Learning relates to career opportunities. An advisor can help in the decision-making process, especially when the relationship is based on openness, honesty, and trust. Above all, an academic advisor is a person who is invested in helping students create rewarding learning experiences.

For the advising relationship to be effective, students and advisors both need to be engaged in the process. OSU advisors have created this list of Advisor-Advisee Responsibilities to outline the obligations of each:

**As an advisee, you should:**
- Understand and accept that you are ultimately responsible for your education and your own decisions.
- Initiate a purposeful relationship with your advisor and make appointments when requested and/or when necessary.
- Utilize the technological resources available to inform yourself on your degree requirements and options.
- Prepare for and be active in your advising session, and ask questions when you have them.
- Work to clarify your personal values, abilities, and goals and share them with your advisor.
- Provide accurate and truthful information when being advised.
- Keep your local address and phone up to date in Student Online Services and utilize and check your Oregon State email account daily for important information coming from your advisor and the institution.
- Learn and understand OSU’s policies, procedures, and requirements as they relate to your academic success and/or degree completion.
- Be aware of and abide by academic calendar deadlines (http://registrar.oregonstate.edu/osu-academic-calendar/).
- Cancel appointments that cannot be kept.

**Advisors should:**
- Develop a purposeful relationship with and be an advocate for their advisees.
- Inform their advisees of the nature of the advisor/advisee relationship.
- Assist their advisees in defining and developing expressed educational, career, and life plans.
- Provide timely and accurate educational information.
- Promote learning opportunities that will help students define or meet personal goals and plans.
- Assist their advisees in preparing a program that is consistent with their abilities and interests.
- Monitor progress toward educational/career goals.
- Interpret and explain institutional policies, procedures and requirements.
- Guide their advisees to campus resources and special services available to them.
- Refer their advisees to those resources that can enhance or supplement their academic or personal experience.
- Cultivate expertise on shared technological resources that are part of their advisees’ academic journeys.

ACADEMIC REGULATIONS

Introduction

These regulations and procedures are published to assist students by providing information that is essential for planning and pursuing their academic programs. Continuing efforts are made each year by the students, faculty, and administration to revise and improve these regulations in order to enhance the quality of the university's programs and the achievement of educational goals.

Every student is responsible for knowing the academic regulations and for observing the procedures that govern their relations with Oregon State University. Unless otherwise specified, these regulations apply to both undergraduate and graduate students. Any question regarding these regulations that cannot be answered by a student’s academic advisor should be referred directly to the Office of the Registrar (B102 Kad). Additional information regarding Graduate School policies should be addressed to the Office of the Graduate Dean (Heckart Lodge).

Some students encounter special problems whose proper solution may require deviations from the academic regulations or procedures. Requests for such deviations in the regulations below must be presented to the Office of the Registrar on petition forms which are available in that office. Petitions received by the registrar will be forwarded to the proper committee or office for review and appropriate action. Requests for deviations from Graduate School policies should be presented by letter to the graduate dean (See the Graduate School section of this catalog).

Other special problems may involve academic issues such as academic freedom in the classroom or evaluations of a student’s academic performance. All students should appeal academic grievances first to the instructor of the course and then to the chair or head of the academic unit in which the course is offered. If the situation is not resolved to the student’s satisfaction, an undergraduate student should consult with the head advisor of the college in which the course is offered to obtain further information about appeal procedures of the college or university; a graduate student should consult the dean of the Graduate School regarding academic appeal procedures above the departmental level. (Appeal procedures for other than academic grievances, e.g., grievances regarding student employment, financial aid, housing, discipline, human rights, etc. are outlined in the Student Life Policy and Regulations, which are available in the OSU website under 'Student Conduct' or from the Dean of Student Life. Some of these regulations pertain to both undergraduate and graduate students. The Graduate School section of this catalog outlines both academic appeal procedures and those relating to the employment of graduate students.)

Faculty Senate revised AR Introduction effective academic year 2019–2020.

AR 1. Admission for Nondegree Students

a. Nondegree enrollment status for undergraduate students is designed for students who wish to take undergraduate classes, but do not wish to pursue a degree or a specific postbaccalaureate credential. Nondegree undergraduate students are limited to taking a maximum of 8 credits per term. Nondegree ECampus, International Exchange, credential and certificate students are not limited to 8 credits per term.

b. A maximum of 36 credits attempted as a nondegree undergraduate student may be used to satisfy Baccalaureate degree requirements upon admission as a degree-seeking student. The most recent 36 credits (or all credits if fewer than 36) will be applied to the Baccalaureate requirements.

c. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses but do not wish to pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) taken per term.

d. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. The student should refer to the admission requirements given in the Graduate School section of this catalog. Communication with the Graduate School and specific academic programs is advised.

e. Nondegree students seeking admission to a degree program may do so by filing an undergraduate, postbaccalaureate, or graduate application for admission.

Faculty Senate revised AR 1 effective academic year 2012–2013.

AR 2. Transfer Credit (Undergraduate Students)

a. College Transfer Credits: Oregon State University accepts college level credit from regionally accredited institutions toward a baccalaureate degree. While all acceptable transfer credits will be transcripted at OSU, no more than 135 quarter credits of non-OSU course work can be applied to an OSU baccalaureate degree. Therefore, students who transfer the full 135 credits from other institutions may ultimately graduate with more than the minimum credits for the baccalaureate degree. Students are encouraged to work with their academic unit to determine whether transfer credits meet department and college requirements for the degree. Transfer credits and grades are not used in calculating the OSU GPA. Transfer credits and grades are combined with OSU credits and grades when calculating the overall GPA. Students who hold OSU-approved direct transfer degrees from Oregon or other regionally accredited community colleges (e.g., the Associate of Arts Oregon Transfer) or who have 90 or more credits accepted in transfer will be granted junior standing. Students who hold OSU-approved direct transfer degrees will be considered to have met the Difference, Power and Discrimination (DPD), Perspectives and Skills (except WIC) areas of the Baccalaureate Core. They must still complete the upper-division Synthesis requirements and the Writing Intensive Course (WIC) of the Baccalaureate core.

b. Transfer of Professional-Technical Credits: a maximum of 12 quarter credits (8 semester credits) of professional-technical course work applicable in an associate’s degree or certificate program at a regionally accredited institution can be accepted upon admission to OSU as general elective credit (graded as Pass) and as part of the 135-quarter credit total that can be applied toward a baccalaureate degree. Academic units may choose to allow additional professional technical course credits for specific articulation if they articulate directly to a program of study offered by that unit. That articulation of coursework must be a direct equivalency and may not equal upper division coursework at OSU.

c. Transfer of Credits for Post-Baccalaureate Students: credits from other institutions are not automatically articulated to the OSU transcript at the point of admission. Individual courses
may be eligible for post-baccalaureate degree applicability. Post-baccalaureate students are encouraged to contact an academic advisor for assistance. See AR for Institutional Requirements for Concurrent and Subsequent Baccalaureate Degrees.

1 Junior standing does not necessarily imply that OSU institutional, college, division, and/or departmental requirements, which are normally satisfied by OSU students prior to their junior year, have been satisfied.

Faculty Senate revised AR 2 effective academic year 2020–2021.

AR 3. Credit from a Non-Regionally Accredited Institution (Undergraduate Students)

After three terms of work at Oregon State University satisfactory to the Undergraduate Admissions Committee, a student may request validation of work done in a non-regionally accredited institution of collegiate rank. The committee will consider each petition separately and base its decision on all information available. In some instances, informal examinations by the departments concerned may be required. Credit for transfer of professional-technical work will be awarded in accordance with paragraphs AR 2, b and c.

Faculty Senate revised AR 3 effective academic year 2019–2020.

AR 4. Classifying Students

a. Undergraduate students: A student who has earned at least 45 credits is classified as a sophomore. A student who has earned at least 90 credits is classified as a junior. A student who has earned at least 135 credits is classified as a senior.

b. Postbaccalaureate students: A student holding a baccalaureate degree who is admitted to work toward a second baccalaureate degree or teaching certificate is classified as a postbaccalaureate student.

c. Graduate students: A student who has been admitted to the Graduate School is classified as a graduate student.

Faculty Senate revised AR 4 effective academic year 2019–2020.

AR 5. Transfer from One College to Another (Undergraduate Students)

Registered students may transfer from one college to another at any time. Returning but not-registered students may transfer colleges between the dates of readmission and registration.

Faculty Senate revised AR 5 effective academic year 2019–2020.

AR 6. Change in Credits Scheduled

No change may be made in the number of credits specified for the various courses and published in the OSU Academic Catalog.

Faculty Senate revised AR 6 effective academic year 2019–2020.

AR 7. Maximum and Minimum Registration

1. The minimum number of credits for which a full-time undergraduate student may register is 12, and the maximum is 19, regardless of the method of grading used for the classes selected. (In determining the load for students not normally held responsible for physical education, the credits in activity courses in physical education will be disregarded.) The maximum may be extended:

   a. Up to and including 24 credits when a student has completed at least 12 credits in courses other than those graded P/N and S/U with a grade-point average of 3.00 or better in their most recent term or when a student has filed with the Registrar a petition approved by their advisor and college dean (or head advisor).
   b. Over 24 credits by petition approved by a student’s advisor and college dean (or head advisor) and the Academic Requirements Committee and filed with the registrar.
   c. Appointees on graduate assistantships must register for a minimum of 12 graduate credits per term and are limited to a maximum of 16 credits per term.

Faculty Senate revised AR 7 effective academic year 2019–2020.

AR 8. Late Registration

Registration is permitted through the second full week of classes each term. Late fees are assessed in accordance with the fee policies stated in the 'Tuition, Fees and Payment' (p. 2610) information in the Academic Catalog.

Faculty Senate revised AR 8 effective academic year 2019–2020.

AR 9. Admission/Enrollment to Class

a. Students whose names appear on class rosters are officially registered; others must complete their registration for enrollment to class.

b. If it is anticipated that the demand for enrollment in a given course will exceed the maximum number that can be accommodated, the department offering the course may designate it in the Schedule of Classes with the code ‘NSHD’ (no-show-drop). A student who is registered for such a course who attends no meetings of the course during the first five school days of the term will be dropped from the course by the instructor, unless the student has obtained prior permission for absence. If such action is taken, the instructor will notify, through the department, the Office of the Registrar, which in turn will drop the student from their course. Students are responsible for confirming their course registration online. No tuition or fee will be charged for that course.

Faculty Senate revised AR 9 effective academic year 2019–2020.

AR 10. Eligibility

To be eligible to hold office or to participate in any extracurricular activity supervised by Oregon State University, students must meet certain requirements.

1. For student activities, students are responsible for following the Student Life Policies (found in University Policies and Standards).

2. For participation in intercollegiate athletics, students must meet all institutional Pac-12 and NCAA requirements. Students should contact the Compliance Office in the Department of Intercollegiate Athletics on all such matters.

Faculty Senate revised AR 10 effective academic year 2019–2020.

AR 11. Adding and Dropping Courses

1. Students may add courses through the second full week of classes each term, depending on the nature of the course and the availability of space. From the end of the first full week of classes to the end
of the second full week of classes, permission (signature) of the instructor offering the course must be obtained.

2. A student may drop courses without responsibility for grades through the end of the first full week of classes. After the drop deadline courses may not be dropped. Failure to drop a course properly will result in an F grade being recorded; courses properly dropped do not appear on the student’s transcript.

3. Add/drop fees are assessed in accordance with the fee policies stated in the Tuition, Fees and Payment (p. 2610) information in the Academic Catalog.

AR 12. Withdrawal from Individual Classes

Any student may withdraw from a maximum of 12\(^1\) individual OSU credit-bearing classes throughout their undergraduate career\(^2\) at OSU\(^3\). Any student may petition for an exception from this limitation if the justification for withdrawal is clearly associated with circumstances beyond the student’s control. Withdrawal from a class with a W grade begins after the drop deadline, which is the first full week of classes, and continues through the end of the seventh full week of classes. After the seventh full week of classes, students are expected to complete the program attempted and will receive letter grades (A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, S, U, P, or N) for all classes in which enrolled unless the allegations and indicating the proposed sanction, and (c) informs

Any student may withdraw from the Term up to four times for a student

Transcript Notation

A notation of the dates of any approved leave will be indicated on each student’s official transcript.

Military deployments are an exception to this limitation. All military personnel who are deployed for military service may submit a voluntary leave request for each deployment.

In accordance with the university’s catalog policy contained in the Academic Catalog.

The PELP began with the 2011–2012 academic year (Summer 2011). Any former OSU students who attended OSU prior to the 2011–2012 academic year and who are away from campus for four or more consecutive regular academic terms (not including summer terms) must re-enroll with OSU to re-establish their relationship as an OSU student and their academic catalog will be reset to the academic year they return to OSU.

AR 14. Attendance

Attendance is one of the most important factors in a student’s academic success. Therefore, an instructor may consider attendance as part of a course grade. If attendance is used in determining the student’s grade, how attendance shall be used needs to be defined in the course syllabus by the instructor.

AR 15. Academic Misconduct

Definitions and examples of academic misconduct are outlined in the Code of Student Conduct, Section 4.2.1. (https://studentlife.oregonstate.edu/sites/studentlife.oregonstate.edu/files/edited_code_of_student_conduct.pdf)

The administration of the classroom rests with the instructor. When potential academic misconduct comes to the instructor’s attention, the instructor documents the incident and permits the student to provide an explanation. If the matter can be resolved without an academic sanction, no report is necessary. If the instructor believes academic misconduct has occurred and that the violation warrants the application of an academic sanction, the instructor: (a) consults with the unit head, (b) submits an Academic Misconduct Report (AMR) documenting the allegations and indicating the proposed sanction, and (c) informs
the student of the action taken. The instructor may recommend any academic sanctions.

Allegations of academic misconduct are reviewed and adjudicated by a college-designated hearing officer (CHO) in accordance with the procedures outlined in the Code of Student Conduct, Section 5.11 (https://studentlife.oregonstate.edu/sites/studentlife.oregonstate.edu/files/edited_code_of_student_conduct.pdf). If the student is not a major in the college in which the course is offered, the CHO of the college in which the student is a major also receives a copy of the AMR.

Depending upon the severity of the violation, or if a record of previous academic misconduct exists, the college and/or university may impose additional sanctions. Sanctions imposed as a result of academic misconduct may be appealed by the student in accordance with the procedures outlined in the Code of Student Conduct, Section 8. (https://studentlife.oregonstate.edu/sites/studentlife.oregonstate.edu/files/edited_code_of_student_conduct.pdf)

**AR 16. Finals Week**

1. No final, midterm, or comprehensive examinations shall be given during the week preceding final examination week. (Examinations on laboratory work, course material covered by ‘weekly’ or ‘section’ quizzes, television courses, ROTC activities, and physical education activities are allowed.)

2. Course work shall continue up to final week. Final examinations shall be given during finals week in accordance with the finals week schedule. If a final examination is not to be given in a course, this action must be approved by the department with notification to the Registrar’s Office. Requests for changes in the time of final examinations will be submitted to the Registrar’s Office.

3. All student petitions for changes in the time of final examinations must be made using forms available from the Registrar’s Office. (A summary of university final examination policy is printed on the form.) Petitions for changing final examinations are submitted directly to the instructor. Students may forward disapproved petitions through the dean of the college to the Registrar’s Office. Requests to change the assigned final examination time for an entire class must be approved by the Registrar’s Office. Final examinations may not be changed to the week preceding final week without approval of the Academic Requirements Committee.

4. No extracurricular activities or curricular activities other than examinations and final class meetings shall be scheduled during final week.

**AR 17. Grades**

The grading system consists of twelve basic grades, A, A−, B+, B, B−, C+, C, C−, D+, D, D−, and F. The grade of A denotes exceptional accomplishment; B, superior; C, average; D, inferior; F, failure. Other marks are I, incomplete; W, withdrawal; R, thesis in progress; P, pass; N, no-credit; S, satisfactory; U, unsatisfactory; AUD, audited course; WAU, withdrawal from audited course; NG, no basis for a grade (administratively assigned by the Office of the Registrar, see below); WC, complete withdrawal.

When a requirement of a course has not been completed for reasons acceptable to the instructor and the rest of the academic work is passing, a report of I (incomplete) may be made and additional time granted. The I grade is only granted at the discretion of the instructor. The instructor must submit the grade the student will earn if the missing work is not completed; this is the alternate grade. The alternate grade will become the default grade if the missing work is not completed as part of the contract for completion of the grade. The instructor documents the deficiency and the deadline for completing the missing work. A record of the deficiency shall be kept on file in the unit or department office. The allotted time awarded shall not exceed one calendar year from petition. The time of the degree conferral, whichever comes first. To remove the I grade, the student must complete the deficiency within the allotted time and the instructor will then submit the appropriate grade. If the student fails to complete the work within the allotted time, the Registrar’s Office will automatically change the I grade on the student’s record to the alternate grade submitted by the instructor at the time the I was given. The alternate grade will be included in the grade point average. Under no circumstances shall a student who earns an A–F grade or an N or U grade have their grade changed retroactively to an I grade.

An instructor may move to correct a grade by filing a Change of Grade in the Registrar’s Office. Grade changes for students of a permanently separated instructor will be managed by the department chair of the course involved. Upon permanent separation from the university an instructor’s change of grade will not be accepted by the Office of the Registrar. The Office of the Registrar will routinely review grade changes. 1 A student may petition via the Office of the Registrar for an extension of the one calendar year deadline with the concurrence of the faculty. An approved petition will grant an extension of a single additional term, with a maximum of three total extensions being possible. An approved petition for an extension of time to remove an incomplete will be voided at the time of degree conferral.

**AR 18. Alternative Grading Systems**

In addition to traditional letter grading (A–F), Oregon State University has adopted two alternative grading systems to be employed in accordance with the provisions outlined below:

a. Satisfactory/Unsatisfactory (S/U)

1. Undergraduate students may elect to be graded on a Satisfactory/Unsatisfactory (S/U) basis in a course (except P/N courses) under the following conditions:
   a. A maximum of 36 credits of those presented in satisfaction of the baccalaureate degree may have been granted on an S/U basis at Oregon State University.
   b. A student normally elects the option S/U at the time of registration. Changes either to or from S/U grading will be permitted through the end of the seventh full week of any term.
   c. A student must obtain the approval of their academic advisor or dean in order to elect to be graded on an S/U basis.

2. Graduate students may elect to take undergraduate courses on the S/U basis except those courses required for the removal of deficiencies. Graduate courses may also be taken on an S/ U basis. (Such courses cannot be used as part of a student’s graduate program. All other provisions of S/U grading apply to graduate students.)

3. A grade of S (satisfactory) shall be equivalent to grades A, A−, B+, B, B−, C+, C, and C−. A grade of U (unsatisfactory) shall be equivalent to grades D+, D, D−, or F.

4. Grades of S or U shall have no grade-point equivalents; hence such grades shall not be included in the computation of grade-point averages. The credit of courses in which an S grade is obtained shall be counted toward graduation. Credits shall not be awarded for U grades.
5. Election of S/U grading for a course shall be known only to the student and the academic advisor. Instructors shall enter the traditional letter grade (A–F) earned. Automatic conversion to S grades and U grades will be made in the Office of the Registrar. A grade of I, Incomplete, may be assigned whenever appropriate.

6. In compliance with Section III of the Statement on Student Rights, Freedoms, and Responsibilities (dated April 28, 1969), disclosure or nondisclosure of the traditional letter grades received in courses in which S grades were awarded is recognized as an exclusive right of the individual student. The Registrar’s Office is obliged and authorized to honor requests for disclosure, provided that the express consent of the student is obtained.

b. Pass/No Credit (P/N)
   1. Those courses in which traditional letter grading has been deemed inappropriate because of the nature of the course content or the objectives of the course are graded on a Pass/No Credit (P/N) basis.
   2. Grades of P or N shall have no grade-point equivalents; hence such grades shall not be included in the computation of grade-point averages. The credits of courses in which a grade of P is obtained shall be counted toward graduation. Credit shall not be awarded for N grades.
   3. Departments are authorized to designate Pass/No Credit courses, subject to the following guidelines and procedures:
      a. The principal criterion for choice of grading system is enhancement of the educational experience for the student;
      b. The nature, structure, and/or objectives of a course may suggest that the Pass/No Credit grading system be adopted. It is anticipated that courses graded on this basis will generally fall into one of the following categories: skill-building courses or practicums, courses which stress orientation and awareness rather than academic preparation;
      c. The designation of Pass/No Credit grading for a course will follow the academic college’s recommendation and approval by the University Curriculum Council, and in the case of graduate courses, by the Graduate Council. Designation of courses for P/N grading must be completed prior to the opening of registration for the term in which the course is offered.
   4. Courses approved for grading on a Pass/No Credit (P/N) basis are identified in the Schedule of Classes.
   c. Nothing stated in the above paragraphs shall be construed as constituting support for petitions requesting change of grade in courses taken during or prior to spring term, 1971.

Faculty Senate revised AR 18 effective academic year 2019–2020.

AR 19. Grade Points

Grade points are computed on the basis of:

- 4 points for each credit of A grade,
- 3.7 for each credit of A– grade,
- 3.3 for each credit of B+ grade,
- 3.0 for each credit of B grade,
- 2.7 for each credit of B– grade,
- 2.3 for each credit of C+ grade,
- 2.0 for each credit of C grade,
- 1.7 for each credit of C– grade,
- 1.3 for each credit of D+ grade,
- 1.0 for each credit of D grade,
- 0.7 for each credit of D– grade, and
- 0 for each credit of F.

Marks of I, W, P, N, NG, R, U, AUD, WAU, and WC are disregarded in the computation of points. The grade-point average (GPA) is the quotient of total points divided by total credits; total credits are the number of term credits in which grades A, B, C, D, and F are received. Thus a person receiving 1 credit of A, 2 credits of B, 3 credits of C, 4 credits of D, 5 credits of F would have 20 grade points (1 x 4 plus 2 x 3 plus 3 x 2 plus 4 x 1 plus 5 x 0). The grade-point average would be 20 (grade points) divided by 15 (credits) equals 1.33. A C average on 15 credits attempted would require 30 grade points; if the student has 20 points, they are 10 grade points deficient.

AR 20. Repeated Courses

If a student repeats an Oregon State University course, the grade from each attempt will appear on the student’s academic record but only the second attempt will count toward the student’s institutional credits, requirements, and grade-point average. An academic unit may, however, include subsequent attempts after the second attempt to meet individual course degree requirements associated with the baccalaureate core/majors/options/minors/certificates/endorsements. A course may not be repeated on an S/U basis if it was taken previously on a normal grade basis.

1. An attempt comprises a final grade in a course where the grade is: A, A–, B +, B, B–, C+, C, C–, D+, D, D–, F, S, U, P, NP or an I/Alternate Grade (where the Alternate Grade is one of these grades).

2. Recognized repeatable courses as defined in the Oregon State University Academic Catalog, such as activity courses, research, seminars, and selected topics, do not come under this restriction. Additionally, if a course has been approved as a multiple repeatable course for credit and grade points, each attempt will be included in the institutional credits and grade-point average until it reaches its defined limit (total allowable attempts or credit maximums for the course). Further, the Office of the Registrar will include all courses from the first repeat taken until it reaches the maximum total allowable attempts or credit maximums for the course. All subsequent repeats after the repeat maximum has been reached will be excluded from both institutional credits earned and grade-point average calculations.

3. Academic Unit: College, School, or Department

4. Normal Grade Basis is defined as any grade of A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, or any I/Alternate Grade (where the Alternate Grade is one of these grades).

AR 21. Honor Roll

At the close of each term, the OSU Registrar publishes a list containing the names of all undergraduate and postbaccalaureate students who for the term have completed at least 12 graded credits with a grade-point average of 3.50 or above.

AR 22. Satisfactory Academic Standing (for Undergraduate and Post-Baccalaureate Students)

Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings
determined for students seeking a baccalaureate degree according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors. Any student who is not on Academic Warning, Academic Probation, or Academic Suspension is in good standing.

1. **Academic Warning**: Students with a term GPA below 2.0 will be placed on Academic Warning.

2. **Academic Probation**: Students who have attempted 24 or more credits at OSU and have an OSU cumulative GPA below 2.0 will be placed on Academic Probation. Students who attain a cumulative GPA of 2.0 or better are removed from Academic Probation.

3. **Academic Suspension**: Students who are on Academic Probation and have a subsequent term GPA below 2.0 will be placed on Academic Suspension. Academic Suspension is recorded on the student's academic record. Students who are academically suspended are denied all the privileges of the institution and of all organizations in any way connected to it, including any university-recognized living group.

4. **Reinstatement to the University**: Suspended students will be considered for reinstatement to the university after two years or completion of a minimum of 24 quarter credits of transferable college-level work at a regionally accredited college or university, with a GPA of 2.5 or above.

The Faculty Senate Academic Standing Committee (http://senate.oregonstate.edu/academic-standing-committee/) is responsible for enforcement of the above regulations on Satisfactory Academic Standing. Additionally, this committee has discretionary authority to grant exceptions and to develop guidelines for administering these regulations.

1 An attempt comprises a final grade in a course where the grade is: A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, S, U, P, NP, I/Alternate Grade (where the Alternate Grade is one of these grades), W.

Faculty Senate revised AR 22 effective academic year 2019–2020.

**AR 23. Special Examination for Credit**

A regularly enrolled student in good standing, either graduate or undergraduate, currently registered at Oregon State University and wishing credit for an OSU course for which a grade has not been previously received, may petition for credit examination under the following conditions:

1. The application for such examination shall be presented on an Official Student Petition and shall bear the approvals of the dean of the student's college, the dean of the college in which the course is offered, and head of the department in which the course is offered. Petitions for special examination for credit may be approved or denied at the sole discretion of the department/college or the faculty member offering the course, taking into account both the academic merit of the petition and the department/college's ability to deploy adequate resources to prepare, administer, and grade such an examination.

2. In no case may such examination be based on work used for graduation from high school, or in a foreign language that is the mother tongue of the applicant, or in courses not listed in the Oregon State University Academic Catalog.

3. Grades earned in special examinations shall be submitted and recorded in the same way as for regularly registered courses, and will count with respect to repeating a course as defined in AR 20.

4. A student may not petition for credit by special examination for a course in any term in which the student is or has been enrolled in the course after the add/drop deadline for that term.

5. An examination for credit will not be approved for courses below the level for which college credit has previously been granted.

6. No examination may be taken until the applicant has received a permit from the Registrar's Office, for which a fee of $80 will be charged.¹

¹ As an alternative to departmental examinations, students may seek credit through the College Level Examination Program (CLEP) to the College Entrance Examination Board. CLEP includes nationally normed subject matter examinations and general examinations covering material included in a number of relatively standard courses taught in colleges and universities throughout the United States. Some of these subject matter examinations and general examinations have been accepted by departments at this institution. Policy guidelines have been established that make it possible for admitted and enrolled students to (a) transfer credits earned through these accepted CLEP subject matter and general examinations to this institution, providing certain criteria are met, and (b) earn credits through accepted CLEP subject matter and general examinations providing certain criteria are met. Further information about CLEP may be obtained from the Office of Admissions, B104 Kerr Administration Bldg.

**AR 24. Special Examination for Waiver (Undergraduate Students)**

A student may petition for examination to waive a course under the following conditions:

1. The application for examination to waive a course shall be presented on an Official Student Petition and shall bear the recommendations of the dean of the student's college, the dean of the college in which the course is offered, and head of the department in which the course is offered. Petitions for special examination for waiver may be approved or denied at its sole discretion by the department/college offering the course, taking into account both the academic merit of the petition and the department/college's ability to deploy adequate resources to prepare, administer, and grade such an examination.

2. No examination may be taken until the applicant has received a permit from the Registrar's Office, for which a fee of $80 will be charged.

3. A minimum grade of C (or equivalent) must be attained in an examination for that waiver to be granted.

4. Credit will not be granted for courses waived.

5. This regulation does not invalidate the right of a dean of a college or head of a department to waive a course requirement of their particular college or department, respectively.

**AR 25. Institutional Requirements for Baccalaureate Degrees (Undergraduate Students)**

a. **Baccalaureate Core**: Each student will complete the following requirements:
1. **Skills Courses (15 credits)**
   - Mathematics, Writing I, and Speech must be taken and completed satisfactorily within the first 45 hours of OSU-generated credits.
   - Writing II must be taken and completed satisfactorily within the first 90 hours of OSU-generated credits.
   - Fitness (3 credits)
   - Mathematics (3 credits)
   - Speech (3 credits)
   - Writing I (3 credits)
   - Writing II (3 credits)

2. **Perspectives Courses (24 credits)**
   - Physical science (with lab) (4 credits)
   - Biological science (with lab) (4 credits)
   - Plus choice of second course in either of the above (with lab) (4 credits)
   - Take a minimum of one course in each of the following areas:
     - Western culture (3 credits)
     - Cultural diversity (3 credits)
     - Literature and the arts (3 credits)
     - Social processes and institutions (3 credits)

3. **Difference, Power, and Discrimination Courses (3 credits)**

4. **Synthesis Courses (6 credits)**
   - Science, technology, and society (3 credits)
   - Contemporary global issues (3 credits)

5. **Writing Intensive Courses, upper division (WIC) (3 credits)**
   - The Baccalaureate Core Committee determines which courses will satisfy each of the requirements above. WIC courses will be reviewed by the Writing Advisory Board. The core is governed by the following rules:
     - (1) No more than two courses from any one department may be used by a student to satisfy the Perspectives category of the core.
     - (2) No single course may be used by a student to satisfy more than one subject area of the core even though some courses have been approved in more than one area.
     - (3) Both Synthesis courses may not be taken in the same department.

b. An undergraduate student may be granted a baccalaureate degree with one or more majors.

c. **Credits**: Minimum 180 earned credits, which must include:
   1. **Credits in upper-division courses**: minimum 60 (exclusive of upper-division physical education activity courses).
   2. **Credits in each major**: minimum 36, including at least 24 in upper-division courses.

d. **Baccalaureate Degrees**: All students receiving a BA degree shall have proficiency in a second language, which may include American Sign Language (ASL), equivalent to that attained at the end of the second year sequence with a grade of C– or better as certified by the School of Language, Culture, and Society. Colleges offering both the BA and the BS will have specific requirements distinguishing the two degrees. The college requirements for the two degrees will place comparable demands upon the time and effort of students, and that assessment of comparability will include the foreign language requirement for the BA. Academic units offering both the BA and BS may have specific requirements distinguishing the two degrees.

e. **Grade-Point Average**: minimum of 2.00 on OSU cumulative grade-point average.

f. **Academic Residence**:  
   1. A minimum of 45 of the last 75 credits, or 150 total credits, must be completed while the student is in academic residence at OSU. ‘Academic Residence’ is defined as OSU courses taken as a degree-seeking student of OSU or courses through one of the following approved special programs: Professional degree programs which require that the student enroll in another institution while finishing the bachelor’s degree at OSU or an international study program sponsored by Oregon State University.
   2. A minimum of 15 upper-division credits used to meet the preceding residency requirement (1) must be taken in each of the student’s majors.
   3. Credits earned by special examination for credit (AR 23) are not considered in academic residence.

g. **Dean’s certification of fulfillment of all requirements of major college**. (For details, see college advisors and deans.)

h. **Restrictions**: A maximum number of credits may be applied to the Baccalaureate Degree as follows:
   1. Transfer from first professional programs such as Law, Medicine, Pharmacy, and Veterinary Medicine: maximum 48 quarter credits.
   2. Music courses (applied music): maximum 12 credits. (This restriction is not applicable to majors in music.)
   3. Physical activity courses: maximum 11 credits.
   4. Courses graded on an S/U basis at Oregon State University: maximum 36 credits.
   5. Academic Learning Service courses: maximum 15 credits.

i. **Degree Candidacy**: To become a candidate for a degree, a student must be identified by their College or the Office of the Registrar as a student in the process of completing their final graduation requirements. Upon successful completion of all degree requirements, a student’s degree(s) will be conferred by the University. Students will be notified of their advancement to graduation candidacy by the Office of the Registrar during their final term and will be able to make adjustments to their program of study, as needed, prior to degree conferral.

---

1. Lists of approved courses may be obtained from advisors. Approved courses are also listed in the OSU Academic Catalog.

2. Some degree programs may require more than 180 credits.

3. Unearned credits are those courses for which a grade of F, N, U, I, W, AUD, or WAU are assigned as a final grade for that course. All other grades are calculated as earned credit.

---

# AR 26. Concurrent and Subsequent Baccalaureate Degrees

a. **Concurrent Baccalaureate Degrees**: An undergraduate student may be granted two or more baccalaureate degrees (for example the BA or BS) at the same graduation exercise. The student must:
   1. Complete institutional, college, and departmental requirements for the degree;
   2. Complete, for each additional degree, a minimum of 32 credits more than the requirements of the curriculum requiring the least number of credits; and
   3. Complete each additional 32 credits in residence.

b. **Subsequent Baccalaureate Degree**: A student who has received a previous baccalaureate degree from either OSU or another accredited university may be granted a subsequent baccalaureate degree. The student must:
   1. Complete, for a BA degree, the requirements for foreign language proficiency (AR 25d);
2. Achieve a minimum of 2.00 on OSU cumulative grade-point average;
3. Complete requirements of the major college and receive the dean's certification; and
4. Meet the requirements for a concurrent degree as specified in AR 26a, if a previous baccalaureate degree has been received from OSU. The additional credits may be taken at any time prior to or subsequent to the granting of a previous OSU baccalaureate degree. Students with a baccalaureate degree from another institution must meet the Academic Residence requirement in AR 25f.

c. A student seeking a baccalaureate degree under the provisions of either AR 26a or AR 26b also must satisfy the appropriate residence requirements as defined in AR 25f.

AR 27. Subsequent Credentials: Minors, Certificates, Options, and Majors

1. Subsequent Minors and Certificates: A student who has received a previous baccalaureate degree from either OSU or another regionally accredited university or college may be granted a subsequent minor or certificate. The student must:
   1. Complete current requirements for minor or certificate; a minimum of 15 credits in the minor or certificate must be taken in residence and not applied to a previous baccalaureate degree;
   2. Achieve a minimum of 2.0 OSU cumulative grade-point average and a minimum of 2.0 for credits applying toward the minor or certificate;
   3. Receive the dean's approval.

2. Subsequent Options and Majors: A student who has received a previous baccalaureate degree from OSU may be granted a subsequent option or major credential. The student must:
   1. Complete current requirements for option or major; a minimum of 20 upper division credits in the option or major must be taken in residence and not applied to a previous baccalaureate degree;
   2. Achieve a minimum of 2.0 OSU cumulative grade-point average and a minimum of 2.0 for credits applying toward the option or major;
   3. Receive the dean’s approval.

Faculty Senate revised AR 27 effective academic year 2018–2019.

AR 28. Substitutions

a. Undergraduate students: Substitutions for institutional requirements as outlined in AR 25, except for baccalaureate core requirements of AR 25a, may be petitioned to the Academic Requirements Committee after approval by the student's dean or college head advisor. Substitutions for baccalaureate core requirements of AR 25a may be presented for consideration to the student’s dean or college head advisor. Substitutions or adjustments of college or departmental requirements are also subject to approval by the college or department.

b. Graduate students: Substitutions for institutional requirements or deviations from the normal Graduate School regulations and policies may be made only by obtaining the approval of the dean of the Graduate School following a petition by means of a letter signed by the student and the student's major professor. Action taken on such substitutions or petitions will not be considered as a precedent for any future action.

AR 29. Graduation Exercises

Attendance at graduation exercises is optional for graduating students. In accordance with procedures obtained from the Registrar's Office, the candidate is responsible for declaring whether or not they will attend commencement, regardless of the term in which requirements are completed.

AR 30. Auditing Courses

Audit registration permits a student to enroll in a course for no credit and no grade. Course requirements for an audited course will be determined by the course instructor. Audit registration is available to degree and non-degree students. Audit registration is only allowable during the second full week of the term. Those who wish to audit should contact the Registrar for registration procedures, which will require approval of the course instructor. Audit courses are assessed instructional fees at the same rate as for credit courses. Any changes to an audit registration are subject to the same procedures, deadlines, and special fees as for registration changes to regular courses. Upon completion of an audited course, the designation of AUD will be recorded on the transcript. The designation of WAU will be recorded on the transcript for students who withdraw from an audit course.

AR 31. Academic Fresh Start Policy

An Oregon State University undergraduate student may petition once with the registrar to exclude OSU courses from the calculation of institutional requirements, credits, and grade-point average, under a condition of academic fresh start defined below:

Conditions to qualify:

The student must have an absence from OSU that begins after the end of the student's last term of attendance and exceeds five academic years before re-admittance to a degree program at OSU. Prior to applying for academic fresh start student must, after re-enrolling in the university, have successfully completed a minimum of 24 letter-graded units over two consecutive terms, and earned a grade-point average of at least 2.5 in these terms. The student must also provide a signed letter of recommendation from a current OSU college dean, school director, or department or program chair/head. It may be seconded by the college head advisor or a current faculty member within the discipline the student is currently engaged to complete advocating on the student's behalf for academic fresh start.

Effect of the academic fresh start:

• Upon meeting all of the conditions of qualification, the student may select from one to three contiguous academic terms from previous enrollment at OSU for the application of academic fresh start.
• The grades from all courses taken during the terms that are proposed for academic fresh start will be excluded from meeting institutional requirements and the calculation of institutional units and grade-point average.
• All grades representing the student’s academic history at OSU will appear on the student’s academic record (transcript), but all academic fresh start approved courses will be coded as ‘excluded’ similar to a repeated course. Additionally, a comment of ‘Academic Fresh Start’ will be appended to each term that qualifies under academic fresh start.
• All courses excluded under academic fresh start, will also be excluded from the calculation of course repeats defined by AR 20.
Valid grades include outstanding I (Incomplete) grades that have not been resolved.

AR 32. Undergraduate Standalone Certificates

a. Standalone Certificates: A student who has not received a baccalaureate degree from either OSU or another regionally accredited university or college may be granted a standalone certificate. The student must:

1. Complete current requirements for standalone certificate; a minimum of 15 credits in the standalone certificate must be taken in academic residence;
2. Achieve a minimum of 2.0 OSU cumulative grade-point average and a minimum of 2.0 for credits applying toward the standalone certificate;
3. Receive the dean's approval.

Faculty Senate approved AR 32 effective academic year 2020–2021.
Oregon State University provides diverse educational opportunities through the undergraduate and graduate programs of its 13 colleges. Academic choices include studies in scientific, technological, interdisciplinary and professional as well as liberal arts fields. A land grant, sea grant, space grant and sun grant university with beginnings in the 1850s, OSU is now home to more than 30,000 undergraduate, graduate and first professional students, representing more than 100 countries, every state in the nation and every county in Oregon.

In addition to its regular educational programs, the university is responsible for Oregon’s land grant mission of research, education and outreach. The OSU Extension Service delivers educational programs in all of Oregon’s 36 counties, reaching out to communities with programs as diverse as Master Gardeners, 4-H, and community leadership. Working in collaboration with Extension Service faculty, the researchers in Oregon’s Agricultural Experiment Station conduct scientific, social and economic research at 11 branch stations at 15 locations across the state, including one of the nation’s only urban experiment stations, the Food Innovation Center in Portland.

OSU’s educational partners include all Oregon community colleges, Eastern Oregon University, the Oregon Center for Advanced Technology Education, Oregon Health & Science University, Portland State University, Southern Oregon University, University of Idaho, University of Oregon and Washington State University.

OSU-Cascades (http://osucascades.edu) in Bend, Oregon — the first branch campus in the state — began offering undergraduate and graduate degree programs in 2001 in partnership with Central Oregon Community College. Students earn an Oregon State University degree in their choice of 18 undergraduate majors, 12 minors and three graduate programs. In 2015, OSU-Cascades will become a full four-year branch campus and will begin enrolling freshmen and sophomores.

Oregon State University’s administration is organized to effectively sustain all functions of the university, including its teaching, research, and outreach and engagement missions.

**Leadership**

OSU Board of Trustees

The Oregon State University Board of Trustees is vested by law with the power and authority to govern the university, and the composition of the board is set out in state statute. The Oregon State University Board of Trustees governs Oregon’s only university with a statewide presence and helps guide OSU’s mission to serve the state and the needs of its citizens in a growing global economy.

**F. King Alexander, President**

Dr. F. King Alexander became Oregon State University’s 15th president on July 1, 2020. The president is the chief executive officer of the university and is appointed by the Oregon State Board of Trustees. Subject to the Board, the president is responsible for the overall leadership and direction of the university.

**Edward Feser, Provost and Executive Vice President**

As provost and executive vice president, Edward Feser is the chief academic and operating officer of Oregon State University, charged by the president to oversee progress on the university’s strategic goals in student success, faculty excellence, outreach and engagement, internationalization and institutional reputation.

More information about OSU Board of Trustees, Office of the President, and Office of the Provost can be found on the Leadership (https://leadership.oregonstate.edu/provost/) webpage.

**Equal Opportunity**

Oregon State University, in compliance with state and federal laws and regulations, does not discriminate on the basis of age, color, disability, gender identity or expression, genetic information, marital status, national origin, race, religion, sex, sexual orientation, or veteran status in any of its policies, procedures, or practices. This nondiscrimination policy covers admission and access to, and treatment and employment in, university programs and activities, including but not limited to academic admissions, financial aid, educational services, and employment. Inquiries regarding the university’s equal opportunity policies may be directed to the Office of Equal Opportunity and Access (http://eoa.oregonstate.edu/) on 541-737-3556.

Oregon State University is accredited by the Northwest Commission on Colleges and Universities (NWCCU). The university is authorized to offer baccalaureate, master’s, doctorate, and first professional degrees, as well as undergraduate-, postbaccalaureate-, and graduate-level certificates. In July 2019, the Board of Commissioners of the NWCCU reaffirmed OSU’s institutional accreditation through 2026.

In the **College of Agricultural Sciences**, the Rangeland Sciences program is accredited by the Society for Range Management (SRM). The Department of Food Science and Technology's undergraduate curricula are approved by the Higher Education Review Board (HERB) of the Institute of Food Technologists (IFT). The Agricultural Education major is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and the Oregon Teacher Standards and Practices Commission (TSPC).

In the **College of Business**, the Business Administration programs (undergraduate and graduate) are accredited by the Association to Advance Collegiate Schools of Business (AACSB—International).

The **College of Education** programs are accredited by the Council for the Accreditation of Educator Preparation (CAEP) and the Oregon Teacher Standards and Practices Commission (TSPC) for the preparation of elementary and secondary teachers. The graduate programs in...
programs. The Double Degree pathway includes all the course work and is accredited through the College of Education's teacher education double degree program in Early Childhood/Elementary Education that the Education of Young Children (NAEYC). HDFS participates in a Center in Bates Hall is accredited with the National Association for Human Development and Family Sciences, the OSU Child Development the Oregon Teacher Standards and Practices Commission (TSPC). In by the Council for the Accreditation of Educator Preparation (CAEP) and Physical Education Teacher Education licensure program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The Dietetic option in the Nutrition major is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The College of Pharmacy's PharmD program is accredited by the Accreditation Council for Pharmacy Education (ACPE). The College also offers PGY1 and PGY2 community pharmacy residency programs. The PGY1 program is jointly accredited by the American Society of Health-System Pharmacists (ASHP) and the American Pharmaceutical Association (APhA). The PGY2 programs are accredited by the American Society of Health-System Pharmacists (ASHP).

In the College of Forestry, the Bachelor of Science degrees in Forest Engineering and the double-degree in Forest Engineering-Civil Engineering are accredited by the Engineering Commission of ABET, http://www.abet.org/. The College of Veterinary Medicine's DVM program is accredited by the American Veterinary Medical Association, Council on Education (COE). In addition to the DVM degree, the Oregon Veterinary Diagnostic Laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians (AAVLD), and the Lois Bates Acheson Veterinary Teaching Hospital is accredited by the American Animal Hospital Association (AAHA).

Student Health Services is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC) and is a member of the American College Health Association (ACHA). The Student Health Services Laboratory is accredited by the Commission on Office Laboratory Accreditation (COLA).

The university's Counseling and Psychological Services (CAPS) office is accredited by the International Association of Counseling Services, Inc. (IACS), and the pre-doctoral training program at CAPS is accredited by the American Psychological Association (APA).

The Oregon State University Institutional Animal Care and Use Program is fully accredited by AAALAC International. OSU's participation in the rigorous AAALAC International accreditation process demonstrates a campus-wide commitment to humane and responsible animal use in research, instruction, production and testing and a dedication to excellent science. This institutional accreditation encompasses the entire campus animal research enterprise and all OSU sites where university-owned animals are housed or maintained. All colleges and research programs are included, with the largest programs being in Agricultural Sciences, Pharmacy, Public Health and Human Sciences, Science, the Carlson College of Veterinary Medicine, the Eastern Oregon Agricultural Research Centers, the Hatfield Marine Science Center, the Oregon Hatchery Research Center, and the Laboratory Animal Resources Center (LARC).

The Academic English program at INTO OSU is accredited by the Commission on English Language Program Accreditation (CEA). INTO OSU agrees to uphold the CEA Standards for English Language Programs and Institutions. CEA is recognized by the U.S. Secretary of Education as a national accrediting agency.

For further information about OSU’s accredited programs, please visit the University Accreditation (https://accreditation.oregonstate.edu/) webpage.

Innovation, Leadership and Excellence for Oregon and the World

Oregon State University is a community of students, faculty, staff, alumni and supporters who aspire to make the world a better place. It is a community defined by innovation, leadership and excellence in academics, research and outreach to serve Oregon, the nation and the world.

With more than 31,000 students, including more than 5,600 students earning their degrees entirely online, Oregon State is the state's largest
Oregon State University, welcoming a diverse student body from all 36 counties across Oregon, all 50 states and more than 100 countries.

Oregon State is the state's land grant university and is one of only two universities in the U.S. to have land, sea, space and sun grant designations. As a premier international research university, with a record $336 million in external research funding in 2016, Oregon State's impact reaches across the state and beyond.

Oregon State's 2015 strategic plan reaffirms the university's commitment to the three Signature Areas that draw from disciplines across the university and integrate research, engagement and teaching at both graduate and undergraduate levels:

- Advancing the Science of Sustainable Earth Ecosystems
- Improving Human Health and Wellness
- Promoting Economic Growth and Social Progress

Students Come First

- Oregon State is committed to diversity. Our students come from all walks of life and from all over the world. These students are extraordinarily bright and high-achieving contributors in the classroom and in their communities. Over the past five years, more of Oregon's high school valedictorians and salutatorians have enrolled at Oregon State than at Oregon's other public research universities.
- Oregon State offers a full range of strong scholarships, grants, work-study and loans from federal, state and university sources to help students get the best possible financial aid package.
- OSU Welcome Week begins at fall move-in and includes the first day of classes. This week is filled with events and activities for everyone, including Welcome Week Kick-off and Rec Night, new student convocation, student club events and many other educational and social activities geared toward connecting new students and welcoming returning students back to the university and Corvallis.
- Our First-Year Experience program helps new students transition into university life. A variety of small-group experiences is offered — including U-ENGAGE and first-year experience courses — to connect first-year students to faculty, current Oregon State students and other new students.
- The University Exploratory Studies Program allows students to explore a variety of disciplines before choosing an academic major.
- Our Diversity and Cultural Engagement office, cultural centers and Educational Opportunities Program work with African American, Asian American, Native American and Latino students to ensure that their Oregon State experience is positive.
- Oregon State is the only college or university in the state that offers ROTC programs for all four branches of the military — Air Force, Army, Marines and Navy.
- With more than 400 student organizations, plus club, intramural and Pac-12 Conference sports, students find it easy to keep busy at Oregon State.

Oregon Is Our Campus

- OSU Ecampus, with more than 45 undergraduate and graduate programs and over 1,000 courses, is consistently ranked in the top 10 among online bachelor's degrees nationwide by U.S. News & World Report and is ranked number one in value by valuecolleges.com (http://valuecolleges.com).
- The OSU Extension Service has programs, staff and volunteers providing essential services in all 36 Oregon counties.
- Consistently ranked among the top college towns in the nation, Corvallis is a welcoming, vibrant city of 55,000 people, offering a wide range of community, recreation, dining, shopping and cultural opportunities. And the city is just an hour or more from the Oregon Coast, the snow-capped Cascade Range and Portland — Oregon's largest city.

Mission

Preamble

Oregon State University is a comprehensive, public, internationally recognized research university. As one of only two land, sea, space and sun grant universities in the country (Penn State being the second), OSU offers programs and employs faculty and staff in every county of the state. OSU views the state of Oregon as its campus and works in partnership with all of Oregon's community colleges and the state's public and private colleges and universities to serve Oregonians' educational needs.

Mission

As a land grant institution committed to teaching, research, and outreach and engagement, Oregon State University promotes economic, social, cultural and environmental progress for the people of Oregon, the nation and the world. This mission is achieved by producing graduates competitive in the global economy, supporting a continuous search for new knowledge and solutions and maintaining a rigorous focus on academic excellence, particularly in the three Signature Areas: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

Vision

To best serve the people of Oregon, Oregon State University will be among the Top 10 land grant institutions in America.

Goals

1. Provide outstanding academic programs that further strengthen performance and pre-eminence in the three Signature Areas of Distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.
2. Provide an excellent teaching and learning environment and achieve student access, persistence and success through graduation and beyond that match the best land grant universities in the country.
3. Substantially increase revenues from private fundraising, partnerships, research grants and technology transfers while strengthening our ability to more effectively invest and allocate resources to achieve success.

Core Values

Accountability. We are committed stewards of the human, fiscal and physical resources entrusted to us. We are also stewards of the loyalty and good will of the people of Oregon; the university's students, faculty, staff, alumni, and donors; and the communities in which we live and work.

Diversity. We recognize that diversity and excellence go hand-in-hand, enhancing our teaching, scholarship, and service as well as our ability to welcome, respect, and interact with other people.

Integrity. We value responsible, accountable and ethical behavior in order to maintain an atmosphere of honest, open communication and mutual respect throughout the Oregon State community.
Respect. We treat each other with civility, dignity and respect.

Social responsibility. We contribute to society's intellectual, cultural, spiritual and economic progress and well-being to the maximum possible extent.

Core Themes

The core themes and their objectives were selected to align with the OSU Strategic Plan, the university’s mission and its three fundamental goals. The following core themes were chosen in early 2010:

- Undergraduate education
- Graduate education and research
- Outreach and engagement

Beginning in the fall of 2010, the university has introduced a Core Theme Planning process that will be conducted on an annual cycle and use continuous improvement principles to inform the campus community of how we are fulfilling our mission.

Source: OSU Strategic Plan

Founded in 1858 as a small, private academy called Corvallis College, Oregon State University has developed into an internationally recognized public research university.

College-level courses were introduced into the curriculum about 1865, and two men and one woman fulfilled the requirements for baccalaureate degrees in 1870, becoming the first graduates of a state-assisted college in the western United States.

Signed into law by President Abraham Lincoln on July 2, 1862, the Morrill Act provided grants of land to be used by states for the sole purpose of endowing, supporting and maintaining public colleges. The Oregon Legislative Assembly designated Corvallis College as the state's land grant institution on October 27, 1868. This was the first state support for higher education in Oregon. Permanent adoption as the state's agricultural college came in 1870.

For many years, the institution was known as Oregon Agricultural College. The name was changed to Oregon State College in 1953 and to Oregon State University in 1961.

Following the designation of the college as a land grant institution, agriculture was added to the existing arts and science curriculum in 1869. The curriculum continued to expand, with professorships in commerce (1880), agriculture (1883), household economy (1889) and engineering (1889) resulting in the establishment in 1908 of the professional schools of commerce, agriculture, engineering and mechanic arts and domestic science and arts. The first summer session was also held in 1908.

