Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSLISTED as MATS 221.
Equivalent to: MATS 221
Recommended: One year of college science.

ENGR 248. ENGINEERING GRAPHICS AND 3-D MODELING. (3 Credits)
Introduction to graphical communication theory, including freehand sketching techniques, geometric construction, multi-view, pictorial, sectional and auxiliary view representation and dimensioning techniques. Practical application of theoretical concepts using solid modeling software to capture design intent and generate engineering drawings. Lec/Lab.

ENGR 299. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.
Equivalent to: ENGR 299H

ENGR 299H. SPECIAL TOPICS. (0-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 299H
This course is repeatable for 16 credits.

ENGR 350. *SUSTAINABLE ENGINEERING. (3 Credits)
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ENGR 350H

ENGR 350H. *SUSTAINABLE ENGINEERING. (3 Credits)
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 350H

ENGR 352. *CREATIVE COLLABORATION: DESIGNING AND BUILDING. (3 Credits)
Working in multi-disciplinary teams, design, implement, and document a piece of public art work or science museum display. Projects may be made of any media, but must demonstrate creativity both in the engineering used to create them and the technology and society message they convey. (Bacc Core Course) CROSSLISTED as ART 352.
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: ART 352

ENGR 363. *ENERGY MATTERS. (3 Credits)
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy use and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ENGR 363H
Recommended: MTH 112 or higher
ENGR 363H. *ENERGY MATTERS. (3 Credits)
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 363
Recommended: MTH 112 or higher

ENGR 390. ENGINEERING ECONOMY. (3 Credits)
Time value of money; economic study techniques, depreciation, taxes, retirement, and replacement of engineering facilities.

ENGR 391. ENGINEERING ECONOMICS AND PROJECT MANAGEMENT. (3 Credits)
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 391H

ENGR 391H. ENGINEERING ECONOMICS AND PROJECT MANAGEMENT. (3 Credits)
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 391

ENGR 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENGR 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENGR 407. SEMINAR. (1-16 Credits)
Graded P/N.
Equivalent to: ENGR 407H
This course is repeatable for 16 credits.

ENGR 407H. SEMINAR. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 407
This course is repeatable for 16 credits.

ENGR 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ENGR 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 499
This course is repeatable for 16 credits.

ENGR 531. APPLIED IMAGING AND IMAGE PROCESSING. (3 Credits)
Explore image formats, storage issues, characteristics and significance of histograms; define and explain image artifacts such as random and periodic noise. Implement different image processing operations such as filters, registration, and mathematical algorithms to enhance an image and facilitate subsequent segmentation such as histogram thresholding, cluster analysis, watershed analysis, etc. Make quantitative measurements from images, such as length, area, orientation, connectivity, anisotropy, and perimeter of objects, as well as porosities, surface areas and curvatures. Apply advanced image analysis via skeletonization, morphological/ topological analysis, surface generation/ triangulation etc.
This course is repeatable for 3 credits.

ENGR 550. PROFESSIONAL PREPARATION FOR ENGINEERS. (1 Credit)
Practical training on professional skills essential for a career as a practicing engineer. Covers development of networking and interviewing skills, preparation of a resume and related online media, and guidance on future professional development. As this is a graduate-level course, it will include guidance on how students can develop and present themselves in ways that differentiate their abilities from those of more junior engineers.

ENGR 555. FOUNDATIONS OF ENGINEERING EDUCATION RESEARCH AND PRACTICE. (3 Credits)
An examination as to why engineering education is practiced and researched the way that it is through reading, discussion and writing. The focus of the course will be on written and verbal interactions informed by careful reading of assigned texts.

ENGR 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Outdoor Products

OP 101. INTRODUCTION TO THE OUTDOOR PRODUCTS INDUSTRY. (4 Credits)

OP 231. EXPERIENCE OUTDOOR PRODUCTS - WATER. (2 Credits)
Hands-on experience with multiple water-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

Humanitarian Engineering Minor

The Humanitarian Engineering minor provides multidisciplinary academic course work for students interested in the application of engineering, science, and technology-based solutions to global development challenges such as access to basic resources (e.g., clean water, clean energy), improved quality of life, and increased ability to earn a livelihood particularly in rural, resource-limited or low-to-middle income settings. A core of course work in humanitarian engineering, science and technology (HEST) is required with an emphasis on engineering as demonstrated by completion of the engineering design class (with engineering prerequisites). Both in the core course work and in the electives, there is
an emphasis on context including social, cultural, economic, resource, political, and environmental.

**Minor Code: 769**

**Thematic Electives**

- Select from the following courses or new HEST courses that will be approved:
- There are two categories of baccalaureate core courses that will count for Bacc Core Playlist for Thematic Electives be counted towards the 13-credit HEST Core and towards the 11-credit service learning. However, 3 credits of than one category (Core, Thematic Electives, International or Service Learning Component). For example, 3 credits of granted, for example, for non-Bacc core courses in political science, public health, anthropology, sociology, engineering, economics, business, geography or others.

**Note on counting credits towards each category:** The credits from a single course cannot be applied to satisfy the credit requirements for more than one category (Core, Thematic Electives, International or Service Learning Component). For example, 3 credits of HEST 310 cannot count towards both 11-credit minimum for thematic electives AND 3 credits of service learning. However, 3 credits of HEST 310 could count towards a total of 14 credits thematic electives AND satisfy the service learning requirement at the 0-credit level. Similarly, 4 credits of ANTH 482 cannot be counted towards the 13-credit HEST Core and towards the 11-credit minimum of thematic electives.

**Bacc Core Playlist for Thematic Electives**

There are two categories of baccalaureate core courses that will count for thematic electives.

1. List I shows courses that are particularly recommended because of the relevance of material and/or instructor affiliation with the program.
2. List II contains all of the courses that will fulfill thematic elective credits for the minor.

### List I (recommended)

1 Each course in the global core also satisfies a baccalaureate core requirement. Students may complete some of these courses to fulfill their baccalaureate core while also applying those credits to the International Engineering minor if they choose.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**School of Chemical, Biological and Environmental Engineering**

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). The Bachelor of Science degrees in CHE, BIOE, and ENVE are each separately accredited by ABET, the Accreditation Board for Engineering and Technology. The Bachelor of Art degrees in CHE, BIOE, and ENVE are not accredited by ABET.

The goals of the CBEE undergraduate program are consistent with the mission and goals of the College of Engineering, and focus on creating work- and leadership-ready graduates who will be successful in professional careers as a chemical engineer, bioengineer, or environmental engineer in the private or public sectors, including industry, government, and consulting, as well as for continued graduate study in the same or closely related fields.

Chemical engineering (CHE) is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products on a manufacturing scale.

Bioengineering (BIOE) is an interdisciplinary field that applies scientific and engineering principles to the development of new biologics, materials, devices, and processes in the broad areas of bioprocess, biomedical, and bioenvironmental technology.
Environmental engineering (ENVE) is the engineering discipline that applies scientific and engineering principles to improve the natural environment, to provide healthy water, air, and land, and to remediate polluted sites.

The educational objectives and curriculum are described separately for each CHE, BIOE, and ENVE program. The school has a core undergraduate curriculum where CHE, BIOE, and ENVE students take common courses in first through senior years, including first-year engineering, process material and energy balances, thermodynamics and transport phenomena, and senior year laboratory.

The school also offers graduate programs in bioengineering, chemical engineering, and environmental engineering leading to MEng, MS, and PhD degrees.

Undergraduate Programs

Majors

- Bioengineering (p. 395)
- Chemical Engineering (p. 398)
- Environmental Engineering (p. 402)

Minor

- Environmental Engineering (p. 401)

Graduate Programs

Majors

- Bioengineering (p. 394)

Faculty

Professors Chang, Herman, Jovanovic, Koretsky, Rorrer, Semprini1, Wildenschild, Wood
Associate Professors Bothwell, Dolan, Harper, Higgins, Kelly, Nason, Rochefort
Assistant Professors AuYeung, Arnadottir, Baio, Feng, Fu, Giers, Goulas, Montfort, Navab Daneshmand, Radniecki, Schilke, Simon, Stoerzinger
Professional Practice Engineers Carlisle, Mallette
Linus Pauling Engineer Harding1

1 Licensed professional engineer

Biological Engineering

BIOE 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 340. BIOMEDICAL ENGINEERING PRINCIPLES. (3 Credits)
Application of engineering concepts (mass and energy conservation, thermodynamics, and transport phenomena) to cellular- and system-level human physiology; design considerations for biomedical interventions and devices.
Prerequisites: (BI 231 with C or better or Z 331 with C or better) and (CHE 332 [C] or CHE 332H [C])
Recommended: Completion or concurrent enrollment in BI 233 and (CHE 333 or CHE 333H)

BIOE 351. BIOMATERIALS AND BIOINTERFACES. (3 Credits)
Material interactions with human tissue, with emphasis on the role of interfacial chemistry and physics in cell adhesion, infection, blood coagulation and thrombosis. Preparation of functional hydrogels, material coatings, and derivitizations, including immobilized bio-active molecules. Issues surrounding regulation of implants and device failure.
Prerequisites: (BB 451 (may be taken concurrently) with C or better or BB 451H (may be taken concurrently) with C or better) and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])

BIOE 399. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: BIOE 399H
This course is repeatable for 16 credits.

BIOE 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 415. BIOENGINEERING LABORATORY. (3 Credits)
Laboratory experimentation with unit operations and processes in bioengineering; preparation of technical reports.
Prerequisites: CBEE 414 with C or better

BIOE 420. SOCIAL JUSTICE, ETHICS, AND ENGINEERING. (3 Credits)
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.
Prerequisites: CBEE 320 with C or better

BIOE 440. BIOCONJUGATION. (3 Credits)
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.
Prerequisites: BB 450 with C or better

BIOE 445. SURFACE ANALYSIS. (3 Credits)
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.
Prerequisites: BIOE 351 (may be taken concurrently) with C or better
BIOE 457. BIOREACTORS. (3 Credits)
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Prerequisites: (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

BIOE 459. CELL ENGINEERING. (3 Credits)
Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g., cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells.
Prerequisites: (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])
Recommended: BB 451 and CHE 333

BIOE 462. BIOSEPARATIONS. (3 Credits)
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.
Prerequisites: (BB 451 with C or better or BB 451H with C or better) and (CHE 332 [C] or CHE 332H [C])

BIOE 490. BIOENGINEERING PROCESS DESIGN. (4 Credits)
Prerequisites: CHE 333 with C or better or CHE 333H with C or better
Recommended: BIOE 457

BIOE 491. BIOENGINEERING PRODUCT DESIGN. (4 Credits)
Design of biomedical and biotechnology-based products. Applications of a structured design process, meeting customer needs and regulatory considerations to design.
Prerequisites: BIOE 490 with C or better

BIOE 492. BIOENGINEERING CAPSTONE DESIGN. (4 Credits)
Culminating experience in bioengineering design of processes and devices. Includes capstone project prototyping, testing and documentation, and constraints in ethics, intellectual property, standards, regulatory, and manufacturing.
Prerequisites: BIOE 491 with C or better

BIOE 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 503. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

BIOE 507. SEMINAR. (1 Credit)
Graded P/N.
This course is repeatable for 3 credits.

BIOE 511. CELLULAR AND MOLECULAR BIOENGINEERING. (3 Credits)
Fundamentals of mammalian cell biology, with an emphasis on biomedical applications and engineering approaches to study and manipulate cells and tissues.
Recommended: A working knowledge of cell biology and biochemistry

BIOE 512. MODELING OF PHYSIOLOGICAL SYSTEMS. (4 Credits)
Integration of engineering principles and human physiology in the areas of: transport phenomena in the cardiopulmonary and renal systems, bioelectricity in the nervous system, and mechanics of the musculoskeletal system.

BIOE 513. DRUG AND MEDICAL DEVICE REGULATIONS IN TECHNOLOGY DEVELOPMENT. (2 Credits)
Overview of the processes by which drugs and devices are regulated by the Food and Drug Administration. Topics include drug and device classifications, approval routes for different classes of drugs and devices, current good manufacturing practices, process validation, and quality assurance and control.

BIOE 520. SOCIAL JUSTICE, ETHICS, AND ENGINEERING. (3 Credits)
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.

BIOE 540. BIOCONJUGATION. (3 Credits)
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.
Recommended: BB 450

BIOE 545. SURFACE ANALYSIS. (3 Credits)
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.
Recommended: BIOE 351

BIOE 557. BIOREACTORS. (3 Credits)
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Recommended: (BB 451 or BB 451H) and (CHE 333 or CHE 333H)

BIOE 562. BIOSEPARATIONS. (3 Credits)
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.
Recommended: BB 451 and CHE 332

BIOE 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

BIOE 603. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 999 credits.

Chemical, Biological and Environmental Engineering

CBEE 101. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION. (3 Credits)
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/rec/lab.
Equivalent to: BIOE 101, CBEE 101H, CHE 101, ENVE 101

CBEE 101H. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION. (3 Credits)
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/rec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: CBEE 101
CBEE 102. ENGINEERING PROBLEM SOLVING AND COMPUTATIONS. (3 Credits)
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Prerequisites: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: BIOE 102, CBEE 102H, CHE 102, ENVE 102

CBEE 102H. ENGINEERING PROBLEM SOLVING AND COMPUTATIONS. (3 Credits)
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Prerequisites: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: CBEE 102

CBEE 111. ENGINEERING PROBLEM SOLVING FUNDAMENTALS. (3 Credits)
Engineering problem solving, dimensional analysis, sketches and drawings, algorithmic thinking, arrays and indexing, understanding the operating system and file handling, the concepts of programming languages and syntax, troubleshooting approaches to coding. Lec/rec.
This course is repeatable for 3 credits.

CBEE 211. MATERIAL BALANCES AND STOICHIOMETRY. (3 Credits)
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Prerequisites: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: BIOE 211, CBEE 211H, CHE 211, ENVE 211
Recommended: General chemistry and second-year standing in engineering

CBEE 211H. MATERIAL BALANCES AND STOICHIOMETRY. (3 Credits)
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: CBEE 211
Recommended: General chemistry and second-year standing in engineering

CBEE 212. ENERGY BALANCES. (3 Credits)
Energy balances, thermophysical and thermochemical calculations. Lec/rec.
Prerequisites: (CBEE 211 with C or better or CBEE 211H with C or better) and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: BIOE 212, CBEE 212H, CHE 212, ENVE 212
Recommended: One year general chemistry and second-year standing in engineering

CBEE 212H. ENERGY BALANCES. (3 Credits)
Energy balances, thermophysical and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (CBEE 211 with C or better or CBEE 211H with C or better) and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: CBEE 212
Recommended: One year general chemistry and second-year standing in engineering

CBEE 213. PROCESS DATA ANALYSIS. (4 Credits)
Applications of material and energy balances, with an emphasis on data analysis important to chemical engineers, bioengineers, and environmental engineers. Contextual learning is emphasized through the laboratory component and the use of process flow simulation modeling and analysis software.
Prerequisites: CBEE 212 (may be taken concurrently) with C or better and CBEE 212H (may be taken concurrently) with C or better
Equivalent to: BIOE 213, CHE 213, ENVE 213

CBEE 280. MATERIAL AND ENERGY BALANCES. (0-6 Credits)
Material balances, thermophysical, and thermochemical calculations. Energy balances, thermophysical and thermochemical calculations.
Prerequisites: MTH 256 (may be taken concurrently) with C or better or MTH 256H (may be taken concurrently) with C or better
This course is repeatable for 6 credits.

CBEE 320. PROFESSIONALISM AND ENGINEERING ETHICS. (3 Credits)
Introduction to engineering ethics. Topics include ethical theory, professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, risk and safety, loyalty and dissent, as well as overarching professional concerns.
Prerequisites: CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better
Equivalent to: BIOE 320

CBEE 414. *PROCESS ENGINEERING LABORATORY. (3 Credits)
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: BIOE 414, CBEE 414H, CHE 414, CHE 414H, ENVE 414

CBEE 414H. *PROCESS ENGINEERING LABORATORY. (3 Credits)
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisites: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: CBEE 414

CBEE 416. CBEE LABORATORY II. (3 Credits)
Integration of overall knowledge of chemical, biological, and environmental engineering through group project activities culminating with public demonstration or display of project results.
Prerequisites: CHE 415 with C or better or CHE 415H with C or better or BIOE 415 with C or better or ENVE 415 with C or better
Equivalent to: CHE 416

CBEE 507. SEMINAR. (1 Credit)
Graded P/N.
This course is repeatable for 3 credits.
Chemical Engineering

CHE 199. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: CHE 199H
This course is repeatable for 99 credits.

CHE 199H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 199

CHE 299. PROFESSIONAL WORKSKILLS. (1-16 Credits)
Equivalent to: CHE 299H
This course is repeatable for 99 credits.

CHE 311. THERMODYNAMICS. (3 Credits)
Entropy, the second law of thermodynamics, equations of state, and thermodynamic network.
Prerequisites: (CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better) and (MTH 256 [C] or MTH 256H [C])

CHE 312. CHEMICAL ENGINEERING THERMODYNAMICS. (3 Credits)
Thermodynamic mixtures, fugacity, phase equilibrium, and chemical reactions equilibrium.
Prerequisites: CHE 311 with C or better

CHE 320. SAFETY, ENGINEERING ETHICS AND PROFESSIONALISM. (3 Credits)
Introduction to engineering ethics and safety concepts. Topics include professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, loyalty and dissent, life-long learning, hazard identification, risk and safety, and process safety management.
Lec/rec.
Prerequisites: CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better

CHE 331. TRANSPORT PHENOMENA I. (4 Credits)
Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment.
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (CBEE 212 (may be taken concurrently) [C] or CBEE 212H (may be taken concurrently) [C])
Equivalent to: CHE 323, CHE 331H

CHE 331H. TRANSPORT PHENOMENA I. (4 Credits)
Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (CBEE 212 (may be taken concurrently) [C] or CBEE 212H (may be taken concurrently) [C])
Equivalent to: CHE 331

CHE 332. TRANSPORT PHENOMENA II. (3 Credits)
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Prerequisites: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332H

CHE 332H. TRANSPORT PHENOMENA II. (3 Credits)
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Attributes: HNRS – Honors Course Designator
Prerequisites: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332

CHE 333. TRANSPORT PHENOMENA III. (3 Credits)
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio.
Prerequisites: CHE 331 with C or better or CHE 331H with C or better or CHE 332 with C or better or CHE 332H with C or better
Equivalent to: CHE 333H

CHE 333H. TRANSPORT PHENOMENA III. (3 Credits)
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio.
Attributes: HNRS – Honors Course Designator
Prerequisites: CHE 331 with C or better or CHE 331H with C or better or CHE 332 with C or better or CHE 332H with C or better
Equivalent to: CHE 333

CHE 334. TRANSPORT PHENOMENA LABORATORY. (3 Credits)
Engineering lab practices and the application of the macroscopic balances of mass, energy, and chemical species; fluid flow, heat and mass transfer experiments by teams for demonstrations of principles established in previous transport phenomena courses.
Prerequisites: CBEE 213 (may be taken concurrently) with C or better and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])

CHE 336. CHEMICAL PROCESS DYNAMICS AND SIMULATION. (3 Credits)
Fundamental principles for process dynamic modeling used in the control of process variables such as pressure, temperature, flow rate and chemical composition.
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (CHE 331 [C] or CHE 331H [C])
Recommended: CBEE 102 and completion of concurrent enrollment in (CHE 331 or CHE 331H)

CHE 339. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

CHE 401. RESEARCH. (1-16 Credits)
Equivalent to: CHE 401H
This course is repeatable for 16 credits.

CHE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: CHE 405H
This course is repeatable for 16 credits.

CHE 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 405
This course is repeatable for 16 credits.

CHE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.
CHE 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 411. MASS TRANSFER OPERATIONS. (4 Credits)
Mass transfer operations; design of separation processes. Lec/rec.
Prerequisites: CHE 312 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 415. CHEMICAL ENGINEERING LABORATORY I. (3 Credits)
Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec.
Prerequisites: CBEE 414 with C or better and CHE 411 [C] and CHE 443 [C] and CHE 361 (may be taken concurrently) [C]
Equivalent to: CHE 415H, ENVE 415

CHE 417. INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGINEERING. (4 Credits)
Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
Prerequisites: CHE 332 with C or better or CHE 335 with C or better
Recommended: (CH 231 or CH 231H) and (CH 261 or CH 261H) and (CH 232 or CH 232H) and (CH 262 or CH 262H) and (CH 233 or CH 233H) and (CH 263 or CH 263H)

CHE 431. CHEMICAL PLANT DESIGN I. (3 Credits)
Short-cut techniques and other abbreviated and useful methods for specifying equipment sufficient for the preliminary design of processes and equipment; estimating capital and manufacturing costs based on equipment specifications.
Prerequisites: CHE 312 with C or better and CHE 411 [C] and CHE 443 [C]

CHE 432. CHEMICAL PLANT DESIGN II. (3 Credits)
Transformation of preliminary design to detailed design; introduction to safety, ethical, economical, and environmental considerations in chemical plant design.
Prerequisites: CHE 431 with C or better

CHE 443. CHEMICAL REACTION ENGINEERING. (4 Credits)
Design of chemical reactors for economical processes and waste minimization. Contacting patterns, kinetics and transport rate effects in single phase and catalytic systems.
Prerequisites: CHE 312 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 444. THIN FILM MATERIALS PROCESSING. (4 Credits)
Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization.
Prerequisites: CHE 443 (may be taken concurrently) with C or better
Recommended: CHE 443

CHE 445. POLYMER ENGINEERING AND SCIENCE. (4 Credits)
Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec.
Recommended: CH 334 and CH 335 and CH 336 and (MTH 256 or MTH 256H) and/or junior standing in engineering or science

CHE 450. CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS. (3 Credits)
Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.
Prerequisites: CHE 311 (may be taken concurrently) with C or better or ME 311 (may be taken concurrently) with C or better or ME 311H (may be taken concurrently) with C or better or CH 440 (may be taken concurrently) with C or better
Recommended: CHE 311

CHE 451. SOLAR ENERGY TECHNOLOGIES. (3 Credits)
A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems.
Prerequisites: CHE 311 (may be taken concurrently) with C or better or ME 311 (may be taken concurrently) with C or better or ME 311H (may be taken concurrently) with C or better or CH 440 (may be taken concurrently) with C or better
Recommended: CHE 311

CHE 452. ELECTROCHEMICAL ENERGY SYSTEMS. (3 Credits)
Introduces principles and processes of electrochemical energy storage and conversion systems. Topics include fundamentals of electrochemistry and concepts of electrochemical energy storage systems. Examples from batteries, fuel cells, supercapacitors devices will be discussed. Lec/rec.
Prerequisites: CHE 311 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 461. PROCESS CONTROL. (3 Credits)
Principles of PID feedback control based on models of chemical processes; analysis and implementation of proportional, integral and derivative tuning; cascade, feedforward, ratio and deadtime compensation; multivariable control and control system design issues and methods.
Prerequisites: (CHE 331 with C or better or CHE 331H with C or better) and (CHE 332 (may be taken concurrently) [C] or CHE 332H (may be taken concurrently) [C]) and CHE 361 [C]

CHE 499. SPECIAL TOPICS. (0-4 Credits)
This course is repeatable for 8 credits.

CHE 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 503. THESIS. (1-16 Credits)
This course is repeatable for 99 credits.

CHE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 514. FLUID FLOW. (4 Credits)
Fundamentals of fluid dynamics for Newtonian and non-Newtonian fluids; flow through porous media; two-phase flow. Lec/rec.
CHE 517. INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGINEERING. (4 Credits)
Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
Recommended: (CH 231 and CH 261 and CH 232 and CH 262 and CH 233 and CH 263)

CHE 520. MASS TRANSFER I. (4 Credits)

CHE 525. CHEMICAL ENGINEERING ANALYSIS. (4 Credits)
Modeling of physical and chemical processes; mathematical analysis of models with appropriate advanced techniques.

CHE 537. CHEMICAL ENGINEERING THERMODYNAMICS I. (4 Credits)
Applications of the fundamental laws of thermodynamics to complex systems. Properties of solutions of non-electrolytes. Phase and chemical equilibrium.

CHE 540. CHEMICAL REACTORS I. (4 Credits)
Catalysis, reactions coupled with transport phenomena. Reactors for high tech applications.

CHE 541. CATALYSIS. (3 Credits)
Introduction to topics related to catalysts and catalytic reactions. Course covers catalytic reaction mechanisms and kinetics, catalyst characterization and testing, and catalyst preparation and manufacturing processes.

CHE 542. MOLECULAR ASPECTS OF HETEROGENEOUS CATALYSIS. (3 Credits)
Introducing the principles of heterogeneous catalysis from the molecular aspect with emphasis on computational molecular approaches and surface science. The role of surface structure in heterogeneous catalytic reactions and surface interactions, development and analysis of reaction kinetics through microkinetic modeling approaches will be covered. A class project will utilize Density Functional Theory software to calculate catalytic properties of model systems.
Prerequisites: CHE 540 with C or better

CHE 544. THIN FILM MATERIALS PROCESSING. (4 Credits)
Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec.
Recommended: CHE 443 or CHE 543

CHE 545. POLYMER ENGINEERING AND SCIENCE. (4 Credits)
Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec.
Recommended: CH 334 and CH 335 and CH 336 and MTH 256

CHE 550. CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS. (3 Credits)
Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.
Recommended: CHE 311 or ME 311 or ME 311H

CHE 551. SOLAR ENERGY TECHNOLOGIES. (3 Credits)
A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems.
Recommended: CHE 311

CHE 552. ELECTROCHEMICAL ENERGY SYSTEMS. (3 Credits)
Introduces principles and processes of electrochemical energy storage and conversion systems. Topics include fundamentals of electrochemistry and concepts of electrochemical energy storage systems. Examples from batteries, fuel cells, supercapacitors devices will be discussed. Lec/rec.
Recommended: CHE 311 AND (CHE 333 or CHE 333H)

CHE 581. SELECTED TOPICS. (3 Credits)
Non-sequence course designed to acquaint students with recent advances in chemical engineering. Topics vary from term to term and from year to year. May be repeated for credit. This course is repeatable for 9 credits.

CHE 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

CHE 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CHE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CHE 611. ELECTRONIC MATERIALS PROCESSING. (3 Credits)
Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as ECE 611.
Equivalent to: CHE 571, ECE 611

CHE 612. PROCESS INTEGRATION. (3 Credits)
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as ECE 612.
Equivalent to: CHE 572, ECE 612
Recommended: CHE 611 or ECE 611

CHE 613. ELECTRONIC MATERIALS AND CHARACTERIZATION. (3 Credits)
Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as ECE 613.
Equivalent to: CHE 573, ECE 613
Environmental Engineering

ENVE 199. SPECIAL TOPICS. (1-16 Credits)
Seminar course that includes invited speakers. Open to all students interested in learning about the Environmental Engineering undergraduate program and potential career opportunities. Graded P/N. This course is repeatable for 16 credits.

ENVE 299. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: ENVE 299H
This course is repeatable for 16 credits.

ENVE 299H. SPECIAL TOPICS. (0-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENVE 299
This course is repeatable for 16 credits.

ENVE 321. ENVIRONMENTAL ENGINEERING FUNDAMENTALS. (4 Credits)
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution.
Prerequisites: MTH 256 with C or better or MTH 256H with C or better

ENVE 322. FUNDAMENTALS OF ENVIRONMENTAL ENGINEERING. (4 Credits)
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution.
Prerequisites: ((CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 225H with C or better) and (MTH 256 [C] or MTH 256H [C]))

ENVE 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 406. SPECIAL PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 407. SEMINAR. (1-16 Credits)
Equivalent to: ENVE 407H
This course is repeatable for 16 credits.

ENVE 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ENVE 407
This course is repeatable for 16 credits.

ENVE 410. OCCUPATIONAL INTERNSHIP. (1-12 Credits)
This course is repeatable for 12 credits.

ENVE 415. ENVIRONMENTAL ENGINEERING LABORATORY. (3 Credits)
Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec.
Prerequisites: CBEE 414 with C or better
Equivalent to: CHE 415

ENVE 421. DRINKING WATER TREATMENT PROCESSES. (4 Credits)
Characterization and treatment of drinking water sources including engineering principles for the selection and design of treatment processes. Lec/rec/lab.
Prerequisites: ENVE 322 with C or better

ENVE 422. WASTEWATER TREATMENT PROCESSES. (4 Credits)
Characterization and treatment of municipal and industrial wastewaters including engineering principles for the selection and design of treatment processes. Lec/rec.
Prerequisites: ENVE 421 with C or better

ENVE 425. AIR POLLUTION CONTROL. (3 Credits)
Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec.
Prerequisites: ENVE 321 with C or better or ENVE 322 with C or better

ENVE 431. FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS. (4 Credits)
Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec.
Prerequisites: ((CH 123 with C or better or CH 223 with C or better or CH 226H with C or better or CH 233 with C or better) and (CH 140 [C] or CH 331 [C] or CHE 331H [C]) and (ENVE 321 [C] or ENVE 322 [C]) and ENVE 421 [C])

ENVE 456. SUSTAINABLE WATER RESOURCES DEVELOPMENT. (3 Credits)
Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 457. BIOREACTORS. (3 Credits)
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Prerequisites: CHE 333 with C or better and ENVE 322 [C]

ENVE 490. ENVIRONMENTAL ENGINEERING DESIGN. (4 Credits)
Open-ended design of environmental processes including development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. Lec/rec.
Prerequisites: ENVE 421 with C or better and ENVE 422 [C]

ENVE 499. SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING. (1-4 Credits)
A critical examination of topics selected by the instructor from among topics not covered in other environmental engineering courses. This course is repeatable for 4 credits.

ENVE 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ENVE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 507. SEMINAR. (1-16 Credits)
One-credit seminar. Graded P/N. This course is repeatable for 16 credits.

ENVE 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ENVE 521. DRINKING WATER TREATMENT PROCESSES. (4 Credits)
Characterization and treatment of drinking water sources including engineering principles for the selection and design of treatment processes. Lec/rec/lab.
Recommended: ENVE 322
ENVE 522. WASTEWATER TREATMENT PROCESSES. (4 Credits)
Characterization and treatment of municipal and industrial wastewaters including engineering principles for the selection and design of treatment processes. Lec/rec.
Recommended: ENVE 421
ENVE 525. AIR POLLUTION CONTROL. (3 Credits)
Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects.
Lec/rec.
Recommended: ENVE 321 or ENVE 322
ENVE 531. FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS. (4 Credits)
Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec.
Recommended: (CH 123 or CH 223 or CH 226H or CH 233) and (CH 440 or CHE 331 or CHE 331H) and (ENVE 321 or ENVE 322) and ENVE 421
ENVE 532. AQUATIC CHEMISTRY: NATURAL AND ENGINEERED SYSTEMS. (4 Credits)
Low temperature thermodynamic and selective kinetic treatments primarily of the inorganic chemistry groups, but also organic ligands and surface active groups, of natural and engineered waters; thermodynamic principles and computational techniques for prediction of equilibrium speciation; comparison of predictions to observations; computer laboratory. Lec/rec.
Equivalent to: OC 532
Recommended: One year of college-level chemistry (CH 221 and CH 222 and CH 223) or (CH 231 or CH 231H) and (CH 232 or CH 232H) and (CH 233 or CH 233H); a minimum of one year organic or physical chemistry; and concurrent enrollment in ENVE 536 and/or OC 652
ENVE 535. PHYSICAL AND CHEMICAL TREATMENT PROCESSES. (4 Credits)
Fundamental principles of physical and chemical processes relevant for the treatment of contaminants in environmental matrices (e.g. water, air and soil).
Prerequisites: ENVE 532 with C or better
Equivalent to: ENVE 538
ENVE 536. AQUEOUS ENVIRONMENTAL CHEMISTRY LABORATORY. (1 Credit)
Laboratory investigation of acid/base equilibria, coordination chemistry, and precipitation/dissolution chemistry.
Corequisites: ENVE 532
ENVE 541. MICROBIAL PROCESSES IN ENVIRONMENTAL SYSTEMS. (4 Credits)
Energetics kinetics and stoichiometry of microbial transformations of organic and inorganic compounds. Mathematical models of biodegradation.
ENVE 542. MICROBIAL PROCESS DESIGN FOR MUNICIPAL AND HAZARDOUS WASTES. (4 Credits)
Principles and design of microbial processes for treatment of municipal and hazardous wastes.
Prerequisites: ENVE 541 with C or better
ENVE 545. MICROBIAL METHODS IN ENVIRONMENTAL ENGINEERING. (3 Credits)
Covers the principles of microbiological methods pertinent to environmental engineers with an emphasis on applications in drinking water treatment, wastewater treatment, and soil remediation. The course is targeted at engineering students that do not have much experience with culture-based and molecular-based techniques.
Prerequisites: ENVE 541 with C+ or better
ENVE 554. GROUNDWATER REMEDIATION. (4 Credits)
ENVE 556. SUSTAINABLE WATER RESOURCES DEVELOPMENT. (3 Credits)
Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.
ENVE 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.
ENVE 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
ENVE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.
ENVE 699. SELECTED TOPICS IN ENVIRONMENTAL ENGINEERING. (1-4 Credits)
A critical examination of topics selected by the instructors from among topics not covered in other environmental engineering courses.
Equivalent to: ENVE 611
This course is repeatable for 8 credits.

Bioengineering Graduate Major (MENG, MS, PhD)
Graduate Areas of Concentration
Biomaterials, biomedical devices and instrumentation, human performance engineering, medical imaging, systems and computation biology

The School of Chemical, Biological, and Environmental Engineering offers Master of Engineering (MEng), Master of Science (MS), and Doctor of Philosophy (PhD) degrees in Bioengineering. Students can choose from among the following areas of concentration: Biomaterials, Biomedical devices and Instrumentation, Human Performance Engineering, Medical Imaging, and Systems and Computational Biology. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between CBEE and other engineering departments and research centers on campus, makes tailored individual programs possible. The department originates and encourages programs ranging from those that are classically bioengineering to those that are distinctly interdisciplinary.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Major Code: 3080
Students enrolled in the MEng and MS degree programs will complete at least 45 graduate credits. For students in the MS program, 12 of those credits must be thesis credits (BIOE 503). Students enrolled in the PhD program will complete at least 108 graduate credits. At least 36 of those credits must be non-blanket course work, and at least 36 must be thesis credits (BIOE 603).

Students in all Bioengineering graduate programs (MEng, MS and PhD) will be required to complete the program core curriculum for a total of 15 credits. The remaining credits required for completion of the degree program will be electives, and may include courses in science, mathematics, engineering or other topics (e.g., entrepreneurship). An abundance of courses are currently offered at OSU that could fulfill the elective requirements, including several courses related to bioengineering offered within the College of Engineering. In addition, the College of Veterinary Medicine’s graduate program in Comparative Health Sciences includes various course offerings that can serve as electives for Bioengineering graduate students. These include courses in Animal Sciences includes various course offerings that can serve as electives for Bioengineering graduate students. Including course in bioinformatics, epidemiology, genomics and immunology.

All students submit a program of study during their first quarter in the program specifying the elective courses they plan to take to complete their degree requirements. Programs of study will be reviewed by a committee of BIOE program faculty to ensure that the program has sufficient breadth and depth in the context of the student’s planned research activities.

Bioengineering Undergraduate Major (BA, BS, HBA, HBS)

This program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Bioengineering is an interdisciplinary field that applies engineering principles and quantitative methods to the development of new and novel biologicals, materials, devices, and processes. In practice, bioengineers address issues surrounding the broad areas of bioprocess, biomedical, and bioenvironmental technology.

The Bioengineering Undergraduate Program provides a solid background in biology, chemistry, physics and math, in addition to the engineering sciences. Upper-level course work in bioengineering includes analysis and design of processes involving suspension and immobilized microbial cultures and the recovery of therapeutic products from bioreactors, as well as courses in biomedical materials engineering, biomedical engineering principles, and selection course work in cell engineering, surface analysis and bioconjugation. All students complete a capstone-design experience that integrates drug and medical device regulation.

Bioengineering graduates are prepared to contribute to the rapidly growing bioscience-based industries with the ability to formulate and solve problems pertaining to enzyme and microbial process technologies, mammalian cell culture, and downstream processing in biotechnology. They also generate solutions to problems with medical relevance, including the design of devices and systems to replace lost organ function, deliver therapeutic agents, and otherwise improve human health.

Alumni of the Bioengineering program will be work-ready engineers, problem solvers, responsible professionals, and interdisciplinary collaborators. Specifically, within a few years after graduation, they will have:

1. obtained employment in the bioprocess and biotechnology industries and/or entered graduate studies in bioengineering, chemical, environmental, or biomedical engineering and/or gained admission to professional schools including health-professional programs and law programs;
2. created value through solving problems at the interface of engineering and biology, whether in a manufacturing, research, or clinical environment;
3. pursued professional development in order to fulfill their professional and ethical responsibilities, and they will have recognized and responded to evolving contemporary questions at the interface of biosciences, technology, and society; and
4. created value through effectively communicating with a diverse set of professionals, and facilitating meaningful collaboration between bioscientists and other engineers.

The Bioengineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through the senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena and senior laboratory.

Chemical Engineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

Chemical engineering

The School of Chemical, Biological and Environmental Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between the school and other engineering departments and schools and research centers on campus, makes tailored individual programs possible. The school originates and encourages programs ranging from those that are classically chemical engineering to those that are distinctly interdisciplinary.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Major Code: 3030
In addition to Graduate School mandated preliminary and final exams, PhD students in chemical engineering must successfully complete a qualifying exam, the details and timing of which can be found in the chemical engineering graduate student handbook

**Major Code: 3030**

### Chemical Engineering Graduate Minor

The Graduate Minor in Chemical Engineering is for masters and doctoral level students who seek additional formal training and mentoring in chemical engineering. Students pursuing a Minor in Chemical Engineering must include at least one Chemical Engineering faculty member on their committee. This faculty member must be engaged in the development of the student’s Program of Study and in the case of Doctoral students, their dissertation research; therefore, it is recommended that this faculty member be identified early in the doctoral program.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

### Chemical Engineering Undergraduate Major (BA, BS, HBA, HBS)

This program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Chemical engineering is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products at a manufacturing scale. These include products found in everyday life such as transportation and heating fuels, plastics, pharmaceuticals, household and paper products (soaps, cosmetics, health care and cleaning products, etc.), as well as more advanced products like solar cells, computer chips, and advanced composites for jet aircraft.

Chemical engineers find employment in traditional chemical industries such as pulp and paper manufacturing and petroleum refining, high-tech industries such as semiconductor device manufacturing, biopharmaceutical production, aerospace, and emerging industries, particularly in sustainable energy.

Alumni of the Chemical Engineering program will be work-ready engineers, problem solvers, responsible professionals, and interdisciplinary collaborators. Specifically, based on the needs of the program’s constituencies, within a few years of graduation chemical engineering alumni will have:

1. Obtained professional employment in a company, institute or agency within the chemical or related industries, entered a graduate program in chemical engineering or a related field or gained admission to a professional program such as medicine, law or business.
2. Created value by applying appropriate modern chemical engineering tools to the analysis, design, and control of chemical, physical, and/or biological processes, including the hazards associated with these processes.
3. Continued to develop their skills and knowledge through professional activities including FE/PE certifications, memberships in professional organizations and continuing education courses in order to fulfill their professional and ethical responsibilities through lifelong learning.
4. Demonstrated good communication skills and worked effectively in cross-functional team environments comprised of a diverse set of members with varying organizational backgrounds, positions, and geographic locations.

The chemical engineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, material and energy balances, thermodynamics, transport phenomena, and senior year laboratory.

Chemical engineering students have opportunities to obtain internships offered through the School of CBEE, and through the Multiple Engineering Cooperative Program (MECOP) program. Many scholarships are also available on a competitive basis for chemical engineering undergraduate students.

### Environmental Engineering Graduate Major (MENG, MS, PhD)

#### Graduate Areas of Concentration

**Bioremediation,** environmental fluid mechanics, environmental microbiology, environmental modeling, multiphase phenomena, subsurface flow and transport, water and wastewater treatment

The School of Chemical, Biological and Environmental Engineering offers graduate curricula leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Environmental Engineering. The ENVE program prepares individuals to apply mathematical and scientific principles to the design, development and operational evaluation of systems for controlling contained living environments and for monitoring and controlling factors in the external natural environment. Specific application areas include pollution control, waste and hazardous material disposal, health and safety protection, conservation, life support, and requirements for protection of special materials and related work environments, as well as emerging areas including sustainability, detection and treatment of emerging contaminants and their fate in the natural environment, water supply for a growing world population, and mitigation of the effects of climate change, among others. All programs are tailored to individual student needs and professional goals.

A diversity of faculty interests, broadened and reinforced by cooperation between the school and other engineering departments and schools and research centers on campus, make tailored individual programs possible.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

#### Program Structure

**Enrollment:**
- MEng Degree
- MS Degree
- PhD Degree

**Course Hours:**
- 132-133
- 152-153
- 192-193

**Minimum Hours:**
- 192

**Minimum GPA:**
- 3.0

**Graduation Requirement:**
- 192

**Reading Intensive Course (RIC):**
- Writing Language (WIC)
- Writing Intensive Course (WIC)
- Must be selected to satisfy the requirements of the baccalaureate core

ENVE 521  DRINKING WATER TREATMENT PROCESSES 4
ENVE 522  WASTEWATER TREATMENT PROCESSES 4
ENVE 531  FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS

In addition to Graduate School mandated preliminary and final exams, PhD students in environmental engineering must successfully complete a qualifying exam, the details and timing of which can be found in the environmental engineering graduate student handbook.

ENVE 521 and ENVE 522 will not count towards the credit requirements for the MEng, MS, and PhD degrees

Major Code: 3310

Environmental Engineering Graduate Minor

The Graduate Minor in Environmental Engineering is for masters and doctoral level students who seek additional formal training and mentoring in environmental engineering. Students pursuing a Minor in Environmental Engineering must include at least one Environmental Engineering faculty member on their committee. This faculty member must be engaged in the development of the student’s Program of Study and in the case of Doctoral students, their dissertation research; therefore, it is recommended that this faculty member be identified early in the doctoral program.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Environmental Engineering Graduate Minor

Major Code: 310

Environmental Engineering Minor
Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS)

This program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The ENVE program draws upon a strong foundation in the basic sciences and prepares students for environmental engineering careers in consulting, industry, and state and local governments. It is a rigorous program incorporating course work in civil and chemical engineering, water and wastewater treatment, hazardous substance management, air pollution, and environmental health. The concept of environmental engineering design is introduced during the freshman year, with most of the design skills developed at the junior and senior level. Training culminates in a team approach to the solution of open-ended, realistic problems that incorporate aspects of economics, process operation and maintenance, process stability and reliability, and consideration of constraints. A more detailed explanation of the design experience and design course sequences is contained in the "Undergraduate Advising Guide for the Environmental Engineering Program," which may be obtained from the school or viewed on the school's website (http://cbee.oregonstate.edu/undergraduate-advising).

Alumni of the environmental engineering program will be ready engineers prepared with the knowledge and skills necessary to solve contemporary environmental engineering problems. Specifically, within a few years of graduation, they will have:

1. gained employment in the field of environmental engineering and/or matriculated in an environmental engineering or related graduate or professional program;
2. created value by analyzing and designing sustainable solutions to problems involving water, air, and soil pollution abatement and prevention;
3. successfully communicated or defended designs and decisions through reference to fundamental concepts of math, science, and engineering;
4. facilitated collaboration and built strong professional relationships by working successfully in multi-disciplinary teams and effectively communicating with a diverse group of stakeholders;
5. actively participated in professional development activities that demonstrate a commitment to sound professional and ethical practices, and the protection of human health and the environment; and
6. achieved Engineer in Training (EIT) certification by passing the Fundamentals of Engineering exam and gained experience relevant for professional licensure.

The environmental engineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences in the first year through senior levels, and structured collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena, and senior year unit operations.

Environmental engineering students have opportunities to obtain internships offered through the School of CBEE, and through the College of Engineering Multiple Engineering Cooperative Program (MECOP) program. Many scholarships are also available on a competitive basis for environmental engineering undergraduate students.

Minor Code: 310

Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS)

* Baccalaureate Core Course (BCC)
† Writing Intensive Course (WIC)
• Contact the School of Chemical, Biological and Environmental Engineering for questions about alternate elective courses
The mission of the School of Civil and Construction Engineering is that of the College of Engineering (see college statement on mission and goals), as well as providing a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering and constructor positions with business, industry, consulting firms, or government.

Education in the basic sciences occurs primarily in the freshman and sophomore years. Engineering science is introduced at the sophomore year and continues through to graduation with a combination of required courses and technical electives. Completion of the OSU Baccalaureate Core provides experience in the humanities, social sciences, and other nontechnical areas as additional preparation for a student’s profession and life.

The CCE School offers an undergraduate option in environmental engineering that provides education in water pollution, air pollution, solid wastes, and hazardous wastes.

The growing complexity of modern engineering practice requires further specialization in one or more engineering disciplines. This is generally attained through postgraduate study. The CCE School offers MEng, MS, and PhD programs with concentrations in civil engineering, coastal and ocean engineering, construction engineering management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering.

Areas of concentration may be combined to form an integrated civil engineering MS program, MEng program, or MEng, MS, and PhD minors.

The school also participates in the Master of Arts in Interdisciplinary Studies program.

* Baccalaureate Core Course (BCC)
² Writing Intensive Course (WIC)
¹ Prerequisite for several upper-division courses
² Must be selected to satisfy the requirements of the baccalaureate core
Civil Engineering

CE 199. SPECIAL TOPICS. (1-4 Credits)
Introductory design principles presented with the use of GIS and
geospatial information (remote sensing, GPS, surveying, and aerial
photography) for civil engineering problem solving. Introduction to the
integration of geospatial data and analysis for decision making and
management for site selection, mitigation, change analysis, modeling
and assessment. Standard software and custom programming used in
course. Students participate in both individual and team projects and
presentations. Projects from the area of civil engineering. Lec/lab.
Prerequisites: CE 201 with C or better or CCE 201 with C or better
or ENGR 248 with C or better

CE 299. SPECIAL TOPICS. (1-4 Credits)
Graded P/N.
Equivalent to: CE 299H

CE 299H. SPECIAL TOPICS. (1-4 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 299

CE 301. CE JUNIOR SEMINAR. (1 Credit)
Professional practices of civil engineering.

CE 311. FLUID MECHANICS. (4 Credits)
Fluid properties, fluid statics, fluid motion, conservation of mass,
momentum and energy for incompressible fluids, dimensional analysis,
civil engineering applications.
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better)
and PH 213 [C] and ENGR 213 [C] and ENGR 212 [C]

CE 313. HYDRAULIC ENGINEERING. (4 Credits)
Analysis of large civil engineering fluid systems including conduit flow,
multiple reservoirs, pipe networks, pumps, turbines, open channel flow,
and hydraulic structures.
Prerequisites: CE 311 with C or better or CHE 331 with C or better or
CHE 331H with C or better

CE 361. SURVEYING THEORY. (4 Credits)
Use of surveying equipment, Gaussian error theory applied to
measurements, calculations of position on spherical and plane surfaces,
state plane coordinate systems, introduction to global positioning
systems.
Prerequisites: (CCE 201 with C or better or CE 202 with C or better) and
ENGR 213 [C] and PH 213 [C] and ST 314 [C]

CE 365. HIGHWAY LOCATION AND DESIGN. (3 Credits)
Curve problems in highway design, including circular, vertical, compound
curves and spirals; earth distribution analysis; preliminary office studies;
paper location procedures and field layout problems.
Prerequisites: CE 361 with C or better or CEM 263 with C or better or
FE 208 with C or better

CE 372. GEOTECHNICAL ENGINEERING I. (4 Credits)
Basic soil mechanics including the identification and classification of soil,
principles of compaction and consolidation, flow through porous media,
effective stress, and shear strength. Lec/lab.
Prerequisites: ENGR 213 with C or better or ENGR 213H with C or better
and (CE 311 may be taken concurrently) [C] or CEM 311 (may be taken
concurrently) [C] or CHE 331 (may be taken concurrently) [C] or CHE 331H
(may be taken concurrently) [C] and CH 201 [C] and PH 212 [C]

CE 373. GEOTECHNICAL ENGINEERING II. (4 Credits)
Application of fundamental soil mechanics principles to analyses of
slope stability, retaining structures, and foundation support. Lec/rec.
Prerequisites: CE 372 with C with better or FE 315 with C or better

CE 381. STRUCTURAL THEORY I. (4 Credits)
Analysis of statically determinate structures (beams, frames, trusses,
arches, and cables). Approximate analysis, influence lines, deflections.
Prerequisites: ENGR 213 with C or better or ENGR 213H with C or better

CE 382. STRUCTURAL THEORY II. (4 Credits)
Analysis of statically indeterminate structures (beams, frames, trusses).
Deflections. Energy methods, introduction to matrix methods.
Prerequisites: CE 381 with C or better and (MTH 306 [C] or MTH 306H [C]
or (MTH 264 [C] and MTH 265 [C])

CE 383. DESIGN OF STEEL STRUCTURES. (4 Credits)
Introduction to design of steel members, connections and structural
systems. Lec/lab.
Prerequisites: CE 382 with C or better

CE 392. INTRODUCTION TO HIGHWAY ENGINEERING. (4 Credits)
Highway engineering standards, geometric design, cross section and
roadside design, highway surfaces, pavement design, highways and the
environment, highway construction and maintenance.
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better)
and CE 361 [C]

CE 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

CE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CE 407. SEMINAR. (1-3 Credits)
Understanding complexity and systems thinking.
Equivalent to: CE 407H

CE 407H. SEMINAR. (1-3 Credits)
Understanding complexity and systems thinking.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 407
This course is repeatable for 16 credits.

CE 408. WORKSHOP. (1-3 Credits)
This course is repeatable for 3 credits.

CE 410. INTERNSHIP. (1-12 Credits)
This course is repeatable for 16 credits.

CE 411. OCEAN ENGINEERING. (4 Credits)
Introduction to linear wave theory and wave forces on piles. Guided
design of wave gauge facility at Coos Bay, Oregon, that requires
synthesizing fluid mechanics, structural design and foundation design.
Prerequisites: CE 313 with C or better or CEM 311 with C or better

CE 412. HYDROLOGY. (4 Credits)
Application of fundamental soil mechanics principles to analyses of
slope stability, retaining structures, and foundation support. Lec/rec.
Prerequisites: CE 372 with C with better or FE 315 with C or better

CE 407H. SEMINAR. (1-3 Credits)
Understanding complexity and systems thinking.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 407
This course is repeatable for 16 credits.

CE 408. WORKSHOP. (1-3 Credits)
This course is repeatable for 3 credits.

CE 410. INTERNSHIP. (1-12 Credits)
This course is repeatable for 16 credits.

CE 411. OCEAN ENGINEERING. (4 Credits)
Introduction to linear wave theory and wave forces on piles. Guided
design of wave gauge facility at Coos Bay, Oregon, that requires
synthesizing fluid mechanics, structural design and foundation design.
Prerequisites: CE 313 with C or better or CEM 311 with C or better

CE 412. HYDROLOGY. (4 Credits)
Fundamentals of hydrology, the hydrologic cycle, precipitation,
streamflow, hydrograph analysis and hydrologic measurements.
Prerequisites: CE 313 with C or better
CE 413. GIS IN WATER RESOURCES. (3 Credits)
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. Recommended: Senior standing or a previous introductory GIS course

CE 415. COASTAL INFRASTRUCTURE. (3 Credits)
Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design.
Prerequisites: CE 313 with C or better

CE 417. HYDRAULIC ENGINEERING DESIGN. (4 Credits)
Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems.
Prerequisites: CE 313 with C or better

CE 418. CIVIL ENGINEERING PROFESSIONAL PRACTICE. (3 Credits)
Engineering career paths; ethics and professionalism, project planning, execution and delivery, team building/management; marketing proposals; engineering overseas; dispute resolution; partnering; effective decision making; uncertainty and risk analysis; and current industry design and construction methods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: CE 382 with C or better and CE 313 [C] and (CE 372 [C] or FE 315 [C])
Equivalent to: CE 454

CE 419. CIVIL INFRASTRUCTURE DESIGN. (3 Credits)
A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of civil engineering. Students should have completed ALL other required courses in their degree program prior to registering for this course. Lec/rec.
Attributes: CWIC – Core, Skills, WIC
Prerequisites: CE 418 with C or better

CE 420. ENGINEERING PLANNING. (4 Credits)
The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 424. CONTRACTS AND SPECIFICATIONS. (4 Credits)
Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.
Prerequisites: CEM 442 with C or better

CE 427. TEMPORARY CONSTRUCTION STRUCTURES. (4 Credits)
Design and construction of temporary structures including formwork, shoring, and earth retaining structures.
Prerequisites: (CE 321 with C or better or CCE 321 with C or better) and (FE 315 [C] or CE 372 [C]) and (CEM 383 [C] or CE 383 [C])

CE 428. PROJECT MANAGEMENT FOR CIVIL ENGINEERS. (4 Credits)
Provides the prospective civil engineer with the technical knowledge and familiarity necessary to successfully and confidently manage projects of different sizes and complexity levels. It relies on basic knowledge and techniques developed by the Project Management Institute (PMI) and real-world examples (through lectures, example projects, case studies, and guest speakers) from the public and private sectors.

CE 429. OPTIMIZATION IN WATER RESOURCES ENGINEERING. (3 Credits)
Introduction to problem formulation and optimization techniques for design of complex water resources systems.
Recommended: CE 412

CE 461. PHOTOGRAMMETRY. (3 Credits)
Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras.
Prerequisites: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 463. CONTROL SURVEYING. (4 Credits)
Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments.
Prerequisites: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 465. OREGON LAND SURVEY LAW. (3 Credits)
Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions.
Prerequisites: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 469. PROPERTY SURVEYS. (3 Credits)
U.S. public land survey; restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to GIS/LIS; field astronomy.
Prerequisites: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 471. FOUNDATIONS FOR STRUCTURES. (3 Credits)
Criteria, theory, design, and construction for foundations of structures; use of in-situ tests for geotechnical engineering; computer applications.
Prerequisites: CE 373 with C or better or FE 316 with C or better

CE 479. SLOPE AND EMBANKMENT DESIGN. (3 Credits)
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as FE 479/FE 579.
Prerequisites: CE 373 with C or better or FE 316 with C or better
Equivalent to: FE 479

CE 481. REINFORCED CONCRETE I. (4 Credits)
Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices.
Prerequisites: CE 382 with C or better
CE 482. MASONRY DESIGN. (3 Credits)
A critical examination in depth of masonry design topics.
Prerequisites: CE 481 with C or better

CE 484. WOOD DESIGN. (4 Credits)
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab.
Prerequisites: CE 383 with C or better or CE 481 with C or better
Equivalent to: WSE 458

CE 486. PRESTRESSED CONCRETE. (3 Credits)
Prestressed concrete analysis and design, systems of prestressing, materials, economics.
Prerequisites: CE 481 with C or better

CE 491. TRANSPORTATION ENGINEERING. (3 Credits)
Introduction to transportation engineering systems characteristics, traffic estimation, comprehensive transportation planning, highway economics, driver and vehicle characteristics, highway operations and capacity, signalization and control. Introduction to intelligent transportation.
Prerequisites: CE 392 with C or better and ST 314 [C]

CE 492. PAVEMENT STRUCTURES. (3 Credits)
Design and rehabilitation of pavement structures for streets, highways, and airports.
Prerequisites: CE 392 with C or better

CE 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

CE 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CE 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CE 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

CE 508. WORKSHOP. (1-3 Credits)
Graded P/N.
This course is repeatable for 3 credits.

CE 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

CE 511. OCEAN ENGINEERING. (4 Credits)
Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design.
Recommended: CE 313 or CEM 311

CE 512. HYDROLOGY. (4 Credits)
Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.

CE 513. GIS IN WATER RESOURCES. (3 Credits)
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered.
Recommended: Senior standing or a previous introductory GIS course

CE 514. GROUNDWATER HYDRAULICS. (4 Credits)
Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design of dewatering and contaminant recovery systems.
Prerequisites: CE 547 with B or better
Equivalent to: BEE 514
Recommended: CE 313 and MTH 252

CE 515. COASTAL INFRASTRUCTURE. (3 Credits)
Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design.
Recommended: CE 313

CE 516. STORMWATER DESIGN AND MANAGEMENT. (4 Credits)
Introduction to urban stormwater drainage systems; urban hydrologic analysis; water quality in urban storm water; design of stormwater control systems; low impact development; storm water monitoring; and computer modeling of urban storm water systems.
Prerequisites: CE 512 with C or better or BEE 512 with C or better

CE 517. HYDRAULIC ENGINEERING DESIGN. (4 Credits)
Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems.
Recommended: CE 313

CE 518. GROUNDWATER MODELING. (4 Credits)
Application of numerical methods to the solution of water flow and solute transport through saturated and unsaturated porous media. Analysis of confined and unconfined aquifers. Computer solution of large-scale field problems including groundwater contamination and aquifer yield.
Prerequisites: CE 514 with C or better

CE 520. ENGINEERING PLANNING. (4 Credits)
The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; and evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 524. CONTRACTS AND SPECIFICATIONS. (4 Credits)
Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.

CE 525. STOCHASTIC HYDROLOGY. (3 Credits)
Introduction to fundamental concepts that are needed for stochastic modeling of hydrologic processes in presence of nonstationarity and uncertainty. CROSSLISTED AS BEE 525/CE 525.
Prerequisites: CE 512 with C or better or BEE 512 with C or better
Equivalent to: BEE 525
CE 526. ADVANCED CONCRETE MATERIALS. (3 Credits)
Cement hydration, supplementary cementing materials, micro to macro scale property development, mixture design and proportioning including material selection for sustainable design practices, durability aspects including freeze-thaw attack, corrosion of reinforcing steel, sulfate attack and alkali-silica reaction, recent advances in concrete technology.
Recommended: CE 321 or CCE 321

CE 527. TEMPORARY CONSTRUCTION STRUCTURES. (4 Credits)
Design and construction of temporary structures including formwork, shoring, and earth retaining structures.
Recommended: (CE 321 or CCE 321) and (FE 315 or CE 372) and (CEM 383 or CE 383)

CE 528. PROJECT MANAGEMENT FOR CIVIL ENGINEERS. (4 Credits)
Provides the prospective civil engineer with the technical knowledge and familiarity necessary to successfully and confidently manage projects of different sizes and complexity levels. It relies on basic knowledge and techniques developed by the Project Management Institute (PMI) and real-world examples (through lectures, example projects, case studies, and guest speakers) from the public and private sectors.

CE 529. OPTIMIZATION IN WATER RESOURCES ENGINEERING. (3 Credits)
Introduction to problem formulation and optimization techniques for design of complex water resources systems.
Recommended: CE 512 or BEE 512

CE 530. SELECTED TOPICS IN STRUCTURAL ANALYSIS AND MECHANICS. (3 Credits)
A critical, in-depth examination of topics selected by the instructor from among topics not covered in other structural analysis and mechanics courses.
Prerequisites: CE 585 with C or better
This course is repeatable for 16 credits.

CE 531. STRUCTURAL MECHANICS. (3 Credits)
Theories of failure, multi-axial stress conditions, torsion, shear distortions, energy methods of analysis, beams on elastic foundations. Nonlinear and inelastic behavior.

CE 532. FINITE ELEMENT ANALYSIS. (4 Credits)
Applications of the finite element method to structural analysis, fluid flow and elasticity problems. Use and development of large finite element computer programs.
Prerequisites: (CE 585 with C or better or ME 520 with C or better)

CE 533. STRUCTURAL STABILITY. (3 Credits)
Stability theory and applications, with emphasis on design of steel structures.
Recommended: CE 383

CE 534. STRUCTURAL DYNAMICS. (4 Credits)
Analytical and numerical solutions for single, multi-degree of freedom and continuous vibrating systems. Behavior of structures, dynamic forces and support motions. Seismic response spectra analysis.
Recommended: CE 382

CE 535. INTRODUCTION TO RANDOM VIBRATIONS. (4 Credits)
Introduction to probability theory and stochastic processes. Correlation and spectral density functions. Response of linear systems to random excitations. First excursion and fatigue failures. Applications in structural and mechanical system analysis and design.
Prerequisites: CE 534 with C or better or ME 522 with C or better

CE 536. MATRIX METHODS OF STRUCTURAL ANALYSIS. (4 Credits)
Equivalent to: CE 585
Recommended: CE 382 with a minimum grade of C

CE 537. NONLINEAR STRUCTURAL ANALYSIS. (4 Credits)

CE 538. STRUCTURAL RELIABILITY AND RISK ANALYSIS. (4 Credits)
Application of probability and statistics in the reliability-based analysis and design of civil and mechanical engineering systems. Probabilistic modeling of loading and resistance including load and resistance factor design. Introduction to risk analysis and robustness.
Prerequisites: (CE 536 with C or better or ME 520 with C or better)
Recommended: ST 314

CE 540. SPECIAL TOPICS IN HYDRAULIC ENGINEERING. (3-4 Credits)
Introduction to the tools and methods employed to characterize hydrologic properties of subsurface systems. Hands-on use of GPR, TDR, resistivity, and methods of determining hydraulic conductivity, sorptivity, bulk density, and other fundamental hydrologic properties.
Equivalent to: BRE 540
This course is repeatable for 16 credits.

CE 543. APPLIED HYDROLOGY. (4 Credits)
Advanced treatment of hydrology covering major components of the hydrological cycle with special emphasis on surface water; hydrologic analysis and design of water resource systems; runoff prediction; and simulation of surface water systems. Offered alternate years.
Equivalent to: BRE 543
Recommended: BEE 512 and CE 412

CE 544. OPEN CHANNEL FLOW. (3 Credits)
Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods.
Equivalent to: BEE 544, BRE 544
Recommended: (CE 311 and CE 313) or CE 547

CE 547. WATER RESOURCES ENGINEERING I: PRINCIPLES OF FLUID MECHANICS. (4 Credits)
Fluid mechanics for water resources engineers, classifications of fluid flows; fluid statics and dynamics, incompressible viscous flows; dimensional analysis; applications to fluid machinery, flow through porous media, fluid motion in rivers, lakes, oceans.

CE 548. WATER QUALITY DYNAMICS. (3 Credits)
Mass balance, advection and diffusion in streams, lakes and estuaries; thermal pollution, heat balance, oxygen balance, and eutrophication; mathematical models; and numerical solutions.

CE 551. COMPUTER-AIDED SITE AND ROAD DESIGN. (4 Credits)
Site development and road design principles and application to a comprehensive design project using computer-based digital terrain model software tools. Lec/lab/rec.
Recommended: Completion or concurrent enrollment in CE 392
CE 552. ISOLATED SIGNALIZED INTERSECTIONS. (3 Credits)
Relationships between signal display, user response, vehicle detection, and signal timing parameters are examined in detail. Traffic simulation is introduced to visualize and design the various elements of isolated signalized intersections.
Recommended: CE 595

CE 553. RAILROAD ENGINEERING. (3 Credits)
The principal subject of this course is the railway infra-structure and operational issues related to high speed passenger rail and freight rail (class 1 and regional rail). The course will cover the techniques used to design, construct, monitor and maintain railway track. Class will include field trips.
Corequisites: CE 392

CE 554. DRIVING SIMULATION. (3 Credits)
Relationships between the functional elements of driving simulation (simulation computer processing, sensory feedback generation, sensory display devices, and the human operator) are examined in detail. The role of driving simulation in transportation engineering research and practice is also considered in depth. Students will design experiments, analyze and interpret data, and extrapolate simulator results to real-world scenarios.
Recommended: CE 595

CE 556. TRANSPORTATION SAFETY ANALYSIS. (3 Credits)
Provides students with a general knowledge of major transportation safety issues and a general background in the application of various statistical and econometric safety analysis techniques. In addition, this course presents a number of model-estimation methods used in transportation safety data analysis, and other subject areas that deal with safety analysis.
Recommended: CE 392 with a minimum grade of C and ST 511

CE 557. NETWORK FLOW ANALYSIS AND OPTIMIZATION. (3 Credits)
Acquaints students with the basic elements of operations research through transportation networks, optimal paths in transportation networks, vehicle routing and scheduling problems on networks, facility location problems, transportation network design problems, transportation network flows, and to indicate the directions for future research in this area. Although the course utilizes examples from transportation, the techniques and models are generalizable to other areas of engineering, e.g., water networks, computer networks, energy networks, agricultural, power, telecommunication, etc.
Recommended: CE 392 with a minimum grade of C

CE 560. SELECTED TOPICS IN GEOMATICS ENGINEERING. (0-4 Credits)
Selected topics on contemporary problems in geomatics engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for 16 credits.

CE 561. PHOTOGRAMMETRY. (3 Credits)
Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras.
Recommended: CE 361 or CEM 263 or FE 208

CE 562. DIGITAL TERRAIN MODELING. (4 Credits)
Fundamentals of LiDAR and creating digital terrain models. Computational geometry, Delaunay triangulations, spline interpolations, statistical gridding methods, ground filtering, data optimizations, and advanced topics in 3D modeling.
Recommended: CE 361 or CEM 263 or equivalent surveying or GIS course.

CE 563. CONTROL SURVEYING. (4 Credits)
Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments.
Recommended: CE 361 or CEM 263 or FE 208

CE 564. GLOBAL NAVIGATION SATELLITE SYSTEM. (4 Credits)
Theories and applications of surveying using satellites, focusing on the use of Global Navigation Satellite System (GNSS). The course will begin with the comprehensive overviews of the GNSS, reference and time systems as well as basic orbital mechanics. A description of the satellite signals and the data collected by GNSS receivers will also be covered. Different positioning and navigation techniques for using GNSS data (absolute/relative positioning, static/kinematic positioning, stand-alone/network based positioning) and different user applications will be reviewed, followed by practices of data collections and processing techniques.
Recommended: CE 361 or CE 202

CE 565. OREGON LAND SURVEY LAW. (3 Credits)
Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions.
Recommended: CE 361 or CEM 263 or FE 208

CE 566. 3D LASER SCANNING AND IMAGING. (4 Credits)
Fundamentals of lidar acquisition, registration, processing, modeling, analysis, and verification. Use of sensor platforms for 3D acquisition. Effective data management procedures. Introduction to other imaging techniques including structure from motion and structured light. Lec/lab.

CE 567. COASTAL REMOTE SENSING. (4 Credits)
Application of remote sensing technologies (e.g., unmanned aircraft systems, multi- and hyperspectral imagery, high-resolution commercial satellite imagery, synthetic-aperture radar, and topographic and bathymetric lidar) to coastal mapping and charting, coastal engineering and coastal zone management. Both the theory and applications of advanced remote sensing technologies are covered. Lec/lab.
Recommended: An undergraduate surveying course, such as CE 361, CEM 263 or FE 208 and some exposure to MATLAB

CE 568. LEAST SQUARES ADJUSTMENTS. (3 Credits)
Examines the theory of random error and statistical testing. Discusses the propagation of error in both indirect observations and direct observations from survey. Studies weights of observations and the principles of least squares. Explains how to adjust redundant observations in level nets, horizontal surveys, GNSS networks, and GNSS and terrestrial survey networks by least squares. Estimates the error ellipses of the adjusted observations. Evaluates methods for performing coordinate transformations.
Recommended: CE 361 or CEM 263 or FE 208

CE 569. PROPERTY SURVEYS. (3 Credits)
U.S. public land survey; restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIDAR/GIS; field astronomy.
Recommended: CE 361 and CEM 263 or FE 208

CE 570. GEOTECHNICAL SPECIAL TOPICS. (1-16 Credits)
Development and management of actual projects through the examination of case histories; evaluation of geotechnical data; development of design recommendations and preparation of project reports.
This course is repeatable for 16 credits.
CE 571. ADVANCED FOUNDATION ENGINEERING. (4 Credits)
Prepares the planning, analysis, and design of shallow and deep foundations from the geotechnical engineering perspective. Topics supporting course objectives include planning and execution of subsurface investigations, interpretation of in-situ tests, analysis and design of deep and shallow foundations, including geotechnical capacity, and immediate settlement. Assessment of deep foundation installation, axial and lateral loading tests, and group effects is presented. Evaluation of foundation performance is conducted under deterministic and probabilistic frameworks.
Recommended: CE 373 and CE 471

CE 572. ADVANCED GEOTECHNICAL LABORATORY. (4 Credits)
Examination of soil composition and engineering properties of soils including volume change, pore pressure generation, strength, and deformation behavior of soils in the laboratory. Advanced static and cyclic shear strength testing of soils will also be discussed. Lec/lab. Recommended: CE 373 and CE 471

CE 574. ENGINEERING PROPERTIES OF SOILS. (5 Credits)
Advanced laboratory experimental methods for measurement of soil properties. Analysis of experimental data, and methods to display data for 2D and 3D experiments. Compositional and environmental factors affecting the stress-strain, volume change, compressibility, shear strength behavior of sand, clay, and compacted soils in 2D and 3D. Stress and strain invariants and modeling of failure criteria.
Recommended: CE 471

CE 575. EARTH RETENTION AND SUPPORT. (4 Credits)
Prepares the theory and practice of design and construction of earth retaining structures. Topics include rigid and flexible retaining structures, ranging from gravity and cantilever systems, cantilever and anchored sheet piling, tied-back shoring elements, soil nailing, and mechanically stabilized earth walls. These topics are developed with a view on compaction stresses and surface loading, and invokes approaches that range from the static equations of equilibrium to empirical rules of thumb.
Recommended: CE 373

CE 576. GROUND IMPROVEMENT. (3 Credits)
Prepares the analysis and design of ground improvement techniques. Topics supporting course objectives include design for accelerated settlement (surcharge design) with and without pre-fabricated vertical drains, vibro-compaction, vibro-replacement (stone columns) and aggregate piers, deep soil mixing, jet grouting, EPS geofoam, and other improvement techniques for improving soil strength and stability, and limiting deformations and the effects of liquefaction.
Prerequisites: CE 572 with C or better and CE 577 [C]

CE 577. STATIC AND DYNAMIC SOIL BEHAVIOR. (3 Credits)
An advanced coverage of volume change and strength behavior of soil. Specific course topics include effective stress, one-dimensional compression of soil, rate of soil consolidation, Mohr circle analysis, shear strength of sands, clays, and silts, and dynamic soil properties, strength, and testing.
Recommended: CE 372 and CE 373

CE 578. GEOTECHNICAL EARTHQUAKE ENGINEERING. (4 Credits)
Major course topics include engineering seismology, strong ground motion, seismic hazard analysis, soil dynamics, seismic site response, earthquake motion selection, liquefaction, and seismic slope stability. Attention will be given to earthquakes created by the Cascadia Subduction Zone. Lec/lab.
Recommended: CE 373 and CE 471

CE 579. SLOPE AND EMBANKMENT DESIGN. (3 Credits)
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as FE 479/FE 579.
Equivalent to: FE 579
Recommended: CE 373 or FE 316

CE 580. SELECTED TOPICS IN STRUCTURAL DESIGN. (3 Credits)
A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses. This course is repeatable for 18 credits.

CE 581. REINFORCED CONCRETE I. (4 Credits)
Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices.
Recommended: CE 382

CE 582. MASONRY DESIGN. (3 Credits)
A critical examination in depth of masonry design topics.
Recommended: CE 581

CE 583. BRIDGE DESIGN. (3 Credits)
AASHTO specifications for bridge design; load models; design for moving loads; design and analysis of bridge decks and simple and continuous bridge spans.
Recommended: Completion of CE 381 and CE 382 and (CE 481 or CE 581) and concurrent enrollment in CE 383

CE 584. WOOD DESIGN. (4 Credits)
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as WSE 558.
Equivalent to: WSE 558
Recommended: CE 383 or CE 481 with a minimum grade of C

CE 585. BRIDGE DESIGN. (4 Credits)
Prestressed concrete analysis and design, systems of prestressing, materials, economics.
Recommended: CE 581

CE 586. PRESTRESSED CONCRETE. (3 Credits)
Prestressed concrete design and analysis, systems of prestressing, materials, economics.
Recommended: CE 581

CE 587. SEISMIC DESIGN. (4 Credits)
Design of structures to resist the effects of earthquakes. Introduction to structural dynamics, dynamic analysis, seismic design philosophy, code requirements, and detailing for steel and reinforced concrete.
Recommended: CE 383 or CE 481

CE 590. SELECTED TOPICS IN TRANSPORTATION ENGINEERING. (1-3 Credits)
Selected topics on contemporary problems in transportation engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for 9 credits.

CE 591. TRANSPORTATION SYSTEMS ANALYSIS, PLANNING, AND POLICY. (3 Credits)
CE 592. PAVEMENT STRUCTURES. (3 Credits)
Design and rehabilitation of pavement structures for streets, highways, and airports.
Recommended: CE 392

CE 593. TRAFFIC FLOW ANALYSIS AND CONTROL. (4 Credits)
Traffic operations and control systems; traffic flow theory and stream characteristics; capacity analysis; traffic models and simulation; accident and safety improvement. Offered alternate years.

CE 594. TRANSPORT FACILITY DESIGN. (4 Credits)
Location and design of highways, and other surface transportation terminals; design for safety, energy efficiency, and environmental quality. Offered alternate years. Lec/rec.

CE 595. TRAFFIC OPERATIONS AND DESIGN. (3 Credits)
Traffic operations and engineering; human and vehicular characteristics; traffic stream characteristics; highway capacity analysis; intersection operation, control and design. Recommended: Completion or concurrent enrollment in CE 491

CE 596. PAVEMENT EVALUATION AND MANAGEMENT. (3 Credits)
Advanced topics in pavement evaluation techniques and pavement management procedures. Recommended: CE 492

CE 597. PUBLIC TRANSPORTATION. (3 Credits)
Characteristics and nature of public transportation systems, including bus, light and heavy rail; financing policy considerations; planning transit service; managing and operating transit systems for small and large urban areas. Offered alternate years.

CE 598. AIRPORT PLANNING AND DESIGN. (3 Credits)
Characteristics and nature of the air transport system. Airport financing, air traffic control. Analysis and design of airports and the airport planning processes. Airport appurtenances. Airport pavement design, environmental facilities and drainage. Offered alternate years.

CE 599. INTELLIGENT TRANSPORTATION SYSTEMS. (3 Credits)
Introduction to intelligent transportation systems, including enabling surveillance, navigation, communication and computer technologies. Application of technologies for monitoring, analysis evaluation and prediction of transportation system performance. Intervention strategies, costs and benefits, safety, human factors, institutional issues and case studies. Offered alternate years.
Recommended: CE 491 for new graduate students

CE 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

CE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CE 607. OCEAN ENGINEERING SEMINAR. (1 Credit)
Presentations from on-campus and off-campus speakers discussing state of technology topics in ocean engineering research, development, and construction. Graded P/N. This course is repeatable for 16 credits.

CE 630. OCEAN WAVE MECHANICS I. (3 Credits)
Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiching, and storm surge. CROSSLISTED as OC 630. Lec/lab.
Equivalent to: OC 630

CE 631. OCEAN WAVE MECHANICS II. (3 Credits)
Second in the sequence of ocean wave engineering mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. CROSSLISTED as OC 631.
Prerequisites: (CE 630 with C or better or OC 630 with C or better)
Equivalent to: OC 631

CE 634. LONG WAVE MECHANICS. (3 Credits)
Theory of long waves. Depth-integrated Euler’s equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSLISTED as OC 634.
Prerequisites: (CE 630 with C or better and CE 631 [C])
Equivalent to: OC 634
Recommended: OC 670

CE 635. APPLIED MODELING OF NEARSHORE PROCESSES. (4 Credits)
An introduction to numerical modeling of the nearshore ocean, providing hands-on experience with state-of-the-art numerical models for wave propagation, nearshore circulation, planform shoreline evolution and bathymetric profile evolution. The focus is on review of model requirements, detailed study of several specific models for several domains of interest, application to coastal phenomena, and the interpretation of model results. Offered alternate years. CROSSLISTED as OC 635.
Equivalent to: OC 635

CE 639. DYNAMICS OF OCEAN STRUCTURES. (3 Credits)
Dynamic response of fixed and compliant structures to wind, wave and current loading; Morison equation and diffraction theory for wave and current load modeling, time and frequency domain solution methods; application of spectral and time series analyses; system parameter identification; and stochastic analysis of fatigue and response to extreme loads. Offered alternate years.

CE 640. SELECTED TOPICS IN OCEAN AND COASTAL ENGINEERING. (1-3 Credits)
Selected topics on contemporary problems in ocean and coastal engineering; application of ongoing research from resident and visiting faculty. Offered alternate years. This course is repeatable for 9 credits.
Recommended: CE 630

CE 642. RANDOM WAVE MECHANICS. (3 Credits)
Random wave theories, probability and statistics of random waves and wave forces, time series analyses of stochastic processes, ocean wave spectra. Offered alternate years.
Prerequisites: CE 630 with C or better
CE 643. COASTAL ENGINEERING. (3 Credits)
Coastal sediment transport including nearshore currents, longshore onshore-offshore transport, and shoreline configuration; equilibrium beach profile concept with application to shore protection; shoreline modeling; tidal inlet hydrodynamics and inlet stabilization; design criteria for soft structures. Offered alternate years.
Prerequisites: CE 630 with C or better

CE 645. WAVE FORCES ON STRUCTURES. (3 Credits)
Wave forces on small and large members, dimensional analyses and scaling of equations, identification and selection of force coefficients for Morison equation; compatibility of wave kinematics and force coefficients in Morison equation; diffraction and radiation of surface gravity waves by large floating bodies, wavemaker problem, and reciprocity relations.
Prerequisites: CE 630 with C or better

CE 647. OCEAN AND COASTAL ENGINEERING MEASUREMENTS. (3 Credits)
Hands-on experience in the conduct of field and laboratory observations, including waves, currents, wind, tides, tsunami, sediments, bathymetry, shore profiles, wave forces on structures, and structural response. Online data archival and retrieval systems.
Prerequisites: CE 630 with C or better

CE 661. KINEMATIC POSITIONING AND NAVIGATION. (3 Credits)
Application of Global Navigation Satellite System (GNSS) aided Inertial Navigation Systems (INS) to directly georeference survey data acquired from a moving platform, such as an unmanned aircraft system (UAS), conventional aircraft, survey boat, or all-terrain vehicle. Topics include 3D coordinate transformations, dead-reckoning, inertial navigation, kinematic GNSS, Kalman filtering, and sensor modeling.
Recommended: Undergraduate surveying course, such as CE 361, CE 263 or FE 208, and some exposure to MATLAB

CE 663. GEODESY. (4 Credits)
Covers the geometrical aspects of terrestrial and celestial reference systems as well as modern realizations of these coordinate systems. In addition, an introductory level of the physical geodesy is also included, such as gravitational and gravity fields in order to deal with the geoid and heights. From this course, students are expected to understand the core elements of geometric and physical earth, which will assist them to have a solid background for other geospatial related studies.
Recommended: CE 202 or CE 361

CE 808. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

Civil and Construction Engineering

CCE 101. CIVIL AND CONSTRUCTION ENGINEERING ORIENTATION. (2 Credits)
Introduction to civil and construction engineering professions; problem solving, communication skills. This course is required by the CE, CEM and FE programs.
Equivalent to: CE 101
Recommended: MTH 111 and completion or concurrent enrollment in MTH 112 or MTH 251

CCE 102. CIVIL AND CONSTRUCTION ENGINEERING: PROBLEM-SOLVING AND TECHNOLOGY. (3 Credits)
A skills-based course that focuses on introducing freshman students to the use of hand calculation and computer technology in solving civil engineering and construction engineering problems. Topics to be covered include structured approach to problem solving, use of Excel for engineering applications, internet tools and data bases, homework professionalism. Opportunities for involvement with ASCE and AGC student chapters. Lec/lab.
Equivalent to: CE 102
Recommended: Completion or concurrent enrollment in MTH 112 or MTH 251

CCE 201. CIVIL AND CONSTRUCTION ENGINEERING GRAPHICS AND DESIGN. (3 Credits)
Introduces the engineering design process and graphic skills that are used by civil and construction engineers. Topics include design process, geometric construction, multiviews, auxiliary views, sections, dimensioning, tolerances and engineering drawing standards. Students participate in team design projects and presentations. Graphic and design projects from the areas of civil and construction engineering. Lec/lab.
Prerequisites: MTH 111 with C or better or MTH 112 (may be taken concurrently) with C or better or MTH 241 (may be taken concurrently) with C or better
Equivalent to: CE 201

CCE 203. INTRODUCTION TO VIRTUAL DESIGN AND CONSTRUCTION. (3 Credits)
Basic principles of virtual design and construction (VDC) focusing on skills required for generating design and construction information models. Parametric modeling and design constraints are introduced. Students will utilize construction drawings and documentation to create accurate 3D models. Use of design and construction information models for making estimates of quantities and cost, and for determination of constructability problems. Lec/lab.
Prerequisites: CCE 201 with C or better or ENGR 248 with C or better

CCE 207. CCE SEMINAR. (1 Credit)
Professional practices of civil and construction engineering.
Recommended: Sophomore standing

CCE 321. CIVIL AND CONSTRUCTION ENGINEERING MATERIALS. (4 Credits)
Highway materials; aggregate, concrete and asphalt. Standard test methods.
Prerequisites: ((ENGR 213 with C or better or ENGR 213H with C or better) and (ST 314 [C] or BA 276 [C]))
Equivalent to: CCE 321H, CE 321

CCE 321H. CIVIL AND CONSTRUCTION ENGINEERING MATERIALS. (4 Credits)
Highway materials; aggregate, concrete and asphalt. Standard test methods.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENGR 213 with C or better or ENGR 213H with C or better) and (ST 314 [C] or BA 276 [C])
Equivalent to: CCE 321
CCE 421. ADVANCED CONCRETE PROPERTIES AND PERFORMANCE. (4 Credits)
Cement production, hydration, supplementary cementitious materials, mixture design and proportioning, heat of hydration, volume stability, shrinkage, cracking, expansion, creep, relaxation, admixtures, alternative binders, strength gain, durability.
Prerequisites: CCE 321 with C or better

CCE 422. GREEN BUILDING MATERIALS. (3 Credits)
Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material "green", long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.
Prerequisites: CE 321 with C or better or CCE 321 with C or better
Recommended: (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314

CCE 424. ASPHALT FUNDAMENTALS. (3 Credits)
Focuses on characterization of asphalt materials and mixtures, current laboratory testing technology for asphalt binders and mixes, engineering of asphalt mixes to meet design requirements, asphalt recycling process, environmental impacts of asphalt pavements, and recent developments in asphalt technology.
Prerequisites: CCE 321 with C or better

CCE 520. SELECTED TOPICS IN INFRASTRUCTURE MATERIALS. (0-4 Credits)
A critical examination of in-depth topics selected by the instructor from among topics not covered in other infrastructure materials courses. This course is repeatable for 16 credits.

CCE 522. GREEN BUILDING MATERIALS. (3 Credits)
Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material "green", long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.
Recommended: (CE 321 or CCE 321) and (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314

CCE 523. CONCRETE DURABILITY. (4 Credits)
Cement production, supplementary cementitious materials, mixture proportioning, concrete durability, freeze-thaw attack, sulfate attack, corrosion, alkali-silica reaction, long-term performance, durability prediction and modeling, durability of alternative cement, multi-scale assessment, dimensional stability.
Recommended: CCE 321 or similar introductory materials course or CCE 421

CCE 524. ASPHALT FUNDAMENTALS. (3 Credits)
Focuses on characterization of asphalt materials and mixtures, current laboratory testing technology for asphalt binders and mixes, engineering of asphalt mixes to meet design requirements, asphalt recycling process, environmental impacts of asphalt pavements, and recent developments in asphalt technology.

CCE 525. CONSTRUCTION SITE SYSTEMS ENGINEERING. (3 Credits)
Design and planning of construction site field operations and engineered systems. Systems analysis and design as it applies to civil engineering projects. Design of construction systems: blasting; rock crushing and conveying; dewatering; cranes, pile driving, and rigging; and concrete pumping and placement. Construction site design and process design.

CCE 526. DESIGN FOR SAFETY. (3 Credits)
Theoretical concepts and industry practices used to model, evaluate, and improve construction worker safety through the design of the project features, construction operations, and site safety program elements. Causes of construction site accidents, hazard recognition and comprehension, safety risk valuation and mitigation, and the true costs of injuries and fatalities.

CCE 528. ADVANCED VIRTUAL DESIGN AND CONSTRUCTION. (4 Credits)
Focusing on the skills and information needed to effectively use an existing Building Information Model (BIM) in plan execution for a building construction project. This is a project based course where students gain knowledge on the implementation of BIM concepts throughout the lifecycle of a building, from planning and design, to construction and operations.
Recommended: CCE 203 [D-]

CCE 529. LEAN CONSTRUCTION. (3 Credits)
Introduction to the basics of lean production management, especially about how they are applied to the AEC industry to improve the operation management and product development. Class topics include theory of manufacturing science, principles of the lean production system, application of production management to project management, variability management in design and construction, improving project performance in the AEC industry, data gathering and process evaluation for productivity improvement.

CCE 552. PROJECT RISK MANAGEMENT. (4 Credits)
An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as IE 586.
Equivalent to: IE 586

CCE 554. PROFESSIONAL RESPONSIBILITY AND ETHICS. (3 Credits)
An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as IE 589.
Equivalent to: IE 589

CCE 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

CCE 621. DURABILITY AND CONDITION ASSESSMENT OF REINFORCED CONCRETE. (4 Credits)
Concrete durability including freeze-thaw attack, sulfate attack, corrosion, alkali-silica reaction, long-term performance, durability modeling, durability of alternative cements. Non-destructive condition assessment; model-assisted testing; corrosion detection and monitoring; multi-scale assessment; service/remaining life predictions.
Prerequisites: CCE 523 with C or better
Recommended: CCE 321
CCE 623. CORROSION OF METALS AND CORROSION CONTROL. (4 Credits)
Corrosion science and corrosion engineering of metals in various environments. Thermodynamics of corrosion. Electrode kinetics and rates of corrosion. Mixed potential theory. Passivity. Measurement of corrosion. Corrosion prevention through materials selection, design, cathodic and anodic protection and coatings. Discussion of critical material-environment combinations such as corrosion of oil/gas pipelines, corrosion of steel in concrete, corrosion in marine environments, microbially induced corrosion (MIC), corrosion of implants in biological media. Cost of corrosion. Recommended: CH 202 or CH 231 or CH 231H or CCE 321

CCE 624. SERVICE LIFE MODELING OF INFRASTRUCTURE MATERIALS. (4 Credits)

Construction Engineering Management

CEM 263. PLANE SURVEYING. (3 Credits)
Use of field surveying equipment; error analysis; plane surveying methods applied to construction; plane coordinate computations; topographic mapping; and introduction to GPS. Lec/lab. Prerequisites: ENGR 211 with C or better or ENGR 211H with C or better

CEM 311. HYDRAULICS. (4 Credits)
Pressure and energy concepts of fluids, fluid measurements, flow in pipes and open channels. Prerequisites: ENGR 211 with C or better or ENGR 211H with C or better

CEM 326. CONSTRUCTION SAFETY. (3 Credits)
Training in construction safety with emphasis on hazard identification, avoidance, control, and prevention. Lec/rec. Prerequisites: CCE 207 with C or better or CEM 407 with C or better

CEM 341. CONSTRUCTION ESTIMATING I. (4 Credits)
Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating. Prerequisites: CEM 442 with C or better Recommended: CCE 102 and CCE 201

CEM 342. CONSTRUCTION ESTIMATING II. (4 Credits)
Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating. Prerequisites: CEM 341 with C or better

CEM 343. CONSTRUCTION PLANNING AND SCHEDULING. (4 Credits)
Principles of construction planning, scheduling, and resource optimization; scheduling techniques and calculations; methods for integrating project resources (materials, equipment, personnel, and money) into the schedule. Prerequisites: CEM 342 (may be taken concurrently) with C or better

CEM 381. STRUCTURES I. (4 Credits)
Introduction to statically determinate analysis and design of steel structures. Lec/rec. Prerequisites: ENGR 213 with C or better or ENGR 213H with C or better

CEM 383. STRUCTURES II. (4 Credits)
Analysis and design of building elements of concrete and timber; detailing and fabrication. Lec/rec. Prerequisites: CCE 321 (may be taken concurrently) with C or better and CEM 381 [C]

CEM 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

CEM 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CEM 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CEM 407. SEMINAR. (1 Credit)
Professional practices of construction engineering management.

CEM 431. OBTAINING CONSTRUCTION CONTRACTS. (4 Credits)
Preparing and effectively presenting detailed and complete proposals for the execution of construction projects. Prerequisites: CEM 341 with C or better Equivalent to: CEM 432

CEM 432. CONSTRUCTION PROJECT PLANNING. (3 Credits)
Planning and preparing cost estimates, schedules, site logistics plans for executing construction projects; presenting written and oral construction proposals. Prerequisites: CEM 341 with C or better Equivalent to: CEM 431

CEM 441. HEAVY CIVIL CONSTRUCTION MANAGEMENT. (4 Credits)
Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites. Prerequisites: FE 315 with C or better or CE 372 with C or better

CEM 442. BUILDING CONSTRUCTION MANAGEMENT. (4 Credits)
Building construction management and methods. Prerequisites: CCE 207 with C or better or CEM 407 with C or better

CEM 443. PROJECT MANAGEMENT FOR CONSTRUCTION. (4 Credits)
Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC Prerequisites: CEM 341 with C or better and CEM 343 [C]

CEM 471. ELECTRICAL FACILITIES. (4 Credits)
Principles and applications of electrical components of constructed facilities; basic electrical circuit theory, power, motors, controls, codes, and building distribution systems. Lec/lab. Prerequisites: CCE 207 with C or better or CEM 407 with C or better

CEM 472. MECHANICAL FACILITIES. (3 Credits)
Principles and applications of mechanical components of constructed facilities; heating, ventilating, air conditioning, plumbing, fire protection, and other mechanical construction. Prerequisites: CCE 207 with C or better or CEM 407 with C or better
CEM 541. HEAVY CIVIL CONSTRUCTION MANAGEMENT. (4 Credits)
Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites.
Recommended: FE 315 or CE 372

CEM 543. PROJECT MANAGEMENT FOR CONSTRUCTION. (4 Credits)
Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement.

CEM 550. CONTEMPORARY TOPICS IN CONSTRUCTION ENGINEERING
MANAGEMENT. (4 Credits)
Contemporary topics of emerging technologies and processes, construction engineering and management, how industry environmental change causes development of new technologies, and the applications of the technologies in the field.

CEM 551. PROJECT CONTROLS. (4 Credits)
Advanced methods of project controls including advanced technologies and methodologies for quality, time, and cost management; project management organization models, and intra-organizational relationships.

CEM 552. RISK MANAGEMENT IN CONSTRUCTION. (4 Credits)
An introduction to the concept of risk in construction projects and construction firms, including risk definition, identification, assessment and management techniques; contractual risk control, sharing and shedding; and contingency management.

CEM 553. CONSTRUCTION BUSINESS MANAGEMENT. (4 Credits)
Introduction to concepts of business structures associated with the construction industry; enterprise-level management techniques; extra-organizational risk management; and operational management structuring.

Architectural Engineering Undergraduate Major (BS, HBS)
This program provides students with breadth and depth in the engineering sciences of buildings and their systems: structural systems; heating, ventilation and air-conditioning (HVAC) systems; electrical and lighting systems; construction engineering and management.

The program emphasizes integration across architectural engineering disciplines as well as with the existing civil engineering and construction engineering programs. This program allows students to specialize in a chosen discipline while gaining the knowledge and skills to become leaders in the design and construction of green, energy efficient and more complex buildings.

**Civil Engineering Graduate Major (MENG, MS, PhD)**

**Graduate Areas of Concentration**

Civil engineering, coastal and ocean engineering, construction, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering

The School of Civil and Construction Engineering offers graduate work leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. The MEng, MS, and PhD degrees offer concentrations in civil engineering, coastal and ocean engineering, construction, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering,
transportation engineering, water resources engineering, and interdisciplinary areas. Areas of concentration can also be combined to form an integrated civil engineering MS program or MS and PhD minors. The MEng is a course work-only degree requiring a final oral exam. For the MS degree, a thesis or project is required. The PhD degree requires a dissertation.

Degree programs prepare the student for advanced-level entry into professional engineering practice and for careers in research and teaching. Majors within the department constitute approximately two-thirds of the total program. Minor fields may be selected from departmental offerings in different subject areas, from other engineering disciplines, or from other fields of study that support the major. The school also participates in the Master of Arts in Interdisciplinary Studies program.

For more information, contact the CCE Graduate Program Coordinator, 541-737-4934, or cce.school@oregonstate.edu

1. This limit excludes CE 506/CE 606 credits for project-in-lieu-of-thesis programs
2. A minimum of 18 credits to be taken during the PhD course of study, excluding credits in CE 601, CE 603, CE 605, and CE 606

**MAIS**

The School of Civil & Construction Engineering also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. See the Graduate School for details.

Major Code: 3060

**Civil Engineering Graduate Minor**

The School of Civil and Construction Engineering offers graduate minor degrees in Civil Engineering. The Graduate minor in Civil Engineering is for masters and doctoral level students who seek additional formal training and mentoring in civil engineering.

For more information, contact the CCE Graduate Program Coordinator, 541-737-4934, or cce.school@oregonstate.edu

Minor Code: 3060

Master’s program minors must include a minimum of 15 quarter credits of graduate course work as approved by the minor faculty advisor. Doctoral minors must include a minimum of 18 quarter credits of graduate course work as approved by the minor faculty advisor. Additional credits may be required as determined by the minor faculty advisor or advising committee.

CCE coursework in the minor should be selected in concert with Minor Professor.

Minor Code: 3060

**Civil Engineering Undergraduate Major (BA, BS, HBA, HBS)**

The Bachelor of Science degree in Civil Engineering is accredited by the Engineering Commission of ABET, http://www.abet.org.

Civil engineering is a diverse professional field with discipline specialties in structures, transportation, water supply and water pollution control, geotechnical engineering, hydrology, hydraulics and water resources, geomatics, ocean engineering, construction, and engineering planning and economics. All CE students receive basic instruction in the various disciplines, with the option for additional elective courses in desired areas. The program is supported by highly qualified faculty and staff that maintain the programs and facilities at the highest level of quality.
The civil engineering curriculum within the School of Civil and Construction Engineering (CCE) includes the basic sciences, social sciences, humanities, communication skills, engineering sciences, and engineering design in order to teach students an integrated approach to practical solutions.

The mission of the civil engineering program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering positions with business, industry, consulting firms or government.

Major Code: 306

Program Educational Objectives—Civil Engineering

Note: The Bachelor of Science degree in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org), which requires stated program educational objectives and student outcomes to support these.

OSU Civil Engineering graduates receive a compelling education, and within 3 to 5 years of graduation will have:

1. Assembled, analyzed and synthesized/evaluated information to solve engineering problems and perform modern civil engineering design by applying mathematics, engineering sciences and fundamentals of civil engineering.
2. Participated in modern professional practice or a graduate program in a specialty area of civil engineering, demonstrating effective communication, collaborative work and leadership in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.
3. Recognized the importance of professional licensure and have achieved or prepared to achieve this significant accomplishment. In this endeavor, consideration of the public health, welfare and safety is seen as the paramount priority.
4. Applied an understanding of public policy and contemporary societal issues with sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

Student Outcomes for Civil Engineering Programs

The OSU Civil Engineering program prepares its graduates to achieve the Program Educational Objectives above several years into their careers. This is achieved by having students able to perform the following on graduation, well preparing them for active immediate and lifelong service in the profession:

1. Ability to apply knowledge of mathematics, science, and engineering to solve engineering problems
2. Ability to design and conduct experiments as well as analyze and interpret data
3. Ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, social, political, ethical, health and safety, manufacturability and sustainability
4. Ability to function on multi-disciplinary teams
5. Ability to identify, formulate, and solve engineering problems
6. Understanding of professional and ethical responsibility
7. Ability to communicate effectively
8. Broad education necessary to understand impact of engineering solutions in global, economic, environmental and societal context
9. Recognition of need for and ability to engage in lifelong learning
10. Knowledge of contemporary issues
11. Ability to use techniques, skills, and modern engineering tools necessary for engineering practice
12. Knowledge of basic concepts in leadership
13. Ability to include non-engineering considerations, including business, regulatory and safety issues in problem-solving
14. Ability to incorporate effective negotiation or consensus-gaining in group decision-making
15. Knowledge and application of project planning and management practices and tools
16. Ability to assess imperfect or incomplete data conditions, risks and alternatives into problem-solving decisions
17. Exposure to current industry design practices, construction methods and materials, and overall project delivery considerations

Design is the essence of civil engineering. Junior and senior level courses include extensive design content, culminating in a team approach to the solution of open-ended, realistic problems, including capstone design and professional practice courses. Courses with design content include those with "design" in their titles. A more detailed explanation of the design experience and design course sequences is contained in the "Civil Engineering Advising Guide," which may be viewed on the school’s website at http://cce.oregonstate.edu/academic-advising.

A student may also earn a concurrent Bachelor of Arts (BA) or Honors Bachelor of Arts (HBA) degree by completing 32 additional credits in residence including language proficiency equivalent to that attained at the end of the second year of a foreign language as certified by the School of Language, Culture, and Society. Neither the BA nor the HBA degree in civil engineering is accredited by the Engineering Commission of ABET.

Civil Engineering-Forest Engineering

A five-year dual-degree program in civil engineering and forest engineering is offered jointly by the School of Civil and Construction Engineering in the College of Engineering and Forest Engineering in the College of Forestry. Advising is done through either academic unit. See Forest Engineering, Resources and Management in the College of Forestry.

Geomatics (Surveying and Mapping)

Graduates of civil engineering are eligible to take the Fundamentals of Land Surveying Examination in pursuit of the Professional Land Surveying license by selecting courses as follows.

Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS)

The School of Civil and Construction Engineering offers BA and BS degrees in Construction Engineering Management (CEM). This unique program blends principles of basic science, engineering, and technology with a strong component of business subjects to prepare graduates for a productive career in the construction industry. The BS in Construction Engineering Management is ACCE accredited.

The CEM program is built on a rigorous four-year curriculum that emphasizes practical applications as well as basic principles. Students are given hands-on experiences in the laboratory and are involved in field trips as a supplement to their classroom activities. A more detailed explanation of the CEM Program is contained in the "Construction Engineering Management Advising Guide," which may be viewed on the school’s website (http://cce.oregonstate.edu/academic-advising).

The mission of the CEM program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible constructor positions with business, industry, consulting firms or government. The program’s educational objectives are to:

1. Provide a compelling education based in the natural sciences, mathematics, engineering sciences, and business, and in the fundamental paradigms, concepts, understandings, applications, and knowledge of civil and construction engineering and construction management.

2. Develop students’ abilities through their education to analyze, synthesize, and evaluate information, solve engineering problems, and be prepared to effectively perform project engineering and management tasks for effective execution of construction projects.

3. Provide education for modern professional practice including the abilities for effective communication, collaborative work in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.

4. Prepare our graduates for either immediate employment or for graduate school opportunities in construction or business.
5. Provide students with knowledge of contemporary societal issues and a sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

School of Electrical Engineering and Computer Science

Consistent with the mission of the university and college, the mission of the School of Electrical Engineering and Computer Science at Oregon State University is to provide a comprehensive, state-of-the-art education that prepares our students to be successful in engineering and computing practice and advanced studies.

The school has traditionally strong undergraduate programs and one of the largest graduate programs within the university, with internationally recognized research programs in the areas of mixed signal integration, artificial intelligence and machine learning, computer graphics and vision, energy systems, multimedia and networking, materials and devices, end-user software, human-computer interaction, and signal processing and communications systems.

Electrical and Computer Engineering

The School of EECS offers programs leading to the BS, MS, MEng, and PhD degrees in Electrical and Computer Engineering (ECE).

Electrical and computer engineers engage in the design, construction and programming, and applications of electronic and integrated circuits, digital computers and embedded systems, power generation and utilization, communication and computer networks, electronic materials and devices, electromagnetic, microwave and optical circuits and systems, control systems, and signal processing and conditioning.

Course work leading to the BS degree consists of courses in many of these topics, as well as courses in the supporting disciplines of mathematics, physical sciences, and computer science. Students select further study beyond the required courses for either more depth in a subdiscipline or further breadth across engineering. Students fulfill humanities and social science requirements as specified by the university’s baccalaureate core program. The BS program is supported by well-equipped laboratories providing hands-on experience with electronic circuits, digital logic, electronic and photonic materials, electric machines, IC design, optoelectronics, RF techniques, instrumentation, and microprocessors.

The program incorporates engineering design principles throughout the undergraduate curriculum. This includes the integration of societal, economic, legal, regulatory, ethical, environmental, and other factors into the technical aspects of engineering design. Design activities begin in the freshman orientation sequence, which incorporates open-ended design problems, and continues throughout the curriculum. The design experience culminates with a yearlong senior design project. Within the senior design experience, students working in teams complete all phases of a design project under the supervision of a faculty member.

Graduates of this program are prepared to either seek industrial employment or pursue advanced graduate degrees.

The BS degree in Electrical and Computer Engineering (ECE) is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410-347-7700.

The Electrical and Computer Engineering graduate program provides opportunities for both MS and PhD thesis programs and a MEng
course work-based program in the following areas: analog and mixed signals, communications and signal processing, computer systems and networking, energy systems, materials and devices, and RF/microwave optoelectronics. Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs' educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school's website (http://eecs.oregonstate.edu).

The Multiple Engineering Cooperative Program (MECOP) offers industrial internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

**Computer Science**

The School of EECS offers programs leading to BA, BS, MA, MAIS, MEng, MS, and PhD degrees in Computer Science (CS).

Computer science is the heart of cutting-edge computing software. Computer scientists invent software that enables computers to do new things. They design programming languages, compilers, operating systems, games, databases, computer networks, and user interfaces. They solve complex challenging problems in a wide range of fields that can make a positive difference in the world.

Computer science majors learn skills to create realistic graphics, design new problem-solving tools that anyone can use, and create new solutions for business, medical diagnoses, games and entertainment. Their programming skills enable computers to "learn" as they process data, as well as assist in social communication and technologies for the disadvantaged.

Computer science offers a foundation that permits graduates to learn how to make software work well, how to make it fast, how to make it correct, how to find where innovation is needed, and how to understand the people who will be using it, so as to make it genuinely useful and compelling to people. Much of computer science course work is carried out in teams, and students gain experience in teamwork, in professionalism in writing, in working with clients, and in making presentations of their teams' efforts.

Course work leading to the BS degree consists of required courses in many of these topics, as well as courses in supporting disciplines such as mathematics. The BS program is supported by well-equipped computer laboratories. Students select further study beyond the required core courses, opting for either more depth in computer science, for breadth in business and entrepreneurship, or for grounding in an applications area for their computing skills. The BS program culminates with a yearlong senior capstone project. Within the senior capstone experience, students working in teams complete all phases of a software project under the supervision of a faculty member.

Graduates of this program are prepared either to pursue advanced graduate degrees or to seek employment in business, industry or government.

The BS degree in Computer Science (CS) with Computer Systems option is accredited by Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410-347-7700. The BA degree is not ABET accredited.

The computer science graduate program provides opportunities for MS and PhD thesis, MS non-thesis, and MEng course work-based programs in the following areas: artificial intelligence and machine learning, computer systems and networking, graphics and visualization, human-computer interaction, programming languages, software engineering, algorithms. Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs' educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school's website (http://eecs.oregonstate.edu).

The Multiple Engineering Cooperative Program (MECOP) offers internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

**Faculty**

Distinguished Professor Dietterich

Professors Adams, Allstot, Bailey, Bose, Brekken, Burnett, Conley, Cull (Emeritus), Dhagat, Erwig, A. Fern, Hamdaoui, Lee, Liu, Mathews, Mayaram, Moon, Nguyen, Pancake (Emeritus), Tadepalli, Temes, Wagner (Emeritus), Weller, Weisshaar, E. Zhang

Associate Professors Borradaile, Budd (Emeritus), Chiang, Cotilla-Sanchez, de Amicis, Dig, X. Fern, Jander, Jensen, Magaña, Minoura (Emeritus), Natarajan, Plant (Emeritus), Raich, Sarma, Scaffidi, Todorovic, Wang, Wong
Assistant Professors: T. Anand, Bobba, Cao, L. Chen, Cheng, Fu, Hendrix, L. Huang, Hutchinson, Jang, Johnston, Kim, Knight, Labram, F. Li, Natarajan, Nayyeri, Parham-Mocello, Ramsey, Rosulek, Termehchy, Walkingshaw  
Senior Instructor: Traylor, McGrath  
Instructors: Alcon, Bakos, Brewster, Cate, Ehsan, Goins, Redfield, Rooker, Schuffort, Shuman, Sweet, Van Londen, Winters, Wolford, L. Zhang  
Faculty Research Assistant: 1 Heer, Irvine  
Associate Professor, Senior Research: Y. Zhang

**Computer Science**

**CS 101. COMPUTERS: APPLICATIONS AND IMPLICATIONS.** (4 Credits)  
The varieties of computer hardware and software. The effects, positive and negative, of computers on human lives. Ethical implications of information technology. Hands-on experience with a variety of computer applications. Lec/lab.

**CS 151. INTRODUCTION TO PROGRAMMING I WITH EMBEDDED CONTROL LAB.** (4 Credits)  
Thorough treatment of the basic elements of C, bitwise operations, flow of control, input/output, functions, arrays, strings, and structures. Lec/lab.  
**Prerequisites:** MTH 111 with C or better or MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better  
**Equivalent to:** ECE 151

**CS 160. COMPUTER SCIENCE ORIENTATION.** (3 Credits)  
Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Approaches to teaching course topics vary across sections. Lec/lab.  
**Equivalent to:** CS 160H

**CS 160H. COMPUTER SCIENCE ORIENTATION.** (3 Credits)  
Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Approaches to teaching course topics vary across sections. Lec/lab.  
**Attributes:** HNRS – Honors Course Designator  
**Equivalent to:** CS 160

**CS 161. INTRODUCTION TO COMPUTER SCIENCE I.** (4 Credits)  
Overview of fundamental concepts of computer science. Introduction to problem solving, software engineering, and object-oriented programming. Includes algorithm design and program development. Lec/lab/rec.  
**Prerequisites:** MTH 112 (may be taken concurrently) with C or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 061  
**Equivalent to:** EECS 161  

**CS 162. INTRODUCTION TO COMPUTER SCIENCE II.** (4 Credits)  
Basic data structures. Computer programming techniques and application of software engineering principles. Introduction to analysis of programs. Lec/lab/rec.  
**Prerequisites:** CS 161 with C or better or EECS 161 with C or better  
**Equivalent to:** EECS 162

**CS 165. ACCELERATED INTRODUCTION TO COMPUTER SCIENCE.** (8 Credits)  
Overview of the fundamental concepts of computer science. Introduction to problem solving, algorithm development, data types, and basic data structures. Introduction to analysis of algorithms and principles of software engineering. System development and computer programming using procedural/object-oriented paradigms. Offered via Ecampus only.  
**Prerequisites:** MTH 112 with C or better or Math Placement - ALEKS with a score of 075

**CS 175. *COMMUNICATIONS SECURITY AND SOCIAL MOVEMENTS.* (3 Credits)  
Equipping students with the theory and practice of communications security, this course explores how social movements can remain effective in the context of mass surveillance and state repression. Lec/rec. (Bacc Core Course)  
**Attributes:** CPDP – Core, Perspective, Difference/Power/Discrimination

**CS 195. WEBSITE DESIGN.** (4 Credits)  
How to design and publish a static website using an existing publishing platform: Techniques and tools for designing and publishing on the World Wide Web; hypertext and HTML; site and page design; media integration; issues raised by Internet publishing.  
**Equivalent to:** CS 295

**CS 199. SPECIAL TOPICS/COMPUTER SCIENCE.** (1-16 Credits)  
This course is repeatable for 16 credits.

**CS 201. COMPUTER PROGRAMMING FOR NON-CS MAJORS.** (3 Credits)  
Covers a variety of fundamental topics in computer programming relevant to anyone who wants to write or work with computer code in their work or studies. Teaches basic computational thinking and programming skills which will allow students to solve a variety of real-world problems. In addition, students will learn more advanced topics such as how some basic algorithms work and can be written in computer code.

**CS 225. DISCRETE STRUCTURES IN COMPUTER SCIENCE.** (4 Credits)  
An introduction to the discrete mathematics of computer science, including logic, set and set operations, methods of proof, recursive definitions, combinatorics, and graph theory. (Note: Students may take either MTH 231 or CS 225, but cannot receive credit for both.)  
**Prerequisites:** MTH 111 with C or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 061 or MTH 112 with C or better  
**Equivalent to:** CS 295

**CS 231. INTEGRATION AND APPLICATIONS.** (4 Credits)  
Abstract data types, dynamic arrays, linked lists, trees and graphs, binary search trees, hash tables, storage management, complexity analysis of data structures. Lec/lab.  
**Prerequisites:** (CS 162 with C or better or CS 165 with C or better) and (CS 225 [C] or MTH 231 [C])  
**Equivalent to:** CS 261

**CS 262. PROGRAMMING PROJECTS IN C++.** (4 Credits)  
Learning a second computer programming language. Elements of C++. Object-oriented programming. Experience team work on a large programming project.  
**Prerequisites:** CS 261 with C or better

**CS 271. COMPUTER ARCHITECTURE AND ASSEMBLY LANGUAGE.** (4 Credits)  
Introduction to functional organization and operation of digital computers. Coverage of assembly language; addressing, stacks, argument passing, arithmetic operations, decisions, macros, modularization, linkers and debuggers.  
**Prerequisites:** CS 151 with C or better or CS 161 with C or better or CS 165 with C or better or ECE 151 with C or better

**CS 290. WEB DEVELOPMENT.** (4 Credits)  
How to design and implement a multi-tier application using web technologies: Creation of extensive custom client- and server-side code, consistent with achieving a high-quality software architecture.  
**Prerequisites:** CS 162 with C or better or CS 165 with C or better  
**Equivalent to:** CS 494
CS 295. WEBSITE MANAGEMENT. (4 Credits)
How to create and promote a dynamic website using existing frameworks/libraries: Designing, developing, publishing, maintaining, and marketing dynamic websites; web security and privacy issues; emerging web technologies; running a website marketing campaign.
Prerequisites: CS 195 with C or better
Recommended: Basic HTML and CSS

CS 312. SYSTEM ADMINISTRATION. (4 Credits)
Prerequisites: (CS 311 with C or better or CS 344 with C or better) and CS 372 [C]

CS 321. INTRODUCTION TO THEORY OF COMPUTATION. (3 Credits)
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321H

CS 321H. INTRODUCTION TO THEORY OF COMPUTATION. (3 Credits)
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Attributes: HNRS – Honors Course Designator
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321

CS 325. ANALYSIS OF ALGORITHMS. (4 Credits)
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325H

CS 325H. ANALYSIS OF ALGORITHMS. (4 Credits)
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Attributes: HNRS – Honors Course Designator
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325

CS 331. INTRODUCTION TO ARTIFICIAL INTELLIGENCE. (4 Credits)
Fundamental concepts in artificial intelligence using the unifying theme of an intelligent agent. Topics include agent architectures, search, games, logic and reasoning, and Bayesian networks.
Prerequisites: CS 325 with C or better or CS 325H with C or better

CS 340. INTRODUCTION TO DATABASES. (4 Credits)
Design and implementation of relational databases, including data modeling with ER or UML, diagrams, relational schema, SQL queries, relational algebra, user interfaces, and administration.
Prerequisites: CS 290 with C or better
Equivalent to: CS 275

CS 344. OPERATING SYSTEMS I. (4 Credits)
Introduction to operating systems using UNIX as the case study. System calls and utilities, fundamentals of processes and interprocess communication.
Prerequisites: CS 261 with C or better and (CS 271 [C] or ECE 271 [C])
Equivalent to: CS 311
Recommended: Experience programming in the C language

CS 352. INTRODUCTION TO USABILITY ENGINEERING. (4 Credits)
Basic principles of usability engineering methods for the design and evaluation of software systems. Includes the study of human-machine interactions, user interface characteristics and design strategies, software evaluation methods, and related guidelines and standards.
Prerequisites: CS 151 with C or better or CS 161 with C or better or CS 165 with C or better or CS 295 with C or better or ECE 151 with C or better
Equivalent to: CS 252

CS 361. SOFTWARE ENGINEERING I. (4 Credits)
Introduction to the "front end" of the software engineering lifecycle; requirements analysis and specification; design techniques; project management.
Prerequisites: CS 261 with C or better

CS 362. SOFTWARE ENGINEERING II. (4 Credits)
Introduction to the "back end" of the software engineering lifecycle implementation; verification and validation; debugging; maintenance.
Prerequisites: CS 261 with C or better
Recommended: Experience with object-oriented programming and data structures (eg. CS 161, CS 162, CS 361)

CS 370. INTRODUCTION TO SECURITY. (4 Credits)
Introductory course on computer security with the objective to introduce concepts and principles of computer systems security. Notions of security, basic cryptographic primitives and their application, basics of authentication and access control, basics of key-management, basics of malware and software security.
Prerequisites: CS 344 (may be taken concurrently) with C or better

CS 372. INTRODUCTION TO COMPUTER NETWORKS. (4 Credits)
Computer network principles, fundamental networking concepts, packet-switching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. Lec. CROSSTLISTED as ECE 372.
Prerequisites: CS 261 with C or better and (ECE 271 [C] or CS 271 [C])
Equivalent to: ECE 372
Recommended: C programming and Unix familiarity

CS 373. DEFENSE AGAINST THE DARK ARTS. (4 Credits)
Introduction to the current state of the art in anti-malware, computer forensics, and networking, messaging, and web security. Broad introduction to the field of computer security.
Prerequisites: CS 344 with C or better and CS 340 [C] and CS 372 [C]

CS 381. PROGRAMMING LANGUAGE FUNDAMENTALS. (4 Credits)
An introduction to the concepts found in a variety of programming languages. Programming languages as tools for problem solving. A brief introduction to languages from a number of different paradigms.
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])

CS 391. *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE. (3 Credits)
In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: CS 391H, CS 391H
Recommended: CS 101 or computer literacy.
CS 391H. *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE. (3 Credits)
In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: CS 391
Recommended: CS 101 or computer literacy

CS 395. WEBSITE MULTIMEDIA. (4 Credits)
How to create and deploy interactive digital multimedia through static websites: Technological, aesthetic, and pedagogical issues of communication using interactive multimedia and hypermedia; techniques for authoring interactive multimedia projects using a variety of digital media roots.
Prerequisites: CS 195 with C or better or (ART 120 with C or better and (CS 162 [C] or CS 165 [C]))

CS 401. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

CS 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

CS 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CS 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

CS 407. SEMINAR. (1-16 Credits)
Graded P/N.
Equivalent to: CS 407H
This course is repeatable for 16 credits.

CS 407H. SEMINAR. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 407
This course is repeatable for 16 credits.

CS 410. OCCUPATIONAL INTERNSHIP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

CS 419. SELECTED TOPICS IN COMPUTER SCIENCE. (0-5 Credits)
Topics of special and current interest not covered in other courses.
Equivalent to: CS 419H
This course is repeatable for 99 credits.

CS 419H. SELECTED TOPICS IN COMPUTER SCIENCE. (1-5 Credits)
Topics of special and current interest not covered in other courses.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 419
This course is repeatable for 99 credits.

CS 420. GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE. (3 Credits)
Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling.
Prerequisites: (CS 325 with C or better or CS 325H with C or better)

CS 427. CRYPTOGRAPHY. (4 Credits)
Introduction to the theory and practice of modern cryptography. Fundamental primitives including pseudorandom generators, block ciphers, hash functions. Symmetric-key cryptography for privacy and authenticity. Public-key cryptography based on number-theoretic problems.
Prerequisites: CS 261 with C or better or MTH 355 with C or better

CS 434. MACHINE LEARNING AND DATA MINING. (4 Credits)
Introduction to machine learning and data mining algorithms (supervised learning, unsupervised learning, and reinforcement learning) tools that are widely employed in industrial and research settings.
Prerequisites: CS 325 with C or better or CS 325H with C or better

CS 440. DATABASE MANAGEMENT SYSTEMS. (4 Credits)
Relational database design, normalization, file structures, disk storage, query processing and optimization, team development of database applications.
Prerequisites: CS 261 with C or better and (CS 275 [C] or CS 340 [C])

CS 444. OPERATING SYSTEMS II. (4 Credits)
Principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessor, file systems, performance evaluation, and networking. Lec/rec.
Prerequisites: (CS 311 with C or better or CS 344 with C or better) and (CS 271 [C] or ECE 375 [C])
Equivalent to: CS 411

CS 446. NETWORKS IN COMPUTATIONAL BIOLOGY. (3 Credits)
An introduction to biological networks and computational methods for their analysis, inference, and functional modeling. Various network centralities, topological measures, clustering algorithms, and probabilistic annotation models are introduced in the context of protein interaction, gene regulatory, and metabolic networks. The course also surveys bioinformatics methods for data-driven inference of network structure.
Prerequisites: CS 261 with C or better
Recommended: Completion or concurrent enrollment in CS 325

CS 447. WIRELESS EMBEDDED SYSTEMS. (4 Credits)
A hands-on introduction to programming wireless embedded systems (aka the "Internet of Things"). Topics include sensors, actuators, state machines, scheduling, wireless communications, time synchronization, localization, fault tolerance, and security related to cyber-physical systems.
Prerequisites: CS 344 with C or better

CS 450. INTRODUCTION TO COMPUTER GRAPHICS. (4 Credits)
Prerequisites: CS 261 with C or better and (MTH 306 [C] or MTH 306H [C] or MTH 341 [C])

CS 453. SCIENTIFIC VISUALIZATION. (4 Credits)
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization.
Recommended: Prior experience with Unix or Windows, programming experience.
CS 457. COMPUTER GRAPHICS SHADERS. (4 Credits)
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages.
Recommended: Previous graphics pipeline programming experience.

CS 458. INTRODUCTION TO INFORMATION VISUALIZATION. (4 Credits)
Tools and techniques for designing, developing, and deploying interactive visualizations of abstract data sources. Discusses techniques based on principles from design, cognitive science, and perceptual psychology. Topics include 1D, 2D, 3D, multivariate representations, time-series, graphs and trees, text and documents, and interaction techniques.
Prerequisites: CS 361 with C or better

CS 461. SENIOR SOFTWARE ENGINEERING PROJECT I. (3 Credits)
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. This course fulfills the WIC requirement for computer science majors.
(Prerequisites: Writing Intensive Courses).
Attributes: CWIC – Core, Skills, WIC
Prerequisites: CS 361 with C or better

CS 462. SENIOR SOFTWARE ENGINEERING PROJECT II. (3 Credits)
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. (Writing Intensive Courses)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: CS 362 with C or better and CS 461 [C]

CS 463. SENIOR SOFTWARE ENGINEERING PROJECT. (2 Credits)
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required.
Prerequisites: CS 462 with C or better

CS 464. OPEN SOURCE SOFTWARE. (4 Credits)
Provides a theoretical foundation of the history, key concepts, technologies, and practices associated with modern Free and Open Source Software (FOSS) projects, and gives students an opportunity to explore and make contributions to FOSS projects with some mentoring and guidance.
Prerequisites: CS 261 with C or better or CS 361 with C or better

CS 466. WEB-BASED START-UP PROJECT. (4 Credits)
Real-world, hands-on learning in a high-tech web/mobile-based company environment. Research in the development of product ideas, hypotheses, and business models to create customer experiments. Prototyping and statistical analysis to develop, optimize, and evaluate solutions. Rapid iteration/refactoring based on customer input, web analytics, and user engagement metrics. Offered at OSU-Cascades only.
Corequisites: CS 461

CS 467. ONLINE CAPSTONE PROJECT. (4 Credits)
Real-world team-based experience with the software engineering design and delivery cycle, including requirements analysis and specification, design techniques, and requirements and final project written documentation. For students in the online CS double-degree program only.
Prerequisites: CS 344 with C or better and CS 361 [C] and CS 362 [C]

CS 468. INCLUSIVE DESIGN (HCI). (4 Credits)
Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer.
Prerequisites: CS 352 with C or better
Recommended: CS 565 with a minimum grade of C

CS 472. COMPUTER ARCHITECTURE. (4 Credits)
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as ECE 472/ECE 572.
Prerequisites: ECE 375 with C or better
Equivalent to: CS 470, ECE 472

CS 475. INTRODUCTION TO PARALLEL PROGRAMMING. (4 Credits)
Theoretical and practical survey of parallel programming, including a discussion of parallel architectures, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language.
Prerequisites: CS 261 with C or better

CS 476. ADVANCED COMPUTER NETWORKING. (4 Credits)
Prerequisites: (CS 372 with C or better or ECE 372 with C or better) and (ECE 353 [C] or ST 314 [C] or ST 314H [C])
Equivalent to: EECS 476

CS 477. INTRODUCTION TO DIGITAL FORENSICS. (4 Credits)
Introduces concepts related to digital forensics, its role and importance, and tools and techniques for collecting and curating digital evidence. The course will also discuss the role of evidence in the justice system and some legal aspects as they pertain to digital forensics. It will introduce tools and techniques for computer and network forensics.
Prerequisites: CS 344 with C or better and CS 370 [C]

CS 478. NETWORK SECURITY. (4 Credits)
Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/TLS, IPSec, firewalls and intrusion detection CROSSLISTED as ECE 478.
Prerequisites: CS 372 with C or better or ECE 372 with C or better
Equivalent to: ECE 478
Recommended: CS 370
CS 480. TRANSLATORS. (4 Credits)
An introduction to compilers; attribute grammars, syntax-directed translation, lex, yacc, LR(1) parsers, symbol tables, semantic analysis, and peep-hole optimization.
Prerequisites: (CS 344 with C or better or CS 311 with C or better) and CS 321 [C]

CS 491. COMPUTER SCIENCE SKILLS FOR SIMULATION AND GAME PROGRAMMING. (4 Credits)
Game and simulation development is very much a data and math-intensive activity. A certain number of actions must be produced, and producing them by hand is hard. This is a middleware CS course that fills in many of the missing pieces for those wanting to enter the simulation and game development worlds in a software tool-building capacity.
Prerequisites: CS 261 with C or better and (CS 225 [C] or MTH 231 [C]) and MTH 252 [C]

CS 492. MOBILE SOFTWARE DEVELOPMENT. (4 Credits)
Introduction to concepts and techniques for developing mobile applications. Students will become familiar with modern mobile structure, implementation, development tools, and workflow.
Prerequisites: CS 344 with C or better

CS 493. CLOUD APPLICATION DEVELOPMENT. (4 Credits)
Covers developing RESTful cloud services, an approach based on representational state transfer technology, an architectural style and approach to communications used in modern cloud services development.
Prerequisites: CS 290 with C or better and CS 340 [C] and CS 372 [C]

CS 495. INTERACTIVE MULTIMEDIA PROJECTS. (4 Credits)
Students apply principles and procedures of digital art, design, communication, and software authoring while working on large integrated media projects.
Recommended: CS 395

CS 496. MOBILE AND CLOUD SOFTWARE DEVELOPMENT. (4 Credits)
Introduction to the concepts and techniques for developing mobile and cloud applications.
Prerequisites: CS 344 with C or better or CS 311 with C or better
Recommended: Working knowledge of at least one operating system

CS 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

CS 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

CS 503. COMPUTER SCIENCE MS THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CS 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 20 credits.

CS 506. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

CS 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

CS 511. PROGRAMMING AND DATA STRUCTURES. (4 Credits)
Computer programming, problem solving, data structures, object-oriented programming, recursion, sorting, dynamic programming, asymptotic time complexity.
Recommended: College algebra, plus the ability to navigate an operating system, manipulate files, and use a command line.
CS 531. ARTIFICIAL INTELLIGENCE. (4 Credits)

CS 532. ADVANCED ARTIFICIAL INTELLIGENCE. (4 Credits)
Recommended: CS 531

CS 533. INTELLIGENT AGENTS AND DECISION MAKING. (4 Credits)
Recommended: CS 531

CS 534. MACHINE LEARNING. (4 Credits)

CS 535. DEEP LEARNING. (4 Credits)
Prerequisites: CS 534 with C or better or ROB 537 with C or better

CS 536. PROBABILISTIC GRAPHICAL MODELS. (4 Credits)
Representation of probabilistic graphical models, both directed (Bayesian networks) and undirected (Markov networks). Exact and approximate inference techniques. Parameter and structure learning from data.
Recommended: Strong programming skills

CS 537. COMPUTER VISION I. (3 Credits)
An introduction to low-level computer vision and visual geometry. Topics of interest include the following: detection of interest points and edges, matching points and edges, color models, projective geometry, camera calibration, epipolar geometry, homography, image stitching, and multitarget tracking.
Recommended: Undergraduate-level statistics, probability, calculus, linear algebra, good programming skills, machine learning or AI

CS 539. SELECTED TOPICS IN ARTIFICIAL INTELLIGENCE. (1-5 Credits)
Advanced topics in artificial intelligence. Typical topics include machine learning for sequential and spatial data, knowledge representation and inference, probabilistic modeling of complex systems, data mining and information extraction.
This course is repeatable for 99 credits.

CS 540. DATABASE MANAGEMENT SYSTEMS. (4 Credits)
Purpose of database systems, levels of data representation. Entity-relationship model. Relational systems: data definition, data manipulation, query language (SQL), relational calculus and algebra, data dependencies and normal forms. DBTG network model. Query optimization, recovery, concurrency control.
Recommended: CS 261

CS 544. OPERATING SYSTEMS II. (4 Credits)
Principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking. Lec/rec.
Equivalent to: CS 511
Recommended: (CS 311 or CS 344) and (CS 271 or ECE 375)

CS 546. NETWORKS IN COMPUTATIONAL BIOLOGY. (3 Credits)
An introduction to biological networks and computational methods for their analysis, inference, and functional modeling. Various network centralities, topological measures, clustering algorithms, and probabilistic annotation models are introduced in the context of protein interaction, gene regulatory, and metabolic networks. The course also surveys bioinformatics methods for data-driven inference of network structure.
Recommended: Completion or concurrent enrollment in CS 325

CS 549. SELECTED TOPICS IN INFORMATION-BASED SYSTEMS. (1-5 Credits)
Current topics in information-based systems, e.g. information management for CAD, geographical information systems, distributed information systems, data models for complex applications. This course is repeatable for 99 credits.
Recommended: CS 540

CS 550. INTRODUCTION TO COMPUTER GRAPHICS. (4 Credits)
Recommended: CS 261 and (MTH 306 or MTH 306H or MTH 341)

CS 551. COMPUTER GRAPHICS. (4 Credits)
3-D graphics hardware: Line and polygon scan conversion, modeling transformations, viewing transformations, matrix stacks, hierarchical models, perspective and orthographic projections, visible surface determination, illumination models, shading models, texture mapping, ray tracing.
Recommended: CS 450 or CS 550

CS 552. COMPUTER ANIMATION. (4 Credits)
Traditional animation concepts: production pipeline, keyframing implementation, interpolation, point-mass dynamics, spring-mass systems, rigid body dynamics, forward and inverse kinematics, human motion control, motion capture.
Recommended: CS 551

CS 553. SCIENTIFIC VISUALIZATION. (4 Credits)
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization.
Recommended: Prior experience with Unix or Windows, programming experience.
CS 554. GEOMETRIC MODELING IN COMPUTER GRAPHICS. (4 Credits)
Advanced topics in computer graphics focusing on representation and processing of polygonal models and their application. Surface fundamentals; discrete differential geometry and topology; data structures for representing 3-D surfaces; surface subdivision and smoothing; mesh simplification and multi-resolution representation of 3-D surfaces; geometry compression; surface parameterization; geometry remeshing; topological simplification; implicit surfaces.
Recommended: CS 450

CS 555. SIGNAL AND IMAGE PROCESSING. (4 Credits)
Fundamental aspects of signal and image processing including image acquisition and display, histograms, level-set and geometric operations, convolutions, Fourier transform, image filtering, sampling theory, image transforms, human vision, color, morphological operations, and image compression.
Recommended: Knowledge of C/C++

CS 556. COMPUTER VISION. (4 Credits)
Algorithm development for automatic interpretation of the three-dimensional world that is captured in a set of images; cameras and image formation; color; keypoint and edge detection; perceptual grouping; segmentation; shape recognition; texture; object recognition; optical flow; motion estimation and tracking; and 3-D scene reconstruction from motion and stereo.
Recommended: Basic statistics, probability, calculus, linear algebra, good programming skills, machine learning or AI

CS 557. COMPUTER GRAPHICS SHADERS. (4 Credits)
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages.
Recommended: Previous graphics pipeline programming experience.

CS 559. SELECTED TOPICS IN COMPUTER GRAPHICS AND VISION. (1-5 Credits)
Advanced topics in graphics, animation, and vision. Topics include distribution ray tracing, global-illumination, radiosity, image-based modeling and rendering, vision-assisted image and video editing, 3-D vision, 3-D virtual environments, 3-D interaction, control for physical simulation, motion graphs, computational geometry, etc. 
This course is repeatable for 99 credits.

