICE IN COUNSELOR EDUCATION. (3 Credits)
Addresses pedagogy relevant to multicultural, diversity, and social justice issues and the role of racial, ethnic, and cultural heritage, nationality, socioeconomic status, family structure, age, gender, sexual orientation, religious and spiritual beliefs, occupation, physical, and mental status, local, regional, national, international perspective, and issues of equity such as oppression, power and privilege in counselor education.

COUN 696. COUNSELOR EDUCATION. (3 Credits)
Orientation to the profession of counselor education. Specific topics include: (1) history and organization of the profession, (2) program accreditation standards and practices, (3) instructional theory and methods relevant to counselor education, and (4) ethical and legal considerations in counselor education.

COUN 697. COUNSELOR SUPERVISION. (3 Credits)
Practical experience for counseling professionals who have responsibility directing personal and professional development of counselors, promoting counselor competency, and developing and implementing counseling services and programs. Theoretical models of supervision are utilized to develop supervisor roles.

Education

ED 199. SPECIAL TOPICS. (1-16 Credits)
Students in this course receive training and experience in one-on-one and group tutoring in varied courses. They are then assigned tutees. This course is repeatable for 16 credits.

ED 216. *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY. (3 Credits)
Introduction to the historical, social, philosophical, political, legal and economic foundations of education in Oregon, the United States, and other countries in order to provide a framework from which to analyze contemporary educational and environmental issues in various schools, communities, and workplaces. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ED 216H

ED 216H. *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY. (3 Credits)
Introduction to the historical, social, philosophical, political, legal and economic foundations of education in Oregon, the United States, and other countries in order to provide a framework from which to analyze contemporary educational and environmental issues in various schools, communities, and workplaces. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ED 216

ED 219. CIVIL RIGHTS AND MULTICULTURAL ISSUES IN EDUCATION. (3 Credits)
Examination of the context of working with students, schools, communities, and workplaces; the diversity of learning cultures (e.g., urban, suburban, rural) and the diversity among learners within those different cultures; and the influence of culture on one’s learning.

ED 253. LEARNING ACROSS THE LIFESPAN. (3 Credits)
An exploration of how learning occurs at all ages from early childhood through adulthood. Covers major and emerging theories and styles, self-reflection on implications of how learning occurs for self and others, and the impact of these issues on the development and delivery of instruction.

ED 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ED 309. FIELD PRACTICUM. (3-6 Credits)
Placement in either an elementary, middle or secondary school. To assist students to develop competencies in dealing with children or adolescents according to the individual major of the university student. This course is repeatable for 18 credits.

ED 340. *SUPPORTIVE DIFFERENTIATED ENVIRONMENTS. (3 Credits)
Addresses special abilities and needs of learners and helps prepare teachers to develop strategies and instructional practices for diverse learners and students with exceptionalities in a supportive and inclusive classroom. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

ED 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ED 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ED 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ED 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ED 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ED 406. PROJECTS. (1-3 Credits)
This course is repeatable for 16 credits.

ED 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ED 408. WORKSHOP. (1-3 Credits)
Equivalent to: ED 408H
This course is repeatable for 16 credits.

ED 408H. WORKSHOP. (1-3 Credits)
Equivalent to: ED 408
Attributes: HNRS – Honors Course Designator

ED 409. PRACTICUM/CLINICAL EXPERIENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ED 410. INTERNSHIP/WORK EXPERIENCE. (1-18 Credits)
This course is repeatable for 18 credits.

ED 411. EDUCATIONAL PSYCHOLOGY, LEARNING AND DEVELOPMENT. (3 Credits)
An opportunity to begin the transition from student to teacher. Explores the relationship between human development and learning through the life cycle.
ED 412. LEARNING STYLES AND NEEDS IN ADOLESCENCE. (2 Credits)
Exploration of the particular learning styles and needs of the adolescent, major and emerging learning theories, individual learning styles including one's own learning styles, self-reflection on implications of how learning occurs, and the impact of these issues on the development and delivery of instruction.

ED 413. LEARNING ENVIRONMENTS I: FOSTERING CLASS ENGAGEMENT. (3 Credits)
Creating a positive culture in the classroom, managing student behavior, and engaging students in critical learning discourse are challenges faced by all educators. Students will learn to develop the components of a productive and safe learning environment.