Curricular growth continued with the schools of forestry (1913), mines (1913), pharmacy (1917), education (1918), basic arts and sciences (1922) and health and physical education (1931).

In 1932, the Oregon State Board of Higher Education established the School of Science for the state system at Corvallis, eliminated the School of Mines, and reduced the School of Health and Physical Education to a division. Major work in business administration was discontinued but was reinstated when the College of Business was established (first as a division) in 1943. The College of Liberal Arts was established (as the School of Humanities and Social Sciences) in 1959. The Department of Oceanography was established in 1959, became the School of Oceanography in 1972 and the College of Oceanography in 1983. In 1992, the Department of Atmospheric Sciences in the College of Science was merged with the College of Oceanography and renamed the following year as the College of Oceanic and Atmospheric Sciences. In 2011, the Department of Geosciences in the College of Science was merged with COAS, and the college renamed the College of Earth, Ocean, and Atmospheric Sciences. The College of Health and Physical Education (now the College of Public Health and Human Sciences) was reinstated (as a school) in 1974, and the College of Veterinary Medicine was established (as a school) the following year. In 1983, all schools of the university, except the School of Education, were re-designated as colleges. In 1989, the School of Education became a college. In 1991, the College of Education merged with the College of Home Economics, and within the College of Home Economics and Education, was renamed the School of Education. In 1995, the University Honors College was established. In 2002, the College of Health and Human Performance and the College of Home Economics and Education were merged into the College of Health and Human Sciences. As part of this restructuring, the new School of Education became an independent academic unit. In 2005, the School of Education was renamed the College of Education. The College of Health and Human Sciences was renamed the College of Public Health and Human Sciences in 2011.

Following the approval of legislation adopted by the 2013 Oregon Legislature, Oregon State University made the decision to have its own institutional board of trustees. That board was appointed by Oregon Governor John Kitzhaber in the fall of 2013 and assumed all of its official duties on July 1, 2014.

Presidents of the institution since its founding:

- William A. Finley, 1865–72;
- Benjamin L. Arnold, 1872–92;
- John M. Bloss, 1892–96;
- Henry B. Miller, 1896–97;
- Thomas M. Gatch, 1897–1907;
- William Jasper Kerr, 1907–32;
- George Wilcox Peavy, 1934–40;
- Frank Llewellyn Ballard, 1940–41;
- August Leroy Strand, 1942–61;
- James Herbert Jensen, 1961–69;
- Robert William MacVicar, 1970–84;
- John V. Byrne, 1984–95;
- Paul G. Risser, 1996–2002;
- F. King Alexander, July 2020–present.

Acting presidents of the institution since its founding:

- Joseph Emery, 1872
- John D. Letcher, 1892
- George Wilcox Peavy, 1932–34
- Francois Archibald Gilfillan, 1941–42
- Roy Alton Young, 1969–70
- Timothy P. White, 2003
ADMISSION TO OREGON STATE UNIVERSITY

Oregon State University welcomes all students without regard to race, creed, sex, marital status, sexual preference, age, religion, handicap, or national origin who provide evidence of suitable preparation for course work at the university level.

Blake Vawter, Sr. Associate Director, 541-737-9807
Heather Wofford, Sr Assistant Director, 541-737-9808

Admission Requirements for First-Year Students
When to Apply
See application deadlines are available online (http://admissions.oregonstate.edu/undergraduate-admission-deadlines/).

The application and fee must be submitted electronically by the respective deadline.

The Admission Process
Apply online (http://admissions.oregonstate.edu/apply-choose-application/). Applicants are required to use a valid Visa, MasterCard, or Discover credit card to pay the $65 nonrefundable application fee. Request that your high school send your official high school transcript to OSU, and have your official SAT or ACT test scores sent to OSU.

Portfolios, videotapes, essays, and personal interviews are generally not required.

Evaluation Process
Admission to Oregon State University is selective and competitive and is based on a holistic review of application materials.

Complete applications are first reviewed to confirm successful completion of the 15 high school subject requirements and GPA earned. Providing SAT or ACT scores for admission review is optional for students applying during their senior year of high school.

Academic performance is not the sole criterion for admission to the university. The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions. Simply qualifying for admission does not guarantee admission.

Applicants can see when they will be notified of their admission status online (http://admissions.oregonstate.edu/admission-requirements-0/#Notification%20of%20status).

Policy Regarding Students' Eligibility to Return to Prior College
Applicants who disclose that they are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission to OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons may be admitted if they meet OSU's minimum academic requirements.

Applicants who are denied admission have the right to appeal that decision, and appeals will be reviewed on a case-by-case basis.

Selection of First-Year Students
OSU's admission requirements promote student success by assessing preparedness and academic potential in the unique context of each student's personal experience. Admission assessment will consider all achievement, both academic and nonacademic, to enroll students with a broad range of characteristics and perspectives. These include, but are not limited to academic achievement, creativity, initiative, motivation, leadership, persistence, service to others, intellectual curiosity, exceptional personal or academic recognition, unusual talent or ability, substantial experience with other cultures, and ability to overcome significant challenges.

The admissions process provides a fair and comprehensive review of all applicants for determining potential success at OSU. It is crucial that applicants carefully complete the application process by providing thorough information. Estimating the likelihood of admission is very difficult without considering the complete application file.

Regular Admission
Initial admission selections are based on a holistic assessment of the criteria listed below.

Strength of Curriculum:
- Quality, quantity, and level of course work throughout the entire high school program, especially course work completed beyond the
Admission to Oregon State University

minimum courses required (See the high school course requirements chart.)

• Advanced placement (AP), international baccalaureate (IB), or college course work completed or in progress
• Strength of the program taken within the context of the high school attended
• Progressively challenging math sequence (including Algebra II), demonstrated by performance

Academic Performance:

• A recommended unweighted high school grade-point average of 3.0 (on a 4.0 scale as calculated by the Office of Admissions)
• Class rank taken in context with academic rigor and size of high school attended
• Performance on standardized tests: SAT or ACT (optional)

Extended Admission (Admission Appeals)

Students not selected for regular admission may appeal via the extended admission process. Extended admission decisions will be determined by the Undergraduate Admissions Committee. In addition to regular admission requirements, students participating in the extended admission review will be asked to provide additional materials for consideration. Please refer to the OSU Office of Admissions website (http://admissions.oregonstate.edu/admission-appeals-aka-extended-admissions/) for specifics.

High School Course Requirements
This is supposed to be a 3-column table.

<table>
<thead>
<tr>
<th>College Preparatory Subjects</th>
<th>Minimum Units</th>
<th>Grades of C- or higher are required.</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4 years</td>
<td></td>
</tr>
<tr>
<td>Mathematics</td>
<td>3 years</td>
<td>Culminating at the Algebra II level or higher</td>
</tr>
<tr>
<td>Social Studies</td>
<td>3 years</td>
<td></td>
</tr>
<tr>
<td>Science</td>
<td>3 years</td>
<td>One year each of two different sciences (biology, chemistry, physics, etc.). One year of lab strongly recommended.</td>
</tr>
<tr>
<td>Foreign Language</td>
<td>2 years</td>
<td>May be met in any one of these ways:</td>
</tr>
</tbody>
</table>

Alternatives to Subject Requirements

Students unable to fulfill the subject requirements will be eligible for consideration by:

1. Taking SAT II Subject Tests
   Or
2. Successfully completing course work (high school or college transfer) for specific subject deficiencies.

Alternatives should be completed by high school graduation.

Test Requirements

Freshman applicants may choose to submit Scholastic Assessment Test (SAT-Reasoning) or American College Test (ACT) scores. Test scores may be used to determine course placement and considered for applicants not meeting the minimum high school GPA requirement.

The SAT college code for Oregon State University is 4586.
The ACT college code for Oregon State University is 3482.

High School Graduation

Public high school students must graduate from standard high schools.¹
Private high school students must graduate from regionally or state accredited high schools.²

¹ Standard high schools are public high schools that are certified as meeting specified levels of resources, services, and quality established by the Oregon Department of Education.

² Accredited high schools are those that are reviewed and recognized by a regional entity, such as the Northwest Association of Schools and Colleges, as meeting an appropriate level of academic rigor and support.

Graduates of Nonstandard or Unaccredited High Schools or Home-Schooled Students

Graduates of non-standard or unaccredited high schools, or home-schooled students will be considered for admission based on a holistic assessment. Students are recommended to provide:

SAT and/or ACT

Note: Only scores sent electronically from College Board (SAT) and/or ACT will be considered official and used for admission purposes. There is not an advantage to pay extra for ‘rush’ scores from the testing agency, and in some cases may add to the time it will take to process the scores within our office.
The SAT college code for Oregon State University is 4586. The ACT college code for Oregon State University is 3482.

SAT subject tests
SAT subject tests (Math I or II, and a second exam of the student’s choice).

College work
Students must provide official transcripts of any completed college credits. Students are encouraged to complete courses in core subject areas (Math, Writing/English, Science).

Additional Factors
- Oregon State is also looking for students who will lend educational and cultural diversity to our campus. We are looking for students who go above and beyond the minimum whether in talent, academic ability or potential. Combined with academic strengths, evidence of these characteristics may be considered in our review of applicants for admission.
- Applicants who are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission at OSU. Applicants who are unable to re-enroll at a previous college or university for academic reasons may be considered for admission if they meet OSU’s minimum academic requirements.

Petition for Admission Consideration
Students not approved for admission may appeal via the extended admission process. Eligible students will be provided with information about the petition procedure. Deadlines are in effect each term for appeals. For additional information, please refer to the OSU Office of Admissions website (http://admissions.oregonstate.edu/admission-appeals-aka-extended-admissions/).

Advanced Placement (AP) Credit
Oregon State University awards ungraded credit for achievement on certain College Board Advanced Placement (AP) examinations. Information pertaining to specific AP credit policies is available in high school counseling centers or may be obtained from the OSU Office of Admissions website (http://admissions.oregonstate.edu/?q=credit-opportunities). OSU’s college code is 4586 for those wishing to have their scores sent.

International Baccalaureate Credit
Oregon State recognizes IB achievement by awarding credit to students who score 5 or above on standard and higher level IB exams. OSU also grants additional benefits for students who complete the full IB diploma with a score of 30 or higher, as follows:

Sophomore Standing, and IB Scholarships are available. Students with a total score on IB exams of 30 or higher may choose to accept the annual, renewable scholarship award of at least $3,000 OR may compete for more substantial awards.

Students must send their official test scores to OSU. The official International Baccalaureate Certificate is required in order to award credit.

Contact your IB coordinator or IB North America to request score reports.

IBO North America
212-696-4464
http://www.ibo.org/

Transfer Admission
When to Apply
Apply online (http://admissions.oregonstate.edu/apply-choose-application/). Applicants are required to use a valid Visa, MasterCard, or Discover credit card to pay the $65 nonrefundable application fee. Official transcripts must be sent to OSU from each college or university attended.

Please refer to the OSU Office of Admissions website (http://admissions.oregonstate.edu/undergraduate-admission-deadlines/) for application deadlines.

Minimum Requirements for Admission Consideration
U.S. Citizens and Permanent Residents:

1. Successful completion of no less than 24 quarter (16 semester) graded, transferable credits from (a) regionally accredited U.S. institution(s). Students with fewer than 24 graded transferable quarter hours will be considered on the basis of their high school records and test scores, and must have a 2.25 GPA on all collegiate work attempted.

2. Only college-level, transferable credits are counted in those accepted in the GPA computation (professional-technical course grades are not included).

3. Students with 24 quarter (16 semester) graded, transferable credits from (a) regionally accredited U.S. institution(s) and a transfer GPA of 2.25 or above will be considered for admission if they have earned a C- or better in the following courses:
   - College-level writing equivalent to WR 121
   - Mathematics equivalent to MTH 111 – OR – MTH 105
CLEP tests should have official test scores sent to Admissions using CLEP please see information on how to meet foreign language deficiencies can be found online (http://admissions.oregonstate.edu/sites/admissions.oregonstate.edu/files/dfl-ways_to_meet.pdf).

4. Students with 24 quarter (16 semester) graded, transferable credits from a regionally accredited U.S. institution(s) and a transfer GPA of 2.50 or above will be considered for admission if they have earned a C- or better in the following courses:
   a. College-level writing equivalent to WR 121
   b. Two terms of the same foreign language in college will be required of those high school graduates of the class of 1997 and beyond who did not successfully complete two units (years) of foreign language while in high school. Additional information on how to meet foreign language deficiencies can be found online (http://admissions.oregonstate.edu/sites/admissions.oregonstate.edu/files/dfl-ways_to_meet.pdf).

5. Applicants who are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission at OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons may be admitted - if they meet OSU’s minimum academic requirements.

6. Applicants who are denied admission may be eligible to appeal that decision, and appeals will be reviewed on a case-by-case basis. Consult with the Office of Admissions for more information on the appeal process.

Please note that meeting the minimum admissions requirements and/or an individual’s academic performance does not guarantee them admission to the university. Furthermore, the university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at OSU.

Consideration will be given to applicants with a 2.00 GPA and an Associate of Arts Oregon Transfer (AAOT) degree from an Oregon community college, but admission is not guaranteed.

Evaluation and Transferability of Credit

Only official records are used to evaluate eligibility for admission and transferability of credit.

Official transcripts of all college work attempted must be submitted directly from the Registrar’s Office of each institution.

Oregon State University accepts college level credit from regionally accredited institutions toward a baccalaureate degree. While all acceptable transfer credits will be transcripted at OSU, no more than 135 quarter credits of non-OSU course work can be applied to an OSU baccalaureate degree. Therefore, students who transfer the full 135 credits from other institutions may ultimately graduate with more than the minimum credits for the baccalaureate degree. One semester credit equals 1.5 quarter credits at OSU.

For information on OSU’s acceptance of professional-technical courses, please see Academic Regulation 2 (p. 16).

CLEP

Applicants who want credit for College-Level Examination Program (CLEP) tests should have official test scores sent to Admissions using college code 4586. Additional details are available in the OSU Credit Opportunities brochure and on the OSU Admissions website (https://admissions.oregonstate.edu/credit-opportunities/).

Nondegree Status

Nondegree enrollment status is designed for students who want to take courses but do not want to pursue a degree. In some instances, nondegree students may not meet regular admission requirements.

Nondegree students are part-time students who are expected to enroll in no more than 8 credits a term. Students who want to enroll for more than 8 credits a term must apply for regular admission.

Nondegree enrollment status requires no formal admission process and has no requirements for entrance. Nondegree applications should be submitted electronically. Approval is granted for a specific term. Students who are unable to attend the specific term and want to enroll later should contact the Office of Admissions (undergraduate nondegree) or the Graduate School (graduate nondegree).

Nondegree students are given grades and academic records, and are reviewed according to university standards of good academic progress.

Nondegree students who wish to seek full admission and pursue a degree must do so by submitting an undergraduate, postbaccalaureate or graduate application for admission. In all cases, an admission application fee is required. Successful enrollment as a nondegree student does not guarantee regular admission. Credits earned while enrolled under nondegree undergraduate status will be applied to a student’s record.

Nondegree graduate students who decide to seek admission to a specific degree program during the course of their studies should note that any credits taken as a nondegree student may or may not be applicable for that degree, depending upon a variety of factors, their chosen program, and the policies of the Graduate School. Graduate students are further advised that academic residency must be completed after full admission as a degree-seeking graduate student, regardless of the number of credits previously earned while in nondegree status. Please refer to Reclassification of Postbaccalaureate Students, Nondegree-Seeking Students, and Graduate Certificate Students (p. 35).

Nondegree students follow the registration procedures and policies as outlined on the Office of the Registrar website (https://registrar.oregonstate.edu/registration/). The Schedule of Classes (https://classes.oregonstate.edu/) is available online. Registering students are expected to obtain a student identification card through the ID Center.

Tuition and fees for nondegree students enrolled in fewer than 9 credits are assessed at resident rates based on undergraduate- or graduate-course level. Payment of the health service fee is optional. Enrollment in excess of 8 credits requires that tuition and fees be assessed at the same rates as regular students and requires full admission as a regular student.

Registration holds in place prior to applying for nondegree status must be satisfied before registration as nondegree student will be allowed.

Academic Regulation 1. Admission for Nondegree Students

1. Nondegree enrollment status for undergraduate students is designed for students who wish to take 8 or fewer credits per term, but do not wish to pursue a degree or a specific postbaccalaureate credential.

2. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses, but do not wish to
pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) per term.

3. Credits earned as a nondegree undergraduate student may be used to satisfy degree requirements upon admission as a degree-seeking student.

4. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. Communication with the Graduate School and specific academic programs is advised.

5. Nondegree students seeking admission to a degree program must do so by submitting an undergraduate, postbaccalaureate, or graduate application for admission.

Select a Major
Undergraduates and postbaccalaureate applicants are asked to select a college and a major within that college. The University Exploratory Studies Program is a choice available to undergraduates who are undecided about a major. Students may change their major in consultation with an academic advisor.

Admission of Postbaccalaureate Students
Admission for postbaccalaureate applicants is determined by the department, not by the Office of Admissions.

If you are interested in pursuing postbaccalaureate course work, please consult the major department before applying for admission.

Degree Seeking Postbaccalaureate
Students who would like to earn a subsequent undergraduate degree from OSU or complete prerequisites for a graduate program at OSU may apply for degree seeking postbaccalaureate admission through the Office of Admissions. Applicants for consideration must submit an admission application along with official transcripts of all college work by the application deadline. Generally, applicants must meet the following admission requirements:

- Have a bachelor’s degree or equivalent from a regionally accredited institution
- 2.25 accumulated GPA requirements. The GPA is computed on the first baccalaureate degree plus any subsequent credit earned.
- Complete College Algebra and English Composition with a C– or better
- Submit Statement of Objectives of 150 to 200 words with their application
- Academic departments may impose additional requirements
- Nonrefundable $65 application fee

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university.

You cannot earn a postbaccalaureate degree in the same field in which you earned your original degree.

1 Applicants wishing to be considered for admission to multiple programs must submit a new application and fee for each program.

Additional Credentials
Students who want to earn a subsequent major credential, minor, option, or certificate from OSU may apply for credential enrollment status using the Postbaccalaureate Admission Application. Students must complete the current requirements for a minor or certificate and receive the dean’s approval. Students must also achieve a minimum GPA of 2.00 and complete a minimum of 15 credits in residence at OSU. A nonrefundable $65 admission application fee is charged. Students with credential enrollment status will be categorized as non-degree credentials at OSU and not eligible to receive federal financial aid.

Credential Classifications
- Minor Credential: Additional minor earned after undergraduate work is completed. Baccalaureate work can be completed at OSU or another institution. Students that previously completed a baccalaureate degree from Oregon State or another college cannot enter the same degree program as the degree program they graduated as an undergraduate.
- Major Credential: Additional major earned after undergraduate work is completed at OSU. Major credential must be completed within the same degree program.
- Option Credential: Additional option earned after undergraduate work is completed at OSU. Option credential must be completed within the same degree and major program.
- Certificate: A structured progression of courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. Undergraduate certificates can be earned by students without any prior degree (professionals in a field), or as a credential seeking, graduate student or as an undergraduate student in conjunction with an undergraduate degree. The certificate requirements and pre-requisites are defined at the college level.

International Applicants
International applicants should also refer to the admissions procedures (http://admissions.oregonstate.edu/international/) for undergraduate/graduate international students for deadlines, test score requirements, and additional information.

Admission with Graduate Standing
To be considered for admission to the Graduate School, an applicant must have a baccalaureate degree from a regionally accredited college or university, as well as a scholastic record, background, or other evidence that indicates the ability to do satisfactory graduate work. See Graduate Admission Procedures (p. 35) in this Catalog.

Admission of International Students (p. 40)
Admission to Summer Session
Students who wish to begin work on a degree during summer session at OSU must satisfy regular admission requirements and apply by the specified deadlines.

Admission to Professional Programs
Professional programs are accredited according to requirements set by professional societies. These programs often have more rigorous requirements for admission, continuation in the program, and acceptance of transfer credit. Therefore, admission to OSU is separate from
admission to a professional program and does not guarantee such admission.

OSU-Cascades

OSU-Cascades provides students personalized instruction and OSU’s excellence in both academics and innovative research, as well as the lifelong advantages of a premier research university. OSU-Cascades is the only baccalaureate and graduate degree granting institution based in Central Oregon. OSU-Cascades expanded to a four-year university when it welcomed its first freshman class in fall 2015.

Born out of a 30-year grassroots effort put forth by Central Oregonians to bring a university to the region the university opened its doors in September 2001 on the COCC campus, offering upper-division and graduate coursework toward bachelor’s and master’s degrees.

After record enrollment growth and demonstrated financial support from the surrounding community, in August 2012 the Oregon University System endorsed OSU-Cascades’ expansion to a four-year university. In July 2013, the Oregon State Legislature approved capital funding that enabled the branch campus to establish its own campus. The branch campus completed the first phase of campus development in 2016.

OSU-Cascades features outstanding faculty in degree programs that reflect Central Oregon’s vibrant economy, abundant natural resources and commitment to sustainability. Eighteen undergraduate majors, 30 minors and options, and three graduate programs include fields such as computer science, energy systems engineering, kinesiology, hospitality management, and tourism and outdoor leadership. Experiential learning options include faculty research, internships and study abroad programs in 80 countries.

OSU-Cascades provides students excellence in academics, practical and experiential learning opportunities, and the lifelong advantages of a premier research university—all on a growing campus community of 1,300 students and faculty.

Degree Partnership Programs – Dual Admission and Enrollment at Designated Community Colleges (p. 35)

Credit for Military Experience

Students are recommended to seek advice from their Academic Advisor prior to transferring in their Military Credits. Oregon State University grants up to 45 credits for military education as recommended by the American Council on Education’s (ACE) Guide to the Evaluation of Educational Experiences in the Armed Services (https://www.acenet.edu/news-room/Pages/Military-Guide-Online.aspx). This is in accordance with transfer credit policies at Oregon State University. Students may request evaluation of military credit by furnishing the Office of Admissions with a Joint Services Transcript, Navy SMART transcript, or U.S. Coast Guard transcript. Transcripts may be obtained through these homepages:

- JST (https://jst.doded.mil/official.html) Note: Some browser security settings may raise a caution message before entering these Department of Defense websites.

- Additional informational links to other service pages can be found on the ACE website (http://www.acenet.edu/higher-education/topics/Pages/College-Credit-for-Military-Service.aspx)

Oregon State University will grant 1.00 quarter credit for the course HHS 241 Lifetime Fitness Lab. For HHS 241 credit to be granted, please submit either the DD214 or an official ACE transcript. Credit will also be granted if one of the following military science courses has been completed successfully: Physical Fitness, Physical Education, or Physical Conditioning. To receive credit, please submit an official transcript from the institution.

Oregon State University will assess and award block transfer credit upon review of your military record. An evaluation report showing block transfer credits will be sent to you. For a better understanding of how each college uses the 45-credit block of general elective credits there is a web page on the OSU Veterans website (http://studentlife.oregonstate.edu/veterans/) (click on Current Students, then click on Military Credit) outlining this information. In addition, if you believe a specific military course, training, experience, etc. directly relates to a university course, you can complete a form to petition for Military Credit Course Substitution (http://studentlife.oregonstate.edu/veterans/) (click on Current Students on the right side, then click on Military Credit on the right side of the page).

Any student receiving GI Bill® education benefits while attending Oregon State University is required to obtain transcripts from all previously attended schools and submit them to the school for review of prior credit.

Footnote: GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website (https://www.benefts.va.gov/gibill/).

Placement Examinations

High school seniors planning to enter OSU must take the SAT or the ACT. These tests provide academic advisors with valuable information about a student’s educational development, abilities, and aptitudes.

New students are required to take an online Math Placement Test (http://www.math.oregonstate.edu/mlc-placement-home/). Students who enter the university with previous language training from another institution and who wish to continue their study of the language are required to take a language proficiency examination to determine placement level. Please call the OSU School of Language, Culture, and Society at 541-737-4603. Other placement examinations may be required in certain majors.

Registration Procedures

Once admitted to Oregon State University, students are eligible for course registration. Complete registration instructions, procedures, schedules and deadlines are detailed in the Schedule of Classes (https://classes.oregonstate.edu/). A student is officially registered and eligible to attend classes only when all procedures have been completed. Students who make arrangements to pay outstanding university debts and who do not adhere to the agreed upon plan may be dis-enrolled.

In addition to the basic information regarding registration, the Office of the Registrar website (https://registrar.oregonstate.edu/registration/) is an essential resource to the student for the academic calendar, fee schedule, academic and other student regulations and procedures, final examination schedule, and listing of baccalaureate core courses.
Re-Enrollment

Undergraduate students who wish to re-enroll in the university after an absence may do so providing they were eligible to re-enroll their last term of attendance. Students who have been absent four or more terms, not including summer terms, should contact the Office of the Registrar to reactivate their records, at which time the current catalog becomes their catalog of record for graduation requirements. The university reserves the right to consider a student’s status with respect to voluntary or involuntary leave, as well as any existing student conduct issues when requesting to re-enroll. Students who have been absent less than four terms are still considered active and register following the registration instructions on the Office of the Registrar website (https://registrar.oregonstate.edu/registration/). International students who wish to re-enroll after an absence should check in with the Office of International Services (p. 1746) (OIS) to make sure they have the required documents to return.

Re-enrolling students who have attended another college or university since their last term at OSU are required to report that enrollment at the time of re-entry. Official transcripts must be forwarded to the Office of Admissions. Returning students with an OSU cumulative GPA below or very near 2.00 are reminded of the OSU graduation requirement (Academic Regulation 25e (p. 16)), which stipulates 2.00 as the minimum OSU cumulative grade-point average required to earn a baccalaureate degree from OSU.

All re-enrolling students are reminded of their responsibility to update any outdated information, such as address, in their OSU records. Contact the Office of the Registrar to make changes.

Degree Partnership Programs

Dual Admission and Enrollment at Designated Community Colleges

Oregon State University offers special Degree Partnership Programs (dual admission and enrollment) with all of Oregon’s community colleges:

1. Blue Mountain Community College (http://www.bluecc.edu/) in Pendleton
2. Central Oregon Community College (http://www.cocc.edu/) in Bend
3. Chemeketa Community College (http://www.chemeketa.edu/) in Salem
4. Clackamas Community College (http://www.clackamas.cc.or.us/) in Oregon City
5. Clatsop Community College (http://www.clatsopcollege.com/) in Astoria
6. Columbia Gorge Community College (http://www.cgcc.edu/admissions/) in The Dalles
7. Klamath Community College (http://www.klamathcc.edu/Home/) in Klamath Falls
8. Lane Community College (http://www.lanecc.edu/) in Eugene
9. Linn-Benton Community College (http://www.linnbenton.edu/) in Albany
10. Mt. Hood Community College (http://www.mhcc.edu/) in Gresham
11. Oregon Coast Community College (http://www.oregoncoastcc.org/) in Newport
12. Portland Community College (http://www.pcc.edu/)
13. Rogue Community College (http://www.roguecc.edu/) in Medford
14. Southwestern Oregon Community College (http://www.socc.edu/) in Coos Bay
15. Tillamook Bay Community College (http://tilamookbaycc.edu/) in Tillamook
16. Treasure Valley Community College (http://www.tvcc.cc.or.us/) in Ontario
17. Umpqua Community College (http://www.umpqua.edu/) in Roseburg

OSU also has Degree Partnership Programs with three of Hawaii’s seven community colleges:

1. Hawai‘i Community College (http://hawaii.hawaii.edu/) in Hilo, Hawai‘i (Big Island)
2. Kapi‘olani Community College (http://www.kapiolani.hawaii.edu/) in Honolulu, Oahu
3. Maui College (http://maui.hawaii.edu/), University of Hawaii, in Kahului, Maui

These programs provide students with simultaneous access and admission/enrollment status at both OSU and the community college. There is one application process to attend both schools, advising is available at either campus, and the student has the opportunity to access services and participate in college life on both campuses. There is flexibility in scheduling with access to more classes, financial aid is available for qualified students while attending both schools, and admitted students have access to library and computer lab resources at both campuses. For more information on Degree Partnership Programs (dual admission and enrollment), please contact the admissions office at the community college, OSU Degree Partnership Student Program, 541-737-2790, or the University Partnership Programs website (http://partnerships.oregonstate.edu/).

Transfer Student Services and Degree Partnership Programs

Rick DeBellis, Associate Director for Enrollment Management
Degree Partnership Programs
Phone: 541-737-2790

Jose Ceja Garibay, Transfer Student Services Manager

Application deadlines for Degree Partnership Programs vary. Please refer to the DPP website (http://partnerships.oregonstate.edu/dpp-students/application-deadlines/) to ensure that you meet the appropriate deadline.

Graduate School Admission

Graduate Admissions Requirements

Oregon State University offers admission to applicants whose records demonstrate the highest potential for graduate study and promise for substantial contribution to both their academic professions and to a diverse, global society. The university fosters an environment that welcomes inclusiveness.

Admission decisions are based on many factors, such as the quality of the applicant’s prior academic degree and record of accomplishment, statement of purpose, letters of recommendation from professors or
others familiar with the applicant’s academic work, performance in aptitude and achievement tests, relevant work experience, preparation in the proposed field of study, and the connection of the applicant’s academic goals with the faculty’s research interests.

**Requirements**

The following minimum entrance requirements guide the university and its graduate programs in the consideration of applicants for graduate admission:

- A four-year baccalaureate degree (or international equivalent), a professional degree (such as BPharm, BVsc, MBBS, MD, DVM, DPharm, etc.), or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, **with**
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent baccalaureate degree or equivalent or any subsequent graduate degree from a regionally accredited (US) or recognized (International) college or university, **plus all work completed thereafter.**

The graduate program may choose to calculate the GPA on the last 90 quarter credits (60 semester credits [last two years on an international record]) of graded undergraduate work on the most recent baccalaureate degree, plus all work completed thereafter, **as the basis for admission.**

Minimum GPA for admission to only graduate certificate programs is set by the departments that supervise the certificates. Applicants requesting admission to only graduate certificate programs should contact their academic program to learn about minimum GPA and other admission requirements.

**OR:**

- A four-year baccalaureate degree (or international equivalent), a professional degree, or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, and
- A 45-quarter credit equivalent graduate degree from a regionally accredited (US) or recognized (International) college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent graduate degree.

If the applicant has completed his or her baccalaureate degree in a country that is a signatory of the Bologna Declaration, then:

- A Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the degree, plus all subsequent graded course work.

**OR (Other three-year bachelor degree holders):**

- A non-Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, and
- A 45-quarter credit equivalent graduate degree from a recognized college or university, with
- A cumulative GPA of at least 3.00 on the most recent graduate degree.

- Graduate programs also have the option of validating that specific professional and/or three-year degrees appropriately prepare students for their graduate admission.

**International Requirements**

All international graduate applicants must meet the following additional requirements:

- Documentation of sufficient financial resources to attend Oregon State University as a graduate student.

  **AND:**

  - Documentation of English language proficiency

<table>
<thead>
<tr>
<th>Test</th>
<th>Regular Admission</th>
<th>Transitional Admission-TAP (formerly Conditional Admission-CAP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOEFL Paper based</td>
<td>550</td>
<td>500-547</td>
</tr>
<tr>
<td>Internet (iBT) TOEFL</td>
<td>80 Minimum score of 18 on each section</td>
<td>60-79 Or any sub-score less than 18</td>
</tr>
<tr>
<td>Internet (iBT) TOEFL</td>
<td>80 Minimum score of 22 on Speaking sub-score and Minimum score of 18 on all other sections</td>
<td></td>
</tr>
<tr>
<td>IELTS</td>
<td>6.5</td>
<td>6.0</td>
</tr>
</tbody>
</table>

**Please note:** OSU requires graduate applicants to meet or exceed all five iBT scores to be eligible for full admission. Scores must be no more than two years old at the time of the applicant’s first term of registration.

**Waived from English Language Testing**

The English language proficiency requirement is waived for applicants who have demonstrated success by achieving an overall GPA greater than 3.0 on a 4.0 scale for two or more semesters/quarters in a rigorous undergraduate or postgraduate program in the U.S. or from one of the following English speaking countries 1: Australia, Canada, New Zealand, and United Kingdom.

1 Waivers for applicants in other countries are considered on a case-by-case basis if the medium of instruction is English. The individual program must petition the Graduate School for a waiver. Not all programs will request a waiver. Please contact your proposed graduate program to inquire about their policy.

**English Language Exceptions**

Individual programs may request exceptions to the minimum English language proficiency requirements. Exceptions to the minimum TOEFL score/sub-score requirements will be considered by the Graduate School Dean on request if:

- Applicant’s GRE Verbal score is greater than 500 (153 – revised GRE) OR
- The chair of the Graduate Program (or designated faculty member)
  - Has personally interviewed the applicant and established a plan for language support for the applicant, if needed, which may include additional English Language Training, OR
• The Graduate Program arranges for the applicant to complete language training at INTO OSU equivalent to the admission status as designated by the Transitional Admission Program-TAP

Transitional Admission Program
Transitional admission based on English language proficiency may be granted to applicants seeking admission to a graduate degree program. University transitional admission of international applicants may be granted only if the applicant is otherwise fully admissible.

Transitional admission for degree-seeking applicants requires:

• Compliance with a specified plan for English and academic course work during each quarter until such time as the applicant qualifies for regular admission.
• Individual graduate programs may require additional documents such as GRE and GMAT test results or set higher English and academic standards. For detailed information, refer to the website for Graduate Admissions and individual graduate program websites.

Transitional admission based on English language proficiency is not granted to applicants seeking admission to only a graduate certificate program.

All international applicants seeking graduate teaching assistantships should refer to the International Graduate Teaching Assistant English Language Requirement (p. 1711) section of this catalog for more details.

Admission Requirements Continued
Applicants not meeting minimum academic requirements still may be considered for admission with the support of their academic program, plus review and approval by the University Graduate Admissions Committee. For these applicants, decisions may rely more heavily on noncognitive criteria. However, the university encourages those applicants whose overall cumulative undergraduate GPA is less than an equivalent 3.00 on a U.S. 4.00 grading scale to take the GRE.

Applicants whose baccalaureate degrees are awarded by an institution that issues non-graded transcripts will be considered for admission with the support of the program’s written evaluation of the quality of the applicant’s transcript record.

Satisfaction of minimum entrance requirements does not guarantee admission, since the number of qualified applicants far exceeds the number of places available. As a consequence, many well-qualified applicants may not be accommodated.

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person’s behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions.

Policy Regarding Students' Eligibility to Return to Prior College
Applicants who disclose that they are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission to OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons will be admitted only if they meet OSU’s minimum academic requirements.

All applicants who are denied admission for conduct reasons have the right to appeal that decision, and appeals will be reviewed on a case-by-case basis.

Application Process
Application forms (https://oregonstate.Force.com/AppLogin/) required for admission to the Graduate School are available electronically.

The applicant’s proposed academic program will examine material submitted to determine the adequacy of scholastic background and to decide whether departmental facilities are adequate for the expressed aims of the applicant. Upon the positive recommendation of the academic program, the Graduate School will determine whether minimum university requirements for admission have been met and, subsequently, will provide to the applicant formal notification as to the action taken.

Applicants must upload application materials, unless a program specifies differently. Applicants should contact their academic program(s) of interest to determine whether additional admission materials are required beyond those listed below. Applicants seeking admission to only a graduate certificate program must provide items a., b., and c. below and contact their academic programs to determine what other program-specific materials may be required for admission to the graduate certificate program.

1. One electronic version of the graduate application for each major to which the applicant seeks admission.
2. $75 nonrefundable application fee (domestic students); $85 nonrefundable fee (international students). Applying online requires payment by credit card.
3. Transcripts/Academic Records of all previous academic work, undergraduate and graduate. International applicants must provide a certified English translation of academic records in addition to original language records.  
4. Three letters of professional reference are required of most applicants applying for admission to a graduate degree program. Applicants with master’s degrees should include a letter from their major professor. Applicants applying only to graduate certificate programs are encouraged to consult with their academic program to determine whether this or other materials are required.
5. Certain graduate programs require the GRE of all applicants. Address inquiries regarding GRE requirements to your proposed academic program. See specific program information. (http://gradschool.oregonstate.edu/programs/)
International applicants must also upload the following documents with their application materials:

1. One photocopy of TOEFL or IELTS scores. If admitted, official test scores must be received by the Graduate School prior to the start of the applicant’s first term of enrollment.
2. Certification of Finances form with supporting documentation, demonstrating sufficient financial resources for the desired academic program.

Financial documentation is not required at the time of application. If the application is accepted, the Graduate School will contact the applicant via email to request the financial materials.

Note: Applicants taking courses as a distance student through OSU Ecampus and not entering the U.S. must complete a special certification form. Proof of funding is not required. Please contact graduate admissions to request the form.

Application Deadlines

Department Deadlines

Academic programs establish their own application deadlines, which are often substantially earlier than the general university deadlines described below. In such cases, program deadlines supersede the more general university deadline. Many academic programs also admit applicants for specific terms only (e.g., fall term). Applicants should contact the proposed graduate program for deadlines and any other restrictions. See specific program information. (http://gradschool.oregonstate.edu/programs/)

In the absence of earlier program deadlines, the following university deadlines exist:

U.S. Citizens and Permanent Residents

Absolutely no later than 30 days prior to the first day of classes.

International Applicants

To allow adequate time for students to obtain visas and make travel arrangements, the following deadlines have been established for international applicants:

<table>
<thead>
<tr>
<th>Term</th>
<th>General University Deadline&lt;sup&gt;1&lt;/sup&gt; for International Students Applying from Outside the U.S.</th>
<th>General University Deadline&lt;sup&gt;1&lt;/sup&gt; for International Students Applying from Within the U.S.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>April 1</td>
<td>June 1</td>
</tr>
<tr>
<td>Winter</td>
<td>July 1</td>
<td>September 1</td>
</tr>
<tr>
<td>Spring</td>
<td>October 1</td>
<td>December 1</td>
</tr>
<tr>
<td>Summer</td>
<td>January 1</td>
<td>March 1</td>
</tr>
</tbody>
</table>

<sup>1</sup> Program deadlines supersede this deadline. Please contact program directly for specific program deadline.

Summer Session Admission

See Summer Session (https://summer.oregonstate.edu/)

Admission Status

Students may be admitted to the Graduate School under the following categories.

Advanced-Degree Students

1. Regularly Admitted Graduate Students. These students have been accepted by the university and by a major program to work toward an advanced degree.
2. Conditionally Admitted Graduate Students. Students who have not met the formal admission requirements but whose achievements have convinced the University Graduate Admissions Committee and their major program that they have potential for success as advanced degree candidates may be conditionally admitted as follows:
   a. Students from nonaccredited institutions must complete at least one term of satisfactory work at Oregon State, after which they may be admitted with full standing in the Graduate School.
   b. Students whose preparation does not warrant full admission to the Graduate School but who may prove acceptable later must satisfactorily complete specified conditions to demonstrate their ability to carry out graduate-level work.

3. Transitionally Admitted Graduate Students. International students who lack minimum English language proficiencies but otherwise meet all other formal admission requirements may be transitionally admitted under the following:
   a. TOEFL total score is in the range of 61 to 79 (iBT).
   b. IELTS total score is 6.0.

   Students who score below the minimum on one or more iBT subtests but meet the minimum overall iBT score requirement may be considered for transitional admission. Transitional admission based on English language proficiency may not be granted to students seeking admission to only a graduate certificate program.

4. Provisionally Admitted Graduate Students. Students who have met all of the university standards for formal admission but whose academic program or major department may have placed additional restrictions upon their admission may be provisionally admitted. These restrictions may include certain prerequisite courses that must be completed, completion of the GRE or GMAT, submission of additional reference letters or scores, etc.

Conditionally and transitionally admitted students cannot schedule and hold preliminary oral exams or final oral exams for their degree until they have satisfied the requirements of their admission and have been reclassified as regular graduate students.

Provisionally admitted students cannot take the final exam for their degree until they have satisfied their provisions and have been reclassified as regular graduate students.

Credit for graduate courses that students have completed acceptably while registered as conditional, transitional or provisional students may count toward the residence requirement for advanced degrees.

If students fail to satisfactorily complete their conditions or provisions, they will be dismissed from the Graduate School.

Graduate Certificate Students

Students admitted to only a graduate certificate program may be considered for reclassification as degree-seeking graduate students by following the procedure in the section below regarding reclassification.

Nondegree-Seeking Graduate Students

The nondegree-seeking graduate student category may be used by holders of a baccalaureate degree who do not wish to pursue an advanced degree or graduate certificate. Those nondegree-seeking
graduate students who wish to be reclassified as degree-seeking graduate students must follow the procedure in the next section.

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. should consult with OSU’s Office of International Services (http://international.oregonstate.edu/ois/) (OIS) (email: ois.student@oregonstate.edu) before submitting the OSU non-degree application for admission. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one’s visa status.

Graduate international students who wish to enroll as nondegree students with OSU for one or more terms, but who will not participate in an established exchange program, should contact the OIS Office isas.advisor@oregonstate.edu for further information before applying.

Students who plan to enroll with OSU as nondegree exchange students should use the application form that is made available at each partner institution. Find a list of exchange partner institutions. (https://international.oregonstate.edu/sites/international.oregonstate.edu/files/atosu/osu-exchange-partner-institutions.pdf)

Reclassification of Postbaccalaureate Students, Nondegree-Seeking Students, and Graduate Certificate Students

A postbaccalaureate, nondegree-seeking graduate, or graduate certificate student may be considered for status as a regular degree-seeking graduate student under one of the following provisions, depending upon prior academic records:

If the student would have been eligible for graduate admission at the time of entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student, the student is eligible for admission consideration at any time but must submit an application for admission to the appropriate level to begin the process.

If the student, prior to entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student had been denied graduate admission or would have been ineligible for graduate admission, as determined a posteriori by the University Graduate Admissions Committee, the postbaccalaureate, nondegree-seeking graduate, or graduate certificate student must complete option a, b, or c below and reapply or reactivate an application for admission to graduate-level study:

1. complete 24 credits of courses each with a grade of B (3.00) or better, or
2. complete 15 credits of graduate course work involving lecture and textbook instruction, each eligible to transfer into the degree program and with a grade of B (3.00) or better, or
3. complete sufficient credits to bring the cumulative grade-point average (that for the last 90 credits of undergraduate work plus that for courses taken as part of a or b above) to 3.00 or better before being eligible to apply for graduate admission.

These courses will normally be regular graduate courses relevant to the specific field, except that seminars and other blanket number graduate courses may not be used. Upper-division undergraduate courses are acceptable, provided that they eliminate specific deficiencies in requirements for entry into an identified graduate program. Lower-division undergraduate courses may not be used. All courses should be carefully selected in consultation with an academic advisor from the graduate field into which the student desires admission.

Completion of 2(a), 2(b) or 2(c) above does not guarantee graduate admission. Reclassification decisions employ the same procedures and requirements as those for admission. Postbaccalaureate, nondegree-seeking graduate, and graduate certificate students who seek reclassification must be acceptable to the program in which they plan to major; admission is competitive. The university does not have the capacity to accommodate all who meet the minimum requirements for regular graduate student status; when selecting among students who meet minimum requirements, the university treats students requesting reclassification the same as those applying for admission as regular graduate students.

A postbaccalaureate or nondegree-seeking graduate student may use graduate credit earned in this status toward an advanced degree or graduate certificate if the student is later reclassified as a regular graduate student. This credit cannot be used to satisfy residence requirements for an advanced degree. A graduate certificate student may use graduate credit earned in this status toward an advanced degree if the student is later reclassified as a regular graduate student. In either case, the amount of usable credit will depend on the size of the individual student’s program (e.g., a maximum of 15 graduate credits could be used on a 45-credit master’s program or a maximum of 6 graduate credits may be applied toward an 18-credit graduate certificate.) See section entitled ‘Transfer Credit’ for complete details.

Students should initiate all requests for reclassification at the Graduate School.

Second OSU Master’s Degree

A candidate for a second master’s degree from Oregon State University may request the application of up to 15 credits, appropriate to both programs, from the first master’s degree program to another, subject to the following three requirements:

1. Credits used to satisfy the residency requirements of one master’s degree may not be used to satisfy the residency requirements of another master’s degree.
2. Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.
3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of C or higher.

Pursuit of the Second Ph.D.

The doctor of philosophy degree is the highest academic degree granted by North American universities. It is a research degree designed to prepare a student to become a scholar; that is, to discover, integrate, and apply knowledge, as well as communicate and disseminate it. The doctor of philosophy degree is to be distinguished from other doctorates such as the MD, JD, or EdD degrees, which are designed for professional training or which focus on applied rather than basic research.

Students may enroll for a second Ph.D. degree if they have previously obtained a Ph.D. from OSU or elsewhere. Concurrent pursuit of dual Ph.D. degrees is not allowed. In the case of a student pursuing a second
Ph.D. degree, requirements for the second Ph.D. must be met without overlap with the first Ph.D. degree including, but not limited to: successful completion of a second preliminary exam, a separate thesis with no overlap with the first Ph.D. thesis, a final defense exam for the second Ph.D., a different major advisor from the first Ph.D., a thesis committee of different faculty than the first Ph.D. degree (although some, but not complete, overlap between committee members would be acceptable in the case of two Ph.D. degrees from OSU), and all other requirements for the second Ph.D. degree. Courses from the first Ph.D. degree relevant to the second degree may be allowed to transfer between the two degrees. However, the student’s program of study committee must approve all course transfers, should pay particular attention to the relevancy, overlap, and currency of any courses to be transferred from one Ph.D. degree to another, and are advised to proceed conservatively when approving course transfers from a first Ph.D. to a second Ph.D. degree.

Re-Enrollment

All credential-seeking graduate students will be subject to the continuous enrollment policy. Continuous graduate enrollment refers to the policy of requiring continuous registration of graduate students from original matriculation until all graduate degree requirements are met. Please refer to Registration Requirements under Policies Governing All Graduate Programs for complete details.

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an application for graduate admission and pay the application fee. Readmission is not guaranteed even if the student left in good standing.

International students who wish to re-enroll after an absence should contact the Office of International Services (OIS) to make sure they have the required documents to return to the US.

International Admissions

International Undergraduates as Nondegree Students

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. and do not have a valid immigration document from an accredited institution in the U.S. or other English speaking country (email: OIS.Student@oregonstate.edu) before submitting the OSU non-degree application for admission. Students will be required to turn in copies of their immigration documents to move forward. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one’s visa status.

International students who plan to enroll with OSU as non-degree exchange students should use the application form that is made available at each partner institution.

Undergraduate students who wish to enroll with OSU for one or more terms, but who do not plan to complete degree requirements at OSU and will not participate in an established exchange program, should contact International Admissions at intladmit@oregonstate.edu for further information, and before applying.

International students who wish to enroll in Academic English, Undergraduate Pathway, Undergraduate Transfer Program or Graduate Pathway programs should contact INTO Oregon State University at intladmit@oregonstate.edu for further information.

Admission of International Undergraduate Students

International students are admitted to OSU based on meeting the minimum OSU academic requirements, English language proficiency requirements and evidence of funding requirements (if an F-1 or J-1 visa is needed). Visit the Office of International Admissions website (https://admissions.oregonstate.edu/international/).

In general, international applicants must have completed their high school diploma or secondary school certificate with a minimum 3.0 on a 4.0 scale, an average ‘B’ grade (A–F), or the equivalent.

Applicants transferring from a recognized college or university outside the U.S. must have a cumulative grade-point average of 2.25, meet OSU’s math requirement for transfer students (if you have earned 24 or more transferrable quarter credits) and be eligible to return to the most recent institution attended.

Applicants transferring from a regionally accredited college or university in the U.S. must have a cumulative grade-point average of 2.25, meet OSU’s math and writing requirements for transfer students (if you have earned 24 or more transferrable quarter credits), and be eligible to return to the most recent institution attended.

Applicants for a bachelor’s degree must submit official records of all secondary, middle and high schools attended (in general, these represent years 9–12) and all colleges, universities and/or professional schools attended. Results of comprehensive examinations are required in the original language and on the official form of the institution, government, or other examining or certifying agency.

Applicants must present proof of English language proficiency, if available, by submitting TOEFL, IELTS or an acceptable alternative, e.g., IGCSE, SAT, ACT, or AP results.

Exceptions to the English proficiency test requirement are:

- Individuals who have completed a bachelor’s degree from a regionally accredited institution in the U.S. or other English speaking country (See list below).
- Citizens of the following countries: Anguilla, Antigua and Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (English speaking provinces), Cayman Islands, Dominica, Grenada, Ireland, Jamaica, Montserrat, New Zealand, St. Kits and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos, United Kingdom, U.S. Virgin Islands.
- For citizens of African countries whose official language is English, waivers will be considered on a case-by-case basis if the medium of instruction is English.

INTO OSU Pathway Programs

UNDERGRADUATE PATHWAY

INTO Oregon State University’s Undergraduate Pathway programs combine intensive language study, academic skills development and academic course work in a carefully constructed program designed to move students successfully through one to three terms of undergraduate study in their degree program. Entry requirements vary based on the length of program chosen. All students have a study plan and receive
academic advising that is reflective of their specific Undergraduate Pathway program.

Successful completion of Undergraduate Pathway progression requirements allows students to complete one to three terms of undergraduate study and progress to their undergraduate degree at Oregon State University in their respective field of study.

Academic English + Undergraduate Pathway
Academically qualified applicants for Undergraduate Pathway who are unable to provide a language proficiency score (or who provide one that is below the minimum) will begin their program by taking Academic English courses until they complete Level 4 of the program. All students have a study plan and receive academic advising that is reflective of the Academic English + Undergraduate Pathway program.

GRADUATE PATHWAY
INTO Oregon State University’s Graduate Pathway program provides international students a direct path to various graduate degrees at the university. The program gives students the academic foundation and essential language skills to successfully move on to the Master’s degree. Entry to this program requires satisfactory completion of a four-year undergraduate degree in an appropriate subject with at least a 2.5 GPA or equivalent overall 70 IBT TOEFL or equivalent test score (some options have higher entry requirements). All students have a study plan and receive academic advising that is reflective of their specific Graduate Pathway program.

Successful completion of Graduate Pathway progression requirements secures students a place in full-time graduate studies at Oregon State University in their respective field of study.

Academic English + Graduate Pathway
Academically qualified applicants for Graduate Pathway who are unable to provide a language proficiency score (or who provide one that is below the minimum) will begin their program by taking Academic English courses until they complete Level 5 of the program. All students have a study plan and receive academic advising that is reflective of the Academic English + Graduate Pathway program.

WHEN TO APPLY: INTERNATIONAL UNDERGRADUATE STUDENTS
The Office of International Admissions recommends that international undergraduate applicants submit a complete application and supporting documents preferably 4 to 6 months before the intended term start date.

For information about Admission of International Graduate Students, please see the Graduate Admissions Requirements (p. 35) section.

Oregon Transfer Module
The Oregon Transfer Module (OTM) provides a one-year curriculum for students who plan to transfer to a state of Oregon two-year or four-year college/university of higher education. The Oregon Transfer Module is neither a certificate nor a degree; it represents the successful completion of certain general education courses. OTM completion will be noted in the student’s record. The Oregon Transfer Module documents that a student has met a subset of the common general education requirements at all Oregon community colleges and state universities in Oregon.