CS 560. DATA-DRIVEN SOFTWARE ENGINEERING. (4 Credits)
An overview of data-driven empirical research methods that can be used to understand the different aspects of software engineering.
Prerequisites: CS 561 with C or better

CS 561. SOFTWARE ENGINEERING METHODS. (4 Credits)
Master software engineering methods and supporting tools in the context of agile processes. Teams will engage in all aspects of software development including design, testing, implementation, deployment and maintenance. 3 hours of lecture per week plus one-hour independent lab per week.
Recommended: CS 362

CS 562. SOFTWARE PROJECT MANAGEMENT. (4 Credits)
Master software project management with an emphasis on timely, cost-effective delivery of high-quality systems. Learn about existing techniques and supporting tools, with a particular focus on coordination and project management. 3 hours of lecture per week plus one-hour independent lab per week.
Recommended: CS 561

CS 563. SOFTWARE MAINTENANCE AND EVOLUTION. (4 Credits)
Contribute to the cutting-edge of software engineering. Learn about existing techniques and supporting tools, with a particular focus on maintenance and evolution. Identify opportunities to support software maintenance and evolution more effectively, by creating new knowledge and supporting systems through research and innovation. 3 hours of lecture per week plus one-hour independent lab per week.
Prerequisites: CS 561 with C or better

CS 564. FIELD STUDIES IN SE AND HCI. (4 Credits)
Deals with the type of empirical study known as the "case" study. These are studies that collect data from natural software development situations as they really occur in the field, in which the researcher does not manipulate or "control" anything. The course is an end-to-end coverage of the process. Mainly focuses on case studies involving human software developers in the field. The student will conduct a field study as part of this course.

CS 565. HUMAN-COMPUTER INTERACTION. (4 Credits)
Basic principles of Human-Computer Interaction (HCI) for the design and evaluation of software systems. Includes research methods for studying human-machine interactions and user interfaces, design strategies, software evaluation methods, and related guidelines and standards.

CS 567. LABORATORY STUDIES IN SE AND HCI. (4 Credits)
Empirical lab studies of software development. Covers how to go about designing, preparing for, running, analyzing, and writing-for-publication lab experiments of programming situations involving human subjects. This is an end-to-end coverage of the entire process, and will put students in a position to conduct lab studies of their own with human subjects.

CS 568. INCLUSIVE DESIGN (HCL). (4 Credits)
Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer.
Recommended: CS 352 [C] or CS 565 [C]

CS 569. SELECTED TOPICS IN SOFTWARE ENGINEERING. (1-5 Credits)
Topics include new programming methodologies, productivity, software development, software complexity metrics.
This course is repeatable for 99 credits.

CS 570. HIGH PERFORMANCE COMPUTER ARCHITECTURE. (4 Credits)
Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as ECE 570.
Equivalent to: ECE 570
Recommended: ECE 472 or ECE 572

CS 572. COMPUTER ARCHITECTURE. (4 Credits)
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as ECE 472/ ECE 572.
Equivalent to: ECE 572
Recommended: ECE 375
CS 575. INTRODUCTION TO PARALLEL PROGRAMMING. (4 Credits)
Theoretical and practical survey of parallel programming, including a
discussion of parallel architecture, parallel programming paradigms, and
parallel algorithms. Programming one or more parallel computers in a
higher-level parallel language.

CS 576. ADVANCED COMPUTER NETWORKING. (4 Credits)
Advanced networking concepts: source/channel coding, queuing theory,
router design, network architectures (Intserv, Diffserv, MPLS), multimedia
protocols (TFRC, RTP), overlay networks, and wireless standards
(Bluetooth 802.11b, 3G/4G). CROSSLISTED as ECE 476/ECE 576.
Equivalent to: CS 576
Recommended: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)

CS 578. CYBER-SECURITY. (4 Credits)
A broad overview of the field of computer and network security.
Essential cryptographic mechanisms such as symmetric and public-
key cryptography (e.g., encryption, signatures), network security and
authentication protocols (e.g., Kerberos, TLS, IPSec), system security
(e.g., access control, firewalls), advanced topics (e.g., searchable
encryption, cloud security, secure computation). CROSSLISTED as
ECE 578.
Equivalent to: ECE 578

CS 579. TOPICS IN COMPUTER ARCHITECTURE AND PARALLEL
PROCESSING. (1-5 Credits)
Current topics in advanced computer architecture and parallel
processing. This course is repeatable for 99 credits.
Recommended: CS 575 or CS 572 or ECE 572

CS 581. PROGRAMMING LANGUAGES I. (4 Credits)
Graduate-level introduction to functional programming and programming
language theory. Strongly typed functional programming in Haskell,
abstract syntax and grammars, interpreters, denotational semantics,
domain theory, and lambda calculus.

CS 582. PROGRAMMING LANGUAGES II. (4 Credits)
Essentials of programming language theory for understanding and
conducting programming language research. Dependently typed
programming in Agda, Coq, or Idris; operational semantics; type systems;
unification and type inference.
Prerequisites: CS 581 with C or better

CS 583. ADVANCED FUNCTIONAL PROGRAMMING. (4 Credits)
Advanced functional programming concepts and strategies, with a focus
on techniques useful for the design and implementation of programming
languages. Includes higher-order abstract syntax, functors and monads,
generalized algebraic data types, functional data structures, and graph
reduction.
Prerequisites: CS 581 with C or better

CS 584. HUMAN FACTORS PROGRAMMING LANGUAGES. (4 Credits)
Principles and evaluation methods for designing and evaluating
programming languages to emphasize human productivity. Overall goals
are (a) to enable students to understand and apply these principles and
methods, and (b) to introduce at least four programming languages that
aim specifically at supporting human problem solving.

CS 585. DOMAIN-SPECIFIC LANGUAGES. (4 Credits)
Graduate-level introduction to the design and implementation of domain-
specific languages (DSLs). Domain analysis; review and revision of
language designs; binding constructs to support abstraction; definition of
syntax and semantics of DSLs; prototype implementation of embedded
DSL.
Prerequisites: CS 581 with C or better

CS 589. SELECTED TOPICS IN PROGRAMMING LANGUAGES. (1-5
Credits)
An in-depth examination of a specific topic of interest in programming
language design and implementation. Example topics include object-
oriented programming, parallel programming, compiler optimization,
programming language semantics.
This course is repeatable for 99 credits.

CS 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

CS 601. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

CS 603. COMPUTER SCIENCE PHD THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

CS 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CS 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

CS 637. COMPUTER VISION II. (4 Credits)
An introduction to recent advances in visual recognition, including object
detection, semantic segmentation, multimodal parsing of images and
text, image captioning, face recognition, and human activity recognition.
The course covers common formulations of these problems, including
energy minimization on graphical models, and supervised machine
learning approaches to low- and high-level recognition tasks.
Prerequisites: CS 535 with B+ or better or CS 537 with B- or better
Recommended: CS 519

Electrical and Computer Engineering

ECE 111. INTRODUCTION TO ECE: TOOLS. (3 Credits)
Introduction to the electrical and computer engineering professional
practice. Covers the foundations of engineering problem solving and
other skills necessary for success. Students will be taught engineering
practice through hands-on approaches. Recommended for electrical and
computer engineering majors, and for those interested in engineering as a
profession. Lec/lab. Has extra fees.
Recommended: Completion or concurrent enrollment in MTH 111

ECE 112. INTRODUCTION TO ECE: CONCEPTS. (3 Credits)
Basic electrical and computer engineering concepts, problem solving and
hands-on laboratory project. Topics include electronic circuit and device
models, digital logic, circuit analysis, and simulation tools. Lec/lab. Has
extra fees.
Prerequisites: MTH 111 with C or better or MTH 112 with C or better
or MTH 251 with C or better or MTH 251H with C or better or Math
Placement Test with a score of 23

ECE 199. SPECIAL STUDIES. (0-16 Credits)
One-credit section. Graded P/N.
This course is repeatable for 16 credits.

ECE 271. DIGITAL LOGIC DESIGN. (3 Credits)
A first course in digital logic design. Data types and representations,
Boolean algebra, state machines, simplification of switching expressions,
and introductory computer arithmetic. Lec/rec.
Prerequisites: MTH 251 (may be taken concurrently) with C or better
or MTH 251H (may be taken concurrently) with C or better or MTH 231 (may
be taken concurrently) with C or better
ECE 272. DIGITAL LOGIC DESIGN LABORATORY. (1 Credit)
This laboratory course accompanies ECE 271, Digital Logic Design. This also illustrates topics covered in the lectures of ECE 271 using computer-aided design, verification tools, and prototyping hardware.
Recommended: Completion or concurrent enrollment in ECE 271

ECE 322. ELECTRONICS I. (3 Credits)
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.
**Prerequisites:** ENGR 203 with C or better
**Equivalent to:** ECE 322H

ECE 322H. ELECTRONICS I. (3 Credits)
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.
**Attributes:** HNRS – Honors Course Designator
**Prerequisites:** ENGR 203 with C- or better
**Equivalent to:** ECE 322

ECE 323. ELECTRONICS II. (3 Credits)
Transient operation of MOSFETs and bipolar transistors; multistage amplifiers; frequency response; feedback and stability.
**Prerequisites:** ECE 322 with C or better

ECE 331. ELECTROMECHANICAL ENERGY CONVERSION. (4 Credits)
Energy conversion principles for electric machines. Steady state characteristics of direct current, induction, and synchronous machines. Application of stepper and servo motors and synchronous generators.
**Prerequisites:** (ENGR 202 with C or better or ENGR 202H with C or better) and MTH 256 [C] and PH 213 [C]

ECE 332. LABORATORY ON ELECTROMECHANICAL ENERGY CONVERSION. (1 Credit)
DC, PMAC, and induction machine testing, operation, and control.
**Prerequisites:** ENGR 202 with C or better or ENGR 202H with C or better
**Corequisites:** ECE 331

ECE 341. JUNIOR DESIGN I. (3 Credits)
Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group.
**Prerequisites:** CS 261 (may be taken concurrently) with C or better and ENGR 203 [C]

ECE 342. JUNIOR DESIGN II. (3 Credits)
Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group.
**Prerequisites:** ECE 341 with C or better

ECE 351. SIGNALS AND SYSTEMS I. (3 Credits)
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis. Lec.
**Prerequisites:** ENGR 203 with C or better and (MTH 256 [C] or MTH 256H [C])

ECE 352. SIGNALS AND SYSTEMS II. (3 Credits)
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis.
**Prerequisites:** ECE 351 with C or better and (MTH 306 [C] or MTH 306H [C])

ECE 353. INTRODUCTION TO PROBABILITY AND RANDOM SIGNALS. (3 Credits)
Introductory discrete and continuous probability concepts, single and multiple random variable distributions, expectation, introductory stochastic processes, correlation and power spectral density properties of random signals, random signals through linear filters. Lec.
**Prerequisites:** ECE 351 with C or better and (MTH 254 [C] or MTH 254H [C])

ECE 372. INTRODUCTION TO COMPUTER NETWORKS. (4 Credits)
Computer network principles, fundamental networking concepts, packet-switching and circuit-switching. TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. Lec. CROSSLISTED as CS 372.
**Prerequisites:** CS 261 with C or better and (ECE 271 [C] or CS 271 [C])
**Equivalent to:** CS 372
**Recommended:** C programming and Unix familiarity.

ECE 375. COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE PROGRAMMING. (4 Credits)
Introduction to computer organization, how major components in a computer system function together in executing a program, and assembly language programming. Lec/lab.
**Prerequisites:** ECE 271 with C or better
**Recommended:** CS 261 or C/C++ programming

ECE 390. ELECTRIC AND MAGNETIC FIELDS. (4 Credits)
Static and quasi-static electric and magnetic fields.
**Prerequisites:** (MTH 255 with C or better or MTH 255H with C or better) and ENGR 203 (may be taken concurrently) [C] and PH 213 [C]

ECE 391. TRANSMISSION LINES. (3 Credits)
Transient and steady-state analysis of transmission line circuits with application to engineering problems.
**Prerequisites:** ECE 322 (may be taken concurrently) with C or better and ENGR 203 [C] and (MTH 254 [C] or MTH 254H [C]) and (MTH 256 [C] or MTH 256H [C])
**Equivalent to:** ECE 391X

ECE 399H. SPECIAL TOPICS. (1-16 Credits)
Course work to meet students' needs in advanced or specialized areas and to introduce new, important topics in electrical and computer engineering at the undergraduate (junior/senior) level.
**Equivalent to:** ECE 399H
This course is repeatable for 16 credits.

ECE 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 401. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 411. ENGINEERING MAGNETICS. (3 Credits)
Application of magnetic materials in the design of magnetic devices. Properties of magnetic materials; engineering design of actuators, sensors and data storage devices. Introduction to spintronics.
**Prerequisites:** ECE 390 with C or better
ECE 413. SENSORS. (3 Credits)
Overview of sensor technologies including materials, physics of operation, applications and system integration.
Prerequisites: ECE 323 with C or better and PH 213 [C] and (CH 201 [C] or CH 231 [C]) or (CH 121 [C] and CH 122 [C]) or (CH 231 [C] and CH 261 [C])

ECE 415. MATERIAL SCIENCE OF NANOTECHNOLOGY. (3 Credits)
Introductory physical chemistry of solid surfaces, thermodynamics, and kinetics applied to synthesis of nanomaterials such as nanoparticles, nanowires, thin films, carbon nanotubes, fullerenes, graphene, etc. Characterization of nanomaterials, applications of nanomaterials, nano-synthesis techniques, integration of nanotechnology, and emerging nanotechnology topics.
Prerequisites: ECE 416 with C or better or ENGR 321 with C or better or ENGR 321H with C or better

ECE 416. ELECTRONIC MATERIALS AND DEVICES. (4 Credits)
Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes.
Prerequisites: ENGR 201 with C or better and PH 213 [C] and (CH 201 [C] or CH 231 [C]) or (CH 121 [C] and CH 122 [C]) or (CH 231 [C] and CH 261 [C])
Equivalent to: ECE 317

ECE 417. BASIC SEMICONDUCTOR DEVICES. (4 Credits)
Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec.
Prerequisites: ECE 416 with C or better

ECE 418. SEMICONDUCTOR PROCESSING. (4 Credits)
Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec.
Prerequisites: ECE 416 with C or better

ECE 422. CMOS INTEGRATED CIRCUITS I. (4 Credits)
Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation.
Prerequisites: ECE 322 with C or better and ECE 323 (may be taken concurrently) [C]

ECE 423. CMOS INTEGRATED CIRCUITS II. (4 Credits)
Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion. Lec/lab.
Prerequisites: ECE 422 with C or better

ECE 431. POWER ELECTRONICS. (4 Credits)
Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis.
Prerequisites: ECE 323 with C or better and ECE 352 [C] and (ENGR 202 [C] or ENGR 202H [C]) and MTH 254 [C] and MTH 306 [C]
Recommended: Three-phase power

ECE 437. SMART GRID. (3 Credits)
Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security.
Prerequisites: ECE 433 with C or better
Recommended: Background in power systems analysis equivalent to ECE 433

ECE 438. ELECTRIC AND HYBRID ELECTRIC VEHICLES. (4 Credits)
Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls.
Prerequisites: ECE 331 with C or better and ECE 431 [C]

ECE 441. ENGINEERING DESIGN PROJECT. (3 Credits)
First term of an extended, 3-term team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECE 322 with C or better and ECE 351 [C] and ECE 342 [C]

ECE 442. ENGINEERING DESIGN PROJECT. (3 Credits)
Second term of an extended, 3-term team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECE 441 with C or better

ECE 443. ENGINEERING DESIGN PROJECT. (2 Credits)
An extended team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECE 442 with C or better

ECE 451. SYSTEMS DYNAMICS AND CONTROL. (4 Credits)
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ME 440.
Prerequisites: (ME 317 with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C])))
Equivalent to: ECE 452, ME 440

ECE 461. INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS. (4 Credits)
Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec.
Prerequisites: ECE 351 with C or better and ECE 352 [C] and ECE 353 [C]
ECE 462. DIGITAL COMMUNICATIONS AND CHANNEL CODING. (4 Credits)
Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec.
Prerequisites: ECE 461 with C or better and ECE 351 [C] and ECE 352 [C] and ECE 353 [C]

ECE 463. WIRELESS COMMUNICATIONS NETWORK. (4 Credits)
Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffics, RF coverage for a certain propagation environment). Lec.
Prerequisites: ECE 351 with C or better and ECE 352 [C]
Recommended: Probability background and ECE 461

ECE 464. DIGITAL SIGNAL PROCESSING. (4 Credits)
Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures.
Prerequisites: ECE 351 with C or better and ECE 352 [C]

ECE 465. DIGITAL IMAGE PROCESSING. (3 Credits)
Introduction to digital image processing including fundamental concepts of visual perception, image sampling and quantization, image enhancement in spatial and frequency domains (through 2D Fourier transform), image restoration, and color image processing. Implementation of algorithms using Matlab Image Processing Toolbox.
Prerequisites: ECE 351 with C or better and ECE 352 [C]

ECE 466. ENERGY-EFFICIENT VLSI DESIGN. (4 Credits)
Combination and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec./lab.
Prerequisites: ECE 271 with C or better and ECE 322 [C] and ECE 323 (may be taken concurrently) [C]

ECE 472. COMPUTER ARCHITECTURE. (4 Credits)
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining, and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec./lab. CROSSLISTED as CS 472/CS 572.
Prerequisites: ECE 375 with C or better
Equivalent to: CS 472

ECE 473. MICROCONTROLLER SYSTEM DESIGN. (4 Credits)
Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. Lec./lab.
Prerequisites: ECE 322 with C or better and ECE 375 [C] and CS 261 [C]

ECE 474. VLSI SYSTEM DESIGN. (4 Credits)
Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced.
Prerequisites: ECE 322 with C or better and ECE 375 [C]

ECE 476. ADVANCED COMPUTER NETWORKING. (4 Credits)
Prerequisites: (CS 372 with C or better or ECE 372 with C or better) and (ECE 353 [C] or ST 314 [C] or ST 314H [C])
Equivalent to: EECS 476

ECE 477. MULTIMEDIA SYSTEMS. (4 Credits)
Design of multimedia systems used in information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec.
Recommended: ECE 375

ECE 478. NETWORK SECURITY. (4 Credits)
Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/TLS, IPSec, firewalls and intrusion detection. CROSSLISTED as CS 478.
Prerequisites: CS 372 with C or better or ECE 372 with C or better
Equivalent to: CS 478
Recommended: CS 370

ECE 482. OPTICAL ELECTRONIC SYSTEMS. (4 Credits)
Photodetectors, laser theory, and laser systems. Lec./lab. CROSSLISTED as PH 482/PH 582.
Equivalent to: PH 482
Recommended: ECE 391 or (PH 481 or PH 581)

ECE 483. GUIDED WAVE OPTICS. (4 Credits)
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec./lab. CROSSLISTED as PH 483/PH 583.
Prerequisites: ECE 391 (may be taken concurrently) with C or better or PH 481 (may be taken concurrently) with C or better
Equivalent to: PH 483

ECE 484. ANTENNAS AND PROPAGATION. (4 Credits)
Introduction to antennas and radiowave propagation. Offered alternate years.
Prerequisites: (ECE 390 with C or better and ECE 391 [C])
ECE 485. MICROWAVE DESIGN TECHNIQUES. (4 Credits)
Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.
Prerequisites: ECE 390 with C or better and ECE 391 [C]

ECE 499. SPECIAL TOPICS. (0-16 Credits)
Course work to meet students' needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the undergraduate level.
This course is repeatable for 16 credits.

ECE 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 503. ECE MS THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ECE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ECE 516. ELECTRONIC MATERIALS AND DEVICES. (4 Credits)
Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes.
Equivalent to: ECE 317
Recommended: ENGR 201

ECE 517. BASIC SEMICONDUCTOR DEVICES. (4 Credits)
Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec.
Recommended: ECE 416

ECE 518. SEMICONDUCTOR PROCESSING. (4 Credits)
Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec.
Recommended: ECE 416

ECE 520. ANALOG CMOS INTEGRATED CIRCUITS. (4 Credits)
Principles and techniques of design of electronic circuits with focus on a
design methodology for analog integrated circuits. Practical aspects of
using CAD tools in analyzing and laying out circuits will be discussed.
Recommended: ECE 423 or ECE 520

ECE 521. ANALOG CIRCUIT SIMULATION. (4 Credits)
Formulation/solution of circuit equations; sparse matrix techniques; DC,
transient, sensitivity, noise and Fourier analyses; RF circuit simulation.
Recommended: ECE 423 or ECE 520

ECE 522. CMOS INTEGRATED CIRCUITS I. (4 Credits)
Analysis and design of analog integrated circuits in CMOS technology;
current mirrors, gain stages, single-ended operational amplifier, frequency
response, and compensation.
Recommended: ECE 322 and completion or concurrent enrollment in
ECE 323

ECE 523. CMOS INTEGRATED CIRCUITS II. (4 Credits)
Analysis and design of analog integrated circuits in CMOS technology;
cascaded current mirrors, cascaded gain stages, single-ended and fully
differential operational amplifier, common-mode feedback, noise, and
distortion. Lec/lab.
Recommended: ECE 422 or ECE 522

ECE 530. CONTEMPORARY ENERGY APPLICATIONS. (4 Credits)
Contemporary energy issues and applications; fundamental physics of
renewable energy sources (e.g. wind, wave, and solar), devices used to
harvest energy from these sources, state-of-the-art renewable energy
technology, power transmission, transformers, and energy storage.
Recommended: Matlab, basic circuit analysis with RLC components and
diode

ECE 531. POWER ELECTRONICS. (4 Credits)
Fundamentals and applications of devices, circuits and controllers used
in systems for electronic power processing. Lec/lab.
Recommended: ECE 322 and ECE 351 and completion or concurrent
enrollment in ECE 323

ECE 532. DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION. (4 Credits)
Generalized machine theory. Techniques for dynamic analysis of
electromechanical machines including arbitrary reference frame theory.
Lec/lab.
Corequisites: ECE 531
Recommended: ECE 331

ECE 533. POWER SYSTEM ANALYSIS. (4 Credits)
Fundamentals and control of real and reactive power, steady-state load
flow studies, unbalance, stability and transient system analysis.
Recommended: ECE 323 and ECE 352 and three-phase power

ECE 534. ADVANCED ELECTRICAL MACHINES. (3 Credits)
Development of models for the dynamic performance of all classes of
electrical machines; synchronous, induction, permanent magnet and
reluctance motors. Dynamic motor simulations.
Equivalent to: ECE 538
Recommended: ECE 530

ECE 535. ADJUSTABLE SPEED DRIVES AND MOTION CONTROL. (3 Credits)
Adjustable speed drives, associated power electronic converters,
simulation and control. Lec.
Equivalent to: ECE 647
Recommended: ECE 530

ECE 536. POWER SYSTEM PROTECTION. (3 Credits)
Fundamentals of protective relaying. Relay input sources. Generation,
transmission, and distribution systems protection. Stability and load
shedding.
Recommended: ECE 433 or ECE 533

ECE 537. SMART GRID. (3 Credits)
Fundamentals of smart power grids. Technology advances in
transmission and distribution systems, policy drivers, assets and demand
management, and smart grid security.
Recommended: Background in power systems analysis equivalent to
ECE 433

ECE 538. ELECTRIC AND HYBRID ELECTRIC VEHICLES. (4 Credits)
Transportation electrification history, hybrid electric vehicle architecture,
powertrain components and their modeling and control, vehicle system
dynamics and controls.
Equivalent to: ECE 534
Recommended: ECE 331 and ECE 431

ECE 550. LINEAR SYSTEMS. (4 Credits)
Linear dynamic systems theory and modeling.
Recommended: ECE 351 and ECE 352
ECE 560. STOCHASTIC SIGNALS AND SYSTEMS. (4 Credits)
Stochastic processes, correlation functions, spectral analysis applicable to communication and control systems.
Recommended: ECE 461 or ECE 561

ECE 561. INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS. (4 Credits)
Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec.
Recommended: ECE 461 and ECE 352 and ECE 353

ECE 562. DIGITAL COMMUNICATIONS AND CHANNEL CODING. (4 Credits)
Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec.
Recommended: Probability background and ECE 461

ECE 563. WIRELESS COMMUNICATIONS NETWORK. (4 Credits)
Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffic, RF coverage for a certain propagation environment.) Lec.
Recommended: Probability background and ECE 461

ECE 564. DIGITAL SIGNAL PROCESSING. (4 Credits)
Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures.
Recommended: ECE 351 and ECE 352

ECE 565. ESTIMATION, FILTERING, AND DETECTION. (4 Credits)
Principles of estimation, linear filtering, and detection.
Recommended: ECE 353

ECE 566. INFORMATION THEORY. (4 Credits)
Introduction to information theory: entropy, differential entropy, entropy rates, mutual information, data compression, channel capacity, source coding, channel coding, network information theory.
Recommended: ECE 353 and strong mathematical background

ECE 569. CONVEX OPTIMIZATION. (4 Credits)
Introduces the fundamental concepts, theories of convex and nonconvex optimization, and the algorithmic solutions as well as applications to many research disciplines including signal processing, networking, communications, and machine learning. Emphasis will be on (i) convex analysis and optimality conditions, (ii) first-order large-scale algorithms (gradient, proximal gradient, ADMM, Frank-Wolfe, stochastic gradient, block coordinate descent), and (iii) convergence analysis.
Recommended: Linear algebra and ECE 599 Matrix Analysis for Signal Processing

ECE 570. HIGH PERFORMANCE COMPUTER ARCHITECTURE. (4 Credits)
Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as CS 570.
Equivalent to: CS 570
Recommended: ECE 472 or ECE 572

ECE 571. ENERGY-EFFICIENT VLSI DESIGN. (4 Credits)
Combination of sequential and logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency and scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab.
Equivalent to: ECE 573
Recommended: ECE 271 and ECE 322 and completion or concurrent enrollment in ECE 323 (all with a minimum grade of C)

ECE 572. COMPUTER ARCHITECTURE. (4 Credits)
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining, and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/CS 572.
Equivalent to: CS 572
Recommended: ECE 375

ECE 573. MICROCONTROLLER SYSTEM DESIGN. (4 Credits)
Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and software and hardware implementation of several systems using a microcontroller and peripherals. Lec/lab.
Equivalent to: ECE 571
Recommended: ECE 322 and ECE 375 and CS 261

ECE 574. VLSI SYSTEM DESIGN. (4 Credits)
Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced.
Recommended: ECE 322 or ECE 375

ECE 575. DATA SECURITY AND CRYPTOGRAPHY. (3 Credits)
Secret-key and public-key cryptography, authentication and digital signatures, protocols, implementation issues, privacy enhanced mail, data and communication security standards.

ECE 576. ADVANCED COMPUTER NETWORKING. (4 Credits)
Equivalent to: CS 576, ECE 566
Recommended: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)
ECE 577. MULTIMEDIA SYSTEMS. (4 Credits)
Design of multimedia systems for information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec.
Recommended: ECE 375

ECE 578. CYBER-SECURITY. (4 Credits)
A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPSec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as CS 578.
Equivalent to: CS 578

ECE 580. NETWORK THEORY. (4 Credits)
Linear graphs, multiport networks, and other topics in advanced network theory.

ECE 582. OPTICAL ELECTRONIC SYSTEMS. (4 Credits)
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as PH 482/PH 582.
Equivalent to: PH 582
Recommended: PH 481 or PH 581

ECE 583. GUIDED WAVE OPTICS. (4 Credits)
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as PH 483/PH 583.
Equivalent to: PH 583
Recommended: Completion or concurrent enrollment in (ECE 391 or PH 481 or PH 581)

ECE 584. ANTENNAS AND PROPAGATION. (4 Credits)
Introduction to antennas and radiowave propagation. Offered alternate years.

ECE 585. MICROWAVE DESIGN TECHNIQUES. (4 Credits)
Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.

ECE 590. ANALYTICAL TECHNIQUES IN ELECTROMAGNETIC FIELDS. (4 Credits)
Basic analytical techniques required to solve meaningful field problems in engineering.

ECE 591. ADVANCED ELECTROMAGNETICS. (3 Credits)
Advanced techniques for analyzing problems in electromagnetics, primarily numerical. Offered alternate years.
Recommended: ECE 590

ECE 593. RF MICROWAVE CIRCUIT DESIGN. (3 Credits)
Active/passive RF and microwave circuit design with emphasis to wireless systems.
Recommended: ECE 390 and ECE 391

ECE 599. SPECIAL TOPICS. (0-16 Credits)
Course work to meet students' needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the graduate level.
This course is repeatable for 99 credits.

ECE 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 603. ECE PhD THESIS. (1-16 Credits)
This course is repeatable for 99 credits.

ECE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ECE 611. ELECTRONIC MATERIALS PROCESSING. (3 Credits)
Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as CHE 611.
Equivalent to: CHE 611, ECE 511

ECE 612. PROCESS INTEGRATION. (3 Credits)
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as CHE 612.
Equivalent to: CHE 612, ECE 512
Recommended: ECE 611 or CHE 611

ECE 613. ELECTRONIC MATERIALS AND CHARACTERIZATION. (3 Credits)
Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as CHE 613.
Equivalent to: CHE 613, ECE 513

ECE 614. SEMICONDUCTORS. (3 Credits)
Essential aspects of semiconductor physics relevant for an advanced understanding of semiconductor materials and devices. Offered alternate years.
Equivalent to: ECE 514
Recommended: Exposure to quantum mechanics and solid state physics.

ECE 615. SEMICONDUCTOR DEVICES I. (3 Credits)
Advanced treatment of two-terminal semiconductor electronic devices. Offered alternate years.
Equivalent to: ECE 515
Recommended: ECE 614

ECE 616. SEMICONDUCTOR DEVICES II. (3 Credits)
Advanced treatment of three-terminal semiconductor electronic devices. Offered alternate years.
Equivalent to: ECE 516
Recommended: ECE 615

ECE 617. THIN FILM TRANSISTORS. (4 Credits)
Thin-film electronics typically necessitate semiconducting materials lacking long-range order (disordered semiconductors), and hence provide a range of challenges and opportunities for device engineers. Provides a comprehensive review of the device physics and materials science of thin film electronics – in particular thin-film transistors. Provides students with the theoretical and practical knowledge to be successful in the development and study of thin film transistors, in both academic and industrial environments.
Recommended: ECE 390, ECE 416/ECE516, ECE 417/ECE 517, ECE 614

ECE 619. SELECTED TOPICS IN SOLID STATE. (3 Credits)
Special courses taught on various topics in solid state as interests and demands vary.
This course is repeatable for 99 credits.
ECE 621. RADIO FREQUENCY IC DESIGN. (3 Credits)
Radio frequency (RF) circuits. Principles, analysis, and design of bipolar and MOS RF IC building blocks: low noise amplifiers, mixers, oscillators, frequency synthesizers.
Recommended: (ECE 422 or ECE 522) and (ECE 423 or ECE 523) or ECE 520

ECE 626. ANALOG CMOS CIRCUIT DESIGN. (3 Credits)
Switched-capacitor circuit design, on-chip filters, data converters. Practical aspects of analog CMOS IC design.

ECE 627. OVERSAMPLED DELTA-SIGMA DATA CONVERTERS. (3 Credits)
Noise-shaping theory in first, second, and higher-order modulators. Design, simulation, and realization in hardware of converters using this popular architecture.

ECE 629. SELECTED TOPICS IN MICROELECTRONICS. (3 Credits)
Course work to meet student's needs in advanced or specialized areas and to introduce the newest important results in microelectronics.

ECE 659. SELECTED TOPICS IN SYSTEMS AND CONTROL. (3 Credits)
Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in systems and control. This course is repeatable for 18 credits.

ECE 669. SELECTED TOPICS IN COMMUNICATIONS AND SIGNAL PROCESSING. (3 Credits)
Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in signal processing. This course is repeatable for 18 credits.

ECE 679. SELECTED TOPICS IN COMPUTER ENGINEERING. (1-16 Credits)
Topics to be presented at various times include information storage and retrieval, computer architecture, fault-tolerant computing, asynchronous sequential circuits, automata, data transmission, coding theory. This course is repeatable for 99 credits.

ECE 699. SPECIAL TOPICS. (3 Credits)
Advanced studies in field and wave theories and special devices. Topic examples are microwave and acoustic devices, advanced lasers and masers, electron beam interactions with traveling waves, MHD device dynamics. This course is repeatable for 99 credits.

Humanitarian Engineering Science and Technology

HEST 241. HOUSEHOLD ENERGY IN GUATEMALA: BACKGROUND. (1 Credit)
An introduction to the technical, social, environmental, and economic issues surrounding energy needs for households in developing countries and the technologies and policies needed to help address them. Students are introduced to concepts about global development, needs assessment and co-design, qualitative and quantitative evaluation, and local socioeconomic conditions. This course is preparation for the 10-day HEST 242 faculty-led study abroad course in Guatemala. Students from any major are invited to participate in this multidisciplinary course series.

HEST 242. HOUSEHOLD ENERGY IN GUATEMALA: APPLICATIONS. (3 Credits)
Through immersion in rural communities during this 10-day interdisciplinary study abroad course, students will gain a deeper understanding of household energy needs in developing countries, as well as the social, environmental, technical, and economic issues surrounding technologies and polices to help meet these needs. The outcomes produced by a variety of household technologies such as biomass cookstoves will be evaluated through qualitative and quantitative data gathering, including experiments, observations, and surveys, giving students the chance to practice their research and cross-cultural communication skills under a variety of circumstances.
Recommended: HEST 241

HEST 299. SPECIAL TOPICS. (1-6 Credits)
This course is repeatable for 9 credits.

HEST 310. *INTRO TO COMMUNITY ENGAGEMENT AND COMMUNITY-BASED DESIGN. (3 Credits)
Includes study of civic problems and issues, design-thinking concepts and application to co-design of engineering, science and technology-based solutions with social impact, and development of dispositions for effective community engagement through field study and service-learning. Recommended course for student wanting to complete a HEST internship. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HEST 320. *ENGINEERING FOR GLOBAL HEALTH SOLUTIONS. (3 Credits)
An introduction to the critical processes and drivers involved in the development of engineering solutions to address global health problems. Topics include world health challenges, accessing and interpreting health and economic data, basic healthcare systems around the world, the importance of ethical guidelines in ensuring the protection of human subjects, the process of cost effectiveness assessment of a technology, and the timescale and hurdles to adoption of a technology. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HEST 399. SPECIAL TOPICS. (1-6 Credits)
This course is repeatable for 9 credits.

HEST 411. ENGINEERING DESIGN FOR EMERGENCY & LOW-RESOURCE ENVIRONMENTS. (3 Credits)
Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure.
Recommended: Completion of an undergraduate engineering fluid mechanics course.

HEST 412. *MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY. (3 Credits)
Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HEST 499. SPECIAL TOPICS. (1-6 Credits)
This course is repeatable for 9 credits.
HEST 511. ENGINEERING DESIGN FOR EMERGENCY & LOW-RESOURCE ENVIRONMENTS. (3 Credits)
Introduces the challenges of engineering in low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure.
Recommended: Completion of an undergraduate engineering fluid mechanics course

HEST 512. MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY. (3 Credits)
Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.

HEST 541. HOUSEHOLD ENERGY IN GUATEMALA: BACKGROUND. (1 Credit)
An introduction to the technical, social, environmental, and economic issues surrounding energy needs for households in developing countries and the technologies and policies needed to help address them. Students are introduced to concepts about global development, needs assessment and co-design, qualitative and quantitative evaluation, and local socioeconomic conditions. This course is preparation for the 10-day Summer HEST 542 faculty-led study abroad course in Guatemala. Students from any major are invited to participate in this multidisciplinary course series.

HEST 542. HOUSEHOLD ENERGY IN GUATEMALA: APPLICATIONS. (3 Credits)
Through immersion in rural communities during this 10-day interdisciplinary study abroad course, students will gain a deeper understanding of household energy needs in developing countries, as well as the social, environmental, technical, and economic issues surrounding technologies and policies to help meet these needs. The outcomes produced by a variety of household technologies such as biomass cookstoves will be evaluated through qualitative and quantitative data gathering, including experiments, observations, and surveys, giving students the chance to practice their research and cross-cultural communication skills under a variety of circumstances.
Recommended: HEST 541

HEST 599. SPECIAL TOPICS. (1-6 Credits)
This course is repeatable for 9 credits.

Software Engineering

SE 201. SOFTWARE DEVELOPMENT I. (4 Credits)
Introduction to collaborative software development of larger, object-oriented systems. Overview of software architecture, and the tools, principles and practice of modern software development.
Prerequisites: CS 162 with C or better

SE 303. SOFTWARE ENGINEERING III. (4 Credits)
Introduction to refactoring techniques and improving the quality and maintainability of software. Applying continuous integration and deployment tools; containers and virtual development environments.
Prerequisites: CS 362 with C or better

SE 467. BUSINESS OF SOFTWARE II. (4 Credits)
Become an entrepreneur. Start a real software business, from ideation to sales. Real-world, hands-on learning in a fast-paced startup environment. Development of product ideas, hypotheses, and business models to discover customers. Teamwork, management, and positioning for investment.
Prerequisites: CS 466 with C or better

SE 468. BUSINESS OF SOFTWARE III. (4 Credits)
Become an entrepreneur. Start a real software business, from ideation to sales. Real-world, hands-on learning in a fast-paced startup environment. Development of product ideas, hypotheses, and business models to discover customers. Teamwork, management, and positioning for investment.
Prerequisites: SE 467 with C or better

Computer Science Graduate Major
(MA, MENG, MS, PhD)

Graduate Areas of Concentration

Algorithms and cryptography; artificial intelligence, machine learning and data science; computer graphics, visualization, and vision; computer systems and networking; human-computer interaction; programming languages; software engineering

See EECS website (http://eecs.oregonstate.edu/research) for complete information.

The master's program provides advanced instruction beyond the undergraduate degree. It prepares students for careers in which a higher level of experience is required. The PhD program prepares students for work in government or industry research laboratories or industry research laboratories or for careers at universities.

Additional areas of concentration may be arranged with other departments, for example, numerical analysis or computer algebra with the Department of Mathematics.

For additional information, contact the EECS Graduate Program Coordinator, phone 541-737-3617 or email eecs.gradinfo@oregonstate.edu.

Additional information concerning courses, advising, procedures, faculty and many other aspects of the program may be found on the school's website (http://eecs.oregonstate.edu/future-students/graduate/research-interest-areas).

### An alternate topic area approved by the program committee

### Prerequisite and Corequisite Coursework

All graduate students in Computer Science must achieve a B grade (or equivalent) in the following courses, or courses deemed equivalent to these courses by the program director, and must be taken either prior to or during your graduate studies:
To earn the minor upon graduation, students must meet all of the following:

1. Earn a C in each of their minor courses (all courses must be taken A–F grading)

2. Have a minimum 2.25 GPA in all required minor course work (36 credits)

The School of Electrical Engineering & Computer Science offers graduate minor degrees in Computer Science. The Graduate minor in Computer Science is for masters and doctoral level students who seek additional formal training and mentoring in computer science.

For more details, contact the EECS Graduate Program Coordinator, 541-737-3617 or eecs.gradinfo@oregonstate.edu

**Computer Science Graduate Minor**

**Major Code: 3070**

**Computer Science Minor**

**Also available at OSU-Cascades and Ecampus.**

Computing has become pervasive, touching nearly every aspect of our lives. A minor in Computer Science can open up opportunities for employment in the software development industry, but also in many areas including healthcare, business, science, medicine, graphics, utilities and education. Courses will teach theory, problem-solving skills, and programming.

**Minor Code: 249**

To earn the minor upon graduation, students must meet all of the following:

1. Earn a C in each of their minor courses (all courses must be taken A–F grading)
Computer Science Undergraduate Major (BA, BS, HBA, HBS)

Also available at OSU-Cascades and via Ecampus.

The computer science undergraduate curriculum has the following objectives:

1. Graduates of the program will have successful careers.
2. Graduates of the program will continue to learn and adapt to a changing world.

Entering undergraduate students must choose and complete options 1 or 2 to earn a degree in Computer Science. Entering post-baccalaureate students may select options 1 and 2 that are offered on campus or the online Computer Science Double Degree option offered by Ecampus.

1. Applied Computer Science (BA, BS, HBA, HBS) - on campus and via Ecampus
2. Computer Systems (BA, BS, HBA, HBS) - on campus only
3. Computer Science Double Degree (BS, HBS) - via Ecampus only

For students entering the undergraduate program, the recommended high school preparation is four years of mathematics, science, and English. High school programming or computer applications courses should not be taken in place of other college preparatory courses.

Major Code: 307

Each option has its own requirements. Please select a specific option for details.

Major Code: 307

Applied Computer Science Option

This option is offered within the following major(s):

- Computer Science - College of Engineering (p. 440)

Also available at OSU-Cascades and via Ecampus.

The Applied Computer Science option is for students who want to combine the study of computer science with an in-depth examination of a field in which computer science plays an important role. This option requires an approved program of study for each student. Students build their own program of study to include their choice of CS electives plus an Applied CS program. The Computer Science Undergraduate Curriculum Committee reviews these programs of study for approval. Existing OSU minors may be proposed for use both as an Applied CS program and as a minor.

Option Code: 354

Computer Science Double Degree Option

This option is offered within the following major(s):

- Computer Science - College of Engineering (p. 440)
Available only via Ecampus.

The Computer Science Double Degree option is for students who want to combine a bachelor’s degree in computer science with a bachelor’s degree in another field. Since computer science is relevant in so many diverse disciplines, students can obtain a computer science degree in combination with virtually any other degree. Those who already hold a bachelor’s degree—a BA or BS—from an accredited institution can add to their existing skill set and enhance their job prospects by earning a computer science degree online from OSU. The program of study includes the core courses in computer science, and also includes courses at the leading edge of computing technologies, software design, web development, and mobile/cloud computing.

All of the courses in the Double Degree option are offered through Ecampus, and most of the courses are also offered on-campus. This degree requires students to be enrolled as online students selecting DSC-Distance Degree Corvallis as their campus.

Students who choose the Computer Science Double Degree option may pursue a degree in computer science concurrently while earning a second bachelor’s degree, or may pursue the computer science degree as a post-baccalaureate degree.

Option Code: 297

Computer Systems Option

This option is offered within the following major(s):

- Computer Science - College of Engineering (p. 440)

The Computer Systems option is for students who want to take up computer science as a career and seek an in-depth understanding of computer science as an academic discipline. This option provides excellent preparation for those who plan to work for companies developing systems software or embedded systems. It also provides

CyberSecurity Certificate

As computer systems have become part of the fabric of modern society, system security has grown essential to the well-being of individuals, companies, the economy and life as we know it. A single security breach can expose the passwords, financial data and private personal information of hundreds of millions of people. This Undergraduate Certificate in Cybersecurity enables students to understand common threats to system security, assess security requirements for a new or existing system, implement secure solutions to counter threats, and evaluate systems to identify and address weaknesses. These skills will support future careers as cybersecurity analyst, cyberdefense engineer, information assurance technician, and security administrator. In addition, these skills will enable students to perform other jobs, such as software engineer and requirements analyst, with a higher level of proficiency. These skills will enable students to perform other jobs, such as software engineer and requirements analyst, with a higher level of proficiency.

Electrical and Computer Engineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

Analog and mixed signal; artificial intelligence and machine learning; communications and signal processing; computer systems; energy systems; materials and devices; RF/microwaves/optoelectronics

See EECS website (http://eecs.oregonstate.edu/research) for complete information.

The School of Electrical and Computer Engineering offers graduate programs leading to MEng, MS, and PhD degrees focusing on the major areas listed below. The MS and MEng programs provide advanced instruction beyond the undergraduate degree. They prepare students for careers in which a higher level of experience is required. The MEng degree is a course work-only degree with no required thesis or project report. The PhD program prepares students for work in government or industry research laboratories or careers at universities. Students are encouraged to develop programs of study in close cooperation with the faculty members in their areas of interest.

Graduate work is supported by the school’s well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

For more information, contact the EECS Graduate Program Coordinator, School of Electrical Engineering and Computer Science, OSU, Corvallis, OR 97331-5501; 541-737-3617; email: eecs.gradinfo@oregonstate.edu

Additional information concerning courses, advising procedures, faculty, and many other aspects of the school may be found on the school’s website (http://eecs.oregonstate.edu).

**Non-MECOP Sample Program for ECE Majors**

The curriculum in Electrical and Computer Engineering provides a wide range of opportunities in undergraduate study in the electrical engineering areas of communications, signal processing and controls, electronics and integrated circuits, power electronics and energy systems, materials and devices, electromagnetism, microwaves and optics, and the computer engineering areas of computer architecture, digital hardware design, and computer networks.

The Electrical and Computer Engineering undergraduate program has the following objectives:

1. Graduates of the program will have successful careers.
2. Graduates of the program will continue to learn and adapt to a changing world.

The Electrical and Computer Engineering undergraduate degree program includes a common set of core courses that provides a solid foundation, plus 29-credits of restricted electives. The restricted electives allow students to prepare for industry, graduate study, or other career paths, specializing or broadening their knowledge and skills. Elective course work is available focusing on sustainability and renewable energy, computers and networks, energy systems, integrated circuits, systems signals and communications, materials and devices, RF/microwaves and optoelectronics, and robotics and control. The sustainability and renewable energy focus addresses global technological challenges

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)
1 Must be selected from approved restricted elective list
2 Prerequisite for required upper-division courses
3 Must be selected to satisfy the requirements of the baccalaureate core

**School of Mechanical, Industrial, and Manufacturing Engineering**

The School of Mechanical, Industrial, and Manufacturing Engineering (MIME) at OSU offers three ABET-accredited undergraduate degrees: Mechanical Engineering, Industrial Engineering, and Manufacturing Engineering and one undergraduate degree that is currently undergoing ABET accreditation: Energy Systems Engineering (offered at OSU-Cascades campus).

The mission of the School of MIME is two-fold:

- To prepare our students as entrepreneurial, team-oriented, work-ready graduates and lifelong learners in mechanical, industrial and manufacturing engineering, and
- To engage in collaborative, cutting-edge research whose applications lead to greater prosperity and a sustainable future for Oregon and the world.

**MIME Program Objectives**

ABET requires that each program establishes educational objectives defined as "broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve." While each program has specific objectives, all MIME programs’ program
objectives may be summarized by the following statements in three broad areas of student participation and graduate achievement:

1. **Our graduates will be systems thinkers.** MIME graduates will be able to analyze, evaluate, improve, and design engineered systems and processes using modern engineering tools (hardware and software) and approaches. They will demonstrate in-depth knowledge of mechanical, industrial and/or manufacturing systems.

2. **Our graduates will be global collaborators.** MIME graduates will be able to communicate effectively across disciplines and cultures. They will provide management and leadership skills within their organizations and work effectively in diverse environments.

3. **Our graduates will be innovative designers and problem solvers.** MIME graduates will use both structured and unstructured methodologies to innovate systems and processes. They will apply technical knowledge and creativity in solving real-world problems. They will demonstrate a sound understanding of engineering and project management fundamentals and breadth of experience with engineering design and problem-solving processes.

**Mechanical Engineering**

Mechanical engineers design and develop small devices, large equipment, and processes for society. They play major roles in the design, testing and operation of mechanisms, machines, and systems, including processes for energy conversion and equipment used in households, businesses, transportation, and manufacturing.

In addition to the university baccalaureate core, the mechanical engineering curriculum has its base in mathematics, science, engineering science, and design. Mathematics and science courses occur primarily in the first two years. Engineering science is a major component, which is treated from the sophomore year to graduation in a combination of required and technical elective sources.

OSU's Mechanical Engineering Program has all the attributes needed for the best learning environment: ABET accredited curriculum, excellent faculty, modern facilities, quality students, and strong industrial interaction.

Engineering design is an integral element of the program. The philosophy is to "plant the seed" for design at the freshman level and grow it throughout the program. Most of the skills are developed at the junior and senior levels when students have achieved proficiency in the basic technical requirements. At the junior level, the design process is extensively developed in three courses. At the senior year, design experiences occur in several areas, culminating in the two-term senior project in which students in small teams carry out the design of some product or process under the supervision of a faculty advisor. Attention to hands-on activity adds a very desirable "feel" for many aspects of the design process.

A good choice of senior electives enables students to achieve a degree of specialization and depth to match their interests. The areas include applied stress analysis; design, dynamics, and analysis of mechanical and thermal/fluid systems; concurrent engineering; control system design; mechatronics; heat transfer; and metallurgy and materials.

The faculty encourages a vibrant extracurricular program for professional and leadership experiences. Students are encouraged to obtain at least three months of work experience through an industrial or research internship or to participate in a foreign exchange program. The school's goal is to have more than 95 percent of its students graduate with such experience. In addition to students having general internships, many of

the professional-level students participate in the industry-driven Multiple Engineering Cooperative Program (MECOP). This program provides two paid six-month internships at over 60 Pacific Northwest companies where interns work with a company mentor and improve their capabilities for the work environment.

Mechanical engineers can be found in a wide variety of industries including aerospace, electronics, biomedical, transportation, manufacturing, energy, automotive, and government labs. Because of the increasing complexity of mechanical engineering, graduate study for the MS and PhD degrees is advisable for students who wish to specialize in depth in any of the above areas. The undergraduate curriculum provides an excellent foundation for graduate study.

**Industrial Engineering**

Industrial engineers (IEs) apply science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are often large and complex, IEs utilize knowledge and skills in a wide variety of disciplines, have the ability to work well with people, and take a broad, systems perspective. The Industrial Engineering degree is a very flexible degree that allows students to tailor their program of study to meet their individual career goals. A large number of restricted elective credits allows students to pursue the Business Engineering option or to customize their program to a field of interest.

IEs are key players in the integration and operation of systems in all sectors of industry and government including the following (with examples):

- aerospace (NASA space shuttle pre-launch processing systems)
- automotive (automobile final assembly plants)
- communications (telephone services)
- computers (factory information systems)
- electronics/semiconductors (silicon wafer fabrication facilities)
- food (canneries and fast food restaurant chains)
- government (department of motor vehicles service centers)
- health care (hospital central stores and operating rooms)
- manufacturing (circuit board fabrication facilities)
- retail (product distribution centers)
- transportation (airlines, overnight delivery services)

In their role as system integrators, IEs analyze and design systems. For example:

- facilities layout,
- material handling systems,
- manufacturing and other production systems,
- information systems,
- individual and group workplaces.

In the operations realm, IEs analyze, design and manage processes. For example:

- manufacturing processes-service processes,
- production system planning and control,
- resource allocation and scheduling,
- personnel assignment and scheduling,
- quality assurance,
Energy Systems Engineering
Energy systems engineers oversee complex energy conversion and distribution systems, work to improve energy storage systems, and manage the efficient use of energy in building, manufacturing, and processing systems. ESE professionals also study the secondary effects of energy usage from a local environmental impact, regional and national economic impact, and global climate change perspective.

Energy systems engineers pursue a variety of jobs and occupations. For example, they might be hired to do any of the following:

- Manage operations of a wind turbine farm
- Analyze efficiency of hydroelectric power systems
- Oversee production of innovative fuel-cell technologies
- Evaluate the economic viability of new solar power installations
- Assess the environmental impact of alternative energy systems

Manufacturing Engineering
The Manufacturing Engineering degree is a more specialized degree, focusing on both high-tech manufacturing and traditional manufacturing. In particular, it is a specialization of industrial engineering that focuses on the making of physical products. The Manufacturing Engineering degree offers a hands-on education, and manufacturing engineering students are encouraged to participate in the college’s MECOP program, a nationally recognized industrial cooperative education program.

Students who complete the requirements for the Manufacturing Engineering degree plus 32 additional credits (at least 16 of these credits must be from the list of industrial engineering restricted electives) can earn two separate degrees, one in manufacturing engineering and the other in industrial engineering. The additional 32 credits typically take two additional quarters to complete.

Undergraduate Programs

Majors
- Energy Systems Engineering (p. 463)
- Industrial Engineering (p. 466)
  Option:
  - Business Engineering
- Manufacturing Engineering (p. 467)

Faculty

Professors Batten, Campbell, Cann, Doolen, Kim, Kruzic, Liburdy, Logendran, Narayanan, Paasch, B. Paul, Pence, Sharp, Stone, I. Tumer, K. Tumer
Associate Professors Albertani, Apte, Atre, Bay, Funk, Gibbons, Grimm, Hurst, Porter, Smart, Warnes
Assistant Professors Balasubramanian, Blunck, Calvo, DuPont, Eseonu, Feuerbacher, Fronk, Greaney, Haapala, Hagen, Hatton, Hollinger, Hoyle, Malhotra, Menguc, Ng, Niemeyer, Parmigiani, Sencer, Tucker, Vergara, Wang
Instructors Ettringer, Feldman, Natarajan, Shea, Squires

Professional Faculty
Barber, Borntrager, DeAdder, Finn, Helvie, Jensen, Marx, G. Newcomb, L. Paul, Randall, J. Robinson, T.A. Robinson
Energy Systems Engineering

ESE 330. MODELING AND ANALYSIS OF DYNAMIC SYSTEMS. (4 Credits)
Prepares basic concepts of dynamic behavior, and the analytical and computational techniques for predicting and assessing dynamic behavior. Modeling a basic system, compound system, dynamic stability, and natural behavior to continuing and abrupt inputs are presented.
Prerequisites: ENGR 202 with C or better and ENGR 212 [C] and MTH 256 [C] and MTH 306 [C]

ESE 355. ENERGY REGULATION. (4 Credits)
Introductory course to the policies and laws governing energy generation and transmission in the United States with a focus on electricity. History of regulations give context to understand current regulation and potential future policies. Laws regulating the use of alternative energy resources covered in a practical setting. Offered at OSU-Cascades only.
Prerequisites: BA 360 (may be taken concurrently) with C or better or ENGR 390 (may be taken concurrently) with C or better

ESE 360. ENERGY CONSUMPTION ANALYSIS. (4 Credits)
Analysis of energy use in transportation, residential and industrial sectors to understand how new technologies improve energy efficiency. Tradeoff techniques applied to decide between less efficient, less expensive systems versus more efficient, more expensive systems. International energy consumption compared, and energy losses evaluated for heating, cooling and electronic systems. Offered at OSU-Cascades only.
Prerequisites: BA 360 (may be taken concurrently) with C or better or ENGR 390 (may be taken concurrently) with C or better and ME 311 [C]

ESE 430. FEEDBACK CONTROL SYSTEMS. (4 Credits)
Modeling and analysis of linear, continuous-time systems in the time and frequency domains. Fundamentals of single-input-single-output control system design using both time-domain and frequency-domain techniques.
Prerequisites: ESE 330 with C or better

ESE 450. ENERGY GENERATION SYSTEMS. (4 Credits)
Survey of technical fundamentals and operational principles of conventional and renewable energy conversion systems to understand the environmental and sustainable issues for energy systems currently in use or may be used in the future to power our industrial society. Offered at OSU-Cascades only.
Prerequisites: ME 312 with C or better

ESE 470. ENERGY DISTRIBUTION SYSTEMS. (4 Credits)
Detailed coverage of the electrical energy distribution system, its operation, control and design. Design considerations and impacts to meet emerging and evolving customer needs. Broader understanding of natural gas and oil pipeline distribution for these infrastructure commodities. Offered at OSU-Cascades only.
Prerequisites: ENGR 202 with C or better and ME 311 [C]

ESE 471. ENERGY STORAGE SYSTEMS. (4 Credits)
Coverage of energy storage techniques involving electrochemical, mechanical and emerging options. Integration of the energy storage media, its effects on the bulk power system, and design tradeoffs to understand environmental impacts, cost, reliabilities, and efficiencies for commercialization of bulk energy storage. Offered at OSU-Cascades only.
Prerequisites: ENGR 202 with C or better and ME 312 [C]

ESE 497. *MIME CAPSTONE DESIGN. (4 Credits)
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC - Core, Skills, WIC
Prerequisites: ((ENGR 390 with C or better or BA 360 with C or better) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331 [C] or ME 331H [C]) and ESE 355 [C] and ESE 360 [C] and WR 327 [C] and (ST 314 [C] or ST 314H [C]))
Equivalent to: IE 497, ME 497, MIME 497

ESE 498. *MIME CAPSTONE DESIGN. (4 Credits)
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC - Core, Skills, WIC
Prerequisites: ESE 497 with C or better or IE 497 with C or better or ME 497 with C or better or MIME 497 with C or better
Equivalent to: IE 498, ME 498

ESE 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

Industrial and Manufacturing Engineering

IE 112. SPREADSHEET SKILLS FOR INDUSTRIAL & MANUFACTURING ENGINEERS. (1 Credit)
Basic spreadsheet functionality needed to create spreadsheet applications for common industrial and manufacturing engineering information processing tasks, including simple databases, statistical analysis, quality control, forecasting, production planning and control, and operations analysis and improvement. Topics include creating spreadsheets, formatting, data types, formulas, charts, user-defined functions, and pivot tables.

IE 199. SPECIAL TOPICS. (1-16 Credits)
Special topics in industrial engineering. This course is repeatable for 16 credits.

IE 212. COMPUTATIONAL METHODS FOR INDUSTRIAL ENGINEERING. (4 Credits)
Prerequisites: ENGR 112 with C or better
Corequisites: IE 112
Recommended: Algebra, calculus, differentiation and integration

IE 255. INTRODUCTORY QUANTITATIVE ANALYSIS OF INDUSTRIAL AND MANUFACTURING SYSTEMS. (3 Credits)
An introduction to basic analysis concepts that will be utilized in subsequent industrial and manufacturing engineering courses. Emphasis will be placed on fundamental concepts such as data collection, commonly applied quantitative analysis methods, and how these are utilized to support decisions in different industrial and manufacturing system applications. Examples include resource utilization calculations, equipment fraction equations, queuing models, basic statistical inference procedures, and probability models used in discrete event simulation.
Prerequisites: MTH 252 with C or better
IE 285. INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING. (3 Credits)
Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. Crosslisted as MFGE 285.
Prerequisites: IE 112 (may be taken concurrently) with C or better or FOR 112 (may be taken concurrently) with C or better
Equivalent to: MFGE 285

IE 299. SPECIAL TOPICS. (1-16 Credits)
Special topics in industrial engineering.
This course is repeatable for 16 credits.

IE 355. STATISTICAL QUALITY CONTROL. (4 Credits)
Control of quality through the use of statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Lec/lab.
Prerequisites: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 351

IE 356. EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES. (4 Credits)
Systematic analysis of processes through the use of statistical analysis, methods, and procedures. Application of statistical techniques including use of classic process analysis techniques, regression and design of experiments. Lec/rec.
Prerequisites: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 352

IE 365. FACILITY DESIGN AND OPERATIONS MANAGEMENT. (4 Credits)
Design and analysis of industrial facilities including just-in-time systems, queuing, material handling systems, material flow analysis, line balancing, systematic layout planning, design of warehouse facilities, and facilities location.
Prerequisites: ENGR 248 with C or better and (IE 255 [C] or ST 314 [C])
Equivalent to: IE 365

IE 380. THE RESPONSIBLE ENGINEER. (3 Credits)
The idea of responsibility and the ethical responsibilities of the engineer. Introduction to value, ethics, and ethical systems. Engineering as value creation and the ethical ramifications of engineering. Codes of engineering ethics. Recognizing and addressing ethical dilemmas in engineering. Examination of the individual, social, and environmental effects of engineering and technology. (Baccalaureate Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

IE 399. SPECIAL TOPICS. (1-16 Credits)
Special topics in industrial engineering.
This course is repeatable for 16 credits.

IE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

IE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

IE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

IE 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

IE 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

IE 411. VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS. (4 Credits)
Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management.
Prerequisites: IE 212 with C or better
Equivalent to: IE 414

IE 412. INFORMATION SYSTEMS ENGINEERING. (4 Credits)
Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.
Prerequisites: IE 212 with C or better

IE 415. SIMULATION AND DECISION SUPPORT SYSTEMS. (4 Credits)
Analysis of operations and production systems through the application of computer simulation modeling techniques. Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab.
Prerequisites: IE 112 with C or better and (IE 255 [C] or ST 314 [C])

IE 418. TELECOMMUNICATION CONCEPTS. (3 Credits)
Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, Internet architecture. Taught fall in even years.
Prerequisites: IE 212 with C or better
Recommended: Previous programming experience

IE 419. WIRELESS NETWORKS. (3 Credits)
RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks.
Prerequisites: IE 418 with C or better

IE 425. INDUSTRIAL SYSTEMS OPTIMIZATION. (4 Credits)
A first course in operations research. Topics include mathematical programming formulations and solutions, the simplex method, network optimization, introduction to metaheuristics, and linear programming under uncertainty.
Prerequisites: (IE 255 with C or better or ST 314 with C or better) and (MTH 306 [C] or MTH 341 [C])
Equivalent to: IE 421, IE 422
IE 426. STOCHASTIC MODELS OF INDUSTRIAL SYSTEMS. (4 Credits)
The application of probabilistic and stochastic modeling methodologies
to analyze the performance of production and service systems. Major
topics include probability models for space planning, Poisson arrival
processes, discrete and continuous time Markov chain models of
machine cycle times, and queuing models applied to various industrial
systems. Other applications of these tools to model inventories, process
behavior, and equipment reliability is illustrated.
Prerequisites: (IE 255 with C or better or ST 314 with C or better) and
IE 425 [C]

IE 470. MANAGEMENT SYSTEMS ENGINEERING. (4 Credits)
Improvement of organizational performance through the design and
implementation of systems that integrate personnel, technological,
environmental, and organizational variables. Topics include performance
assessment and measurement as well as improvement methodologies.
Prerequisites: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and
IE 367 [C] and IE 368 [C]
Equivalent to: IE 474

IE 471. PROJECT MANAGEMENT IN ENGINEERING. (3 Credits)
Critical issues in the management of engineering and high-technology
projects are discussed. Time, cost, and performance parameters are
analyzed from the organizational, people, and resource perspective.
Network optimization and simulation concepts are introduced. Resource-
constrained project scheduling case discussions and a term project are
included.
Prerequisites: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and
IE 367 [C] and IE 368 [C]

IE 475. ADVANCED MANUFACTURING COSTING TECHNIQUES. (3 Credits)
Costing techniques applicable in advanced manufacturing enterprises:
activity-based costing, economic value added, Japanese cost
management techniques, life cycle costing, throughput accounting,
cost of quality, and financial versus operational performance measures.
Emphasis on linkages to such advanced manufacturing systems as
cellular manufacturing, flexible manufacturing, JIT, Lean, and ERP.
Prerequisites: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and
IE 367 [C] and IE 368 [C]
Equivalent to: IE 495

IE 499. SPECIAL TOPICS. (1-5 Credits)
Recent advances in industrial engineering pertaining to the theory and
application of system studies. Analysis and design of natural resource
systems; evaluation; detection extraction; processing and marketing
systems; advanced design of production systems with reference to
social, economic, and regional planning; human engineering studies of
man-machine systems; applications of operations research techniques.
Nonsequence course. Not offered every term.
This course is repeatable for 99 credits.

IE 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

IE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

IE 506. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

IE 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

IE 511. VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS. (4 Credits)
Object-oriented modeling, Unified Modeling Language, software
development concepts, file and database connectivity, and visual
programming skills (Microsoft Visual Basic) for use in developing
industrial applications, such as process monitoring and supply chain
management.
Equivalent to: IE 514
Recommended: IE 212

IE 512. INFORMATION SYSTEMS ENGINEERING. (4 Credits)
Framework for enterprise information systems. Engineering and scientific
systems. Requirements definition, enhanced entity relationship modeling,
logical modeling, structured query language, relational model, referential
integrity. Lec/lab.

IE 515. SIMULATION AND DECISION SUPPORT SYSTEMS. (4 Credits)
Analysis of operations and production systems through the application
of computer simulation modeling techniques. Fundamentals of computer
simulation including random number generation, input/output data
analysis, model validation and verification. Lec/lab.
Recommended: ST 314

IE 518. TELECOMMUNICATION CONCEPTS. (3 Credits)
Telecommunication concepts for industrial applications. OSI reference
model, local area networks, wide area networks, internet architecture.
Taught fall in even years.
Recommended: IE 212 and previous programming experience.

IE 519. WIRELESS NETWORKS. (3 Credits)
RF fundamentals, ISO 802.11 standards, spread spectrum technology,
narrow band technology, direct sequence and frequency hopping
transmission schemes, electromagnetic interference, design of indoor
wireless networks.
Prerequisites: IE 518 with C or better

IE 521. INDUSTRIAL SYSTEMS OPTIMIZATION I. (3 Credits)
Techniques for analysis and solution of problems in industrial and
management systems. Emphasis on application of linear and integer
programming and extensions.
Equivalent to: IE 525
Recommended: MTH 341

IE 522. INDUSTRIAL SYSTEMS OPTIMIZATION II. (3 Credits)
Techniques for analysis and solution of problems in industrial and
management systems. Emphasis on applications of dynamic
programming. Markovian processes, and questions as applied to
industrial problems.
Recommended: ST 314

IE 523. INTEGER PROGRAMMING. (3 Credits)
Classic models and algorithms for discrete optimization. Includes
intuition and theory about computational strategies for solution of integer
programming and combinatorial optimization problems.
Prerequisites: IE 521 with C or better

IE 533. HUMAN ANALYTICS AND BEHAVIORAL OPERATIONS. (3 Credits)
Introduces several quantitative applications related to determining
workforce size, skill-sets, and multi-functionality in service and
manufacturing systems based on measurable quality and productivity
performance, at the intersection of human factors engineering and
production planning. Modeling and solving problems in a context of
the speed and accuracy trade-off. Models include learning, forgetting,
teamwork, fatigue, procrastination, and individual difference measures.
Recommended: Introductory math programming
IE 545. HUMAN FACTORS ENGINEERING. (4 Credits)
Analysis and design of work systems considering human characteristics, capabilities and limitations. Analysis and design of displays, controls, tools, and workstations. Human performance analysis. Human factors research methods.
Equivalent to: IE 541

IE 546. HUMAN-MACHINE SYSTEMS ENGINEERING. (3 Credits)
Development of safe, high performance human-machine systems. System/function/task analysis, function allocation, design, mockups and rapid prototyping, human factors test and evaluation. Critical examination of the human-factors and domain-specific literature to identify human factors problems, and knowledge and methods to address those problems.
Equivalent to: IE 542
Recommended: IE 545

IE 548. COGNITIVE ENGINEERING. (3 Credits)
Theories and models of human sensory, cognitive, and motor performance pertaining to the operation of complex systems. Applications to human-machine systems engineering. Research topics and methods related to cognitive engineering.
Recommended: IE 545

IE 552. DESIGN OF INDUSTRIAL EXPERIMENTS. (3 Credits)
A first course in design of experiments with an emphasis on applications and fundamental data analysis methods. Basic statistical inference, analysis of variance, blocking, general factorial designs, and two-level factorial designs are covered.
Recommended: ST 314

IE 553. DESIGN OF INDUSTRIAL EXPERIMENTS II. (3 Credits)
This second course in design of experiments is a continuation of IE 552. The same textbook is used. Topics covered include two-level fractional factorial designs, regression models, response surface methods, rules for expected sum of squares and expected mean squares, a summary of the "no-name" approach to DOE, and analysis of experiments with unbalanced data (time permitting).
Prerequisites: IE 552 with C or better

IE 563. ADVANCED PRODUCTION PLANNING AND CONTROL. (3 Credits)
Recommended: IE 521 and ST 314

IE 564. DESIGN AND SCHEDULING OF CELLULAR MANUFACTURING SYSTEMS. (3 Credits)
Recommended: Computer experience

IE 570. MANAGEMENT SYSTEMS ENGINEERING. (4 Credits)
Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies.
Equivalent to: IE 574

IE 571. PROJECT MANAGEMENT IN ENGINEERING. (3 Credits)
Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included.

IE 575. SYSTEMS THINKING THEORY AND PRACTICE. (4 Credits)
An introduction to systems science theory and practice. Systems science theory is explored through the fundamentals of systems thinking theory, and theory of knowledge. Systems science practice is explored through system dynamics modeling techniques for simulating socio-technical systems, structures, and processes.

IE 581. OPERATIONS MANAGEMENT. (4 Credits)
Critical and current issues on the implementation of operations management strategies for the engineering manager. Includes aspects of operations in an engineering management environment such as work systems design, forecasting, strategy, facilities location and design, management of quality and resources planning and management.
Prerequisites: IE 582 with B or better
Recommended: IE 571

IE 582. INTRODUCTION TO MANAGEMENT FOR ENGINEERS AND SCIENTISTS. (4 Credits)
An introduction to concepts, tools, and practices necessary for a broad understanding of the roles of engineering and technical managers. A mix of research results, case studies, and experiential learning is used to bolster theories of management, with focus on technical organizations.

IE 583. ADVANCED ENGINEERING ECONOMICS ANALYSIS. (4 Credits)
Examines the economics dimension of engineering management, from costing techniques to financial analysis. Topics include industrial cost analysis and estimation, economic planning, forecasting, and budgeting, and financial analysis for engineering and engineering management.
Prerequisites: IE 582 with B or better
Recommended: Basic courses in engineering economic analysis

IE 584. SYSTEMS ENGINEERING. (4 Credits)
An overview of systems engineering within engineering management practice. Principles of systems engineering are explored through traditional and contemporary hard and soft systems of engineering techniques and practices, and through current future developments in the field.
Prerequisites: IE 582 with B- or better
Recommended: IE 581 and IE 583 and IE 586 and IE 587

IE 585. LEGAL ASPECT OF ENGINEERING MANAGEMENT. (3 Credits)
A survey of legal topics relevant to engineers, including basic of legal system, labor law, intellectual property, torts, and contracts. This is an introductory course, emphasizes on legal principles that can provide engineers with the ability to recognize legal issues that are likely to arise in the engineering profession and engineering management. Note: This is an introductory class and students are advised to seek legal representation if he/she encounters a legal issue.
Prerequisites: IE 582 with B or better
Recommended: IE 581 and IE 583 and (IE 586 or CCE 552)

IE 586. SYSTEMS THINKING THEORY AND PRACTICE. (4 Credits)
An introduction to systems science theory and practice. Systems science theory is explored through the fundamentals of systems thinking theory, and theory of knowledge. Systems science practice is explored through system dynamics modeling techniques for simulating socio-technical systems, structures, and processes.

IE 587. ADVANCED ENGINEERING ECONOMICS ANALYSIS. (4 Credits)
Examines the economics dimension of engineering management, from costing techniques to financial analysis. Topics include industrial cost analysis and estimation, economic planning, forecasting, and budgeting, and financial analysis for engineering and engineering management.
Prerequisites: IE 582 with B or better
Recommended: Basic courses in engineering economic analysis
IE 586. PROJECT RISK MANAGEMENT. (4 Credits)
An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. 
Equivalent to: CCE 552.

IE 587. MANAGEMENT OF INFORMATION SYSTEMS. (4 Credits)
An introduction to the management of information systems and their strategic importance in business. Topics covered include global e-business and collaboration, databases and information management, basics of telecommunications and wireless technology, security vulnerabilities of information systems, basics of business intelligence and business analytics, knowledge management and enhanced decision making.
Prerequisites: IE 582 with B or better

IE 588. MANAGEMENT OF NEW PRODUCT DEVELOPMENT. (4 Credits)
Introduces the new product development (NPD) process with the objective of understanding the underlying structure in NPD and exploring the methods to manage NPD processes by applying them to case studies and term project. The NPD process is investigated through its five key phases: (1) Opportunity identification/selection, (2) Concept generation, (3) Concept/project evaluation, (4) Development, and (5) Launch.
Prerequisites: IE 581 with B or better and IE 582 [B] and IE 583 [B]
Recommended: IE 584

IE 589. PROFESSIONAL RESPONSIBILITY AND ETHICS. (3 Credits)
An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as CCE 554.
Equivalent to: CCE 554

IE 590. STRATEGIC PLANNING IN ENGINEERING ORGANIZATIONS. (4 Credits)
Provides an overview of the strategic planning process from a variety engineering perspective. Variety engineering is explored via key management control theory concepts and through applying students’ work experience.
Prerequisites: IE 581 with B or better and IE 582 [B] and IE 583 [B]

IE 591. STATISTICAL CONCEPTS FOR ENGINEERING MANAGERS. (4 Credits)
Provides a first review of basic probability and statistical inference concepts and methods relevant for engineering managers. This is followed by a presentation of frequently utilized statistical methods in industry. These include process control, regression analysis, and experimental design. For each method, the fundamental ideas will be covered, and simple examples will be presented to provide engineering managers with the background needed to initiate and manage applications of these methods in industry. The course will end with an overview of process optimization, and robust parameter design.
Prerequisites: IE 582 with B or better

IE 594. RESEARCH METHODS IN ENGINEERING. (3 Credits)
Introduction to research methodologies including surveys, interviews, quasi-experimentation, and case studies. Methods for research design, and collection and analysis of data.
Equivalent to: IE 574

IE 599. SPECIAL TOPICS. (1-5 Credits)
Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term.
Equivalent to: IE 592
This course is repeatable for 99 credits.

IE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

IE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

IE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

IE 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

Materials Science

MATS 221. THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY. (3 Credits)
Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSLISTED as ENGR 221.
Equivalent to: ENGR 221
Recommended: One year of college science.

MATS 321. INTRODUCTION TO MATERIALS SCIENCE. (4 Credits)
Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria.
Prerequisites: CH 202 with C or better or CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 224H with C or better
Equivalent to: ENGR 321, ENGR 321H, MATH 321H

MATS 321H. INTRODUCTION TO MATERIALS SCIENCE. (4 Credits)
Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria.
Attributes: HNRS – Honors Course Designator
Prerequisites: CH 202 with C or better or CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 224H with C or better
Equivalent to: ENGR 321, ENGR 321H, MATH 321

MATS 322. MECHANICAL PROPERTIES OF MATERIALS. (3 Credits)
Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis.
Prerequisites: (ENGR 213 with C or better or ENGR 213H with C or better) and (ENGR 321 [C] or ENGR 321H [C] or MATH 321 [C])
Equivalent to: ENGR 322
MATS 445. WELDING METALLURGY. (4 Credits)
Theory-based course focused on the metallurgy of welds. Topics covered include welding/joining processes, heat input, diffusion, solidification, phase transformation, materials compatibility and welding defects. This is NOT a practical welding class.
Prerequisites: (MATS 321 with C or better or ENGR 321 with C or better or ENGR 321H with C or better) or MATS 570 with C or better

MATS 455. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE. (4 Credits)
Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab.
Prerequisites: (ENGR 321 with C or better or ENGR 321H with C or better)
Equivalent to: ME 455
This course is repeatable for 8 credits.
Recommended: ME 570

MATS 478. THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES. (4 Credits)
Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films.
Prerequisites: (ME 311 with C or better or ME 311H with C or better) and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C]) and (ENGR 322 [C] or MATS 322 [C])
Equivalent to: ME 478

MATS 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

MATS 545. WELDING METALLURGY. (4 Credits)
Theory-based course focused on the metallurgy of welds. Topics covered include welding/joining processes, heat input, diffusion, solidification, phase transformation, materials compatibility and welding defects. This is NOT a practical welding class.
Recommended: (MATS 321 or ENGR 321 or ENGR 321H) or MATS 570

MATS 555. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE. (4 Credits)
Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab.
Prerequisites: ME 570 with C or better
Equivalent to: ME 555
This course is repeatable for 8 credits.
Recommended: ENGR 321 or ENGR 321H

MATS 570. STRUCTURE-PROPERTY RELATIONS IN MATERIALS. (4 Credits)
Equivalent to: ME 570

MATS 571. ELECTRONIC PROPERTIES OF MATERIALS. (4 Credits)
Equivalent to: ME 571
Recommended: CH 545 or ME 570

MATS 578. THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES. (4 Credits)
Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films.
Equivalent to: ME 578

MATS 581. THERMODYNAMICS OF SOLIDS. (4 Credits)
Equivalent to: ME 581

MATS 582. RATE PROCESSES IN MATERIALS. (3 Credits)
Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development.
Equivalent to: ME 582

MATS 584. ADVANCED FRACTURE OF MATERIALS. (4 Credits)
Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data.
Equivalent to: ME 584
Recommended: ENGR 322

MATS 587. DISLOCATIONS, DEFORMATION, AND CREEP. (4 Credits)
The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies.
Equivalent to: ME 587
Recommended: ENGR 322

MATS 588. COMPUTATIONAL METHODS IN MATERIALS SCIENCE. (4 Credits)
A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo methods. Learning is through a mixture of lecture and hands-on lab projects in which students use computational methods to explore and reinforce fundamental concepts in materials science. Lec/lab.
Equivalent to: ME 588
Recommended: Experience with Matlab or Mathematica or an equivalent numerical and programming environment.

MATS 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

MATS 659. PRINCIPLES OF TRANSMISSION ELECTRON MICROSCOPY. (4 Credits)
This lecture-only course covers basic principles of transmission electron microscopy (TEM) including instrument components, electron optics, electron diffraction, and the origins and interpretation of image contrast. Spectroscopic techniques are covered, but diffraction and imaging techniques are emphasized. Coverage of experimental techniques will focus on those useful for addressing problems in materials science.
Recommended: MATS 570 and (CH 616 or MATS 555)

MATS 671. ELECTRONIC PROPERTIES OF OXIDES. (4 Credits)
Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides.
Equivalent to: ME 671
Recommended: ME 571 or MATS 571 or PH 575
Mechanical Engineering

ME 206. PROJECTS. (1-16 Credits)

ME 250. INTRODUCTION TO MANUFACTURING PROCESSES. (1 Credit)
Use of measuring and layout tools, interpretation of blueprints and drawings, identification of engineering materials. Operation of machine tools, including calculation of machining parameters. Operation of gas and MIG welding equipment. Lec/lab. Graded P/N.
Prerequisites: ENGR 248 with C or better and (PH 211 [C] or PH 211H [C])

ME 299. SPECIAL TOPICS. (1-16 Credits)
Graded P/N.
Equivalent to: ME 299H
This course is repeatable for 16 credits.

ME 299H. SPECIAL STUDIES. (1-16 Credits)
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 299
This course is repeatable for 16 credits.

ME 306. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ME 311. INTRODUCTION TO THERMAL-FLUID SCIENCES. (4 Credits)
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as NSE 311.
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ENGR 311, ENGR 311H, ME 311H, NE 311, NE 311H, NSE 311, NSE 311H

ME 311H. INTRODUCTION TO THERMAL-FLUID SCIENCES. (4 Credits)
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as NSE 311H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ENGR 311, ENGR 311H, ME 311H, NE 311, NE 311H, NSE 311, NSE 311H

ME 312. THERMODYNAMICS. (4 Credits)
Exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as NSE 312.
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
Equivalent to: ENGR 312, ME 312H, NE 312, NE 312H, NSE 312, NSE 312H

ME 312H. THERMODYNAMICS. (4 Credits)
Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as NSE 312H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
Equivalent to: ME 312, NE 312, NE 312H, NSE 312, NSE 312H

ME 316. MECHANICS OF MATERIALS. (3 Credits)
Determination of stresses, deflections, and stability of deformable bodies with an introduction to finite element analysis.
Prerequisites: (ENGR 213 with C or better or ENGR 213H with C or better) and (MTH 256 [C] or MTH 256H [C])

ME 317. INTERMEDIATE DYNAMICS. (4 Credits)
Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 317H

ME 317H. INTERMEDIATE DYNAMICS. (4 Credits)
Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C]))
Equivalent to: ME 317

ME 331. INTRODUCTORY FLUID MECHANICS. (4 Credits)
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as NSE 331.
Prerequisites: ((MTH 254 with C or better or MTH 254H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 212 [C] or ENGR 212H [C]) and (ENGRII 311 [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
Equivalent to: ENGR 331, ENGR 331H, ME 331H, NE 331, NE 331H, NSE 331H, NSE 331H

ME 331H. INTRODUCTORY FLUID MECHANICS. (4 Credits)
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as NSE 331H.
Attributes: HNRS – Honors Course Designator
Prerequisites: ((MTH 254 with C or better or MTH 254H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 212 [C] or ENGR 212H [C]) and (ENGRII 311 [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
Equivalent to: ME 331, NE 331, NE 331H, NSE 331, NSE 331H

ME 332. HEAT TRANSFER. (4 Credits)
A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as NSE 332.
Prerequisites: ((MTH 256 with C or better or MTH 256H with C or better) and (ENGR 212 [C] or ENGR 212H [C]) and (ME 311 [C] or ME 311H [C] or NE 311 [C] or NE 311H [C]) and (ME 331 [C] or ME 331H [C] or NSE 331 [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C])
Equivalent to: ME 332H, NE 332, NE 332H, NSE 332, NSE 332H
ME 332H. HEAT TRANSFER. (4 Credits)
A treatment of conductive, convective and radiative energy transfer
using control volume and differential analysis and prediction of transport
properties. CROSSTLISTED as NSE 332H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better)
and (ENGR 212 [C] or ENGR 212H [C]) and (ME 311 [C] or ME 311H [C] or
NE 311 [C] or NE 311H [C]) and (ME 331 [C] or ME 331H [C] or NSE 331 [C]
or NSE 331H [C] or NE 331 [C] or NE 331H [C])
Equivalent to: ENGR 332, ME 332, NE 332H, NSE 332, NSE 332H
ME 348. ADVANCED SOLID MODELING. (1 Credit)
Practical application of graphical communication theory using
advanced solid modeling software to capture design intent and generate
engineering drawings. Lec/lab. Graded P/N.
Prerequisites: ENGR 248 with C or better
ME 373. MECHANICAL ENGINEERING METHODS. (3 Credits)
Analytical and numerical methods for solving representative mechanical
engineering problems. Lec/rec.
Prerequisites: (ENGR 112 with C or better or ENGR 112H with C or better)
and (MTH 256 [C] or MTH 256H [C]) and MTH 341 [C]
Equivalent to: ME 373H
ME 373H. MECHANICAL ENGINEERING METHODS. (3 Credits)
Analytical and numerical methods for solving representative mechanical
engineering problems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENGR 112 with C or better or ENGR 112H with C or better)
and (MTH 256 [C] or MTH 256H [C]) and MTH 341 [C]
Equivalent to: ME 373
ME 382. INTRODUCTION TO DESIGN. (4 Credits)
Organization, planning, economics, and the use of creativity and
optimization in solving mechanical design problems. Case studies and/or
industrial design problems. Lec/lab.
Prerequisites: ENGR 248 with C or better and ME 250 (may be taken
concurrently) [C] and (PH 211 [C] or PH 211H [C])
Equivalent to: ME 382H
ME 382H. INTRODUCTION TO DESIGN. (4 Credits)
Organization, planning, economics, and the use of creativity and
optimization in solving mechanical design problems. Case studies and/or
industrial design problems. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: ENGR 248 with C or better and ME 250 (may be taken
concurrently) [C] and (PH 211 [C] or PH 211H [C])
Equivalent to: ME 382
ME 383. MECHANICAL COMPONENT DESIGN. (4 Credits)
Failure analysis and design of machine components. Lec/lab.
Prerequisites: ME 316 with C or better and ME 250 (may be taken
concurrently) [C] and (ENGR 212 [C] or ENGR 212H [C]) and ENGR 213 [C]
Equivalent to: ME 383H
ME 383H. MECHANICAL COMPONENT DESIGN. (4 Credits)
Failure analysis and design of machine components. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisites: ME 316 with C or better and ME 250 (may be taken
concurrently) [C]
Equivalent to: ME 383
ME 401. RESEARCH. (1-16 Credits)
This course is repeatable for 9 credits.
ME 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.
ME 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 9 credits.
ME 405H. READING AND CONFERENCE. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 405
ME 406. PROJECTS. (1-16 Credits)
This course is repeatable for 15 credits.
ME 407. SEMINAR. (1-16 Credits)
Equivalent to: ME 407H
This course is repeatable for 2 credits.
ME 410. INTERNSHIP. (1-16 Credits)
Credits may not apply toward BS degree in Mechanical Engineering.
Graded P/N.
This course is repeatable for 16 credits.
ME 411. AEROSPACE APPLICATIONS IN MECHANICAL ENGINEERING. (4
Credits)
Provides students with the fundamentals of mechanical engineering
applications to aerospace. Topics covered include an overview of modern
aircraft and spacecraft analysis, with an emphasis on performance,
stability, structures, materials, FAA and FAR standards and current
professional practices in the conceptual design of aerospace vehicles.
Student projects will integrate course topics.
Prerequisites: (ME 316 with C or better and (ME 317 [C] or ME 317H [C]
and (ME 331 [C] or ME 331H [C]) and (ME 373 [C] or ME 373H [C])
ME 412. DESIGN OF MECHANISMS. (4 Credits)
Analysis and study of the function, classification, position, velocity, and
acceleration of multi-element mechanical linkages and mechanisms.
Synthesis of mechanisms for specified multiple point paths, quick return,
dwell, and straight-line motion. The lecture will instruct students in the
kinematic analyses and synthesis of mechanisms through the use of
theory and software packages. The laboratory will familiarize students
with a modern mechanism design and animation software package. Lec/
lab.
Prerequisites: (ME 317 with C or better or ME 317H with C or better) and
ME 383 [C]
ME 413. COMPUTER-AIDED DESIGN AND MANUFACTURING. (4 Credits)
Introduces students to the use of computers in several extended areas
of product design and manufacturing. These areas include product data
management in a sustaining engineering environment; computer-aided
manufacturing (CAM) and computer numerical control (CNC) operations
and technology; the use of programmable logic controllers (PLCs) for
industrial control systems; and the use of simulation software for virtual
prototyping for Design/Manufacturing/Validation. Lec/lab.
Prerequisites: ME 382 with C or better or ME 382H with C or better or
IE 366 with C or better
ME 420. APPLIED STRESS ANALYSIS. (4 Credits)
Elasticity theory, failure theories, energy methods, finite element analysis.
Prerequisites: ME 316 with C or better
ME 422. MECHANICAL VIBRATIONS. (4 Credits)
Dynamic response of single and multiple degree-of-freedom systems.
Prerequisites: ME 317 with C or better or ME 317H with C or better
Equivalent to: ME 422H
ME 422H. MECHANICAL VIBRATIONS. (4 Credits)
Dynamic response of single and multiple degree-of-freedom systems.
Attributes: HNRS – Honors Course Designator
Prerequisites: ME 371 with C or better or ME 371H with C or better
Equivalent to: ME 422

ME 424. FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS. (3 Credits)
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations.
Prerequisites: ME 420 with C or better or ME 520 with C or better

ME 430. SYSTEMS DYNAMICS AND CONTROL. (4 Credits)
Prerequisites: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C])))
Equivalent to: ECE 451, ME 430H

ME 430H. SYSTEMS DYNAMICS AND CONTROL. (4 Credits)
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ECE 451
Attributes: HNRS – Honors Course Designator
Prerequisites: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C])))
Equivalent to: ECE 451, ME 430

ME 443. RENEWABLE ENERGY: THERMAL FLUID SYSTEMS. (4 Credits)
Evaluates several thermal/fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences.
Prerequisites: (ME 311 with C or better or ME 311H with C or better or NE 311 with C or better or ME 311H with C or better and (ME 331 [C] or ME 331H [C] or ME 331 [C] or ME 331H [C]) and (ME 332 [C] or ME 332H [C]) or ME 332 [C] or ME 332H [C])

ME 444. THERMAL SYSTEMS DESIGN AND ANALYSIS. (4 Credits)
Integration of the concepts, laws, and methodologies from fluid mechanics, heat transfer, and thermodynamics, into a set of practical tools for thermal energy systems design and analysis.
Prerequisites: (ME 332 with C or better or ME 332H with C or better or NE 332 with C or better or ME 332H with C or better) and (ME 312 (may be taken concurrently) [C] or ME 312H (may be taken concurrently) [C] or (ME 312 (may be taken concurrently) [C] or ME 312H (may be taken concurrently) [C])

ME 445. INTRODUCTION TO COMBUSTION. (4 Credits)
Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions.
Prerequisites: (ME 312 with C or better or ME 312H with C or better) and (ME 332 [C] or ME 332H [C])

ME 450. APPLIED HEAT TRANSFER. (4 Credits)
An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week.
Prerequisites: ME 332 with C or better or ME 332H with C or better

ME 451. INTRODUCTION TO INSTRUMENTATION AND MEASUREMENT SYSTEMS. (4 Credits)
Function, operation, and application of common mechanical engineering instruments, measurement principles, and statistical analysis. Major elements of measurement systems, including transduction, signal conditioning, and data recording. Function and operation of digital data acquisition systems. Lec/lab.
Prerequisites: (ENGR 202 with C or better or ENGR 202H with C or better) and (ME 311 [C] or ME 311H [C]) and ME 316 [C] and (ME 317 [C] or ME 317H [C]) and (ME 373 [C] or ME 373H [C]) and (ST 314 [C] or ST 314H [C])
Equivalent to: ME 351

ME 452. THERMAL AND FLUIDS SCIENCES LABORATORY. (4 Credits)
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Prerequisites: (ME 311 with C or better or ME 311H with C or better and (ME 331 [C] or ME 331H [C]) and (ME 332 [C] or ME 332H [C])
Equivalent to: ME 452H

ME 452H. THERMAL AND FLUIDS SCIENCES LABORATORY. (4 Credits)
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ME 311 with C or better or ME 311H with C or better) and (ME 331 [C] or ME 331H [C]) and (ME 332 [C] or ME 332H [C])
Equivalent to: ME 452

ME 453. STRUCTURE AND MECHANICS LABORATORY. (4 Credits)
Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials.
Prerequisites: ME 451 with C or better

ME 460. INTERMEDIATE FLUID MECHANICS. (4 Credits)
Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence.
Prerequisites: ME 331 with C or better or ME 331H with C or better

ME 461. GAS DYNAMICS. (4 Credits)
Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems.
Prerequisites: (ME 312 with C or better or ME 312H with C or better) and (ME 331 [C] or ME 331H [C])

ME 480. MATERIALS SELECTION. (3 Credits)
Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection.
Prerequisites: MATS 322 with C or better or ENGR 322 with C or better
ME 484. FRACTURE OF MATERIALS. (3 Credits)
Fracture mechanics and fatigue mechanisms: mechanisms of ductile and brittle fracture. Environmentally induced fracture and fatigue. Considerations in design of engineering materials and structures will be discussed.
Prerequisites: MATS 322 with C or better or ENGR 322 with C or better.

ME 499. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: ME 499H
This course is repeatable for 16 credits.

ME 499H. SPECIAL TOPICS. (0-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 499
This course is repeatable for 16 credits.

ME 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ME 502. INDEPENDENT STUDIES. (1-16 Credits)
This course is repeatable for 16 credits.

ME 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ME 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ME 506. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ME 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ME 508. THERMAL FLUID SCIENCE SEMINAR. (1 Credit)
Student participation seminar experience for 1 course credit. Students will present and listen to seminars concerning ongoing research within the thermal fluid sciences.

ME 509. MATERIALS SCIENCE SEMINAR. (1 Credit)
Student participation seminar experience for one credit; students will listen to seminars concerning ongoing research activities within materials science. Students will also have the opportunity to present their own research results periodically. Graded P/N.
Equivalent to: MATS 509

ME 511. PRECISION MACHINE DESIGN. (3 Credits)
Tolerance analysis and application in design/manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as MFGE 511.
Equivalent to: MFGE 511
Recommended: An understanding of mechanical component design and solid mechanics.

ME 512. DESIGN OF MECHANISMS. (4 Credits)
Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab.
Recommended: (ME 317 or ME 317H) and ME 383

ME 513. BIO-INSPIRED DESIGN. (4 Credits)
Intersection of design and biology that seeks to systematically mine biological knowledge to solve design problems. Investigates inspiration from nature from three different types: visual, conceptual, and computational. Includes design rules, heuristics, principles or patterns to solve engineering problems. Algorithmic bio-inspiration emulates natural algorithms for control or optimization problems.

ME 515. RISK AND RELIABILITY ANALYSIS IN ENGINEERING DESIGN. (4 Credits)
Fundamentals of risk, uncertainty, and reliability. Methods to analyze and quantify the risk of failures, and the reliability of complex systems, including fault tree analysis, reliability block diagrams, probabilistic risk assessment. Introduction to research methods for risk and reliability analysis during the early design stages.

ME 516. MODELING AND ANALYSIS OF COMPLEX SYSTEMS. (4 Credits)
Introduction to challenges and considerations when designing complex systems. Fundamentals of systems engineering and methods used in practice. Models and tools used to enable the use of models for trade studies during the design of complex systems. Model-based design environments and methodologies. Introduction to decision support tools in design.

ME 517. OPTIMIZATION IN DESIGN. (4 Credits)
Optimization methods as applied to engineering design, theory and application of nonlinear optimization techniques for multivariate unconstrained and constrained problems. Model boundedness and sensitivity.

ME 519. SELECTED TOPICS IN DESIGN. (3-4 Credits)
Topics in mechanical design selected from the following: design processes, quality engineering, design for assembly, statistical machine design, the Taguchi method, and parametric design.
This course is repeatable for 32 credits.

ME 520. APPLIED STRESS ANALYSIS. (4 Credits)
Elasticity theory, failure theories, energy methods, finite element analysis. Recommended: ME 316

ME 521. LINEAR ELASTICITY. (4 Credits)
A general introduction to the theory of elasticity. The solution of 2-D problems using the Airy stress function in rectangular and polar coordinates. The solution of 3-D problems using the Galerkin vector, the Papkovich-Neuber solution, and complex variable methods. Applications to asymptotic fields at discontinuities, contact and crack problems, and thermoelasticity.
Recommended: ME 316

ME 522. MECHANICAL VIBRATIONS. (4 Credits)
Dynamic response of single and multiple degree-of-freedom systems. Recommended: ME 317

ME 523. ADVANCED STRESS ANALYSIS. (4 Credits)
An introduction to the mechanics of nonlinear elastic, plastic, and viscoelastic material behavior including large deformations. Recommended: ME 316

ME 524. FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS. (3 Credits)
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab.
Prerequisites: ME 520 with C or better
ME 526. NUMERICAL METHODS FOR ENGINEERING ANALYSIS. (3 Credits)
Equivalent to: NE 526, NSE 526
Recommended: Programming experience and previous exposure to numerical methods

ME 529. SELECTED TOPICS IN SOLID MECHANICS. (3-4 Credits)
Advanced topics in solid mechanics emphasizing research applications of current interest.
This course is repeatable for 32 credits.

ME 531. LINEAR MULTIVARIABLE CONTROL SYSTEMS I. (4 Credits)
Theoretical design of control systems for systems modeled by linear multivariable differential equations. Topics covered include controllability, observability, state feedback control, pole placement, output feedback, estimator design, and control designs that include both estimators and regulators.
Prerequisites: ME 531 with C or better

ME 533. NONLINEAR DYNAMIC ANALYSIS. (4 Credits)
Course focuses on understanding the behavior of nonlinear dynamic systems of interest to mechanical engineers. Lec.
Recommended: ME 317

ME 534. NONLINEAR MULTIVARIABLE CONTROL SYSTEMS. (4 Credits)
Focuses on designing control systems when the device to be controlled is an uncertain system, yet can be described by a set of linear differential equations. Lec.
Prerequisites: ME 533 with C or better

ME 539. SELECTED TOPICS IN DYNAMICS. (1-16 Credits)
Advanced topics in dynamics emphasizing research applications of current interest.
This course is repeatable for 30 credits.

ME 540. INTERMEDIATE THERMODYNAMICS. (4 Credits)
Students are expected to master classical thermodynamics by way of solving extended problems using software tools. Statistical thermodynamics concepts are also introduced and exercised.
Recommended: ME 312

ME 541. LIQUID-VAPOR PHASE CHANGE AND HEAT TRANSFER. (4 Credits)
Advanced treatment of underlying physics and engineering modeling approaches for heat transfer associated with vapor/liquid phase change processes. Topics include thermodynamics and mechanical aspects of phase change processes, pool boiling, filmwise and dropwise condensation, internal convective boiling and condensation, and other emerging areas in phase change heat transfer.

ME 543. RENEWABLE ENERGY: THERMAL FLUID SYSTEMS. (4 Credits)
Evaluates several thermal/fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences.
Recommended: (ME 311 or ME 311H or NE 311 or NE 311H) and (ME 331 or ME 331H or NE 331 or NE 331H) and (ME 332 or ME 332H or NE 332 or NE 332H)

ME 544. ADVANCED POWER GENERATION SYSTEMS. (4 Credits)
Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/rec.
Recommended: ME 312 and (ME 332 or ME 332H)

ME 545. INTRODUCTION TO COMBUSTION. (4 Credits)
Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions.
Recommended: ME 312 and (ME 332 or ME 332H)

ME 546. CONVECTION HEAT TRANSFER. (3 Credits)
An advanced treatment of forced and natural convection heat transfer processes emphasizing underlying physical phenomena. Current topical literature will be considered; analytical and numerical problem solving is included.
Recommended: (ME 332 or ME 332H) and ME 373

ME 547. CONDUCTIVE HEAT TRANSFER. (3 Credits)
Analytical and numerical solutions to steady state and transient conduction problems.
Recommended: (ME 332 or ME 332H) and ME 373

ME 548. RADIATION HEAT TRANSFER. (3 Credits)
Analytical and numerical methods of solution of thermal radiation problems.
Recommended: (ME 332 or ME 332H) and ME 373

ME 549. SELECTED TOPICS IN HEAT TRANSFER. (3 Credits)
Topics in heat transfer including advanced problems in conduction, radiation, and convection. Additional examination of heat transfer in multiphase systems, inverse problems, combined modes, equipment design, solution techniques and other topics of current interest considered, including extensive use of current literature. Not all topics covered each year.
This course is repeatable for 9 credits.

ME 550. APPLIED HEAT TRANSFER. (4 Credits)
An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week.
Recommended: ME 332 or ME 332H

ME 552. MEASUREMENTS IN FLUID MECHANICS AND HEAT TRANSFER. (4 Credits)
Course emphasis is on measurement techniques and data analysis methods related to fluid mechanics and heat transfer. Proper experimental methods, data and uncertainty analyses related to thermal and fluids measurements are discussed. Local and spatial mapping of fluid and thermal fields are highlighted.
Recommended: (ME 331 or ME 331H) and (ME 332 or ME 332H) and ME 451

ME 553. STRUCTURE AND MECHANICS LABORATORY. (4 Credits)
Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials.
Recommended: ME 451
ME 560. INTERMEDIATE FLUID MECHANICS. (4 Credits)
Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence.
Recommended: ME 331

ME 561. GAS DYNAMICS. (4 Credits)
Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems.
Recommended: ME 312 and (ME 331 or ME 331H)

ME 564. TURBULENCE MODELING. (3 Credits)
An introductory course on theory of different turbulence modeling techniques such as Reynolds Averaged Navier Stokes (RANS), Large Eddy Simulation (LES), and Direct Numerical Simulation (DNS) applied to a range of turbulent flows including free shear flows, boundary layers, and internal flows.
Prerequisites: ME 560 with C or better and (ME 565 [C] or ME 566 [C])

ME 565. INCOMPRESSIBLE FLUID MECHANICS. (3 Credits)
Generalized fluid mechanics; kinematics; methods of description, geometry of the vector field, dynamics of nonviscous fluids, potential motion, two-dimensional potential flow with vorticity.

ME 566. VISCOS FLOW. (3 Credits)
Boundary layer, stability, transition prediction methods, computational methods in fluid mechanics, recent developments.

ME 567. ENGINEERING APPLICATIONS OF COMPUTATIONAL FLUID DYNAMICS. (4 Credits)
Basic concepts of computational fluid dynamics, a technique used for solving fully three-dimensional fluid flow problems with no exact solution, will be discussed and applied to general engineering applications using commercially available software. Lec.
Recommended: ME 312 and (ME 331 or ME 331H)

ME 568. TURBULENT FLOW DYNAMICS. (4 Credits)
An introductory course of the basic physics of turbulent flows, coverage will include statistical methods and physical interpretation of a range of flows including boundary layer flows, internal flows, and environmental flows.
Prerequisites: ME 560 with C or better
Recommended: A first course in fluid mechanics such as ME 331

ME 569. SELECTED TOPICS IN FLUID MECHANICS. (2-4 Credits)
Topics in fluid mechanics emphasizing research applications of current interest.
This course is repeatable for 32 credits.

ME 580. MATERIALS SELECTION. (3 Credits)
Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. Lec/lab.
Equivalent to: MATS 580
Recommended: MATS 322 or ENGR 322

ME 583. COMPOSITE MATERIALS. (3 Credits)
Fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications. Lec/lab.
Recommended: MATS 322 or ENGR 322

ME 585. FATIGUE OF MATERIALS. (4 Credits)
Analyzes the failure of materials by fatigue including how fatigue behavior is characterized, how fatigue failure is predicted, the physical mechanisms responsible for fatigue failure of various materials, and how such behavior is related to the atomic structure and microstructure of the material.
Prerequisites: ME 570 with C or better or MATS 570 with C or better

ME 589. SELECTED TOPICS IN MATERIALS. (3 Credits)
Topics in materials science to correspond to areas of graduate research. Topics will be chosen from the following list: optical materials, dielectrics, oxidation and corrosion, ceramics, thermophysical properties, polymers and viscoelasticity, coatings and thin films. Lec/rec.
This course is repeatable for 32 credits.

ME 596. SELECTED TOPICS IN THERMODYNAMICS. (3 Credits)
Topics in thermodynamics including advanced problems in classical thermodynamics and statistical thermodynamics of current interest. Topics will likely be considered, including extensive use of literature. Not all topics covered each year.
This course is repeatable for 32 credits.

ME 597. PRECISION MOTION GENERATION. (4 Credits)
Introduces fundamental knowledge in mechatronic systems used in manufacturing equipment such as CNC machine tools, and their computer numerical controls. Students will be exposed to sensors and actuators utilized in machine tools, industrial robots and for process automation. Fundamental knowledge to model and identify dynamics of motion delivery systems, design and analysis of accurate position control algorithms for precision motion generation will be covered. Digital motion control design will be introduced. Motion planning and real-time path interpolation algorithms will be covered. Students will be able to design NC systems for 2D motion platforms.
Recommended: ME 430

ME 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 32 credits.

ME 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ME 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ME 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ME 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ME 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ME 611. MODERN PRODUCT DESIGN. (4 Credits)
Modern product development, design and prototyping are covered. Product development and prototyping is examined from a research standpoint in this course. Customer outcomes gathering, functional modeling, product architecture, modern techniques for concept generation and selection are explored. Also covered are recently developed theories and techniques for prototyping. The topics’ place in the overall design process is shown through a product development and prototyping project.
ME 613. SUSTAINABLE PRODUCT DESIGN. (4 Credits)
Graduate students will work in multidisciplinary design teams to develop innovative and environmentally friendly products. Combining the principles of integrated product development and sustainable design thinking, students will (a) advance their knowledge of the design process by creating a patent-quality new product, (b) learn and employ environmentally-minded design theory and methods, including various software packages and online tools, and (c) further enhance teamwork skills by working collaboratively in a professional design team. Sustainable Product Development is conducted as a collaborative design experience, in that lectures, discussion, and team working time will be integrated into class sessions.

ME 615. DESIGN UNDER UNCERTAINTY. (4 Credits)
Tackles the problem of decision making in engineering design. The fundamental challenge faced in making decisions in engineering designs is that they are almost exclusively decisions made under uncertainty. Sources of uncertainty could result from engineering models, experiments conducted, or lack of knowledge of future events. The course will cover three basic topics 1) how do we quantify uncertainty, 2) how do we account for the uncertainty in decision making, and 3) how do we make design selection decisions about products or systems we design.
Prerequisites: ME 517 with C or better

ME 617. DESIGN AUTOMATION. (4 Credits)
Design automation is the field of study whereby advanced numerical methods are used to automate difficult or tedious design decisions. Typically, such methods are based on numerical optimization and artificial intelligence. They work in tandem with other engineering digital tools like computer-aided design, computer-aided manufacturing, and finite-element analysis. This course builds upon a fundamental understanding of optimization to introduce students to a range of different techniques that may be used to support engineering decision-making. This includes heuristic methods, AI tree-search, discrete and stochastic algorithms. The course concludes with discussion of recent innovations in multi-objective, multi-disciplinary and robust optimization.
Prerequisites: ME 517 with C or better

ME 667. COMPUTATIONAL FLUID DYNAMICS. (3 Credits)
Application of modern computational techniques to solve a wide variety of fluid dynamics problems including both potential and viscous flow with requirements for computer code development.
Prerequisites: (ME 560 with C or better or ME 565 with C or better or ME 566 with C or better) and (ME 526 [C] or ME 575 [C])

Manufacturing Engineering

MFGE 285. INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING. (3 Credits)
Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrated role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. Crosslisted as IE 285.
Prerequisites: IE 112 (may be taken concurrently) with C or better for IE 112 (may be taken concurrently) with C or better
Equivalent to: IE 285

MFGE 336. PRODUCTION ENGINEERING. (4 Credits)
Provides a general understanding of the production engineering function within industry and the means by which to achieve tight tolerances through machining. Geometric dimensioning and tolerancing, fixture and gage design, and fundamentals of metal cutting mechanics are introduced, and their interactions are explored. Lec/lab.
Prerequisites: (ENGR 213 with C or better or ENGR 213H with C or better) and ENGR 248 [C] and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C] or MATS 321H [C]) and (ENGR 250 [C] or ME 250 [C])
Equivalent to: IE 336

MFGE 337. MATERIALS AND MANUFACTURING PROCESSES. (4 Credits)
Introduces mechanical manufacturing methods by which materials are economically shaped into valuable products. The overall goal is to develop an understanding of how the functionality, shape, materials, cost and sustainability of a product influence manufacturing process selection and design. Lec/lab.
Prerequisites: (ENGR 321 with C or better or ENGR 321H with C or better or MATS 321 with C or better or MATS 321H with C or better) and ME 250 [C] and MFGE 336 [C]
Equivalent to: IE 337

MFGE 436. LEAN MANUFACTURING SYSTEMS ENGINEERING. (4 Credits)
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/control, product design, supply chain resource management. Lec/lab.
Prerequisites: ENGR 390 with C or better or ENGR 391 with C or better
Equivalent to: IE 436

MFGE 437. COMPUTER CONTROL OF MANUFACTURING PROCESSES. (4 Credits)
Introduces fundamental computer knowledge in the automation of manufacturing systems and processes. Automated manufacturing system design and operations—computer numerical control (CNC) technology; NC part programming; sensors and actuators, their modeling and dynamic simulation; feedback motion delivery systems design and tuning; programmable logic controls (PLC) for industrial control systems, and path planning for numerical controlled (NC) machinery. Lec/lab.
Prerequisites: (ME 317 with C or better or ME 317H with C or better or MFGE 336 with C or better) and (ENGR 212 [C] or ENGR 212H [C])
Equivalent to: IE 437

MFGE 438. COMPOSITES MANUFACTURING. (4 Credits)
Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab.
Prerequisites: ENGR 213 with C or better or ENGR 213H with C or better

MFGE 499. SPECIAL TOPICS. (0-5 Credits)
This course is repeatable for 99 credits.

MFGE 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.
MFGE 511. PRECISION MACHINE DESIGN. (3 Credits)
Tolerance analysis and application in design/manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as ME 511.
Equivalent to: ME 511
Recommended: An understanding of mechanical component design and solid mechanics.

MFGE 531. MICROMANUFACTURING. (4 Credits)
Introduction to microsystem platforms, scaling laws and size effects in micromanufacturing techniques with an emphasis on microchannel arrays, microchannel lamination and micro-scale characterization. Lec/lab.
Equivalent to: IE 531

MFGE 535. INDUSTRIAL SUSTAINABILITY ANALYSIS. (3 Credits)
Students are exposed to the role of business and engineering in the design and implementation of sustainable industrial systems. Drivers, metrics, and analysis concepts, methods, and tools are introduced. Students incorporate business and engineering considerations in making product, manufacturing process, and supply chain design considerations.

MFGE 536. LEAN MANUFACTURING SYSTEMS ENGINEERING. (4 Credits)
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/control, product design, supply chain resource management. Lec/lab.
Equivalent to: IE 536

MFGE 538. COMPOSITES MANUFACTURING. (4 Credits)
Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab.
Recommended: (ENGR 213 or ENGR 213H)

MFGE 551. ADDITIVE MANUFACTURING. (3 Credits)
Introduces basic principles and process physics for additive manufacturing as compared with subtractive manufacturing. Various processes in AM (extrusion, jetting, photopolymerization, powder bed fusion, direct energy deposition and sheet lamination) and laser AM are discussed. Materials selection in AM (metals, polymers, ceramics and composites), powder metallurgy and metallurgical phenomena in additive manufacturing will be covered.

MFGE 599. SPECIAL TOPICS. (0-5 Credits)
This course is repeatable for 99 credits.

Mechanical/Industrial/Manufacturing Engineering

MIME 101. INTRODUCTION TO MIME. (3 Credits)
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
Equivalent to: ME 101, MIME 101H

MIME 101H. INTRODUCTION TO MIME. (3 Credits)
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: MIME 101

MIME 199. SPECIAL TOPICS. (0-4 Credits)
Equivalent to: MIME 101

MIME 299. SPECIAL TOPICS. (0-4 Credits)
This course is repeatable for 4 credits.

MIME 399. SPECIAL TOPICS. (0-4 Credits)
Special topics in mechanical, industrial, and manufacturing engineering. This course is repeatable for 16 credits.

MIME 497. *MIME CAPSTONE DESIGN. (4 Credits)
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (IE 355 with C or better and IE 356 [C] and IE 367 [C] and IE 368 [C] and WR 327 [C] or (MATS 322 [C] and (ENGR 391 [C] or ENGR 391H [C]) and ME 250 [C] and (ME 312 [C] or ME 312H [C]) and (ME 317 [C] or ME 317H [C]) and (ME 383 [C] or ME 383H [C] and WR 327 [C] and (ST 314 [C] or ST 314H [C])]
Equivalent to: ESE 497, IE 497, ME 497

MIME 498. *MIME CAPSTONE DESIGN. (4 Credits)
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: MIME 497 with C or better or ESE 497 with C or better
Equivalent to: ESE 498, IE 498, ME 498

MIME 504. WRITING AND CONFERENCE/EXPLORATION. (1-9 Credits)
Students will be allowed to register for a variable number of MIME 504 credits to bring their registration up to full-time status (9 credits). Graded P/N.
Equivalent to: IE 504, ME 504, ROB 504
This course is repeatable for 15 credits.

MIME 507. SEMINAR/New Student Orientation. (1 Credit)

Robotics

ROB 421. APPLIED ROBOTICS. (4 Credits)
Multidisciplinary teams of student design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/lab.
Prerequisites: ME 430 with C or better
Equivalent to: ENGR 421
ROB 456. INTELLIGENT ROBOTS. (4 Credits)
Foundations of probabilistic reasoning for robotics. Topics include state estimation, robot motion, perception, localization and decision making under uncertainty.
Prerequisites: ST 314 with C or better
Equivalent to: ME 456
Recommended: CS 331, CS 361, ECE 353, or other programming experience

ROB 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

ROB 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ROB 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ROB 506. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ROB 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

ROB 514. INTRODUCTION TO ROBOTICS. (4 Credits)
A broad introduction to the field of robotics, and to the graduate Robotics program. The goal of the class is to take students with different backgrounds (mechanical engineering, computer science, electrical engineering, physics, etc.) and give them a common base in the fundamentals of robotics. A secondary goal is to introduce students to the Robotics program, and to give them some of the skills that will make them successful, both in the program and as a professional roboticist.

ROB 521. RESEARCH ROBOTICS. (4 Credits)
Multidisciplinary teams of students will use the backdrop of a robotics competition to generate a research question, then design, build, and demonstrate a robotic system that is used to answer this research question. An example may be a Jenga-playing robot, where students try a new computer vision algorithm, or test a theory on force control. This directly parallels graduate research in robotics, where systems-building is necessary, and toy problems can illustrate research results, but the important focus is a core research question. The specific competition task changes each year, and robots will compete at the end of the term. Lec/lab.
Equivalent to: ENGR 521

ROB 534. SEQUENTIAL DECISION MAKING IN ROBOTICS. (4 Credits)
Examines sequential decision making in robotics with a focus on motion planning and related optimization problems applied to fielded systems in marine, aerial, and ground domains. Discussions regarding both fundamental background material as well as cutting edge research in the following areas: discrete planning, sampling-based planning, planning under uncertainty, multi-robot systems, optimization, and performance guarantees.

ROB 537. LEARNING-BASED CONTROL. (4 Credits)
Provides an introduction to learning systems and their application to the control of nonlinear systems. Covered topics include neural networks, reinforcement learning, and evolutionary algorithms. Includes project component in which students write a technical paper and give a conference style presentation based on their project.
Equivalent to: ME 537

ROB 538. AUTONOMOUS AGENTS AND MULTI-AGENT SYSTEMS. (4 Credits)
Provides an introduction to autonomous agents and multi-agent systems. In particular, it focuses on how to use agents as building blocks for different autonomous systems. Covered topics include reinforcement learning, game theory, swarms, auctions, and collectives. Because this course covers a constantly evolving field, there will be a significant paper reading component in addition to the regular lectures. Students are expected to spend at least three hours a week reading, discussing and critiquing assigned papers.
Equivalent to: ME 538

ROB 541. GEOMETRIC MECHANICS. (4 Credits)
An introduction to geometric methods in the analysis of dynamic systems. Using the kinematics of simple robotic systems as a motivating example, we explore topics such as manifolds and Lie groups, representations of velocity, holonomic and nonholonomic constraints, constraint curvature and response to cyclic inputs, distance metrics.
Recommended: Prior exposure to linear algebra and differential equations

ROB 542. ACTUATOR DYNAMICS. (4 Credits)
Focuses on how inertia, spring compliance, and other passive dynamics affect highly dynamic, software-controlled systems. Examples include robotic manipulation tasks, robot-human interaction, CNC machines, or legged locomotion. Lec/lab.
Recommended: Prior courses on dynamics and control such as ME 531, ME 533, ME 535

ROB 545. ROBOTIC MANIPULATION. (4 Credits)
Introduction to the mechanical processes governing manipulation with a focus on the kinematics, statics, and dynamics of interacting rigid bodies. Topics include numerical inverse kinematics, dynamics of open chains, and interaction control. Some manipulation problems considered include grasping, picking and placing, and assembly.

ROB 552. HUMAN CONTROL SYSTEMS. (4 Credits)
Covers mechanisms of human motor systems and control of the neuromusculoskeletal anatomy followed by functional analysis of these system components. Then all the components are integrated to study feedback control dynamics. Covers classic to modern theories of motor control, adaptation, cognitive involvement, and rehabilitation techniques.
Equivalent to: ME 539
Recommended: Basic feedback control systems, linear algebra, differential equations

ROB 564. SOFT ROBOTICS. (4 Credits)
Soft robotics researchers propose building intelligent machines purely out of stretchable compressible soft materials. The course is centered on term-long projects that will result in real soft robots with the goal of presenting to the international community. The topics covered include rapid digital manufacturing, soft actuators, soft sensors, soft logic, soft energy, applications of soft robotics, and modeling soft mechanics.

ROB 567. HUMAN ROBOT INTERACTION. (4 Credits)
The field of human-robot interaction brings together research and application of methodology from robotics, human factors, human-computer interaction, interaction design, cognitive psychology, education and other fields to enable robots to have more natural and more rewarding interactions with humans throughout their spheres of functioning.
Recommended: Background in one of human factors, usability/hci, programming experience, design
ROB 568. SOCIAL ROBOTICS. (4 Credits)
In-depth exploration of the leading research, design principles, and challenges in Human-Robot Interaction (HRI), with an emphasis on socially interactive robots. Topics include social embodiment, multi-modal communication, human-robot teamwork, social learning, aspects of social psychology and cognition, as well as applications and evaluation with human subjects. Requires participation, lightning talks, student-led lectures, written critiques of class readings, and a group project involving a hypothetical social robotics project.

ROB 599. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 32 credits.

ROB 601. RESEARCH. (1-16 Credits)
Graded P/N. This course is repeatable for 99 credits.

ROB 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ROB 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

Engineering Management Graduate Certificate

Available only via Ecampus.

This program focuses on the application of engineering principles to the planning and operational management of industrial and manufacturing operations, and prepares individuals to plan and manage such operations. It includes instruction in accounting, engineering economy, financial management, industrial and human resources management, industrial psychology, management information systems, mathematical modeling and optimization, quality control, operations research, safety and health issues, and environmental program management.

Industrial Engineering Graduate Major (MENG, MS, PhD)

Also available via Ecampus.

Industrial engineering is the application of science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are so large and complex, industrial engineers (IEs) must develop expertise in a wide variety of disciplines, the ability to work well with people, and a broad, systems perspective. All IE graduate students learn advanced methods of system integration and operation. As practitioners, MEng and MS graduates analyze and design facilities, material handling systems, manufacturing processes, information systems, and workstations. They also develop, apply, and oversee policies, procedures, and algorithms for production planning, inventory control, resource allocation and scheduling, quality assurance, and supply chain management. As researchers, MS and PhD graduates advance the field of industrial and manufacturing engineering by their work in industrial corporations and government agencies. As educators, PhD graduates teach and perform research in industrial and manufacturing engineering in universities around the world.

Major Code: 3190

Advanced Manufacturing Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)
- Mechanical Engineering - College of Engineering (p. 471)

The Advanced Manufacturing graduate option is offered under both the Industrial Engineering and Mechanical Engineering majors. Advanced Manufacturing (AM) focuses on the integration of nanomaterial synthesis and microfabrication techniques and conventional macroscale manufacturing technologies to produce nano- and microscale systems in an economically, environmentally, and socially sustainable manner.

Option Code: 3191

A minimum of 12 credits from the following set of specific courses will be required of students wishing to declare the IE Advanced Manufacturing (AM) graduate option.

Engineering Management Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)
- Mechanical Engineering - College of Engineering (p. 471)

Also available via Ecampus.

The graduate option in Engineering Management at Oregon State University is designed for engineers who are conversant in the language and methods of engineering and technology who are motivated to become managers and leaders. The curriculum will equip engineers...
with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

This option is shared with the Mechanical Engineering graduate major.

**Human Systems Engineering Graduate Option**

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)

This graduate option within the Industrial Engineering major distinguishes an area of specialization, human systems engineering, within the broader discipline of industrial engineering. Human Systems Engineering (HSE) uses engineering methods and knowledge from the physical, biological, information, social, and management sciences to develop, implement, operate, evaluate, and improve human-machine, human-human, and human-organization systems. Topical areas include management systems engineering and human factors and ergonomics.

**Option Code: 3192**

The following set of specific courses will be required of students wishing to declare the Human Systems Engineering (HSE) graduate option:

**Information Systems Engineering Graduate Option**

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)

This graduate option within the Industrial Engineering major distinguishes an area of specialization, information systems engineering, within the broader discipline of industrial engineering. Information Systems Engineering (ISE) uses information systems to integrate organizational mechanisms, people, and processes for purposes of improving organizational performance. Typical ISE technologies include database management systems, networks, wireless communications, Web-enabled technologies, and automatic identification and data collection using bar codes, RFID, EDI, and other such devices.

**Option Code: 3193**

The following set of specific courses will be required of students wishing to declare the Information Systems Engineering (ISE) graduate option:

**Manufacturing Systems Engineering Graduate Option**

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)

This graduate option within the Industrial Engineering major distinguishes an area of specialization within the broader discipline of industrial engineering. Manufacturing Systems Engineering (MSE) focuses on the development of reliable, economically competitive, and environmentally benign manufacturing processes and systems. Topical areas include operations research, computer integrated manufacturing, environmentally responsible manufacturing, simulation, and statistical quality engineering.

**Option Code: 3196**

The following set of specific courses will be required of students wishing to declare the Manufacturing Systems Engineering (MSE) graduate option:

<table>

**Manufacturing Engineering Undergraduate Major (BS, HBS)**

ABET Accredited. For more information, please contact program advisor Tyler DeAdder, 541-737-4718, tyler.deadder@oregonstate.edu.

The curriculum in Manufacturing Engineering supports a range of career paths in the areas of manufacturing process development, manufacturing systems analysis, and new product development, among others. The Manufacturing Engineering undergraduate degree program includes a common set of core courses that provides a solid foundation, plus 39-credits of electives organized into approved options.

Students must select and complete an approved option to receive the BS in Manufacturing Engineering degree. The degree prepares students for industry, graduate study, or other career paths, specializing or broadening further their knowledge and skills.

Materials Science Graduate Major (MS, PhD)

The discipline of materials science is inherently interdisciplinary, involving fundamental aspects of engineering, chemistry, physics, biology, geoscience, and mathematics.

Reflecting this characteristic, the Materials Science Program at Oregon State University, initiated in the 1980s, involves over 60 tenured and tenure-track faculty members spanning the OSU Colleges of Engineering, Science and Forestry. This allows students to earn MS and PhD degrees in Materials Science in many different areas of concentration, including all classes of materials over a wide spectrum of materials behavior. The coursework requirements are extremely flexible to allow students to tailor their program of study to directly support their research activities.

For more information, visit the website (http://matsci.oregonstate.edu), or contact the Materials Science Graduate Program, School of Mechanical & Industrial Engineering, info-mime@oregonstate.edu, 541-737-3441.

Materials Science Graduate Minor

The discipline of materials science is inherently interdisciplinary, involving fundamental aspects of chemistry, physics, biology, geoscience, agricultural science, mathematics, and engineering.

Reflecting this characteristic, the Materials Science Program at Oregon State University, initiated in the 1980s, is distributed over nine departments spanning three OSU colleges. This allows students to earn MS and PhD degrees in Materials Science in many different areas of concentration, including all classes of materials, and in a wide range of materials behavior. The course work requirements are extremely flexible to allow students to tailor their program of study to directly support their research activities.

For more information, visit the website (http://matsci.oregonstate.edu) or contact the Materials Science Graduate Program, School of Mechanical & Industrial Engineering, info-mime@oregonstate.edu, 541-737-3441.

Minor Code: 3200
### Materials Science Minor

Materials Science is a unique blend of disciplines spanning engineering, science, and forestry at OSU.

The Materials Science minor is aimed at students with a wide range of materials-related interests including composites, ceramics, polymers, metallurgy, electronic materials and devices, solid-state chemistry, and solid-state physics.

**Partial List of Courses:**

- **Materials Science (MATS):**
  - 545: WELDING METALLURGY
  - 555: EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE
  - 571: ELECTRONIC PROPERTIES OF MATERIALS
  - 578: THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES
  - 582: RATE PROCESSES IN MATERIALS
  - 584: ADVANCED FRACTION OF MATERIALS
  - 588: COMPUTATIONAL METHODS IN MATERIALS SCIENCE
  - 659: PRINCIPLES OF TRANSMISSION ELECTRON MICROSCOPY
  - OC 528: MICROPROBE ANALYSIS
  - WSE 535: POLYMER SYNTHESIS AND STRUCTURE

- **Mechanical Engineering (ME):**
  - 480: MATERIALS SELECTION

**Total Hours:** 26-28

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
1 At least 3 credits from each category; 12 credits must be upper division (300 level or above)
must complete additional course work where an individual project may be included.

The mechanical engineering field is diverse, therefore, research activities in the school encompass a broad range of technical endeavors. Areas of research include applied mechanics, solid mechanics, biomechanics, dynamics, stress analysis, design, systems and control, energy, applied thermodynamics, heat transfer, fluid mechanics, metallurgy, and materials science.

In addition, research activities have been directed toward areas of current interest and need, including wind energy, microscale energy conversion, combustion, composite materials, superconductors, advanced materials, impact dynamics, mechatronics, microscale fluid mechanics, diagnostics in design, design for manufacture and computer-aided design and manufacturing, design and control of complex systems.

Major Code: 3210
Major Code: 3210

**Advanced Manufacturing Graduate Option**

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)
- Mechanical Engineering - College of Engineering (p. 471)

The Advanced Manufacturing graduate option is offered under both the Industrial Engineering and Mechanical Engineering majors. Advanced Manufacturing (AM) focuses on the integration of nanomaterial synthesis and microfabrication techniques and conventional macroscale manufacturing technologies to produce nano- and microscale systems in an economically, environmentally, and socially sustainable manner.

**Option Code: 3191**

A minimum of 12 credits from the following set of specific courses will be required of students wishing to declare the IE Advanced Manufacturing (AM) graduate option.

**Engineering Management Graduate Option**

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 464)
- Mechanical Engineering - College of Engineering (p. 471)

Also available via Ecampus.

The graduate option in Engineering Management at Oregon State University is designed for engineers who are conversant in the language and methods of engineering and technology who are motivated to become managers and leaders. The curriculum will equip engineers with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

Renewable Energy Graduate Option

This option is offered within the following major(s):

- Mechanical Engineering - College of Engineering (p. 471)

This graduate option within the Mechanical Engineering graduate major distinguishes an area of interdisciplinary specialization, Renewable Energy (RE).

Renewable Energy is inherently interdisciplinary and thus is being proposed as an interdisciplinary option within ME which requires students to select 16 credits of ME courses from across all four ME primary graduate options and then choose from a set of courses which equip students to understand the underlying physical phenomena governing renewable energy technologies and be able to understand overarching themes in US energy policy pertaining to renewables.

Students wishing to declare the ME Renewable Energy (RE) graduate option must first fulfill core mechanical engineering requirements in one of two ways:

1. Declare an interdisciplinary option in mechanical engineering, or
2. Fulfill the requirements of one of the four ME Primary Options.

Robotics Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

-Assistive robots, autonomous robots, human-robot interaction, legged locomotion, manipulation, mobile robots, multi-robot coordination

The interdisciplinary robotics program offers Master of Engineering (MEng), Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Robotics. MS degree candidates may pursue thesis or nonthesis options. A coursework-only MEng degree may only be pursued with special permission from a Robotics faculty member. The PhD program prepares students for careers in industry, research laboratories or universities. Students are encouraged to develop programs of study in close cooperation with the faculty members in their areas of interest.

The program includes core areas of robotics, including actuation, locomotion, manipulation, dynamics, control, sensing, artificial intelligence, and human/robot interactions.

Additional information concerning courses, advising procedures, faculty, and many other aspects of the program may be found in the programs’ website (https://engineering.oregonstate.edu/robotics).

Major Code: 3250

Core Curriculum

Coursework for all degrees in Robotics (including minors) must comprise the following 16 credits:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ME 531</td>
<td>LINEAR MULTIVARIABLE CONTROL SYSTEMS I</td>
<td>4</td>
</tr>
<tr>

</table>

Total Hours for MEng/MS: 45

Total Hours for PhD: 108

Robotics Graduate Minor

For additional information about the Robotics graduate minor, please visit the program website (http://robotics.oregonstate.edu).

Minor Code: 3255

School of Nuclear Science and Engineering

The School of Nuclear Science and Engineering at Oregon State University is EAC, ABET and CAMPEP accredited.

The school offers BS, MEng, MS, and PhD degrees in Nuclear Engineering. In addition, it offers a BS, MS, MHP (Master of Health Physics) degrees in Radiation Health Physics and an MMP (Master of Medical Physics), MS,
and PhD in Medical Physics. The BS in Radiation Health Physics degree may also be taken as a premedical track.

Excellent facilities are available for the instructional and research programs at the Radiation Center, including a TRIGA Mark II nuclear reactor and the AP-600 1/4 scale test facility. Instruction is integrated with an extensive research program, with opportunities to participate at both the undergraduate and graduate levels.

The mission of the School of Nuclear Science and Engineering is to educate students to become nuclear engineers and health physicists with the ability to achieve the highest standards of the profession and to support the needs of industry, government, and the nation.

The nuclear engineering undergraduate program objectives are:

1. To produce graduates with a high level of competency in the nuclear engineering core curriculum.
2. To produce graduates with a high level of competency in engineering and science.
3. To produce graduates that can work effectively in both individual and team environments.
4. To produce graduates with effective communication skills.
5. To produce graduates with a high regard for their profession and their responsibility to lifelong learning.

The objectives of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, an emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

The School of Nuclear Science and Engineering aims to educate students majoring in radiation health physics to become radiation health physicists with the ability to achieve the highest standards of the profession and to support the needs of industry, government, and the nation.

The radiation health physics undergraduate program objectives are:

1. To produce graduates with a high level of competency in the radiation health physics core curriculum.
2. To produce graduates with a high level of competency in the biological and physical sciences.
3. To produce graduates who can work effectively in both individual and team environments.
4. To produce graduates with effective communication skills.
5. To produce graduates with a high regard for their profession and their responsibility to lifelong learning.

Radiation health physics is a specialized program in the School of Nuclear Science and Engineering for students with a professional interest in the field of radiation protection, also known as health physics. It involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to protect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive material.

**Pre-Med Option**

Students in radiation health physics can also pursue a pre-med option in which they fulfill the requirements for the BS in Radiation Health Physics degree, as well as the course work expected for entrance into most medical schools.

**Certified Health Physicist**

Students completing the Radiation Health Physics degree will be eligible to take Part I of the Certified Health Physics (CHP) Examination of the American Board of Health Physics after one year of applied health physics practice. After six years of responsible professional experience in health physics, graduates will be eligible to take Part II of the CHP examination.