ED 414. LEARNING ENVIRONMENTS II: ADVANCING EVERY STUDENT. (2 Credits)
Students will expand their knowledge about constructing a positive K-12 classroom environment to a productive learning environment accommodating the needs of a diversified student population.
Prerequisites: ED 413 with D- or better

ED 420. CLASSROOM MANAGEMENT. (3 Credits)
Build knowledge and learn techniques for cultivating a positive learning environment and for managing classrooms. Learn through examining the literature and observing relevant learning environments and classrooms. Explore factors that influence student behavior, including those associated with social and/or multicultural student populations.

ED 424. TEACHER AS REFLECTIVE PRACTITIONER. (2-3 Credits)
Designed to help teachers make complex judgments based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment.
Prerequisites: ED 407 with D- or better or TCE 407 with D- or better
This course is repeatable for 3 credits.

ED 425. CURRICULUM IMPLEMENTATION AND INSTRUCTIONAL STRATEGIES 7-12. (4 Credits)
The relationship of theory to practice in teaching the content areas in grades 7-12 is examined. General curriculum trends as well as content selection in specific endorsement/subject areas are explored. This course is preparation for and is coordinated with part-time student teaching.

ED 427. ALTERNATIVE ASSESSMENT FOR MIDDLE AND HIGH SCHOOL. (2 Credits)
Introduces methods of assessment that encourage effective learning. Students will design assessments aligned to national, state, and local standards as they prepare and implement a teaching unit in their practicum. Taken concurrently with TCE 410, Part-Time Student Teaching in Middle or High School.

ED 429. CURRICULUM, INSTRUCTION, AND ASSESSMENT FOR CTE. (3 Credits)
Build knowledge and skills in curriculum design, instructional strategies, and assessment for successful teaching in a Career and Technical Education and other specialty areas: (a) Agriculture Food and Natural Resource Systems, (b) Arts, Information and Communications, (c) Business Management, (d) Health Sciences (e) Human Resources, (f) Industrial and Engineering Systems, (g) Family and Consumer Sciences, (h) Career Trades.

ED 440. HUMAN DEVELOPMENT AND PSYCHOLOGY OF THE ADOLESCENT. (3 Credits)
Examines research from psychology, human development, and neuroscience to provide a holistic understanding of adolescents and learning with a focus on the middle/secondary student. Investigates the influence of family, neighborhood, peer, and school contexts on brain development; identity formation; and the challenges and opportunities of adolescence.

ED 450. FOUNDATIONS OF EDUCATION AND PLANNING. (4 Credits)
The first of three courses examining the iterative cycle of curriculum planning, instruction and assessment. An introduction to learning theory and the relationship between teaching and learning provide the foundation. An overview of the complete teaching cycle leads to a focus on curriculum planning based on state standards.

ED 452. USING DATA TO SUPPORT ALL STUDENTS. (3 Credits)
Teacher candidates will gather and analyze student data to inform instructional practice devoted to enhancing student learning; develop data literacy skills; differentiate instruction for targeted groups and individualized student learners while continuing to foster higher-order thinking and communication skills in the whole class: analyze patterns and gaps in individualized student learning; apply differentiated instruction and assessment strategies to support student growth; engage learners in goal setting; and identify teaching and assessment strategies to work with students with exceptional needs.
Prerequisites: ED 451 with C or better

ED 456. STRATEGIES FOR TEACHING LANGUAGE ARTS AND SOCIAL STUDIES. (3 Credits)
Exploration of language arts and social studies programs (e.g., children's literature, writing, special needs, spelling, and cultural factors). Development of research-based teaching strategies and assessment. Focuses on the development of inquiry approaches that reflect interdisciplinary curriculum as well as subject-specific pedagogy in the teaching of both social studies and language arts.

ED 457. TEACHING ELEMENTARY MATHEMATICS FOR UNDERSTANDING. (3 Credits)
Part of the Education Double Degree. Explores the teaching of mathematics in K-8 classrooms in a manner consistent with state and national standards. Students learn teaching strategies that incorporate the development of mathematical models and mental constructs.

ED 458. STRATEGIES FOR TEACHING WELLNESS AND FINE ARTS. (2 Credits)
Exploration of recent trends and research-based practices in the teaching of wellness, physical education, and fine arts. Includes strategies, assessments, special needs, integrating curriculum through developmentally appropriate practices, content standards, and the value of developing holistic learners through an effective wellness and fine arts program.