The Oregon Transfer Module requirements at Oregon State University are:

- 45 lower-division credits—minimum of 12 credits must be OSU course work according to the attached list
- Minimum grade of C– for each course
- Minimum cumulative GPA 2.0 at time Oregon Transfer Module is completed
- Students are allowed 3 S/U credits per full time term or a maximum of 9 S/U credits in the Oregon Transfer Module.

OSU students planning to complete the Oregon Transfer Module must file the OTM Completion Application with the Registrar’s Office. Students should fill out the form when the module is completed or they are in the last term of completion.

Upon successful review by OSU and completion of the Oregon Transfer Module, a notation will be added to the student’s OSU record indicating the module is complete and the date. The notation will appear on the transcript as follows:

Oregon Transfer Module Completed day-month-year

Social Sciences
Select a minimum of three courses of the following: 9
AEC 250 *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY
AEC 253 *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS
ANTH 110 *INTRODUCTION TO CULTURAL ANTHROPOLOGY
ANTH 208 *WESTERN CULTURE STUDY ABROAD
ANTH 209 *CULTURAL DIVERSITY STUDY ABROAD
ANTH 210 *INTRODUCTION TO CULTURAL ANTHROPOLOGY
ANTH 251 *LANGUAGE IN THE USA
ECON 201 *INTRODUCTION TO MICROECONOMICS
ECON 202 *INTRODUCTION TO MACROECONOMICS
ES 101 *INTRODUCTION TO ETHNIC STUDIES
ES 213 *LATINO/A IDENTITIES AND ACTIVISM
ES 221 *SURVEY OF AFRICAN AMERICAN STUDIES I
ES 222 *SURVEY OF AFRICAN AMERICAN STUDIES II
ES 231 *INTRODUCTION TO ASIAN AMERICAN STUDIES
ES 233 *ASIAN PACIFIC AMERICAN ACTIVISM AND EMPOWERMENT
ES 241 *INTRODUCTION TO NATIVE AMERICAN STUDIES
ES 243 *NATIVE AMERICAN ASSIMILATION AND ACTIVISM
FST 260 *FOOD SCIENCE AND TECHNOLOGY IN WESTERN CULTURE
GEOG 105 *GEOGRAPHY OF THE NON-WESTERN WORLD
GEOG 106 *GEOGRAPHY OF THE WESTERN WORLD
H 210 *INTRODUCTION TO THE HEALTH CARE SYSTEM
H 225 *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS
HDFS 201 *CONTEMPORARY FAMILIES IN THE U.S.
HST 101 *HISTORY OF WESTERN CIVILIZATION
HST 102 *HISTORY OF WESTERN CIVILIZATION
HST 103 *HISTORY OF WESTERN CIVILIZATION
HST 104 *WORLD HISTORY I: ANCIENT CIVILIZATIONS
HST 105 *WORLD HISTORY II: MIDDLE AND EARLY MODERN AGES
HST 106 *WORLD HISTORY III: THE MODERN AND CONTEMPORARY WORLD
HST 201 *HISTORY OF THE UNITED STATES
HST 202 *HISTORY OF THE UNITED STATES
HST 203 *HISTORY OF THE UNITED STATES
HST 203H *HISTORY OF THE UNITED STATES
NUTR 216 *FOOD IN NON-WESTERN CULTURE
PHL 150 *GREAT IDEAS IN PHILOSOPHY
PHL 160 *QUESTS FOR MEANING: WORLD RELIGIONS
PHL 170 *THE IDEA OF GOD

COLLEGES, SCHOOLS, DEPARTMENTS, AND PROGRAMS

- College of Agricultural Sciences (p. 60)
  - Agricultural Education and General Agriculture (p. 135)
  - Agricultural Education Graduate Major (MS) (p. 142)
  - Agricultural Education Graduate Minor (p. 142)
  - Agricultural Sciences and Natural Resources Communications Minor (p. 142)
  - Agricultural Sciences Minor (p. 143)
  - Agricultural Sciences Undergraduate Major (BS, HBS) (p. 143)
  - Comparative International Agriculture Minor (p. 145)
  - Leadership Minor (p. 146)
- Animal and Rangeland Sciences (p. 146)
  - Animal Science Graduate Major (MS, PhD) (p. 157)
  - Animal Science Graduate Minor (p. 158)
  - Animal Sciences Minor (p. 158)
  - Animal Sciences Undergraduate Major (BS, HBS) (p. 158)
    - Animal Behavior Option (p. 161)
    - Animal BioHealth/Pre-Professional Option (p. 161)
    - Animal Production Option (p. 161)
    - Equine Option (p. 162)
    - Rangeland Science Option (p. 163)
  - Rangeland Ecology and Management Graduate Major (MS, PhD) (p. 163)
  - Rangeland Ecology and Management Graduate Minor (p. 163)
  - Rangeland Science Minor (p. 163)
  - Rangeland Sciences Undergraduate Major (BS, HBS) (p. 164)
    - Habitat Management Option (p. 166)
    - Pastoral Systems of the World Option (p. 167)
    - Sustainable Livestock Ranching Option (p. 167)
    - Sustainable Rangeland Ecosystem Stewardship Option (p. 168)
- Applied Economics (p. 169)
  - Agricultural and Food Business Management Minor (p. 178)
  - Agricultural and Food Business Management Undergraduate Major (BS, HBS) (p. 178)
  - Applied Economics Graduate Major (MA, MS, PhD) (p. 179)
  - Applied Economics Graduate Minor (p. 179)
  - Environmental Economics and Policy Minor (p. 180)
  - Environmental Economics and Policy Undergraduate Major (BS, HBS) (p. 180)
  - Environmental Law and Policy Minor (p. 181)
  - Bioresource Research Undergraduate Major (BS, HBS) (p. 181)
    - Animal Reproduction and Development Option (p. 182)
    - Applied Genetics Option (p. 183)
    - Bioproducts and Bioenergy Option (p. 183)
    - Biotechnology Option (p. 184)
  - Climate and Biosystems Modeling Option (p. 184)
  - Environmental Chemistry Modeling Option (p. 185)
  - Food Quality Option (p. 185)
  - Genomics/Bioinformatics Option (p. 185)
  - Pest Biology and Management Option (p. 186)
  - Plant Growth and Development Option (p. 186)
  - Sustainable Ecosystems Option (p. 187)
  - Toxicology Option (p. 188)
  - Water Resources Option (p. 189)
- Botany and Plant Pathology (p. 189)
  - Biological Data Sciences Minor (p. 197)
  - Biological Data Sciences Undergraduate Major (BS, HBS) (p. 198)
    - Computational Biology Option (p. 201)
    - Ecological and Environmental Informatics Option (p. 201)
    - Genomics Option (p. 202)
  - Botany and Plant Pathology Graduate Major (MS, PhD) (p. 202)
  - Botany and Plant Pathology Graduate Minor (p. 203)
  - Botany Minor (p. 203)
  - Botany Undergraduate Major (BS, HBS) (p. 203)
    - Comprehensive Botany Option (p. 206)
    - Customizable Option (p. 206)
    - Ecology, Evolution, and Conservation Option (p. 207)
    - Molecular, Cellular, and Genomic Botany Option (p. 207)
    - Plant Pathology Option (p. 207)
- Crop and Soil Science Department (p. 208)
  - Crop and Soil Science Undergraduate Major (BS, HBS) (p. 222)
    - Agronomy Option (p. 222)
    - Plant Breeding and Genetics Option (p. 224)
    - Soil Science Option (p. 226)
  - Crop Science Graduate Major (MS, PhD) (p. 228)
    - Entomology Graduate Option (p. 228)
    - Plant Breeding and Genetics Graduate Option (p. 229)
  - Crop Science Graduate Minor (p. 229)
  - Crop Science Minor (p. 229)
  - Soil Science Graduate Major (MS, PhD) (p. 230)
  - Soil Science Graduate Minor (p. 230)
  - Soil Science Minor (p. 230)
- Entomology (p. 230)
  - Entomology Graduate Major (MA, MS, PhD) (p. 233)
  - Entomology Graduate Minor (p. 233)
  - Entomology Minor (p. 233)
- Environmental and Molecular Toxicology (p. 234)
  - Toxicology Graduate Major (MS, PhD) (p. 239)
  - Toxicology Graduate Minor (p. 239)
  - Toxicology Minor (p. 239)
- Fisheries and Wildlife (p. 239)
  - Fisheries and Wildlife Administration Graduate Major (PSM) (p. 252)
  - Fisheries and Wildlife Sciences Minor (p. 253)
• Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS) (p. 254)
• Fisheries Management Graduate Certificate (p. 258)
• Fisheries Science Graduate Major (MS, PhD) (p. 259)
• Fisheries Science Graduate Minor (p. 259)
• Marine Conservation and Management Minor (p. 259)
• Wildlife Management Graduate Certificate (p. 260)
• Wildlife Science Graduate Major (MS, PhD) (p. 260)
• Wildlife Science Graduate Minor (p. 261)
• Food Science and Technology (p. 261)
  • Fermentation Science Minor (p. 266)
  • Food Manufacturing Minor (p. 267)
• Food Science and Technology Graduate Major (MS, PhD) (p. 267)
• Food Science and Technology Graduate Minor (p. 267)
• Food Science and Technology Undergraduate Major (BS, HBS) (p. 268)
  • Enology and Viticulture Option (p. 269)
  • Fermentation Science Option (p. 271)
• Food Science Option (p. 272)
• Food Science Minor (p. 273)
• Food Technology Minor (p. 273)
• Horticulture (p. 274)
  • Horticulture Graduate Major (MS, PhD) (p. 283)
  • Entomology Graduate Option (p. 283)
  • Plant Breeding and Genetics Graduate Option (p. 284)
• Horticulture Graduate Minor (p. 284)
• Horticulture Minor (p. 284)
• Horticulture Undergraduate Major (BS, HBS) (p. 284)
  • Ecological Management of Turf, Landscape and Urban Horticulture Option (p. 285)
  • General Horticulture Option (p. 287)
  • Horticultural Research Option (p. 289)
  • Plant Breeding and Genetics Option (p. 291)
  • Sustainable Horticultural Production Option (p. 293)
  • Therapeutic Horticulture Option (p. 296)
  • Viticulture and Enology Option (p. 297)
• Organic Farming Systems Certificate (p. 299)
• Turf and Landscape Management Minor (p. 299)

  • Dean’s Academy Option (p. 365)
  • Digital Marketing Analytics Option (p. 366)
  • Human Resource Analytics Option (p. 366)
  • Market Research and Consumer Analytics Option (p. 366)
• Business Fundamentals Graduate Certificate (p. 367)
• Business Graduate Major (MSB) (p. 367)
• Business Graduate Option (http://catalog.oregonstate.edu/college-departments/business/business-msb/finance-option/)
• Financial Analytics Graduate Option (http://catalog.oregonstate.edu/college-departments/business/business-msb/financial-analytics-option/)
• Financial Planning Graduate Option (p. 367)
• Marketing Insights and Analytics Graduate Option (p. 367)
• Supply Chain Analytics Graduate Option (p. 368)
• Business Information Systems Undergraduate Major (BA, BS, HBA, HBS) (p. 368)
  • Dean’s Academy Option (p. 370)
  • International Business Option (p. 371)
• Business Minor (p. 371)
• Design and Human Environment Graduate Major (MA, MS, PhD) (p. 372)
• Design and Human Environment Graduate Minor (p. 372)
• Design and Innovation Management Undergraduate Major (BS, HBS) (p. 372)
  • Dean’s Academy Option (p. 374)
• Chemistry Teaching Option (p. 504)
• Elementary Teaching Option (p. 504)
• Family and Consumer Sciences Teaching Option (p. 505)
• Foundational Mathematics Option (p. 506)
• Health Teaching Option (p. 506)
• Integrated Science Teaching Option (p. 507)
• Language Arts Teaching Option (p. 508)
• Physics Teaching Option (p. 509)
• Social Studies Teaching Option (p. 509)
• Elementary Education Undergraduate Major (BS, HBS) (p. 510)
• English for Speakers of Other Languages Graduate Certificate (p. 512)
• Instructional Design Graduate Certificate (p. 512)
• Mathematics Education Graduate Minor (p. 512)
• Science Education Graduate Minor (p. 513)
• Teaching Graduate Major (MAT) (p. 513)
  • Clinically Based Elementary Graduate Option (p. 513)
  • Elementary Graduate Option (p. 514)
  • Language Arts Graduate Option (p. 514)
  • Mathematics Graduate Option (p. 514)
  • Music Graduate Option (p. 515)
  • Science Graduate Option (p. 515)
  • Social Studies Graduate Option (p. 515)
• College of Engineering (p. 516)
  • Biological and Ecological Engineering (p. 598)
    • Biological and Ecological Engineering Graduate Major (MENG, MS, PhD) (p. 603)
    • Biological and Ecological Engineering Graduate Minor (p. 604)
    • Ecological Engineering Undergraduate Major (BS, HBS) (p. 605)
    • Irrigation Engineering Minor (p. 608)
• Other Degrees & Programs within the College of Engineering (p. 608)
  • Engineering Science Undergraduate Major (BS, HBS) (p. 613)
  • Humanitarian Engineering Minor (p. 614)
  • International Engineering Minor (p. 616)
  • Outdoor Products Minor (p. 616)
  • Outdoor Products Undergraduate Major (BS, HBS) (p. 617)
• School of Chemical, Biological and Environmental Engineering (p. 618)
  • Bioengineering Graduate Major (MENG, MS, PhD) (p. 628)
  • Bioengineering Undergraduate Major (BA, BS, HBA, HBS) (p. 628)
  • Chemical Engineering Graduate Major (MENG, MS, PhD) (p. 630)
  • Chemical Engineering Graduate Minor (p. 631)
  • Chemical Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 631)
  • Environmental Engineering Graduate Major (MENG, MS, PhD) (p. 634)
  • Environmental Engineering Graduate Minor (p. 635)
  • Environmental Engineering Minor (p. 635)
• Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 635)
• School of Civil and Construction Engineering (p. 636)
  • Architectural Engineering Undergraduate Major (BS, HBS) (p. 650)
  • Civil Engineering Graduate Major (MENG, MS, PhD) (p. 652)
  • Civil Engineering Graduate Minor (p. 653)
  • Civil Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 653)
  • Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS) (p. 654)
• School of Electrical Engineering and Computer Science (p. 657)
  • Computer Science Graduate Major (MENG, MS, PhD) (p. 678)
  • Computer Science Graduate Minor (p. 680)
  • Computer Science Minor (p. 680)
  • Computer Science Undergraduate Major (BA, BS, HBA, HBS) (p. 680)
    • Applied Computer Science Option (p. 681)
    • Computer Science Double Degree Option (p. 681)
    • Computer Systems Option (p. 682)
  • CyberSecurity Certificate (p. 683)
  • Electrical and Computer Engineering Graduate Major (MENG, MS, PhD) (p. 683)
  • Electrical and Computer Engineering Graduate Minor (p. 685)
  • Electrical and Computer Engineering Undergraduate Major (BS, HBS) (p. 685)
• School of Mechanical, Industrial, and Manufacturing Engineering (p. 687)
  • Aerospace Engineering Minor (p. 711)
  • Energy Systems Engineering Undergraduate Major (BS, HBS) (p. 711)
  • Engineering Management Graduate Certificate (p. 712)
  • Industrial Engineering Graduate Major (MENG, MS, PhD) (p. 712)
    • Advanced Manufacturing Graduate Option (p. 713)
    • Engineering Management Graduate Option (p. 713)
    • Human Systems Engineering Graduate Option (p. 713)
    • Information Systems Engineering Graduate Option (p. 713)
    • Manufacturing Systems Engineering Graduate Option (p. 714)
  • Industrial Engineering Graduate Minor (p. 714)
  • Industrial Engineering Undergraduate Major (BS, HBS) (p. 714)
    • Business Engineering Option (p. 716)
  • Manufacturing Engineering Undergraduate Major (BS, HBS) (p. 716)
    • Manufacturing Systems Option (p. 718)
    • Product Development Option (p. 718)
  • Materials Science Graduate Major (MS, PhD) (p. 719)
  • Materials Science Graduate Minor (p. 719)
  • Materials Science Minor (p. 720)
  • Mechanical Engineering Graduate Major (MENG, MS, PhD) (p. 721)
• Advanced Manufacturing Graduate Option (p. 721)
• Design Graduate Option (p. 721)
• Dynamics and Controls Graduate Option (p. 721)
• Engineering Management Graduate Option (p. 722)
• Materials Mechanics Graduate Option (p. 722)
• Renewable Energy Graduate Option (p. 722)
• Thermal Fluid Sciences Graduate Option (p. 722)
• Mechanical Engineering Graduate Minor (p. 723)
• Mechanical Engineering Undergraduate Major (BS, HBS) (p. 723)
• Robotics Graduate Major (MENG, MS, PhD) (p. 724)
• Robotics Graduate Minor (p. 725)

• School of Nuclear Science and Engineering (p. 725)
  • Medical Physics Graduate Major (MMP, MS, PhD) (p. 734)
  • Nuclear Engineering Graduate Major (MENG, MS, PhD) (p. 734)
  • Nuclear Engineering Graduate Minor (p. 735)
  • Nuclear Engineering Minor (p. 735)
  • Nuclear Engineering Undergraduate Major (BS, HBS) (p. 736)
  • Radiation Health Physics Graduate Major (MHP, MS, PhD) (p. 737)
  • Radiation Health Physics Graduate Minor (p. 738)
  • Radiation Health Physics Minor (p. 738)
  • Radiation Health Physics Undergraduate Major (BS, HBS) (p. 739)
    • Radiation Health Physics - Pre Med Option (p. 740)

• College of Forestry (p. 741)
  • Forest Ecosystems and Society (p. 770)
    • Forest Ecosystems and Society Graduate Major (MF, MS, PhD) (p. 786)
  • Forests and Climate Change Graduate Certificate (p. 787)
  • Natural Resources Graduate Major (MNR) (p. 787)
  • Natural Resources Minor (p. 789)
  • Natural Resources Undergraduate Major (BS, HBS) (p. 790)
    • Conservation Law Enforcement Option (p. 794)
    • Ecological Restoration Option (p. 794)
    • Fish and Wildlife Conservation Option (p. 795)
    • Forest Ecosystems Option (p. 796)
    • Human Dimensions in Natural Resources Option (p. 797)
    • Individualized Specialty Option (p. 798)
    • Integrated Conservation Analysis Option (p. 798)
    • Landscape Analysis Option (p. 798)
    • Natural Resource Education Option (p. 799)
    • Policy and Management Option (p. 800)
    • Urban Forest Landscapes Option (p. 800)
    • Wildland Fire Ecology Option (p. 801)
  • Sustainable Natural Resources Graduate Certificate (p. 801)
  • Tourism, Recreation, and Adventure Leadership Minor (p. 802)
  • Tourism, Recreation, and Adventure Leadership Undergraduate Major (BS, HBS) (p. 802)

• Adventure Leadership Education Option (p. 806)
• Nature, Eco, and Adventure Tourism Option (p. 807)
• Outdoor Recreation Management Option (p. 807)
• Sustainable Tourism Management Option (p. 808)
• Urban Forestry Graduate Certificate (p. 809)

• Forest Engineering, Resources and Management (p. 809)
  • Forest Engineering - Civil Engineering Undergraduate Major (BS, HBS) (p. 820)
  • Forest Engineering Undergraduate Major (BS, HBS) (p. 823)
  • Forestry Minor (p. 825)
  • Forestry Undergraduate Major (BS, HBS) (p. 825)
    • Forest Management Option (p. 829)
    • Forest Operations Management Option (p. 830)
    • Forest Restoration and Fire Option (p. 830)
  • Sustainable Forest Management Graduate Major (MF, MS, PhD) (p. 831)

• Wood Science and Engineering (p. 832)
  • Renewable Materials Minor (p. 837)
  • Renewable Materials Undergraduate Major (BS, HBS) (p. 838)
    • Advanced Wood Manufacturing Option (p. 839)
    • Art and Design Option (p. 840)
    • Management and Marketing Option (p. 841)
    • Science and Engineering Option (p. 842)
  • Wood Science Graduate Major (MS, PhD) (p. 844)
  • Wood Science Graduate Minor (p. 844)

• College of Liberal Arts (p. 844)
  • American Studies Program (p. 1050)
    • American Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1051)
  • Liberal Studies Program (p. 1052)
    • Liberal Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1052)
    • Pre-Education Option (p. 1052)
  • Other Degrees & Programs within the College of Liberal Arts (p. 1053)
    • Environmental Arts and Humanities Graduate Major (MA) (p. 1053)
    • Environmental Arts and Humanities Graduate Minor (p. 1054)
    • Social Science Undergraduate Major (BA, BS, HBA, HBS) (p. 1055)
      • Community Development and Leadership Option (p. 1056)
  • School of Arts and Communication (p. 1057)
    • Art Graduate Minor (p. 1100)
    • Art History Minor (p. 1100)
    • Art Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 1101)
      • Art History Option (p. 1101)
      • Photography and Digital Studio BFA Option (p. 1102)
      • Photography and Digital Studio Option (p. 1102)
      • Studio Art BFA Option (p. 1103)
      • Studio Art Option (p. 1104)
    • Arts, Media, and Technology Minor (p. 1105)
    • Arts, Media, and Technology Undergraduate Major (BA, BS, HBA, HBS) (p. 1105)
• Communication Minor (p. 1107)
• Digital Communication Arts Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 1107)
• Graphic Design Minor (p. 1109)
• Graphic Design Undergraduate Major (BFA, HBFA) (p. 1109)
• Guitar Minor (p. 1111)
• Music Graduate Minor (p. 1111)
• Music Minor (p. 1111)
• Music Performance Minor (p. 1111)
• Music Studies Undergraduate Major (BM, HBM) (p. 1112)
  • Instrumental Performance Option (p. 1113)
  • Music Education Option (p. 1114)
  • Piano Performance and Pedagogy Option (p. 1115)
  • Piano Performance Option (p. 1115)
  • Vocal Performance, Pedagogy and Literature Option (p. 1116)
• Music Undergraduate Major (BA, BS, HBA, HBS) (p. 1116)
  • Music Production Option (p. 1119)
• New Media Communications Minor (p. 1119)
• Photography Minor (p. 1119)
• Popular Music Studies Minor (p. 1120)
• Scientific, Technical, and Professional Communication Certificate (p. 1120)
• Speech Communication Graduate Minor (p. 1121)
• Speech Communication Undergraduate Major (BA, BS, HBA, HBS) (p. 1121)
  • Communication Option (p. 1122)
  • Theater Arts Option (p. 1122)
• Studio Art Minor (p. 1122)
• Theater Arts Minor (p. 1123)
• School of History, Philosophy, and Religion (p. 1123)
  • Applied Ethics Certificate (p. 1162)
  • Applied Ethics Graduate Major (MA, MS) (p. 1163)
  • Applied Ethics Graduate Minor (p. 1163)
• History and Philosophy of Science Graduate Major (MA, MS, PhD) (p. 1163)
• History and Philosophy of Science Graduate Minor (p. 1164)
• History Graduate Major (MA, MS) (p. 1164)
  • Community History and Civic Engagement Graduate Option (p. 1164)
  • Global Perspectives on War, Peace, and Empire Graduate Option (p. 1164)
  • History of Science and Technology Graduate Option (p. 1165)
• History Graduate Minor (p. 1165)
• History Minor (p. 1165)
• History Undergraduate Major (BA, BS, HBA, HBS) (p. 1166)
• Medical Humanities Certificate (p. 1166)
• Military History Minor (p. 1167)
• Peace Studies Certificate (p. 1168)
• Philosophy Graduate Minor (p. 1169)
• Philosophy Minor (p. 1169)
• Philosophy Undergraduate Major (BA, BS, HBA, HBS) (p. 1170)
• Religious Studies Minor (p. 1170)
• Religious Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1171)
• Yoga Studies and Yoga Teacher Training Certificate (p. 1172)
• School of Language, Culture, and Society (p. 1172)
  • Anthropology Graduate Minor (p. 1241)
  • Anthropology Minor (p. 1241)
  • Anthropology Undergraduate Major (BA, BS, HBA, HBS) (p. 1241)
  • Archaeology Option (p. 1242)
  • Biocultural Option (p. 1242)
  • Cultural/Linguistic Option (p. 1242)
  • General Anthropology Option (p. 1243)
  • Applied Anthropology Graduate Major (MA, MS, PhD) (p. 1243)
  • Applied Anthropology Graduate Minor (p. 1244)
  • Asian Languages and Cultures Minor (p. 1244)
  • College Student Services Administration Graduate Major (EDM, MS) (p. 1245)
  • Ethnic Studies Graduate Minor (p. 1245)
  • Ethnic Studies Minor (p. 1245)
  • Ethnic Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1246)
  • Food in Culture and Social Justice Certificate (p. 1247)
  • Food in Culture and Social Justice Graduate Minor (p. 1248)
  • French Minor (p. 1248)
  • French Undergraduate Major (BA, HBA) (p. 1248)
  • German Minor (p. 1251)
  • German Undergraduate Major (BA, HBA) (p. 1251)
  • Global Development Studies Minor (p. 1252)
  • Language in Culture Certificate (p. 1253)
  • Latin American Affairs Certificate (p. 1254)
  • Queer Studies Graduate Minor (p. 1254)
  • Queer Studies Minor (p. 1255)
  • Social Justice Minor (p. 1255)
  • Spanish Minor (p. 1256)
  • Spanish Undergraduate Major (BA, HBA) (p. 1256)
  • Women, Gender, and Sexuality Studies Certificate (p. 1257)
  • Women, Gender, and Sexuality Studies Graduate Major (MA, PhD) (p. 1257)
  • Women, Gender, and Sexuality Studies Graduate Minor (p. 1258)
  • Women, Gender, and Sexuality Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1259)
• School of Psychological Science (p. 1261)
  • Contemplative Studies Minor (p. 1270)
  • Psychology Graduate Major (MS, PhD) (p. 1271)
  • Psychology Graduate Minor (p. 1272)
  • Psychology Minor (p. 1272)
  • Psychology Undergraduate Major (BA, BS, HBA, HBS) (p. 1273)
  • User Experience Research Minor (p. 1276)
• School of Public Policy (p. 1277)
- Asian Studies Minor (p. 1302)
- Economics Minor (p. 1303)
- Economics Undergraduate Major (BA, BS, HBA, HBS) (p. 1303)
  - General Economics Option (p. 1304)
  - Law, Economics and Policy Option (p. 1304)
  - Managerial Economics Option (p. 1305)
  - Mathematical Economics Option (p. 1305)
- Energy Policy Graduate Certificate (p. 1306)
- Political Science Graduate Minor (p. 1306)
- Political Science Minor (p. 1307)
- Political Science Undergraduate Major (BA, BS, HBA, HBS) (p. 1308)
  - Environmental and Energy Politics Option (p. 1309)
  - International Affairs Option (p. 1310)
  - Law and Politics Option (p. 1311)
- Public Policy Graduate Major (EMPP, MPP, PhD) (p. 1311)
- Public Policy Graduate Certificate (p. 1314)
- Sociology Graduate Minor (p. 1315)
- Sociology Minor (p. 1315)
- Sociology Undergraduate Major (BA, BS, HBA, HBS) (p. 1315)
  - Crime and Justice Option (p. 1315)
  - Environmental and Natural Resource Sociology Option (p. 1316)
- School of Writing, Literature and Film (p. 1316)
  - Applied Journalism Minor (p. 1336)
  - Creative Writing Graduate Major (MA) (p. 1337)
  - Creative Writing Graduate Minor (p. 1337)
  - Creative Writing Undergraduate Major (BA, HBA) (p. 1337)
  - English Graduate Major (MA) (p. 1339)
  - English Graduate Minor (p. 1339)
  - English Minor (p. 1339)
  - English Undergraduate Major (BA, HBA) (p. 1340)
  - Film Studies Minor (p. 1342)
  - Writing Minor (p. 1342)
- College of Pharmacy (p. 1343)
  - Pharmaceutical Sciences Graduate Major (MS, PhD) (p. 1356)
  - Pharmaceutical Sciences Graduate Minor (p. 1356)
  - Pharmacy Professional Major (PHARMD) (p. 1356)
- College of Public Health and Human Sciences (p. 1358)
  - Public Health Graduate Certificate (p. 1406)
  - Public Health Graduate Major (MPH, PhD) (p. 1407)
    - Biostatistics Graduate Option (p. 1407)
    - Environmental and Occupational Health Graduate Option (p. 1408)
    - Epidemiology Graduate Option (p. 1408)
    - Global Health Graduate Option (p. 1408)
    - Health Promotion and Health Behavior Graduate Option (p. 1408)
    - Health Systems and Policy Graduate Option (p. 1409)
    - Physical Activity Graduate Option (p. 1409)
    - Public Health Practice Graduate Option (p. 1409)
  - Public Health Graduate Minor (p. 1410)
- School of Biological and Population Health Sciences (p. 1410)
  - Adapted Physical Education Graduate Major (MAPE) (p. 1451)
  - Athletic Training Graduate Major (MATRN) (p. 1451)
  - Environmental and Occupational Health Minor (p. 1452)
  - Epidemiology Graduate Minor (p. 1452)
  - Ergonomics Graduate Minor (p. 1452)
  - Exercise Physiology Minor (p. 1453)
  - Global Health Minor (p. 1453)
  - Kinesiology Graduate Major (MS, PhD) (p. 1454)
    - Adapted Physical Activity Graduate Option (p. 1454)
  - Kinesiology Graduate Minor (p. 1454)
  - Kinesiology Undergraduate Major (BS, HBS) (p. 1454)
    - Pre-Therapy and Allied Health Option (p. 1455)
  - Nutrition Graduate Major (MS, PhD) (p. 1457)
  - Nutrition Graduate Minor (p. 1457)
  - Nutrition Minor (p. 1457)
  - Nutrition Undergraduate Major (BS, HBS) (p. 1458)
    - Dietetics Option (p. 1458)
    - Nutrition and Health Sciences Option (p. 1459)
    - Nutrition in Foodservice, Culinary and Food Systems Option (p. 1460)
    - Pre-Dietetics Option (p. 1460)
  - Physical Therapy Professional Major (DPT) (p. 1461)
- School of Social and Behavioral Health Sciences (p. 1462)
  - Aging Sciences Graduate Minor (p. 1480)
  - Early Childhood Development and Education Minor (p. 1480)
  - Gerontology Certificate (p. 1481)
  - Gerontology Graduate Minor (p. 1482)
  - Health Management and Policy Graduate Certificate (p. 1482)
  - Health Management and Policy Minor (p. 1482)
  - Human Development and Family Sciences Minor (p. 1483)
  - Human Development and Family Sciences Undergraduate Major (BS, HBS) (p. 1483)
    - Child Development Option (p. 1484)
    - Early Childhood Option (p. 1484)
    - General Human Development and Family Sciences Option (p. 1484)
    - Human Services Option (p. 1485)
  - Human Development and Family Studies Graduate Major (MS, PhD) (p. 1485)
  - Human Development and Family Studies Graduate Minor (p. 1486)
  - Public Health Minor (p. 1486)
  - Public Health Undergraduate Major (BS, HBS) (p. 1486)
    - Health Management and Policy Option (p. 1487)
    - Health Promotion and Health Behavior Option (p. 1487)
- College of Science (p. 1488)
  - Chemistry (p. 1549)
    - Chemistry Graduate Major (MA, MS, PhD) (p. 1560)
    - Chemistry Graduate Minor (p. 1561)
    - Chemistry Minor (p. 1561)
    - Chemistry Undergraduate Major (BA, BS, HBA, HBS) (p. 1561)
• Advanced Biochemistry Option (p. 1564)
• Advanced Chemistry Option (p. 1565)
• Biochemistry Option (p. 1565)
• Business Option (p. 1565)
• Chemical Engineering Option (p. 1566)
• Chemistry Education Option (p. 1566)
• Environmental Chemistry Option (p. 1567)
• Forensic Science Option (p. 1567)
• Materials Science Option (p. 1568)
• Pre-Medicine Option (p. 1568)

• Mathematics (p. 1568)
  • Actuarial Science Minor (p. 1582)
  • Mathematics Graduate Major (MA, MS, PhD) (p. 1583)
  • Mathematics Graduate Minor (p. 1583)
  • Mathematics Minor (p. 1583)
  • Mathematics Undergraduate Major (BS, HBS) (p. 1583)
    • Applied and Computational Mathematics Option (p. 1584)
    • Mathematical Biology Option (p. 1585)
    • Secondary Teaching Emphasis Option (p. 1585)
    • Statistics Option (p. 1586)
• Physics (p. 1587)
  • Physics Graduate Major (MA, MS, PhD) (p. 1595)
  • Physics Graduate Minor (p. 1596)
  • Physics Minor (p. 1596)
  • Physics Undergraduate Major (BA, BS, HBA, HBS) (p. 1596)
    • Applied Physics Option (p. 1598)
    • Biological Physics Option (p. 1598)
    • Chemical Physics Option (p. 1599)
    • Computational Physics Option (p. 1599)
    • Geophysics Option (p. 1600)
    • Mathematical Physics Option (p. 1600)
    • Optical Physics Option (p. 1601)
    • Physics Teaching/Physics Option (p. 1601)
• School of Life Sciences (p. 1602)
  • Biochemistry and Biophysics (p. 1626)
    • Biochemistry and Biophysics Graduate Major (MA, MS, PhD) (p. 1632)
    • Biochemistry and Biophysics Graduate Minor (p. 1633)
    • Biochemistry and Biophysics Undergraduate Major (BS, HBS) (p. 1633)
      • Advanced Biophysics Option (p. 1635)
      • Neuroscience Option (p. 1636)
      • Pre-Medicine/Biochemistry and Biophysics Option (p. 1636)
    • Biochemistry and Molecular Biology Undergraduate Major (BS, HBS) (p. 1638)
      • Advanced Molecular Biology Option (p. 1639)
      • Computational Molecular Biology Option (p. 1640)
      • Pre-Medicine/Biochemistry and Molecular Biology Option (p. 1640)
  • Integrative Biology (p. 1640)
    • Biology Minor (p. 1654)
    • Biology Undergraduate Major (BS, HBS) (p. 1655)
  • Ecology Option (p. 1660)
  • Genetics Option (p. 1661)
  • Marine Biology Option (p. 1661)
  • Physiology and Behavior Option (p. 1662)
  • Pre-Dentistry/Biology Option (p. 1663)
  • Pre-Education Biology Option (p. 1663)
  • Pre-Medicine/Biology Option (p. 1664)
  • Pre-Veterinary Medicine Option (p. 1665)
• Integrative Biology Graduate Major (MS, PhD) (p. 1666)
• Integrative Biology Graduate Minor (p. 1666)
• Marine Biology and Ecology Minor (p. 1666)
• Zoology Undergraduate Major (BS, HBS) (p. 1667)
• Microbiology (p. 1671)
  • BioHealth Sciences Undergraduate Major (BS, HBS) (p. 1671)
  • Pre-Clinical Laboratory Science Option (p. 1680)
  • Pre-Dentistry Option (p. 1681)
  • Pre-Medicine/Pre-Podiatry Option (p. 1681)
  • Pre-Optometry Option (p. 1682)
  • Pre-Pharmacy Option (p. 1682)
  • Pre-Physical Therapy Option (p. 1682)
  • Pre-Physician Assistant Option (p. 1683)
  • Microbiology Graduate Major (MA, MS, PhD) (p. 1683)
  • Microbiology Graduate Minor (p. 1684)
  • Microbiology Minor (p. 1684)
  • Microbiology Undergraduate Major (BS, HBS) (p. 1685)
    • Aquatic Microbiology Option (p. 1687)
    • Pre-Medicine/Microbiology Option (p. 1688)
• Statistics (p. 1688)
  • Data Analytics Graduate Certificate (p. 1694)
  • Data Analytics Graduate Major (MS) (p. 1694)
  • Statistics Graduate Major (MA, MS, PhD) (p. 1694)
  • Statistics Graduate Minor (p. 1695)
  • Statistics Minor (p. 1695)
• College of Veterinary Medicine (p. 1696)
  • Veterinary Medicine Professional Major (DVM) (p. 1708)
• Graduate School (p. 1711)
  • Biological Data Sciences Graduate Minor (p. 1732)
  • College and University Teaching Graduate Certificate (p. 1734)
  • Comparative Health Sciences Graduate Major (MS, PhD) (p. 1734)
    • Biomedical Sciences Graduate Option (p. 1735)
    • Clinical Sciences Graduate Option (p. 1735)
  • Comparative Health Sciences Graduate Minor (p. 1735)
  • Environmental Sciences (p. 1736)
    • Environmental Sciences Graduate Major (MA, MS, PhD, PSM) (p. 1738)
    • Environmental Sciences Graduate Minor (p. 1739)
  • Interdisciplinary Studies Graduate Major (MAIS) (p. 1739)
  • Water Resources Engineering (p. 1739)
    • Water Resources Engineering Graduate Major (MS, PhD) (p. 1740)
    • Water Resources Engineering Graduate Minor (p. 1741)
  • Water Resources Policy and Management (p. 1741)
• Water Resources Policy and Management Graduate Major (MS) (p. 1742)
• Water Resources Policy and Management Graduate Minor (p. 1743)
• Water Resources Science (p. 1743)
• Water Resources Graduate Minor (p. 1744)
• Water Resources Science Graduate Major (MS, PhD) (p. 1745)
• Water Resources Science Graduate Minor (p. 1745)
• International Programs (p. 1746)
• International Studies Undergraduate Major (BA, HBA) (p. 1746)

• Reserve Officer Training Corps (p. 1749)
• Aerospace Studies (p. 1753)
• Aerospace Studies Minor (p. 1756)
• Military Science (AROTC) (p. 1756)
• Military Science Minor (p. 1758)
• Naval Science (NROTC) (p. 1759)
• Naval Science-U.S. Marine Corps Minor (p. 1761)
• Naval Science-U.S. Navy Minor (p. 1761)

• University Honors College (p. 1761)
• Honors Associate Undergraduate Major (HBA, HBFA, HBM, HBS) (p. 1793)
• Honors Scholar Undergraduate Major (HBA, HBFA, HBM, HBS) (p. 1793)
• College of Agricultural Sciences (p. 60)
• College of Business (p. 305)
• College of Earth, Ocean, and Atmospheric Sciences (p. 412)
• College of Education (p. 468)

• Botany and Plant Pathology Graduate Major (MS, PhD) (p. 202)
• Botany Undergraduate Major (BS, HBS) (p. 203)
• Business Administration Graduate Major (MBA, PhD) (p. 351)
• Business Administration Undergraduate Major (BA, BS, HBA, HBS) (p. 357)
• Business Analytics Undergraduate Major (BS, HBS) (p. 363)
• Business Graduate Major (MSB) (p. 367)
• Business Information Systems Undergraduate Major (BA, BS, HBA, HBS) (p. 368)
• Chemical Engineering Graduate Major (MENG, MS, PhD) (p. 630)
• Chemical Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 631)
• Chemistry Graduate Major (MA, MS, PhD) (p. 1560)
• Chemistry Undergraduate Major (BA, BS, HBA, HBS) (p. 1561)
• Civil Engineering Graduate Major (MENG, MS, PhD) (p. 652)
• Civil Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 653)
• College Student Services Administration Graduate Major (EDM, MS) (p. 1245)
• Comparative Health Sciences Graduate Major (MS, PhD) (p. 1734)
• Computer Science Graduate Major (MENG, MS, PhD) (p. 678)
• Computer Science Undergraduate Major (BA, BS, HBA, HBS) (p. 680)
• Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS) (p. 654)
• Counseling Graduate Major (MCOUN, PhD) (p. 495)
• Creative Writing Graduate Major (MFA) (p. 1337)
• Creative Writing Undergraduate Major (BA, HBA) (p. 1337)
• Crop and Soil Science Undergraduate Major (BS, HBS) (p. 222)
• Crop Science Graduate Major (MS, PhD) (p. 228)
• Data Analytics Graduate Major (MS) (p. 1694)
• Design and Human Environment Graduate Major (MA, MS, PhD) (p. 372)
• Design and Innovation Management Undergraduate Major (BS, HBS) (p. 372)
• Digital Communication Arts Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS) (p. 1107)
• Earth Sciences Undergraduate Major (BS, HBS) (p. 442)
• Ecological Engineering Undergraduate Major (BS, HBS) (p. 605)
• Economics Undergraduate Major (BA, BS, HBA, HBS) (p. 1303)
• Education Graduate Major (EDD, EDM, MS, PhD) (p. 497)
• Education Undergraduate Major (BA, BS, HBA, HBS) (p. 501)
• Electrical and Computer Engineering Graduate Major (MENG, MS, PhD) (p. 683)
• Electrical and Computer Engineering Undergraduate Major (BS, HBS) (p. 685)
• Elementary Education Undergraduate Major (BS, HBS) (p. 510)
• Elementary Graduate Option (p. 514)
• Energy Systems Engineering Undergraduate Major (BS, HBS) (p. 711)
• Engineering Science Undergraduate Major (BS, HBS) (p. 613)
• English Graduate Major (MA) (p. 1339)
• English Undergraduate Major (BA, HBA) (p. 1340)
• Entomology Graduate Major (MA, MS, PhD) (p. 233)
• Environmental Arts and Humanities Graduate Major (MA) (p. 1053)
• Environmental Economics and Policy Undergraduate Major (BS, HBS) (p. 180)
• Environmental Engineering Graduate Major (MENG, MS, PhD) (p. 634)
• Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS) (p. 635)
• Environmental Sciences Graduate Major (MA, MS, PhD, PSM) (p. 1738)
• Environmental Sciences Undergraduate Major (BS, HBS) (p. 446)
• Ethnic Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1246)
• Finance Undergraduate Major (BA, BS, HBA, HBS) (p. 377)
• Fisheries and Wildlife Administration Graduate Major (PSM) (p. 252)
• Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS) (p. 254)
• Fisheries Science Graduate Major (MS, PhD) (p. 259)
• Food Science and Technology Graduate Major (MS, PhD) (p. 267)
• Food Science and Technology Undergraduate Major (BS, HBS) (p. 268)
• Forest Ecosystems and Society Graduate Major (MF, MS, PhD) (p. 786)
• Forest Engineering - Civil Engineering Undergraduate Major (BS, HBS) (p. 820)
• Forest Engineering Undergraduate Major (BS, HBS) (p. 823)
• French Undergraduate Major (BA, HBA) (p. 1248)
• Geography and Geospatial Science Undergraduate Major (BS, HBS) (p. 457)
• Geography Graduate Major (MS, PhD) (p. 460)
• Geology Graduate Major (MA, MS, PhD) (p. 461)
• German Undergraduate Major (BA, HBA) (p. 1251)
• Graphic Design Undergraduate Major (BFA, HBFA) (p. 1109)
• History and Philosophy of Science Graduate Major (MA, MS, PhD) (p. 1163)
• History Graduate Major (MA, MS) (p. 1164)
• History Undergraduate Major (BA, BS, HBA, HBS) (p. 1166)
• Honors Associate Undergraduate Major (HBA, HBFA, HBM, HBS) (p. 1793)
• Honors Scholar Undergraduate Major (HBA, HBFA, HBM, HBS) (p. 1793)
• Horticulture Graduate Major (MS, PhD) (p. 283)
• Horticulture Undergraduate Major (BS, HBS) (p. 284)
• Hospitality Management Undergraduate Major (BA, BS, HBA, HBS) (p. 381)
• Human Development and Family Sciences Undergraduate Major (BS, HBS) (p. 1483)
• Human Development and Family Studies Graduate Major (MS, PhD) (p. 1485)
• Industrial Engineering Graduate Major (MENG, MS, PhD) (p. 712)
• Industrial Engineering Undergraduate Major (BS, HBS) (p. 714)
• Innovation Management Undergraduate Major (BA, BS, HBA, HBS) (p. 382)
• Integrative Biology Graduate Major (MS, PhD) (p. 1666)
• Interdisciplinary Studies Graduate Major (MAIS) (p. 1739)
• Interior Design Undergraduate Major (BS, HBS) (p. 382)
• International Studies Undergraduate Major (BA, HBA) (p. 1746)
• Kinesiology Graduate Major (MS, PhD) (p. 1454)
• Kinesiology Undergraduate Major (BS, HBS) (p. 1454)
• Liberal Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1052)
• Management Undergraduate Major (BA, BS, HBA, HBS) (p. 385)
• Manufacturing Engineering Undergraduate Major (BS, HBS) (p. 716)
• Marine Resource Management Graduate Major (MA, MS) (p. 462)
• Marketing Undergraduate Major (BA, BS, HBA, HBS) (p. 389)
• Materials Science Graduate Major (MS, PhD) (p. 719)
• Mathematics Graduate Major (MA, MS, PhD) (p. 1583)
• Mathematics Undergraduate Major (BS, HBS) (p. 1583)
• Mechanical Engineering Graduate Major (MENG, MS, PhD) (p. 721)
• Mechanical Engineering Undergraduate Major (BS, HBS) (p. 723)
• Medical Physics Graduate Major (MMP, MS, PhD) (p. 734)
• Merchandising Management Undergraduate Major (BS, HBS) (p. 393)
• Microbiology Graduate Major (MA, MS, PhD) (p. 1683)
• Microbiology Undergraduate Major (BS, HBS) (p. 1685)
• Music Studies Undergraduate Major (BM, HBM) (p. 1112)
• Music Undergraduate Major (BA, BS, HBA, HBS) (p. 1116)
• Natural Resources Graduate Major (MNR) (p. 787)
• Natural Resources Undergraduate Major (BS, HBS) (p. 790)
• Nuclear Engineering Graduate Major (MENG, MS, PhD) (p. 734)
• Nuclear Engineering Undergraduate Major (BS, HBS) (p. 736)
• Nutrition Graduate Major (MS, PhD) (p. 1457)
• Nutrition Undergraduate Major (BS, HBS) (p. 1458)
• Ocean, Earth and Atmospheric Sciences Graduate Major (MA, MS, PhD) (p. 463)
• Outdoor Products Undergraduate Major (BS, HBS) (p. 617)
• Pharmaceutical Sciences Graduate Major (MS, PhD) (p. 1356)
• Pharmacy Professional Major (PHARM) (p. 1356)
• Philosophy Undergraduate Major (BA, BS, HBA, HBS) (p. 1170)
• Physical Therapy Professional Major (DPT) (p. 1461)
• Physics Graduate Major (MA, MS, PhD) (p. 1595)
• Physics Undergraduate Major (BA, BS, HBA, HBS) (p. 1596)
• Political Science Undergraduate Major (BA, BS, HBA, HBS) (p. 1308)
• Psychology Graduate Major (MS, PhD) (p. 1271)
• Psychology Undergraduate Major (BA, BS, HBA, HBS) (p. 1273)
• Public Health Graduate Major (MPH, PhD) (p. 1407)
• Public Health Undergraduate Major (BS, HBS) (p. 1486)
• Public Policy Graduate Major (EMPP, MPP, PhD) (p. 1311)
• Public Policy Undergraduate Major (BS, HBS) (p. 1312)
• Radiation Health Physics Graduate Major (MHP, MS, PhD) (p. 737)
• Radiation Health Physics Undergraduate Major (BS, HBS) (p. 739)
• Rangeland Ecology and Management Graduate Major (MS, PhD) (p. 163)
• Rangeland Sciences Undergraduate Major (BS, HBS) (p. 164)
• Religious Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1171)
• Renewable Materials Undergraduate Major (BS, HBS) (p. 838)
• Robotics Graduate Major (MENG, MS, PhD) (p. 724)
• Social Science Undergraduate Major (BA, BS, HBA, HBS) (p. 1055)
• Sociology Undergraduate Major (BA, BS, HBA, HBS) (p. 1315)
• Soil Science Graduate Major (MS, PhD) (p. 230)
• Spanish Undergraduate Major (BA, HBA) (p. 1256)
• Speech Communication Undergraduate Major (BA, BS, HBA, HBS) (p. 1121)
• Statistics Graduate Major (MA, MS, PhD) (p. 1694)
• Sustainability Undergraduate Major (BS, HBS) (p. 303)
• Sustainable Forest Management Graduate Major (MF, MS, PhD) (p. 831)
• Teaching Graduate Major (MAT) (p. 513)
• Tourism, Recreation, and Adventure Leadership Undergraduate Major (BS, HBS) (p. 802)
• Toxicology Graduate Major (MS, PhD) (p. 239)
• Veterinary Medicine Professional Major (DVM) (p. 1708)
• Water Resources Engineering Graduate Major (MS, PhD) (p. 1740)
• Water Resources Policy and Management Graduate Major (MS) (p. 1742)
• Water Resources Science Graduate Major (MS, PhD) (p. 1745)
• Wildlife Science Graduate Major (MS, PhD) (p. 260)
• Women, Gender, and Sexuality Studies Graduate Major (MA, PhD) (p. 1257)
• Women, Gender, and Sexuality Studies Undergraduate Major (BA, BS, HBA, HBS) (p. 1259)
• Wood Science Graduate Major (MS, PhD) (p. 844)
• Zoology Undergraduate Major (BS, HBS) (p. 1667)
• Accounting Graduate Option (p. 352)
• Accounting Information Systems Option (p. 346)
• Adapted Physical Activity Graduate Option (p. 1454)
• Advanced Biochemistry Option (p. 1564)
• Advanced Biophysics Option (p. 1635)
• Advanced Chemistry Option (p. 1565)
• Advanced Manufacturing Graduate Option (p. 721)
• Advanced Manufacturing Graduate Option (p. 713)
• Advanced Mathematics Teaching Option (p. 503)
• Advanced Molecular Biology Option (p. 1639)
• Advanced Science and Mathematics Education Graduate Option (p. 499)
• Advanced Wood Manufacturing Option (p. 839)
• Adventure Leadership Education Option (p. 806)
• Agricultural Education Graduate Option (p. 499)
• Agronomy Option (p. 222)
• Alternative Energy Option (p. 449)
• Animal Behavior Option (p. 161)
• Animal BioHealth/Pre-Professional Option (p. 161)
• Animal Production Option (p. 161)
• Animal Reproduction and Development Option (p. 182)
• Applied and Computational Mathematics Option (p. 1584)
• Applied Computer Science Option (p. 681)
• Applied Ecology Option (p. 450)
• Applied Genetics Option (p. 183)
• Applied Physics Option (p. 1598)
• Aquatic Biology Option (p. 450)
• Aquatic Microbiology Option (p. 1687)
• Archaeology Option (p. 1242)
• Art and Design Option (p. 840)
• Art History Option (p. 1101)
• Biochemistry Option (p. 1565)
• Biocultural Option (p. 1242)
• Biological Physics Option (p. 1598)
• Biology Teaching Option (p. 503)
• Biomedical Sciences Graduate Option (p. 1735)
• Bioproducts and Bioenergy Option (p. 183)
• Biostatistics Graduate Option (p. 1407)
• Biotechnology Option (p. 184)
• Business Analytics Graduate Option (p. 352)
• Business Engineering Option (p. 716)
• Business Option (p. 1565)
• Chemical Engineering Option (p. 1566)
• Chemical Physics Option (p. 1599)
• Chemistry and the Environment Option (p. 451)
• Chemistry Education Option (p. 1566)
• Chemistry Teaching Option (p. 504)
• Child Development Option (p. 1484)
• Climate and Biosystems Modeling Option (p. 184)
• Climate Science Option (p. 442)
• Clinical Mental Health Counseling Graduate Option (p. 496)
• Clinical Sciences Graduate Option (p. 1735)
• Clinically Based Elementary Graduate Option (p. 513)
• Communication Option (p. 1122)
• Community College Leadership Graduate Option (p. 494)
• Community Development and Leadership Option (p. 1056)
• Community History and Civic Engagement Graduate Option (p. 1164)
• Comprehensive Botany Option (p. 206)
• Computational Biology Option (p. 201)
• Computational Molecular Biology Option (p. 1640)
• Computational Physics Option (p. 1599)
• Computer Science Double Degree Option (p. 681)
• Computer Systems Option (p. 682)
• Conservation Law Enforcement Option (p. 794)
• Conservation, Resources, and Sustainability Option (p. 451)
• Corporate Finance Graduate Option (p. 353)
• Counselor Education Graduate Option (p. 496)
• Crime and Justice Option (p. 1315)
• Cultural/Linguistic Option (p. 1242)
• Customizable Option (p. 206)
• Dean's Academy Option (p. 347)
• Dean's Academy Option (p. 351)
• Dean's Academy Option (p. 360)
• Dean's Academy Option (p. 370)
• Dean's Academy Option (p. 374)
• Dean's Academy Option (p. 380)
• Dean's Academy Option (p. 384)
• Dean's Academy Option (p. 387)
• Dean's Academy Option (p. 392)
• Dean's Academy Option (p. 396)
• Dean's Academy Option (p. 365)
• Design Graduate Option (p. 721)
• Dietetics Option (p. 1458)
• Digital Marketing Analytics Option (p. 366)
• Digital Marketing Option (p. 360)
• Dynamics and Controls Graduate Option (p. 721)
• Early Childhood Option (p. 1484)
• Earth Systems Option (p. 452)
• Ecological and Environmental Informatics Option (p. 201)
• Ecological Management of Turf, Landscape and Urban Horticulture Option (p. 285)
• Ecological Restoration Option (p. 794)
• Ecology Option (p. 1660)
• Ecology, Evolution, and Conservation Option (p. 207)
• Elementary Teaching Option (p. 504)
• Engineering Management Graduate Option (p. 722)
• Engineering Management Graduate Option (p. 713)
• Enology and Viticulture Option (p. 269)
• Entomology Graduate Option (p. 228)
• Entomology Graduate Option (p. 283)
• Entrepreneurship for Business Majors Option (p. 360)
• Environmental Agriculture Option (p. 453)
• Environmental and Energy Politics Option (p. 1309)
• Environmental and Natural Resource Sociology Option (p. 1316)
• Environmental and Occupational Health Graduate Option (p. 1408)
• Environmental Chemistry Option (p. 1567)
• Environmental Chemistry Option (p. 185)
• Environmental Policy and Economics Option (p. 454)
• Environmental Science Education Option (p. 454)
• Environmental Water Resources Option (p. 455)
• Epidemiology Graduate Option (p. 1408)
• Equine Option (p. 162)
• Family and Consumer Sciences Teaching Option (p. 505)
• Family Business Option (p. 361)
• Fermentation Science Option (p. 271)
• Finance Graduate Option (http://catalog.oregonstate.edu/college-departments/business/business-msb/finance-option/)
• Financial Analytics Graduate Option (http://catalog.oregonstate.edu/college-departments/business/business-msb/financial-analytics-option/)
• Financial Planning Graduate Option (p. 367)
• Fish and Wildlife Conservation Option (p. 795)
• Food Quality Option (p. 185)
• Food Science Option (p. 272)
• Forensic Science Option (p. 1567)
• Forest Ecosystems Option (p. 796)
• Forest Management Option (p. 829)
• Forest Operations Management Option (p. 830)
• Forest Restoration and Fire Option (p. 830)
• Forestry Undergraduate Major (BS, HBS) (p. 825)
• Foundational Mathematics Option (p. 506)
• Free-Choice Learning Graduate Option (p. 499)
• General Anthropology Option (p. 1243)
• General Business Option (p. 361)
• General Economics Option (p. 1304)
• General Horticulture Option (p. 287)
• General Human Development and Family Sciences Option (p. 1484)
• Genetics Option (p. 1661)
• Genomics Option (p. 202)
• Genomics/Bioinformatics Option (p. 185)
• Geology Option (p. 443)
• Geophysics Option (p. 1600)
• Global Health Graduate Option (p. 1408)
• Global Perspectives on War, Peace, and Empire Graduate Option (p. 1164)
• Habitat Management Option (p. 166)
• Health Management and Policy Option (p. 1487)
• Health Promotion and Health Behavior Graduate Option (p. 1408)
• Health Promotion and Health Behavior Option (p. 1487)
• Health Systems and Policy Graduate Option (p. 1409)
• Health Teaching Option (p. 506)
• History of Science and Technology Graduate Option (p. 1165)
• Horticultural Research Option (p. 289)
• Hospitality Management Option (p. 361)
• Human Dimensions in Natural Resources Option (p. 797)
• Human Resource Analytics Option (p. 366)
• Human Resource Management Graduate Option (p. 353)
• Human Services Option (p. 1485)
• Human Systems Engineering Graduate Option (p. 713)
• Individualized Specialty Option (p. 798)
• Information Systems Engineering Graduate Option (p. 713)
• Innovation Management Graduate Option (p. 354)
• Instrumental Performance Option (p. 1113)
• Integrated Conservation Analysis Option (p. 798)
• Integrated Science Teaching Option (p. 507)
• International Affairs Option (p. 1310)
• International Business Option (p. 347)
• International Business Option (p. 361)
• International Business Option (p. 371)
• International Business Option (p. 380)
• International Business Option (p. 388)
• International Business Option (p. 392)
• Landscape Analysis Option (p. 798)
• Language Arts Graduate Option (p. 514)
• Language Arts Teaching Option (p. 508)
• Language Equity and Educational Policy Graduate Option (p. 499)
• Law and Politics Option (p. 1311)
• Law, Economics and Policy Option (p. 1304)
• Leadership in Higher Education Graduate Option (p. 495)
• Management and Marketing Option (p. 841)
• Managerial Economics Option (p. 1305)
• Manufacturing Systems Engineering Graduate Option (p. 714)
• Manufacturing Systems Option (p. 718)
• Marine Biology Option (p. 1661)
• Market Research and Consumer Analytics Option (p. 366)
• Marketing Graduate Option (p. 355)
• Marketing Insights and Analytics Graduate Option (p. 367)
• Marketing Option (p. 362)
• Materials Mechanics Graduate Option (p. 722)
• Materials Science Option (p. 1568)
• Mathematical Biology Option (p. 1585)
• Mathematical Economics Option (p. 1305)
• Mathematical Physics Option (p. 1600)
• Mathematics Education Graduate Option (p. 500)
• Mathematics Graduate Option (p. 514)
• Merchandising Management Option (p. 362)
• Molecular, Cellular, and Genomic Botany Option (p. 207)
• Music Education Option (p. 1114)
• Music Graduate Option (p. 515)
• Music Production Option (p. 1119)
• Natural Resource Education Option (p. 799)
• Nature, Eco, and Adventure Tourism Option (p. 807)
• Neuroscience Option (p. 1636)
• Nutrition and Health Sciences Option (p. 1459)
• Nutrition in Foodservice, Culinary and Food Systems Option (p. 1460)
• Ocean Science Option (p. 444)
• Optical Physics Option (p. 1601)
• Organizational Leadership Graduate Option (p. 355)
• Outdoor Recreation Management Option (p. 807)
• Pastoral Systems of the World Option (p. 167)
• Pest Biology and Management Option (p. 186)
• Photography and Digital Studio BFA Option (p. 1102)
• Photography and Digital Studio Option (p. 1102)
• Physical Activity Graduate Option (p. 1409)
• Physics Teaching Option (p. 509)
• Physics Teaching/Physics Option (p. 1601)
• Physiology and Behavior Option (p. 1662)
• Piano Performance and Pedagogy Option (p. 1115)
• Piano Performance Option (p. 1115)
• PK-12 English to Speakers of Other Languages (ESOL) Graduate Option (p. 500)
• Plant Breeding and Genetics Graduate Option (p. 229)
• Plant Breeding and Genetics Graduate Option (p. 284)
• Plant Breeding and Genetics Option (p. 224)
• Plant Breeding and Genetics Option (p. 291)
• Plant Growth and Development Option (p. 186)
• Plant Pathology Option (p. 207)
• Policy and Management Option (p. 800)
• Pre-Clinical Laboratory Science Option (p. 1680)
• Pre-Dentistry Option (p. 1681)
• Pre-Dentistry/Biology Option (p. 1663)
• Pre-Dietetics Option (p. 1460)
• Pre-Education Biology Option (p. 1663)
• Pre-Education Option (p. 1052)
• Pre-Medicine Option (p. 1568)
• Pre-Medicine/Biochemistry and Biophysics Option (p. 1636)
• Pre-Medicine/Biochemistry and Molecular Biology Option (p. 1640)
• Pre-Medicine/Biology Option (p. 1664)
• Pre-Medicine/Microbiology Option (p. 1688)
• Pre-Medicine/Pre-Podiatry Option (p. 1681)
• Pre-Optometry Option (p. 1682)
• Pre-Pharmacy Option (p. 1682)
• Pre-Physical Therapy Option (p. 1682)
• Pre-Physician Assistant Option (p. 1683)
• Pre-Therapy and Allied Health Option (p. 1455)
• Pre-Veterinary Medicine Option (p. 1665)
• Product Development Option (p. 718)
• Public Health Practice Graduate Option (p. 1409)
• Radiation Health Physics - Pre Med Option (p. 740)
• Rangeland Science Option (p. 163)
• Renewable Energy Graduate Option (p. 722)
• Research Thesis Graduate Option (p. 356)
• Retail Management Option (p. 362)
• School Counseling Graduate Option (p. 497)
• Science and Engineering Option (p. 842)
• Science Education Graduate Option (p. 500)
• Science Graduate Option (p. 515)
• Science/Mathematics Education Graduate Option (p. 500)
• Secondary Teaching Emphasis Option (p. 1585)
• Social Justice Education Graduate Option (p. 501)