**Undergraduate Programs**

**Majors**

- Nuclear Engineering (p. 484)
- Radiation Health Physics (p. 487)

**Option:**
- Radiation Health Physics – Pre Med

**Minors**

- Nuclear Engineering (p. 484)
- Radiation Health Physics (p. 486)

**Graduate Programs**

**Majors**

- Medical Physics (p. 482)
- Nuclear Engineering (p. 482)
- Radiation Health Physics (p. 485)

**Minors**

- Nuclear Engineering (p. 483)
- Radiation Health Physics (p. 486)

**Kathryn A. Higley**, School Head, Radiation Health Physics Program

Coordinator 132 Radiation Center Oregon State University Corvallis, OR 97331-5902 Phone: 541-737-2343 Email: nuc_engr@ne.oregonstate.edu

Website: http://ne.oregonstate.edu/

**Faculty**

**Professors** Hamby, Higley, Meyer, T. Palmer, Paulenova, Woods, Wu

**Associate Professors** Farsoni, Marcum, C. Palmer, Reese, Yang

**Assistant Professors** Briggs, Cadell, Chen, Gutowska, LaBrier, Mignot

**Instructors** Crilly, Keller, Kishore, Laub, Merz, Pillai, Ranbar, Schickler, Tanyi, Zhang

**Emeriti** Binney, Klein, Ringle, Reyes, Robinson

1. Certified Health Physicist
2. Licensed Professional Engineer
3. DABR (Diplomat, American Board of Radiology)
NSE 114. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS I. (3 Credits)
Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
Equivalent to: NE 114, RHP 114

NSE 115. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS II. (3 Credits)
Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
Equivalent to: NE 115, RHP 115

NSE 233. MATHEMATICAL METHODS FOR NSE. (3 Credits)
Development and application of analytical and numerical methods with applications to problems in the NE/RHP field. Major topics will include solution of ODEs and systems of ODEs, root finding techniques and numerical integration and differentiation. Major applications will include solution of the Bateman Equations and solution of the diffusion equation.
Prerequisites: MTH 256 with C or better or MTH 256H with C or better

NSE 234. NUCLEAR AND RADIATION PHYSICS I. (3 Credits)
Relativistic dynamics; basic nuclear physics; basic quantum mechanics; radioactivity; electromagnetic waves; interaction of ionizing radiation with matter; cross sections; basic atomic structure.
Prerequisites: MTH 251 with C or better or MTH 251H with C or better
Equivalent to: NE 234, RHP 234

NSE 235. NUCLEAR AND RADIATION PHYSICS II. (3 Credits)
Radioactivity; radioactive decay modes; decay kinetics, interaction of neutrons with matter; nuclear reactions; fission and fusion basics; cross sections.
Prerequisites: (NSE 234 with C or better or NE 234 with C or better or RHP 234 with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: NE 235, RHP 235

NSE 236. NUCLEAR RADIATION DETECTION AND INSTRUMENTATION. (4 Credits)
Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation; experimental investigation of interactions of radiation with matter. Lec/lab.
Prerequisites: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 236, RHP 236

NSE 311. INTRODUCTION TO THERMAL-FLUID SCIENCES. (4 Credits)
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311H.
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 311, NE 311, ME 311H, NSE 311H

NSE 311H. INTRODUCTION TO THERMAL-FLUID SCIENCES. (4 Credits)
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 311H, NE 311H, NSE 311

NSE 312. THERMODYNAMICS. (4 Credits)
Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312.
Prerequisites: (NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or ME 311 with C or better or ME 311H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 312, NE 312H, NSE 312H

NSE 312H. THERMODYNAMICS. (4 Credits)
Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or ME 311 with C or better or ME 311H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 312, ME 312H, NSE 312H

NSE 319. *SOCIETAL ASPECTS OF NUCLEAR TECHNOLOGY. (3 Credits)
Description and discussion of nuclear-related issues as they impact society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: NE 319

NSE 331. INTRODUCTORY FLUID MECHANICS. (4 Credits)
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331.
Prerequisites: (MTH 254 with C or better or MTH 254H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 212 [C] or ENGR 212H [C] and (ENGR 311 [C] or ENGR 311H [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
Equivalent to: ME 331, NE 331, NSE 331H

NSE 331H. INTRODUCTORY FLUID MECHANICS. (4 Credits)
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 254 with C or better or MTH 254H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 212 [C] or ENGR 212H [C] and (ENGR 311 [C] or ENGR 311H [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
Equivalent to: ME 331, ME 331H, NE 331, ME 331H, NSE 331
NSE 332. HEAT TRANSFER. (4 Credits)
A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332.
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (ENGR 212 [C] or ENGR 212H [C]) and (NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] or NSE 311H [C] or NSE 331 [C] or NE 311 [C] or NE 311H [C] or NSE 311H [C] or NSE 331 [C] or NE 311 [C] or NE 311H [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C]).
Equivalent to: ME 332, ME 332H, NE 332, NE 332H, NSE 332H

NSE 332H. HEAT TRANSFER. (4 Credits)
A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332H.
Attributes: HNRS – Honors Course Designator
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (ENGR 212 [C] or ENGR 212H [C]) and (NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] or NSE 311H [C] or NSE 331 [C] or NE 311 [C] or NE 311H [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C]).
Equivalent to: ME 332, ME 332H, NE 332, NE 332H, NSE 332H

NSE 401. RESEARCH. (1-16 Credits)
Graded P/N.
Equivalent to: NE 401
This course is repeatable for 99 credits.

NSE 403. THESIS/DISSERTATION. (1-16 Credits)
This course is repeatable for 16 credits.

NSE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

NSE 406. PROJECTS. (1-16 Credits)
Equivalent to: NE 406
This course is repeatable for 16 credits.

NSE 407. SEMINAR. (1 Credit)
Graded P/N.
Equivalent to: RHP 407
This course is repeatable for 16 credits.

NSE 410. INTERNSHIP. (1-12 Credits)
Supervised technical work experience at approved organizations. Graded P/N.
Equivalent to: RHP 410
This course is repeatable for 12 credits.

NSE 415. NUCLEAR RULES AND REGULATIONS. (2 Credits)
An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
Prerequisites: NSE 236 with C or better
Equivalent to: NE 415, RHP 415
Recommended: NSE 481 or NE 481 or RHP 481

NSE 429. SELECTED TOPICS IN NUCLEAR ENGINEERING. (1-3 Credits)
Topics associated with nuclear engineering not covered in other undergraduate courses; topics may vary from year to year.
Equivalent to: NE 429
This course is repeatable for 45 credits.

NSE 435. RADIATION SHIELDING AND EXTERNAL DOSIMETRY. (4 Credits)
Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.
Prerequisites: (NSE 234 with C or better or NE 234 with C or better or RHP 234 with C or better) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C] and (NSE 481 [C] or NE 481 [C] or RHP 481 [C])
Equivalent to: NE 435

NSE 440. NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT. (4 Credits)
Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.
Prerequisites: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 440

NSE 450. PRINCIPLES OF NUCLEAR MEDICINE. (3 Credits)
Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

NSE 451. NEUTRONIC ANALYSIS I. (3 Credits)
Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.
Prerequisites: (MTH 256 with C or better or MTH 256H with C or better) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C]) and (NSE 333 [C] or NE 333 [C] or RHP 333 [C])
Equivalent to: NE 451

NSE 452. NEUTRONIC ANALYSIS II. (3 Credits)
Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. Lec/lab.
Prerequisites: NSE 451 with C or better or NE 451 with C or better
Equivalent to: NE 452

NSE 455. REACTOR OPERATOR TRAINING I. (3 Credits)
The Oregon State University TRIGA reactor Operator Training I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NSE 455/NSE 555 and NSE 456/ NSE 556 classes taught during spring and summer terms. Students successfully completing the NSE 455/NSE 555 and NSE 456/NSE 556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisites: (NSE 236 with C or better or NE 236 with C or better or RHP 236 with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: NE 455
NSE 456. REACTOR OPERATOR TRAINING II. (4 Credits)
The Oregon State University TRIGA reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NE 455. Students successfully completing NSE 455/NE 555 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisites: NSE 455 with C or better or NE 455 with C or better
Equivalent to: NE 456

NSE 457. NUCLEAR REACTOR LABORATORY. (2 Credits)
Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab.
Prerequisites: (NSE 451 with C or better or NE 451 with C or better or NSE 551 with C or better or NE 551 with C or better) and (NSE 452 [C] or NE 452 [C] or NSE 552 [C] or NE 552 [C])
Equivalent to: NE 457

NSE 467. NUCLEAR REACTOR THERMAL HYDRAULICS. (4 Credits)
Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes.
Prerequisites: ME 332 with C or better or ME 332H with C or better or NSE 332 with C or better or NE 332 with C or better or NSE 332H with C or better or NE 332H with C or better
Equivalent to: NE 467

NSE 473. NUCLEAR REACTOR SYSTEMS ANALYSIS. (3 Credits)
Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs.
Prerequisites: NSE 452 with C or better or NE 452 with C or better
Equivalent to: NE 473

NSE 474. *NUCLEAR SYSTEMS DESIGN I. (4 Credits)
Part I of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: NSE 481 with C or better
Equivalent to: NE 474, RHP 474

NSE 475. *NUCLEAR SYSTEMS DESIGN II. (4 Credits)
Part II of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: (NSE 452 with C or better or NE 452 with C or better) and (NSE 474 [C] or NE 474 [C] or RHP 474 [C])
Equivalent to: RHP 475

NSE 481. RADIATION PROTECTION. (4 Credits)
Fundamental principles and theory of radiation protection; regulatory agencies, dose units; source of radiation; biological effects and risk; dose limits; applications of external and internal dosimetry; shielding and atmospheric dispersion.
Prerequisites: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 481, RHP 481

NSE 483. RADIATION BIOLOGY. (3 Credits)
Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.
Prerequisites: NSE 481 with C or better or RHP 481 with C or better or MP 481 with C or better
Equivalent to: MP 483

NSE 488. RADIOECOLOGY. (3 Credits)
Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals.
Prerequisites: NSE 481 with C or better or RHP 481 with C or better or NE 481 with C or better
Equivalent to: RHP 488

NSE 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.
Equivalent to: NE 499

NSE 501. RESEARCH. (1-16 Credits)
This course is repeatable for 99 credits.
Equivalent to: MP 501

NSE 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.
Equivalent to: MP 503

NSE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
Equivalent to: MP 505

NSE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.
Equivalent to: MP 506

NSE 507. SEMINAR. (1 Credit)
Graded P/N.
Equivalent to: MP 507

NSE 510. INTERNSHIP. (1-12 Credits)
Supervised technical work experience at approved organizations. Graded P/N.
Equivalent to: MP 510

NSE 515. NUCLEAR RULES AND REGULATIONS. (2 Credits)
An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
Equivalent to: NE 515, RHP 515
NSE 516. RADIOCHEMISTRY. (4 Credits)
Selected methods of radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. CROSSLISTED as CH 516.
Prerequisites: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C])
Equivalent to: RHP 516

NSE 517. RADIONUCLIDES IN LIFE SCIENCES. (4 Credits)
Chemistry of actinides and fission products, radioseparations, selected medical generators, radiolabeling of organic molecules. Designed for majors in medical physics, radiation health physics, chemistry, pharmacy.
Prerequisites: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C])
Equivalent to: RHP 517

NSE 519. RADIOCHEMICAL ANALYSIS. (4 Credits)
Hands-on learning of radiochemistry, practical training with open radiation sources for preparation of irradiation targets, counting samples from contaminated soils or separation of medical radionuclides. Fundamentals of chemical dosimetry are also covered. Designed for a broad range of majors in chemistry, nuclear engineering, radiation health physics, radioecology, chemical and environmental engineering. Lec/lab. The lecture part of the course also is delivered online as video stream via Canvas.
Prerequisites: NSE 536 with C or better or NE 536 with C or better or RHP 536 with C or better
Equivalent to: NE 519, RHP 519
Recommended: NSE 516

NSE 521. RADIOLOGICAL ANATOMY AND PHYSIOLOGY. (4 Credits)
Anatomy and physiology with correlating images for use by medical physicists, therapists, dosimetrists. This course adheres to the AAMD requirements for Cross Sectional Anatomy.
Equivalent to: MP 521, RHP 521

NSE 522. NUCLEAR SECURITY SCIENCE. (4 Credits)
Explores the nuclear fuel cycle from the perspective of nuclear security and safeguards and in the context of current international nuclear policies. Nuclear threats are balanced with the past history of nuclear weapons use, current nonproliferation technology, and the future international growth of the nuclear industry. Critical thinking will be assessed by way of in-class discussions, journal article reviews, written analysis of fuel cycle signatures, and conducting research. Signatures including radiological and morphological characteristics of nuclear material is introduced as well as the techniques for the detection of special nuclear materials.

NSE 525. NUCLEAR SECURITY SYSTEM DESIGN. (3 Credits)
Studies the science and engineering associated with the design, evaluation, and implementation of systems to secure nuclear and radiological materials. Topics include adversary characterization, target categorization and the consequences of failure to protect targets, detection and delay technologies, on-site and off-site response and response strategies, insider threat evaluation, and mathematical methods for evaluating risk due to the threat and the security system design. Students will become familiar with the components of a sustainable nuclear security program and their interconnections, and learn about the planning of nuclear security activities at both the state and facility level.

NSE 526. NUMERICAL METHODS FOR ENGINEERING ANALYSIS. (3 Credits)
Equivalent to: NE 526
Recommended: Programming experience and previous exposure to numerical methods

NSE 531. RADIOPHYSICS. (3 Credits)
Expands understanding of concepts and applications of atomic and nuclear physics to enable continued study in nuclear engineering and health physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and the characteristics of fission.
Equivalent to: MP 531

NSE 533. DETECTION OF SPECIAL NUCLEAR MATERIALS. (3 Credits)
Designed for students interested in radiation measurements and nuclear security, especially those considering PhD-level work in this area. Covers topics including special nuclear material characteristics, radiation background and its interference with SNM, an introduction to MCNPX, a brief introduction to Geant4, detection of SNM via counting or imaging, localization of SNM; and characterization of SNM.
Prerequisites: NSE 536 with C or better
Recommended: MTH 251 or MTH 251H

NSE 535. RADIATION SHIELDING AND EXTERNAL DOSIMETRY. (4 Credits)
Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.
Equivalent to: MP 535, NE 535, RHP 535

NSE 536. ADVANCED RADIATION DETECTION AND MEASUREMENT. (4 Credits)
Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab.
Prerequisites: NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better or MP 531 with C or better
Equivalent to: MP 536

NSE 537. DIGITAL RADIATION MEASUREMENT AND SPECTROSCOPY. (3 Credits)
Principles of digital spectroscopy; application of digital filters in digital processing of detector pulses; hardware implementation of a typical digital spectrometer; introduction of Field-Programmable Gate Array (FPGA) devices programming a digital spectrometer using Hardware Description Language (VHDL); simulation, synthesis and spectroscopy; experimental design tests and evaluation. Lec/lab.
Prerequisites: NSE 536 with C or better or NE 536 with C or better or RHP 536 with C or better
Equivalent to: NE 537

NSE 539. SELECTED TOPICS IN INTERACTION OF NUCLEAR RADIATION. (1-6 Credits)
Topics associated with interactions of nuclear radiation not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 539
NSE 540. NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT. (4 Credits)
Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.
Equivalent to: NE 540

NSE 541. DIAGNOSTIC IMAGING PHYSICS I. (3 Credits)
An introduction to the production and usage of ionizing radiation in medicine. The course will cover x-ray production, x-ray spectrum, characteristics and manipulation, and how x-rays are utilized to obtain anatomical information in diagnostics imaging. Imaging modalities to be covered in this course are general and portable planar radiography, mammography, and fluoroscopy (including interventional radiography).
Prerequisites: NSE 531 with C or better or MP 531 with C or better or RHP 531 with C or better
Equivalent to: MP 541

NSE 542. DIAGNOSTIC IMAGING PHYSICS II. (3 Credits)
An introduction to Computed Tomography (CT) and Ultrasound (US) imaging, and their applications in medicine. The course will cover x-ray production, detection, and image processing as it relates specifically to CT, as well as general acoustic physics principles and how they are applied to US imaging. Additionally, clinical radiation protection and dosimetry in diagnostic imaging will be taught.
Prerequisites: NSE 531 with C or better or PP 531 with C or better or RHP 531 with C or better
Equivalent to: MP 542

NSE 543. ADVANCED DIAGNOSTIC IMAGING PHYSICS. (3 Credits)
An introduction to the areas of health informatics and magnetic resonance imaging (MRI). The health informatics portion of the course will specifically cover picture archiving and communication systems (PACS), including DICOM standards, data transfer and storage, digital image displays, and clinical implementation of PACS systems. The MRI portion of the course will provide instruction on the physical principles behind nuclear magnetic response (NMR) and how these phenomenon are exploited in MRI. Advanced MRI techniques and applications, along with clinical testing requirements, will also be covered.
Prerequisites: NSE 531 with C or better or MP 531 with C or better or RHP 531 with C or better
Equivalent to: MP 543

NSE 544. NUCLEAR MEDICINE IMAGING. (3 Credits)
An introduction to the uses of radionuclides in medical imaging. The theory and application of detectors and imaging systems in nuclear medicine including collimators, scintillation probes, cameras, SPECT, PET, and hybrid technologies (SPECT/CT, PET/CT, and PET/MRI) will be covered.
Prerequisites: (NSE 541 with C or better or MP 541 with C or better) and (NSE 531 [C] or RHP 531 [C])
Equivalent to: MP 544

NSE 545. DIAGNOSTIC IMAGING PRACTICUM. (3 Credits)
Provides an introduction to the medical physicist’s role in a clinical department; an opportunity to integrate principles learned throughout the graduate program as they apply to diagnostic imaging physics. Observations of procedures in radiography, fluoroscopy, ED, OR, interventional radiology, CT, MRI, ultrasound, and nuclear medicine. Experience in regulatory testing of x-ray equipment; observations of testing of CT and other x-ray modalities. Graded P/N.
Prerequisites: (NSE 541 with C or better or MP 541 with C or better) and (NSE 531 [C] or MP 531 [C] or RHP 531 [C])
Equivalent to: MP 545

NSE 549. SELECTED TOPICS IN NUCLEAR FUEL CYCLE ANALYSIS. (1-6 Credits)
Topics associated with the nuclear fuel cycle not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 549
This course is repeatable for 45 credits.

NSE 550. PRINCIPLES OF NUCLEAR MEDICINE. (3 Credits)
Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.
Equivalent to: RHP 550

NSE 551. NEUTRONIC ANALYSIS I. (3 Credits)
Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.
Equivalent to: NE 551

NSE 552. NEUTRONIC ANALYSIS II. (3 Credits)
Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.
Prerequisites: NSE 551 with C or better or NE 551 with C or better
Equivalent to: NE 552

NSE 553. ADVANCED NUCLEAR REACTOR PHYSICS. (3 Credits)
Advanced analytic and numerical techniques for the prediction of the neutron population in nuclear reactor systems. Topic will include long characteristic neutron transport, collision probabilities, nodal methods, equivalence theory, and perturbation theory.
Prerequisites: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C])
Equivalent to: NE 553
Recommended: Computer programming experience

NSE 555. REACTOR OPERATOR TRAINING I. (3 Credits)
The Oregon State University TRIGA Reactor Operator I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NSE 455/555 and NSE 456/556 classes taught during spring and summer terms. Students successfully completing the NSE 455/555 and NSE 456/556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Equivalent to: NE 555

NSE 556. REACTOR OPERATOR TRAINING II. (4 Credits)
The Oregon State University TRIGA Reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/555. Students successfully completing NSE 456/556 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisites: NSE 555 with C or better or NE 555 with C or better
Equivalent to: NE 556
NSE 557. NUCLEAR REACTOR LABORATORY. (2 Credits)
Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab.
Prerequisites: (NSE 551 with C or better or NE 550 with C or better) and (NSE 552 [C] or NE 552 [C])
Equivalent to: NE 557

NSE 559. SELECTED TOPICS IN NUCLEAR REACTOR ANALYSIS. (1-3 Credits)
Topics associated with nuclear reactor theory not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 559
This course is repeatable for 45 credits.

NSE 561. NUCLEAR REACTOR SYSTEMS LABORATORY. (3 Credits)
Operational aspects of nuclear reactor systems; neutronic and thermal-hydraulic characterization of nuclear reactors; examination of design basis accident prevention and mitigation; loss of coolant accidents; loss of flow accidents; station blackouts. Lec/lab.
Prerequisites: (NSE 553 with C or better or NE 553 with C or better) and (NSE 567 [C] or NE 567 [C])
Equivalent to: NE 561

NSE 562. RADIATION THERAPY. (3 Credits)
The physics of radiation generation and delivery relevant to the field of clinical radiation oncology. Topics will include external beam radiation therapy; dosimetric calculations; high dose-rate and low dose-rate brachytherapy; electron beam dosimetry and treatment planning; special techniques in radiotherapy; and clinical radiation protection and quality assurance.
Prerequisites: NSE 531 with C or better or MP 531 with C or better or NE 531 with C or better or RHP 531 with C or better
Equivalent to: MP 562

NSE 563. APPLIED RADIATION THERAPY PHYSICS LABORATORY I. (3 Credits)
The applied practice of therapeutic radiation physics for clinical radiation oncology. Topics will include current methods and protocols for quality assurance, special techniques in radiotherapy, and oncology.
Prerequisites: NSE 562 with C or better or MP 562 with C or better
Equivalent to: MP 563

NSE 564. APPLIED RADIATION THERAPY PHYSICS LABORATORY II. (3 Credits)
Covers the applied practice of therapeutic radiation physics for clinical radiation oncology. Topics include current methodologies in SRS and ARC QA, treatment planning QA, adaptive radiotherapy, eye plaque brachytherapy and HDR braytherapy.
Equivalent to: MP 564

NSE 565. APPLIED THERMAL HYDRAULICS. (3 Credits)
Advanced topics in the computational modeling of the hydrodynamic and heat transfer phenomena of nuclear reactors. Steady-state and transient solutions of one-dimensional nuclear reactor thermal hydraulic models. Nuclear reactor behavior analysis during various accident scenarios.
Equivalent to: NE 565

NSE 567. NUCLEAR REACTOR THERMAL HYDRAULICS. (4 Credits)
Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes.
Equivalent to: NE 567

NSE 569. SELECTED TOPICS IN NUCLEAR REACTOR ENGINEERING. (1-6 Credits)
Advanced nuclear engineering design concepts, reactor systems analysis techniques and innovative nuclear engineering applications. Artificial intelligence and expert system applications to nuclear engineering problems. Topics may vary from year to year.
Equivalent to: NE 569
This course is repeatable for 30 credits.

NSE 573. NUCLEAR REACTOR SYSTEMS ANALYSIS. (3 Credits)
Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs.
Prerequisites: NSE 552 with C or better or NE 552 with C or better
Equivalent to: NE 573

NSE 574. NUCLEAR SYSTEMS DESIGN I. (4 Credits)
Part I of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills.
Equivalent to: RHP 574

NSE 575. NUCLEAR SYSTEMS DESIGN II. (4 Credits)
Part II of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills.
Prerequisites: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C]) and (NSE 574 [C] or NE 574 [C])
Equivalent to: RHP 575

NSE 582. APPLIED RADIATION SAFETY. (4 Credits)
Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce health hazards at each of the following stages: design, prevention, assessment, and post-incident. A history of key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab.
Equivalent to: MP 582

NSE 583. RADIATION BIOLOGY. (3 Credits)
Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.
Equivalent to: MP 583
**NSE 584. RADIATION BIOLOGY II.** (3 Credits)
Application of radiobiological models in radiation therapy. Some background in radiation biology is strongly recommended.
Equivalent to: MP 584, RHP 584

NSE 588. RADIOECOLOGY. (3 Credits)
Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals.
Equivalent to: RHP 588

**NSE 589. INTERNAL DOSIMETRY.** (3 Credits)
Further development and more in-depth treatment of internal dosimetry concepts introduced in NE/RHP 582, in NE/RHP 582, theoretical basis of energy deposition, biokinetics, and estimation of radiation risk from ingested, inhaled, or injected radionuclides.
Prerequisites: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 535 [C] or NE 535 [C] or RHP 535 [C])
Equivalent to: NE 590, RHP 590

NSE 590. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: MP 599
This course is repeatable for 16 credits.

NSE 601. RESEARCH. (1-16 Credits)
Graded P/N.
Equivalent to: MP 601
This course is repeatable for 99 credits.

NSE 603. THESIS. (1-16 Credits)
Equivalent to: MP 603
This course is repeatable for 999 credits.

NSE 605. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: MP 601
This course is repeatable for 16 credits.

NSE 606. PROJECTS. (1-16 Credits)
Equivalent to: MP 606
This course is repeatable for 16 credits.

NSE 607. SEMINAR. (1-16 Credits)
Graded P/N.
Equivalent to: MP 607
This course is repeatable for 16 credits.

NSE 610. INTERNSHIP. (1-16 Credits)
Equivalent to: MP 610
This course is repeatable for 16 credits.

NSE 654. COMPUTATIONAL PARTICLE TRANSPORT. (3 Credits)
Properties of and methods for solution of the linear Boltzmann equation for nuclear reactors; spherical and double-spherical harmonics; integral equation methods; Monte Carlo methods.
Prerequisites: (NSE 551 with C or better or NE 551 with C or better or RHP 551 with C or better) and (NSE 552 [C] or NE 552 [C] or RHP 552 [C])
Equivalent to: NE 654

NSE 667. ADVANCED THERMAL HYDRAULICS. (3 Credits)
Advanced topics in single- and two-phase hydrodynamics and heat transfer for nuclear reactors. Two-phase flow patterns, flow instabilities, condensation induced transients, convective boiling heat transfer, and current topics in reactor safety thermal hydraulics. Offered alternate years.
Prerequisites: NSE 567 with C or better or NE 567 with C or better
Equivalent to: NE 667

NSE 699. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: NE 699
This course is repeatable for 16 credits.

NSE 808. WORKSHOP. (1-4 Credits)
Equivalent to: NE 808
This course is repeatable for 16 credits.

**Medical Physics Graduate Major (MMP, MS, PhD)**

**Graduate Areas of Concentration**

**Medical health physics, therapeutic radiologic physics**

Medical physics examines and applies numerous aspects of nuclear science to medicine. Graduates can move to clinical residencies or research jobs which apply physics to medicine in imaging and radiation therapy.

The programs consist of a minimum of 45 credits, 39 of which must be didactic. The following courses are required and the remaining credits can be compiled of any 500- or 600-level course taught in the department or from outside the department if approved by an advisor. A comprehensive oral exam must be passed to complete the degree. MS students, in addition to the exam, must present their work to a committee of graduate faculty.

For more information, please contact:

Dr. Krystina Tack, PhD, DABR
Director
100 Radiation Center
Oregon State University
Corvallis, OR 97331-5902

---

**Nuclear Engineering Graduate Major (MENG, MS, PhD)**

**Graduate Areas of Concentration**

Application of nuclear techniques, arms control technology, nuclear instrumentation and applications, nuclear medicine, nuclear power generation, nuclear reactor engineering, nuclear systems design and modeling, nuclear waste management, numerical methods for reactor analysis, radiation shielding, radioisotope production, space nuclear power, thermal hydraulics

The School of Nuclear Science and Engineering offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering.

The Nuclear Engineering graduate degree is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. Nuclear engineering professions are essential to society’s well-being since they enable
significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. We are one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering Nuclear Engineering and Radiation Health Physics at OSU.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, contact the School of Nuclear Science & Engineering, NSE.Office@oregonstate.edu, 541-737-2343.

1. The MEng degree option provides students the opportunity to pursue advanced-level study without the requirement of completing thesis research. A comprehensive oral exam is taken in lieu of the thesis requirement and course requirements are the same as for the MS degree. These degrees are intended as terminal degrees, not as preparation for a doctorate, and will emphasize job-related knowledge and skills. Although not required, students wishing to pursue a PhD in the future are advised to pursue an MS degree, not the MEng.

2. The student's principal direction in the course of study comes from the doctoral committee, in which the major professor has final approval. In addition, the School of Nuclear Science & Engineering requirements include:

1. Passing a written qualifying examination for candidacy
2. On assignment from the student's doctoral committee, taking and passing (B average or higher) such courses as judged desirable by the doctoral committee for satisfactory progress in doctoral research
3. Calling regular (every 6 months recommended, but at least annual) meetings of the Doctoral Committee so that the student's progress can be evaluated and guidance offered
4. Preparing, presenting and defending a written dissertation proposal, i.e., the Preliminary Exam.

The Preliminary Exam should be taken as soon after the qualifying exam as possible

Major Code: 3270

Nuclear Engineering Graduate Minor

The School of Nuclear Science and Engineering offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering.

The Nuclear Engineering graduate degree is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. Nuclear engineering professions are essential to society's well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. We are one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for
students entering Nuclear Engineering and Radiation Health Physics at OSU.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

**Nuclear Engineering Undergraduate Major** (BS, HBS)

The objectives of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, an emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

and the methods used to protect people and their environment from aspects of ionizing and nonionizing radiation, their biological effects, this specialized field involves an integrated study of the physical content. 

This graduate curricula and research programs are designed for medical health, and industrial competitiveness. 

**Radiation Health Physics Program** 

The Radiation Health Physics program is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. The Radiation Health Physics profession is essential to society’s well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

This graduate curricula and research programs are designed for students with professional interests in the field of radiation protection. This specialized field involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to protect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive materials.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. Oregon State University is one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering nuclear engineering and radiation health physics at OSU. Research and teaching assistant opportunities are also available for students to support the educational and research programs conducted by the department.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, contact the School of Nuclear Science & Engineering, NSE.Office@oregonstate.edu, 541-737-2343.

### Radiation Health Physics Undergraduate Major (BS, HBS)

Radiation health physics is a specialized program in the School of Nuclear Science and Engineering for students with a professional interest in the field of radiation protection, also known as health physics. It involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to protect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive material.

College of Forestry (CoF)

The College of Forestry at Oregon State University is one of the world’s premier education, research, and outreach institutions that focuses on broad areas related to forest resources, terrestrial systems, wood products, ecosystem services, recreation, tourism, and their management.

We provide our graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them; to work with nature to keep land healthy for future generations; to know the science, technology and business associated with managing and using forests and related resources; and to work effectively with others in a culturally diverse, global society.

We provide our graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them; to work with nature to keep land healthy for future generations; to know the science, technology and business associated with managing and using forests and related resources; and to work effectively with others in a culturally diverse, global society.

The OSU College of Forestry has educated students for over 100 years. We offer a breadth of undergraduate and graduate programs that prepare students for a variety of careers in the public and private sectors. Our programs are ranked among the very best in the world. Our world-class faculty and modern facilities, combined with remarkable access to local forests, private industries, public agencies, international travel, and research through paid internships and mentored work experiences, provide our students with necessary knowledge and skills for fulfilling careers.

College of Forestry

The College of Forestry at Oregon State University is one of the world’s premier education, research, and outreach institutions that focuses on broad areas related to forest resources, terrestrial systems, wood products, ecosystem services, recreation, tourism, and their management.

We provide our graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them; to work with nature to keep land healthy for future generations; to know the science, technology and business associated with managing and using forests and related resources; and to work effectively with others in a culturally diverse, global society.

We provide our graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them; to work with nature to keep land healthy for future generations; to know the science, technology and business associated with managing and using forests and related resources; and to work effectively with others in a culturally diverse, global society.

The OSU College of Forestry has educated students for over 100 years. We offer a breadth of undergraduate and graduate programs that prepare students for a variety of careers in the public and private sectors. Our programs are ranked among the very best in the world. Our world-class faculty and modern facilities, combined with remarkable access to local forests, private industries, public agencies, international travel, and research through paid internships and mentored work experiences, provide our students with necessary knowledge and skills for fulfilling careers.
Degrees and Accreditations
The college offers Bachelor of Science (BS, HBS) degrees in Forest Engineering, Forestry, Natural Resources, Renewable Materials, and Tourism, Recreation & Adventure Leadership; and, in coordination with the College of Engineering, a double degree in Forest-Civil Engineering.

BS degrees in Forestry, Forest Engineering, and Forest Engineering-Civil Engineering are accredited by the Society of American Foresters (SAF). In addition, the BS degree in Forest Engineering and the BS double degree in Forest Engineering-Civil Engineering are accredited by the Engineering Accreditation Commission of ABET (https://www.abet.org). The BS degree in Renewable Materials is accredited by the Society of Wood Science and Technology (SWST).

Graduate programs in Sustainable Forest Management, Forest Ecosystems and Society, and Wood Science and Engineering include the Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD). Each department also participates in the Master of Arts in Interdisciplinary Studies (MAIS). The college also offers an online-only Master of Natural Resources (MNR) and online-only graduate certificates in Sustainable Natural Resources (SNR), Urban Forestry, and Forests & Climate Change.

Double Degrees
Undergraduates with majors in the College of Forestry also can earn secondary degrees in education, innovation management, or sustainability. See the College of Education, College of Business, or College of Agricultural Sciences sections of this catalog for more information.

Minors
The college offers minors in Forestry, Natural Resources, Renewable Materials, and Tourism, Recreation & Adventure Leadership (Bend campus only).

High School Preparation
Students planning to study at Oregon State University should include the following subjects in their high school programs: English, 4 years; mathematics, 3 years; science, 3 years (to include at least one year each of two different sciences—biology, chemistry, physics, etc.); social studies, 3 years; and foreign language, 2 years.

Transfer Students
Because of the technical and professional nature of the college’s curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college’s curricular requirements. In general, equivalent college-level courses successfully completed at an accredited college or university are accepted. OSU students requesting a transfer to the College of Forestry must be in good academic standing at the university. Please contact the Head Advisor at 541-737-1592 for additional information.

Advising
The College of Forestry is committed to helping students succeed. Students are required to meet with an advisor each term. Advisors are valuable sources of information about degree programs, mentoring, and other special opportunities in line with students’ interests. Personnel in Advising and the Student Resources & Engagement Office are available to help with university rules and regulations, job placement, exchange programs, and referrals to cross-campus programs and services. Students are encouraged to take an active role in their program planning, and to use their time at OSU to develop themselves both academically and professionally.

The college and the OSU Career Development Center provide up-to-date information for both seasonal and permanent work and offer a full array of career services to prepare undergraduates and graduates for jobs.

Education Facilities
Richardson Hall contains modern classroom, laboratory, computer, and study facilities that support learning. COF offers a Self-Learning Center where students have access to educational materials, computers, and group study space. The Wood Innovation Center promotes great relationships between students, employers, and faculty.

Classes use the nearby college forests for field instruction and research projects. In addition to the 11,500 acres in the McDonald-Dunn Forests, the college manages other forests in Oregon for education and research.

The college also makes extensive use of various public and private programs and facilities for student benefit. Numerous field trips to forests, wood processing and manufacturing operations, recreation facilities, and research sites enable students to observe contemporary problems and practices.

Corvallis is one of the largest forestry and wood science research centers in the world. An innovative research program is conducted by the college through its Forest Research Laboratory and by the campus-based Forest Sciences Laboratory of the U.S. Forest Service. These organizations offer state-of-the-art facilities for educational and employment opportunities for superior students.

A Forest Products Collection contains approximately 2,500 species of wood, primarily from North and South America, Southeast Asia, and Africa, while the grounds around the college are planted with an extensive collection of Pacific Northwest trees and shrubs.

Student Activities
Numerous opportunities exist for students to participate in social and academic activities related to forestry and natural resources, sports logging, and international travel. Clubs and student chapters of several professional societies are active in the college, as well as Xi Sigma Pi, a national honorary society to which College of Forestry students may belong. These clubs offer students the chance to develop leadership and team-building skills.

Scholarships
The College of Forestry offers over $500,000 in undergraduate scholarships annually. Many scholarships are merit based, and awards range from between $1,000 and $9,000 per year. Online applications (http://studentservices.forestry.oregonstate.edu/sre/scholarships) are available and are due February 15 of each year.

Graduate students are commonly supported with teaching and research assistantships, as well as fellowships with awards totaling over $300,000 per year. More information is available on the College of Forestry website (http://www.forestry.oregonstate.edu/graduate-programs/funding).

Scholarships and fellowships are awarded each spring for the following academic year.
Academic Requirements

To earn a bachelor of science degree, a student must complete at least 180 quarter credits of university-level courses for the Forestry; Natural Resources; Renewable Materials; and Tourism, Recreation, and Adventure Leadership programs. At least 192 quarter credits of university-level courses are required for the BS in Forest Engineering, and 242 credits are required for the double degree in Forest Engineering and Civil Engineering. These curricula include:

- Written and oral communications, 12–13 credits including a senior writing intensive course.
- OSU Baccalaureate Core curriculum.
- Completion of an approved departmental curriculum.
- Minimum grades:
  - Forestry majors must earn grades of C or better in all courses (or approved substitutions) required for the major and option. No major or option courses may be taken with S/U grading.
  - Forest Engineering majors must earn grades of C or better in all courses (or approved substitutions) required for the major. No major courses may be taken with S/U grading.
  - Forest-Civil Engineering majors must earn grades of C or better in all courses (or approved substitutions) required for the major. No major courses may be taken with S/U grading.
  - Natural Resources majors must achieve passing grades in all major courses, and a minimum GPA of 2.25 in the option. Natural Resources majors can take up to two S/U graded courses in their major or option.
  - Renewable Materials majors must achieve grades of C- or high in all COF courses (prefix: FE, FES, FOR, NR, TRAL, or WSE) for the major or option. No major or option courses may be taken with S/U grading.
  - Tourism, Recreation & Adventure Leadership majors must earn grades of C or high in all COF courses (prefix: FE, FES, FOR, NR, TRAL, or WSE) for the major or option. No major or option courses may be taken with S/U grading.
- Approved work experience as noted below.

Professional and Personal Requirements

Those majoring in Forest Engineering, Forest Engineering-Civil Engineering, Forestry, Renewable Materials, and Tourism, Recreation & Adventure Leadership must complete six months of satisfactory employment in an area related to their major.

Students are personally responsible for fulfilling all curricular requirements in proper sequence. Work performance and personal conduct are thoroughly appraised by the college. Since the professions of forestry and natural resources are highly regarded for their ethical and academic standards, students are responsible for observing the Professional Code of Conduct of the college in its entirety. Departure from these ethical requirements may result in dismissal from the college.

Forest Ecosystems and Society

The faculty, staff, and students in the Department of Forest Ecosystems and Society are dedicated to the discovery and dissemination of knowledge related to the interactions among landscapes, forests, and people. Humans are dependent on forests in many ways. We seek to understand the diversity of benefits derived from forests and expand our knowledge of how forests function to provide those benefits. We provide the expertise needed by scientists, managers, and the general public as they jointly decide how these values can be sustained in the face of climate change, land use pressures and economic uncertainties. We contribute scientific understanding to decisions that lead to sustaining these important values on forestlands in Oregon, in the U.S., and around the globe now and in the future.

The Department of Forest Ecosystems and Society offers a graduate program in Forest Ecosystems and Society. The program includes Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. The department also offers an online-only Master of Natural Resources (MNR) degree and online-only graduate certificates in Sustainable Natural Resources; Urban Forestry; and Forests and Climate Change.

Research

Research in the Department of Forest Ecosystems and Society focuses on understanding and applied research to help solve complex natural resource challenges. We integrate biophysical and social sciences across scales within natural and managed forest ecosystems. Graduate education emphasizes the ability to define and solve researchable problems and function in interdisciplinary terms. Graduate students are encouraged to participate actively in the department’s large, diverse program of seminars, continuing education courses and workshops, international research, and other professional and educational activities.

Forest Ecosystems and Society Graduate Degree Programs

The MS and PhD degrees in Forest Ecosystems and Society are structured specifically for those interested in careers in resource management, research, teaching, and specialized areas of forest science, social science, and interdisciplinary science. The degrees are available in seven areas of concentration: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; the science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; and sustainable recreation and tourism.

The Master of Forestry degree is a non-thesis degree that supports advancement in non-research professional forestry and forestry-related professional positions. The degree emphasizes one of two areas: biology or silviculture. Students in either area prepare for careers as professional forest biologists, silviculturists, or other specialists capable of analyzing opportunities for natural resource management for landowners. This degree typically takes 12–15 months to complete and requires the student work on a capstone project.

The Master of Natural Resources (MNR) degree is offered as a non-thesis option only. Certificates in Sustainable Natural Resources, Urban Forestry, and Forests and Climate Change are available in association with the MNR program. The MNR curriculum facilitates learning by natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. The MNR is taught entirely online through OSU Ecampus (although it may be possible for some students to work toward the MNR degree while in residence at OSU).

Interdisciplinary Graduate Degree Programs

The Department of Forest Ecosystems and Society participates in a number of other interdisciplinary graduate degree programs at OSU, including the Master of Arts in Interdisciplinary Studies (MAIS), Master of Environmental Arts and Humanities, PhD in Molecular and

**Undergraduate Programs**

**Majors**

- Natural Resources (p. 506)
  - **Options:**
    - Conservation Law Enforcement (p. 508)
    - Ecological Restoration
    - Fish and Wildlife Conservation
    - Forest Ecosystems
    - Human Dimensions in Natural Resources
    - Individualized Specialty Option
    - Integrated Conservation Analysis
    - Landscape Analysis
    - Natural Resource Education (p. 513)
    - Policy and Management
    - Urban Forest Landscapes
    - Wildland Fire Ecology
  - Sustainability (http://catalog.oregonstate.edu/college-departments/agricultural-sciences/other-degrees-programs/sustainability-bs-hbs)
- Tourism, Recreation, and Adventure Leadership (p. 517)
  - **Options:**
    - Adventure Leadership Education
    - Nature, Eco- and Adventure Tourism
    - Outdoor Recreation Management
    - Sustainable Tourism Management

**Minors**

- Natural Resources (p. 504)
- Tourism, Recreation, and Adventure Leadership (p. 516)

**Graduate Programs**

**Majors**

- Forest Ecosystems and Society (p. 502)
  - Natural Resources (p. 503)

**Certificates**

- Forests and Climate Change (p. 502)
- Sustainable Natural Resources (p. 516)
- Urban Forestry (p. 523)

**Troy Hall, Department Head**

Phone: 541-737-2088
Email: fesdept@oregonstate.edu
Website: http://fes.forestry.oregonstate.edu/

**Assistant Professors** Ahrens, Campbell, D’Antonio, Davis, Hajjar, Krawchuk, Luoma, Munanura, Rivers, Rosenberg, Schmidt, Schulze, Warren

**Senior Instructors** Anzinger, Bishaw

**Instructors** Diebel, Gassner, K. Hall, Liegel, Mangla, Olsen, Painter, Perry, Ries, Stermer

**Adjunct Faculty**

Bailey, Lach, Lajtha, Walker

**Courtesies/Affiliate Faculty**

Alexander, Baur, Bell, Brooks, Castellano, Cazeres-Gonzalez, Charnley, Cohen, Eisenberg, Pettig, Gray, Grimm-Greenblatt, Hagar, Kim, Kraft, Kroll, McCulloh, McKane, Meinzer, Morzillo, Murden, Newsome, Perakis, Phillips, Smith, Spies, Swanson, Taylor, Trappe, Vogeler, Woodruff, Zhao

**Forest Ecosystems and Society**

**FES 115. ECOLOGY OF OREGON COAST FOREST. (1 Credit)**

A combination of lecture, lab, and field exercises to explore the ecology and development of Oregon coastal forests. Lec/lab. Graded P/N.

**Equivalent to:** FS 115

**FES 199. SPECIAL TOPICS. (1-16 Credits)**

This course is repeatable for 16 credits.

**FES 202. SOFTWARE TOOLS IN QUANTITATIVE SOCIAL SCIENCE RESEARCH. (3 Credits)**

Develop and apply software skills to analyze quantitative social science data, then interpret and present results. Using software, students will conduct statistical analysis of primary and/or secondary data (for example, their own survey data or data from sources such as the US Census American Community Survey).

**Prerequisites:** ST 201 with C or better

**FES 240. *FOREST BIOLOGY. (4 Credits)**

Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Equivalent to:** FES 240H, FOR 240

**FES 240H. *FOREST BIOLOGY. (4 Credits)**

Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator

**Equivalent to:** FES 240

**FES 241. DENDROLOGY. (3 Credits)**

Learn to identify the principal forest trees of North America, and the principal trees and shrubs of the Pacific Northwest. Also learn about forested regions of the world. Lec/lab/rec.

**Equivalent to:** FES 141

**FES 242. FOREST PLANTS OF THE PACIFIC NORTHWEST. (3 Credits)**

Field course on the identification and ecology of forest trees, shrubs, and herbs of the Pacific Northwest. Overnight camping required. Students should be prepared to hike 3-5 miles per day.
FES 341. FOREST ECOLOGY. (3 Credits)
Basic physiological characteristics of trees, succession, climax, and related concepts. Vegetation classification. Stand structure, diversity, competition, growth, soils-forests interactions, biomass and nutrient distribution, energy relations, nutrient element dynamics, ecology of disturbances.
Equivalent to: FOR 341

FES 342. FOREST TYPES OF THE NORTHWEST. (3 Credits)
Forest trees in nature are aggregated into stable or transitory associations known as forest cover types. Knowledge of forest cover types, their species composition and ecology, is applicable to the fields of forestry, fire management, wildlife management, and forest ecology.
Equivalent to: FOR 342

FES 343. FORESTS OF THE EASTERN UNITED STATES. (3 Credits)
Major Southeast US forest types will be visited and morphological, geographic, ecological and economic characteristics of important forest tree species examined.
Prerequisites: FES 141 with C or better or FES 241 with C or better This course is repeatable for 3 credits.

FES 350. URBAN FORESTRY. (3 Credits)
Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. CROSSLISTED as HORT 350.
Equivalent to: FOR 350
Recommended: Foundational forestry and horticulture courses

FES 355. MANAGEMENT FOR MULTIPLE RESOURCE VALUES. (3 Credits)
Management of a variety of resource attributes in multiple use context, including considerations for recreation, fish, wildlife, aesthetics, watersheds, and forest products.
Equivalent to: FOR 355

FES 365. *ISSUES IN NATURAL RESOURCES CONSERVATION. (3 Credits)
Background of major current issues in natural resources conservation with emphasis on forests, soils, and water and potential sustainable carrying capacity. Focus on evaluating facts and opinions related to issues. Basics of terrestrial and aquatic ecology, recent and current issues of soil, water, and forest use and management. (Bacc Core Course)
Attributes: CSSI – Core, Synth, Global Issues
Equivalent to: FOR 365

FES 399. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

FES 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: FS 401
This course is repeatable for 16 credits.

FES 403. THESIS. (1-16 Credits)
Equivalent to: FS 403
This course is repeatable for 16 credits.

FES 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: FS 405
This course is repeatable for 16 credits.

FES 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

FES 407. SEMINAR. (1-16 Credits)
Some sections graded A-F. This course is repeatable for a maximum of 16 credits.
This course is repeatable for 16 credits.

FES 410. INTERNSHIP. (1-16 Credits)
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N. This course is repeatable for 16 credits.

FES 412. FOREST ENTOMOLOGY. (3 Credits)
Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values.
Prerequisites: BI 204 with C or better or BI 211 with C or better or BI 211H with C or better or BI 212 with C or better or BI 212H with C or better

FES 422. RESEARCH METHODS IN SOCIAL SCIENCE. (4 Credits)
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab.
Prerequisites: ST 201 with D- or better or ST 351 with D- or better or ST 351H with D- or better
Equivalent to: TOL 422

FES 430. FOREST AS CLASSROOM. (4 Credits)
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.

FES 433. PLANNING AGROFORESTRY PROJECTS. (2 Credits)
Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions.
Prerequisites: BOT 341 with D- or better

FES 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK. (3 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as MCB 535, TOX 435/TOX 535, TOX 435H. (Bacc Core Course)
Attributes: CSSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FES 435H
Recommended: One quarter each of biology and chemistry

FES 440. WILDLAND FIRE ECOLOGY. (3 Credits)
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
Equivalent to: FOR 446
Recommended: Junior or senior standing, with coursework in ecology and natural resource management

FES 444. ECOLOGICAL ASPECTS OF PARK MANAGEMENT. (3 Credits)
Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored.
Equivalent to: TOL 444
Recommended: An ecology course and completion or concurrent enrollment in FES 251 or FOR 251
FES 445. ECOLOGICAL RESTORATION. (4 Credits)
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. Lec/lab/rec. CROSSLISTED as FW 445.
Equivalent to: FOR 445, FW 445
Recommended: Bi 370 or Bi 370H

FES 447. ARBORICULTURE. (4 Credits)
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. CROSSLISTED as HORT 447.
Equivalent to: FOR 447
Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)

FES 452. BIODIVERSITY CONSERVATION IN MANAGED FORESTS. (3 Credits)
Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSLISTED as FW 452.
Equivalent to: FS 453, FW 452
Recommended: FES 240 or FES 341 or Bi 370

FES 454. MANAGING AT THE WILDLAND-URBAN INTERFACE. (3 Credits)
Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities.
Equivalent to: FOR 454
Recommended: FOR 111 for non-Ecampus students

FES 455. URBAN FOREST PLANNING, POLICY AND MANAGEMENT. (4 Credits)
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as HORT 455.
Equivalent to: FOR 455
Recommended: FES 350 or HORT 350

FES 477. *AGROFORESTRY. (3 Credits)
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as NR 477. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FS 477
Recommended: Introductory course in biology.

FES 485. *CONSENSUS AND NATURAL RESOURCES. (3 Credits)
Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FS 485

FES 486. *PUBLIC LANDS POLICY AND MANAGEMENT. (3 Credits)
Examines public lands policy and management in the Western U.S. Overview of historical and current federal land management agency laws, regulations, and policies. Highlights political, legal, economic, ecological, and social context of public land management decisions. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: Sophomore standing

FES 499. SELECTED TOPICS IN FOREST SCIENCE. (0-16 Credits)
In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others.
Equivalent to: FS 499
This course is repeatable for 16 credits.

FES 500. MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS. (3 Credits)
Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies. CROSSLISTED as MNR 500.
Equivalent to: MNR 500
Recommended: MTH 111

FES 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: FS 501
This course is repeatable for 16 credits.

FES 503. THESIS. (1-16 Credits)
Equivalent to: FS 503
This course is repeatable for 999 credits.

FES 505. READING AND CONFERENCE. (1-16 Credits)
Some sections graded P/N.
Equivalent to: FS 505
This course is repeatable for 16 credits.

FES 506. PROJECTS. (1-16 Credits)
Equivalent to: FS 506
This course is repeatable for 16 credits.

FES 507. SEMINAR. (1-16 Credits)
Some sections graded A-F.
Equivalent to: FS 507
This course is repeatable for 16 credits.

FES 508. WORKSHOP. (1-16 Credits)
Equivalent to: FS 508
This course is repeatable for 16 credits.

FES 511. COMMUNITIES AND NATURAL RESOURCES. (5 Credits)
Provides students from diverse backgrounds with interdisciplinary, experiential learning exposure to contemporary community and natural resource issues in rural Oregon. Social science concepts are employed to critically appraise current conditions and future prospects for rural, natural resource-dependent communities.
Equivalent to: FS 511
This course is repeatable for 15 credits.
FES 512. FOREST ENTOMOLOGY. (3 Credits)
Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values.
Recommended: BI 204 or BI 211 or BI 211H or BI 212 or BI 212H or equivalent.

FES 520. POSING RESEARCH QUESTIONS. (3 Credits)
Acquaints beginning graduate students in the natural resources to the scientific method and formation of good researchable questions. The course consists of lectures, readings and discussions. Concepts in the course are reinforced and amplified by discipline-specific companion modules. Students prepare and orally present a researchable question in their area of interest that is critiqued by the class and instructors.
Equivalent to: FS 520

FES 521. NATURAL RESOURCE RESEARCH PLANNING. (3 Credits)
Research planning and study plan development, investigative procedures, the principles and ethics of natural resource science, principles and practices in scientific communication.
Equivalent to: FS 521

FES 522. RESEARCH METHODS SOCIAL SCIENCE. (4 Credits)
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Equivalent to: FOR 522, MNR 522
Recommended: ST 201 or ST 351 or ST 351H plus graduate level statistics course

FES 523. QUANTITATIVE ANALYSIS IN SOCIAL SCIENCE. (4 Credits)
Application and interpretation of statistical approaches to human dimensions of natural resources, recreation, and other social sciences. Emphasis is on an applied approach focusing on understanding data, selecting appropriate statistics for theoretical and managerial problems, using statistical software for analyses, and interpreting findings.
Recommended: (FES 522 or FOR 522) and ST 511

FES 524. NATURAL RESOURCES DATA ANALYSIS. (4 Credits)
Hands-on experience in applied statistical modeling and data analysis for natural resources. Emphasis is on understanding of statistical models and the application and actual implementation of statistical analysis techniques, use of statistical software for analyses (e.g., R), and interpretation of findings. Students analyze data from their own research for final projects.
Prerequisites: ST 511 with B or better and ST 512 [B]

FES 525. INTERDISCIPLINARY APPROACHES TO SOCIO-ECOLOGICAL PROBLEMS. (3 Credits)
Inter-, multi- and transdisciplinary approaches to socio-ecological problems, including terminology, assumptions, and analytical frameworks of different scientific fields. How disciplines have been integrated to approach specific case studies. Teams apply concepts, tools, and approaches in a final integrated analysis, resulting in proposed actions or policies.

FES 526. EFFECTIVE COMMUNICATION & PRESENTATION SKILLS FOR SCIENTISTS. (1 Credit)
Provides an overview of communication principles and effective scientific communication skills for producing a seminar on proposed research presented to fellow scientists. Students evaluate strengths and weaknesses of communication styles; develop their ability to provide fair, timely feedback; and apply communication principles to evaluate strengths and weaknesses of presentations and proposed research.
This course is repeatable for 3 credits.

FES 527. FOREST CARBON ANALYSIS FOR ASSESSMENTS AND POLICY AGREEMENTS. (3 Credits)
Role of forests in mitigating greenhouse gas emissions. International GHG policies and recommendations for monitoring emissions and forest carbon. Measurement, modeling, and projections of forest ecosystem carbon. Evaluation of policies for reducing GHG emissions and increasing forest carbon stores.
Prerequisites: FES 536 with C or better
Recommended: MNR 538 or MNR 550

FES 530. FOREST AS CLASSROOM. (4 Credits)
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.

FES 532. RESEARCH METHODS AGROFORESTRY PROJECTS. (2 Credits)
Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions.
Recommended: BOT 341 and/or equivalent course in ecology.

FES 533. PLANNING AGROFORESTRY PROJECTS. (2 Credits)
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as MCB 535, TOX 435/TOX 535, TOX 435H.
Equivalent to: BI 535, FS 535, MCB 535, TOX 535
Recommended: One quarter each of biology and chemistry

FES 536. CARBON SEQUESTRATION IN FORESTS. (2 Credits)
Examines processes controlling the sequestration of carbon in the forest system including the forest itself and wood products. Also examines how forests can be managed to sequester carbon as well as the important economic, policy, and other constraints. Lectures, readings, discussion, simulation models, and home work will be used to cover the material.
Recommended: Undergraduate-level biology or ecology

FES 537. BELOWGROUND ECOSYSTEMS. (3 Credits)
Physical and biological components and their interactions in different soil ecosystems with description and examination of the relationships between producers and decomposers in the soil.
Recommended: Undergraduate biology or ecology courses
FES 538. VALUATION OF NON-MARKET RESOURCES. (3 Credits)
Focuses on the theory and methods for estimating the economic value of non-market resources (e.g. clean air and water, biodiversity, nature-based recreation, etc.). Blends the theory and econometrics of non-market valuation through hands-on applications of methods with real datasets. The valuation of non-market resources is a burgeoning field within applied economics and should continue to grow in both importance and applications.
Recommended: AREC 512 or ECON 512

FES 540. WILDLAND FIRE ECOLOGY. (3 Credits)
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
Recommended: Coursework in ecology and natural resource management

FES 542. WILDLIFE LANDSCAPE ECOLOGY. (3 Credits)
Explores the interaction between spatial pattern and scale and ecological processes with particular emphasis on biodiversity in forests. The focus is on theory, methods and conservation applications in landscape ecology.
Recommended: Undergraduate courses in ecology and concurrent enrollment in ST 511

FES 543. ADVANCED SILVICULTURE. (3 Credits)
The scientific basis of forest regeneration and silvicultural practices and prescriptions in immature and mature stands. Field trips are required.
Lec/lab.
Equivalent to: FS 543
Recommended: FOR 442 and FOR 443

FES 545. ECOLOGICAL RESTORATION. (4 Credits)
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic; biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FW 545.
Equivalent to: FOR 545, FW 545
Recommended: BI 370 or BI 370H

FES 546. ADVANCED FOREST COMMUNITY ECOLOGY. (4 Credits)
Fundamental concepts of community including disturbance, diversity and succession. Strong emphasis on field skills and data interpretation. Saturday field trip required. Lec/lab.
Equivalent to: HORT 547
Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)

FES 548. INVASIVE PLANTS: BIOLOGY, ECOLOGY AND MANAGEMENT. (3 Credits)
Concepts of plant physiology, genetics and population dynamics are used to understand how plant invasions occur and some communities continue to exist. Management implications are explored.
Equivalent to: FS 548

FES 550. TROPHIC CASCADES. (2-3 Credits)
Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. CROSSLISTED as FW 550.
Equivalent to: FOR 547, FW 547, FW 550
This course is repeatable for 3 credits.

FES 552. FOREST WILDLIFE HABITAT MANAGEMENT. (4 Credits)
Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations.
Lec/lab. CROSSLISTED as FW 552.
Equivalent to: FW 552
Recommended: FOR 341 or equivalent course in ecology.

FES 554. MANAGING AT THE WILDLAND-URBAN INTERFACE. (3 Credits)
Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities.
Equivalent to: FOR 554
Recommended: FOR 111 for non-Ecampus students

FES 555. URBAN FOREST PLANNING, POLICY AND MANAGEMENT. (4 Credits)
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as HORT 555.
Equivalent to: FOR 555
Recommended: FES 350 or HORT 350

FES 558. CONCEPTS OF FOREST RECREATION PLANNING AND MANAGEMENT. (3 Credits)
Examines research that forms the conceptual basis for tools, techniques, and approaches used in recreation planning and management.
Equivalent to: FOR 558

FES 560. GREEN INFRASTRUCTURE. (4 Credits)
Explores the relationship between the natural and built environments in cities and examines how planning for and managing green infrastructure assets (such as urban tree canopy, watersheds, and natural areas) increases economic health, community livability and ecological resilience in cities.

FES 561. PHYSIOLOGY OF WOODY PLANTS. (3 Credits)
The structure, growth and physiological processes of trees and shrubs.
Equivalent to: FS 561
Recommended: ((CH 231 or CH 231H) and (CH 232 or CH 232H) and (CH 233 or CH 233H)) and CH 331 and CH 332 and BOT 331

FES 565. URBAN FORESTRY LEADERSHIP. (2 Credits)
Examines the application of leadership theories and principles to the decision-making, policy creation, and effective administration of urban forestry programs in the public, private, and non-profit sectors. Taught via Ecampus only.
FES 577. AGROFORESTRY. (3 Credits)
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology.
Equivalent to: FS 577, NR 577
Recommended: Introductory course in biology.

FES 580. WRITING SCIENTIFIC MANUSCRIPTS. (1 Credit)
Discussion of parts of a scientific manuscript and the submission, review, and publication process. Brief presentations and discussion of examples provided by the instructor and students. Students write their own manuscripts and work in teams to provide feedback on manuscript components.

FES 585. CONSENSUS AND NATURAL RESOURCES. (3 Credits)
Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue.
Equivalent to: FS 585

FES 586. PUBLIC LANDS POLICY AND MANAGEMENT. (3 Credits)
Examines public lands policy and management in the Western U.S. Overview of historical and current federal land management agency laws, regulations, and policies. Highlights political, legal, economic, ecological, and social context of public land management decisions.

FES 599. SELECTED TOPICS IN FOREST SCIENCE. (0-16 Credits)
In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others.
Equivalent to: FS 599
This course is repeatable for 16 credits.

FES 600. GLOBAL CHANGE ECOLOGY: IMPACTS, MITIGATION, AND ADAPTATION. (3 Credits)
An interdisciplinary discourse on what is known about global change and dynamics of the earth system, including principles of climate, influences on ecosystem functioning and connectivity needed to understand responses of the earth system to human activities.
Equivalent to: FS 600

FES 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: FS 601
This course is repeatable for 16 credits.

FES 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

FES 605. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: FS 605
This course is repeatable for 16 credits.

FES 606. PROJECTS. (1-16 Credits)
Equivalent to: FS 606
This course is repeatable for 16 credits.

FES 629. TEACHING PRACTICUM IN FOREST SCIENCE. (1 Credit)
Preparation of graduate students in forest science and related disciplines for their first teaching experiences. Using concepts and information introduced in the class, students will develop the curriculum for one credit of college-level instruction (or an equivalent approved by the instructor) in a topic of their choice.
Equivalent to: FS 629

FES 646. FOREST ECOSYSTEMS ANALYSIS AND APPLICATION. (4 Credits)
The structure and function of forests and associated streams in natural and managed landscapes; application of ecosystem analysis to policy management decisions; roles of models; scaling from individual processes to ecosystems, landscapes, and beyond. Required classroom discussions, field trip.
Equivalent to: FS 646
Recommended: College-level ecology/biology, chemistry, and math; familiarity with Excel.

FES 699. SELECTED TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Master of Natural Resources

MNR 500. MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS. (3 Credits)
Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies.
CROSSLISTED as FES 500.
Equivalent to: FES 500
Recommended: MTH 111

MNR 511. INTRODUCTION TO SUSTAINABLE NATURAL RESOURCES. (3 Credits)
Overview of economic, environmental, social, cultural, ethical, and policy considerations of sustainable natural resource management. International collaborative efforts to address global natural resource issues. Key policy drivers, key stressors, balancing competing interests. Introductory course required for all Master of Natural Resources students; open to other graduate students. Taught via Ecampus only.
Recommended: Undergraduate biology or ecology course

MNR 522. RESEARCH METHODS SOCIAL SCIENCE. (4 Credits)
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Lec/lab.
Equivalent to: FES 522
Recommended: Upper-division or graduate level statistics

MNR 530. TROPICAL FOREST ECOLOGY AND MANAGEMENT: A GLOBAL PERSPECTIVE. (3 Credits)
Study of tropical forest ecology and the common ecological patterns found within tropical forests. The threats and challenges that tropical forests face in the 21st century and the issues of human use and their impacts. Developing strategies for sustainable management and restoration approaches to alleviate pressure on remaining tropical forests. Taught via Ecampus only.

MNR 538. ADAPTING FORESTS TO CLIMATE CHANGE. (3 Credits)
Climate change is expected to have profound effects on forests. Society can respond by managing in forests in ways that can help mitigate climate change or help forests adapt. Nonetheless, changes in climate and forest responses are uncertain, making management and policy decisions difficult and controversial. We will investigate the effects of climate change on forests, focusing on potential forest management and policy responses.
**MNR 550. CLIMATE CHANGE IMPACTS ON FOREST ECOSYSTEMS.** (3 Credits)

Forest management responses to climate change will rely on understanding the mechanisms of interaction between forests and climate, as well as the capacity to evaluate impacts of future climate scenarios on forests. This course will consider effects of rising CO2 and changing climate at the level of ecophysiological processes, changes in species distribution, changes in disturbance regimes, and ecosystem-level impacts mediated by the water, carbon, and nitrogen cycles. Modeling approaches will include statistically-based bioclimatic envelopes, and dynamic global vegetation models that treat ecosystem processes and changes in biome distribution.

**Recommended:** Basic ecology course. FCSJ Graduate Certificate students should take SNR 511 in their first term

**MNR 560. MASTER'S CASE STUDY.** (3 Credits)

Capstone project integrating course work, readings, and assignments to address complex natural resource problems of local or regional importance. Taught via Ecampus only. Graded P/N.

**Prerequisites:** MNR 511 with C or better

**MNR 561. MNR CAPSTONE PROJECT.** (1-6 Credits)

Students work with their major advisor on the completion of their capstone project at the end of the MNR degree program. Students incorporate knowledge gained from coursework to address a natural resource problem within interconnected ecological, economic and social contexts.

This course is repeatable for 12 credits.

**Recommended:** MNR 560 or (SNR 511 and SNR 506)

**Natural Resources**

**NR 201. MANAGING NATURAL RESOURCES FOR THE FUTURE.** (3 Credits)

Overview of the complexities involved in managing natural resources of the Pacific Northwest. Exposure to major natural resource issues of the region. Development of critical thinking skills useful in seeking solutions.

**NR 202. NATURAL RESOURCE PROBLEMS AND SOLUTIONS.** (3 Credits)

Exploration of the multiple components (ecological, social, political, ethical) of selected natural resource problems. Uses case studies to illustrate how social and biophysical characteristics of environmental problems influence the methods used to try to solve these problems and their potential for success.

**Recommended:** NR 201

**NR 312. CRITICAL THINKING FOR NATURAL RESOURCE CHALLENGES.** (3 Credits)

Provides an introduction to critical thinking as it applies to issues and problems in natural resources. Attention is given to formal argument analysis, fallacies of argumentation, and critical scientific and philosophical concepts.

**Recommended:** Sophomore standing

**NR 325. SCIENTIFIC METHODS FOR ANALYZING NATURAL RESOURCE PROBLEMS.** (3 Credits)

Approaches to disciplinary and interdisciplinary problem analysis in natural resources. Introduces systems thinking and the benefits and limitations of different tools used to integrate information from multiple disciplines and stakeholders. Applications of alternative analysis tools are illustrated through selected forest-related case studies. Lec/lab.

**Prerequisites:** MTH 111 with C- or better or Math Placement - ALEKS with a score of 060

**Recommended:** NR 201 and (ST 201 or ST 351)

**NR 351. WHEN SCIENCE ESCAPES THE LAB: SCIENCE AND RESOURCE MANAGEMENT.** (3 Credits)

Role of science in solving natural resource problems. Selecting the "best available science." How science is portrayed, filtered, and used by the media and interests groups to affect policy and management. Analysis of case studies on use of science in natural resource decision making.

**Attributes:** CSST – Core, Synthesis, Science/Technology/Society

**Recommended:** Sophomore standing and NR 312

**NR 380. NATURE IN STORYTELLING OVER THE CENTURIES.** (3 Credits)

Examines the historic tendency across cultures to mythologize elements of the natural world, resulting in celebrated myths, fables, and stories. The course examines nature-based folklore from past centuries, uncovering early perceptions of landscapes, creatures, and plants held by societies and cultures. Focus then shifts to exploration of how elements of the natural world have been portrayed in contemporary film, television, and advertising, revealing how perceptions of nature have evolved over the past century. Connections between contemporary popular culture and old-world myths, fables, and stories will thus be revealed.

**NR 399. SPECIAL TOPICS.** (0-16 Credits)

This course is repeatable for 16 credits.

**NR 401. RESEARCH AND SCHOLARSHIP.** (1-16 Credits)

This course is repeatable for 16 credits.

**NR 403. THESIS.** (1-16 Credits)

This course is repeatable for 16 credits.

**NR 405. READING AND CONFERENCE.** (1-9 Credits)

This course is repeatable for 18 credits.

**NR 406. PROJECTS.** (1-9 Credits)

This course is repeatable for 16 credits.

**NR 407. SEMINAR.** (1-9 Credits)

This course is repeatable for 18 credits.

**NR 410. INTERNSHIP.** (1-6 Credits)

This course is repeatable for 12 credits.

**NR 455. NATURAL RESOURCE DECISION MAKING.** (4 Credits)

Students will participate on collaborative planning teams that effectively engage stakeholders in the decision making process, and offer sound natural resource decisions that are supported by multiple interests.

**Prerequisites:** FES 485 with D- or better and (BI 371 [D-] or BI 373 [D-] or ENSC 479 [D-] or BI 371 [D-] or BI 373 [D-] or ENSC 479 [D-] or ENSC 479 [D-] or ENSC 479 [D-] or ENSC 479 [D-] or FOR 460 [D-] or FW 435 [D-] or FW 439 [D-] or FW 454 [D-] or FW 497 [D-] or GEG 323 [D-] or HORT 318 [D-] or SOIL 395 [D-] or WR 462 [D-])

**NR 477. AGROFORESTRY.** (3 Credits)

Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/ FES 577. (Bacc Core Course)

**Attributes:** CSGI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society

**Equivalent to:** FES 477, FES 577, RNG 477

**Recommended:** Introductory course in biology.

**NR 499. SPECIAL TOPICS.** (1-16 Credits)

This is a hybrid course when offered by Ecampus.

**Equivalent to:** NR 499H

This course is repeatable for 16 credits.
NR 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: NR 499
This course is repeatable for 16 credits.

Sustainable Natural Resources

SNR 506. INDEPENDENT PROJECT IN NATURAL RESOURCE SUSTAINABILITY. (2 Credits)
Students identify, pose, frame, and analyze the various components of an important natural resource sustainability problem within their country, region, or organization and, at the end of term, present a workplan for its resolution. Oral and written reports are expected. Graded P/N.
Prerequisites: SNR 511 with C or better

SNR 511. SUSTAINABLE NATURAL RESOURCE DEVELOPMENT. (1 Credit)
Using readings, class discussions, and field trips, we introduce the program sessions and pedagogical methods, familiarize students with basic working definitions of sustainability, and build capacity to work as group on a common project.

SNR 520. SOCIAL ASPECTS OF SUSTAINABLE NATURAL RESOURCES. (3 Credits)
Using readings, personal experiences, and class discussions, students explore five principles of socially sustainable natural resource management, and review the role they play in creating natural resource-based sustainable communities.
Recommended: SNR 511 and at least two years’ experience working in a natural resources-related field

SNR 521. ECONOMICS OF SUSTAINABLE NATURAL RESOURCE MANAGEMENT. (3 Credits)
Focuses on the sources of market failure, the means of correcting market failure, and the real-world examples of making progress toward sustainable resource use by means of market mechanisms.
Recommended: SNR 511 and at least two years’ experience working in a natural resources-related field

SNR 522. BASIC BELIEFS AND ETHICS IN NATURAL RESOURCES. (3 Credits)
Examines basic philosophies and ethical systems in American forestry, including Pinchot’s agricultural/utilitarian approach and Leopold’s biotic/ecological model, compares them to contemporary public attitudes and considers their implications for sustainability.

SNR 530. ECOLOGICAL PRINCIPLES OF SUSTAINABLE NATURAL RESOURCES. (3 Credits)
Focus an ecological sustainability and ecological concepts and principles, with examples drawn from forests and arid lands. Exploration of global ecosystems, ecological processes and services, factors that create and maintain diversity, ecosystem health and integrity. Principles for sustainable natural resource management and use.
Recommended: SNR 511 and at least two years’ experience working in a natural resources-related field. Basic ecology course highly recommended.

SNR 531. SUSTAINABLE SILVICULTURE AND FOREST CERTIFICATION. (3 Credits)
Strategies for sustainable silviculture, and measuring and verifying environmental performance (including certification systems) are examined using classroom lectures, case studies, and field exercises.
Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years’ experience working in a natural resources-related field

SNR 532. PLANNING AGROFORESTRY PROJECTS. (2 Credits)
Develop basic understanding and appreciation of agroforestry concepts, systems, technologies and practices as used and applied in tropical and temperate zones of the world.
Recommended: SNR 530 (or equivalent ecology course) and SNR 511

SNR 533. NONTIMBER FOREST PRODUCTS: AN INTERDISCIPLINARY INTRODUCTION. (3 Credits)
Interdisciplinary introduction to the culture, history, economy, ecology, policy and management of nontimber forest products (NTFP), e.g., wild foods, medicines, floral greens, craft material and landscaping species. Includes domestic public and private forest and international case studies.

SNR 534. REDUCED IMPACT TIMBER HARVEST. (2 Credits)
Explores planning, implementation, monitoring, and evaluation of reduced impact timber harvesting. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years’ experience working in a natural resources-related field

SNR 535. SUSTAINABLE MANAGEMENT OF AQUATIC AND RIPARIAN RESOURCES. (3 Credits)
Explores integrated strategies for sustainable management of watersheds, estuaries, coastal zones, and aquatic resources. Special emphasis given to links between land uses and aquatic environments. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years’ experience working in a natural resources-related field

SNR 540. GLOBAL ENVIRONMENTAL CHANGE. (3 Credits)
Explore biophysical and social sciences that underlie contemporary global change issues: global biogeochemical cycles, climate system, climate change, threats to biodiversity; human dimensions of climate change, globalization, land cover and land use change, global environmental governance and management tools. 
Recommended: At least two years’ working in a natural resources-related field. Basic biology course highly recommended

SNR 808. WORKSHOP. (1-4 Credits)
Describes the policies, practices, and market mechanisms that enhance ecological, economic, and social sustainability of natural resource production and natural ecosystems. Sustainable natural resource management attempts to meet the needs of the present without compromising the future of people or the ecosystems on which they depend.
This course is repeatable for 4 credits.

Tourism and Outdoor Leadership

TRAL 110. INTRODUCTION TO WHITE WATER KAYAKING. (2 Credits)
Students will learn fundamentals of white water kayaking in sheltered & moving water based on the internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Emphasis is on activity and basic skills.

TRAL 111. INTRODUCTION TO CANOEING. (2 Credits)
Students will learn fundamentals of canoeing in sheltered & moving water based on the internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Emphasis is on activity and basic skills.
TRAL 115. OUTDOOR LIVING SKILLS. (2 Credits)
Edutes and introduces students on how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. Classroom and field (lab) experience. Includes one mandatory weekend overnight outing. CROSSLISTED as PAC 115/TRAL 115.
Corequisites: TRAL 118
Equivalent to: PAC 115
This course is repeatable for 4 credits.
TRAL 118. LABORATORY FOR OUTDOOR LIVING SKILLS. (1 Credit)
Practical field application of concepts learned in TRAL 115/PAC 115, Outdoor Living Skills. Field (lab) experience includes one mandatory weekend overnight. Introduces how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. CROSSLISTED as PAC 118/ TRAL 118.
Corequisites: TRAL 115
Equivalent to: PAC 118
This course is repeatable for 2 credits.
TRAL 130. INTRODUCTION TO OUTDOOR AND ADVENTURE PROFESSIONS. (3 Credits)
Outdoor and adventure professions will be explored. Introduces students to practical and conceptual aspects of land and water trips in outdoor tourism, adventure, and educational settings. Innovative people and products will be examined in the context of outdoor and adventure professions and their impact; past, present, and future.
Equivalent to: TOL 130
TRAL 132. FOUNDATIONS AND HISTORY OF OUTDOOR AND ADVENTURE PROFESSIONS. (3 Credits)
History, evolution, and theoretical underpinning of outdoor and adventure professions as an important and evolving feature of Western culture within the United States and beyond. Influential ideas, paradigm shifts, events, and developments that have led to professionalism, institutionalization, dissemination, and impact on other subject areas and professions. Impact of other cultures on current state of the professions. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: TOL 132
TRAL 173. INTERMEDIATE ROCK CLIMBING. (2 Credits)
Introduces variety of basic skills, gear and systems that will allow them to safely participate in a single pitch rock climbing environment based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Presents students with various technical skills that will serve as a foundation for future land-based outdoor disciplines. Students will be introduced to gear, such as software (ropes, webbing, harnesses) and hardware (carabiners, friction devices); skills, such as knots, belaying, rappelling, lead climbing; and systems such as anchors and basic rescue techniques. CROSSLISTED AS PAC 173/TRAL 173.
Equivalent to: PAC 173
TRAL 215. GROUP FACILITATION. (4 Credits)
Introduces facilitation, leadership, and management of groups. Group facilitation theory, techniques, and models for use in a variety of environments and with different populations. Prominent personality types and how to effectively facilitate these. Determining needs, utilizing appropriate techniques, sequencing, and processing to meet specific determined needs of groups.
TRAL 217. INTERMEDIATE ROCK. (2 Credits)
Begins by affirming rock site management foundational skills such as proper equipment, knots, belay techniques, rappelling, and basic climbing anchor systems. Then focuses on building upon those foundational skills by covering more complex anchor systems, belay techniques, vertical rescues, releasable rappels, and movement through various rock specific terrains.
Recommended: TRAL 172 or similar training and equivalent skill level
TRAL 218. ROCK SITE MANAGEMENT. (2 Credits)
Begins by affirming Intermediate Rock foundational skills such as proper equipment, knots, belay & lead climbing techniques, movement, rappelling, and basic climbing anchor systems based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Class will then focus on building upon those foundational skills by covering more complex anchor systems, belay techniques, vertical rescues, releasable rappels and movement through various rock specific terrains.
Prerequisites: TRAL 173 with C or better or PAC 173 with C or better
TRAL 251. RECREATION RESOURCE MANAGEMENT. (4 Credits)
Overview of recreation resource management including study of land and water resources used for outdoor recreation. The planning and management of natural and cultural resources for long-term resource productivity, with a focus on rural and wildlife areas of the forest, range and coast.
Equivalent to: FES 251
TRAL 260. INTERMEDIATE PADDLESPORT. (2 Credits)
Learn how to successfully paddle as a competent group member within moving water & whitewater environments up to class III. This course will emphasize that the student has a holistic approach to river running, can be an effective group member during river rescues, can contribute to the safety, group skills and leadership of a river descent and showcase the knowledge required of an intermediate whitewater paddler based on internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Uses a variety of diverse whitewater specific kayaks and canoes.
Prerequisites: (TRAL 110 with C or better or PAC 110 with C or better) and (TRAL 111 [C] or PAC 111 [C])
TRAL 270. PRE-INTERNSHIP SEMINAR. (1 Credit)
Exploration of career goals, internship opportunities, and the variety of practice areas in the tourism, recreation, and adventure leadership (TRAL) professions. Student preparation in planning, obtaining, and completing TRAL internships. The course is designed to assist undergraduate majors in TRAL prepare for the required internship. Graded P/N.
Equivalent to: TOL 270
TRAL 280. OUTDOOR LEADERSHIP FUNDAMENTALS. (3 Credits)
A week-long outdoor expedition focusing on water-based and land-based skills while developing a comprehensive understanding of expedition behavior. Students will meet in the classroom to prepare for the week-long field expedition covering various topics such as risk management, expedition planning, navigation, water safety and other topics. The expedition will expose students to extended travel in the backcountry while further developing technical and interpersonal skills.
Prerequisites: (TRAL 110 with C or better or PAC 110 with C or better) and (TRAL 111 [C] or PAC 111 [C]) and TRAL 115 [C] and TRAL 118 [C] and TRAL 173 [C]
TRAL 299. SPECIAL TOPICS. (0-16 Credits)
Topics of current importance in tourism, recreation, and/or adventure leadership education. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

TRAL 309. CERTIFICATION PRACTICUM. (2 Credits)
Allows students the opportunity to acquire nationally or internationally recognized certification in one or more disciplines. Will provide an avenue for students to acquire professional faculty guidance and mentoring so they are more able to attain a certification.
This course is repeatable for 6 credits.

TRAL 351. OUTDOOR RECREATION MANAGEMENT ON PUBLIC LANDS. (3 Credits)
Explores current issues and problems in outdoor recreation management on public lands and approaches to address these. Emphasis on day-to-day, field-based management of recreation resources, rather than broad-scale planning.
Prerequisites: TRAL 251 with C- or better or FES 251 with C- or better
Equivalent to: FES 351

TRAL 352. WILDERNESS MANAGEMENT. (3 Credits)
Wilderness as land use concept. Wilderness history, preservation, planning and management. Wilderness in the context of other land uses.
Equivalent to: FES 352

TRAL 353. NATURE, ECO, AND ADVENTURE TOURISM. (3 Credits)
Introduces students to natural resource-based tourism issues in both domestic and international contexts. Explores distinctions between nature, eco, and adventure tourism and other forms of tourism, positive and negative impacts, and contemporary issues such as accreditation/certification and sustainable design.
Equivalent to: FES 353

TRAL 354. COMMUNITIES, NATURAL AREAS, AND SUSTAINABLE TOURISM. (3 Credits)
Introduces students to macro-level community and regional issues associated with tourism in natural areas. Explores positive and negative community impacts associated with tourism, traditional government-based tourism management and policies; community-based tourism management, and partnerships and stakeholder collaboration. Domestic and international examples are used to illustrate concepts and principles.
Equivalent to: FES 354

TRAL 357. *PARKS AND PROTECTED AREAS MANAGEMENT. (3 Credits)
Provides a broad yet comprehensive understanding of the theories, problems, and techniques of managing parks, wild and scenic rivers, wilderness, and other protected areas. Covers the evolution of policies and recent issues in management of these protected areas, in the United States and around the world. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FES 357

TRAL 370. DESIGN AND MANAGEMENT OF OUTDOOR EXPERIENCES. (4 Credits)
Introduction to pedagogical, administrative, and organizational knowledge, skills, and dispositions for effective design and management of effective short and extended duration outdoor experiences in wilderness-like areas. Covers personnel logistics, site planning, itinerary planning, educational and skills progression, communication with volunteers and program contacts, budgets.
Prerequisites: TRAL 280 with C or better or TOL 375 with C or better
Equivalent to: TOL 370
Recommended: Junior standing

TRAL 372. ETHICS AND ADVENTURE LEADERSHIP. (3 Credits)
Examines ethical issues and situations inherent in adventure leadership and other experiential education settings. Leading adventure programs entails judgment-laden decisions that are made every hour of every day concerning participants, leaders, and programs. Students will become familiar with predominant ethical theories and apply these theories to practical situations with a view to assessing the values that influence their decisions and subsequent actions. Students will better understand how their decisions influence their professional work and those of others within the context of adventure leadership.
Equivalent to: TOL 372
Recommended: TOL 375 or TRAL 375 or other writing intensive course

TRAL 373. WILDERNESS AND ADVENTURE EDUCATION. (4 Credits)
Rationale for and methods used in the application of wilderness and outdoor adventure education programs in education, recreation, corporate and human service settings. Covers historical and contemporary philosophies and practices in adventure education, with a primary emphasis on outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Also explores the role of wilderness in the context of the United States and differing views of what constitutes wilderness from an international perspective.
Equivalent to: TOL 373
Recommended: TRAL 375 or TOL 375

TRAL 374. OUTDOOR ADVENTURE EDUCATION. (3 Credits)
Rationale for and methods used in the application of outdoor adventure education programs in education, recreation, corporate and human service settings. Historical and contemporary philosophies and practices in outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Examines outdoor adventure education in the context of the United States and differing paradigms informing the practice in other cultures internationally. Presents current research in outdoor adventure education.
Prerequisites: TRAL 130 with C or better and TRAL 215 [C]

TRAL 375. *EXPERIENTIAL EDUCATION. (4 Credits)
Theory, techniques, and practice of experiential education. Students will define learning objectives, design curriculum, develop teaching materials, and effectively teach a variety of audiences. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: TOL 375

TRAL 377. EXPEDITIONS I WATER. (5 Credits)
A field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead, and participate in, an extended water based expedition of one week or longer. Technical skill emphasis is on whitewater kayaks and/or rafts and/or canoes with an additional focus on swift water rescue skills.
Prerequisites: TRAL 370 with C or better and TOL 377 [C]
Corequisites: TRAL 379
Equivalent to: TOL 377

TRAL 378. TOURISM AND RECREATION DATA ANALYSIS. (3 Credits)
Introduces students to descriptive and inferential statistics. The focus is on 1) applying relevant statistical analyses to tourism and recreation data and 2) interpreting results.
Equivalent to: TOL 378
Recommended: MTH 111
TRAL 379. EXPEDITIONS II-LAND. (10 Credits)
This is a field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended backcountry expedition of three weeks or longer. Emphasis is on mountaineering skills in a backcountry context.
Prerequisites: TRAL 370 with C or better
Corequisites: TRAL 377
Equivalent to: TOL 379

TRAL 399. SPECIAL TOPICS. (0-16 Credits)
Topics of current importance in tourism, recreation, and/or adventure leadership education. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

TRAL 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: TOL 401
This course is repeatable for 16 credits.

TRAL 406. PROJECTS. (1-16 Credits)
Equivalent to: TOL 406
This course is repeatable for 16 credits.

TRAL 410. INTERNSHIP. (1-16 Credits)
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
Equivalent to: TOL 410
This course is repeatable for 16 credits.
Recommended: FES 251 and FES 351 and FES 356 and FOR 391 and FOR 407

TRAL 432. ECONOMICS OF RECREATION AND TOURISM. (3 Credits)
Applications of economic theory, concepts, and methods to outdoor recreation and nature-based tourism resources, projects and plans. Key topics include analyses of economic impacts, benefits and costs, demand and supply, and non-market valuation (e.g., revealed, stated, and benefit transfer methods).
Equivalent to: FES 432
Recommended: (AEC 350, ECON 201 or 201H) and (ST 202 or 202H)

TRAL 456. PLANNING FOR SUSTAINABLE RECREATION. (4 Credits)
Concepts related to the creation and design of outdoor recreation plans. Techniques for collecting data pertaining to visitor experiences and preferences. Recreation planning at several levels, both for public and private lands, with emphasis on larger scale site planning where recreation is integrated with other resource uses. Lec/lab.
Prerequisites: TRAL 251 with C- or better or FES 251 with C- or better
Equivalent to: FES 456

TRAL 457. PLANNING FOR SUSTAINABLE TOURISM. (4 Credits)
Examines relationships among tourists, tourism developments, and the planning of tourist attractions and services. Focuses on planning tourist resources and programs within a geographic region, as well as at both the destination and site levels. Planning tools and design concepts are reviewed, analyzed, and applied. Lec/lab.
Prerequisites: TRAL 251 with C or better or FES 251 with C or better
Equivalent to: FES 457

TRAL 474. ENTREPRENEURSHIP IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP. (3 Credits)
Creation and management of tourism and outdoor leadership businesses. Covers principles of running a successful business and includes special considerations for operations on public lands (e.g., concessionaires).
Equivalent to: TOL 474
Recommended: BA 101

TRAL 476. RISK MANAGEMENT IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP. (3 Credits)
Risk management in tourism and outdoor leadership from an operational perspective. Focuses on risk in tourism and outdoor education programs as a contributing factor for learning, growth, and satisfaction of client motivations. Covers the nature of accidents in outdoor settings, addresses the practitioner’s perspective of risk in the field, and describes theories and methods of implementing risk management. Covers the ethics of utilizing risk and potentially dangerous activities as a basis for enhancing client education and experience.
Equivalent to: TOL 476

TRAL 477. ADVENTURE THERAPY. (3 Credits)
Provides students with an overview of adventure therapy, including its history, theory, current status and future trends. Includes program design, ethical issues, and best practices in the field.
Equivalent to: TOL 477

TRAL 478. LEGAL ISSUES IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP. (3 Credits)
Covers the legal dimensions of tourism and outdoor leadership activities. Students will learn about the civil and criminal judicial system from a tourism and outdoor leadership perspective. They will learn to apply risk management methodologies and instruments, such as contracts, insurance, waivers and releases to address legal liability. The basic principles of intentional and negligent torts will be discussed, with an emphasis on practical applications. Also covers employment issues and general business law, including business structure and the use of entities as liability shields.
Prerequisites: TRAL 375 with C- or better or TOL 375 with C- or better
Equivalent to: TOL 478

TRAL 479. *NATURE AND THE HUMAN EXPERIENCE. (3 Credits)
Examines the human experience with (and within) nature from biological, psychological, spiritual, and international/cultural perspectives. Identifies opportunities for fostering the human-nature connection to achieve organizational goals and individual and societal health. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: TOL 479
Recommended: TOL 375 or other equivalent WIC course.

TRAL 493. ENVIRONMENTAL INTERPRETATION. (4 Credits)
Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
Equivalent to: FES 493

TRAL 499. SPECIAL TOPICS. (1-16 Credits)
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
Equivalent to: TOL 499
This course is repeatable for 16 credits.

TRAL 593. ENVIRONMENTAL INTERPRETATION. (4 Credits)
Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
Equivalent to: FES 593
Forest Ecosystems and Society Graduate Major (MF, MS, PhD)

Graduate Areas of Concentration

Forest biology; forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; silviculture; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

This graduate program combines a strong social science faculty with a strong biological and ecological science faculty and so provides a rare opportunity to focus on the interface of social science and ecological science. The FES graduate program provides specific disciplinary opportunities in both ecological and social sciences in natural resource settings and also strives to develop interdisciplinary skills and knowledge. Our program objective is to develop interdisciplinary thinkers, highly capable scientists, and natural resource leaders who are prepared to solve complex socio-ecological problems. The students will be able to identify and contribute to collaborative science-based solutions in ecology and natural resources-related social science.

Master of Forestry (MF) in Forest Ecosystems—Areas of Concentration

1. Forest Biology. Management of natural resources is an increasingly complex and technical undertaking. In some cases, breadth or depth of specialization beyond the BS degree is required or is highly desirable in entry-level professional forestry positions or for advancement in non-research professional forestry positions. The MF in Forest Biology program emphasizes graduate course work in one of five areas of emphasis in forest biology, with supporting work in another area. The program can be completed in 12 months, but it may be extended in accordance with personal needs and the policies of the OSU Graduate School.

2. Silviculture. The MF in Silviculture program provides graduate-level preparation in the full range of disciplines essential for analyzing opportunities, solving problems, and making decisions in silviculture and forest resource management. Graduates from this program must demonstrate competence in the preparation of well-documented silvicultural prescriptions and in the supervision of prescription implementation. The program also provides the background for sustained career development in forest resource management.

Master of Science (MS) and Doctor of Philosophy (PhD) in Forest Ecosystems and Society—Areas of concentration

MS and PhD students may focus their work in one of these areas of concentration or a hybrid of them: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

1. Forest, Wildlife and Landscape Ecology. The many dimensions of biodiversity are the focus of this area of concentration. Species and communities of species, act, react and interact at many spatial and temporal scales. These dynamics take place in an environment that can change gradually or quite rapidly and that can have a large impact on dynamics through direct and indirect effects on species and interspecific relationships.

2. Genetics and Physiology. This concentration explores the genetic and physiological mechanisms, from the scale of molecules and tissues to whole organisms, populations, and species, that determine how plants grow, reproduce, respond to the environment, and are managed and modified for human benefit.

3. Integrated Social and Ecological Systems. Many issues in the broad natural resources arena are truly interdisciplinary across the biophysical and the social sciences. This area of concentration focuses on the integration of these sciences in developing basic concepts and in resolving management issues.

4. Science of Conservation, Restoration and Sustainable Management. The bases for these applied sciences are found in the more basic biophysical and social sciences but their application to these complex goals generates new scientific challenges. This area of concentration seeks to develop these new scientific understandings.

5. Social Science, Policy, and Natural Resources. This concentration involves exploration of social aspects, human dimensions, and policy aspects of natural resource issues by examining linkages among humans, society, and the natural resources on which humans and society depend.

6. Soil-Plant-Atmosphere Continuum. The movement of energy and matter within and among ecosystems controls how these systems function and the services they provide. This area of concentration investigates the mechanisms controlling ecosystem behavior over a range of levels from the whole-plant to the globe.

7. Sustainable Recreation and Tourism. This concentration explores social and/or ecological topics in sustainable recreation and tourism including recreation and tourism behavior; social and ecological impacts; and planning, management, and policy.

For more information, contact the head of the department or any faculty member.

Major Code: 1100

All graduate students are required to take FES 520 usually in their first year and FES 525 usually in their second year.

In addition to FES 520 and FES 525, graduate students are required to take FES 526. M.S. students are expected to enroll in this 1-credit course for two terms during their course of study. Ph.D students must enroll for three terms, and M.F. students must enroll for one term.

Students will work with their major professor / advisor and advisory committee to select additional courses specific to their area of interest in order to meet the minimum number of credits required for their degree program.

Major Code: 1100

Forests and Climate Change Graduate Certificate

This certificate is delivered primarily by Ecampus though some courses may also be offered on the Corvallis campus.

Forests worldwide have begun to be impacted by global climate change, and over the coming century, they will be profoundly altered by it. The adaptation of managed forests to climate change may require both silvicultural and genetics-based options. Because forests have
the capacity to both emit and sequester carbon dioxide, a leading greenhouse gas contributing to climate change, there is tremendous interest in managing forests for the mitigation of climate change. These considerations suggest that a good understanding of the relationship between forests and climate change will be a critical requirement for the sustainable management of forest resources. The Forests and Climate Change (FCC) graduate certificate is designed to provide a thorough grounding in methods for assessing the impacts of climate change on forests, the evaluation of proposed adaptation strategies, and the development of management practices to enhance forest carbon sequestration for the mitigation of climate change.

The Forests and Climate Change graduate certificate is appropriate for many students, especially mid-career, company, industry or agency employees who want more training and experience in natural resources management and climate change.

Natural Resources Graduate Major (MNR)

Graduate Areas of Concentration

Fisheries management, forests and climate change, geographic information science (GISScience), sustainable natural resources, urban forestry, water conflict management, and wildlife management

Also available via Ecampus.

The MNR is a 45-credit online degree program with curriculum organized into three sections: core (18 credits), area of emphasis (18 credits), and capstone project (9 credits). It is taught entirely online through OSU Ecampus, although some students work toward the MNR degree while in-residence at OSU.

The MNR degree is offered as a non-thesis program with a capstone project, rather than a thesis. The MNR’s contemporary content is for natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. Integration of multiple disciplines occurs through the curriculum, assignments, and a capstone project. All MNR students integrate concepts and approaches developed throughout the entire program in a final capstone project.

Area of Emphasis

Students may select a certificate listed below or design their own option. A certificate may not be used to satisfy core requirements.

- Geographic Information Science (GIScience)
- Sustainable Natural Resources (SNR)
- Water Conflict Management and Transformation (WCMT)
- Fisheries Management
- Urban Forestry
- Forests and Climate Change
- Wildlife Management

Design own option (no certificate)

Capstone Project

Master of Natural Resources students will choose one option below depending upon their area of emphasis choice. All students should choose option 1 unless they have completed SNR 511 and SNR 506 as part of their certificate program. Students are advised not to take MNR 560 (or SNR 506) and MNR 561 during the same term. MNR 561 credits should be taken after MNR 560, and the credits may be broken up over more than one term.

Select one of the following options:

Natural Resources Minor

Also available at OSU-Cascades and via Ecampus.

Students majoring in other programs at OSU can choose to complete the Natural Resources minor. The minor is intended to provide a broad exposure to the natural resources field. It offers course work that integrates a number of natural resource disciplines.

**Ecology (3-4 credits)**

Select one course from the following:  
3-4  
BI 351  MARINE ECOLOGY  
BI 370  ECOLOGY  
BOT 341  PLANT ECOLOGY  
FES 341  FOREST ECOLOGY

**Mathematics and Statistics (8 credits)**

**Mathematics (4 credits)**

Select one course from the following:  4  
MTH 112  *ELEMENTARY FUNCTIONS  
MTH 241  *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE  
MTH 245  *MATHEMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES  
MTH 251  *DIFFERENTIAL CALCULUS

**Statistics (4 credits)**

Select one course from the following:  4  
ST 201  PRINCIPLES OF STATISTICS  
ST 351  INTRODUCTION TO STATISTICAL METHODS

**Resource Management (23–33 credits)**

**Animal ID (2-4 credits)**

Select one course from the following:  2-4  
FES 412  FOREST ENTOMOLOGY  
FW 312  SYSTEMATICS OF BIRDS  
FW 316  SYSTEMATICS OF FISHES  
FW 318  SYSTEMATICS OF MAMMALS  
Z 365  BIOLOGY OF INSECTS  
Z 477  AQUATIC ENTOMOLOGY

**Environmental Assessment and Planning (3-4 credits)**

Select one course from the following:  3-4  
FES 445/FW 445  ECOLOGICAL RESTORATION  
FW 462  ECOSYSTEM SERVICES  
GEOG 250  *LAND USE PLANNING FOR SUSTAINABLE COMMUNITIES  
GEOG 450  LAND USE IN THE AMERICAN WEST

GEOG 452  SUSTAINABLE SITE PLANNING  
RNG 421  WILDLAND RESTORATION AND ECOLOGY  
RNG 490  RANGELAND MANAGEMENT PLANNING  
SUS 304  *SUSTAINABILITY ASSESSMENT  
SUS 350  *SUSTAINABLE COMMUNITIES  
TRAL 456  PLANNING FOR SUSTAINABLE RECREATION  
TRAL 457  PLANNING FOR SUSTAINABLE TOURISM  
NR 325  SCIENTIFIC METHODS FOR ANALYZING NATURAL RESOURCE PROBLEMS

**Fisheries and Marine Sciences (3-4 credits)**

Select one course from the following:  3-4  
BI 150  INTRODUCTION TO MARINE BIOLOGY  
BI 347  *OCEANS IN PERIL  
BI 351  MARINE ECOLOGY  
FW 302  BIOLOGY AND CONSERVATION OF MARINE MAMMALS  
FW 320  INTRODUCTORY POPULATION DYNAMICS  
FW 323  MANAGEMENT PRINCIPLES OF PACIFIC SALMON IN THE NORTHWEST  
FW 426  COASTAL ECOLOGY AND RESOURCE MANAGEMENT  
FW 454  *FISHERY BIOLOGY  
FW 465  MARINE FISHERIES  
FW 473  FISH ECOLOGY  
FW 481  WILDLIFE ECOLOGY  
OC 201  *OCEANOGRAPHY  
OC 332  COASTAL OCEANOGRAPHY

**Forestry (3-4 credits)**

Select one course from the following:  3-4  
FE 456/FDR 456  *INTERNATIONAL FORESTRY  
FES 240  *FOREST BIOLOGY  
FES 341  FOREST ECOLOGY  
FES 342  FOREST TYPES OF THE NORTHWEST  
FES 350/HORT 350  URBAN FORESTRY  
FES 440  WILDLAND FIRE ECOLOGY  
FES 445/FW 445  ECOLOGICAL RESTORATION  
FES 452/FW 452  BIODIVERSITY CONSERVATION IN MANAGED FORESTS  
FES 477/NT 477  *AGROFORESTRY  
FOR 346  TOPICS IN WILDLAND FIRE  
FOR 441  SILVICULTURE PRINCIPLES

**Land and Water (3-5 credits)**

Select one course from the following:  3-5  
FE 430  WATERSHED PROCESSES  
FE 434  FOREST WATERSHED MANAGEMENT  
FW 326  INTEGRATED WATERSHED MANAGEMENT  
FW 456  FRESHWATER ECOLOGY AND CONSERVATION  
FW 479  WETLANDS AND RIPARIAN ECOLOGY  
GEO 306  *MINERALS, ENERGY, WATER, AND THE ENVIRONMENT  
GEO 307  *NATIONAL PARK GEOLOGY AND PRESERVATION  
GEO 308  *GLOBAL CHANGE AND EARTH SCIENCES  
GEOG 340  *INTRODUCTION TO WATER SCIENCE AND POLICY  
GEOG 440  WATER RESOURCES MANAGEMENT IN THE UNITED STATES  
GEOG 441  INTERNATIONAL WATER RESOURCES MANAGEMENT  
RNG 355  DESERT WATERSHED MANAGEMENT  
RNG 455  RIPARIAN ECOHYDROLOGY AND MANAGEMENT  
SOIL 366  ECOSYSTEMS OF WILDLAND SOILS  
SOIL 388  SOIL SYSTEMS AND PLANT GROWTH  
SOIL 395  *WORLD SOIL RESOURCES  
SOIL 466  SOIL MORPHOLOGY AND CLASSIFICATION

**Range (3-4 credits)**

Select one course from the following:  3-4  
FES 440  WILDLAND FIRE ECOLOGY  
FES 445/FW 445  ECOLOGICAL RESTORATION  
FOR 346  TOPICS IN WILDLAND FIRE  
RNG 341  RANGELAND ECOLOGY AND MANAGEMENT  
RNG 351  RANGE ECOLOGY I-GRASSLANDS  
RNG 352  RANGE ECOLOGY II-SHRUBLANDS  
RNG 421  WILDLAND RESTORATION AND ECOLOGY  
RNG 441  RANGELAND ANALYSIS  
RNG 442  RANGELAND-ANIMAL RELATIONS  
RNG 490  RANGELAND MANAGEMENT PLANNING

**Vegetation ID (3-4 credits)**

Select one course from the following:  3-4  
BOT 321  PLANT SYSTEMATICS  
BOT 414  AGROBOTANY  
BOT 425  FLORA OF THE PACIFIC NORTHWEST  
FES 241  DENDROLOGY  
HORT 226  LANDSCAPE PLANT MATERIALS I: DECIDUOUS HARDWOODS AND CONIFERS  
HORT 228  LANDSCAPE PLANT MATERIALS II: SPRING FLOWERING TREES AND SHRUBS  
RNG 353  WILDLAND PLANT IDENTIFICATION

**Wildlife Management (3-4 credits)**

Select one course from the following:  3-4  
FW 251  PRINCIPLES OF FISH AND WILDLIFE CONSERVATION  
FW 320  INTRODUCTORY POPULATION DYNAMICS  
FW 321  APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY  
FW 435  *WILDLIFE IN AGRICULTURAL ECOSYSTEMS  
FW 451  AVIAN CONSERVATION AND MANAGEMENT  
FW 452/FES 452  BIODIVERSITY CONSERVATION IN MANAGED FORESTS
Select one course from the following: 3-4

- **Social Issues (15–20 credits)**

- **Resource Economics (3-4 credits)**

- **Political Issues (3-4 credits)**

- **Natural Resource Policy (3-4 credits)**

- **Spatial Analysis (3-4 credits)**

Select one course from the following: 3-4

- **Foundational Courses (16 credits)**

- **Total credits for graduation is 180**

**Conservation Law Enforcement Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus (http://ecampus.oregonstate.edu).

Students will be prepared to enter careers in conservation law enforcement with an understanding of the criminal justice system, environmental law and policy, human dimensions and sustainable resource management.

**Option Code: 787**

A minimum of 40 credits is required with at least 20 upper-division credits.
Ecological Restoration Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus.

This option will help students understand complexities associated with restoration of terrestrial and aquatic ecosystems, and how restoration decisions involve significant interactions between ecological and social systems.

Option Code: 787

Minimum of 40 credits is required with at least 20 upper-division credits.

Fish and Wildlife Conservation Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available at OSU-Cascades and via Ecampus.

This option prepares students for a career in the broad arena of natural resource and wildlife conservation. It emphasizes understanding the relationship between animal species and their habitat requirements and the ability to apply this knowledge to the management of ecosystems as a means of conserving fish and wildlife.

Option Code: 663

Minimum of 40 credits is required with at least 20 upper-division credits.

Habitat Management (6-9 credits)

Select two courses from the following:

- FES 445/FW 445 Environmental Restoration
- FW 326 Integrated Watershed Management
- FW 426 Coastal Ecology and Resource Management
- FW 434/OC 434 Estuarine Ecology
- FW 435 *Wildlife in Agricultural Ecosystems
- FW 456 Freshwater Ecology and Conservation
- FW 479 Wetlands and Riparian Ecology
- RNG 341 Rangeland Ecology and Management
- RNG 455 Riparian Hydrology and Management
- SOIL 366 Ecosystems of Wildland Soils
- SOIL 388 Soil Systems and Plant Growth
- SOIL 466 Soil Morphology and Classification

Natural Resource Policy (3 credits)

Select one course from the following:

- FES 485 *Public Lands Policy and Management
- FW 350 *Endangered Species, Society and Sustainability
- FW 415 Fisheries and Wildlife Law and Policy
- FW 439 *Human Dimensions of Fisheries and Wildlife Management
- FOR 462 Natural Resource Policy and Law

Electives (6-8 credits)

Select two courses from the following:

- BI 347 *Oceans in Peril
- ENSC 479 **Environmental Case Studies
- FW 323 Management Principles of Pacific Salmon in the Northwest
- or FW 360 *Origins of F&W Management: Evolution, Genetics, and Ecology
- or FW 470 *Ecology and History: Landscapes of the Columbia Basin
- FW 366 Environmental Contaminants in Fish and Wildlife
- FW 419 The Natural History of Whales and Whaling
- FW 421 Aquatic Biological Invasions
- FW 427 Principles of Wildlife Diseases
- FW 439 *Human Dimensions of Fisheries and Wildlife Management
- FW 451 Avian Conservation and Management
- FW 454 *Fishery Biology
- FW 462 Ecosystem Services
- FW 465 Marine Fisheries
- FW 467 Antartic Science and Conservation
- FW 469 Methods in Physiology and Behavior of Marine Megafauna
- FW 471 Environmental Physiology of Fishes
- FW 474 Early Life History of Fishes
- FW 475 Wildlife Behavior
- FW 476 Fish Physiology
- FW 497 *Aquaculture
- FW 498 Aquaculture Laboratory
- NR 202 Natural Resource Problems and Solutions
- NR 325 Scientific Methods for Analyzing Natural Resource Problems
- Z 349 *Biodiversity: Causes, Consequences, and Conservation
- Z 350 Animal Behavior
- Z 365 Biology of Insects
- Z 477 Aquatic Entomology

Total credits needed for option is a minimum of 40
**Forest Ecosystems Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

This option will assist students in understanding the nature of forest ecosystems and the processes by which they function. Course work includes an understanding of the multiple resources and values associated with forest ecosystems and some of the techniques involved in managing them.

**Option Code: 673**

Minimum of 40 credits with at least 20 upper-division credits required.

Human Dimensions in Natural Resources Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus.

The student will develop an understanding of the interconnectedness of human behavior and well-being and natural resources. It includes skills and knowledge to better understand the cultural, social, political, and philosophical issues associated with natural resources, and prepares students to work with various stakeholders in natural resource management.

**Option Code: 675**

Minimum of 40 credits with at least 20 upper-division credits required.

**Individualized Specialty Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available at OSU-Cascades and via Ecampus.

A specialty option is a required part of the Natural Resources major that allows the students to develop depth and focus in a particular area of natural resource management.

The Individualized Specialty option is a student-designed option that allows a student to tailor their academic program to specific goals or interests. In consultation with their academic advisor, students will develop a program of study that meets their goals, as well as program requirements. Students should contact their assigned academic advisor for information on developing an Individualized Specialty option.

**Option Code: 676**

Minimum of 40 credits with 20 credits of upper-division credits required.

**Integrated Conservation Analysis Option**

This option allows students to learn to recognize, understand, analyze and evaluate complex natural resource problems through a cross-disciplinary approach. They will contribute to finding solutions to these critical issues by developing depth of knowledge in a disciplinary focus and by preparing to work on cross-disciplinary teams. Students will learn to communicate their findings effectively to diverse groups and apply conflict resolution, leadership, and collaboration skills effectively.

**Option Code: 735**

**Disciplinary Focus**

Select a minimum of 28 credits

**Total Hours**

- Baccalaureate Core Course (BCC)
- Writing Intensive Course (WIC)
Disciplinary Focus

- Students will select an area of study for disciplinary depth from Policy, Social Science/Human Dimensions or an Ecological discipline.
- Students will be required to submit an academic plan for completion of the option which will be approved by the Natural Resources Program Director. The academic plan must include a minimum of 20 upper-division courses.

Option Code: 735

Landscape Analysis Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus.

This option prepares students to work with Geographic Information Science technology in a natural resource field such as wildfire ecology, land use planning, forestry, ecological restoration, and more. The pairing of the technical skills of GIScience with a disciplinary knowledge in a natural resource area will prepare students for the practical application of technical skills in the real world.

In addition, this specialty option will allow students to earn the GIScience Undergraduate Certificate through the College of Earth, Ocean, and Atmospheric Sciences concurrently with their BS degree through the College of Forestry. The student will apply to the GIS Certificate Program as well as the Natural Resources Program.

Students should contact Kuipo Walsh (kuipo.walsh@oregonstate.edu), GIScience Certificate Program Director, to enroll in the GIScience Certificate Program.

Option Code: 689

Natural Resource Education Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus (http://ecampus.oregonstate.edu).

This option will prepare students for careers as natural resource educators. Students may choose to focus on teaching in informal settings such as interpretive center, aquariums, museums, and parks or pursue a career in formal education in a K-12 classroom.

Students on the Corvallis campus may wish to explore the Education Double Degree program offered by the College of Education which allows students to earn a BA or BS in Education as well as their BS in Natural Resources. Courses in this option may be double counted with the Education Double Degree where applicable.

Option Code: 679

Minimum of 40 credits with 20 upper-division credits required.
This option is offered within the following major(s):

* Natural Resources - College of Forestry (p. 506)

Also available via Ecampus (http://ecampus.oregonstate.edu).

This option will prepare students for careers in the broad arena of natural resource and environmental conservation, with an emphasis on the social and political aspects of resource issues.

Option Code: 791

Minimum of 40 credits with 20 credits upper division required.

* Baccalaureate Core Course (BCC)
1 Up to 6 credits of appropriate internships, projects, or study abroad may be used to fulfill requirements in this option as approved by petition
2 Students may choose a minimum of 14 credits from either category below. Students may choose to focus on teaching in informal education settings or formal classroom instruction/licensure in K–12 schools. Students should work with their advisor to plan an appropriate plan of study to meet their goals

Option Code: 679

Policy and Management Option

This option is offered within the following major(s):
Urban Forest Landscapes Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus.

This option will help students understand the complexities surrounding the culture and management of urban forest ecosystems. It includes an examination of the economic, social, and environmental benefits and values of trees in urban areas, and the relationship between people and trees.

**Option Code: 685**

Minimum of 40 credits with 20 upper-division credits required.

**Option Code: 687**

Wildland Fire Ecology Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

This option will help students understand the nature of fire in wildland ecosystems. It includes an understanding of the dynamics of fire behavior and post-fire response.

**Option Code: 791**

Urban Forest Landscapes Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 506)

Also available via Ecampus.

This option will help students understand the complexities surrounding the culture and management of urban forest ecosystems. It includes an examination of the economic, social, and environmental benefits and values of trees in urban areas, and the relationship between people and trees.

**Option Code: 685**

Minimum of 40 credits with 20 upper-division credits required.
Sustainable Natural Resources Graduate Certificate

Available only via Ecampus.

The Sustainable Natural Resources graduate certificate is an 18-credit interdisciplinary program offered online through Ecampus. Students have a choice among 12 courses designed to build personal and organizational capacity to examine the many aspects of natural resource problems—environmental, economic, and social—in the search for innovative solutions. The courses are organized into three main sections: integration, human dimensions, and ecology and management of sustainable natural resources. All courses in the certificate program are integrated through a student-designed capstone project that addresses a specific sustainability problem in the student's own organization or region. Throughout the program, students will work with faculty members and other students, and under the guidance of an assigned mentor to design and complete the project.

Traditional university training provides rigor in individual disciplines. However, natural resource problems require synthesis of multiple perspectives and fields of knowledge. In addition, natural resource problems can be international in scope. Globalization clearly reveals how decisions and practices in any part of the world affect natural resources elsewhere and highlights a need for natural resource professionals who can apply multidisciplinary systems-thinking to address these complex issues. The SNR graduate certificate program is designed to meet that need.

By offering this program as an online series of courses, it is possible for people from around the world to participate and to receive their graduate certificate without having to take a leave of absence from their work. The opportunity to collaborate with natural resource managers or graduate students from other regions or countries offers all participants a broader perspective on management issues and potential solutions.

For additional information and advising, contact:

Badege Bishaw
Program Director

Tourism, Recreation, and Adventure Leadership Minor

Available only at OSU-Cascades.

This minor provides basic knowledge about recreation resource planning and tourism management.

Minor Code: 958
Completion of an approved option is required for the Tourism, Recreation, and Adventure Leadership degree. Declaration of the option must be done by the end of the sophomore year, or at least six (6) terms prior to graduation. Courses for an option are in addition to the core curriculum. Some courses may require prerequisites not included in the core curriculum.

- All students pursuing the BS in TRAL must earn grades of C or better in all courses for the major (or approved substitutions)
- All students pursuing the BS in TRAL must complete at least six months of work experience related to the major

**Major Code: 872**

### Adventure Leadership Education Option

This option is offered within the following major(s):

- Tourism, Recreation, and Adventure Leadership - College of Forestry (p. 517)

Available only at OSU-Cascades.

Designed for students pursuing careers as educators, guides and managers/owners in the outdoor and adventure education field.

**Option Code: 875**

Outdoor Recreation Management Option

This option is offered within the following major(s):

- Tourism, Recreation, and Adventure Leadership - College of Forestry (p. 517)

Available only on the Corvallis campus.

Designed for students pursuing careers as outdoor recreation planners and managers in public land management agencies and non-profit organizations at local, state, and federal levels. Students study land management, the process of permitting, and laws relevant to outdoor recreation. They create monitoring and assessment protocols for recreation resources in natural settings, and they learn to respectfully engage with individuals and groups that may have diverse perspectives and priorities regarding recreation opportunities. Students are trained to facilitate understanding and conflict resolution across these individuals and groups.

### Sustainable Tourism Management Option

This option is offered within the following major(s):

- Tourism, Recreation, and Adventure Leadership - College of Forestry (p. 517)

**Available only on the Corvallis campus.**

Designed for students pursuing careers as tourism destination planners, developers, and marketers in government, non-profit, or the private sector, in both domestic and international locations. This option applies business concepts to tourism, and explains best practices for planning, developing, and managing sustainable nature-based tourism. Students learn to create a business plan, apply business law principles, create marketing strategies, create financial statements, explain land management goals and permit processes. They learn to plan, develop and manage sustainable nature-based tourism in a manner that integrates
experiential, economic, biophysical, and social data. They explore the consequences of development of natural resources in domestic and international tourism.

**Option Code: 874**

**Forest Engineering, Resources and Management**

The mission of the Department of Forest Engineering, Resources and Management (FERM) is to develop, communicate, and teach the science, knowledge and engineering necessary for the sustainable management of forest, land, and water resources to achieve economic, environmental, and social objectives. Teaching and research focus on support and enhancement of active forest management across the full range of owner objectives, from ecosystem restoration to timber production. FERM includes biologists, engineers, economists, biometricians, hydrologists, silviculturists and applied ecologists.

The Department of Forest Engineering, Resources and Management offers undergraduate degree programs leading to professional practice in forestry and forest engineering. It also offers more broadly defined graduate programs at the master’s and doctorate levels in Sustainable Forest Management, including six areas of concentration.

**Forestry Undergraduate Program**

The forest management profession requires an understanding of natural resource systems and the management of forest resources for multiple uses. The Bachelor of Science (BS) degree in Forestry provides a broad-based education with the goal of preparing students to be successful forest managers. Graduates must understand biological and physical processes occurring in forests, the social and economic forces that influence policies and actions affecting forests, natural resource systems, and management of forest resources for multiple uses. Students also learn how values affect forest management planning so they can communicate effectively with others and make relevant decisions.

The core curriculum provides a broad-based education which includes basic courses in the biological, physical, social sciences, as well as professional courses designed to prepare students to manage
Forest resources. The Forestry BS also requires six months of relevant work experience intended to provide the enhanced understanding of the professional workplace. Students are required to select one of three options and serves to fulfill the 180 credits for graduation:

- Forest Management
- Forest Operations Management
- Forest Restoration and Fire

Graduates are employed by private and public organizations. The private sector includes the timber and forest products industry, forestry consulting firms, environmental organizations, and self-employment. Public employers include federal, state, and local government agencies such as the U.S. Forest Service, Bureau of Land Management, National Park Service, and state departments of forestry and natural resources.

The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters.

**Forest Engineering Undergraduate Program**

The Forest Engineering Undergraduate Program provides an engineering education within a strong forestry context. The program is founded on fundamental principles of forest science and engineering science. Forest Engineering program objectives are to prepare graduates to plan and implement complex forestry and natural resource operations that help meet global demands for wood products while sustaining water, habitat, and other forest resources. It provides "work-ready" graduates for entry into the diverse professional field of forest engineering. Early career accomplishments include harvest unit design, forest road location and design, contract inspection and administration, cost analysis, and forest transportation management. Mid-career accomplishments commonly expand to involve aspects of engineering management, including planning and budgeting, supervision, wood supply procurement, harvest and road design reviews, and scheduling and controlling forest operations.

Specifically, the Forest Engineering Undergraduate Program provides fundamental coverage of the following:

- Fundamental engineering and forestry principles
- Physical and biological aspects of soil and water resources
- Surveying and measurement of land and forest resources
- Analysis and design of the forest transportation system
- Analysis and design of harvesting operations
- Economics and operational planning principles

Integration of these topics enables forest engineering graduates to develop and manage safe, economical, and environmentally sound forest operations. Design experiences that integrate the topics listed above and steadily build on previous course material are distributed throughout the upper-division portion of the program. The Forest Engineering capstone sequence during the senior year provides an opportunity for students to bring together all the topics from the curriculum in a project framework that includes the field and office engineering tasks associated with the planning and design of forest operations. The capstone sequence is integrated with the Forestry capstone sequence to provide realistic interdisciplinary planning and design experience.

Forest engineering graduates are employed by private forestry firms, public forestry agencies, logging and construction companies, engineering consulting firms, and surveying firms. Some graduates establish their own consulting businesses after a few years of field experience. Career progression following graduation can be quite varied. Some graduates gravitate toward technical positions while others move quickly toward management of harvesting and other forest operations, or more broadly defined management of the forest land base.

The Bachelor of Science degree in Forest Engineering can be earned through completion of the Forest Engineering program or the Forest Engineering-Civil Engineering double degree program. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The BS in Forest Engineering is also accredited by the Society of American Foresters.

Completion of the five-year, double-degree Forest Engineering-Civil Engineering program results in a BS in Forest Engineering and a BS in Civil Engineering, offered by the School of Civil and Construction Engineering. The BS in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Forest engineering is a licensed profession in the state of Oregon. The BS in Forest Engineering meets the administrative rules established by the Oregon State Board of Examiners for Engineering and Land Surveying (OSBEELS) as evidence of adequate preparation for the Fundamentals of Engineering Examination, the first of two examinations required for professional engineering licensing. The BS in Forest Engineering, with the completion of appropriate program electives, also meets the OSBEELS administrative rules for evidence of adequate preparation for the Fundamentals of Land Surveying Examination, the first of two examinations required for professional land surveyor licensing.

**Undergraduate Programs**

**Majors**

- Forest Engineering (p. 535)
- Forest Engineering-Civil Engineering (p. 532)
- Forestry (p. 537)
  - **Options:**
    - Forest Management
    - Forest Operations Management
    - Forest Restoration and Fire

**Minor**

- Forestry (p. 537)

**Graduate Programs**

**Major**

- Sustainable Forest Management (p. 543)

Faculty

Professors Bailey, Chung, Davis, Fitzgerald, Johnson, Landgren, Maguire, Reed, Sessions PE, Shaw, Temesgen

Associate Professors Bennett, Hatten, Leshchinsky PE, Lyons, Punches, Wing

Assistant Professors Belard, Bladon, Gonzalez-Benecke, Kuusela, LeBoldus, Powers, Segura, Souder, Strimbu

Assistant Professor of Practice Cushing, Christiansen, Grand, Leavell, Kline

Senior Instructor II Wimer

Senior Instructor I Kiser

Emeritus D. Adams, P. Adams, Atkinson, Bell, Boyle, Brodie, Brown, Elwood, Fletcher, Garland PE, Hann, Hermann, Hobbs, Kellogg, Montgomery, Murphy, Newton, Olsen, Pyles PE, Skaugset PE, Tappeiner, Tesch, Walstad

Adjunct Faculty

J. Jones, M. Olsen

Courtesay/Affiliate Faculty

Ager, Amishev, Argerich, Barrett, Burnett, Cloughesy, Cole, Dumroese, Ferreiro, Frey, Fried, Han, Harrington, Hessburg, Johnson, Kaetzel, Kerns, Kim, Lake, Latta, Lee, Lesmeister, Lieberg, Light, Marshall, McNassar, Monleon, Moriarty, Pinto, Rathbun, Riegel, Sobotka, Stednick, Strunk, Ver Hoef, Wagenbrenner, White, Zald, Zamora

Certified Water Right Examiner

PE Registered Professional Engineer in one or more states

RPF Registered Professional Forester in one or more states

PLS Registered Professional Land Surveyor in one or more states

Forest Engineering

FE 101. INTRODUCTION TO FOREST ENGINEERING. (2 Credits)
Introduction to the forest engineering discipline. Discussion of critical issues, available resources, career opportunities and professional opportunities. Overview of field instruments and analytical approaches.

FE 102. FOREST ENGINEERING PROBLEM SOLVING AND TECHNOLOGY. (3 Credits)
A technology applications course designed to introduce students to formulating and implementing computational solutions to engineering analysis and design problems in a digital environment. Students will learn to evaluate engineering problems, formulate one or more solution techniques or algorithms, and code the solution using spreadsheet and/or programming software. Professionalism in completing and presenting laboratory exercises is emphasized. Laboratory examples draw from a variety of engineering topics. This course may be substituted for CE 102, Civil Engineering I: Problem Solving and Technology.

Equivalent to: FE 215
Recommended: Calculus

FE 206. ENGINEERING FOREST BIKING TRAILS. (2 Credits)
Students will design trails that mitigate impact on the environment and other trail users, while still providing a fun experience for mountain bike riders. Topics include site classification, trail safety, water management, digital terrain models, and commercial road design software. This course will emphasize field and design work.

FE 208. FOREST SURVEYING. (4 Credits)
Introduction to theory and practice of surveying methods and measurements as applied to the specifics of forestry problems and their solutions. This is the first of a four-course sequence (FE 208, 209, 310, 311). Together with FE 257 it is designed to prepare students for the Fundamentals of Land Surveying exam, which is necessary to become a professional land surveyor.

Prerequisites: MTH 112 with C or better or MTH 241 with C or better or MTH 251 with C or better or MTH 251H with C or better or MTH 252 with C or better or MTH 252H with C or better

Equivalent to: FE 308

FE 209. FOREST PHOTOGRAMMETRY AND REMOTE SENSING. (4 Credits)
Management and conservation of natural resources with the fundamentals of spatial data acquisition from airborne and spaceborne sensors. Introduction to theory of spectral reflectance properties of vegetation, the principles of photographic analysis and aerial photo-interpretation and new advances such as LIDAR.

Prerequisites: MTH 112 with C or better or MTH 241 with C or better or MTH 251 with C or better or MTH 251H with C or better or MTH 252 with C or better or MTH 252H with C or better

Equivalent to: FE 309

FE 257. GIS AND FOREST ENGINEERING APPLICATIONS. (3 Credits)
An introduction to the appropriate use and potential applications of geographic information systems (GIS) and related technologies (GPS and remote sensing) in forest management and operational planning and problem solving. Students are presented with lectures and exercises that cover a wide range of GIS and GIS-related topics and issues including spatial database creation, structure, analysis, and modeling.

Equivalent to: FE 357

FE 257. JUNIOR SEMINAR. (1 Credit)
College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. CROSSLISTED as FOR 307.

Equivalent to: FOR 307

FE 301. FOREST ROUTE SURVEYING. (4 Credits)
Route surveying and site surveying applied to forestry problems. Use of surveying equipment; traversing; computations; leveling; horizontal, vertical, compound, reverse and spiral curves; earthwork; construction staking as applied to new road and existing road P-line survey. Includes rapid survey techniques. Lec/lab.

Prerequisites: (FE 208 with C or better or FE 308 with C or better) or CE 311 or CEM 311 or CEM 263 with C or better

FE 312. FORESTRY FIELD SCHOOL. (2 Credits)
A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. CROSSLISTED as FOR 312.

Equivalent to: FOR 312

FE 305. SOIL ENGINEERING. (4 Credits)

Prerequisites: ENGR 213 (may be taken concurrently) with D- or better
Recommended: CE 311 or CEM 311 or FE 330
FE 316. SOIL MECHANICS. (4 Credits)
Soil strength and soil mechanics theories applied to analysis of slope stability, retaining structures, foundations, and pavements. Lec/lab.
Prerequisites: FE 315 (may be taken concurrently) with C- or better or CE 372 (may be taken concurrently) with D- or better

FE 330. FOREST ENGINEERING FLUID MECHANICS AND HYDRAULICS. (3 Credits)
Fluid properties, pressure, fluid statics, continuity, energy equation, single and series pipe flow, open channel hydraulics, peakflow estimates for culvert design, stream crossing design. Lec/lab.
Prerequisites: ENGR 213 (may be taken concurrently) with D- or better and FE 102 (may be taken concurrently) [C-]
Equivalent to: FE 431

FE 370. HARVESTING OPERATIONS. (4 Credits)
Timber harvesting and transport methods from the forest to the mill. Technical feasibility, economic, and environmental relationships in forestry operations. Junior standing in forestry required. For non-forest engineering students.
Prerequisites: PH 201 with C or better or PH 211 with C or better

FE 371. HARVESTING PROCESS ENGINEERING. (4 Credits)
Timber harvesting equipment and systems. Harvesting process evaluation and decisions aided by forest engineering analysis. Lec/lab.
Prerequisites: ENGR 211 with C or better and FE 102 [C]
Recommended: Concurrent enrollment in FE 208 and FE 357

FE 403. THESIS. (1-16 Credits)
PREREQ: Departmental approval required. This course is repeatable for 16 credits.

FE 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FE 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

FE 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

FE 415. FOREST ROAD ENGINEERING. (3 Credits)
Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating.
Prerequisites: FE 310 with C- or better

FE 416. FOREST ROAD SYSTEM MANAGEMENT. (4 Credits)
Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management.
Prerequisites: (ENGR 211 with D- or better or ENGR 211H with D- or better) and (ENGR 213 [D-] or ENGR 213H [D-]) and FE 316 [C-] and FE 415 [C-]

FE 423. UNMANNED AIRCRAFT SYSTEM REMOTE SENSING. (3 Credits)
Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes.
Prerequisites: FE 309 with C or better or GEOG 480 with C or better or GEOG 481 with C or better or GEO 444 with C or better or GEO 466 with C or better

FE 430. WATERSHED PROCESSES. (4 Credits)
Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab.

FE 434. FOREST WATERSHED MANAGEMENT. (4 Credits)
Physical hydrology, erosion processes, streams, and riparian areas of forested ecosystems. The material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest.
Prerequisites: (CH 121 with C or better or CH 201 with C or better or CH 231 with C or better) and (SOIL 205 [C] or CSS 305 [C] or CSS 205 [C]) and (MTH 241 [C] or MTH 251 [C] or MTH 251H [C])

FE 436. FOREST DISTURBANCE HYDROLOGY. (3 Credits)
Impacts of forest disturbance, including timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams.
Prerequisites: FE 434 with C or better
Equivalent to: FE 435

FE 440. FOREST OPERATIONS ANALYSIS. (4 Credits)
Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab.
Prerequisites: FE 102 with C- or better and (FE 370 [C-] or FE 371 [C-])
Recommended: Basic statistics

FE 444. FOREST REMOTE SENSING AND PHOTOGRAMMETRY. (4 Credits)
Introduction to spectral reflectance, photogrammetry, image analysis, and point clouds. Fundamentals of data acquisition with passive and active sensors installed on airborne and spaceborne platforms. Radar and lidar in forestry. Lec/lab.
Prerequisites: FE 257 with C or better and (MTH 112 [C] or MTH 241 [C] or MTH 251 [C] or MTH 251H [C] or MTH 252 [C] or MTH 252H [C]) and (PH 201 [C] or PH 211 [C])

FE 456. INTERNATIONAL FORESTRY. (3 Credits)
An introduction to the biological, physical, and sociological factors that shape the world’s forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FOR 456. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FOR 456
Recommended: Introductory course in biology.

FE 457. TECHNIQUES FOR FOREST RESOURCE ANALYSIS. (4 Credits)
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FOR 457/FOR 557.
Prerequisites: AREC 351 with C or better or FOR 330 with C or better
Equivalent to: FOR 457

FE 459. FOREST MANAGEMENT PLANNING AND DESIGN I. (4 Credits)
Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab. CROSSLISTED as FOR 459.
Prerequisites: FE 457 with C or better or FOR 457 with C or better
Equivalent to: FOR 459
FE 460. *FOREST OPERATIONS REGULATIONS AND POLICY ISSUES. (3 Credits)
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FE 469. FOREST MANAGEMENT PLANNING AND DESIGN II. (4 Credits)
A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab. CROSSLISTED as FOR 469.
Prerequisites: FE 459 with C or better or FOR 459 with C or better
Equivalent to: FOR 469

FE 470. LOGGING MECHANICS. (4 Credits)
Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance.
Prerequisites: (ENGR 211 with D- or better or ENGR 211H with D- or better) and ENGR 213 [D-] and FE 371 [C-]

FE 471. HARVESTING MANAGEMENT. (3 Credits)
Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. Lec/lab. Recommended: FE 371 and FE 470

FE 472. MECHANIZED HARVESTING AND SIMULATION. (2 Credits)
Study of harvesters, forwarders, and processing of timber for maximizing stand value. The use of a harvesting simulator will provide for a hands-on approach to learning.
Recommended: FOR 321

FE 479. SLOPE AND EMBANKMENT DESIGN. (3 Credits)
A comprehensive overview of evaluating stability and performance for natural and engineering slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/CE 579.
Prerequisites: CE 373 with C or better or FE 316 with C or better
Equivalent to: CE 479

FE 480. FOREST ENGINEERING PRACTICE AND PROFESSIONALISM. (1 Credit)
Personal and professional skills, attributes, and issues in forest engineering practice. Includes topics such as ethics, land stewardship, media relations and risk management.

FE 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 8 credits.

FE 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

FE 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

FE 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FE 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

FE 507. SEMINAR. (1-16 Credits)
Subject matter as required by graduate programs.
This course is repeatable for 16 credits.