ED 465. ELEMENTARY METHODS: LITERACY. (4 Credits)
Understanding the theoretical and developmental foundations for literacy programs K-5; targeted reading, writing, listening, vocabulary, and speaking skill needs assessments; organizational strategies for teaching literacy; understanding dyslexia and how to differentiate instruction for students with dyslexia; and the integration of cultural diversity and social justice into literacy learning.
ED 466. ELEMENTARY METHODS II: MATHEMATICS. (4 Credits)
Exploration of the teaching of early childhood/elementary school mathematics with emphases on problem solving, connections, representation, communication, reasoning, and proof. Course will incorporate the development of mathematical models and mental constructs. Research-based, developmentally appropriate and culturally relevant practices will be incorporated into lessons.

ED 467. ELEMENTARY METHODS III: NATURAL AND SOCIAL SCIENCE. (4 Credits)
Inquiry approaches to the teaching and learning of the natural and social sciences are used to explore the structure of the disciplines and support the creation of instructional units that develop disciplinary knowledge and practices/skills while highlighting cross-cutting themes. Scientific literacy and civic competence are emphasized.

ED 470. BILITERACY INSTRUCTION. (3 Credits)
Explores literacy development in Spanish and English. Examines differences in literacy development across the two languages, as well as pedagogical approaches that leverage students’ home language and literacy practices. Explores equity and bias in classroom language practices. Taught bilingually in Spanish and English.
Prerequisites: ED 472 (may be taken concurrently) with C or better

ED 471. MULTILINGUAL LINGUISTICS. (3 Credits)
Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on academic language development and teaching implications for emergent bilingual students in Spanish-English K-12 dual language programs. Taught bilingually in Spanish and English.
Prerequisites: ED 472 (may be taken concurrently) with C or better

ED 472. FOUNDATIONS OF ESOL EDUCATION. (3 Credits)
Examines characteristics of English language learners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.

ED 473. INSTRUCTIONAL APPROACHES FOR ESOL EDUCATION. (3 Credits)
Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroom-based assessment, and use of technology to support student learning.
Prerequisites: ED 472 with C or better

ED 474. PROJECT-BASED MATHEMATICS. (3 Credits)
Building on the foundational concepts covered in ED 457 and ED 466/ED 566, students will plan and apply project-based lessons. Students will transfer knowledge and skills of mathematics to real world problems and will learn to teach with a project-based approach.

ED 475. INTEGRATED STEM. (3 Credits)
Students will continue to develop their pedagogical content knowledge in science, technology, engineering, mathematics, and integrated STEM. Students will develop a deeper understanding of the crosscutting concepts common to all science endeavors and will learn how to use these concepts to bridge across science or STEM curriculum units. Students will also examine and develop expertise in using science and engineering practices to lead students in authentic inquiry. Integrating crosscutting concepts, science and engineering practices, and disciplinary core ideas, students will learn and practice the development of curriculum and instruction utilizing the engineering design process.

ED 476. PARTNERSHIPS AND IDEOLOGIES IN ESOL EDUCATION. (3 Credits)
Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple ideologies in ESOL and building partnerships across schools, families, and communities.
Prerequisites: ED 472 with C or better

ED 477. DIFFERENTIATION FOR STUDENTS WITH SPECIAL NEEDS. (3 Credits)
Building on the foundational concepts covered in HDFS 431, this course goes into greater depth on how to provide students with a range of exceptionalities with education in the least restrictive environment. Teacher candidates will explore differentiated instruction techniques for students with special needs that can be used in both the regular education and pull out Special Education resource classrooms.

ED 478. SPECIAL EDUCATION LAW RIGHTS AND REGULATIONS. (3 Credits)
In-depth review of special education law and regulations that protect and provide educational rights for students with disabilities. Teacher candidates will leave the class understanding both the historical and current legal rights of students receiving special education and how to best meet those rights in both the regular and special education resource classrooms.

ED 479. LINGUISTICS FOR TEACHERS. (3 Credits)
Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications—from psycholinguistic, sociolinguistic, and critical perspectives—for emergent bilingual students in P-12 contexts.
Prerequisites: ED 472 with C or better

ED 480. TEACHING MATH TO SECONDARY LEARNERS IN CONTEXT. (3 Credits)
Enhance and reinforce mathematics embedded within occupational-specific curricula taught at the secondary level to prepare Career and Technical Education teachers for licensure.