• Marine Resource Management Graduate Certificate (p. 462)
• Medical Humanities Certificate (p. 1166)
• Organic Agriculture Graduate Certificate (p. 300)
• Organic Farming Systems Certificate (p. 299)
• Peace Studies Certificate (p. 1168)
• Public Health Graduate Certificate (p. 1406)
• Rural Policy Graduate Certificate (p. 1314)
• Scientific, Technical, and Professional Communication Certificate (p. 1120)
• Supply Chain and Logistics Management Graduate Certificate (p. 412)
• Sustainable Natural Resources Graduate Certificate (p. 801)
• Urban Agriculture Certificate (p. 300)
• Urban Forestry Graduate Certificate (p. 809)
• Water Conflict Management and Transformation Graduate Certificate (p. 466)
• Wildlife Management Graduate Certificate (p. 260)
• Women, Gender, and Sexuality Studies Certificate (p. 1257)
• Yoga Studies and Yoga Teacher Training Certificate (p. 1172)

College of Agricultural Sciences

The college connects people and the environment, helping communities and industries thrive by finding real-world solutions that are both economically and ecologically sustainable. With over 2600 students, 250 professorial faculty, $500,000 in scholarships, and $90 million in research grants and contracts, AgSci is integral to OSU’s standing as a top-tier land-grant university and its international ranking for agriculture and forestry.

147 Strand Agricultural Hall
Oregon State University

College of Agricultural Sciences (AgSci)

Academics within the College of Agricultural Sciences prepare the next generation of scientists, managers, and leaders in the fields of food, agriculture, natural resources, and life sciences. With 14 academic programs, learning is integrated with research and Extension to provide students with inquiry-based, hands-on experiences in laboratories and field locations across Oregon and the world.

Individualized Advising

Each student is considered an important individual. A student’s study program is developed in personal consultation with an advisor in the department of their major interest. A student’s advisor is the primary resource for advising, obtaining information about registration, and gaining signatures and support for petitions and forms. They are a student’s link to campus support resources, and can help with other advising issues including professional development, leadership opportunities, experiential learning and career based topics or questions. Advisors know how to find help for almost any issue—they are a great place to start when students feel lost.

As early as possible, each student is encouraged to select a subject area and become associated with instructors and other students with similar interests. Initial or early advising is based upon the student’s high school record and placement test scores. When high school preparation is found to be inadequate, the student is encouraged to enroll in courses providing the education, training, and experience necessary to help ensure success at the university level, even though such work may require the student to take one or more additional terms to complete a prescribed four-year curriculum. Students planning to transfer from a community college or
another four-year institution are encouraged to contact an advisor to discuss their plan of study as far in advance of transferring as possible.

Opportunities

Internships
College of Agricultural Sciences departments offer academic credit for on-the-job learning experiences that connect to student learning objectives. Internships are available at https://agsci.oregonstate.edu/academic-programs/opportunities/internships/ in all facets of agriculture and can be paid, unpaid, local, national or international. Details regarding specific departmental requirements are available from departmental advisors. Industries, agencies and students interested in general internship information should contact the Academic Programs Office (https://agsci.oregonstate.edu/academic-programs/contact/).

Scholarships
The College of Agricultural Sciences offers a variety of scholarships. Several are reserved for incoming high school or transfer students, and are included in the admissions process (https://admissions.oregonstate.edu/apply-choose-application/). Additional information and application forms for college-level scholarships can be found here (https://agsci.oregonstate.edu/academic-programs/scholarships/). For information about departmental scholarships, contact each department directly (https://agsci.oregonstate.edu/main/operating-units/). For more information about university-level scholarships, contact the Scholarships Office (http://scholarships.oregonstate.edu/).

Global
The College of Agricultural Sciences has International Exchange Agreements (https://international.oregonstate.edu/agreements/list/) with numerous institutions spanning thirteen countries. Students may choose to study abroad via the exchange program with Lincoln University in New Zealand; learn about various regions across the globe by participating in the Exploring World Agriculture class and companion Faculty-led Educational Tour; or encounter cultures and traditions through their peers in the International Agriculture Club.

Research
The College of Agricultural Sciences provides multiple pathways for students to apply their knowledge through research (https://agsci.oregonstate.edu/academic-programs/opportunities/undergraduate-research/). Whether you are just starting out, or ready to begin an independent research project (https://agsci.oregonstate.edu/academic-programs/agsci-all-star-ananiya/), we have mentors and funding to help you gain research experience.

Undergraduate Minor Programs
Minors (https://agsci.oregonstate.edu/academic-programs/undergraduate-degrees/#minor) are offered through most departments of the College of Agricultural Sciences. Students interested in pursuing a minor must first contact the key advisor (https://agsci.oregonstate.edu/academic-programs/about/advisors/) in the area of interest. The minor must consist of a minimum of 27 designated credits of related course work, including at least 12 in upper-division courses.

Graduate Programs
Take your education to the next level with one of our advanced degrees, or broaden your skill-set by completing a graduate certificate. The College of Agricultural Sciences offers a variety of graduate studies (https://agsci.oregonstate.edu/academic-programs/graduate-degrees/) both on-campus and online. Our graduate student body includes ARCS® Foundation Scholars, Fulbright Fellows and Fellows supported by NOAA and other organizations or federal agencies. Funding opportunities are available through graduate teaching and research assistant positions. Graduate program requirements, deadlines, and application processes can be found on the Graduate School website (https://gradschool.oregonstate.edu/).

Graduation Requirements
To be eligible for a bachelor of science (BS) degree, a student must complete a minimum of 180 credits including:

1. University Baccalaureate Core requirements
2. Courses in agricultural sciences: 36 credits including 24 credits at the upper-division level.

Agricultural Education (AED)

AED 235, INTRODUCTION TO AGRICULTURAL EDUCATION, 2 Credits
Introduces students to the field of agricultural education. Explore the historical foundations and career pathways in non-formal and school-based agricultural education. Topics will include school-based agricultural education, non-formal and extension education, and agricultural literacy. Develop career skills and a plan to pursue a future career in agricultural education.

AED 313, THEORY AND PRACTICUM III: FIELD, 4 Credits
Field based experience for students preparing to be agricultural teachers. Focus on teaching models. Available via Ecampus

AED 325, PLANNING AND DELIVERING NON-FORMAL AGRICULTURAL EDUCATION, 3 Credits
This course uses adult learning theory and practice, including planning non-formal agricultural education programs for youth and adults, methods of instructional delivery, effective use of instructional technology, marketing agricultural education programs, and evaluation of agricultural education outcomes. Microteaching (practice teaching presentations) and group presentations required as part of laboratory assignments.

AED 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AED 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

AED 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits. Available via Ecampus

AED 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
AED 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AED 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AED 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

AED 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

AED 510, PROFESSIONAL INTERNSHIP: AGRICULTURE EDUCATION, 1-40 Credits
A field experience in which the intern will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for 40 credits.
Available via Ecampus

AED 518, EXTENSION COURSE IN TEACHER EDUCATION/PEDAGOGY, 1-3 Credits
Enables present and prospective teachers of agriculture to continue their professional development on pedagogical topics of current importance. (This course is limited to 9 credits per term.)
Equivalent to: AG 518
This course is repeatable for 50 credits.
Available via Ecampus

AED 533, RURAL SURVEY METHODS, 3 Credits
Technique; analyzing, interpreting, and using results of survey data; identifying and utilizing community resources; develop and organize agriculture programs to meet community needs.

AED 552, PROGRAM ORGANIZATION AND MANAGEMENT, 3 Credits
Explores the foundations of vocational education, essential learning skills, advisory committees, and development of a vocational education philosophy. Students will study the elements of educational reform as they apply to specific service areas. Resource analysis, student organizations, and school-to-work transitions will also be studied.

AED 554, MICRO-TEACHING, 3 Credits
Planning, presenting and evaluating lessons in a micro-teaching lab. It includes application of content pedagogy strategies, subject matter principles and media technology. Lessons presented on safety.

AED 555, LABORATORY PEDAGOGY, 3 Credits
Applications of efficient planning, organizing, and teaching skills within the laboratory setting and utilization of laboratory facilities to optimize learning experiences. Laboratory facilities could include a shop, greenhouse, land laboratories/outdoors, agriscience labs, aquaculture, computer lab, field trips, etc.

AED 556, LINK RESEARCH, TEACHING, AND PRACTICE, 3 Credits
Links research to teaching. Students will work with cooperating teachers to identify and apply research to teaching.

AED 557, ISSUES AND TRENDS IN CURRICULUM AND INSTRUCTION, 3 Credits
Emphasizes trends related to subject matter curriculum issues unique to agricultural education at the secondary level.

AED 558, IMPROVING AGRICULTURAL SCIENCE AND TECHNOLOGY PROGRAMS, 3 Credits
Provides impetus toward evaluation and improvement of local programs of agricultural science and technology (AST), such that they better reflect community, regional, and national needs.

AED 580, COMMUNICATING AGRICULTURAL AND LIFE SCIENCES TO THE PUBLIC, 3 Credits
Focuses on communicating with the public about research-based science in agricultural and life sciences for the purposes of education, influencing public policy, promoting positive agricultural practices and creating change. Explores various communication outlets and media and how they are appropriate for different messages.

AED 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AED 603, DISSERTATION, 1-16 Credits
Students engage in research and writing related to the completion of their dissertation to fulfill the requirements of the College of Education PhD program. This course is repeatable for 999 credits.
AED 640, INSTRUMENTATION AND DATA COLLECTION IN SOCIAL SCIENCE, 3 Credits
Addresses the selection, development, and analysis of various types of quantitative instruments and procedures for collecting research data. The course has a quantitative focus and is oriented toward social science research. Lec/lab.
Recommended: SED 580 or equivalent introductory research methods course.

Applied Economics (AEC)
AEC 121, DISCOVERING AGRICULTURAL AND RESOURCE ECONOMICS, 1 Credit
Explore issues, opportunities, and challenges in the dynamic and diverse employment field of agricultural and resource economics.
Equivalent to: AREC 121
AEC 199, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AREC 199
This course is repeatable for 8 credits.
AEC 211, AGRICULTURAL AND FOOD MANAGEMENT, 4 Credits
Economic and business principles applied to the management of firms in agricultural and food industries, including farms, ranches and nurseries, agricultural input suppliers, packers, shippers, processors and food manufacturers and distributors; firm-level goal setting, information management and financial analysis.
Prerequisite: AEC 250 with C- or better or AEC 251 with C- or better or AREC 250 with C- or better or ECON 201 with C- or better or ECON 201H with C- or better
Equivalent to: AREC 211
Available via Ecampus
AEC 221, AGRICULTURAL AND FOOD MARKETING, 3 Credits
Organization and functions of agricultural and food markets both domestic and international; market channels and supply chains for various agricultural commodities and food products; role of agribusiness, cooperatives, and government in marketing decisions.
Equivalent to: AREC 221
Available via Ecampus
AEC 240, *RURAL ECONOMICS OF PLACE AND PEOPLE, 3 Credits
Provides perspective on issues influencing rural communities and economic development in rural America. People, places and natural resources of rural communities play a vital role in economic vitality of the West, yet rural landscapes are changing faster than many urban counterparts. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: AREC 240
AEC 243, *GLOBAL POVERTY AND SUSTAINABLE DEVELOPMENT, 3 Credits
Students are introduced to the challenges of eradicating extreme poverty and achieving sustainable economic development in the world. Topics include: the measurement of poverty and inequality; analysis of food security and agricultural development; the role of health and education in economic development; credit markets; risk and insurance; climate change and biodiversity; gender equality; rural-urban and international migration; population growth and development; institutions and economic performance; the political economy of development. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
AEC 250, *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY, 3 Credits
Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: AEC 250H, AREC 250, AREC 250
Recommended: MTH 111
Available via Ecampus
AEC 250H, *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY, 3 Credits
Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course
Designator
Equivalent to: AEC 250
Recommended: MTH 111
Available via Ecampus
AEC 251, *INTRODUCTION TO AGRICULTURAL AND FOOD ECONOMICS, 3 Credits
An introductory applied microeconomics course focused on the unique challenges of agricultural and food systems. Topics include rational choice theory, models of supply and demand, and price formation, with particular attention on markets for agricultural and food products. Additional topics include market interdependencies, government policy, the behavior of firms, and market structure within agricultural and food systems. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Recommended: MTH 111
Available via Ecampus
AEC 253, *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS, 4 Credits
A general introduction to federal environmental law and policy in the U.S. Familiarizes students with basic legal institutions and concepts of the American legal system, outlines the transition of environmental policy from its common law roots to its modern administrative law form, and gives an overview of the major federal environmental statutes. Relationships among legal theory and process and economic principles are emphasized. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: AREC 253
Available via Ecampus

AEC 299, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AREC 299
This course is repeatable for 8 credits.

AEC 310, EXPLORING EXPERIENTIAL LEARNING OPPORTUNITIES, 2 Credits
Provides background and preparation for students’ experiential learning (EL) activities. Students will be shown examples of appropriate EL, how to find and compete for opportunities, and how to establish and define their learning objectives for EL. Resume writing, appropriate conduct in the workplace, as well as writing and oral presentation skills will be covered. A proposal for an EL activity will be prepared and presented to classmates. Graded P/N.
Recommended: WR 121

AEC 311, INTERMEDIATE APPLIED ECONOMICS I: PRODUCERS AND CONSUMERS, 4 Credits
An examination of the theories of consumer behavior and demand, production cost, the firm, supply, and competitive and monopoly market structures.
Prerequisite: ((AEC 250 with C- or better or AREC 250 with C- or better) or AEC 251 with C- or better or (ECON 201 with C- or better or ECON 201H with C- or better)) and (MTH 241 [C-] or (MTH 251 [C-] or MTH 251H [C-]))
Equivalent to: AREC 311
Available via Ecampus

AEC 313, INTERMEDIATE APPLIED ECONOMICS II: MARKETS, WELFARE & POLICY, 4 Credits
Complementing the private-decision focus in AEC 311, the present course focuses on the intermediate microeconomic theory of social welfare and public decision-making. Topics include exchange, monopoly, game theory, social welfare, externalities, public goods and choice, asymmetric information, uncertainty, and cost-benefit analysis. Substantial attention will be given to the implications of these theories for real-world problems, especially regarding resource and environmental issues.
Prerequisite: MTH 241 with C- or better or (AEC 311 with C- or better or AREC 311 with D- or better or ECON 311 with C- or better)
Equivalent to: AREC 313
Available via Ecampus

AEC 351, *NATURAL RESOURCE ECONOMICS AND POLICY, 3 Credits
Application of principles of economics to identify the causes, consequences, and ways of dealing with natural resource problems, including problems associated with fisheries, forests, water resources, and land. Conceptual topics and policy applications. Emphasis is on developing students’ skill in applying an economic way of thinking about natural resource management. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Prerequisite: (AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better)
Equivalent to: AREC 351
Recommended: MTH 111
Available via Ecampus

AEC 352, *ENVIRONMENTAL ECONOMICS AND POLICY, 3 Credits
Provides an overview of the interrelationships between economic activity, the environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. CROSSLISTED as AEC 352/ ECON 352. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Prerequisite: AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better
Equivalent to: AREC 352
Available via Ecampus

AEC 353, *INTRODUCTION TO COASTAL AND MARINE RESOURCE ECONOMICS, 3 Credits
Introduces tools of economic analysis for understanding coastal and marine resource management. Surveys a selection of current topics in the field, emphasizing innovation in production and stewardship, institutions, and sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: MTH 111 with C- or better and (AEC 250 [C-] or AREC 250 [C-] or ECON 201 [C-] or ECON 201H [C-])

AEC 372, AGRICULTURAL COOPERATIVES, 3 Credits
An introduction to and in-depth examination of the agricultural cooperative. Students will gain a working knowledge of the concepts, principles, and terminology of agricultural cooperatives through reference materials, lectures, presentations by guest speakers and a cooperatives tour. Students will consider the strengths and weaknesses of the agricultural cooperative as well as the unique management and operational challenges inherent to this form of business operation.
Prerequisite: AEC 211 with D- or better or AREC 211 with D- or better
Equivalent to: AREC 372
AEC 388, AGRICULTURAL LAW, 4 Credits
Application of legal principles to business decision making in farming, ranching, and the agricultural support industry. Consideration of the obligations arising out of contract, tort, property, water, public land, and natural resource law.
Equivalent to: AREC 388
Available via Ecampus

AEC 399, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AEC 399H, AREC 399H
This course is repeatable for 8 credits.

AEC 399H, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 399, AREC 399
This course is repeatable for 8 credits.

AEC 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: AREC 401
This course is repeatable for 16 credits.

AEC 402, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: AREC 402
This course is repeatable for 16 credits.

AEC 403, THESIS, 1-16 Credits
Equivalent to: AREC 403
This course is repeatable for 16 credits.

AEC 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: AREC 405
This course is repeatable for 16 credits.

AEC 406, PROJECTS, 1-16 Credits
Equivalent to: AREC 406
This course is repeatable for 16 credits.
Available via Ecampus

AEC 407, SEMINAR, 1-16 Credits
Equivalent to: AEC 407H, AREC 407, AREC 407H
This course is repeatable for 16 credits.

AEC 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 407, AREC 407, AREC 407H
This course is repeatable for 16 credits.

AEC 408, WORKSHOP, 1-16 Credits
Equivalent to: AREC 408
This course is repeatable for 16 credits.

AEC 410, INTERNSHIP, 1-6 Credits
Practical on-the-job training in agricultural business, marketing, commercial agricultural production, or related private or public organizations. Graded P/N.
Equivalent to: AREC 410
This course is repeatable for 6 credits.

AEC 421, ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET, 4 Credits
Introduces students to the geography of poverty in the United States and the “social safety net” that the U.S. has constructed to reduce poverty and its negative effects. The course focuses on the geography of the social safety net, the operation and administration of the safety net, and how recent changes in the social safety net may have disadvantaged rural people and places.
Equivalent to: AREC 421, RS 421
Available via Ecampus

AEC 432, ENVIRONMENTAL LAW, 4 Credits
Legal relationships arising out of rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials.
Equivalent to: AREC 432
Available via Ecampus

AEC 434, BENEFIT-COST ANALYSIS, 4 Credits
Develops the fundamental tools for Benefit-Cost Analysis, a technique for evaluating a project or investment by comparing the economic benefits with the economic costs of the activity. Examines the tricky topic of how to measure the benefits of non-market such as good health and higher environmental quality. The methods introduced here apply to a wide variety of situations. Explores the broad issues of how to think about uncertainty and risk, how to discount future costs and benefits, to value lives saved, and other challenging topics. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: AEC 311 with C- or better or ECON 411 with C- or better
Equivalent to: AREC 434
Recommended: STAT 352 or familiarity with regression analysis
Available via Ecampus

AEC 440, THE ECONOMICS OF BUSINESS ORGANIZATION IN THE FOOD SYSTEM, 4 Credits
Application of economic analysis to questions related to the choice of an appropriate form of business organization for a wide variety of food system enterprises. Topics include costs of contracting, costs of ownership, enterprise scope and scale, and the dynamics of business ownership and structure. Particular emphasis is given to entrepreneurial enterprises and cooperative businesses in the food system.
Prerequisite: AEC 311 with D- or better or ECON 311 with D- or better
AEC 442, AGRICULTURAL BUSINESS MANAGEMENT, 4 Credits
Application of economic, financial, and strategic management principles to agricultural business with a focus on a case-study framework for analysis and business decision making for alternative business management strategies.
Equivalent to: AREC 442

AEC 444, COMMODITY FUTURES AND OPTIONS MARKETS, 4 Credits
Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.
Equivalent to: AREC 444
Available via Ecampus

AEC 446, INTRODUCTION TO APPLIED ECONOMETRICS, 4 Credits
Introduces students to applied econometrics: the use of statistical techniques to estimate and test economic relationships. Topics include multiple regression models, multicollinearity, and simultaneous equations. The applications and labs will focus on econometric analysis of real world problems pertaining to issues in environmental, food, and resource economics and policy. Lec/lab.
Prerequisite: AEC 311 with D- or better and ST 351 [D-]

AEC 447, AGRICULTURAL PRICE AND MARKET ANALYSIS, 4 Credits
Price determination for food and agricultural commodities; development of quantitative economic models that explain and predict prices and other market outcomes. Lec/lab.
Equivalent to: AREC 447
Recommended: AEC 311 and ST 351

AEC 448, ADVANCED TOPICS IN ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Reviews core concepts of economic efficiency and market failures and then focuses on the economics of environmental regulation. Develops an appreciation for the structure of key concepts that underlie the economic approach to environmental issues and applications to policy and regulations. Builds skills in assessing regulatory policies from the perspective of economics.
Prerequisite: AEC 311 with D- or better and AEC 352 [D-]

AEC 452, MARINE ECONOMICS, 3 Credits
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries.
Prerequisite: AEC 351 with D- or better or AEC 352 with D- or better or AREC 351 with D- or better or AREC 352 with D- or better
Equivalent to: AREC 452

AEC 453, CONSERVATION ON PRIVATE LAND, 3 Credits
Explore and experience the increasingly popular phenomenon of conservation on private land. This exploration includes the explosive growth of land trusts and the use of conservation easements to restrict the use of private land and often promote ecological goals.

AEC 454, RURAL DEVELOPMENT ECONOMICS AND POLICY, 3 Credits
Learn economic and regional development conceptual frameworks. Explore U.S. rural development and government interventions. Discuss differing popular local strategies for development that emphasize building current assets like local entrepreneurship to attracting resources and incomes from outside the region like amenity migration and tourism.
Equivalent to: AREC 454
Available via Ecampus

AEC 455, PROGRAM EVALUATION, 3 Credits
Explores the leading methods for evaluating the effectiveness of public programs and policies, specifically focusing on causal inference and empirical applications.
Prerequisite: (AEC 311 with C- or better or ST 351 with C- or better) and AEC 313 [C-]
Available via Ecampus

AEC 460, CAPITAL INVESTMENT ANALYSIS USING AGBIZ LOGIC, 3 Credits
Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgBiz LogicTM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.
Equivalent to: AREC 460

AEC 461, AGRICULTURAL AND FOOD POLICY ISSUES, 4 Credits
Principles of agricultural and food policy formulation; agricultural price and income policies in relation to land use, water, and food policies; interrelationships among U.S. and foreign agriculture and trade policies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: AEC 311 with D- or better or ECON 311 with D- or better
Equivalent to: AREC 461
AEC 465, AGRICULTURAL AND FOOD FINANCIAL MANAGEMENT, 4 Credits
Students will develop risk management strategies utilizing the AgBiz Logic program to reduce the financial, production, marketing, and human resource risks facing agribusinesses. This course is designed to help students apply financial and economic principles to business decisions under diverse and changing circumstances. The course reviews basic financial reporting statements, details accounting and financing practices specific to agricultural and food enterprises.
Prerequisite: (AEC 211 with D- or better or AREC 211 with D- or better) and AEC 311 [D-]
Equivalent to: AREC 465

AEC 466, AGRICULTURAL AND FOOD MARKETING MANAGEMENT, 4 Credits
Principles, trends, issues, barriers, policies, strategies and decisions involved in domestic and international marketing of perishable and storable agricultural commodities and food products from the point of production to the point of consumption. Topics include firm-level marketing concepts, the integration of marketing with firms' overall strategic management goals, as well as comparative studies across multiple outlets for agricultural and food products, to include local, regional, and global markets.
Prerequisite: AEC 221 with D- or better and (AEC 250 [D-] or AEC 251 [D-] or ECON 201 [D-])

AEC 475, WRITING BUSINESS PLANS: AGRICULTURE/FOOD-RELATED ENTERPRISES, 2 Credits
Students choose an enterprise and write a comprehensive business plan that describes the business vision, marketing plan, financial projections, risk management, and implementation strategy. At the end of term selected students present their plan to a commercial lender.
Equivalent to: AREC 475
Recommended: AEC 211 and AEC 221

AEC 499, SPECIAL TOPICS, 1-16 Credits
Various topics in agricultural and resource economics of special and current interest not covered in other courses.
Equivalent to: AREC 499
This course is repeatable for 16 credits.

AEC 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: AREC 501
This course is repeatable for 16 credits.

AEC 502, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

AEC 503, THESIS, 1-16 Credits
Equivalent to: AREC 503
This course is repeatable for 999 credits.
AEC 532, ENVIRONMENTAL LAW, 4 Credits
Legal relationships arising out of rights to air, water, and rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials.
Equivalent to: AREC 532
Available via Ecampus

AEC 534, ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Environmental problems and misuse of natural resources are caused by humans’ behavior, and thus must be solved by changing behavior. Explores the ways economics is central to understanding the incentive behind the causes, consequences, and potential for effective solutions to environmental and resource problems involving air, water, fish, forests, climate change, and biodiversity. Builds on microeconomics principles to include theories of market failures, externalities, common-pool resources, and institutions, as well as growth and sustainability. Equips students with tools for non-market valuation and for critical evaluation of environmental policies’ benefits and costs.
Equivalent to: AREC 534
Recommended: AEC 311 or AREC 311
Available via Ecampus

AEC 540, THE ECONOMICS OF BUSINESS ORGANIZATION IN THE FOOD SYSTEM, 4 Credits
Application of economic analysis to questions related to the choice of an appropriate form of business organization for a wide variety of food system enterprises. Topics include costs of contracting, costs of ownership, enterprise scope and scale, and the dynamics of business ownership and structure. Particular emphasis is given to entrepreneurial enterprises and cooperative businesses in the food system.
Recommended: AEC 311 or ECON 311

AEC 543, INTERNATIONAL TRADE, 4 Credits
Introduction to the major theories of international trade and to models that are useful for applied policy and regional analysis. Effects of trade and trade policy on consumers, workers, and firms are emphasized.
Prerequisite: AEC 513 with C or better
Equivalent to: AREC 543

AEC 544, COMMODITY FUTURES AND OPTIONS MARKETS, 4 Credits
Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.
Equivalent to: AREC 544
Available via Ecampus

AEC 546, INTRODUCTION TO APPLIED ECONOMETRICS, 4 Credits
Introduces students to applied econometrics: the use of statistical techniques to estimate and test economic relationships. Topics include multiple regression models, multicollinearity, and simultaneous equations. The applications and labs will focus on econometric analysis of real world problems pertaining to issues in environmental, food, and resource economics and policy. Lec/lab.
Recommended: AEC 311 and ST 351

AEC 548, ADVANCED TOPICS IN ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Reviews core concepts of economic efficiency and market failures and then focuses on the economics of environmental regulation. Develops an appreciation for the structure of key concepts that underlie the economic approach to environmental issues and applications to policy and regulations. Builds skills in assessing regulatory policies from the perspective of economics.

AEC 550, ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS, 4 Credits
Presents concepts, theories, and methods used in the economic analysis of environmental and natural resource issues. The emphasis is on the economics of environmental policies and the development of decision rules regarding the efficient use of natural resources.
Prerequisite: AEC 512 with C or better
Equivalent to: AREC 550

AEC 551, APPLICATIONS OF ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS, 4 Credits
Applies and expands upon concepts, theories, and methods in environmental and natural resource economics introduced in AEC 550. Topics include non-market valuation, discounting, and benefit-cost analysis, as well as the role and importance of institutions, appropriate research methods, and the philosophical basis for normative judgments in economics.
Prerequisite: AEC 550 with C or better or AREC 550 with C or better
Equivalent to: AREC 551

AEC 552, MARINE ECONOMICS, 3 Credits
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. CROSSTOLISTED as AEC 552/MRM 552.
Equivalent to: AREC 552, MRM 552
Recommended: (AEC 351 or AEC 352 or AREC 351 or AREC 352)

AEC 553, CONSERVATION ON PRIVATE LAND, 3 Credits
Explore and experience the increasingly popular phenomenon of conservation on private land. This exploration includes the explosive growth of land trusts and the use of conservation easements to restrict the use of private land and often promote ecological goals.
AEC 554, RURAL DEVELOPMENT ECONOMICS AND POLICY, 3 Credits
Learn economic and regional development conceptual frameworks. Explore U.S. rural development and government interventions. Discuss differing popular local strategies for development that emphasize building current assets like local entrepreneurship to attracting resources and incomes from outside the region like amenity migration and tourism.
Equivalent to: AREC 554
Available via Ecampus

AEC 555, PROGRAM EVALUATION, 3 Credits
Explores the leading methods for evaluating the effectiveness of public programs and policies, specifically focusing on causal inference and empirical applications.
Available via Ecampus

AEC 560, CAPITAL INVESTMENT ANALYSIS USING AGBIZ LOGIC, 3 Credits
Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgBiz Logic software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.
Equivalent to: AREC 560

AEC 565, AGRICULTURAL AND FOOD FINANCIAL MANAGEMENT, 4 Credits
Students will develop risk management strategies utilizing the AgBiz Logic program to reduce the financial, production, marketing, and human resource risks facing agribusinesses. This course is designed to help students apply financial and economic principles to business decisions under diverse and changing circumstances. The course reviews basic financial reporting statements, details accounting and financing practices specific to agricultural and food enterprises.
Equivalent to: AREC 565
Recommended: (AEC 211 or AREC 211) and AEC 311

AEC 566, AGRICULTURAL AND FOOD MARKETING MANAGEMENT, 4 Credits
Principles, trends, issues, barriers, policies, strategies and decisions involved in domestic and international marketing of perishable and storable agricultural commodities and food products from the point of production to the point of consumption. Topics include firm-level marketing concepts, the integration of marketing with firms’ overall strategic management goals, as well as comparative studies across multiple outlets for agricultural and food products, to include local, regional, and global markets.
Recommended: AEC 221 and (AEC 250 or AEC 251 or ECON 201)

AEC 599, SPECIAL TOPICS, 0-16 Credits
Various topics in applied economics of special and current not covered in other courses. May be repeated for credit when topics differ.
Equivalent to: AREC 599
This course is repeatable for 16 credits.

AEC 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

AEC 602, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

AEC 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

AEC 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

AEC 606, SPECIAL PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

AEC 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AEC 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

AEC 611, ADVANCED MICROECONOMIC THEORY I, 4 Credits
A rigorous development of the theory of consumption and production, with emphasis on duality.
Prerequisite: (AEC 512 with C or better and AEC 513 [C])
Recommended: MTH 254

AEC 612, ADVANCED MICROECONOMIC THEORY II, 4 Credits
A rigorous extension of the theory of the consumer and firm to aggregate and heterogeneous populations, decision making under uncertainty, and related game theory concepts.
Prerequisite: AEC 611 with C or better

AEC 613, ADVANCED MICROECONOMIC THEORY III, 4 Credits
A rigorous development of the theory of competitive equilibrium, market power, public goods, and information.
Prerequisite: AEC 612 with C or better
AEC 625, ADVANCED ECONOMETRICS I, 4 Credits
Emphasizes the basic theory underlying the main types of estimators used in econometrics, as well as their application in empirical research. Includes derivation, properties, and application of method of moments, maximum likelihood, ordinary and generalized least squares, and instrumental variables estimators, statistical inference and hypothesis testing, and model building and specification analysis. Provides the necessary foundation for estimation techniques covered in AEC 626. Lec/lab.
Prerequisite: AEC 525 with C or better

AEC 626, ADVANCED ECONOMETRICS II, 4 Credits
Extensions to the generalized linear regression model are considered: discrete choice, limited dependent variable, panel data, and simultaneous equations models, and new solutions to identification problems. Strong applied orientation, emphasizing problems of data measurement, model selection and specification.
Prerequisite: AEC 625 with C or better

AEC 627, COMPUTATIONAL ECONOMICS, 4 Credits
Covers the numerical analysis of static optimization models and stochastic dynamic models in resource and development economics, emphasizing formulation, solution, and simulation of dynamic optimization, rational expectations, and arbitrage pricing models. Lec/lab.

AEC 640, SUSTAINABLE DEVELOPMENT, 3 Credits
Surveys research on the quantitative economic analysis of sustainable development, with an emphasis on integrated assessment methods and models and their application to agriculture and rural development policy, agricultural technology impact assessment, and climate change impact assessment.
Prerequisite: AEC 611 with D- or better and AEC 612 [D-] and AEC 625 [D-]
Equivalent to: AREC 640

AEC 643, ADVANCED TOPICS IN DEVELOPMENT ECONOMICS, 3 Credits
Introduces students to key issues in the economics of development and equips them with the theoretical and empirical tools required to conduct advanced research in these topics.
Prerequisite: AEC 613 with C or better and AEC 626 [C]
Equivalent to: AREC 643

AEC 651, ADVANCED NATURAL RESOURCE ECONOMICS, 3 Credits
Contemporary economic theory of dynamic natural resource allocation is introduced. Assignments focus on analytical and numerical methods for solving dynamic optimization problems in resource and environmental management. Lecture and readings emphasize current research trends in the field and relevant advances in quantitative methodology.
Prerequisite: AEC 611 with C or better
Equivalent to: AREC 651

AEC 652, ADVANCED ENVIRONMENTAL ECONOMICS, 3 Credits
Interrelationships of natural resource use and the environment; applied welfare and benefit-cost analysis; externalities and pollution abatement; non-market valuation of resources; property rights; legal and social constraints; policy approaches.
Prerequisite: (AEC 513 with C or better or AREC 513 with C or better) and (AEC 525 [C] or AREC 525 [C])
Equivalent to: AREC 652

AEC 653, EMPIRICAL ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Introduces empirical methods at the current frontiers of research in environmental and resource economics. General topics may include the identification of non-market values, revealed and stated preference methods, environmental policy evaluation, equilibrium sorting models, and climate econometrics.
Prerequisite: AEC 513 with C or better and AEC 525 [C]
Equivalent to: AREC 653

AEC 699, SPECIAL TOPICS, 1-16 Credits
Various topics in applied economics of special and current interest not covered in other courses.
Equivalent to: AREC 699
This course is repeatable for 16 credits.

General Agriculture (AG)
AG 111, INFORMATION TECHNOLOGY IN AGRICULTURE, 3 Credits
Using information technology in agriculture and agribusiness; practical experience with computer programs applicable to all agricultural disciplines.
Equivalent to: AREC 111
Available via Ecampus

AG 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

AG 200, ORIENTATION TO THE AGRICULTURAL SCIENCES MAJOR, 2 Credits
Exploration of Agricultural Sciences major and career opportunities.

AG 211, SURVEY AND CONSTRUCTION, 3 Credits
Land measurement and leveling as applied to agricultural uses. Concrete and agricultural building construction including the use of construction power tools, selection of materials and cost estimating.

AG 221, METALS AND WELDING, 3 Credits
Practices of metal working including the use of metal working machines, metal identification, heat treating and metal properties. Fabrication of metals including arc and oxy-acetylene welding and cutting. Lec/lab.
AG 230, INTRODUCTION TO EXTENSION AND ENGAGEMENT, 3 Credits
For students interested in pursuing a career with the OSU Extension Service. An introduction to the OSU Extension Service mission, philosophy, history, organization, structure, administration, program areas, Extension program development, Extension teaching and delivery methods, and the involvement and use of volunteers.
This course is repeatable for 6 credits.

AG 301, *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS, 3 Credits
Designed and presented in partnership with Pacific Northwest Indians and Alaska Natives, focusing on natural ecosystems, differing views, power relationships, policymaking, and gender roles. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

AG 311, *NATIVE AMERICAN AGRICULTURE, 3 Credits
Explores Native North American agriculture and land management—prehistory of important domesticates such as maize, historic change, and contemporary issues including modern stereotypes, women in agriculture, cultural survival, and both the physical and spiritual significance of these crops in Native American communities and around the globe past and present. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Available via Ecampus

AG 312, ENGINE THEORY AND OPERATION, 3 Credits
Engine construction, operational theories and principles, lubrication, fuels and oils, emissions and preventive maintenance are taught through the process of small engine lab activities. Engine efficiency theories and measurement are presented.

AG 318, ACCESSING INFORMATION FOR AGRICULTURAL RESEARCH, 1 Credit
Designed for students at a distance to develop library skills and improve access to information used to conduct technical agricultural research.

AG 351, *COMMUNICATING AGRICULTURE TO THE PUBLIC, 3 Credits
Students will explore various outlets for communicating with the public about agriculture using appropriate, professional writing. Additionally, students will articulate their thoughts on controversial issues as well as write feature and editorial pieces promoting positive agricultural practices and people in agriculture. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

AG 391, FARM IMPLEMENTS, 3 Credits
Power farming implements including operation, maintenance, adjustments, calibration and use are covered. Field trips may be required.
Available via Ecampus

AG 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 402, INDEPENDENT STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

AG 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

AG 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 406, SPECIAL PROBLEMS, 1-16 Credits
This course is repeatable for 16 credits.

AG 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 410, INTERNSHIP, 1-16 Credits
A work internship to give students practical on-the-job preparation in any of the main facets of agriculture or related industries.
This course is repeatable for 16 credits.
Available via Ecampus

AG 412, AG SAFETY AND HEALTH, 3 Credits
An examination of various hazards associated with agriculture. Control strategies will be explored and prevention methods identified. Hazards examined include machinery, livestock, controlled spaces, pesticides, and other items common to the agricultural workplace. Lec/lab.
Available via Ecampus

AG 421, ^WRITING IN AGRICULTURE, 3 Credits
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Available via Ecampus

AG 425, DEVELOPMENTS IN AGRICULTURAL MECHANICS, 3 Credits
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology.
This course is repeatable for 9 credits.
AG 435, PROFESSIONAL PRESENTATIONS IN AGRICULTURE, 3 Credits
Students will learn to effectively create and deliver professional presentations relevant to careers in agriculture and natural resources. This includes developing skills for both formal and informal presentations, using visual aids effectively, and using appropriate strategies to engage various audiences.
Available via Ecampus

AG 445, SOCIAL MEDIA ADVOCACY IN AGRI SCIENCES & NATURAL RESOURCES, 3 Credits
Through practice and application, students develop the ability to communicate effectively in writing using social media and other digital platforms for business purposes, including internal communication, stakeholder engagement, educational messaging, event promotion, and product marketing.

AG 455, *RISK AND CRISIS COMMUNICATIONS IN AG SCI & NATURAL RESOURCES, 3 Credits
Examine potential risk and crisis communications scenarios in agriculture, natural resources and environmental sciences, plus the relevant theories, models, and processes involved in addressing these types of situations effectively. Explores the mitigation, management, and response to risks and crises from a communications perspective with special application to natural resources, along with agricultural and environmental sciences, hazardous situations through completing case studies and creating a risk and crisis communications manual. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

AG 465, AG SCI AND NATURAL RESOURCES COMMUNICATIONS MINOR CAPSTONE, 2 Credits
Reflect on accumulated knowledge and technical/soft skills gained and conceptualize how to apply communication theories and practices in the context of future agricultural and natural resources careers. Integrate real-life agriculture and natural resources communications scenarios, which will allow for the practice of strategy development, proper implementation, and appropriate assessment methods. Helps package and demonstrate skills verbally and in a portfolio.
Prerequisite: AG 351 with D- or better

AG 492, TECHNOLOGY TRANSFER IN AGRICULTURE, 3 Credits
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 499, SPECIAL TOPICS, 1-4 Credits
Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 12 credits.

AG 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AG 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

AG 518, EXTENSION COURSE IN TEACHER EDUCATION: TECHNICAL, 1-3 Credits
Enables present and prospective teachers of agriculture to continue their professional development on technical topics of current importance.
Equivalent to: AED 518
This course is repeatable for 9 credits.

AG 521, WRITING IN AGRICULTURE, 3 Credits
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing.
Available via Ecampus

AG 525, DEVELOPMENTS IN AGRICULTURAL MECHANICS, 3 Credits
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology.
This course is repeatable for 45 credits.
Available via Ecampus

AG 541, COMMUNITY PROGRAMS IN AGRICULTURE, 3 Credits
Evaluating agricultural education program effectiveness and technical appropriateness. Development of long-range plans for agricultural programs to meet the technical needs of a community.

AG 592, TECHNOLOGY TRANSFER IN AGRICULTURE, 3 Credits
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 808, WORKSHOP, 1-4 Credits
Designed to enhance professionalism and create a knowledge base to increase personal effectiveness. This course will provide a basis for future leadership by synthesizing theoretical knowledge with practical application. Individuals will have the opportunity to explore their own personality, reflect on their leadership ability, and develop the professional skills and networking abilities necessary to become influential leaders in their home, community and profession.
This course is repeatable for 4 credits.

AG 521, WRITING IN AGRICULTURE, 3 Credits
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing.
AGRI 299, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for 8 credits.

AGRI 399, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural science. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 8 credits.

AGRI 402, INDEPENDENT STUDIES, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

AGRI 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AGRI 411, *INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL, 3 Credits
What is a food system, what does it look like, and how does it work? How do our food choices shape our world? Food systems, farm to plate, operate within social, political, economic, and natural environments, at multiple scales. This multidisciplinary course will introduce students to the complex topic of food systems, at different scales and from a variety of perspectives. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

AGRI 420, INTRODUCTION TO ORGANIC PRODUCTION, 3 Credits
History of organic farming, advantages and disadvantages, review of long-term studies comparing organic and conventional production systems, a review of the federal organic production guidelines, methods and applications for organic production facilities, crop nutrition, compost and manure utilization, organic amendments, organic field crop production, organic gardening, organic livestock production, weed and pest control in organic systems, and marketing of organic produce.
Prerequisite: CROP 200 with D- or better or SOIL 205 with D- or better or BI 213 with D- or better
Available via Ecampus

AGRI 438, EXPLORING WORLD AGRICULTURE, 2 Credits
Global practices of food production are highly diverse. However, there are also many common global issues related to agriculture, food, and natural resources. Speakers with international backgrounds and experiences will present material, as well as student teams who will research a topic of personal interest. In addition, opportunities for global study, internship, and research will be explored.
Equivalent to: AEC 438

AGRI 499, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for 8 credits.