FE 515. FOREST ROAD ENGINEERING. (3 Credits)
Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating.
Recommended: Basic surveying

FE 516. FOREST ROAD SYSTEM MANAGEMENT. (4 Credits)
Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management.
Recommended: FE 415 or FE 515

FE 523. UNMANNED AIRCRAFT SYSTEM REMOTE SENSING. (3 Credits)
Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes.
Prerequisites: GEOG 580 with C or better or GEOG 581 with C or better or GEO 544 with C or better or GEO 566 with C or better or OC 678 with C or better

FE 530. WATERSHED PROCESSES. (4 Credits)
Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab.

FE 532. FOREST HYDROLOGY. (4 Credits)
Physical hydrology, erosion processes, and attributes of stream ecosystems for forested watersheds. Material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. Lec/rec.
Recommended: BEE 512 or introductory hydrology course

FE 536. FOREST DISTURBANCE HYDROLOGY. (3 Credits)
Impacts of forest disturbance, including timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams.
Recommended: FE 434

FE 540. FOREST OPERATIONS ANALYSIS. (4 Credits)
Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab.
Recommended: FE 102 and (FE 370 or FE 371) and basic statistics.

FE 544. FOREST REMOTE SENSING AND PHOTOGRAMMETRY. (4 Credits)
Introduction to spectral reflectance, photogrammetry, image analysis, and point clouds. Fundamentals of data acquisition with passive and active sensors installed on airborne and spaceborne platforms. Radar and lidar in forestry. Lec/lab.
Recommended: FE 257 and (MTH 112 or MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H)

FE 545. SEDIMENT TRANSPORT. (4 Credits)
Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as BEE 545.
Equivalent to: BEE 545
Recommended: CE 313 or FE 330
FE 552. FOREST TRANSPORTATION SYSTEMS. (4 Credits)
Analysis of interactions between harvesting and road systems. Advanced topics in road and landing spacing, determination of road standards, analysis of logging road networks, transfer and sort yard facility location. Simultaneous resource scheduling and transportation planning.
Recommended: FE 102 and (FE 440 or FE 540)

FE 555. FOREST SUPPLY CHAIN MGMT. (3 Credits)
Develop and implement operational planning and logistics scheduling systems to manage a forestry supply chain for typical forest organizations in the Pacific Northwest. Once developed, these supply chain plans will be implemented using simulation software that will allow students to view the results of their forest operations plans.
Recommended: (CS 151 or FE 102) and FE 357 and FOR 457

FE 557. TECHNIQUES FOR RESOURCE ANALYSIS. (4 Credits)
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FOR 457/FOR 557.
Equivalent to: FOR 557
Recommended: AREC 351 or FOR 330

FE 560. FOREST OPERATIONS REGULATIONS AND POLICY ISSUES. (3 Credits)
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players.

FE 570. LOGGING MECHANICS. (4 Credits)
Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance.
Recommended: ENGR 211 and ENGR 213 and FE 371

FE 571. HARVESTING MANAGEMENT. (3 Credits)
Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs.
Recommended: FE 371 and FE 470

FE 579. SLOPE AND EMBANKMENT DESIGN. (3 Credits)
A comprehensive overview of evaluating stability and performance for natural and engineering slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/CE 579.
Equivalent to: CE 579
Recommended: CE 373 or FE 316

FE 599. SPECIAL TOPICS. (0-16 Credits)
Advanced topics in isotope hydrology.
This course is repeatable for 16 credits.

FE 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

FE 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

FE 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

FE 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.
FOR 321. FOREST MENURATION. (5 Credits)
Theory and practice of sampling and cruising techniques; stratified and nonstratified sampling systems with fixed plots, variable plots, and 3-P designs.
Prerequisites: (FOR 141 with C or better or FES 141 with C or better or FOR 241 with C or better or FES 241 with C or better or FE 208 [C] and FE 209 [C]) and (MTH 241 [C] or MTH 245 [C] or MTH 251 [C] or MTH 251H [C] and (ST 201 [C] or ST 314 [C] or ST 314H [C] or ST 351 [C] or ST 351H [C])
Equivalent to: F 321

FOR 322. FOREST MODELS. (3 Credits)
Introduction to static and dynamic forest models: defining what they are, how they might be used, and, in general terms, how they are developed.
Prerequisites: FOR 321 with C- or better and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])
Equivalent to: F 322

FOR 330. FOREST RESOURCE ECONOMICS I. (4 Credits)
Basic arithmetic of interest and capital budgeting. Basic wood products markets. Forest resource markets and market failures. Nonmarket valuation and multiple-use forestry. Impacts of forest management and policy decisions on forest resource use. Lec/lab.
Prerequisites: (AEC 250 with C or better or AREC 250 with C or better or ECON 201 with C or better or ECON 201H with C or better) and (MTH 241 [C] or MTH 245 [C] or MTH 251 [C] or MTH 251H [C] or MTH 252 [C] or MTH 252H [C])
Equivalent to: FOR 430

FOR 331. FOREST RESOURCE ECONOMICS II. (4 Credits)
Forest products markets, appraisal, rotation, thinning, uneven-aged management and forest regulation. Economics of timber management and harvest scheduling.
Prerequisites: ST 201 with C or better or ST 351 with C or better
Equivalent to: FOR 431
Recommended: FOR 330

FOR 346. TOPICS IN WILDLAND FIRE. (3 Credits)
An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy. Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion.
Equivalent to: FW 346, RNG 346
Recommended: Coursework in forest biology or ecology (eg. FOR 240 or FES 240 or FES 341)

FOR 399. SPECIAL TOPICS. (0-16 Credits)
Equivalent to: FOR 399H
This course is repeatable for 16 credits.

Corequisites: FOR 399H
This course is repeatable for 16 credits.

FOR 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: F 401
This course is repeatable for 16 credits.

FOR 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

FOR 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: F 405, FRR 405
This course is repeatable for 16 credits.

FOR 406. PROJECTS. (1-16 Credits)
Section 4: Integrated Projects, Graded.
Equivalent to: F 406, FRR 406
This course is repeatable for 16 credits.

FOR 407. SEMINAR. (1-16 Credits)
Equivalent to: F 407, FRR 407
This course is repeatable for 16 credits.

FOR 408. WORKSHOP. (1-3 Credits)
Equivalent to: FRR 408
This course is repeatable for 16 credits.

FOR 410. INTERNSHIP. (1-16 Credits)
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
Equivalent to: FRR 410
This course is repeatable for 16 credits.

FOR 413. FOREST PATHOLOGY. (3 Credits)
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 413.
Prerequisites: BI 204 with C or better or BI 212 with C or better or BI 212H with C or better or BI 213 with C or better or BI 213H with C or better
Equivalent to: BOT 413

FOR 417. ADVANCED FOREST SOILS. (4 Credits)
Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/ lab.
Prerequisites: SOIL 205 with C- or better and ((CH 231 with C- or better or CH 231H with C- or better) and (CH 261 [C-] or CH 261H [C-]) or CH 201 [C-]) and (MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-] or MTH 252 [C-] or MTH 252H [C-])
Equivalent to: FOR 417X

FOR 429. INTEGRATED PRESCRIPTIONS. (3 Credits)
Using an actual stand and real data, we will cultivate systematic approaches for: 1) characterizing site conditions and limiting factors; 2) harmonizing multiple management objectives; 3) modeling long-term responses to silvicultural manipulations; 4) assessing environmental impacts; 5) building public acceptance; and 6) communicating alternatives and rationales for decisions. This expanded course will allow a deeper project experience and more integration among the faculty in the co-requisite course, and providing the lab component of three other inter-related forest management courses.
Prerequisites: (FOR 240 with C- or better or FES 240 with C- or better) and FOR 321 [C-]
Corequisites: FOR 443

FOR 431. ECONOMICS AND POLICY OF FOREST WILDLAND FIRE. (3 Credits)
General overview of the history of fire and the interaction of people with fire on forested landscapes. Forest fire policy history and current issues in the U.S. Basic legal concepts relevant to forest fire policy. An economic framework for understanding spatial externalities, decision-making under uncertainty, institutional economics, and incentives.
Prerequisites: AEC 351 with C or better or AEC 352 with C or better or FOR 330 with C or better or ECON 352 with C or better
FOR 436. WILDLAND FIRE SCIENCE AND MANAGEMENT. (4 Credits)
Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab.
Equivalent to: FW 436, RNG 436

FOR 441. SILVICULTURE PRINCIPLES. (4 Credits)
Nursery operation, vegetation management, herbivores, fire, seeding and planting techniques. Introduction to principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to forest stand treatments. Lec/lab.
Prerequisites: (FES 240 with C or better or FOR 240 with C or better) and (FES 141 [C] or FES 241 [C])

FOR 442. SILVICULTURE REFORESTATION. (4 Credits)
Sylvicultural principles and practices needed to successfully regenerate forestlands in North America. Topics include artificial and natural regeneration, genetic improvement, seed orchards, forest tree nurseries, site preparation, seedling quality and handling, vegetation management, animal damage protection, early stand management, and ecological and ecophysiological considerations. Emphasis is placed on regeneration methods applied to plantations in western Oregon. Field trips required.
Prerequisites: SOIL 205 with C or better and (FES 240 [C] or FES 240H [C] or FOR 240 [C])
Corequisites: FOR 443

FOR 443. SILVICULTURAL PRACTICES. (4 Credits)
Manipulation of forest stand structure and dynamics to meet various resource management objectives. Covers key concepts and practices associated with vegetation control, thinning, fertilization, even-aged and uneven-aged regeneration systems including social and environmental considerations associated with treatments. Two-day field trip required. Lec/lab.
Prerequisites: (FES 240 with C or better or FES 240H with C or better or FOR 240 with C or better) and FOR 321 [C]
Corequisites: FOR 442

FOR 456. INTERNATIONAL FORESTRY. (3 Credits)
An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FE 456. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FE 456
Recommended: Introductory course in biology.

FOR 457. TECHNIQUES FOR FOREST RESOURCE ANALYSIS. (4 Credits)
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FE 557.
Prerequisites: AREC 351 with C or better or FOR 330 with C or better
Equivalent to: FE 457

FOR 459. FOREST MANAGEMENT PLANNING AND DESIGN I. (4 Credits)
Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab. CROSSLISTED as FE 459.
Prerequisites: FE 457 with C or better or FOR 457 with C or better
Equivalent to: FE 459

FOR 460. WILDLAND FIRE SCIENCE AND MANAGEMENT II. (4 Credits)
Policy formulation and analysis for forest resources. Consideration of policy affecting land management approaches to planning, management, and social and economic development. Major forestry policy areas covered include outdoor recreation, range, timber, wilderness, and wildlife and fish. Lec/lab. (Writing Intensive Course)
Attributes: CSGI – Core, Synth, Global Issues

FOR 462. NATURAL RESOURCE POLICY AND LAW. (3 Credits)
First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory.

FOR 469. FOREST MANAGEMENT PLANNING AND DESIGN II. (4 Credits)
A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab. CROSSLISTED as FE 469.
Prerequisites: FE 459 with C or better or FOR 459 with C or better
Equivalent to: FE 469

FOR 499. SPECIAL TOPICS. (0-16 Credits)
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
This course is repeatable for 16 credits.

FOR 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: F 501
This course is repeatable for 16 credits.

FOR 503. THESIS. (1-16 Credits)
Equivalent to: F 503
This course is repeatable for 999 credits.

FOR 505. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: F 505, FRR 505
This course is repeatable for 16 credits.

FOR 506. PROJECTS. (1-16 Credits)
Equivalent to: F 506
This course is repeatable for 16 credits.

FOR 507. SEMINAR. (1-16 Credits)
Equivalent to: F 507, FRR 507
This course is repeatable for 16 credits.

FOR 508. WORKSHOP. (1-3 Credits)
This course is repeatable for 16 credits.

FOR 510. INTERNSHIP. (1-9 Credits)
This course is repeatable for 16 credits.

FOR 513. FOREST PATHOLOGY. (3 Credits)
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 513.
Equivalent to: BOT 513
Recommended: BI 204 or BI 212 or BI 212H or BI 213 or BI 213H
FOR 517. ADVANCED FOREST SOILS. (4 Credits)
Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/lab.
Recommended: SOIL 205 and (((CH 231 or CH 231H) and (CH 261 or CH 261H)) or CH 201) and (MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H) all with a minimum grade of C-

FOR 518. MANAGING FOREST NUTRITION. (3 Credits)
Synthesize current information on nutrient limitations of forest productivity, long-term forest productivity, and mitigating and managing forest nutrition with emphasis on forests of the Pacific Northwest.

FOR 520. GEOSPATIAL DATA ANALYSIS WITH MATLAB. (3 Credits)
An introduction into analysis of spatial and other data using Matlab. The course will provide a practical introduction and is designed as a hands-on learning experience.
Equivalent to: F 520

FOR 524. FOREST BIOMETRICS. (3 Credits)
Advanced topics in forest biometrics, including measurement of forest structure and dynamics, application of sampling theory and methods, and statistical techniques for interpreting forestry data.
Equivalent to: F 524
Recommended: FOR 322 and ST 511

FOR 525. FOREST MODELING. (3 Credits)
Examination of regression techniques and assumptions used to develop static and dynamic equations of tree and stand attributes.
Prerequisites: ST 552 with C or better
Equivalent to: F 525

FOR 528. PROFESSIONAL COMMUNICATION AND ETHICS. (2 Credits)
Conventions of written and oral communication in forestry and related disciplines including basic narrative development. Exploration of environmental, professional, and research ethics, and the role they play in effective communication with multiple stakeholders.

FOR 531. ECONOMICS AND POLICY OF FOREST WILDLAND FIRE. (3 Credits)
General overview of the history of fire and the interaction of people with fire on forested landscapes. Forest fire policy history and current issues in the U.S. Basic legal concepts relevant to forest fire policy. An economic framework for understanding spatial externalities, decision-making under uncertainty, institutional economics, and incentives.
Recommended: FOR 330 or AEC 351 or AEC 352 or ECON 352

FOR 534. ECONOMICS OF THE FOREST RESOURCE. (3 Credits)
Topics include optimal stand and forest management for timber production, economics of ecosystem services (e.g. recreation, biodiversity, carbon sequestration, water quality and regulation), non-market valuation methods, management under risk and uncertainty, discounting, intergenerational equity, sustainability, international trade and other global issues.
Recommended: FOR 330 and FOR 331

FOR 536. WILDLAND FIRE SCIENCE AND MANAGEMENT. (4 Credits)
Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab.
Equivalent to: FW 536, RNG 536

FOR 542. INTERNATIONAL INTENSIVE SILVICULTURE. (2 Credits)
Operational and ecological aspects of intensive silvicultural management of planted forests around the world. Guest speakers in different countries will describe the type of silvicultural management that is carried out in the speaker's country from species and genetic selection, to harvest and rotation length, including site preparation and planting techniques. Emphasis on comparing silvicultural practices in each country to the management of plantations in western Oregon.

FOR 543. SILVICULTURAL PRACTICES. (5 Credits)
Manipulation of immature and mature forest stands for various resource management objectives. Principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to stand treatments. Two-day field trips required.
Recommended: (FOR 240 or FES 240) and FOR 321 and concurrent enrollment in FOR 429

FOR 549. SILVICULTURAL INFLUENCES ON FOREST ECOSYSTEM DYNAMICS. (3 Credits)
Fundamental biological and ecological principles for the design and implementation of silvicultural regimes that achieve a wide diversity of forest ecosystem management objectives.
Recommended: Undergraduate course in silviculture and in forest mensuration.

FOR 550. SUSTAINABLE FOREST MANAGEMENT. (3 Credits)
Sustainable forestry as part of the global sustainability movement. History of sustainability and its influence on decision-making in forest management. Current dimensions of sustainability: forest certification, climate change, role of environmental ethics, biodiversity conservation, maintenance of long-term site productivity, conservation of soil and water resources, roles of social institutions, and links to concerns for social justice.

FOR 557. TECHNIQUES FOR FOREST RESOURCE ANALYSIS. (4 Credits)
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSTLISTED as FE 457/FE 557.
Equivalent to: FE 557
Recommended: AREC 351 or FOR 330

FOR 561. FOREST POLICY ANALYSIS. (3 Credits)
Basic elements of forest policy problems, including resource allocation and efficiency, distribution, and interpersonal equity, taxation, regulation, and control, and planning and uncertainty. Emphasis on policy and analysis and its uses in policy decision.

FOR 562. NATURAL RESOURCE POLICY AND LAW. (3 Credits)
First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory.
FOR 563. ENVIRONMENTAL POLICY AND LAW INTERACTIONS. (3 Credits)
Second of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on the arena of regulatory environmental laws. Environmental torts, regulation of point and non-point source pollution under the federal Clean Water Act, wetlands protection, and laws governing agricultural and forest practices will be examined as examples of regulatory frameworks for achieving resource protection. Students will be exposed to the basic framework of federal laws regulating air and hazardous waste pollutants.

FOR 599. SPECIAL TOPICS. (1-16 Credits)
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for 16 credits.

FOR 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits) Equivalent to: F 601
This course is repeatable for 16 credits.

FOR 603. THESIS. (1-16 Credits) Equivalent to: F 603
This course is repeatable for 999 credits.

FOR 605. READING AND CONFERENCE. (1-16 Credits) Equivalent to: F 605
This course is repeatable for 16 credits.

FOR 606. PROJECTS. (1-16 Credits) Equivalent to: F 606
This course is repeatable for 16 credits.

FOR 607. SEMINAR. (1-16 Credits) Equivalent to: F 607
This course is repeatable for 16 credits.

FOR 699. SPECIAL TOPICS. (1-16 Credits) Equivalent to: F 699
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. This course is repeatable for 16 credits.

FOR 808. WORKSHOP. (1-9 Credits) Equivalent to: F 808
This course is repeatable for 16 credits.

Forest Engineering - Civil Engineering Undergraduate Major (BS, HBS)
The Forest Engineering-Civil Engineering program results in a BS degree in Forest Engineering and a BS degree in Civil Engineering. The BS degree in Forest Engineering and the BS degree in Civil Engineering are both accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The BS in Forest Engineering is also accredited by the Society of American Foresters. This unique five-year, double degree program is offered in cooperation with the School of Civil and Construction Engineering. This program begins with basic science and mathematics and progresses on through engineering science and forest science to arrive at professional-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year.

Pre-Professional Program
Admission to the pre-professional program requires that a student is admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

Professional Program
Students must be admitted to the professional forest engineering program following completion of the pre-professional forest engineering course work in order to progress to the junior year in forest engineering. Students in the double degree program must also be admitted to the College of Engineering professional program prior to beginning the civil engineering junior year. Students should consult the College of Engineering for requirements of the College of Engineering professional program.

Enrollment in professional forest engineering program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-fs engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional forest engineering program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made at the end of winter term for the following fall term. For admission, students must earn:

1. a grade of "C" or better in all pre-professional courses required for entry into the professional program (marked with an E). Grade repeat (replacement) policy will follow OSU Academic Regulation #20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms for the forest engineering professional program and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of "C"
or better in remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program in the fall term of each academic year.

The professional forest engineering program begins with Forestry Field School prior to fall term of the professional program.

Major Code: 381

Pre-Forest Engineering-Civil Engineering Major Code: 361

Grade standards for the pre-professional program as listed in the program description apply.

All students pursuing the BS in Forest Engineering-Civil Engineering:

1. must earn grades of "C" or better in all required professional courses, or approved substitutions for majors and options, and
2. must maintain a 2.0 GPA in all major course work, and courses used for substitution of required courses.

College of Engineering specific requirements:

1. Must earn grades of "C" or better in all required civil engineering major courses in the pre-professional and professional core.
2. Must maintain a cumulative 2.25 GPA in all civil engineering major course work and an overall OSU GPA of 2.25.

Forest Engineering Undergraduate Major (BS, HBS)

The BS degree in Forest Engineering is offered through a four-year resident curriculum and as part of a five-year double degree program from which graduates receive two bachelor of science degrees, one in forest engineering and one in civil engineering. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org). The BS degree in Forest Engineering is also accredited by the Society of American Foresters. The double degree program is offered in cooperation with the School of Civil and Construction Engineering. Curricula for the double degree program is listed under a separate heading. Both programs begin with basic science and mathematics, progress on through engineering science and forest science, to arrive at professional-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Pre-Professional Forest Engineering Program

Admission to the pre-professional program requires that students be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

Professional Forest Engineering Program

Students must be admitted to the professional Forest Engineering program following completion of the pre-professional forest engineering course work in order to progress to the junior year in forest engineering. Students in the double degree program also must be admitted to the College of Engineering professional program following completion of the pre-engineering course work.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-forest engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term. For admission, students must earn:

1. a grade of "C" or better is required in all courses for the major (marked E on course list). Grade repeat (replacement) policy will follow OSU Academic Regulation 20 (https://catalog.oregonstate.edu/regulations).
2. a minimum GPA of 2.25 in all courses required for the major.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms for the Forest Engineering professional program and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of "C" or better in remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forest engineering program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program in the fall term each academic year.

The professional program begins with Forestry Field School prior to fall term of the professional program.

Major Code: 380

Pre-Forest Engineering Major Code: 825

Grade standards for the professional program as listed in the program description apply.

All students pursuing the BS in Forest Engineering:
1. must earn grades of "C" or better in all courses required for the major;
2. must maintain a 2.0 GPA in all courses required for the major;
3. total credits required for graduation is 192.

须满足以下要求以选修本专业课程。

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Forestry Undergraduate Major (BS, HBS)

The successful forester must understand the biological and physical processes of forest ecosystems, as well as the social, economic, and operational forces that influence forest policies and management actions. The forestry core curriculum includes basic courses in the biological, physical, social sciences, and six months of work experience as well as professional courses designed to prepare students to manage forest resources.

Students are **required** to select one of the following required options:

- Forest Restoration and Fire
- Forest Management
- Forest Operations Management

The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters (SAF).

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Six months of forestry or related natural resource work experience and completion of an option is required in the forestry degree program. The option courses complement the forestry core and serve to fulfill the 180 credits for graduation.

Pre-Professional Forestry Program

Admission to the pre-professional program requires that a student be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at
the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

**Professional Forestry Program**
Successful completion of the pre-professional program will result in acceptance into the professional program. This requires selection of an option and:

1. a grade of "C" or better in all pre-professional courses required for entry into the professional program (marked with an E on the course list). Grade repeat (replacement) policy will follow OSU Academic Regulation 20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is determined based on available resources.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking student, and to the College of Forestry for admission to the professional program. Application forms and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain "C" or better grades in any remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.

All courses required for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program for fall term each academic year.

The professional program begins with Forestry Field School during the two weeks prior to the first fall term of the professional program.

**Major Code: 820**

**Pre-Forestry Major Code: 810**

**Pre-Forestry**
Grade standards for the pre-professional program as listed in the program description apply.

Option Courses and/or Bacc Core Courses 16-20

#### Hours

54-57

#### Total Hours

88-94

**Professional Forestry**

All students pursuing the BS in Forestry;

1. must earn grades of "C" or better in all required professional forestry courses (with FE, FES, FOR course designators), or crosslisted course designators, or approved substitutions for majors and options, and;

2. must maintain a 2.0 GPA in all major course work, defined as courses listed by prefix (e.g., FOR, BA, BOT) and number, or used for substitution of required courses, and as part of option lists.

3. total credits required for graduation is 180.
Fourth Year
FE 444/FOR 456  FOREST REMOTE SENSING AND PHOTOGRAMMETRY  4
FE 456/FOR 456  *INTERNATIONAL FORESTRY (or other CGI Bacc Core course)  3
FE 457/FOR 457  TECHNIQUES FOR FOREST RESOURCE ANALYSIS  4
FE 459/FOR 459  FOREST MANAGEMENT PLANNING AND DESIGN I  4
FOR 460 or FE 460  *FOREST POLICY or *FOREST OPERATIONS REGULATIONS AND POLICY ISSUES  3-4
FE 469/FOR 469  FOREST MANAGEMENT PLANNING AND DESIGN II  4
Option Courses and/or Bacc Core Courses  19-25
Hours  41-48
Total Hours  84-95

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)
1 Must be selected to satisfy baccalaureate core requirements
2 Required for entry into the professional program

Major Code: 820

Pre-Forestry Major Code: 810

Forest Management Option

This option is offered within the following major(s):
• Forestry - College of Forestry (p. 537)

Option Code: 822

Pre-Professional Forestry

Grade standards for the pre-professional program as listed in the program description (p. 535) apply.

Course  Title  Hours
Pre-Professional Forestry
TRAL 251  RECREATION RESOURCE MANAGEMENT  4
Bacc Core Courses  9

Hours  13

Third Year
Professional Forestry

Grade standards for the professional program as listed above apply.

Course  Title  Hours
FES 341  FOREST ECOLOGY  3
FES 355  MANAGEMENT FOR MULTIPLE RESOURCE VALUES

or FES 477  or *AGROFORESTRY
or NR 477  or *AGROFORESTRY
or FES 485  or *CONSSENSUS AND NATURAL RESOURCES
or GEOG 300  or *SUSTAINABILITY FOR THE COMMON GOOD
FES 452 or FW 452  BIODIVERSITY CONSERVATION IN MANAGED FORESTS

or BIODIVERSITY CONSERVATION IN MANAGED FORESTS
FOR 322  FOREST MODELS  3
Bacc Core Course  3

Hours  15

Fourth Year

Course  Title  Hours
FES 412  FOREST ENTOMOLOGY  3
FOR 413  FOREST PATHOLOGY  3

or BOT 413  or FOREST PATHOLOGY
Bacc Core Courses  3

Select a minimum of 15 credits of the following:  15
CROP 440  WEED MANAGEMENT
FE 310  FOREST ROUTE SURVEYING

Option Code: 822

Course  Title  Hours
First Year
Fall
FOR 111 or NR 201  INTRODUCTION TO FORESTRY

or MANAGING NATURAL RESOURCES FOR THE FUTURE  3
Bacc Core Course  3

### Restricted Electives for the Forest Management Option

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)

Select a minimum of 15 credits of the following:

- CROP 440  WEED MANAGEMENT
- FE 310  FOREST ROUTE SURVEYING
- FE 423  UNMANNED AIRCRAFT SYSTEM REMOTE SENSING
- FE 436  FOREST DISTURBANCE HYDROLOGY
- FE 456/FOR 456 *INTERNATIONAL FORESTRY
- FE 472  MECHANIZED HARVESTING AND SIMULATION
- FES 342  FOREST TYPES OF THE NORTHWEST
- FES 350/HORT 350 URBAN FORESTRY
- FES 433  PLANNING AGROFORESTRY PROJECTS
- FES 440  WILDLAND FIRE ECOLOGY
- FES 445/FW 445 ECOLOGICAL RESTORATION
- FES 454  MANAGING AT THE WILDLAND-URBAN INTERFACE
- FES 477/NR 477 *AGROFORESTRY
- FES 485  *CONSENSUS AND NATURAL RESOURCES
- FOR 346  TOPICS IN WILDLAND FIRE
- FOR 407  SEMINAR
- FOR 417  ADVANCED FOREST SOILS
- FOR 431  ECONOMICS AND POLICY OF FOREST WILDLAND FIRE
- FOR 436  WILDLAND FIRE SCIENCE AND MANAGEMENT
- FOR 442  SILVICULTURE REFORESTATION
- FOR 452  NATURAL RESOURCE POLICY AND LAW
- FOR 499  SPECIAL TOPICS (Must be pre-approved by academic advisor)
- GEOG 201  *FOUNDATIONS OF GEOSPATIAL SCIENCE AND GIS
- GEOG 370  GEODISPLAY: CARTOGRAPHY
- GEOG 480  REMOTE SENSING I: PRINCIPLES AND APPLICATIONS
- TRAL 351  OUTDOOR RECREATION MANAGEMENT ON PUBLIC LANDS
- TRAL 352  WILDERNESS MANAGEMENT
- TRAL 357  *PARKS AND PROTECTED AREAS MANAGEMENT
- WSE 453  *FOREST PRODUCTS BUSINESS
- WSE 470  *FOREST, WOOD, AND CIVILIZATION
- Study Abroad (Must be pre-approved by academic advisor)

Total Hours: 15
Forest Operations Management Option

This option is offered within the following major(s):

- Forestry - College of Forestry (p. 537)

The Forest Operations Management option requires the completion of 7 business courses that can be taken as a minor if the student gains entrance to the College of Business Entrepreneurship minor.

Option Code: 823

Pre-Professional Forestry

Grade standards for the pre-professional program as listed in the program description (p. 535) apply.

Forest Restoration and Fire Option

This option is offered within the following major(s):

- Forestry - College of Forestry (p. 537)

Disturbance processes, such as wildland fire, insect or disease outbreak, landslide, and windthrow, are important considerations in any actively managed forest, regardless of the specific management objective. The Forest Restoration and Fire option prepares students to understand, manage, mitigate and/or use forest disturbance processes, especially wildland fire, as part of a forest management plan.

Baccalaureate Core Course (BCC)

Writing Intensive Course (WIC)
Forest soil and watershed processes; silviculture, fire, and forest health operations planning and management; forest policy analysis and economics; Engineering for sustainable forestry; forest biometrics and geomatics; forest Graduate Areas of Concentration

Graduate Major (MF, MS, PhD)

Sustainable Forest Management

Graduate Areas of Concentration

Engineering for sustainable forestry; forest biometrics and geomatics; forest operations planning and management; forest policy analysis and economics; forest soil and watershed processes; silviculture, fire, and forest health

### Areas of Concentration

#### Engineering for Sustainable Forestry—
Designing forest operations to achieve sustainable forest management objectives; ecological restoration operations; road design and construction. Supporting course work often draws from slope and embankment, industrial systems optimization, watershed impacts of forest disturbance, GIScience II: analysis and applications, forest transportation systems, forest hydrology, forest geometrics, forest road engineering, forest road system management, water quality and forest land use, forest operations analysis, advanced logging mechanics, harvesting management, advanced silviculture, heuristics for combinatorial optimization, economics of the forest resource, and human factors engineering. **Contacts:** Belart, Chung, Leshchinsky, Lyons, Olsen, Segura, Sessions, Wing

#### Forest Biometrics and Geomatics—
Modeling tree and stand development; forest data sampling and monitoring methods; forest measurements and assessments; mapping and data management technologies. Supporting course work often draws from forest biometrics, forest geometrics, geospatial data and analysis, digital terrain modeling, GIScience II: analysis and applications, geodesy, spatio-temporal variation in ecology and earth sciences, remote sensing, advanced landscape and seascape ecology, generalized regression modeling, scientific visualization, forest models, statistical methods, forest policy analysis, advanced silviculture, quantitative ecology, GIS in water resources, ecological sampling, theory of statistics, applied multivariate design, advanced experimental design, remote sensing I, time series **Contacts:** Hailemariam, Kiser, Maguire, Strimbu, Wing

#### Forest Operations Planning and Management—
Planning, organizing, and executing forest plans; enhancing supply chain efficiency and improving international competitiveness. Supporting course work often draws from tactical and operational planning, geospatial data and analysis, forest policy analysis, industrial systems optimization, advanced silviculture, harvesting management, organization leadership and management, marketing and innovation in renewable materials forestry supply chain management, forest geometrics, forest transportation systems, forest operations regulations and policy issues, heuristics for combinatorial optimization, forest wildlife habitat management, industrial systems optimization, statistical methods, forest biometrics, unmanned aircraft system remote sensing, forest transportation systems, techniques for forest resource analysis, forest operations analysis, operations

---

### Professional Master of Forestry Programs

*Forest business for private landowners; spatial science and analysis; silviculture, fire, and forest health*

The Sustainable Forest Management (SFM) graduate program emphasizes the conservation of forest-dominated landscapes to meet a defined set of ecological, economic and social criteria over long time frames. The program follows the sustainable principles outlined by the Montreal Process Criteria and Indicators. These principles have been adopted by the state of Oregon.

The program provides a strong grounding in the principles and techniques of active management of forests to improve forest health and condition while producing a full range of products and ecosystems services. It consists of a common core in the principles and criteria of sustainable forest management; statistics for design and interpretation of experiments; and specialization in one of six areas of concentration. The MF degree requires a project, MS a thesis, and PhD a dissertation.

---

### Third Year

- **Fall**
  - FE 312 or FOR 312: FORESTRY FIELD SCHOOL
  - FE 370: HARVESTING OPERATIONS
  - FE 434: FOREST WATERSHED MANAGEMENT
  - FES 341: FOREST ECOLOGY
  - FOR 321: FOREST MENSURATION

### Winter

- FES 485: *CONSSENSUS AND NATURAL RESOURCES
- FOR 322: FOREST MODELS
- FOR 331: FOREST RESOURCE ECONOMICS II
- Bacc Core course

### Spring

- FES 445/FW 445: ECOLOGICAL RESTORATION
- FOR 330: FOREST RESOURCE ECONOMICS I
- FOR 346: TOPICS IN WILDLAND FIRE
- FOR 442: SILVICULTURE REFORESTATION
- FOR 443: SILVICULTURAL PRACTICES

### Fourth Year

- **Fall**
  - FE 444: FOREST REMOTE SENSING AND PHOTограмmetry
  - FE 457/FOR 457: TECHNIQUES FOR FOREST RESOURCE ANALYSIS
  - FOR 413/BOT 413: FOREST PATHOLOGY
  - FOR 436: WILDLAND FIRE SCIENCE AND MANAGEMENT

- **Winter**
  - FE 456/FOR 456: *INTERNATIONAL FORESTERY (or other CGI Bacc Core course)
  - FE 459/FOR 459: FOREST MANAGEMENT PLANNING AND DESIGN I
  - FOR 440: WILDLAND FIRE ECOLOGY
  - FOR 460: *FOREST POLICY or *FOREST OPERATIONS REGULATIONS AND POLICY ISSUES

- **Spring**
  - FE 436: FOREST DISTURBANCE HYDROLOGY
  - FE 469/FOR 469: FOREST MANAGEMENT PLANNING AND DESIGN II
  - FES 412: FOREST ENTOMOLOGY
  - FOR 431: ECONOMICS AND POLICY OF WILDLAND FIRE
  - Elective

**Total Hours:** 178-182
regulations and policy issues, mathematical statistics **Contacts:** Belart, Chung, Lyons, Sessions, Strimbu

**Forest Policy Analysis and Economics**—Analyzing tradeoffs in the forest and resource policy decision process; public land use policy; interpretations of regulations; markets for forest products; forest certification; theoretical and applied research related to ecosystem services. Supporting course work often draws from natural resource policy and law, microeconomic theory, environmental policy and law interactions, forest policy analysis, economics of the forest resource, applied and advanced econometrics, heuristics for combinatorial optimization, global context of the forest sector, techniques for forest resource analysis, economics and policy of forest wildland fire, silvicultural influences on forest ecosystem dynamics, wildland fire science management, time series; and work in other fields to support thesis or dissertation research. This area of concentration is jointly sponsored by FERM, the Applied Economics Graduate Program and the Applied Economics Department. **Contacts:** Cushing, Huntington, Kuusela, Souder

**Forest Soil and Watershed Processes**—Understanding watershed conditions and processes in forested ecosystems and the effects of management activities; evaluating and improving soil and water quality and related practices and policies for forest operations. Supporting course work often draws from forest hydrology, soil physics, environmental soil chemistry, geomorphology and landscape ecology, geospatial data analyses, principles of fluid mechanics, stream ecology, nutrient cycling, snow hydrology, river engineering, natural resources and forest ecosystems analysis, mineral organic matter interactions, open channel flow, managing forest nutrition, GIS in water resources, ecological restoration stream ecology, mineral-organic matter interactions, limnology, design and analysis of planned experiments, statistical methods, sediment transport, principles of stable isotopes, advanced forest soils, watershed processes, forest hydrology, principles of stable isotopes, environmental soil chemistry, properties and functions of soils, regional hydrologic modeling, mineral organic matter interactions, soil morphology and classification. **Contacts:** Bladon, Hatten, Segura, Souder

**Silviculture, Fire, and Forest Health**—Manipulating vegetation to achieve management objectives, from restoration to intensive timber production; fire ecology and fire management, forest ecosystem health. Supporting course work often draws from advanced silviculture, geospatial data analysis, forest pathology, forest entomology, environmental policy and law interactions, natural resource policy and law, plant pathology, community structure and analysis, wildland fire science and management, ecological restoration, forest policy analysis, statistical methods, sampling methods, forest hydrology, water quality and forest land use, natural resource data analysis, advanced forest community ecology, wildland fire ecology, biology of invasive plants, forest wildlife habitat management, global change ecology, weed management, advanced landscape and seascape ecology, quantitative ecology, and ecological sampling. **Contacts:** Bailey, Davis, Fitzgerald, Gonzalez-Benecke, Kiser, LeBoldus, Maguire, Powers, Shaw

**Professional Pathway Foci**

**Forest Business for Private Landowners**—Applying business techniques to assist management decisions for private forest landowners. **Contact:** Cushing

**Spatial Science and Analysis**—Application of spatial science and tools for managing natural resources. **Contact:** Wing

**Silviculture, Fire, and Forest Health**—Managing forest vegetation dynamics and ecosystem processes to achieve a range of management objectives. **Contact:** Powers

**Major Code:** 1090

**Major Code:** 1090

**Wood Science and Engineering**

Use of renewable materials is increasing as the world becomes more concerned about climate change and population growth. Americans use thousands of different products such as wood each year—by weight more than we do of steel, cement and plastic combined. To meet the growing demand for renewable materials and to maximize the benefits of bioenergy and renewable products we must be smarter in how and where we use them. New opportunities for the world through renewable materials is the core of wood science and engineering at OSU.

The department is a world leader in research, outreach and education related to renewable, wood-based materials and products. It offers an undergraduate degree program in Renewable Materials that prepares students for diverse careers in the private sector that is a major component of the Pacific Northwest economy and around the world. Graduates are in high demand as climate change concerns and advanced technology accelerate the transformation to a globally competitive, green renewable materials-based industry.

The department also offers MS and PhD degrees in Wood Science. These graduate programs ensure a foundation in science that is supplemented with programs tailored to student interest. Many students pursue dual majors in science or engineering fields. Interested students should see the department Web page for more information or contact the department head.

**Undergraduate Programs**

**Major**

- Renewable Materials (p. 549)
  - **Options:**
    - Advanced Wood Manufacturing
    - Art and Design
    - Science and Engineering
    - Management and Marketing

**Minor**

- Renewable Materials (p. 549)

**Graduate Programs**

**Major**

- Wood Science (p. 556)

**Minor**

- Wood Science (p. 556)

Faculty

Professors Gupta, Hansen, Kamke, Muszynski, Nairn, Schimleck, Simonsen
Associate Professors Knowles, Leavengood, Robinson, Sinha
Assistant Professors Du, Presley, Riggio
Instructors Fore, Hermann, G. Li, Mangla

Affiliate Faculty

Aimene, Bull, Davis, Kozak, Kutnar, Toppinen, Zelinka

Adjunct Faculty

A. Barbosa (Civil and Construction Engineering), T. Miller (Civil and Construction Engineering)

1 Licensed Professional Engineer

WSE 111. RENEWABLE MATERIALS FOR A GREEN PLANET. (2 Credits)
Renewable materials are an integral part of modern lifestyles, and current societal trends point to increased use of renewable materials. This course provides an overview of renewable materials and their current applications in society. As an overview course, it covers a breadth of renewable material uses and exposes students to life-cycle thinking.

WSE 210. RENEWABLE MATERIALS TECHNOLOGY AND UTILIZATION. (4 Credits)
Characteristics and uses of renewable fiber products including wood, bamboo and grasses; manufacturing processes; effect of tree growth and harvesting on renewable products manufacturing and properties. Wood identification. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: FP 210

WSE 211. WOODTURNING WITH SCIENCE I. (4 Credits)
An introduction to scientific woodturning. Students will get a grounding in tools, lathes, sharpening, and set-up, and then will transition into turning basic forms (spindle and bowl). Particular relevance will be placed upon grain orientation, wood moisture content, wood anatomy, wood chemistry, wood species and extractive effects, and how all of these attributed affect both form and function. Class instruction will be entirely studio based. CROSSLISTED as ART 211.
Equivalent to: ART 211
This course is repeatable for 8 credits.

WSE 225. DEVELOPMENTS OF BUILDING DESIGN WITH RENEWABLE MATERIALS. (3 Credits)
Introduction to architectural design, considering the different building requirements and the solutions available, with a focus on wood-based products and other ligno-cellulosic materials.

WSE 250. CAD: COMPUTER AIDED DESIGN. (3 Credits)
Provides students with the tools and techniques to design and render products, furniture, and structures using Solidworks, as well as create technical drawings that facilitate communication between designers, engineers, and clients. The techniques developed during this course are applicable to a wide variety of industrial CAD and product design industries worldwide. Lec/lab/studio.

WSE 251 with C- or better

WSE 299. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

WSE 320. ANATOMY OF RENEWABLE MATERIALS. (3 Credits)
Examination of macroscopic and microscopic anatomy of renewable (plant based) materials commonly used by society. Learning activities including lecture and the hands-on study of the various plant materials and their components with naked-eye, hand lens, and microscopic examination. Lec/lab.

WSE 321. CHEMISTRY OF RENEWABLE MATERIALS. (3 Credits)
Chemical structures and chemical properties of renewable plant-based materials will be taught at molecular levels. Chemical compositions of different renewable materials will be covered. Chemical and biochemical modifications and applications or renewable materials will be discussed in detail. Lec/lab.
Prerequisites: CH 122 with D- or better or CH 202 with D- or better CH 232 with D- or better or CH 232H with D- or better

WSE 322. PHYSICAL AND MECHANICAL PROPERTIES OF RENEWABLE MATERIALS. (4 Credits)
Introduction to thermodynamics and mechanics of plant fibers, solid wood and bio-based composites: hygroscopicity, heat and mass transport; statics, elasticity and strength of materials; mechanical properties.
Prerequisites: WSE 321 with C- or better

WSE 324. RENEWABLE MATERIALS LABORATORY. (3 Credits)
Integrates the knowledge gained in the core science courses (WSE 321 and WSE 322) to help students obtain a deeper understanding of how chemistry, physics, and anatomy affect renewable material properties. The course uses renewable fiber materials such as hardwoods, softwoods, natural fibers, bamboo, composite wood products (e.g. OSB, plywood, MDF, etc.) and fiber-based products (e.g. wood-plastic composites, natural fiber composites, straw panels, paper, etc.) to examine the intricate relationships between fundamental properties and performance. Lec/lab.
Prerequisites: WSE 321 with C- or better and WSE 322 [C-]

WSE 350. SECONDARY PRODUCTS DESIGN AND MANUFACTURING. (3 Credits)
Provides students with hands-on experience designing and manufacturing wood furniture. Includes how to safely operate and properly maintain wood working equipment, as well as how to design for consumers with efficient manufacturing processes in mind. Lec/lab/studio.
Prerequisites: WSE 250 with C- or better

WSE 351. ADVANCED CAD: COMPUTER AIDED DESIGN. (3 Credits)
Develop advanced techniques using industry standard CAD software as it relates to wood based product, furniture, and structural design. Build upon the skills acquired during WSE 250 CAD: COMPUTER AIDED DESIGN and learn advanced Solidworks techniques. Introduction to Rhinoceros 3D software and various parametric plugins. Lec/studio.
Prerequisites: WSE 250 with C- or better
WSE 352. CAM FOR THE CNC ROUTER AND LASER ENGRAVER. (3 Credits)
Process G-code using CAM software for CNC routing operations, as well as create raster and vector drawings for laser cutting/engraving applications. Each student will work through the design process researching and conceptualizing ideas, 3D modeling designs, developing working prototypes, and fabricating a final product. (Writing Intensive Course)
Prerequisites: WSE 210, WSE 324
Recommended: Introductory level CAD course or demonstrated proficiency in industry standard CAD software
Attributes: CSST – Core, Synthesis, Science/Technology/Society

WSE 385. *EVALUATING SUSTAINABILITY THROUGH LIFE CYCLE ANALYSIS. (3 Credits)
With increased focus on sustainability, it has become important to quantify a sustainability metric of a material, process, or a system. To that end an understanding of life cycle analysis (LCA) is needed that can be used to determine a sustainability metric. This Ecampus course presents the use of LCA to gain insights on the environmental and social impacts of the choices we make. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

WSE 392. *BAMBOOLOOZA: THE FASCINATING WORLD OF BAMBOO. (3 Credits)
An exploration of the world of bamboo and its application to renewable products. This course provides an in-depth understanding of a renewable material bamboo from its native form to processed products. Additionally, this course discusses the utilization and perception of bamboo in different societies of the world. Taught via Ecampus only. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

WSE 399. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.

WSE 401. RESEARCH. (1-16 Credits)
Equivalent to: FP 401
This course is repeatable for 16 credits.

WSE 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

WSE 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: FP 405
This course is repeatable for 16 credits.

WSE 406. PROJECTS. (1-16 Credits)
Equivalent to: FP 406
This course is repeatable for 16 credits.

WSE 413. WOODTURNING WITH SCIENCE II. (4 Credits)
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. CROSSLISTED as ART 413.
Prerequisites: WSE 210 with C- or better and WSE 211 [C-]
Equivalent to: ART 413, FP 413
This course is repeatable for 8 credits.

WSE 414. *ART AND DESIGN CAPSTONE. (4 Credits)
For the final term of a student’s last year in the Renewable Materials Industrial Design program, this course brings together the basic collaborative design elements and technical background of each student in the creation of collaborative design projects with the intention of giving students real-world, problem-based design experience. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WSE 425. TIMBER TECTONICS IN THE DIGITAL AGE. (4 Credits)
An exploration of the advances in design, construction, and fabrication of timber buildings. Includes experimentation with both physical and digital models and a final project, in collaboration with UO Architecture students. Lec/lab/studio.
Recommended: Junior standing and knowledge of CAD

WSE 430. FUNDAMENTALS OF ENGINEERING MECHANICS. (4 Credits)
An introduction to fundamentals of engineering mechanics for RM students selecting Science and Engineering option. While in most aspects the course follows standard introductory mechanics courses for engineers, special attention is paid to elasticity and strength in cellular and anisotropic materials like solid wood and bio-based composites. The overall objective of this course is to provide fundamental knowledge and practical skills in the area of engineering mechanics and mechanical principles behind some of the most important methods of characterization, processing, and utilization of renewable biomaterials; commonly used today, emerging and future. Lec/lab.
Prerequisites: MTH 254 with D- or better and WSE 324 [B-]

WSE 444. STRAND-BASED COMPOSITES MANUFACTURE. (1 Credit)
The strand-based composites manufacturing process uses the results of research projects and the instructor’s mill experience. All aspects of the process from wood procurement through pressing are discussed. This course will be valuable to those interested in a manufacturing career.

WSE 450. ENTREPRENEURIAL PRODUCT DEVELOPMENT I. (3 Credits)
Provides an entrepreneurial experience in product development, in which students design, produce, market, and sell a product in a business setting. Working as a team, students will design a product using renewable materials and are expected to perform and understand manufacturing techniques and processes to produce the product in limited quantities.
Prerequisites: WSE 250 with C- or better and WSE 455 [C-]

WSE 451. ENTREPRENEURIAL PRODUCT DEVELOPMENT II. (3 Credits)
Provides an entrepreneurial experience in product development, in which students design, produce, market, and sell a product in a business setting. Working as a team, students will design a product using renewable materials and are expected to perform and understand manufacturing techniques and processes to produce the product in limited quantities. Lab/studio.
Prerequisites: WSE 250 with C- or better and WSE 450 [C-] and WSE 455 [C-]

WSE 453. *FOREST PRODUCTS BUSINESS. (3 Credits)
Provides students with the skills necessary to operate effectively in the global forest products industry. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: ECON 201 and ECON 202
WSE 455. INDUSTRIAL MARKETING IN THE FOREST SECTOR. (3 Credits)
Marketing relies heavily on effective communication, so this course concentrates on written and oral communication. The course will arm students with the skills necessary to apply basic concepts of marketing of forest products. Application will be highlighted through examples and industry speakers relating course work to the day-to-day work in business.
Equivalent to: FP 455

WSE 458. DESIGN OF WOOD STRUCTURES. (3 Credits)
Study of basic wood properties and design considerations. Design of wood connectors, beams, columns, and beam columns. Introduction to plywood and glue laminated members. Design of structural diaphragms and shear walls. Taught via Ecampus only.
Prerequisites: CE 381 with C or better
Equivalent to: CE 484

WSE 461. BIO-BASED PRODUCTS MANUFACTURING. (4 Credits)
First of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include the major processing steps for the conversion of raw materials such as wood, bamboo, hemp, and cereal straws into products.
Prerequisites: WSE 210 with C- or better and WSE 321 [C-] and WSE 324 [C-]

WSE 462. ADVANCED MANUFACTURING 1. (4 Credits)
Second of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process design elements, quality control, and approaches to continuous process improvement.
Prerequisites: WSE 461 with C- or better

WSE 463. ADVANCED MANUFACTURING 2. (4 Credits)
Third of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process control, optimization, automation, and contemporary topics such as Big Data and the Internet of Things and the potential impacts of the trends on manufacturing enterprises.
Prerequisites: WSE 462 with C- or better

WSE 465. RENEWABLE MATERIALS MANUFACTURING EXPERIENCE. (2 Credits)
Learning about and visiting a number of renewable materials industrial and commercial operations representing all parts of the renewable materials value chain. The class will meet daily for one 5-day week immediately prior to the start of fall term. During the week, the students and at least one instructor will meet daily. Lectures will precede visits to industrial plants, mills and sites. At the end of the day, an instructor will participate in a debriefing session, reiterating what was learned during the day. Students will then submit a report on the day's activities. The class includes daily travel and overnight stays.
This course is repeatable for 4 credits.

WSE 470. FORESTS, WOOD, AND CIVILIZATION. (3 Credits)
Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: WSE 470H

WSE 470H. FORRESTS, WOOD, AND CIVILIZATION. (3 Credits)
Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: WSE 470

WSE 471. RENEWABLE MATERIALS IN BUILDING CONSTRUCTION. (3 Credits)
Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced.

WSE 473. BIOENERGY AND ENVIRONMENTAL IMPACT. (3 Credits)
Explores world’s use of woody biomass fuels, their potential to contribute to our region’s energy supply, and conversion technologies such a direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products.
Prerequisites: (MTH 111 with D- or better or MTH 112 with D- or better or MTH 231 with D- or better or MTH 241 with D- or better or MTH 245 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better) and (CH 122 [D-] or CH 222 [D-] or CH 232 [D-] or CH 232H [D-])

WSE 475. ENVIRONMENTAL ASSESSMENT OF BUILDING MATERIALS. (4 Credits)

WSE 499. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 99 credits.

WSE 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: FP 501
This course is repeatable for 16 credits.

WSE 503. THESIS. (1-16 Credits)
Equivalent to: FP 503
This course is repeatable for 99 credits.

WSE 505. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: FP 505
This course is repeatable for 16 credits.

WSE 506. PROJECTS. (1-16 Credits)
Equivalent to: FP 506
This course is repeatable for 16 credits.

WSE 507. SEMINAR. (1 Credit)
Section 1: Beginning Seminar. Section 2: Seminar. Graded P/N.
Equivalent to: FP 507
This course is repeatable for 99 credits.
WSE 513. WOODTURNING WITH SCIENCE II. (4 Credits)
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based.  
*This course is repeatable for 12 credits.*  
Recommended: WSE 210 and WSE 211

WSE 514. ART AND DESIGN CAPSTONE. (4 Credits)
For the final term of a student's last year in the Renewable Materials Industrial Design program, this course brings together the basic collaborative design elements and technical background of each student in the creation of collaborative design projects with the intention of giving students real-world, problem-based design experience.

WSE 516. INTRODUCTION TO SCULPTURAL WOODTURNING. (4 Credits)
The development of studio / sculptural woodturning has a unique history, and involves a cluster of specialized skills. This course blends historic woodturning practices with modern approaches and aesthetics to bring an understanding of wood science into this very specialized field of woodturning.

Prerequisites: WSE 513 with B or better and WSE 514 [B]  
*This course is repeatable for 12 credits.*

WSE 520. THE GLOBAL CONTEXT OF THE FOREST SECTOR. (3 Credits)
Provides a broad knowledge base of business and marketing practices in the global forest industry. Includes a module on research ethics that fulfills OSU Graduate School requirements.

WSE 521. WOOD SCIENCE I. (4 Credits)
A comprehensive overview and integration of wood anatomy, wood physics, wood chemistry and wood mechanics; global contemporary issues impacting the wood and fiber sector; integration of basic wood sciences to understand the complex relationships between environment and wood material properties, and the influence of both on the use of wood-based materials.

WSE 522. WOOD SCIENCE II. (4 Credits)
Continuation of the comprehensive overview and integration of wood and fiber anatomy, physics, chemistry, and mechanics; integration of basic wood science to understand relationships with wood and fiber properties and their impact on final use. Focus on biological, chemical and physical degradation of wood; adhesion; and physical and engineering properties of wood. Lec/lab.

WSE 525. TIMBER TECTONICS IN THE DIGITAL AGE. (4 Credits)
An exploration of the advances in design, construction and fabrication of timber buildings. Includes experimentation with both physical and digital models and a final project, in collaboration with OU Architecture students. Lec/lab/studio.

Recommended: Knowledge of CAD

WSE 526. STRUCTURAL HEALTH ASSESSMENT/monitoring of Timber Buildings. (3 Credits)
Holistic approaches for the evaluation of the performance of timber systems and structures in a building. Learn about the tools available to experts for different analysis purposes, and to understand how data acquired from different techniques can be analyzed and used to inform building management and maintenance, fabrication and construction practices, and future design.

WSE 530. POLYMER COMPOSITES. (3 Credits)
A comprehensive survey of the material and mechanical properties of polymer-based composite materials including failure mechanisms, interfacial and nanoscale effects, and transport and thermal properties.  
Recommended: CHE 545 and multivariable calculus

WSE 535. POLYMER SYNTHESIS AND STRUCTURE. (3 Credits)
A comprehensive overview of various synthetic methods for various synthetic polymers; structures of various synthetic and natural polymers.  
Recommended: 3 credits of undergraduate organic chemistry or CH 331 or CH 334

WSE 553. FOREST PRODUCTS BUSINESS. (3 Credits)
Provides students with the skills necessary to operate effectively in the global forest products industry.  
Recommended: ECON 201 and ECON 202

WSE 555. INDUSTRIAL MARKETING IN THE FOREST SECTOR. (3 Credits)
Marketing relies heavily on effective communication, so this course concentrates on written and oral communication. The course will arm students with the skills necessary to apply basic concepts of marketing of forest products. Application will be highlighted through examples and industry speakers relating coursework to the day-to-day work in business.  
Equivalent to: FP 555

WSE 558. WOOD DESIGN. (4 Credits)
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glue laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSTLISTED as CE 584.  
Equivalent to: CE 584
Recommended: CE 383 or CE 481 with minimum grade of C

WSE 561. BIO-BASED PRODUCTS MANUFACTURING. (4 Credits)
First of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include the major processing steps for the conversion of raw materials such as wood, bamboo, hemp, and cereal straws into products.  
Recommended: WSE 210 and WSE 321 and WSE 324

WSE 562. ADVANCED MANUFACTURING 1. (4 Credits)
Second of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process design elements, quality control, and approaches to continuous process improvement.  
Recommended: WSE 461

WSE 563. ADVANCED MANUFACTURING 2. (4 Credits)
Third of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process control, optimization, automation, and contemporary topics such as Big Data and the Internet of Things and the potential impacts of the trends on manufacturing enterprises.  
Recommended: WSE 462

WSE 571. RENEWABLE MATERIALS IN BUILDING CONSTRUCTION. (3 Credits)
Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced.
**WSE 573. BIOENERGY AND ENVIRONMENTAL IMPACT. (3 Credits)**

Explores world’s use of woody biomass fuels, their potential to contribute to our region’s energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products.  
**Recommended:** (MTH 111 or MTH 112 or MTH 231 or MTH 241 or MTH 245 or MTH 251 or MTH 251H) and (CH 122 or CH 222)

**WSE 575. ENVIRONMENTAL ASSESSMENT OF BUILDING MATERIALS. (4 Credits)**

**WSE 592. ADVANCED WOOD DESIGN. (4 Credits)**

**Recommended:** Understanding of basic concepts in mechanics and timber design

**WSE 599. SPECIAL TOPICS. (0-16 Credits)**

This course is repeatable for 99 credits.

**WSE 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)**

Equivalent to: FP 601  
This course is repeatable for 16 credits.

**WSE 603. THESIS. (1-16 Credits)**

Equivalent to: FP 603  
This course is repeatable for 999 credits.

**WSE 605. READING AND CONFERENCE. (1-16 Credits)**

This course is repeatable for 16 credits.

**WSE 606. PROJECTS. (1-16 Credits)**

Equivalent to: FP 606  
This course is repeatable for 16 credits.

**WSE 607. SEMINAR. (1 Credit)**

Section 1: Beginning Seminar. Section 2: Graduate Seminar.  
Equivalent to: FP 607  
This course is repeatable for 99 credits.

**WSE 699. SPECIAL TOPICS. (1-16 Credits)**

This course is repeatable for 16 credits.

---

**Renewable Materials Minor**

The minor in Renewable Materials exposes students to the world of renewable materials science and technology and will enable students in other majors to gain a specialization that will make them more competitive for careers associated with green materials and allied industries.

**Minor Code: 238**

Students must complete a minimum of 27 credits for the minor, at least 12 of which must be upper division.

**Renewable Materials Undergraduate Major (BS, HBS)**

The Bachelor of Science degree in Renewable Materials program is a multidisciplinary professional program that prepares students to work with renewable, plant-based materials to solve challenging world problems. Renewable materials such as wood, bamboo, canes, and agricultural fibers are examined to understand their characteristics and how to make useful products. Students gain broad perspectives on current issues associated with the sustainable utilization of renewable materials, including global trade, business innovation, energy production, and environmental impacts.

Graduates with degrees in renewable materials are highly sought after to work in business, manufacturing operations, and technical support where they use their knowledge and expertise to help develop sustainable products, industrial systems, and economies.

The curriculum includes a lower-division core in science and math with a choice of one of the required upper-division options in Advanced Wood Manufacturing (AWD), Art and Design (A&D), Management and Marketing (M&M), or Science and Engineering (S&E).

- The AWD option develops students’ knowledge of smart manufacturing and its application in renewable materials industries.  
- The A&D option prepares students to engage with renewable materials on an aesthetic level. Artistically-oriented students learn how materials function within the human space and gain an understanding of green buildings and architecture.  
- The M&M option is designed for students interested in business. Completion of the M&M option and meeting additional grade requirements of the College of Business will fulfill the requirements for a transcript-visible Business and Entrepreneurship minor.
• The S&E option is a flexible program that allows technically oriented students to design a personalized curriculum that opens doors to jobs that solve complex problems or to graduate school. Students select courses (often minors) that complement their interests.

In addition to the course work, all students must have six months of work experience in an area related to their major. This is usually accomplished by two summers of employment in business or industry, but it may include work during the academic year. The department has an established network of connections to help place students in internships and summer employment.

Major Code: 238

Advanced Wood Manufacturing Option

This option is offered within the following major(s):

- Renewable Materials - College of Forestry (p. 549)

This option complements the Renewable Materials core curriculum that develops students’ knowledge of properties and behavior of bio-based materials. It adds a strong foundation in how the products are manufactured, as well as how the manufacturing processes are designed, managed, controlled, and optimized. Students will be exposed to important advanced topics such as automation, scanning and optimization systems, computer numerically controlled (CNC) machining, robotics, 3D printing, as well as how emerging topics such as the Internet of Things (IoT) and Big Data may impact the future of manufacturing.

### Art and Design Option

This option is offered within the following major(s):

- Renewable Materials - College of Forestry (p. 549)

The Art and Design (A&D) option prepares students to engage with renewable materials on an aesthetic level, whether as interior designers, fine artists, or entrepreneurs. Students will gain not only an in-depth knowledge of renewable materials but also how these materials can function visually within the human space. In addition to the aesthetic aspect, students will gain an understanding of green building materials and green architecture. Students in the A&D option may also earn a visual arts minor by completing 31 credits of applicable course work.

**Option Code: 478**

**Approved Area of Concentration**

Select a 24-credit program of study proposed by the student and approved by the WSE Department Head. Must include 12 credits of Restricted Electives from the list above, and 20 upper-division credits.

**Total Hours**: 93

1 As a base for an "Area of Concentration" as described below.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

**Baccalaureate Core Courses**

Not satisfied by the Renewable Materials core or the option.

Courses meeting other Baccalaureate requirements for the following categories not specified by the Renewable Materials Core or the option can be found in the OSU Catalog online at https://catalog.oregonstate.edu/

**Science and Engineering Option**

This option is offered within the following major(s):

- Renewable Materials - College of Forestry (p. 549)

This is a flexible, math- and science-intensive program that allows students to design a personalized curriculum that opens doors to jobs that solve complex problems, create efficiencies, foster intelligent use of renewable materials, or to graduate school. Students select a group of courses (often minors) that complement their interests.

Wood Science Graduate Major (MS, PhD)

Graduate Areas of Concentration

Biodeterioration and materials protection, chemistry and chemical processing, forest products business and marketing, physics and moisture relations, process modeling and analysis, renewable materials science and engineered composites, wood anatomy and quality, wood engineering and mechanics.

The Department of Wood Science and Engineering offers graduate programs leading toward the Master of Science and Doctor of Philosophy degrees in Wood Science. Thesis research and academic programs can be developed in the many special disciplines represented by the faculty. Minors are most commonly selected from statistics, engineering, chemistry, or business.

Many students pursue a dual major degree in wood science and a field of engineering or science. A wide variety of science, engineering and business opportunities are available.

Graduate students in wood science come from a wide range of undergraduate degree programs in science, engineering, and business.

Excellent laboratories are available for teaching and research in Richardson Hall, Peavy Hall, Emmerson Advanced Wood Products Laboratory, and the Oak Creek Laboratory. Student research involves seeking solutions to current problems in renewable materials science, other sciences such as chemistry, physics and biology, engineering, business or related fields. Most graduate students are employed as part-time graduate assistants.

Graduates with advanced degrees find employment in research and development, management or technical positions in the private sector, as university faculty or in technical public service positions.

Wood Science Graduate Minor

Minor Code: 3690

If a Wood Science minor is desired, you should first select a minor professor within the Wood Science & Engineering department, and work with them to identify an appropriate set of courses within Wood Science to meet or exceed 15 credits.

Minor Code: 3690

College of Liberal Arts

The College of Liberal Arts offers major programs in the arts, humanities, and social sciences that comprise the core of human knowledge. Students can earn degrees and minors in the college’s many disciplines and interdisciplinary programs, as well as certificates of specialized training in seven other fields. Qualified students can also participate in a joint program with the College of Law at Willamette University, in which they can earn their bachelor’s and law degrees in six years.

Tristen Shay, Associate Director of Student Services, 541-737-0561, tristen.shay@oregonstate.edu

Double Degrees
Undergraduates with majors in the College of Liberal Arts can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education (https://catalog.oregonstate.edu/college-departments/education), College of Business (https://catalog.oregonstate.edu/college-departments/business), International Programs (https://catalog.oregonstate.edu/college-departments/international-programs) or Department of Forest Ecosystems and Society (https://catalog.oregonstate.edu/college-departments/forestry/forest-ecosystems-society) sections of this catalog for more information.

Minors
Students throughout the university may elect to pursue the following undergraduate minors: Anthropology; Art History; Asian Languages and Cultures; Asian Studies; Communication; Economics; English; Ethnic Studies; Film Studies; French; German; History; Multimedia; Music; Music Performance; New Media Communications; Philosophy; Photography; Political Science; Popular Music Studies; Psychology; Queer Studies; Religious Studies; Social Justice; Sociology; Spanish; Theatre Arts; Visual Arts; Women, Gender, and Sexuality Studies; and Writing.

The College of Liberal Arts also offers many courses in the arts, humanities, and social sciences that are of value to all students and are basic to a liberal education. Such courses help students in their personal development and enrichment through a deeper understanding of themselves and appreciation of human cultural development.

Teacher Education
The College of Liberal Arts offers excellent undergraduate preparation for elementary, middle or high school teachers. The Liberal Studies pre-education program is ideal for elementary school teachers.

Students wanting to teach at the high school level may major in English, French, German, history/social studies, music or Spanish.

Certificate Programs
Certificate programs in Applied Ethics; Food in Culture and Social Justice; Language in Culture; Latin American Affairs; Medical Humanities; Peace Studies; Religion and Culture; and Women, Gender, and Sexuality Studies are offered to all students and may be taken concurrently with any major degree program.

Pre-Law Preparation
OSU provides opportunities for a complete and rigorous preparation for students interested in attending law school. Our accomplished graduates attend some of the finest schools in the nation.

Law school is one of the few professional schools that do not require a particular set of courses as a prerequisite for admission. Students may major in any subject. Students should choose a major that engages and challenges them, a course of study where they can excel. They are advised to supplement their major courses with a diverse selection of classes that offer depth, rigor, and skill in three areas: written and oral communication, deductive reasoning and logic, and a general knowledge of the institutions and values of our society.

The College of Liberal Arts offers many effective and engaging ways to prepare for law school, rather than one single pre-law program. Students interested in law school may contact Professor Jason Tanenbaum in the School of Public Policy. Call 541-737-3663 for his office hours. Students also may call the CLA Student Services Office, 541-737-0561. Students should also obtain the College of Liberal Arts pre-law advising brochure, which is available online (http://liberalarts.oregonstate.edu/content/pre-law-program).

Accelerated BA/BS and Law (JD) Program with Willamette University College of Law and Lewis and Clark College Law School
This program enables OSU students to earn a BA or BS degree and a law degree in a total of six years, three years at OSU and three at either the Willamette University College of Law or the Lewis and Clark College Law School.

Students may be admitted to the program any time during their first two years of undergraduate study provided they have a 3.5 high school GPA and a minimum combined SAT score of 1950 or composite ACT score of 29. Students will complete all but 45 credits of upper-division electives for a BA or BS degree in defined majors in the College of Liberal Arts. For admission to law school, students must have earned a cumulative GPA of 3.4 or higher and a Law School Admission Test (LSAT) score no lower than the median LSAT for the prior year’s entering class.

At Willamette University and at Lewis & Clark College, the students’ first-year law courses will satisfy the 45-credit upper-division elective requirements for their OSU degree. After completing the additional two years at Willamette or at Lewis & Clark, students will have completed both the bachelors and JD degrees in six years.

OSU Honors College students are currently not eligible for this program due to the senior year thesis requirement.

American Studies (OSU-Cascades Branch Campus in Bend); Anthropology; Economics; English; Ethnic Studies; French; German; History; Philosophy; Political Science; Sociology; Spanish; Speech Communication; Women, Gender, and Sexuality Studies

Academic Advising
Mission Statement: The College of Liberal Arts academic advising is a teaching and learning process dedicated to student success. Academic advising engages students in developing a plan to realize their educational, career and life goals.

Values Statement: The values associated with advising in the College of Liberal Arts are closely aligned with the stated values of the university.

• Accountability: We are committed to providing timely, accurate and intentional advising.
• Diversity: We honor the unique nature and interests of each student. Advising services and delivery methods will be shaped to fit the diverse needs of our campus populations.
The liberal arts core consists of five courses (at least 15 credits) as follows:

- **Respect**: We seek to establish a reciprocal relationship with students based on an ethic of care and shared responsibility.
- **Social Responsibility**: We foster a culture of independent thinking and global awareness so that students make informed, socially responsible choices consistent with their academic, career and life goals.
- **Integrity**: We seek to engage students in a fair and professional process of meaningful self-reflection and authentic inquiry.

A liberal arts education involves exploration and broad study beyond one’s major field. Students are encouraged to understand other cultures, other ways of knowing, and other fields of study. Students are also encouraged to take more courses in areas outside their major field to enhance their experience.

Liberal Arts students are required to satisfy four sets of requirements:

- **Oregon State University Baccalaureate Core**
- **College of Liberal Arts Core**
- **BA or BS requirements**
- **Major program requirements**

The University Baccalaureate Core course requirements are explained in a separate section Earning a Degree at Oregon State (p. 1570). The College of Liberal Arts Core and the BA and BS requirements are explained below. The major program requirements are explained in the appropriate section in the pages that follow. If you want to add a minor program, you will also need to complete the requirements for that minor. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog. Specific requirements for disciplinary minors are usually given in the appropriate school or departmental section; for example see the School of Public Policy section for requirements for the Economics minor.

You may not use a single course to satisfy more than one of these requirements. In addition, you may not use courses within your major field to satisfy either baccalaureate core or liberal arts core requirements. (However, courses taken to satisfy the baccalaureate core requirements or the liberal arts core may also be used to satisfy requirements for a minor.)

### Liberal Arts Core
The liberal arts core consists of five courses (at least 15 credits) as follows:

- **Humanities (3)**: Critical examination of influential traditions and ideas as defined by major scholarly works (includes English literature; ethnic studies; film studies; foreign language and literatures, including culture; history; and philosophy).
- **Fine Arts (3)**: Participation in or appreciation of different forms (includes art, music, theater, and creative writing in poetry, fiction, creative nonfiction, or drama).
- **Social Science (3)**: Scientific investigation and theory pertaining to human individuals, social groups, institutions, and ideologies (includes anthropology; economics; political science; psychology; sociology; women, gender, and sexuality studies; and selected geography courses).
- **Nonwestern Culture (3)**: Study in any of the following areas focusing outside of Western culture—Africa, Asia, Russia, South America, Central America, Caribbean, Middle East, the Pacific, or Native North Americans.
- **One additional course** from one of the preceding four areas (3).

### BA/BS Requirements
Nearly all liberal arts students graduate with either a bachelor of arts or bachelor of science degree.

- **BA Requirement**: Second-year proficiency in a second language, including ASL, at the college level with at least a C–.
- **BS Requirement**: A minimum 15-credit block of science, computer science, and quantitative studies as follows:
  a. Any computer science (CS) course approved by the student’s major school or department (3–4), and
  b. Any course from the College of Science approved by the student’s major school or department except math (MTH) or statistics (ST) courses (3–4), and
  c. One of the following (8–12):

Many schools or departments require specific courses to satisfy the BS degree requirements; students should consult their academic advisors for details. Courses used to satisfy the BS degree requirements may not also be used to satisfy baccalaureate core requirements.

Bachelor of Fine Arts (BFA) degrees in Digital Communication Arts and Graphic Design are offered by the School of Arts and Communication. BFA degree requirements differ from those in other College of Liberal Arts programs. Students in the BFA degree program must complete the baccalaureate core and a minimum of 105 credits in art or digital communication arts.

Liberal Arts students are required to satisfy four sets of requirements:

- **Oregon State University Baccalaureate Core**
- **College of Liberal Arts Core**
- **BA or BS requirements**
- **Major program requirements**

The Liberal Arts Core consists of five courses (at least 15 credits) as follows:
• **Humanities (3):** Critical examination of influential traditions and ideas as defined by major scholarly works (includes English literature; ethnic studies; film studies; foreign language and literatures, including culture; history; and philosophy).

• **Fine Arts (3):** Participation in or appreciation of different forms (includes art, music, theater, and creative writing in poetry, fiction, or drama).

• **Social Science (3):** Scientific investigation and theory pertaining to human individuals, social groups, institutions, and ideologies (includes anthropology; economics; political science; psychology; sociology; women, gender, and sexuality studies; and selected geography courses).

• **Nonwestern Culture (3):** Study in any of the following areas focusing outside of Western culture—Africa, Asia, Russia, South America, Central America, Caribbean, Middle East, the Pacific, or Native North Americans.

• **One additional course** from one of the preceding four areas (3).

Below you will find a list of courses that will fulfill each section of our Liberal Arts Core. Students must take a minimum of 3 credits/1 course for each of the five Liberal Arts Core sections.

American Studies Program

American Studies is only offered on the OSU-Cascades Campus in Bend, Oregon.

Undergraduate Programs

Major

- American Studies (p. 564)

**Neil Browne**, Director Tykeson Hall 302D OSU-Cascades Campus 1500 SW Chandler Avenue Bend, OR 97702 Phone: 541-322-3129 Email: neil.browne@osucascades.edu Website: http://osucascades.edu/academics/american-studies

**AMS 311. TOPICS IN AMERICAN STUDIES. (4 Credits)**

Selected topics, changed annually, that investigate American ideas, regions, events, or periods. Fulfills the requirement for an integrated course in the major. May be repeated as topics vary. Open to nonmajors. *This course is repeatable for 99 credits.*

**AMS 350. *AMERICAN CULTURE AND THE VIETNAM EXPERIENCE. (4 Credits)**

Examines through literature, film, and popular media the effects of the Vietnam War on American culture. Taught at OSU-Cascades only. (Bacc Core Course)

**Attributes:** CSGI – Core, Synth, Global Issues
AMS 405. READING AND CONFERENCE. (1-16 Credits)
Independent, individual studies supervised by the director, members of the American Studies Board, or assigned professors, as arranged by the student and the director.
This course is repeatable for 16 credits.

AMS 406. PROJECTS. (1-16 Credits)
Studies of American culture and society centered around topical events or cultural programs of current interest in American studies.
This course is repeatable for 16 credits.

AMS 407. *SEMINAR. (1-16 Credits)
May be repeated for credit as topics vary. (Writing Intensive Course) CROS一样LISTED as ENG 407/ENG 507.
Attributes: CWIC – Core, Skills, WIC
Equivalent to: ENG 407
This course is repeatable for 16 credits.

AMS 410. AMERICAN STUDIES INTERNSHIP. (1-16 Credits)
Supervised and evaluated work in a variety of professional fields to enhance students’ career preparation; arranged at the initiative of the student one semester in advance.
This course is repeatable for 16 credits.

AMS 507. SEMINAR. (1-16 Credits)
May be repeated for credit as topics vary. CROS一样LISTED as ENG 407/ENG 507.
Equivalent to: ENG 507
This course is repeatable for 16 credits.

American Studies Undergraduate Major (BA, BS, HBA, HBS)

Available only at OSU-Cascades.

An interdisciplinary major that engages American culture in its historical, contemporary, and global contexts. Examines American culture through a variety of media including film, music, literature, history, politics, and art. Teaching faculty members are from several different disciplines and students approach course objectives from many scholarly vantage points.

American Studies Final Portfolio (Must be submitted during the student’s final term)

1. Pick three essays you wrote during the course of your program in American Studies that you feel are representative of your most meaningful work. These may be your best essays, but they may be essays in which you struggled with difficult material in an attempt to better understand it. In other words, which essays are most meaningful to you in your experience earning an American Studies degree at OSU Casacades?
2. Incorporating at least one of the American Studies Outcomes, write a three-page cover letter explaining why you chose these essays and how they reflect what you have learned and experienced in the process of earning your degree in American Studies at OSU-Cascades.

**LS 199. SPECIAL STUDIES. (1-16 Credits)**
This course is repeatable for 16 credits.

**LS 402. INDEPENDENT STUDY. (1-16 Credits)**
This course is repeatable for 16 credits.

**LS 403. THESIS. (1-16 Credits)**
This course is repeatable for 16 credits.

**LS 405. READING AND CONFERENCE. (1-3 Credits)**
This course is repeatable for 16 credits.

**LS 406. PROJECTS. (1-16 Credits)**
May be repeated a maximum of 12 credits.
This course is repeatable for 16 credits.

**LS 407. SEMINAR. (1-16 Credits)**
Graduate credit must not exceed 9 credits.
This course is repeatable for 16 credits.

**LS 408. WORKSHOP. (1-16 Credits)**
This course is repeatable for 16 credits.

**LS 410. INTERNSHIP. (1-12 Credits)**
Restricted to students enrolled in off-campus programs. Not available to students in residence on the Corvallis campus. Maximum of 12 credits.
This course is repeatable for 12 credits.

**LS 499. SPECIAL TOPICS. (1-16 Credits)**
This course is repeatable for 16 credits.

**Candidates for the Liberal Studies major must complete the following:**

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core requirements
- A program consisting of 45 or more credits that are thematic in nature and include at least 27 upper-division credits developed from the course offerings of two or more departments within the College of Liberal Arts. The plan of study and statement of justification must be approved in advance by the head advisor or designee.
- At least one Writing Intensive Course (WIC) with a grade of C or better.
- Maintain a 2.0 or better university GPA.
- Maintain a 2.3 or better major GPA.

The typical program is designed to meet the needs and interests of the particular student and is unique in content. In some cases, a prestructured program may provide a suitable match.

Total credits required for graduation is 180.

**Major Code: 920**

**Pre-Education Option**

This option is offered within the following major(s):

- Liberal Studies - College of Liberal Arts (p. 565)

The BA or BS degree in Liberal Studies may be used to prepare for a teacher licensure program.

**Option Code: 922**

</tr>
</tbody>
</table>

Note: Students must enroll in at least 29 stand-alone courses (52% of their course work).

**Engagement**

Students are required to develop a plan for their Engagement credits with their committee by the end of year one. Engagement credits include fieldwork and thesis/project credits.

EAH XXX. Fieldwork (up to 8 credits)

EAH XXX. Thesis/Project (up to 8 credits)

All students will be required to make a final thesis or project presentation and defend the work to the student’s committee. Students must submit a draft of their thesis or project to their committee for review six weeks prior to their presentation and oral examination.

**Thesis Options:** Students can develop a written thesis of appropriate length and format as agreed upon by their committee. Theses can include, but are not limited to 1) a sustained argument broken into closely related chapters or sections, or 2) a number of articles (e.g., magazine articles, scholarly articles) that develop arguments on distinct but related topics with a framing introduction that addresses their relationship.

**Project Option:** Student’s projects can take any form with the approval of the student’s committee. Examples include developing a community program, making a documentary film, and creating multi-media or art exhibits.

Major Code: 8200
These requirements can be fulfilled at Oregon Community Colleges.

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

Note: Courses taken to fulfill major requirements cannot be used to fulfill the baccalaureate core, College of Liberal Arts, or option requirements. Not all courses are offered every year. Students should consult the annual schedule of classes for a listing of available courses for the academic year.

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

**School of Arts and Communication**

**Art**

The Art Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees through extensive course work in fine arts, graphic design, photography, and art history.

The curriculum provides an awareness and understanding of the historical and contemporary significance of art as a unique feature of society. Major programs offer the opportunity for professional artistic development while incorporating subjects that lead to a liberal education. These programs prepare the student for a range of professional opportunities or later graduate study in photography, fine art, and art history, as well as many related fields. As a cultural enrichment for our students, the Art Area sponsors exhibitions, lectures, workshops, and other events related to the visual arts.

Candidates for the BFA degree may select an option in fine arts or photography. Candidates for the BS degree may select the fine arts or photography option. Candidates for the BA degree may select an option in fine arts, art history, or photography. The BFA is a pre-professional degree. The College of Liberal Arts requirements for the BFA differ from other degree programs. Admission into either the Fine Arts or Photography option is selective and competitive. See program requirements for specific details.

The Art History minor combines an introduction to art history with an opportunity to explore advanced topics. The Visual Arts minor is a studio concentration in either fine arts or photography. The Art Area also participates in the New Media Communications minors and Digital Communication Arts major, as well as the Master of Arts in Interdisciplinary Studies (MAIS).

**Monthly Art Exhibitions**

The Art Area of the School of Arts and Communication, based in Fairbanks Hall, features monthly exhibitions by nationally and internationally recognized artists in the Fairbanks Gallery. The school is also the sponsor of the Visiting Artists and Scholars Lecture Series, which has brought in renowned artists including Philip Pearlstein, Ann Hamilton, Marina Abramovic, Bill Viola, and Do Ho Suh. In 1995, the school created the JumpstART (https://liberalarts.oregonstate.edu/sac/sac-academy/precollege-summer-programs/jumpstart) Precollege Visual and Performing Arts Workshop held each summer for talented high school students in art, music and theater.

**Music**

The Music Area of the School of Arts and Communication offers programs leading to the Bachelor of Arts (BA) or Bachelor of Science (BS) degree, a variety of baccalaureate core courses for students with little or no background in music, and opportunities for qualified students to perform in bands, choirs, and the symphony orchestra. Students wishing a greater curricular choice may wish to combine music study with courses in another school or department in the College of Liberal
Arts for a liberal studies major. The Music Area also offers minors in
Music and Popular Music Studies.

The Music Area also teaches graduate courses in music education, literature and history, conducting, performance and special projects. Graduate students may pursue the Master of Arts in Teaching: Music Education (MAT) degree or the Master of Arts in Interdisciplinary Studies (MAIS) degree in a broad range of fields. OSU's graduate programs in music have been approved by Oregon's Teacher Standards and Practices Commission and the National Council for Accreditation of Teacher Education. Programs are available for individuals seeking both the initial and/or continuing license in music at all levels of authorization.

Performance instruction at the intermediate and advanced levels is available with instructor consent. Students should contact the school office for application procedures and fee schedules.

The Music Area proudly presents upwards of 200 musical events of all types throughout the academic year and summer. Choral, instrumental, orchestral ensembles of all sizes and types provide students from across campus the chance to participate in and/or simply enjoy listening to music. Many ensembles and events include the chance to work with and learn from professional musicians and nationally and internationally-recognized music educators.

Scholarships are available for music majors and for outstanding performers. Auditions and interviews take place in February and March each year. Selection is based on musical and academic achievement.

The Sound Design Lab in Community Hall includes state-of-the-art digital recording and editing hardware and software and is open to all OSU students. Work-study students are available to help students learn how to use the facilities.

Career possibilities in music include teaching in the schools, private instruction, performing in orchestras or ensembles, music librarianship, arts management, music business, and recording engineering.

**New Media Communications**

The New Media Communications (NMC) Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees in Digital Communication Arts. There is also a minor in New Media Communications. Course work explores the storytelling capacity of contemporary media and technologies. When pursuing an NMC degree students acquire the skills they need to use today's media effectively in sharing knowledge, imagination, and information. Students also learn to anticipate how future changes in the media are likely to influence their lives. In NMC courses, students explore how to make abstract concepts or hidden processes visible, how to anticipate people's reactions to innovation, how to write professionally, how to recognize the influence of media, how to produce creative content in a variety of media formats, and much more.

A New Media Communications major prepares students for a lifetime of change and involvement in the digital world.

NMC courses are taught in multiple venues on campus including the Motion-Capture and Gaming labs, both currently located on the fourth floor of Strand Ag Hall.

Each year numerous New Media students participate in internships with on-campus organizations and off campus with local and regional companies. Selected students participate in the National Association of Broadcasters annual convention and other regional and national organizations and events.

**Speech Communication**

The Communication Area of the School of Arts and Communication offers a major program leading to a Bachelor of Arts (BA) or Bachelor of Science (BS) degree. The degree examines both theoretical and practical aspects of human communication as a liberal art, as a social science, as background for further study, or as pre-professional experience.

All students initially pursuing a Speech Communication major with an option in Communication take basic courses in public speaking, argumentation, and interpersonal communication. Further studies focus on areas such as rhetorical and communication theory, methods of criticism and research, and history. Students pursuing an option in Communication enhance the skills inherent in all human interactions, preparing themselves for a range of potential vocational pursuits, avocations, and graduate study. The area also offers a Communication minor.

The Communication Area is located in cottage-esque Shepard Hall on Campus Way. Communication Area students are active in Lambda Pi Eta, the National Communication Association's honor society for four-year colleges and universities. Students from across the university also compete on the nationally-recognized OSU Forensics Team in individual events and debate. Faculty and graduate students participate regularly in national and regional conferences as well as area-sponsored colloquia on campus.

The Communication Area also takes part in the Master of Arts in Interdisciplinary Studies (MAIS), with many master's students pursuing two areas of concentration within the area's graduate curriculum.

**Theatre Arts**

The Theatre Arts Area offers a Bachelor of Arts (BA) or Bachelor of Science (BS) degree option in theatre within the Speech Communication major. The Theatre Arts option emphasizes a liberal arts approach to theatre history, practice, and production. All students pursuing the degree complete a core of classes designed to introduce them to fundamental elements of the art. The large remaining portion of the option is split between courses in history/theory/literature and those focusing on design/technical/performance matters. Students select specific classes within each disciplinary area to match their interests (performance, design, literature, etc.) while meeting key degree requirements. The result is a theatre education grounded in a liberal arts perspective and emphasizing a basic knowledge of all theatre elements. The area offers a similarly structured minor in Theatre Arts.

The Theatre Arts Area facilities are located in Withycombe Hall. The Main Stage Theatre seats approximately 350 in a modified-proscenium arrangement while the flexible Laboratory Theatre seats around 100. Both spaces function as classrooms as well as performance venues.

The University Theatre (UT) is the producing arm of the Theatre Arts Area. Students from across campus collaborate with UT faculty, staff, and guest artists to create theatre productions throughout the academic year and summer. Students from all colleges and departments across campus are encouraged and welcome to participate.

The Theatre Arts Area also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program.

Art

ART 100. ART ORIENTATION. (1 Credit)
Introduction to the study of art and career options in fine arts, graphic design, photography, and art history.
ART 101. *INTRODUCTION TO THE VISUAL ARTS. (3 Credits)
An introductory lecture course using visual materials with emphasis on
tools and methods that generate the visual experience, both past and
present. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts
Core

ART 115. 2-D CORE STUDIO. (4 Credits)
Studio course that introduces the visual language, the elements of
design, and the principles of organization. Emphasizes skills, concepts,
and problem solving in the areas of two-dimensional design and color.
Attributes: LACF – Liberal Arts Fine Arts Core

ART 117. 3-D CORE STUDIO. (4 Credits)
Studio course examining three-dimensional design elements and their
spatial organization. Emphasizes innovative problem solving and
exposure to varied media. Gives students a sound conceptual basis to
apply to more advanced media-oriented courses.

ART 121. DIGITAL CORE STUDIO. (4 Credits)
An introductory studio art class using computers in the visual arts.
Project-based exploration of digital imaging, layout, 3-D rendering, and
video. Examination of the impact of digital technology on the visual arts
from contemporary and historical perspectives.

ART 131. DRAWING CORE STUDIO. (4 Credits)
Introductory studio course in drawing techniques with emphasis on
developing skills in perception and visual organization. Lec/studio.
Attributes: LACF – Liberal Arts Fine Arts Core

ART 199. SPECIAL STUDIES. (0-16 Credits)
Equivalent to: ART 199H
This course is repeatable for 16 credits.

ART 204. *INTRODUCTION TO WESTERN ART: PREHISTORY TO THE HIGH
MIDDLE AGES. (3 Credits)
A survey of the painting, sculpture, architecture, and decorative arts of
Europe and the Mediterranean between the Paleolithic period and the
eleventh century. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West
Culture; LACH – Liberal Arts Humanities Core

ART 205. *INTRODUCTION TO WESTERN ART: GOTHIC TO BAROQUE. (3
Credits)
A survey of the painting, sculpture, architecture, and decorative arts of
Europe between the late Middle Ages and the seventeenth century. (Bacc
Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West
Culture; LACH – Liberal Arts Humanities Core

ART 206. *INTRODUCTION TO WESTERN ART: NEOCLASSICISM TO
CONTEMPORARY. (3 Credits)
A survey of painting, sculpture and other visual arts in the Western world
from the late eighteenth century to the present. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West
Culture; LACH – Liberal Arts Humanities Core

ART 208. *INTRODUCTION TO ASIAN ART. (3 Credits)
Introduces the distinctive, yet related, aesthetic traditions of South and
Southeast Asia, Inner Asia, and East Asia. It focuses on architectural
sites, sculptures, and paintings from prehistory to the present. (Bacc Core
Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and
Arts

ART 210. *HISTORY OF WESTERN ARCHITECTURE. (3 Credits)
A survey of buildings and architectural thought in the West from antiquity
to the twentieth century; focuses on major periods and movements of
architectural history by examining building types, patrons, materials,
building traditions, structural innovations and other critical aspects
inherent to architecture. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West
Culture

ART 211. WOODTURNING WITH SCIENCE I. (4 Credits)
An introduction to scientific woodturning. Students will get a grounding in
tools, lathes, sharpening, and set-up, and then will transition into turning
basic forms (spindle and bowl). Particular relevance will be placed upon
grain orientation, wood moisture content, wood anatomy, wood chemistry,
wood species and extractive effects, and how all of these attributed
affect both form and function. Class instruction will be entirely studio
based. CROSSLISTED as WSE 211.
Equivalent to: WSE 211
This course is repeatable for 8 credits.

ART 215. COLOR IN THE VISUAL ARTS. (4 Credits)
Studio course following ART 115 and ART 117 that examines the
properties of colors and their interaction. Emphasizes problem solving
and the experimental use of color.
Prerequisites: ART 115 with D- or better

ART 222. INTRODUCTION TO TIME-BASED ART. (4 Credits)
Introduction to time-based media using the computer as a tool. Studio
class developing skills in video art, sound art, performance, and other
time-based digital arts. Exploration of sequential, experimental, historical,
and contemporary themes and the role of the audience in time-based art.
Prerequisites: ART 121 with C- or better
Equivalent to: ART 122

ART 234. DRAWING II/FIGURE. (4 Credits)
Drawing from the life model with emphasis on skill and conceptual
awareness as well as anatomical consideration.
Prerequisites: ART 131 with D- or better

ART 263. DIGITAL PHOTOGRAPHY. (4 Credits)
Introductory course in digital photography. Focus on creation of
photographic images in series format. Technical camera operation
will be emphasized as well as basic photographic composition, use of
photographic editing software, historical grounding, and discussions
of contemporary issues in photography. Students must have the use
of a digital single lens reflex camera (DSLR) or mirrorless camera (with
viewfinder and fully manual controls).
Recommended: ART 115 and ART 120

ART 264. *PHOTOGRAPHY: HISTORY, TECHNOLOGY, CULTURE AND ART.
(3 Credits)
Introduction to the history of photography through aesthetic, cultural
and technical contexts. This course covers the history of photography
and its technologies, photography in art, some photographers and their
photographs and the purposes of photography. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ART 271. PRINTMAKING I. (4 Credits)
Introduction to the basic processes of printmaking, with options among
relief, lithography, intaglio, screen printing and monotype.
Prerequisites: ART 115 with C- or better and ART 131 [C-]
ART 281. PAINTING I. (4 Credits)
Introductory studio course with emphasis on basic materials and techniques in painting. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisites: ART 131 with C- or better

ART 291. SCULPTURE I. (4 Credits)
Studio course in basic materials and approaches used in sculpture; a foundation for further three-dimensional work. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisites: ART 117 with C- or better
Recommended: Art core curriculum

ART 306. ADVISOR REVIEW. (1 Credit)
A review, conducted by the student’s advisor and another faculty member of the student’s choosing, of work produced to date in the student’s area of concentration. Graded P/N.
Prerequisites: Fine Arts Portfolio Review with a score of 1

ART 310. *EARLY CHINESE ART AND ARCHAEOLOGY. (3 Credits)
Introduces major forms of Chinese art from the Neolithic period to the Tang dynasty (618-907 CE) and related major archaeological finds. Stresses the materials and processes of making art, development of representational art, and the role of visual arts in an aristocratic and religious culture. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts

ART 311. *LATE CHINESE ART AND CULTURE. (3 Credits)
Introduction to the major forms of Chinese art and visual culture from the eleventh century to the early twentieth century. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts

ART 312. *CONTEMPORARY CHINESE ART. (3 Credits)
Introduces origins and development of contemporary Chinese art and visual culture in its domestic and global contexts. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts

ART 313. *ART OF JAPAN. (3 Credits)
Surveys the arts of Japan from the prehistoric period to the twentieth century. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts

ART 320. *ANCIENT GREEK ART. (3 Credits)
Focuses on the major artistic developments in Ancient Greece from the Middle Bronze Age to 31 BCE, and especially on the city-state of Athens during the Fifth Century. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ART 321. *ANCIENT ROMAN ART AND ARCHITECTURE. (3 Credits)
Survey of ancient Roman art and culture between the sixth century BCE and fifth century CE, covering principal media, styles, and subject matter. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture

ART 322. *MEDIEVAL ART AND ARCHITECTURE. (3 Credits)
Survey of the art and architecture of the major periods and cultures of Europe and the Mediterranean between the fourth and the fourteenth century. Traces salient developments in thought and material culture of western civilization. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture

ART 323. *ITALIAN RENAISSANCE ART AND ARCHITECTURE. (3 Credits)
Survey of Italian Renaissance art and culture, covering the principal artists, patrons, media, styles, and subject matter. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture

ART 331. DRAWING CONCEPTS. (4 Credits)
Studio course emphasizing drawing composition as an investigative, conceptualizing and communicative nonverbal language. Independent thinking, problem solving, and creative development encouraged.
Prerequisites: ART 131 with C- or better and ART 234 [C-]
This course is repeatable for 12 credits.

ART 334. DRAWING III: FIGURE. (4 Credits)
Intermediate study of the human figure utilizing life models, the skeleton, and anatomy texts. Emphasis on gaining greater knowledge of the body’s underlying structure and potential for aesthetic expression.
Prerequisites: ART 234 with D- or better and (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Revie with a score of 1)
This course is repeatable for 12 credits.
Recommended: Art core curriculum

ART 339. PROFESSIONAL PRACTICES FOR ARTISTS. (3 Credits)
Examination of relevant issues and realities facing working artists today through class discussion, critical readings, gallery visits, guest lectures and panel discussions. Development of professional practices appropriate for artists and the business of art include portfolio development, writing and presentation skills, grants, contracts, exhibition opportunities and marketing strategies.
This course is repeatable for 6 credits.

ART 340. DARKROOM PHOTOGRAPHY I. (4 Credits)
Studio course in black-and-white film exposure and development, and printing in the darkroom. The medium of silver-based black-and-white photography is explored as a communication mode and art form. Historical, conceptual, technical and legal aspects of traditional wet processing are surveyed. Access to a single lens reflex (SLR) film camera is required. Course fee.
Recommended: ART 263 for Photography majors

ART 341. DARKROOM PHOTOGRAPHY II. (4 Credits)
Improving silver-gelatin printing and photographic presentation techniques. Emphasis on furthering creative visual language and individual photographic project development. Studio and lecture course. Student must supply a medium format or 35mm single lens reflex (SLR) film camera. Lec/studio.
Prerequisites: ART 340 with D- or better

ART 345. INTERMEDIATE PHOTOGRAPHY. (4 Credits)
Emphasis is on both technical and aesthetic expression of digital color photography, from initial image capture, color management to finished print along with color symbolism and composition. Exploration of narrative, sequencing and image-series concepts. Introduction to contemporary color photographers. Studio.
Prerequisites: ART 263 with C+ or better

ART 346. PHOTO ILLUSTRATION I. (3 Credits)
Prerequisites: (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Revie with a score of 1)
Recommended: ART 262 and Art core curriculum
ART 347. PHOTOGRAPH: STUDIO LIGHTING. (4 Credits)
Practical studio class surveying the basic principles and application of light in the creation of photographs. The development of craft and technique inside the studio will be emphasized but formal and conceptual considerations related to light and photography will also be explored.
Prerequisites: ART 263 with C or better
Recommended: ART 345

ART 348. CONCEPTS IN DIGITAL IMAGING. (4 Credits)
Approaches to non-traditional and the manipulated image in digital photography with an emphasis on producing personal imagery. Introduction to the history of the manipulated image in photography and to contemporary approaches to digital photography.
Prerequisites: ART 263 with D- or better
Recommended: ART 121 or prior Photoshop knowledge

ART 349. VIDEO ART. (4 Credits)
Studio course in video art and time-based media projects. Emphasis on experimental approaches to video art in a contemporary art context, linear and non-linear video production and the projection and screening of video art projects. Introduction to the history of video art as an art form.
Lec/studio. CROSSLISTED as NMC 349.
Prerequisites: ART 222 with C- or better and ART 263 [C-]
Equivalent to: NMC 349
This course is repeatable for 8 credits.

ART 350. PHOTOGRAPHY ON ASSIGNMENT. (4 Credits)
An introduction to shooting photographs on assignment. Students will create, edit, caption, and submit photographs for print publications, online media, and alternative/independent media venues. Students will experiment with text, audio slideshows, and other creative means of illustrating concepts and ideas. Also covered are history, law, and ethics of photojournalism.
Recommended: ART 263 or active knowledge of camera operations, shooting RAW files and Adobe Lightroom.

ART 351. INSTALLATION. (4 Credits)
Studio/lecture course designed to acquaint the student with the possibilities of using non-traditional means such as site, time, and interaction to communicate ideas.
Prerequisites: ART 291 with D- or better and (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
Recommended: Foundation curriculum

ART 352. *CREATIVE COLLABORATION: DESIGNING AND BUILDING. (3 Credits)
Working in multi-disciplinary teams, design, implement, and document a piece of public art work or science museum display. Projects may be made of any media, but must demonstrate creativity both in the engineering used to create them and the technology and society message they convey. (Bacc Core Course) CROSSLISTED as ENGR 352.
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: ENGR 352

ART 354. ALTERNATIVE PROCESSES IN PHOTOGRAPHY. (4 Credits)
Historical photographic printing methods in use today e.g., cyanotype, gum bichromate and more. Use of digital and analog negatives, mixing emulsions and coating paper by hand.
Prerequisites: ART 263 with C- or better and ART 345 [C-]
Recommended: ART 340

ART 359. *PHOTOGRAPHY: ACTIVISM, AND SOCIAL CHANGE. (3 Credits)
Explores photography as an agent of social change through creative projects and topical discussions. Emphasis on the visual language, ethical considerations, and strategies employed by activist photographers that disrupt dominant ideologies and address institutionalized inequality and privilege in the United States. No prior photography experience necessary. (Bacc Core Course)
Attributes: CPDP – Core, Perspective/Difference/Power/Discrimination

ART 364. *NINETEENTH-CENTURY ART. (3 Credits)
Lecture course covering the principal movements and trends in late eighteenth-century and nineteenth-century architecture, painting, and sculpture in Europe and America, from Neoclassicism to Symbolism. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ART 366. ART SINCE 1945. (3 Credits)
Lecture course covering the principal movements, theories and ideas in visual art since 1945, including painting, sculpture, photography, installation, performance and participatory art.
Recommended: ART 204 and ART 205 and ART 206

ART 367. *HISTORY OF DESIGN. (3 Credits)
A survey of the impact of technology on the visual qualities of graphic, advertising, fashion, architecture, and industrial design from the Victorian Arts and Crafts Movement to the computer age. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

ART 368. *HISTORY OF PHOTOGRAPHY. (3 Credits)
The development of photographic processes and applications. Influential figures. From the early beginnings to contemporary trends. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

ART 375. PRINTMAKING: RELIEF. (4 Credits)
Studio course in relief printmaking with emphasis on lino and woodcut, may include other relief processes, i.e. photo polymer plate. Black-and-white and color.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 271 [C-]

ART 376. PRINTMAKING: INTAGLIO. (4 Credits)
Studio course in intaglio printmaking with emphasis on drypoint, line etching, aquatint, softground and photo process. Black-and-white and possibly color for final project.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 271 [C-]

ART 377. PRINTMAKING: LITHOGRAPHY. (4 Credits)
Studio course in lithographic printmaking with emphasis on graining the stone, drawing with crayon and tusche, etching and reworking, inking and printing lithographic limestone. Black-and-white and possibly color for final project.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 271 [C-]
ART 378. PRINTMAKING: MONOTYPE. (4 Credits)
Studio course in monotype printmaking with emphasis on drawing/painting with brushes, oil pastels, watercolors, water-based crayons, inking with a lithographic roller and printing with an etching press. Black-and-white and color.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 271 [C-]
ART 379. PRINTMAKING: SCREEN PRINTING. (4 Credits)
Studio course in screen printing with emphasis on paper stencil, drawing fluid and photo emulsion processes. Students are exposed to a range of techniques and concepts are encouraged to investigate personal motivations while making multiple color prints.
Prerequisites: ART 115 with C- or better and (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
Recommended: Art core curriculum. ART 100, ART 101, ART 117, ART 131, ART 204, ART 205, ART 206.
ART 381. PAINTING II: THE FIGURE. (4 Credits)
Studio course with emphasis on painting from the live model; understanding the figure in terms of color, form and composition, the figure as symbol, implied narrative and vehicle of expression.
Prerequisites: ART 281 with C- or better and ART 234 [C-]
This course is repeatable for 8 credits.
Recommended: ART 234 and Art core curriculum.
ART 382. PAINTING II: CONCEPTS. (4 Credits)
Painting with emphasis on experimentation and an exploratory investigation of mixed media, new media, collage, and assemblage, utilizing either representation or abstraction.
Prerequisites: ART 281 with D- or better and (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
This course is repeatable for 8 credits.
Recommended: Art core curriculum.
ART 383. PAINTING II: ABSTRACT AND MULTIMEDIA. (4 Credits)
Intermediate studio course with emphasis on contemporary directions in painting: abstraction and non-literal approaches.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 281 [C-]
This course is repeatable for 12 credits.
Recommended: Art core curriculum.
ART 384. PAINTING II: NEW GENRE. (4 Credits)
Exploration of current directions in painting using traditional and non-traditional concepts and techniques.
Prerequisites: ART 281 with D- or better and (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
This course is repeatable for 12 credits.
ART 385. PAINTING II: ENCAUSTICS. (4 Credits)
Exploration and application of a variety of traditional and non-traditional techniques using encaustics paint; beeswax and pigment fused to a surface.
Prerequisites: ART 281 with C- or better
This course is repeatable for 8 credits.
ART 386. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART I. (4 Credits)
The first in an interdisciplinary sequence of courses that examines the development and interrelationships of American art and literature from contact to the present. ART 386, Part I, covers Conquest to Civil War. CROSSLISTED as ENG 386.
Equivalent to: ENG 386.
ART 387. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART II. (4 Credits)
The second course an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ART 387, Part II, covers Civil War to Harlem Renaissance. CROSSLISTED as ENG 387.
Equivalent to: ENG 387
ART 388. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART III. (4 Credits)
The second course an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ART 388, Part III, covers Great Depression to Postmodernity. CROSSLISTED as ENG 388.
Equivalent to: ENG 388
ART 391. SCULPTURE II. (4 Credits)
Intermediate studio course with emphasis in material research and developing greater skills and technical knowledge in sculptural fabrication processes.
Prerequisites: ART 291 with C- or better
This course is repeatable for 12 credits.
Recommended: Art core curriculum.
ART 395. SPECIAL TOPICS IN EARLY ART HISTORY. (3 Credits)
Intermediate studio course in painting with aqueous materials. Emphasis on media and composition. PREREQ: Core curriculum; ART 295.
This course is repeatable for 99 credits.
ART 396. SELECTED TOPICS IN MODERN ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.
ART 397. SELECTED TOPICS IN GLOBAL ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.
ART 398. SPECIAL TOPICS IN ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.
ART 399. SPECIAL TOPICS. (0-16 Credits)
This course is repeatable for 16 credits.
ART 399H. SPECIAL TOPICS. (0-16 Credits)
Attributes: HNRS – Honors Course Designator
This course is repeatable for 16 credits.
ART 400. THE DISCERNING PEN: ART CRITICISM. (3 Credits)
Writing on art history provides students with an opportunity to write about art using three distinct structures and styles while drawing on the student's own ideas and opinions.
Prerequisites: (ART 101 with D- or better or WR 121 with C- or better) and ART 200 [D-] and ART 206 [D-]
ART 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
ART 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.
ART 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.
ART 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
ART 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.
ART 407. SEMINAR. (1-16 Credits)
Equivalent to: ART 407H
This course is repeatable for 16 credits.
Recommended: ART 206
ART 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ART 409. PRACTICUM STUDENT MEDIA. (1 Credit)
Practical workshop class offering experiential learning in student media on the Oregon State University campus.
Equivalent to: NMC 409
This course is repeatable for 12 credits.

ART 410. INTERNSHIP. (1-16 Credits)
A one-quarter residency with an appropriate, approved agency or organization where a student may receive practical experience related to the objectives of the Department of Art. The intern observes and produces; the work is supervised and evaluated, both by the agency and the art faculty.
This course is repeatable for 16 credits.

ART 411. *ART IN CONTEXT HISTORICAL AND CRITICAL APPROACHES. (3 Credits)
Seminar developing writing and research skills in the field of art with interdisciplinary approaches. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: Fine Arts Portfolio Review with a score of 1
Recommended: Art core curriculum plus 12 credits of upper-division studio credits.

ART 413. WOODTURNING WITH SCIENCE II. (4 Credits)
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. CROSSLISTED as WSE 413.
Prerequisites: WSE 210 with C- or better and WSE 211 [C-]
Equivalent to: WSE 413
This course is repeatable for 8 credits.

ART 414. ARTS MANAGEMENT. (3 Credits)
Survey of the theory and practice of managing an arts organization in an increasingly digital world. Includes managing diverse teams, interpersonal communication, cultural competence, and best practices in leadership, organizational planning, and conflict management.

ART 415. ART FOR TEACHERS I. (4 Credits)
A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.
Recommended: Fine Arts Portfolio Review (ART1) and Graphic Design Portfolio Review (ART2)

ART 416. ART FOR TEACHERS II. (4 Credits)
A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.
Prerequisites: (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)

ART 418. PORTFOLIO SEMINAR. (2 Credits)
An advanced lecture course providing an overview of pertinent issues in creating a professional graphic design portfolio. Graded P/N.
Prerequisites: Graphic Design Portfolio Review with a score of 1

ART 421. MUSEUM CURATORSHIP AND MANAGEMENT. (1-5 Credits)
Prerequisites: ART 341 with D- or better
This course is repeatable for 12 credits.

ART 422. NEW MEDIA: INTERACTIVE. (4 Credits)
An advanced course designing digital experiences with emphasis on innovative navigation, architectural structures, theoretical, and historical issues of new media.
Prerequisites: Graphic Design Portfolio Review with a score of 1
Recommended: CS 295

ART 431. DRAWING IV. (3-5 Credits)
Development of an individual approach to the varied aspects of drawing, emphasis on exploration of traditional and contemporary techniques and styles. Course offered 3 to 5 credits per term.
Prerequisites: (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
This course is repeatable for 15 credits.
Recommended: 9 credits of ART 331.

ART 432. *GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE. (3 Credits)
A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women’s, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. (Bacc Core Course) CROSSLISTED as QS 432, WGSS 432.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 432, WGSS 432

ART 434. DRAWING IV/Figure. (3-5 Credits)
Development of an individual approach to the varied aspect of figure drawing; emphasis on exploration of traditional and contemporary techniques and styles. Course offered 3-5 credits per term; maximum 15 credits. Departmental approval required for 5 credits.
Prerequisites: (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
This course is repeatable for 15 credits.
Recommended: 9 credits of ART 334.

ART 441. PHOTOGRAPHY III. (4 Credits)
Prerequisites: ART 341 with D- or better
This course is repeatable for 12 credits.

ART 443. COMBINED MEDIA: PHOTO INSTALLATION. (4 Credits)
This studio course explores the use the photographic image in conjunction with other studio media to create multi-media works and site-specific installations. Designed to remove and release the photographic image from its ubiquitous tradition, it looks to reassign the association of photography as merely a two dimensional pursuit. Emphasizing the relationship between objects, the course investigates installation art as a contemporary practice and focuses on the role photography or the photographic image has played in expanding this dialogue. Issues involved with using photography for the purposes of creating multimedia spatial experiences are discussed and compared with ideas related to traditional photographic presentation.
Prerequisites: ART 345 with C or better
This course is repeatable for 8 credits.
Recommended: Understanding of basic camera functions and competency using digital printing techniques
ART 444. THE CONSTRUCTED IMAGE. (4 Credits)
An advanced studio photography course that explores directed, manipulated, and constructed photographs. It investigates this rich tradition by looking at both historical and contemporary photography. Issues involved with making clearly artificial photographs are discussed and compared with traditional ideas related to veracity of the photographic image.
Prerequisites: ART 345 with C or better
Recommended: Pre-established foundation of technical camera operations and digital printing skills

ART 446. DOCUMENTARY PHOTOGRAPHY. (4 Credits)
Intensive in-depth documentary photography course designed to develop skill in telling stories with pictures. The course requires pitching a photographic project, reading and writing about documentary photography, and producing a sustained photographic essay with a self-selected documentary subject. Expanded documentary mediums and socially concerned photography are also covered. Hybrid Course.
Prerequisites: ART 263 with C or better and ART 345 [C-]
This course is repeatable for 12 credits.

ART 447. ADVANCED STUDIO LIGHTING. (4 Credits)
Practical studio course focusing on the advanced applications of studio and location lighting. Students will use digital cameras in combination with professional strobe and mixed artificial lighting. Real-world location lighting challenges will be mastered: scouting locations, hauling and setting up gear, working with models and products, and learning to work on-location.
Prerequisites: ART 263 with C or better and ART 347 [C]
This course is repeatable for 8 credits.

ART 451. INTRODUCTION TO ARTS ENTREPRENEURSHIP. (3 Credits)
Survey of the business strategies behind a successful career in the arts. Emphasizes the importance of entrepreneurial thinking, engages students with the fundamentals of the arts "business", and explores ways to influence and shape the industry's future. (FA) CROSSLISTED as MUS 451, TA 451.
Attributes: LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 451, TA 451

ART 454. ALTERNATIVE PROCESSES IN PHOTOGRAPHY II. (4 Credits)
Advanced projects using historical photographic processes.
Prerequisites: ART 354 with C- or better
This course is repeatable for 8 credits.

ART 455. PORTFOLIO-PHOTOGRAPHY/VIDEO ART. (4 Credits)
Culmination-level course for the creation of an exhibition-level photographic portfolio or other artistic product using lens-based media. Taught using lectures, critiques, readings, writing and self-reflection.
Prerequisites: ART 340 with C- or better and ART 345 [C] and ART 347 [C-]
This course is repeatable for 12 credits.

ART 460. HISTORY OF AMERICAN ART. (3 Credits)
Specialized study of the visual arts in the United States focusing on such issues as landscape, mass culture, and American responses to European culture. Art and ideas from the colonial period to 1900. Not offered every year.
Recommended: 9 credits of art history and American literature or American history.

ART 461. HISTORY OF AMERICAN ART. (3 Credits)
Specialized study of the visual arts in the United States focusing on such issues as landscape, mass culture, and American responses to European culture. American modernism since 1900. Not offered every year.
Recommended: 9 credits of art history and American literature or American history.

ART 462. DIRECTIONS AND ISSUES IN CONTEMPORARY ART. (3 Credits)
Specialized study of current trends, developments, and critical issues, including the study of new media such as video and photography, as they manifest themselves in the contemporary art world. May be repeated with different topics. Not offered every year.
This course is repeatable for 9 credits.
Recommended: 9 credits of art history

ART 463. TOPICS IN RENAISSANCE AND BAROQUE ART. (3 Credits)
Specialized study of selected areas of special interest, including such topics as Michelangelo, Leonardo da Vinci, Bernini, and art in the Medici's Florence. Subject matter may vary year to year. Not offered every year.
This course is repeatable for 6 credits.
Recommended: 9 credits of art history

ART 464. CULTURAL STUDIES OF THE MUSEUM. (3 Credits)
Overview of the history, visual culture, and cultural significance of the Western museum. Special attention paid to the development of the art museum and artist's projects that pertain to museums.
Recommended: 9 credits of art history

ART 468. HISTORY OF PRINTMAKING. (3 Credits)
Survey of the social, economic, intellectual, and technical history of printmaking between the early Middle Ages and the twentieth century in Asia, Europe, and the Americas. Treats the major printmaking processes of woodcut, intaglio, lithography, silkscreen, and photography.

ART 469. METHODS AND THEORY OF ART HISTORY. (3 Credits)
Seminar designed to improve writing and library skills, develop interdisciplinary approaches, and explore art historical theory from Plato to the present.
Attributes: CWIC – Core, Skills, WIC
Recommended: 9 credits of art history

ART 475. PRINTMAKING STUDIO. (4 Credits)
Studio workshop in relief, intaglio, lithographic, and silkscreen media on an individual project basis. Course offered 4 credits per term; maximum 20 credits.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 271 [C-]
This course is repeatable for 20 credits.
Recommended: 8 credits of 300-level printmaking

ART 479. PRINTMAKING: ADVANCED SCREEN PRINTING. (4 Credits)
Studio course in screen printing with an emphasis on photo emulsion processes. Students are encouraged to integrate these processes with other art-making methods in their creative work.
Prerequisites: ART 379 with D- or better and (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Revie with a score of 1)
This course is repeatable for 12 credits.

ART 481. PAINTING III. (4 Credits)
Development of individual interests and directions in painting. Maximum 16 credits.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 131 [C-] and ART 281 [C]
This course is repeatable for 16 credits.
Recommended: 12 credits of any combination of the following: ART 381, ART 382, ART 383, ART 384, ART 385.

ART 491. SCULPTURE III. (4 Credits)
Development of individual interests and directions in sculpture.
Prerequisites: ART 391 with C- or better
This course is repeatable for 24 credits.
Recommended: 12 credits of 300-level sculpture
ART 492. SPECIAL TOPICS IN ASIAN ART. (3 Credits)
Specialized study of selected areas of Asian art history such as Chinese calligraphy, Song Dynasty painting, and storytelling in Asian art. May be repeated with different topics.
This course is repeatable for 99 credits.

ART 494. SPECIAL TOPICS IN EARLY ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.

ART 495. EXHIBITION DESIGN. (1 Credit)
Participatory experience in art gallery exhibition design working in Fairbanks Gallery. Includes specialized study in visual design, lighting, and technical installation. Course offered 1 credit per term, maximum 3 credits.
Prerequisites: (Fine Arts Portfolio Review with a score of 1 or Graphic Design Portfolio Review with a score of 1)
This course is repeatable for 3 credits.

ART 496. SELECTED TOPICS IN MODERN ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.

ART 497. SELECTED TOPICS IN GLOBAL ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.

ART 498. SPECIAL TOPICS IN ART HISTORY. (3 Credits)
This course is repeatable for 99 credits.

ART 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 99 credits.

ART 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ART 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ART 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ART 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ART 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ART 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.
Recommended: ART 206

ART 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ART 510. INTERNSHIP. (1-12 Credits)
A one-quarter residency with an appropriate, approved agency or organization where a student may receive practical experience related to the objectives of the Department of Art. The intern observes and produces; the work is supervised and evaluated, both by the agency and the art faculty.
This course is repeatable for 15 credits.

ART 514. ARTS MANAGEMENT. (3 Credits)
Survey of the theory and practice of managing an arts organization in an increasingly digital world. Includes managing diverse teams, interpersonal communication, cultural competence, and best practices in leadership, organizational planning, and conflict management.

ART 515. ART FOR TEACHERS I. (4 Credits)
A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.

ART 516. ART FOR TEACHERS II. (4 Credits)
A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.

ART 532. GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE. (3 Credits)
A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. CROSSTLISTED as QS 532, WGSS 532.
Equivalent to: QS 532, WGSS 532

ART 546. DOCUMENTARY PHOTOGRAPHY. (3 Credits)
An intensive shooting course in 35mm photography designed to develop skill in telling stories using pictures. Single picture and multiple picture stories. Lec/lab.
This course is repeatable for 9 credits.
Recommended: ART 350

ART 556. PORTFOLIO-PHOTOGRAPHY/VIDEO ART. (4 Credits)
Culmination-level course for the creation of an exhibition-level photographic portfolio or other artistic product using lens-based media. Taught using lectures, critiques, readings, writing and self-reflection.
This course is repeatable for 12 credits.

ART 562. DIRECTIONS AND ISSUES IN CONTEMPORARY ART. (3 Credits)
Specialized study of current trends, developments, and critical issues, including the study of new media such as video and photography, as they manifest themselves in the contemporary art world. Not offered every year. May be repeated with different topics.
This course is repeatable for 9 credits.
Recommended: 9 credits of art history

ART 564. CULTURAL STUDIES OF THE MUSEUM. (3 Credits)
Overview of the history, visual culture, and cultural significance of the Western museum. Special attention paid to the development of the art museum and artist's projects that pertain to museums.
Recommended: 9 credits of art history

ART 569. METHODS AND THEORY OF ART HISTORY. (3 Credits)
Seminar designed to improve writing and library skills, develop interdisciplinary approaches, and explore art historical theory from Plato to the present.
Recommended: 9 credits of art history

ART 581. PAINTING III. (3-5 Credits)
Development of individual interests and directions in painting. Course offered 3 to 5 credits per term; maximum 15 credits.
This course is repeatable for 15 credits.
Recommended: 9 credits of 300-level painting

ART 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 99 credits.

Communication

COMM 111. *PUBLIC SPEAKING. (3 Credits)
Public communication as it relates to informative and persuasive discourse. The theory and practice of public speaking in informative and persuasive contexts. Lec/rec. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech
Equivalent to: COMM 111H
COMM 111H. *PUBLIC SPEAKING. (3 Credits)
Public communication as it relates to informative and persuasive discourse. The theory and practice of public speaking in informative and persuasive contexts. Lec/rec. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech; HNRS – Honors Course Designator
Equivalent to: COMM 111

COMM 114. *ARGUMENT AND CRITICAL DISCOURSE. (3 Credits)
Examination of argumentation as a part of human interaction and investigation. The course emphasizes the processes by which people give reasons to gain adherence and to justify beliefs and actions. The course includes readings, writing, and presentations concerned with the nature of arguments, processes of arguing, and argument criticism. Lec/rec. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech
Equivalent to: COMM 114H

COMM 114H. *ARGUMENT AND CRITICAL DISCOURSE. (3 Credits)
Examination of argumentation as a part of human interaction and investigation. The course emphasizes the processes by which people give reasons to gain adherence and to justify beliefs and actions. The course includes readings, writing, and presentations concerned with the nature of arguments, processes of arguing, and argument criticism. Lec/rec. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech; HNRS – Honors Course Designator
Equivalent to: COMM 114

COMM 180. INTRODUCTION TO THE RHETORIC OF THE FILM. (3 Credits)
The motion picture from prephotographic eras to the present; individuals responsible for major advances in theory and technique. The motion picture and social influence. Films viewed for discussion and analysis. Film fee required.

COMM 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 211. *COMMUNICATING ONLINE. (3 Credits)
In our increasingly technological world, we use mediated communication to build relationships. Introduces students to the theoretical and practical dimensions on online communication in order to facilitate more informed analysis and performance of online communication as a means of developing both interpersonal and public relationships. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech

COMM 218. *INTERPERSONAL COMMUNICATION. (3 Credits)
Introduction to dyadic and relational communication. Overview of current research in such areas as verbal and nonverbal messages, self-concept and perception, culture and gender stereotypes and styles, relational development and dissolution, deception, compliance gaining and conflict management. (Bacc Core Course)
Attributes: CSW3 – Core, Skills, Speech
Equivalent to: COMM 218H

COMM 221. FORENSICS. (3 Credits)
Laboratory experience in debate, public speaking, and interpretation of literature. Preparation for intercollegiate debate and forensics participation.

COMM 280. MEDIA COMMUNICATION IN THE INFORMATION AGE. (3 Credits)
A survey of the traditional media of mass communication and the new and emerging media technologies: their development, role in contemporary society and impact upon the public. The influence of mediated communication upon living in the information society. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 312. ADVANCED PUBLIC SPEAKING. (3 Credits)
Advanced theory and practice in public speaking. Simulated public speaking situations, audience analysis, and rhetorical strategies will be emphasized. Students will prepare and present a variety of public speeches.
Prerequisites: COMM 111 with D- or better or COMM 111H with D- or better or COMM 114 with D- or better or COMM 114H with D- or better

COMM 314. ARGUMENTATION. (3 Credits)
Concepts and processes of argumentation, systems of logic, critical analysis of contemporary efforts to influence. Examination of arguing to gain adherence and argumentation as a way of knowing. Development of cases and argument briefs for presentation. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: COMM 114 with D- or better or COMM 114H with D- or better

COMM 316. ADVANCED PERSUASION. (3 Credits)
Advanced theory and practice in persuasion, with evidence on social and behavioral science research. Examination of the cognitive and affective aspects of persuasion, focusing particularly on the audience. Consideration of persuasion in interpersonal relations, organizations, public advocacy, and public relations. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: COMM 111

COMM 318. ADVANCED INTERPERSONAL COMMUNICATION. (3 Credits)
Advanced theory and practice in communication in interpersonal relations. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: COMM 218 with D- or better or COMM 218H with D- or better

COMM 320. INTRODUCTION TO RHETORICAL THEORY. (3 Credits)
Introduction to the basic theories of rhetoric, as well as the background of rhetoric as a discipline in speech communication. (H)
Attributes: LACH – Liberal Arts Humanities Core

COMM 321. INTRODUCTION TO COMMUNICATION THEORY. (3 Credits)
Introduction to 20th century models, theories, and empirical research programs in communication. Survey of selected theories and social scientific methods across diverse contexts in communication. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 322. SMALL-GROUP PROBLEM SOLVING. (3 Credits)
Theory and practice of small-group decision making. Group processes of problem solving and decision by consensus. The history and role of group problem solving in a democratic society. Group power, leadership, and roles. Experience with problems of fact, value, and policy. (SS)
Attributes: LACS – Liberal Arts Social Core
Recommended: COMM 218

COMM 323. COMMUNITY DIALOGUE. (4 Credits)
Examination of the nature and role of community dialogue in formal and informal social scenes in which participants communicate differing perspectives, values and beliefs. Taught at OSU-Cascades only.
COMM 324. COMMUNICATION IN ORGANIZATIONS. (3 Credits)
Examination of the nature and role of communication in formal and informal organizations. Introductory survey of central issues in the study of organizations, including corporate communication, leadership, organizational effectiveness, power, organizational culture, management styles, organizational conflict, and decision making. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 325. COMMUNICATING LEADERSHIP. (4 Credits)
Theory and practice of communicating leadership. Communication processes of facilitating productive climates, innovative and creative leading, and goal-oriented community leading. Offered at OSU-Cascades only.

COMM 326. INTERCULTURAL COMMUNICATION. (3 Credits)
Perspectives, theories, and experiences of communication in intercultural, cross-cultural, and pan-cultural relations. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 328. NONVERBAL COMMUNICATION. (3 Credits)
The study of human communication behavior that transcends the spoken and written word; nondiscursive symbolism. The course examines the relationship between nonverbal and verbal communication behavior and nonverbal communication skill development. Topics addressed include space, distance, the environment, touch, gesture, facial expression, and gaze as communication. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 329. FAMILY COMMUNICATION. (3 Credits)
How various elements of communication impact familial relationships. Two main discussions: general communication patterns in the family, and various understudied types of family relationships. Provides students with insights into past familial experiences and skills for future family relationships.
Prerequisites: COMM 218 with D or better

COMM 350. DEBATE AND FORENSICS WORKSHOP. (1-3 Credits)
Laboratory experience in debate, public speaking, and interpretation of literature. Preparation for intercollegiate debate and forensics participation.
This course is repeatable for 15 credits.

COMM 368. PROPAGANDA AND SOCIAL CONTROL. (3 Credits)
Case studies, examples, and analyses of direct and indirect influences upon thought, belief, and action involving mass media of communication, including film, theatre, radio, television, posters, and art objects. Historical approach using film, tape, and recordings for student analysis and discussion. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 372. VISUAL RHETORIC. (3 Credits)
The course will survey the major theories of semiotics. Using semiotics as a foundation, students will explore the nature of the rhetoric of the visual image. (H)
Attributes: LACH – Liberal Arts Humanities Core

COMM 380. IMAGE AND MYTH IN FILM. (3 Credits)
Film as a medium for creating, reflecting, and defining values, roles, styles, conflicts, problems, strategies, expectations, and institutions in American life. Various methods of analysis and evaluation are applied to film as an agent and artifact. Film images of the frontier, war, women, men, justice, America, progress, and beauty are explored. Film fee required. (H)
Attributes: LACH – Liberal Arts Humanities Core
COMM 414. COMMUNICATION RESEARCH METHODS. (3 Credits)
Communication research and its relationship to theory. Quantitative and qualitative methods of investigation in speech communication. Experimental and non-experimental research design; naturalistic observation; issues of reliability and validity; statistical analysis. Standards and principles of writing and reporting research.
Prerequisites: COMM 321 with D- or better

COMM 416. ETHNOGRAPHY OF COMMUNICATION. (3 Credits)
Study and practice of using ethnography of communication as a research method for developing theory in communication studies; topics include data collection, analysis, and writing ethnographic reports. (SS)
Attributes: LACS – Liberal Arts Social Core

COMM 418. *INTERPERSONAL COMMUNICATION THEORY AND RESEARCH. (3 Credits)
Current theory, research, and practice in interpersonal communication. Issues addressed may include compliance gaining, nonverbal behavior, family communication, gender issues, impression formation, rules, and human relations. (SS) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACS – Liberal Arts Social Core
Prerequisites: COMM 321 with D- or better

COMM 422. *SMALL-GROUP COMMUNICATION THEORY AND RESEARCH. (3 Credits)
Current theory, research, and practice in communication and small-group communication. Issues addressed may include leadership, decision making, problem solving, training, and human relations. (SS) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACS – Liberal Arts Social Core
Prerequisites: COMM 321 with D- or better

COMM 425. COMMUNICATION AND YOUTH OUTREACH. (4 Credits)
Examines the role of communication outreach when working with youth. Study and examination of applied youth communication theory and research. Topics may include establishing communication boundaries, communicating identity, anti-smoking and anti-drug campaigns, social exclusion, effects of media, and pro-social communication. Students are required to volunteer in a youth context coordinated by the instructor. Taught only on the OSU-Cascades Campus.

COMM 426. INTERCULTURAL COMMUNICATION: THEORIES AND ISSUES. (3 Credits)
Advanced study in intercultural communication theoretical developments and research directions. Topics addressed may include intercultural research methods, training, language and culture, acculturation, and intercultural effectiveness. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: COMM 321 with D- or better and COMM 326 [D-]

COMM 427. CULTURAL CODES IN COMMUNICATION. (3 Credits)
Study and examination of the contextualized use of communication within speech communities and cultures; topics include the cultural patterning of communication and cultural communication theory.

COMM 430. THEORETICAL ISSUES IN COMMUNICATION INQUIRY. (3 Credits)
Review of conceptual, philosophical, ontological, epistemological, and methodological issues in the development of theories in human communication; application to contemporary, empirical human communication research. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: COMM 321 with D- or better

COMM 432. GENDER AND COMMUNICATION. (3 Credits)
Investigation of impact of sex and gender on communication in conflict, decision-making, leadership, nonverbal messages, language, and interpersonal relationships. Focus on definitions of sex and gender in regard to knowledge, social constructs, and self-development.
Prerequisites: COMM 321 with D- or better
Equivalent to: COMM 432H

COMM 435. SCIENTIFIC, TECHNICAL, & PROFESSIONAL COMMUNICATION CAPSTONE. (1 Credit)
Students complete a portfolio comprised of material generated throughout previous courses in the Certificate in Scientific, Technical, and Professional Communication. CROSSTLISTED as WR 435.
Equivalent to: WR 435
Recommended: Completion of 18 credits towards the Scientific, Technical and Professional Communication Certificate

COMM 437. HEALTH COMMUNICATION. (3 Credits)
This class is designed to unpack various elements of how communication impacts health, and vice versa. There are three main sections to this course: 1) discussing doctor-patient communication, 2) discussing the effects of health campaigns, and 3) discussing the link between communication and both psychological and physiological health.