ED 481. READING AND WRITING FOR SECONDARY LEARNERS IN CONTEXT. (3 Credits)
Enhance and reinforce the authentic reading and writing embedded within occupationally relevant materials to prepare Career and Technical Education teachers for licensure.

ED 483. DEVELOPMENTAL READING. (3 Credits)
Development of pedagogy in teaching of reading to elementary-aged students, including teaching of vocabulary, comprehension, phonics, fluency and motivation to read. Use of children’s literature, assessment approaches, and special needs students are also addressed. This is a PTCE course in the elementary Double Degree Program.

ED 484. INTRODUCTION TO CAREER AND TECHNICAL EDUCATION. (3 Credits)
A study of the history of Career and Technical Education, the impact of the educational reform on Career and Technical Education and workforce development. Topics include leaders in vocational education, legislative initiatives, social issues, and organizations involved in and impacting Career and Technical Education.

ED 492. TECHNOLOGY TOOLS FOR TEACHING. (2 Credits)
Teacher candidates will learn the technology skills needed to be successful as a classroom teacher. Topics range from exploration of how digital tools can be used in instruction, assessment, communication, and collaboration in educational settings to bring vibrant energy into student learning and engagement. The course also covers responsible digital citizenship, responsible use and ethics of technology in the classroom.
ED 493. READING, LITERATURE, AND LANGUAGE DEVELOPMENT IN THE CONTENT. (2 Credits)
Examination of reading, literature, and language development methods that can be used by middle school and high school teachers to support students' learning of content area information. Development of specific reading strategies in content areas.

ED 494. CONTENT STANDARDS AND CURRICULUM DEVELOPMENT FOR HIGH SCHOOL. (3 Credits)
Exploration of content standards, materials and methods appropriate for high school students. Develops skills in work sample methodology through the design of effective instruction, integrating a variety of methods with existing understandings of content area, how people learn, and the diverse communities in which they work.

ED 496. TECHNOLOGY FOR EDUCATORS. (3 Credits)
Explore the integration of current and emerging technologies into K-12 content areas by engaging learners in real world issues and learning in a social context. Integrate technologies that promote critical thinking, communication, collaboration, and creativity. Discuss technologies in terms of cultural linguistic diversity. Gain transferable skills. Taught via Ecampus only.

ED 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ED 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ED 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ED 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ED 505. READING & CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ED 506. PROJECTS. (1-3 Credits)
This course is repeatable for 16 credits.

ED 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ED 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ED 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ED 510. INTERNSHIP. (1-18 Credits)
By special permission and arrangement. This course is repeatable for 40 credits.

ED 513. LEARNING ENVIRONMENTS I: FOSTERING CLASS ENGAGEMENT. (3 Credits)
Creating a positive culture in the classroom, managing student behavior, and engaging students in critical learning discourse are challenges faced by all educators. Students will learn to develop the components of a productive and safe learning environment.

ED 514. LEARNING ENVIRONMENTS II: ADVANCING EVERY STUDENT. (2 Credits)
Students will expand their knowledge about constructing a positive K-12 classroom environment to a productive learning environment accommodated to fit the needs of a diversified student population.

Prerequisites: ED 513 with B or better

ED 515. LEARNING ENVIRONMENTS III: CULTURES AND COMMUNITIES. (2 Credits)
The third in a series of courses to assist the Teacher candidate in developing a classroom culture of learning that challenges every student to succeed and thrive. Teacher candidates will understand the important role that culture and community play in the teaching and learning process, and develop culturally responsive teaching practices.

Prerequisites: ED 513 with B or better and ED 514 [B]

ED 517. ACADEMIC WRITING FOR MASTER'S STUDENTS. (1 Credit)
A writing refresher that addresses academic voice, style, tone, construction, conventions, and writing style appropriate for master's-level research papers and capstones.

This course is repeatable for 2 credits.

ED 518. PROFESSIONAL PRACTICE IN THE TEACHING COMMUNITY. (2 Credits)
The professional themes of communication, collaboration, reflection, knowledge of learners, professional ethics, social justice and cultural understanding will be explored and applied to teaching contexts, behaviors, dispositions, and actions.

ED 519. CAPSTONE: TEACHING AS A PROFESSION. (3 Credits)
Capstone course for the MAT in which teacher candidates further develop their educational philosophy and analyze their professional growth in alignment with national standards.