AGRI 506, ORGANIC AGRICULTURE CAPSTONE, 3 Credits
Recommended: AGRI 520, CROP/SOIL 530, ANS 550

AGRI 511, INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL, 3 Credits
What is a food system, what does it look like, and how does it work? How do our food choices shape our world? Food systems, farm to plate, operate within social, political, economic, and natural environments, at multiple scales. This multidisciplinary course will introduce students to the complex topic of food systems, at different scales and from a variety of perspectives.
Available via Ecampus

AGRI 520, INTRODUCTION TO ORGANIC FOOD PRODUCTION, 3 Credits
History of organic farming, advantages and disadvantages, review of long-term studies comparing organic and conventional production systems, a review of the federal organic production guidelines, methods and applications for organic production facilities, crop nutrition, compost and manure utilization, organic amendments, organic field crop production, organic gardening, organic livestock production, weed and pest control in organic systems, and marketing of organic produce.
Recommended: CROP 200 or SOIL 205 or BI 213
Available via Ecampus

AGRI 599, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural science. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 8 credits.

Animal Sciences (ANS)

ANS 100, ORIENTATION TO ANIMAL AND RANGELAND SCIENCES, 1 Credit
Designed to provide incoming Animal and Rangeland Sciences students an introduction to college life at OSU with an emphasis on the faculty, facilities, services, and the curricula of the Department of Animal and Rangeland Sciences.

ANS 121, *INTRODUCTION TO ANIMAL SCIENCES, 4 Credits
Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: ANS 121H
Available via Ecampus
**ANS 121H, *INTRODUCTION TO ANIMAL SCIENCES, 4 Credits***

Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator

Equivalent to: ANS 121

**ANS 207, SOPHOMORE SEMINAR, 2 Credits***

Examination of career opportunities in animal sciences.

Available via Ecampus

**ANS 215, BEEF/DAIRY INDUSTRIES, 3 Credits***

Introduction to beef and dairy industries; history, current industry status, and demonstration and practice of basic husbandry skills.

Recommended: ANS 121

**ANS 216, SMALL RUMINANT/SWINE INDUSTRIES, 3 Credits***

Introduction to the small ruminant and swine industries including history, current status and production practices, with demonstration and hands-on experience of basic husbandry practices.

Recommended: ANS 121

**ANS 217, POULTRY INDUSTRIES, 3 Credits***

Familiarization of the organizational structure and marketing arrangement of poultry industries; hands-on managerial techniques, practices and procedures carried out by the poultry industries.

**ANS 220, INTRODUCTORY HORSE SCIENCE, 3 Credits***

Introduction to horses, their history, breeds, form and function, performance evaluation, current industry status, and general management.

Recommended: ANS 121

**ANS 223, EQUINE MARKETING, 2 Credits***

Course covers practical concepts of equine marketing. Emphasis on market assessment, targeting buyers, marketing and advertising strategies, hands-on experience in product preparation and presentation, marketing legalities.

Recommended: ANS 121, ANS 220 and ANS 192

**ANS 231, LIVESTOCK EVALUATION, 3 Credits***

Focuses on an individual animal's economic merit as compared to a sample group. Visual appraisal, performance data, and carcass merit are stressed. Includes the evaluation of both market and breeding animals. The livestock species of concentration include beef cattle, swine, sheep, and meat goats. Lec/lab.

Recommended: ANS 121

**ANS 251, PRINCIPLES OF ANIMAL FOODS TECHNOLOGY, 3 Credits***

Processing of meat, milk and eggs into human food products. Lec/lab.

Recommended: ANS 121

**ANS 280, COMPANION ANIMAL MANAGEMENT, 4 Credits***

An introduction to the challenges, responsibilities, and benefits of interaction with selected companion animals. Topics covered will provide an overview of the human-animal bond, the position of companion animals in society, ethical issues of pet ownership and potential career opportunities. In addition, the course will serve as an introduction to preventive care and normal behavior of dogs, cats, and selected exotic pets. As the Department of Animal and Rangeland Sciences curriculum offers courses addressing equine care and husbandry, horses will not be discussed in this class.

Available via Ecampus

**ANS 302, COMMON DISEASES OF COMPANION ANIMALS, 4 Credits***

An introduction to common diseases of selected companion animals. Emphasis will be placed on identifying predisposing factors, clinical signs, common diagnostic procedures and potential implications for human health. A $10 course fee will be required. Lec/rec.

Prerequisite: (( (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-])) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-])) ) and (CH 121 [D-] and CH 122 [D-] and CH 123 [D-])

Recommended: ANS 280

Available via Ecampus

**ANS 311, PRINCIPLES OF ANIMAL NUTRITION, 3 Credits***

Classification, digestion, absorption, and metabolism of nutrients in animals; consequences of nutritional deficiencies and toxicities.

Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-])) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))

Available via Ecampus

**ANS 313, APPLIED ANIMAL NUTRITION: FEEDS AND RATION FORMULATION, 4 Credits***

Discusses topics relevant to feedstuff identification and nutrient analysis, feed processing and formulation of balanced animal diets based on nutrient requirements. Provides students hands-on experiences in identifying various feedstuffs and formulating rations based on the nutrient composition of those feedstuffs.

Recommended: MTH 111

Available via Ecampus
ANS 314, ANIMAL PHYSIOLOGY, 4 Credits
Biological basis of animal performance; describes how networks of cells act cooperatively to enable locomotion, provide a stable internal environment, allocate resources, remove metabolic end-products, and counteract microorganisms.
Recommended: General principles of biology equivalent to BI 211, BI 212, BI 213 and junior standing or higher
Available via Ecampus

ANS 315, *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE, 3 Credits
Discussion of contentious issues including role of animal products and human health; use of hormones and antibiotics; new animal biotechnologies; animal rights/welfare; livestock grazing on public lands. (Bacc Core Course).
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

ANS 316, REPRODUCTION IN DOMESTIC ANIMALS, 4 Credits
Anatomy and physiology of mammalian and avian reproductive systems; fertilization, embryonic and fetal development, placentation and parturition; reproductive technologies. Lec/rec.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) or ((BI 221 with D- or better or BI 221H with D- or better) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-])) and (CH 121 [D-] or CH 221 [D-] or CH 231 [D-] or CH 231H [D-])
Recommended: ANS 121
Available via Ecampus

ANS 317, REPRODUCTION IN DOMESTIC ANIMALS LABORATORY, 1 Credit
Gross and microscopic anatomy of the reproductive tract; semen collection, evaluation and extension; evaluation of fertilization, embryo and fetal development and placentation. Lec/lab.
Prerequisite: ANS 316 (may be taken concurrently) with D- or better
Available via Ecampus

ANS 320, PRINCIPLES OF COMPANION ANIMAL NUTRITION, 3 Credits
Learn about nutrients, the digestive process, and the application of nutritional sciences to the health and welfare of companion animals. Introduction to the metabolic basis and practical preventative management for nutritional diseases in companion animals.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Available via Ecampus

ANS 321, AVIAN EMBRYO, 4 Credits
Discussion and experimentation involving the development and the environmental requirements for the artificial incubation of avian embryos. Lec/lab. Offered even-numbered years.
Recommended: ANS 121 and ANS 217 and BI 211

ANS 333, EQUINE STABLE MANAGEMENT, 3 Credits
Discusses developing a business plan, financial statements, and ratios, budgeting, financial planning, taxation, and employment issues within the current equine industry.
Prerequisite: ANS 220 with D- or better
Recommended: ANS 222

ANS 335, EQUINE HEALTH AND DISEASE, 3 Credits
Recognition of common diseases and disorders including their cause, treatment and prevention. Management of internal and external parasites. Recognizing common lameness issues.
Available via Ecampus

ANS 341, ANIMAL BEHAVIOR AND COGNITION, 3 Credits
Survey, discuss, and explore principles of animal behavior and cognition from a comparative perspective, taking into account the interacting influences of biology, environment, and life experience on the individual and group behavior of animals across species. Aspects of animal cognition, including reasoning, perception, memory and personality, that play an important role in animal behavior will also be addressed.
Prerequisite: BI 102 with D or better or (BI 213 with D or better or BI 213H with D or better) or (BI 221 with D or better or BI 221H with D or better) and (BI 222 [D] or BI 222H [D]) and (BI 223 [D] or BI 223H [D])
Available via Ecampus

ANS 351, ADVANCED PRINCIPLES OF ANIMAL FOODS TECHNOLOGY, 4 Credits
Provides in-depth coverage of both fresh and processed meats and eggs into products suitable for human consumption.
Recommended: ANS 251

ANS 378, ANIMAL GENETICS, 4 Credits
Fundamentals of inheritance, principles of genetic segregation, population and quantitative genetics, response to natural selection and artificial manipulation of populations.
Prerequisite: BI 211 with D- or better or BI 211H with D- or better or BI 212 with D- or better or BI 212H with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 222 with D- or better or BI 222H with D- or better or BI 223 with D- or better or BI 223H with D- or better
Recommended: ANS 121 and ST 351
Available via Ecampus
ANS 380, PRINCIPLES OF ANIMAL ANATOMY AND PHYSIOLOGY, 3 Credits

An introductory course in animal anatomy to provide a foundation for advanced courses in the Animal Science curriculum. Emphasis is on acquisition of a basic knowledge of minute and gross anatomical structures, their operation, and integration. Begins with anatomical nomenclature such as body planes and directional terms then covers the following tissues and organ systems: epithelium, connective tissue, blood and bone marrow, bone/cartilage, muscle tissue, nervous tissue, digestive system, circulatory system, reproductive system, urinary system, and respiratory system.

Prerequisite: ((BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D])) or (BI 221 [D] or BI 221H [D] and (BI 222 [D] or BI 222H [D]) and (BI 223 [D] or BI 223H [D])

Available via Ecampus

ANS 385, FOUNDATIONS OF MAMMALIAN HISTOLOGY, 3 Credits

Provides a basic knowledge of mammalian microscopic anatomy. Emphasis will be on the appearance, organization and function of minute anatomical structures that can only be observed with the help of a visual enhancer, such as a microscope. Covers basic histological techniques and histology related functions of the following tissues and organ systems: epithelium, connective tissue, bone/cartilage, blood, muscle tissue, nervous tissue, circulatory system, digestive system, reproductive system, urinary system, respiratory system, immune system, integument, eye and ear. Also covers gametogenesis, fertiliation, and early development of the vertebrate embryo. Lec/rec.

Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C]) and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C])) and (BB 314 [C] or BB 314H [C])

Available via Ecampus

ANS 390, GROSS ANATOMY OF DOMESTIC ANIMALS, 4 Credits

Provides a foundation for advanced courses in the Animal Sciences curriculum. Emphasis is on gaining knowledge of mammalian anatomy. Lectures cover anatomical nomenclature, structure, operation, and integration of major organ systems. The dog is used as the general model while comparative domestic animal anatomy is also covered. Lec/lab.

Prerequisite: ((BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D])) or ((BI 221 [D] or BI 221H [D] and (BI 222 [D] or BI 222H [D]) and (BI 223 [D] or BI 223H [D]))

ANS 391, RESEARCH, 1-16 Credits

Graded P/N.

This course is repeatable for 16 credits.

ANS 407, SEMINAR, 1-16 Credits

Graded P/N.

This course is repeatable for 16 credits.

ANS 410, ANIMAL SCIENCE INTERNSHIP, 1-12 Credits

On- or off-campus, occupational work experience supervised by the department. Graded P/N.

This course is repeatable for 16 credits.

Available via Ecampus

ANS 420, ETHICAL ISSUES IN ANIMAL AGRICULTURE, 3 Credits

Students are provided with an opportunity to discuss, debate and write extensively about current, relevant, and controversial social issues dealing with modern animal agriculture. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

Available via Ecampus

ANS 427, APPLIED PHYSIOLOGY OF REPRODUCTION, 5 Credits

Principles, techniques and recent development in semen collection, evaluation, extension and preservation; artificial insemination, estrus detection and synchronization; pregnancy diagnosis and embryo transfer.

Prerequisite: ANS 316 with C or better and ANS 317 [C]

Equivalent to: ANS 327

ANS 430, EQUINE SYSTEMS I: EXERCISE SCIENCE, 4 Credits

Seniors and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.

Recommended: ANS 314

ANS 431, EQUINE SYSTEMS II: NUTRITION, 3 Credits

Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.

Recommended: ANS 313

ANS 432, EQUINE SYSTEMS III: REPRODUCTION, 4 Credits

Senior and graduate students explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training of laboratory techniques. Lec/lab.

Prerequisite: ANS 220 with D- or better and ANS 316 [D-]

Recommended: ANS 327

ANS 433, POULTRY MEAT PRODUCTION SYSTEMS, 3 Credits

Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.

Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378
ANS 434, EGG PRODUCTION SYSTEMS, 3 Credits
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378

ANS 435, APPLIED ANIMAL BEHAVIOR, 3 Credits
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.
Recommended: ANS 314 and BI 350 or Z 350

ANS 436, SHEEP PRODUCTION SYSTEMS, 3 Credits
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.
Recommended: ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 439, DAIRY PRODUCTION SYSTEMS, 4 Credits
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.
Recommended: ANS 215 and ANS 313 and ANS 316 and ANS 378

ANS 440, DAIRY PRODUCTION SYSTEMS, 3 Credits
Decision case analysis or special topics in application of dairy management principles.
Prerequisite: ANS 439 with D- or better

ANS 441, TOPICS IN ANIMAL LEARNING, 3 Credits
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Recommended: ANS 435 or ANS 535 and (BI 350 or Z 350) and BI 213

ANS 443, BEEF PRODUCTION SYSTEMS: COW/CALF, 4 Credits
Fundamentals of nutrition, reproductive physiology, health and care, and financial management of beef cow/calf operations in the western U.S. Discussions will focus on critical management stages and practices common to the beef cow/calf production cycle. Taught at EOU La Grande campus only.
Recommended: ANS 121 and ANS 313 and (BA 321 or AEC 211)

ANS 444, BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT, 4 Credits
A continuation of the study of beef cattle management. Content will encompass the growth and development of weaned calves through slaughter for consumer beef production, with particular focus on the management of growing and yearling cattle in forage-based (stocker cattle) and drylot (feedlot) systems. Taught at EOU La Grande campus only.
Recommended: ANS 121 and ANS 313 and (BA 321 or AEC 211)

ANS 445, BEEF PRODUCTION SYSTEMS, 4 Credits
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.
Recommended: ANS 313 and ANS 316 and ANS 317 and ANS 378

ANS 446, GRAZING LIVESTOCK PRODUCTION, 4 Credits
Equips non-animal science majors with basic ruminant livestock (beef cattle, sheep and meat goat) production knowledge, so they may communicate and collaborate effectively with livestock producers.
Prerequisite: ANS 121 with D- or better
Available via Ecampus

ANS 448, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: CROP 448, RNG 448

ANS 452, LIVESTOCK HOUSING AND WASTE MANAGEMENT, 3 Credits
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization.
Available via Ecampus
ANS 456, COMPANION ANIMAL PRODUCTION SYSTEMS, 3 Credits
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.
Prerequisite: (ANS 313 with D- or better and ANS 316 (may be taken concurrently) [D-] and ANS 317 (may be taken concurrently) [D-] and ANS 378 [D-])
Available via Ecampus

ANS 460, SWINE PRODUCTION SYSTEMS, 4 Credits
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of swine from conception through farrowing, weaning, and the growing/finishing phases. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.
Recommended: ANS 121 and ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ANS 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

ANS 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 507, GRADUATE SEMINAR, 1 Credit
Section 1: Seminar/general for all graduate students. Preparation of effective visual aids. Practice explaining the validity or significance of experimental results to an informed audience. Section 2: Seminar/endocrinology, for graduate students interested in physiology. This course is repeatable for 99 credits.

ANS 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ANS 509, TEACHING PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

ANS 511, DIGESTIVE PHYSIOLOGY AND NUTRITION OF RUMINANT ANIMALS, 4 Credits
Anatomy and physiology of the ruminant digestive tract including rumen microbiology and digestive processes. Nutritional biochemistry and physiology of ruminants. Feed chemistry, feed intake and principles of ration balancing. Theory of energy and protein metabolism.
Recommended: ANS 311 or ANS 313

ANS 512, MONOGASTRIC AND POULTRY NUTRITION, 3 Credits
Anatomical differences in digestive tracts of monogasctics; nutritional biochemistry of poultry; practical feeding of avian species; least-cost ration techniques; techniques for determining nutrient needs of monogasctics.
Recommended: ANS 311 and ANS 313

ANS 515, REVIEW OF APPLIED RUMINANT NUTRITION RESEARCH TECHNIQUES, 3 Credits
Review and discussion and applied techniques and methodology used for ruminant nutrition research.

ANS 530, EQUINE SYSTEMS I: EXERCISE SCIENCE, 4 Credits
Senior and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.
Recommended: ANS 314

ANS 531, EQUINE SYSTEMS II: NUTRITION, 3 Credits
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.
Recommended: ANS 313

ANS 532, EQUINE SYSTEMS III: REPRODUCTION, 4 Credits
Designed for seniors and graduate students to explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training in laboratory techniques. Lec/lab.
Equivalent to: BI 532
Recommended: ANS 220 and ANS 316 and ANS 327

ANS 533, POULTRY MEAT PRODUCTION SYSTEMS, 3 Credits
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378
ANS 534, EGG PRODUCTION SYSTEMS, 3 Credits
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378

ANS 535, APPLIED ANIMAL BEHAVIOR, 3 Credits
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.
Recommended: ANS 314 and BI 350 or Z 350

ANS 536, SHEEP PRODUCTION SYSTEMS, 3 Credits
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.
Recommended: ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 538, BIOLOGY OF LACTATION, 3 Credits
Physiological and environmental factors affecting mammary gland development and function. Offered alternate years.
Recommended: Z 431 or Z 531

ANS 539, DAIRY PRODUCTION SYSTEMS, 4 Credits
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.
Recommended: ANS 215 and ANS 313 and ANS 316 and ANS 378

ANS 540, DAIRY PRODUCTION SYSTEMS, 3 Credits
Decision case analysis or special topics in application of dairy management principles.
Recommended: ANS 439

ANS 541, TOPICS IN ANIMAL LEARNING, 3 Credits
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).
Recommended: BI 211 and BI 212 and BI 213 and (ANS 435 or ANS 535) and (BI 350 or Z 350)

ANS 543, BEEF PRODUCTION SYSTEMS: COW/CALF, 3 Credits
Fundamentals of nutrition, reproductive physiology and health programs and their applications in the care and management of beef cattle. Overnight field trip with extra fee charged. Lec/lab. Taught at EOU La Grande campus only.
Recommended: ANS 315 and ANS 313 and ANS 316 and ANS 378

ANS 544, BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT, 3 Credits
Continuation of the study of beef cattle management. Students will practice decision-making processes using area beef cattle operations as case studies. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only.
Recommended: ANS 443 or ANS 543

ANS 545, BEEF PRODUCTION SYSTEMS, 4 Credits
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.
Recommended: ANS 313 and ANS 316 and ANS 317 and ANS 378

ANS 548, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSTITLED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: CROP 548, RNG 548

ANS 550, ORGANIC ANIMAL PRODUCTION SYSTEMS, 3 Credits
Topics include the principles of livestock production, legislation, animal welfare, and marketing of organic production systems. Course emphasizes principles, concepts, and techniques of organic and sustainable production of animals.
Available via Ecampus

ANS 552, LIVESTOCK HOUSING AND WASTE MANAGEMENT, 3 Credits
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization. Offered alternate years.

ANS 556, COMPANION ANIMAL PRODUCTION SYSTEMS, 3 Credits
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.
Recommended: ANS 313 and ANS 378 and completion or concurrent enrollment in ANS 316 and ANS 317
ANS 560, LIPID METABOLISM, 3 Credits
Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism in various tissues and metabolism of eicosanoids. Offered alternate years.
Equivalent to: NUTR 560
Recommended: BB 452 and BB 492

ANS 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ANS 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ANS 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ANS 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ANS 607, GRADUATE SEMINAR, 1 Credit
This course is repeatable for 16 credits.

ANS 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ANS 609, TEACHING PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

ANS 662, HORMONE ACTION, 3 Credits
Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. Offered every other year, winter term.
Prerequisite: BB 551 with C or better or BB 592 with C or better
Equivalent to: PHAR 662

ANS 673, BIOLOGY OF MAMMALIAN REPRODUCTION, 4 Credits
Physiological, neuroendocrine, endocrine and environmental factors that regulate reproduction of mammals. Offered alternate years.
Equivalent to: BI 673
Recommended: ANS 316 and BB 350

ANS 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Biological Data Sciences (BDS)

BDS 211, USE AND ABUSE OF DATA: CRITICAL THINKING IN SCIENCE, 3 Credits
Critically examine how data analysis can support legitimate conclusions from biological datasets and also how deceptive visualizations, misleading comparisons, and spurious reasoning can lead to false conclusions. Analyze data to break down the logical flow of an argument and identify key assumptions, even when they are not stated explicitly.
Prerequisite: (MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better) or MTH 227 with C- or better or MTH 241 with C- or better or MTH 245 with C- or better

BDS 311, COMPUTATIONAL APPROACHES FOR BIOLOGICAL DATA, 3 Credits
The theory and practice underlying widely used computational methods for biological data analysis. Focuses on the analysis and visualization of large data sets using Python, with broad applications to genomics, ecology, and other disciplines. Topics may include image processing, time series analysis, dimensionality reduction, and resampling methods. Develops student expertise in designing and implementing algorithms in the Python programming language.
Prerequisite: (BI 223 with C- or better or BI 223H with C- or better) and (MTH 252 [C-] or MTH 252H [C-] or MTH 228 [C-]) and (CS 161 [C-] or BOT 476 [C-])

BDS 406, SPECIAL PROJECTS, 1-99 Credits
This course is repeatable for 99 credits.

BDS 411, ANALYSIS OF BIOLOGICAL DATA: CASE STUDIES, 3 Credits
Case studies; synthesize previously acquired knowledge and skills in biology, mathematics, statistics, and computer science to implement, in writing, an analysis strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 311 with C- or better or BI 311H with C- or better) or (BB 314 with C- or better or BB 314H with C- or better)) or MB 310 with C- or better) and ((MTH 252 with C- or better or MTH 252H with C- or better) or MTH 228 with C- or better) and CS 261 [C-] and (ST 352 [C-] or ST 412 [C-])

BDS 474X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatin; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Prerequisite: BI 311 (may be taken concurrently) with C- or better or BB 314 (may be taken concurrently) with C- or better
Equivalent to: BOT 474X
BDS 475, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Prerequisite: (BB 314 with D- or better or BB 314H with D- or better) and (BI 311 [D] or BI 311H [D] or PBG 430 [D-])
Equivalent to: BOT 475
Recommended: Basic working knowledge of cell and molecular biology and genetics

BDS 478, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BOT 460, BOT 478

BDS 491, CAPSTONE PROJECTS IN BIOLOGICAL DATA SCIENCE I, 3 Credits
Quantitative skills and biological thinking will be used to analyze and draw conclusions from real-world biological datasets. Projects will be completed in the context of small groups. Draws on skills in mathematics, statistics, computer science, and biology.
Prerequisite: (ST 352 with C- or better or ST 412 with C- or better) and (CS 162 [C-] or BOT 476 [C-] or BB 485 [C-] or MTH 427 [C-])

BDS 492, CAPSTONE PROJECTS IN BIOLOGICAL DATA SCIENCE II, 3 Credits
Quantitative skills and biological thinking will be used to analyze and draw conclusions from biological datasets retrieved in BDS 412. This is a synthesis course that draws skills in mathematics, statistics, computer science, and biology, in which the students will process their curated datasets and draw conclusions.
Prerequisite: BDS 491 with C- or better

BDS 574X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatin; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Equivalent to: BOT 574X

BDS 575, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Equivalent to: BOT 575, MCB 575
Recommended: BB 314 and (BI 311 or PBG 430) and basic working knowledge of cell and molecular biology and genetics

BDS 578, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Equivalent to: BOT 578

BDS 574X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatin; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Equivalent to: BOT 574X

BDS 575, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Equivalent to: BOT 575, MCB 575
Recommended: BB 314 and (BI 311 or PBG 430) and basic working knowledge of cell and molecular biology and genetics

BDS 578, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Equivalent to: BOT 578

BDS 599, SPECIAL TOPICS, 1-4 Credits
This course is repeatable for 99 credits.

Botany and Plant Pathology (BOT)
BOT 101, *BOTANY: A HUMAN CONCERN, 4 Credits
Introductory botany for non-majors, emphasizing the role of plants in the environment, agriculture and society. Includes molecular approaches to the study of plant function and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
BOT 220, *INTRODUCTION TO PLANT BIOLOGY, 4 Credits
Introduction to plant biology including an overview of major groups of plants, plant cells and cell types, plant anatomy and architecture, physiology and function, and ecology and the roles of plants in the environment. Laboratory exercises build on lecture themes and provide hands-on learning experiences including field trips. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Available via Ecampus

BOT 213, PLANT STRUCTURE, 4 Credits
The structural components of vascular plants and how plant structure relates to function, development, environment, evolution, and human use of plants. Field trip. Lec/lab.
Prerequisite: ((BI 212 with D- or better or BI 212H with D- or better) and ((BI 211 with D- or better or BI 211H with D- or better) or (BI 213 with D- or better or BI 213H with D- or better))) or ((BI 221 with D- or better or BI 221H with D- or better) and (BI 222 [D-] or BI 222H [D-]) or (BI 205 [D-] and BI 206 [D-]))
Recommended: BI 213 or BI 213H or BI 223 or BI 223H
Available via Ecampus

BOT 221, PLANT SYSTEMATICS, 4 Credits
Vascular plant classification, diversity, and evolutionary relationships. Lab emphasizes the collection and identification of ferns, gymnosperms, and flowering plants in Oregon. Field trips. Lec/lab.
Recommended: BI 213 or BI 213H or BI 223 or BI 223H
Available via Ecampus

BOT 222, ECONOMIC AND ETHNOBOTANY: ROLE OF PLANTS IN HUMAN CULTURE, 3 Credits
Economic and cultural (ethnobotanical) uses of plants and fungi by humans, including domesticated cultivated plants as well as wild-growing plants, and uses of plants and fungi by indigenous cultures. Ecampus course only.
Available via Ecampus

BOT 223, *FLOWERING PLANTS OF THE WORLD, 3 Credits
Global perspective of plant biodiversity with a focus on evolutionary origins, classification, and evolutionary relationships of the major groups of plants. Development and application of scientific writing and utilization of online information resources in plant evolutionary biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: (BI 211, BI 212, BI 213) or (BI 221, BI 222, BI 223) or (BI 204, BI 205, BI 206)
Available via Ecampus

BOT 224, *FUNGI IN SOCIETY, 3 Credits
Explores the diverse roles played by fungi in relation to human civilization and the natural environment. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: One course in biological sciences.
Available via Ecampus

BOT 225, *INTERSECTIONS BETWEEN PLANTS AND HUMANITY, 3 Credits
The unique attributes of plants—including aspects of their biochemistry, growth, structure, and physiology—have influenced all aspects of life on earth, from biogeochemical cycles to the rise and expansion of human civilizations. Plants are sources of medicines, stimulants, hallucinogens, fibers and woods, resins and latex, oils and waxes; plants have inspired technological innovation, exploration, and exploitation of people and the environment. This course critically examines the intersections of plants with society and technology by exploring the roles plants have played in both historical and modern contexts. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: One course in biological sciences and junior standing.

BOT 231, PLANT PHYSIOLOGY, 4 Credits
Survey of physiological processes in plants, including photosynthesis and plant metabolism, mineral nutrition and ion uptake processes, plant cell/water relations, regulation of plant growth and development, and transpiration and translocation. Lec/rec.
Prerequisite: ((BI 212 with D- or better or BI 212H with D- or better) and (BI 213 [D-] or BI 213H [D-]) or (BI 221 [D-] or BI 222 [D-] or BI 222H [D-])) or (BI 205 [D-] and BI 206 [D-] and (CH 123 [D-] or (CH 233 [D-] and CH 263 [D-]))
Recommended: (BI 213 or BI 213H or BI 223 or BI 223H) and (CH 123 or (CH 233 and CH 263))
Available via Ecampus

BOT 232, LABORATORY TECHNIQUES IN PLANT BIOLOGY, 3 Credits
Laboratory experiences in the manipulation and observation of physiological processes in plant systems. Analysis and interpretation of physiological data generated in experimentation with plant systems. Training in basic laboratory skills, including the principles and procedures involved in the use of common items of laboratory instrumentation. Lab.
Recommended: BOT 331 or BI 314 or BB 314
Available via Ecampus

BOT 234, PLANT ECOLOGY, 4 Credits
Study of higher plants in relation to their environment. The relationship of plant physiology and reproduction to environmental factors; competition and other species interactions; the structure, dynamics and analysis of vegetation. Field trips. Lec/lab.
Recommended: BOT 321 and ((BI 213 or BI 213H) or (BI 223 or BI 223H))
Available via Ecampus

BOT 235, INTRODUCTORY PLANT PATHOLOGY, 4 Credits
Symptoms, causal agents, diagnosis, and prevention of plant diseases, with emphasis on fungi, bacteria, nematode, and virus pathogens. Lec/lab.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-] and (BI 213 [D-] or BI 213H [D-]) or (BI 221 [D-] or BI 221H [D-] and (BI 222 [D-] or BI 222H [D-] or BI 223 [D-] or BI 223H [D-]))) or (BI 204 [D-] and BI 205 [D-] and BI 206 [D-])
Available via Ecampus

BOT 240, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
BOT 403, THESIS, 1-16 Credits  
This course is repeatable for 16 credits.

BOT 405, READING AND CONFERENCE, 1-16 Credits  
This course is repeatable for 16 credits.

BOT 406, PROJECTS: CURATORIAL ASSISTANT, 1-6 Credits  
Students assist with curatorial projects in the OSU Herbarium. Admission is by application to the Department of Botany & Plant Pathology.  
This course is repeatable for 6 credits.

BOT 407, SEMINAR, 1 Credit  
Section 1: Departmental seminar. Section 2: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.  
Equivalent to: BI 407H, BOT 407H  
This course is repeatable for 6 credits.

BOT 407H, SEMINAR, 1 Credit  
Section 1: Departmental seminar. Section 3: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.  
Attributes: HNRS – Honors Course Designator  
Equivalent to: BOT 407  
This course is repeatable for 16 credits.

BOT 408, WORKSHOP, 1-16 Credits  
This course is repeatable for 16 credits.

BOT 410, INTERNSHIP, 1-16 Credits  
This course is repeatable for 16 credits.

BOT 413, FOREST PATHOLOGY, 3 Credits  
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab.  
CROSSLISTED as BOT 413/FOR 413.  
Prerequisite: BI 204 with C or better or BI 212 with C or better or BI 212H with C or better or BI 213 with C or better or BI 213H with C or better or BI 221 with C or better or BI 221H with C or better  
Equivalent to: FOR 413

BOT 414, AGROSTOLOGY, 4 Credits  
Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab.  
Recommended: BOT 321

BOT 416, AQUATIC BOTANY, 4 Credits  
Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab.  
Recommended: (BI 213 or BI 213H) or (BI 223 or BI 223H)

BOT 417X, PHYCOLOGY, 4 Credits  
A field and laboratory based introduction to micro- and macro-algal biology, reproduction and evolution. Emphasis is placed on how the endosymbiosis theory ties algae together as a functional group. Algal diversity will be explored through lectures, laboratory and field trips. The laboratory experience will include methods for isolation, culturing and maintenance of algae for aquaculture and research.  
Recommended: One year of biology

BOT 425, FLORA OF THE PACIFIC NORTHWEST, 3 Credits  
Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab.  
Recommended: BOT 321

BOT 440, FIELD METHODS IN PLANT ECOLOGY, 4 Credits  
Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student’s location, and student projects.  
Available via Ecampus

BOT 442, PLANT POPULATION ECOLOGY, 3 Credits  
Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab.  
Recommended: BOT 341

BOT 458, ECOSYSTEMS GENOMICS, 3 Credits  
Genomic approaches used to understand species interactions with a focus on plant-associated microbes. Learning the conceptual framework and computational techniques of genomics to study the ecology of plant-microbe interactions at the ecosystem level.  
Prerequisite: (BI 311 with D- or better or BI 311H with D- or better) and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-] or BB 314H [D-])
BOT 460, FUNCTIONAL GENOMICS, 3 Credits
Functional genomics describes a set of conceptual approaches and associated laboratory techniques that rely on large-scale DNA sequence datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. This course will provide an overview of these techniques, including a) approaches to predicting protein function based on sequence analysis, b) large-scale genetic approaches to identifying novel genotype-phenotype associations, and c) transcriptomic, proteomic and metabolomic approaches that reveal gene functions by measuring changes in abundance/modification of associated RNA transcripts, proteins and metabolites.
Prerequisite: (BI 311 with C- or better or BI 311H with C- or better) and (BI 314 [C-] or BI 314H [C-] or BB 314 [C-] or BB 314H [C-])

BOT 461, MYCOLOGY, 4 Credits
Broad taxonomic survey of the fungi and their biology. Examines fungal life histories, systematics, ecology, and genetics, as well as ethnomycology. Introduces approaches to mycology in the field, including collection and preparation of specimens.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or ((BI 221 [C-] or BI 221H [C-] and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))

BOT 465, LICHENOLOGY, 4 Credits
Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: ((BI 213 or BI 213H) or (BI 223 or BI 223H)) and two botany courses

BOT 466, BRYOLOGY, 4 Credits
Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: ((BI 213 or BI 213H) or (BI 223 or BI 223H)) and two botany courses

BOT 474X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatin; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Prerequisite: BI 311 (may be taken concurrently) with C- or better or BB 314 (may be taken concurrently) with C- or better
Equivalent to: BDS 474X

BOT 475, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Prerequisite: (BB 314 with D- or better or BB 314H with D- or better) and (BI 311 [D-] or BI 311H [D-] or PBG 430 [D-])
Equivalent to: BDS 475
Recommended: Basic working knowledge of cell and molecular biology and genetics

BOT 476, INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES, 3 Credits
Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences.
Recommended: Cell and molecular biology or genetics. Familiarity with text editing software and unix/linux operating system is advantageous

BOT 478, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BDS 478, BOT 460

BOT 480, PHOTOSYNTHESIS AND PHOTOBIOLOGY, 3 Credits
Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems.
Recommended: One course in plant physiology or ecology

BOT 488, ENVIRONMENTAL PHYSIOLOGY OF PLANTS, 3 Credits
Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab.
Recommended: One course in plant physiology or one course in ecology.
BOT 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: BOT 499H
This course is repeatable for 16 credits.

BOT 499H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BOT 499
This course is repeatable for 16 credits.

BOT 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

BOT 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BOT 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BOT 507, SEMINAR, 1-16 Credits
Section 1: Departmental seminar (F, W, S). Section 2: Communication in Ecology (F). Section 3: Community and Habitat Analyses (W). Section 4: Lichens and Bryophytes Research (S). Weekly one-hour meetings for reporting and discussions of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Graded P/N.
This course is repeatable for 16 credits.

BOT 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 513, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 513/FOR 513.
Equivalent to: FOR 513
Recommended: BI 204 or BI 212 or BI 212H or BI 213 or BI 213H

BOT 514, AGROSTOLOGY, 4 Credits
Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab.
Recommended: BOT 321

BOT 516, AQUATIC BOTANY, 4 Credits
Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submersed vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab.
Recommended: BI 213 or BI 213H

BOT 517X, PHYCOLOGY, 4 Credits
A field and laboratory based introduction to micro- and macro-algal biology, reproduction and evolution. Emphasis is placed on how the endosymbiosis theory ties algae together as a functional group. Algal diversity will be explored through lectures, laboratory and field trips. The laboratory experience will include methods for isolation, culturing and maintenance of algae for aquaculture and research.
Recommended: One year of biology

BOT 525, FLORA OF THE PACIFIC NORTHWEST, 3 Credits
Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab.
Recommended: BOT 321

BOT 540, FIELD METHODS IN PLANT ECOLOGY, 4 Credits
Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student’s location, and student projects.
Recommended: Course in ecology and a course in statistics.
Available via Ecampus

BOT 542, PLANT POPULATION ECOLOGY, 3 Credits
Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab.
Recommended: BOT 341

BOT 543, PLANT COMMUNITY ECOLOGY, 3 Credits
The structure, diversity, and successional dynamics of terrestrial plant communities; methods of analysis. Lec/lab.
Recommended: BOT 341 or equivalent.

BOT 547, NUTRIENT CYCLING, 3 Credits
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as BOT 547/SOIL 547.
Equivalent to: FS 547, SOIL 547
Recommended: College-level chemistry and biology and one class in ecology (eg. BI 370) and/or soils (eg. SOIL 205)
BOT 550, PLANT PATHOLOGY, 5 Credits
Causal agents of plant disease, diagnosis, pathogenesis, epidemiology, and disease management principles and strategies. Field trip. Lec/lab/rec.
Recommended: BI 213 or BI 213H

BOT 552, PLANT DISEASE MANAGEMENT, 4 Credits
Analysis of host, pathogen, and environmental factors influencing the increase and spread of plant disease. Epidemiological theory will be used as a basis for developing and evaluating principles and concepts of plant disease management. Lec/lab/rec. Offered alternate years.
Recommended: BOT 350 or BOT 550

BOT 553, PLANT DISEASE DIAGNOSIS, 3 Credits
Diagnosis of plant diseases and identification of causal agents. Laboratory practice in identification techniques. Observation of symptoms exhibited by diseased plants in greenhouse and field locations. Field trips. Lec/lab. Offered alternate years in summer term.
Recommended: BOT 350 or BOT 550

BOT 554, BIOLOGY OF NEMATODES, 4 Credits
Survey of basic biology and biodiversity of nematodes. Includes taxonomy, identification, life cycles, ecology and pathology, and interaction with other organisms. Lec/lab. Offered alternate years.
This course is repeatable for 4 credits.
Recommended: Plant pathology

BOT 558, ECOSYSTEMS GENOMICS, 3 Credits
Genomic approaches used to understand species interactions with a focus on plant-associated microbes. Learning the conceptual framework and computational techniques of genomics to study the ecology of plant-microbe interactions at the ecosystem level.
Recommended: BI 311 and BI 314

BOT 560, FUNCTIONAL GENOMICS, 3 Credits
Functional genomics describes a set of conceptual approaches and associated laboratory techniques that rely on large-scale DNA sequence datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. This course will provide an overview of these techniques, including a) approaches to predicting protein function based on sequence analysis, b) large-scale genetic approaches to identifying novel genotype-phenotype associations, and c) transcriptomic, proteomic and metabolomic approaches that reveal gene functions by measuring changes in abundance/modification of associated RNA transcripts, proteins and metabolites.
Recommended: (BI 311 or BI 311H) and (BI 314 or BI 314H)

BOT 561, MYCOLOGY, 4 Credits
Broad taxonomic survey of the fungi and their biology. Examines fungal life histories, systematics, ecology, and genetics, as well as ethnomycology. Introduces approaches to mycology in the field, including collection and preparation of specimens.

BOT 565, LICHENOLOGY, 4 Credits
Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: (BI 213 or BI 213H) and two botany courses.

BOT 566, BRYOLOGY, 4 Credits
Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: (BI 213 or BI 213H) and two botany courses.

BOT 570, COMMUNITY STRUCTURE AND ANALYSIS, 4 Credits
Quantitative methods for the analysis of biotic communities, including community concepts, estimation of community composition parameters, theoretical aspects of multivariate methods of analyzing species-importance data, and overview of multivariate tools; hands-on computer analysis of data sets. Lec/lab.
Equivalent to: BI 570
Recommended: BI 370 and (ST 412 or ST 512) and calculus

BOT 574X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatin; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Equivalent to: BDS 574X

BOT 575, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Equivalent to: BDS 575, MCB 575
Recommended: BB 314 and (BI 311 or PBG 430) and basic working knowledge of cell and molecular biology and genetics.
BOT 578, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Equivalent to: BDS 478/BOT 478 and BDS 578/BOT 578.

BOT 580, PHOTOSYNTHESIS AND PHOTOBIOLOGY, 3 Credits
Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems.
Recommended: One course in plant physiology or ecology

BOT 588, ENVIRONMENTAL PHYSIOLOGY OF PLANTS, 3 Credits
Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab.
Recommended: One course in plant physiology or ecology

BOT 590, SELECTED TOPICS IN MYCOLOGY, 1-3 Credits
Advanced topics in mycology through analysis of current literature. Detailed study of an aspect of mycology beyond those covered in regular classes. Seminar and discussion format.
This course is repeatable for 16 credits.
Recommended: BOT 461 or BOT 561

BOT 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BOT 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

BOT 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BOT 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BOT 607, SEMINAR, 1 Credit
Section 1. Departmental seminar
This course is repeatable for 16 credits.

BOT 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 651, MOLECULAR BASIS OF PLANT PATHOGENESIS, 3 Credits
Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years.
Equivalent to: MCB 651
Recommended: BOT 550

BOT 668, PLANT DISEASE DYNAMICS, 4 Credits
Evaluation of processes affecting the dynamics of plant disease and pathogen populations through analysis of current literature. Students will be expected to conduct extensive reading and analysis of literature and to meet with the instructor for small group discussions. Offered alternate years.
Recommended: BOT 550 and ST 412

BOT 691, SELECTED TOPICS-PLANT ECOLOGY, 1-3 Credits
Recent advances and developing problems in plant ecology, with critical evaluation of current literature. Topics vary from year to year.
This course is repeatable for 99 credits.
Recommended: Graduate-level ecology

BOT 692, SELECTED TOPICS: PLANT PATHOLOGY, 1-3 Credits
Selected topics concerning plant pathogens and plant disease processes, emphasizing current literature and theory. Topics vary from year to year.
Equivalent to: MCB 692
This course is repeatable for 99 credits.
Recommended: BOT 550

BOT 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Bioresource Research (BRR)
BRR 100, GREAT EXPERIMENTS IN BIORESOURCE SCIENCES, 2 Credits
For students interested in BRR and undergraduate research, to introduce the research process and help them start defining research interests and project areas. Faculty describe research projects and experimental approaches, and pose interesting political and ethical questions related to scientific research. Students work with junior and senior student mentors already involved in research projects. Offered fall term.
This course is repeatable for 4 credits.
**BRR 200, SCIENCE AND RESEARCH, 2 Credits**

An introduction to science concepts, professional skills and science literacy for organizing, planning, designing and conducting research in biological, agricultural and natural resource science. Learn the process of research, prepare a resume for prospective research mentors, and work in teams to analyze a timely and relevant problem, formulate experimental approaches to address it, and write a research proposal.

**BRR 299, SPECIAL TOPICS, 1-16 Credits**

This course is repeatable for 16 credits.

**BRR 325, *ENERGY TECHNOLOGY AND SOCIAL CHANGE, 3 Credits**

Science and technology co-evolve with a prosperous human society. The course discusses key issues surrounding the interaction between social changes and energy technologies. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

Recommended: One term physical science with lab.

Available via Ecampus

**BRR 399, SPECIAL TOPICS, 0-4 Credits**

This course is repeatable for 6 credits.

**BRR 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits**

Undergraduate mentored research. Students select a faculty research mentor (from 7 OSU colleges) and complete 14 credits of research. Students follow established guidelines to prepare project proposals, progress reports, and a thesis; learn research methods applicable to their chosen field; gain professional skills and contacts. Students are evaluated on their ability to develop and complete a research project proposal, learn and develop research methodologies, conduct research and trouble-shooting procedures, and demonstrate responsible and ethical participation in the research project. Offered all terms.

This course is repeatable for 99 credits.

**BRR 403, *THESIS, 4 Credits**

BRR students independently interpret and present their research in writing. Students write the thesis in a style appropriate for submission to a peer-reviewed journal in their chosen scientific discipline. Students receive a letter grade based on their final thesis. Timeliness of reports is factored in student assessments. The student’s faculty mentor and the BRR Director provide a consensus grade when the thesis is completed. Offered all terms. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

This course is repeatable for 49 credits.

**BRR 404, WRITING AND CONFERENCE, 1-3 Credits**

Thesis writing for Bioenergy minor and other students.

This course is repeatable for 3 credits.

**BRR 405, READING AND CONFERENCE, 1-16 Credits**

This course is repeatable for 16 credits.

**BRR 406, PROJECTS-DATA PRESENTATIONS, 1 Credit**

For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students' posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. CROSSLISTED as BRR 406/HORT 406.

Equivalent to: HORT 406

**BRR 407, SEMINAR, 1 Credit**

For BRR students, to encourage excellence in public speaking. Exposes students to a variety of current seminar topics and provides them with the opportunity to evaluate components of good public seminars. Students receive a grade only after completing a public seminar on their own research (final research seminar). Offered spring term.

**BRR 409, PRACTICUM: TEACHING AND PEER MENTORING, 2-4 Credits**

Upper-division BRR students are grouped with lower-division students in BRR 100 to facilitate discussion and encourage dialogue about current research topics. Juniors and seniors. Juniors and seniors continue to learn new ways to teach and communicate science issues in written and verbal formats.

This course is repeatable for 16 credits.

**BRR 410, INTERNSHIP, 1-12 Credits**

Supervised internship allowing students to gain off-campus work experience for credit. Under direction and approval of the program director, students will submit a statement of intent, identify employer contact, and provide a written report upon completion.

This course is repeatable for 16 credits.

**BRR 499, SPECIAL TOPICS, 2 Credits**

This course is repeatable for 4 credits.

Crop Science (CROP)

**CROP 101, INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE, 1 Credit**

Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. CROSSLISTED as CROP 101/ENT 101/SOIL 101.

Equivalent to: ENT 101, HORT 101, SOIL 101

Available via Ecampus

**CROP 199, SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE, 1-16 Credits**

Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ.

Equivalent to: CROP 199H

This course is repeatable for 16 credits.
CROP 200, CROP ECOLOGY AND MORPHOLOGY, 3 Credits
An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science courses. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance.
Equivalent to: CSS 200
Available via Ecampus

CROP 280, INTRODUCTION TO THE COMPLEXITY OF OREGON CROPPING SYSTEMS, 4 Credits
An introduction to field cropping systems of western Oregon. Provides students with a broad overview of the complexity of cropping systems and the knowledge required to grow and produce a crop–plant physiology, seed biology, plant pathology, soil fertility, entomology, and weed science. Students will observe a crop under different management strategies to enhance understanding of management approaches.
Available via Ecampus

CROP 300, CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS, 4 Credits
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as CROP 300/HORT 300.
Equivalent to: CSS 300, HORT 300
Recommended: One year of general biology
Available via Ecampus

CROP 310, FORAGE PRODUCTION, 4 Credits
Importance of, and current production practices for, forage crops. Lec/lab.
Equivalent to: CSS 310
Recommended: (CSS 300 or CROP 300 or HORT 300) and (CSS 305 or CSS 205 or SOIL 205)
Available via Ecampus

CROP 325, AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH, 3 Credits
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. CROSSLISTED as CROP 325/SOIL 325/SUS 325. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: SOIL 325, SUS 325

CROP 330, WORLD FOOD CROPS, 3 Credits
Origin, production, utilization, and improvement of the world’s major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: CSS 330
Recommended: CSS 200 or CROP 200
Available via Ecampus

CROP 340, PENS AND PLOWS: WRITINGS OF WORKING THE LAND, 3 Credits
A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. (Bacc Core Course) Taught via Ecampus only.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: CSS 340
Available via Ecampus

CROP 355, ORGANIC CERTIFICATION, 3 Credits
Learn about the USDA National Organic Program (NOP) standards relating to certified operations, inspection, certification processes, and labeling. Focus on the crops, processing, and livestock aspects of organic certification for farms and food manufacturing operations.
Available via Ecampus

CROP 401, RESEARCH, 1-16 Credits
Equivalent to: CSS 401
This course is repeatable for 16 credits.

CROP 403, THESIS, 1-16 Credits
Independent, original study and preparation of a senior thesis.
Equivalent to: CSS 403
This course is repeatable for 16 credits.

CROP 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CROP 405H, CSS 405
This course is repeatable for 16 credits.

CROP 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 405, CSS 405H
This course is repeatable for 16 credits.

CROP 407, SEMINAR, 1 Credit
Equivalent to: HORT 407, SOIL 407
Available via Ecampus
CROP 410, INTERNSHIP, 1-6 Credits
Professional work experience previously approved and supervised by the department, written report required.
Equivalent to: CSS 410
This course is repeatable for 12 credits.

CROP 414, PRECISION AGRICULTURE, 4 Credits
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab. CROSSLISTED as CROP 414/HORT 414.
Equivalent to: HORT 414
Available via Ecampus

CROP 418, TOXIC PLANTS IN PNW PASTURES, 1 Credit
Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only.
Equivalent to: CSS 418
Recommended: College-level plant biology and/or taxonomy courses.

CROP 420, SEED SCIENCE AND TECHNOLOGY, 3 Credits
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.
Equivalent to: CSS 420
Recommended: Biology, plant anatomy and/or physiology courses
Available via Ecampus

CROP 433, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as CROP 433/HORT 433 and CROP 533/HORT 533.
Prerequisite: BI 102 with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 223 with D- or better or BI 223H with D- or better or BI 311 with D- or better or BI 311H with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or PBG 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better
Equivalent to: HORT 433

CROP 440, WEED MANAGEMENT, 4 Credits
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec.
Equivalent to: CSS 440
Recommended: One year biological science and one course in organic chemistry.
Available via Ecampus

CROP 448, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 448, RNG 448

CROP 460, SEED PRODUCTION, 3 Credits
Equivalent to: CSS 460
Recommended: CROP 200 or CSS 200
Available via Ecampus

CROP 463, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROSSLISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: HORT 463

CROP 470, OILSEEDS AND ESSENTIAL OIL CROPS, 3 Credits
Provides students with an understanding of the principles and the latest research information of field crop production, chemistry, oil extraction and utilization of OEOC. Includes the importance of OEOC, their uses, current trends, production systems for major crops, harvesting, drying, processing, and other post-harvest operations, fixed (fatty acid) and essential oil extraction methods, and oil utilization. Relevant recent research and review papers will be also included and the information discussed and assessed.
Prerequisite: CROP 200 with D- or better
CROP 480, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSTLISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: HORT 480
Recommended: CROP 300 or HORT 300
Available via Ecampus

CROP 499, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 1-16 Credits
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: CROP 499H, CSS 499
This course is repeatable for 16 credits.
Available via Ecampus

CROP 499H, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 1-16 Credits
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 499, CSS 499
This course is repeatable for 16 credits.

CROP 501, RESEARCH, 1-16 Credits
Equivalent to: CSS 501
This course is repeatable for 16 credits.

CROP 503, THESIS, 1-16 Credits
Equivalent to: CSS 503
This course is repeatable for 999 credits.

CROP 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CSS 505
This course is repeatable for 16 credits.

CROP 506, PROJECTS, 1-16 Credits
Equivalent to: CSS 506
This course is repeatable for 16 credits.

CROP 507, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: CSS 507
This course is repeatable for 99 credits.

CROP 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSTLISTED as CROP 509/ENT 509/ PBG 509/SOIL 509.
Equivalent to: CSS 509, ENT 509, PBG 509, SOIL 509
This course is repeatable for 9 credits.

CROP 514, PRECISION AGRICULTURE, 4 Credits
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab.