COMM 440. THEORIES OF CONFLICT AND CONFLICT MANAGEMENT. (3 Credits)
Conflict on a variety of levels: intrapersonal, interpersonal, group, public, and social. Conflict in a variety of contexts: relationships, family, organizations, community, and society. Constructive and destructive means of confronting and managing conflict; social and psychological aspects of conflict; conflict analysis; causes of conflict; conflict and peace, social order, and social change; case studies of conflict. (SS)
Attributes: LACS – Liberal Arts Social Core
Recommended: COMM 321

COMM 442. BARGAINING AND NEGOTIATION PROCESSES. (3 Credits)
Theory and practice of bargaining and negotiation as means of settling disputes, with emphasis on the role of communication. Strategies and tactics of distributive and integrative bargaining orientations. Negotiation preparation and experience through case studies and simulations. (SS)
Attributes: LACS – Liberal Arts Social Core
Recommended: COMM 321

COMM 444. THIRD PARTIES IN DISPUTE RESOLUTION: MEDIATION AND ARBITRATION. (3 Credits)
Philosophies, strategies, practices, and characteristics of mediation and arbitration processes in the settlement of conflicts and disputes. Study of the role of the third party neutral in the peace making process. Case studies and simulations in mediation and arbitration. (SS)
Attributes: LACS – Liberal Arts Social Core
Recommended: COMM 321

COMM 446. *COMMUNICATION IN INTERNATIONAL CONFLICT AND DISPUTES. (3 Credits)
Examination of the nature of international conflicts and disputes and the roles culture and communication play in resolving them constructively. Analysis of negotiation, mediation, and international law as approaches to dealing with international political, economic, cultural, and religious disputes. Scrutiny of contemporary world conflicts. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Recommended: COMM 321
COMM 454. ADVANCED ARGUMENTATION. (3 Credits)
Advanced study in classical and current theories of the persuasive and epistemological functions of argumentation. Examination of the dominant contemporary theorists, including Toulmin, Perelman, and Willard. Analysis of research and applied perspectives, including conversational argument, argument fields, the philosophy of argument, argument as rhetoric, and argument in contexts. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 456. RHETORIC: 500 BC TO 500 AD. (3 Credits)
History and philosophy of rhetorical principles. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 458. RHETORIC: 500 AD TO 1900. (3 Credits)
History and philosophy of rhetorical principles. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 459. CONTEMPORARY THEORIES OF RHETORIC. (3 Credits)
A survey of contemporary rhetorical theories from 1900 to the present. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 460. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1750 TO 1900. (3 Credits)
Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 462. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1900-PRESENT. (3 Credits)
Speech criticism; great American speakers; relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 464. RHETORICAL CRITICISM. (3 Credits)
Explores the approaches to the criticism of rhetoric, including aesthetic, social movement, genre, feminist, and other modes of criticism. 
Prerequisites: COMM 320 with D- or better

COMM 466. ETHICS OF RHETORIC. (3 Credits)
Examines the ethical questions raised by the use of persuasive discourse, including the derivation of standards of ethical persuasion and approaches to ethical judgment about persuasion. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: COMM 320 with D- or better

COMM 470. HISTORY OF SPEECH COMMUNICATION. (3 Credits)
Examines the theories and practices involved in the development of speech communication as a field and a discipline, with a special emphasis on the central roles played by rhetorical theory and criticism.
Prerequisites: COMM 320 with D- or better and COMM 321 [D-]

COMM 472. THE RHETORIC OF POPULAR CULTURE. (3 Credits)
A survey of theories of popular culture from Arnold to Hall. Students will examine various artifacts of popular culture and the influences they exert. (H)
Attributes: LACH – Liberal Arts Humanities Core

COMM 476. ISSUES IN THE FREEDOM OF SPEECH. (3 Credits)
Examination of the theories of free expression and case materials related to tests of free speech in key U.S. Supreme Court cases. The course emphasizes the context of social and political movements from which the cases arise. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: COMM 320

COMM 478. POLITICAL CAMPAIGN RHETORIC. (3 Credits)
Theory, research and methods of political campaign rhetoric. Topics include rhetorical strategies and tactics in advertising, national conventions, broadcast debates, media coverage and public opinion polls. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: COMM 320

COMM 482. THE MEDIA IN CULTURE AND SOCIETY. (3 Credits)
The study of the societal-cultural impact on the media, and their effect upon individuals, social, cultural, political, economic, and leisure structures and systems. Special focus on the issues of media in shaping values, molding opinions, and reflecting/projecting attitudes, beliefs, and behaviors, including media’s role in racial, gender, and familial relations. (SS)
Attributes: LACS – Liberal Arts Social Core
Recommended: COMM 280

COMM 484. MEDIA CRITICISM. (3 Credits)
A critical examination of the media analysis of content, forms and deployment of media messages and products. A critical study of the structure, functions and economics of media systems. A consideration of media ethics and responsibilities in relation to news and information, entertainment, advertising and marketing, and social-cultural influence. (SS)
Attributes: LACS – Liberal Arts Social Core
Recommended: COMM 280

COMM 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

COMM 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 510. COMMUNICATION INTERNSHIP. (1-12 Credits)
An assignment in a private or public business or agency. The student observes or works in one or more departments of the enterprise, perhaps in one area of interest or specialization (e.g., public relations, training, personnel, research and planning). Work is supervised by the agency staff, supervising school faculty member(s) provide academic evaluation. 12 credits maximum. Graded P/N.
This course is repeatable for 12 credits.
COMM 512. TOPICS IN SPEECH COMMUNICATION. (3 Credits)
Contemporary issues in speech communication: appraisal and discussion of current theories, trends, research methods, problems, or applications.

This course is repeatable for 9 credits.
Recommended: 9 credits of speech communication.

COMM 514. COMMUNICATION RESEARCH METHODS. (3 Credits)
Communication research and its relationship to theory. Quantitative and qualitative methods of investigation in speech communication. Experimental and non-experimental research design; naturalistic observation; issues of reliability and validity; statistical analysis. Standards and principles of writing and reporting research.

Recommended: COMM 321

COMM 516. ETHNOGRAPHY OF COMMUNICATION. (3 Credits)
Study and practice of using ethnography of communication as a research method for developing theory in communication studies; topics include data collection, analysis, and writing ethnographic reports.

Recommended: COMM 321

COMM 517. RESEARCH METHODS IN COMMUNICATION. (3 Credits)
Introduction to the structure, process, and logic of quantitative empirical research in communication. Topics include research design, measurement, methodology, and descriptive statistics. Think of this as a skills course, where you are going to learn how to understand, critique, and design quantitative methodological approaches. Note that this course is rigorous, and will hopefully challenge you to better understand how research applies to your life outside of the classroom.

COMM 518. INTERPERSONAL COMMUNICATION THEORY AND RESEARCH. (3 Credits)
Current theory, research, and practice in interpersonal communication. Issues addressed may include compliance gaining, nonverbal behavior, family communication, gender issues, impression formation, rules, and human relations.

Recommended: COMM 321

COMM 520. INTRODUCTION TO GRADUATE STUDY IN SPEECH COMMUNICATION. (3 Credits)
Introductory graduate seminar in the field of communication. Emphasis on the breadth and depth of the discipline, graduate study, and research directions.

COMM 522. SMALL-GROUP COMMUNICATION THEORY AND RESEARCH. (3 Credits)
Current theory, research, and practice in communication and small-group communication. Issues addressed may include leadership, decision making, problem solving, training, and human relations.

Recommended: COMM 321

COMM 524. COMMUNICATION IN ORGANIZATIONS: THEORIES AND ISSUES. (3 Credits)
Analysis of human interaction within the informal and formal systems of organizations. Theory, research, and practice relevant to the analysis of the nature and role of communication within small, mid-range and highly complex organizations. The course addresses structural, functional, and cultural features of communication in organizational environments.

COMM 526. INTERCULTURAL COMMUNICATION: THEORIES AND ISSUES. (3 Credits)
Advanced study in intercultural communication theoretical developments and research directions. Topics addressed may include intercultural research methods, training, language and culture, acculturation, and intercultural effectiveness.

Recommended: COMM 321 and COMM 326

COMM 527. CULTURAL CODES IN COMMUNICATION. (3 Credits)
Study and examination of the contextualized use of communication within speech communities and cultures; topics include the cultural patterning of communication and cultural communication theory.

COMM 530. THEORETICAL ISSUES IN COMMUNICATION INQUIRY. (3 Credits)
Review of conceptual, philosophical, ontological, epistemological, and methodological issues in the development of theories in human communication; application to contemporary, empirical human communication research.

Recommended: COMM 321

COMM 532. GENDER AND COMMUNICATION. (3 Credits)
Investigation of impact of sex and gender on communication in conflict, decision-making, leadership, nonverbal messages, language, and interpersonal relationships. Focus on definitions of sex and gender in regard to knowledge, social constructs, and self-development.

Recommended: COMM 321

COMM 537. HEALTH COMMUNICATION. (3 Credits)
This class is designed to unpack various elements of how communication impacts health, and vice versa. There are three main sections to this course: 1) discussing doctor-patient communication, 2) discussing the effects of health campaigns, and 3) discussing the link between communication and both psychological and physiological health.

COMM 540. THEORIES OF CONFLICT AND CONFLICT MANAGEMENT. (3 Credits)
Conflict on a variety of levels: intrapersonal, interpersonal, group, public, and social. Conflict in a variety of contexts: relationships, family, organizations, community, and society. Constructive and destructive means of confronting and managing conflict; social and psychological aspects of conflict; conflict analysis; causes of conflict; conflict and peace, social order, and social change; case studies of conflict.

Recommended: COMM 321

COMM 542. BARGAINING AND NEGOTIATION PROCESSES. (3 Credits)
Theory and practice of bargaining and negotiation as means of settling disputes, with emphasis on the role of communication. Strategies and tactics of distributive and integrative bargaining orientations. Negotiation preparation and experience through case studies and simulations.

Recommended: COMM 321

COMM 544. THIRD PARTIES IN DISPUTE RESOLUTION: MEDIATION/ARBITRATION. (3 Credits)
Philosophies, strategies, practices, and characteristics of mediation and arbitration processes in the settlement of conflicts and disputes. Study of the role of the third party neutral in the peace making process. Case studies and simulations in mediation and arbitration.

Recommended: COMM 321

COMM 546. COMMUNICATION IN INTERNATIONAL CONFLICT AND DISPUTES. (3 Credits)
Examination of the nature of international conflicts and disputes and the roles culture and communication play in resolving them constructively. Analysis of negotiation, mediation, and international law as approaches to dealing with international political, economic, cultural, and religious disputes. Scrutiny of contemporary world conflicts.

Recommended: COMM 321
COMM 550. COMMUNICATION AND THE PRACTICE OF SCIENCE. (3 Credits)
Communication is central to science-based decision-making, the function of science teams, the reporting and critique of scientific knowledge, and the interface between science and policy making. This seminar emphasizes communication competence in the arena of applied science; that is, science as practiced in government agencies, private corporations, and nonprofit organizations.

COMM 554. ADVANCED ARGUMENTATION. (3 Credits)
Advanced study in classical and current theories of the persuasive and epistemological functions of argumentation. Examination of the dominant contemporary theorists, including Toulmin, Perelman, and Willard. Analysis of research and applied perspectives, including conversational argument, argument fields, the philosophy of argument, argument as rhetoric, and argument in contexts.
Recommended: COMM 320

COMM 556. RHETORIC: 500 BC TO 500 AD. (3 Credits)
History and philosophy of rhetorical principles.
Recommended: COMM 320

COMM 558. RHETORIC: 500 AD TO 1900. (3 Credits)
History and philosophy of rhetorical principles.
Recommended: COMM 320

COMM 559. CONTEMPORARY THEORIES OF RHETORIC. (3 Credits)
A survey of contemporary rhetorical theories from 1900 to the present.
Recommended: COMM 320

COMM 560. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1750 TO 1900. (3 Credits)
Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements.
Recommended: COMM 320

COMM 562. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1900-PRESENT. (3 Credits)
Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements.
Recommended: COMM 320

COMM 564. RHETORICAL CRITICISM. (3 Credits)
Explores the approaches to the criticism of rhetoric, including aesthetic, social movement, genre, feminist, and other modes of criticism.
Recommended: COMM 320

COMM 565. RESEARCH METHODS IN RHETORIC. (3 Credits)
A graduate-level introduction to research methods in rhetorical studies. Topics include rhetorical criticism, discourse analysis, and historiography. Course goals include the ability to understand and critique common methodological approaches in rhetorical studies.

COMM 566. ETHICS OF RHETORIC. (3 Credits)
Examines the ethical questions raised by the use of persuasive discourse, including the derivation of standards of ethical persuasion and approaches to ethical judgment about persuasion.
Recommended: COMM 320

COMM 572. THE RHETORIC OF POPULAR CULTURE. (3 Credits)
A survey of theories of popular culture from Arnold to Hall. Students will examine various artifacts of popular culture popular culture and the influences they exert.

COMM 576. ISSUES IN THE FREEDOM OF SPEECH. (3 Credits)
Examination of the theories of free expression and case materials related to tests of free speech in key U.S. Supreme Court cases. The course emphasizes the context of social and political movements from which the cases arise.
Recommended: COMM 320

COMM 578. POLITICAL CAMPAIGN RHETORIC. (3 Credits)
Theory, research and methods of political campaign rhetoric. Topics include rhetorical strategies and tactics in advertising, national conventions, broadcast debates, media coverage and public opinion polls.
Recommended: COMM 320

COMM 582. THE MEDIA IN CULTURE AND SOCIETY. (3 Credits)
The study of the societal-cultural impact on the media, and their effect upon individuals, social, cultural, political, economic, and leisure structures and systems. Special focus on the issues of media in shaping values, molding opinions, and reflecting/projecting attitudes, beliefs, and behaviors, including media’s role in racial, gender, and familial relations.
Recommended: COMM 280

COMM 584. MEDIA CRITICISM. (3 Credits)
A critical examination of the media analysis of content, forms and deployment of media messages and products. A critical study of the structure, functions and economics of media systems. A consideration of media ethics and responsibilities in relation to news and information, entertainment, advertising and marketing, and social-cultural influence.
Recommended: COMM 280

COMM 590. GRADUATE SEMINAR IN RHETORIC. (3 Credits)
Examines topics dealing with the current state of research in rhetorical studies. This includes discussing a number of approaches to the history, theory, and criticism of rhetoric, as well as to the relationship between rhetoric and related disciplines. Course goals include increased competence in understanding the current state of rhetorical theory and research in the area being explored.
This course is repeatable for 9 credits.

COMM 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

COMM 808. WORKSHOP. (1-16 Credits)
Through reading, dialogue, reflection, and appreciative inquiry, participants will develop skills to more effectively communicate with culturally different others.
This course is repeatable for 16 credits.

Graphic Design
GD 121. ADOBE SOFTWARE BASICS. (3 Credits)
Instruction in drawing, editing, and layout techniques using Adobe Illustrator, and Photoshop CS6 and CC.
Equivalent to: DHE 121

GD 126. GRAPHIC DESIGN PRO APPLICATION. (2 Credits)
Required pre-graphic design course. Course will focus on the development of a final portfolio to be reviewed by the graphic design faculty at the end of the spring term. Lec/lab/studio.
Prerequisites: ART 101 with C- or better and ART 115 [C-] and ART 121 [C-] and ART 131 [C-]
Recommended: ART 120 and ART 122 and DHE 121
GD 200. GRAPHIC DESIGN TECHNOLOGY AND PRODUCTION 1. (4 Credits)
A second year level course (2 series) covering software skills and production techniques aimed at building a confident understanding and demonstration of the tools of design, making, craft, and delivery.

GD 220. GRAPHIC DESIGN TECHNOLOGY AND PRODUCTION 2. (4 Credits)
A second-year level course (2 series) covering software skills and production techniques aimed at building a confident understanding and demonstration of the tools of design, making, craft, and delivery.
Prerequisites: GD 200 with C- or better

GD 224. INTERACTIVE DESIGN 1. (4 Credits)
Introductory class to interactive design principles in the graphic design professional core.
Prerequisites: GD 126 with C- or better and GD 226 (may be taken concurrently) [C-] and GD 228 (may be taken concurrently) [C-]

GD 226. TYPOGRAPHY 1. (4 Credits)
An introductory course in the discipline, function and tradition of typography as it relates to visual and verbal communication.
Prerequisites: GD 126 with C- or better
Equivalent to: ART 226

GD 228. PROCESS: MAKING AND MEANING. (4 Credits)
Course utilizes creative problem solving techniques, communication theories, combined with media explorations to bring together message, meaning, medium, and form.
Prerequisites: GD 126 with C- or better
Equivalent to: ART 228

GD 230. GRAPHIC DESIGN PROFESSIONAL DEVELOPMENT. (2 Credits)
A required professional development course for graphic design sophomores aimed at preparing and empowering students to navigate professional opportunities 'as students'. This course is a prerequisite for GD 430 Graphic Design Practicum.

GD 269. GRAPHIC DESIGN HISTORY. (3 Credits)
A historical and theoretical overview of the evolution and innovations in graphic design.
Prerequisites: GD 126 with D- or better
Equivalent to: GD 369

GD 312. *CONTEMPORARY ISSUES IN DESIGN. (3 Credits)
For all graphic design students in the professional graphic design program. The course examines contemporary design issues through reading, research, writing, presentations and discussion. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: GD 126 with D- or better
Equivalent to: GD 412

GD 325. GRAPHIC DESIGN: COLLABORATIVE PROCESSES. (4 Credits)
Intermediate course in graphic design. Emphasis on collaborative projects exploring principles of group problem solving in typography.
Equivalent to: ART 325

GD 326. TYPOGRAPHY 2. (4 Credits)
An intermediate course exploring the design of organizational typographic structures and systems.
Prerequisites: GD 126 with C- or better
Equivalent to: ART 326

GD 327. TYPOGRAPHY 3. (4 Credits)
An intermediate course exploring the visual, expressive vocabulary of typography, using innovative experimentation.
Prerequisites: GD 126 with C- or better
Equivalent to: ART 327

GD 328. INTERACTIVE 2. (4 Credits)
An introduction to the contemporary issues of interactive design: experience design, application design, e-publication design, and from a visual communications perspective.
Prerequisites: GD 126 with C- or better
Equivalent to: ART 328

GD 369. GRAPHIC DESIGN HISTORY. (3 Credits)
An intermediate lecture course providing a historical and theoretical overview of the evolution and innovation in graphic design.
Equivalent to: ART 369, GD 269
Recommended: ART 204 and ART 205 and ART 206 and ART 367

GD 412. *CONTEMPORARY ISSUES IN DESIGN. (3 Credits)
How contemporary culture shapes the practice of graphic design and how design shapes the culture in which we live. Issues examined through lectures, readings, discussion and writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: ART 412

GD 419. PORTFOLIO REVIEW. (3 Credits)
A course to advise students during their final portfolio preparation. The objective is to complete the portfolio and hone presentation skills and techniques.
Prerequisites: GD 420 with C- or better
Equivalent to: ART 419

GD 420. PROFESSIONAL PRACTICES. (3 Credits)
Professional ethics and standards, business practices and tactics, and pre-press production techniques and concerns for graphic designers.
Prerequisites: GD 126 with D- or better
Equivalent to: ART 420

GD 421. INFORMATION AND PUBLICATION DESIGN. (4 Credits)
Theoretical and historical issues of organizing and visualizing statistics, numbers, and/or complex relationships. Emphasis on conceptualization, visual diagramming, and analysis of subtle visual relationships.
Equivalent to: ART 421

GD 422. NEW MEDIA: INTERACTIVE. (4 Credits)
An advanced course designing digital experiences with emphasis on innovative navigation, architectural structures, theoretical, and historical issues of new media.
Recommended: Junior block in graphic design and CS 295.

GD 423. EXPERIMENTAL TYPOGRAPHY. (4 Credits)
An advanced course in experimental typography focusing on intent, meaning, and method.
Equivalent to: ART 423

GD 424. BRAND IDENTITY SYSTEMS. (4 Credits)
Studio course that explores both the theory and the practice of brand identity systems, through the creation of a comprehensive visual branding project.
Prerequisites: GD 126 with C- or better
Equivalent to: ART 424
This course is repeatable for 12 credits.

GD 426. GRAPHIC DESIGN CAPSTONE 1. (3 Credits)
The first in a two-course sequence of senior-level graphic design capstone courses. The focus is on applying more in-depth design research methods to graphic design senior capstone projects.
GD 427. CAPSTONE 2. (4 Credits)
The second in a two-course sequence of senior-level graphic design capstone courses. The focus is on the design and development of the senior capstone project.
Prerequisites: GD 126 with C- or better and GD 426 [C-]
Equivalent to: GD 428
GD 429. GRAPHIC DESIGN STUDIO. (4 Credits)
Provides opportunity for students to work with clients on actual projects in a professional environment. Lec/lab.
Equivalent to: ART 429
This course is repeatable for 16 credits.
GD 430. GRAPHIC DESIGN PRACTICUM. (2 Credits)
Works from the skills and lessons learned in GD 230, Professional Development, to provide a system of evaluation and reflection in a structured class environment for students in a graphic design internship or project-based practicum.
Prerequisites: GD 230 with C- or better
This course is repeatable for 8 credits.
GD 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Music Education
MUED 100. MUSIC EDUCATION IN PUBLIC SCHOOLS. (3 Credits)
An introduction to the practice of teaching music in public schools in the United States. Participants will learn about teaching and learning through reading, discussion, creative projects, field observations, and peer teaching experiences. Provides a breadth of experiences so prospective teachers can make informed decisions regarding their career path. While completion of this course does not guarantee admittance to the Music Education Program at OSU, it will prepare candidates for the admission process.
Prerequisites: MUS 121 with C or better
MUED 201. VOCAL DICTION SEMINAR I: LATIN AND GERMAN. (1 Credit)
A laboratory course in Latin and German vocal diction for choral music education majors. Emphasis on the pronunciation of sung texts and the International Phonetic Alphabet.
Prerequisites: MUED 100 with B- or better
MUED 202. VOCAL DICTION SEMINAR II: ITALIAN AND FRENCH. (1 Credit)
A laboratory course in Italian and French vocal diction for choral music education majors. Emphasis on the pronunciation of sung texts and the International Phonetic Alphabet.
Prerequisites: MUED 100 with B- or better
MUED 275. PROFESSIONAL SEMINAR IN MUSIC EDUCATION I. (1 Credit)
Provides a professional community for emerging music educators. Students will complete field-work, interact with field specialists and practitioners, and study emerging topics and contemporary practices in music education. Students will begin to develop their professional portfolios. This course begins a series of seminars, which will be dedicated to professional development the exploration of trends in music education.
Prerequisites: MUED 100 with B- or better
MUED 276. PROFESSIONAL SEMINAR IN MUSIC EDUCATION II. (1 Credit)
Continued engagement in field-work, interaction with field specialists and practitioners, and a study of emerging topics and contemporary practices in music education.
Prerequisites: MUED 100 with B- or better
MUED 277. PEDAGOGIC TECHNIQUES FOR THE MUSIC EDUCATOR. (1 Credit)
MUED 277: Brass; MUED 277: Woodwinds; MUED 277: Strings; MUED 277: Voice (Instrumentalists); MUED 277: Vocal Pedagogy (Singers); MUED 277: Percussion; MUED 277: Guitar. Topics: performance using proper beginning technique for each instrument, and description/assessment of proper technique for each instrument at the intermediate and advanced level. Emphasis is on techniques for teaching in classroom settings.
This course is repeatable for 16 credits.
MUED 375. PROFESSIONAL SEMINAR IN MUSIC EDUCATION III. (1 Credit)
Continued interaction with field specialists and practitioners, and study of emerging topics and contemporary practices in music education. Fieldwork focuses on instructional strategies for guiding critical thinking and creative music listening.
Prerequisites: MUED 100 with B- or better
MUED 376. PROFESSIONAL SEMINAR IN MUSIC EDUCATION IV. (1 Credit)
Continued interaction with field specialists and practitioners, and study of emerging topics and contemporary practices in music education. Fieldwork focuses on observation, leadership of composition, and improvisation activities.
Prerequisites: MUED 100 with B- or better
MUED 391. SECONDARY GENERAL MUSIC FOUNDATIONS. (3 Credits)
Prepares the teacher candidate to design and facilitate experiences in music learning appropriate for secondary students (grades 6 to 12).
Prerequisites: MUED 100 with B- or better
MUED 392. SEMINAR IN SECONDARY GENERAL MUSIC. (1 Credit)
Focuses on special topics (drumming) that follow evolving trends in secondary general music education.
Prerequisites: MUED 100 with D- or better
MUED 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
MUED 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.
MUED 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
MUED 406. PROJECT. (1 Credit)
Editing and refining of portfolio materials representing professional growth in teaching throughout the Professional Teacher and Counselor Education Program. Includes work samples, assessments, reflections, and videotapes.
This course is repeatable for 16 credits.
MUED 408. WORKSHOP. (1-16 Credits)
May be repeated for a maximum of 18 credits.
This course is repeatable for 18 credits.

MUED 410. INTERNSHIP/STUDENT TEACHING. (1-10 Credits)
An immersive 60-day experience. Daily experience with communicating
content, planning, assessment, and classroom management in a guided
field setting. Student teaching is a requirement for Oregon licensure.
This course is repeatable for 99 credits.

MUED 413. THEORY AND PRACTICUM: FIELD. (1-4 Credits)
Field experience in music classroom. For pre-MAT students taking 4
credits, the experience is approximately 10 hours per week in elementary-
level classroom.

MUED 450. SURVEY OF WIND LITERATURE. (1 Credit)
Examines different time periods of wind band literature from the
Renaissance through current repertoire. Explores wind band literature
through study of the music and historical practices.
Prerequisites: MUED 326 with B- or better

MUED 460. PSYCHOLOGY OF MUSIC. (3 Credits)
The study and evaluation of psychological, physiological, and
neurological aspects of musical behavior and experience; including
but not limited to acoustics, human hearing, perception and cognition,
development and expertise, affective response and preference, unusual
abilities, and selected special topics.

MUED 469. MARCHING BAND TECHNIQUES LABORATORY. (1 Credit)
Provides an in-depth study of the unique techniques and demands of
running a marching band.
Prerequisites: MUED 121 with C or better

MUED 470. METHODS AND MATERIALS FOR THE PUBLIC SCHOOL WIND
BAND. (3 Credits)
Includes examination of method books, instructional materials, and
music for middle school and high school band. Class format is lecture,
discussions, and microteaching demonstrations. Includes study of past
and current methods of improving student musical understanding and
performance through band literature and rehearsal techniques.
Recommended: MUS 318 and MUS 319

MUED 471. INVESTIGATING MUSICAL CULTURES. (3 Credits)
Immerse yourself in an unfamiliar musical culture and learn how to
teach students about it. Become better prepared to work effectively with
multicultural materials, and to use culturally appropriate pedagogical
approaches. Music will be emphasized as a gateway to cultural
understanding, but previous musical experience is not required.

MUED 473. METHODS FOR TEACHING ELEMENTARY MUSIC. (3 Credits)
Focuses on pedagogical content knowledge in music for specialists
preparing to teach Kindergarten through grade five. Students will
focus on the developmental characteristics of learners, repertoire and
instructional techniques appropriate for the elementary music classroom,
and lesson planning incorporating state and national standards. Issues
related to diverse and special needs populations will be interwoven
throughout each segment of the course.
Prerequisites: MUED 353 with D- or better

MUED 474. ELEMENTARY APPROACHES SEMINAR I. (1 Credit)
Topics include practical applications of varied teaching methods, lesson
planning, curricular design, repertoire, and resources for the general
music classroom at the elementary level.
Prerequisites: MUED 473 with B- or better

MUED 475. ELEMENTARY APPROACHES SEMINAR II. (1 Credit)
Provides the foundation for teacher candidates to develop a critical
disposition regarding contemporary issues in the general music
classroom.
Prerequisites: MUED 473 with B- or better

MUED 477. CLASSROOM INSTRUMENTAL TECHNIQUES. (2 Credits)
A brief overview of fundamental principles and playing techniques of
brass, percussion, string, and woodwind instruments designed for
the choral music educator who uses instrumental accompaniment or
conducts an instrumental ensemble.
Recommended: MUS 222 and MUS 234 and MUS 319

MUED 480. CLASSROOM CHORAL METHODS. (3 Credits)
Examines research, theory, and pedagogical methods of choral
classrooms. Primary topics: the role of choral music in various school
settings and the responsibilities of the music teacher in developing/
implementing goals and objectives for a choral music education
curriculum.
Prerequisites: MUED 100 with B- or better

MUED 499. SPECIAL STUDIES. (1-16 Credits)
May be repeated for a maximum of 18 credits.
This course is repeatable for 18 credits.

MUED 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 18 credits.

MUED 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 18 credits.

MUED 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

MUED 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 18 credits.

MUED 506. PROJECTS. (1-16 Credits)
This course is repeatable for 18 credits.

MUED 507. THEORY AND PRACTICUM SEMINAR. (1-4 Credits)
Field experience in music classroom.
This course is repeatable for 10 credits.

MUED 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 18 credits.

MUED 510. PROFESSIONAL INTERNSHIP. (3-15 Credits)
A supervised teaching experience at a variety of public school levels.
The student works with an experienced mentor teacher, accepting the
professional responsibilities of teaching.
This course is repeatable for 15 credits.

MUED 521. SPECIAL TOPICS IN MUSIC ED. (3 Credits)
Advanced pedagogy in one particular area within music education,
such as jazz band techniques, computer design of marching band drills,
advanced technology in music education. Topics will vary.

MUED 560. PSYCHOLOGY OF MUSIC. (3 Credits)
The study and evaluation of psychological, physiological, and
neurological aspects of musical behavior and experience; including
but not limited to acoustics, human hearing, perception and cognition,
development and expertise, affective response and preference, unusual
abilities, and selected special topics.

MUED 562. RESEARCH IN MUSIC EDUCATION. (3 Credits)
Introduction to the historical, philosophical, quantitative and qualitative
research methodologies in music education. Includes interpretation and
application of findings published in major research journals.
MUED 570. METHODS AND MATERIALS FOR THE PUBLIC SCHOOL WIND BAND. (3 Credits)
Includes examination of method books, instructional materials, and music for middle school and high school band. Class format is lecture, discussions, and microteaching demonstrations. Includes study of past and current methods of improving student musical understanding and performance through band literature and rehearsal techniques.

MUED 571. INVESTIGATING MUSICAL CULTURES. (3 Credits)
Immerse yourself in an unfamiliar musical culture and learn how to teach students about it. Become better prepared to work effectively with multicultural materials, and to use culturally appropriate pedagogical approaches. Music will be emphasized as a gateway to cultural understanding, but previous musical experience is not required.

MUED 573. METHODS FOR TEACHING ELEMENTARY MUSIC. (3 Credits)
Focusses on pedagogical content knowledge in music for specialists preparing to teach Kindergarten through grade five. Students will focus on the developmental characteristics of learners, multiple representations of the subject matter, and lesson planning incorporating state and national standards. Issues related to diverse and special needs populations will be interwoven throughout each segment of the course. Recommended: MUED 353

MUED 574. MIDDLE LEVEL MUSIC EDUCATION. (3 Credits)
This methods course focuses on general music education, grades four through eight. Students explore relationships between teaching and learning in order to effectively plan for instruction.

MUED 580. SECONDARY VOCAL MUSIC EDUCATION. (3 Credits)
This methods course focuses on vocal music education, grades nine through twelve. Students explore relationships between teaching and learning in order to effectively plan for instruction.

MUED 581. SECONDARY INSTRUMENTAL MUSIC EDUCATION. (3 Credits)
This methods course focuses on instrumental music education, grades nine through twelve. Students explore relationships between teaching and learning in order to effectively plan for instruction.

MUED 591. CURRICULUM FOUNDATIONS IN MUSIC EDUCATION. (3 Credits)
Examination of historical, philosophical, and social influences on contemporary music education emphasizing 1950 through the present, culminating in the National Standards for Arts Education.

MUED 592. FOUNDATIONS OF MUSIC EDUCATION II. (3 Credits)
CURRICULUM IMPLEMENTATION AND EVALUATION: Students design and construct a comprehensive music education curriculum grounded in current research, the National Standards for Arts Education and Oregon's Common Curriculum Goals.

MUED 593. MUSIC TECHNOLOGY. (3 Credits)
Specific applications for teaching music incorporating appropriate software and hardware for curricular integration and curricular evolution.

MUED 599. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 18 credits.

Music Studio

MUP 161. INDIVIDUAL LESSONS: BEGINNING STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 162. INDIVIDUAL LESSONS: BEGINNING BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 163. INDIVIDUAL LESSONS: BEGINNING WOODWINDS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 164. INDIVIDUAL LESSONS: BEGINNING VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 165. INDIVIDUAL LESSONS: BEGINNING PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 166. INDIVIDUAL LESSONS: BEGINNING PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 170. INDIVIDUAL LESSONS: INTERMEDIATE PIANO. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 171. INDIVIDUAL LESSONS: INTERMEDIATE STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 172. INDIVIDUAL LESSONS: INTERMEDIATE BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 173. INDIVIDUAL LESSONS: INTERMEDIATE WOODWINDS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 174. INDIVIDUAL LESSONS: INTERMEDIATE VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 175. INDIVIDUAL LESSONS: INTERMEDIATE PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 176. INDIVIDUAL LESSONS: INTERMEDIATE WIND BAND. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 190. INDIVIDUAL LESSONS: KEYBOARD. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 191. INDIVIDUAL LESSONS: VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 192. INDIVIDUAL LESSONS: STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 193. INDIVIDUAL LESSONS: WOODWINDS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 194. INDIVIDUAL LESSONS: BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 195. INDIVIDUAL LESSONS: PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 196. INDIVIDUAL LESSONS: GUITAR. (1-2 Credits)
Private studio guitar lessons designed to explore effective practice strategies, technique, and repertoire. This course is repeatable for 12 credits. Recommended: MUS 162 or MUS 362

MUP 290. INDIVIDUAL LESSONS: KEYBOARD. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 291. INDIVIDUAL LESSONS: VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 292. INDIVIDUAL LESSONS: STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 293. INDIVIDUAL LESSONS: WOODWINDS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 294. INDIVIDUAL LESSONS: BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 295. INDIVIDUAL LESSONS: PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.
MUP 296. INDIVIDUAL LESSONS: GUITAR. (1-2 Credits)
Private studio guitar lessons designed to explore effective practice strategies, technique, and repertoire.
This course is repeatable for 12 credits.
Recommended: MUS 164

MUP 390. INDIVIDUAL LESSONS: KEYBOARD. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 391. INDIVIDUAL LESSONS: VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 392. INDIVIDUAL LESSONS: STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 393. INDIVIDUAL LESSONS: WOODWINDS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 394. INDIVIDUAL LESSONS: BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 395. INDIVIDUAL LESSONS: PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 396. INDIVIDUAL LESSONS: GUITAR. (1-2 Credits)
Private studio guitar lessons designed to explore effective practice strategies, technique, and repertoire.
This course is repeatable for 12 credits.
Recommended: MUS 162 or MUS 362

MUP 398. JUNIOR RECITAL. (1 Credit)
Time is dedicated towards the applied music project for junior music performance majors. A public recital will be given during junior-level applied study with the approval of the applied teacher. Graded P/N.

MUP 490. INDIVIDUAL LESSONS: KEYBOARD. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 491. INDIVIDUAL LESSONS: VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 492. INDIVIDUAL LESSONS: STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 493. INDIVIDUAL LESSONS: WOODWINDS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 494. INDIVIDUAL LESSONS: BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 495. INDIVIDUAL LESSONS: PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 496. INDIVIDUAL LESSONS: GUITAR. (1-2 Credits)
Private studio guitar lessons designed to explore effective practice strategies, technique, and repertoire.
This course is repeatable for 12 credits.
Recommended: MUS 162 or MUS 362

MUP 498. SENIOR RECITAL. (1 Credit)
Time is dedicated towards the final applied music project for instrumental and voice music majors. A public recital will be given after the completion of junior-level applied study with the approval of the applied teacher. Graded P/N.

MUP 590. INDIVIDUAL LESSONS: KEYBOARD. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 591. INDIVIDUAL LESSONS: VOICE. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 592. INDIVIDUAL LESSONS: STRINGS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 594. INDIVIDUAL LESSONS: BRASS. (1-2 Credits)
This course is repeatable for 12 credits.

MUP 595. INDIVIDUAL LESSONS: PERCUSSION. (1-2 Credits)
This course is repeatable for 12 credits.

Music

MUS 101. *MUSIC APPRECIATION I: SURVEY. (3 Credits)
Dealing primarily with the Western classical tradition, the course focuses on developing perceptive listening skills through the study of musical forms and styles. For non-majors. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 101H

MUS 101H. *MUSIC APPRECIATION I: SURVEY. (3 Credits)
Dealing primarily with the Western classical tradition, the course focuses on developing perceptive listening skills through the study of musical forms and styles. For non-majors. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 101

MUS 102. *MUSIC APPRECIATION II: PERIODS AND GENRES. (3 Credits)
A study of the masterworks of a single era (such as Baroque, classic, romantic, twentieth century) or a genre (such as orchestra, chamber, opera, musical theatre). For non-majors. Need not be taken in order. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 102H
This course is repeatable for 12 credits.

MUS 102H. *MUSIC APPRECIATION II: PERIODS AND GENRES. (3 Credits)
A study of the masterworks of a single era (such as Baroque, classic, romantic, twentieth century) or a genre (such as orchestra, chamber, opera, musical theatre). For non-majors. Need not be taken in order. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 102
This course is repeatable for 12 credits.

MUS 103. *MUSIC APPRECIATION III: GREAT COMPOSERS. (3 Credits)
The life and works of one or more significant composers including Bach, Haydn, Mozart, Beethoven, and others. For non-majors. Does not need to be taken in sequence. (FA) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts Core
Equivalent to: MUS 103H
This course is repeatable for 18 credits.

MUS 104. SURVEY OF JAZZ. (3 Credits)
Explores the historical, sociological and artistic development of jazz, America’s musical art form. A concise review of the first 100 years of the music from its blues-based roots at the turn of the 20th century to its current eclectic state will constitute the main framework of the course. While the focus will be on the important performers and composers of jazz, key historical and social events that contributed to the evolution of the idiom will also be discussed.
MUS 107. INTRODUCTION TO DIGITAL AUDIO WORKSTATIONS AND PUBLISHING. (3 Credits)
An introduction to project based music composing applications to create original music, remixes and contemporary productions. Students build skills through weekly exercises in both Reaper and MuseScore notation software.
This course is repeatable for 6 credits.

MUS 108. *MUSIC CULTURES OF THE WORLD. (3 Credits)
Survey of the world's music with attention to musical styles and cultural contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America. For non-majors. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: MUS 108H
This course is repeatable for 18 credits.

MUS 108H. *MUSIC CULTURES OF THE WORLD. (3 Credits)
Survey of the world's music with attention to musical styles and cultural contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America. For non-majors. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course
Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: MUS 108
This course is repeatable for 18 credits.

MUS 111. THE FUNDAMENTALS OF MUSIC TECHNOLOGY. (3 Credits)
Covers the principles and approaches used in contemporary music technology. Lectures and demonstrations will be rooted in physics, psychoacoustics, digital and analog recording, various software and hardware platforms, composition, and audio production in order to give students greater context into the creative and technical avenues of the music technologist.

MUS 112. INTRODUCTION TO DIGITAL AUDIO. (3 Credits)
Students will develop a thorough understanding of digital audio in both theory and application. Topics to be explored include common DAW operations, CD authoring, audio for web, sound design, MIDI, songwriting and composition, and digital effects. Course projects will engage students in both technical and creative capacities of digital audio production.
Prerequisites: MUS 111 with C- or better

MUS 113. AUDIO TECHNOLOGIES. (3 Credits)
Students will gain a thorough understanding of the technical and creative potential of various audio equipment used in sound production including microphones, speakers, mixers, recording equipment, effects processors, patch bays, MIDI, and various video equipment. Through discussion and experimentation, students will pursue real-world audio problems in collaborative and individual projects.
Prerequisites: MUS 111 with C- or better

MUS 114. FOUNDATIONS: APPLIED LISTENING AND THEORY. (3 Credits)
A general music foundation series that facilitates students with no prior formal musical background to develop contemporary music literacy using modes of listening including radio, digital music libraries, interactive tutorials and guided listenings and visual mapping.
This course is repeatable for 6 credits.

MUS 121. LITERATURE AND MATERIALS OF MUSIC I. (3 Credits)
Covers fundamentals of music theory along with a brief introduction to Western art music. This requires students to learn to read and write all notes in treble and bass clef, and all common scales, intervals, triads and seventh chords, using key signatures. They also learn to recognize basic rhythms and write them down.
This course is repeatable for 6 credits.

MUS 122. LITERATURE AND MATERIALS OF MUSIC I. (3 Credits)
An integrated, team-taught approach to the study of Western art music, including repertory, melodic, harmonic, and rhythmic components, formal organization, and composition. Recitation included.
Recommended: MUS 121

MUS 123. LITERATURE AND MATERIALS OF MUSIC I. (3 Credits)
An integrated, team-taught approach to the study of Western art music, including repertory, melodic, harmonic, and rhythmic components, formal organization, and composition. Recitation included. Lec/lab/rec.
Recommended: MUS 122

MUS 125. LITERATURE AND MATERIALS LAB I. (1 Credit)
Scales, all major and harmonic form of minor, interval drill.
Equivalent to: MUS 124
Recommended: MUS 121. Concurrent enrollment in MUS 122 for music majors

MUS 126. LITERATURE AND MATERIALS LAB II. (1 Credit)
Transpose scores, harmonic idioms, harmonic progressions. Lec/lab.
Equivalent to: MUS 125
Recommended: MUS 122 and MUS 125. Concurrent enrollment in MUS 123 for music majors

MUS 134. AURAL SKILLS I. (1 Credit)
Aural comprehension of the basic melodic, rhythmic, and harmonic elements of music.
Corequisites: MUS 121

MUS 135. AURAL SKILLS II. (1 Credit)
Aural comprehension of the basic melodic, rhythmic, and harmonic elements of music.
Recommended: Concurrent enrollment with MUS 122

MUS 136. AURAL SKILLS III. (1 Credit)
Aural comprehension of the basic melodic, rhythmic, and harmonic elements of music.
Recommended: MUS 135 and concurrent enrollment in MUS 123

MUS 137. JAZZ IMPROVISATION. (1-3 Credits)
Instrumental and vocal improvisation including composition and arranging techniques.
This course is repeatable for 9 credits.

MUS 140. OSU CHAMBER CHOIR. (1-2 Credits)
A select ensemble of approximately 40 mixed voices. Performances each term. Annual tours. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 146. WOMEN'S CHOIR. (1-2 Credits)
A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term.
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 147. MEN'S CHOIR. (1-2 Credits)
A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term.
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 150. SYMPHONIC BAND. (1 Credit)
A select ensemble of approximately 80 wind and percussion players. Performance each term. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.
MUS 151. CAMPUS BAND. (1 Credit)
Wind and percussion ensemble of approximately 70 players. Performance each term. Open to all students.
This course is repeatable for 9 credits.

MUS 152. RHYTHM AND BEAVS PEP BAND. (1 Credit)
An auditioned group of 12 musicians who perform at university, community, and athletic events throughout the year.
This course is repeatable for 9 credits.

MUS 153. MARCHING BAND. (1-2 Credits)
A marching and playing unit of more than 160 musicians. Performs for home football games.
This course is repeatable for 6 credits.

MUS 154. BASKETBALL BAND. (1 Credit)
An ensemble of approximately 50 players. Performs for home games.
This course is repeatable for 3 credits.

MUS 155. COLOR GUARD. (1 Credit)
A derivative of the Marching Band Color Guard, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required.
This course is repeatable for 9 credits.

MUS 156. INDOOR DRUM LINE. (1-2 Credits)
A derivative of the Marching Band Drum Line, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required.
This course is repeatable for 9 credits.

MUS 157. SMALL JAZZ ENSEMBLE. (1 Credit)
Concentration on current jazz styles. Performance each term.
This course is repeatable for 9 credits.

MUS 158. LARGE JAZZ ENSEMBLE. (1 Credit)
Concentration on current jazz styles. Performance each term.
This course is repeatable for 9 credits.

MUS 160. UNIVERSITY SYMPHONY ORCHESTRA. (1 Credit)
An ensemble of 65-80 players. Performance of orchestral repertoire from the eighteenth, nineteenth, and twentieth centuries. Performance each term. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 162. CHAMBER ENSEMBLE: GUITAR. (1 Credit)
A guitar performance group designed to explore ensemble rehearsal techniques and repertoire.
This course is repeatable for 9 credits.

MUS 163. ACCOMPANYING. (1 Credit)
Piano accompanying and chamber music skills, studio experience and weekly performance class.
This course is repeatable for 9 credits.

MUS 164. CHAMBER ENSEMBLE: STRINGS. (1 Credit)
This course is repeatable for 9 credits.

MUS 165. CHAMBER ENSEMBLE: WOODWINDS. (1 Credit)
This course is repeatable for 9 credits.

MUS 166. CHAMBER ENSEMBLE: BRASS. (1 Credit)
This course is repeatable for 9 credits.

MUS 167. CHAMBER ENSEMBLE: PERCUSSION. (1 Credit)
This course is repeatable for 9 credits.

MUS 168. CHAMBER ENSEMBLE: MISCELLANEOUS. (1 Credit)
This course is repeatable for 9 credits.

MUS 169. OPERA WORKSHOP. (1-2 Credits)
This course is repeatable for 3 credits.

MUS 171. GROUP LESSONS: PIANO I. (1 Credit)
Part 1 of the first-year group piano sequence. Group instruction in piano skills and basic theory.
Prerequisites: MUS 171 with C- or better

MUS 172. GROUP PIANO II. (1 Credit)
Part 2 of the first-year group piano sequence. A continuation of MUS 171.
Prerequisites: MUS 172 with C- or better

MUS 173. GROUP PIANO III. (1 Credit)
Part 3 of the first-year group piano sequence. A continuation of MUS 172.
Prerequisites: MUS 172 with C- or better

MUS 177. GROUP LESSONS: PIANO. (1 Credit)
Beginning Piano I, elementary group instruction in piano skills for non-majors.
This course is repeatable for 2 credits.

MUS 178. GROUP LESSONS: PIANO. (1 Credit)
Beginning Piano II: Continuation of MUS 177, piano for non-majors.
This course is repeatable for 2 credits.

MUS 185. VOICE CLASS. (1 Credit)
Students improve and strengthen the voice as a solo instrument.
This course is repeatable for 9 credits.

MUS 186. GROUP GUITAR. (1 Credit)
Teaches fundamentals of the guitar in a small-group setting. Emphasis on practical use of the instrument.
This course is repeatable for 9 credits.

MUS 187. GROUP GUITAR II. (1 Credit)
A continuation of MUS 186, MUS 187 focuses on helping students learn higher functionality in techniques and attain greater ability to perform solo or in ensemble.
Prerequisites: MUS 186 with D- or better
This course is repeatable for 9 credits.

MUS 190. APPLIED MUSICIANSHIP: BEGINNER BEAT MAKING (DAW). (2 Credits)
Teaches the process involved in composing and constructing drum beats for any style of popular music. This course will take you through the basics of understanding the roles of each individual drum on a typical drum kit, to programming on an 808 or sequenced style virtual kit. We will also explore putting together your own collection of sounds and building drum and percussion kits for your own creative applications and compositions.
Prerequisites: MUS 111 with C or better
This course is repeatable for 6 credits.

MUS 199. SPECIAL STUDIES. (1-3 Credits)
First-year level.
This course is repeatable for 18 credits.

MUS 201. ENGLISH AND LATIN DICTION FOR SINGERS. (1 Credit)
Presents the principles of lyric diction in English and Latin and provides practice in the skills needed to sing the languages accurately and expressively.

MUS 202. ITALIAN LYRIC DICTION FOR SINGERS. (1 Credit)
Presents the principles of lyric diction in Italian and provides practice in the skills needed to sing the languages accurately and expressively.
Prerequisites: MUS 201 with C or better
MUS 203. GERMAN LYRIC DICTION FOR SINGERS. (1 Credit)
Prerequisite: MUS 201 with C- or better
This course is repeatable for 3 credits.

MUS 204. FRENCH LYRIC DICTION FOR SINGERS. (1 Credit)
Prerequisite: MUS 201 with C- or better
This course is repeatable for 3 credits.

MUS 221. LITERATURE AND MATERIALS OF MUSIC. (3 Credits)
Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Recommended: MUS 213 with C- or better

MUS 222. LITERATURE AND MATERIALS OF MUSIC. (3 Credits)
Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Recommended: MUS 213 with C- or better

MUS 223. LITERATURE AND MATERIALS OF MUSIC. (3 Credits)
Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Recommended: MUS 213 with C- or better

MUS 234. AURAL SKILLS II. (1 Credit)
Sight-singing; melodic and harmonic dictation. To be taken in sequence. Recommended: MUS 213 and MUS 136

MUS 235. AURAL SKILLS II. (1 Credit)
Sight-singing; melodic and harmonic dictation. To be taken in sequence. Recommended: MUS 234

MUS 236. AURAL SKILLS II. (1 Credit)
Sight-singing; melodic and harmonic dictation. To be taken in sequence. Recommended: MUS 235

MUS 251. INTRO TO ARTS ENTREPRENEURSHIP. (3 Credits)
Introduction to Arts Entrepreneurship emphasizes the importance of entrepreneurial thinking in the arts while engaging students with the fundamentals of the arts “business”. The focus of this course is the development of each student’s Digital Portfolio. Each student will explore the arts industry through first-hand experiences with creative problem-solving exercises, discussion questions, collaborative projects, case studies, and hands-on activities. For majors. (FA) This course is repeatable for 3 credits.

MUS 271. GROUP PIANO IV. (1 Credit)
Part of the second-year group piano sequence. Group instruction in piano skills and basic theory.

MUS 272. GROUP PIANO V. (1 Credit)
Part of the second-year group piano sequence. Group instruction in piano skills and basic theory. Prerequisite: MUS 271 with C- or better

MUS 273. GROUP PIANO VI. (1 Credit)
Part of the second-year group piano sequence. Group instruction in piano skills and basic theory. Prerequisite: MUS 272 with C- or better

MUS 279. INTRODUCTION TO SONGWRITING 1. (3 Credits)
The study of songs and songwriting will be introduced, with special attention paid to the art of lyrics, melody, harmony, and structure to create songs. Songs will be analyzed and composed, and students will listen to popular American songwriting throughout modern history. Students are expected to listen critically and create and collaborate on original song lyrics and music. This course is repeatable for 6 credits.

MUS 299. SPECIAL STUDIES. (1-3 Credits)
Sophomore level. This course is repeatable for 18 credits.

MUS 301. SOLO VOCAL REPERTOIRE: ENGLISH. (2 Credits)
Survey of the development of English solo vocal literature from the Renaissance period to the present. Prerequisite: MUS 123 with C or better

MUS 302. SOLO VOCAL REPERTOIRE: ITALIAN. (2 Credits)
Survey of the development of Italian solo vocal literature from the Renaissance period to the present. Prerequisite: MUS 123 with C or better

MUS 303. SOLO VOCAL REPERTOIRE: GERMAN. (2 Credits)
Survey of the development of German solo vocal literature from the Renaissance period to the present. Prerequisite: MUS 123 with C or better

MUS 304. SOLO VOCAL REPERTOIRE: FRENCH. (2 Credits)
Survey of the development of French solo vocal literature from the 19th century to the present. Prerequisite: MUS 123 with C or better

MUS 309. WOMEN IN WESTERN MUSIC. (3 Credits)
Course will identify contributions women have made as composers, performers, patrons, educators, and consumers, and will examine why women's contributions were ignored in the past. (Bacc Core Course) Attributes: CPLA – Core, Pers, Lit and Arts

MUS 311. MIDI SYSTEMS AND APPLICATIONS. (3 Credits)
Students will develop a thorough understanding of the Musical Instrument Digital Interface (MIDI) language. Using both hardware and software environments, they will learn technical and creative approaches to live and studio MIDI applications expected of the industry professional. Prerequisite: MUS 112 with C- or better

MUS 313. SOUND SYNTHESIS. (3 Credits)
Examines the various forms of synthesis used in modern electronic music and audio production. Throughout the course of the term, students will cultivate listening, programming, and analytical skills through the study of analog and digital synthesis. Emphasis will be placed on practical applications of synthesis through original creative projects. Prerequisite: MUS 213 with C- or better

MUS 315. INTRODUCTION TO CONDUCTING. (2 Credits)
Basic terminology, beat patterns, and baton technique. Introduction to score preparation. Philosophy and history of conducting are also addressed. Recommended: MUS 223 and MUS 236 and piano proficiency exam.
MUS 316. CHORAL CONDUCTING. (2 Credits)
Continuation of MUS 315. Hand gesture technique, score reading, and score preparation of literature from all major historical periods. Focus upon principles of developing choral excellence. Includes conducting practice with a campus ensemble. To be taken in sequence.
Recommended: MUS 315

MUS 317. CHORAL CONDUCTING. (2 Credits)
Continuation of MUS 315. Hand gesture technique, score reading, and score preparation of literature from all major historical periods. Focus upon principles of developing choral excellence. To be taken in sequence.
Recommended: MUS 315

MUS 318. INSTRUMENTAL CONDUCTING. (2 Credits)
Continuation of MUS 315, including types of instrumental groups, seating arrangements, score preparation, and instrumental transposition and ranges. Advanced baton technique. To be taken in sequence.
Recommended: MUS 315

MUS 319. INSTRUMENTAL CONDUCTING. (2 Credits)
Continuation of MUS 315, including types of instrumental groups, seating arrangements, score preparation, and instrumental transposition and ranges. Advanced baton technique. To be taken in sequence.
Recommended: MUS 315

MUS 321. LITERATURE AND MATERIALS OF MUSIC III. (3 Credits)
Twentieth century harmony and counterpoint, including contrapuntal composition. Continued study and analysis of repertoire into the 21st century.
Recommended: MUS 223

MUS 324. HISTORY OF WESTERN MUSIC. (3 Credits)
Chronological survey of the Euro-American traditions in music to be taken in sequence.
Prerequisites: MUS 123 with D- or better
Recommended: MUS 223

MUS 325. HISTORY OF WESTERN MUSIC. (3 Credits)
Traces the development of music history from the early Classic period through the end of the 19th century. Major trends in orchestral, solo, chamber and vocal music are explored through lectures, readings, research, discussion, score studies, and intensive writing assignments. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: MUS 123 with D- or better
Recommended: MUS 223

MUS 326. HISTORY OF WESTERN MUSIC. (3 Credits)
Chronological survey of the Euro-American traditions in music to be taken in sequence.
Prerequisites: MUS 123 with D- or better
Recommended: MUS 223

MUS 330. ALEXANDER TECHNIQUE FOR MUSICIANS. (1 Credit)
A theoretical and practical introduction to the Alexander Technique, a psychophysical reeducation process developed by F.M. Alexander. The course will provide the opportunity for instrumentalists and singers to integrate the Alexander Technique into their practice and performance, enabling more freedom of choice in their approach to music making.
Prerequisites: MUS 123 with D- or better
This course is repeatable for 6 credits.

MUS 337. JAZZ IMPROVISATION. (1-3 Credits)
Instrumental and vocal improvisation including composition and arranging techniques.
This course is repeatable for 9 credits.
Recommended: Two years college-level MUS 137 experience

MUS 340. OSU CHAMBER CHOIR. (1-2 Credits)
A select ensemble of approximately 40 mixed voices. Performance each term. Annual tours. Students must have two years college-level vocal experience or equivalent. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 341. VOCAL PEDAGOGY I. (2 Credits)
Provides an understanding of the singing voice and establishes guidelines for teaching vocal techniques. Explores the anatomical, physiological and acoustic elements of singing, providing students with a working knowledge of the vocal mechanism.
Prerequisites: MUP 291 with C or better

MUS 344. INSTRUMENTAL PEDAGOGY AND REPERTOIRE. (3 Credits)
This course is directed towards the student who anticipates a career as a professional musician in a performance group, soloist, or as an instrumental studio instructor.
Recommended: Music lessons MUP 300 or higher

MUS 346. WOMEN'S CHOIR. (1-2 Credits)
A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term.
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 347. MEN'S CHOIR. (1-2 Credits)
A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term.
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 350. SYMPHONIC BAND. (1 Credit)
A select ensemble of approximately 80 wind and percussion players. Performance winter and spring terms. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 351. CAMPUS BAND. (1 Credit)
Wind and percussion ensemble of approximately 70 players. Performance each term. Open to all students.
This course is repeatable for 9 credits.

MUS 352. RHYTHM AND BEAVS PEP BAND. (1 Credit)
An auditioned group of 12 musicians who perform at university, community, and athletic events throughout the year.
This course is repeatable for 9 credits.

MUS 353. MARCHING BAND. (1-2 Credits)
A marching and playing unit of more than 160 musicians. Performs for home football games; one trip each year to an off-campus game.
This course is repeatable for 6 credits.

MUS 354. BASKETBALL BAND. (1 Credit)
An ensemble of approximately 50 players. Performs for home games. One trip each year to an off-campus game.
This course is repeatable for 9 credits.

MUS 355. COLOR GUARD. (1 Credit)
A derivative of the Marching Band Color Guard, this ensemble performs and completes around the Pacific Northwest during winter term. Audition required.
This course is repeatable for 3 credits.
MUS 356. INDOOR DRUM LINE. (1-2 Credits)
A derivative of the Marching Band Drum Line, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required.
This course is repeatable for 3 credits.

MUS 357. SMALL JAZZ ENSEMBLE. (1 Credit)
Concentration on current jazz styles. Performance each term.
This course is repeatable for 9 credits.

MUS 358. LARGE JAZZ ENSEMBLE. (1 Credit)
Concentration on current jazz styles. Performance each term.
This course is repeatable for 9 credits.

MUS 360. UNIVERSITY SYMPHONY ORCHESTRA. (1 Credit)
An ensemble of 65-80 players. Performance of orchestral repertoire from the 18th, 19th, and 20th centuries. Performance each term. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
This course is repeatable for 9 credits.

MUS 362. CHAMBER ENSEMBLE: GUITAR. (1 Credit)
A guitar performance group designed to explore ensemble rehearsal techniques and repertoire.
This course is repeatable for 9 credits.
Recommended: MUP 196 or MUP 296 or MUP 396 or MUP 496

MUS 363. ACCOMPANYING. (1 Credit)
Piano accompanying and chamber music skills, studio experience, and weekly performance class.
This course is repeatable for 9 credits.
Recommended: Concurrent enrollment in MUS 390 or MUS 490. Two years college-level ensemble.

MUS 364. CHAMBER ENSEMBLE: STRINGS. (1 Credit)
May be repeated for a maximum of 9 credits.
This course is repeatable for 9 credits.

MUS 365. CHAMBER ENSEMBLE: WOODWINDS. (1 Credit)
May be repeated for a maximum of 9 credits.
This course is repeatable for 9 credits.

MUS 366. CHAMBER ENSEMBLE: BRASS. (1 Credit)
May be repeated for a maximum of 9 credits.
This course is repeatable for 9 credits.

MUS 367. CHAMBER ENSEMBLE: PERCUSSION. (1 Credit)
May be repeated for a maximum of 9 credits.
This course is repeatable for 9 credits.

MUS 368. CHAMBER ENSEMBLE: MISCELLANEOUS. (1 Credit)
May be repeated for a maximum of 9 credits.
This course is repeatable for 9 credits.

MUS 369. OPERA WORKSHOP. (1-2 Credits)
This course is repeatable for 3 credits.

MUS 371. GROUP PIANO VII. (1 Credit)
Part of the third-year group piano sequence. Group instruction in piano skills and basic theory.

MUS 372. GROUP PIANO VIII. (1 Credit)
Part of the third-year group piano sequence. Group instruction in piano skills and basic theory.
Prerequisites: MUS 371 with C- or better

MUS 373. GROUP PIANO IX. (1 Credit)
Part of the third-year group piano sequence. Group instruction in piano skills and basic theory.
Prerequisites: MUS 372 with C- or better

MUS 375. INTRODUCTION TO PIANO TUNING. (3 Credits)
Provides an introduction to the science of piano tuning and general piano maintenance. Students will acquire knowledge of the construction of the modern piano and its predecessors. They will learn about the temperaments and the science of tuning. Finally, through supervised instruction and practice, students will learn the skill of how to tune a modern piano.
This course is repeatable for 6 credits.

MUS 378. MUSICAL WELLNESS FOR PIANISTS. (3 Credits)
Pianists are offered a body of knowledge that enables them to cultivate mindful, healthful learning and performance processes for themselves and their students. Special focus is given to dealing with fatigue, physical limitations, and injuries.
This course is repeatable for 6 credits.

MUS 399. SPECIAL STUDIES. (1-3 Credits)
Junior level.
This course is repeatable for 18 credits.

MUS 400. STUDIES IN WRITING ABOUT MUSIC. (3 Credits)
Students will read relevant literature pertaining to a selected topic. These readings will be discussed during the class period, serve as a basis of knowledge for the writing assignments throughout the quarter, and promote critical thinking about the topic. As a Writing Intensive Course (WIC), a large portion of the term will be devoted to learning various genres of writing about music, including formal writing and informal, low-stakes writing. Students will be introduced to a variety of ways of writing about music through the course readings and will learn how to tailor one's writing style towards a genre's particular audience. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: MUS 325 with C or better
Recommended: Completion of a WR II course

MUS 401. RESEARCH AND SCHOLARSHIP. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 402. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 403. THESIS. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 405. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 406. PROJECTS. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 407. SEMINAR. (1-6 Credits)
Equivalent to: MUS 407H
This course is repeatable for 18 credits.

MUS 408. WORKSHOP. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 409. PIANO PEDAGOGY PRACTICUM. (2 Credits)
A practical application course offering experiential learning and supervised teaching experiences to piano pedagogy students. Serves as a practicum co-requisite for the final two terms of Piano Pedagogy (MUS 446 and MUS 447).
Corequisites: MUS 446, MUS 447
This course is repeatable for 8 credits.

MUS 410. INTERNSHIP. (3 Credits)
Provides experience in field settings, opportunity to develop personal and professional skills. See school for details.
This course is repeatable for 12 credits.
MUS 442. GENRE STUDIES. (3 Credits)
Intensive study of selected genres, such as orchestra, chamber music, keyboard literature, vocal literature, music theatre and opera.
Equivalent to: MUS 442H
This course is repeatable for 18 credits.

MUS 443. THEORY AND COMPOSITION STUDIES. (3 Credits)
Intensive study of selected subjects, such as analysis, composition, choral arranging, band arranging, and orchestration.
This course is repeatable for 18 credits.
Recommended: MUS 223

MUS 444. FOUNDATIONS OF PIANO PEDAGOGY. (3 Credits)
Introduction to foundational principles of piano instruction and addresses topics surrounding methodology, materials, and the techniques of teaching piano.
This course is repeatable for 6 credits.

MUS 445. PIANO PEDAGOGY I: BEGINNING AND ELEMENTARY STUDENTS. (3 Credits)
Introduces basic foundational ideas of piano instruction at the beginning and elementary levels. Students will engage with topics surrounding methodology, materials, and the techniques of teaching piano to the beginning and elementary student.

MUS 446. PIANO PEDAGOGY II. (3 Credits)
The second in a three-term sequence. The course reinforces foundational ideas and skills learned in Pedagogy I, and continues on to address methodology, materials, and techniques surrounding group piano teaching, teaching preschoolers, and teaching adults. Students will engage in supervised teaching experiences in class as well as in a corresponding lab practicum course which should be taken in conjunction with Pedagogy II. Students must also register for MUS 409.
Prerequisites: MUS 445 with D- or better
Corequisites: MUS 409

MUS 447. PIANO PEDAGOGY III. (3 Credits)
The third in a three-term sequence. The course reinforces foundational ideas learned in Pedagogy I and Pedagogy II, and continues with emphasis on special topics and projects preparing students for a professional career as independent piano teachers. Students must also register for MUS 409.
Prerequisites: MUS 446 with D- or better
Corequisites: MUS 409

MUS 451. INTRODUCTION TO ARTS ENTREPRENEURSHIP. (3 Credits)
Survey of the business strategies behind a successful career in the arts. Emphasizes the importance of entrepreneurial thinking, engages students with the fundamentals of the arts "business", and explores ways to influence and shape the industry's future. (FA) CROSSLISTED as ART 451, TA 451.
Attributes: LACF – Liberal Arts Fine Arts Core
Equivalent to: ART 451, TA 451

MUS 472. ITALIAN AND LATIN DICTIO FOR SINGERS. (2 Credits)
Presents the principles of lyric diction in Italian and liturgical Latin and provides practice in the skills needed to sing the languages accurately and expressively.

MUS 481. PIANO LITERATURE I: 18TH THROUGH EARLY 19TH CENTURIES. (3 Credits)
Examines the evolution of piano literature from the Baroque period through the early 19th Century. Examines individual styles and composers' works in the context of the surrounding cultural and social history, beginning with the birth of the piano and continuing with the piano's growing popularity in Western European society. An emphasis will be placed on listening experience and the aural identification of landmark piano works. Students to gain familiarity with a rich body of piano repertoire in the historical and social context in which it was composed.

MUS 482. PIANO LITERATURE II: 19TH AND 20TH CENTURIES. (3 Credits)
Examines the evolution of piano literature in the 19th and 20th centuries. Students will learn about individual styles and composers' works in the context of the surrounding cultural and social history of the piano. An emphasis will be placed on listening experience and the aural identification of landmark piano works. The overall objective of the course is for students to gain familiarity with a rich body of piano repertoire in the historical and social context in which it was composed.

MUS 485. PIANO LITERATURE III: REPERTOIRE FOR TEACHING THE PIANO. (3 Credits)
This specialized area of Piano Pedagogy includes repertoire for piano students of varying levels, analytical skills for evaluating repertoire for students, and repertoire requirements for national and international piano teaching organizations.

MUS 493. BASIC RECORDING TECHNIQUES. (3 Credits)
The first of a three-term sequence on analog and digital recording and editing techniques. The first term deals with issues such as signal processing, microphone design and placement, and an introduction to Digidesign Pro-Tools.
This course is repeatable for 9 credits.
Recommended: MUS 123

MUS 494. INTERMEDIATE RECORDING TECHNIQUES. (3 Credits)
The second of a three-term sequence on analog and digital recording and editing techniques. The second term deals with multi-track recording, MIDI interfacing and recording, advanced microphone placement, intermediate Pro-tools, and an introduction to E-magic Logic.
Recommended: MUS 493

MUS 495. ADVANCED RECORDING TECHNIQUES. (3 Credits)
The third of a three-part sequence on analog and digital recording and editing techniques. The third term deals with advanced multi-track recording, sampling MIDI interfacing and recording, mixing and mastering using Waveburner, advanced Pro-Tools, advanced use of E-magic Logic recording and editing and portable ADAT recording and editing.
Recommended: MUS 494

MUS 496. SURROUND SOUND RECORDING AND MASTERING. (2 Credits)
Survey of the concepts, equipment, and standard procedures used in surround sound audio and audio-for-video, including basic equipment and software configuration, surround recording and editing techniques, advanced automation using Pro Tools, and layback/sync to video.
Prerequisites: MUS 495 with D- or better

MUS 499. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 18 credits.

MUS 501. RESEARCH AND SCHOLARSHIP. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 502. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 18 credits.
MUS 503. THESIS. (1-6 Credits)
This course is repeatable for 999 credits.

MUS 505. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 506. PROJECTS. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 507. SEMINAR. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 508. WORKSHOP. (1-6 Credits)
This course is repeatable for 18 credits.

MUS 510. INTERNSHIP. (3 Credits)
Provides experience in field settings, opportunity to develop personal and professional skills. See school for details.
This course is repeatable for 12 credits.

MUS 516. ADVANCED CONDUCTING: CHORAL. (3 Credits)
Baton technique, interpretation and the study of major choral scores.
Recommended: MUS 317

MUS 517. ADVANCED CONDUCTING: CHORAL. (3 Credits)
Baton technique, interpretation and the study of major choral scores.
Recommended: MUS 317

MUS 518. ADVANCED CONDUCTING: INSTRUMENTAL. (3 Credits)
Baton technique, interpretation and the study of major instrumental scores.
Recommended: MUS 319

MUS 519. ADVANCED CONDUCTING: INSTRUMENTAL. (3 Credits)
Baton technique, interpretation and the study of major instrumental scores.
Recommended: MUS 319

MUS 540. OSU CHAMBER CHOIR. (1-2 Credits)
A select ensemble of approximately 40 mixed voices. Performance each term. Annual tours. 500-level credit available only to students who can demonstrate proficiency and experience to perform at the graduate level. This will be evaluated by the instructor through audition.
This course is repeatable for 6 credits.

MUS 543. THEORY AND COMPOSITION STUDIES. (3 Credits)
Intensive study of selected subjects, such as analysis, composition, choral arranging, band arranging, and orchestration.
This course is repeatable for 18 credits.
Recommended: MUS 223

MUS 546. WOMEN’S CHOIR. (1-2 Credits)
A women’s ensemble designed for vocal development and exploration of treble choral literature. Performances each term.
This course is repeatable for 9 credits.

MUS 547. MEN’S CHOIR. (1-2 Credits)
A men’s ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term.
This course is repeatable for 9 credits.

MUS 550. SYMPHONIC BAND. (1 Credit)
A select ensemble of approximately 80 wind and percussion players. Performance winter and spring terms. 500-level credit available only to students who can demonstrate proficiency and experience sufficient to perform at the graduate level. This will be evaluated by the instructor by audition.
This course is repeatable for 6 credits.

MUS 560. UNIVERSITY SYMPHONY ORCHESTRA. (1 Credit)
An ensemble of 65-80 players. Performance of orchestral repertoire from the 18th, 19th, and 20th centuries. Performance each term. 500-level credit available only to students who can demonstrate proficiency and experience to perform at the graduate level. This will be evaluated by the instructor through audition.
This course is repeatable for 6 credits.

MUS 563. ACCOMPANYING. (1 Credit)
Piano accompanying and chamber music skills, studio experience and weekly performance class. 500-level credit available only to students who can demonstrate proficiency and experience sufficient to perform at the graduate level. This will be evaluated by the instructor by audition.
This course is repeatable for 6 credits.
Recommended: Concurrent enrollment in MUP 590

MUS 572. ITALIAN AND LATIN DICTION FOR SINGERS. (2 Credits)
Presents the principles of lyric diction in Italian and liturgical Latin and provides practice in the skills needed to sing the languages accurately and expressively.

MUS 573. GERMAN DICTION FOR SINGERS. (2 Credits)
Presents the principles of German lyric diction and provides practice in the skills needed to sing the language accurately and expressively.

MUS 599. SPECIAL STUDIES. (1-16 Credits)
This course is repeatable for 6 credits.

New Media Communications

NMC 100. *NEW MEDIA AND CULTURE. (3 Credits)
Provides students with the basic critical skills to analyze the cultural, social, and political impact of new media technologies, new media texts, and new media institutions. Students will be exposed to a variety of social scientific and humanistic conceptual approaches to analyzing new media and culture. Special emphasis will be placed on historical analyses of how new media have shaped culture, as well as how culture has shaped new media. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

NMC 101. *INTRODUCTION TO NEW MEDIA COMMUNICATIONS. (3 Credits)
Principles of new media communications. Perspectives on the communications media. How the communications media operate and how they interact with society.
Attributes: CPSI – Core, Pers, Soc Proc & Inst

NMC 183. INTRODUCTION TO MEDIA PRODUCTION. (3 Credits)
Provides core competency in media production: an introduction to audio and video production, and the elements of the media production and post-production processes.

NMC 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

NMC 240. SURVEY OF SOCIAL MEDIA. (3 Credits)
Social media are curiously positioned as being both emergent media and convergent media--they function because of the coalescence of existing media forms and the creation of new ones. This class will use multiple perspectives to explore the past, present, and future of social media.
Prerequisites: NMC 101 with C- or better

NMC 241. APPLIED MEDIA AESTHETICS. (4 Credits)
Principles of visual composition, sequential imagery, interactive design, narrative structure, and cinematic language as they relate to digital communication arts and visualization. Provides core competencies in introductory digital communication arts tools.
Prerequisites: NMC 101 with C- or better
NMC 245. CULTURAL ANALYTICS AND DATA SCIENCE. (3 Credits)
Computational approaches to cultural research have changed what it means to work with media today. This course provides a foundation in data science tailored for work in social and cultural research including basic work in natural language processing, social network analysis, and information visualization.

NMC 255. INTRODUCTION TO SOUND DESIGN. (4 Credits)
The principals and practices of sound design for motion pictures, television and radio. Through reading, viewing, listening and discussion, students will learn the art and science of sound design. Topics include the soundtrack and film narrative—basic terms and concepts; narrative, psychological and emotive functions of sound design; components of the soundtrack—dialogue, music and sound effects; sound design process—recording, editing, mixing and exhibition.
Prerequisites: NMC 101 with C- or better

NMC 260. NEW MEDIA FUTURES. (3 Credits)
Historical context and current perspectives on the various aspects of new multimedia communications, including linear and nonlinear or time-based and interactive media. Primary topics include digital cinema (compositing and nonlinear access), visual music, information visualization, interactive narrative, and virtual space.
Prerequisites: NMC 101 with C- or better

NMC 279. MEDIA LITERACY. (3 Credits)
From the days of cave paintings to our current digital world, we have told stories and created mythologies that guided our collective, daily actions. Using a critical approach, we will analyze various different media to shed light on the underlying structure that shapes our understandings of gender, ethnicity, the self, and our everyday practices as citizens and media consumers.

NMC 280. GLOBAL MEDIA. (3 Credits)
Explores theoretical and practical concepts of global media. Both historical and contemporary perspectives on the topic are addressed, particularly as they relate to cultural autonomy, political rights, social justice, communication flow debates, media systems of different world regions, global representations in U.S. media, and developments in global technology and economic media developments.

NMC 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

NMC 301. WRITING FOR THE MEDIA PROFESSIONAL. (3 Credits)
Fundamentals of gathering information, evaluating information, writing information of the media and editing media content in written form. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: NMC 101

NMC 302. REPORTING. (3 Credits)
An introduction to the practices, procedures, techniques, and organizational structures of basic news gathering and writing.
Equivalent to: WR 301
Recommended: WR 201

NMC 305. COPYEDITING. (3 Credits)
Copyreading, headline writing, newspaper layout and design.
Equivalent to: WR 305

NMC 306. ART AND CULTURE CONTENT CREATION. (3 Credits)
Explores various forms of the arts and culture using criticism/reviewing/feature writing’s forms, principles and ethics. Encourages students to be artful in response, given certain time and space boundaries, but also to discuss pushing the boundaries, exploding those boundaries and doing excellent, artful creation in response to the arts that affect our lives.

NMC 311. INTRODUCTION TO NONPROFIT MANAGEMENT. (3 Credits)
Introduction to the principles of effective nonprofit management and lays a foundation for future leaders and managers in the nonprofit sector. Focuses on historical perspectives, ethics, governance and leadership, legal structure and standards, financial management, strategic planning principles, fundraising principles, volunteer management, marketing and communications, and the future of the nonprofit sector.

NMC 320. HISTORY OF TELECOMMUNICATIONS. (3 Credits)
A historical overview of the telecommunication industry. The goal is to understand how the industry got where it is today and, by analyzing principles, events, and trends, suggest what directions it may take in the future. The emphasis is on constructing a causal chronology, interrelating developments in technology, organization, and structure of the industry. This course will focus on the technological developments in the industry.
Prerequisites: NMC 101 with C- or better and NMC 260 [C-]
Recommended: WR II completed with a passing grade.

NMC 321. HISTORY OF BROADCASTING. (3 Credits)
The technological, economic and corporate, legal and political, artistic, and social developments that shaped American broadcasting in the 20th century are examined. Implications for the future of broadcasting are addressed as well.
Prerequisites: NMC 260 with C- or better
Recommended: WR II completed with a passing grade.

NMC 322. LANDMARKS IN MEDIA CONTENT. (3 Credits)
Introduces students to media content that represents advances in the art and science of creative use of media technology. Some of these advances were recognized immediately, some only after time had passed.
Prerequisites: NMC 101 with C- or better and NMC 260 [C-]
Recommended: WR II completed with a passing grade.

NMC 330. THE MEANING OF VIDEO GAMES. (3 Credits)
Examines approaches to understanding the experience of playing video games, including the role of storytelling in diverse games, the relationship between the player and the game, the game as art, and intersections between games and real life.
Prerequisites: NMC 301 with C- or better
Recommended: NMC 101

NMC 340. SOCIAL MEDIA STRATEGY. (3 Credits)
Designing systems of interaction is important for understanding how people come to be a part of social networks. Students will participate in a series of simulation games that will explore the dimensions of the interaction between publics and social networks, culminating in an original research project.
Prerequisites: NMC 240 with C- or better and NMC 260 [C-]
Recommended: NMC 301

NMC 341. MEDIA SPIN AND DECEPTION DETECTION. (3 Credits)
Examines common ways media is used to deceive, and how media scholars and creators can avoid falling prey to spinners, platformed prevaricators, and purveyors of "fake news" using knowledge of production techniques, logic, and other skills.
Prerequisites: NMC 101 with C- or better and NMC 260 (may be taken concurrently) [C-]
NMC 349. VIDEO ART. (4 Credits)
Studio course in video art and time-based media projects. Emphasis on experimental approaches to video art in a contemporary art context, linear and non-linear video production and the projection and screening of video art projects. Introduction to the history of video art as an art form. Lec/studio. CROSSLISTED as ART 349.
**Prerequisites:** ART 222 with C- or better and ART 263 [C-]
**Equivalent to:** ART 349
*This course is repeatable for 8 credits.*

NMC 351. NEW MEDIA VISUALIZATION. (4 Credits)
Principles of spatial design, immersive story-telling as they relate to Virtual, Augmented and Mixed Reality (collectively referred to as Extended or X-Reality). Additional topics include the history and current applications of X-Reality technology.
**Prerequisites:** NMC 101 with C- or better

NMC 355. APPLIED SOUND DESIGN. (4 Credits)
Technical and theoretical application of placing sound in relation to moving image. Concepts and terminology will focus on the physical anatomy of sound and how manipulation changes the perception of sound. Topics include recording environments and monitoring sound; dialogue, voice over and ADR; sound effects and Foley art; and music underscoring.
**Prerequisites:** NMC 255 with C- or better and NMC 260 [C-]

NMC 356. PODCAST PRODUCTION. (3 Credits)
An intermediate-level production class in which we will develop, launch, distribute, and maintain professional-quality podcasts and use podcasting tools and resources for other storytelling enterprises.
**Prerequisites:** NMC 255 with C- or better
**Corequisites:** NMC 260

NMC 380. PRE-PRODUCTION. (4 Credits)
Focuses on pre-production or the planning phase of multimedia production, which includes concept development, scriptwriting, storyboarding, budgeting, and talent/location scouting. Class projects emphasize brainstorming, story concept/structure, conceptual art, storyboards, storyboarding, and interactive design. Class examines narrative structure and the languages of graphic design, cinema, and interactive story. Lec/studio.
**Prerequisites:** NMC 260 with C- or better

NMC 382. STUDIO AND MULTICAMERA PRODUCTION. (4 Credits)
Proficiency in organizing, producing, directing, and evaluating television programs using multicamera studio techniques, including graphics, set design, audio for television and digital video production, and lighting. Emphasis on bringing ideas from conception to realization in a studio setting. Lec/lab.
**Recommended:** NMC 101

NMC 383. FIELD PRODUCTION. (4 Credits)
Development of the technical abilities and conceptual approaches to audio, film, video and multimedia production. Emphasis on single-camera production techniques and concepts. Students will begin the study of post-production process. Students will also begin to study lighting and audio as they relate to single-camera field production.
**Prerequisites:** NMC 380 with C- or better
**Recommended:** NMC 351

NMC 385. FOUNDATIONS IN MOTION DESIGN. (4 Credits)
Explores theoretical and applied processes in foundational motion design. Through the creation of assets, applied visual styles and animated compositions students investigate the impact of motion in digital storytelling. Applied principles of motion include timing, rhythm, pace, exaggeration, anticipation and balance through stop motion, rotoscope and key frame animation techniques.
**Prerequisites:** NMC 101 with C- or better and NMC 241 [C-] and NMC 260 [C-] and NMC 380 [C-]

NMC 388. SOCIAL MEDIA AND INTERPERSONAL RELATIONSHIPS. (3 Credits)
Examines how individuals build and maintain close relationships through new media and social networks. Currently, scholars are seeing a shift in how individuals self-report building close relationships, as people use elements of new media more and more frequently. This course is designed to look into the similarities and differences of these relationships as compared to face-to-face relationships. CROSSLISTED as COMM 388.
**Equivalent to:** COMM 388

NMC 392. WEB DESIGN AND PROGRAMMING. (3 Credits)
Web apps are applications that are loaded as web pages. They can store data locally and continue to function while offline. In this hands-on class, students will create web apps that run on smart phones. No prior programming skills are required. Programming concepts that are required to create interactive web apps will be covered in this class.
**Prerequisites:** NMC 260 with C- or better

NMC 393. SERVER SIDE PROGRAMMING. (0-3 Credits)
Create websites that focus on the server side. Sever side website can store or retrieve data from users. In this hands-on class, students will create server side websites. No prior programming skills are required. Programming concepts that are required to create interactive server side websites will be covered in this class.
**Prerequisites:** NMC 260 with C- or better
*This course is repeatable for 3 credits.*

**Recommended:** NMC 392

NMC 399. SPECIAL TOPICS. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 402. INDEPENDENT STUDY. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 403. THESIS/DISSERTATION. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 404. WRITING AND CONFERENCE. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 405. READING AND CONFERENCE. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 406. PROJECTS. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 407. SEMINAR. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 408. WORKSHOP. (1-16 Credits)
*This course is repeatable for 16 credits.*

NMC 409. PRACTICUM. (1-16 Credits)
**Equivalent to:** ART 409
*This course is repeatable for 16 credits.*
NMC 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

NMC 418. VIRAL CONTENT. (3 Credits)
Online media is often filled with memes, likes, shares, tweets and even hilarious cat videos. Companies like Buzzfeed exist to create, maintain and drive traffic to content. In 2015, collectively the top 10 YouTube content creators made 70.5 million dollars. So, what's the secret to going viral? This class is designed to look at this question by examining the culture of viral content, the social and psychological influences that shape online behavior and the business of creating and spreading viral content. Throughout the term, students will apply these principle concepts in an attempt to make their own viral content.

NMC 419. REEFER MADNESS IN THE MEDIA. (3 Credits)
Critically examines the history of hemp and marijuana prohibition, issues of propaganda and the media's role during the transition between prohibition and the current state of reform. The purpose of this course is to better understand the role media plays in shaping our political, cultural and personal experiences. For students, this knowledge is invaluable for analysis, evaluation and critical thinking skills. The framework of this class is based on four modules: "History of Marijuana Prohibition", "Marijuana, Media and Culture", "Medicinal Marijuana Movement" and "Legalizing Marijuana Campaigns".

NMC 421. DIFFUSION OF INNOVATIONS. (3 Credits)
An introduction to old and emerging theories that explain the spread of innovative ideas and technologies among members of a society, emphasizing the role of communication processes and the special problems for diffusion in communication technology.
Prerequisites: NMC 301 with C- or better
Recommended: NMC 101

NMC 425. LATINOS IN THE MEDIA. (3 Credits)
Examines the sociohistorical context for the underrepresentation of Latinos in mainstream media, the narrow roles and issues ascribed to Latinos and the ways in which media moguls attempt to attract Latino consumers. Focus on Latino filmmakers, actors, and writers as they rewrite traditional scripts to create a vibrant, multifaceted picture of Latinos in the U.S. today.
Prerequisites: NMC 101 with D- or better

NMC 427. DIGITAL PORNOGRAPHY. (3 Credits)
Exploration of the prominent role pornography plays in digital communication innovation globally including the examination of social consequences; diffusion of technology, business models and economic impact; legal, ethical, and moral issues; and community health and well-being. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

NMC 430. MEDIA THEORY. (3 Credits)
Specifies the concepts, hypotheses, and theoretical paradigms that have characterized the study of media since the early 20th century. The evolution of theory as new media has changed the media economy is emphasized, as well as the need for new concepts to describe phenomena unique to the Internet era (concepts such as .
Prerequisites: NMC 301 with C- or better
Recommended: NMC 101

NMC 433. NEW MEDIA STORY TELLING. (3 Credits)
Students will study and develop storytelling methods using new media communications technology. Storytelling will focus on telling stories using non-linear, interactive, multidimensional, multi-sensory, multimedia techniques.
Recommended: NMC 101

NMC 435. MEDIA EFFECTS. (3 Credits)
Reviews the potential for media technology and media content to influence the beliefs and behaviors of individuals. The media's ability to bring about specific changes in people's attitudes, values, political agendas, purchasing habits, and jury decisions are discussed. The impact of new media's interactive technology and content on people's beliefs and behaviors is emphasized.
Prerequisites: NMC 301 with C- or better

NMC 437. NEW MEDIA AND SOCIETY. (3 Credits)
Traces the impact of new media--from the telegraph to the Internet--on American society. Emphasizes the way that existing social institutions (e.g., schools and churches) and opinion leaders (e.g., presidents and scholars) greeted the arrival of new media with an increasingly predictable mixture of fear and euphoria. Social changes such as the westward expansion of the U.S. in the 19th century, the arrival of immigrants in the late 19th and early 20th centuries, and the rise of youth culture in the mid-20th century are discussed in terms of their connection to developments in the technology and structure of media. The integration of Internet-based services into contemporary American society is the focus of one-half of the course.
Prerequisites: NMC 301 with C- or better
Recommended: NMC 101

NMC 440. MEDIA MANAGEMENT. (3 Credits)
Principles of management and their application to new media. The practice of new media management including personnel, programming, sales and promotions. Students will gain an understanding of the business side of the media industries. Students will also develop the analytical methods and problem solving techniques used in the management decision-making process as they relate to the mass media. Students will study the media of radio, broadcast television, cable television, DBS, MMDS, SMATV, satellite, telephony, Internet, film, the recording industry, advertising and public relations, as well as emerging media businesses.
Prerequisites: NMC 301 with C- or better

NMC 441. MEDIA ENTREPRENEURSHIP. (3 Credits)
Studies the entrepreneurial process as it relates uniquely to the arts and sciences of new media. Students will study the basic entrepreneurial processes of law, finance, accounting, organizational structure, budgeting, business plans, market analyses, taxes, licensing, and insurance as they relate to new media enterprises. Students will also study the sales/revenue generation side of new media ventures.
Prerequisites: NMC 301 with C- or better

NMC 461. TRANS-MEDIA PUBLISHING I: CREATING IP. (4 Credits)
Students develop an exploitable intellectual-property storyworld suitable for trans-media franchise development, and anchor it with a genre-fiction novelette of at least 10,000 words.
Prerequisites: NMC 260 with C- or better and NMC 301 [C-]

NMC 462. TRANS-MEDIA PUBLISHING II: EXPLOITING IP. (3 Credits)
Students exploit intellectual-property story franchises (usually developed in NMC 461) into trans-media suites of storytelling assets, choosing from among various media such as video, e-book, audiobook, podcasting, boardgames, iOS apps.
Prerequisites: NMC 260 with C- or better and NMC 301 [C-]
NMC 470. MEDIA LAW. (3 Credits)
The relevant laws and regulations that govern the mass media; the participants in the law making process; the analytical methods and problem solving techniques used in the law making process; the laws and policies affecting journalists. Issues such as libel, privacy, obscenity, indecency, fair trial/free press and copyright are covered. 
Prerequisites: NMC 301 with C- or better

NMC 471. TELECOMMUNICATIONS POLICY. (3 Credits)
Covers past and present telecommunications policy. Examines the agencies that govern the telecommunications industry, including the Federal Communications Commission. Studies the differences and similarities between the regulations associated with public and private telecommunications systems and services. Students will gain knowledge of telecommunications industry ownership regulations, including antitrust regulation of the telecommunications industry. 
Prerequisites: NMC 301 with C- or better

NMC 481. COMPOSITING AND DIGITAL EFFECTS. (4 Credits)
Explores compositing and digital effects as production techniques in digital storytelling. This course explores several compositing techniques and workflow options for digital manipulation of moving image content. Topics include green screen extraction, motion and camera tracking, rotoscoping, and 2D/3D workflows. 
Prerequisites: NMC 101 with C- or better and NMC 241 [C-] and NMC 260 [C-] and NMC 380 [C-]

NMC 482. DOCUMENTARY. (4 Credits)
Theory and production of the documentary genre. The class covers all stages of producing a documentary film from the idea through development, marketing, planning, shooting, editing, and post-production. Lec/lab. 
Prerequisites: NMC 383 with C- or better 
Recommended: NMC 351 and NMC 380

NMC 483. NEW MEDIA 3-D. (4 Credits)
Hands-on introduction to the world of 3-D computer modeling and animation, including investigations of light, texture, form, spatial design and motion. Course includes discussions of professional and artistic practice and critique of student and professional work. Lec/lab. 
Equivalent to: NMC 485

NMC 484. NEW MEDIA ANIMATION. (4 Credits)
An in-depth theoretical and hands-on investigation of advanced animation tools and techniques used for educational, scientific, entertainment, and expressive communication projects. Tools and techniques covered include motion capture (full body, face, hand), automated lip-sync dialogue processing, dynamic simulation, particle motion, and other simulation or performance-based animation approaches. Students will work individually and in teams to explore the communicative and creative possibilities of the described technologies. 
Recommended: NMC 101

NMC 487. VIRTUAL MEDIA. (4 Credits)
Explores the topics of interactivity in virtual space from conceptual, historical, theoretical, and practical perspectives. The course will compare and contrast real world physical space with virtual space in an attempt to create a virtual world designed with an audience in mind. Color, light, form, motion, and sound will all be examined and applied throughout this course. Lec/lab. 
Prerequisites: NMC 101 with C or better and NMC 483 (may be taken concurrently) [C]

NMC 490. MEDIA ETHICS. (3 Credits)
Exploration of the ethical issues surrounding new media communications. Topics include professionalism in journalism, new media visual production, new media management, advertising, film, and public relations. Topics also include new media's relationship with society, violence in the media, and sex in the media. 
Prerequisites: NMC 301 with C- or better 
Recommended: NMC 101

NMC 493. MEDIA AND POWER. (3 Credits)
Exposes students to the relationship between media and power. From papyrus and the pencil to the printing press, the telegraph, and GPS, media technologies have been central to the analysis and governance of populations. Special attention will be paid to how media technologies have allowed for the exertion, extension, and resistance of power. 
Prerequisites: NMC 301 with C or better

NMC 498. ADVANCED COLLABORATIVE EXPERIENCE. (3-4 Credits)
Senior-level course designed to integrate the skills and knowledge obtained through NMC course work into a group research, group project, and/or group production that will be useful to students for their professional portfolio or serve as the basis for academic publication. Topic changes per term. 
Prerequisites: NMC 101 with C- or better and NMC 301 [C-]
This course is repeatable for 4 credits.

NMC 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Theater Arts

TA 121. ORAL INTERPRETATION I. (3 Credits)
Analysis and presentation of literature. Exploration of emotional reactions, expressive vocal and physical responses, and performing techniques for effective communication. (FA) 
Attributes: LACF – Liberal Arts Fine Arts Core

TA 144. PLAYREADING. (1 Credit)
Reading/discussion/examination of plays from world theatre of past and present from the perspective of production and theatre history. 
This course is repeatable for 2 credits.

TA 147. *INTRODUCTION TO THE THEATRE. (3 Credits)
Origins, history, nature, elements, and style of theatre production; function of artists and craftpersons of the theatre. (FA) (Bacc Core Course) 
Attributes: CPLA – Core, Pers, Lit and Arts; LACF – Liberal Arts Fine Arts Core
Equivalent to: TA 147H

TA 147H. *INTRODUCTION TO THE THEATRE. (3 Credits)
Origins, history, nature, elements, and style of theatre production; function of artists and craftpersons of the theatre. (FA) (Bacc Core Course) 
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACF – Liberal Arts Fine Arts Core
Equivalent to: TA 147

TA 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 242. VISUAL PRINCIPLES OF THEATRE. (3 Credits)
An introduction to visual creativity, creative thinking, and visual problem solving as applied to theatre arts as a whole, and to scene and costume design. (FA) 
Attributes: LACF – Liberal Arts Fine Arts Core
TA 243. PRINCIPLES OF COSTUMING FOR THE STAGE. (3 Credits)
Principles and techniques of costume construction; practical application in the costume shop on theatre production.
Recommended: TA 147 and TA 242

TA 244. SCENE CRAFTS. (3 Credits)
Constructing scenery and stage properties; practical experience in backstage procedures and scene painting. Lec/lab. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core

TA 245. STAGE LIGHTING. (3 Credits)
Fundamentals of electricity as used in stage lighting; color and light, lighting instruments and control systems, theory and practice of lighting stage production.
Recommended: TA 244

TA 247. STAGE MAKEUP. (3 Credits)
Basic principles and theory with laboratory experience in most-used applications of theatrical makeup.

TA 248. FUNDAMENTALS OF ACTING I. (3 Credits)
Examination of basic principles and techniques of acting. Exploration of relaxation/focus, personal vocal/physical awareness, the actor’s craft, and the performance process. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Recommended: TA 147

TA 249. FUNDAMENTALS OF ACTING II. (3 Credits)
Continued work in the basic principles and techniques of acting. Emphasis on improvisation, character analysis, and creation, the balance between truth and technique.
Prerequisites: TA 248 with D- or better

TA 250. WORKSHOP: THEATRE ARTS. (1-3 Credits)
Practical experience in performance, technical theatre, or design. Maximum for 6 credits may be applied toward graduation.
Equivalent to: TA 250H
This course is repeatable for 6 credits.

TA 250H. WORKSHOP: THEATRE ARTS. (1-3 Credits)
Practical experience in performance, technical theatre, or design. Maximum for 6 credits may be applied toward graduation.
Attributes: HNRS – Honors Course Designator
Equivalent to: TA 250
This course is repeatable for 6 credits.

TA 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 330. **HISTORY OF THE THEATRE. (3 Credits)
The rise and development of the composite arts of the theatre in their cultural and social context. Origins to 1500. Offered alternate years. (H)
(Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

TA 331. **HISTORY OF THE THEATRE. (3 Credits)
The rise and development of the composite arts of the theatre in their cultural and social context. 1500 to 1870. Offered alternate years. (H)
(Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Recommended: TA 144 and TA 147

TA 332. **HISTORY OF THE THEATRE. (3 Credits)
The rise and development of the composite arts of the theatre in their cultural and social context. 1870 to present. Offered alternate years. (H)
(Bacc Core Course) (Writing Intensive Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
Recommended: TA 144 and TA 147

TA 344. PLAYSCHRIFT ANALYSIS. (3 Credits)
Study of major approaches to playscript analysis and detailed application of these systems to the theatrical production process. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisites: TA 147 with D- or better
Recommended: TA 144

TA 346. SCENE AND STAGE DESIGN. (3 Credits)
Designs for stage productions including elements of color, mass, line, and lighting for various types of theatre architecture and plays. Offered alternate years.
Recommended: TA 147 and TA 244

TA 348. ADVANCED ACTING: REALISM. (3 Credits)
Discussion, research, rehearsal, performance, and criticism of scenes from realistic drama. Emphasis on the craft of acting, emotional availability/honesty, personal awareness. Offered alternate years.
Prerequisites: TA 248 with D- or better

TA 349. ADVANCED ACTING: STYLES. (3 Credits)
Discussion, research, rehearsal, performance, and criticism of scenes from a range of period and genre styles. Offered alternate years.
Prerequisites: TA 248 with D- or better

TA 350. WORKSHOP THEATRE ARTS. (1-3 Credits)
Advanced work in acting, directing or technical theatre in dramatic productions; laboratory experience. Maximum of 6 credits may be applied toward graduation.
This course is repeatable for 6 credits.

TA 351. PRINCIPLES OF PLAYWRITING. (3 Credits)
Basic principles and techniques of playwriting. Offered alternate years.
Recommended: TA 144 and TA 344

TA 352. PLAYWRITING WORKSHOP. (3 Credits)
Intensive work on student playscripts generated in TA 351, through re-writes, revision and rehearsals. Offered alternate years.
Recommended: TA 351

TA 354. FUNDS PLAY DIRECTION. (3 Credits)
History, theories and techniques of stage direction. Script analysis, study of the audience, staging, working with actors and designers, the production process. Emphasis on practical exploration and application. Offered alternate years.
Recommended: TA 244 and TA 248

TA 360. **MULTICULTURAL AMERICAN THEATRE. (3 Credits)
Examines the rich panorama of multicultural-American theatre (e.g., African-American, gay and lesbian, Hispanic, Asian American). (H)
(Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
Equivalent to: TA 360H
TA 360H. *MULTICULTURAL AMERICAN THEATRE. (3 Credits)
Examines the rich panorama of multicultural-American theatre (e.g.,
African-American, gay and lesbian, Hispanic, Asian American). (H) (Bacc
Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination;
HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: TA 360

TA 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

TA 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

TA 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

TA 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 407. SEMINAR. (1-16 Credits)
Equivalent to: TA 407H
This course is repeatable for 16 credits.

TA 407H. SEMINAR. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: TA 407
This course is repeatable for 16 credits.

TA 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

TA 410. THEATRE ARTS INTERNSHIP. (1-16 Credits)
One- to three-term residency in a producing theatre, for a maximum
allowable total of 15 credits. Student works in a department of the theatre
and in related production activities, according to areas of interest or
specialization. Work supervised and evaluated by agency staff; academic
evaluation by supervising department faculty member(s). Available to
upper-division theatre arts majors and graduate students approved by
faculty and selected by intern agency.
This course is repeatable for 15 credits.
Recommended: 27 credits of theatre arts, with a minimum of 6 credits in area of skill specialization, or 12 credits of upper-division theatre arts courses, with a minimum of 6 credits in area of skill specialization

TA 416. TOPICS IN THEATRE ARTS. (3 Credits)
Lectures and explorations of theories, issues, methods, problems, and
applications in theatre arts. Concentrated work in a variety of selected
theatre topics. Offered as demand and staffing allow.
Equivalent to: TA 416H
This course is repeatable for 12 credits.
Recommended: 9 credits of theatre arts

TA 416H. TOPICS IN THEATRE ARTS. (3 Credits)
Lectures and explorations of theories, issues, methods, problems, and
applications in theatre arts. Concentrated work in a variety of selected
theatre topics. Offered as demand and staffing allow.
Attributes: HNRS – Honors Course Designator
Equivalent to: TA 416
This course is repeatable for 12 credits.
Recommended: 9 credits of theatre arts

TA 443. COSTUME DESIGN. (3 Credits)
Theory and practice of designing costumes for a theatrical production.
Recommended: TA 243

TA 444. *THEORY AND CRITICISM OF THEATRE ARTS. (3 Credits)
Major theories that have influenced and motivated theatre practice in
Western civilization throughout its development. Offered on alternate
years. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: TA 444H
Recommended: 6 credits of theatre history, or 6 credits of dramatic
literature.

TA 450. STUDIO: THEATRE ARTS. (3-6 Credits)
Advanced individual study on approved projects in one of the arts of the
theatre: acting, directing or scene/costume/lighting design; or in stage or
theatre management.
This course is repeatable for 6 credits.
Recommended: 9 credits of upper-division theatre arts

TA 451. INTRODUCTION TO ARTS ENTREPRENEURSHIP. (3 Credits)
Survey of the business strategies behind a successful career in the arts.
Emphasizes the importance of entrepreneurial thinking, engages
students with the fundamentals of the arts "business", and explores
ways to influence and shape the industry's future. (FA) CROSSLISTED as
ART 451, MUS 451.
Attributes: LACF – Liberal Arts Fine Arts Core
Equivalent to: ART 451, MUS 451

TA 454. ADVANCED PLAY DIRECTION. (3 Credits)
Expanded exploration of directing theories and techniques. Practical
application through the production of a one-act play in a laboratory
theatre. Offered alternate years.
Prerequisites: TA 354 with D- or better

TA 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

TA 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

TA 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

TA 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

TA 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

TA 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

TA 510. THEATRE ARTS INTERNSHIP. (6-15 Credits)
One- to three-term residency in a producing theatre, for a maximum
allowable total of 15 credits. Student works in a department of the theatre
and in related production activities, according to areas of interest or
specialization. Work supervised and evaluated by agency staff; academic
evaluation by supervising department faculty member(s). Available to
upper-division theatre arts majors and graduate students approved by
faculty and selected by intern agency.
This course is repeatable for 15 credits.
Recommended: 27 credits in theatre arts, with a minimum of 6 credits in area of skill specialization, or 12 credits of upper-division theatre arts courses, with a minimum of 6 credits in area of skill specialization
TA 516. TOPICS IN THEATRE ARTS. (3 Credits)
Lectures and explorations of theories, issues, methods, problems, and applications in theatre arts. Concentrated work in a variety of selected theatre topics. Offered as demand and staffing allow. This course is repeatable for 12 credits.
Recommended: 9 credits of theatre arts

TA 543. COSTUME DESIGN. (3 Credits)
Theory and practice of designing costumes for a theatrical production.
Recommended: TA 243

TA 550. STUDIO: THEATRE ARTS. (3-6 Credits)
Advanced individual study on approved projects in one of the arts of the theatre: acting, directing or scene/costume/lighting design; or in stage or theatre management.
This course is repeatable for 6 credits.
Recommended: 9 credits of upper-division theatre arts

TA 554. ADVANCED PLAY DIRECTION. (3 Credits)
Expanded exploration of directing theories and techniques. Practical application through the production of a one-act play in a laboratory theatre. Offered alternate years.
Recommended: TA 354

Art Graduate Minor

Graduate Areas of Concentration

Art history, fine arts, photography

The School of Arts and Communication offers graduate work leading to the Master of Arts in Interdisciplinary Studies (MAIS) and toward minors in other advanced degree programs. Emphasis may be in fine arts, art history, or photography. These fields offer sufficient depth to provide a strong minor.

Minor Code: 8800

Minor Code: 8800

Art History Minor

Also available at OSU-Cascades.

Minor Code: 881

Art minors may not elect to take required art courses on an S/U graded basis.

Art Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS)

Also available at OSU-Cascades.

We offer three options of study for a BA/BS in Art:
1. Art History
2. Studio Art
3. Photography and Digital Studio

We offer two options of study for a BFA in Art:
1. Studio Art BFA
2. Photography and Digital Studio BFA

The Art program is an interdisciplinary curriculum that enables students to gain a deeper understanding of their own ideas and how they relate to larger historical and cultural contexts. Courses at the 100 level stress fundamental aspects of visual literacy. Courses numbered 200 through 499 offer increasingly intensive study in art history, painting, printmaking, photography, digital studio, sculpture, expanded media, and drawing.

Major Code: 880

Art majors may not take required art courses on an S/U graded basis.

The Art Major core curriculum courses must be completed before taking upper-division studio courses.

Option Code: 831

The core curriculum studio courses must be completed before taking upper-division studio courses for a major program. All students seeking a major or a minor must see a departmental advisor on a yearly basis.

Option Code: 881

Photography and Digital Studio BFA Option

This option is offered within the following major(s):

- Art - College of Liberal Arts (p. 603)

Formerly Photography BFA option (892).

The Photography and Digital Studio BFA option concentrates on digital and traditional photographic processes and approaches to making contemporary art but also on related technological arts such as video, sound, installation, and computer-based arts. The primary objective of offering the BFA is to provide professional education in visual art at the undergraduate level and to enable graduates to enter professional, studio-based careers and within the creative industries.

Art (BFA) majors taking the Photography and Digital Studio BFA option may not take required art courses on an S/U graded basis. Students may not use courses in which they have earned less than a C– to satisfy BFA requirements. A minimum 3.00 grade-point average must be maintained in all art courses used to meet BFA requirements.

All students seeking a major or a minor must see a departmental advisor on a yearly basis.

### Code | Title | Hours
--- | --- | ---

#### Lower Division

**Art Major Core**

- Select 12 credits

- **ART 100** | ART ORIENTATION | 1
- **ART 199** | SPECIAL STUDIES (Studio for ART 100) | 1
- **ART 117** | 3-D CORE STUDIO | 4
- **ART 121** | DIGITAL CORE STUDIO | 4

#### Studio Art Electives

Select three of the following studio art electives at the 200 level:

- **ART 215** | COLOR IN THE VISUAL ARTS |
- **ART 222** | INTRODUCTION TO TIME-BASED ART |
- **ART 234** | DRAWING II/FIGURE |
- **ART 263** | DIGITAL PHOTOGRAPHY |
- **ART 271** | PRINTMAKING I |
- **ART 281** | PAINTING I |
- **ART 291** | SCULPTURE I |

Select three of the following art history electives at the 200 level:

- **ART 204** | INTRODUCTION TO WESTERN ART: PREHISTORY TO THE HIGH MIDDLE AGES |
- **ART 205** | INTRODUCTION TO WESTERN ART: GOTHIC TO BAROQUE |
- **ART 206** | INTRODUCTION TO WESTERN ART: NEOCLASSICISM TO CONTEMPORARY |
- **ART 208** | INTRODUCTION TO ASIAN ART |
- **ART 210** | HISTORY OF WESTERN ARCHITECTURE |
- **ART 264** | PHOTOGRAPHY: HISTORY, TECHNOLOGY, CULTURE AND ART |

#### Upper-Division

**Required Courses**

- **ART 339** | PROFESSIONAL PRACTICES FOR ARTISTS | 3
- **ART 366** | ART SINCE 1945 | 3
- **ART 411** | ART IN CONTEXT HISTORICAL AND CRITICAL APPROACHES | 3
- **ART 462** | DIRECTIONS AND ISSUES IN CONTEMPORARY ART | 3

**Electives**

Select 45 credits of the following with 4 credits at the 200 level and at least 20 credits at the 400 level:

- **ART 321** | DRAWING CONCEPTS |
- **ART 334** | DRAWING III: FIGURE |
- **ART 340** | DARKROOM PHOTOGRAPHY I |
- **ART 341** | DARKROOM PHOTOGRAPHY II |
- **ART 345** | INTERMEDIATE PHOTOGRAPHY |
- **ART 347** | PHOTOGRAPH: STUDIO LIGHTING |
- **ART 348** | CONCEPTS IN DIGITAL IMAGING |
- **ART 349** | VIDEO ART |
- **ART 351** | INSTALLATION |
- **ART 354** | ALTERNATIVE PROCESSES IN PHOTOGRAPHY |
- **ART 375** | PRINTMAKING: RELIEF |
- **ART 376** | PRINTMAKING: INTAGLIO |
- **ART 377** | PRINTMAKING: LITHOGRAPHY |
- **ART 378** | PRINTMAKING: MONOTYPE |
- **ART 379** | PRINTMAKING: SCREEN PRINTING |
- **ART 381** | PAINTING II: THE FIGURE |
- **ART 382** | PAINTING II: CONCEPTS |
- **ART 383** | PAINTING II: ABSTRACT AND MULTIMEDIA |
- **ART 384** | PAINTING II: NEW GENRE |
- **ART 391** | SCULPTURE II |
- **ART 422** | NEW MEDIA: INTERACTIVE |
- **ART 431** | DRAWING IV |
- **ART 434** | DRAWING IV/FIGURE |
- **ART 441** | PHOTOGRAPHY III |
- **ART 443** | COMBINED MEDIA: PHOTO INSTALLATION |
- **ART 444** | THE CONSTRUCTED IMAGE |
- **ART 446** | DOCUMENTARY PHOTOGRAPHY |
- **ART 447** | ADVANCED STUDIO LIGHTING |
- **ART 454** | ALTERNATIVE PROCESSES IN PHOTOGRAPHY II |
- **ART 475** | PRINTMAKING STUDIO |
- **ART 479** | PRINTMAKING: ADVANCED SCREEN PRINTING |
- **ART 481** | PAINTING III |

Select three of the following art history electives at the 300/400 level with 3 credits at the 200 level and at least one at the 400 level:

- **ART 310** | EARLY CHINESE ART AND ARCHAEOLOGY |
- **ART 311** | LATE CHINESE ART AND CULTURE |
- **ART 312** | CONTEMPORARY CHINESE ART |
- **ART 313** | ART OF JAPAN |
- **ART 320** | ANCIENT GREEK ART |
- **ART 321** | ANCIENT ROMAN ART AND ARCHITECTURE |
- **ART 322** | MEDIEVAL ART AND ARCHITECTURE |
- **ART 323** | ITALIAN RENAISSANCE ART AND ARCHITECTURE |
- **ART 364** | NINETEENTH-CENTURY ART |
- **ART 365** | HISTORY OF MODERN ART 1900-1945 |
- **ART 366** | ART SINCE 1945 |
- **ART 367** | HISTORY OF DESIGN |
- **ART 368** | HISTORY OF PHOTOGRAPHY |
- **ART 460** | HISTORY OF AMERICAN ART |
- **ART 461** | HISTORY OF AMERICAN ART |
- **ART 462** | DIRECTIONS AND ISSUES IN CONTEMPORARY ART |
- **ART 463** | TOPICS IN RENAISSANCE AND BAROQUE ART |
- **ART 464** | CULTURAL STUDIES OF THE MUSEUM |
- **ART 468** | HISTORY OF PRINTMAKING |
- **ART 469** | METHODS AND THEORY OF ART HISTORY |

**Arts, Media, and Technology Minor**

Available only at OSU-Cascades.

The Arts, Media, and Technology program prepares individuals for careers as creative professionals with diverse and adaptable skillsets, ready to address the opportunities and challenges of the 21st century. In addition to traditional art students, this program is designed to attract artists, designers, makers, tinkerers, and builders - those with unorthodox perspectives and unconventional approaches to technology. This minor complements various other programs that may attract like-minded students.

Minor Code: 913
**Arts, Media, and Technology Undergraduate Major (BA, BS, HBA, HBS)**

**Minor Code: 913**

**Arts, Media, and Technology Undergraduate Major (BA, BS, HBA, HBS)**

Available only at OSU-Cascades.

This program provides students with the required skills needed for the contemporary visual arts and design fields. Specifically, the degree provides students with skills in digital imaging, video, design, interactivity, gaming, and 3D output as well as basic visual studies fundamentals in creative communication, color theory, image output and display. This program creates a unique educational experience within Oregon by providing a trans-disciplinary curriculum; traditional studio practice combined with communication and entrepreneurship coursework while also instilling technical practices for professional application. This coursework provides graduates with the content knowledge, experience, and technological skills that employers argue are necessary to be competitive in the 21st century arts and design industries and communities.

* Baccalaureate Core Course (BCC)

Students may not use any variable credit courses toward their minor. Minors must take courses used to fulfill the requirements for a letter grade. A minimum GPA of 2.00 must be earned in communication course work.

**Minor Code: 983**

**Digital Communication Arts Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS)**

Students have the opportunity to focus their studies on a particular part of the discipline of New Media Communications.

**BA/BS/HBA/HBS**

The BA/BS/HBA/HBS of Digital Communication Arts studies the intersection of media and social life. Throughout history, new media have produced profound changes in human interaction. Family life, politics, commerce, religion, and the distribution of privileges have all been subject to fundamental revision in the wake of new technologies for communication. This provides students with a theoretical and practical understanding of the nature of these changes and prepares them to anticipate and manage inevitable future changes as the media landscape continues to evolve. This is particularly appropriate for students who seek careers in media research and criticism, graduate studies in media, work in media policy, and gain skills needed to manage media communications enterprises. A BA/BS/HBA/HBS of Digital Communication Arts can be earned by completing the core requirements as well as the intermediate and advanced levels of study.

**BFA**

The BFA in Digital Communication Arts focuses on media production. The BFA is designed to provide a foundation in media aesthetics, story conceptualization and preproduction planning for linear and nonlinear/interactive projects, video production, sound design and 3D modeling and animation. Students are encouraged to explore their own creativity within a carefully constructed curriculum that serves as a basis for independent work and portfolio development. Faculty members include artists, videographers, editors and composers from professional production environments. A BFA can be earned by completing the Core Requirements, Foundation Course Work and the Production Specialty Requirements.

**Major Code: 473**

**BA/BS Additional Requirements**

All students receiving a BA degree shall have proficiency in a second language, including American Sign Language (ASL), equivalent to that of
attained at the end of the second year sequence with a grade of C– or better as certified by the School of Language, Culture, and Society.

The BS degree is conferred for focused curricula that emphasize scientific ways of knowing and quantitative approaches to understanding in the sciences and the social sciences and for curricula in professional fields. Students satisfying BS degree requirements shall have completed additional math, science and computer science courses beyond the University Baccalaureate Core.

Both the BA and BS degrees require completion of the College of Liberal Arts Core.

The BFA degree does not require the College of Liberal Arts Core or the college’s BA/BS requirements. The requirements within the major exceed those of the CLA Core, making it redundant.

**Degree Requirements**

The Digital Communication Arts major requires a 2.0 GPA for admittance and a 2.3 GPA for graduation. Students must receive a C– or better in all degree course work. Courses for the major must be A–F grading and not S/U.

The Graphic Design major is a professional program. Entering students are designated as Pre-Graphic Design majors.

The pre-professional Graphic Design program typically takes one year to complete. After completing the pre-professional program requirements, students may apply to the professional Graphic Design program. Students will not be permitted to take professional Graphic Design course work without acceptance into the professional Graphic Design program. If admitted into the professional Graphic Design program, it will take students three additional years to complete the professional program regardless of transfer credit standing.

Admission into the professional Graphic Design program is subject to a competitive application process. To apply and be considered for admission, all pre-professional students must meet the following requirements:

- Be declared as a Pre-Graphic Design major.
- Have completed and received a C– or better in ALL courses within the Pre-Graphic Design major by the end of spring term before applying.

Criteria for acceptance. Students will be evaluated on the following:

- Completion and grade in GD 126.
- Completion and grades in GD Foundation courses: ART 101, ART 115, ART 121, and ART 131.
- Completion and grades in Bacc Core First-Year Skills Requirements: WR 121, Speech course (choose one: COMM 111, COMM 114, or COMM 218) and College Level Math course: MTH 105.
- INTRODUCTION TO CONTEMPORARY MATHEMATICS or higher.
- Overall GPA.

- NMC 383: FIELD PRODUCTION
- NMC 409: PRACTICUM 1
  or NMC 410: INTERNSHIP
- NMC 481: COMPOSITING AND DIGITAL EFFECTS
- NMC 482: DOCUMENTARY
- NMC 483: NEW MEDIA 3-D
- NMC 484: NEW MEDIA ANIMATION
- NMC 498: ADVANCED COLLABORATIVE EXPERIENCE

**Total credits required for graduation**: 180

1. Taken as three 1-credit courses or two 1-credit and one 2-credit courses or one 3-credit course. Must equal a minimum total of 3 credits to count as one course in this level. Can combine NMC 409 and NMC 410 credits to equal three.

2. Baccalaureate Core Course (BCC)

3. Writing Intensive Course (WIC)

Students pursuing the BFA in Digital Communication Arts, Production will take a total of approximately 91–98 total credits from the course work listed above to complete the major.

**Major Code: 473**

### Graphic Design Undergraduate Major (BFA, HBFA)

The Bachelor of Fine Arts degree in Graphic Design (GD) is an exciting and rigorous program at OSU. The disciplinary foundations of graphic design are rooted in visual problem solving, design theory and history, as well as professional practices that tie into business and marketing for specific audiences. Examples of the work graphic designers engage in include both print and digital media such as the design of:

- branding and visual identities
- publication design (magazines, newspapers, catalogs)
- information design
- package design
- exhibition design
- interactive design (Web, video)

The discipline of graphic design is constantly changing due to new technologies, broader target audiences, and softer boundaries between disciplines. Students learn to be adaptable, flexible and collaborative in how they work. Graphic designers are creative thinkers and makers and may have strengths and interests in drawing, printmaking and photography.

Music Graduate Minor

Graduate Areas of Concentration

Composition, conducting, music education, performance

The School of Arts and Communication participates in the Master of Arts in Interdisciplinary Studies degree and Master of Arts in Teaching degree. Contact the school for entrance requirements for the MAT degree. Areas of specialization include performance, conducting, composition, music history, and music education.

Through the School of Arts and Communication, graduate students may participate in the following programs: Professional Music Teacher Education, the Master of Arts in Teaching (MAT), the Master of Arts in Interdisciplinary Studies (MAIS), and the Master of Education (EdM) with a focus in music education. The school offers graduate courses in music, music education, and music performance. OSU's music education program is approved by the state of Oregon Teachers Standards and Practices Commission (TSPC) and the National Council for Accreditation of Teacher Education (NCATE). With careful planning, students may complete both the initial and continuing teaching licensure requirements, as well as a master's degree. For more information, contact the Music Education Coordinator, Oregon State University, 101 Community Hall, Corvallis, OR 97331.

Minor Code: 9500

Music Performance Minor

The Music Performance minor focuses attention on the development of performance skills in studio lessons and ensembles that contribute to aptitudes and proficiencies necessary for a lifetime participation in the arts.

Minor Code: 936

Music Minor

Students majoring in other disciplines may elect the Music minor.

Minor Code: 950

Music Undergraduate Major (BA, BS, HBA, HBS)

Major Code: 950

Departmental degree requirements are 47 credits, of which 24 must be upper division. The College of Liberal Arts allows only 12 credits of MUP courses to be applied toward a degree.

A grade of C− or better is required for all courses used to complete music major requirements. These courses cannot be taken with S/U grading.

Transfer students must demonstrate competency in the areas of music history, music theory, aural skills, and piano skills. Placement examinations in each of these areas must be completed by Wednesday of the first week of classes.

### New Media Communications Minor

**Option Code: 954**

**Vocal Performance Option**

This option is offered within the following major(s):

- Music - College of Liberal Arts (p. 614)

Application may be made upon acceptance to 300-level individual lessons and with permission of the faculty program director.

**Option Code: 951**

Courses in the New Media Communications minor are designed to prepare students for a variety of careers in media and allied fields in which knowledge of and skills in mediated communications are an integral part of professional activity. NMC offers students the opportunity to pursue a range of theoretical and practical courses in media.

An NMC minor will allow students from across campus to complement their chosen field of study with an understanding of mediated communications from a new media perspective. Students will better understand how to process the information they receive about their chosen field and how to distribute information about their own work effectively in society. The minor in New Media Communications will assist students in attaining the background necessary for leadership roles in their chosen fields.

For more information, contact the New Media Communications Program on 541-737-1492 or newmedia@oregonstate.edu or visit their website (http://liberalarts.oregonstate.edu/school-arts-and-communication/new-media-communications).

**Minor Code: 619**

All courses for the New Media Communications minor must be taken for graded credit.

A total of 27–29 credits is required for the minor, at least 15 of which must be upper division (300–400).

**Option Code: 954**

**New Media Communications Minor**

New Media Communications (NMC) minor focuses on mediated storytelling and the new media technology that makes it possible. This focus within the broader discipline of mediated communications capitalizes on the historic strengths of Oregon State University. NMC takes an innovative approach to the study of mediated communications. New Media Communications is devoted to the study of mediated communications and its impact on culture, technology and society.

All courses for the New Media Communications minor must be taken for graded credit. A total of 27–29 credits is required for the minor, at least 15 of which must be upper division (300–400).

**Minor Code: 619**
Photography Minor

The Photography minor creates an opportunity for non-Photography majors to study and practice photography, digital imaging and collaborative digital arts practices. Through the study of a diverse range of photographic genres and techniques, students actively practice photography, develop critical-thinking skills, study the histories of photography and key photographic practitioners, have the option to experience other time-based media genres, and further their photography skills by creating professional-level projects.

The role of photography to improve creative thinking skills is invaluable for students studying in other fields where the role of creativity as an aspect of inventiveness and independent project generation is encouraged. Furthermore, a photography minor is an ideal companion to students majoring in the design fields or in Digital Communication Arts students in these areas already share several courses in common with art/photography students.

To qualify as a Photography minor, students must declare the minor when filing the application for graduation, and must have 27 credits in art/photography. Students in these areas already share several courses in common with non-photography students.

For further information, please contact the academic advisor.

Popular Music Studies Minor

Also available via Ecampus.

The online Popular Music Studies minor, offered only via Ecampus, creates an opportunity for students to examine popular music as a cultural and social practice. The minor provides students with literacy in several popular music genres of their choice, including rock n’ roll, hip hop, film music, reggae, Broadway music, music technology and jazz. Through the study of a diverse range of genres, stylistic practices, performance media, and music as a commercial enterprise, students will develop analytical and critical skills to examine musical meaning through the lens of community, music production, and identity.

This minor does not require an audition or ability to read music.

* Baccalaureate Core Course (BCC)
Scientific, Technical, and Professional Communication Certificate

Also available via Ecampus.

The undergraduate certificate in Scientific, Technical, and Professional Communication is an interdisciplinary program offered by the School of Writing, Literature and Film and the School of Arts and Communication. The core will consist of courses in writing, communications, and new media arts. These courses are production-oriented and focused on writing and communication skills that students will transfer into other work. Electives are divided between course work in these and other fields, including one course from the Writing Intensive Curriculum (WIC) and up to six credits in upper-division courses in writing and communication. The program is capped by a one-credit course (face-to-face and Ecampus) focused on the creation of a portfolio of technical and scientific communication materials that will be valuable for students as they begin their careers.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Speech Communication Graduate Minor

Graduate Areas of Concentration

Interpersonal and group communication; rhetoric and social influence; theatre arts costume and scene design; theatre arts directing, performance, and management; theatre arts history, criticism/literature, and playwriting

Minor Code: 9850

Minor Code: 9850

Speech Communication Undergraduate Major (BA, BS, HBA, HBS)

Students majoring in Speech Communication must choose between a Communication option and a Theater Arts option. Both options function as stand-alone majors.

The Communication option consists of 48 credits of course work. Students who choose the Communication option will be required to satisfactorily complete an undergraduate prerequisite core before applying (through the School of Arts and Communication) to the major. Students who are working on completing the prerequisite core are placed in the Pre-Communication major (major code 997).

The Theater Arts option consists of 51 credits of course work. Students in theater arts do not need to complete the undergraduate prerequisite core required in the Communication option. The course requirements for students pursuing a Theatre Arts option are held to a minimum with the intention of allowing the student and their faculty advisor to devise a program most suited to the student's specific needs and objectives.

Major Code: 985

Students pursuing the bachelor's degree in Speech Communication must successfully complete the following requirements:

- Communication option (48 credits) or Theater Arts option (51 credits);
- College of Liberal Arts Core requirements (15 credits);
- Oregon State University Baccalaureate Core (48 credits);
• Oregon State University requirements for the BA or BS;
• Total credits required for graduation is 180.

Major Code: 985

Communication Option

This option is offered within the following major(s):

• Speech Communication - College of Liberal Arts (p. 618)

The Communication option in the School of Arts and Communication consists of 48 credits. The undergraduate prerequisite core must be successfully completed before the student applies to the major through the School of Arts and Communication. Until then, students are placed in the Pre-Communication major (major code 979).

Option Code: 983

COMM 454 ADVANCED ARGUMENTATION
COMM 456 *RHETORIC: 500 BC TO 500 AD
COMM 458 *RHETORIC: 500 AD TO 1900
COMM 459 *CONTEMPORARY THEORIES OF RHETORIC
COMM 466 ETHICS OF RHETORIC

Methods

Select one of the following: 3

COMM 414 COMMUNICATION RESEARCH METHODS
COMM 416 ETHNOGRAPHY OF COMMUNICATION
COMM 464 RHETORICAL CRITICISM (or another methods course outside the Dept. of Speech Communication as approved by advisor)

Electives

Select 24 credits 24

Total Hours 48

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Electives: 24 credits of electives are required in the Communication option with the following stipulations:

• A minimum of 2.0 GPA in course work used for the option is required (including the prerequisite core).
• One Writing Intensive Course (WIC) in the major is required.
• Six (6) elective credits must be taken at the 400 level. Variable credit courses cannot be used for this requirement.
• Limitations: Only 3 credits maximum of lower-division courses will be allowed for the elective portion of this option.
• Only 6 credits maximum of variable credit course work will apply to this option.

Option Code: 983

Theater Arts Option

This option is offered within the following major(s):

• Speech Communication - College of Liberal Arts (p. 618)

Through the Degree Partnership Program (dual admission/enrollment) with Linn-Benton Community College, the Theatre Arts program at Oregon State University is building closer ties with LBCC's drama program. As this innovative program grows, theatre students from both schools will have more performance and production opportunities with greater access to a variety of performance venues and theatre faculty.

* Baccalaureate Core Course (BCC)

**School of History, Philosophy, and Religion**

**History**

The School of History, Philosophy, and Religion offers a BA or BS degree in History. Courses provide fundamental background for the social sciences and humanities and are of special value to students of government, education, law, science, journalism, and business. History majors go on to careers in teaching and many jobs benefiting from a liberal arts background.

BA candidates must have proficiency at the second-year college level of a foreign language.

The school also offers a minor program for undergraduates with majors in other fields.

**Philosophy**

The School of History, Philosophy, and Religion offers a BA or BS degree in Philosophy, a Philosophy minor, an undergraduate and postbaccalaureate certificate in Applied Ethics, an MA or MS in Applied Ethics, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) program with a focus on applied ethics and other areas of philosophy. The school's Program for Ethics, Science, and the Environment (PESE) supports multidisciplinary education and scholarship on ethical and policy issues that are raised by advances in scientific knowledge, biotechnology, and natural resource use.

The Spring Creek Project seeks to bring together the practical wisdom of the environmental sciences, the clarity of philosophical analysis, and the creative, expressive power of the written word, to find new ways to understand and re-imagine our relation to the natural world.

Baccalaureate core courses are taught for students interested in broadening their intellectual horizons, developing their abilities for intellectual criticism, and enlarging their understanding of social, ethical, religious, political, and aesthetic values in contemporary society and world cultures. Many philosophy courses have content that is relevant to the interests of women and minority students.

The school invites non-majors to combine the study of philosophy with their major program by enrolling in the philosophy minor or the Applied Ethics certificate program.

Students interested in philosophy programs should contact or visit the school's undergraduate advisor or director of graduate studies.

**History of Science**

The School of History, Philosophy, and Religion offers the degrees of Master of Arts (MA), Master of Science (MS) and Doctor of Philosophy (PhD) in History of Science. The History of Science graduate program provides professional training in the interdisciplinary subject of the history of science. The program connects the humanities, social sciences, and natural sciences by studying and interpreting the development of the sciences within particular historical settings and
analyzing the changing roles of the sciences within modern cultures. The emphasis in the program is on scientific traditions since the sixteenth century in Europe and North America, in the physical, earth, biological, medical, and social sciences, as well as on environmental history and the history of the environmental sciences.

MA or MS in Applied Ethics Degree

The MA or MS in Applied Ethics provides students skills in moral reasoning and an understanding of the ethical values and dilemmas in today’s world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

MAIS Degree

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, philosophy may be used as a minor. See the graduate section of this catalog for details.

Environmental Arts and Humanities

EAH 411. **PERSPECTIVES IN ENVIRONMENTAL ARTS AND HUMANITIES. (4 Credits)
Introduction to methods of inquiry in the field of environmental arts and humanities. Students will learn key concepts in approaches to environmental humanities scholarship and environmental art, informed by ecological principles and other perspectives from the natural sciences. Disciplinary approaches include history, literature, philosophy, and the formal arts. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC

EAH 412. **ENVIRONMENTAL SCIENCE IN CONTEXT. (4 Credits)
Introduction to environmental science methods and practice, especially for students studying in the arts and humanities. Students will gain a working understanding of the scientific method, theory, and analysis, including how to interpret and evaluate risk assessment, statistics-based arguments, and visual representations of data. Students will also gain an understanding of the history and role of the sciences in environmental discourse. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC

EAH 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

EAH 503. THESIS. (1-16 Credits)
Graded P/N.
This course is repeatable for 99 credits.

EAH 505. READING AND CONFERENCE. (1-4 Credits)
Graded P/N.
This course is repeatable for 4 credits.

EAH 506. FIELD COURSE PROJECTS. (3 Credits)

EAH 507. SEMINAR. (2-4 Credits)
This course is repeatable for 10 credits.

EAH 508. PROFESSIONAL DEVELOPMENT WORKSHOP. (1 Credit)
Graded P/N.
This course is repeatable for 6 credits.

EAH 510. WORK AND FIELD EXPERIENCE. (1-4 Credits)
Graded P/N.
This course is repeatable for 8 credits.
EAH 511. PERSPECTIVES IN ENVIRONMENTAL ARTS AND HUMANITIES.  
(4 Credits)  
Introduction to methods of inquiry in the field of environmental arts and humanities. Students will learn key concepts in approaches to environmental humanities scholarship and environmental art, informed by ecological principles and other perspectives from the natural sciences. Disciplinary approaches include history, literature, philosophy, and the formal arts.

EAH 512. ENVIRONMENTAL SCIENCE IN CONTEXT.  
(4 Credits)  
Introduction to environmental science methods and practice, especially for students studying in the arts and humanities. Students will gain a working understanding of the scientific method, theory, and analysis, including how to interpret and evaluate risk assessment, statistics-based arguments, and visual representations of data. Students will also gain an understanding of the history and role of the sciences in environmental discourse.

EAH 599. SPECIAL TOPICS.  
(4 Credits)  
This course is repeatable for 12 credits.

History

HST 101. *HISTORY OF WESTERN CIVILIZATION.  
(4 Credits)  
Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers the Ancient World to 1000 A.D. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)  
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core  
Equivalent to: HST 101H

HST 102. *HISTORY OF WESTERN CIVILIZATION.  
(4 Credits)  
Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1789 to the present. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)  
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core  
Equivalent to: HST 102H

HST 103. *HISTORY OF WESTERN CIVILIZATION.  
(4 Credits)  
Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1789 to the present. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)  
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core  
Equivalent to: HST 103H

HST 104. *WORLD HISTORY I: ANCIENT CIVILIZATIONS.  
(3 Credits)  
A survey of the historical development of several world civilizations from antiquity to roughly 600 to 700 A.D. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)  
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core  
Equivalent to: HST 201H

HST 105. *WORLD HISTORY II: MIDDLE AND EARLY MODERN AGES.  
(3 Credits)  
A survey of the historical development of several world civilizations roughly from the 8th century to the late 18th century. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. (H) (Bacc Core Course)  
Attributes: CPDC – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core  
Equivalent to: HST 105H

HST 105H. *WORLD HISTORY II: MIDDLE AND EARLY MODERN AGES.  
(3 Credits)  
A survey of the historical development of several world civilizations roughly from the 8th century to the late 18th century. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)  
Attributes: CPDC – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core  
Equivalent to: HST 105

HST 106. *WORLD HISTORY III: THE MODERN AND CONTEMPORARY WORLD.  
(3 Credits)  
A survey of the historical development of several world civilizations from the 18th century to the contemporary period. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)  
Attributes: CPDC – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core  
Equivalent to: HST 106H

HST 106H. *WORLD HISTORY III: THE MODERN AND CONTEMPORARY WORLD.  
(3 Credits)  
A survey of the historical development of several world civilizations from the 18th century to the contemporary period. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)  
Attributes: CPDC – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core  
Equivalent to: HST 106

HST 199. SPECIAL STUDIES.  
(1-16 Credits)  
This course is repeatable for 16 credits.

HST 201. *HISTORY OF THE UNITED STATES.  
(4 Credits)  
Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers pre-Columbian and colonial origins to 1820. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)  
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core  
Equivalent to: HST 201H
HST 201H. *HISTORY OF THE UNITED STATES. (4 Credits)
Provides an overview of the development of the U.S. from the pre-
Columbian era to the present. Attention is given to economic, political,
and social trends, as well as to international relations. Covers pre-
Columbian and colonial origins to 1820. HST 201, HST 202, HST 203 need

Equivalent to: HST 203

HST 210. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United
States, with an eye toward ways that social and cultural contexts
have shaped the religious experience of Americans in different places
and times. Surveys a wide array of religious movements, groups, and
individuals from the colonial period to present. CROSSLISTED as
PHL 210, REL 210. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: HST 210H, PHL 210, PHL 210H, REL 210

HST 210H. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United
States, with an eye toward ways that social and cultural contexts
have shaped the religious experience of Americans in different places
and times. Surveys a wide array of religious movements, groups, and
individuals from the colonial period to present. CROSSLISTED as
PHL 210, REL 210H. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination;
HNRS – Honors Course Designator
Equivalent to: HST 210, PHL 210, PHL 210H, REL 210, REL 210H

HST 215. *INTRODUCTION TO JEWISH TRADITIONS. (4 Credits)
An introduction to Judaism's traditions, histories, and practices. Covers
historical origins and developments from the biblical period through
the Middle Ages, and considers Judaism in the modern world. Topics include
the Jewish calendar (including holidays and their traditions), Jewish life
cycle events, Jewish prayer, and traditional texts such as the Mishnah
and Talmud. CROSSLISTED as HST 215. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: REL 215

HST 299. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: HST 299H
This course is repeatable for 16 credits.

HST 299H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HST 299
This course is repeatable for 16 credits.

HST 310. THE HISTORIAN'S CRAFT. (4 Credits)
A study of the practice as well as theory of historical work. Combines
training in reading, writing, and thinking historically with a survey of
the development of history, philosophies of history, types and use of
historical evidence, varieties of historical investigation, and factors that
influence the writing of history. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 420
Recommended: 9 credits of history or upper-division standing.

HST 315. THE EUROPEAN MILITARY, 1400-1815. (4 Credits)
Major aspects of European military history, 1400-1815, notable
developments in weaponry and strategy, the social history of the military,
impact of war on the civilian front, and pacifism and antimilitarism. Not
offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 316. THE AMERICAN MILITARY, 1607-1865. (4 Credits)
Major aspects of American military history, 1607-1865, notable
developments in weaponry and strategy, the social history of the military,
impact of war on the civilian front, and pacifism and antimilitarism. Not
offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 317. WHY WAR: A HISTORICAL PERSPECTIVE. (4 Credits)
An inquiry into the origins of mass violence. Theory and case studies are
used to suggest possible causes of international war, civil war, revolution,
and genocide. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts
Humanities Core
Equivalent to: HST 317H
HST 317. *WHY WAR: A HISTORICAL PERSPECTIVE. (4 Credits)
An inquiry into the origins of mass violence. Theory and case studies are used to suggest possible causes of international war, civil war, revolution, and genocide. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 317

HST 318. THE AMERICAN MILITARY, 1865-PRESENT. (4 Credits)
Major aspects of American military history, 1865-present: evolution of strategy, tactics, and technology in war; the impact of the military on American society in peace and war; historiographic aspects of U.S. military history. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 319. *THE HISTORY OF HUMAN RIGHTS IN THE MODERN WORLD. (4 Credits)
Historical examination of the articulations, development, and enforcement of human rights in a global context since the 1770s. Particular attention devoted to nineteenth-century transnational humanitarian missions, wartime codes of conduct, international war crimes tribunals, European imperialism and decolonization, twentieth-century genocides, the International Criminal Court, the United Nations’ “Universal Declaration of Human Rights” (UDHR), and the legacy of the UDHR. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

HST 320. *ANCIENT NEAR EAST. (4 Credits)
A detailed survey of the peoples and cultures of the ancient Near East, including Assyria, Babylon, Egypt, Israel, Mesopotamia, and Persia, from the earliest recorded beginnings of civilization to about 500 B.C. Particular attention is given to the art, religion, law, and literature of these civilizations. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACP – Liberal Arts Non-Western Core

HST 321. GREECE. (4 Credits)
The history of the Greek city-states and the civilization they produced; the archaeological discovery of early Greece; the development of the polis; Sparta, Athenian democracy, the Persian and Peloponnesian Wars; Greek private life and religion. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 322. ROMAN REPUBLIC. (4 Credits)
The rise of Rome from a city-state to a world power, Rome’s wars with Carthage, her growing domination of the Mediterranean, the ensuing breakdown of Roman society and traditional values, and the rise of ambitious leaders who ultimately destroyed the Republic. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 323. ROMAN EMPIRE. (4 Credits)
Roman history from 31 B.C. to A.D. 493. The establishment of the Principate, Roman social and private life, the rise of Christianity, the decline and fall of the Western Empire, Rome’s contributions to arts, religion, and law. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 324. *ANCIENT JEWISH HISTORY. (4 Credits)
History of Judaism from the Second Temple through the early Rabbinic period (539 BCE–200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and Greco-Roman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as REL 324.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: HST 324H, REL 324, REL 324H

HST 324H. *ANCIENT JEWISH HISTORY. (4 Credits)
History of Judaism from the Second Temple through the early Rabbinic period (539 BCE–200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and Greco-Roman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as REL 324H.
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: HST 324, REL 324

HST 325. *EARLY CHRISTIANITY: ORIGINS TO 600. (4 Credits)
Traces early Christianity from its origins to the beginning of the Middle Ages. It deals with the origins and Jewish background of Christianity in Palestine, the ministry and teachings of Jesus, the spread of Christianity throughout the Roman Empire by his disciples and early missionaries, the formation of the New Testament canon, the development of Christian doctrine, controversies over heresy, and the origin of monasticism and the Papacy. (Bacc Core Course) CROSSLISTED as REL 325.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: REL 325

HST 326. *HISTORY OF CHRISTIANITY. (4 Credits)
Examines the history of global Christianity from the fifth through the seventeenth centuries. Themes to be investigated include the evolving relationship between the church and the state; mysticism; conversion and resistance; the emergence of Protestantism; marriage and sex, as well as women in the history of Christianity. CROSSLISTED AS REL 326/ HST 326.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: REL 326

HST 327. HISTORY OF MEDIEVAL EUROPE. (4 Credits)
Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 284 A.D. to 1000. Not offered every year. (H) CROSSLISTED as REL 327.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: REL 327

HST 328. HISTORY OF MEDIEVAL EUROPE. (4 Credits)
Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 1000 to 1400. Not offered every year. (H) CROSSLISTED as REL 328.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: REL 328

HST 329. HISTORY OF EARLY MODERN EUROPE. (4 Credits)
Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the Renaissance. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 330. HISTORY OF EARLY MODERN EUROPE. (4 Credits)
Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the Reformation. Not offered every year. (H) CROSSLISTED as REL 330.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: REL 330

HST 331. HISTORY OF EARLY MODERN EUROPE. (4 Credits)
Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the scientific revolution. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
HST 333. _MEDIEVAL AND EARLY MODERN SPANISH HISTORY_. (4 Credits)
From conquest to conquest of America, the social, religious, political and economic history of Spain from 1000 to 1700. Offered fall term in odd years. (H) CROSSLISTED as REL 333. 
Attributes: LACH – Liberal Arts Humanities Core 
Equivalent to: REL 333

HST 335. *_NINETEENTH-CENTURY EUROPE_. (4 Credits)
A thematic overview of the "long" nineteenth century, from the French Revolution (1789) to the outbreak of the First World War (1914): the industrial revolution and the class struggles that accompanied it; the growing importance of the nation in politics and culture; imperial expansion and Europeans’ contacts with non-Europeans; urbanization; Darwinism and Social Darwinism; and the developments leading to the cataclysm of Europe's first "modern" war. Not offered every year. (H) 
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core 

HST 336. _TWENTIETH-CENTURY EUROPE_. (4 Credits)
Examines the politics, culture, and society of Europe from World War I to the present. Themes include total war; ways that art and literature influenced politics; communist and fascist visions of the relationship of the individual to the society or collective; racial theories and genocide; the cold war division of Europe into East and West; decolonization; and the development of the European Community. Not offered every year. (H) 
Attributes: LACH – Liberal Arts Humanities Core

HST 338. *_HITLER'S EUROPE_. (4 Credits)
Examines WWII and Nazi Germany’s efforts to construct an empire. Themes include: the Nazi Party’s rise to power in 1933 and pursuit of war; battles and occupation policies in Western and Eastern Europe, anti-Semitism and the concept of Lebensraum, collaboration among occupied peoples and Germans, and the Holocaust. (Bacc Core Course) 
Attributes: CPWC – Core, Pers, West Culture

HST 340. _HISTORY OF RUSSIA_. (4 Credits)
Survey of political, economic, and social developments from the origin of Russia to the post-Soviet period. Focuses on the period from 862 to 1917. Not offered every year. HST 340 and HST 341 need not be taken in sequence. (H) 
Attributes: LACH – Liberal Arts Humanities Core 
Equivalent to: HST 440, HST 540

HST 341. _HISTORY OF RUSSIA_. (4 Credits)
Survey of political, economic, and social developments from the origin of Russia to the post-Soviet period. Focuses on the period from 1917 to the present. Not offered every year. HST 340 and HST 341 need not be taken in sequence. (H) 
Attributes: LACH – Liberal Arts Humanities Core 
Equivalent to: HST 441, HST 541

HST 344. _SPECIAL TOPICS IN RUSSIAN HISTORY_. (4 Credits)
Special topics and problems in Russian history not covered in other courses. May be repeated when topic varies. Not offered every year. (H) 
Attributes: LACH – Liberal Arts Humanities Core 
This course is repeatable for 8 credits.

HST 345. _SOCIETY IN MODERN RUSSIA_. (4 Credits)
Development of Russian/Soviet/Post-Soviet society since 1861, focusing on gender, urbanization, and the general social ramifications of modernization. Not offered every year. (H) 
Attributes: LACH – Liberal Arts Humanities Core 
Equivalent to: HST 445, HST 545

HST 348. *_INDIGENOUS HISTORY OF LATIN AMERICA_. (4 Credits)
Dedicated to studying the indigenous histories of Mexico, Central, and South America from 2000 BCE to 1600 CE through their own voices with an emphasis on religion, gender, and society. (Bacc Core Course) 
Attributes: CPWC – Core, Pers, Cult Diversity

HST 350. *_MODERN LATIN AMERICA_. (4 Credits)
History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 350. 
Attributes: CPWC – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core 
Equivalent to: HST 350H, REL 350

HST 350H. *_MODERN LATIN AMERICA_. (4 Credits)
History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course) 
Attributes: CPWC – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core 
Equivalent to: HST 350, REL 350

HST 351. *_MODERN LATIN AMERICA_. (4 Credits)
History of the development of Latin America, emphasizing the issues of imperialism, economic dependency, social stratification, political instability, and nationalism within an international context. Covers 1850 to the present. (H) (NC) (Bacc Core Course) 
Attributes: CPWC – Core, Pers, Cult Diversity 

HST 351H. *_MODERN LATIN AMERICA_. (4 Credits)
History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course) 
Attributes: CPWC – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core 
Equivalent to: HST 351

HST 352. *_AFRICANS IN LATIN AMERICAN HISTORY_. (4 Credits)
A survey of the role of Africans and their descendants in Latin American history, linking the history of the Americas, Europe and Africa. (Baccalaureate Core Course) CROSSLISTED as REL 352. 
Attributes: CPWC – Core, Pers, Cult Diversity 
Equivalent to: REL 352
Recommended: HST 350 and HST 351

HST 353. *_SLAVERY IN THE AMERICAS_. (4 Credits)
A survey of the roles of Africans and their descendants in the history of the Atlantic World, linking Europe, Africa, and the Americas. Examines slavery and freedom in the African Diaspora, as well as social, cultural, and spiritual life. (Bacc Core Course) CROSSLISTED as REL 353. 
Attributes: CPWC – Core, Pers, Cult Diversity

HST 356. _WOMEN IN UNITED STATES HISTORY_. (4 Credits)
Women in the United States—their roles in and contribution to American political, economic, social, cultural, and intellectual life. Course sequence pays particular attention to the diversity of American women's backgrounds and experiences. Covers 1620 to 1890. Not offered every year. HST 362 and HST 363 need not be taken in sequence. (H) 
Attributes: LACH – Liberal Arts Humanities Core 

HST 356H. _WOMEN IN UNITED STATES HISTORY_. (4 Credits)
Women in the United States—their roles in and contribution to American political, economic, social, cultural, and intellectual life. Course sequence pays particular attention to the diversity of American women's backgrounds and experiences. Covers 1620 to 1890. Not offered every year. HST 362 and HST 363 need not be taken in sequence. (H) 
Attributes: LACH – Liberal Arts Humanities Core
HST 364. *UNITED STATES RELIGION AND SOCIAL REFORM. (4 Credits)
Provides an awareness of how various religious groups have thought about and engaged with social change pertaining to slavery, feminism, civil rights, same-sex marriage, and immigration. Focus on reading primary sources related to each of these issues. (Bacc Core Course) CROSSLISTED as REL 364.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: REL 364

HST 365. *THE CIVIL RIGHTS MOVEMENT IN THE MODERN U.S.. (4 Credits)
An exploration of the "long civil rights movement" among African Americans and their allies during the 20th century United States, with attention to the structure of racial inequality, movement philosophies and strategies, white allies and opponents, relationships to other freedom movements, and the movement's legacies. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: HST 365H

HST 365H. *THE CIVIL RIGHTS MOVEMENT IN THE MODERN U.S.. (4 Credits)
An exploration of the "long civil rights movement" among African Americans and their allies during the 20th century United States, with attention to the structure of racial inequality, movement philosophies and strategies, white allies and opponents, relationships to other freedom movements, and the movement's legacies. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: HST 365

HST 366. *NATIVE NORTH AMERICA. (4 Credits)
Explores the history, culture, and representation of various Native American groups from the pre-Columbian era to the twenty-first century. Through a range of interdisciplinary readings and media, students will explore themes like the construction and maintenance of cultural identity, politics and warfare between indigenous groups and European or American interlopers, the influence of Native economies, and Native groups' persistence in American life amidst ongoing economic and demographic change. (Bacc Core Course) (H)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core

HST 366. *LESBIAN AND GAY MOVEMENT IN MODERN AMERICA. (4 Credits)
Examination of lesbian and gay male identities, lives, and collectivities in American culture from the post-Civil War period to the present. The political and cultural participation, rather than human sexual behaviors, orientations, or values. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core

HST 369. **IMMIGRATION TO THE U.S. SINCE 1880. (4 Credits)
The history of immigrants to the U.S. after 1880. Focuses on the experience of immigrants and their children in the U.S. and on the history of U.S. immigration policy. Includes several types of writing assignments: nongraded, drafts and revisions, and a research paper using outside primary and secondary sources and scholarly notations specific to the discipline of history. HST 369 satisfies WIC requirement for Liberal Studies majors but not History majors. (Baccalaureate Core Course) (Writing Intensive Course) Taught via Ecampus only.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CWIC – Core, Skills, WIC

HST 370. *SOCIAL CHANGE AND AMERICAN POPULAR MUSIC. (4 Credits)
An examination of the interactions between social history and popular music, including creation, performance, production, distribution, and reception. Social, ethnic, and economics groups have notoriously used popular music to identify themselves and their boundaries. This course examines how the functions of popular music in our culture and economy have changed over time, and the ways in which popular music reflects and sometimes helps precipitate social change. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

HST 375. *GLOBAL HISTORY OF SPORTS. (4 Credits)
Historical and contemporary examination of the ties between global sports and politics, economy, culture, and society. Particular attention devoted to the development of various sports and their modern articulation. Among other, the course deals with these crucial questions: How is 'sports' defined? What led to the development of different sports in different places throughout the world? How are global sports institutions influencing our lives? What are the changes witnessed in consuming sports in the last half a century? How can sports tackle institutionalized racism, but also promote nefarious practices, chauvinism, and exclusion based on ethnicity or religion?.
Attributes: CSGI – Core, Synth, Global Issues

HST 376. *RELIGION AND GENDER: A GLOBAL PERSPECTIVE. (4 Credits)
Introduces students to the academic study of religion, as well as the academic study of gender. In order to offer a global perspective, we will read a series of case studies that deal with the religion as a gendered experience. Students will produce two essays, one of which will be based on independent research. (Bacc Core Course) CROSSLISTED as REL 378 and WGSS 378.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: REL 378, WGSS 378

HST 381. *HISTORY OF AFRICA. (4 Credits)
History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Africa before 1830. HST 381 and HST 382 need not be taken in sequence. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

HST 382. *HISTORY OF AFRICA. (4 Credits)
History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Nineteenth and Twentieth century Africa. (H) (NC)
(Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 382H

HST 382H. *HISTORY OF AFRICA. (4 Credits)
History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Nineteenth and Twentieth century Africa. (H) (NC)
(Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 382
HST 385. *THE ARAB-ISRAELI CONFLICT. (4 Credits)  
Examination of the origins of the Arab-Israeli conflict and subsequent efforts to find a lasting solution. (H) (Bacc Core Course)  
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core  
Equivalent to: HST 385H  
HST 385H. *THE ARAB-ISRAELI CONFLICT. (4 Credits)  
Examination of the origins of the Arab-Israeli conflict and subsequent efforts to find a lasting solution. (H) (Bacc Core Course)  
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core  
Equivalent to: HST 385  
HST 386. *MODERN IRAN: REVOLUTION AND ITS AFTERMATH. (4 Credits)  
The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course)  
Attributes: CSGI – Core, Synth, Global Issues  
Equivalent to: HST 386H  
HST 386H. *MODERN IRAN: REVOLUTION AND ITS AFTERMATH. (4 Credits)  
The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course)  
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator  
Equivalent to: HST 386  
HST 387. *ISLAMIC CIVILIZATION. (4 Credits)  
Political, social, and religious developments from 600 to 1400. Early history and the formation of Islamic society to the Mongol invasion. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 387.  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
Equivalent to: REL 387  
HST 388. *ISLAMIC CIVILIZATION. (4 Credits)  
Political, social, and religious developments from 1400 to the present. The expansion of Islam, Turkic, and Asian dynasties, impact of Western imperialism and modern Islamic world. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 388.  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
Equivalent to: REL 388  
HST 390. *MIDEAST WOMEN: IN THEIR OWN WORDS. (4 Credits)  
The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course)  
Attributes: CSGI – Core, Synth, Global Issues  
Equivalent to: HST 390H  
HST 390H. *MIDEAST WOMEN: IN THEIR OWN WORDS. (4 Credits)  
The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course)  
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator  
Equivalent to: HST 390  
HST 391. *TRADITIONAL CHINA AND JAPAN. (4 Credits)  
Prehistory to Western encounters in the middle of the nineteenth century, with emphasis on the philosophical, artistic heritage, and social institutions of these two countries which form East Asia. HST 391 and HST 392 need not be taken in sequence. (H) (NC) (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
HST 392. *MODERN CHINA AND JAPAN. (4 Credits)  
From the opening of East Asia in the mid-nineteenth century to the present, with emphasis on modern political movements and cultural transformation. HST 391 and HST 392 need not be taken in sequence. (H) (NC) (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
HST 396. *GENDER, FAMILY AND POLITICS IN TRADITIONAL CHINA. (4 Credits)  
Study of the interaction between gender, family and politics as major factors shaping traditional Chinese experience. (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity  
HST 397. *GENDER, FAMILY AND POLITICS IN MODERN CHINA. (4 Credits)  
Study of the interaction between gender, family and politics as three factors shaping modern Chinese experience. Elective for history majors. (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity  
HST 399. SPECIAL TOPICS. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 399H. SPECIAL TOPICS. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 401. RESEARCH. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 402. INDEPENDENT STUDY. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 403. THESIS. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 405. READING AND CONFERENCE. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 406. PROJECTS. (1-16 Credits)  
This course is repeatable for 16 credits.  
HST 407. ^SEMINAR. (5 Credits)  
(Writing Intensive Course)  
Attributes: CWIC – Core, Skills, WIC  
Equivalent to: HST 407H  
This course is repeatable for 20 credits.  
HST 407H. ^SEMINAR. (5 Credits)  
(Writing Intensive Course)  
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator  
Equivalent to: HST 407  
This course is repeatable for 20 credits.
HST 410. HISTORY INTERNSHIP. (1-12 Credits)
Supervised work of a historical nature with historical societies, archives, museums, or other public or private organizations. No more than 6 of the maximum 12 credits may be used to satisfy the history major requirement of 51 credits.
This course is repeatable for 12 credits.

HST 415. SELECTED TOPICS. (4 Credits)
Selected topics of special or current interest not covered in other courses. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 415H
This course is repeatable for 99 credits.

HST 415H. SELECTED TOPICS. (4 Credits)
Selected topics of special or current interest not covered in other courses. (H)
Attributes: HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 415
This course is repeatable for 99 credits.

HST 416. *FOOD IN WORLD HISTORY. (4 Credits)
Historical analysis of food and cooking from pre-history to the present, with an emphasis on cross-cultural differences of food production and consumption. (Bacc Core Course) (H)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core

HST 417. *HISTORY OF BEER AND BREWING. (4 Credits)
History of beer and brewing from the beginnings of civilization through the modern microbrewery movement.
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HST 421. HELLENISTIC GREECE. (4 Credits)
History of the Greek world from the end of the Peloponnesian War to the Roman conquest of Greece; the careers of Alexander the Great and his successors; the art, literature, science, religion, and philosophy of the post-classical or Hellenistic world. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 422. MEDIEVAL SLAVERY. (4 Credits)
A seminar-style course on the history of slavery from late Rome until the beginning of the Atlantic slave trade. Focuses on both primary sources which shed light on premodern slavery, and on recent scholarly debates, as seen in secondary sources. Through the study of slavery, students will investigate the social and cultural history of the long Middle Ages, including questions of class, religion, economics, gender, race, and law.

HST 425. *THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history, other episodes of mass murder in the 20th century. Not offered every year. (H) (Bacc Core Course) CROSSLISTED as REL 425, REL 525.
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core
Equivalent to: HST 425H, REL 425, REL 425H

HST 425H. *THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history, other episodes of mass murder in the 20th century. Not offered every year. (Bacc Core Course) Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 425, REL 425

HST 426. WORLD WAR I: A GLOBAL HISTORY. (4 Credits)
Examines World War I from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at Great Britain, France, Russia, Germany and their colonial possessions. Topics will include the concept of total war and the home fronts of a number of nations.
Prerequisites: HST 103 with D- or better

HST 427. TEACHING THE HOLOCAUST. (4 Credits)
Provides a broad sense of the Holocaust; reviews the event itself, its long-term background (the history of anti-Semitism), and the rise of Nazism and Fascism in the years before World War II. Examines what has been learned from the Holocaust and addresses the broader issue of genocide, especially in the 20th century.

HST 428. HISTORY OF WESTERN THOUGHT. (4 Credits)
A synthesis of major developments in philosophy, science, social, and political theory and the arts in the European Enlightenment (1715-1789). Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 429. HISTORY OF WESTERN THOUGHT. (4 Credits)
A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1789 and 1890. Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence.

HST 430. HISTORY OF WESTERN THOUGHT. (4 Credits)
A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1890 and 1945. Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 431. *A HISTORY OF CHILDHOOD. (4 Credits)
Examines childhood as a social and historical construct and explores how race, class, gender, and geography have created unequal access to this protected category for individual children and continues to produce inequalities in children's health, education, and access to designated safe spaces. Explores how historical phenomena have impacted children, including colonialism, slavery, revolution, the rise of the modern state, the professionalization of medicine and social work, compulsory education, developing legal concepts about children's rights, the development of consumer mass culture, WWII, WWII, and the Cold War. Traces shifting understandings of the 'normal' child. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

HST 432. THE HISTORY OF SEXUALITY. (4 Credits)
The history of human sexuality from ancient Greece to the present. (H) (SS)
Attributes: LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HST 432H
HST 432H. THE HISTORY OF SEXUALITY. (4 Credits)
The history of human sexuality from ancient Greece to the present. (H) (SS)
Attributes: HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HST 432

HST 433. ENGLISH HISTORY. (4 Credits)
The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. Medieval and Tudor-Stuart England. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 434. ENGLISH HISTORY. (4 Credits)
The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. England since 1688. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 435. THE HISTORY OF EUROPEAN WOMEN FROM 1400 TO 1789. (4 Credits)
Focuses on the social, economic, and cultural roles women in Europe between 1400 and 1789. Topics include Christianity and women, the Renaissance lady, the European witch craze, women rulers, the debate about female intellectual abilities, and the beginning of the campaign for female equality.
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 102 and HST 103

HST 436. HISTORY OF MODERN GERMANY. (4 Credits)
Political, economic, social and intellectual developments from 1815 through the imperial, Weimar, and Nazi eras to the present. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 452. MODERN MEXICO. (4 Credits)
History of Mexico since 1810—economic, political, and social change and relations with the United States. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 350 or HST 351 or upper-division standing.

HST 456. PROBLEMS IN LATIN AMERICAN HISTORY. (4 Credits)
A focused examination of the origins and development of selective institutions and problems important to understanding the region, such as the church, the military, labor, political instability, economic stagnation, and social stratification. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 350 or HST 351 or upper-division standing.

HST 460. AMERICAN THOUGHT AND CULTURE. (4 Credits)
An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1776 to 1860. Not offered every year. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 461. AMERICAN THOUGHT AND CULTURE. (4 Credits)
An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1860 to 1930. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 462. AMERICAN THOUGHT AND CULTURE. (4 Credits)
An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1930 to the present. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 464. AMERICAN DIPLOMATIC HISTORY. (4 Credits)
American diplomatic relations from the nation's founding to 1898. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 465. *AMERICAN DIPLOMATIC HISTORY. (4 Credits)
American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core
Equivalent to: HST 465H
Recommended: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 465H. *AMERICAN DIPLOMATIC HISTORY. (4 Credits)
American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HST 465
Recommended: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 466. RELIGION AND U.S. FOREIGN RELATIONS. (4 Credits)
An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSLISTED as REL 466/REL 566.
Equivalent to: REL 466
Recommended: HST 202 and HST 203 or upper-division standing.
HST 467. HISTORY OF THE AMERICAN WEST. (4 Credits)
Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 or upper-division standing.

HST 468. HISTORY OF THE AMERICAN WEST. (4 Credits)
Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 or upper-division standing.

HST 469. HISTORY OF THE PACIFIC NORTHWEST. (4 Credits)
The demographic, ecological, and cultural transformation of Oregon, Washington, and Idaho from Indian times to the present. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 or upper-division standing.

HST 470. RELIGION IN THE AMERICAN WEST. (4 Credits)
The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations (movement in and out of the region), adaptations (changes over time, in response to changing conditions), and discrimination (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSLISTED as REL 470.
Equivalent to: REL 470

HST 471. COLONIAL AMERICA. (4 Credits)
Economic, political, social, religious, and intellectual development of colonial North America from the English background to 1689. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 or upper-division standing.

HST 472. COLONIAL AMERICA. (4 Credits)
Economic, political, social, religious, and intellectual development of colonial North America from 1689 to 1763. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 or upper-division standing.

HST 473. THE ERA OF THE AMERICAN REVOLUTION. (4 Credits)
The American Revolution, the drafting of the Constitution, and the launching of the new nation, 1763 to 1789. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 or upper-division standing.

HST 474. JEFFERSONIAN AND JACKSONIAN DEMOCRACY. (4 Credits)
American political, economic, religious, and social development during the early and middle national era with emphasis on the formation and growth of political parties, territorial expansion and western settlement, and the beginnings of sectional conflict. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 201 and HST 202 or upper-division standing.

HST 475. CIVIL WAR AND RECONSTRUCTION. (4 Credits)
Origins of the war, nature of the war, and the critical postwar era, 1830s to 1880s, with special attention to the changing historiography of the period. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 202 or upper-division standing.

HST 477. THE PROGRESSIVE AND NEW DEAL ERAS. (4 Credits)
Twentieth-century U.S. history from 1900 to 1939, with emphasis on political and economic developments; attention given to diplomatic, cultural, and social change. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 203

HST 478. THE U.S. SINCE 1939. (4 Credits)
United States political, cultural, and diplomatic history from the Second World War through the 1970s, with special emphasis on the Cold War at home and abroad. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 203

HST 481. ENVIRONMENTAL HISTORY OF THE UNITED STATES. (4 Credits)
A study of human interaction with the environment and the transformation of the landscape and ecology of North America from the Indian period to the present, with special attention to the progressive alterations induced by the modernizing world of agriculture, industry, urbanism, and their relation to the market system in the United States. Not offered every year. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core
Recommended: HST 201, HST 202 and HST 203

HST 484. RELIGION AND LAW. (4 Credits)
Investigates the relationship between religion and law in Jewish, Christian, and Muslim society, as well as modern western "secular" society, considering the question from a theoretical, historical, and contemporary case-study perspective. We will look at the religious origins of legal systems, the ways in which members of religious communities engaged with their own and others' laws, and the ways in which modern societies have used law to separate "religion" from the state. CROSSLISTED as REL 484.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: REL 484

HST 485. POLITICS AND RELIGION IN THE MODERN MIDDLE EAST. (4 Credits)
The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 485/REL 585.
Attributes: CPTCD – Core, Pers, Cult Diversity; CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: REL 485
HST 486. A HISTORY OF CHRISTIANITY IN AFRICA. (4 Credits)
An investigation of the historical development and changing character of Christianity in Africa. Topics include the examination of the role of Christianity in the development of social identity and politics in historic Ethiopia from the early first millennium CE; Portuguese missionary efforts in Central Africa during the period of the Atlantic slave trade from the 15th to the 18th centuries; the role of 19th century missionaries in both spreading Christianity in Africa and during the European colonization of Africa at the end of the 19th century, the emergence of African independence churches and prophetic Christianity in the 20th century; and the.
Attributes: LACH – Liberal Arts Humanities Core
Recommended: HST 381 and/or HST 382

HST 487. WORLD WAR II: A GLOBAL HISTORY. (4 Credits)
Examines World War II from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at the US, USSR, Britain, Germany and Japan. Topics will include the concept of total war and the home fronts of a number of nations.
Recommended: HST 103

HST 488. *THE UNITED STATES AND VIETNAM 1945-1995. (4 Credits)
Examines the Vietnam War from both the US and Vietnamese perspective within the context of the Cold War. Political, military, social and moral issues will be covered within the concept of American exceptionalism. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

HST 490. *ISRAELI SOCIETY AND PLURALISM. (4 Credits)
Overwhelmingly a nation of immigrants, modern Israel displays an extraordinary amount of ethnic and social diversity among the 75% of its citizens who identify as Jews and among the 25% defined as Arab or "other." By introducing students to Israel’s ethnic, religious, LGBQT, migrant worker and refugee communities, this course examines the tensions that inform Israel’s efforts to construct a national identity within a multicultural society. Israel aspires to be both liberal democratic and Jewish, secular and religious. As such, it provides an unparalleled case study for investigating how a society negotiates the dynamics of inclusion, exclusion and difference.
Attributes: CSGI – Core, Synth, Global Issues

HST 494. MODERN JAPAN: A CULTURAL HISTORY. (4 Credits)
Japanese history from the Meiji to the contemporary period (1980s/1990s). Examination of Japanese tradition and the Tokugawa period. Investigation of Westernization/modernization, imperialism, national identity, gender, atomic bomb(s), and post-war culture. (H)
Attributes: LACH – Liberal Arts Humanities Core

HST 495. CHINA IN 20TH CENTURY. (4 Credits)
Treats the decline of the Confucian tradition, shifts in the economy, and metamorphoses of the political system. Attention is given to China’s attempt to balance her Communist revolutionary legacies with her current modernizing goals. (H) (NC)
Attributes: LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Recommended: HST 391 and HST 392 or upper-division standing.

HST 499. SPECIAL TOPICS. (1-16 Credits)
Supervised readings designed to allow students to explore in depth key issues in Asian history. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 499H
This course is repeatable for 16 credits.

HST 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: HST 499
This course is repeatable for 16 credits.

HST 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

HST 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

HST 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

HST 506. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

HST 507. SEMINAR. (5 Credits)
PREREQ: Graduate standing.
This course is repeatable for 20 credits.

HST 510. HISTORY INTERNSHIP. (1-12 Credits)
Supervised work of a historical nature with historical societies, archives, museums, or other public or private organizations. No more than 6 of the maximum 12 credits may be used to satisfy the history major requirement of 51 credits.
This course is repeatable for 12 credits.

HST 511. HISTORIOGRAPHY IN HISTORY. (4 Credits)
Introduces graduate students to the range of scholarship within the literature of history. Reveals the full sweep of history as an academic discipline and the process of its professionalization.

HST 512. METHODOLOGIES OF HISTORY. (4 Credits)
A study of the practice as well as theory of historical work. Combines training in reading, writing, and thinking historically with a survey of the development of history, philosophies of history, types and use of historical evidence, varieties of historical investigation, and factors that influence the writing of history.

HST 514. PUBLIC HISTORY. (4 Credits)
Introduces graduate students to the varied aspects and roles of public history, including cultural resource management, research, and report writing.

HST 515. SELECTED TOPICS. (4 Credits)
Selected topics of special or current interest not covered in other courses.
This course is repeatable for 16 credits.

HST 516. FOOD IN WORLD HISTORY. (4 Credits)
Historical analysis of food and cooking from pre-history to the present, with an emphasis on cross-cultural differences of food production and consumption.

HST 521. HELLENISTIC GREECE. (4 Credits)
History of the Greek world from the end of the Peloponnesian War to the Roman conquest of Greece; the careers of Alexander the Great and his successors; the art, literature, science, religion, and philosophy of the post-classical or Hellenistic world. Not offered every year.
Recommended: HST 101

HST 522. MEDIEVAL SLAVERY. (4 Credits)
A seminar-style course on the history of slavery from late Rome until the beginning of the Atlantic slave trade. Focuses on both primary sources which shed light on premodern slavery, and on recent scholarly debates, as seen in secondary sources. Through the study of slavery, students will investigate the social and cultural history of the long Middle Ages, including questions of class, religion, economics, gender, race, and law.
HST 525. THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The
general theme of anti-Semitism in European history is explored for
background. Topics discussed for comparative purposes include anti-
Semitism in American history; other episodes of mass murder in the 20th
century. Not offered every year. CROSSLISTED as REL 425, REL 525.
Equivalent to: REL 525
HST 526. WORLD WAR I: A GLOBAL HISTORY. (4 Credits)
Examines World War I from a global perspective, its origins, the course of
the conflict and its aftermath, looking especially at Great Britain, France,
Russia, Germany and their colonial possessions. Topics will include the
concept of total war and the home fronts of a number of nations.
Recommended: HST 103
HST 527. TEACHING THE HOLOCAUST. (4 Credits)
Provides a broad sense of the Holocaust; reviews the event itself, its long-
term background (the history of anti-Semitism), and the rise of Nazism
and Fascism in the years before World War II. Examines what has been
learned from the Holocaust and addresses the broader issue of genocide,
especially in the 20th century.
HST 528. HISTORY OF WESTERN THOUGHT. (4 Credits)
A synthesis of major developments in philosophy, science, social, and
political theory and the arts in the European Enlightenment (1715-1789).
Not offered every year. HST 528, HST 529, HST 530 need not be taken in
sequence.
HST 529. HISTORY OF WESTERN THOUGHT. (4 Credits)
A synthesis of major developments in philosophy, science, social, and
political theory and the arts between 1789 and 1890. Not offered every
year. HST 528, HST 529, HST 530 need not be taken in sequence.
HST 530. HISTORY OF WESTERN THOUGHT. (4 Credits)
A synthesis of major developments in philosophy, science, social, and
political theory and the arts between 1890 and 1945. Not offered every
year. HST 528, HST 529, HST 530 need not be taken in sequence.
HST 531. A HISTORY OF CHILDHOOD. (4 Credits)
Examines childhood as a social and historical construct and explores
how race, class, gender, and geography have created unequal access to
this protected category for individual children and continues to produce
inequalities in children's health, education, and access to designated
safe spaces. Explores how historical phenomena have impacted children,
including colonialism, slavery, revolution, the rise of the modern state,
the professionalization of medicine and social work, compulsory education,
developing legal concepts about children's rights, the development of
consumer mass culture, WWI, WWII, and the Cold War. Traces shifting
understandings of the 'normal' child.
HST 532. THE HISTORY OF SEXUALITY. (4 Credits)
The history of human sexuality from ancient Greece to the present.
HST 533. ENGLISH HISTORY. (4 Credits)
The major political, cultural, economic, social and religious developments
that have shaped the history of England and ultimately of America and
much of the world. England since 1688. HST 433/HST 533, HST 434/
HST 534 need not be taken in sequence. Not offered every year.
HST 534. ENGLISH HISTORY. (4 Credits)
The major political, cultural, economic, social and religious developments
that have shaped the history of England and ultimately of America and
much of the world. England since 1688. HST 433/HST 533, HST 434/
HST 534 need not be taken in sequence. Not offered every year.
HST 535. THE HISTORY OF EUROPEAN WOMEN FROM 1400 TO 1789. (4
Credits)
Focuses on the social, economic, and cultural roles women in Europe
between 1400 and 1789. Topics include Christianity and women, the
Renaissance lady, the European witch craze, women rulers, the debate
about female intellectual abilities, and the beginning of the campaign for
female equality.
Recommended: HST 102 or HST 103
HST 536. HISTORY OF MODERN GERMANY. (4 Credits)
Political, economic, social and intellectual developments from 1815
through the imperial, Weimar, and Nazi eras to the present. Not offered
every year.
HST 552. MODERN MEXICO. (4 Credits)
History of Mexico since 1810—economic, political, and social change and
relations with the United States. Not offered every year.
Recommended: HST 350 or HST 351
HST 556. PROBLEMS IN LATIN AMERICAN HISTORY. (4 Credits)
A focused examination of the origins and development of selective
institutions and problems important to understanding the region, such as
the church, the military, labor, political instability, economic stagnation,
and social stratification.
Recommended: HST 350 or HST 351
HST 560. AMERICAN THOUGHT AND CULTURE. (4 Credits)
An examination of the main currents of American thought and culture,
emphasizing ideas and concepts that have influenced the development
and growth of American institutions and values from 1776 to 1860.
HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be
taken in sequence. Not offered every year.
Recommended: HST 201 and HST 202 and HST 203
HST 561. AMERICAN THOUGHT AND CULTURE. (4 Credits)
An examination of the main currents of American thought and culture,
emphasizing ideas and concepts that have influenced the development
and growth of American institutions and values from 1860 to 1930.
HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not taken in
sequence. Not offered every year.
Recommended: HST 201 and HST 202 and HST 203
HST 562. AMERICAN THOUGHT AND CULTURE. (4 Credits)
An examination of the main currents of American thought and culture,
emphasizing ideas and concepts that have influenced the development
and growth of American institutions and values from 1930 to the present.
HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be
taken in sequence. Not offered every year.
Recommended: HST 201 and HST 202 and HST 203
HST 564. AMERICAN DIPLOMATIC HISTORY. (4 Credits)
American diplomatic relations from the nation's founding to 1898.
HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence.
Not offered every year.
Recommended: HST 201 and HST 202 and HST 203
HST 565. AMERICAN DIPLOMATIC HISTORY. (4 Credits)
American diplomatic relations from 1898 to the present. HST 464/
HST 564 and HST 465/HST 565 need not be taken in sequence. Not
offered every year.
Recommended: HST 201 and HST 202 and HST 203
HST 566. RELIGION AND U.S. FOREIGN RELATIONS. (4 Credits)
An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSTLISTED as REL 466/REL 566.
Equivalent to: REL 566
Recommended: HST 202 and HST 203

HST 567. HISTORY OF THE AMERICAN WEST. (4 Credits)
Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year.
Recommended: HST 201 and HST 202 and HST 203

HST 568. HISTORY OF THE AMERICAN WEST. (4 Credits)
Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year.
Recommended: HST 201 and HST 202 and HST 203

HST 569. HISTORY OF THE PACIFIC NORTHWEST. (4 Credits)
The demographic, ecological, and cultural transformation of Oregon, Washington, and Idaho from Indian times to the present. Not offered every year.
Recommended: HST 201 and HST 202 and HST 203

HST 570. RELIGION IN THE AMERICAN WEST. (4 Credits)
The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations (movement in and out of the region), adaptations (changes over time, in response to changing conditions), and discriminations (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSTLISTED as REL 570.
Equivalent to: REL 570

HST 571. COLONIAL AMERICA. (4 Credits)
Economic, political, social, religious, and intellectual development of colonial North America from the English background to 1689. HST 471/ HST 571, HST 472/572 need not be taken in sequence. Not offered every year.
Recommended: HST 201

HST 572. COLONIAL AMERICA. (4 Credits)
Economic, political, social, religious, and intellectual development of colonial North America from 1689 to 1763. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year.
Recommended: HST 201

HST 573. THE ERA OF THE AMERICAN REVOLUTION. (4 Credits)
The American Revolution, the drafting of the Constitution, and the launching of the new nation, 1763 to 1789. Not offered every year.
Recommended: HST 201

HST 574. JEFFERSONIAN AND JACKSONIAN DEMOCRACY. (4 Credits)
American political, economic, religious, and social development during the early and middle national era with emphasis on the formation and growth of political parties, territorial expansion and western settlement, and the beginnings of sectional conflict. Not offered every year.
Recommended: HST 201 and HST 202

HST 575. CIVIL WAR AND RECONSTRUCTION. (4 Credits)
Origins of the war, nature of the war, and the critical postwar era, 1830s to 1880s, with special attention to the changing historiography of the period. Not offered every year.
Recommended: HST 202

HST 577. THE PROGRESSIVE AND NEW DEAL ERAS. (4 Credits)
Twentieth-century U.S. history from 1900 to 1939, with emphasis on political and economic developments; attention given to diplomatic, cultural, and social change. Not offered every year.
Recommended: HST 203

HST 578. THE U.S. SINCE 1939. (4 Credits)
United States political, cultural, and diplomatic history from the Second World War through the 1970s, with special emphasis on the Cold War at home and abroad. Not offered every year.
Recommended: HST 203

HST 581. ENVIRONMENTAL HISTORY OF THE UNITED STATES. (4 Credits)
A study of human interaction with the environment and the transformation of the landscape and ecology of North America from the Indian period to the present, with special attention to the progressive alterations induced by the modernizing world of agriculture, industry, urbanism, and their relation to the market system in the United States. Not offered every year.
Recommended: HST 201, HST 202, HST 203

HST 584. RELIGION AND LAW. (4 Credits)
Investigates the relationship between religion and law in Jewish, Christian, and Muslim society, as well as modern western “secular” society, considering the question from a theoretical, historical, and contemporary case-study perspective. We will look at the religious origins of legal systems, the ways in which members of religious communities engaged with their own and others’ laws, and the ways in which modern societies have used law to separate “religion” from the state. CROSSTLISTED as REL 584.
Equivalent to: REL 584

HST 585. POLITICS AND RELIGION IN THE MODERN MIDDLE EAST. (4 Credits)
The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. CROSSTLISTED as REL 485/REL 585.
Equivalent to: REL 585

HST 586. A HISTORY OF CHRISTIANITY IN AFRICA. (4 Credits)
An investigation of the historical development and changing character of Christianity in Africa. Topics include the examination of the role of Christianity in the development of social identity and politics in historic Ethiopia from the early first millennium CE; Portuguese missionary efforts in Central Africa during the period of the Atlantic slave trade from the 15th to the 18th centuries; the role of 19th century missionarises in both spreading Christianity in Africa and during the European colonization of Africa at the end of the 19th century; the emergence of African independence churches and prophetic Christianity in the 20th century; and the
Recommended: HST 381 and/or HST 382

HST 587. WORLD WAR II: A GLOBAL HISTORY. (4 Credits)
Examines World War II from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at the US, USSR, Britain, Germany and Japan. Topics will include the concept of total war and the home fronts of a number of nations.
Recommended: Completion or concurrent enrollment in HST 103
HSTS 415H. **THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY. (4 Credits)
Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. (H) (SS) (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 415
Recommended: Upper-division standing.

HSTS 416. *HISTORY OF MEDICINE PRE-1800. (4 Credits)
History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture, to 1800. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HSTS 417. **HISTORY OF MEDICINE. (4 Credits)
History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 417H

HSTS 417H. **HISTORY OF MEDICINE. (4 Credits)
History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 417
HSTS 418. *SCIENCE AND SOCIETY. (4 Credits)
Historical study of the interaction of science and society. Case studies are used from the 18th through 20th centuries. Topics vary by term. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
HSTS 419. **STUDIES IN SCIENTIFIC CONTROVERSY: METHODS AND PRACTICES. (4 Credits)
Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries. (H) (SS) (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 419H
HSTS 419H. **STUDIES IN SCIENTIFIC CONTROVERSY: METHODS AND PRACTICES. (4 Credits)
Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries. (H) (SS) (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
Equivalent to: HSTS 419
HSTS 421. *TECHNOLOGY AND CHANGE. (4 Credits)
Current views of technology and associated cultural changes and the contexts in which these developed; the changing role of technology in modern industrial society, especially in the United States; recent efforts to predict and control technological developments and the social and cultural consequences. (H) (SS) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core; LACS – Liberal Arts Social Core
HSTS 422. **HISTORICAL STUDIES OF SCIENCE AND POLITICS. (4 Credits)
The historical study of scientists, their work, their political and ethical choices mainly in the United States and Europe from the 1920s to the 1950s. (H) (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
HSTS 423. *SCIENCE AND RELIGION. (4 Credits)
A historical survey of critical issues in the relationship of Western science and religion from ancient times to the end of the twentieth century. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core
HSTS 425. **HISTORY OF THE LIFE SCIENCES. (4 Credits)
History of ideas about life from Greeks to present day. Cultural background and development of major theories of the life sciences with emphasis on natural history. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC
Recommended: Upper-division standing plus one year college sciences.
HSTS 437. *HISTORY OF ANIMALS IN SCIENCE. (4 Credits)
Using a variety of sources, this course explores the ways humans have thought about and used animals in science and medicine from the seventeenth century to the present. How has science constructed the boundaries between humans and animals, and what have the consequences been for each? (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
HSTS 440. *HISTORY OF PSYCHOTHERAPY. (4 Credits)
The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core
Equivalent to: HSTS 440H
HSTS 440H. *HISTORY OF PSYCHOTHERAPY. (4 Credits)
The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: HSTS 440
HSTS 451. *THE HISTORY OF OUTER SPACE. (4 Credits)
Advancements in technology and science have made it possible to observe, robotically explore, personally visit, and daily use outer space including an overview of what we have learned, how this endeavor has shaped human civilization and culture, and what may lie ahead. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
HSTS 452. *A WOMEN'S HISTORY OF OUTER SPACE. (4 Credits)
Since early Babylon, women have also observed the sky, performed fundamental calculations, examined astronomical plates, and made significant fundamental discoveries that changed the way we see the cosmos. At NASA, women have gone from purely secretarial positions in 1958 to commanding the International Space Station and administering the Mars Rover Program today. These advancements in opportunity and responsibility reflect a larger story of how traditional roles for women have evolved in response to changes in both technology and social norms. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
HSTS 499. SPECIAL TOPICS. (1-16 Credits)
(H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HSTS 499H
This course is repeatable for 16 credits.
HSTS 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.
HSTS 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.
HSTS 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
HSTS 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.
HSTS 511. HISTORY OF SCIENCE. (4 Credits)
Stresses the interaction of scientific ideas within their social and cultural context. Scientific thought from ancient civilizations to the post-Roman era. Not offered every year. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence.
Recommended: At least one science sequence
HSTS 512. HISTORY OF SCIENCE. (4 Credits)
Stresses the interaction of scientific ideas with their social and cultural context. Origin of modern science in the 16th and 17th centuries. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence.
Recommended: At least one science sequence

HSTS 513. HISTORY OF SCIENCE. (4 Credits)
Stresses the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence.
Recommended: At least one science sequence

HSTS 514. HISTORY OF TWENTIETH-CENTURY SCIENCE. (4 Credits)
Focuses on the organization, practice, and theories of the natural sciences in the twentieth century, with emphasis primarily on the European and American scientific traditions from the 1890s to the present.

HSTS 515. THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY. (4 Credits)
Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present.

HSTS 516. HISTORY OF MEDICINE PRE-1800. (4 Credits)
History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture, to 1800.

HSTS 517. HISTORY OF MEDICINE. (4 Credits)
History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture.

HSTS 518. SCIENCE AND SOCIETY. (4 Credits)
Historical study of the interaction of science and society. Case studies are used from the 18th through 20th centuries. Topics vary by term.

HSTS 519. STUDIES IN SCIENTIFIC CONTROVERSY: METHOD AND PRACTICE OF. (4 Credits)
Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries.

HSTS 521. TECHNOLOGY AND CHANGE. (4 Credits)
Current views of technology and associated cultural changes and the contexts in which these developed; the changing role of technology in modern industrial society, especially in the United States; recent efforts to predict and control technological developments and the social and cultural consequences.

HSTS 522. HISTORICAL STUDIES OF SCIENCE AND POLITICS. (4 Credits)
The historical study of scientists, their work, their political and ethical choices mainly in the United States and Europe from the 1920s to the 1950s.

HSTS 523. SCIENCE AND RELIGION. (4 Credits)
A historical survey of critical issues in the relationship of Western science and religion from ancient times to the end of the twentieth century.

HSTS 525. HISTORY OF THE LIFE SCIENCES. (4 Credits)
History of ideas about life from Greeks to present day. Cultural background and development of major theories of the life sciences with emphasis on natural history.
Recommended: One year of college sciences

HSTS 537. HISTORY OF ANIMALS IN SCIENCE. (4 Credits)
The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year.

HSTS 539. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

HSTS 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

Peace Studies

PAX 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

PAX 201. STUDY OF PEACE AND THE CAUSES OF CONFLICT. (3 Credits)
Examination of the causes of personal, social, and institutional conflict and peaceful, constructive means of dealing with conflict. The history and current status of peace movements within and outside governments; prospects for world peace. Case studies in peace and conflict. (H) CROSSLISTED as REL 201.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: REL 201

PAX 402. INDEPENDENT STUDY. (1-16 Credits)
Individual basic and applied study projects on peace-related issues, designed in consultation with the Peace Studies Program director or a member of the Peace Studies faculty.
This course is repeatable for 16 credits.

PAX 405. READING AND CONFERENCE. (1-16 Credits)
Study supervised and directed by members of the Peace Studies Program committee or approved faculty, as arranged by the student and Peace Studies Program director.
This course is repeatable for 16 credits.

PAX 407. SEMINAR. (1-16 Credits)
Close examination of peace-related topics, including theory, method, research, and application. May be taken more than one time as topics vary.
This course is repeatable for 16 credits.

PAX 410. PEACE STUDIES INTERNSHIP. (1-16 Credits)
Direct, supervised, and evaluated field work, to supplement the student's classroom work, arranged one term in advance.
This course is repeatable for 16 credits.

PAX 415. TOPICS IN PEACE STUDIES. (1-16 Credits)
Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.
Equivalent to: PAX 415H
This course is repeatable for 16 credits.
PAX 415H. TOPICS IN PEACE STUDIES. (1-16 Credits)
Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.
Attributes: HNRS — Honors Course Designator
Equivalent to: PAX 415
This course is repeatable for 16 credits.

PAX 499. TOPICS IN PEACE STUDIES. (1-4 Credits)
Examination of the work of a particular nonviolence theorist or of a specific problem; e.g., pacifism and humanitarian intervention, nonviolence and gender. Course may be repeated as appropriate. Not offered every year.
This course is repeatable for 16 credits.

PAX 502. INDEPENDENT STUDY. (1-16 Credits)
Individual and applied study projects on peace-related issues, designed in consultation with the Peace Studies Program director or a member of the Peace Studies faculty.
This course is repeatable for 16 credits.

PAX 505. READING AND CONFERENCE. (1-16 Credits)
Study supervised and directed by members of the Peace Studies Program committee or approved faculty, as arranged by the student and Peace Studies Program director.
This course is repeatable for 16 credits.

PAX 507. SEMINAR. (1-16 Credits)
Close examination of peace-related topics, including theory, method, research, and application. May be taken more than one time as topics vary.
This course is repeatable for 16 credits.

PAX 510. PEACE STUDIES INTERNSHIP. (1-16 Credits)
Directed, supervised, and evaluated field work, to supplement the student's classroom work, arranged one term in advance.
This course is repeatable for 16 credits.

PAX 515. TOPICS IN PEACE STUDIES. (1-16 Credits)
Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.

PAX 599. TOPICS IN PEACE STUDIES. (1-4 Credits)
Examination of the work of a particular nonviolence theorist or of a specific problem; e.g., pacifism and humanitarian intervention, nonviolence and gender. Course may be repeated as appropriate. Not offered every year.
This course is repeatable for 8 credits.

Philosophy

PHL 101. CRITICAL THINKING. (4 Credits)
Analysis of arguments, basic patterns of inductive and deductive reasoning, logical relations, and logical fallacies. Intended to improve analytical, critical and reasoning skills.

PHL 110. CRITICAL ANALYSIS. (3 Credits)
Development of a question-asking attitude for academic study. Enables students to explore issues and make informed decisions.

PHL 121. *REASONING AND WRITING. (3 Credits)
Develops critical thinking skills to increase clarity and effectiveness of student writing; uses writing experiences to teach critical thinking skills. Subjects include identifying and evaluating arguments, analyzing assumptions, justifying claims with reasons, avoiding confused or dishonest reasoning, applying common patterns of reasoning in everyday contexts, and writing cogent complex arguments. (Bacc Core Course)
Attributes: CSW2 — Core, Skills, WR II
Equivalent to: PHL 121H

PHL 150. *GREAT IDEAS IN PHILOSOPHY. (3 Credits)
Explores the assumptions and deeper meanings of familiar concepts and experiences. An introduction to some basic and famous ideas in Western thought. Topics may include truth, beauty, infinity, perception, freedom, pleasure, knowledge, mind and body, morality, justice, and political authority. (H) (Bacc Core Course)
Attributes: CPWC — Core, Pers, West Culture; LACH — Liberal Arts Humanities Core

PHL 160. *QUESTS FOR MEANING: WORLD RELIGIONS. (4 Credits)
A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam.
Lec/rec. (H) (Bacc Core Course) CROSSTLISTED as REL 160.
Attributes: CPCD — Core, Pers, Cult Diversity; LACH — Liberal Arts Humanities Core
Equivalent to: PHL 160H, REL 160, REL 160H

PHL 170. *THE IDEA OF GOD. (4 Credits)
Concepts and images of God and their connections to world-views, experience, science, gender, society, self-understanding, and religions. (Bacc Core Course) CROSSTLISTED as PHL 170.
Attributes: CPWC — Core, Pers, West Culture
Equivalent to: REL 170

PHL 199. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies.
Equivalent to: PHL 199H
This course is repeatable for 16 credits.

PHL 201. *INTRODUCTION TO PHILOSOPHY. (4 Credits)
An in-depth introduction to the methods and ideas of Western philosophy, concentrating on such great figures as Socrates, Plato, Aristotle, Descartes, Kant and Nietzsche and such topics as the nature of reality, the existence of God, knowledge and doubt, the relation of consciousness to the world, free will and determinism, good and evil, and minds and machines. Philosophers and ideas covered will vary by the section.
Written assignments are required. (H) (Bacc Core Course)
Attributes: CPWC — Core, Pers, West Culture; LACH — Liberal Arts Humanities Core

PHL 202. INTRODUCTION TO RELIGIOUS STUDIES. (4 Credits)
An introduction to the academic study of religion. It examines the concepts of religion and the sacred, approaches to the study of religion, ubiquitous features of religious experience, including symbol, myth, ritual, and community, understandings of the human condition in diverse religious traditions, and ways religious communities address challenges of pluralism and secularization. CROSSTLISTED as REL 202.
Equivalent to: REL 202

PHL 203. *THE MEANING OF EXISTENCE. (4 Credits)
Introduction to existentialism; explores different philosophical approaches to the significance of human life, meaning, and freedom. (Bacc Core Course)
Attributes: CPWC — Core, Pers, West Culture
PHL 205. *ETHICS. (4 Credits)
Introduction to ethical theory and to the evaluation of ethical issues in society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. Lec/rec. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts
Humanities Core
Equivalent to: PHL 205H

PHL 205H. *ETHICS. (4 Credits)
Introduction to ethical theory and to the evaluation of ethical issues in society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. Lec/rec. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts
Humanities Core
Equivalent to: PHL 205

PHL 206. *RELIGIOUS ETHICS AND MORAL PROBLEMS. (4 Credits)
An examination of the practical ethics of the monotheistic religious traditions of the West–Judaism, Christianity, Islam–and their different approaches to concrete moral problems. Topics include sexuality and marriage, euthanasia, capital punishment, pacifism and just war, and environmentalism. (Bacc Core Course) CROSSLISTED as REL 206.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: REL 206

PHL 207. *POLITICAL PHILOSOPHY. (4 Credits)
Introductory study of the philosophical justifications of political systems and philosophical theories about the rights and obligations of citizens and governments. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts
Humanities Core
Equivalent to: PHL 207H

PHL 208. INTRODUCTION TO BUDDHIST TRADITIONS. (4 Credits)
Survey of the historical development of Buddhism in India and its spread throughout Asia and beyond by investigating the literature, rituals, history and social structure of the Buddhist traditions of Sri Lanka and Southeast Asia, Tibet and the Himalayan region, China, Taiwan, Korea, Japan, and finally its growth in the West. CROSSLISTED as REL 208.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: REL 208

PHL 209. *SELF AND SOCIETY. (4 Credits)
An introduction to social philosophy, addresses the interactions between the development of personal identity (self) and social structures, including social relations, institutions, norms and values. Includes issues in philosophical anthropology (what it means to be human), social theories of the self, and perspectives from feminist philosophy, post-colonial studies, and non-Western contributions in so-cial philosophy. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

PHL 210. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210, REL 210. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: HST 210, HST 210H, PHL 210H, REL 210

PHL 210H. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210H, REL 210H. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: HST 210, HST 210H, PHL 210, REL 210, REL 210H

PHL 213. *INTRODUCTION TO HINDU TRADITIONS. (4 Credits)
Survey of the historical development of Hinduism in India and the "Hindu Diaspora." Topics will include the Indus Valley civilization, the Vedic tradition, yoga, and Hindu renunciation, "Classical" Hindu theism and devotion, Hindu philosophy and ritual, and modern and contemporary Hinduism. (Bacc Core Course) CROSSLISTED as REL 213.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: REL 213

PHL 214. *INTRODUCTION TO ISLAMIC TRADITIONS. (4 Credits)
Development of Islamic traditions in the Arab world and in the global context. Origins of Islam, the narrative of the Prophet Muhammad, the development of the Qur'an, and the central tenets of Islamic faith and practice. Transformation of Islam from a regional to a global tradition. (Bacc Core Course) CROSSLISTED as REL 214.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: REL 214

PHL 220. *WORLD-VIEWS AND VALUES IN THE BIBLE. (4 Credits)
A study of central portions of the Bible (in the Old Testament: Torah, prophets, psalms, and wisdom; in the New Testament: Jesus, gospels, and letters) from the perspective of the academic discipline of biblical scholarship, exploring the philosophical questions of the relationships between story, myth, thought, values, and understandings of life. (H) (Bacc Core Course) CROSSLISTED as REL 220.
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts
Humanities Core
Equivalent to: PHL 220H, REL 220

PHL 251. *KNOWERS, KNOWING, AND THE KNOWN. (4 Credits)
An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: PHL 251H
PHL 251H. *KNOWERS, KNOWING, AND THE KNOWN. (4 Credits)
An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: PHL 251

PHL 275. *INTRODUCTION TO DISABILITY STUDIES. (4 Credits)
Introduces core concepts and themes in the multidisciplinary field of disability studies. Analyzes disability as a product of discriminatory, oppressive, and inaccessible built environments and societies. Explores disability pride, culture, and community as alternatives to medical and charity models of disability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: PHL 275H

PHL 275H. *INTRODUCTION TO DISABILITY STUDIES. (4 Credits)
Introduces core concepts and themes in the multidisciplinary field of disability studies. Analyzes disability as a product of discriminatory, oppressive, and inaccessible built environments and societies. Explores disability pride, culture, and community as alternatives to medical and charity models of disability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: PHL 275

PHL 280. *ETHICS OF DIVERSITY. (4 Credits)
Uses moral philosophy to examine difference-based discrimination and prejudice in the human community. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: PHL 280H

PHL 280H. *ETHICS OF DIVERSITY. (4 Credits)
Uses moral philosophy to examine difference-based discrimination and prejudice in the human community. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 280

PHL 295. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, WGSS 295.
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: ENG 295, ENG 295H, PHL 295H, WGSS 295, WGSS 295H

PHL 295H. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, ENG 295H, WGSS 295, WGSS 295H.
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: ENG 295, ENG 295H, PHL 295, WGSS 295, WGSS 295H

PHL 299. SELECTED TOPICS. (1-16 Credits)
Equivalent to: PHL 299H

This course is repeatable for 99 credits.

PHL 301. *HISTORY OF WESTERN PHILOSOPHY. (4 Credits)
A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: 3 credits of philosophy

PHL 302. *HISTORY OF WESTERN PHILOSOPHY. (4 Credits)
A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: 3 credits of philosophy

PHL 303. *HISTORY OF WESTERN PHILOSOPHY. (4 Credits)
A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: 3 credits of philosophy

PHL 309. *SELF AND SOCIETY. (4 Credits)
As introduction to social philosophy, addresses the interactions between the development of personal identity (self) and social structures, including social relations, institutions, norms and values. Includes issues in philosophical anthropology (what it means to be human), social theories of the self, and perspectives from feminist philosophy, post-colonial studies, and non-Western contributions in social philosophy. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Recommended: Sophomore standing

PHL 310. *CRITICS OF RELIGION. (4 Credits)
An introduction to critiques of religion by Nietzsche, Freud, Marx, and other influential thinkers. Examines the nature, scope, and effects of criticisms that challenge the psychological, moral, political, and epistemological foundations of religious belief, practice, and institutions. (Bacc Core Course) CROSSLISTED as REL 310.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: REL 310

This course is repeatable for 99 credits.
PHL 312. *ASIAN THOUGHT. (4 Credits)
Familiarizes students with key figures in the history of Asian religious ideas and philosophy. While the emphasis will be on the philosophical traditions of Asia, it will quickly become apparent that philosophy and religion are not so easily distinguishable in many Asian traditions. Areas of thought studied will include Hindu, Buddhist, Confucian, and Taoist. (NC) (Bacc Core Course) CROSSLISTED as REL 312.
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: REL 312

PHL 315. *GANDHI AND NONVIOLENCE. (4 Credits)
An examination of the life and work of Mohandas K. Gandhi, the 20th century activist and author, and the theory and practice of nonviolence in his life and work. Emphasis will be placed upon Gandhi's biographical narrative, the development of satyagraha, Gandhi's nonviolent approach to social transformation, and post-Gandhian nonviolent movements. (Bacc Core Course) CROSSLISTED as REL 315.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: PHL 315H, REL 315

PHL 316. INTELLECTUAL ISSUES OF MEXICO AND MEXICAN AMERICANS. (4 Credits)
The philosophical, social, cultural, and political reality of Mexican Americans and their historical roots in Mexico since the Spanish Conquest. Analysis of internal colonialism, racism, machismo, fatalism, alienation, cultural identity, as well as more contemporary including NAFTA, immigration, and U.S.-Mexican relations. (NC) CROSSLISTED as REL 316.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: REL 316

PHL 321. DEDUCTIVE LOGIC. (4 Credits)
Development of formal language and deductive systems for first-order, quantificational logic. Emphasis on translation of ordinary English statements into formal language. Discussion of the contrast between semantic and syntactic treatment of logical concepts.
Recommended: Upper-division standing or PHL 101.

PHL 325. *SCIENTIFIC REASONING. (4 Credits)
Introduction to and analysis of scientific reasoning. Emphasis on understanding and evaluation of theoretical hypotheses, causal and statistical models, and uses of scientific knowledge to make personal and public decisions. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: PHL 325H

PHL 342. CONTEMPORARY ETHICS. (4 Credits)
A study of significant ethical developments and issues in contemporary society, including ethical principles and concepts behind social debates on such matters as sexual ethics, abortion, discrimination, the uses of animals in scientific research, and responsibilities of corporations. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: PHL 205

PHL 344. *PACIFISM, JUST WAR, AND TERRORISM. (4 Credits)
An examination of the philosophical and theological issues pertaining to pacifism, justified war, and forms of terrorism in Islamic and Western traditions. Special attention is given to concepts of jihad, justifications of war, and restraints on conduct in war. (Bacc Core Course) CROSSLISTED as REL 344.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 344H, REL 344

PHL 345. *FIRST FREEDOM: RELIGIOUS LIBERTY AND INTOLERANCE. (4 Credits)
An examination of the religious, philosophical, political, and historical issues regarding religious freedom, conscience, and disestablishment as enshrined in the First Amendment and as illustrated by historical and contemporary examples of religious intolerance in the United States. (Bacc Core Course) CROSSLISTED as REL 345.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: REL 345

PHL 360. *PHILOSOPHY AND THE ARTS. (4 Credits)
Major philosophical theories about art and its meaning, from ancient to modern times. How philosophers have understood beauty, the imagination, art and knowledge, art and pleasure, art and emotion. Offered every other year. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 360H
Recommended: 3 credits of philosophy or upper-division standing

PHL 360H. *PHILOSOPHY AND THE ARTS. (4 Credits)
Major philosophical theories about art and its meaning, from ancient to modern times. How philosophers have understood beauty, the imagination, art and knowledge, art and pleasure, art and emotion. Offered every other year. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 360

PHL 365. *LAW IN PHILOSOPHICAL PERSPECTIVE. (4 Credits)
A study of philosophical issues in the law through the examination of legal cases and major essays in jurisprudence. Special attention given to concepts of justice, responsibility, liberty, law, and legal ethics. Offered every other year. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: 3 credits of philosophy or upper-division standing

PHL 371. *PHILOSOPHIES OF CHINA. (4 Credits)
A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course) CROSSLISTED as REL 371.
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 371H, REL 371
Recommended: 3 credits of philosophy or upper-division standing

PHL 371H. *PHILOSOPHIES OF CHINA. (4 Credits)
A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 371, REL 371
Recommended: 3 credits of philosophy or upper-division standing

PHL 390. MORAL THEORIES. (3 Credits)
Examines the evolution of moral philosophy from the beginning of Western, Greek-based philosophy through contemporary moral theory, and will include philosophical questions about moral philosophy generally, virtue ethics, deontology, utilitarianism, environmental ethics, animal rights, and feminism and ecofeminism.
Prerequisites: PHL 205 with D- or better
PHL 399. SPECIAL TOPICS IN PHILOSOPHY. (1-4 Credits)
Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every year.
Equivalent to: PHL 399H
This course is repeatable for 16 credits.
Recommended: 3 credits of upper-division philosophy

PHL 399H. SPECIAL TOPICS IN PHILOSOPHY. (1-4 Credits)
Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every term.
Attributes: HNRS – Honors Course Designator
Equivalent to: PHL 399
This course is repeatable for 16 credits.
Recommended: 3 credits of upper-division philosophy

PHL 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

PHL 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

PHL 405. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: PHL 405H
This course is repeatable for 16 credits.
Recommended: Sophomore standing

PHL 407. ^SEMINAR. (1-16 Credits)
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: PHL 407H
This course is repeatable for 16 credits.
Recommended: Two upper-division philosophy courses and sophomore standing

PHL 407H. ^SEMINAR. (1-16 Credits)
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Equivalent to: PHL 407
This course is repeatable for 16 credits.
Recommended: Two upper-division philosophy courses and sophomore standing

PHL 410. INTERNSHIP. (1-12 Credits)
This course is repeatable for 16 credits.

PHL 411. GREAT FIGURES IN PHILOSOPHY. (4 Credits)
Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. (H) CROSSLISTED as REL 411/REL 511.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: REL 411
This course is repeatable for 16 credits.
Recommended: 6 credits of philosophy and sophomore standing.

PHL 417. FEMINIST PHILOSOPHIES. (3 Credits)
Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues such as rape and pornography. CROSSLISTED as WGSS 417/WGSS 517. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: WGSS 417, WS 417
Recommended: 6 credits of philosophy or upper-division standing.

PHL 421. MATHEMATICAL LOGIC. (3 Credits)
Rigorous definition of a formal logic and investigation of its characteristics. Emphasis on the distinction and relation between semantic and syntactic methods (model theory and proof theory) and on the meta-mathematical analysis of axiomatic theories. Not offered every year.
Recommended: PHL 321 or 6 credits of 400-level mathematics or computer science and sophomore standing.

PHL 430. HISTORY OF BUDDHIST PHILOSOPHY. (4 Credits)
Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC) CROSSLISTED as REL 430/REL 530.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 430H, REL 430

PHL 430H. HISTORY OF BUDDHIST PHILOSOPHY. (4 Credits)
Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC)
Attributes: HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 430, REL 430

PHL 431. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE. (4 Credits)
Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as REL 431.
Equivalent to: PHL 431H, REL 431

PHL 431H. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE. (4 Credits)
Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by .
Attributes: HNRS – Honors Course Designator
Equivalent to: PHL 431, REL 431

PHL 432. ^YOGA AND TANTRIC TRADITIONS. (4 Credits)
An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. (Bacc Core Course) CROSSLISTED as REL 432/REL 532.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: REL 432

PHL 433. ^THEORY AND PRACTICE OF MODERN YOGA. (4 Credits)
An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga. Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSLISTED as REL 433, REL 533. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: REL 433
PHL 434. *SPIRITUALITY AND ECOCOLOGY: GREEN YOGA. (4 Credits)
An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 434, REL 534.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 434H, REL 434H

PHL 434H. *SPIRITUALITY AND ECOCOLOGY: GREEN YOGA. (4 Credits)
An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 432H/REL 532H.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: PHL 434, REL 434, REL 434H

PHL 436. PHILOSOPHY AND RELIGION. (3 Credits)
Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as REL 436/REL 536.
Equivalent to: REL 436
Recommended: 6 credits of philosophy and sophomore standing.

PHL 439. PHILOSOPHY OF NATURE. (3 Credits)
Intensive one-week field course taught in the Cascade Range. What is nature? What is the relation of humans to the rest of the natural world? How are our concepts of nature and decisions about land use shaped by the words and metaphors we use? What is the value ofwild places? What can we learn from a close study of the natural world about right ways of acting in communities, both civic and biotic? The course will draw on many ways ofknowing—philosophical analysis, close observation, and especially writing.

PHL 440. *ENVIRONMENTAL ETHICS. (3 Credits)
Philosophical ideas about our ethical relationships with parts of the non-human world and future generations, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics, philosophical problems in environmental ethics (such as the moral status of animals, plants, species, and ecosystems), the uses of environmental ethics by environmental groups, and selected contemporary global environmental issues such as global warming and loss of biodiversity. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 440H
Recommended: PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing.

PHL 440H. *ENVIRONMENTAL ETHICS. (3 Credits)
Philosophical ideas about our ethical relationships with parts of the non-human world and future generations, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics, philosophical problems in environmental ethics (such as the moral status of animals, plants, species, and ecosystems), the uses of environmental ethics by environmental groups, and selected contemporary global environmental issues such as global warming and loss of biodiversity. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 440
Recommended: PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing.

PHL 443. *WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (Bacc Core Course) (NC) CROSSLISTED as REL 443, REL 543.
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Non-Western Core
Equivalent to: PHL 443H, REL 443
Recommended: One introductory-level science course and sophomore standing.

PHL 443H. *WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (Bacc Core Course) CROSSLISTED as REL 443H.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACH – Liberal Arts Non-Western Core
Equivalent to: PHL 443, REL 443, REL 443H
Recommended: One introductory-level science course and sophomore standing.

PHL 444. *BIOMEDICAL ETHICS. (4 Credits)
Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decision in medicine. (H) (Bacc Core Course) CROSSLISTED as REL 444/REL 544.
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 444H, REL 444

PHL 444H. *BIOMEDICAL ETHICS. (4 Credits)
Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decision in medicine. (H) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 444, REL 444

PHL 448. NATIVE AMERICAN PHILOSOPHIES. (4 Credits)
Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. (NC) CROSSLISTED as ES 448/ES 548, REL 448/REL 548.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: ES 448, REL 448

PHL 450. TOPICS. (1-16 Credits)
Uses the IDEAS MATTER lectures as the focus for an exploration of ideas that make a difference in the world. Students read background materials, attend lectures, meet with the speakers, and write essays on the ideas they learn.
This course is repeatable for 16 credits.
PHL 451. KNOWLEDGE AND REALITY. (3 Credits)
Examination of significant theories of knowledge, theories concerning the nature of reality, and their connections. Includes an analysis of important concepts and problems, such as perception, induction, belief, empiricism, rationalism, and skepticism. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: 6 credits of philosophy, sophomore standing.

PHL 455. DEATH AND DYING. (3 Credits)
A multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSLISTED as REL 455, REL 555.
Equivalent to: PHL 455H, REL 455
Recommended: 6 credits of philosophy or sophomore standing.

PHL 456. PHILOSOPHY OF MIND. (4 Credits)
Past and present theories about consciousness, the relationship of mind and body, and the roots and implications of those theories. Includes historical "isms" (e.g., dualism, monism), contemporary views, and connections of these theories to further issues in philosophy and contemporary culture, e.g., desires, mental illness, personhood and otherness, animal minds, explanation, the mind in non-Western traditions and in religions.
Recommended: PHL 251

PHL 461. ART AND MORALITY. (4 Credits)
The arts in the context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as REL 461/REL 561.
Equivalent to: REL 461

PHL 470. PHILOSOPHY OF SCIENCE. (3 Credits)
Examination of philosophical questions, classic and contemporary, about science and scientific knowledge. Scientific explanations, the structure of theories, the concept of a natural law, revolutions in science, influences of the sciences and philosophy on one another, science and values. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: 6 credits of upper-division philosophy and sophomore standing

PHL 474. *PHILOSOPHY OF BIOLOGY. (4 Credits)
An introduction to some of the conceptual challenges engendered by contemporary evolutionary biology, including the nature of fitness, natural selection, adaptations, and species; identifying organisms, traits, and the units of selection; the evidence required to support particular adaptive or historical hypotheses; and others. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: Previous university-level course work in either philosophy or the biological sciences

PHL 499. TOPICS IN PHILOSOPHY. (1-4 Credits)
Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year.
Equivalent to: PHL 499H
This course is repeatable for 16 credits.
Recommended: 6 credits of upper-division philosophy, sophomore standing.

PHL 499H. TOPICS IN PHILOSOPHY. (1-4 Credits)
Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year.
Attributes: HNRS – Honors Course Designator
Equivalent to: PHL 499
This course is repeatable for 4 credits.
Recommended: 6 credits of upper-division philosophy, sophomore standing

PHL 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PHL 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

PHL 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PHL 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PHL 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.
Recommended: Two upper-division philosophy courses

PHL 510. INTERNSHIP. (1-12 Credits)
This course is repeatable for 16 credits.

PHL 511. GREAT FIGURES IN PHILOSOPHY. (4 Credits)
Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. CROSSLISTED as REL 411/REL 511.
Equivalent to: REL 511
This course is repeatable for 16 credits.
Recommended: 6 credits of philosophy

PHL 517. FEMINIST PHILOSOPHIES. (3 Credits)
Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues such as rape and pornography. CROSSLISTED as WGSS 417/WGSS 517.
Equivalent to: WGSS 517, WS 517
Recommended: 6 credits of philosophy

PHL 525. PHILOSOPHICAL METHODS. (3 Credits)
Examines diverse ways of approaching philosophical issues. Contains readings from different philosophical traditions. Develops understanding of the skills and conventions of philosophical argumentation.

PHL 530. HISTORY OF BUDDHIST PHILOSOPHY. (4 Credits)
Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. CROSSLISTED as REL 430/REL 530.
Equivalent to: REL 530

PHL 531. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE. (4 Credits)
Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as REL 431.
Equivalent to: REL 531
PHL 532. YOGA AND TANTRIC TRADITIONS. (4 Credits)
An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. CROSSTLISTED as REL 432/REL 532.
Equivalent to: REL 532

PHL 533. THEORY AND PRACTICE OF MODERN YOGA. (4 Credits)
An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSTLISTED as REL 433, REL 533.
Equivalent to: REL 533

PHL 534. SPIRITUALITY AND ECOLOGY: GREEN YOGA. (4 Credits)
An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSTLISTED as REL 434, REL 534.
Equivalent to: REL 534

PHL 536. PHILOSOPHY AND RELIGION. (3 Credits)
Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSTLISTED as REL 436/REL 536.
Recommended: 6 credits of philosophy

PHL 539. PHILOSOPHY OF NATURE. (3 Credits)
Intensive one-week field course taught in the Cascade Range. What is nature? What is the relation of humans to the rest of the natural world? How are our concepts of nature and decisions about land use shaped by the words and metaphors we use? What is the value of wild places? What can we learn from a close study of the natural world about right ways of acting in communities, both civic and biotic? The course will draw on many ways of knowing--philosophical analysis, close observation, and especially writing. Camping required.

PHL 540. ENVIRONMENTAL ETHICS. (3 Credits)
Philosophical ideas about our ethical relationships with parts of the non-human world and future generations, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics, philosophical problems in environmental ethics (such as the moral status of animals, plants, species, and ecosystems), the uses of environmental ethics by environmental groups, and selected contemporary global environmental issues such as global warming and loss of biodiversity.
Recommended: PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy

PHL 541. CLASSIC MORAL THEORIES. (3 Credits)
Philosophical issues in ethics analyzed through the examination of such classical works in moral philosophy as Aristotle's Nichomachean ethics. Not offered every year.
Recommended: Either PHL 205 or PHL 342 or PHL 440 or one course in the history of philosophy.

PHL 542. CONTEMPORARY MORAL THEORIES. (3 Credits)
Examines contemporary ethical theories through study of moral philosophy in the 20th century, including recent developments in such areas as environmental ethics and feminist/feminine ethics.
Recommended: At least two philosophy courses including at least one of PHL 205 or PHL 342 or PHL 541.

PHL 543. WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. CROSSTLISTED as REL 443, REL 543.
Equivalent to: REL 543
Recommended: One introductory-level science course

PHL 544. BIOMEDICAL ETHICS. (4 Credits)
Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. CROSSTLISTED as REL 444/REL 544.
Equivalent to: REL 544

PHL 547. RESEARCH ETHICALS. (3 Credits)
An examination of the interpersonal relationship between ethical values and scientific practice. Topics include professionalism in science; scientific integrity, misconduct, and whistleblowing; the ethics of authorship; conflicts of interest between academic science and commercial science, and social responsibilities in science.

PHL 548. NATIVE AMERICAN PHILOSOPHIES. (4 Credits)
Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. CROSSTLISTED as ES 448/ES 548, REL 448/REL 548.
Equivalent to: ES 548, REL 548

PHL 550. TOPICS. (1-16 Credits)
Uses the IDEAS MATTER lectures as the focus for an exploration of ideas that make a difference in the world. Students read background materials, attend lectures, meet with the speakers, and write essays on the ideas they learn.
This course is repeatable for 16 credits.

PHL 551. KNOWLEDGE AND REALITY. (3 Credits)
Examination of significant theories of knowledge, theories concerning the nature of reality, and their connections. Includes an analysis of important concepts and problems, such as perception, induction, belief, empiricism, rationalism, and skepticism. Not offered every year.
Recommended: 6 credits of philosophy

PHL 555. DEATH AND DYING. (3 Credits)
A multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year.
CROSSTLISTED as REL 455, REL 555.
Equivalent to: REL 555
Recommended: 6 credits of philosophy

PHL 556. PHILOSOPHY OF MIND. (4 Credits)
Past and present theories about consciousness, the relationship of mind and body, and the roots and implications of those theories. Includes historical "isms" (e.g., dualism, monism), contemporary views, and connections of these theories to further issues in philosophy and contemporary culture, e.g., desires, mental illness, personhood and otherness, animal minds, explanation, the mind in non-Western traditions and in religions.
Recommended: PHL 251
PHL 561. ART AND MORALITY. (4 Credits)
The arts in the context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as REL 461/REL 561.
Equivalent to: REL 561

PHL 570. PHILOSOPHY OF SCIENCE. (3 Credits)
Examination of philosophical questions, classic and contemporary, about science and scientific knowledge. Scientific explanations, the structure of theories, the concept of a natural law, revolutions in science, influences of the sciences and philosophy on one another, science and values. Not offered every year.

Recommended: 6 credits of upper-division philosophy

PHL 574. PHILOSOPHY OF BIOLOGY. (4 Credits)
An introduction to some of the conceptual challenges engendered by contemporary evolutionary biology, including the nature of fitness, natural selection, adaptations, and species; identifying organisms, traits, and the units of selection; the evidence required to support particular adaptive or historical hypotheses; and others.

Recommended: Previous university-level course work in either philosophy or the biological sciences

PHL 599. TOPICS IN PHILOSOPHY. (1-4 Credits)
Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year.

Equivalent to: PHL 590
This course is repeatable for 16 credits.

Recommended: 6 credits of upper-division philosophy

**Religious Studies**

REL 160. *QUESTS FOR MEANING: WORLD RELIGIONS. (4 Credits)
A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as PHL 160.
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 160, PHL 160H, REL 160H

REL 160H. *QUESTS FOR MEANING: WORLD RELIGIONS. (0-4 Credits)
A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as PHL 160H.
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 160, PHL 160H, REL 160

REL 170. *THE IDEA OF GOD. (4 Credits)
Concepts and images of God and their connections to world-views, experience, science, gender, society, self-understanding, and religions. (Bacc Core Course) CROSSLISTED as PHL 170.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: PHL 170

REL 199. SPECIAL TOPICS. (1-4 Credits)
This course is repeatable for 12 credits.

REL 201. STUDY OF PEACE AND THE CAUSES OF CONFLICT. (3 Credits)
Examination of the causes of personal, social, and institutional conflict and peaceful, constructive means of dealing with conflict. The history and current status of peace movements within and outside governments; prospects for world peace. Case studies in peace and conflict (H) CROSSLISTED as PAX 201.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: PAX 201

REL 202. INTRODUCTION TO RELIGIOUS STUDIES. (4 Credits)
An introduction to the academic study of religion. It examines the concepts of religion and the sacred, approaches to the study of religion, ubiquitous features of religious experience, including symbol, myth, ritual, and community, understandings of the human condition in diverse religious traditions, and ways religious communities address challenges of pluralism and secularization. CROSSLISTED as PHL 202.
Equivalent to: PHL 202

REL 206. *RELIGIOUS ETHICS AND MORAL PROBLEMS. (4 Credits)
An examination of the practical ethics of the monotheistic religious traditions of the West—Judaism, Christianity, Islam—and their different approaches to concrete moral problems. Topics include sexuality and marriage, euthanasia, capital punishment, pacifism and just war, and environmentalism. (Bacc Core Course) CROSSLISTED as PHL 206.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: PHL 206

REL 208. INTRODUCTION TO BUDDHIST TRADITIONS. (4 Credits)
Survey of the historical development of Buddhism in India and its spread throughout Asia and beyond by investigating the literature, rituals, history and social structure of the Buddhist traditions of Sri Lanka and Southeast Asia, Tibet and the Himalayan region, China, Taiwan, Korea, Japan, and finally its growth in the West. (NC) CROSSLISTED as PHL 208.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 208

REL 210. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. (Bacc Core Course) CROSSLISTED as HST 210, PHL 210.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: HST 210, HST 210H, PHL 210, PHL 210H, REL 210H

REL 210H. *RELIGION IN THE UNITED STATES. (4 Credits)
A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. (Bacc Core Course) CROSSLISTED as HST 210H, PHL 210H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: HST 210, HST 210H, PHL 210, PHL 210H, REL 210
REL 212. *INTRODUCTION TO CATHOLICISM. (4 Credits)
Explores historical experiences of Roman Catholics from the origins of the tradition to the present. The course 1) explores the historical origins and expansions of Catholicism in world history, 2) examines Catholic practices, structures, ideas and beliefs, and 3) surveys the unique form Catholicism took in United States history using a wide variety of sources, including historical monographs, novels, memoir, film, papal documents, correspondence, essays, speeches, poetry, political writing, sermons, advertisements, liturgy, and artwork. Learn about the major developments, persons, institutions, and ideas that shaped the experience of Catholics in different moments of world history.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: PHL 213

REL 213. *INTRODUCTION TO HINDU TRADITIONS. (4 Credits)
Survey of the historical development of Hinduism in India and the “Hindu Diaspora.” Topics will include the Indus Valley civilization, the Vedic tradition, yoga, and Hindu renunciation, “Classical” Hindu theism and devotion, Hindu philosophy and ritual, and modern and contemporary Hinduism. (Bacc Core Course) CROSSLISTED as PHL 213.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: PHL 213

REL 214. *INTRODUCTION TO ISLAMIC TRADITIONS. (4 Credits)
Development of Islamic traditions in the Arab world and in the global context. Origins of Islam, the narrative of the Prophet Muhammad, the development of the Qur’an, and the central tenets of Islamic faith and practice. Transformation of Islam from a regional to a global tradition. (Bacc Core Course) CROSSLISTED as PHL 214.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: PHL 214

REL 215. *INTRODUCTION TO JEWISH TRADITIONS. (4 Credits)
An introduction to Judaism’s traditions, histories, and practices. Covers historical origins and developments from the biblical period through the Middle Ages, and considers Judaism in the modern world. Topics include the Jewish calendar (including holidays and their traditions), Jewish life cycle events, Jewish prayer, and traditional texts such as the Mishnah and Talmud. CROSSLISTED as HST 215. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: HST 215

REL 220. *WORLD-VIEWS AND VALUES IN THE BIBLE. (4 Credits)
A study of central portions of the Bible (in the Old Testament: Torah, prophets, psalms, and wisdom; in the New Testament: Jesus, gospels, and letters) from the perspective of the academic discipline of biblical scholarship, exploring the philosophical questions of the relationships between story, myth, thought, values, and understandings of life. (H) (Bacc Core Course) CROSSLISTED as PHL 220.
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 220

REL 299. SPECIAL TOPICS. (1-4 Credits)
This course is repeatable for 12 credits.

REL 310. *CRITICS OF RELIGION. (4 Credits)
An introduction to critiques of religion by Nietzsche, Freud, Marx, and other influential thinkers. Examines the nature, scope, and effects of criticisms that challenge the psychological, moral, political, and epistemological foundations of religious belief, practice, and institutions. (Bacc Core Course) CROSSLISTED as PHL 310.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 310

REL 312. *ASIAN THOUGHT. (4 Credits)
Familiarizes students with key figures in the history of Asian religious ideas and philosophy. While the emphasis will be on the philosophical traditions of Asia, it will quickly become apparent that philosophy and religion are not so easily distinguishable in many Asian traditions. Areas of thought studied will include Hindu, Buddhist, Confucian, and Taoist. (NC) (Bacc Core Course) CROSSLISTED as PHL 312.
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 312

REL 315. *GANDHI AND NONVIOLENCE. (4 Credits)
An examination of the life and work of Mohandas K. Gandhi, the 20th century activist and author, and the theory and practice of nonviolence in his life and work. Emphasis will be placed upon Gandhi’s biographical narrative, the development of satyagraha, Gandhi’s nonviolent approach to social transformation, and post-Gandhian nonviolent movements. (Bacc Core Course) CROSSLISTED as PHL 315.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: PHL 315

REL 316. INTELLECTUAL ISSUES OF MEXICO AND MEXICAN AMERICANS. (4 Credits)
The philosophical, social, cultural, and political reality of Mexican Americans and their historical roots in Mexico since the Spanish Conquest. Analysis of internal colonialism, racism, machismo, fatalism, alienation, cultural identity, as well as more contemporary including NAFTA, immigration, and the U.S.-Mexican relations. (NC) CROSSLISTED as PHL 316.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 316

REL 324. *ANCIENT JEWISH HISTORY. (4 Credits)
History of Judaism from the Second Temple through the early Rabbinic period (539 BCE–200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and Greco-Roman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as HST 324.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: HST 324, HST 324H, REL 324H

REL 324H. *ANCIENT JEWISH HISTORY. (4 Credits)
History of Judaism from the Second Temple through the early Rabbinic period (539 BCE–200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and Greco-Roman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as HST 324H.
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: HST 324, REL 324

REL 325. *EARLY CHRISTIANITY: ORIGINS TO 600. (4 Credits)
Traces early Christianity from its origins to the beginning of the Middle Ages. It deals with the origins and Jewish background of Christianity in Palestine, the ministry and teachings of Jesus, the spread of Christianity throughout the Roman Empire by his disciples and early missionaries, the formation of the New Testament canon, the development of Christian doctrine, controversies over heresy, and the origin of monasticism and the Papacy. (Bacc Core Course) CROSSLISTED as HST 325.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: HST 325
REL 326. *HISTORY OF CHRISTIANITY. (4 Credits)
Examines the history of global Christianity from the fifth through the
seventeenth centuries. Themes to be investigated include the evolving
relationship between the church and the state; mysticism; conversion
and resistance; the emergence of Protestantism; marriage and sex, as
well as women in the history of Christianity. CROSSLISTED AS HST 326/
REL 326.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: HST 326

REL 327. HISTORY OF MEDIEVAL EUROPE. (4 Credits)
Covers the period from 1400 to 1810. (H) (NC) (Bacc Core
and religious developments from the fall of the Roman Empire in the West to the Renaissance. Covers
284 A.D. to 1000. Not offered every year. (H). CROSSLISTED as HST 327.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 327

REL 328. HISTORY OF MEDIEVAL EUROPE. (4 Credits)
Cultural, political, and economic history of the European Middle Ages
from the fall of the Roman Empire in the West to the Renaissance. Covers
1000 to 1400. Not offered every year. (H) CROSSLISTED as HST 328.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 328

REL 330. HISTORY OF EARLY MODERN EUROPE. (4 Credits)
Political, social, intellectual, and cultural history of Europe from
1400-1789. Focuses on the Reformation. Not offered every year. (H)
CROSSLISTED as HST 330.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 330

REL 333. MEDIEVAL AND EARLY MODERN SPANISH HISTORY. (4 Credits)
From Islamic conquest to conquest of America, the social, religious,
political and economic history of Spain from 1000 to 1700. Offered fall
term in odd years. (H) CROSSLISTED as HST 333.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: HST 333

REL 344. *PACIFISM, JUST WAR, AND TERRORISM. (4 Credits)
An examination of the philosophical and theological issues pertaining
to pacifism, justified war, and forms of terrorism in Islamic and Western
traditions. Special attention is given to concepts of jihad, justifications of
war, and restraints on conduct in war. (Bacc Core Course) CROSSLISTED as
PHL 344.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 344

REL 345. *FIRST FREEDOM: RELIGIOUS LIBERTY AND INTOLERANCE. (4 Credits)
An examination of the religious, philosophical, political, and historical
issues regarding religious freedom, conscience, and disestablishment
as enshrined in the First Amendment and as illustrated by historical and
contemporary examples of religious intolerance in the United States.
(Bacc Core Course) CROSSLISTED as PHL 345.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: PHL 345

REL 350. *MODERN LATIN AMERICA. (4 Credits)
History of Latin America leading up to and after Spanish and Portuguese
conquest. Focus on indigenous American, European and African cultures
and religions in contact under colonial government and economic systems.
Covers the period from 1400 to 1810. (H) (NC) (Bacc Core
Course) CROSSLISTED as HST 350.
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts
Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 350, HST 350H

REL 352. *AFRICANS IN LATIN AMERICAN HISTORY. (4 Credits)
A survey of the role of Africans and their descendants in Latin American
history, linking the history of the Americas, Europe and Africa. (Bacc Core
Course) CROSSLISTED as HST 352.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: HST 352
Recommended: HST 350 and HST 351

REL 353. *SLAVERY IN THE AMERICAS. (4 Credits)
A survey of the role of Africans and their descendants in the history of
the Atlantic World, linking Europe, Africa, and the Americas. Examines
slavery and freedom in the African Diaspora, as well as social, cultural,
and spiritual life. (Bacc Core Course) CROSSLISTED as HST 353.
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: HST 353

REL 364. *UNITED STATES RELIGION AND SOCIAL REFORM. (4 Credits)
Provides an awareness of how various religious groups have thought
about and engaged with social change pertaining to slavery, feminism,
civil rights, same-sex marriage, and immigration. Focus on reading
primary sources related to each of these issues. (Bacc Core Course)
CROSSLISTED as HST 364.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: HST 364

REL 371. *PHILOSOPHIES OF CHINA. (4 Credits)
A study of the traditional philosophies of China, including Confucianism,
Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC)
(Bacc Core Course) CROSSLISTED as PHL 371.
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-
Western Core
Equivalent to: PHL 371, PHL 371H
Recommended: 3 credits of philosophy or upper-division standing.

REL 378. *RELIGION AND GENDER: A GLOBAL PERSPECTIVE. (4 Credits)
Introduces students to the academic study of religion, as well as the
academic study of gender. In order to offer a global perspective, we will
read a series of case studies that deal with the religion as a gendered
experience. Students will produce two essays, one of which will be based
on independent research. (Bacc Core Course) CROSSLISTED as HST 378
and WGSS 378.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: HST 378, WGSS 378

REL 387. *ISLAMIC CIVILIZATION. (4 Credits)
Political, social, and religious developments from 600 to 1400. Early
history and the formation of Islamic society to the Mongol invasion. (H)
(NC) (Bacc Core Course) CROSSLISTED as HST 387.
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts
Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 387

REL 388. *ISLAMIC CIVILIZATION. (4 Credits)
Political, social, and religious developments from 1400 to the present.
The expansion of Islam, Turkic, and Asian dynasties, impact of Western
imperialism and modern Islamic world. (H) (NC) (Bacc Core Course)
CROSSLISTED as HST 388.
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts
Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 388

REL 399. SPECIAL TOPICS. (1-4 Credits)
This course is repeatable for 12 credits.

REL 402. INDEPENDENT STUDY. (1-12 Credits)
This course is repeatable for 16 credits.
REL 405. READING AND CONFERENCE. (1-4 Credits)
This course is repeatable for 12 credits.

REL 407. *SEMINAR. (1-16 Credits)
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

REL 411. GREAT FIGURES IN PHILOSOPHY. (4 Credits)
Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. (H) CROSSLISTED as PHL 411/PHL 511.
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: PHL 411
This course is repeatable for 16 credits.
Recommended: 6 credits of philosophy and sophomore standing.

REL 415. SELECTED TOPICS. (1-4 Credits)
This course is repeatable for 12 credits.

REL 425. *THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (H) (Bacc Core Course) CROSSLISTED as HST 425, HST 525.
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core
Equivalent to: HST 425, HST 425H, REL 425H

REL 425H. *THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (H) (Bacc Core Course) CROSSLISTED as HST 425, HST 525.
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core
Equivalent to: HST 425, HST 425H, REL 425H

REL 430. HISTORY OF BUDDHIST PHILOSOPHY. (4 Credits)
Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing their Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC) CROSSLISTED as PHL 430/PHL 530.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 430, PHL 430H

REL 431. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE. (4 Credits)
Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as PHL 431.
Equivalent to: PHL 431, PHL 431H

REL 432. *YOGA AND TANTRIC TRADITIONS. (4 Credits)
An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemporeaneous practices, bodily disciplines, and ritual. (Bacc Core Course) CROSSLISTED as PHL 432/PHL 532.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 432

REL 433. *THEORY AND PRACTICE OF MODERN YOGA. (4 Credits)
An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSLISTED as PHL 433, PHL 533. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 433

REL 434. *SPIRITUALITY AND ECOLOGY: GREEN YOGA. (4 Credits)
An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as PHL 434, PHL 534.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: PHL 434, PHL 434H, REL 434H

REL 434H. *SPIRITUALITY AND ECOLOGY: GREEN YOGA. (4 Credits)
An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 434H, REL 534H.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: PHL 434, PHL 434H, REL 434

REL 436. PHILOSOPHY AND RELIGION. (3 Credits)
Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as PHL 436/PHL 536.
Equivalent to: PHL 436
Recommended: 6 credits of philosophy and sophomore standing.

REL 443. *WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (NC) (Bacc Core Course) CROSSLISTED as PHL 443, PHL 543.
Attributes: CSGI – Core, Synth, Global Issues; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 443, PHL 443H, REL 443H

REL 443H. *WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (NC) (Bacc Core Course) CROSSLISTED as PHL 443H.
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 443, PHL 443H, REL 443H
Recommended: One introductory-level science course and sophomore standing.

REL 444. *WORLD VIEWS AND ENVIRONMENTAL VALUES. (3 Credits)
A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (NC) (Bacc Core Course) CROSSLISTED as PHL 444.
Attributes: CSGI – Core, Synth, Global Issues; LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 444, PHL 444H, REL 444
Recommended: One introductory-level science course and sophomore standing.
REL 444. *BIOMEDICAL ETHICS. (4 Credits)
Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course) CROSSTLISTED as PHL 444/PHL 544.

Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 444, PHL 444H, REL 444H

REL 444H. *BIOMEDICAL ETHICS. (4 Credits)
Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: PHL 444, PHL 444H, REL 444

REL 448. NATIVE AMERICAN PHILOSOPHIES. (4 Credits)
Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. (NC) CROSSTLISTED as ES 448/ES 548, PHL 448/PHL 548.

Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: ES 448, PHL 448

REL 455. DEATH AND DYING. (3 Credits)
A multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSTLISTED as PHL 455, PHL 555.

Equivalent to: PHL 455
Recommended: 6 credits of philosophy or sophomore standing.

REL 461. ART AND MORALITY. (4 Credits)
The arts in context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free thought and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSTLISTED as PHL 461/PHL 561.

Equivalent to: PHL 461

REL 466. RELIGION AND U.S. FOREIGN RELATIONS. (4 Credits)
An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSTLISTED as HST 466/HST 566.

Equivalent to: HST 466
Recommended: HST 202 and HST 203 or upper-division standing.

REL 470. RELIGION IN THE AMERICAN WEST. (4 Credits)
The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations (movement in and out of the region), adaptations (changes over time, in response to changing conditions), and discrimination (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSTLISTED as HST 470.

Equivalent to: HST 470

REL 484. RELIGION AND LAW. (4 Credits)
Investigates the relationship between religion and law in Jewish, Christian, and Muslim society, as well as modern western “secular” society, considering the question from a theoretical, historical, and contemporary case-study perspective. We will look at the religious origins of legal systems, the ways in which members of religious communities engaged with their own and others’ laws, and the ways in which modern societies have used law to separate “religion” from the state. CROSSTLISTED as HST 484.

Equivalent to: HST 484

REL 485. *POLITICS AND RELIGION IN THE MODERN MIDDLE EAST. (4 Credits)
The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. (H) (NC) (Bacc Core Course) CROSSTLISTED as HST 485/HST 585.

Attributes: CPDC – Core, Pers, Cult Diversity; CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: HST 485

REL 511. GREAT FIGURES IN PHILOSOPHY. (4 Credits)
Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. CROSSTLISTED as PHL 411/PHL 511.

Equivalent to: PHL 511
This course is repeatable for 16 credits.
Recommended: 6 credits of philosophy

REL 525. THE HOLOCAUST IN ITS HISTORY. (4 Credits)
An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. CROSSTLISTED as HST 425, HST 525.

Equivalent to: HST 525

REL 530. HISTORY OF BUDDHIST PHILOSOPHY. (4 Credits)
Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. CROSSTLISTED as PHL 430/PHL 530.

Equivalent to: PHL 530

REL 531. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE. (4 Credits)
Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSTLISTED as PHL 531.

Equivalent to: PHL 531
REL 532. YOGA AND TANTRIC TRADITIONS. (4 Credits)
An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. CROSSLISTED as PHL 432/PHL 532.
Equivalent to: PHL 532

REL 533. THEORY AND PRACTICE OF MODERN YOGA. (4 Credits)
An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of “bodily culture” of both European and Indian origins. CROSSLISTED as PHL 433, PHL 533.
Equivalent to: PHL 533

REL 534. SPIRITUALITY AND ECOLOGY: GREEN YOGA. (4 Credits)
An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as PHL 434, PHL 534.
Equivalent to: PHL 534

REL 536. PHILOSOPHY AND RELIGION. (3 Credits)
Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as PHL 436/PHL 536.
Equivalent to: PHL 536

REL 537. CULINARY AND RELIGION. (3 Credits)
Focus on the relationship between culinary arts and religion. CROSSLISTED as PHL 437, PHL 537.
Equivalent to: PHL 537

REL 538. NATIVE AMERICAN PHILOSOPHIES. (4 Credits)
Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of living Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. CROSSLISTED as ES 448/ES 584, PHL 448/PHL 548.
Equivalent to: ES 548, PHL 548

REL 551. ART AND MORALITY. (4 Credits)
The arts in context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as PHL 461/PHL 561.
Equivalent to: PHL 561

REL 555. DEATH AND DYING. (3 Credits)
A multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSLISTED as PHL 455, PHL 555.
Equivalent to: PHL 555

Recommended: 6 credits of philosophy

Twentieth Century Studies

TCS 407. SEMINAR. (1-12 Credits)
Advanced study of selected topics related to issues and problems in the twentieth century introduced in TCS core course offerings. Section I seminars will be graded pass/no pass and carry 1 credit; other sections will be graded A-F and will carry variable credit.
This course is repeatable for 16 credits.

TCS 507. SEMINAR. (1-12 Credits)
Advanced study of selected topics related to issues and problems in the Twentieth Century introduced in TCS core course offerings. Section I seminars will be graded P/N and carry 1 credit; other sections will be graded A-F and will carry variable credit.
This course is repeatable for 16 credits.
The Applied Ethics undergraduate certificate builds upon the various courses in ethics taught in the School of History, Philosophy, and Religion and courses with ethics-related content found throughout the university, in order to provide students with a systematic and thorough understanding of the moral world for their civic, professional, and personal lives.

Students pursuing a major in any academic or professional field may also pursue applied ethics for educational interest and for professional preparation. The certificate adds a critical philosophical dimension to students’ understanding of their professional aspirations.

Students seeking a baccalaureate degree at OSU may earn the Applied Ethics certificate by completing a minimum of 28 credits of approved course work.

For more information, contact Courtney Campbell, 541-737-5651, ccampbell@oregonstate.edu

Certificate Code: C200

**Applied Ethics Graduate Major (MA, MS)**

**Graduate Areas of Concentration**

*Art and morality, bioethics, environmental ethics*

The MA, MS in Applied Ethics is designed to provide students with skills of moral reasoning and an understanding of ethical values and dilemmas in today's world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

Students are required to take courses in ethical theory, as well as courses in applied ethics and in an appropriate disciplinary or integrated minor. Completion of the degree requires a practicum and thesis. Please note that Oregon State University also requires completion of two years of a foreign language for the master of arts degree.

**Major Code: 9580**

History Graduate Minor

Graduate Areas of Concentration

American history (U.S.) Western U.S. history, European history, non-American and non-European history (Asian, African, Latin American, Islamic), history of science

Graduate work in the School of History, Philosophy, and Religion may apply to the Master of Arts in Interdisciplinary Studies degree and to minors in other advanced degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion.

Minor Code: 9000

History Minor

Also available via Ecampus.

Undergraduate students may elect a minor in History to complement course work in their major discipline.

Minor Code: 900

- Courses cannot be taken for S/U credit
- Students must earn a 2.0 GPA or higher in courses applied to the minor
- History minors must complete 27 credits, of which 4 credits must be HST 310 (The Historian's Craft)
- Minor courses may be used to fulfill baccalaureate core, CLA, and minor requirements

History of Science Graduate Major

(MA, MS, PhD)

Graduate Areas of Concentration

Development of the physical, biological, and environmental sciences; history of science and medicine; intellectual and social history of science in Europe and the U.S.

The graduate program leading to the MS, MA, and PhD is offered through the School of History, Philosophy, and Religion. Graduate work in the school may apply to the Master of Arts in Interdisciplinary Studies and to minors in other advanced-degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion

Course work in the history of science graduate major provides a critical perspective on the scientific enterprise through the centuries. It is valuable for graduate students in a variety of disciplines in the sciences and the humanities.

Admission Requirements

Students must have completed a four-year baccalaureate degree from an accredited college or university and have achieved a combined GPA of 3.00 for the last 90 quarter (60 semester) credits of graded undergraduate work of the first baccalaureate and all subsequent graded credits.

The applicant must submit photocopies of official transcripts of all previous academic work at the college or university level.

Applicants must also provide:

- A statement of the student’s particular fields of interest and overall aims and purpose in the study of the history of science. An additional writing sample (no more than 25 pages) would be helpful to the graduate admissions committee.
- A photocopy of the official Graduate Record Examination (GRE) scores.
- Three letters of recommendation that specifically evaluate academic abilities and professional potential.

Major Code: 5440

Requirements for a Master’s Degree

Either the MA or MS may be earned. The MA requires demonstration, either by course work or examination, of a reading knowledge of a foreign language appropriate for research. Both degrees require the successful completion of 45 graduate credits. Candidates are required to have a major field of at least 24 credits of course work (including historiography) from a list of approved history of science courses and a minor field of 15 credits of course work in science, history, or a related (or integrated) field; a thesis is optional.

Major Code: 5440

Requirements for a Doctoral Degree

The equivalent of three years of graduate work beyond the bachelor’s degree is required including a doctoral thesis. This must include the requirements for, or the equivalent of, a master’s degree in history of science. Course work should have history of science as a major; the minor field can be in science, history, or a related (or integrated) field. Generally, one foreign language is required.

Major Code: 5440
History of Science Graduate Minor

Graduate Areas of Concentration

History of science and medicine, development of the physical, biological, and environmental sciences, intellectual and social history of science in Europe and the U.S.

Graduate work in the School of History, Philosophy, and Religion may apply to the Master of Arts in Interdisciplinary Studies and to minors in other advanced degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion.

³ Students must complete HST 310 before attempting.
⁴ Baccalaureate Core Course
⁵ Writing Intensive Course (WIC)

Medical Humanities Certificate

Also available via Ecampus.

The undergraduate certificate in Medical Humanities offers OSU students a multi-disciplinary integrated program to study health, medicine, and the healing professions. The certificate relies on key courses in medical anthropology, literature and medicine, medical history, and biomedical ethics for its core content foundations. Courses from additional different disciplines—biology; ethnic studies; kinesiology; philosophy; political science; psychology; public health; religious studies; sociology; and women, gender, and sexuality studies—can fulfill complementary elective courses. The certificate program emphasizes skills in professional identity, reflective writing, cultural competency, and diversity as a complement to the scientific features of the healing professions. The certificate will prepare students to empathize with the sufferings of others, reflect critically on medical knowledge and discourse, create new representations of the medical experience, and confront moral, psychological, and ethical dilemmas.

For further information, please contact Courtney Campbell, 541-737-5651, ccampbell@oregonstate.edu

Current students in the Medical Humanities Certificate program should contact David Bishop, 541-737-8918, david.bishop@oregonstate.edu

Military History Minor

Issues such as war and peace have continually been part of the human condition. This military history minor is designed to better inform students regarding the questions and controversies surrounding military and peace studies. It is not only for current and future military personnel, rather it is designed for all students interested not only in strategy, tactics and military technology but also for the relationship between war and peace regarding topics such gender, social and scientific movements and what it means to serve one’s country.

Philosophy Graduate Minor

Graduate Areas of Concentration

Aesthetic theory, ethics (including environmental ethics and biomedical ethics), history of philosophy, logic and philosophy of science, religious studies

The School of History, Philosophy, and Religion is committed to teaching students the skills and knowledge they need to reason cogently and decide wisely about difficult issues they will confront as citizens and professionals. The school offers graduate work leading to the Master of Arts in Interdisciplinary Studies degree with a specialization in applied ethics and in other areas of philosophy and religious studies. The MAIS thesis option is encouraged. The study of applied ethics builds on a special strength among school faculty.

Graduate credit is offered in logic, ethics (including environmental ethics and biomedical ethics), aesthetics, religious studies, philosophy of science, contemporary philosophy, and history of philosophy. PHL 550 is offered in conjunction with the "IDEAS MATTER" lecture series.

Prospective students should request additional program literature from the school. Some teaching assistantship support is available.

Minor Code: 955

Philosophy Minor

The Philosophy minor allows students to specialize in such areas as ethics, legal and political philosophy, philosophy and religion, non-Western philosophies and religious ideas, philosophy of art, logic, philosophy of science, and the history of philosophy.

Minor Code: 955

Philosophy Undergraduate Major (BA, BS, HBA, HBS)

An undergraduate major in philosophy provides a broad education and intellectual skills that are useful in many occupations and areas of life. It is also a valuable background for graduate study in philosophy and religious studies and for advanced study in such professional fields as law and public service.

Major Code: 955
• At least 44 total credits of PHL courses.
• At least 24 credits must be upper division.
• No courses used to satisfy the requirements of major may be taken S/U.
• Only courses with C– or better will be accepted for the major.
• Students must have a 2.5 GPA in those courses used to satisfy the requirements of the major.

**Major Code: 977**

**School of Language, Culture, and Society**

**Anthropology**

Anthropology offers courses to meet the needs of students interested in a comprehensive understanding of human societies and cultures past and present. Prehistoric, historic, ethnographic, and linguistic study provides the basis for understanding how a variety of societies solve common problems. The anthropology curriculum provides a cross-cultural perspective, a sound basis for later professional or graduate education.

An anthropology degree enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media, and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts, and management of cultural resources.

Anthropology bridges sciences and the humanities and develops critical thinking, communication skills, facility with group processes, and the ability to work independently. It can help students succeed in an increasingly interconnected and complex world.

**Ethnic Studies**

Ethnic studies is an established academic discipline traditionally defined by a concentration on the experiences and concerns of the
four major ethnic minority groups historically under-represented in United States political and institutional life and in university curricula. Ethnic studies faculty bring a variety of methodological approaches to bear on the exploration of issues affecting African American, Asian American, Chicano/a-Latino/a, and American Indian and Alaskan Native communities. A degree in ethnic studies provides a sound basis for future work in graduate or professional programs and is of value to students interested in careers in a broad range of jobs requiring a liberal arts background and an understanding of race, ethnicity, and cultural competency.

World Languages

World languages and cultures (WLC) offers major programs leading to a BA degree in French, German, or Spanish, as well as minor programs in Asian Languages and Cultures, French, German, and Spanish for undergraduate students with majors in other disciplines. The major and minor programs provide students with the opportunity to develop language skills and to raise their understanding of and appreciation for world literatures and cultures.

Proficiency in a world language and knowledge of another culture can enhance career possibilities in fields that range from business, library work, and government service to park service, oceanography, agriculture, and forestry. Students often find it possible to combine languages with another major such as business administration, psychology, political science, sociology, and professional training to prepare for an exciting, internationally oriented career.

Study of a language other than English can help students improve communication skills in English, become more linguistically aware, develop analytical skills, and communicate on an equal basis with non-English-speaking people. Through language courses, students can gain a global perspective, more fully understand different cultures and value systems, and enhance their general knowledge of world development.

An undergraduate academic major (French, German, or Spanish) is required as a prerequisite to the Fifth-Year Teacher Education Program designed to prepare students for licensure and/or other graduate programs in education.

WLC cooperates with institutions of the Oregon University System and with other Northwest institutions of higher education in administering overseas study centers at Beijing and Fujian, China; Quito, Ecuador; Angers, Lyon, and Poitiers, France; Baden-Wurttemberg and Cologne, Germany; Tokyo, Japan; Seoul, Korea; Puebla, Mexico; Santander, Oviedo, and Segovia, Spain. Students may also study at different institutions in Russia and in the former Soviet republics. See the International Programs section of this catalog.

Liberal Studies

The BA degree in Liberal Studies offers area studies that allow students to use language and culture courses taken in the School of Language, Culture, and Society to fulfill core course requirements. Students majoring in liberal studies can elect to complete their undergraduate degree using prestructured programs in the following areas: Asian studies, Chinese studies, European studies and Japanese studies.

A minimum of 45 credits of course work in the concentration area is required to complete the Liberal Studies major.

Women, Gender, and Sexuality Studies

The Women, Gender, and Sexuality Studies Program at OSU relies on multi-disciplinary approaches to the study of gender and sexuality, particularly as they intersect with race, ethnicity, class, culture, religion, nation, and ability. Our program emphasizes academic excellence, the use of feminist and anti-racist pedagogies, and scholarship that contributes to social change and justice. We are committed to challenging all forms of oppression, and we center queer, transnational, and women of color feminisms in our curriculum. We encourage creative, innovative, and collaborative frameworks of study, and we work to meet the needs of a wide range of students, developing curriculum that is meaningful for students who wish to pursue careers in academia, as well as those who may be interested in community organizing, feminist nonprofit work, and/or other professional areas. The Women, Gender, and Sexuality Studies Program offers an undergraduate major, minor, and certificate, as well as the MA in Women, Gender, and Sexuality Studies and the opportunity to declare Women, Gender, and Sexuality Studies as a primary and/or secondary area in the MAIS. We also offer undergraduate and graduate minors in Queer Studies.

Certificate Programs

The School of Language, Culture, and Society participates in the Languages in Culture and Latin American Affairs certificate programs. These interdisciplinary programs are designed for students who wish to combine their school major with a broad knowledge of Latin American or Russian affairs, past and present, or who wish to explore how languages and cultures interact. Core courses are typically taken in language, in the humanities and social sciences.

Graduate Programs

The School of Language, Culture, and Society offers master’s of arts and doctor of philosophy degrees in Applied Anthropology, College Student Services Administration; Contemporary Hispanic Studies; and Women, Gender, and Sexuality Studies. Graduate minors are offered in Anthropology; Applied Anthropology; Contemporary Hispanic Studies; Ethnic Studies; Food in Culture and Social Justice; Foreign Languages and Literatures; and Women, Gender, and Sexuality Studies.

Students may earn the Master of Arts in Interdisciplinary Studies (MAIS) degree in the areas of anthropology, applied anthropology, ethnic studies, foreign languages and literatures, French, German, Spanish, and women studies. Typically, candidates who select French, German or Spanish as one of their primary areas complete graduate course work in language, linguistics, literature and culture studies. To be admitted to a world language component of the MAIS degree, students must meet the Graduate School’s general entrance requirements and obtain the consent of a graduate faculty member of the School of Language, Culture, and Society who agrees to serve as the field advisor. A maximum of 6 graduate credits completed at an overseas study center may be used to satisfy requirements for any one of three fields of the MAIS degree.

Anthropology

ANTH 101. *INTRODUCTION TO ANTHROPOLOGY. (3 Credits)
Located at the intersection of the humanities and the sciences, anthropology strives for a holistic understanding of the human condition. This course introduces students to the basic concepts, theories and methods of anthropology, including its four main sub-fields: archaeology, biological anthropology, cultural anthropology, and linguistic anthropology. The course is driven by fundamental questions, including: What is culture? How do anthropologists study human populations, both past and present? How can this field help us better understand contemporary human problems? (Bacc Core Course)

Attributes: CPC – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

ANTH 110. *INTRODUCTION TO CULTURAL ANTHROPOLOGY. (3 Credits)
Investigates cultural adaptation and change in different environmental and historical contexts. Compares the means by which cultures solve common human problems. Shows similarities and differences throughout the world in systems of values, family, religion, economics, and politics. Students are asked to consider future cultural conditions. Uses a video format. (SS) (Bacc Core Course)

Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

ANTH 159. *LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION. (4 Credits)
Students in this course will unpack language, race and racism—as well as the intersections between those ideas—as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ES 159 and WLC 159.

Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination Equivalent to: ES 159, WLC 159

ANTH 199. SPECIAL STUDIES. (1-3 Credits)
Equivalent to: ANTH 199H
This course is repeatable for 3 credits.

ANTH 208. *WESTERN CULTURE STUDY ABROAD. (3 Credits)
Overseas study of the history and contemporary form of important features of Western culture. Based on at least 10 weeks of studying abroad. CROSSLISTED as LING 208. (Bacc Core Course)

Attributes: CPWC – Core, Pers, West Culture
Equivalent to: LING 208

ANTH 209. *CULTURAL DIVERSITY STUDY ABROAD. (3 Credits)
Overseas study of non-Western cultures. Based on at least 10 weeks of studying abroad. CROSSLISTED as LING 209. (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: LING 209

ANTH 210. *COMPARATIVE CULTURES. (3 Credits)
Compares the cultures originating in Asia, Africa, and precolonial Australia, Oceania, and North and South America. Introduces method and theory for comparative cultural analysis from historical, ethnographic, and indigenous viewpoints. Considers the contribution and influences of minority and ethnic groups on the mainstream culture in nation states. Summarizes the characteristics of cultures in the major world culture areas. (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: ANTH 210H
ANTH 230. TIME TRAVELERS. (3 Credits)
Introduction to the historical developments of modern archaeology. The often romanticized public image of archaeology will be contrasted with scientific reality. The nature of archaeological data, modern field methods, analytical techniques, and theoretical background will be reviewed in order to illustrate how the unwritten record of human cultural behavior is deciphered. (SS)
Attributes: LACS – Liberal Arts Social Core

ANTH 240. INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY. (3 Credits)
An investigation of the origin of modern people (Homo sapiens) in a historical context; review of key discoveries and current research on the relationships between humans and other primates; exploration of contrasting views of humanity. (SS)
Attributes: CPD – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ANTH 251H

ANTH 251. *LANGUAGE IN THE USA. (3 Credits)
Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course)
Attributes: CPD – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ANTH 251

ANTH 251H. *LANGUAGE IN THE USA. (3 Credits)
Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course)
Attributes: CPD – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ANTH 251

ANTH 261. *FOOD IN AMERICAN CULTURE. (3 Credits)
Fosters understanding of the meanings of foods and foodways in American culture. Uses food as a lens to explore general topic areas such as work, family, ecology, and identity. Critically examines core issues that shape and have shaped American culture. (Bacc Core Course) (SS) CROSSLISTED as FCSJ 261.
Attributes: CPWC – Core, Pers, West Culture; LACS – Liberal Arts Social Core
Equivalent to: FCSJ 261

ANTH 284. *PRIMATE ADAPTATION AND EVOLUTION. (4 Credits)
Introduces students to our closest living relatives, the primates. Uses theories and concepts from evolutionary biology to explore the diverse anatomical and behavioral adaptations of different primate species. Also explores the relationships between anatomy, behavior, and ecology on the individual and community level. Provides an evolutionary and ecological framework with which to view primates (including humans) and all living organisms. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science

ANTH 311. *PEOPLES OF THE WORLD-NORTH AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 311H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 311H. *PEOPLES WORLD-NORTH AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 311
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 312. *PEOPLES WORLD-EUROPE. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: ANTH 312H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 312H. *PEOPLES WORLD-EUROPE. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: ANTH 312
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 313. *PEOPLES OF THE WORLD-LATIN AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 313H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 313H. *PEOPLES OF THE WORLD-LATIN AMERICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Equivalent to: ANTH 313
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.
ANTH 314. *PEOPLES OF THE WORLD-MIDDLE EAST. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

Equivalent to: ANTH 314H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 314H. *PEOPLES OF THE WORLD-MIDDLE EAST. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core

Equivalent to: ANTH 314
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 315. *PEOPLES OF THE WORLD-AFRICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

Equivalent to: ANTH 315H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 315H. *PEOPLES OF THE WORLD-AFRICA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core

Equivalent to: ANTH 315
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 316. *PEOPLES OF THE WORLD-SOUTH AND SOUTHEAST ASIA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 317. *PEOPLES OF THE WORLD-PACIFIC. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

Equivalent to: ANTH 317H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 318. *PEOPLES OF THE WORLD-CHINA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core

Equivalent to: ANTH 318H
Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 318H. *PEOPLES OF THE WORLD-CHINA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core

Prerequisites: ANTH 110 with D- or better or ANTH 210 with D- or better

Equivalent to: ANTH 318
Recommended: Completion of social processes and institutions requirement.

ANTH 319. *PEOPLES OF THE WORLD-JAPAN AND KOREA. (3 Credits)
Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course)

Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core

Recommended: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 330. *EVOLUTION OF PEOPLE, TECHNOLOGY, AND SOCIETY. (3 Credits)
Overview of the evolution and prehistory of the human species, including the development and interaction of human biology, technology, and society. (SS) (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACS – Liberal Arts Social Core

Equivalent to: ANTH 330H
ANTH 331. MESOAMERICAN PREHISTORY. (3 Credits)
Explores the archaeology and prehistory of Mesoamerica from Paleo-Indian times through the Olmec, Maya, Zapotec, and Aztec cultures to the Spanish Conquest. Themes include the transition to settled agriculture, emergence of social inequality and political authority, the role of the natural environment, and the rich cultural heritage of Mesoamerican civilizations.
Attributes: LACN – Liberal Arts Non-Western Core  
Recommended: Sophomore standing and completion of one anthropology course.

ANTH 332. ARCHAEOLOGICAL INFERENCE. (4 Credits)
In this course on archaeological inference, or the thought process of forming our understanding about the past, we will take a guided tour of the main stages of archaeological research design and try our hand at making archaeological inferences. We begin by learning about the basic conceptual problems in the study of the past, then, we engage with the theories and models used to address them, and finally we apply this knowledge in hands-on analytical activities during the laboratory sessions with archaeological artifacts. Lec/lab.
Prerequisites: ANTH 230 with D- or better

ANTH 345. *BIOLOGICAL AND CULTURAL CONSTRUCTIONS OF RACE. (3 Credits)
The social, cultural, and historical context of human biological diversity in the United States. Students become acquainted with primary resources relating to biological diversity within the modern human species and will offer a critical perspective on racial/ethnic categorization of that diversity. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination  
Equivalent to: ANTH 345H  
Recommended: Sophomore standing and completion of one anthropology course.

ANTH 350. LANGUAGE, CULTURE AND SOCIETY. (4 Credits)
An examination of the communicative functions of language and the role of language in the construction of social relations. Covers the origins, structure, and diversity of language. Explores the relationships between language and thought and the use of linguistic models in the study of culture. (SS)
Attributes: LACS – Liberal Arts Social Core  
Recommended: 3 credits of social science.

ANTH 352. *ANTHROPOLOGY, HEALTH, AND ENVIRONMENT. (3 Credits)
Major threats to human health are increasingly linked to global environmental changes. This course engages medical and environmental anthropology research to critically explore the values, meanings and ideologies associated with ecological and public health issues in given localities throughout the world. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues  
ANTH 361. *FOOD JUSTICE. (4 Credits)
Contemporary food systems are examined from a cultural and social justice perspective. The human right to food as recognized by the United Nations serves as the justice grounding point. Impediments to realizing the right to food will be examined in national and international contexts. (Bacc Core Course) (SS) CROSSLISTED as FCSJ 361.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination;  
LACS – Liberal Arts Social Core  
Equivalent to: FCSJ 361  

ANTH 370. *ANTHROPOLOGICAL THEORIES. (4 Credits)
Foundational theories, approaches, and concepts are explored and used as a means to understanding how anthropologists past and present use theory. Students compare and contrast prominent theories, analyze current events and situations, and write a major research paper using anthropological sources.
Attributes: CWIC – Core, Skills, WIC  
Prerequisites: ANTH 110 with D- or better  
Recommended: Completion of social processes and institutions requirement

ANTH 371. RESEARCH METHODS IN CULTURAL ANTHROPOLOGY. (4 Credits)
Designed for anthropology majors, this course involves students in learning about and practicing anthropological research methods. Students practice ethnographic fieldwork by conducting participant observation and interviews, writing fieldnotes, analyzing real-life material for cultural values and power differences, and writing up a research paper.
Prerequisites: ANTH 110 with D- or better

ANTH 372. *SOCIAL NETWORKS AND SOCIETY. (3 Credits)
Introduces the foundational theory and concepts of social network analysis (SNA) and explores practical applications of SNA in environmental science, public health, business, politics, education, and public life. Also explores how the Internet, social media, and other information and communication technologies are affecting social networks and culture in the 21st century. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

ANTH 373. APPROACHES TO SOCIAL JUSTICE. (3 Credits)
Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ES 373, WGSS 373, WLC 373.
Equivalent to: ES 373, WGSS 373, WLC 373

ANTH 374. *ANTHROPOLOGY AND GLOBAL HEALTH. (3 Credits)
An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critical and evidence-based perspective on complex global health issues. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues;  
LACS – Liberal Arts Social Core  
Equivalent to: ANTH 374H

ANTH 374H. *ANTHROPOLOGY AND GLOBAL HEALTH. (3 Credits)
An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critical and evidence-based perspective on complex global health issues. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator  
Equivalent to: ANTH 374
ANTH 380. *CULTURES IN CONFLICT. (3 Credits)
Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Equivalent to: ANTH 380H
Recommended: ANTH 110 or completion of non-Western Cultures requirement

ANTH 380H. *CULTURES IN CONFLICT. (3 Credits)
Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Prerequisites: ANTH 110 with D- or better
Equivalent to: ANTH 380
Recommended: Completion of non-Western Cultures requirement

ANTH 383. *INTRODUCTION TO MEDICAL ANTHROPOLOGY. (3 Credits)
Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: ANTH 383H

ANTH 383H. *INTRODUCTION TO MEDICAL ANTHROPOLOGY. (3 Credits)
Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: ANTH 383

ANTH 399. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: ANTH 399H
This course is repeatable for 16 credits.

ANTH 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 399
This course is repeatable for 16 credits.

ANTH 401. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 402. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 403. THESIS. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 405. READING AND CONFERENCE. (1-6 Credits)
Equivalent to: ANTH 405H
This course is repeatable for 16 credits.

ANTH 405H. READING AND CONFERENCE. (1-6 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 405
This course is repeatable for 16 credits.

ANTH 406. PROJECTS. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 407. SEMINAR. (1-3 Credits)
Equivalent to: ANTH 407H
This course is repeatable for 16 credits.

ANTH 407H. SEMINAR. (1-3 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 407
This course is repeatable for 16 credits.

ANTH 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 410. INTERNSHIP. (1-16 Credits)
Opportunities for students at junior and first-term senior class levels to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members.
This course is repeatable for 16 credits.
Recommended: 6 credits of anthropology.

ANTH 420. WORLD CULTURES--TOPICS. (4 Credits)
In-depth study of world cultures. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. Includes three hours of lecture and one hour of seminar. Cannot be taken if student is taking or has completed the 300-level course in the same geographical area. Graded P/N.
Recommended: 9 credits of social science including 3 credits of anthroplogy

ANTH 421. ANALYSIS OF LITHIC TECHNOLOGIES. (4 Credits)
Covers the principles, procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric hunter-gatherers.
Prerequisites: ANTH 230 with D- or better

ANTH 422. HISTORIC MATERIALS ANALYSIS. (3 Credits)
Introduction to the analytical and descriptive methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects.
Prerequisites: ANTH 230 with D- or better

ANTH 423. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY. (4 Credits)
Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.
ANTH 424. SETTLEMENT ARCHAEOLOGY. (4 Credits)
Explores the evolution of the theoretical underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of "settlement archaeology" over time.

ANTH 425. CERAMIC ANALYSIS IN ARCHAEOLOGY. (4 Credits)
Provides fundamental practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/ lab.

Prerequisites: ANTH 230 with D- or better

ANTH 430. TOPICS IN ARCHAEOLOGY. (1-4 Credits)
Recent advances in archaeology and their application to special fields of study. Topics vary from term to term.

Prerequisites: ANTH 230 with D- or better or ANTH 330 with D- or better
This course is repeatable for 99 credits.

ANTH 432. *DOMESTICATION, URBANIZATION, AND THE RISE OF CIVILIZATION. (4 Credits)
Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ANTH 432H
Recommended: 6 credits of anthropology.

ANTH 432H. *DOMESTICATION, URBANIZATION, AND THE RISE OF CIVILIZATION. (4 Credits)
Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ANTH 432
Recommended: 6 credits of anthropology

ANTH 433. FIRST AMERICANS, LAST FRONTIERS. (4 Credits)
The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago.

Attributes: LACN – Liberal Arts Non-Western Core
Recommended: 6 credits of anthropology.

ANTH 434. NORTH AMERICA AFTER THE ICE AGE. (4 Credits)
The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention.

Recommended: ANTH 433 or 6 credits of anthropology.

ANTH 435. CULTURAL RESOURCES: POLICY AND PROCEDURES. (4 Credits)
Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field techniques and strategies to implement legislation.

Prerequisites: ANTH 230 with D- or better

ANTH 436. NORTHWEST PREHISTORY. (4 Credits)
Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones within the Northwest; comparisons of the cultural development through prehistoric times of the Columbia Plateau, intermontane and coastal zones of Oregon, Washington, and British Columbia. Special emphasis on the theories on origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest.

Recommended: 6 credits of anthropology.

ANTH 437. GEOARCHAEOLOGY. (4 Credits)
Provides an introduction to geoarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems.

Prerequisites: ANTH 230 with D- or better

ANTH 438. ARCHAEOLOGY FIELD SCHOOL. (10-12 Credits)
Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management.