CROP 520, SEED SCIENCE AND TECHNOLOGY, 3 Credits
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.
Equivalent to: CSS 520
Recommended: Biology, plant anatomy and/or physiology courses
Available via Ecampus

CROP 530, ORGANIC SOIL AND CROP MANAGEMENT, 3 Credits
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies. CROSSTLISTED as CROP 530/SOIL 530.
Equivalent to: SOIL 530
Recommended: SOIL 525, CROP 200, SOIL 205 or introductory biology. Completion or concurrent enrollment in AGRI 520
Available via Ecampus

CROP 533, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSTLISTED as CROP 433/HORT 433 and CROP 533/HORT 533.
Equivalent to: CSS 533, HORT 533
Recommended: BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or PBG 430 or HORT 450 or CSS 450 or PBG 450

CROP 540, WEED MANAGEMENT, 4 Credits
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec.
Equivalent to: CSS 540
Recommended: One year biological science and one course in organic chemistry.
Available via Ecampus
CROP 548, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 448, RNG 548

CROP 560, SEED PRODUCTION, 3 Credits
Equivalent to: CSS 560
Recommended: CROP 200 or CSS 200
Available via Ecampus

CROP 563, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROSSLISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: HORT 563

CROP 570, OILSEEDS AND ESSENTIAL OIL CROPS, 3 Credits
Provides students with an understanding of the principles and the latest research information of field crop production, chemistry, oil extraction and utilization of OEOC. Includes the importance of OEOC, their uses, current trends, production systems for major crops, harvesting, drying, processing, and other post-harvest operations, fixed (fatty acid) and essential oil extraction methods, and oil utilization. Relevant recent research and review papers will be also included and the information discussed and assessed.
Prerequisite: CROP 200 with D- or better
Recommended: Horticulture, biology or chemistry course

CROP 580, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: HORT 580
Recommended: CROP 300 or HORT 300
Available via Ecampus

CROP 590, EXPERIMENTAL DESIGN IN AGRICULTURE, 4 Credits
Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. Lec/rec.
Equivalent to: CSS 590
Recommended: ST 351
Available via Ecampus

CROP 599, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 0-16 Credits
Technical knowledge and skills development courses offered in a wide variety of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: CSS 599
This course is repeatable for 16 credits.

CROP 601, RESEARCH, 1-16 Credits
Equivalent to: CSS 601
This course is repeatable for 16 credits.

CROP 603, THESIS, 1-16 Credits
Equivalent to: CSS 603
This course is repeatable for 999 credits.

CROP 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CSS 605
This course is repeatable for 16 credits.

CROP 606, PROJECTS, 1-16 Credits
Equivalent to: CSS 606
This course is repeatable for 16 credits.

CROP 607, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: CSS 607
This course is repeatable for 99 credits.

CROP 608, WORKSHOP, 1-16 Credits
Equivalent to: CSS 608
This course is repeatable for 16 credits.

CROP 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: ENT 609, PBG 609, SOIL 609
This course is repeatable for 9 credits.

CROP 660, HERBICIDE SCIENCE, 4 Credits
Absorption, movement, and mechanism of action in plants; behavior of herbicides in soil. Offered alternate years.
Recommended: BOT 331 and (CSS 440 or CSS 540 or CROP 440 or CROP 540)
CROP 670, PHYSIOLOGY OF CROP YIELD, 3 Credits
Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature.
Equivalent to: CSS 670
Recommended: BOT 331

CROP 699, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 1-16 Credits
Equivalent to: CSS 699
This course is repeatable for 16 credits.

Crop and Soil Science (CSS)
CSS 205, *SOIL SCIENCE, 4 Credits
Introduction to the chemical, physical, and biological nature of soils. Examines the functions of soil as a medium for plant growth, a recycling system for nutrients and wastes, a modifier of atmospheric chemistry, a habitat for soil organisms, a system for water purification, and an engineering medium. Field and laboratory projects provide an understanding of fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec/lab. (Bacc Core Course) Taught via Ecampus only.
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Equivalent to: CSS 305, SOIL 205
Available via Ecampus

CSS 305, PRINCIPLES OF SOIL SCIENCE, 4 Credits
Origin, formation, classification, physical, chemical, and biological characteristics; ecosystem functions of soils; effects of soil management on agricultural and forest crop production. Field trips. Taught at EOU LaGrande campus only.
Equivalent to: CSS 205, SOIL 205
Recommended: Two quarters of college chemistry and CSS 306

CSS 306, PROBLEM SOLVING: SOIL SCIENCE APPLICATIONS, 1 Credit
Problem solving for, and in-depth exploration of, Principles of Soil Science (CSS 305). Real-world problems requiring knowledge of soil physical, chemical, and biological properties. Taught at EOU LaGrande campus only.
Corequisites: CSS 305

CSS 315, ^NUTRIENT MANAGEMENT AND CYCLING, 4 Credits
Nutrient forms, transformations, and plant availability as influenced by chemical and biological reactions in soils; soil pH and management of acid and alkaline soils; characteristics and use of fertilizers, soil amendments and organic wastes. Labs include routine soil testing procedures, computer applications for soil fertility management, and field trips. Lec/lab. (Writing Intensive Course) Taught at EOU LaGrande campus only.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CSS 305 with D- or better
Recommended: CH 122 and courses in computers

CSS 320, PRINCIPLES OF OIL AND FIBER CROP PRODUCTION, 1 Credit
An overview of production practices and characteristics of oil seed, essential oil, and fiber crops. Taught at EOU LaGrande campus only.
Recommended: CSS 300 and CSS 305

CSS 321, PRINCIPLES OF CEREAL CROP PRODUCTION, 1 Credit
An overview of the principles underlying small grain production practices in the Pacific Northwest. Taught at EOU LaGrande campus only.
Recommended: CSS 300 and CSS 305

CSS 322, PRINCIPLES OF POTATO PRODUCTION, 1 Credit
Principles and practices governing all aspects of potato production, storage and use. Taught at EOU LaGrande campus only.
Recommended: CSS 300 and CSS 305

Entomology (ENT)
ENT 101, INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE, 1 Credit
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. CROSSLISTED as CROP 101/ENT 101/SOIL 101.
Equivalent to: CROP 101, HORT 101, SOIL 101
Available via Ecampus

ENT 300, ^PLAGUES, PESTS, AND POLITICS, 3 Credits
Integration and interaction of agricultural and public health aspects of entomology in society and history. CROSSLISTED as ENT 300/HORT 330. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: BI 300, HORT 330
Available via Ecampus

ENT 311, INTRODUCTION TO INSECT PEST MANAGEMENT, 4 Credits
Identification, biology and management of injurious and beneficial insects. Concurrent laboratory is designed to provide hands-on experience with identification of insect groups of relevance to agricultural cropping systems. Lec/lab.
Equivalent to: CSS 311
Recommended: Entomology course work or one year college biology
Available via Ecampus

ENT 322, HONEY BEE BIOLOGY AND BEEKEEPING, 3 Credits
In this introduction to the fascinating honey bee and its biology, honey bees are used as model organisms to illustrate general principles of biology, entomology, and sociobiology. Students will learn the basics of beekeeping, have an opportunity to manipulate honey bee colonies, and gain hands-on experience, prevailing winter weather permitting.
Available via Ecampus
ENT 331, POLLINATORS IN PERIL, 3 Credits
Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world.
Equivalent to: HORT 331
Recommended: Completion of a Baccalaureate Core biological science course.
Available via Ecampus

ENT 401, RESEARCH, 1-16 Credits
Work on approved problems carried on in the library, laboratory or field. This course is repeatable for 16 credits.

ENT 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ENT 405, READING AND CONFERENCE, 1-16 Credits
Reading and discussions on special topics. This course is repeatable for 16 credits.

ENT 407, SEMINAR, 1-2 Credits
Graded P/N. This course is repeatable for 16 credits.

ENT 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENT 420, INSECT ECOLOGY, 3 Credits
Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered on even years.
Recommended: BI 370

ENT 440, ISSUES IN INSECT TOXICOLOGY, 3 Credits
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.
Recommended: Background in basic chemistry and biology
Available via Ecampus

ENT 444, INSECT AGROECOLOGY, 3 Credits
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSTLISTED as ENT 444/HORT 444 and ENT 544/HORT 544.
Equivalent to: HORT 444
Recommended: General background or previous course work in entomology.

ENT 499, SPECIAL TOPICS, 1-6 Credits
Equivalent to: FW 499
This course is repeatable for 6 credits.

ENT 501, RESEARCH, 1-16 Credits
Work on approved problems carried on in the library, laboratory or field. This course is repeatable for 16 credits.

ENT 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENT 505, READING AND CONFERENCE, 1-16 Credits
Reading and discussions on special topics. This course is repeatable for 16 credits.

ENT 507, SEMINAR, 1-2 Credits
Graded P/N. This course is repeatable for 16 credits.

ENT 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ENT 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSTLISTED as CROP 509/ENT 509/ PBG 509/SOIL 509.
Equivalent to: CROP 509, PBG 509, SOIL 509
This course is repeatable for 9 credits.

ENT 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENT 518, CURRENT TOPICS IN ENTOMOLOGY, 2 Credits
A core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSTLISTED as ENT 518/HORT 518.
Equivalent to: HORT 518
This course is repeatable for 12 credits.
**ENT 520, INSECT ECOLOGY, 3 Credits**
Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered every year.
Recommended: BI 370 and Z 365

**ENT 523, ORGANIC BEEKEEPING AND HONEY PRODUCTION, 3 Credits**
In this introduction to the fascinating honey bee and its biology, honey bees are used as model organisms to illustrate general principles of biology, entomology, and sociobiology. Learn the basics of beekeeping, organic beekeeping and honey production. Examine the culture and certification of organic and conventional systems of honey production. Available via Ecampus

**ENT 540, ISSUES IN INSECT TOXICOLOGY, 3 Credits**
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.
Recommended: Background in basic chemistry and biology
Available via Ecampus

**ENT 542, PRINCIPLES OF INTEGRATED PEST MANAGEMENT: SYSTEMS DESIGN, 4 Credits**
Principles of integrated pest management design focusing on the use of systems analysis as a means to integrate management tactics, environmental and biological monitoring, pest control models, and implementation elements into a cohesive whole. Introduction to integrated pest management on websites. Students will design a hypothetical crop-pest management system. Lec/lab.
Equivalent to: HORT 542
Recommended: ENT 311

**ENT 544, INSECT AGROECOLOGY, 3 Credits**
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSTLISTED as ENT 444/HORT 444 and ENT 544/HORT 544.
Equivalent to: HORT 544
Recommended: General background or previous course work in entomology.

**ENT 548, INTEGRATED PEST MANAGEMENT IN ORGANIC SYSTEMS, 3 Credits**
Prevention, detection, and management of pests and diseases in organic plant production systems. Content includes activities that require students to expand their experience of pest management in their locality by incorporating new and emergent technology for monitoring, diagnosing and managing insects, pathogen, and weed pests and their impacts on crops. Discussions will be centered on the logistics and potential of new technologies in pest management, incorporating biological, ecological and sustainable agriculture concepts.
Recommended: ENT 311 with minimum grade of D-
Available via Ecampus

**ENT 599, SPECIAL TOPICS, 1-16 Credits**
Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering.
This course is repeatable for 16 credits.

**ENT 601, RESEARCH, 1-16 Credits**
This course is repeatable for 16 credits.

**ENT 603, THESIS, 1-16 Credits**
This course is repeatable for 999 credits.

**ENT 605, READING AND CONFERENCE, 1-16 Credits**
This course is repeatable for 16 credits.

**ENT 607, SEMINAR, 1-16 Credits**
This course is repeatable for 16 credits.

**ENT 609, PRACTICUM IN TEACHING, 1-3 Credits**
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, PBG 609, SOIL 609
This course is repeatable for 9 credits.

**ENT 699, SPECIAL TOPICS, 1-16 Credits**
Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering.
This course is repeatable for 16 credits.

**Food Science and Technology (FST)**

**FST 101, FOOD SCIENCE ORIENTATION, 1 Credit**
For food science majors. Orientation and academic guidance toward career planning in food science and technology.

**FST 199, SPECIAL STUDIES, 1-16 Credits**
Graded P/N.
This course is repeatable for 16 credits.
FST 210, FRUIT AND VEGETABLE PROCESSING, 3 Credits
Lectures, lab activities and plant tours to help majors and non-majors understand traditional and modern fruit and vegetable processing technologies.
Recommended: CH 123 or CH 223 or ((CH 233 or CH 233H) and (CH 263 or CH 263H))

FST 212, DAIRY PROCESSING, 2 Credits
Methods of processing and preserving milk and milk products and related unit operations.
Recommended: CH 123 or CH 223 or CH 233 or CH 233H

FST 213, DAIRY PROCESSING LABORATORY, 1 Credit
Laboratory and field work to accompany FST 212. Field trip required.
Recommended: Concurrent enrollment in FST 212

FST 251, INTRODUCTION TO WINES, BEERS, AND SPIRITS, 3 Credits
A descriptive introduction to the history, science, sensory, economics, and societal aspects of alcoholic beverages.
Recommended: High school biology and chemistry
Available via Ecampus

FST 260, *FOOD SCIENCE AND TECHNOLOGY IN WESTERN CULTURE, 3 Credits
Exploring the sciences and technologies of food processing and preservation within the context of their historical, current, and possible future influences on what we eat, the structure of our society, and our day-to-day lives. (Baccalaureate Core Course)
Attributes: CPWC – Core, Pers, West Culture
Available via Ecampus

FST 273, *WINE IN THE WESTERN WORLD, 3 Credits
A study of wine throughout history, from its accidental discovery and refinement through today, with a focus on the profound role wine plays in agriculture, social rituals, human health, economics, and the ambivalent pursuit of pleasure. (Baccalaureate Core Course)
Attributes: CPWC – Core, Pers, West Culture
Available via Ecampus

FST 280, FOOD AND BEVERAGE FERMENTATION, 2 Credits
Investigates different types of fermentation processes, related techniques, and products. Engages in laboratory activities on cider fermentation and sensory evaluation. Lec/lab.
Prerequisite: CH 231 (may be taken concurrently) with C- or better and CH 261 (may be taken concurrently) [C-]

FST 315, PILOT PLANT EXPERIENCES, 2 Credits
Students will be working in one of the FST pilot plants (dairy, vegetables/fruit, brewing, wine making, distilling) and will be assisting with the manufacturing of foods or beverages. Students must have available blocks of time in their schedules to contribute significantly to a production run. Production schedules for each pilot plant will be determined in advance of registration for each term. Not all pilot plants will be available each term. Lab.

FST 360, FOOD SAFETY AND SANITATION, 3 Credits
Principles, practices, and regulations governing and ensuring the microbiological safety of our food supply through risk assessment, surveillance, and intervention.
Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 212 with D- or better or BI 212H with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 222 with D- or better or BI 222H with D- or better or BI 223 with D- or better or BI 223H with D- or better) and (CH 121 [D-] or CH 221 [D-] or CH 221H [D-] or CH 223 [D-] or CH 223H [D-])

FST 370, INDUSTRY PREPARATION/ HACCP, 3 Credits
Assists students in preparation for internships and employment in the food industry by introducing compliance with food safety regulations, HACCP, and audits.
Recommended: One year of chemistry and one year of biology.

FST 385, *COMMUNICATING FOOD AND FERMENTATION SCIENCE, 3 Credits
This writing intensive course (WIC) will guide students in the investigation and critical evaluation of literature on a topic of current interest in food or fermentation science, and the development of their ability to write concisely and with precision about technical subject matter in this discipline. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: WR 121 with C- or better and FST 360 [D-] and MB 302 (may be taken concurrently) [D-]
Recommended: Completion of Bacc Core Writing II requirement

FST 399, SPECIAL TOPICS, 0-16 Credits
Equivalent to: FST 399H
This course is repeatable for 16 credits.

FST 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: FST 399
This course is repeatable for 16 credits.

FST 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

FST 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.
FST 407, SENIOR SEMINAR, 1 Credit
FST 410, INTERNSHIP, 1-16 Credits
A work internship to give students practical on-the-job training in the food processing or related industries. Graded P/N.
This course is repeatable for 16 credits.

FST 420, SENSORY EVALUATION OF FOOD, 4 Credits
Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab.
Prerequisite: (ST 351 with C- or better or ST 411 with C- or better) and (ST 352 (may be taken concurrently) [D-]) or ST 412 (may be taken concurrently) [D-]

FST 421, *FOOD LAW, 3 Credits
Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FST 422, FOOD CHEMISTRY FUNDAMENTALS, 4 Credits
An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, and carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec.
Prerequisite: (BB 350 with D- or better or BB 450 with D- or better or BB 450H with D- or better) and (CH 332 [C-] or CH 336 [C-]) and (MTH 228 (may be taken concurrently) [D-]) or MTH 252 (may be taken concurrently) [D-] or MTH 252H (may be taken concurrently) [D-]

FST 423, FOOD ANALYSIS, 4 Credits
An integrated laboratory/lecture course covering methods used for the quantitative analysis of the chemical composition of foods and agricultural products.
Recommended: CH 324 and CH 337 and BB 350

FST 425, FOOD SYSTEMS CHEMISTRY, 4 Credits
The chemistry of food components in real-world food systems. Focused on water, proteins, carbohydrates, lipids, and food polymers, their interactions, and the effects of food processing and storage. Integrates writing as a learning tool and means of professional communication. Lec/lab/rec.
Prerequisite: FST 422 with D- or better

FST 430, FOOD PRODUCT DEVELOPMENT, 3 Credits
Provides technical background and hand-on experience in food product development and food innovation.
Recommended: Junior or senior standing
Available via Ecampus

FST 437, CHEMISTRY AND BIOCHEMISTRY OF DISTILLED SPIRITS, 3 Credits
The underlying science of the production of the distilled spirits will be discussed systematically. The course will cover the requirements for water, the major raw materials (eg. cereals, fruits, agave, syrups, and woods for maturation) and the conversion of these into fermentable extract. The scientific principles of fermentation will be explored, in the context of both ethanol and secondary metabolite production. Distillation will be considered, in terms of the physics and chemistry of liquid-liquid separations, before discussing post-fermentation options such as blending, maturation and product finishing.
Prerequisite: FST 251 with C- or better and BB 350 (may be taken concurrently) [D-]
Available via Ecampus

FST 438, PRODUCTION AND ANALYSIS OF DISTILLED SPIRITS, 3 Credits
Building on the prerequisite course, this course compares and contrasts different approaches to the manufacture of distilled spirits by using some of the major spirit categories as examples. The management of a distilled spirits production plant in terms of legislative, safety and process/ product quality will be discussed before explicit consideration of the requirements for establishing a distilled spirits production plant. Successful completion of this course will provide students with a broad understanding of the distilled spirits sector.
Prerequisite: FST 437 with D- or better
This course is repeatable for 3 credits.

FST 455X, FOOD FOR CHANGE, 3 Credits
Focus on traditional regional recipes, explore and document how global change has affected food production and demand until today and how projected climate change will affect it in the future by analyzing the ingredient lists. Focus on one recipe/ingredient, find maps of past/current crop ranges, document changes, establish the carbon footprint, and identify possible replacement ingredients projecting future culinary solutions.
Available via Ecampus

FST 460, CHEMISTRY AND BIOCHEMISTRY OF BEER, 3 Credits
Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality.
Prerequisite: (BI 212 with C- or better or BI 212H with C- or better or BI 221 with C- or better or BI 221H with C- or better) and CH 331 [C-] and CH 332 [C-]
Recommended: Completion or concurrent enrollment in BEE 472 and MB 302

FST 461, PRODUCTION AND ANALYSIS OF BEER, 3 Credits
Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab.
Prerequisite: FST 460 with D- or better and MB 302 [D-] and (MB 303 (may be taken concurrently) [D-]) or MB 303H (may be taken concurrently) [D-]
FST 466, WINE PRODUCTION PRINCIPLES, 3 Credits
Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines.
Prerequisite: (BI 212 with C- or better or BI 212H with C- or better or BI 221 with C- or better or BI 221H with C- or better) and CH 331 [C-] and CH 332 [C-]
Recommended: BB 350 and MB 302

FST 467, PRODUCTION AND ANALYSIS OF WINE, 5 Credits
Examines the practical fundamentals of red and white wine production and the key analysis techniques used to assess grapes and wines. Wine will be produced and monitored from grape to bottle using standard chemical, microbial, and sensorial techniques.
Prerequisite: FST 466 with D- or better and FST 479 (may be taken concurrently) [D-]

FST 479, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. CROSSLISTED as FST 479/MB 479 and FST 579/MB 579.
Prerequisite: ((BI 212 with C- or better or BI 212H with C- or better) or ((BI 221 with C- or better or BI 221H with C- or better) and (BI 223 [C-] or BI 223H [C-])) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
Equivalent to: MB 479

FST 480, TOPICS IN FERMENTATION, 0-2 Credits
Selected topics in fermentation science will be presented by department faculty and invited outside experts. Topics and format will change each quarter. Students may take the course for 1 or 2 credits as the topics change. Lec/lab.
This course is repeatable for 8 credits.

FST 490, FOOD PROCESSING CALCULATIONS, 2 Credits
Application of engineering principles to produce safe processed foods meeting consumer expectations for safety and quality. Validate process engineering models by comparing predicted values with new experimental data.
Prerequisite: BEE 472 with D- or better and FST 360 [D-]
Corequisites: FST 491

FST 491, FOOD PROCESSING CALCULATIONS LABORATORY, 1 Credit
Experiments in a pilot plant supported by a computer laboratory. Prepare samples of novel process technology products.
Corequisites: FST 490
Recommended: Microsoft Excel skills.

FST 495, FOOD PACKAGING, 3 Credits
Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, glass, metal, and paperboard. Modeling of gas and water permeation and accelerated shelf testing. Regulations in food contact surface and related to indirect food additives.
Prerequisite: MTH 111 with C- or better and PH 201 [C-] and CH 331 [C-]

FST 499, SPECIAL STUDIES, 0-16 Credits
This course is repeatable for 16 credits.

FST 501, RESEARCH, 1-16 Credits
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

FST 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FST 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 4 credits.

FST 507, SEMINAR, 1 Credit
This course is repeatable for 4 credits.

FST 509, PRACTICUM IN TEACHING, 1-16 Credits
This course is repeatable for 16 credits.

FST 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FST 514, HEALTH BENEFITS OF FUNCTIONAL FOODS, NUTRACEUTICALS AND DIETARY SUPPLEMENTS, 3 Credits
Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. CROSSLISTED as FST 514/NUTR 514.
Equivalent to: NFM 514, NUTR 514
Recommended: BB 350 and CH 332

FST 520, SENSORY EVALUATION OF FOOD, 4 Credits
Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab.
Recommended: Completion of ST 351 or ST 411 and completion or concurrent enrollment in ST 352 or ST 412
FST 521, FOOD LAW, 3 Credits
Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food.

FST 522, FOOD CHEMISTRY FUNDAMENTALS, 4 Credits
An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, and carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec.
Recommended: (BB 350 or BB 450 or BB 450H) and (CH 332 or CH 336) and (MTH 228 or MTH 252 or MTH 252H)

FST 523, FOOD ANALYSIS, 4 Credits
An integrated laboratory/lecture course covering methods used for the quantitative analysis of the chemical composition of foods and agricultural products.
Recommended: CH 324 and CH 337 and BB 350

FST 525, FOOD SYSTEMS CHEMISTRY, 4 Credits
The chemistry of food components in real-world food systems. Focused on water, proteins, carbohydrates, lipids, and food polymers, their interactions, and the effects of food processing and storage. Integrates writing as a learning tool and means of professional communication. Lec/lab/rec.
Prerequisite: FST 522 with C or better

FST 537, CHEMISTRY AND BIOCHEMISTRY OF DISTILLED SPIRITS, 3 Credits
The underlying science of the production of the distilled spirits will be discussed systematically. The course will cover the requirements for water, the major raw materials (eg. cereals, fruits, agave, syrups, and woods for maturation) and the conversion of these into fermentable extract. The scientific principles of fermentation will be explored, in the context of both ethanol and secondary metabolite production. Distillation will be considered, in terms of the physics and chemistry of liquid-liquid separations, before discussing post-fermentation options such as blending, maturation and product finishing.
Available via Ecampus

FST 538, PRODUCTION AND ANALYSIS OF DISTILLED SPIRITS, 3 Credits
Building on the prerequisite course, this course compares and contrasts different approaches to the manufacture of distilled spirits by using some of the major spirit categories as examples. The management of a distilled spirits production plant in terms of legislative, safety and process/ product quality will be discussed before explicit consideration of the requirements for establishing a distilled spirits production plant. Successful completion of this course will provide students with a broad understanding of the distilled spirits sector.
Prerequisite: FST 537 with D- or better
This course is repeatable for 3 credits.

FST 555X, FOOD FOR CHANGE, 3 Credits
Focus on traditional regional recipes, explore and document how global change has affected food production and demand until today and how projected climate change will affect it in the future by analyzing the ingredient lists. Focus on one recipe/ingredient, find maps of past/current crop ranges, document changes, establish the carbon footprint, and identify possible replacement ingredients projecting future culinary solutions.
Equivalent to: ENSC 555X
Available via Ecampus

FST 560, CHEMISTRY AND BIOCHEMISTRY OF BEER, 3 Credits
Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality.
Recommended: (BI 212 or BI 212H or BI 221 or BI 221H) and CH 331 and CH 332 and completion or concurrent enrollment in BEE 472 and MB 302

FST 561, PRODUCTION AND ANALYSIS OF BEER, 3 Credits
Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab.
Prerequisite: FST 560 with D- or better

FST 566, WINE PRODUCTION PRINCIPLES, 3 Credits
Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines.
Recommended: (BI 212 or BI 212H or BI 221 or BI 221H) and CH 331, CH 332, BB 350 and MB 302

FST 567, PRODUCTION AND ANALYSIS OF WINE, 5 Credits
Examines the practical fundamentals of red and white wine production and the key analysis techniques used to assess grapes and wines. Wine will be produced and monitored from grape to bottle using standard chemical, microbial, and sensorial techniques.
Prerequisite: FST 566 with C or better and FST 579 (may be taken concurrently) [C]

FST 579, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
Equivalent to: MB 579
Recommended: ((BI 212 or BI 212H) or ((BI 221 or BI 221H) and (BI 223 or BI 223H))) and CH 331, CH 332, (BB 350 or BB 450) and MB 302

FST 595, FOOD PACKAGING, 3 Credits
Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, glass, metal, and paperboard. Modeling of gas and water permeation and accelerated shelf testing. Regulations in food contact surface and related to indirect food additives.
FST 599, SPECIAL STUDIES, 0-16 Credits
This course is repeatable for 16 credits.

FST 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

FST 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FST 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FST 607, SEMINAR, 1 Credit
This course is repeatable for 4 credits.

FST 620, ADVANCED TOPICS IN SENSORY SCIENCE, 2 Credits
Current and/or advanced subjects in human sensory science. Includes 1) topics in human flavor perception that covers human psychophysics, neuroscience, and related fields, and 2) sensory evaluation techniques and data handling methods that are advanced in nature. Different points of view regarding above topics will be discussed.
Prerequisite: FST 520 with C or better
This course is repeatable for 4 credits.

FST 628, FLAVOR CHEMISTRY, 3 Credits
The definition of flavor, analytical methods in flavor chemistry, and mechanisms of odor interaction in food system will be discussed. In addition, an integrated approach will be used to study the flavor chemistry of economically-important agricultural products in the Pacific Northwest such as dairy products, fruits, and alcoholic beverages.
Recommended: (FST 422 or FST 522) and (FST 425 or FST 525)

FST 639, FOOD POLYMER SCIENCE, 3 Credits
Investigates the theoretical principles and structure-function relationships of food macromolecules. The theoretical principles are related, where possible, to observable phenomena during thermal processing and storage of foods.
Recommended: (FST 422 or FST 522) and (FST 425 or FST 525)

FST 641, PROCESSING WHEAT AND OTHER SMALL GRAINS: A MOLECULAR VIEW, 3 Credits
Provides a fundamental overview of wheat and other cereals from the perspective of the molecular level events that are important in milling, baking, and other processes. Uses cereal processing (focused primarily on bread-making) as the vehicle for placing elements of food chemistry, food polymer science, physical chemistry, and rheology into the cohesive framework of a single food category. Students will experience how the sciences of chemistry, physics, engineering, microbiology, biochemistry, nutrition, etc. amalgamate in the production of the selected cereal products. Lec/lab.

FST 666, ADVANCED TOPICS IN ENOLOGY, 3 Credits
An in-depth investigation of advanced wine processing techniques and wine research, focusing on their impact on production and wine quality.
Prerequisite: FST 566 with B or better and FST 567 (may be taken concurrently) [B]
Recommended: Viticulture course such as HORT 454 and good understanding of how vineyard practices influence grape quality

Fisheries and Wildlife (FW)

FW 107, ORIENTATION TO FISHERIES AND WILDLIFE, 1 Credit
Information relevant to academic pathways and career planning in the fields of fisheries and wildlife. Graded P/N.
Available via Ecampus

FW 113, INTRODUCTION TO MARINE LIFE IN THE SEA-MARINE BIRDS AND MAMMALS, 1 Credit
Introduces first- and second-year undergraduates, teachers and non-degree students to the breadth of marine science course offerings and research at Oregon State University's Hatfield Marine Science Center located in Newport, Oregon. Using an experiential based format, students collect field data to better understand marine mammals (whales, dolphins and porpoises), seabirds, and their interactions with their environment. Lec/lab. Graded P/N.

FW 199, SPECIAL STUDIES, 1-16 Credits
Graded P/N.
Equivalent to: FW 199H
This course is repeatable for 16 credits.

FW 199H, SPECIAL STUDIES, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 199
This course is repeatable for 16 credits.

FW 209, CAREER SKILLS IN FISHERIES AND WILDLIFE SCIENCES, 1 Credit
A foundation for life-long career development in fisheries and wildlife sciences. Practice the skills needed to search, apply, and attain internships and jobs.
Prerequisite: FW 107 with P or better
Available via Ecampus

FW 251, PRINCIPLES OF FISH AND WILDLIFE CONSERVATION, 3 Credits
History of conservation and natural resource use; ecological principles, and social and economic limitations of conservation; principles and practices of wildlife and fisheries management; role of research in management.
Recommended: One course in introductory biology
Available via Ecampus
FW 255, FIELD SAMPLING OF FISH AND WILDLIFE, 3 Credits
Introduction to sampling populations and communities of vertebrate animals emphasizing sampling design, collection and management of data, and communication of results.
Recommended: WR 121 and familiarity with personal computers.
Available via Ecampus

FW 289, COMMUNICATION SKILLS FOR FISHERIES AND WILDLIFE PROFESSIONALS, 4 Credits
Introduces students to the theoretical and practical dimensions of interpersonal and public communication in a natural resource management field. Lec/rec.
Recommended: FW 251
Available via Ecampus

FW 301, FIELD TECHNIQUES FOR MARINE MAMMAL CONSERVATION, 1 Credit
A laboratory and hands-on experience covering field techniques, computer software for data organization and analyses, and understanding the practical management conservation application for students who are taking or have taken FW/BI 302, Biology and Conservation of Marine Mammals. Taught summer term at HMSC, Newport, OR.
Prerequisite: BI 302 (may be taken concurrently) with D- or better or FW 302 (may be taken concurrently) with D- or better

FW 302, BIOLOGY AND CONSERVATION OF MARINE MAMMALS, 4 Credits
An examination of the biology of whales, pinnipeds, and other marine mammals, including general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions; including conservation issues. Taught at Hatfield Marine Science Center OR online through Ecampus.
Equivalent to: BI 302
Recommended: One year of introductory biology
Available via Ecampus

FW 303, SURVEY OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCE, 3 Credits
Concepts underlying geographic information systems, global positioning system, and remote sensing; application to management and research, data quality issues, and case studies. Not a lab/skills class.
Available via Ecampus

FW 307, SPECIALIZATION DEVELOPMENT, 1 Credit
Students will examine career alternatives, develop career goals, learn what knowledge, skills, and abilities are important for diverse careers in fisheries and wildlife conservation, and develop an academic and lifelong plan for achieving their career goals. This course is intended to assist students in developing a specialization in fisheries and wildlife sciences. Graded P/N.
Equivalent to: FW 207
Recommended: FW 209
Available via Ecampus

FW 311, ORNITHOLOGY, 3 Credits
Survey of the adaptations of birds to a diverse array of habitats. Topics include origins, anatomy, reproductive strategies, migration, flight, behavior, physiology, nutrition, and conservation.
Recommended: One year introductory biology.
Available via Ecampus

FW 312, SYSTEMATICS OF BIRDS, 2 Credits
External anatomy, classification of birds of the world, and field identification of birds by sight and song. Field trips required.
Recommended: One year introductory biology.
Available via Ecampus

FW 315, ICHTHYOLOGY, 3 Credits
A survey of the diversity of biological adaptations of fishes. Topics include physiological and zoogeographical adaptations, reproduction, evolution, cladogenesis, morphology, behavior, and genetics.
Equivalent to: FW 313
Recommended: One year introductory biology.
Available via Ecampus

FW 316, SYSTEMATICS OF FISHES, 3 Credits
Phylogenetic diversity, evolution, relationships and identification of the world’s fishes, with particular focus on Oregon fishes. Includes identification, anatomy, use of keys, introduction to the comparative method, systematic theory, taxonomy, field collection and specimen curation. Lec/lab.
Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 212H [D-] or BI 222 [D-] or BI 222H [D-] or BI 205 [D-]) and (BI 213 [D-] or BI 213H [D-] or BI 223 [D-] or BI 223H [D-] or BI 206 [D-])
Recommended: FW 315
Available via Ecampus

FW 317, MAMMALOGY, 3 Credits
A survey of the origins, evolution, diversity, and adaptations of mammals to diverse environments. Topics include taxonomy, reproduction, sensory perception, herbivory, population cycles and behavior.
Recommended: One year introductory biology.
Available via Ecampus
FW 318, SYSTEMATICS OF MAMMALS, 2 Credits
A survey of the phylogenetic diversity of the mammals in Oregon from a habitat/community perspective. Identifying, using keys, and measuring specimens will be stressed.
Recommended: One year introductory biology.
Available via Ecampus

FW 320, INTRODUCTORY POPULATION DYNAMICS, 4 Credits
Principles and concepts of population dynamics related to fish and wildlife populations; methods of estimating abundance, mortality, sustainable harvest levels and extinction risk; hands-on introduction to models for population analysis. Lec/lab.
Prerequisite: BI 370 (may be taken concurrently) with D- or better or BI 370H (may be taken concurrently) with D- or better or BI 371 (may be taken concurrently) with D- or better
Recommended: Introductory statistics and mathematics equivalent to MTH 245 or higher
Available via Ecampus

FW 321, APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY, 3 Credits
Perspectives in community and ecosystem ecology, and their use in management of fisheries and wildlife resource systems.
Prerequisite: FW 320 (may be taken concurrently) with D- or better
Available via Ecampus

FW 323, MANAGEMENT PRINCIPLES OF PACIFIC SALMON IN THE NORTHWEST, 3 Credits
Explores the nature of the salmon problem in the Northwest. Experts from diverse disciplines describe principles of salmon biology, habitat ecology and management, socioeconomics of direct and indirect users, and government policies.
Available via Ecampus

FW 324, *FOOD FROM THE SEA, 3 Credits
Where does seafood come from, and how does seafood arrive on a plate? How productive are the world's oceans, and can the oceans continue to produce enough to feed (and employ) the masses? How do different cultures, ethnicities, and regions of the world rely upon food from the sea for daily meals? Food from the Sea is an exploration of the cultural, societal, economic, practical, and environmental features of the protein that feeds billions. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

FW 325, *GLOBAL CRISES IN RESOURCE ECOLOGY, 3 Credits
Historical and contemporary implications of the impacts of burgeoning human populations on rates and patterns of global ecological change. Changes in ecosystem processes and crises of species extinction in the context of cultural and political institutions. (Bacc Core Course).
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

FW 326, INTEGRATED WATERSHED MANAGEMENT, 3 Credits
A comprehensive approach to watershed management, one that includes biophysical, socioeconomic, planning and education related topics. Intended for students interested in the sustainable management of natural resources.
Recommended: FW 251
Available via Ecampus

FW 328, WILDLIFE CAPTURE AND IMMOBILIZATION, 2 Credits
Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations.
This course is repeatable for 4 credits.
Available via Ecampus

FW 331, ECOLOGY OF MARINE AND ESTUARINE BIRDS, 4 Credits
Focusing on how marine and estuarine birds are adapted for life at sea. Topics include morphology, physiology, foraging ecology, and biogeography as well as introductory oceanography. Field trips.
Recommended: One year introductory biology.

FW 340, *MULTICULTURAL PERSPECTIVES IN NATURAL RESOURCES, 3 Credits
Explores multicultural influences on development of natural resources in the American West. Effects of diverse social values on changes in the physical landscape and biodiversity. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: FW 340H
Available via Ecampus

FW 341, FISH AND WILDLIFE LAW ENFORCEMENT, 2 Credits
Introduction to the philosophy, purposes, and methods of enforcing natural resource laws, emphasizing fish and wildlife laws.

FW 345, *GLOBAL CHANGE BIOLOGY, 3 Credits
Global Change Biology is the study of the impact of climate change on natural systems and actions to mitigate (slow) or adapt to climate change. Global climate change is having dramatic effects on natural resources including fish and wildlife populations and their habitats. Students will gain an understanding of the role that natural ecosystems (oceans, forests, wetlands, grasslands etc.) play in regulating the climate; how land use affects the earth's climate; how climate change will affect fish, wildlife and their habitats; and the role that managers and researchers can play in mitigating and adapting to climate change. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: Introductory biology and ecology courses such as BI 370
FW 350, *ENDANGERED SPECIES, SOCIETY AND SUSTAINABILITY, 3 Credits
Provides a general background to endangered species biology, and the social and economic implications of the legislation enacted to conserve endangered species (Endangered Species Act, CITES Treaty). (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: FW 251
Available via Ecampus

FW 356, *CITIZEN SCIENCE, 3 Credits
Citizen science involves non-specialists in scientific studies addressing large challenges best solved through collaboration. Citizens contribute data scientists may not otherwise be able to obtain, while improving their understanding of the scientific process, integrating technology into the learning process, and generating new knowledge for society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: FW 251
Available via Ecampus

FW 360, *ORIGINS OF F&W MANAGEMENT-EVOLUTION, GENETICS, AND ECOLOGY, 3 Credits
Examines genetics and human interactions with fisheries and wildlife from an ecological and evolutionary perspective. Basic principles of environmental interactions, and how humans interact with other species and their environments in the disciplines commonly recognized as fisheries, wildlife and conservation sciences. (Baccalaureate Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Two terms of coursework at OSU
Available via Ecampus

FW 366, ENVIRONMENTAL CONTAMINANTS IN FISH AND WILDLIFE, 3 Credits
Environmental contamination is an important threat to many fish and wildlife populations and the habitats and prey upon which they rely. The field of ecotoxicology links the ecology of fish and wildlife with toxicology of environmental contaminants, and so spans political, scientific, and public relations realms. Through the pairing of introductory concepts with key case studies, this course provides students with a preparatory framework for understanding toxicological issues of importance for those focused on studying, managing or conserving fish and wildlife populations.
Prerequisite: (BI 204 with D- or better or BI 211 with D- or better or BI 211H with D- or better) and (BI 205 [D-] or BI 212 [D-] or BI 212H [D-])
Available via Ecampus

FW 370, CONSERVATION GENETICS, 4 Credits
A foundational course in preparation for a degree in Fisheries and Wildlife or other degrees focused on conservation of natural resources. Covers a broad range of topics associated with issues surrounding genetics that working professionals in the biological sciences should be conversant about. One of the most important aspects of the course is the development of problem-solving and critical-thinking skills.
Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 212H [D-] or BI 222 [D-] or BI 222H [D-] or BI 205 [D-]) and (BI 213 [D-] or BI 213H [D-] or BI 223 [D-] or BI 223H [D-] or BI 206 [D-])
Recommended: One year introductory biology
Available via Ecampus

FW 391, *RIDGE TO REEF: SUSTAINABLE RESOURCE MANAGEMENT IN PALAU, 4 Credits
How do small islands address issues of natural resource management, food security, and sustainability? What role do communities, governments, and non-profits play in addressing these issues? Can traditional ecological knowledge help solve these challenges? What about climate change on small Islands? The Republic of Palau will be our classroom. Students will work with and learn from fishers, farmers, community leaders, traditional chiefs, terrestrial and marine biologists, and policy makers. Key topics include food security/production, climate change adaptation, protected area management, biocultural conservation, sustainable forest management, watershed management, sustainable development, coral reef and fisheries management, biodiversity measurement methods and ecosystem restoration.
Attributes: CSGI – Core, Synth, Global Issues

FW 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 403, THESIS, 1-16 Credits
This course is repeatable for 32 credits.

FW 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 407, SEMINAR, 1-16 Credits
Graded P/N. Taught at Hatfield Marine Science Center.
Equivalent to: FW 407H
This course is repeatable for 16 credits.
Available via Ecampus

FW 407H, SEMINAR, 1-16 Credits
Graded P/N. Taught at Hatfield Marine Science Center.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 407
This course is repeatable for 16 credits.

FW 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.
FW 410, INTERNSHIP, 1-6 Credits
This course is repeatable for 99 credits.
Available via Ecampus

FW 415, FISHERIES AND WILDLIFE LAW
AND POLICY, 3 Credits
Provides students with an understanding of the key legal frameworks
within which they will work to conserve fish and wildlife resources.
Examines federal law and policy relating to allocation and conservation of
fish and wildlife resources.
Recommended: PS 201 or other introductory political science course.
Available via Ecampus

FW 418, URBAN ECOLOGY, 3 Credits
Understand how an increasing human population increases pressure
on fish and wildlife communities and resources within ecosystems.
Examines the interactions between humans and animal species within
urban areas and the effects of urbanization on species, communities, and
ecosystems. Topics include conserving biodiversity, invasive species,
human health and well-being, and urban planning.
Recommended: FW 255, BI 370
Available via Ecampus

FW 419, THE NATURAL HISTORY OF
WHALES AND WHALING, 3 Credits
Addresses the natural history of whales as a unique example of
adaptation in an evolutionary lineage, and the history of whaling as a
general example of the failings of international resource management.
Recommended: Some background in vertebrate ecology and evolution or
Genetics
Available via Ecampus

FW 421, AQUATIC BIOLOGICAL
INVASIONS, 4 Credits
An overview of the background, theory, evolution, ecology, politics and
conservation of invasions by introduced species in aquatic environments.
Taught at Hatfield Marine Science Center OR online through Ecampus.
Equivalent to: BI 421
Recommended: One year of university-level biology.
Available via Ecampus

FW 422, INTRODUCTION TO OCEAN LAW, 3
Credits
Examination of US law and primary international law focused on fisheries
management with coverage of regulation of other ocean resources
including energy, marine mammals, endangered species, pollution, and
protected areas. Final project is intended to provide students with hands-
on exposure to real-world fisheries and ocean management issues.
Available via Ecampus

FW 426, COASTAL ECOLOGY AND
RESOURCE MANAGEMENT, 5 Credits
Study of the ecology and management of coastal marine and freshwater
ecosystems as well as natural resources, emphasizing experimental
(participatory) learning in a field station setting. Lec/lab.

FW 427, PRINCIPLES OF WILDLIFE
DISEASES, 4 Credits
Ecological aspects of important diseases affecting North American
wildlife will be discussed. Demonstrations will mainly cover migratory
birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use
lab demonstrations.
Available via Ecampus

FW 433, POPULATION DYNAMICS FOR
CONSERVATION, 4 Credits
A synthesis of the principles of population dynamics from the viewpoint
of a resource manager. Particular attention is paid to populations
structured by age, size, or over space, and considering both fisheries and
wildlife management. Laboratory work uses computer programming in
the R language to implement examples from lecture.
Prerequisite: (FW 320 with C or better or BI 483 with C or better) and
((MTH 227 with C or better or MTH 228 with C or better) or (MTH 251 with
C or better or MTH 252 with C or better))

FW 434, ESTUARINE ECOLOGY, 4 Credits
Integrated and synthetic training in the ecological processes of estuarine
environments, with emphases on ecological interactions among
organisms and the biogeochemical cycling of carbon and nitrogen.
Topics include geomorphology, estuarine physics and chemistry, primary
and secondary producers, ecosystem metabolism, element cycling, food
webs, fisheries, restoration, management, and impacts of climate. Field
trip required, transportation fee charged. CROSSLISTED as FW 434/
OC 434 and FW 534/OC 534.
Equivalent to: OC 434
Available via Ecampus

FW 435, WILDLIFE IN AGRICULTURAL
ECOSYSTEMS, 3 Credits
Examines the relationships between agricultural production and fish
and wildlife populations and communities. Explores the impacts
of agricultural practices on fish and wildlife. Field trips required,
transportation fee charged. OSU Ecampus students are not required to
attend field trips. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: BI 370 and FW 251
Available via Ecampus

FW 439, HUMAN DIMENSIONS OF
FISHERIES AND WILDLIFE MANAGEMENT,
3 Credits
Examines the human dimensions of fisheries and wildlife including
economics, policy, communications, and management. Focuses on the
application of social scientific theories and approaches to fisheries and
wildlife issues. Independent and group work with a substantial writing
component. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: FW 255, FW 289 and completion of human dimensions
coursework
Available via Ecampus
FW 445, ECOLOGICAL RESTORATION, 4 Credits
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FES 445/FW 445 and FES 545/FW 545.
Equivalent to: FES 445, FOR 445
Recommended: BI 370 or BI 370H

FW 451, AVIAN CONSERVATION AND MANAGEMENT, 3 Credits
Identification, classification, life history strategies, ecology and management of upland and migratory birds.
Recommended: FW 311
Available via Ecampus

FW 452, BIODIVERSITY CONSERVATION IN MANAGED FORESTS, 3 Credits
Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSLISTED as FES 452/FW 452.
Equivalent to: FES 452
Recommended: FW 315 with D- or better and FW 320 [D-]
Available via Ecampus

FW 454, ^FISHERY BIOLOGY, 4 Credits
Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fisheries management. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: FW 315 with D- or better and FW 320 [D-]
Available via Ecampus

FW 456, FRESHWATER ECOLOGY AND CONSERVATION, 5 Credits
Physical, chemical, biological, and environmental concepts in continental aquatic systems. Includes techniques related to assessing aquatic resources their management and conservation. Lec/lab.
Prerequisite: BI 370 with D- or better or BI 371 with D- or better
Recommended: 9 credits of upper-division biological sciences
Available via Ecampus

FW 458, MAMMAL CONSERVATION AND MANAGEMENT, 4 Credits
A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs.
Recommended: 9 credits of upper-division biological sciences.
Available via Ecampus

FW 462, ECOSYSTEM SERVICES, 3 Credits
Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts.
Recommended: BI 370
Available via Ecampus

FW 464, MARINE CONSERVATION BIOLOGY, 3 Credits
Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats.
Prerequisite: BI 370 with D- or better or BI 370H with D- or better
Equivalent to: BI 464

FW 465, MARINE FISHERIES, 4 Credits
A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered fall term in odd years.
Recommended: FW 315

FW 467, ANTARCTIC SCIENCE AND CONSERVATION, 4 Credits
Explores the history, geology, climate, and ecosystems of Antarctica, with an emphasis on current research and conservation issues. Focuses on critical thinking skills developed through independent research on a topic of interest, an internal peer review project, and discussions of relevant case studies in Antarctic research.
Available via Ecampus

FW 469, METHODS IN PHYSIOLOGY AND BEHAVIOR OF MARINE MEGAFUNA, 4 Credits
An in-depth study of marine megafauna (mammals, birds, turtles) with an emphasis on methods and analyses of behavior and physiology for conservation. Lab and field exercises include investigations into the behavior–physiology nexus of diving, migration, thermoregulation, energy expenditure, and mating systems. Research techniques to be explored will include, for example, tracking and remote biotelemetry monitoring technologies, respirometry, genetics, and direct field study observation. Theoretical approaches, field techniques and statistical analyses will help prepare students for a career in fisheries or wildlife science. Lec/lab. Taught at HMSc. 
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))
Recommended: FW 302, FW 320, FW 331 and FW 475
FW 470, *ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN, 3 Credits
Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: HSTS 470
Recommended: (HST 201 and HST 202 and HST 203) or BI 370

FW 471, ENVIRONMENTAL PHYSIOLOGY OF FISHES, 4 Credits
Principles of the functional biology of fishes with emphasis on environmental interactions and management implications.
Recommended: FW 315 and (BI 370 or BI 371)

FW 473, FISH ECOLOGY, 4 Credits
Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems. Lec/lab/rec.
Prerequisite: (BI 370 with D- or better or BI 370H with D- or better) and FW 315 [D-]
Available via Ecampus

FW 474, EARLY LIFE HISTORY OF FISHES, 4 Credits
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years.
Recommended: FW 315

FW 475, WILDLIFE BEHAVIOR, 4 Credits
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 476, FISH PHYSIOLOGY, 4 Credits
Physiological specializations and adaptations of major groups of fishes.
Prerequisite: FW 315 with D- or better
Available via Ecampus

FW 479, WETLANDS AND RIPARIAN ECOLOGY, 3 Credits
Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored.
Recommended: BI 370 or BI 371
Available via Ecampus

FW 481, WILDLIFE ECOLOGY, 3 Credits
Interrelationships of wildlife, environmental change. Predicting and measuring responses of wildlife to altered habitat conditions
Prerequisite: BI 370 with D- or better or BI 370H with D- or better or BI 371 with D- or better
Available via Ecampus

FW 488, PROBLEM SOLVING IN FISHERIES AND WILDLIFE SCIENCE, 3 Credits
A capstone course designed to introduce students to the synthesis of scientific information on species, habitats and ecosystems and the use of such data in shaping fisheries and wildlife conservation, management and policy. Includes a group problem-solving project and case studies. For FW majors in their senior year.
Prerequisite: FW 320 with D- or better and FW 321 (may be taken concurrently) [D-]
Recommended: 400-level FW course work (e.g., FW 426 or FW 454 or FW 481)
Available via Ecampus

FW 489, EFFECTIVE COMMUNICATIONS IN FISHERIES AND WILDLIFE SCIENCE, 3 Credits
Centers on the synthesis and interpretation of data and effective communication of that information in written and oral communication to diverse audiences including scientists, managers, administrators and the general public.
Available via Ecampus

FW 491, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: MB 491
Recommended: 9 credits of upper-division fisheries biology.

FW 493, FIELD METHODS FOR MARINE RESEARCH, 3 Credits
The primary focus is providing hands-on experience in a small class exploring various field sampling methodologies, research planning logistics, and field operations in estuary and nearshore environments. Topics covered include measurement and collection methods, animal handling techniques, equipment care and handling, sampling strategy, experimental design, data management planning and, if possible, small boat work.
Recommended: One year of biology

FW 496, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596.
Equivalent to: MB 496
Recommended: MB 303 or other upper-division laboratory course.
FW 497, AQUACULTURE, 3 Credits
Principles and practices for the aquaculture of fish, shellfish, and algae. (Writing Intensive Course.)
Attributes: CWIC – Core, Skills, WIC
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 498, AQUACULTURE LABORATORY, 3 Credits
Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center.
Recommended: 9 credits of upper-division biology.

FW 499, SPECIAL TOPICS IN FISHERIES AND WILDLIFE, 0-16 Credits
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: ENT 499
This course is repeatable for 16 credits.
Available via Ecampus

FW 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 502, TEACHING METHODS IN FISHERIES AND WILDLIFE, 1 Credit
This is a discussion course designed to help new GTAs and instructors who are learning the trials and tribulations of university-level teaching in our department. This is a great course for students who are interested in hearing more about teaching approaches, grading and assessment, student communication, problem students, and development of teaching Graded P/N.

FW 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
Available via Ecampus

FW 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 506, PROJECTS, 1-6 Credits
Projects are synthesis papers or outreach products that are developed with a mentor from campus, a natural resource agency, or the student’s place of employment. The purpose of your project is to contribute to the field of study with a product that reflects the principles and applications learned in your classes.
This course is repeatable for 12 credits.
Available via Ecampus

FW 507, SEMINAR, 1-16 Credits
Selected Topics. Taught at Hatfield Marine Science Center and Corvallis campus.
This course is repeatable for 16 credits.
Available via Ecampus

FW 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

FW 510, PROFESSIONAL INTERNSHIP, 1-16 Credits
This course is repeatable for 10 credits.
Available via Ecampus

FW 514, PROFESSIONAL DEVELOPMENT: MEETING COMMUNICATIONS, 1-3 Credits
Fisheries and wildlife professionals use meetings of scientists, managers and stakeholders to communicate key findings and develop consensus recommendations for policy. This experiential learning course exposes students to a scientific or management meeting in their chosen field (fisheries, wildlife, ecology, or conservation biology) and gets them to think about how meetings function as well as their content.
This course is repeatable for 3 credits.
Available via Ecampus

FW 515, FISHERIES AND WILDLIFE LAW AND POLICY, 3 Credits
Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources.
Recommended: PS 201 or other introductory political science course.
Available via Ecampus

FW 518, URBAN ECOLOGY, 3 Credits
Understand how an increasing human population increases pressure on fish and wildlife communities and resources within ecosystems. Examines the interactions between humans and animal species within urban areas and the effects of urbanization on species, communities, and ecosystems. Topics include conserving biodiversity, invasive species, human health and well-being, and urban planning.
Available via Ecampus

FW 519, THE NATURAL HISTORY OF WHALES AND WHALING, 3 Credits
Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management.
Recommended: Some background in vertebrate ecology and evolution or genetics
Available via Ecampus

FW 521, AQUATIC BIOLOGICAL INVASIONS, 4 Credits
An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center OR online through Ecampus.
Recommended: One year of university-level biology.
Available via Ecampus
FW 522, INTRODUCTION TO OCEAN LAW, 3 Credits
Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.
Available via Ecampus

FW 523, MONITORING WILDLIFE POPULATIONS AND THEIR HABITATS, 3 Credits
An overview of monitoring plan design and the conceptual background needed to understand and critique monitoring plans, and have the basic skills to develop and implement a monitoring program as part of an interdisciplinary team.
Recommended: Introductory course in statistics and introductory course in ecology.
Available via Ecampus

FW 524, INTRODUCTION TO FISHERIES ASSESSMENT, 3 Credits
Fisheries management strategies rely on models that predict a population's responses to exploitation. This course introduces approaches commonly used to assess and evaluate the dynamics and status of a population. Provides an overview of the terminology, data requirements, underlying rationale, assumptions, limitations and uncertainty associated with stock assessments.
Recommended: College algebra, introductory statistics and, if unfamiliar with data collection and analysis methods in fisheries, FW 454/554
Available via Ecampus

FW 526, COASTAL ECOLOGY AND RESOURCE MANAGEMENT, 5 Credits
Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab.

FW 527, PRINCIPLES OF WILDLIFE DISEASES, 4 Credits
Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations.
Available via Ecampus

FW 528, DIVERSITY AND IDENTIFICATION OF LARVAL FISHES, 3 Credits
Research on early life history stages of fishes has increased considerably in recent years, due to its importance in many research fields, such as fisheries science and oceanography, species conservation, systematics and morphology. Simultaneously, the ability to identify ichthyoplankton has decreased. This course is intended to provide students with an understanding of the evolutionary diversity of ichthyoplankton of the world.
Recommended: A completed 300-level systematics of fishes, ichthyology or comparative anatomy course.
Available via Ecampus

FW 529, ICHTHYOPLANKTON IDENTIFICATION LABORATORY, 2 Credits
Larval fishes are important in many research fields, and are part of many natural history collections. However, often museums are unable to provide the curatorial needs due to the lack of trained personnel. The lab will provide students with the necessary practical skills to identify larval fishes. Distinctive from the course 528, where students learn about the diversity and evolution of larval fish characters, the laboratory is designed to the identification of larvae from a real collection. Students are encouraged to bring unidentified ichthyoplankton samples or mixed species lots to the course to help with their identification.

FW 533, POPULATION DYNAMICS FOR CONSERVATION, 4 Credits
A synthesis of the principles of population dynamics from the viewpoint of a resource manager. Particular attention is paid to populations structured by age, size, or over space, and considering both fisheries and wildlife management. Laboratory work uses computer programming in the R language to implement examples from lecture.
Prerequisite: IB 592 with C or better
Recommended: (MTH 227 and MTH 228) or (MTH 251 and MTH 252)

FW 534, ESTUARINE ECOLOGY, 4 Credits
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as FW 434/OC 434 and FW 534/OC 534.
Equivalent to: OC 534
Available via Ecampus

FW 535, WILDLIFE IN AGRICULTURAL ECOSYSTEMS, 3 Credits
Examines the relationships between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required; transportation fee charged. OSU Ecampus students are not required to attend field trips.
Recommended: BI 370 and FW 251
Available via Ecampus
**FW 537, STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT, 2 Credits**

Structured decision making (SDM) is used for making natural resource management and policy decisions. It is an ideal framework for interdisciplinary teams to cooperate and identify the most effective management strategies. Graduate students from diverse backgrounds (natural resources, political science, others) are provided with an understanding of the SDM process.

**Recommended:** One year of college-level mathematics and one quarter of fish and wildlife management

Available via Ecampus

**FW 538, STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT LAB, 2 Credits**

Students who are taking or have taken FW 537 are provided with the understanding of and ability to employ the techniques needed to build models that are used during the structured decision-making process. The laboratory emphasizes the use of graphical models and basic statistical techniques for building decision-making models. Lec/lab.

**Prerequisite:** FW 537 (may be taken concurrently) with D- or better

**FW 540, VERTEBRATE POPULATION DYNAMICS, 4 Credits**

Concepts in population ecology and quantitative approaches to managing wildlife populations; methods of parameter estimation, model structure, assumptions, and analysis, applications to common management issues.

**Recommended:** Upper-division population ecology and basic statistics courses

**FW 544, QUANTITATIVE DECISION ANALYSIS FOR FISH AND WILDLIFE MANAGEMENT, 4 Credits**

Decision analysis allows decision makers to examine the expected effects of different strategies before implementation; incorporate multiple objectives and values of stakeholders; determine the relative influence of various sources of uncertainty; and estimate the value of collecting additional data. Quantitatively oriented graduate students in natural resources are provided with an in-depth overview of decision analysis and adaptive management, emphasizing animal population management. Lec/lab.

**Recommended:** ST 511 and ST 512 or equivalent, basic background in animal population dynamics and management.

**FW 545, ECOLOGICAL RESTORATION, 4 Credits**

Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSTLISTED as FES 445/FW 445 and FES 545/FW 545.

**Equivalent to:** FES 545, FOR 545

**Recommended:** BI 370 or BI 370H

**FW 549, HISTORY OF FISHERIES SCIENCE, 3 Credits**

Surveys the development of fisheries science, professionalization of the discipline, patronage, and the political, economic, and social context in which fisheries science operates.

Available via Ecampus

**FW 550, TROPHIC CASCADES, 2-3 Credits**

Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. CROSSTLISTED as FES 550/FW 550.

**Equivalent to:** FES 550, FOR 547, FW 547

This course is repeatable for 3 credits.

**FW 551, AVIAN CONSERVATION AND MANAGEMENT, 3 Credits**

Identification, classification, life history strategies, ecology and management of upland and migratory birds.

**Recommended:** FW 311 or equivalent course work.

Available via Ecampus

**FW 552, FOREST WILDLIFE HABITAT MANAGEMENT, 4 Credits**

Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. CROSSTLISTED as FES 552/FW 552.

**Equivalent to:** FES 552

**Recommended:** FOR 341 or equivalent course in ecology.

Available via Ecampus

**FW 554, FISHERY BIOLOGY, 4 Credits**

Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management.

**Recommended:** FW 315 and FW 320

Available via Ecampus

**FW 556, FRESHWATER ECOLOGY AND CONSERVATION, 5 Credits**

Physical, chemical, biological, and environmental concepts in continental aquatic systems. Includes techniques related to assessing aquatic resources their management and conservation. Lec/lab.

**Recommended:** BI 370 or BI 371 or 9 credits of upper-division biological sciences

Available via Ecampus

**FW 558, MAMMAL CONSERVATION AND MANAGEMENT, 4 Credits**

A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs.

**Recommended:** 9 credits of upper-division biological sciences.

Available via Ecampus
FW 560, PSYCHOLOGY OF ENVIRONMENTAL DECISIONS, 3 Credits

Natural resource management and conservation programs have one thing in common: to be effective, they must consider how and why humans make decisions. This course approaches this topic from a psychological lens and will cover the psychological processes associated with making individual and group decisions, common biases and heuristics in our decision-making, and how these apply to diverse natural resource management and conservation issues. Students will learn how to take these aspects of human decision making into consideration when participating in or facilitating collaborative environmental programs.

Available via Ecampus

FW 562, ECOSYSTEM SERVICES, 3 Credits

Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts.

Recommended: BI 370 or equivalent course work.
Available via Ecampus

FW 563, CONSERVATION BIOLOGY OF WILDLIFE, 3 Credits

Overview of the field of conservation biology with emphasis on the relationship to conservation and management of wildlife.
Available via Ecampus

FW 564, MARINE CONSERVATION BIOLOGY, 3 Credits

Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats.
Equivalent to: BI 564
Recommended: BI 370 or BI 370H

FW 565, MARINE FISHERIES, 4 Credits

A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered fall term in odd years.
Recommended: FW 315

FW 567, ANTARCTIC SCIENCE AND CONSERVATION, 4 Credits

Explores the history, geology, climate, and ecosystems of Antarctica, with an emphasis on current research and conservation issues. Focuses on critical thinking skills developed through independent research on a topic of interest, an internal peer review project, and discussions of relevant case studies in Antarctic research.
Available via Ecampus

FW 569, BEHAVIOR AND PHYSIOLOGY OF MARINE MEGAFAUNA, 4 Credits

An in-depth study of marine megafauna (mammals, birds, turtles) with an emphasis on methods and analyses of behavior and physiology for conservation. Lab and field exercises include investigations into the behavior–physiology nexus of diving, migration, thermoregulation, energy expenditure, and mating systems. Research techniques to be explored will include, for example, tracking and remote biotelemetry monitoring technologies, respirometry, genetics, and direct field study observation. Theoretical approaches, field techniques and statistical analyses will help prepare students for a career in fisheries or wildlife science. Lec/lab. Taught at HMSC.
Recommended: FW 302, FW 320, FW 331, and FW 475

FW 570, ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN, 3 Credits

Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities.
Equivalent to: HSTS 570
Recommended: (HST 201 and HST 202 and HST 203) or BI 370

FW 571, ENVIRONMENTAL PHYSIOLOGY OF FISHES, 4 Credits

Principles of the functional biology of fishes with emphasis on environmental interactions and management implications.
Recommended: FW 315 and (BI 370 or BI 371)

FW 573, FISH ECOLOGY AND CONSERVATION, 4 Credits

Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems.
Recommended: BI 370 and FW 315
Available via Ecampus

FW 574, EARLY LIFE HISTORY OF FISHES, 4 Credits

Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years. CROSSLISTED as FW 574/OC 574.
Equivalent to: OC 574
Recommended: FW 315

FW 575, WILDLIFE BEHAVIOR, 4 Credits

Equivalent to: FW 585
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 576, FISH PHYSIOLOGY, 4 Credits

Physiological specializations and adaptations of major groups of fishes.
Recommended: FW 315
Available via Ecampus
FW 579, WETLANDS AND RIPARIAN ECOLOGY, 3 Credits
Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored.
Recommended: BI 370 or BI 371
Available via Ecampus

FW 580, STREAM ECOLOGY, 3 Credits
Structure and function of stream ecosystems, with emphasis on biological processes; physical and chemical relations; riparian influences and landscape perspectives.
Recommended: 9 credits of upper-division science.
Available via Ecampus

FW 581, WILDLIFE ECOLOGY, 3 Credits
Interrelationships of wildlife, environment and humans. Evaluation of properties and habitats of wildlife populations.
Recommended: (BI 370 or BI 371) and FW 311 and FW 320 and ST 351
Available via Ecampus

FW 583, SPECIES RECOVERY PLANNING AND RESTORATION, 3 Credits
The importance of communication in science is stressed and a broad knowledge of endangered species-related information is provided. Students develop the ability to critically evaluate published information in scientific literature and to present and summarize it as part of the collaborative species recovery planning process with a varied audience of stakeholders.
Recommended: FW 563 and FW 573
Available via Ecampus

FW 591, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: MB 591
Recommended: 9 credits of upper-division fisheries biology.

FW 596, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596.
Equivalent to: MB 596
Recommended: MB 303 or other upper-division laboratory course.

FW 597, AQUACULTURE, 3 Credits
Principles and practices for the aquaculture of fish, shellfish, and algae.
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 598, AQUACULTURE LABORATORY, 3 Credits
Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center.
Recommended: 9 credits of upper-division biology.

FW 599, SPECIAL TOPICS IN FISHERIES AND WILDLIFE, 0-16 Credits
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: ENT 499
This course is repeatable for 99 credits.

FW 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

FW 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FW 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FW 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FW 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

FW 620, ECOLOGICAL POLICY, 3 Credits
Policy issues associated with ecosystem management, risk assessment, biological diversity, ecosystem health, sustainability, invasive species, bioregionalism, globalization and transnational factors, and rights, ethics, and morals.
Recommended: Background in natural resources, environmental sciences, ecological sciences, ecological economics, political science, or similar discipline.
Available via Ecampus

FW 661, ANALYSIS OF ANIMAL POPULATIONS, 5 Credits
Quantitative methods for estimating parameters (abundance, survival, population stability) of animal populations. Emphasis is on vertebrate animals and statistical methods of hypothesis testing, parameter estimation, and inference testing. Offered odd-numbered years.
Recommended: ST 511 and ST 512 or equivalent

FW 699, SPECIAL TOPICS IN FISHERIES AND WILDLIFE, 1-4 Credits
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
This course is repeatable for 8 credits.
FW 808, WORKSHOP, 1-16 Credits

Horticulture (HORT)

HORT 112, INTRODUCTION TO HORTICULTURAL SYSTEMS, PRACTICES AND CAREERS, 2 Credits

Overview of horticultural systems and practices, with an emphasis on the Pacific Northwest. Exploration of career opportunities in horticulture. Includes viticulture, environmental landscaping, turf management, greenhouse and nursery production, farming, education, and research. Required field trips.

Available via Ecampus

HORT 199, SPECIAL TOPICS, 1-16 Credits

Equivalent to: HORT 199H

This course is repeatable for 16 credits.

HORT 199H, SPECIAL TOPICS, 1-16 Credits

Attributes: HNRS – Honors Course Designator

Equivalent to: HORT 199

This course is repeatable for 16 credits.

HORT 212, INTRODUCTION TO ORGANIC AGRICULTURAL SYSTEMS, 4 Credits

An introduction to organic agricultural systems with a focus on history, regulations, principles and practices, performance, trends, and careers.

Available via Ecampus

HORT 217, *SOCIAL IMPACTS OF SCIENCE, 3 Credits

Contemporary societies provide funding for scientific research, at the same time they struggle with existing and emerging societal problems. This course will discuss how social problems can be addressed by science and technology, and how the impacts of research are quantified. (Bacc Core Course)

Attributes: CPSI – Core, Pers, Soc Proc & Inst

Available via Ecampus

HORT 226, LANDSCAPE PLANT MATERIALS I: DECIDUOUS HARDWOODS AND CONIFERS, 4 Credits

Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on deciduous hardwoods and conifers.

Available via Ecampus

HORT 228, LANDSCAPE PLANT MATERIALS II: SPRING FLOWERING TREES AND SHRUBS, 4 Credits

Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on spring flowering trees and shrubs. Lec/rec.

Available via Ecampus

HORT 251, TEMPERATE TREE FRUIT, BERRIES, GRAPES, AND NUTS, 2 Credits

Covers fruit and nut crops for temperate zones. Emphasis placed on scientific and common names, plant adaptation, basic morphology, major cultivars, and markets. Offered alternate years.

HORT 255, HERBACEOUS ORNAMENTAL PLANT MATERIALS, 3 Credits

Identification and culture of herbaceous plants used in the landscape. Offered via Ecampus only.

Available via Ecampus

HORT 260, ORGANIC FARMING AND GARDENING, 3 Credits

Organic farming and gardening methods are discussed in class and practiced in the field. The philosophical background of organic farming as well as the biological, environmental and social factors involved in organic food production are covered. Emphasis is on hands-on application of scientific principles to create sustainable food production systems. Lec/lab.

Available via Ecampus

HORT 270, INTRODUCTION TO THERAPEUTIC HORTICULTURE, 2 Credits

An introduction to the history, benefits, and methods of therapeutic horticulture. Surveys program models for vocational, social/recreational, wellness and therapeutic applications of horticulture.

HORT 271, TECHNIQUES AND ADAPTIVE STRATEGIES IN THERAPEUTIC HORTICULTURE, 2 Credits

An introduction to the characteristics of therapeutic gardens. Survey of year-round, indoor and outdoor therapeutic horticultural programming adaptations, strategies and techniques for different special populations.

Prerequisite: HORT 270 with D- or better

HORT 272, BASIC THERAPEUTIC SKILLS I, 2 Credits

The assessment and evaluation process in therapeutic horticulture. Development of communication strategies, helping skills, and horticultural skills for therapeutic situations.

Prerequisite: HORT 271 with D- or better

HORT 273, BASIC THERAPEUTIC SKILLS II, 2 Credits

Assessment and documentation tools in therapeutic horticulture. Treatment issues related to different types of physical and mental issues. Conduct and evaluate therapeutic horticultural activity sessions.

Prerequisite: HORT 272 with D- or better

HORT 274, THERAPEUTIC HORTICULTURAL PROGRAMS FOR OLDER ADULTS/CHILDREN, 2 Credits

Benefits and applications of therapeutic horticulture to older adults and special needs children.

Prerequisite: HORT 273 with D- or better
HORT 275, THERAPEUTIC GARDEN DESIGN, MAINTENANCE AND PROGRAMMING, 2 Credits
The history, characteristics and design of the therapeutic garden. The use of the garden in therapeutic horticultural programming.
Prerequisite: HORT 274 with D- or better and HORT 280 [D-]

HORT 283, INTRODUCTION TO URBAN AGRICULTURE, 3 Credits
Focuses on the adaption of agricultural principles to the urban environment, specifically the production of plant crops. Topics include: (I) urban environments and infrastructure, (II) urban crop production practices, (III) urban markets and farm management. Exposes students to the breadth of items that they should consider in order to be a successful urban grower.
Recommended: General background or previous coursework in agriculture
Available via Ecampus

HORT 285, PERMACULTURE DESIGN AND THEORY: CERTIFICATE COURSE, 4 Credits
Permaculture design course meets internationally recognized standards for certification. Lectures, hands-on activities, experiential learning, group discussions, readings, student projects and presentations. Two mandatory weekend days. Design intensive, utilizing graphic and verbal presentation skills. Research into other functioning permaculture systems through literature, websites, and as observed on field trips. Lec/lab.
This course is repeatable for 8 credits.
Available via Ecampus

HORT 299, SPECIAL TOPICS, 0-16 Credits
Equivalent to: HORT 299H
This course is repeatable for 16 credits.

HORT 299H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 299
This course is repeatable for 16 credits.

HORT 300, CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS, 4 Credits
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as CROP 300/HORT 300.
Equivalent to: CROP 300, CSS 300
Recommended: One year of general biology
Available via Ecampus

HORT 301, GROWTH AND DEVELOPMENT OF HORTICULTURAL CROPS, 3 Credits
Gain fundamental knowledge of plant growth and development of horticultural crops from a micro- to macro-level starting at double fertilization through fruit growth–covering seed-to-seed. The last section specifically examines how environmental factors affect growth and development. Lec/lab.
Recommended: General biology or botany sequence.
Available via Ecampus

HORT 303, HORTICULTURAL PROJECTS, 2 Credits
Student-managed crop production projects with emphasis on container grown, greenhouse crops. Crop scheduling, propagation and planting, selecting temperature and lighting regimes, specifying growth regulator applications, nutrient management, irrigation management, pest monitoring, and problem diagnosis and correction.
Recommended: HORT 301

HORT 306, INPUTS IN ORGANIC CROPPING SYSTEMS: SOURCING AND EFFICACY, 2 Credits
Applied course focused on the regulation, sourcing, and efficacy of organic inputs including soil amendments, fertilizers, and pesticides. Gain experience using science-, practice-, and regulation-based information to source and determine effectiveness of inputs in certified organic cropping systems.
Prerequisite: HORT 212 with C- or better and CROP 355 [C-]

HORT 307, ORGANIC SYSTEM PREDICAMENTS, 3 Credits
Analyze controversial organic agriculture and systems issues while developing critical- and systems-thinking skills. Synthesis of information from diverse sources and application of scientific knowledge will be required to recommend possible solutions to real world organic agriculture predicaments.
Available via Ecampus

HORT 308, WEED MANAGEMENT IN ORGANIC CROPPING SYSTEMS, 3 Credits
Applied organic weed identification and management course. Learn real-world application of science-, practice-, and regulation-based weed management information while designing and evaluating organic weed management plans for certified organic farming systems.
Available via Ecampus

HORT 310, PRINCIPLES OF PLANT PROPAGATION, 3 Credits
Plant propagation is the regeneration of plants using vegetative plant parts or seeds to maintain the desired genetic makeup. Theory and principles of horticultural and physiological concepts applicable for laboratory, greenhouse, nursery, field, and orchard propagators.
Prerequisite: HORT 301 with D- or better
Available via Ecampus
HORT 311, PLANT PROPAGATION, 4 Credits
The regeneration of plants from vegetative and reproductive tissue and organs. Horticultural and physiological principles, methods, and techniques for laboratory, greenhouse nursery, field, and orchard.
Prerequisite: HORT 301 with D- or better
Available via Ecampus

HORT 314, PRINCIPLES OF TURFGRASS MAINTENANCE, 4 Credits
Identification and adaptation of common turfgrasses. Physiology of turfgrass growth and response to cultural and environmental stresses. Cultural practices including establishment, general maintenance, and pest control. Field trips required.
Recommended: (CSS 205 or CSS 305 or SOIL 205)
Available via Ecampus

HORT 315, SUSTAINABLE LANDSCAPES: MAINTENANCE, CONSERVATION, RESTORE, 4 Credits
Sustainable care and maintenance practices for non-turf landscape areas. Low input pruning, planting, fertilization, and pest control with an emphasis on IPM. Plant responses to stress, particularly those encountered in the urban environment. Outdoor labs required.
Recommended: Basic knowledge of plant physiology
Available via Ecampus

HORT 316, PLANT NUTRITION, 4 Credits
Basic concepts and principles of plant mineral nutrition that provide a basis for solving practical nutritional problems in horticultural crops. Areas covered include mineral nutrients, nutrient availability in the soil and plant uptake, nutrient deficiencies and toxicities and their causes and remedies, and plant and soil analysis. Lec/lab/rec.
Prerequisite: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better
Available via Ecampus

HORT 318, APPLIED ECOLOGY OF MANAGED ECOSYSTEMS, 3 Credits
Survey of ecological processes in managed ecosystems emphasizing ecological management techniques. Ecosystem services; biodiversity management; weed dynamics; agroecology; urban ecology; restoration and mitigation; landscape management. Field trip required. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Available via Ecampus

HORT 319, RESTORATION HORTICULTURE, 3 Credits
As world population increases to some 9 billion plus by 2044, the importance of ecologically sound horticultural practices becomes increasingly apparent. Integration of ecological concepts and theory in management and development of created landscapes is critical for the preservation of many ecological services currently provided by undeveloped areas. Offered via Ecampus only.
Recommended: WR 121 with proficiency in writing skills and ability to communicate through writing. Basic ecology course or practical experience providing understanding of ecological principals and concepts
Available via Ecampus

HORT 330, PLAGUES, PESTS, AND POLITICS, 3 Credits
Integration and interaction of agricultural and public health aspects of entomology in society and history. CROSSTRAINED as ENT 300/HORT 330. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: BI 300, ENT 300
Available via Ecampus

HORT 331, POLLINATORS IN PERIL, 3 Credits
Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world.
Equivalent to: ENT 331
Recommended: Completion of a Baccalaureate Core biological science course.
Available via Ecampus

HORT 344, INSECT AND DISEASE MANAGEMENT IN ORGANIC CROPPING SYSTEMS, 3 Credits
A skills-based course on the science, practice, and regulations related to insect and disease management in organic cropping systems.
Prerequisite: BOT 350 with C- or better and ENT 311 [C-]
This course is repeatable for 3 credits.
Available via Ecampus

HORT 349, DIAGNOSING PLANT PROBLEMS, 3 Credits
Basic principles of problem diagnosis in crop, garden, and landscape plants are covered. Problems caused by cultural and environmental issues, plant diseases, insect pests, and other causes are addressed. Students will gain familiarity with resources for plant problem diagnosis. Offered via Ecampus only.
Recommended: Background in basic biology, plant pathology and/or entomology from a university or practical setting
HORT 350, URBAN FORESTRY, 3 Credits
Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. CROSSLISTED as FES 350/HORT 350.
Equivalent to: FES 350, FOR 350
Recommended: Foundational forestry and horticulture courses
Available via Ecampus

HORT 351, FLORICULTURE AND GREENHOUSE SYSTEMS, 4 Credits
For students interested in growing plants in commercial or educational greenhouses. Actively explores the production and scheduling of floriculture crops for various markets. Combines the practical aspects of growing floral crops under environments created by traditional and technologically advanced greenhouses. Greenhouse structures and crop environment manipulation will be emphasized. Students actively manage a floriculture crop and are responsible for developing and implementing production schedules, and for making key decisions on the culture of diverse floral crops.
Recommended: HORT 301

HORT 358, LANDSCAPE CONSTRUCTION TECHNIQUES, 4 Credits
Study of landscape construction process from initial site analysis to finished landscape. Techniques used in building hardscape and landscape areas. Field trips required. Lec/lab.

HORT 360, IRRIGATION AND DRAINAGE, 4 Credits
Familiarizes students with the principles and practices of irrigation and drainage systems. Optimum use of water, irrigation and drainage system design, installation, repairs, and troubleshooting are emphasized. Lec/lab.
Prerequisite: CSS 305 with D- or better or SOIL 205 with D- or better or (SOIL 205 with D- or better

HORT 361, PLANT NURSERY SYSTEMS, 4 Credits
Covers how to grow shrubs and trees, and herbaceous annuals and perennials in nurseries for use in urban landscapes and managed ecosystems such as forestry and restoration. Plant nursery systems are diverse and require intensive management involving a dynamic decision making process. This course actively explores field and container production systems as well as the marketing of plants, an overview of plant growth regulation and post-production handling, the influence of efficient production practices on plant quality, integrating pest management strategies, and natural resource utilization.
Recommended: HORT 301

HORT 380, SUSTAINABLE LANDSCAPE DESIGN, 3 Credits
The assessment of design problems/situations, the development of solutions and the communication of those solutions to the client through the design. Specific topics include designing for ecosystem maintenance/enhancement, introduction to computer-aided design (CAD), using color in landscape designs and rendering section/elevation views.

HORT 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HORT 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

HORT 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

HORT 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

HORT 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: HORT 405H
This course is repeatable for 16 credits.

HORT 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 405
This course is repeatable for 16 credits.

HORT 406, PROJECTS: DATA PRESENTATIONS, 1 Credit
For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students’ posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. CROSSLISTED as BRR 406/HORT 406.
Equivalent to: BRR 406

HORT 407, SEMINAR, 1 Credit
Equivalent to: CROP 407, SOIL 407
Available via Ecampus

HORT 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HORT 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

HORT 410, INTERNSHIP, 1-12 Credits
Work internship to acquaint horticulture majors with the practices of the horticulture industry. Under direction of departmental internship committee. Requires approved statement of intent, submission of employer and employee evaluation forms and written report. This course is repeatable for 12 credits.
Available via Ecampus
HORT 411, HORTICULTURE BOOK CLUB, 1 Credit
Reading and discussion of noteworthy books and associated topics relating to agriculture, society and the environment. 
This course is repeatable for 2 credits.

HORT 412, CAREER EXPLORATION: INTERNSHIPS AND RESEARCH PROJECTS, 1 Credit
Provides orientation to the horticulture major internship and research project requirement. Covers procedures for selecting, performing, and reporting on an internship or research project. Includes guidance and skill development valuable in the pursuit of horticultural career goals, such as cover letter and resume preparation and interviewing experience. 
Available via Ecampus

HORT 414, PRECISION AGRICULTURE, 4 Credits
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab. CROSSLISTED as CROP 414/HORT 414. 
Equivalent to: CROP 414
Available via Ecampus

HORT 418, GOLF COURSE MAINTENANCE, 4 Credits
Basic aspects of golf course maintenance under temperate zone conditions. Lec/lab. 
Recommended: HORT 314

HORT 421, HERBS, SPICES, AND MEDICINAL PLANTS, 3 Credits
Principles of crop ecology, morphology, chemistry and utilization of natural products of herbs, spices, and medicinal plants (HSMP). Examines the history and importance of HSMP; their historic and modern uses, current market trends, botany, collection in the wild, fundamentals of production systems for HSMP, harvesting, drying, and other postharvest operations, natural products and their uses, regulations and legal concerns of herbal products. 
Recommended: CROP 200 or equivalent horticulture course
Available via Ecampus

HORT 433, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as CROP 433/HORT 433 and CROP 533/HORT 533. 
Prerequisite: BI 102 with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 223 with D- or better or BI 223H with D- or better or BI 311 with D- or better or BI 311H with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or CSS 430 with D- or better or CSS 430 with D- or better or PBG 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better
Equivalent to: CROP 433

HORT 444, INSECT AGROECOLOGY, 3 Credits
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 444/HORT 444 and ENT 544/HORT 544. 
Equivalent to: ENT 444
Recommended: General background or previous course work in entomology.

HORT 447, ARBORICULTURE, 4 Credits
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSLISTED as FES 447/HORT 447 and FES 547/HORT 547. 
Equivalent to: FES 447, FOR 447
Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)
Available via Ecampus

HORT 451, TREE FRUIT PHYSIOLOGY AND CULTURE, 4 Credits
Plant growth and development in relation to tree fruit production; emphasis on canopy development and pruning theory, flowering and fruit set, and development, dormancy, and cold acclimation. Field trips required. 
Recommended: Completion or concurrent enrollment in HORT 301 and BOT 331

HORT 452, BERRY AND GRAPE PHYSIOLOGY AND CULTURE, 4 Credits
Production of wine grapes, caneberries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years. 
Recommended: HORT 301
HORT 453, GRAPEVINE GROWTH AND PHYSIOLOGY, 3 Credits
The physiological aspects of grapevine growth and development including dormancy, flowering and fruit set, vegetative growth, fruit development and water relations. Additional topics include taxonomy, morphology and physiological influences of vineyard mesoclimate and vine microclimate. Lec/lab.
Prerequisite: HORT 301 with C- or better
Recommended: HORT 301

HORT 454, PRINCIPLES AND PRACTICES OF VINEYARD PRODUCTION, 3 Credits
The relationship of vineyard and canopy management to grapevine physiology and fruit quality. Nutrient/water relations within the soil/vine continuum. Vineyard microclimate, floor management, and pests will also be discussed. Lec/lab.
Prerequisite: HORT 301 with D- or better
Recommended: Completion or concurrent enrollment in HORT 453

HORT 455, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSTLISTED as FES 455/HORT 455 and FES 555/HORT 555.
Prerequisite: FES 350 with C- or better or HORT 350 with C- or better
Equivalent to: FES 455, FOR 455
Available via Ecampus

HORT 456, PHYSIOLOGY AND PRODUCTION OF BERRY CROPS, 4 Credits
Physiology and production systems of blueberries, red and black raspberries, blackberries, and other berry crops. Emphasis on plant growth and development; flower and fruit development; cultivars; pruning and training systems; irrigation; harvesting; nutrient management; and conventional and organic production systems.
Prerequisite: HORT 301 with D- or better
Available via Ecampus

HORT 463, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROSSTLISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: CROP 463, HORT 363

HORT 480, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSTLISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: CROP 480
Recommended: CROP 300 or HORT 300
Available via Ecampus

HORT 481, HORTICULTURE PRODUCTION CASE STUDIES, 4 Credits
Field-based case studies investigate production issues encountered in horticultural crops; individual and group activities; discussion of processes for troubleshooting, decision-making and management recommendations; assessment of economic, practical and logistical feasibility. Prior knowledge of plant physiology, soils, entomology, and plant nutrition are required. Multiple field trips required. A field trip fee will be charged.
Prerequisite: HORT 301 with D- or better

HORT 482, DESIGN AND MANAGEMENT OF ORGANIC CROPPING SYSTEMS, 3 Credits
This capstone course is the final stage of the Organic Farming Systems Certificate Program. Iteratively design and evaluate organic farming system management plans. Apply real-world science-, practice-, and regulation-based information to the design and management of organic farming systems.
Prerequisite: HORT 212 with C- or better and CROP 355 [C-] and HORT 306 (may be taken concurrently) [C-] and HORT 307 (may be taken concurrently) [C-] and HORT 344 (may be taken concurrently) [C-] and SOIL 360 (may be taken concurrently) [C-]

HORT 483, CASE STUDIES IN URBAN AGRICULTURE, 3 Credits
Provides an overview of the diversity of endeavors that are available to potential urban agriculturists. These include urban and peri-urban farms (for profit and non-profit), community and school gardens, controlled climate facilities, rooftop farms and gardens, and more. For each case study, we will specifically examine: (1) the market where the farmer sells goods, (2) methods of achieving growth, particularly while avoiding debt, (3) increasing livelihood reliance upon on-farm income.
Recommended: General background or previous coursework in agriculture
Available via Ecampus
HORT 485, ADVANCED PERMACULTURE DESIGN TOOLS FOR CLIMATE RESILIENCE, 3 Credits
Understand how permaculture as a design system can create sustainable human habitation that is beneficial to the natural world. Use tools specific to permaculture designers to assess, analyze, and project future climate scenarios and respond to them with appropriate design. Climate analogue identification and climate change forecasting provide the basis for a student assessment project that addresses current and future climatic conditions. Assessment and mapping assignments utilize Google Earth Pro, Google Docs, and Google Sheets.
Prerequisite: HORT 285 with B or better
Available via Ecampus

HORT 495, HORTICULTURAL MANAGEMENT PLANS, 3 Credits
Develop an integrated management plan for a horticultural enterprise. This course is repeatable for 6 credits.

HORT 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: HORT 499H
This course is repeatable for 16 credits.

HORT 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 499
This course is repeatable for 16 credits.

HORT 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

HORT 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

HORT 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

HORT 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

HORT 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

HORT 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HORT 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

HORT 510, INTERNSHIP, 1-12 Credits
Offered via Ecampus only.
This course is repeatable for 12 credits.

HORT 511, RESEARCH AND EDUCATIONAL PERSPECTIVES IN HORTICULTURE, 2 Credits
Introduces beginning graduate students to the faculty in horticulture and provides an in-depth discussion of their research and education programs.

HORT 518, CURRENT TOPICS IN ENTOMOLOGY, 2 Credits
A core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as ENT 518/HORT 518.
Equivalent to: ENT 518
This course is repeatable for 12 credits.

HORT 519, CURRENT TOPICS IN PLANT BREEDING AND GENETICS, 2 Credits
Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as HORT 519/PBG 519.
Equivalent to: PBG 519
This course is repeatable for 12 credits.

HORT 520, CURRENT TOPICS IN HORTICULTURAL RESEARCH, 2 Credits
This is a core course in the horticulture graduate program. Students gain an advanced understanding of horticulture science and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to their peers. Instructors, topics and specific learning objectives vary from term to term.
This course is repeatable for 12 credits.

HORT 521, HERBS, SPICES, AND MEDICINAL PLANTS, 3 Credits
Principles of crop ecology, morphology, chemistry and utilization of natural products of herbs, spices, and medicinal plants (HSMP). Examines the history and importance of HSMP, their historic and modern uses, current market trends, botany, collection in the wild, fundamentals of production systems for HSMP, harvesting, drying, and other postharvest operations, natural products and their uses, regulations and legal concerns of herbal products.
Recommended: CROP 200 or equivalent course in HORT.
Available via Ecampus
HORT 533, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as CROP 433/HORT 433 and CROP 533/HORT 533.
Equivalent to: CROP 533
Recommended: BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or HORT 450 or CSS 450

HORT 540, ORGANIC VEGETABLE PRODUCTION SYSTEMS: DESIGN AND MANAGEMENT, 3 Credits
Design, management, and troubleshooting in organic vegetable production systems. Students learn to integrate knowledge from various technical disciplines and explore the social, economic, and environmental dimensions of vegetable production to analyze and evaluate organic vegetable farm enterprises.
Recommended: CROP/SOIL 530 and ENT 548
Available via Ecampus

HORT 544, INSECT AGROECOLOGY, 3 Credits
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 444/HORT 444 and ENT 544/HORT 544.
Equivalent to: ENT 544
Recommended: General background or previous course work in entomology.

HORT 547, ARBORICULTURE, 4 Credits
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSLISTED as FES 447/HORT 447 and FES 547/HORT 547.
Equivalent to: FES 547
Available via Ecampus

HORT 552, BERRY AND GRAPE PHYSIOLOGY AND CULTURE, 4 Credits
Production of wine grapes, caneberries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years.
Recommended: HORT 301

HORT 555, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 455/HORT 455 and FES 555/HORT 555.
Equivalent to: FES 555, FOR 555
Recommended: FOR 350 or FES 350 or HORT 350
Available via Ecampus

HORT 556, PHYSIOLOGY AND PRODUCTION OF BERRY CROPS, 4 Credits
Physiology and production systems of blueberries, red and black raspberries, blackberries, and other berry crops. Emphasis on plant growth and development; flower and fruit development; cultivars; pruning and training systems; irrigation; harvesting; nutrient management; and conventional and organic production systems.
Available via Ecampus

HORT 563, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROSSLISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: CROP 563, HORT 363

HORT 580, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: CROP 580
Recommended: CROP 300 or HORT 300
Available via Ecampus

HORT 581, HORTICULTURE PRODUCTION CASE STUDIES, 4 Credits
Field-based case studies investigate production issues encountered in horticultural crops; individual and group activities; discussion of processes for troubleshooting, decision-making and management recommendations; assessment of economic, practical and logistical feasibility. Prior knowledge of plant physiology, soils, entomology, and plant nutrition are required. Multiple field trips required. A field trip fee will be charged.
Recommended: HORT 301

HORT 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

HORT 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
HORT 603, DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

HORT 605, READING & CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

HORT 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

HORT 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

HORT 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HORT 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Leadership (LEAD)

LEAD 242, PERSONAL LEADERSHIP DEVELOPMENT, 3 Credits
Examines content related to leadership traits, styles, and effective leadership tactics. An introductory course designed to create awareness and develop the employability skills necessary for participants to be productive contributors in their school, home, community and profession.
Equivalent to: AG 242
Available via Ecampus

LEAD 342, TEAM AND ORGANIZATIONAL LEADERSHIP, 3 Credits
Examines the planning, implementation and evaluation of organizations, and challenges students in the development of effective communication, group dynamics, conflict management, teambuilding and problem solving. Students will explore the development of successful teams, multiple roles within teams, improving group performance, group decision making, how to manage conflict in teams, enhancing diversity in teams, creating a culture of creativity and innovation, and the evaluation of teams.
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: AG 342
Available via Ecampus

LEAD 401, LEADERSHIP RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

LEAD 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 410, LEADERSHIP INTERNSHIP, 1-16 Credits
Students apply what they have learned through both the leadership theory and trait/skill development portion of the Leadership minor. This course is repeatable for 16 credits.
Available via Ecampus

LEAD 442, LEADERSHIP SKILLS FOR CAREER SUCCESS, 3 Credits
Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence.
Equivalent to: AG 442
Available via Ecampus

LEAD 443, LEADERSHIP THROUGH CONVERSATIONS, 3 Credits
Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.
Equivalent to: AG 442
Available via Ecampus

LEAD 444, LEADERSHIP MINOR CAPSTONE, 2 Credits
Capstone course for students completing the Leadership minor. Students will reflect on what they have learned through the Leadership minor and how to apply that learning in the context of their future careers.
Equivalent to: AG 444
Recommended: (AG 242 or LEAD 242) and (AG 342 or LEAD 342)

LEAD 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 502, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 506, SPECIAL PROBLEMS/SPECIAL PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.
LEAD 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 542, LEADERSHIP SKILLS FOR CAREER SUCCESS, 3 Credits
Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence.
Equivalent to: AG 542
Available via Ecampus

LEAD 543, LEADERSHIP THROUGH CONVERSATIONS, 3 Credits
Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.
Equivalent to: AG 543
Available via Ecampus

LEAD 580, LEADING AUTHENTICALLY: FOUNDATIONS OF LEADERSHIP, 3 Credits
The foundational course for students in graduate leadership coursework. Students will explore leadership theories to develop an understanding of how to be an authentic leader. Students will analyze and apply course content in relation to their own personal leadership experiences and gain perspectives and tools to influence their future.

LEAD 581, LEADING OTHERS: ENHANCING TEAM AND ORGANIZATIONAL PERFORMANCE, 3 Credits
A foundational course for group, team, and organizational leadership. Throughout this course, you will become familiar with the necessary conditions for designing effective teams and work groups, best practices and processes needed for maximum productivity, strategies to resolve common issues in teams, and methods to evaluate team performance.

LEAD 582, LEADING CHANGE: LEADING, MOTIVATING, AND EMPOWERING OTHERS, 3 Credits
Examines and synthesizes leadership content to form a personal and professional foundation for being remarkable. Drawing on 15 different being remarkable qualities, students will be challenged to develop and apply the skills needed for leadership success.

Plant Breeding and Genetics (PBG)
PBG 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PBG 199H
This course is repeatable for 16 credits.

PBG 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 199
This course is repeatable for 16 credits.

PBG 299, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PBG 299H
This course is repeatable for 16 credits.

PBG 299H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 299
This course is repeatable for 16 credits.

PBG 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

PBG 403, THESIS, 1-16 Credits
Graded P/N. This course is repeatable for 99 credits.

PBG 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: PBG 405H
This course is repeatable for 16 credits.

PBG 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

PBG 409, TEACHING PRACTICUM, 1-16 Credits
Graded P/N. This course is repeatable for 16 credits.

PBG 410, INTERNSHIP, 1-12 Credits
Offered via Ecampus only. This course is repeatable for 12 credits.

PBG 430, PLANT GENETICS, 3 Credits
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.
Equivalent to: HORT 430
Recommended: One year of biology and chemistry.
Available via Ecampus

PBG 431, PLANT GENETICS RECITATION, 1 Credit
Review and demonstration of plant genetics principles.
Equivalent to: CSS 431, HORT 431
PBG 441, PLANT TISSUE CULTURE, 4 Credits
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. CROSSLISTED as PBG 441 and MCB 541/PBG 541.
Equivalent to: HORT 441
Recommended: (BI 311 and BOT 331) or PBG 430 or CSS 430

PBG 450, PLANT BREEDING, 4 Credits
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.
Prerequisite: PBG 430 with D- or better
Equivalent to: CSS 450, HORT 450
Recommended: BI 311 or PBG 430

PBG 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PBG 499H
This course is repeatable for 16 credits.

PBG 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 499
This course is repeatable for 16 credits.

PBG 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PBG 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

PBG 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PBG 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PBG 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

PBG 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as CROP 509/ENT 509/
PBG 509/SOIL 509.
Equivalent to: CROP 509, ENT 509, SOIL 509
This course is repeatable for 9 credits.

PBG 510, INTERNSHIP, 4 Credits
Offered via Ecampus only.
This course is repeatable for 12 credits.

PBG 513, PLANT GENETIC ENGINEERING, 3 Credits
Principles, methods, and recent developments in the genetic engineering of higher plants. Offered alternate years.
Equivalent to: HORT 513
Recommended: (BI 311 and BOT 331) or (CSS 430 or CSS 530) or (HORT 430 or HORT 530) or (PBG 430 or PBG 530)

PBG 519, CURRENT TOPICS IN PLANT BREEDING AND GENETICS, 2 Credits
Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as HORT 519/PBG 519.
Equivalent to: HORT 519
This course is repeatable for 12 credits.

PBG 530, PLANT GENETICS, 3 Credits
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.
Equivalent to: HORT 530
Recommended: One year of biology and chemistry.

PBG 541, PLANT TISSUE CULTURE, 4 Credits
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. CROSSLISTED as PBG 441 and MCB 541/PBG 541.
Equivalent to: HORT 541, MCB 541
Recommended: (BI 311 and BOT 331) or PBG 430

PBG 550, PLANT BREEDING, 4 Credits
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.
Equivalent to: CSS 550, HORT 550
Recommended: BI 311 or PBG 430 or PBG 530
PBG 551, BREEDING CLONAL CROPS, 1 Credit
The overall goal of the course is to gain fundamental knowledge of breeding methods for clonal crops; these methods are different from those used for seed-propagated crops. Specific examples from a wide array of plant species (tree fruits, berries, tree nuts, potato, sweet potato, cassava, cacao) will be provided to illustrate application of the fundamental knowledge.
Prerequisite: PBG 450 with C or better or PBG 550 with C or better

PBG 552, PLANT BREEDING AND SEED PRODUCTION IN ORGANIC SYSTEMS, 3 Credits
Genetic improvement and seed propagation of self-pollinated and cross-pollinated crops bred for and used in organic production. The philosophical basis for organic agriculture will be reviewed in the context of what breeding technologies are allowed and why. Important traits for adaptation to organic production will be described. Models for organic plant breeding and examples of such programs are provided.
Prerequisite: PBG 530 with D or better
Recommended: BI 311 or PBG 430

PBG 556, CROP PLANT DOMESTICATION, 2 Credits
Learning is based on discussion of the contemporary literature on crop plant origins and domestication. The major agronomic and horticultural crops will be covered. Topics include primary centers of domestication, traits altered by domestication, effect of genetic architecture and local ecology on domestication, and importance of genetic diversity to current plant improvement efforts.

PBG 557, PLANTS AND PATENTS, 2 Credits
Learn about different methods of intellectual property protection in agriculture with a focus on plant patents, plant variety protection and utility patents. The rights, current issues and restrictions that different types of patents allow will be presented through reading the current literature.

PBG 591, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PBG 603, DISSERTATION, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

PBG 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PBG 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

PBG 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, ENT 609, SOIL 609
This course is repeatable for 9 credits.

PBG 620, INTRODUCTION TO MOLECULAR MARKERS, 2 Credits
Principles and methods for molecular marker discovery and analysis. Offered even years. CROSSLISTED as MCB 620/PBG 620.
Equivalent to: MCB 620
Recommended: BI 311 or PBG 430 or PBG 530 or HORT 430 or HORT 530

PBG 621, GENETIC MAPPING AND ASSOCIATION, 2 Credits
Principles and methods for genetic map construction and genome-wide association studies. Offered even years. CROSSLISTED as MCB 621/PBG 621.
Equivalent to: MCB 621
Recommended: BI 311 or PBG 430 or PBG 530 or HORT 430 or HORT 530

PBG 622, MAPPING QUANTITATIVE TRAIT LOCI, 1 Credit
Principles and methods for mapping genes underlying phenotypically complex traits. Offered alternate years. CROSSLISTED as MCB 622/PBG 622.
Equivalent to: CSS 622, MCB 622
Recommended: CROP 590 or CSS 590 or ST 513

PBG 650, ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS, 3 Credits
Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S~1~, and S~2~, family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and family selection experiments. Offered odd years.
Equivalent to: CSS 650
Recommended: (CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530) and (CSS 450 or CSS 550 or PBG 450 or PBG 550 or HORT 450 or HORT 550) and (ST 411 or ST 511) and (ST 412 or ST 512) and (ST 413 or ST 513)

PBG 691, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Rangeland Ecology & Management (RNG)

**RNG 121, *INTRODUCTION TO WILDLAND ECOLOGY, 4 Credits***

Ecological principles will be applied to understand contemporary issues related to wildlands, specifically the rangeland biomes that comprises over 50% of the Earth’s surface (FAO, SRM, USDA ERS). Topics to be covered fall into the following categories: Fundamentals of Ecology; Animals (wildlife & livestock); Disturbance (e.g., invasive species, fire, mineral extraction, etc.); Ecosystem Goods & Services (e.g., carbon sequestration, watersheds, biodiversity, recreation, etc.). The course will largely focus on U.S. wildlands, however a portion will examine the ecology and issues of international rangelands in Africa, Eurasia, Australia, and South America. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Available via Ecampus**

**RNG 299, SPECIAL TOPICS, 1-16 Credits***

**Equivalent to:** RNG 299H

This course is repeatable for 16 credits.

**RNG 299H, SPECIAL TOPICS, 1-16 Credits***

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** RNG 299

This course is repeatable for 16 credits.

**RNG 341, RANGELAND ECOLOGY AND MANAGEMENT, 3 Credits***

Nature and management of rangelands. Integrated land use with emphasis on plant-animal-soil interactions.

**Equivalent to:** RNG 241

**Available via Ecampus**

**RNG 351, RANGE ECOLOGY I-GRASSLANDS, 3 Credits***

Principles and terminology of grassland ecology. Addresses the spatial-temporal dynamics of structure, function, and process in North American grassland ecosystems. Water, nutrient cycles and energy pathways are explored in context of the variable driving forces of climate (drought), herbivory, and fire.

**Recommended:** (BOT 313 [D-] and RNG 341 [D-])

**Available via Ecampus**

**RNG 352, RANGE ECOLOGY II-SHRUBLANDS, 3 Credits***

Introduces the ecology of shrublands using an autecological approach. Explores the effects of stressors such as temperature, drought, fire, and herbivory on plant morphology, physiology, reproduction, and growth. Covers life histories of common shrubs and descriptions of shrubland communities used to promote understanding of autecological principles.

**Recommended:** BOT 313 and RNG 341

**Available via Ecampus**

**RNG 353, WILDLAND PLANT IDENTIFICATION, 4 Credits***

Students will learn how to identify approximately 100 plant species found in wildlands of North America and Mexico. Individual plant species ecology, basic plant anatomy and identification characteristics observable only through a microscope or dissecting scope, and how to use a dichotomous key for plant ID will also be covered.

**Equivalent to:** RNG 253

**Available via Ecampus**

**RNG 355, DESERT WATERSHED MANAGEMENT, 4 Credits***

A systems-based understanding of hydrologic processes in arid and semiarid landscapes. The class is focused on gaining knowledge of multiple ecological and hydrological interactions occurring in dryland watersheds and on discussing practical methodology aimed to enhance site productivity and ecosystem resilience. Emphasis is placed on land use effects on watershed function; monitoring of soil, water, and vegetation variables; and methods of rehabilitation of degraded landscapes. The course has a strong experiential learning component through a series of ‘hands-on’ practicums and a field trip to a semiarid location in eastern Oregon. Lec/lab.

**Available via Ecampus**

**RNG 399, SPECIAL TOPICS, 1-16 Credits***

May be repeated for a total of 16 credits.

This course is repeatable for 16 credits.

**RNG 403, SENIOR THESIS, 1-16 Credits***

This course is repeatable for 16 credits.

**RNG 405, READING AND CONFERENCE, 1-16 Credits***

This course is repeatable for 16 credits.

**RNG 406, PROJECTS, 1-16 Credits***

This course is repeatable for 16 credits.

**Available via Ecampus**

**RNG 411, ADVANCED PLANT ID, 2 Credits***

Advanced rangeland plant taxonomy.

This course is repeatable for 16 credits.