Recommended: 6 credits of anthropology

ANTH 439. ARCHAEOLOGY OF FORAGERS. (4 Credits)
Provides an in-depth review of the concepts and approaches employed to study cultural aspects of past foraging peoples using archaeological research methods and theoretical perspectives.

ANTH 440. TOPICS IN PHYSICAL ANTHROPOLOGY. (1-4 Credits)
Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term.

Prerequisites: ANTH 240 with D- or better or ANTH 330 with D- or better
This course is repeatable for 16 credits.

Recommended: General biology

ANTH 441. HUMAN EVOLUTION. (4 Credits)
The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/ lab.

Prerequisites: (ANTH 110 with D- or better or ANTH 210 with D- or better) and ANTH 240 [D-]

Recommended: General biology

ANTH 442. HUMAN ADAPTABILITY. (4 Credits)

Prerequisites: ANTH 240 with D- or better

Recommended: ANTH 340 or general biology

ANTH 443. HUMAN OSTEOLOGY LAB. (4 Credits)
Identification and analysis of human skeletal materials in an archaeological context.

Prerequisites: ANTH 240 with D- or better
ANTH 444. NUTRITIONAL ANTHROPOLOGY. (4 Credits)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSTLISTED as FCSJ 444.
Prerequisites: ANTH 240 with C or better or ANTH 330 with C or better
Equivalent to: FCSJ 444

ANTH 446. FORENSIC ANTHROPOLOGY. (4 Credits)
Concepts and practices in the use of anthropology in legal matters and police cases, especially involving identification of human remains.
Prerequisites: ANTH 443 with D- or better

ANTH 447. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS. (4 Credits)
The Arctic is on the forefront of today's most pressing global problems. This course uses Arctic perspectives to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: ANTH 447H

ANTH 447H. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS. (4 Credits)
The Arctic is on the forefront of today's most pressing global problems. This course uses Arctic perspectives to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: ANTH 447

ANTH 448. EVOLUTIONARY MEDICINE. (4 Credits)
Evolutionary medicine is founded on the idea that many challenges to human health can be accounted for by discordanices between contemporary environments and those under which humans evolved. This course examines ways anthropologists may help to reframe questions about diseases within long-term, evolutionary contexts.
Prerequisites: (ANTH 110 with D- or better or ANTH 210 with D- or better) and (ANTH 240 [D-] or ANTH 330 [D-])

ANTH 449. BIOCULTURAL PERSPECTIVES ON HUMAN REPRODUCTION. (4 Credits)
Examines human reproduction and sexuality from the perspective of the New Biocultural Synthesis, a theoretical approach in anthropology that examines the interface of evolved biological, sociocultural and political-economic factors that interact to produce complex human behaviors and biology. Topics are presented from a life-history perspective where questions related to human reproduction and evolutionary history are examined across the lifespan from mating and conception through childhood and menopause. Lec/lab.

ANTH 450. TOPICS IN LINGUISTIC ANTHROPOLOGY. (1-4 Credits)
Recent advances in the study of culture and communication and their application to special fields of knowledge. Topics vary from term to term. This course is repeatable for 16 credits.
Recommended: 3 credits of linguistic anthropology.

ANTH 452. FOLKLORE AND EXPRESSIVE CULTURE. (4 Credits)
The study of folklore/popular culture in its social and historical context. Examines content, structure, communicative potential, and performative aspects of various forms of oral and written expression. Includes familiarization with the analysis of myths, legends, tall tales, proverbs, riddles, and play languages. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Recommended: 3 credits of social science.

ANTH 453. COMMUNITY HEALTH FIELD SCHOOL. (3-12 Credits)
Meets the growing need for international experiences for students in medical anthropology; international public health; and women, gender and sexuality studies. The field school is offered over a three- to seven-week period during the summer term. In-country time is flexible and can be adjusted depending on program requirements and financial constraints. Provides an intensive cross-cultural field experience in San Juan, Puerto Rico, that is premised on a model of community-engaged, service learning and applied, emancipatory research.
This course is repeatable for 12 credits.

ANTH 455. REPRODUCTIVE JUSTICE: A SERVICE LEARNING COURSE. (4 Credits)
Reproductive Justice is a service-learning course that aims to bridge theory and practice in reproductive health and social justice by developing connections between the university campus and members of the local community.

ANTH 459. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY. (4 Credits)
Students in this course will unpack language, race and racism--as well as the intersections between those ideas-- as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSTLISTED as ES 459/ES 559, WLC 459/WLC 559.
Equivalent to: ES 459, WLC 459

ANTH 460. ETHNOGRAPHIC FIELD SCHOOL. (6 Credits)
Involves an intensive field experience, learning and developing practical skills for operating socially and culturally in another culture. Students engage in anthropological and mixed research topics, methods, and analysis, such as research ethics, research design, participant observation, ethnographic interviewing, community mapping, qualitative and quantitative data analysis.

ANTH 461. NEUROANTHROPOLOGY. (4 Credits)
The emerging interdisciplinary field of neuroanthropology combines anthropological understandings of human biological and cultural variation with recent findings in neuroscience. Key topics include socialization and enculturation, addiction, ritual, depression, and psychiatric disorders.
Prerequisites: ANTH 240 with C- or better or ANTH 345 with C- or better or ANTH 383 with C- or better

ANTH 465. POPULAR CULTURE: AN ANTHROPOLOGICAL PERSPECTIVE. (4 Credits)
Introduces some of the debates and issues swirling around analyses of late twentieth-, early twenty-first century popular/mass/public/mediated/commercial culture. Learning about its pervasive forms, its origins and effects, how we are situated in it, and how it situates us is vital to understanding the changes that characterize our postmodern world.
ANTH 466. *RURAL ANTHROPOLOGY. (4 Credits)
Concentrates on study of the socio-cultural dynamics in rural communities as they develop in national and global contexts of political and economic change. Includes anthropological readings on rural issues in domestic and international contexts and a research paper on a contemporary rural issue. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: 3 credits of social science.

ANTH 468. ANTHROPOLOGY OF CHILDHOOD. (4 Credits)
Ethnographies of the organization of children's lives in different cultural contexts are combined with readings on the conceptual and methodological genealogies that have constructed children as research subjects in anthropology.
Recommended: 3 credits of social science.

ANTH 469. ENERGY IN CULTURAL PERSPECTIVE. (4 Credits)
Examines historical and current trends in energy around the globe. Course themes include the role of energy in economic development, cultural innovation in energy production, social problems that arise from energy shortages or the uneven distribution of energy resources and social and cultural changes required as societies attempt to reduce their dependence on fossil fuels.
Prerequisites: ANTH 110 with D- or better or ANTH 210 with D- or better

ANTH 470. TOPICS IN CULTURAL ANTHROPOLOGY. (1-16 Credits)
Covers recent advances in cultural anthropology and their applications to the field. Topics vary from term to term.
Equivalent to: ANTH 470H
This course is repeatable for 16 credits.
Recommended: 3 credits of social science.

ANTH 471. CASH, CLASS AND CULTURE: HUNTER-GATHERERS TO CAPITALISM. (4 Credits)
Students explore the cultural and social effects of capitalism in the contemporary world within the larger question of how economics and society intersect and change over time. Special emphases are put on food and work, but students explore the linkages of global forces and local life in a variety of ways.
Recommended: 3 credits of social science.

ANTH 472. CONTEMPORARY INDIAN ISSUES. (4 Credits)
Examines the background of Indian treaties and reservations with discussions of present issues such as health care, education, the Indian Child Welfare Act, fishing rights, and religious freedom. Issues are discussed in class with considerable class participation and some role playing.
Recommended: 3 credits of social science.

ANTH 473. *GENDER, ETHNICITY, AND CULTURE. (4 Credits)
Study of the practices and ideologies of gender as they intersect with those of ethnicity, race, class, and culture. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: 3 credits of social science.

ANTH 474. CROSS-CULTURAL HEALTH AND HEALING. (4 Credits)
A comprehensive overview of current issues in global health with particular emphasis on social, cultural, and behavioral interventions. Explores issues of health and development in the international context, focusing on such issues as inequality, structural adjustment, economic development, and community-based approaches to health care, specific cultural beliefs and practices, and the influence of people's perceptions of health, illness, and healing.

ANTH 475. ANTHROPOLOGY IN PRACTICE. (4 Credits)
Capstone course for Anthropology majors. Discusses the use of anthropological skills and methods to solve real-world problems. Addresses professional opportunities for anthropologists; provides career development opportunities; and assesses learning outcomes for Anthropology majors.

ANTH 477. ECOLOGICAL ANTHROPOLOGY. (4 Credits)
Examines past and present interactions between humans and their environments. Emphasizes the concept of system and process of human adaptation.
Recommended: Upper-division standing and 3 credits of social science.

ANTH 478. *ANTHROPOLOGY OF TOURISM. (4 Credits)
Tourism is among the world's largest industries. The anthropology of tourism seeks to understand the relationships between the industry and the other cultural productions. Students explore the cultural practices and impacts of tourism in relation to both host and guest communities, and travel as cultural practice. Course is taught online and on Corvallis campus. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: 3 credits of social science.

ANTH 479. ANTHROPOLOGY OF MIGRATION. (4 Credits)
Focuses on the multiple aspects of population movements around the globe. Investigates the history of recent human migration; current theories, trends and policies; as well as issues of immigrant incorporation and anti-immigrant politics.
Recommended: 3 credits of social science.

ANTH 480. TOPICS IN APPLIED ANTHROPOLOGY. (1-4 Credits)
Recent advances in applied anthropology and their application to special fields of study. Topics vary from term to term.
This course is repeatable for 16 credits.
Recommended: 3 credits of social science.

ANTH 481. *NATURAL RESOURCES AND COMMUNITY VALUES. (3 Credits)
Investigates relations between human communities and the values of community members. Resource issues integrate concepts from social science, economics, and ecology. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: 3 credits of social science.

ANTH 482. *ANTHROPOLOGY OF INTERNATIONAL DEVELOPMENT. (4 Credits)
Examines the ideological and theoretical bases of world assistance programs and their effects on different sectors and classes, including women. Causes of world hunger in terms of agronomic, mainstream economic and radical economic paradigms are developed and contrasted. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: AG 482

ANTH 483. ADVANCED MEDICAL ANTHROPOLOGY. (4 Credits)
An overview of anthropological studies of the health of human communities from a biological and behavioral perspective. Topics include prehistory of disease, cultural perspectives on causation of disease and approaches to healing; anthropological approach to international health issues; and case studies.
Prerequisites: (ANTH 110 with D- or better or ANTH 210 with D- or better) and (ANTH 240 [D-] or ANTH 330 [D-])
ANTH 484. *WEALTH AND POVERTY. (4 Credits)
Summarizes the distribution of wealth observed cross-culturally and through time. Determines the relation between wealth distribution and economic productivity. Shows the impact of industrialization and economic wealth distribution in Western civilization and cross-culturally. Evaluates how cultural practices affect wealth distribution in Western and non-Western societies. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: 3 credits of social science

ANTH 485. CAPSTONE IN SOCIAL JUSTICE. (2 Credits)
Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. CROSSLISTED as ES 485, WGSS 485, WLC 485.
Prerequisites: (ANTH 373 with D- or better or ES 373 with D- or better or WGSS 373 with D- or better or WLC 373 with D- or better) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-])
Equivalent to: ES 485, WGSS 485, WLC 485
This course is repeatable for 4 credits.

ANTH 486. ANTHROPOLOGY OF FOOD. (4 Credits)
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as FCSJ 486.
Attributes: LACS – Liberal Arts Social Core
Recommended: 3 credits of social science
Equivalent to: FCSJ 486

ANTH 487. LANGUAGE IN GLOBAL CONTEXT. (4 Credits)
Deals with practical uses of linguistics in the global political arena. Explores use of official vs. unofficial languages, language standardization, the preservation of dying languages; problems in learning first and second languages, and the relevance of linguistic knowledge to education and cross-cultural communication.
Prerequisites: ANTH 251 with D- or better or ANTH 350 with D- or better
Recommended: Some knowledge of linguistic structure

ANTH 490. TOPICS IN METHODOLOGY. (1-4 Credits)
Recent advances in anthropological methodologies and their application to special fields of study. Topics vary from term to term.
This course is repeatable for 16 credits.
Recommended: 6 credits of anthropology

ANTH 492. ARCHAEOLOGICAL LABORATORY METHODS. (1-3 Credits)
Provides information on the basics of archaeological laboratory work. Students learn the day-to-day operations of a lab, how to classify and catalog artifacts, and how to do artifact analysis, research hypothesis.
Recommended: 6 credits of anthropology

ANTH 497. ARCHAEOLOGICAL FIELD METHODS. (1-3 Credits)
Archaeological field strategies emphasizing reconnaissance and survey. Application of field equipment and project management.

ANTH 498. ORAL NARRATIVE. (3 Credits)
Methodology course focused on the collection and processing of multiple speech genres, including personal narrative, oral history, folklore, and songs. Attention is given to ethics, legal issues, different forms of transcription, and the politics of representation.
Prerequisites: ANTH 350 with D- or better

ANTH 499. SPECIAL TOPICS IN ANTHROPOLOGY. (1-16 Credits)
Equivalent to: ANTH 499H
This course is repeatable for 16 credits.

ANTH 499H. SPECIAL TOPICS IN ANTHROPOLOGY. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ANTH 499
This course is repeatable for 16 credits.

ANTH 501. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 502. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 503. THESIS. (1-12 Credits)
This course is repeatable for 999 credits.

ANTH 505. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 506. PROJECTS. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 507. SEMINAR. (1-3 Credits)
This course is repeatable for 16 credits.

ANTH 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 510. GRADUATE INTERNSHIP. (1-16 Credits)
Opportunities for students at junior and first-term senior class levels to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members.
This course is repeatable for 16 credits.
Recommended: 6 credits of anthropology

ANTH 515. ADVANCED RESEARCH LITERATURE REVIEW. (3 Credits)
Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research. CROSSLISTED as CSSA 515, ES 515, WGSS 515.
Equivalent to: CSSA 515, ES 515, WGSS 515

ANTH 519. BIOLOGIES OF POVERTY. (4 Credits)
A readings-based, discussion seminar on the applications of biological and biocultural anthropological theory to questions of embodiment and poverty. In it we will explore the ways key theoretical and methodological developments over the past two decades enable biocultural anthropologists to measure and explain the ways poverty and inequality become embodied beneath our skin—that is, the ways culture, belief, difference, power and discrimination are written on our bodies, and thus contribute to inequities in health outcomes across populations.
Recommended: A minimum of 6 credits of anthropology coursework

ANTH 521. ANALYSIS OF LITHIC TECHNOLOGIES. (4 Credits)
Covers the principles, procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric hunter-gatherers.
Recommended: ANTH 230
ANTH 522. HISTORIC MATERIALS ANALYSIS. (3 Credits)
Introduction to the analytical and descriptive methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects.
Recommended: ANTH 230

ANTH 523. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY. (4 Credits)
Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.

ANTH 524. SETTLEMENT ARCHAEOLOGY. (4 Credits)
Explores the evolution of the theoretical underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of “settlement archaeology” over time.

ANTH 525. CERAMIC ANALYSIS IN ARCHAEOLOGY. (4 Credits)
Provides fundamental practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/ lab.
Recommended: ANTH 230

ANTH 530. TOPICS IN ARCHAEOLOGY. (1-4 Credits)
Recent advances in archaeology and their application to special fields of study. Topics vary from term to term.
This course is repeatable for 16 credits.
Recommended: ANTH 230 or ANTH 330

ANTH 531. ARCHAEOLOGICAL THEORY. (4 Credits)
Historical development of archaeological field techniques and theoretical concepts with an emphasis on modern method and theory in North American archaeology.
Recommended: ANTH 230

ANTH 533. FIRST AMERICANS, LAST FRONTIERS. (4 Credits)
The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago.
Recommended: 6 credits of anthropology.

ANTH 534. NORTH AMERICA AFTER THE ICE AGE. (4 Credits)
The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention.
Recommended: ANTH 433 or 6 credits of anthropology.

ANTH 535. CULTURAL RESOURCES: POLICY AND PROCEDURES. (4 Credits)
Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field techniques and strategies to implement legislation.
Recommended: ANTH 431

ANTH 536. NORTHWEST PREHISTORY. (4 Credits)
Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones within the Northwest; comparisons of the cultural development through prehistoric times of the Columbia Plateau, intermontane and coastal zones of Oregon, Washington, and British Columbia. Special emphasis on the theories of origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest.
Recommended: 6 credits of anthropology.

ANTH 537. GEOARCHAEOLOGY. (4 Credits)
Provides an introduction to geoaarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems.
Recommended: ANTH 230

ANTH 538. ARCHAEOLOGY FIELD SCHOOL. (1-10 Credits)
Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management.
Recommended: 6 credits of anthropology

ANTH 539. ARCHAEOLOGY OF FORAGERS. (4 Credits)
Provides an in-depth review of the concepts and approaches employed to study cultural aspects of past foraging peoples using archaeological research methods and theoretical perspectives.

ANTH 540. TOPICS IN PHYSICAL ANTHROPOLOGY. (1-4 Credits)
Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term.
This course is repeatable for 16 credits.
Recommended: ANTH 240 or ANTH 330 or general biology

ANTH 541. HUMAN EVOLUTION. (4 Credits)
The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/ lab.
Recommended: (ANTH 110 or ANTH 210) and ANTH 240

ANTH 542. HUMAN ADAPTABILITY. (4 Credits)
Overview of human biology and its various sub fields, applications of human biology in areas of nutrition, health, growth, adaptation, and demography. Understanding adaptive variations among populations and individuals in responses to environment, disease, and nutritional stress.
Recommended: ANTH 240 or ANTH 340 or general biology

ANTH 543. HUMAN OSTEOLOGY LAB. (4 Credits)
Identification and analysis of human skeletal materials in an archaeological context.
Recommended: ANTH 240
ANTH 544. NUTRITIONAL ANTHROPOLOGY. (4 Credits)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, palaeodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSTOURED as FCSJ 544.
Equivalent to: FCSJ 544
Recommended: ANTH 240 or ANTH 330

ANTH 546. FORENSIC ANTHROPOLOGY. (4 Credits)
Concepts and practices in the use of anthropology in legal matters and police cases, especially involving identification of human remains.
Recommended: ANTH 443

ANTH 547. METHODS IN FOOD IN CULTURE AND SOCIAL JUSTICE STUDIES. (4 Credits)
Exposes graduate students to the methodological approaches and methods used in guiding empirical research on the socio-cultural aspects of food, focusing on vulnerable populations, food security, procurement, foodways, disasters, and climate change. Methodological approaches and methods as evidenced in peer-reviewed publications is the grounding for the course. CROSSTOURED as FCSJ 547.
Equivalent to: FCSJ 547

ANTH 548. EVOLUTIONARY MEDICINE. (4 Credits)
Evolutionary medicine is founded on the idea that many challenges to human health can be accounted for by discordances between contemporary environments and those under which humans evolved. This course examines ways anthropologists may help to reframe questions about diseases within long-term, evolutionary contexts.
Recommended: (ANTH 110 or ANTH 210) and (ANTH 240 or ANTH 330)

ANTH 549. BIOCULTURAL PERSPECTIVES ON HUMAN REPRODUCTION. (4 Credits)
Examines human reproduction and sexuality from the perspective of the New Biocultural Synthesis, a theoretical approach in anthropology that examines the interface of evolved biological, sociocultural and political-economic factors that interact to produce complex human behaviors and biology. Topics are presented from a life-history perspective where questions related to human reproduction and evolutionary history are examined across the lifespan from mating and conception through childhood and menopause.

ANTH 550. TOPICS IN LINGUISTIC ANTHROPOLOGY. (1-4 Credits)
Recent advances in the study of culture and communication and their application to special fields of knowledge. Topics vary from term to term. This course is repeatable for 16 credits.
Recommended: 3 credits of linguistic anthropology.

ANTH 551. LINGUISTIC ANTHROPOLOGY. (4 Credits)
The study of language in social context including the relationships between language and age, gender, personality, religion, ethnicity and social class. Examines pidgins, creoles, dialects, genres and the processes of language change.
Recommended: ANTH 251 or ANTH 350

ANTH 552. FOLKLORE AND EXPRESSIVE CULTURE. (4 Credits)
The study of folklore/popular culture in its social and historical context. Examines content, structure, communicative potential, and performative aspects of various forms of oral and written expression. Includes familiarization with the analysis of myths, legends, tall tales, proverbs, riddles, and play languages.
Recommended: ANTH 251 or ANTH 350

ANTH 553. COMMUNITY HEALTH FIELD SCHOOL. (3-12 Credits)
Meets the growing need for international experiences for students in medical anthropology; international public health; and women, gender and sexuality studies. The field school is offered over a three- to seven-week period during the summer term. In-country time is flexible and can be adjusted depending on program requirements and financial constraints. Provides an intensive cross-cultural field experience in San Juan, Puerto Rico, that is premised on a model of community-engaged, service learning and applied, emancipatory research. This course is repeatable for 12 credits.

ANTH 554. SOCIAL NETWORK ANALYSIS: METHODS AND THEORY. (4 Credits)
An introduction to social network analysis (SNA), focusing on the methods of research design, data collection, and analysis. Students will learn key concepts and theories of SNA, apply these concepts to research projects in their chosen field, develop methods for collecting network data, and perform qualitative and quantitative analysis of these networks. Readings draw on studies of social networks from a variety of disciplines, including anthropology, sociology, environmental studies, public health, and political science.

ANTH 555. REPRODUCTIVE JUSTICE: A SERVICE LEARNING COURSE. (4 Credits)
Reproductive Justice is a service-learning course that aims to bridge theory and practice in reproductive health and social justice by developing connections between the university campus and members of the local community.

ANTH 556. COMMUNITY HEALTH FIELD SCHOOL. (3-12 Credits)
Meets the growing need for international experiences for students in medical anthropology; international public health; and women, gender and sexuality studies. The field school is offered over a three- to seven-week period during the summer term. In-country time is flexible and can be adjusted depending on program requirements and financial constraints. Provides an intensive cross-cultural field experience in San Juan, Puerto Rico, that is premised on a model of community-engaged, service learning and applied, emancipatory research. This course is repeatable for 12 credits.

ANTH 557. ETHNOGRAPHIC FIELD SCHOOL. (6 Credits)
Involves an intensive field experience, learning and developing practical skills for operating socially and culturally in another culture. Students engage in anthropological and mixed research topics, methods, and analysis, such as research ethics, research design, participant observation, ethnographic interviewing, community mapping, qualitative and quantitative data analysis.

ANTH 558. NEUROANTHROPOLOGY. (4 Credits)
The emerging interdisciplinary field of neuroanthropology combines anthropological understandings of human biological and cultural variation with recent findings in neuroscience. Key topics include socialization and enculturation, addiction, ritual, depression, and psychiatric disorders.
Recommended: ANTH 240 or ANTH 345 or ANTH 383
ANTH 565. POPULAR CULTURE: AN ANTHROPOLOGICAL PERSPECTIVE. (4 Credits)
Introduces some of the debates and issues swirling around analyses of late twentieth, early twenty-first century popular/mass/public/mediated/commercial culture. Learning about its pervasive forms, its origins and effects, how we are situated in it, and how it situates us is vital to understanding the changes that characterize our postmodern world.

ANTH 566. RURAL ANTHROPOLOGY. (4 Credits)
Concentrates on study of socio-cultural dynamics in rural communities as they develop in national and global contexts of political and economic change. Includes anthropological readings on rural issues in domestic and international contexts and a research paper on a contemporary rural issue.

Recommended: 3 credits of social science.

ANTH 567. AGRI-FOOD MOVEMENTS. (4 Credits)
Investigates the origins and contemporary status of producer and consumer food movements including, but not limited to, organics, agricultural labor movements, animal welfare, vegetarian and vegan movements, farmers’ markets, and permaculture. CROSSLISTED as FCSJ 567.
Equivalent to: FCSJ 567

ANTH 568. ANTHROPOLOGY OF CHILDHOOD. (4 Credits)
Ethnographies of the organization of children’s lives in different cultural contexts are combined with readings on the conceptual and methodological genealogies that have constructed children as research subjects in anthropology.

Recommended: 3 credits of social science

ANTH 569. ENERGY IN CULTURAL PERSPECTIVE. (4 Credits)
Examines historical and current trends in energy around the globe. Course themes include the role of energy in economic development, cultural innovation in energy production, social problems that arise from energy shortages or the uneven distribution of energy resources and social and cultural changes required as societies attempt to reduce their dependence on fossil fuels.

Recommended: ANTH 110 or ANTH 210

ANTH 570. TOPICS IN CULTURAL ANTHROPOLOGY. (1-16 Credits)
Covers recent advances in cultural anthropology and their applications to the field. Topics vary from term to term.
This course is repeatable for 16 credits.

Recommended: 3 credits of social science.

ANTH 571. CASH, CLASS AND CULTURE: HUNTER-GATHERERS TO CAPITALISM. (4 Credits)
Students explore the cultural and social effects of capitalism in the contemporary world within the larger question of how economics and society intersect and change over time. Special emphases are put on food and work, but students explore the linkages of global forces and local life in a variety of ways.

Recommended: 3 credits of social science.

ANTH 572. CONTEMPORARY INDIAN ISSUES. (4 Credits)
Examines the background of Indian treaties and reservations with discussions of present issues such as health care, education, the Indian Child Welfare Act, fishing rights, and religious freedom. Issues are discussed in class with considerable class participation and some role playing.

Recommended: 3 credits of social science.

ANTH 573. GENDER, ETHNICITY, AND CULTURE. (4 Credits)
Study of the practices and ideologies of gender as they intersect with those of ethnicity, race, class, and culture.

Recommended: 3 credits of social science.

ANTH 574. CROSS-CULTURAL HEALTH AND HEALING. (4 Credits)
A comprehensive overview of current issues in global health with particular emphasis on social, cultural, and behavioral interventions. Explores issues of health and development in the international context, focusing on such issues as inequality, structural adjustment, economic development, and community-based approaches to health care, specific cultural beliefs and practices, and the influences of people’s perceptions of health, illness, and healing.

ANTH 575. THEORY OF CULTURE. (4 Credits)
Core ideas in the discipline of anthropology. Examination of the contributions to anthropological method and theory of the major schools of thought in the history of anthropology.

Recommended: 9 credits of upper-division social science, including at least one 400-level anthropology course.

ANTH 576. ADVANCED ANTHROPOLOGICAL THEORY SEMINAR. (4 Credits)
Investigates theories used by current anthropologists to explicate issues of concern in a world of movement, fragmentation, global-local interactions, individuation via state and media unequal power relations, and neoliberal agendas. Students will participate in discussions, essays and a paper that links these theories to their research topics for theses or dissertations.

Recommended: ANTH 575

ANTH 577. ECOLOGICAL ANTHROPOLOGY. (4 Credits)
Examines past and present interactions between humans and their environments. Emphasizes the concept of system and process of human adaptation.

Recommended: 3 credits of social science

ANTH 578. ANTHROPOLOGY OF TOURISM. (4 Credits)
Examines the cultural practices and impacts of tourism in relation to both host and guest communities, and travel itself as a part of culture. We will explore theories of tourism and what role anthropology can play in influencing the industry and tourist and host relationships.

Recommended: 3 credits of social science.

ANTH 579. ANTHROPOLOGY OF MIGRATION. (4 Credits)
Focuses on the multiple aspects of population movements around the globe. Investigates the history of recent human migration; current theories, trends and policies; as well as issues of immigrant incorporation and anti-immigrant politics.

Recommended: 3 credits of social science.

ANTH 580. TOPICS IN APPLIED ANTHROPOLOGY. (1-4 Credits)
Recent advances in applied anthropology and their application to special fields of study. Topics vary from term to term.
This course is repeatable for 16 credits.

Recommended: 3 credits of social science.

ANTH 581. NATURAL RESOURCES AND COMMUNITY VALUES. (4 Credits)
Investigates relations between human communities and the values of community members. Resource issues integrate concepts from social science, economics, and ecology.

Recommended: 3 credits of social science.
ANTH 582. ANTHROPOLOGY OF INTERNATIONAL DEVELOPMENT. (4 Credits)
Examines the ideological and theoretical bases of world assistance programs and their effects on different sectors and classes, including women. Causes of world hunger in terms of agronomic, mainstream economic and radical economic paradigms are developed and contrasted.
Equivalent to: AG 582

ANTH 583. ADVANCED MEDICAL ANTHROPOLOGY. (4 Credits)
An overview of anthropological studies of the health of human communities from a biological and behavioral perspective. Topics include prehistory of disease, cultural perspectives on causation of disease and approaches to healing, anthropological approach to international health issues, and case studies.
Recommended: (ANTH 110 or ANTH 210) and (ANTH 240 or ANTH 330)

ANTH 584. WEALTH AND POVERTY. (4 Credits)
Summarizes the distribution of wealth observed cross-culturally and through time. Determines the relation between wealth distribution and economic productivity. Shows the impact of industrialization and economic wealth distribution in Western civilization and cross-culturally. Evaluates how cultural practices affect wealth distribution in Western and non-Western societies.
Recommended: 3 credits of social science.

ANTH 585. USES OF ANTHROPOLOGY. (4 Credits)
Examines the practical applications of anthropological knowledge in historical and contemporary contexts. Focuses on planned social change and roles of anthropologists in interdisciplinary research and nonacademic settings such as international business, industrial relations, economic and technological development, education, legal institutions, environmental change, minority relations, health care, and cultural preservation. Emphasizes relevance to public policy and ethical issues associated with applications of anthropological knowledge.
Recommended: 3 credits of social science.

ANTH 586. ANTHROPOLOGY OF FOOD. (4 Credits)
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as FCSJ 586.
Equivalent to: FCSJ 586
Recommended: 3 credits of social science.

ANTH 587. LANGUAGE IN GLOBAL CONTEXT. (4 Credits)
Deals with practical uses of linguistics in the global political arena. Explores use of official vs. unofficial languages, language standardization, the preservation of dying languages; problems in learning first and second languages, and the relevance of linguistic knowledge to education and cross-cultural communication.
Recommended: ANTH 251 or ANTH 350 or some knowledge of linguistic structure

ANTH 590. TOPICS IN METHODOLOGY. (1-4 Credits)
Recent advances in anthropological methodologies and their application to special fields of study. Topics vary from term to term.
This course is repeatable for 16 credits.
Recommended: 6 credits anthropology

ANTH 591. ETHNOGRAPHIC METHODS. (4 Credits)
Cultural descriptions are produced through systematic observation, elicitation, and analysis to achieve proximity to the insider's point of view. Covers techniques of interviewing, validating, and interpreting cultural data. Allows students to practice what they have learned.
Recommended: 6 credits of anthropology

ANTH 592. ARCHAEOLOGICAL LABORATORY METHODS. (1-3 Credits)
Provides information on the basics of archaeological laboratory work. Students learn the day-to-day operations of a lab, how to classify and catalog artifacts, and how to do artifact analysis.
Recommended: 6 credits of anthropology

ANTH 593. STATISTICAL APPLICATIONS IN ANTHROPOLOGY. (4 Credits)
Develops the skills necessary to use statistical software to analyze and interpret numerical data. Covers descriptive statistics, correlation, and multivariate statistical procedures. Evaluate the adequacy of data for parametric and nonparametric statistical tests.
Recommended: A minimum of 6 credits of anthropology if an undergraduate

ANTH 595. ANTHROPOLOGICAL RESEARCH DESIGN. (4 Credits)
Critical examination of research design and methodology in anthropology; analysis of methods and procedures of research in the subfields of anthropology.
Recommended: 9 credits of upper-division social science, including at least one 400-level anthropology course.

ANTH 597. ARCHAEOLOGICAL FIELD METHODS. (1-3 Credits)
Archaeological field strategies emphasizing reconnaissance and survey. Application of field equipment and project management.

ANTH 598. ORAL TRADITIONS. (3 Credits)
Method of examining unwritten culture preserved in speech, including local history, folklore, and songs passed from one generation to another. May include the use of life history, genealogy, and other means of collecting information. Attention is given to ethics, legal issues, and the process of transcription.
Recommended: ANTH 350

ANTH 599. SPECIAL TOPICS IN ANTHROPOLOGY. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 601. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 602. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

ANTH 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ANTH 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 610. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ANTH 695. ANTHROPOLOGICAL RESEARCH DESIGN. (4 Credits)
Doctoral student seminar focused on the research process, from the selection of a research topic, to the choice of appropriate methods for data collection and analysis, to the submission of a research proposal. Class assignments will result in completion of a research proposal. Seminal discussion will focus on problem formulation, statement of objectives, theoretical background, methodological approach, analytical techniques, ethical responsibilities, justification for the research, data analysis and interpretation, and budgetary concerns.

ANTH 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
ANTH 808. WORKSHOPS. (1-16 Credits)
This course is repeatable for 16 credits.

Arabic Language

ARAB 111. FIRST-YEAR ARABIC. (4 Credits)
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113.
Equivalent to: ARAB 111H

ARAB 199. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

ARAB 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ARAB 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ARAB 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

American Sign Language

ASL 111. FIRST-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A beginning course to learn the basics of American Sign Language. The course focuses on the ASL language and its uses of syntax, grammar, vocabulary, facial expressions and deaf culture.

ASL 112. FIRST-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of ASL 111 with the development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, ASL 113.
Prerequisites: ASL 111 with D- or better
Recommended: Basic foundation of the language

ASL 113. FIRST-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of ASL 111 and ASL 112 with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, ASL 113.
Prerequisites: ASL 112 with D- or better

ASL 211. SECOND-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of the first-year ASL courses with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213.
Prerequisites: ASL 211 with D- or better

ASL 212. SECOND-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of the second-year ASL series with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213.
Prerequisites: ASL 211 with D- or better

ASL 213. SECOND-YEAR AMERICAN SIGN LANGUAGE. (4 Credits)
A continuation of the second-year ASL series with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213.
Prerequisites: ASL 212 with D- or better

Asian Languages and Cultures

ASN 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Chinese Language

CHN 111. FIRST-YEAR CHINESE. (4 Credits)
Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec.

CHN 112. FIRST-YEAR CHINESE. (4 Credits)
Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec.
Prerequisites: CHN 111 with D- or better

CHN 113. FIRST-YEAR CHINESE. (4 Credits)
Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec.
Prerequisites: CHN 112 with D- or better

CHN 211. SECOND-YEAR CHINESE. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/Rec.
Prerequisites: CHN 113 with C- or better

CHN 212. SECOND-YEAR CHINESE. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/discussion/activity.
Prerequisites: CHN 211 with D- or better

CHN 213. SECOND-YEAR CHINESE. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/discussion.
Prerequisites: CHN 212 with C- or better

CHN 299. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

CHN 311. THIRD-YEAR CHINESE LANGUAGE. (3 Credits)
Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language.
Prerequisites: CHN 213 with C- or better
CHN 312. THIRD-YEAR CHINESE LANGUAGE. (3 Credits)
Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language. Lec/rec.
Prerequisites: CHN 311 with C- or better

CHN 313. THIRD-YEAR CHINESE LANGUAGE. (3 Credits)
Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language.
Prerequisites: CHN 312 with C- or better

CHN 379. PROCTOR EXPERIENCE. (1-2 Credits)
Supervised practicum for advanced students, with assignments as proctor or tutor in lower-division Chinese courses. May be repeated for credit. No credit may be used to satisfy requirements for a minor in Chinese. Graded P/N.
This course is repeatable for 6 credits.
Recommended: Completion of third-year Chinese with a minimum 3.0 GPA in that sequence

CHN 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

CHN 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

CHN 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

CHN 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

CHN 410. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.

CHN 411. FOURTH-YEAR CHINESE (NEWSPAPER CHINESE). (3 Credits)
Development of reading, writing, and speaking skills at a more advanced level; reading of newspaper articles from China, Taiwan, and other sources; oral reports and compositions in Chinese. Not offered every year.
Recommended: CHN 313

CHN 412. FOURTH-YEAR CHINESE (NEWSPAPER CHINESE). (3 Credits)
Development of reading, writing, and speaking skills at a more advanced level; reading of newspaper articles from China, Taiwan, and other sources; oral reports and compositions in Chinese. Not offered every year.
Recommended: CHN 411

CHN 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

CHN 505. READING AND CONFERENCE. (1-16 Credits)
Prereq: Departmental approval required.
This course is repeatable for 16 credits.

College Student Services Administration

CSSA 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: AHE 501, ED 501
This course is repeatable for 16 credits.

CSSA 502. INDEPENDENT STUDY. (1-16 Credits)
Graded P/N.
Equivalent to: AHE 502
This course is repeatable for 16 credits.

CSSA 503. THESIS. (1-16 Credits)
Graded P/N.
Equivalent to: AHE 503
This course is repeatable for 999 credits.

CSSA 505. READING AND CONFERENCE. (1-16 Credits)
Graded P/N.
Equivalent to: AHE 505
This course is repeatable for 16 credits.

CSSA 506. PROJECTS. (1-16 Credits)
Graded P/N.
Equivalent to: AHE 506
This course is repeatable for 16 credits.

CSSA 507. SEMINAR. (1-5 Credits)
Graded P/N.
Equivalent to: AHE 507
This course is repeatable for 16 credits.

CSSA 508. WORKSHOP. (1-3 Credits)
Graded P/N.
Equivalent to: AHE 508
This course is repeatable for 16 credits.

CSSA 510. INTERNSHIP. (1-18 Credits)
Graded P/N.
Equivalent to: ED 510
This course is repeatable for 18 credits.

CSSA 513. RESEARCH IN HIGHER EDUCATION. (3 Credits)
Basic understanding of research and assessment ideas, uses, and practices in higher education and student affairs.
Equivalent to: AHE 513

CSSA 515. ADVANCED RESEARCH LITERATURE REVIEW. (3 Credits)
Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research. CROSSTRAINED as ANTH 515, ES 515, WGSS 515.
Equivalent to: ANTH 515, ES 515, WGSS 515

CSSA 520. MULTICULTURAL ISSUES IN HIGHER EDUCATION. (3 Credits)
Developing understanding, knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.
Equivalent to: AHE 520

CSSA 530. FUNDAMENTALS OF COUNSELING. (3 Credits)
Explores basic helping skills and processes appropriate in a variety of settings, specifically within the higher education arena. Instruction will focus on a variety of counseling skills and techniques through videotape and role plays. Course activities will explore ethical standards of conduct, multicultural considerations and competencies, and engage in discussions of counseling issues within higher education.
Equivalent to: COUN 530

CSSA 535. TRAGEDY AND CRISIS MANAGEMENT IN HIGHER EDUCATION. (3 Credits)
Introduction to the history of major incidents of college and university tragedies and best practices for preventing and responding to these crisis situations.
CSSA 548. AMERICAN HIGHER EDUCATION. (3 Credits)
The origins and development of higher education in the United States from the colonial colleges to the present.
Equivalent to: AHE 548

CSSA 549. GLOBALIZATION IN HIGHER EDUCATION. (3 Credits)
Exposes students to the multifaceted nature of global education by exploring Globalization/internationalization as it relates not only to student affairs, but to the greater higher education setting.

CSSA 551. PROGRAMS AND FUNCTIONS IN COLLEGE STUDENT SERVICES. (3 Credits)
Historical, philosophical, and organizational foundations; operational components and functional areas; overview and analysis of college student services in postsecondary educational institutions; leadership development.
Equivalent to: AHE 551

CSSA 552. STUDENT DEVELOPMENT IN UNIVERSITIES AND COLLEGES. (3 Credits)
Theoretical and philosophical foundations of student development; analysis of college student characteristics and the student culture; nontraditional student subgroups; student attitudes, values, and beliefs; concepts and models that promote student learning; and assessment of student growth.
Equivalent to: AHE 552
This course is repeatable for 6 credits.

CSSA 553. STUDENT DEVELOPMENT IN UNIVERSITIES AND COLLEGES II. (3 Credits)
Gain a deeper understanding of adult student populations and development theory (specifically, cognitive theories and typologies) and its application to practice.

CSSA 554. LEGAL ISSUES IN HIGHER EDUCATION. (3 Credits)
A comprehensive presentation and discussion of the law governing administration within public colleges and universities with a special emphasis on tort liability and freedom of expression.
Equivalent to: AHE 554

CSSA 555. PROFESSIONAL DEVELOPMENT IN COLLEGE STUDENT SERVICES. (1 Credit)
Self-assessment, goal setting, professional growth, and professional ethics as a practitioner in college student services administration. Graded P/N.
Equivalent to: AHE 557

CSSA 557. PROFESSIONAL DEVELOPMENT IN COLLEGE STUDENT SERVICES II. (1 Credit)
Core, Pers, Cult Diversity; LACS – Liberal Arts Social Sciences. This course is repeatable for 16 credits.

CSSA 558. ORGANIZATION AND ADMINISTRATION OF COLLEGE STUDENT SERVICES. (3 Credits)
Legal foundations, governance models, planning, and goal setting, resource acquisition and allocation, personnel and financial management and administrative leadership.
Equivalent to: AHE 558

CSSA 559. CSSA TRANSITIONS. (3 Credits)
First-term CSSA students will explore issues of professional transition, orientation and acculturation, including: foundational professional values that inform student affairs work; student affairs professional associations; student affairs research and scholarship; social justice in higher education; and approaches to self-care and professional well-being.
Equivalent to: ES 221H

CSSA 574. BUDGET AND FINANCE. (2 Credits)
Introduction to budget and finance in student services. Overview of topics with which student affairs practitioners should be familiar, able to use, and to assess.
Equivalent to: AHE 574

CSSA 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Ethnic Studies

ES 101. INTRODUCTION TO ETHNIC STUDIES. (3 Credits)
This interdisciplinary course focuses on the ethnic group experience in the United States with emphasis on African Americans, Native Americans, Chicanos/as, Latinos/as, and Asian Americans. (Bacc Core Course)
Attributes: CPOD – Core, Cult Diversity; LACS – Liberal Arts Social Sciences

ES 159. LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION. (4 Credits)
Students in this course will unpack language, race and racism—as well as the intersections between those ideas—as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ANTH 159 and WLC 159.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ANTH 159, WLC 159

ES 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 201. INVENTING ETHNIC AMERICA. (3 Credits)
An examination of past and present constructions of race and ethnicity in U.S. culture and society and their impact on individuals, institutions, policies, and practices, with particular emphasis on contemporary America. (Bacc Core Course) (H) (SS)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Social Sciences

ES 211. INTRODUCTION TO LATINO/A STUDIES. (4 Credits)
An introduction to key concepts and ideas in Latino/a Studies, with a focus on the processes that led to the historical incorporation of various Latin@ groups into the United States, and the factors that have shaped contexts of reception for Latino/as historically. Students will explore connections and disconnections between historical and present day discourses and processes. (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity

ES 213. LATINO/A IDENTITIES AND ACTIVISM. (4 Credits)
A comparative interdisciplinary treatment of contemporary Latin@ cultures and current issues affecting their status in the United States. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core

ES 221. SURVEY OF AFRICAN AMERICAN STUDIES I. (4 Credits)
An interdisciplinary survey of the African American experience beginning with pre-colonial Africa to the early 1900s. (H) (NC) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ES 221H. SURVEY OF AFRICAN AMERICAN STUDIES I. (3 Credits)
An interdisciplinary survey of the African American experience beginning with pre-colonial Africa and ending with World War I. (H) (NC) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ES 221
ES 223. *SURVEY OF AFRICAN AMERICAN STUDIES II. (4 Credits)
An interdisciplinary survey of the African American experience from World War I to the present. (Bacc Core Course)  
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core  
Equivalent to: ES 223H

ES 223H. *SURVEY OF AFRICAN AMERICAN STUDIES II. (4 Credits)
An interdisciplinary survey of the African American experience from World War I to the present. (Bacc Core Course)  
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core  
Equivalent to: ES 223

ES 231. *INTRODUCTION TO ASIAN AMERICAN STUDIES. (4 Credits)
An examination of the histories and experiences of Asian Americans from the mid-1800s to the present through historical texts, oral histories, personal essays, video, audio, and creative writings. (H) (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core

ES 233. *ASIAN PACIFIC AMERICAN ACTIVISM AND EMPOWERMENT. (4 Credits)
A look at Asian Pacific American activism and issues, from early labor organizing to contemporary community efforts, with particular emphasis on the 1960s to the present. (H) (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
Equivalent to: ES 241H

ES 241. *INTRODUCTION TO NATIVE AMERICAN STUDIES. (4 Credits)
A survey of Native American cultures and history, both prior to and following contact with Europeans. Introduces the key contemporary issues and questions in the field of Native American studies. (H) (NC) (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
Equivalent to: ES 241

ES 241H. *INTRODUCTION TO NATIVE AMERICAN STUDIES. (4 Credits)
A survey of Native American cultures and history, both prior to and following contact with Europeans. Introduces the key contemporary issues and questions in the field of Native American studies. (H) (NC) (Bacc Core Course)  
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core  
Equivalent to: ES 241

ES 243. *NATIVE AMERICAN ASSIMILATION AND ACTIVISM. (4 Credits)
Comprehensive course dealing with Native American experiences in the United States. Focuses on tribal and individual Native American activism and responses to government policies and cultural practices of assimilation since 1900. (Bacc Core Course) (H) (NC)  
Attributes: CPCD – Core, Pers, Cult Diversity; CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ES 260. *INTRODUCTION TO PACIFIC ISLANDS STUDIES. (4 Credits)
Introduction to the geography, societies, histories, cultures, and contemporary issues of Oceania (Pacific islands). Especially concerned with the experience of indigenous communities and the representations generated inside and outside Oceania. (Bacc Core Course)  
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

ES 270. MAKING ALLIANCES AND SOLIDARITIES. (4 Credits)
Examines the history of social justice movement alliances and solidarity work. Students will learn from case studies and analyses of successes and failures in collaborations across race, gender, class, sexuality, and indigenous communities. Students will extend course learning via experiential projects requiring the application and practice of alliance-making and solidarity principles.

ES 299. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 311. NARRATIVES OF LATINO MIGRATIONS. (3 Credits)
A study of the scholarship and creative literature dealing with migrations from Mexico and other Latin American countries to the United States.  
Attributes: LACH – Liberal Arts Non-Western Core

ES 321. AFRICAN AMERICAN POLITICAL AND SOCIAL THOUGHT: 20TH CENTURY. (4 Credits)
This interdisciplinary course examines the dialogues, conflicts and self-representations produced by African Americans beginning with the closing years of the 19th century (1895) and ending with the opening days of World War II. (SS)

Attributes: LACH – Liberal Arts Social Core

ES 323. CONTEMPORARY AFRICAN AMERICAN SOCIAL DISCOURSE. (4 Credits)
Interdisciplinary course examines key African American political discourse(s) that emerged in response to major social and cultural transformations occurring in the United States after World War II to the present. (SS)

Attributes: LACS – Liberal Arts Social Core

ES 332. ASIAN PACIFIC AMERICANS AND THE MEDIA. (4 Credits)
A broad study of representations of Asians, Pacific Islanders, and Asian Pacific Americans in various US media, including media produced by Asian Pacific Americans themselves.

Attributes: LACH – Liberal Arts Humanities Core

ES 334. *ASIAN PACIFIC AMERICAN LITERATURE. (4 Credits)
An examination of various works by Asian Pacific American writers and some of the critical debates surrounding them. (Bacc Core Course)  
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPLA – Core, Pers, Lit and Arts

ES 345. NATIVE AMERICANS IN OREGON. (4 Credits)
Analysis and understanding of the complex experiences of Native Americans in the present state of Oregon, from early contact with those of other ethnicities to contemporary demographic contexts. (H) (NC)

Attributes: LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ES 350. *PUBLIC DISCOURSE AND WRITINGS ON RACE. (4 Credits)
Explores historical and contemporary cases of private, political, and public discourse on race and difference. Students will study diverse examples to explore strategies and methods of dominant and resistant discourse, as well as their social and material impacts. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

ES 351. *ETHNIC MINORITIES IN OREGON. (4 Credits)
Exploration of the cultures and contributions of major ethnic groups in the state of Oregon. With timelines, oral histories, and audiovisual aids, the course will allow students to learn the ethnic and regional diversity in Oregon history. (Bacc Core Course) (H)

Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
ES 353. *ENVIRONMENTAL RACISMS. (4 Credits)
Introduces environmental racism; the unequal impact of environmental harm on communities of color and indigenous peoples. Presents empirical evidence and theoretical frames, and explores efforts by government, residents, and activists to combat it. Considers questions of environmental justice via social structure, public access, open space, indigeneity, food, and media. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 353H

ES 353H. *ENVIRONMENTAL RACISMS. (4 Credits)
Introduces environmental racism; the unequal impact of environmental harm on communities of color and indigenous peoples. Presents empirical evidence and theoretical frames, and explores efforts by government, residents, and activists to combat it. Considers questions of environmental justice via social structure, public access, open space, indigeneity, food, and media. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ES 353

ES 354. *LITERATURE OF ETHNIC MINORITIES IN THE UNITED STATES. (4 Credits)
An examination of various literary works by ethnic minorities addressing issues of race and ethnicity in U.S. culture and society. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

ES 355. *RACE, SPACE, AND DIFFERENCE. (4 Credits)
A hands-on approach to exploring how we make space, and why geography is always infused with markers of social identity and exercises of power. Will practice “reading” space and landscapes, and learn how notions of race and other forms of “difference” shape space (and vice versa) to produce experiences of inclusion, exclusion, cooperation, and conflict. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 355H

ES 355H. *RACE, SPACE, AND DIFFERENCE. (4 Credits)
A hands-on approach to exploring how we make space, and why geography is always infused with markers of social identity and exercises of power. Will practice “reading” space and landscapes, and learn how notions of race and other forms of “difference” shape space (and vice versa) to produce experiences of inclusion, exclusion, cooperation, and conflict. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ES 355

ES 357. *FARMWORKER JUSTICE MOVEMENTS. (4 Credits)
Justice movements for farmworkers have a long and storied past in the annals of US history. This course begins with the 1960s Chicano civil rights era struggles for social justice. Focus on the varied strategies of four farmworker justice movements: United Farm Workers, Farm Labor Organizing Committee, Pineros y Campesinos Unidos Noroeste, and the Coalition of Immokalee Workers. The course is structured around the question of the movement and its various articulations. Course covers central themes and strategies that comprise the core of farmworker movements but is designed to allow students to explore other articulations they find relevant. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 357H

ES 357H. *FARMWORKER JUSTICE MOVEMENTS. (4 Credits)
Justice movements for farmworkers have a long and storied past in the annals of US history. This course begins with the 1960s Chicano civil rights era struggles for social justice. Focus on the varied strategies of four farmworker justice movements: United Farm Workers, Farm Labor Organizing Committee, Pineros y Campesinos Unidos Noroeste, and the Coalition of Immokalee Workers. The course is structured around the question of the movement and its various articulations. Course covers central themes and strategies that comprise the core of farmworker movements but is designed to allow students to explore other articulations they find relevant. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: ES 357

ES 361. (RE)FRAMING RACE THROUGH FILM PRODUCTION. (4 Credits)
A critical engagement of ways race and ethnicity are treated in nonfiction short films as students produce their own short films as a means of challenging dominant racial representations and narratives. Requires a basic understanding of ways that notions about race and ethnicity combine with ideologies about gender, sexuality, ability, class, etc. to perpetuate unjust systems and institutions. Prior filmmaking experience is welcome but not required. CROSSLISTED as QS 361, WGSS 361, WLC 361.
Equivalent to: QS 361, WGSS 361, WLC 361

ES 373. APPROACHES TO SOCIAL JUSTICE. (3 Credits)
Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ANTH 373, WGSS 373, WLC 373.
Equivalent to: ANTH 373, WGSS 373, WLC 373

ES 375. *ARTS AND SOCIAL JUSTICE. (4 Credits)
Explores concepts of structural inequality, difference, power, and discrimination through a critical survey of arts activism. Students will think critically about artwork and artists who address a number of social issues in the United States, including race, ethnicity, class, gender, sexuality, immigration, and indigeneity. CROSSLISTED as QS 375, WGSS 375.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 375, WGSS 375

ES 377. *HEALTH AND SOCIAL JUSTICE. (4 Credits)
Introduction to the intersection of health and social justice, to better understand socially unjust health differences (inequities) present in communities across the United States and abroad. Examination of relevant historical issues, theories of justice, human rights, and empirical evidence of health inequities, with an emphasis in critical analysis and applied knowledge. Overview of community-engaged participatory approaches that may be used to address social injustices and health inequities. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

ES 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
Equivalent to: ES 399H

ES 399H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: ES 399
This course is repeatable for 16 credits.

ES 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.
ES 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ES 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ES 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ES 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ES 409. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ES 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ES 416. MIGRANT HEALTH. (4 Credits)
An overview of major health and health care issues related to immigrant communities in the United States. From an ecological perspective, students gain an understanding of the theories and realities about migration and the migration-health relationship. In particular, the situation of migrant and seasonal farmworkers in the Pacific Northwest is analyzed. Specific topics include assimilation and acculturation, access to care, protective practices (the so-called Latino paradox), migrant health centers and community health workers, environmental and occupational issues, immigrant families.

ES 431. *QUEER OF COLOR CRITIQUES. (4 Credits)
"Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) CROSSLISTED as QS 431 and WGSS 431.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 431, WGSS 431

ES 437. *(EN)GENDERING ASIAN PACIFIC AMERICA. (4 Credits)
An examination of intersecting articulations of race, class, gender, sexuality, and ethnicity as they relate to and are addressed by Asian Pacific Americans. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
Equivalent to: ES 431

ES 444. NATIVE AMERICAN LAW: TRIBES, TREATIES, AND THE UNITED STATES. (4 Credits)
Examination of the parameters of native treaty relationships with the federal and state governments, and considers the future of these agreements.
Attributes: LACN – Liberal Arts Non-Western Core; LACS – Liberal Arts Social Core

ES 445. *NATIVE AMERICAN SCIENCE AND TECHNOLOGY. (4 Credits)
Examination of scientific and technological discovery, continuity, and change among indigenous peoples, with particular emphasis on selected communities of pre- and post-European contact North America. (Bacc Core Course) (H) (NC)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ES 445H

ES 445H. *NATIVE AMERICAN SCIENCE AND TECHNOLOGY. (4 Credits)
Examination of scientific and technological discovery, continuity, and change among indigenous peoples, with particular emphasis on selected communities of pre- and post-European contact North America. (Bacc Core Course) (H) (NC)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ES 445

ES 448. NATIVE AMERICAN PHILOSOPHIES. (4 Credits)
Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. (NC) CROSSLISTED as PHL 448/PHL 548, REL 448/REL 548.
Attributes: LACN – Liberal Arts Non-Western Core
Equivalent to: PHL 448, REL 448

ES 451. THEORIES OF RACE AND ETHNICITY. (4 Credits)
A seminar examining various theories of race and ethnicity, their historical contexts, and applications.

ES 452. *ETHNICITY IN FILM. (4 Credits)
Using ethnicity and gender as primary frames of reference, this upper-division/graduate level seminar seeks to introduce students to critical film theory and examine ethnicity and gender as a force both in front of and behind the camera. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACN – Liberal Arts Non-Western Core

ES 453. *ETHNOHISTORY METHODOLOGY. (4 Credits)
A seminar developing techniques for collecting, analyzing, and incorporating ethnic community histories in research papers and theses. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

ES 455. INTERNSHIP SEMINAR. (1 Credit)
Prepares students for the internship and provides an opportunity to explore career options and/or graduate study.
Recommended: ES 101 and ES 201

ES 457. *LITERATURE BY WOMEN OF COLOR IN THE UNITED STATES. (4 Credits)
An examination of works by various women writers of color and their treatment of issues such as race, ethnicity, class, sexuality, and gender. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core

ES 459. *HUMAN RIGHTS AND ETHNICITY. (4 Credits)
An examination of the ways in which ethnicity and race shape social, political, and economic relations in communities, and how these communities address these challenges. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core

ES 465. RACIAL PATTERNS OF URBANIZATION. (4 Credits)
This interdisciplinary course will examine the linkages between race and patterns of urbanization. It will examine how ideologies about race, gender, and class have set the themes of debate and discussion about urbanization in both theoretical and popular discourses.
ES 459. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY. (4 Credits)
Students in this course will unpack language, race and racism—as well as the intersections between these ideas—as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, WLC 459/WLC 559.
Equivalent to: ANTH 459, WLC 459

ES 460. ETHNICITY AND SOCIAL JUSTICE. (4 Credits)
Seminar examines inequities and social justice issues in contemporary U.S. society, particularly dimensions of race and ethnicity in our public policies and practices impacting communities in areas such as housing, poverty, employment, public health, education, law enforcement, and the environment.

ES 461. RACISM AND THE PRISON INDUSTRIAL COMPLEX. (4 Credits)
The prison industrial/punishment complex in the late 20th and early 21st centuries has become a growth industry with the privatization of prisons, and mass incarceration of mostly people-of-color. This course examines the history and growth of this industry and the implications that it has on this democracy.

ES 463. US EMPIRE/IMPERIALISM, SETTLER/OLONIALISM, CAPITALISM/RACE. (4 Credits)
How and when did the United States become an empire? This course approaches the historical and contemporary actions of the United States as both a continental and global empire through historiography, socio-political, economic, and racial analyses of U.S. hegemony. Students will learn from recent interdisciplinary scholars who have worked to understand the development of U.S. empire as a series of overlapping cultural projects in the homeland, and beyond the borders of the United States as mutually constitutive of political, and economic, and cultural processes of empire-building, that is capital accumulation, and power.

ES 464. FOOD AND ETHNIC IDENTITY: DECOLONIZING OUR FOOD AND BODY. (3 Credits)
This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as FCSJ 464. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: FCSJ 464

ES 472. *INDIGENOUS TWO-SPIRIT AND QUEER STUDIES. (4 Credits)
"Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as QS 472, WGSS 472.
Attributes: CWIC – Core, Skills, WIC
Equivalent to: QS 472, WGSS 472
Recommended: QS 262 or ES 242 or WGSS 414

ES 477. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM. (4 Credits)
LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as QS 477/ QS 577, WGSS 477/WGSS 577.
Equivalent to: QS 477, WGSS 477
Recommended: QS 262 and QS 462

ES 483. CUBAN CULTURE, POLITICS AND SOCIETY. (4 Credits)
One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as PS 483 and WLC 483.
Equivalent to: ENG 483

ES 485. CAPSTONE IN SOCIAL JUSTICE. (2 Credits)
Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. CROSSLISTED as ANTH 485, WGSS 485, WLC 485.
Prerequisites: (ANTH 373 with D- or better or ES 373 with D- or better or WGSS 373 with D- or better or WLC 373 with D- or better) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-])
Equivalent to: ANTH 485, WGSS 485, WLC 485
This course is repeatable for 4 credits.

ES 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

ES 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ES 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ES 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ES 506. SPECIAL PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ES 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

ES 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

ES 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
ES 515. ADVANCED RESEARCH LITERATURE REVIEW. (3 Credits)
Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research. CROSSLISTED as ANTH 515, CSSA 515, WGSS 515.
Equivalent to: ANTH 515, CSSA 515, WGSS 515

ES 516. MIGRANT HEALTH. (4 Credits)
An overview of major health and health care issues related to immigrant communities in the United States. From an ecological perspective, students gain an understanding of the theories and realities about migration and the migration-health relationship. In particular, the situation of migrant and seasonal farmworkers in the Pacific Northwest is analyzed. Specific topics include assimilation and acculturation, access to care, protective practices (the so-called Latino paradox), migrant health centers and community health workers, environmental and occupational issues, immigrant families.

ES 531. QUEER OF COLOR CRITIQUES. (4 Credits)
"Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. CROSSLISTED as QS 531 and WGSS 531.
Equivalent to: QS 531, WGSS 531

ES 537. (EN)GENDERING ASIAN PACIFIC AMERICA. (4 Credits)
An examination of intersecting articulations of race, class, gender, sexuality, and ethnicity as they relate to and are addressed by Asian Pacific Americans.
Equivalent to: ES 531

ES 544. NATIVE AMERICAN LAW: TRIBES, TREATIES, AND THE U.S.. (4 Credits)
Examination of the parameters of native treaty relationships with the federal and state governments, and considers the future of these agreements.

ES 548. NATIVE AMERICAN PHILOSOPHIES. (4 Credits)
Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. CROSSLISTED as PHL 448/PHL 548, REL 448/REL 548.
Equivalent to: PHL 548, REL 548

ES 551. THEORIES OF RACE AND ETHNICITY. (4 Credits)
A seminar examining various theories of race and ethnicity, their historical contexts, and applications.

ES 552. ETHNICITY IN FILM. (4 Credits)
Using ethnicity and gender as primary frames of reference, this upper-division/graduate level seminar seeks to introduce students to critical film theory and examine ethnicity and gender as a force both in front of and behind the camera.

ES 553. ETHNOHISTORY METHODOLOGY. (4 Credits)
A seminar developing techniques for collecting, analyzing, and incorporating ethnic community histories in research papers and theses.

ES 557. LITERATURE BY WOMEN OF COLOR IN THE UNITED STATES. (4 Credits)
An examination of works by various women writers of color and their treatment of issues such as race, ethnicity, class, sexuality, and gender.

ES 558. RACIAL PATTERNS OF URBANIZATION. (4 Credits)
This interdisciplinary course will examine the linkages between race and patterns of urbanization. It will examine how ideologies about race, gender, and class have set the themes of debate and discussion and about urbanization in both theoretical and popular discourses.

ES 559. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY. (4 Credits)
Students in this course will unpack language, race and racism--as well as the intersections between those ideas-- as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, WLC 459/WLC 559.
Equivalent to: ANTH 559, WLC 559

ES 560. ETHNICITY AND SOCIAL JUSTICE. (4 Credits)
Seminar examines inequities and social justice issues in contemporary U.S. society, particularly dimensions of race and ethnicity in our public policies and practices impacting communities in areas such as housing, poverty, employment, public health, education, law enforcement, and the environment.

ES 561. RACISM AND THE PRISON INDUSTRIAL COMPLEX. (4 Credits)
The prison industrial/punishment complex in the late 20th and early 21st centuries has become a growth industry with the privatization of prisons, and mass incarceration of mostly people-of-color. This course examines the history and growth of this industry and the implications that it has on this democracy.

ES 563. US EMPIRE/IMPERIALISM, SETTLER/COLONIALISM, CAPITALISM/RACE. (4 Credits)
How and when did the United States become an empire? This course approaches the historical and contemporary actions of the United States as both a continental and global empire through historiography, socio-political, economic, and racial analyses of U.S. hegemony. Students will learn from recent interdisciplinary scholars who have worked to understand the development of U.S. empire as a series of overlapping cultural projects in the homeland, and beyond the borders of the United States as mutually constitutive of political, and economic, and cultural processes of empire-building, that is capital accumulation, and power.

ES 564. FOOD AND ETHNIC IDENTITY: DECOLONIZING OUR FOOD AND BODY. (3 Credits)
This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as FCSJ 564.
Equivalent to: FCSJ 564
ES 569. TOPICS IN JOTERIA STUDIES. (3 Credits)
A space for engaging with arts, activism and scholarship emerging from queer Latin@/Chicano experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as QS 569, SPAN 569, WGSS 569.
Equivalent to: QS 569, SPAN 569, WGSS 569
This course is repeatable for 6 credits.

ES 572. INDIGENOUS TWO SPIRIT AND QUEER STUDIES. (4 Credits)
"Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as QS 572, WGSS 572.
Equivalent to: QS 572, WGSS 572
Recommended: QS 262 or ES 242 or WGSS 414 or WGSS 514

ES 575. CRITICAL RACE FEMINISM AND OUTSIDER JURISPRUDENCE. (4 Credits)
Critical exploration of critical legal justice movements and their relationship to social identities. Seminar emphasizes specific legal cases, federal and state laws, and constitutional issues that impact groups deemed outsiders in legal discourse as well as their social implications. The critical justice movement and anti-subordination struggles will be explored via case analyses that shape race, class, gender, sexuality, and disability relations. Theoretical contributions of law and society, critical race theory, LatCrit, and critical race feminism, critical white studies, critical mixed race studies, OutCrit, ClassCrit, and critical disability studies applied to historical precedent and current attempts at marginalizing/empowering communities. CROSSLISTED as WGSS 575.
Equivalent to: WGSS 575

ES 577. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM. (4 Credits)
LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as QS 477/ QS 577, WGSS 477/WGSS 577.
Equivalent to: QS 577, WGSS 577
Recommended: QS 262 and QS 464

ES 583. CUBAN CULTURE, POLITICS AND SOCIETY. (4 Credits)
One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuban-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/ their program of study. CROSSLISTED as PS 583 and WLC 583.
Equivalent to: ENG 583

ES 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

ES 808. WORKSHOP. (1-16 Credits)
This course is repeatable for 99 credits.

FCSJ 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Food in Culture and Social Justice
FCSJ 199. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
FCSJ 444. NUTRITIONAL ANTHROPOLOGY. (4 Credits)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodiets, and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as ANTH 444.
Prerequisites: ANTH 240 with C or better or ANTH 330 with C or better
Equivalent to: ANTH 444

FCSJ 454. *INTERNATIONAL PERSPECTIVES ON FOOD SYSTEMS. (4 Credits)
Macro and micro-comparative overview of food systems in at least two different international settings, highlighting the influences of culture, social structure, geography, and economy on food systems. Non-traditional and emerging theoretical critiques of such influences on food systems are highlighted. (Bacc Core Course) (H) (SS) (NC)
Attributes: CSSI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core; LACS – Liberal Arts Social Core

FCSJ 464. FOOD AND ETHNIC IDENTITY: DECOLONIZING FOOD AND OUR BODY. (3 Credits)
This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as ES 464. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: ES 464

FCSJ 467. CAPSTONE: FOOD IN CULTURE AND SOCIAL JUSTICE. (1 Credit)
Working under the supervision of a Food in Culture and Social Justice faculty person, students further engage with a topic previously explored in FCSJ course work and produce a 5-page paper and public poster, presentation or website that demonstrates critical thinking and writing competencies about food, culture and social justice. Graded P/N.
Equivalent to: ANTH 467
Recommended: Completion or concurrent enrollment in the last coursework for the FCSJ undergraduate certificate

FCSJ 486. ANTHROPOLOGY OF FOOD. (4 Credits)
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as ANTH 486.
Attributes: LACS – Liberal Arts Social Core
Equivalent to: ANTH 486
Recommended: 3 credits of social science.

FCSJ 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

FCSJ 501. RESEARCH. (1-6 Credits)
This course is repeatable for 16 credits.

FCSJ 502. INDEPENDENT STUDY. (1-6 Credits)
This course is repeatable for 16 credits.

FCSJ 503. THESIS. (1-12 Credits)
This course is repeatable for 999 credits.

FCSJ 505. READING AND CONFERENCE. (1-6 Credits)
This course is repeatable for 16 credits.

FCSJ 506. FOOD PROJECTS. (1-6 Credits)
Graded P/N.
This course is repeatable for 6 credits.

FCSJ 507. SEMINAR. (1-3 Credits)
This course is repeatable for 16 credits.

FCSJ 510. GRADUATE INTERNSHIP. (1-16 Credits)
Opportunities for students to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members.
This course is repeatable for 16 credits.
Recommended: 6 credits of FCSJ

FCSJ 522. INTERCULTURAL LEARNING COMMUNITY. (3-6 Credits)
Taught as a learning community combining students, professors and community members to explore contemporary food-related questions in two different countries. Syllabus content will change depending on 1) The countries chosen, 2) The questions that are most of interest to the members of the community. Depending on the year, up to 25% of the time might be spent on the Corvallis campus.
Prerequisites: FCSJ 554 with C or better
This course is repeatable for 6 credits.

FCSJ 544. NUTRITIONAL ANTHROPOLOGY. (4 Credits)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodiets, and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as ANTH 544.
Equivalent to: ANTH 544
Recommended: ANTH 240 or ANTH 330

FCSJ 547. METHODS IN FOOD IN CULTURE AND SOCIAL JUSTICE. (4 Credits)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodiets, and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as ANTH 547.
Equivalent to: ANTH 547

FCSJ 554. INTERNATIONAL PERSPECTIVES ON FOOD SYSTEMS. (4 Credits)
Macro and micro-comparative overview of food systems in at least two different international settings, highlighting the influences of culture, social structure, geography, and economy on food systems. Non-traditional and emerging theoretical critiques of such influences on food systems are highlighted.

FCSJ 564. FOOD AND ETHNIC IDENTITY: DECOLONIZING FOOD AND OUR BODY. (3 Credits)
This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as ES 564.
Equivalent to: ES 564

FCSJ 567. AGRI-FOOD MOVEMENTS. (4 Credits)
Investigates the origins and contemporary status of producer and consumer food movements including but not limited to organic, agricultural labor movements, animal welfare, vegetarian and vegan movements, farmer’s markets, and permaculture. CROSSLISTED as ANTH 567.
Equivalent to: ANTH 567

FCSJ 586. ANTHROPOLOGY OF FOOD. (4 Credits)
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as ANTH 586.
Equivalent to: ANTH 586
Recommended: 3 credits of social science.

FCSJ 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

French
FR 111. FIRST-YEAR FRENCH. (4 Credits)
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. Lec/rec.
Recommended: Concurrent enrollment in FR 199

FR 112. FIRST-YEAR FRENCH. (4 Credits)
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. Lec/rec.
Prerequisites: FR 111 with D- or better or placement test
Recommended: Concurrent enrollment in FR 199

FR 113. FIRST-YEAR FRENCH. (4 Credits)
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. Lec/rec.
Prerequisites: FR 112 with D- or better or placement test
Recommended: Concurrent enrollment in FR 199

FR 121. SURVIVAL FRENCH FOR STUDENTS AND TRAVELERS. (3 Credits)
Provides practical linguistic tools for short stays in France. Basic conversation skills, pronunciation, introduction to French non-verbal language, as well as cultural tools, introduction to French etiquette, visual dictionary, and tips for avoiding cross-cultural misunderstandings common between Americans and the French.

FR 188. FRENCH STUDIES, FRENCH STUDY CENTERS. (1-12 Credits)
May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society.
This course is repeatable for 12 credits.

FR 199. SPECIAL STUDIES. (1-16 Credits)
Conversation, pronunciation, vocabulary-building, etc. Supplements basic sequence FR 111, FR 112, FR 113. May be repeated for credit when topic varies.
This course is repeatable for 16 credits.

FR 211. SECOND-YEAR FRENCH. (4 Credits)
Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. Lec/rec.
Prerequisites: FR 113 with D- or better or placement test
Recommended: Concurrent enrollment in FR 299

FR 212. SECOND-YEAR FRENCH. (4 Credits)
Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. Lec/rec.
Prerequisites: FR 211 with D- or better or placement test
Recommended: Concurrent enrollment in FR 299

FR 213. SECOND-YEAR FRENCH. (4 Credits)
Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Completion of FR 213 with a grade of C- or better satisfies BA requirement in foreign languages. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. Lec/rec.
Prerequisites: FR 212 with D- or better or placement test
Recommended: Concurrent enrollment in FR 299

FR 288. FRENCH STUDIES, FRENCH STUDY CENTERS. (1-12 Credits)
May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society.
This course is repeatable for 12 credits.

FR 299. SPECIAL STUDIES. (1-16 Credits)
Conversation, pronunciation, vocabulary-building, etc. Supplements basic sequence FR 211, FR 212, FR 213. May not be offered every year. May be repeated for credit when topic varies.
This course is repeatable for 16 credits.

FR 300. ADVANCED FRENCH CONVERSATION. (3 Credits)
Focuses on oral communication through extensive listening and speaking practice in French. Students will interact with francophone cultures and the French language through personal research and presentations, exchanges with native and non-native francophone speakers, as well as through diverse authentic documents. Time will be dedicated to a targeted practice of French pronunciation, topical vocabulary and idiomatic expressions. Some reading and writing will also be required to develop oral skills. Native speakers of French are not eligible to take this course.
Prerequisites: FR 311 with C- or better
FR 311. THIRD-YEAR FRENCH. (3 Credits)
A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French.
Prerequisites: FR 213 with C- or better or placement test

FR 312. THIRD-YEAR FRENCH. (3 Credits)
A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French.
Prerequisites: FR 311 with C- or better or placement test

FR 313. THIRD-YEAR FRENCH. (3 Credits)
A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French.
Prerequisites: FR 312 with C- or better or placement test

FR 315. FRENCH FOR BUSINESS. (3 Credits)
Recommended: FR 213

FR 319. SELECTED TOPICS IN FRENCH LANGUAGE. (3 Credits)
Skill-orientation variable. Conducted in French. May be repeated for credit when topic varies. This course is repeatable for 9 credits.

FR 321. FRENCH CONVERSATION FOR ADVANCED SPEAKERS I. (1 Credit)
Designed for students who would like to continue developing basic listening and speaking skills in French through independent work with a variety of media. Graded P/N.
Prerequisites: FR 213 with D- or better

FR 322. FRENCH CONVERSATION FOR ADVANCED SPEAKERS II. (1 Credit)
Designed for students who would like to continue developing basic listening and speaking skills in French through independent work with a variety of media.
Prerequisites: FR 213 with D- or better

FR 323. FRENCH CONVERSATION FOR ADVANCED SPEAKERS III. (1 Credit)
Designed for students who would like to continue developing basic listening and speaking skills in French through independent work with a variety of media.
Prerequisites: FR 213 with D- or better

FR 333. FRENCH CULTURE AND SOCIETY SINCE THE REVOLUTION. (3 Credits)
Cultural life of the French people from 1789 to the present. Conducted in French. Need not be taken in order. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: Completion of 6 credits of 300-level French

Literary works, themes, movements, or authors from French-speaking areas of the world. Conducted in French. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 9 credits.

FR 379. PROCTOR EXPERIENCE. (1-2 Credits)
Supervised practicum for advanced students. Assignments as proctors or tutors in lower-division French courses. No more than 2 credits may be used to satisfy degree requirements for a major in French; may not be used to satisfy requirements for a minor in French. Graded P/N. This course is repeatable for 6 credits.
Recommended: Completion of 12 upper-division credits in French, including FR 311, FR 312, FR 313 and FR 351, with a minimum 3.0 GPA

FR 388. FRENCH STUDIES, FRENCH STUDY CENTERS. (1-12 Credits)
May be repeated when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for 12 credits.

FR 399. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

FR 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

FR 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

FR 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.
FR 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

FR 410. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.

FR 411. FOURTH-YEAR FRENCH. (3 Credits)
A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and techniques; oral reports and original presentations in French; original compositions. Conducted in French.
Prerequisites: FR 313 with D- or better

FR 421. FRENCH CONVERSATION FOR ADVANCED SPEAKERS IV. (1 Credit)
Designed for students who would like to continue developing listening and speaking skills in French through independent work with a variety of media. Graded P/N.
Prerequisites: FR 313 with D- or better

FR 422. FRENCH CONVERSATIONS FOR ADVANCED SPEAKERS V. (1 Credit)
Designed for students who would like to continue developing listening and speaking skills in French through independent work with a variety of media. Graded P/N.
Prerequisites: FR 313 with D- or better

FR 423. FRENCH CONVERSATION FOR ADVANCED SPEAKERS VI. (1 Credit)
Designed for students who would like to continue developing listening and speaking skills in French through independent work with a variety of media.
Prerequisites: FR 313 with D- or better

FR 439. *FRENCH/FRANCOPHONE STUDIES. (3 Credits)
Variable topics in language, culture, or literature. May be repeated for credit when topic varies. Conducted in French. Not offered every year. (Writing Intensive Course)
Attributes: CWIC — Core, Skills, WIC
This course is repeatable for 9 credits.

FR 449. SELECTED TOPICS IN FRANCOPHONE LITERATURE. (3 Credits)
Conducted in French. May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 9 credits.

FR 488. FRENCH STUDIES, FRENCH STUDY CENTERS. (1-12 Credits)
May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society.
This course is repeatable for 12 credits.

FR 499. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
Equivalent to: FR 499H
This course is repeatable for 9 credits.

FR 499H. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year.
Attributes: HNRS — Honors Course Designator
Equivalent to: FR 499
This course is repeatable for 9 credits.

FR 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.
GER 211. SECOND-YEAR GERMAN. (4 Credits)
Continuing development of writing, reading, listening, and speaking skills; cultural component. Completion of second-year German or equivalent with a GPA of 2.50 or higher serves as a prerequisite for upper-division courses. Native or bilingual speakers of German will not receive credit for GER 211, GER 212 or GER 213. Lec/lab/rec.
Prerequisites: GER 113 with D- or better

GER 212. SECOND-YEAR GERMAN. (4 Credits)
Continuing development of writing, reading, listening, and speaking skills; cultural component. Completion of Second-Year German or equivalent with a GPA of 2.50 or higher serves as a prerequisite for upper-division courses. Native or bilingual speakers of German will not receive credit for GER 211, GER 212, or GER 213. Lec/rec.
Prerequisites: GER 211 with D- or better

GER 213. SECOND-YEAR GERMAN. (4 Credits)
Continuing development of writing, reading, listening, and speaking skills; cultural component. Completion of Second-Year German or equivalent with a GPA of 2.50 or higher serves as a prerequisite for upper-division courses. Completion of GER 213 with grade of C- or better satisfies BA requirement in foreign languages. Native or bilingual speakers of German will not receive credit for GER 211, GER 212, or GER 213. Lec/rec.
Prerequisites: GER 212 with D- or better

GER 299. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 16 credits.

GER 311. THIRD-YEAR GERMAN. (3 Credits)
Focus on development of German writing, speaking, and listening skills. Conducted in German. Required of German majors and minors.
Prerequisites: GER 213 with C or better

GER 312. THIRD-YEAR GERMAN. (3 Credits)
Focus on development of German writing, speaking, and listening skills. Conducted in German. Required of German majors and minors.
Prerequisites: GER 213 with C or better

GER 313. THIRD-YEAR GERMAN. (3 Credits)
Focus on development of German writing, speaking, and listening skills. Conducted in German. Both courses required of German majors and minors.
Prerequisites: GER 213 with C- or better

GER 319. SELECTED TOPICS IN GERMAN LANGUAGE. (3 Credits)
Focus on development of German language skills and/or history of the language. Conducted in German. May be repeated for credit when topic varies. Lec/rec. Not offered every year.
This course is repeatable for 9 credits.

GER 329. SELECTED TOPICS IN LITERATURE AND/OR CULTURE. (3 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 9 credits.

GER 331. *GERMAN CULTURE. (3 Credits)
Aspects of history, politics, art, music, literature, and everyday life in German-speaking countries. Attention to development of German language skills. Conducted in German. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: GER 213

GER 332. *GERMAN CULTURE. (3 Credits)
Aspects of history, politics, art, music, literature, and everyday life in German-speaking countries. Attention to development of German language skills. Conducted in German. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Prerequisites: GER 213 with D- or better

GER 339. SELECTED TOPICS IN GERMAN CULTURE. (3 Credits)
Focus on specific aspects of German culture. Attention to development of German language skills. Conducted in German. May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 9 credits.
Recommended: Completion of 9 credits from GER 311, GER 312, GER 313.

GER 349. SELECTED TOPICS IN GERMAN LITERATURE. (3 Credits)
Attention to development of German language skills. Conducted in German. May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 9 credits.
Recommended: GER 213

GER 351. GERMAN PRONUNCIATION AND PHONETICS. (3 Credits)
Analysis of the fundamentals of the German sound system, including pronunciation, phonology, phonetic and contrastive analysis of sounds; phonemes, intonation, and tone patterns. Required of students working toward a teaching certificate in German. Not offered every year.
Recommended: GER 213

GER 355. TRANSLATION. (3 Credits)
Introduces students to translation studies in theory and practice. Students will learn problems behind translating texts and strategies to overcome these issues, before working on shorter and longer translation projects of a variety of texts. Taught in English.
Prerequisites: GER 312 with D- or better

Critique of current scholarly debates in German cinema (popular cinema, stars, institutional and cultural frameworks, cultural politics, and transnational connections) in connection with the critical viewing of a large variety of films from various periods. Taught in English.

GER 362. DIVIDED SCREEN: GERMAN CINEMA BETWEEN 1945 AND 1990. (3 Credits)
Introduces German cinema between the corner dates 1945–division into East and West–and German unification in 1990. Compares and contrasts films made in East and West Germany to understand differences and similarities in the political and cultural set-up of the two states.

GER 363. CONTEMPORARY GERMAN CINEMA. (3 Credits)
Introduces German cinema after unification in 1990. Analyzes German films from various genres, “schools,” and directors. Reflects and compares contemporary issues of Germany, Austria, and Switzerland to Hollywood cinema.

GER 379. PROCTOR EXPERIENCE. (1-2 Credits)
Supervised practicum for advanced students, with assignments as proctors or tutors in lower-division German language courses. No more than 2 credits may be used to satisfy degree requirements for a major in German; no credit may be used to satisfy requirements for a minor in German. Graded P/N.
This course is repeatable for 6 credits.
Recommended: Completion of 12 upper-division credits in German, including GER 311, GER 312, GER 313
GER 399. SPECIAL TOPICS. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 401. RESEARCH. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 402. INDEPENDENT STUDY. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 403. THESIS. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 405. READING AND CONFERENCE. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 407. SEMINAR. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 410. INTERNSHIP. (1-15 Credits)  
This course is repeatable for 15 credits.

GER 411. FOURTH-YEAR GERMAN. (3 Credits)  
Focus on development of German writing, speaking, and listening skills. Conducted in German.  
Attributes: CWIC – Core, Skills, WIC  
Prerequisites: GER 313 with C- or better

GER 412. FOURTH-YEAR GERMAN. (3 Credits)  
Focus on development of German writing, speaking, and listening skills. Conducted in German.  
Prerequisites: GER 411 with C- or better

GER 413. FOURTH-YEAR GERMAN. (3 Credits)  
Focus on development of German writing, speaking, and listening skills. Conducted in German.  
Prerequisites: GER 412 with C- or better

GER 421. GERMAN LANGUAGE TANDEM. (1 Credit)  
Optional course that can be taken to fine-tune advanced German speaking skills with the help of a native speaker. Graded P/N. This course is repeatable for 6 credits.

GER 449. SELECTED TOPICS IN GERMAN LITERATURE. (3 Credits)  
May be repeated for credit when topic varies. Conducted in German.  
Recommended: 9 upper-division credits in German.

GER 501. RESEARCH. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 502. INDEPENDENT STUDY. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 503. THESIS. (1-16 Credits)  
This course is repeatable for 999 credits.

GER 505. READING AND CONFERENCE. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 507. SEMINAR. (1-16 Credits)  
This course is repeatable for 16 credits.

GER 511. FOURTH-YEAR GERMAN. (3 Credits)  
Focus on development of German writing, speaking, and listening skills. Conducted in German.  
Recommended: GER 313

GER 512. FOURTH-YEAR GERMAN. (3 Credits)  
Focus on development of German writing, speaking, and listening skills. Conducted in German.  
Recommended: GER 411 or GER 511

GER 513. FOURTH-YEAR GERMAN. (3 Credits)  
Focus on development of German writing, speaking, and listening skills. Conducted in German.  
Recommended: GER 412 or GER 512

GER 549. SELECTED TOPICS IN GERMAN LITERATURE. (3 Credits)  
May be repeated for credit when topic varies. Conducted in German.  
This course is repeatable for 9 credits.  
Recommended: 9 upper-division credits in German.

Hebrew

HEBR 111. INTRODUCTION TO HEBREW. (4 Credits)  
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in Hebrew. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 111, HEBR 112, HEBR 113.

HEBR 112. INTERMEDIATE HEBREW. (4 Credits)  
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with on prior training in Hebrew. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 111, HEBR 112, HEBR 113.  
Prerequisites: HEBR 111 with D- or better

HEBR 113. INTERMEDIATE HEBREW II. (4 Credits)  
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with on prior training in Hebrew. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 111, HEBR 112, HEBR 113.  
Prerequisites: HEBR 111 with D- or better and HEBR 112 [D-]

HEBR 211. SECOND-YEAR HEBREW I. (4 Credits)  
Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 211. Taught via Ecampus only.  
Prerequisites: HEBR 113 with D- or better

HEBR 212. SECOND-YEAR HEBREW II. (4 Credits)  
Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 211, HEBR 212, HEBR 213. Taught via Ecampus only.  
Prerequisites: HEBR 211 with D- or better

HEBR 213. SECOND-YEAR HEBREW III. (4 Credits)  
Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 211, HEBR 212, HEBR 213.  
Prerequisites: HEBR 212 with D or better

Italian

IT 111. FIRST-YEAR ITALIAN. (4 Credits)  
Development of listening comprehension, speaking, reading, and writing skills. Designed for students with no previous training in Italian. Native speakers of Italian will not receive credit for IT 111, IT 112, IT 113. Not offered every year.

IT 112. FIRST-YEAR ITALIAN. (4 Credits)  
Development of listening comprehension, speaking, reading, and writing skills. Designed for students with no previous training in Italian. Native speakers of Italian will not receive credit for IT 111, IT 112, IT 113. Not offered every year.  
Prerequisites: IT 111 with D- or better
IT 113. FIRST-YEAR ITALIAN. (4 Credits)
Development of listening comprehension, speaking, reading, and writing skills. Designed for students with no previous training in Italian. Native speakers of Italian will not receive credit for IT 111, IT 112, IT 113. Not offered every year.
Prerequisites: IT 112 with D- or better

IT 188. ITALIAN STUDIES, ITALIAN STUDY CENTER. (1-12 Credits)
May be repeated for credit when topic varies. Section 1: Topics, Italian language. Section 2: Practical work (exercises).
This course is repeatable for 99 credits.

IT 199. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 16 credits.

IT 211. SECOND-YEAR ITALIAN. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Native speakers of Italian will not receive credit for IT 211, IT 212, IT 213. Not offered every year.
Prerequisites: IT 113 with D- or better

IT 212. SECOND-YEAR ITALIAN. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Native speakers of Italian will not receive credit for IT 211, IT 212, IT 213. Not offered every year.
Prerequisites: IT 211 with D- or better

IT 213. SECOND-YEAR ITALIAN. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Native speakers of Italian will not receive credit for IT 211, IT 212 IT 213. Completion of IT 213 with a grade of C- or better satisfies BA requirement in foreign languages. Not offered every year.
Prerequisites: IT 212 with D- or better

IT 299. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 16 credits.

IT 331. ITALIAN CULTURE. (3 Credits)
An investigation of Italy through the wide-angle lens of social anthropology. Students will explore what is both known and unknown about Italy in its socio-political, broad cultural as well as regional, and media contexts (music, film, technology). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec.
Prerequisites: JPN 111 with D- or better

JPN 113. FIRST-YEAR JAPANESE. (4 Credits)
Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec.
Prerequisites: JPN 112 with D- or better

JPN 199. SPECIAL STUDIES: INTENSIVE JAPANESE. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 16 credits.

JPN 211. SECOND-YEAR JAPANESE. (4 Credits)
Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Lec/lab/rec.
Prerequisites: JPN 113 with D- or better

JPN 212. SECOND-YEAR JAPANESE. (4 Credits)
Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Lec/lab/rec.
Prerequisites: JPN 211 with D- or better

JPN 213. SECOND-YEAR JAPANESE. (4 Credits)
Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Completion of JPN 213 with a grade of C- or better satisfies BA requirement in foreign languages. Lec/rec.
Prerequisites: JPN 212 with D- or better

JPN 299. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 16 credits.

JPN 311. THIRD-YEAR JAPANESE. (3 Credits)
Continued development of oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/lab/rec.
Prerequisites: JPN 213 with C- or better or placement test
JPN 302. THIRD-YEAR JAPANESE. (3 Credits)
Continued development of oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/lab/rec.
Prerequisites: JPN 311 with C- or better or placement test

JPN 303. THIRD-YEAR JAPANESE. (3 Credits)
Continued development of oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/rec.
Recommended: JPN 312

JPN 329. SPECIAL TOPICS IN LANGUAGE, CULTURE, OR LITERATURE. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

JPN 345. MULTIMODAL LITERACIES: JAPANESE. (2 Credits)
Introduction to the analysis and production of multimodal literacies. Study of semiotic resources such as language and images across modalities such as film, manga, and social media. Required of all majors in World Languages and Cultures. Taught in Japanese. Has to be taken in conjunction with the lecture session in English.
Corequisites: WLC 345
Recommended: JPN 213

JPN 379. PROCTOR EXPERIENCE. (1-2 Credits)
Supervised practicum for advanced students, with assignment as proctor or tutor in lower-division Japanese courses. No credit may be used to satisfy requirements for a minor in Japanese. Graded P/N. This course is repeatable for 6 credits.

JPN 388. JAPANESE STUDIES, JAPANESE STUDY CENTER. (1-12 Credits)
May be repeated for credit when topic varies. This course is repeatable for 12 credits.

JPN 399. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

JPN 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

JPN 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

JPN 410. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.

JPN 411. FOURTH-YEAR JAPANESE. (3 Credits)
Designed to help students apply grammatical points and expressions that they have learned from the first through the third year. It also stresses further development of reading and writing skills. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: JPN 313 with C or better

JPN 412. FOURTH-YEAR JAPANESE. (3 Credits)
Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year.
Prerequisites: JPN 411 with C- or better

JPN 413. FOURTH-YEAR JAPANESE. (3 Credits)
Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year.
Prerequisites: JPN 412 with C- or better

JPN 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

JPN 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

Korean

KOR 111. FIRST-YEAR KOREAN. (4 Credits)
For students with no prior training in Korean. Basic language skills along with cultural understanding by introducing the history of Hangul, traditional holidays, games, songs, foods and drama. Provides the Korean alphabet (Hangul), basic vocabulary, grammar, listening, speaking, reading, and writing skills. KOR 213. FIRST-YEAR KOREAN. (4 Credits)
For students with no prior training in Korean. Basic language skills along with cultural understanding by introducing the history of Hangul, traditional holidays, games, songs, foods and drama. Provides the Korean alphabet (Hangul), basic vocabulary, grammar, listening, speaking, reading, and writing skills. Three areas of focus: (1) reading and writing the Korean alphabet; (2) basic colloquial expressions; and (3) cultural understanding.
Prerequisites: KOR 111 with D- or better

KOR 311. FIRST-YEAR KOREAN. (4 Credits)
Designed to increase fluency in listening, speaking, reading and writing skills through various topics that are relevant to students’ life; sports, health, experiences, housing. Enlarge vocabulary and knowledge of grammar and sentence structure with honorifics, adjectives, connectives, and comparatives. Discuss Korean culture and literature using folk tales.
Prerequisites: KOR 112 with D- or better

KOR 312. FIRST-YEAR KOREAN. (4 Credits)
Designed to increase fluency in listening, speaking, reading and writing skills through pragmatic topics necessary for survival in the target language culture. Topic-based lessons consist of model dialogues, narration, vocabulary, grammar and culture corresponding to the level of intermediate low (ACTFL).
Prerequisites: KOR 113 with D or better or Korean 113 with a score of 1

KOR 313. FIRST-YEAR KOREAN. (4 Credits)
Designed to increase fluency in listening, speaking, reading and writing skills through pragmatic topics necessary for survival in the target language culture. Topic-based lessons consist of model dialogues, narration, vocabulary, grammar, and culture corresponding to the level of Intermediate Mid (ACTFL). Students learn to describe favorite activities, feelings, foods, restaurants, fashions, colors, and physical appearances. Students also learn to engage in a conversation as well as to write compositions related to daily life, making recommendations, asking for and giving directions, making a telephone call, and writing a recipe.
Prerequisites: KOR 211 with D or better
LING 111. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE. (4 Credits)
Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence.
This course is repeatable for 12 credits.

LING 112. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE. (4 Credits)
Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence.
This course is repeatable for 12 credits.

LING 113. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE. (4 Credits)
Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence.
This course is repeatable for 12 credits.

LING 114. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE. (1-4 Credits)
LING 114, LING 115, and LING 116 provides context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language.
This course is repeatable for 12 credits.

LING 115. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE. (1-4 Credits)
LING 114, LING 115, and LING 116 provides context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language.
This course is repeatable for 12 credits.

LING 116. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE. (1-4 Credits)
LING 114, LING 115, and LING 116 provides context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language.
This course is repeatable for 12 credits.
LING 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

LING 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

LING 410. INTERNSHIP. (1-15 Credits)
This course is repeatable for 16 credits.

LING 451. GENERAL LINGUISTICS. (3 Credits)
Language systems; comparative philology; historical, descriptive, and structural linguistics; semantics; phonetics and phonemics. Not offered every year.
Recommended: 9 credits upper-division foreign language training

LING 499. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 16 credits.

LING 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

LING 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

LING 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

LING 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

LING 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

LING 509. PRACTICUM. (1-16 Credits)
This course is repeatable for 16 credits.

LING 510. INTERNSHIP. (1-15 Credits)
This course is repeatable for 16 credits.

LING 545. METHODS AND MATERIALS FOR SECOND LANGUAGE ACQUISITION. (4 Credits)
Historical and contemporary approaches to teaching and assessment in the second language classroom; emphasis on evaluating second language teaching methods and materials.

LING 551. GENERAL LINGUISTICS. (3 Credits)
Language systems; comparative philology; historical, descriptive, and structural linguistics; semantics; phonetics and phonemics. Not offered every year.
Recommended: 9 credits upper-division foreign language training

LING 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Queer Studies

QS 262. *INTRODUCTION TO QUEER STUDIES. (3 Credits)
Centering itself on activism and scholarship, this course examines homophobia’s and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as WGSS 262H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 262H, WGSS 262, WGSS 262H

QS 262H. *INTRODUCTION TO QUEER STUDIES. (3 Credits)
Centering itself on activism and scholarship, this course examines homophobia’s and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as WGSS 262H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 262, WGSS 262, WGSS 262H

QS 299. SPECIAL TOPICS. (3 Credits)
This course is repeatable for 9 credits.

QS 321. *QUEER POP CULTURE. (3 Credits)
Examines the concept of Queer popular culture through film, music, TV, image, and other mediums. Seeks to disrupt dominant discourses around gender and sexuality by centralizing women of color feminisms and queer of color critiques to analyze popular representations of gender, sexuality, race, class, disability, and other social locations. CROSSLISTED as WGSS 321. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: WGSS 321

QS 361. (RE)FRAMING RACE THROUGH FILM PRODUCTION. (4 Credits)
A critical engagement of ways race and ethnicity are treated in nonfiction short film as students produce their own short film as a means of challenging dominant racial representations and narratives. Requires a basic understanding of ways that notions about race and ethnicity combine with ideologies about gender, sexuality, ability, class, etc. to perpetuate unjust systems and institutions. Prior filmmaking experience is welcome but not required. CROSSLISTED as ES 361, WGSS 361, WLC 361.
Equivalent to: ES 361, WGSS 361, WLC 361

QS 362. *SERVING LGBTQ+ COMMUNITIES. (3 Credits)
Engages the ethics and responsibilities involved in serving LGBTQ+ communities in fields such as education, health, law, and social services for those entering and/or continuing professions in fields that historically underserve LGBTQ+ people. Topics include LGBTQ+ youth; LGBTQ+ elders; issues affecting LGBTQ+ people across their lifespans; approaches to cultural competency; violence against LGBTQ+ people, forms of oppression including heterosexism, homophobia, and transphobia; and LGBTQ+ community resilience. (Bacc Core Course) CROSSLISTED as WGSS 362.
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: WGSS 362

QS 364. *TRANSGENDER POLITICS. (3 Credits)
Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as WGSS 364.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 364H, WGSS 364, WGSS 364H

QS 364H. *TRANSGENDER POLITICS. (3 Credits)
Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as WGSS 364H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 364, WGSS 364, WGSS 364H
**QS 375. *ARTS AND SOCIAL JUSTICE.* (4 Credits)
Explores concepts of structural inequality, difference, power, and discrimination through a critical survey of arts activism. Students will think critically about art and artists which address a number of social issues in the United States, including race, ethnicity, class, gender, sexuality, immigration, and indigeneity. CROSSLISTED as ES 375, WGSS 375.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 375, WGSS 375

**QS 399. SPECIAL TOPICS IN QUEER STUDIES. (3 Credits)
This course is repeatable for 12 credits.

**QS 409. PRACTICUM: PROJECTS IN QUEER STUDIES. (1-12 Credits)
Capstone projects bring theory into practice through research, design, and implementation of a project that synthesizes and demonstrates learning in the Queer Studies program.
This course is repeatable for 12 credits.

**QS 431. *QUEER OF COLOR CRITIQUES.* (4 Credits)
*"Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) CROSSLISTED as ES 431 and WGSS 431.*
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 431, WGSS 431

**QS 432. *GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE.* (3 Credits)
A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women’s, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ART 432, WGSS 432

**QS 462. *QUEER THEORIES.* (4 Credits)
Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression, including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. (Bacc Core Course) CROSSLISTED as WGSS 462/WGSS 562.
Attributes: CPDC – Core, Pers, Cult Diversity
Equivalent to: WGSS 462

**QS 472. *INDIGENOUS TWO SPIRIT AND QUEER STUDIES.* (4 Credits)
*"Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 472, WGSS 472 (Writing Intensive Course)*
Attributes: CWIC – Core, Skills, WIC
Equivalent to: ES 472, WGSS 472
Recommended: QS 262 or ES 242 or WGSS 414

**QS 473. TRANSGENDER LIVES. (4 Credits)
With a particular focus on transgender people of color and transnational constructions of gender, this course will engage issues in the lives of Transgender people through autobiography, memoir, biography, poetry, and documentary film. CROSSLISTED as WGSS 473/WGSS 573.
Equivalent to: WGSS 473
Recommended: WGSS/QS 262, WGSS/QS 364

**QS 476. *TRANSNATIONAL SEXUALITIES.* (4 Credits)
Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, same-sex desires, queer transnational immigration and labor flows, sex industries and discourses of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. (Bacc Core Course) CROSSLISTED as WGSS 476/WGSS 576.
Attributes: CSGI – Core, Synth, Global Issues
Prerequisites: QS 262 with D- or better
Equivalent to: WGSS 476

**QS 477. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM. (4 Credits)
LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, WGSS 477/WGSS 577.
Equivalent to: ES 477, WGSS 477
Recommended: QS 262 and QS 462

**QS 499. SPECIAL TOPICS IN QUEER STUDIES. (4 Credits)
Topics in gay, lesbian, bisexual, transgender, and queer issues and scholarship. May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

**QS 524. TRANS/GENDER POLITICS. (4 Credits)
Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. CROSSLISTED as WGSS 524.
Equivalent to: WGSS 524

**QS 531. QUEER OF COLOR CRITIQUES. (4 Credits)
*"Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. CROSSLISTED as ES 531 and WGSS 531.*
Equivalent to: ES 531, WGSS 531

**QS 532. GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE. (3 Credits)
A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women’s, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. CROSSLISTED as ART 532, WGSS 532.
Equivalent to: ART 532, WGSS 532
QS 562. QUEER THEORIES. (4 Credits)
Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression, including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. CROSSLISTED as WGSS 462/WGSS 562.
Equivalent to: WGSS 562

QS 569. TOPICS IN JOTERIA STUDIES. (3 Credits)
A space for engaging with arts, activism and scholarship emerging from queer Latin@/Chicano@ experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as ES 569, SPAN 569, WGSS 569.
Equivalent to: ES 569, SPAN 569, WGSS 569
This course is repeatable for 6 credits.

QS 572. INDIGENOUS TWO-SPIRIT AND QUEER STUDIES. (4 Credits)
“Two-spirit” refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 572, WGSS 572.
Equivalent to: ES 572, WGSS 572
Recommended: QS 262 or ES 242 or WGSS 414 or WGSS 514

QS 573. TRANSGENDER LIVES. (4 Credits)
With a particular focus on transgender people of color and transnational constructions of gender, this course will engage issues in the lives of Transgender people through autobiography, memoir, biography, poetry, and documentary film. CROSSLISTED as WGSS 473/WGSS 573.
Equivalent to: WGSS 573
Recommended: WGSS/QS 262, WGSS/QS 364

QS 576. TRANSNATIONAL SEXUALITIES. (4 Credits)
Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBQT organizing, same-sex desires, queer transnational immigration and labor flows, sex industries and disclosures of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. CROSSLISTED as WGSS 476/WGSS 576.
Equivalent to: WGSS 576
Recommended: QS 262

QS 577. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM. (4 Credits)
LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, WGSS 477/WGSS 577.
Equivalent to: ES 577, WGSS 577
Recommended: QS 262 and QS 462

QS 599. SPECIAL TOPICS IN QUEER STUDIES. (4 Credits)
Topics in gay, lesbian, bisexual, transgender, and queer issues and scholarship. May be repeated for credit when topic varies. This course is repeatable for 12 credits.

Russian Courses
RUS 111. FIRST-YEAR RUSSIAN. (4 Credits)
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for RUS 111, RUS 112, RUS 113.

RUS 112. FIRST-YEAR RUSSIAN. (4 Credits)
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for RUS 111, RUS 112, RUS 113.
Prerequisites: RUS 111 with D- or better

RUS 113. FIRST-YEAR RUSSIAN. (4 Credits)
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for RUS 111, RUS 112, RUS 113.
Prerequisites: RUS 112 with D- or better

RUS 199. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

RUS 299. SPECIAL STUDIES. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

RUS 329. SPECIAL TOPICS IN LANGUAGE, CULTURE, AND/OR LITERATURE. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 16 credits.

RUS 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

RUS 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

RUS 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

RUS 410. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.

RUS 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

RUS 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

RUS 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

Spanish
SPAN 111. FIRST-YEAR SPANISH. (4 Credits)
Development of listening comprehension, speaking, reading, and writing skills. Native speakers and bilingual speakers will not receive credit for SPAN 111, SPAN 112, SPAN 113. Lec/rec.

SPAN 112. FIRST-YEAR SPANISH. (4 Credits)
Development of listening comprehension, speaking, reading, and writing skills. Native speakers and bilingual speakers may not receive credit for SPAN 111, SPAN 112, SPAN 113. Lec/rec.
Prerequisites: SPAN 111 (may be taken concurrently) with D- or better or placement test
SPAN 113. FIRST-YEAR SPANISH. (4 Credits)
Development of listening comprehension, speaking, reading, and writing skills. Native speakers and bilingual speakers may not receive credit for SPAN 111, SPAN 112, SPAN 113. Lec/rec.
Prerequisites: SPAN 112 with D- or better or placement test

SPAN 117. FIRST-YEAR SPANISH-COMPLETE SEQUENCE. (12 Credits)
Introduction to Spanish. Listening, speaking, reading, and writing skills developed. Students must take all twelve credits. Entire first-year sequence in eight weeks.
Equivalent to: SPAN 111, SPAN 112, SPAN 113

SPAN 188. HISPANIC STUDIES, HISPANIC STUDY CENTERS. (1-12 Credits)
Section 1: Topics, Hispanic language. Section 2: Practical work (exercises); Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.

SPAN 199. SPECIAL STUDIES. (1-3 Credits)
May be repeated for a maximum of 3 credits. This course is repeatable for 9 credits.

SPAN 211. SECOND-YEAR SPANISH. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Native speakers will not receive credit for SPAN 211, SPAN 212, SPAN 213.
Prerequisites: SPAN 113 with D- or better or placement test

SPAN 212. SECOND-YEAR SPANISH. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Native speakers may not receive credit for SPAN 211, SPAN 212, SPAN 213.
Prerequisites: SPAN 211 with D- or better or placement test

SPAN 213. SECOND-YEAR SPANISH. (4 Credits)
Further development of listening comprehension, speaking, reading, and writing skills. Native speakers may not receive credit for SPAN 211, SPAN 212, SPAN 213. Completion if SPAN 213 with a grade of C- or better satisfies BA requirement for foreign languages.
Prerequisites: SPAN 212 with D- or better or placement test

SPAN 214. SECOND-YEAR SPANISH FOR NATIVE SPEAKERS. (4 Credits)
Designed for native speakers who learned Spanish in a home environment. Introduction to written Spanish.

SPAN 215. SECOND-YEAR SPANISH FOR NATIVE SPEAKERS. (4 Credits)
Designed for native speakers who learned Spanish in a home environment. Introduction to written Spanish.
Recommended: SPAN 214

SPAN 216. SECOND-YEAR SPANISH FOR NATIVE SPEAKERS. (4 Credits)
Designed for native speakers who learned Spanish in a home environment. Introduction to written Spanish. Completion of SPAN 216 with a grade of C- or better satisfies BA requirement for foreign languages.
Recommended: SPAN 215

SPAN 217. SECOND-YEAR SPANISH-COMPLETE SEQUENCE. (12 Credits)
Intermediate Spanish. Listening, speaking, reading, and writing skills developed. Students must take all 12 credits. Entire second-year sequence in eight weeks.
Recommended: SPAN 113 or SPAN 117

SPAN 221. SPANISH FOR MEDICAL PROFESSIONS I. (4 Credits)
Provides students in health science and pre-professional disciplines with a working knowledge of Spanish used in health sciences and cultural competency needed to serve Latino populations.
Prerequisites: SPAN 113 with C- or better

SPAN 222. SPANISH FOR MEDICAL PROFESSIONS II. (4 Credits)
Provides students in health science and pre-professional disciplines with a working knowledge of Spanish used in health sciences and cultural competency needed to serve Latino populations.
Prerequisites: SPAN 221 with C- or better

SPAN 236. *CONTEMPORARY LATIN AMERICAN CULTURE. (3 Credits)
Students will examine the current social, political, economic and cultural status and experiences of Latinos/as in the U.S. related to patterns of (im)migration as well as sociohistorical and political events that have shaped U.S. Latino identities. In addition, the course will explore the current social, political, economic and cultural status and experiences of Latinos/as in different regions of the United States. (Taught in English) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity

SPAN 237. *U.S. LATINO/A IDENTITIES AND CULTURES. (3 Credits)
An introduction to past and contemporary experiences of Latinos/as in the U.S. related to patterns of (im)migration as well as sociohistorical and political events that have shaped U.S. Latino identities. In addition, the course will explore the current social, political, economic and cultural status and experiences of Latinos/as in different regions of the United States. (Taught in English) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity

SPAN 288. HISPANIC STUDIES, HISPANIC STUDY CENTERS. (1-12 Credits)
Section 1: Topics, Hispanic language; Section 2: Practical work (exercises); Section 3: Topics, Hispanic arts and letters; Section 4: Topics, Hispanic society.
This course is repeatable for 12 credits.

SPAN 299. SPECIAL STUDIES. (1-3 Credits)
This course is repeatable for 9 credits.

SPAN 311. ADVANCED SPANISH GRAMMAR. (3 Credits)
Students further develop language skills acquired in earlier courses while studying more complex structural aspects of the language through the application of grammar concepts in composition and other language tasks.
Prerequisites: SPAN 213 with C- or better or placement test
Equivalent to: SPAN 314

SPAN 312. INTERMEDIATE WRITING SKILLS. (3 Credits)
Focuses on written communication in Spanish. Authentic texts are used to identify writing processes and products and see how composition is informed by cultural considerations. Special attention will be paid to the author’s purpose and the distinctiveness of the target audience. Students will create original written works and reinforce oral communication skills through class discussions.
Prerequisites: SPAN 213 with C- or better or placement test
Equivalent to: SPAN 314

SPAN 313. SPANISH LANGUAGE THROUGH CULTURE. (3 Credits)
Development of Spanish language through an exploration of cultural products, perspectives and practices of Spanish-speaking communities around the world.
Equivalent to: SPAN 315

SPAN 314. THIRD-YEAR SPANISH FOR NATIVE SPEAKERS. (3 Credits)
This course is repeatable for 9 credits.
SPAN 315. THIRD-YEAR SPANISH FOR NATIVE SPEAKERS. (3 Credits)
Extensive practice in reading, writing, and speaking; refinement of spelling, grammar and vocabulary within a dynamic cultural context. Native speakers should take SPAN 314, SPAN 315, SPAN 316 instead of SPAN 311, SPAN 312, SPAN 313; credit is not allowed for both.
Equivalent to: SPAN 312
Recommended: SPAN 314

SPAN 316. THIRD-YEAR SPANISH FOR NATIVE SPEAKERS. (3 Credits)
Extensive practice in reading, writing, and speaking; refinement of spelling, grammar and vocabulary within a dynamic cultural context. Native speakers should take SPAN 314, SPAN 315, SPAN 316 instead of SPAN 311, SPAN 312, SPAN 313; credit is not allowed for both.
Equivalent to: SPAN 313
Recommended: SPAN 315

SPAN 317. DIRECTED READING AND WRITING IN SPANISH. (3 Credits)
Emphasis on reading comprehension and improving writing ability. Students will build on their language skills and cultural awareness using different forms of literary expression from the Spanish-speaking world.
Equivalent to: SPAN 327
Recommended: 9 credits of upper-division Spanish

SPAN 318. INTRODUCTION TO SPANISH LANGUAGE LITERATURE. (3 Credits)
Provides the literary background and analytical tools for students to discuss Spanish language literature with some depth and prepares students for more advanced literature courses. Some discussion of Latin American and Spanish history, politics and culture will provide a context for the readings.
Recommended: 9 credits of upper-division Spanish

SPAN 319. SPANISH FOR BUSINESS. (3 Credits)
Recommended: SPAN 312

SPAN 320. SPANISH CONVERSATION. (3 Credits)
Extensive listening and speaking practice in Spanish, and systematic contact with Latin culture. Emphasis on vocabulary, pronunciation, intonation, and comprehension. Native speakers of Spanish are not eligible to take this course. May be used to satisfy requirements for the major or minor.
Recommended: 6 credits of upper-division Spanish.

SPAN 327. MEXICAN-AMERICAN LITERATURE AND COMPREHENSION FOR SPANISH HERITAGE LANGUAGE LEARNERS. (3 Credits)
Combines the study of fiction, drama, and poetry in Spanish language produced by people of Mexican origin in what is today the United States, with intensive practice in the writing of formal Spanish. Students are encouraged to develop their independent thinking and analytical ability. Designed for students from a Spanish-speaking background.
Equivalent to: SPAN 317
Recommended: SPAN 316

SPAN 331. *THE CULTURES OF SPAIN AND PORTUGAL. (3 Credits)
Historical development of the cultures and societies of the Iberian Peninsula. Taught in Spanish. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 332. *THE CULTURES OF SPAIN AND PORTUGAL. (3 Credits)
Historical development of the cultures and societies of the Iberian Peninsula. Taught in Spanish. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 333. CULTURES OF SPAIN AND PORTUGAL. (3 Credits)
Historical development of the cultures and societies of today’s Iberian Peninsula. Taught in Spanish.
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 336. *LATIN AMERICAN CULTURE. (3 Credits)
Historical development of the cultures and societies of Latin America, with an emphasis on Spanish- and Portuguese-speaking peoples. Taught in Spanish. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 337. *LATIN AMERICAN CULTURE. (3 Credits)
Historical development of the cultures and societies of Latin America, with an emphasis on Spanish- and Portuguese-speaking peoples. Taught in Spanish. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 338. *LATIN AMERICAN CULTURE. (3 Credits)
Historical development of the cultures and societies of Latin America, with an emphasis on Spanish- and Portuguese-speaking peoples. Taught in Spanish. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 339. MEXICAN IMMIGRANT EXPERIENCE IN THE UNITED STATES. (3 Credits)
An interdisciplinary analysis of the immigration from Mexico to the United States. It will include discussions of literary, cultural and political accounts. Emphasis on the development of presentational communication skills in Spanish. Taught in Spanish.
Recommended: 12 credits from SPAN 314, SPAN 315, SPAN 316, SPAN 317, SPAN 318, SPAN 331, SPAN 332, SPAN 336, SPAN 337, SPAN 338.

SPAN 344. SELECTED TOPICS IN LITERATURE. (3 Credits)
Taught in Spanish. May be repeated for credit when topic varies. This course is repeatable for 9 credits.
Recommended: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 350. PHONETICS AND PRONUNCIATION. (3 Credits)
An exploration of the organs of speech and hearing, acoustic analysis, and transcription of native and learner Spanish speech samples.
Recommended: 3 credits of upper-division Spanish.
SPAN 351. HISPANIC LINGUISTICS. (3 Credits)
Recommended: SPAN 350

SPAN 379. PROCTOR EXPERIENCE. (1 Credit)
Supervised practicum for advanced students, with assignments as proctors or tutors in lower-division Spanish language courses. No more than 2 credits may be used to satisfy degree requirements for a major in Spanish; no credit may be used to satisfy requirements for a minor in Spanish. Graded P/N.
This course is repeatable for 3 credits.
Recommended: Completion of 21 upper-division credits in Spanish with a minimum 3.00 GPA.

SPAN 388. HISPANIC STUDIES, HISPANIC STUDY CENTERS. (1-12 Credits)
Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.
This course is repeatable for 12 credits.

SPAN 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 410. INTERNSHIP. (1-15 Credits)
This course is repeatable for 15 credits.

SPAN 411. SPECIALIZED GRAMMAR OR LINGUISTICS TOPICS. (3 Credits)
Students develop an in-depth knowledge of various linguistic aspects of Spanish, particularly in regard to problematic grammatical structures and the development of writing proficiency. The main focus is on integrating a thorough understanding of grammatical structures into writing using selected literary works as models. Students analyze their own linguistic progress and apply this meta-knowledge to their writing.
Recommended: 18 credits of upper-division Spanish.

SPAN 412. ADVANCED COMPOSITION. (3 Credits)
Emphasis on creative writing. Students will read and discuss a series of stories with the same theme, then write their own. The subjunctive and other advanced grammar topics will be reviewed and incorporated into the writing activities. Taught in Spanish.
Recommended: 18 credits of upper-division Spanish

SPAN 413. ADVANCED COMMUNICATION SKILLS. (3 Credits)
Contextualized exploration of skills outlined in the National Standards Project’s.
Recommended: 18 credits of upper-division Spanish

SPAN 435. SPECIAL TOPICS IN LATIN AMERICAN CULTURE. (3 Credits)
Historical and contemporary aspects of the cultures of Latin America. May include material relevant to Spain and U.S. Latinos. May be repeated for credit when topic varies. This course is repeatable for 9 credits.
Recommended: 18 credits of upper-division Spanish

SPAN 438. *SELECTED TOPICS IN LUSO-HISPANIC CULTURE. (3 Credits)
Contemporary aspects of the cultures of Spain, Portugal, or Latin America with a cross-cultural perspective. Topics and language of instruction vary. May be repeated for credit when topic varies. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 9 credits.
Recommended: Completion of 6 credits from SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338.

SPAN 439. TOPICS IN MEXICAN CULTURE AS EVIDENCED THROUGH MEXICAN FILM. (3 Credits)
Critical analysis and evaluation of films as cultural texts that open up a window into Mexican society. Movies with strong sexual content, explicit violence, language, and/or drug use will be viewed in the class. Taught in Spanish with some readings in English. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 9 credits.
Recommended: Completion of 12 credits from SPAN 316, SPAN 317, SPAN 318, SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338, SPAN 339, SPAN 411, SPAN 412, SPAN 413 with a minimum grade of B-

SPAN 441. CONTEMPORARY SHORT STORY. (3 Credits)
An exploration and comparison of the short story in its various manifestations across the Spanish-speaking world in the 20th and 21st centuries. Themes such as identity, discrimination, class conflict, language, power, resistance, and marginalization will be analyzed within the socio-historical contexts in which the literary works were created.
Recommended: At least 12 credits of upper-division Spanish.

SPAN 444. SELECTED TOPICS IN THE LITERATURE OF SPAIN. (3 Credits)
Representative Spanish prose, poetry, and drama, with an emphasis on the 19th and 20th centuries. Taught in Spanish. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 12 credits.
Recommended: Completion of 21 upper-division credits in Spanish.

SPAN 445. SELECTED TOPICS IN THE LITERATURE OF LATIN AMERICA. (3 Credits)
Representative prose, poetry, and drama of Spanish America and/or Brazil, with an emphasis on the mid-19th century to the present. Topics and language of instruction may vary. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for 18 credits.
Recommended: Completion of 21 upper-division credits in Spanish.

SPAN 446. RECENT LATIN AMERICAN LITERATURE. (3 Credits)
Recent fiction that goes beyond Magical Realism. Discussion includes literary techniques, as well as Latin American history, politics and cultural values. Taught in Spanish.
Recommended: Completion of 21 upper-division credits in Spanish.

SPAN 447. MEXICAN WOMEN WRITERS. (3 Credits)
Fiction by contemporary Mexican women, emphasizing how the writing reflects the authors’ lives, as well as Mexican history, politics and cultural values. Taught in Spanish.
Recommended: Completion of 21 upper-division credits of Spanish.
SPAN 448. LATIN AMERICAN GREAT WORKS. (3 Credits)
Major works by Latin American writers, concentrating on literary style and technique, as well as Latin American history, politics and culture. Taught in Spanish.
Recommended: Completion of 21 upper-division credits of Spanish.

SPAN 453. SPANISH SOCIOLINGUISTICS. (3 Credits)
Provides a foundation of sociolinguistic theory from which various topics can be analyzed, discussed and applied to language situations that are specific to Spanish. These include language contact, Spanish varieties, language policy, and language attitudes. All topics are presented within the context of speech communities and the external and internal variables that affect these communities.
Prerequisites: SPAN 350 with C- or better

SPAN 455. INTRODUCTION TO SPANISH TRANSLATION. (3 Credits)
Combines beginning translation theory with hands-on practice using a variety of activities from several areas of professional specialization. Includes a brief introduction to simultaneous interpretation as it is done in professional conference or broadcast media settings. Participants must be highly proficient in both English and Spanish.
Recommended: 12 credits of upper-division Spanish.

SPAN 456. SPANISH IN THE UNITED STATES. (3 Credits)
Provides a foundation for the study of Spanish in the United States. Focuses on the diverse identities of Latino/as and Spanish speakers as they define what it means to be bilingual locally, regionally, and nationally. Spanish and Spanish-English bilingualism will be studied from critical sociolinguistic, historical and political perspectives.
Prerequisites: SPAN 350 with C- or better

SPAN 462. FIFTH-YEAR SPANISH. (3 Credits)
Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing.
Recommended: SPAN 461

SPAN 470. *ADVANCED SPANISH COORDINATED STUDIES. (1-30 Credits)
Interdisciplinary examination of a topic related to points of contact between Spanish- and English-speaking populations in Oregon and beyond. Includes the study of literature, culture, language skills, and a service-learning component. Constitutes a full-time course load. Taught in Spanish. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
This course is repeatable for 30 credits.

SPAN 488. HISPANIC STUDIES, HISPANIC STUDY CENTERS. (1-12 Credits)
Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.
This course is repeatable for 12 credits.

SPAN 499. SPECIAL TOPICS. (1-16 Credits)
May be repeated for credit when topic varies. Not offered every year.
This course is repeatable for 99 credits.

SPAN 501. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 502. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

SPAN 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 506. SPECIAL PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 507. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 508. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

SPAN 510. INTERNSHIP. (1-15 Credits)
(See SPAN 410 for description.)
This course is repeatable for 15 credits.

SPAN 511. SPECIALIZED GRAMMAR OR LINGUISTICS TOPICS. (3 Credits)
Students develop an in-depth knowledge of various linguistic aspects of Spanish, particularly in regard to problematic grammatical structures and the development of writing proficiency. The main focus is on integrating a thorough understanding of grammatical structures into writing using selected literary works as models. Students analyze their own linguistic progress and apply this meta-knowledge to their writing.
Recommended: 18 credits of upper-division Spanish.

SPAN 512. ADVANCED COMPOSITION. (3 Credits)
Emphasis on creative writing. Students will read and discuss a series of stories with the same theme, then write their own. The subjunctive and other advanced grammar topics will be reviewed and incorporated into the writing activities. Taught in Spanish.
Recommended: 18 credits of upper-division Spanish

SPAN 513. ADVANCED COMMUNICATION SKILLS. (3 Credits)
Contextualized exploration of skills outlined in the National Standards Project's.
Recommended: 18 credits of upper-division Spanish

SPAN 535. SPECIAL TOPICS IN LATIN AMERICAN CULTURE. (3 Credits)
Historical and contemporary aspects of the cultures of Latin America. May include material relevant to Spain and U.S. Latinos. May be repeated for credit when topic varies.
This course is repeatable for 9 credits.

SPAN 538. SELECTED TOPICS IN LUSO-HISPANIC CULTURE. (3 Credits)
Contemporary aspects of the cultures of Spain, Portugal, or Latin America with a cross-cultural perspective. Topics and language of instruction vary. Not offered every year. May be repeated for credit when topic varies.
This course is repeatable for 9 credits.

SPAN 543. SELECTED TOPICS IN THE LITERATURE OF SPAIN. (3 Credits)
Representative Spanish prose, poetry, and drama, with an emphasis on the 19th and 20th centuries. Taught in Spanish. Not offered every year. May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

SPAN 544. SELECTED TOPICS IN THE LITERATURE OF SPAIN. (3 Credits)
Representative Spanish prose, poetry, and drama, with an emphasis on the 19th and 20th centuries. Taught in Spanish. Not offered every year. May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

SPAN 545. SELECTED TOPICS IN THE LITERATURE OF LATIN AMERICA. (3 Credits)
Representative prose, poetry, and drama of Spanish America and/or Brazil, with an emphasis on the mid-19th century to the present. Topics and language of instruction may vary. Not offered every year. May be repeated for credit when topic varies.
This course is repeatable for 18 credits.
Recommended: Completion of 21 upper-division credits in Spanish.
SPAN 546. RECENT LATIN AMERICAN LITERATURE. (3 Credits)
Recent fiction that goes beyond Magical Realism. Discussion includes literary techniques, as well as Latin American history, politics and cultural values. Taught in Spanish.
Recommended: Completion of 21 upper-division credits in Spanish.

SPAN 547. MEXICAN WOMEN WRITERS. (3 Credits)
Fiction by contemporary Mexican women, emphasizing how the writing reflects the authors’ lives, as well as Mexican history, politics and cultural values. Taught in Spanish.
Recommended: 21 upper-division credits of Spanish.

SPAN 548. LATIN AMERICAN GREAT WORKS. (3 Credits)
Major works by Latin American writers, concentrating on literary style and technique, as well as Latin American history, politics and culture. Taught in Spanish.
Recommended: 21 upper-division credits of Spanish.

SPAN 552. INTRODUCTION TO SPANISH SOCIOLINGUISTICS. (3 Credits)
Provides a foundation of sociolinguistic theory in order to analyze, discuss and apply the theory to Spanish language situations, such as language contact, Spanish varieties, language politics, and language attitudes; all within the context of a speech community and the external and internal variables that affect it.

SPAN 553. SPANISH SOCIOLINGUISTICS. (3 Credits)
Provides a foundation of sociolinguistic theory from which various topics can be analyzed, discussed and applied to language situations that are specific to Spanish. These include language contact, Spanish varieties, language policy, and language attitudes. All topics are presented within the context of speech communities and the external and internal variables that affect these communities.
Recommended: SPAN 350

SPAN 555. INTRODUCTION TO SPANISH TRANSLATION. (3 Credits)
Combines beginning translation theory with hands-on practice using a variety of activities from several areas of professional specialization. Includes a brief introduction to simultaneous interpretation as it is done in professional conference or broadcast media settings. Participants must be highly proficient in both English and Spanish.
Recommended: 12 credits of upper-division Spanish.

SPAN 556. SPANISH IN THE UNITED STATES. (3 Credits)
Provides a foundation for the study of Spanish in the United States. Focuses on the diverse identities of Latino/as and Spanish speakers as they define what it means to be bilingual locally, regionally, and nationally. Spanish and Spanish-English bilingualism will be studied from critical sociolinguistic, historical and political perspectives.
Recommended: SPAN 350

SPAN 561. FIFTH-YEAR SPANISH. (3 Credits)
Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing.
Recommended: SPAN 413

SPAN 562. FIFTH-YEAR SPANISH. (3 Credits)
Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing.
Recommended: SPAN 561

SPAN 563. FIFTH-YEAR SPANISH. (3 Credits)
Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing.
Recommended: SPAN 562

SPAN 569. TOPICS IN JOTERIA STUDIES. (3 Credits)
A space for engaging with arts, activism and scholarship emerging from queer Latin@/Chican@ experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as ES 569, QS 569, WGSS 569
Equivalent to: ES 569, QS 569, WGSS 569
This course is repeatable for 6 credits.

SPAN 570. GRADUATE SPANISH COORDINATED STUDIES. (1-15 Credits)
An intensive, team-taught course in which learners engage in advanced exploration of issues of importance to Spanish-speaking communities in Oregon and facilitate the learning of undergraduate native speaker and second language students. Topics change regularly. The course addresses all communicative areas (reading, writing, speaking and listening) and includes content in the areas of literature, linguistics, culture, civic engagement, and service-learning. Successful completion of the full 15 credits with a grade of B or higher meets requirements for the graduate minor in Contemporary Hispanic Studies.
Equivalent to: SPAN 510, SPAN 538, SPAN 545, SPAN 546, SPAN 562, SPAN 563
This course is repeatable for 30 credits.
Recommended: SPAN 599

SPAN 588. HISPANIC STUDIES, HISPANIC STUDY CENTERS. (1-12 Credits)
Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.

SPAN 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 99 credits.

SPAN 808. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

Women, Gender, and Sexuality Studies

WGSS 110. *GENDER, RACE, AND POP CULTURE. (3 Credits)
Introduces students to the critical analysis of mass media and representations of women, gender, sexuality, and race in popular culture. Topics vary from term to term and may include the entertainment industry, advertising, music, literature, the internet and technology. May be repeated for credit when topic varies. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
This course is repeatable for 9 credits.

WGSS 111. *FEMINIST PERSPECTIVES ON CURRENT EVENTS. (3 Credits)
Introduction to feminist analysis through the examination of current events and their relation to gender, sexuality, race, ethnicity, nationality, religion, class, age, and ability. Topics vary from term to term and may include issues related to politics, social movements, education, the workplace, science and technology, the environment, globalization, arts and culture, and the media. May be repeated for credit when topic varies. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
This course is repeatable for 9 credits.
WGSS 199. SPECIAL STUDIES. (1-3 Credits)
Special topics of contemporary relevance to research of women and gender role issues. For students who seek an elementary introduction to a specific realm of women, gender, and sexuality studies. May be repeated for credit when topic varies.
Equivalent to: WS 199
This course is repeatable for 9 credits.

WGSS 223. *INTRODUCTION TO WOMEN, GENDER, AND SEXUALITY STUDIES. (3 Credits)
Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: WGSS 223H, WS 223, WS 223H

WGSS 223H. *INTRODUCTION TO WOMEN, GENDER, AND SEXUALITY STUDIES. (3 Credits)
Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: WGSS 223, WS 223, WS 223H

WGSS 224. *WOMEN: PERSONAL AND SOCIAL CHANGE. (3 Credits)
Examines the way the questioning of traditional gender roles and their accompanying power structures can lead to change in women's personal and public lives. Explores women's heritage and contributions and focuses on issues of self-growth and social movements for change. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: WS 224

WGSS 230. *WOMEN IN THE MOVIES. (3 Credits)
Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: WGSS 230H, WS 230

WGSS 230H. *WOMEN IN THE MOVIES. (3 Credits)
Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 230

WGSS 235. *WOMEN IN WORLD CINEMA. (3 Credits)
Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: WGSS 235H, WS 235

WGSS 235H. *WOMEN IN WORLD CINEMA. (3 Credits)
Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: WS 235H

WGSS 240. *GENDER AND SPORT. (3 Credits)
Focuses on sport as a gendered institution. Drawing from cultural, psychosocial, and political perspectives, the course examines intersections of gender with age, sexual orientation, social class, gender identity, race and ethnicity and politics. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: WGSS 240H, WS 240

WGSS 240H. *GENDER AND SPORT. (3 Credits)
Focuses on sport as a gendered institution. Drawing from cultural, psychosocial, and political perspectives, the course examines intersections of gender with age, sexual orientation, social class, gender identity, race and ethnicity and politics. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: WGSS 240

WGSS 242. *INTRODUCTION TO QUEER STUDIES. (3 Credits)
Centering itself on activism and scholarship, this course examines homophobia’s and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSTLISTED AS QS 262.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 262, QS 262H, WGSS 262H

WGSS 262H. *INTRODUCTION TO QUEER STUDIES. (3 Credits)
Centering itself on activism and scholarship, this course examines homophobia’s and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSTLISTED AS QS 262H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 262, QS 262H, WGSS 262

WGSS 270. *RESISTING GENDER VIOLENCE. (3 Credits)
Addresses issues of domestic violence, rape, dating violence, as well as contemporary social debates about pornography and the media's impact on violence in society, which includes a global perspective. Course focuses on individual and collective practices resisting gender violence. (Bacc Core Course) (SS)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: WS 270

WGSS 280. *WOMEN WORLDWIDE. (3 Credits)
Focuses on women's experiences throughout the world and examines women's issues and status cross-culturally. (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity
Equivalent to: WS 280H, WS 280
WGSS 280H. *WOMEN WORLDWIDE. (3 Credits)
Focuses on women’s experiences throughout the world and examines women’s issues and status cross-culturally. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: WGSS 280, WS 280, WS 280H

WGSS 295. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, PHL 295.
Attributes: CPGA – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: ENG 295, ENG 295H, PHL 295, PHL 295H, WS 295H

WGSS 295H. *FEMINISM AND THE BIBLE. (3 Credits)
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, ENG 295H, PHL 295, PHL 295H.
Attributes: CPGA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: ENG 295, ENG 295H, PHL 295, PHL 295H, WS 295H

WGSS 312. *GLOBAL EXPERIENCE: WESTERN CULTURE. (3 Credits)
Engagement in a study abroad experience in Western Europe with an emphasis on transnational, queer, and critical race feminist analysis (minimum of 7days). (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
This course is repeatable for 12 credits.

WGSS 299. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES. (1-6 Credits)
Current topics related to women, gender and sexuality. Description and analysis of different realms of knowledge about gender issues.
Equivalent to: WS 299
This course is repeatable for 12 credits.

WGSS 313. *GLOB EXPER: CONTEMP GLOB ISSU. (3 Credits)
Engagement in a study abroad experience with an emphasis on transnational, queer, and critical race feminist analysis of critical global issues (minimum of 7days).
Attributes: CSGI – Core, Synth, Global Issues
This course is repeatable for 12 credits.

WGSS 319. *FEMINIST DECOLONIZING METHODOLOGIES: SOCIAL JUSTICE RESEARCH. (3 Credits)
Examines traditional scientific methods through a feminist philosophy of science lens that incorporates critiques of the racialized and gendered origins of modern science. Second, it introduces the breadth of feminist research methods associated with social justice research.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisites: WGSS 223 with D- or better or WGSS 223H with D- or better

WGSS 320. *GENDER AND TECHNOLOGY. (3 Credits)
Explores women’s contributions and focuses in technology fields. Analyzes gendered nature of technology. Theory and practice of technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: WS 320

WGSS 321. *QUEER POP CULTURE. (3 Credits)
Examines the concept of Queer popular culture through film, music, TV, image, and other mediums. Seeks to disrupt dominant discourses around gender and sexuality by centralizing women of color feminisms and queer of color critiques to analyze popular representations of gender, sexuality, race, class, disability, and other social locations. CROSSLISTED as QS 321. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: QS 321

WGSS 324. *FEMINIST ACTIVISMS. (3 Credits)
Addresses the breadth of feminist social justice activism through a focus on collective movements for social change as well as individual and community resistance. In exploring relationships between feminist theories and practice, students are encouraged to vision and practice a variety of feminist activism. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst

WGSS 325. *DISNEY: GENDER, RACE, EMPIRE. (3 Credits)
Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 325H, WS 325

WGSS 325H. *DISNEY: GENDER, RACE, EMPIRE. (3 Credits)
Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 325

WGSS 340. *GENDER AND SCIENCE. (3 Credits)
Analyses the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WGSS 340H, WS 340

WGSS 340H. *GENDER AND SCIENCE. (3 Credits)
Analyses the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. (SS) (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; LACS – Liberal Arts Social Core
Equivalent to: WGSS 340
WGSS 350. *POLITICS OF MOTHERHOOD IN A GLOBAL CONTEXT. (3 Credits)
Introduces students to the politics of motherhood in global contexts, focusing on politics of transnational adoption; motherhood, surrogacy, and biotechnologies; effects of globalization on mothering across borders; mothering in the global welfare state; movements for reproductive justice; and transnational representations of motherhood. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: WS 350

WGSS 360. *MEN AND MASCULINITIES IN A GLOBAL CONTEXT. (3 Credits)
Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written and creative work. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: WGSS 360H, WS 360

WGSS 360H. *MEN AND MASCULINITIES. (3 Credits)
Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written and creative work. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: WGSS 360, WS 360

WGSS 361. (RE)FRAMING RACE THROUGH FILM PRODUCTION. (4 Credits)
A critical engagement of ways race and ethnicity are treated in nonfiction short film as students produce their own short film as a means of challenging dominant racial representations and narratives. Requires a basic understanding of ways that notions about race and ethnicity combine with ideologies about gender, sexuality, ability, class, etc. to perpetuate unjust systems and institutions. Prior filmmaking experience is welcome but not required. CROSSLISTED as ES 361, QS 361, WLC 361.
Equivalent to: ES 361, QS 361, WLC 361

WGSS 362. *SERVING LGBTQ+ COMMUNITIES. (3 Credits)
Engages the ethics and responsibilities involved in serving LGBTQ+ communities in fields such as education, health, law, and social services for those entering and/or continuing professions in fields that historically underserve LGBTQ+ people. Topics include LGBTQ+ youth; LGBTQ+ elders; issues affecting LGBTQ+ people across their lifespan; approaches to cultural competency; violence against LGBTQ+ people, forms of oppression including heterosexism, homophobia, and transphobia; and LGBTQ+ community resilience. (Bacc Core Course) CROSSLISTED as QS 362.
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: QS 362

WGSS 364. *TRANSGENDER POLITICS. (3 Credits)
Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as QS 364.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 364, QS 364H, WGSS 364H

WGSS 364H. *TRANSGENDER POLITICS. (3 Credits)
Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as QS 364H.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: QS 364, QS 364H, WGSS 364

WGSS 373. APPROACHES TO SOCIAL JUSTICE. (3 Credits)
Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ANTH 373, ES 373, WLC 373.
Equivalent to: ANTH 373, ES 373, WLC 373

WGSS 375. *ARTS AND SOCIAL JUSTICE. (4 Credits)
Explores concepts of structural inequality, difference, power, and discrimination through a critical survey of arts activism. Students will think critically about artwork and artists which address a number of social issues in the United States, including race, ethnicity, class, gender, sexuality, immigration, and indigeneity. CROSSLISTED as ES 375, QS 375.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 375, QS 375

WGSS 378. *RELIGION AND GENDER: A GLOBAL PERSPECTIVE. (4 Credits)
Introduces students to the academic study of religion, as well as the academic study of gender. In order to offer a global perspective, we will read a series of case studies that deal with the religion as a gendered experience. Students will produce two essays, one of which will be based on independent research. (Bacc Core Course) CROSSLISTED as HST 378 and REL 378.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: HST 378, REL 378

WGSS 380. *MUSLIM WOMEN. (3 Credits)
Examines the lives and experiences of Muslim women in Islamic communities around the world from a variety of perspectives in order to highlight issues significant for contemporary Muslim women: family, education, work, politics, health, marriage, divorce, war, and violence. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: WGSS 380H

WGSS 399. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES. (1-6 Credits)
Current topics in women, gender, and sexuality. May be repeated for credit when topic varies.
Equivalent to: WGSS 399H, WS 399
This course is repeatable for 12 credits.

WGSS 399H. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES. (1-6 Credits)
Current topics in women, gender, and sexuality. May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: WGSS 399, WS 399, WS 399H
This course is repeatable for 12 credits.

WGSS 402. INDEPENDENT STUDY. (1-16 Credits)
Equivalent to: WS 402
This course is repeatable for 16 credits.
WGSS 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

WGSS 407. SEMINAR. (3 Credits)
Equivalent to: WS 407
This course is repeatable for 99 credits.

WGSS 409. PRACTICUM. (1-12 Credits)
This course is repeatable for 12 credits.

WGSS 410. INTERNSHIP. (1-16 Credits)
The internship experience provides the opportunity to gain experience within an off-campus private, public, or community agency or organization which has as one of its goals the improvement of the status of women in society. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the WGSS program. Only 6 credits will count toward the Women, Gender, and Sexuality Studies major.
Equivalent to: WS 410
This course is repeatable for 16 credits.

WGSS 414. *SYSTEMS OF OPPRESSION IN WOMEN'S LIVES. (4 Credits)
Explores the ways different systems of oppression and discrimination impact women's lives. Examines sexism, classism, racism, and anti-Jewish oppression, as well as discrimination against queer women, older women, and those who differ in ability and appearance. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACS – Liberal Arts Social Core
Prerequisites: WS 223 with D- or better or WS 223H with D- or better
Equivalent to: WS 414H

WGSS 416. THEORIES OF FEMINISM. (4 Credits)
Explores feminist conceptions about the nature of the world, women’s reality and visions for change. Analyzes major issues raised by the women’s movement and the development of feminist ideas, as well as provides a critical examination of feminist thought and different theories which comprise it.
Prerequisites: WS 223 with D- or better or WS 223H with D- or better or WS 224 with D- or better or WGSS 223 with D- or better or WGSS 223H with D- or better or WS 224 with D- or better
Equivalent to: WS 416

WGSS 417. FEMINIST PHILOSOPHIES. (3 Credits)
Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues, such as rape and pornography. CROSSLISTED as PHL 417/PHL 517.
Equivalent to: WS 417

WGSS 418. FEMINIST RESEARCH METHODS. (4 Credits)
Introduces feminist research methods associated with research design, analysis, and interpretation. It utilizes feminist social justice frameworks and focuses on in-depth interviewing and focus groups, oral histories, ethnography, and visual and textual analysis, as well as survey design and community-based participatory research.
Prerequisites: WGSS 414 with C- or better

WGSS 430. WOMEN OF COLOR FEMINISMS. (4 Credits)
Explores the contemporary experiences of women of color, as well as the theoretical and practical frameworks of women of color feminisms. Analyzes key themes in women of color feminisms, including politics of representation, multiple forms of state and interpersonal violence, intersecting forms of oppression, economic justice, reproductive justice, and strategies of resistance.
Prerequisites: WS 223 with D- or better or WS 223H with D- or better or WGSS 223 with D- or better or WGSS 223H with D- or better
Equivalent to: WS 430

WGSS 431. *QUEER OF COLOR CRITIQUES. (4 Credits)
“Queer of color critiques” refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) CROSSLISTED as ES 431 and QS 431.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ES 431, QS 431

WGSS 432. *GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE. (3 Credits)
A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women’s, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. (Bacc Core Course) CROSSLISTED as ART 432, QS 432.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ART 432, QS 432

WGSS 440. *WOMEN AND NATURAL RESOURCES. (3 Credits)
Explores the relationship between women and natural resources. In particular, the course examines the roles of policy, technology, culture, and management in women’s use and control of natural resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: WGSS 440H, WS 440

WGSS 440H. *WOMEN AND NATURAL RESOURCES. (3 Credits)
Explores the relationship between women and natural resources. In particular, the course examines the roles of policy, technology, culture, and management in women’s use and control of natural resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: WGSS 440

WGSS 450. ECOFEMINISM. (3 Credits)
Focuses on the ecological and feminist principles that mediate humanity’s relationship with nature.
Equivalent to: WS 450
WGSS 460. *SEXUALITIES, FEMINISMS, WOMEN. (4 Credits)
Explores the historical, theoretical, and political dimensions of female sexuality. The course also examines the basic assumptions about the meaning of gendered sexuality; how it has been shaped and controlled, and why women's sexuality has been/is a source of both women's liberation and subjugation. In addition, the course incorporates Queer and Trans* theories about gendered/women's sexualities. (SS) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACS – Liberal Arts Social Core
Prerequisites: WGSS 223 with D- or better or WGSS 223H with D- or better or WGSS 224 with D- or better
Equivalent to: WS 460

WGSS 462. *QUEER THEORIES. (4 Credits)
Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. (Bacc Core Course) CROSSLISTED as QS 462/QS 562.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: QS 462, WS 462

WGSS 463. *GLOBAL SEX WORK AND TRAFFICKING. (3 Credits)
Examination of sex work and trafficking, cross culturally drawing upon case studies from Africa, Asia, the Americas, and Europe. It explores legal and regulatory debates, diversity of sex work-related experiences, and sex work-related social activism to uncover the gendered intersections of power and privilege from a global perspective. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Prerequisites: WGSS 223 with D- or better or WS 223 with D- or better or WGSS 224 with D- or better or WS 224 with D- or better

WGSS 465. WOMEN, WEIGHT, AND BODY IMAGE. (4 Credits)
Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, and government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems oppression including sexism, racism, classism, heterosexism, ableism, and ageism. CROSSLISTED as PSY 465/PSY 565.
Equivalent to: PSY 462

WGSS 466. *FAT STUDIES. (4 Credits)
Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as PSY 466/PSY 566 (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisites: WS 223 with D- or better or WS 223H with D- or better or WS 224 with D- or better or WGSS 240 with D- or better or WGSS 262 with D- or better or WGSS 262H with D- or better or WGSS 270 with D- or better or WGSS 280 with D- or better or WGSS 280H with D- or better or WGSS 321 with D- or better or WGSS 325 with D- or better or WGSS 325H with D- or better or WGSS 340 with D- or better or WGSS 340H with D- or better or WGSS 350 with D- or better or WS 224 with D- or better or WS 224 with D- or better or WS 224 with D- or better or WS 224 with D- or better
Equivalent to: WS 466

WGSS 472. *INDIGENOUS TWO-SPIRIT AND QUEER STUDIES. (4 Credits)
“Two-spirit” refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 472, QS 472.
Attributes: CWIC – Core, Skills, WIC
Equivalent to: ES 472, QS 472
Recommended: WS 262 or ES 242 or WGSS 414

WGSS 473. TRANSGENDER LIVES. (4 Credits)
With a particular focus on transgender people of color and transnational constructions of gender, this course will engage issues in the lives of Transgender people through autobiography, memoir, biography, poetry, and documentary film. CROSSLISTED as QS 473/QS 573.
Equivalent to: QS 473
Recommended: WS 262, WGSS/QS 262, WGSS/QS 364

WGSS 476. *TRANSNATIONAL SEXUALITIES. (4 Credits)
Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, same-sex desires, queer transnational immigration and labor flows, sex industries and discourses of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. (Bacc Core Course) CROSSLISTED as QS 476/QS 576.
Attributes: CSGI – Core, Synth, Global Issues
Prerequisites: WS 262 with D- or better
Equivalent to: QS 476

WGSS 477. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM. (4 Credits)
LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, QS 477/QS 577.
Equivalent to: ES 477, QS 477
Recommended: WS 262 and QS 464
WGSS 480. *GENDER AND TRANSNATIONAL ACTIVISMS. (3 Credits)
Focuses on social constructions of gender in global context. It explores the comparative realities of various gendered struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminist activism. (NC) (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity; CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Prerequisites: WGSS 223 with D- or better or WGSS 223H with D- or better or WGSS 224 with D- or better
Equivalent to: WGSS 480H, WS 480

WGSS 480H. *GENDER AND TRANSNATIONAL ACTIVISMS. (3 Credits)
Focuses on social constructions of gender in global context. It explores the comparative realities of various gendered struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminist activism. (NC) (Bacc Core Course)
Attributes: CPDP – Core, Pers, Cult Diversity; CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator; LACN – Liberal Arts Non-Western Core
Prerequisites: WS 223 with D- or better or WS 223H with D- or better or WS 224 with D- or better or WGSS 223 with D- or better or WGSS 223H with D- or better or WGSS 224 with D- or better
Equivalent to: WGSS 480

WGSS 482. GLOBAL PERSPECTIVES ON WOMEN'S HEALTH. (4 Credits)
Women's health issues are examined from a global perspective in the context of a woman's life and through a feminist political lens. Central to our discussions will be an analysis of the interplay among race, class, and gender in shaping particular health care outcomes. The course stresses the potential for women's agency and autonomy with respect to improving their health and environments.
Equivalent to: WS 482

WGSS 483. RACE, GENDER, AND HEALTH JUSTICE. (4 Credits)
Based on a social justice framework, this course explores the intersections of race, gender, ethnicity, disability and sexuality to provide a deeper understanding of how these factors shape health inequities in diverse communities nationally and globally.

WGSS 485. CAPSTONE IN SOCIAL JUSTICE. (2 Credits)
Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. CROSSLISTED as ANTH 485, ES 485, WLC 485.
Prerequisites: (ANTH 373 with D- or better or ES 373 with D- or better or WGSS 373 with D- or better or WLC 373 with D- or better) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-])
Equivalent to: ANTH 485, ES 485, WLC 485
This course is repeatable for 4 credits.

WGSS 486. GLOBAL EXPERIENCE I. (1 Credit)
Prepares students to participate in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.
Equivalent to: WS 486

WGSS 487. GLOBAL EXPERIENCE II. (1 Credit)
Engages students in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.
Prerequisites: WS 486 with D- or better or WS 586 with D- or better or WGSS 486 with D- or better or WGSS 586 with D- or better
Equivalent to: WS 487

WGSS 488. GLOBAL EXPERIENCE III. (1 Credit)
Students reflect on their short-term study abroad experience by engaging in-depth transnational feminist analysis of particular aspects of the study abroad experience.
Prerequisites: WS 486 with D- or better or WS 487 with D- or better or WGSS 486 with D- or better or WGSS 487 with D- or better
Equivalent to: WS 488

WGSS 490. SELF-ESTEEM AND PERSONAL POWER. (3 Credits)
Explores ways to improve self-esteem and develop personal power. Focuses on issues of self and identity, contextualizing these in the ways gender is constructed in society. (SS)
Attributes: LACS – Liberal Arts Social Core
Equivalent to: WS 490

WGSS 495. *GLOBAL FEMINIST THEOLOGIES. (4 Credits)
Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: WS 495, WS 495
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

WGSS 495H. *GLOBAL FEMINIST THEOLOGIES. (3 Credits)
Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: WS 495, WS 495
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

WGSS 496. *FEMINIST THEOLOGIES IN THE UNITED STATES. (4 Credits)
Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: WS 496H, WS 496, WS 496H
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

WGSS 496H. *FEMINIST THEOLOGIES IN THE UNITED STATES. (4 Credits)
Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: WS 495, WS 496, WS 496H
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

WGSS 498. FEMINIST PRACTICE. (4 Credits)
For graduating seniors in women, gender, and sexuality studies. Building on knowledge and experiences acquired in required and elective women, gender, and sexuality studies courses, it focuses on central questions for feminist research and activism. In particular, the course helps students develop deeper understandings of the process of generating feminist knowledge and its application in diverse forms of feminist practice.
Prerequisites: WS 414 with D- or better and WS 416 [D-]
Equivalent to: WS 498
WGSS 499. TOPICS. (1-6 Credits)
Topics on contemporary research in women, gender, and sexuality studies. May be repeated for credit when topic varies.
Equivalent to: WS 499
This course is repeatable for 12 credits.

WGSS 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: WS 501
This course is repeatable for 16 credits.

WGSS 502. INDEPENDENT STUDY. (1-16 Credits)
Equivalent to: WS 502
This course is repeatable for 16 credits.

WGSS 503. THESIS. (1-16 Credits)
Equivalent to: WS 503
This course is repeatable for 999 credits.

WGSS 506. PROJECTS. (1-16 Credits)
Equivalent to: WS 506
This course is repeatable for 16 credits.

WGSS 510. INTERNSHIP. (1-16 Credits)
The internship experience provides the opportunity to gain experience within off-campus private, public, or community agency or organization which has as one of its goals the improvement of the status of women in society. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the Women, Gender, and Sexuality Studies program.
Equivalent to: WS 510
This course is repeatable for 16 credits.

WGSS 511. ORIENTATION AND PROFESSIONALIZATION I. (1 Credit)
The WGSS 511, 512, 513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 511 provides knowledge about Women, Gender, and Sexuality Studies as a discipline and as a course of study that helps students manage the transition to graduate school. Graded P/N.
Equivalent to: GRAD 511, WS 511

WGSS 512. ORIENTATION AND PROFESSIONALIZATION II. (1 Credit)
The WGSS 511, 512, 513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 512 guides students in the development of an intellectual life with a focus on thriving and surviving as a scholar in Women, Gender, and Sexuality Studies. Graded P/N.
Equivalent to: GRAD 511, WS 512

WGSS 513. ORIENTATION AND PROFESSIONALIZATION III. (1 Credit)
The WGSS 511, 512, 513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 513 focuses on helping students shape a future that utilizes the graduate degree in Women, Gender, and Sexuality Studies. It helps students manage the transition to life after the Women, Gender, and Sexuality Studies Master’s program at OSU. Graded P/N.
Equivalent to: GRAD 511, WS 513

WGSS 514. SYSTEMS OF OPPRESSION: STRATEGIES FOR RESISTANCE. (4 Credits)
Explores the ways different systems of oppression function in society. Applies feminist intersectionality approaches to examine interlocking systems of inequality and privilege.
Equivalent to: WS 514

WGSS 515. ADVANCED RESEARCH LITERATURE REVIEW. (3 Credits)
Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student’s research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research. CROSSLISTED as ANTH 515, CSSA 515, ES 515.
Equivalent to: ANTH 515, CSSA 515, ES 515

WGSS 516. THEORIES OF FEMINISM. (4 Credits)
Explores feminist conceptions about the nature of the world, women’s reality and visions for change. Analyzes major issues raised by the women's movement and the development of feminist ideas, as well as provides a critical examination of feminist thought and different theories which comprise it.
Equivalent to: WS 516
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224

WGSS 517. FEMINIST PHILOSOPHIES. (3 Credits)
Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues, such as rape and pornography. CROSSLISTED as PHL 417/PHL 517.
Equivalent to: WS 517
Recommended: 6 credits of philosophy

WGSS 518. FEMINIST RESEARCH. (4 Credits)
Explores the socio-political and historical context out of which traditional research methodologies emerge and the relationship of gender to scientific pursuits. Teaches what it means to do emancipatory anti-sexist and participatory research.
Equivalent to: WS 518

WGSS 521. FEMINIST LEADERSHIP. (4 Credits)
Examines theories of feminist leadership and applications in non-profit, governmental, and higher education institutions.
Equivalent to: WS 521

WGSS 522. GRANT AND FUND DEVELOPMENT FOR FEMINIST ORGANIZATIONS. (4 Credits)
Provides students with the skills needed to be successful in grant-writing and fundraising for feminist organizations. Students will address the politics of grant writing and fund raising in relation to the feminist movement’s aims and goals. They will also work directly with agencies to understand the trade-offs and value/need of securing funding for social change organizations.
Equivalent to: WS 522

WGSS 523. COMMUNITY ORGANIZING AND COLLECTIVE ACTION. (2 Credits)
Addresses relationships between theory and action in feminist context. Explores both social change activism in terms of individual and collective action strategies and social movement theory in historical and contemporary perspectives.
Equivalent to: WS 523

</table>
WGSS 572. INDIGENOUS TWO-SPIRIT AND QUEER STUDIES. (4 Credits)
"Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 572, QS 572.
Equivalent to: ES 572, QS 572
Recommended: QS 262 or ES 242 or WGSS 414 or WGSS 514

WGSS 573. TRANSGENDER LIVES. (4 Credits)
With a particular focus on transgender people of color and transnational constructions of gender, this course will engage issues in the lives of Transgender people through autobiography, memoir, biography, poetry, and documentary film. CROSSLISTED as QS 473/QS 573.
Equivalent to: QS 573
Recommended: WGSS/QS 262, WGSS/QS 364

WGSS 575. CRITICAL RACE FEMINISM AND OUTSIDER JURISPRUDENCE. (4 Credits)
Critical exploration of critical legal justice movements and their relationship to social identities. Seminar emphasizes specific legal cases, federal and state laws, and constitutional issues that impact groups deemed outsiders in legal discourse as well as their social implications. The critical justice movement and anti-subordination struggles will be explored via case analyses that shape race, class, gender, sexuality, and disability relations. Theoretical contributions of law and society, critical race theory, LatCrit, and critical race feminism, critical white studies, critical mixed race studies, OutCrit, ClassCrit, and critical disability studies applied to historical precedent and current attempts at marginalizing/empowering communities. CROSSLISTED as ES 575.
Equivalent to: ES 575

WGSS 576. TRANSNATIONAL SEXUALITIES. (4 Credits)
Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, same-sex desires, queer transnational immigration and labor flows, sex industries and discourses of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. CROSSLISTED as QS 476/QS 576.
Equivalent to: QS 576
Recommended: QS 262

WGSS 577. Queer/Trans People of Color Arts and Activism. (4 Credits)
LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the ways these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, QS 477/QS 577.
Equivalent to: ES 577, QS 577
Recommended: QS 262 and QS 464

WGSS 582. GLOBAL PERSPECTIVES ON WOMEN'S HEALTH. (4 Credits)
Women's health issues are examined from a global perspective in the context of a woman's life and through a feminist political lens. Central to our discussions will be an analysis of the interplay among race, class, and gender in shaping particular health care outcomes. The course stresses the potential for women's agency and autonomy with respect to improving their health and environments.
Equivalent to: WS 582

WGSS 583. RACE, GENDER, AND HEALTH JUSTICE. (4 Credits)
Based on a social justice framework, this course explores the intersections of race, gender, ethnicity, disability and sexuality to provide a deeper understanding of how these factors shape health inequities in diverse communities nationally and globally.

WGSS 585. TRANSNATIONAL FEMINISMS. (4 Credits)
Introduces students to themes and theoretical principles of transnational feminisms, with special emphasis placed on feminist movements of the global South. We will explore colonialism, globalization, nation-building, representation, global economies, militarism, human rights, and politics of gender, race, class, sexuality, and nation.
Equivalent to: WS 585

WGSS 586. GLOBAL EXPERIENCE I. (1 Credit)
Prepares students to participate in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.
Equivalent to: WS 586

WGSS 587. GLOBAL EXPERIENCE II. (1 Credit)
Engages students in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.
Equivalent to: WS 587
Recommended: WS 486 or WS 586 or WGSS 486 or WGSS 586

WGSS 588. GLOBAL EXPERIENCE III. (1 Credit)
Students reflect on their short-term study abroad experience by engaging in in-depth transnational feminist analysis of particular aspects of the study abroad experience.
Equivalent to: WS 588
Recommended: (WS 586 and WS 587) or (WGSS 586 and WGSS 587)

WGSS 595. GLOBAL FEMINIST THEOLOGIES. (4 Credits)
Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality.
Equivalent to: WS 595
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WS 224

WGSS 596. FEMINIST THEOLOGIES IN THE UNITED STATES. (4 Credits)
Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences.
Equivalent to: WS 596
Recommended: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WS 224

WGSS 599. TOPICS. (1-6 Credits)
Topics on contemporary research in women, gender, and sexuality. May be repeated for credit when topic varies.
Equivalent to: WS 599
This course is repeatable for 12 credits.

WGSS 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Individual and collaborative research and scholarship under the supervision of faculty.
This course is repeatable for 16 credits.

WGSS 602. INDEPENDENT STUDY. (1-16 Credits)
Independent study in some field of special interest under the supervision of a faculty member.
This course is repeatable for 16 credits.
WGSS 603. THESIS. (1-12 Credits)
Graded P/N.
This course is repeatable for 999 credits.

WGSS 605. READING AND CONFERENCE. (1-16 Credits)
Independent reading in specialized topics, guided by discussions in conference with faculty.
This course is repeatable for 16 credits.

WGSS 606. PROJECTS. (1-16 Credits)
Special project initiation and participation under the supervision of faculty. Graded P/N.
This course is repeatable for 16 credits.

WGSS 610. INTERNSHIP. (1-6 Credits)
The internship experience provides opportunities to gain experience in a private, public, or community agency or organization, which has social justice advocacy as one of its goals. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the WGSS program. One feature of graduate internships is the opportunity to shadow key personnel in order to meet internship goals. Graded P/N.
This course is repeatable for 6 credits.

WGSS 611. COLLOQUIUM. (1 Credit)
Provides presentations of feminist research by OSU faculty and graduate students and faculty members from other institutions. Graded P/N.
This course is repeatable for 4 credits.

WGSS 616. MULTIRACIAL, TRANSCONTINENTAL, AND QUEER FEMINISMS I. (4 Credits)
Introduces doctoral students to foundational and emerging themes and texts in women, gender, and sexuality studies, with particular emphases on women of color feminisms, transnational feminisms, and queer feminist critiques. The first seminar in a two-part sequence (WGSS 616 and 617).

WGSS 617. MULTIRACIAL, TRANSCONTINENTAL, AND QUEER FEMINISMS II. (4 Credits)
Introduces doctoral students to foundational and emerging themes and texts in women, gender, and sexuality studies, with particular emphases on women of color feminisms, transnational feminisms, and queer feminist critiques. The second seminar in a two-part sequence (WGSS 616 and 617).
Prerequisites: WGSS 616 with B or better

WGSS 618. FEMINIST PARTICIPATORY ACTION RESEARCH. (4 Credits)
An examination of theories, principles and strategies of PAR, and appreciation of advantages and limitations of this approach and skills necessary for participating effectively in PAR projects.
Recommended: Any upper-division graduate level course in research methods.

WGSS 619. DECOLONIZING METHODS. (4 Credits)
Navigates from feminist philosophy of science interventions to postcolonial, Chicana/Latina, and critical race criticisms of methodological stances in "normal" science. Standpoint methodologies, racialized and gendered origins of modern statistical methods, longstanding affinity between colonial inequalities and Eurocentric scientific inquiry, and successor sciences/sciences from below constitute the main themes of the course.

WGSS 620. SOCIAL JUSTICE THEORY AND PRACTICE. (4 Credits)
An examination of social justice theories and practices. Specifically engages with issues of power and privilege, systems of oppression, intersectionality, and social activism. Explores the practices of social justice movements.

World Languages and Cultures

WLC 159. *LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION. (4 Credits)
Students in this course will unpack language, race and racism—as well as the intersections between those ideas—as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ANTH 159 and ES 159.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: ANTH 159, ES 159

WLC 221H. *MASTERPIECES OF GERMAN CINEMA. (3 Credits)
An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: WLC 221

WLC 222. *WOMEN IN ITALIAN CINEMA. (3 Credits)
An exploration of filmic portrayals of women as participants in social, economic and political life in Italy. Examines Italian cinema as a reflection of Italian culture. Focuses on women as protagonists, symbolic figures and filmmakers. Analysis will be presented through a variety of historical, critical and theoretical approaches. Taught in English. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: IT 261

WLC 230. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS. (3 Credits)
An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France’s European vocation, and social conflict today. Conducted in English. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: FR 270, FR 270H, WLC 230H

WLC 230H. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS. (3 Credits)
An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France’s European vocation, and social conflict today. Conducted in English. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: FR 230, FR 230H, WLC 230

WLC 231. *GERMAN DICTATORSHIPS: NAZIS AND COMMUNISTS. (3 Credits)
Introduction to the two best-known dictatorships in German society, National Socialism of the Third Reich from 1933-1945 and Socialism in the German Democratic Republic from 1949-1989 via the study of visual media (feature films, documentaries, newsreels, etc.) and other primary and secondary sources. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: GER 231, GER 231H, WLC 231H

WLC 232. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS. (3 Credits)
An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France's European vocation, and social conflict today. Conducted in English. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: FR 230, FR 230H, WLC 230
WLC 231H. *GERMAN DICTATORSHIPS: NAZIS AND COMMUNISTS. (3 Credits)
Introduction to the two best-known dictatorships in German society, National Socialism of the Third Reich from 1933-1945 and Socialism in the German Democratic Republic from 1949-1989 via the study of visual media (feature films, documentaries, newsreels, etc.) and other primary and secondary sources. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: GER 231H

WLC 232. *INTRODUCTION TO JEWISH CULTURE. (3 Credits)
An overview of Jewish culture from its origins to the present day. Students will compare and contrast the lifestyles, ideologies, religious and cultural practices of Jews living in Israel and the United States; two divergent cultures that developed from similar roots. Taught in English. Taught via Ecampus only. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: HEBR 231

WLC 233. *RUSSIAN CULTURE I. (3 Credits)
Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. WLC 233: Old Russia; WLC 234: 19th Century; WLC 235: 20th Century. Taught in English. (H) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: RUS 231

WLC 234. *RUSSIAN CULTURE II. (3 Credits)
Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. WLC 233: Old Russia; WLC 234: 19th Century; WLC 235: 20th Century. Taught in English. (H) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: RUS 232

WLC 235. *RUSSIAN CULTURE III. (3 Credits)
Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. WLC 233: Old Russia; WLC 234: 19th Century; WLC 235: 20th Century. Taught in English. (H) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: RUS 233

WLC 241. *GRIMMS’ FAIRY TALES. (4 Credits)
We will read a selection of the most popular Grimms’ fairy tales and consider why they have remained so popular. What is it about fairy tales that has made them such a lasting source of creative inspiration into our time? Students will learn to understand and critique fairy tales and their role in Western cultures through analysis of the tales and creative adaptation of a tale for a modern audience. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: GER 241

WLC 261. *MASTERPIECES GERMAN CINEMA. (3 Credits)
An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: GER 261, GER 261H, WLC 261H

WLC 261H. *MASTERPIECES GERMAN CINEMA. (3 Credits)
An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
Equivalent to: GER 261, GER 261H, WLC 261H

WLC 301. *INTRODUCTION TO WORLD LANGUAGE AND CULTURE STUDIES. (4 Credits)
Addresses the structure, histories, and cultures associated with world languages and presents skills for learning languages more effectively. Includes related topics such as globalization, colonialism, and language justice; language policy, linguistic diversity, and language death; immigration and migration; race and racism. This is a required course in the WLC major in the Literacies thematic area. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

WLC 320. *FRANCOPHONE CULTURES IN FILM. (3-9 Credits)
An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students’ analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: FR 329, FR 329H, WLC 320H
This course is repeatable for 9 credits.

WLC 320H. *FRANCOPHONE CULTURES IN FILM. (3-9 Credits)
An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students’ analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; HNRS – Honors Course Designator
Equivalent to: FR 329, FR 329H, WLC 320
This course is repeatable for 9 credits.

WLC 321. *MODERN SPAIN THROUGH SPANISH CINEMA. (3 Credits)
Examines the history of modern Spain and its cinematography via the study of key Spanish films and cineastes in the twentieth and twenty-first centuries. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture
Equivalent to: SPAN 361
WLC 331. *CHINESE CULTURE I. (3 Credits)
Introduction to basic features of Chinese culture from ancient times to the 9th century. Topics include philosophy and religion, the Chinese language, literature and the arts, science and technology, government, family and gender, social and economic conditions, contacts with the outside world. Taught in English. Open to all students. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: CHN 331

WLC 332. *CHINESE CULTURE II. (3 Credits)
Introduction to basic features of Chinese culture from the 10th through the 19th centuries. Topics include philosophy and religion, literature and the arts, science and technology, government, family and gender, social and economic conditions, daily life, and contacts with the outside world. Taught in English. Open to all students. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: CHN 332

WLC 333. *CHINESE CULTURE III. (3 Credits)
Survey of important developments of Chinese society and culture from the early 20th century to the present. Topics include wars and revolutions, economic, political, and social conditions, the new culture movement, changing family structure and women's status, relationships within greater China (Mainland China, Taiwan, and Hong Kong). Taught in English. Open to all students. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: CHN 333

WLC 334. FASHION AND DESIGN IN THE FRANCOPHONE WORLD. (3 Credits)
A study of the world of French fashion and design: origins and history, what's new and exciting in French fashion today and attitudes about fashion and beauty of design that have given the French the inside track on prestige in this arena for centuries.
Equivalent to: FR 338

WLC 335. *JAPANESE CULTURE I. (3 Credits)
An introductory survey of Japanese history, arts, literature, society, and traditions from the ancient to the mid-19th century. Taught in English. May not be offered every year. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: JPN 331

WLC 336. *JAPANESE CULTURE II. (3 Credits)
An introductory survey of Japanese history, arts, literature society, and traditions from the ancient to the mid-19th century. May not be offered every year. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: JPN 332

WLC 337. *JAPANESE CULTURE III. (3 Credits)
A survey of Japan from the mid-19th century to the present in areas including arts, literature, business, education, society, politics, and foreign relations. Taught in English. May not be offered every year. (NC) (Bacc Core Course)
Attributes: CPD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: JPN 333

WLC 338. *DEAF CULTURE. (4 Credits)
Introduction to Deaf culture in the United States. Includes discussion and analysis of issues relevant to Deaf culture, including politics, language, education, art, literature, media representations, and contemporary life in the Deaf community. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

WLC 339. *DEAF HISTORY. (4 Credits)
This course covers the history of Deaf people and the Deaf community in the United States. It examines the historical and contemporary impacts of US social, political, legal, educational, and economic systems on the Deaf experience. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

WLC 360. INTERNATIONAL FILM FESTIVAL. (3 Credits)
Critical study of a selection of films screened at the Oregon State University's International Film Festival. Topics include acting, sound, special effects, cinematography. CROSSLISTED as FILM 360.
Equivalent to: FILM 360
This course is repeatable for 9 credits.
Recommended: Sophomore standing or higher.

WLC 361. (RE)FRAMING RACE THROUGH FILM PRODUCTION. (4 Credits)
A critical engagement of ways race and ethnicity are treated in nonfiction short film as students produce their own short film as a means of challenging dominant racial representations and narratives. Requires a basic understanding of ways that notions about race and ethnicity combine with ideologies about gender, sexuality, ability, class, etc. to perpetuate unjust systems and institutions. Prior filmmaking experience is welcome but not required. CROSSLISTED as ES 361, QS 361, WGSS 361.
Equivalent to: ES 361, QS 361, WGSS 361

WLC 373. APPROACHES TO SOCIAL JUSTICE. (3 Credits)
Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ANTH 373, ES 373, WGSS 373.
Equivalent to: ANTH 373, ES 373, WGSS 373

WLC 399. SPECIAL TOPICS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

WLC 410. WORLD LANGUAGE INTERNSHIP. (1-12 Credits)
Opportunities for juniors and seniors to apply skills in world language and knowledge of world culture at selected government, industry, or business placement sites. Allows students to prepare for transition from academic to work world. Interns are supervised and evaluated by employer and faculty coordinator. See also Oregon International Internships in the catalog section on International Programs. Graded P/N.
Equivalent to: FLL 410
This course is repeatable for 16 credits.
Recommended: Completion of 90 credits with 2.75 GPA or higher; completion of the third-year language course in one foreign language with 3.00 GPA or better, with at least three terms of study in the OSU School of Language, Culture, and Society.
WLC 429. *FRENCH SOCIETY THROUGH ITS CINEMA. (3 Credits)
An examination of French society through its own cinema. Via the screening and study of films from the various periods of French history, students will delve into the heart of French society and will discover the socio-historical, political, economic and cultural context. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: FR 429, FR 429H, WLC 429H

WLC 429H. *FRENCH SOCIETY THROUGH ITS CINEMA. (3 Credits)
An examination of French society through its own cinema. Via the screening and study of films from the various periods of French history, students will delve into the heart of French society and will discover the socio-historical, political, economic and cultural context. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator
Equivalent to: FR 429, FR 429H, WLC 429

WLC 459. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY. (4 Credits)
Students in this course will unpack language, race and racism—as well as the intersections between those ideas—as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, ES 459/ES 559.
Equivalent to: ANTH 459, ES 459

WLC 473. COMMUNITY-BASED LEARNING. (3 Credits)
A service-learning course that allows students to apply the theory and skills acquired in advanced linguistics, culture, and literature courses to specific needs of populations that speak a language taught in the department. It combines 80 hours of community-supervised fieldwork with an online academic component consisting of assigned readings, independent research, and ongoing reflective writing. Each student is expected to make significant contributions toward the completion of a deliverable product that benefits a native speaker community. Pre-advanced oral proficiency required.
This course is repeatable for 6 credits.

WLC 483. CUBAN CULTURE, POLITICS AND SOCIETY. (4 Credits)
One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ES 483 and PS 483.
Equivalent to: ENG 483, ES 483, PS 483

WLC 485. CAPSTONE IN SOCIAL JUSTICE. (2 Credits)
Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. CROSSLISTED as ANTH 485, ES 485, WGSS 485.
Prerequisites: (ANTH 373 with D- or better or ES 373 with D- or better or WGSS 373 with D- or better or WLC 373 with D- or better) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-])
Equivalent to: ANTH 485, ES 485, WGSS 485
This course is repeatable for 4 credits.

WLC 499. SPECIAL TOPICS. (1-16 Credits)
Equivalent to: WLC 499H
This course is repeatable for 16 credits.

WLC 499H. SPECIAL TOPICS. (1-16 Credits)
Attributes: HNRS – Honors Course Designator
Equivalent to: WLC 499
This course is repeatable for 16 credits.

WLC 510. WORLD LANGUAGE INTERNSHIP. (1-12 Credits)
Opportunities for juniors and seniors to apply skills in world language and knowledge of world culture at selected government, industry, or business placement sites. Allows students to prepare for transition from the academic world to the work world. Interns are supervised and evaluated by the employer and a faculty coordinator. See also Oregon International Internships in the catalog section on International Programs. Graded P/N.
Equivalent to: FLL 510
This course is repeatable for 16 credits.
Recommended: Completion of 90 credits with 2.75 GPA or higher; completion of the third-year language course in one foreign language with 3.00 GPA or better, with at least three terms of study in the OSU School of Language, Culture, and Society.

WLC 559. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY. (4 Credits)
Students in this course will unpack language, race and racism—as well as the intersections between those ideas—as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, ES 459/ES 559.
Equivalent to: ANTH 559, ES 559

WLC 583. CUBAN CULTURE, POLITICS AND SOCIETY. (4 Credits)
One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ES 583 and PS 583.
Equivalent to: ENG 583, ES 583, PS 583

WLC 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
Anthropology Graduate Minor
The School of Language, Culture, and Society offers graduate work leading to a Master of Arts in Applied Anthropology. The school also offers graduate work leading to a master of arts in interdisciplinary studies and participates as a minor field in other advanced degree programs. A variety of individualized programs is available within the MAIS framework.

Minor Code: 860

Anthropology Minor
Also available via Ecampus.

Undergraduate students may elect the Anthropology minor to complement coursework in their major discipline.

Minor Code: 860

Additional Anthropology credits to total 27 with the following restrictions:
• No more than 6 blanket credits (ANTH 401–ANTH 409)
• No more than 6 internship credits (ANTH 410)
• At least 12 400-level credits, excluding blanket credits and internship credits

Minor Code: 860

Anthropology Undergraduate Major (BA, BS, HBA, HBS)
Also available via Ecampus.

Anthropology seeks to promote awareness of the complexity and diversity of humanity and the human experience—past and present—in its cultural, biological, and ecological contexts. An Anthropology degree emphasizes cultural sensitivity and enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts and management of cultural resources. Anthropology curriculum provides a sound basis for later professional or graduate education. Four options are available: archaeology, biocultural, cultural/linguistic, and general anthropology. Completion of an option is required to earn a degree in Anthropology.

Option Code: 854

Also available via Ecampus.

The Archaeology option focuses on the material remains of past cultures and their environments. This option provides students with the essential field and laboratory skills necessary to collect, analyze, and curate archaeological materials, as well as meet the ethical issues and legal responsibilities concerning cultural resource management.

ANTH 475 ANTHROPOLOGY IN PRACTICE 4
Option 21-33
Total credits required for graduation 180

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
1 In certain cases, an extra course taken in this category can be counted as an elective. Please check with the Anthropology advisor.

Majors must additionally fulfill requirements for one of the options, plus upper-division electives in Anthropology to complete a total of 60 credits for the major. The following restrictions apply:
• No more than 6 credits internship ANTH 410
• No more than 6 credits from ANTH 311, ANTH 312, ANTH 313, ANTH 314, ANTH 315, ANTH 316, ANTH 317, ANTH 318, ANTH 319
• At least 12 credits at the 400-level excluding blanket-numbered (ANTH 401–ANTH 409) and internship (ANTH 410) credits
• A grade of C− or better is required for all courses used to complete major requirements. Such courses cannot be taken S/U

Major Code: 860

Archaeology Option

This option is offered within the following major(s):
• Anthropology · College of Liberal Arts (p. 711)

Also available via Ecampus.

The Archaeology option focuses on the material remains of past cultures and their environments. This option provides students with the essential field and laboratory skills necessary to collect, analyze, and curate archaeological materials, as well as meet the ethical issues and legal responsibilities concerning cultural resource management.

Option Code: 854

Also available via Ecampus.

The Archaeology option focuses on the material remains of past cultures and their environments. This option provides students with the essential field and laboratory skills necessary to collect, analyze, and curate archaeological materials, as well as meet the ethical issues and legal responsibilities concerning cultural resource management.

Option Code: 854

Also available via Ecampus.

The Archaeology option focuses on the material remains of past cultures and their environments. This option provides students with the essential field and laboratory skills necessary to collect, analyze, and curate archaeological materials, as well as meet the ethical issues and legal responsibilities concerning cultural resource management.

Option Code: 854

This option provides students with the essential field and laboratory skills necessary to collect, analyze, and curate archaeological materials, as well as meet the ethical issues and legal responsibilities concerning cultural resource management.
Biocultural Option

This option is offered within the following major(s):

• Anthropology - College of Liberal Arts (p. 711)

Also available via Ecampus.

The Biocultural option focuses on the ways evolutionary biology, political-economy, ecology, and culture interact to influence human health and behavior, over time and in cross-cultural perspective. This option prepares students to engage in ethical fieldwork, laboratory work, and data analyses, to ultimately understand the intersections of biomarkers and other indicators of human health status, demographic processes, social relationships, cultural norms, and political and economic inequalities.

Option Code: 855

Cultural/Linguistic Option

This option is offered within the following major(s):

• Anthropology - College of Liberal Arts (p. 711)

Also available via Ecampus.

The Cultural/Linguistic option focuses on the diversity of living cultures, in terms of their subsistence practices, sacred and secular rituals, economies, technology, arts, language, and social institutions. This concentration prepares the student to engage in ethnographic research and to follow ethical and professional standards for cultural sensitivity in interpersonal and cross-cultural interactions.

Option Code: 855

### Degree Type Proficiencies

**PhD Requirements**

1. Students must have MA or MS in Anthropology or related discipline (34 credits)

Students must bring in graduate credits to cover the equivalent of the courses central to the MA/MS in Applied Anthropology at Oregon State University (20 credits, see below) plus 14 credits of graduate level Anthropology courses or graduate courses in relevant disciplines as agreed upon by the major professor. If these requirements are not met upon entrance to the program, they must be earned after admittance. Students will work with their major professors in consultation with the Director of Graduate Studies to assess what can be accepted from past work and what must be made up at OSU.

2. Specialization Courses (25 credits)

Specialization courses are those that enable students to develop their knowledge in order to do effective comprehensive exams and dissertation work in their particular field of expertise. Students work with their major professor and their Committee to determine what courses will be most helpful for them.

Specializations courses must include ANTH 695 for developing their dissertation research project, two courses in Anthropology, and 2
credits of "Tan Sack" (ANTH 607). All other specialization courses may be within or outside of Anthropology.

3. Second Language Proficiency
Evidenced by passing two years of university-level second language study or by passing the proficiency exam. Must be completed before Comprehensive Exams are taken. A substitution of skill sets is possible for archaeology students in consultation with the major professor and the Director of Graduate Studies.

4. Graduate Minor is optional
5. Residency (6 credits)
ANTH 610
6. Comprehensive Exams (9 credits)
ANTH 699 Comprehensive Review
7. Dissertation (36 credits)
ANTH 603

Major Code: 8640

Applied Anthropology Graduate Minor

The School of Language, Culture, and Society offers graduate work leading to a Master of Arts in Applied Anthropology. The school also offers graduate work leading to a master of arts in interdisciplinary studies and participates as a minor field in other advanced degree programs. A variety of individualized programs is available within the MAIS framework.

Minor Code: 8640
Minor Code: 8640

Asian Languages and Cultures Minor

Provides a broad background in Asian languages and cultures which will enable the student to explore Asia from various disciplinary perspectives in order to prepare for graduate study or a professional career.

Minor Code: 939

A total of 30 credits are required, 18 of which must be upper-division courses. 12 credits out of the 18 credits must be completed in residence with an average grade of C. The courses offered through Ecampus are included.

College Student Services Administration Graduate Major (EDM, MS)

Graduate Areas of Concentration

College and university characteristics and environments; history, development, and current issues in higher education; leadership and management of administrative departments; program oversight in specialized administrative areas such as financial aid, student activities, career services, multicultural affairs, recreational sports, and student housing; student development theory and application

Also available via Ecampus (http://ecampus.oregonstate.edu).

The College Student Services Administration program offers preparation in the organization, leadership and administration of programs, services, and facilities in postsecondary education, including college union/centers, recreational sports, student government and activities, residence life programs, student housing, financial aid, career services, and general student advising and academic support.

CSSA students have two degree tracks from which to select:

This first degree track, the Master of Education (EdM), is earned through successful completion of all required program course work and successful completion and defense of a capstone portfolio. The capstone portfolio is a cumulative, comprehensive, and reflective form of student assessment. Completing a portfolio requires that the student address each program competency in a comprehensive, meaningful, and creative way. The portfolio "product" can be shared in any number of formats, including, but not limited to, writings, pictures, audio or video clips, and electronic media (websites, PowerPoint documents, etc.). Final portfolios are distributed to and evaluated in writing by a committee just prior to the last term of course work. A public, formal committee meeting with oral presentation and defense serves as the second method of evaluation.

The second degree track, the Master of Science (MS), is earned through successful completion of all required program course work and successful completion and defense of thesis. In addition to required course work and the thesis, students pursuing the MS degree must also demonstrate adequate evidence of competence and learning in each of the five CSSA competency areas. Demonstration of this evidence may take the form of an extended/detailed competency plan with select work samples or other methods approved by the major professor. This demonstration need not be a portfolio, but it should clearly show
evidence of competency mastery. Thesis research should be reflected in the demonstration.

For thesis work, CSSA and university policies require students to convene a. a proposal meeting to present their research plan (generally spring of the first year for full-time students or fall/winter of the second year for part-time students) and b. a final defense for presentation and evaluation of the research and competency demonstration (final term of course work).

Students who wish to pursue the MS should decide this early in their graduate program, ideally during the first term, since such research requires careful and lengthy planning. Major professors should be made aware of this decision.

Major Code: 2200

Graduation from the program requires the following

- Successful completion of at least 54 credits of graduate-level coursework, the majority of which are required in the major field of study (CSSA). Additionally, a minor or area of specialization is chosen and completed by the individual student; and

- Successful completion and presentation of a capstone project (EdM degree) or a thesis capstone (MS degree) during the final year.

Major Code: 2200

Ethnic Studies Graduate Minor

Graduate Areas of Concentration

Ethnic studies

Graduate work in the School of Language, Culture, and Society may serve as a field of study for the Master of Arts in Interdisciplinary Studies degree or as a minor in other advanced degree programs. The program offers an interdisciplinary exploration of the critical areas of race, class, ethnicity, and gender in American life, as well as focused study of the four major ethnic minority groups in the United States (African Americans, Asian Americans, Chicano/Latinos and Native Americans).

Students applying for graduate work in ethnic studies must meet the following requirements:

1. a minimum GPA of 3.00 in the last 90 credits of graded undergraduate work on the first baccalaureate degree plus all work completed thereafter;
2. appropriate undergraduate or postgraduate work in ethnic studies. Applicants are urged to speak with an advisor prior to submitting their materials.

Minor Code: 8940

Minor Code: 8940

Ethnic Studies Minor

Also available via Ecampus.

Ethnic Studies is an interdisciplinary field focused on critical engagement with the historical and ongoing ways in which race and ethnicity shape everyday life in the United States, but also within a global context. A minor in Ethnic Studies provides students with a strong background and set of analytical skills to address issues of difference and inequality in a wide range of areas, from policy, to institutions and community settings, to pop culture, media, and literature, and is a valuable complement to any major.

Minor Code: 894
The Ethnic Studies Undergraduate Major (BA, BS, HBA, HBS) is an interdisciplinary field that critically engages the historical and ongoing impact of race and ethnicity, primarily in the US but within a global context. A major in Ethnic Studies provides students with a strong background and set of analytical skills to address issues of difference and inequity in a wide range of areas, from state policy and institutions to pop culture, media, and literature.

**Minor Code: 894**

**Food in Culture and Social Justice Certificate**

Also available via Ecampus.

Food is more than simple nourishment. It is part of a system of communication firmly rooted in individual and group identities within cultures around the world. When and how we eat, what is considered acceptable to eat, how we prepare it, and how we learn about producing and eating food are all fascinating questions to explore by humanists and social scientists. Histories of particular food commodities and changes in the way people think about sustaining healthy bodies richly contextualize our present practices. Cultural analyses of food and food production lead us to question the level of social justice within the local and global food systems. Community food security is a condition in which all community residents obtain a safe, culturally acceptable, nutritionally adequate diet through a sustainable food system that maximizes community self-reliance and social justice. Students who...
complete this certificate will not only have a clear idea of the cultural bases of food and food production but will obtain some experience working towards community food security.

## Global Development Studies Minor

"Development" refers to the expansion of economic activity, integration into global flows of information and commerce, and improvement of the quality of life. The undergraduate minor program in Global Development Studies at OSU is designed to help students understand the challenges faced by developing communities and countries, including economic inequality, poverty, health and wellness, and the sustainable use of natural resources. Emphasis is placed on interdisciplinary and practical solutions to international development problems.

Courses address both thematic and regional dimensions of international development. Some required and elective courses may also count toward fulfillment of baccalaureate core requirements in categories such as "Contemporary Global Issues," "Cultural Diversity," "Science, Technology and Society," and "Social Processes and Institutions." Courses will be offered on campus, with the potential for some instruction via Ecampus. Students will be encouraged to participate in research projects, international experiences, and applied work (e.g., internships, service learning, etc.).

**Minor Code: 711**

Students putting together a program of study in Global Development Studies should consult their academic advisor. Students are required to take a minimum of 27 credits, as follows.

Latin American Affairs Certificate

Juan A. Trujillo, Director
36 Kidder Hall
Oregon State University
Corvallis, OR 97331-4603
541-737-3956
Email: jtrujillo@oregonstate.edu

Students earning a Latin American Affairs certificate will have gained a broad knowledge and understanding of the history and current situation in Latin America. The program allows students with majors in any discipline to complement their professional studies; certificates are awarded concurrently with the undergraduate or graduate degree.

Course work is drawn from several departments and schools, primarily in the College of Liberal Arts. Interested students should contact the program director early in their academic careers in order to plan their schedules.

Certificate Code: C700

Electives

Select a minimum of 21 credits of approved Latin American courses outside the major from at least two departments/schools from the following:

- ANTH 313 | *PEOPLES OF THE WORLD-LATIN AMERICA |
- ES 311 | NARRATIVES OF LATINO MIGRATIONS |
- GEOG 314 | *GEOGRAPHY OF LATIN AMERICA |
- HST 452 | MODERN MEXICO |
- HST 456 | PROBLEMS IN LATIN AMERICAN HISTORY |
- PHL 316 | INTELLECTUAL ISSUES OF MEXICO AND MEXICAN AMERICANS |
- PS 344 | *LATIN AMERICAN POLITICS |
- SPAN 311 | ADVANCED SPANISH GRAMMAR |
- SPAN 312 | INTERMEDIATE WRITING SKILLS |
- SPAN 313 | SPANISH LANGUAGE THROUGH CULTURE |

Total Hours: 27

* Baccalaureate Core Course (BCC). You can double count courses for your BCC requirement and your certificate requirement

1 To develop a sense of linguistic diversity, certificate students must study two languages other than English. End-of-second-year proficiency is required in one language and end-of-first-year proficiency in another language. One of these languages must be outside the Indo-European language family. Students should work with a Language in Culture advisor to identify an appropriate mode of assessment. It is highly recommended that students participate in a study abroad program

2 Some electives used for the certificate may have prerequisites

Certificate Code: C810

Queer Studies Graduate Minor

The graduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this graduate option examines homophobia and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of power.

Minor Code: 8777

Master’s students must complete a total of 20 credits, and doctoral students must complete a total of 24 credits. Students whose primary area is WGSS may use required course work for their program towards an MA or PhD minor in Queer Studies.

- WS 585 | TRANSNATIONAL FEMINISMS |
**Minor Code: 8777**

**Queer Studies Minor**

Also available via Ecampus.

The undergraduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the role of gender and the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this minor examines homophobia and transphobia’s relationship with racism, colonialism, sexism, ableism, classism and other forms of power.

**Minor Code: 877**

A total of 33 credits is required for the minor, with at least 12 of these credits at the upper-division level.

**Minor Code: 940**

**Women, Gender, and Sexuality Studies Certificate**

Also available via Ecampus.

The Women, Gender, and Sexuality Studies undergraduate certificate is designed to facilitate the broad interdisciplinary study of gender and women's issues. It emphasizes the diversity of women's experience.
through a focus on disciplinary-based knowledge about women’s lives and relationships in the many schools/departments where courses on gender are taught.

Certificate Code: C808

While core coursework taught by the Women, Gender, and Sexuality Studies Program is required, students are expected to take the bulk of their elective coursework from approved Women, Gender, and Sexuality Studies Program classes offered throughout the different academic units on campus. A total of 27 credits is required for the certificate, with at least 12 of these credits at the upper-division level.

All required coursework must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus certificate.

Electives
Select 17 credits

Total Hours 27

1. Baccalaureate Core Course (BCC)
   The remaining 17 credits can be taken from elective courses offered by the Women, Gender, and Sexuality Studies (WGSS) Program and from approved program courses offered in any school/department at OSU. However, at least 12 of these 17 credits must consist of approved program courses. An approved program course is one that has a focus on gender and/or women’s issues, is taught in a unit other than the WGSS Program, and has been approved as fulfilling the requirements of a WGSS Program course. See the electives for the WGSS major.

2. No more than 3 credits of WGSS 402 and WGSS 410 may count toward the certificate.

Certificate Code: C808

Women, Gender, and Sexuality Studies Graduate Major (MA, PhD)

Graduate Areas of Concentration
Feminist leadership; gender, rhetoric, and representation; health and gender justice; social justice theory and practice

Major Code: 8008

MA students will take 42-43 credits of course work, including 21 credits of required courses and thesis credit. In addition, students select two courses from cluster area one, one course from each of cluster areas two and three, and 6 elective credit chosen from any of the cluster areas and/or other WGSS/QS elective courses. Cluster areas include:

1. Women of Color Feminisms/Queer of Color Feminisms
2. Global/Transnational Feminisms
3. Feminist Praxis

MA students must also demonstrate second-year proficiency in a second language.

PhD students will take 27–28 credits of core requirements, as well as 36 dissertation credits, and 12 credits of electives in a concentration specific to their area of focus, for a total of 75–76 required credits. No more than two “slash” courses will be accepted toward the degree.

Electives

Students must also complete at least 6 elective credits from any of the cluster areas and/or other WGSS/QS elective courses in order to meet the 42-43 minimum credit total.

Second-year proficiency in a second language as demonstrated by:
1. Two years of a college language sequence on the transcript.
2. Scoring at second-year proficiency on a language placement test.
3. Completing the 213 course of a language sequence while enrolled in the MA program.

Women, Gender, and Sexuality Studies Graduate Minor

Graduate Areas of Concentration

Contemporary women’s issues; leadership and community engagement; race, class and gender; sexuality studies; transnational perspectives

Women, Gender, and Sexuality Studies is the multidisciplinary study of gender and women’s lives and experiences. Course work explores women’s realities in such areas as the political and social sciences, health, psychology, history, literature, and the arts. Women, Gender, and Sexuality Studies programs grew out of the women’s movement, involving understandings of discrimination in society and a need to celebrate different women’s strengths, contributions, and forms of resistance.

Women, Gender, and Sexuality Studies can be elected as a primary and/or secondary field for the Master of Arts in Interdisciplinary Studies degree (MAIS) and as a graduate minor. Areas of specialization include contemporary women’s issues; gender, race and class; and global women’s issues. The master’s program requires a thesis or research report (nonthesis option) and the completion of a core curriculum. This curriculum includes an understanding of how issues of gender, race, class, and other differences among women affect their status in Western and global perspectives. It also emphasizes the relationship between theory and strategies for social change. An internship or field placement in an agency that is concerned with gender issues or women’s role and status in society is required and is designed to help students integrate classroom knowledge with practical experience. The graduate program is beneficial for any work experience in which gender is negotiated or women are affected. Women, Gender, and Sexuality Studies graduates are employed in human service agencies and programs, advocacy organizations such as battered women’s shelters and women’s resource centers and community organizing, teaching, business, administration, and cultural work. Many students have used their degree as a preparatory base for doctoral work.

Women, Gender, and Sexuality Studies faculty are drawn from colleges across the university. Many teach Women, Gender, and Sexuality Studies program courses in their home departments and are involved in research projects that give them different perspectives on the challenges in Women, Gender, and Sexuality Studies. These courses and faculty are not listed in this entry. For more information, contact Patti Duncan, Director,
Women, Gender, and Sexuality Studies Minor, 252 Waldo Hall, OSU, Corvallis, OR 97331.

Women, Gender, and Sexuality Studies Minor

Also available via Ecampus.

The Women, Gender, and Sexuality Studies minor provides a multidisciplinary exploration of gender and sexuality as they intersect with race, ethnicity, class, culture, nation, and ability. The curriculum incorporates a social activism component, and students are encouraged to consider the ways knowledge and activist engagements help promote social justice in local and global communities.

Minor Code: 908

Students are expected to take the bulk of their coursework toward the minor from the core and elective courses offered by the Women, Gender, and Sexuality Studies Program.

A total of 27 credits is required for the minor, with at least 12 credits at the upper-division level.

All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus minor.

Electives

Select seven credits

Total Hours 27

Baccalaureate Core Course (BCC)

The remaining 7 credits may be taken from Women, Gender, and Sexuality Studies (WGSS) electives and from approved program courses offered in other departments.

An approved program course is one that has a focus on gender and/or women’s issues, is taught in a unit other than the WGSS Program, and has been approved as fulfilling the requirements of a WGSS Program course. See the list of WGSS electives and WGSS Program electives for the WGSS major. In addition, WGSS 410 may be taken as an elective for the minor. No more than 3 credits of WGSS 402 and WGSS 410 may count toward the minor.

Minor Code: 908

Women, Gender, and Sexuality Studies Undergraduate Major (BA, BS, HBA, HBS)

Also available via Ecampus.

The Women, Gender, and Sexuality Studies major represents multidisciplinary approaches to the study of gender and sexuality, particularly as they intersect with race, ethnicity, class, culture, nation, and ability. The curriculum incorporates feminist social justice theory and research to better understand differences in power and privilege and to contribute to practices that help transform our world. Many classes incorporate a social activism component, and students are encouraged to consider the ways knowledge and activist engagements help promote social justice in local and global communities.

Major Code: 808

A total of 48 credits is required for the major: 27 credits of required Women, Gender, and Sexuality Studies core courses, and 21 credits of elective courses. Electives may include courses taught in Women, Gender, and Sexuality Studies as well as courses that are taught in other academic units that are approved as Women, Gender, and Sexuality Studies Program courses. These courses have a focus on gender, sexuality, and/or women’s issues, and have been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies course. No more than 9 credits of these Women, Gender, and Sexuality Studies Program courses may be used toward the major.

All required course work for the on-campus major must be taken on campus and no more than 6 credits of online elective course work can be used toward the on-campus major.

Total credits required for graduation is 180.

Total Hours 180

1 College of Liberal Arts BA/BS Requirements:
  • The BA requires second year language proficiency at the college level with C grade or better
  • The BS requires 15 credits in science, computer science, and quantitative studies.

2 With the exception of WIC, courses used to satisfy requirements for the major may not be used to meet baccalaureate or liberal arts core requirements.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Major Code: 808

School of Psychological Science

The psychology curriculum explores scientific approaches to a wide range of psychological phenomena. Courses meet the needs of students
desiring a knowledge of psychology as part of their general education or professional background, planning to secure entry-level jobs in human services occupations, or preparing for graduate study in psychology or related fields. The school offers a major program leading to a BA or BS degree in Psychology, a minor program for undergraduate students with majors in other disciplines, and a PhD program.

Graduates with Bachelor’s degrees in psychology often find entry-level career positions in human services, law enforcement, business, education, management, sales, and also may go on to graduate study in such fields as psychology, counseling, social work, public and business administration, and law.

**Assistant to Director:** Shirley Mann
**Academic Advisors:** Ashleigh Anderson (Head Advisor), Nathan Walters
**Academic Programs Coordinator:** Nicole Wolfe
**Contemplative Studies Coordinator:** Katelin Gallagher

**School of Psychological Science**

**PSY 202. **GENERAL PSYCHOLOGY. (3 Credits)
Motivation and emotion; personality; measurement of human differences; adjustment, psychopathology and psychotherapy; attitudes and social behavior. (SS) (Bacc Core Course)
**Attributes:** CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
**Equivalent to:** PSY 202H

**PSY 298. QUANTITATIVE METHODS IN PSYCHOLOGICAL SCIENCE. (4 Credits)**
Foundation course explores quantitative methods in psychological science to prepare students for further study in research methods in psychological science. Topics include descriptive statistics, hypothesis testing, correlation, one-way or two-way ANOVA, regression, controversies and emerging practices in open psychological science.
**Prerequisites:** ((PSY 202 with C- or better or PSY 202H with C- or better) and PSY 201 [C-]) and MTH 105 [C-] and ST 201 [C-] and (PHL 121 [C-] or WR 222 [C-] or WR 327 [C-])
**PSY 299. SPECIAL TOPICS. (0-6 Credits)**
This course is repeatable for 30 credits.

**PSY 301. RESEARCH METHODS IN PSYCHOLOGY. (4 Credits)**
Study of scientific methodology in psychology, including experimental and observational techniques. Topics include problem identification and hypothesis formation, research design, application of statistics, collection and interpretation of data, computer usage, and research report writing.
**Lec/lab.**
**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-] and (ST 351 [D-] or ST 351H [D-])
**PSY 330. BRAIN AND BEHAVIOR. (4 Credits)**
Introduction to the relationships of the structure and functioning of the human brain to behavior. Information from neuroanatomy, neurochemistry, neurosurgery and neurology is combined with psychological research on both normal and abnormal human behavior. (SS)
**Attributes:** LACS – Liberal Arts Social Core
**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-]

**PSY 340. COGNITION. (4 Credits)**
Theories, research and applications concerning cognition. Topics include perception, attention, memory, learning, thinking and language. (SS)
**Attributes:** LACS – Liberal Arts Social Core
**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-]

**PSY 340H. COGNITION. (4 Credits)**
Theories, research and applications concerning cognition. Topics include perception, attention, memory, learning, thinking and language.
**Attributes:** HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-]

**PSY 350. HUMAN LIFESPAN DEVELOPMENT. (4 Credits)**
An introduction to physical, social, cognitive and linguistic development with an emphasis on theory and methodology. (SS)
**Attributes:** LACS – Liberal Arts Social Core
**Prerequisites:** PSY 201 with D- or better and PSY 202 [D-]
PSY 360. SOCIAL PSYCHOLOGY. (4 Credits)
The study of behavior and experience in a social context. Topics include
person perception, attribution, attraction and love, attitudes and attitude
change, aggression, social influence and group dynamics. Applications of
social psychological principles to other fields, e.g., law, health care, etc.

Attributes: LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]
Equivalent to: PSY 360H

PSY 360H. SOCIAL PSYCHOLOGY. (4 Credits)
The study of behavior and experience in a social context. Topics
include person perception, attribution, attraction and love, attitudes and
attitude change, aggression and social influence and group dynamics.
Applications of social psychological principles to other fields, e.g., law,
health care, etc. (SS)

Attributes: HNRS – Honors Course Designator; LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]
Equivalent to: PSY 360

PSY 370. PERSONALITY. (4 Credits)
An overview of major theories of personality is followed by an
introduction to personality testing and research. (SS)

Attributes: LACS – Liberal Arts Social Core
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 381H. PSYCHOPHARMACOLOGY. (4 Credits)
Drug-brain-behavior interactions. Psychoactive drugs and their
relationships to normal and abnormal behavior in humans.
Recommended: Upper-division standing and biological science
background

PSY 381. ABNORMAL PSYCHOLOGY. (4 Credits)
Survey of various forms of psychological disorders; theories regarding
etiology and treatment. Special emphasis on research approaches to
such disorders.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]
Equivalent to: PSY 381H

PSY 399H. SPECIAL TOPICS. (1-6 Credits)
This course is repeatable for 30 credits.

PSY 399. SPECIAL TOPICS. (1-6 Credits)

PSY 401. RESEARCH. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 402. INDEPENDENT STUDY. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 407. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 408. WORKSHOP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 410. PSYCHOLOGY INTERNSHIP. (1-16 Credits)
Professional experience applying psychological science in a variety
of employment settings under joint faculty and employer supervision.
Graded P/N.

This course is repeatable for 16 credits.

PSY 426. *PSYCHOLOGY OF GENDER. (4 Credits)
Survey of theories, life cycles and contemporary problems of women
and men in a social context. Scientific examination of gender related
to psychological functioning and behavior. Topics can include psychological
research on human similarities and differences in gender attitudes,
relationships, sexuality, violence, employment, and mental health. (Bacc
Core Course)
Attributes: CPDP – Core, Perspective/Difference/Power/Discrimination
Prerequisites: PSY 202 with D- or better

PSY 432. PHYSIOLOGICAL PSYCHOLOGY. (4 Credits)
Basic vertebrate neurophysiology and neuroanatomy in relation to
behavior. Neural and hormonal correlates of sensation, learning, memory
and motivation.
Prerequisites: PSY 330 with D- or better
Recommended: Biological science background

PSY 433. PSYCHOPHARMACOLOGY. (4 Credits)
Drug-brain-behavior interactions. Psychoactive drugs and their
relationships to normal and abnormal behavior in humans.

PSY 434. ^BRAIN AND BEHAVIOR METHODS. (4 Credits)
Methodology primarily in the area of neuropsychological research. Topics
include the finding and interpretation of background literature, critical
evaluation of research, hypothesis formulation, experimental design,
data interpretation, reporting of results and methods, and weaving a
conclusion and review article. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and PSY 330 [D-]

PSY 437. MOTIVATION. (4 Credits)
Biological, learning, and cognitive approaches to human and animal
motivation. Topics include evolution, homeostasis, drive, arousal,
incentive motivation, achievement motivation, and social motivation.
Prerequisites: (PSY 330 with D- or better or PSY 340 with D- or better) and
PSY 301 [D-]

PSY 440. *COGNITION RESEARCH. (4 Credits)
Advanced scientific methodology primarily in the areas of attention,
learning, memory, and thinking. Students will design their own research
projects, collect and analyze data, and write a professional report.
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 442. PERCEPTION. (4 Credits)
Fundamental concepts of animal and human sensation and perception,
with emphasis on audition and vision. Applications of psychophysical
methods to research in all sensory modalities. Includes review workshops
on basic mathematical, physical and physiological concepts necessary to
interpret research in this field.
Prerequisites: PSY 301 with D- or better and (PSY 330 [D-] or PSY 340 [D-])

PSY 444. LEARNING AND MEMORY. (4 Credits)
Experimental and theoretical work on learning, conditioning, and memory
in animals and humans.
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]
PSY 448. CONSCIOUSNESS. (4 Credits)
Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness.
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 454. COGNITIVE DEVELOPMENT. (4 Credits)
Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed.
Prerequisites: PSY 350 with D- or better

PSY 456. SOCIAL DEVELOPMENT. (4 Credits)
Covers theories and research concerning human social development. Topics include theories of socialization; the development of social relationships; the self-concept; emotion; sex roles; social cognition; prosocial behavior; morality; self-control; and aggression.
Prerequisites: PSY 350 with D- or better

PSY 458. LANGUAGE ACQUISITION. (4 Credits)
Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well as personal uses of language, such as language in thought and reading.
Prerequisites: PSY 350 with D- or better

PSY 460. *ADVANCED SOCIAL RESEARCH METHODS. (4 Credits)
Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and PSY 360 [D-]

PSY 463. JUDGMENT AND DECISION MAKING. (4 Credits)
Explores ways to improve judgment and decision making through the application of research from cognitive psychology. Emphasis on development of critical thinking skills.
Prerequisites: PSY 340 with D- or better

PSY 464. SOCIAL COGNITION. (4 Credits)
Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing.
Prerequisites: PSY 360 with D- or better

PSY 465. WOMEN, WEIGHT, AND BODY IMAGE. (4 Credits)
Focuses on women’s increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism. CROSSLISTED as WGSS 465.

PSY 466. *FAT STUDIES. (4 Credits)
Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisites: WGSS 223 with D- or better or WGSS 223H with D- or better or WGSS 224 with D- or better or WGSS 240 with D- or better or WGSS 262 with D- or better or WGSS 262H with D- or better or WGSS 270 with D- or better or WGSS 280 with D- or better or WGSS 280H with D- or better or WGSS 321 with D- or better or WGSS 325 with D- or better or WGSS 325H with D- or better or WGSS 340 with D- or better or WGSS 340H with D- or better or WGSS 350 with D- or better or WGSS 360H with D- or better or WGSS 364 with D- or better or WGSS 364H with D- or better or WGSS 373 with D- or better or WGSS 375 with D- or better or WGSS 380 with D- or better or WGSS 380H with D- or better
Equivalent to: WGSS 466, WS 466

PSY 467. POLITICAL PSYCHOLOGY. (4 Credits)
Survey of classic and contemporary perspectives in political psychology. Special focus on how citizens form political judgments. Topics include personality, affect, cognition, group influence, voting, nationalism, and political tolerance.
Prerequisites: PSY 360 with D- or better

PSY 468. THE PSYCHOLOGY OF CLOSE RELATIONSHIPS. (4 Credits)
Explores the research and theory on the development, maintenance, and dissolution of human relationships. The course will examine various directions to the study of interpersonal relationships, including attachment, evolutionary-biological, cognition, and interdependence. Topics will also include physical attraction, love, friendship, communication, trust, jealousy, and several issues that are specific to troubled dyadic relations.
Prerequisites: PSY 360 with D- or better

PSY 470. *PSYCHOMETRICS AND PSYCHOLOGICAL TESTING. (4 Credits)
An introduction to psychological measurement is provided with emphasis on the notions of reliability and validity; advanced correlation techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and (PSY 340 [D-] or PSY 370 [D-] or PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-])

PSY 480. *CLINICAL RESEARCH METHODS. (4 Credits)
Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PSY 301 with D- or better and (PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-])

PSY 482. PSYCHOTHERAPY. (4 Credits)
Survey of the theory, techniques and research on the major contemporary systems of psychotherapy.
Prerequisites: PSY 370 with D- or better or PSY 380 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better
PSY 483. DEVELOPMENTAL PSYCHOPATHOLOGY. (4 Credits)
Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions.
Prerequisites: PSY 350 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better

PSY 484. PSYCHOLOGY OF ADDICTION. (4 Credits)
Focuses on the psychological factors in drug and behavioral addictions and associated interventions. The approach will be biopsychosocial, addressing neurobiological, behavioral, psychological, and social factors that influence addiction. Topics will include epidemiology and public health impact, diagnosis, models of addiction, and intervention and treatment approaches.
Attributes: CWIC – Core, Skills, WIC
Prerequisites: H 220 with C- or better or PSY 301 with C- or better or SOC 315 with C- or better

PSY 485. BEHAVIOR MODIFICATION. (4 Credits)
Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include behavior problems, handicaps, eating disorders, time management, self-control stress management, contingency contracts, and cognitive therapies.
Prerequisites: PSY 350 with D- or better or PSY 380 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better
Recommended: Background work in family life or education

PSY 486. YOGA AND MENTAL HEALTH. (4 Credits)
Examines the use of yoga in psychological practice with a particular focus on managing mental and physical illnesses.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 492. CONSERVATION PSYCHOLOGY. (4 Credits)
Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human well-being. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 493. POSITIVE PSYCHOLOGY. (4 Credits)
Psychological theory, research, and interventions directed at how humans can flourish and identify and enhance positive strengths. Topics include positive emotional and cognitive states and processes, prosocial behavior, positive school and work environments, and discovering meaning in life.
Prerequisites: PSY 360 with D- or better or PSY 370 with D- or better

PSY 494. ENGINEERING PSYCHOLOGY. (4 Credits)
Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs.
Prerequisites: PSY 301 with D- or better and PSY 340 [D-]

PSY 495. PSYCHOLOGY OF MEDITATION. (4 Credits)
Explores the psychological processes of meditation, and requires regular meditation sessions by students. Readings ranging from traditional Eastern philosophy to empirical psychological research journal articles will focus on outcomes and effective methods of meditation practice.
Prerequisites: PSY 201 with D- or better or PSY 202 with D- or better

PSY 496. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY. (4 Credits)
Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation.
Prerequisites: PSY 360 with D- or better or PSY 370 with D- or better

PSY 497. EVOLUTIONARY PSYCHOLOGY. (4 Credits)
Evolutionary approach to the study of psychology. Focus on psychological mechanisms as evolved traits.
Prerequisites: PSY 201 with D- or better and PSY 202 [D-]

PSY 498. HEALTH PSYCHOLOGY. (4 Credits)
Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness.
Prerequisites: PSY 330 with D- or better or PSY 340 with D- or better or PSY 350 with D- or better or PSY 360 with D- or better or PSY 370 with D- or better or PSY 381 with D- or better or PSY 481 with D- or better

PSY 499. SPECIAL TOPICS. (1-16 Credits)
Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus.
Equivalent to: PSY 422, PSY 499H
This course is repeatable for 30 credits.

PSY 499H. SPECIAL TOPICS. (1-16 Credits)
Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus.
Attributes: HNRS – Honors Course Designator
Equivalent to: PSY 499

PSY 501. RESEARCH. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 502. INDEPENDENT STUDY. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 503. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

PSY 505. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 506. PROJECTS. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 507. SEMINAR. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 508. WORKSHOP. (1-16 Credits)
Graded P/N.
This course is repeatable for 16 credits.

PSY 510. PSYCHOLOGY INTERNSHIP. (1-16 Credits)
Professional experience applying psychological science in a variety of employment settings under joint faculty and employer supervision.
Graded P/N.
This course is repeatable for 16 credits.
PSY 514. RESEARCH METHODS I. (4 Credits)
An introduction to the tools and methods that psychologists use to examine the processes that underlie human behavior. Emphasis is on the skills necessary for completing a research study: hypothesis formulation, design criteria, data collection, analysis, interpretation, write-up, and presentation of results. Utilizes a combination of readings, discussions, and class exercises. Course culminates in an independent research project proposal.
Prerequisites: ST 511 with B- or better

PSY 521. ISSUES IN PROFESSIONAL PSYCHOLOGY. (1 Credit)
Professional development seminar focused on professional issues specific to the field of research-based psychology. Includes writing for publication, professional speaking, professional development and leadership, and current professional and research controversies. Each iteration of the course over the academic year will have a different focus. Graded P/N. This course is repeatable for 3 credits.

PSY 523. ETHICS IN PSYCHOLOGICAL RESEARCH. (1 Credit)
Covers research ethics in psychology. Topics include the history of research-oriented ethical guidelines, ethical principles, working with an IRB, questionable research practices, and fraud. Meets OSU's Learning Outcome regarding the ethical conduct of research. Recommended: An undergraduate-level psychological research methods course

PSY 526. PSYCHOLOGY OF GENDER. (4 Credits)
Survey of theories, life cycles and contemporary problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health. Recommended: PSY 202

PSY 531. GRADUATE BEHAVIORAL NEUROSCIENCE. (4 Credits)
Neurobiological underpinnings of behavior examining animal and human research on neural structure and function in relation to typical and atypical behavior, including psychiatric disorders.

PSY 533. PSYCHOPHARMACOLOGY. (4 Credits)
Drug-brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans. Recommended: Biological science background

PSY 534. BRAIN AND BEHAVIOR METHODS. (4 Credits)
Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article. Recommended: PSY 301 and PSY 330

PSY 537. MOTIVATION. (4 Credits)
Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation. Recommended: PSY 301 and (PSY 330 or PSY 340)

PSY 540. COGNITION RESEARCH. (4 Credits)
Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking. Students will design their own research projects, collect and analyze data, and write a professional report. Recommended: PSY 301 and PSY 340

PSY 541. GRADUATE SEMINAR IN COGNITION. (4 Credits)
Cognitive psychology studies the processes by which human beings notice, encode, remember, and use information. A graduate-level survey that covers the history, methods, important findings, and major theories of the field, with an emphasis on reading and critically analyzing articles from the primary research literature. Topics of interest will include perception and object recognition, attention, working memory, long-term memory, concepts and categorization, and judgment and decision making.

PSY 542. PERCEPTION. (4 Credits)
Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision. Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and physiological concepts necessary to interpret research in this field. Recommended: PSY 301 and (PSY 330 or PSY 340)

PSY 544. LEARNING AND MEMORY. (4 Credits)
Experimental and theoretical work on learning, conditioning, and memory in animals and humans. Recommended: PSY 301 and PSY 340

PSY 548. CONSCIOUSNESS. (4 Credits)
Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness. Recommended: PSY 301 and PSY 340

PSY 551. LIFESPAN DEVELOPMENTAL SCIENCE. (4 Credits)
The study of human change and stability over time. Topics may include, but are not limited to, theories, methodological approaches, and contexts for development, social development, cognitive development, and biopsychosocial processes including temperament and personality, resilience, health, thriving, emotion regulation, and developmental contexts.

PSY 554. COGNITIVE DEVELOPMENT. (4 Credits)
Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed. Recommended: PSY 350

PSY 556. SOCIAL DEVELOPMENT. (4 Credits)
Covers theories and research concerning human social development. Topics include theories of socialization, the development of social relationships; the self-concept; emotion; sex roles; social cognition; prosocial behavior; morality; self-control; and aggression. Recommended: PSY 350

PSY 558. LANGUAGE ACQUISITION. (4 Credits)
Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well as personal uses of language, such as language in thought and reading. Recommended: PSY 350

PSY 560. ADVANCED SOCIAL RESEARCH METHODS. (4 Credits)
Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. Recommended: PSY 301 and PSY 360
PSY 561. GRADUATE SOCIAL PSYCHOLOGY. (4 Credits)
A graduate level survey course of the theories, methods, and empirical findings that constitute the field of social psychology. Topics will include, but not be limited to, person perception, social cognition, attitudes, attitude change, persuasion, interpersonal attraction, relationships, small-group processes, altruism, and aggression.

PSY 564. SOCIAL COGNITION. (4 Credits)
Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing.
Recommended: PSY 360

PSY 565. WOMEN, WEIGHT, AND BODY IMAGE. (4 Credits)
Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism.
Equivalent to: WGSS 565

PSY 566. FAT STUDIES. (4 Credits)
Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566.
Equivalent to: WGSS 566, WS 566
Recommended: WGSS 223 or WGSS 223H or WGSS 224 or WGSS 240 or WGSS 262 or WGSS 262H or WGSS 270 or WGSS 280 or WGSS 280H or WGSS 321 or WGSS 325 or WGSS 325H or WGSS 340 or WGSS 340H or WGSS 350 or WGSS 360 or WGSS 360H or WGSS 364 or WGSS 364H or WGSS 373 or WGSS 375 or WGSS 380 or WGSS 380H

PSY 567. POLITICAL PSYCHOLOGY. (4 Credits)
Survey of classic and contemporary perspectives in political psychology. Special focus on how citizens form political judgments. Topics include personality, affect, cognition, group influence, voting, nationalism, and political tolerance.

PSY 570. PSYCHOMETRICS AND PSYCHOLOGICAL TESTING. (4 Credits)
An introduction to psychological measurement is provided, with emphasis on the notions of reliability and validity; advanced correlational techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement.
Recommended: PSY 301 and (PSY 340 or PSY 370)

PSY 571. GRADUATE PSYCHOMETRICS. (4 Credits)
A graduate level introduction to psychological testing theory and practice, and to ethical, sociopolitical, psychological, and psychometric issues in the use of psychological tests. Particularly emphasizes basic psychometric principles that are important in scale construction, test evaluation, and practical assessment.
Prerequisites: ST 511 with B- or better and ST 512 [B-]

PSY 580. CLINICAL RESEARCH METHODS. (4 Credits)
Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary.
Recommended: PSY 301 and (PSY 380 or PSY 381 or PSY 481)

PSY 581. GRADUATE SEMINAR IN CLINICAL RESEARCH AND THEORY. (4 Credits)
Focuses on major concepts, theory, and empirical findings on the causes and treatment of psychological disorders. The seminar emphasizes culture, context, bias, and stigma, as well as application of principles of clinical science to students’ graduate program research agendas.

PSY 582. PSYCHOTHERAPY. (4 Credits)
Survey of the theory, techniques and research on the major contemporary systems of psychotherapy.
Recommended: PSY 370 or PSY 381

PSY 583. DEVELOPMENTAL PSYCHOPATHOLOGY. (4 Credits)
Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions.
Recommended: PSY 350 or PSY 381 or PSY 481

PSY 584. PSYCHOLOGY OF ADDICTION. (4 Credits)
Focuses on the psychological factors in drug and behavioral addictions and associated interventions. The approach will be biopsychosocial, addressing neurobiological, behavioral, psychological, and social factors that influence addiction. Topics will include epidemiology and public health impact, diagnosis, models of addiction, and intervention and treatment approaches.

PSY 585. BEHAVIOR MODIFICATION. (4 Credits)
Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include: behavior problems, handicaps, eating disorders, time management, self-control, stress management, contingency contracts, and cognitive therapies.
Recommended: PSY 350 or equivalent work in family life or education.

PSY 586. YOGA AND MENTAL HEALTH. (4 Credits)
Examines the use of yoga in psychological practice with a particular focus on managing mental and physical illnesses.
Recommended: PSY 201 and PSY 202

PSY 591. GRADUATE SEMINAR IN HEALTH PSYCHOLOGY. (4 Credits)
Covers the theories, methods, and empirical findings that constitute the field of health psychology. Topics include, but are not limited to, the interaction of multiple factors involved in etiology, prevention, treatment, and course of illness and disability; health behavior, health promotion, and health risks; stress and coping in health; long-term care and adaptation to chronic illness or disability; practice of institutional healthcare.

PSY 592. CONSERVATION PSYCHOLOGY. (4 Credits)
Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human well-being. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature.
Recommended: PSY 201 and PSY 202

PSY 593. POSITIVE PSYCHOLOGY. (4 Credits)
Psychological theory, research, and interventions directed at how humans can flourish and identify and enhance positive strengths. Topics include positive emotional and cognitive states and processes, prosocial behavior, positive school and work environments, and discovering meaning in life.
Recommended: PSY 360 or PSY 370
PSY 594. ENGINEERING PSYCHOLOGY. (4 Credits)
Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs.
Recommended: (PSY 301 and PSY 340)

PSY 595. PSYCHOLOGY OF MEDITATION. (4 Credits)
Explores the psychological processes of meditation, and requires regular meditation sessions by students. Readings ranging from traditional Eastern philosophy to empirical psychological research journal articles will focus on outcomes and effective methods of meditation practice.
Recommended: PSY 201 and PSY 202

PSY 596. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY. (4 Credits)
Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation.
Recommended: PSY 360 and PSY 370

PSY 598. HEALTH PSYCHOLOGY. (4 Credits)
Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness.
Recommended: 300-level course in psychology.

PSY 599. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 99 credits.

PSY 601. RESEARCH. (1-16 Credits)
Research credits for PhD students in Psychological Science. Graded P/N. This course is repeatable for 99 credits.

PSY 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 603. THESIS/DISSERTATION. (1-16 Credits)
Graded P/N. This course is repeatable for 999 credits.

PSY 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 606. SPECIAL PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 608. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.

PSY 643. APPLIED COGNITION. (4 Credits)
Surveys a range of applied cognition research in real-world settings, including aviation, driving, business, education, sports, legal practice, and everyday activities.

PSY 649. ADVANCED ENGINEERING PSYCHOLOGY. (4 Credits)
Advanced survey of human information processing and performance in human-technology systems, with emphasis on theory, methodology, and implications for system analysis and design.

PSY 697. GRADUATE PSYCHOLOGICAL SCIENCE OF TEACHING AND LEARNING. (4 Credits)
For graduate students of all majors on the translation of cognitive, social, and developmental psychological science for the practice of university teaching and learning. Topics include memory, attention, metacognition, motivation, interpersonal and developmental processes, and individual differences. Emphasis on critical review of theories and methods, and practical applications for university teaching.

PSY 699. SPECIAL TOPICS. (1-16 Credits)
Special topics for advanced graduate students. Graded A-F. This course is repeatable for 99 credits.

Contemplative Studies Minor

This minor combines courses from several areas to foster an objective understanding of contemplative practices and philosophies by studying them in the context of psychology, philosophy, religion, history, health, and other academic areas. In addition to coursework, Contemplative Studies includes first-person experience with practicing contemplation, adding an increasingly-valued complement to theory-based learning. This approach qualifies as experiential learning, which is an OSU emphasis. A large research literature has shown that contemplative practice has a variety of beneficial effects for people, including enhanced attentional ability, increased compassion, better physical and mental health, and increased personal insight. Other benefits of contemplative practices include cultivating the ability to be resilient in the face of challenges, reducing our experience of stress, and improving relationships.

Contemplative practices are increasingly being used in a variety of professional and work settings, including education, organizational wellness programs, counseling, and many areas of healthcare. Because of this, Contemplative Studies will be a useful minor to add to many disciplines, including Psychology, HDFSciences, BioHealth Sciences, Education, Digital Communication Arts, and others. Business schools at Harvard, Stanford, University of Virginia, and, increasingly, others, value, teach, research, and promote adding studies in contemplation as an important, complementary education and skill set for leadership, productiveness, effectiveness, and well-being of their graduates in preparing them for a career in business and related fields.

Upon completion of a Minor in Contemplative Studies at Oregon State University, you will be able to:

(1) Demonstrate effective application of multiple forms of contemplative practice
(2) Articulate the research-based benefits of contemplative practice
(3) Articulate the connections between contemporary contemplative practices and their historical contexts

Minor Code: 802

A minor in Contemplative Studies can be earned by satisfactorily completing 27 credits from the following list of courses, which must include 12 upper division credits (300 and 400 level courses).

Check with your own college’s policies to see if the same course can count to meet different degree requirements.

Department of Psychology
Graduate Areas of Concentration

Applied cognition, engineering psychology, health psychology

The MS and Ph.D. program is a doctoral program with a Master’s degree component that is obtained en route to the Ph.D. The MS portion of the program assures that students have experience designing and conducting research prior to the dissertation stage. The program has a strong research component, ensuring that graduates have the tools to tackle a variety of applied problems. This entails both classwork in research methods and statistics and a continuing emphasis on student research.

The program’s general focus is on the application of psychological research methods, theories, and principles to solving practical problems. The program has three areas of concentration: applied cognition, engineering psychology, and health psychology.

Applied cognition is the application of research on thinking, learning, decision-making, perception, social judgment, and other cognitive processes to applied issues. Examples of relevant application areas include the psychology of teaching and learning, the effects of contemplative practice, and risk perception.

Engineering psychology refers to research at the intersection of psychology and technology. Relevant topics include such things as the improvement of technology, human-machine interfaces, transportation, information systems, and work and living environments.

Health psychology concerns the relations between psychological factors (e.g., cognition, motivation, individual and interpersonal behavior, emotion) and physical and mental health and wellness in diverse populations with regard to age, gender, ethnicity, socioeconomic background, and health status.

Admission Requirements

Bachelor’s or Master’s degree from an accredited institution; minimum undergraduate GPA of 3.2/4.0 or graduate GPA of 3.5/4.0; GRE, TOEFL score of at least 600 (paper exam), 250 (computer exam), or 100 (internet exam); three letters of recommendation; personal statement.

Major Code: 9700

The Psychology PhD program requires a minimum of 111 credits, including at least 36 credits of dissertation. The program is organized into core requirements for all students, along with additional work in a concentration area composed of electives, the nature of which is defined primarily by the student’s research focus.

The core requirements are in research methods, professional issues, and basic content in psychology. The required core curriculum provides a critical foundation in quantitative and research methods, core theory in psychological science, ethics, and professional issues.

No more than 15 credits of blanket-numbered classes, excluding dissertation, thesis, or internship credit, may be used towards the 111 credit minimum.

Psychology Graduate Minor

Graduate Areas of Concentration

General psychology

Graduate work in the School of Psychological Science may apply to the Master of Arts in Interdisciplinary Studies degree or to minors in other advanced degree programs.

Minor Code: 9650

Minor Code: 9650

Psychology Minor

Also available at OSU-Cascades, OSU-Portland and via Ecampus.

The School of Psychological Science offers students a variety of educational avenues that provide the necessary tools for competency in, and appreciation for, psychology as a scientific discipline.

Many of our graduates will go straight into the workforce into areas such as human services, human resources, and educational assistants. Many graduates will also continue their education through professional schools such as law, medicine, or optometry. Others will engage in further study in business or in public administration. Some students will continue their study of Psychology at a school with a graduate program in one of the specialties area of psychology.

In addition to classes whose contents span the many sub disciplines of psychology, the School of Psychological Science at Oregon State values the intellectual contributions of its students and offers a number of opportunities for research experience.

Minor Code: 965

Students should consult their major advisors to see if specific courses are required for their major. Students must receive a grade of C– or better in any course applied toward the minor. Such courses cannot be taken with S/U grading.

Psychology Undergraduate Major
(BA, BS, HBA, HBS)

Also available at OSU-Cascades, OSU-Portland and via Ecampus.

The School of Psychological Science offers students a variety of educational avenues that provide the necessary tools for competency in, and appreciation for, psychology as a scientific discipline.

Many of our graduates will go straight into the workforce into areas such as human services, human resources, and educational assistants. Many graduates will also continue their education through professional schools such as law, medicine, or optometry. Others will engage in further study in business or in public administration. Some students will continue their study of Psychology at a school with a graduate program in one of the specialty areas of psychology.

In addition to classes whose contents span the many sub disciplines of psychology, the School of Psychological Science at Oregon State values the intellectual contributions of its students and offers a number of opportunities for research experience.

School of Public Policy

Policy is about the way we make decisions in both private and public contexts. Faculty and students in the School of Public Policy are interested in a wide variety of decision contexts and are particularly interested in advancing the social and policy-related dimensions of OSU’s three areas of distinction: sustainable ecosystems, health and wellness, and economic growth and progress. The School of Public Policy offers undergraduate majors and minors in economics, political science, and sociology, as well as the Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in political science and sociology. School faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

Undergraduate Programs

The School of Public Policy offers undergraduate major and minor programs in economics, political science, and sociology.

Economics Program

The economics program is an excellent choice for students interested in:

- Law school or graduate programs in business, economics, public administration or other social sciences.
- Careers in business or public management.
- Becoming wiser consumers and better-informed citizens.

The study of economics provides a framework for logical thought that can be used to address a wide variety of practical problems and situations. It can provide uncommon insights into society itself. Indeed, people holding degrees in economics are increasingly sought for positions of responsibility and authority in government, business, and industry. The economics major is useful preparation for various careers and for graduate study in many fields, primarily because it does not lead simply to the accumulation of facts but rather develops analytical skills that can be used in many ways.

Political Science Program

Graduates of the political science program pursue:

- Careers in all levels of government, foreign service, national and international nongovernmental organizations, journalism, business or public management.
- Law school or graduate programs in political science, public administration, public policy, business, or other social sciences.
- Elected office.

Students can focus their interests in different subfields, including American politics, public law, political theory, international relations, and comparative politics (for example, Asia, Latin America, Western Europe, Russia). Political science majors are encouraged to incorporate a minor in other social science fields such as economics, psychology, or sociology, or in a field of interest related to their specialization in political science. For example, students with an interest in international relations or comparative politics may choose to minor in a language or in history, emphasizing a specific part of the world. Political science majors also are encouraged to consider the International Degree and IE3 Global Internships.

Sociology Program

Graduates of the sociology program pursue:

- Careers in community development, criminal justice, business, public policy and administration, social services, non-profit organizations, and research and teaching.
- Graduate programs in sociology, criminology, public policy, social services, human resources, law, social work and other social sciences.

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of
interest adds meaning to one’s education and strengthens the base of understanding from which one can pursue a career or further education. Two options are currently available for Corvallis campus students — Crime and Justice, and Environmental and Natural Resource Sociology — with the Environmental and Natural Resource option also available for Ecampus students.

Graduate Programs

The School of Public Policy offers a Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in Political Science and Sociology, and courses applicable toward the graduate degree in Applied Economics. Faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

Master of Public Policy (MPP)

Graduates of the MPP program:

- Are employed at all levels of government as policy analysts, project managers, and managers.
- Work in national and international nongovernmental organizations like the United Nations.
- Pursue further graduate training in law, public administration, public affairs, public policy, and other social science disciplines.

Policy students at OSU focus their studies around environmental and natural resource policy, international policy, social policy, and rural policy, working with strong researchers around campus. Internships with agencies and organizations give policy students real world experience and networks to enhance their classroom education.

PhD in Public Policy

The PhD in Public Policy prepares students for academic or nonacademic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. Like the MPP, the PhD program offers concentrations in energy policy; international policy, law, crime, and policy; rural policy; science and technology policy; and/or social policy.

Master of Arts in Interdisciplinary Studies (MAIS)

The MAIS program is designed to meet the particular needs and interests of individual students and features collaborative work in any two or three pertinent departments or schools. Sociology faculty members may serve as advisors to students selecting sociology as either a major field or minor field of concentration.

Graduate Minors

Political Science

Master’s or PhD students interested in adding a Political Science minor should follow the guidelines within their major program in declaring a minor. All students declaring political science as a graduate minor must contact the program coordinator prior to doing so. See the Political Science website (http://gradschool.oregonstate.edu/programs/9600) for a listing of requirements for the minor concentration.

Sociology

Master’s or PhD students interested in adding a Sociology minor should follow the guidelines within their major program in declaring a minor. The minimum number of credits for sociology is 15 or higher if required by the major. All students declaring sociology as a graduate minor must contact the program coordinator prior to doing so. See the Sociology website (http://liberalarts.oregonstate.edu/spp/sociology/programs/graduate-programs/graduate-minor) for a listing of requirements for the minor concentration.

Undergraduate Programs

Majors

- Economics (p. 758)
  - General Economics (p. 759)
  - Law, Economics and Policy
  - Managerial Economics
  - Mathematical Economics
- Political Science (p. 763)
  - Environmental and Energy Politics
  - International Affairs
  - Law and Politics
- Public Policy (p. 767)
- Social Science (http://catalog.oregonstate.edu/college-departments/liberal-arts/other-degrees-programs/social-science-ba-bs)
  - Sociology (p. 770)
  - Crime and Justice
  - Environmental and Natural Resource Sociology

Minors

- Asian Studies (p. 758)
- Economics (p. 758)
- Political Science (p. 762)
- Sociology (p. 769)

Graduate Programs

Majors

- Interdisciplinary Studies (p. 1046)
- Public Policy (p. 766)

Minors

- Political Science (p. 761)
- Sociology (p. 769)

Certificate

- Rural Policy (p. 769)

Laura Relyea, Economics Advisor
ECON 202. *INTRODUCTION TO MACROECONOMICS. (4 Credits)
An introduction to macroeconomic principles including study of the theories of output determination, consumption, investment, inflation, unemployment, and fiscal and monetary policy. Other selected topics may include the study of the international balance of payments, growth and development, and urban and regional problems. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: ECON 202H
Recommended: MTH 111

ECON 311. INTERMEDIATE MICROECONOMIC THEORY. (4 Credits)
An examination of demand theory, production and cost theory, game theory, behavioral economics, competitive and imperfectly competitive markets, and general equilibrium and welfare economics. ECON 311 and ECON 411 cannot both be taken for credit toward the Economics major.
Prerequisites: ECON 201 with D- or better or ECON 201H with D- or better
Equivalent to: AREC 311, EC 311

ECON 315. INTERMEDIATE MACROECONOMIC THEORY. (4 Credits)
An examination of macroeconomic aggregates, income determination, aggregate demand and supply. The basic macroeconomic models will be discussed such as Keynesian, Classical, Monetarist, and Neo-Classical.
ECON 315 and ECON 415 cannot both be taken for credit toward the Economics major.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])
Equivalent to: EC 315

ECON 329. INTRODUCTION TO MATHEMATICAL ECONOMICS. (4 Credits)
Mathematical methods of economic analysis. Theory of economic structure and optimization developed through calculus and linear algebra, dynamic systems analyzed through integral calculus and difference and differential equations. The mathematical tools are developed in conjunction with their application to economic problems. Some acquaintance with calculus recommended.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-]) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-])
Equivalent to: EC 329

ECON 330. MONEY AND BANKING. (4 Credits)
Nature and functions of money; functions and operations of depository institutions; the money market; central banking and monetary policy. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])
Equivalent to: EC 330

ECON 340. INTERNATIONAL ECONOMICS. (4 Credits)
An overview of international economics with an emphasis on current events and applications, including classical and modern trade theory and the study of trade and exchange-rate policies. (SS) (See Schedule Comment regarding Bacc Core status.)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-])
Equivalent to: EC 340

Faculty
Professors M. Edwards, Emerson, Gallagher, Lach, Meng, Plaza, Steel, C. Tremblay, V. Tremblay, Warner, Weber
Associate Professors Akins, Bernell, Boudet, Burkhardt, Cramer, Hammer, Henderson, Hurst, Inderbitzin, M. Jones, Johnston, Li, Ortiz, Pugatch, Schroeder, Solberg, Valls
Assistant Professors Kretschmer, Spalding, Stout, Thompson, Vue, Wolters
Instructors Andersen, Cheshbro, Jerman, Kneis, M. Nelson, C. Soltau, Nelson, Stanley, Trevathan
Professor Emeriti Clinton, Cordray, Färe, Foster, Grosskopf, Lunch, Sahr
ECON 350. FINANCIAL ECONOMICS. (4 Credits)
Discusses how various securities meet the needs of different economic agents and the efficiency of financial markets in meeting those needs. Topics include interest rates, valuation, investment risk, trading and market structure, arbitrage, market efficiency, debt markets, equity markets, and financial derivatives.
Prerequisites: ECON 201 with D- or better and ECON 202 [D-]
ECON 352. *ENVIRONMENTAL ECONOMICS AND POLICY. (3 Credits)
Provides an overview of the interrelationships between economic activity, the environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. CROSSLISTED as AEC 352.
(Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Prerequisites: AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better
Equivalent to: AEC 352, AREC 352, AEC 352H, EC 352, ECON 352H
ECON 383. *THE ECONOMICS OF DISCRIMINATION. (4 Credits)
An economic analysis of discrimination, focusing on labor market inequities for women and minorities. Historical and current trends in pay, education, and employment disparities, economic explanations for such disparities, and econometric evidence for wage and employment discrimination. (SS) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACS – Liberal Arts Social Core
Prerequisites: ECON 201 with C- or better or ECON 201H with C- or better
Equivalent to: EC 383
ECON 399. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 399H. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 401. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 402. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 403. THESIS. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 405. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 406. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 407. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 408. WORKSHOP. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 410. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.
ECON 411. ADVANCED MICROECONOMIC THEORY. (4 Credits)
Rigorous treatment of optimizing behavior of economic agents and markets. Examines utility maximization and demand; cost minimization, profit maximization and supply; perfect competition and monopoly; imperfect competition and game theory; and general equilibrium, social welfare and market failure using sophisticated mathematical tools. Students cannot receive credit toward the major for both ECON 311 and ECON 411.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-])
ECON 414. BEHAVIORAL ECONOMICS. (4 Credits)
Economic analysis of the effects of social, cognitive, and emotional factors on individual decision making and their implications for market outcomes and policy making. Topics include time inconsistency, decision making under risk, cognitive dissonance, heuristics, social preferences, and experimental economics.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better
ECON 415. ADVANCED MACROECONOMIC THEORY. (4 Credits)
Macroeconomics as an application of general equilibrium theory. Macroeconomic models are developed taking preferences and technology as primitives. The models’ short and long run predictions are analyzed and compared to the data. The welfare implications of fiscal and monetary policy are discussed. ECON 315 and ECON 415 cannot both be taken for credit toward the major.
Prerequisites: (ECON 201 with D- or better or ECON 201H with D- or better) and (ECON 202 [D-] or ECON 202H [D-]) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-])
ECON 420. GAME THEORY. (4 Credits)
Systematically studies strategic interactions among multiple decision makers with applications in economics, politics, sociology, law, computer science, sports, and biology. Topics taught include static, sequential, and repeated games of perfect and imperfect information.
Attributes: LACS – Liberal Arts Social Core
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better
Equivalent to: EC 420
ECON 423. PRE-ECONOMETRICS. (4 Credits)
Introduction to probability and statistics with an emphasis on estimation and hypothesis testing. Applications to economic models.
Prerequisites: MTH 241 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better
ECON 424. INTRODUCTION TO ECONOMETRICS. (4 Credits)
Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized. ECON 424 and ECON 427 cannot both be taken for credit toward the major. Lec/lab.
Prerequisites: (ECON 311 with C or better or ECON 411 with C or better) and (ST 351 [C] or ST 351H [C] or ECON 423 [C])
Equivalent to: ECON 325
ECON 427. INTRODUCTION TO ECONOMETRICS WITH CALCULUS. (4 Credits)
Addresses both the theory and practice of econometrics, including properties of estimators, modeling economic processes, estimation, hypothesis testing, prediction and interpretation of results. Students cannot receive credit toward the major for both ECON 424 and ECON 427.
Prerequisites: (ECON 311 with C or better or ECON 411 with C or better) and ECON 423 [C]

ECON 428. *INTRODUCTION TO ECONOMIC RESEARCH. (4 Credits)
Basic methods of economic research: concepts and models; data sources, collection, and presentation; hypothesis formulation and testing; policy analysis. Written assignments apply methods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECON 311 with C- or better or ECON 411 with C- or better
Equivalent to: ECON 328
Recommended: Prior completion of WR II

ECON 435. PUBLIC ECONOMICS. (4 Credits)
Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy.
Prerequisites: ECON 311 with C- or better or ECON 411 with C- or better
Equivalent to: EC 435

ECON 439. *PUBLIC POLICY ANALYSIS. (4 Credits)
Theory of public problems and decision making. Evaluation of public policy strategies, selected public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better
Equivalent to: EC 439

ECON 440. ECONOMICS OF GLOBALIZATION. (4 Credits)
Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate—offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance.
Prerequisites: ECON 311 with D- or better
Equivalent to: EC 440

ECON 441. INTERNATIONAL FINANCE THEORY AND POLICY. (4 Credits)
Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions.
Prerequisites: ECON 315 with D- or better
Equivalent to: EC 441

ECON 455. ECONOMIC DEVELOPMENT. (4 Credits)
History, theories and policies for economic development in the Third World of underdeveloped countries. (SS)
Attributes: LACS – Liberal Arts Social Core
Prerequisites: ECON 201 with D- or better and ECON 202 [D-]
Equivalent to: EC 449, EC 450, EC 455

ECON 460. INDUSTRIAL ORGANIZATION THEORY AND POLICY. (4 Credits)
The study of the causes of market structure, the behavior of firms in game theoretic settings, and the welfare implications of competitive and imperfectly competitive markets; United States antitrust and other laws regulating business behavior.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better
Equivalent to: EC 460

ECON 461. LAW, ECONOMICS, AND REGULATION. (4 Credits)
The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals.
Prerequisites: ECON 201 with D- or better or ECON 201H with D- or better

ECON 462. MANAGERIAL ECONOMICS. (4 Credits)
The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better

ECON 463. EFFICIENCY AND PRODUCTIVITY ANALYSIS. (4 Credits)
Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software.
Prerequisites: ECON 311 with C or better or ECON 411 with C or better

ECON 466. *ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY. (4 Credits)
Reviews and analyzes the economics and structure of world markets for various traditional energy (e.g., oil, coal, natural gas), as well as renewable energy (wind, geothermal and solar) with the latter focusing on the Pacific Northwest electrical industry structure and regulatory framework. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisites: ECON 201 with D- or better or ECON 201H with D- or better

ECON 480. LABOR ECONOMICS AND SOCIAL POLICY. (4 Credits)
Interaction of workers and firms in labor markets, social policy and its effects on labor markets, human capital theory and education policy, discrimination and other sources of wage differentials, immigration, unemployment, inequality.
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better
Equivalent to: EC 480
Recommended: Microeconomics such as ECON 517

ECON 491. ECONOMICS OF INEQUALITY. (4 Credits)
Prerequisites: ECON 311 with D- or better or ECON 411 with D- or better
Equivalent to: EC 491

ECON 499. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.
Recommended: ECON 311 or ECON 411

ECON 501. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
Equivalent to: EC 501
This course is repeatable for 16 credits.

ECON 502. INDEPENDENT STUDY. (1-16 Credits)
Equivalent to: EC 502
This course is repeatable for 16 credits.
ECON 503. THESIS. (1-16 Credits)
Equivalent to: EC 503
This course is repeatable for 999 credits.

ECON 505. READING AND CONFERENCE. (1-16 Credits)
Equivalent to: EC 505
This course is repeatable for 16 credits.

ECON 506. PROJECTS. (1-16 Credits)
Equivalent to: EC 506
This course is repeatable for 16 credits.

ECON 507. SEMINAR. (1-16 Credits)
Equivalent to: EC 507
This course is repeatable for 16 credits.

ECON 510. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 512. MICROECONOMIC THEORY I. (4 Credits)
Economic theories of consumer behavior and demand, production, cost, the firm, supply, and competitive and monopoly market structures.
Equivalent to: AREC 512
Recommended: ECON 512

ECON 513. MICROECONOMIC THEORY II. (4 Credits)
Economic theories of imperfect competition, input markets, general equilibrium and welfare economics.
Equivalent to: AREC 513
Recommended: ECON 512

ECON 514. BEHAVIORAL ECONOMICS. (4 Credits)
Economic analysis of the effects of social, cognitive, and emotional factors on individual decision making and their implications for market outcomes and policy making. Topics include time inconsistency, decision making under risk, cognitive dissonance, heuristics, social preferences, and experimental economics.
Recommended: ECON 311 or ECON 411

ECON 515. MACROECONOMIC THEORY I. (4 Credits)
Determination of income, employment, and prices in classical, Keynesian, monetarist, and new classical macroeconomic models. Theories of consumption, investment, money demand, and money supply. Monetary and fiscal policies, the role of expectations.
Equivalent to: EC 515
Recommended: ECON 515

ECON 517. MICROECONOMIC THEORY FOR MPP. (4 Credits)
Familiarizes MPP students who do not have a strong background in microeconomics with the material they will need for their future economics course work.
Recommended: Working knowledge of algebra and geometry.

ECON 520. GAME THEORY. (4 Credits)
Systematically studies strategic interactions among multiple decision makers with applications in economics, politics, sociology, law, computer science, sports, and biology. Topics taught include static, sequential, and repeated games of perfect and imperfect information.
Equivalent to: EC 520
Recommended: ECON 311 or ECON 411

ECON 523. STATISTICS FOR ECONOMETRICS. (4 Credits)
Examines mathematical and statistical topics essential for graduate-level econometric analysis, including matrix algebra, probability and distribution theory (emphasis on joint and conditional distributions), statistical inference, and econometric optimization algorithms.
Equivalent to: AREC 523
Recommended: MTH 253 and (ST 351 or ST 351H) and (ST 352 or ECON 424 or ECON 524)

ECON 524. INTRODUCTION TO ECONOMETRICS. (4 Credits)
Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized.
Recommended: (ECON 311 or ECON 411 or ECON 517) and (ST 351 or ST 351H or ECON 423)

ECON 525. ECONOMETRIC METHODS. (4 Credits)
The use of multiple regression under generalized assumptions, specification problems, an introduction to simultaneous equation estimation, the classical linear model using matrices. Emphasis on the analysis of data and communication of findings.
Prerequisites: ECON 523 with C or better
Equivalent to: AREC 525, EC 525
Recommended: (ECON 424 or ECON 524) and ECON 512

ECON 526. APPLIED ECONOMETRICS. (4 Credits)
Model building, hypothesis testing, and appropriate estimation procedures including generalized least squares, seemingly unrelated regressions, simultaneous equations, maximum likelihood, and limited dependent variables. Emphasis on applications and interpretation of results.
Equivalent to: AREC 526, EC 526
Recommended: ECON 525

ECON 535. PUBLIC ECONOMICS. (4 Credits)
Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy.
Equivalent to: EC 535
Recommended: ECON 311 or ECON 411

ECON 539. PUBLIC POLICY ANALYSIS. (4 Credits)
Theory of public problems and decision making. Evaluation of public policy strategies, selected public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation.
Equivalent to: EC 539
Recommended: ECON 311 and ECON 435

ECON 540. ECONOMICS OF GLOBALIZATION. (4 Credits)
Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate—offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance.
Equivalent to: EC 540
Recommended: ECON 311
ECON 541. INTERNATIONAL FINANCE THEORY AND POLICY. (4 Credits)
Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions.
Equivalent to: EC 541
Recommended: ECON 315

ECON 555. ECONOMIC DEVELOPMENT. (4 Credits)
History, theories and policies for economic development in the Third World of underdeveloped countries.
Equivalent to: EC 555
Recommended: (ECON 201 or ECON 201H) and (ECON 202 or ECON 202H)

ECON 560. INDUSTRIAL ORGANIZATION THEORY AND POLICY. (4 Credits)
The study of the causes of market structure, the behavior of firms in game theoretic settings, and the welfare implications of competitive and imperfectly competitive markets; United States antitrust and other laws regulating business behavior.
Equivalent to: EC 560
Recommended: ECON 311 or ECON 411

ECON 561. LAW, ECONOMICS, AND REGULATION. (4 Credits)
The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals.
Recommended: ECON 201 or ECON 201H

ECON 562. MANAGERIAL ECONOMICS. (4 Credits)
The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions.
Recommended: ECON 311 or ECON 411

ECON 563. EFFICIENCY AND PRODUCTIVITY ANALYSIS. (4 Credits)
Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software.
Recommended: ECON 311 or ECON 411

ECON 566. ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY. (4 Credits)
Reviews and analyzes the economics and structure of world markets for various traditional energy (e.g., oil, coal, natural gas), as well as renewable energy (wind, geothermal and solar) with the latter focusing on the Pacific Northwest electric utility industry structure and regulatory framework.
Recommended: ECON 201 or ECON 201H

ECON 570. MACROECONOMIC THEORY I. (4 Credits)
Introduction to dynamic macroeconomic theory, including a review of Keynesian models, continuous and discrete time programming, Solow, Ramsey, and endogenous growth models, and real business cycle theory.
Recommended: ECON 315 or equivalent.

ECON 580. LABOR ECONOMICS AND SOCIAL POLICY. (4 Credits)
Interaction of workers and firms in labor markets, social policy and its effects on labor markets, human capital theory and education policy, discrimination and other sources of wage differentials; immigration, unemployment, inequality.
Equivalent to: EC 580
Recommended: ECON 311 or ECON 411 or Microeconomics such as ECON 517

ECON 601. RESEARCH AND SCHOLARSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 602. INDEPENDENT STUDY. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 603. THESIS. (1-16 Credits)
This course is repeatable for 999 credits.

ECON 605. READING AND CONFERENCE. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 606. PROJECTS. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 607. SEMINAR. (1-16 Credits)
This course is repeatable for 16 credits.

ECON 610. INTERNSHIP. (1-16 Credits)
This course is repeatable for 16 credits.

Master of Public Policy

PPOL 406. SPECIAL PROJECTS. (5 Credits)
Associated with the internship for which credit is given in PPOL 410.

PPOL 407. SEMINAR. (1-6 Credits)
This course is repeatable for 6 credits.

PPOL 409. PRACTICUM/CLINICAL EXPERIENCE. (2 Credits)
This discussion-based course will cover topics in public policy based on assigned readings.

PPOL 410. INTERNSHIP WORK EXPERIENCE. (5 Credits)
Supervised work experience in public policy-related programs, government, or organizations. Reports and appraisals required. Only 5 credits may be applied to the major.

PPOL 413. ETHICS IN PUBLIC POLICY. (4 Credits)
Examines ethical dilemmas in public policy, and provides the opportunity to study the ethical theories of Hobbes, Kant, Mill, and Rawls.

PPOL 421. INTRODUCTION TO POLICY RESEARCH. (4 Credits)
Introduction to research design, research ethics, and quantitative and qualitative data collection and analysis. Activities include reading, review questions and exercises, discussion board participation, and data collection, analysis and reporting.
Prerequisites: ECON 201 with D- or better and PS 201 [D-] and SOC 204 [D-]

PPOL 422. POLICY ANALYSIS. (4 Credits)
Overview of common policy analysis approaches, methods and tools used to identify, assess, present and select public policy. Assignments include reading, reflection, exercises and a multi-stage policy analysis memo project using analyses conducted in PPOL 421.
Attributes: CWIC – Core, Skills, WIC
Prerequisites: PPOL 421 with C or better
PPOL 441. *ENERGY AND SOCIETY. (4 Credits)
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

PPOL 446. THE POLICY AND LAW OF U.S. COASTAL GOVERNANCE. (4 Credits)
Examines federal and state policy, legislative and judicial protections of public beach access; ownership and use of tide and submerged lands, including the public trust doctrine; wetland conservation; and the Federal Coastal Zone Management Act. This course is intended to equip future environmental and natural resource professionals with a foundation in US coastal management, especially areas where new professionals will be very involved (coastal development, offshore/alternative energy, and sea level rise/storm hazards). The format includes reading, discussion, and student presentations. Readings will be drawn from the textbook; additional readings will be posted on Canvas.

PPOL 447. INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE. (4 Credits)
Environmental decisions include trade-offs. Policy choices for sustainably providing Earth’s eight billion people with food, energy, and water are urgently needed. Policy sectors (such as food) risk outcomes that are not beneficial, and impose long-term costs and potential catastrophic climate burdens. This transdisciplinary course examines emerging integrated policies concerning provision of food, energy, and water and their relationship to climate.

PPOL 448. MARINE POLICY IN THE UNITED STATES. (4 Credits)
Introduces students to the history, rationale, achievements, and gaps in American ocean policy. Students will acquire foundational tools of policy analysis and problem solving, and will synthesize and apply their knowledge creatively in order to propose integrated policy solutions to specific contemporary marine issues.

PPOL 452. INTERNATIONAL COMPARATIVE RURAL POLICY. (4 Credits)
Examines and compares the role of rural policy in different cultural, political and administrative contexts at the international, national, state, regional and local levels. The course also provides the opportunity to study the nature and implications of new forms of governance in rural contexts in North America and Europe.

PPOL 501. RESEARCH AND SCHOLARSHIP. (1-12 Credits)
Graded P/N.
This course is repeatable for 99 credits.

PPOL 505. READING AND CONFERENCE. (1-10 Credits)
This course is repeatable for 16 credits.

PPOL 507. SEMINAR. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 510. INTERNSHIP. (1-12 Credits)
Supervised work experience in government, public policy, public affairs or non-profit organizations. Reports and appraisals required. Graded P/N.
This course is repeatable for 12 credits.

PPOL 511. PUBLIC ORGANIZATIONS AND LEADERSHIP. (4 Credits)
Provides an historical overview of developments in, and theories associated with, the organization and control of public organizations. Students will critically examine various influential models of bureaucracy, while also learning about the strengths and weaknesses of emergent forms of bureaucratic organization, including networks, public-private partnerships, collaboration, and governance. The course also explores different theories of leadership, assisting students in the development of their own authentic leadership style, and thinking through the application of such theories and styles to the real world of public organization leadership, especially in the fragmented, decentralized, complex, and uncertain contemporary environment of networks, partnerships, and governance.

PPOL 512. PUBLIC POLICY THEORY. (4 Credits)
Theoretical approaches to the study of the policy process, policy elements, policy tools, (e.g., regulation), and policy typologies.
Equivalent to: PS 571

PPOL 521. UNDERSTANDING SOCIAL RESEARCH. (4 Credits)
Study of basic concepts and principles of qualitative and quantitative social research, including selection of general strategies and specific designs, conceptual and operational measurement, sample selection, data collection, data processing and analysis techniques, interpretation and reporting. Utilizes reports of social research in scholarly journals, popular media, and agency documents. Emphasis on critical evaluation and interpretation.
Equivalent to: SOC 515

PPOL 522. QUANTITATIVE METHODS FOR PUBLIC POLICY ANALYSIS. (4 Credits)
Covers a variety of techniques for analyzing quantitative data, including linear regression, logistic regression, and other techniques. Emphasis is placed on working with data and software to answer research questions. Prior knowledge of hypothesis testing and descriptive statistics is assumed.
Prerequisites: PPOL 521 with C or better and ECON 524 [C]
Equivalent to: SOC 516

PPOL 523. QUALITATIVE RESEARCH METHODS. (4 Credits)
An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined.
Equivalent to: SOC 518
Recommended: SOC 204 or SOC 204H

PPOL 524. APPLIED RESEARCH METHODS. (4 Credits)
Application of sociological theory, concepts, and methods. Topics vary but may include program evaluation, social impact assessment, policy analysis, focus group research, survey research, among others.
Equivalent to: SOC 519
Recommended: SOC 204 or SOC 204H and at least one upper-division course in sociology.
PPOL 525. MANAGING AND GOVERNING PUBLIC AND NON-PROFIT ORGANIZATIONS. (4 Credits)
Provides students with an introduction to management in public and non-profit organizations. Public and non-profit managers face challenges that are not faced by their counterparts in the private sector. These challenges are often associated with a different legal structure, employee protections, and differences in ethos and motivation. Students will build on knowledge of public administration to examine contemporary issues of public management and public governance and the techniques and challenges of management in practice. Successful completion of the course will equip students to be critically reflective practitioners and scholars of the management of public and non-profit organizations.
Recommended: Public Administration or PS 572 or PPOL 532 or experience in working in public or community service

PPOL 531. INFLUENCING PUBLIC POLICY: AN INTRODUCTION TO THE DARK ARTS. (4 Credits)
Explores the various tactical and strategic behaviors that individuals and groups use to influence public policy. Focusing on the ethical and pragmatic dimensions of policy consequential tactics and strategy, topics vary but may include policy communication, the use of science and evidence, human cognition and decision-making processes, lobbying, and vote and agenda manipulation.

PPOL 541. ENERGY AND SOCIETY. (4 Credits)
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice.

PPOL 544. COLLABORATIVE GOVERNANCE. (4 Credits)
Explores and develops the norms, rules, institutional design, decision-making dynamic, and politics of collaborative governance arrangements for complex natural resource problem settings. Designed to bring together traditional adversaries, government agencies, and citizens to resolve and improve management of collective public problems, collaborative governance for natural resources is now an important problem-solving tool that is employed in thousands of communities, watersheds, and landscapes around the world.

PPOL 545. INTERNATIONAL MARINE POLICY. (4 Credits)
Explores the institutional, political and legal factors that impact international marine policy with an emphasis on the United Nations Law of the Sea Convention. Additional topics include marine resource exploitation, climate change, and national security issues as they pertain to the world's oceans, coasts, and national policies.
This course is repeatable for 16 credits.

PPOL 546. THE POLICY AND LAW OF UNITED STATES COASTAL GOVERNANCE. (4 Credits)
Examines federal and state policy, legislative and judicial protections of public beach access; ownership and use of tide and submerged lands, including the public trust doctrine; wetland conservation; and the Federal Coastal Zone Management Act. This course is intended to equip future environmental and natural resource professionals with a foundation in US coastal management, especially areas where new professionals will be very involved (coastal development, offshore/alternative energy, and sea level rise/storm hazards). The format includes reading, discussion, and student presentations. Readings will be drawn from the textbook; additional readings will be posted on Canvas.

PPOL 547. INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE. (4 Credits)
Environmental decisions include trade-offs. Policy choices for sustainably providing Earth's eight billion people with food, energy, and water are urgently needed. Policy sectors (such as food) risk outcomes that are not beneficial, and impose long-term costs and potential catastrophic climate burdens. This transdisciplinary course examines emerging integrated policies concerning provision of food, energy, and water and their relationship to climate.

PPOL 548. MARINE POLICY IN THE UNITED STATES. (4 Credits)
Introduces students to the history, rationale, achievements, and gaps in American ocean and coastal policy. Students will acquire foundational tools of policy problem solving, critique, and analysis, and will synthesize and apply their knowledge creatively to propose integrated policy solutions to specific contemporary marine issues.

PPOL 551. HIGHER EDUCATION POLICY. (4 Credits)
An introduction to policy issues in the area of higher education and exploration of possible tensions within the policy goals of quality, equity, access and outcomes. Students will gain knowledge of the key pieces of legislation and constitutional law governing higher education policy at both federal and state levels, as well as an overview of the relevant research in this area. Begins with a short historical introduction to the U.S. higher education system and concludes with a discussion of its competing demands and functions.

PPOL 552. INTERNATIONAL COMPARATIVE RURAL POLICY. (4 Credits)
Examines and compares the role of rural policy in different cultural, political and administrative contexts at the international, national, state, regional and local levels. The course also provides the opportunity to study the nature and implications of new forms of governance in rural contexts in North America and Europe.

PPOL 599. SPECIAL TOPICS. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 602. INDEPENDENT STUDY. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 603. THESIS. (1-12 Credits)
This course is repeatable for 999 credits.

PPOL 607. SEMINAR. (1-4 Credits)
This course is repeatable for 16 credits.

PPOL 609. PRACTICUM. (1-12 Credits)
This course is repeatable for 24 credits.

PPOL 613. ADVANCED POLICY THEORY I. (4 Credits)
First of two-class series introducing a comprehensive review of public policy theory focused on examining theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy.

PPOL 614. ADVANCED POLICY THEORY II. (4 Credits)
Second course in a two-course series providing a comprehensive review of public policy theory. The course examines theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy.

PPOL 621. ADVANCED QUANTITATIVE METHODS. (4 Credits)
Methods used in research in the social sciences, focused on causal inference in public policy contexts. Covers methods used at the frontier of research to estimate the causal effect of policies on outcomes, including instrumental variables, regression discontinuity, and difference-in-differences estimation.
Recommended: ECON 524
PPOL 622. ADVANCED POLICY ANALYSIS. (4 Credits)
Introduction to advanced quantitative modeling used in policy analysis, with an emphasis on the application of modeling techniques to research papers. Focus is predominantly on counts and zero-truncated modeling, time series, and panel regression.
Prerequisites: (ECON 524 with B+ or better and PPOL 522 [B+]) or PPOL 621 [C+] or (AEC 523 [C+] and AEC 525 [C+])

PPOL 628. ADVANCED QUALITATIVE METHODS. (4 Credits)
Focus on epistemological approaches, research design, data analysis techniques and critiques of qualitative research, with emphasis on participant observation and interviewing. Culminates in the written and oral presentation of a qualitative research proposal, including preliminary results from fieldwork conducted during the course.
Prerequisites: ANTH 591 with C or better or HDFS 538 with C or better or SOC 518 with C or better

PPOL 699. SPECIAL TOPICS. (1-16 Credits)
This course is repeatable for 16 credits.

Political Science

PS 110. *GOVERNING AFTER THE ZOMBIE APOCALYPSE. (3 Credits)
Constitution-writing in a post-apocalyptic world. Students write a constitution that addresses issues of difference, power, and discrimination. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

PS 201. *INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS. (4 Credits)
Description and analysis of American politics and government, including such topics as interest groups, parties, elections, media, the presidency, Congress, the Constitution, and the courts. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: PS 101, PS 102, PS 102H

PS 204. *INTRODUCTION TO COMPARATIVE POLITICS. (4 Credits)
Major concepts of comparative politics applied to various political settings; the United States, Western Europe, Communist regimes, and developing countries. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core

PS 205. *INTRODUCTION TO INTERNATIONAL RELATIONS. (4 Credits)
Analysis of the international system and factors affecting world politics. (SS) (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social Core
Equivalent to: PS 205H

PS 206. *INTRODUCTION TO POLITICAL THOUGHT. (4 Credits)
Introduction to political philosophy. Major ideas and issues of selected political thinkers. (H) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: PS 206H

PS 221. INTRODUCTION TO LAW. (4 Credits)
Overview of American law and the U.S. legal system. Topics include legal concepts from selected substantive areas of law, structures and processes of law, and development of basic legal analytical skills.

PS 299. SPECIAL STUDIES. (1-4 Credits)
PREREQ: Departmental approval required.
This course is repeatable for 4 credits.

PS 300. *RESEARCH METHODS. (4 Credits)
Qualitative and quantitative approaches to the study of political phenomena. The role of values, theory, hypothesis, data collection, and analysis in evaluating and conducting political science research. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: PS 400

PS 311. CONGRESSIONAL POLITICS. (4 Credits)
Congressional politics, both on Capitol Hill and in the district, including campaigns, constituent relations, lobbying, legislating, and the legislature in democratic theory.
Equivalent to: PS 411

PS 312. PRESIDENTIAL POLITICS. (4 Credits)
Office, powers, and politics of the American presidency, with reference to other executive offices in American government; emphasis on the importance and effect of the presidency in American politics.

PS 313. CAMPAIGNS AND ELECTIONS. (4 Credits)
Political parties and elections, the conduct of electoral campaigns, the electorate and voting behavior, electoral system, exercise of the suffrage, extent and consequences of voter participation.
Equivalent to: PS 413

PS 314. INTEREST GROUP POLITICS. (4 Credits)
Interest group formation, resources, strategies, and internal struggles, as well as group influence on elections and politics, in government and policy making, and in relation to democratic theory.

PS 315. *THE POLITICS OF MEDIA. (4 Credits)
Examination of the methods of operation, content and effects of the media in relation to politics and government. Includes analysis of newspaper, radio and television, political advertising, and other forms of political communication. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

PS 317. GENDER AND POLITICS. (4 Credits)
Analyzes the role that gender plays in shaping politics and other aspects of society. The course will cover theories of gender difference, gender-based movements, gender and political office, and gender and public policy. (SS)
Attributes: LACS – Liberal Arts Social Core

PS 321. CONSTITUTIONAL LAW: GOVERNMENT POWERS AND CONSTRAINTS. (4 Credits)
The role of the U.S. Supreme Court in shaping the powers and limitations of the U.S. government. The powers of the three main branches of our government, and cases where the powers of these branches clash with one another or with the powers of the states or rights of the individual.

PS 322. *CONSTITUTIONAL LAW: CIVIL RIGHTS AND LIBERTIES. (4 Credits)