**Available via Ecampus**

**RNG 421, WILDLAND RESTORATION AND ECOLOGY, 4 Credits***

Emphasis is placed on understanding the ecology of arid and semiarid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.

**Recommended:** Course work in soils and ecology

**Available via Ecampus**
RNG 441, RANGELAND ANALYSIS, 4 Credits
Techniques used to describe vegetation in shrub-lands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods.
Recommended: ST 351 or ST 351H
Available via Ecampus

RNG 442, RANGELAND-ANIMAL RELATIONS, 4 Credits
Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiology, and their effects on management of rangeland-animal resources.
Available via Ecampus

RNG 448, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 448, CROP 448

RNG 455, RIPARIAN ECOHYDROLOGY AND MANAGEMENT, 4 Credits
A systems approach to study ecological and hydrological relationships occurring in riparian ecosystems. The class is focused on gaining knowledge of multiple connections between soil, water, and terrestrial vegetation occurring in riparian systems. Emphasis is placed on land use effects on the riparian ecologic and hydrologic function, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e., fish, wildlife, livestock, aesthetics, recreation, and silviculture).
Recommended: RNG 355
Available via Ecampus

RNG 457, HABITAT ANALYSIS 1: HABITAT USE AND MOVEMENT, 3 Credits
Effective habitat management necessitates an understanding of how animals use and move through the landscape, including rangelands. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on site selection of terrestrial animals (wild and domestic). However, topics covered in this course are broadly analogous to other ecosystems. Emphasis will be placed on analysis of habitat use (space use) and animal movement from multiple study designs.
Prerequisite: FW 251 with D- or better and RNG 341 [D-] and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])
Available via Ecampus

RNG 458, HABITAT ANALYSIS 2: ABUNDANCE, OCCUPANCY AND DEMOGRAPHY, 3 Credits
Habitat influences abundance, occupancy, and demographic rates of wildlife. Wildlife management is often a component of land management and both benefit from land stewards that have an understanding of how habitat characteristics influence the occupancy, abundance, and performance of wildlife within an area. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on abundance, occupancy, and demographic rates of terrestrial animals. Prerequisite: FW 251 with D- or better and RNG 341 [D-] and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])

RNG 470, PASTORAL SYSTEMS OF THE WORLD, 4 Credits
Description and evaluation of ecosystems which support grazing animals and pastoralists. Biology, ecology and management of these landscapes will be explored through climate, soils, and plant communities and human-livestock interactions. The historic role of trade and contemporary challenges to the ecological, social and economic sustainability of pastoral systems will be examined.

RNG 490, RANGELAND MANAGEMENT PLANNING, 4 Credits
Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints affecting decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.
Available via Ecampus

RNG 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

RNG 503, MASTER'S THESIS, 1-16 Credits
This course is repeatable for 999 credits.

RNG 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

RNG 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 507, SEMINAR, 1-2 Credits
This course is repeatable for 16 credits.
RNG 521, WILDLAND RESTORATION AND ECOLOGY, 4 Credits
Emphasis is placed on understanding the ecology of arid and semi-arid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.
Available via Ecampus

RNG 541, RANGELAND ANALYSIS, 4 Credits
Techniques used to describe vegetation in shrub-lands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods.
Recommended: ST 351

RNG 542, RANGELAND-ANIMAL RELATIONS, 4 Credits
Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiography, and their effects on management of rangeland-animal resources.
Recommended: RNG 341
Available via Ecampus

RNG 548, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 548, CROP 548

RNG 555, RIPARIAN ECOHYDROLOGY AND MANAGEMENT, 4 Credits
A systems approach to study ecological and hydrological relationships occurring in riparian ecosystems. The class is focused on gaining knowledge of multiple connections between soil, water, and terrestrial vegetation occurring in riparian systems. Emphasis is placed on land use effects on the riparian ecologic and hydrologic function, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e., fish, wildlife, livestock, aesthetics, recreation, and silviculture).
Recommended: RNG 355
Available via Ecampus

RNG 557, HABITAT ANALYSIS 1: HABITAT USE AND MOVEMENT, 3 Credits
Effective habitat management necessitates an understanding of how animals use and move through the landscape, including rangelands. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on site selection of terrestrial animals (wild and domestic). However, topics covered in this course are broadly analogous to other ecosystems. Emphasis will be placed on analysis of habitat use (space use) and animal movement from multiple study designs.
Recommended: ST 511 and ST 512
Available via Ecampus

RNG 558, HABITAT ANALYSIS 2: ABUNDANCE, OCCUPANCY AND DEMOGRAPHY, 3 Credits
Habitat influences abundance, occupancy, and demographic rates of wildlife. Wildlife management is often a component of land management and both benefit from land stewards that have an understanding of how habitat characteristics influence the occupancy, abundance, and performance of wildlife within an area. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on abundance, occupancy, and demographic rates of terrestrial animals.

RNG 577, AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/ NR 477 and FES 577/RNG 577.
Equivalent to: FES 577, FS 577, NR 577
Recommended: Introductory course in biology.

RNG 590, RANGELAND MANAGEMENT PLANNING, 4 Credits
Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints necessary for decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.

RNG 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

RNG 603, PH.D. THESIS, 1-16 Credits
This course is repeatable for 999 credits.

RNG 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

RNG 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
RNG 607, SEMINAR, 1-2 Credits
This course is repeatable for 16 credits.

RNG 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

RNG 643, WILDLAND PLANT ECOPHYSIOLOGY, 4 Credits
Emphasizes the physiological ecology of plants living in arid and semi-arid ecosystems. Primary class emphasis will include photosynthesis, respiration, water stress and water use efficiency, stable isotopes, root structure and function, nutrient uptake and stress, and defoliation. Offered every other winter, odd years.

RNG 662, RANGELAND ECOLOGY, 3 Credits
Studies ecological theory and related resource management implications in rangelands and arid wildlands. Topics include the history and development of rangeland ecology, plant demography, invasive species, plant population dynamics, disturbance theory, succession, vegetation classification and range condition assessments. Offered every other winter, even years.

Recommended: Basic ecology course

RNG 670, ECOLOGICAL INVASIVE PLANT MANAGEMENT, 2 Credits

RNG 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Soil Science (SOIL)

SOIL 101, INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE, 1 Credit
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. CROSSLISTED as CROP 101/ENT 101/ SOIL 101.

Equivalent to: CROP 101, ENT 101, HORT 101
Available via Ecampus

SOIL 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: SOIL 199H
This course is repeatable for 16 credits.

SOIL 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 199
This course is repeatable for 16 credits.

SOIL 205, SOIL SCIENCE, 3 Credits
Introduction to the chemical, physical and biological nature of soils. Examines how soils function in terms of plant growth, nutrient supply, the global carbon cycle, ecological habitat, and water purification. Community-based learning projects provide hands-on experience with fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec. (Bacc Core Course if taken with SOIL 206 or FOR 206)

Attributes: CPBL – Core, Pers, BioSci Attached Lec; CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: SOIL 206 (may be taken concurrently) with D- or better or FOR 206 (may be taken concurrently) with D- or better

Equivalent to: CSS 205, CSS 305

SOIL 206, SOIL SCIENCE LABORATORY FOR SOIL 205, 1 Credit
Students will gain hands-on experience with soil science concepts and applications. Laboratory exercises and field trips will help students develop proficiency in the methods/tools for analyzing soil chemistry, biology, morphology, physical properties, and soil forming factors. Skills will be taught in the context of soils’ social, economic, and environmental importance. (Bacc Core Course if taken with SOIL 205)

Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Corequisites: SOIL 205

SOIL 299, SPECIAL TOPICS, 1-16 Credits
Equivalent to: SOIL 299H
This course is repeatable for 16 credits.

SOIL 299H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 299
This course is repeatable for 16 credits.

SOIL 316, NUTRIENT CYCLING IN AGROECOSYSTEMS, 4 Credits
Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Labs include soil sampling and testing procedures, data collection on soil and plants, computer applications for soil fertility management, and field trips. Lec/lab.

Prerequisite: (CH 121 with D- or better or CH 231 with D- or better) and (SOIL 205 [C] or CSS 205 [C] or CSS 305 [C])

SOIL 325, AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH, 3 Credits
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. CROSSLISTED as CROP 325/SOIL 325/SUS 325. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC
Equivalent to: CROP 325, SUS 325
SOIL 360, SOIL MANAGEMENT FOR ORGANIC PRODUCTION, 3 Credits
This is a skills-based soil management course that is part lecture and part student-centered learning. Significant class time will be devoted to making field-scale management decisions. The course includes individual and group work, presentation, and discussion. The intent is to prepare students for real-world application of soil management decisions in certified organic systems. Using the National Organic Program as a starting point as well as farm system descriptions with extensive long-term data sets, we will interpret soil nutrient analyses, cover cropping systems, and organic amendments, to design soil management plans for two model cropping systems (annual and perennial).
Prerequisite: (SOIL 205 with C or better and (SOIL 206 [C] or FOR 206 [C])) or CSS 205 [C]
Recommended: Introductory soil science course with lab
Available via Ecampus

SOIL 366, ECOSYSTEMS OF WILDLAND SOILS, 3 Credits
Focuses on soils that occur in relatively undisturbed ecosystems such as forests and rangelands. Topics covered include properties and processes specific to understanding and managing the soil resource in these areas. An overview of US Soil Taxonomy will also be given.
Prerequisite: SOIL 205 with D- or better or CSS 205 with D- or better or CSS 305 with D- or better
Recommended: An understanding and appreciation of environmental chemistry, biology, ecology, and physics
Available via Ecampus

SOIL 388, SOIL SYSTEMS AND PLANT GROWTH, 4 Credits
Introduces soils as providers of critical resources for plant growth. Explains how soils supply water, air, thermal energy and nutrients to plants. Shows that sustainable management of soil resources requires substantial understanding of their role in the functioning of natural, forest, and agricultural systems. Explains controls on stocks and availabilities of individual soil resources and mechanisms making these resources plant-available.
Prerequisite: ((SOIL 205 with D- or better and (SOIL 206 [D-] or FOR 206 [D-]) or CSS 205 [D-]) and (CH 121 [D-] or CH 231 [D-]) and (BOT 220 [D-] or (BI 204 [D-] or BI 205 [D-]) or BI 206 [D-]) or (BI 211 [D-] or BI 212 [D-] or BI 213 [D-]) or (BI 211H [D-] or BI 212H [D-] or BI 213H [D-]) or (BI 221 [D-] or BI 222 [D-] or BI 223 [D-]) or (BI 221H [D-] or BI 222H [D-] or BI 223H [D-]))
Available via Ecampus

SOIL 395, **WORLD SOIL RESOURCES, 3 Credits
The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. Offered via Ecampus only. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC
Prerequisite: CH 121 with D- or better or CH 122 with D- or better or CH 231 with D- or better or CH 231H with D- or better or CH 232 with D- or better or CH 232H with D- or better or CH 233 with D- or better or CH 233H with D- or better
Equivalent to: CSS 395
Recommended: One term of chemistry
Available via Ecampus

SOIL 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 401, RESEARCH, 1-16 Credits
Equivalent to: CSS 401
This course is repeatable for 16 credits.

SOIL 403, THESIS, 1-16 Credits
Independent, original study and preparation of a senior thesis.
Equivalent to: CSS 403
This course is repeatable for 16 credits.

SOIL 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: SOIL 405
This course is repeatable for 16 credits.

SOIL 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 405H
This course is repeatable for 16 credits.

SOIL 407, SEMINAR, 1 Credit
Equivalent to: CROP 407, HORT 407
Available via Ecampus

SOIL 408, WORKSHOP, 1-16 Credits
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
Equivalent to: CSS 408
This course is repeatable for 16 credits.

SOIL 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 410, INTERNSHIP, 1-6 Credits
Professional work experience previously approved and supervised by the department, written report required.
Equivalent to: CSS 410
This course is repeatable for 12 credits.
SOIL 435, ENVIRONMENTAL SOIL PHYSICS, 3 Credits
Covers principles of soil physical properties and processes as they relate to agricultural, hydrological and environmental problems. Lec/lab. Offered odd years.
Prerequisite: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better
Equivalent to: CSS 435
Recommended: CH 123 and MTH 241 and PH 201
Available via Ecampus

SOIL 445, ENVIRONMENTAL SOIL CHEMISTRY, 3 Credits
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.
Equivalent to: CSS 445

SOIL 455, BIOLOGY OF SOIL ECOSYSTEMS, 4 Credits
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.
Equivalent to: CSS 455
Recommended: (CSS 305 or CSS 205 or SOIL 205). Courses in chemistry, physics, and microbiology

SOIL 466, SOIL MORPHOLOGY AND CLASSIFICATION, 4 Credits
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.
Prerequisite: SOIL 205 with D- or better or CSS 205 with D- or better or CSS 305 with D- or better
Equivalent to: CSS 466
Available via Ecampus

SOIL 468, SOIL LANDSCAPE ANALYSIS, 4 Credits
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system and landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered even years.
Prerequisite: SOIL 466 (may be taken concurrently) with D- or better or CSS 466 (may be taken concurrently) with D- or better
Equivalent to: CSS 468
Available via Ecampus

SOIL 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 499
This course is repeatable for 16 credits.

SOIL 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 503, THESIS/DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

SOIL 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 508, WORKSHOP, 1-16 Credits
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
Equivalent to: CSS 508
This course is repeatable for 16 credits.

SOIL 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as CROP 509/ENT 509/PBG 509/SOIL 509.
Equivalent to: CROP 509, ENT 509, PBG 509
This course is repeatable for 9 credits.

SOIL 510, INTERNSHIP, 1-6 Credits
Professional work experience previously approved and supervised by the department, written report required.
This course is repeatable for 6 credits.

SOIL 511, SOIL: A NATURAL AND SOCIETAL RESOURCE, 3 Credits
Serves degree- and non-degree-seeking graduate learners wanting soil science knowledge but having minimal science background. Understanding soil physical, chemical, and biological properties promotes informed soil management while supporting individual to global societal values. Established curriculum facilitates graduate degrees or certificates, continuing education, professional certification, and self-improvement goals. A highly interactive social media framework supports weekly student-student and instructor-student learning interactions.
Available via Ecampus
SOIL 512, METHODS OF SOIL ANALYSIS - FIELD, 1 Credit
Recognition and quantitative description of soil properties in agroecosystems. Assessments of soil environments used for crop production in Oregon. Demonstration and practice of volumetric and bulk soil sampling techniques as well as the application of pedotransfer functions. Each participant will be responsible for analyzing at least one soil sample in the chemical level. Five-day duration with four overnight stays at campgrounds. Participants will use their own or borrowed camping equipment.
Recommended: SOIL 205 with a minimum grade of C

SOIL 514, METHODS OF SOIL ANALYSIS - LABORATORY, 2 Credits
Provide the theoretical background, as well as practical experience needed to plan, select, execute, and interpret soil chemical and physical analyses such as those typically used for nutrient management recommendations. Individual and group activities involve classroom presentations, as well as hands-on work in a teaching laboratory. Samples processed are those collected in SOIL 512, Methods of Soil Analysis - Field. Duration is five full work days.
Prerequisite: SOIL 512 (may be taken concurrently) with C or better
Recommended: SOIL 205 and successful completion of EH&S Laboratory

SOIL 515, SOIL FERTILITY MANAGEMENT, 3 Credits
Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils.
Equivalent to: CSS 515
Recommended: CSS 315 and courses in statistics, chemistry and plant physiology.

SOIL 523, PRINCIPLES OF STABLE ISOTOPES, 3 Credits
An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Offered even years.
Equivalent to: CSS 523

SOIL 525, MINERAL-ORGANIC MATTER INTERACTIONS, 3 Credits
Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties.
Equivalent to: CSS 525
Recommended: CSS 305 or CSS 205 or SOIL 205

SOIL 530, ORGANIC SOIL AND CROP MANAGEMENT, 3 Credits
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies. CROSSLISTED as CROP 530/SOIL 530.
Equivalent to: CROP 530
Recommended: (SOIL 525, CROP 200 and SOIL 205 or introductory biology) and completion or concurrent enrollment in AGRI 520
Available via Ecampus

SOIL 535, SOIL PHYSICS, 3 Credits
Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Offered fall term in even years.
Equivalent to: CSS 535
Recommended: CSS 305, CSS 205, SOIL 205, MTH 241, CH 123, PH 201

SOIL 536, VADOSE ZONE HYDROLOGY LABORATORY, 1 Credit
Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Offered even years.
Equivalent to: CSS 536
Recommended: CH 123 and PH 201

SOIL 545, ENVIRONMENTAL SOIL CHEMISTRY, 3 Credits
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.
Equivalent to: CSS 545

SOIL 547, NUTRIENT CYCLING, 3 Credits
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as BOT 547/SOIL 547.
Equivalent to: BOT 547, FS 547
Recommended: College-level chemistry and biology and one class in ecology (eg. BI 370) and/or soils (eg. SOIL 205)
SOIL 555, BIOLGY OF SOIL ECOSYSTEMS, 4 Credits
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.
Equivalent to: CSS 555
Recommended: CSS 305 or CSS 205 or SOIL 205. Courses in chemistry, physics, and microbiology

SOIL 566, SOIL MORPHOLOGY AND CLASSIFICATION, 4 Credits
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.
Equivalent to: CSS 566
Recommended: CSS 305 or CSS 205 or SOIL 205

SOIL 568, SOIL LANDSCAPE ANALYSIS, 4 Credits
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab.
Prerequisite: CSS 566 (may be taken concurrently) with C or better or SOIL 566 (may be taken concurrently) with C or better
Equivalent to: CSS 568

SOIL 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 603, THESIS/DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

SOIL 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, ENT 609, PBG 609
This course is repeatable for 9 credits.

SOIL 635, ADVANCED SOIL PHYSICS, 3 Credits
Explores theoretical development of a key topic in soil physics. Topics may include evaporation from porous media, multiphase fluid movement, soil deformation, and soil salinization, with respect to either historical development, present day understanding or future needs of the field. Course structure incorporates lectures and discussion requiring intensive student participation. Offered odd years.
Prerequisite: CSS 535 with C or better or SOIL 535 with C or better
Recommended: A working knowledge of soil physics and a passing grade in a graduate-level soil physics course

SOIL 645, SOIL MICROBIAL ECOLOGY, 3 Credits
An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Offered even years.
Equivalent to: CSS 645
Recommended: SOIL 455 or CSS 455 or MB 448

SOIL 684, GLOBAL BIOGEOCHEMICAL CYCLES, 4 Credits
An in-depth treatment of global biogeochemical cycles, focusing on cycles of carbon, oxygen, nitrogen, phosphorus, and sulfur in the atmosphere, hydrosphere, and lithosphere. CROSSLISTED as GEO 684/ SOIL 684.
Equivalent to: GEO 684
Recommended: One year of college-level physics and chemistry, including introductory biology. One year of graduate coursework in soil, earth, ocean, atmospheric or forest science

SOIL 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Sustainability (SUS)

SUS 102, INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY, 4 Credits
An introduction to the science behind critical environmental issues and the biological basis of creating and maintaining sustainable ecosystems. Focus on such questions as: how do we decide what to believe about environmental issues? How do we quantify, restore, and value biodiversity? What is valid science in the global warming debate?
Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: SOIL 102
Available via Ecampus
SUS 103, *INTRODUCTION TO CLIMATE CHANGE, 4 Credits
An introduction to the principles of climate change science with an emphasis on the empirical evidence for climate change. Students will learn critical thinking skills to assess such questions as: How do we determine the processes controlling global warming? How do we predict trends in climate change? How do we calculate and understand uncertainty in these predictions? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

SUS 304, *SUSTAINABILITY ASSESSMENT, 4 Credits
Explores theories and application of sustainability assessment techniques and analysis methods. Practical application of globally recognized assessment protocol, including checklists, footprinting, life-cycle analysis and the indicators used to conduct these analyses. Emphasis on ecological and social indicators, although economic indicators are explored. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

SUS 325, ^AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH, 3 Credits
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. CROSSLISTED as CROP 325/SOIL 325/SUS 325. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: CROP 325, SOIL 325

SUS 331, *SUSTAINABILITY, JUSTICE, AND ENGAGEMENT, 3 Credits
Many sustainability crises are local, and the people most impacted tend to be groups already experiencing difference, lack of power, and discrimination. Transformational responses led by those most affected will be examined – responses that address the environmental problem while also building social and economic power for those affected. The tools and tactics used to achieve positive changes will be analyzed. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: SUS 331H
Available via Ecampus

SUS 331H, *SUSTAINABILITY, JUSTICE, AND ENGAGEMENT, 3 Credits
Many sustainability crises are local, and the people most impacted tend to be groups already experiencing difference, lack of power, and discrimination. Transformational responses led by those most affected will be examined – responses that address the environmental problem while also building social and economic power for those affected. The tools and tactics used to achieve positive changes will be analyzed. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: SUS 331
Available via Ecampus

SUS 350, *SUSTAINABLE COMMUNITIES, 4 Credits
Introduction to the concept of sustainable communities from a multidisciplinary perspective. Instructors from a broad array of disciplines and professions. Development of holistic thinking skills and innovative solutions to complex problems. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: NR 350
Available via Ecampus

SUS 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

SUS 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

SUS 420, SOCIAL DIMENSIONS OF SUSTAINABILITY, 3 Credits
Focuses on the social aspects of sustainability, including how the environment, the economy, social life interact to create the world we live in. Explores how social institutions (school, government, business, family) contribute to sustainability and promote or discourage social and environmental justice at local and global scales. Also offered at OSU-Cascades and via Ecampus.
Available via Ecampus

SUS 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SUS 512, TOPICS IN THE SCIENCE OF SUSTAINABILITY, 4 Credits
Provides a graduate-level introduction to key concepts and issues in environmental science and sustainability, targeted at business-oriented graduate and post-bacc students who do not have a science background. The course is a core requirement of the Sustainable Business certificate program offered jointly by the College of Business (COB) and the College of Agricultural Sciences’ (CAS) Sustainability Double-Degree (SDD) Program.
SUS 514, SUSTAINABILITY PLANNING AND ASSESSMENT, 4 Credits

Sustainability is fundamentally about balancing social, economic and ecological systems. This course examines a range of different methodologies for measuring and evaluating performance towards established sustainability criteria and indicators. Students will critically evaluate tools for making sustainable decisions and understand the limitations of individual assessment approaches in different contexts. Specific assessment techniques to be explored include ecological footprinting, sustainable community indicators, greenhouse gas emissions inventories, sustainability checklists, environmental management systems (ISO standards), life-cycle analysis, and business sustainability reporting. Students will leave the course with the fundamental skills required to complete sustainability assessments via globally relevant approaches.

SUS 599, SPECIAL TOPICS, 0-16 Credits

This course is repeatable for 16 credits.

Toxicology (TOX)

TOX 003, UNDERGRADUATE RESEARCH, 0 Credits

Students engage in research activities appropriate to their discipline; and through the research experience, to acquire skills, techniques, and knowledge relevant to their field of study. In consultation with a faculty mentor, students will engage in research activity, and make and execute a plan for a project.

TOX 360, *THE WORLD OF POISONS, 3 Credits

Provides a basic understanding of how we are exposed and respond to chemicals, examples of human diseases associated with toxic insult, the role of technology and the interface of society and toxicology in risk perception and legislation. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

Recommended: One 3-credit course in chemistry or one 3-credit course in biology.

TOX 401, RESEARCH, 1-16 Credits

Equivalent to: AC 401

This course is repeatable for 16 credits.

TOX 405, READING AND CONFERENCE, 1-16 Credits

Equivalent to: AC 405

This course is repeatable for 16 credits.

TOX 411, FUNDAMENTALS OF TOXICOLOGY, 3 Credits

Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations.

Prerequisite: BB 350 (may be taken concurrently) with D- or better or BB 450 (may be taken concurrently) with D- or better or BB 490 (may be taken concurrently) with D- or better

TOX 413, ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits

Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed.

Prerequisite: TOX 411 with D- or better

TOX 429, TOXIC SUBSTANCES IN FOOD, 3 Credits

Toxicology and epidemiology of human exposures to pesticides and food toxicants.

Prerequisite: BB 350 (may be taken concurrently) with D- or better or BB 450 (may be taken concurrently) with D- or better or BB 490 (may be taken concurrently) with D- or better

Equivalent to: TOX 429H

TOX 430, CHEMICAL BEHAVIOR IN THE ENVIRONMENT, 3 Credits

Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment.

Prerequisite: CH 123 with D- or better or CH 331 with D- or better

TOX 435, *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

Equivalent to: FES 435, FES 435H, TOX 435H

Recommended: One quarter each of biology and chemistry

Available via Ecampsus

TOX 435H, *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator

Equivalent to: BI 435, BI 435H, FES 435, FS 435, FS 435H, TOX 435

Recommended: One quarter each of biology and chemistry

TOX 455, ECOTOXICOLOGY: AQUATIC ECOSYSTEMS, 3 Credits

Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish.

Prerequisite: CH 331 with D- or better
**TOX 480, COMPUTATIONAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits**

Provides an in-depth understanding of the current systems biology paradigm for chemical risk and drug safety assessment. Learn about novel technologies in computational chemistry, molecular biology and systems biology used to develop methods for risk assessment, including approaches for chemical prioritization for screening and testing, predictive models for high-throughput hazard identification and utilization of “big data” to determine chemical mechanisms of action and toxicity pathways. Apply these approaches to specific case studies in risk analysis, environmental health and toxicology.

**Recommended:** One year college chemistry and biology plus introductory toxicology or biochemistry

**TOX 490, ENVIRONMENTAL FORENSIC CHEMISTRY, 3 Credits**

Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations.

**Recommended:** One year of college chemistry and one term of organic chemistry.

**TOX 499, SPECIAL TOPICS, 1-16 Credits**

This course is repeatable for 16 credits.

**TOX 501, RESEARCH, 1-16 Credits**

This course is repeatable for 16 credits.

**TOX 503, THESIS, 1-16 Credits**

This course is repeatable for 999 credits.

**TOX 505, READING AND CONFERENCE, 1-16 Credits**

This course is repeatable for 16 credits.

**TOX 507, SEMINAR, 1-16 Credits**

This course is repeatable for 16 credits.

**TOX 511, FUNDAMENTALS OF TOXICOLOGY, 3 Credits**

Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations.

**Prerequisite:** BB 550 (may be taken concurrently) with C or better or BB 590 (may be taken concurrently) with C or better

**TOX 512, TARGET ORGAN TOXICOLOGY, 3 Credits**

Examination of toxicological effects of chemicals at organ level. Normal physiology of the organ system is received.

**Prerequisite:** TOX 511 with C or better

**TOX 513, ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits**

Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed.

**Prerequisite:** TOX 511 with C or better

**TOX 529, TOXIC SUBSTANCES IN FOOD, 3 Credits**

Toxicology and epidemiology of human exposures to pesticides and food toxicants.

**Recommended:** Completion or concurrent enrollment in BB 350, BB 450 or BB 490

**TOX 530, CHEMICAL BEHAVIOR IN THE ENVIRONMENT, 3 Credits**

Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment.

**Recommended:** CH 106 and CH 331 and graduate standing.

**TOX 535, GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits**

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535.

**Equivalent to:** BI 535, FES 535, FS 535, MCB 535

**Recommended:** One quarter each of biology and chemistry

Available via Ecampus

**TOX 555, ECOTOXICOLOGY: AQUATIC ECOSYSTEMS, 3 Credits**

Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish.

**Recommended:** CH 331

**TOX 557, SCIENTIFIC SKILLS AND ETHICS, 3 Credits**

Acquire a multitude of skills to launch and maintain productive extramurally funded careers as research scientists. Explore the ethical practices, data sharing approaches, and compliance requirements needed to conduct research. Examine the ethical use of human subjects and animals in research. Explore the changing landscape of intellectual property and commercialization policies for scientists. Introduces communication strategies for effective interactions with scientific peers, the general public and research sponsors.

**Equivalent to:** MCB 557
TOX 575, ADVANCED XENOBIOTIC METABOLISM AND DISPOSITION, 2 Credits
Course will focus on structure, function and regulation of specific proteins that function in uptake, distribution, metabolism, and excretion of drugs and other chemicals that are foreign to the body (xenobiotics). The course will focus on proteins which are termed Phase I and Phase II xenobiotic metabolizing enzymes and xenobiotic transporters. There will be an emphasis on Cytochrome P450 enzymes and hepatic and renal xenobiotic transporter proteins and their key roles in xenobiotic metabolism and excretion.
Recommended: TOX 512

TOX 580, COMPUTATIONAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits
Provides an in-depth understanding of the current systems biology paradigm for chemical risk and drug safety assessment. Learn about novel technologies in computational chemistry, molecular biology and systems biology used to develop methods for risk assessment, including approaches for chemical prioritization for screening and testing, predictive models for high-throughput hazard identification and utilization of “big data” to determine chemical mechanisms of action and toxicity pathways. Apply these approaches to specific case studies in risk analysis, environmental health and toxicology.
Recommended: One year college chemistry and biology plus introductory toxicology or biochemistry

TOX 590, ENVIRONMENTAL FORENSIC CHEMISTRY, 3 Credits
Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations.
Recommended: One year of college chemistry and one term of organic chemistry.

TOX 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

TOX 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

TOX 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

TOX 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

TOX 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

TOX 611, TESTING FOR GENOTOXICITY, 4 Credits
A lab-based course geared toward toxicology, biochemistry, biology, food science, nutrition, pharmacy and MCB students. Introduces principles and methods of several key assays used to screen for DNA damage and mutation. These tests will include the following: (i) Salmonella mutagenicity assay (‘Ames test’), (ii) single cell gel electrophoresis (‘comet’) assay, (iii) micronucleus assay, and (iv) PCR-based single strand conformation polymorphism (SSCP) screening for oncogene/tumor suppressor gene mutation in cancers. This 2-week, intensive lab/lecture class runs Mon-Fri in the LPSC during the first session of summer term. Each day includes laboratory work and a 2-hour lecture covering basic principles of the assays, as well as technical details of the experiment for the day.
Prerequisite: TOX 514 with C or better
Recommended: BB 400 series, prior course work on DNA repair and mutagenesis

TOX 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

TOX 808, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

Agricultural Education and General Agriculture

The Department of Agricultural Education and General Agriculture combines two programs: Agricultural Sciences and Agricultural Education.

The Agricultural Sciences Program is an undergraduate studies program that provides maximum flexibility in designing and structuring a course of study to meet the students’ individual needs. Agricultural Sciences should be seriously considered by students desiring programs of study not currently available in any other agricultural subject matter department (such as those involving a minor in communications, recreation, or environmental studies in agriculture); students wishing to pursue two or more areas of specialization (such as students who are returning to farms or ranches and who need substantial background, for example, in animal science, crops, and agricultural business management); students preparing for leadership positions in agriculture that require excellent communication and leadership skills as well as breadth of agricultural background (such as agriculture teachers, lobbyists, commodity liaison persons or extension staff); or students who have not selected a departmental major in the College of Agricultural Sciences but who know they are interested in an agricultural career.

The goal of the Agricultural Sciences Program is to help students identify the agricultural career in which they are most interested and build a course of study that will qualify each student for their chosen profession. Advising is of paramount importance in this process and major emphasis is placed on career advising.

The Agricultural Education Program offers course work serving teachers and leaders in agriculture. The MS and MAIS degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their
occupational objectives. The Agricultural Education MS degree aligns with an initial teaching license in Oregon.

**Three undergraduate minors are available** in the Department of Agricultural Education and General Agriculture.

1. The **Agricultural Sciences minor** is available for undergraduate students who have majored in an area that requires the addition of breadth in agriculture to their major program. The minor provides the appropriate technical agriculture background for students interested in agricultural management, communication, environmental studies, etc.

2. The **Comparative International Agriculture minor** provides students with formal instruction in international agricultural concepts and practical experiences through global awareness course work, language immersion via study/research abroad, and/or international fieldwork. The 27-credit curriculum prepares students for successful postbaccalaureate international careers, or those seeking graduate studies in international agriculture programs.

3. The **Leadership minor** is designed for all undergraduates interested in developing premier leadership, enhancing professional competencies, and fostering the skills necessary to meet the local, national, and international needs of our society. The Leadership minor is centered on leadership theory (education), trait/skill development (training), and application (development). It is designed to allow students to apply the course work in a relevant and relational manner. This minor is also available via Ecampus.

**Career Opportunities in Agricultural Sciences**

Career opportunities for general agriculture majors are unlimited because of the nature of the program structure. Students can return to home farms or ranches, move into agricultural middle management, become extension staff, move into political lobby positions, work in marketing or international agriculture, become high school teachers of agriculture, or teach agriculture in community colleges. Salaries vary depending on the position a student may strive to achieve.

**Undergraduate Studies Curriculum**

High school and college transfer students who are admitted to Oregon State University as an undergraduate are eligible to participate in the Agricultural Sciences Program. Agricultural Sciences majors, in consultation with their departmental academic advisor, may plan elective course work to emphasize personal interests, abilities, and career objectives. A leadership and communication area of emphasis is available and is specially designed for those students who will need breadth in their technical agriculture background and excellence in communication and leadership skills. The intent of this area of emphasis within the Agricultural Sciences Program is to prepare agriculture’s future leaders in extension, government, and business. A teacher preparation area of emphasis is available and allows for Initial Teacher Licensure within the baccalaureate degree.

**Undergraduate Programs**

**Majors**

- Agricultural Sciences (p. 143)

**Minors**

- Agricultural Sciences (p. 143)
- Agricultural Sciences and Natural Resources Communications (p. 142)
- Comparative International Agriculture (p. 145)
- Leadership (p. 146)

**Graduate Programs**

**Majors**

- Agricultural Education (p. 142)

**Minors**

- Agricultural Education (p. 142)

Burt, John 1973, Emeritus

Cole, Richard 1977, Emeritus

Haddad, Becky 2017, Instructor
Degrees:
BS, Univ of Wisconsin-Platteville, 2012
MS, North Dakota St U-Main Campus, 2016

Maddy, Deborah 1997, Emeritus

Millhollin, Melissa 2010, Instructor
Degrees:
BS, Oregon State University,
MS, Oregon State University, 2015

Shirley, Lindsey 2016, Associate Professor
Degrees:
BS, Iowa State University, 2001
MED, Univ of Minnesota-Twin Cities, 2002
PHD, Iowa State University, 2007

Stewart, Josh 2014, Instructor
Degrees:
BS, Texas Tech University, 1999
MS, Texas Tech University, 2014

Strawn, Kellie 2001, Instructor
Degrees:
BS, Oregon State University, 2005
MS, Oklahoma State Univ-Okla City, 2008

Sunderland, Paul 1986, Emeritus

Thompson, Gregory 1996, Emeritus

Velez, Jonathan 2008, Interim Department Head, Associate Professor
Degrees:
BS, Oregon State University, 2000
MAT, Oregon State University, 2001
PHD, The Ohio State Univ Main, 2008
Agricultural Education (AED)

AED 235, INTRODUCTION TO AGRICULTURAL EDUCATION, 2 Credits
Introduces students to the field of agricultural education. Explore the historical foundations and career pathways in non-formal and school-based agricultural education. Topics will include school-based agricultural education, non-formal and extension education, and agricultural literacy. Develop career skills and a plan to pursue a future career in agricultural education.

AED 313, THEORY AND PRACTICUM III: FIELD, 4 Credits
Field based experience for students preparing to be agricultural teachers. Focus on teaching models. Available via Ecampus

AED 325, PLANNING AND DELIVERING NON-FORMAL AGRICULTURAL EDUCATION, 3 Credits
This course uses adult learning theory and practice, including planning non-formal agricultural education programs for youth and adults, methods of instructional delivery, effective use of instructional technology, marketing agricultural education programs, and evaluation of agricultural education outcomes. Microteaching (practice teaching presentations) and group presentations required as part of laboratory assignments.

AED 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AED 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

AED 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits. Available via Ecampus

AED 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

AED 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

Available via Ecampus

AED 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AED 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

AED 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

AED 510, PROFESSIONAL INTERNSHIP: AGRICULTURE EDUCATION, 1-40 Credits
A field experience in which the intern will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for 40 credits. Available via Ecampus

AED 518, EXTENSION COURSE IN TEACHER EDUCATION/PEDAGOGY, 1-3 Credits
Enables present and prospective teachers of agriculture to continue their professional development on pedagogical topics of current importance. This course is limited to 9 credits per term. Equivalent to: AG 518
This course is repeatable for 50 credits. Available via Ecampus

AED 533, RURAL SURVEY METHODS, 3 Credits
Technique; analyzing, interpreting, and using results of survey data; identifying and utilizing community resources; develop and organize agriculture programs to meet community needs.

AED 552, PROGRAM ORGANIZATION AND MANAGEMENT, 3 Credits
Explores the foundations of vocational education, essential learning skills, advisory committees, and development of a vocational education philosophy. Students will study the elements of educational reform as they apply to specific service areas. Resource analysis, student organizations, and school-to-work transitions will also be studied.

AED 553, APPLIED INSTRUCTIONAL STRATEGIES, 3 Credits
Helps students in the identification and development of goals, objectives and units. The course includes the development and application of subject area instructional strategies/models, including applied math, writing, communication skills, measurement and evaluation of achievement, and delivery of instruction to at-risk students. Safety is a primary focus.

AED 554, MICRO-TEACHING, 3 Credits
Planning, presenting and evaluating lessons in a micro-teaching lab. It includes application of content pedagogy strategies, subject matter principles and media technology. Lessons presented on safety.

AED 555, LABORATORY PEDAGOGY, 3 Credits
Applications of efficient planning, organizing, and teaching skills within the laboratory setting and utilization of laboratory facilities to optimize learning experiences. Laboratory facilities could include a shop, greenhouse, land laboratories/outdoors, agriscience labs, aquaculture, computer lab, field trips, etc.
AED 556, LINK RESEARCH, TEACHING, AND PRACTICE, 3 Credits
Links research to teaching. Students will work with cooperating teachers to identify and apply research to teaching.

AED 557, ISSUES AND TRENDS IN CURRICULUM AND INSTRUCTION, 3 Credits
Emphasizes trends related to subject matter curriculum issues unique to agricultural education at the secondary level.

AED 558, IMPROVING AGRICULTURAL SCIENCE AND TECHNOLOGY PROGRAMS, 3 Credits
Provides impetus toward evaluation and improvement of local programs of agricultural science and technology (AST), such that they better reflect community, regional, and national needs.

AED 580, COMMUNICATING AGRICULTURAL AND LIFE SCIENCES TO THE PUBLIC, 3 Credits
Focuses on communicating with the public about research-based science in agricultural and life sciences for the purposes of education, influencing public policy, promoting positive agricultural practices and creating change. Explores various communication outlets and media and how they are appropriate for different messages.

AED 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AED 603, DISSERTATION, 1-16 Credits
Students engage in research and writing related to the completion of their dissertation to fulfill the requirements of the College of Education PhD program.
This course is repeatable for 999 credits.

AED 640, INSTRUMENTATION AND DATA COLLECTION IN SOCIAL SCIENCE, 3 Credits
Addresses the selection, development, and analysis of various types of quantitative instruments and procedures for collecting research data. The course has a quantitative focus and is oriented toward social science research. Lec/lab.
Recommended: SED 580 or equivalent introductory research methods course.

AG 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

AG 200, ORIENTATION TO THE AGRICULTURAL SCIENCES MAJOR, 2 Credits
Exploration of Agricultural Sciences major and career opportunities.

AG 211, SURVEY AND CONSTRUCTION, 3 Credits
Land measurement and leveling as applied to agricultural uses. Concrete and agricultural building construction including the use of construction power tools, selection of materials and cost estimating.

AG 221, METALS AND WELDING, 3 Credits
Practices of metal working including the use of metal working machines, metal identification, heat treating and metal properties. Fabrication of metals including arc and oxy-acetylene welding and cutting. Lec/lab.

AG 230, INTRODUCTION TO EXTENSION AND ENGAGEMENT, 3 Credits
For students interested in pursuing a career with the OSU Extension Service. An introduction to the OSU Extension Service mission, philosophy, history, organization, structure, administration, program areas, Extension program development, Extension teaching and delivery methods, and the involvement and use of volunteers.
This course is repeatable for 6 credits.

AG 301, *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS, 3 Credits
Designed and presented in partnership with Pacific Northwest Indians and Alaska Natives, focusing on natural ecosystems, differing views, power relationships, policymaking, and gender roles. (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

AG 311, *NATIVE AMERICAN AGRICULTURE, 3 Credits
Explores Native North American agriculture and land management--prehistory of important domesticates such as maize, historic change, and contemporary issues including modern stereotypes, women in agriculture, cultural survival, and both the physical and spiritual significance of these crops in Native American communities and around the globe past and present. (Bacc Core Course) Attributes: CPCD – Core, Pers, Cult Diversity
Available via Ecampus

AG 312, ENGINE THEORY AND OPERATION, 3 Credits
Engine construction, operational theories and principles, lubrication, fuels and oils, emissions and preventive maintenance are taught through the process of small engine lab activities. Engine efficiency theories and measurement are presented.
AG 318, ACCESSING INFORMATION FOR AGRICULTURAL RESEARCH, 1 Credit
Designed for students at a distance to develop library skills and improve access to information used to conduct technical agricultural research.

AG 351, *COMMUNICATING AGRICULTURE TO THE PUBLIC, 3 Credits
Students will explore various outlets for communicating with the public about agriculture using appropriate, professional writing. Additionally, students will articulate their thoughts on controversial issues as well as write feature and editorial pieces promoting positive agricultural practices and people in agriculture. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

AG 391, FARM IMPLEMENTS, 3 Credits
Power farming implements including operation, maintenance, adjustments, calibration and use are covered. Field trips may be required.
Available via Ecampus

AG 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 402, INDEPENDENT STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

AG 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

AG 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 406, SPECIAL PROBLEMS, 1-16 Credits
This course is repeatable for 16 credits.

AG 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

AG 410, INTERNSHIP, 1-16 Credits
A work internship to give students practical on-the-job preparation in any of the main facets of agriculture or related industries. This course is repeatable for 16 credits.
Available via Ecampus

AG 412, AG SAFETY AND HEALTH, 3 Credits
An examination of various hazards associated with agriculture. Control strategies will be explored and prevention methods identified. Hazards examined include machinery, livestock, controlled spaces, pesticides, and other items common to the agricultural workplace. Lec/lab.
Available via Ecampus

AG 421, ^WRITING IN AGRICULTURE, 3 Credits
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Available via Ecampus

AG 425, DEVELOPMENTS IN AGRICULTURAL MECHANICS, 3 Credits
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology. This course is repeatable for 9 credits.

AG 435, PROFESSIONAL PRESENTATIONS IN AGRICULTURE, 3 Credits
Students will learn to effectively create and deliver professional presentations relevant to careers in agriculture and natural resources. This includes developing skills for both formal and informal presentations, using visual aids effectively, and using appropriate strategies to engage various audiences.
Available via Ecampus

AG 445, SOCIAL MEDIA ADVOCACY IN AGRI SCIENCES & NATURAL RESOURCES, 3 Credits
Through practice and application, students develop the ability to communicate effectively in writing using social media and other digital platforms for business purposes, including internal communication, stakeholder engagement, educational messaging, event promotion, and product marketing.

AG 455, *RISK AND CRISIS COMMUNICATIONS IN AG SCI & NATURAL RESOURCES, 3 Credits
Examine potential risk and crisis communications scenarios in agriculture, natural resources and environmental sciences, plus the relevant theories, models, and processes involved in addressing these types of situations effectively. Explores the mitigation, management, and response to risks and crises from a communications perspective with special application to natural resources, along with agricultural and environmental sciences, hazardous situations through completing case studies and creating a risk and crisis communications manual. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus
AG 465, AG SCI AND NATURAL RESOURCES COMMUNICATIONS MINOR CAPSTONE, 2 Credits
Reflect on accumulated knowledge and technical/soft skills gained and conceptualize how to apply communication theories and practices in the context of future agricultural and natural resources careers. Integrate real-life agriculture and natural resources communications scenarios, which will allow for the practice of strategy development, proper implementation, and appropriate assessment methods. Helps package and demonstrate skills verbally and in a portfolio.
Prerequisite: AG 351 with D- or better

AG 492, TECHNOLOGY TRANSFER IN AGRICULTURE, 3 Credits
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 499, SPECIAL TOPICS, 1-4 Credits
Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
This course is repeatable for 12 credits.

AG 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AG 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

AG 518, EXTENSION COURSE IN TEACHER EDUCATION: TECHNICAL, 1-3 Credits
Enables present and prospective teachers of agriculture to continue their professional development on technical topics of current importance.
Equivalent to: AED 518
This course is repeatable for 9 credits.

AG 521, WRITING IN AGRICULTURE, 3 Credits
Students will synthesize their knowledge in various areas of agricultural sciences and analyze how current issues impact the agriculture industry, explore careers in agriculture, and develop their written communication skills. Students will share their ideas and demonstrate their learning primarily in writing.
Available via Ecampus

AG 525, DEVELOPMENTS IN AGRICULTURAL MECHANICS, 3 Credits
Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology.
This course is repeatable for 45 credits.
Available via Ecampus

AG 541, COMMUNITY PROGRAMS IN AGRICULTURE, 3 Credits
Evaluating agricultural education program effectiveness and technical appropriateness. Development of long-range plans for agricultural programs to meet the technical needs of a community.

AG 592, TECHNOLOGY TRANSFER IN AGRICULTURE, 3 Credits
Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change.

AG 808, WORKSHOP, 1-4 Credits
Designed to enhance professionalism and create a knowledge base to increase personal effectiveness. This course will provide a basis for future leadership by synthesizing theoretical knowledge with practical application. Individuals will have the opportunity to explore their own personality, reflect on their leadership ability, and develop the professional skills and networking abilities necessary to become influential leaders in their home, community and profession.
This course is repeatable for 4 credits.

Leadership (LEAD)

LEAD 242, PERSONAL LEADERSHIP DEVELOPMENT, 3 Credits
Examines content related to leadership traits, styles, and effective leadership tactics. An introductory course designed to create awareness and develop the employability skills necessary for participants to be productive contributors in their school, home, community and profession.
Equivalent to: AG 242
Available via Ecampus

LEAD 342, *TEAM AND ORGANIZATIONAL LEADERSHIP, 3 Credits
Examines the planning, implementation and evaluation of organizations, and challenges students in the development of effective communication, group dynamics, conflict management, teambuilding and problem solving. Students will explore the development of successful teams, multiple roles within teams, improving group performance, group decision making, how to manage conflict in teams, enhancing diversity in teams, creating a culture of creativity and innovation, and the evaluation of teams.
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: AG 342
Available via Ecampus

LEAD 401, LEADERSHIP RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus
LEAD 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 410, LEADERSHIP INTERNSHIP, 1-16 Credits
Students apply what they have learned through both the leadership theory and trait/skill development portion of the Leadership minor. This course is repeatable for 16 credits.

Available via Ecampus

LEAD 442, LEADERSHIP SKILLS FOR CAREER SUCCESS, 3 Credits
Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence.
Equivalent to: AG 442
Available via Ecampus

LEAD 443, LEADERSHIP THROUGH CONVERSATIONS, 3 Credits
Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.
Equivalent to: AG 442
Available via Ecampus

LEAD 444, LEADERSHIP MINOR CAPSTONE, 2 Credits
Capstone course for students completing the Leadership minor. Students will reflect on what they have learned through the Leadership minor and how to apply that learning in the context of their future careers.
Equivalent to: AG 444
Recommended: (AG 242 or LEAD 242) and (AG 342 or LEAD 342)

LEAD 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

LEAD 542, LEADERSHIP SKILLS FOR CAREER SUCCESS, 3 Credits
Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence.
Equivalent to: AG 542
Available via Ecampus

LEAD 543, LEADERSHIP THROUGH CONVERSATIONS, 3 Credits
Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.
Equivalent to: AG 543
Available via Ecampus

LEAD 580, LEADING AUTHENTICALLY: FOUNDATIONS OF LEADERSHIP, 3 Credits
The foundational course for students in graduate leadership coursework. Students will explore leadership theories to develop an understanding of how to be an authentic leader. Students will analyze and apply course content in relation to their own personal leadership experiences and gain perspectives and tools to influence their future.

LEAD 581, LEADING OTHERS: ENHANCING TEAM AND ORGANIZATIONAL PERFORMANCE, 3 Credits
A foundational course for group, team, and organizational leadership. Throughout this course, you will become familiar with the necessary conditions for designing effective teams and work groups, best practices and processes needed for maximum productivity, strategies to resolve common issues in teams, and methods to evaluate team performance.

LEAD 582, LEADING CHANGE: LEADING, MOTIVATING, AND EMPOWERING OTHERS, 3 Credits
Examines and synthesizes leadership content to form a personal and professional foundation for being remarkable. Drawing on 15 different being remarkable qualities, students will be challenged to develop and apply the skills needed for leadership success.
Agricultural Education Graduate Major (MS)

Graduate Areas of Concentration

Teacher preparation, leadership, and communication in agriculture

The Department of Agricultural Education and General Agriculture offers course work that serves teachers and leaders in agriculture. The Master of Science and Master of Arts in Interdisciplinary Studies degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension, and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their occupational objectives. A person who completes an Agricultural Education master’s degree is not solely locked into teaching. Potential occupations also include lobbyist, journalist, and Extension work.

Major Code: 1050

Minor Code: 1050

Agricultural Education Graduate Minor

Develop a teaching, pedagogical, leadership development in agriculture minor by working with a departmental advisor.

Minor Code: 1050

Minor Code: 1050

Agricultural Sciences and Natural Resources Communications Minor

A minor in agricultural sciences and natural resources communications prepares students for careers in communications and public service roles in the agricultural, natural resources, forestry, and environmental sciences disciplines. This minor allows for students who may be well-versed in the technical knowledge of their science-based agriculture or natural resources discipline to effectively communicate vital information about agriculture and natural resources to a multitude of audiences. Minor requirements provide students a diverse education combining skills and knowledge in agricultural, environmental and natural resources sciences, the social sciences, speech communication, photography, new media communication, and writing. Students will practice effectively communicating issues, research, policy, products, and regulations in their related fields.

Minor Code: 857

Agricultural Sciences Minor

Also available at LaGrande.

The Agricultural Sciences minor is designed for students who have an interest in agricultural sciences. The minor is ideal for students who want to add more exposure and content (broadly) within agriculture to their primary major.

Minor Code: 106

The minor requirements listed below are subject to the following:

• 27 credit minimum (15 required, 12 upper-division electives).
• Courses required for a major and taken in the major department may not count towards this minor.
• Students may not use variable credit courses toward the minor.
• Courses used to fulfill the requirements must be taken for a letter grade.
• Agricultural elective courses for this minor must be upper-division credits.

### Code | Title | Credits
--- | --- | ---
AG 111 | INFORMATION TECHNOLOGY IN AGRICULTURE | 3
AG 301 | *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS | 3
AG 351 | COMMUNICATING GLOBAL AGRICULTURE & NATURAL RESOURCES ISSUES | 3
AG 412 | AG SAFETY AND HEALTH | 3
LEAD 242 | PERSONAL LEADERSHIP DEVELOPMENT | 3
or LEAD 342 | *TEAM AND ORGANIZATIONAL LEADERSHIP | 3

### Electives

Select 12 credits of upper-division courses, with a minimum of one course from three different areas of study in the College of Agricultural Sciences:

- Animal Sciences
- Applied Economics
- Bioresource Research
- Botany and Plant Pathology
- Crop Science
- Entomology
- Environmental and Molecular Toxicology
- Fisheries and Wildlife
- Food Science and Technology
- Horticulture
- Leadership
- Rangeland Ecology and Management
- Soil Science
- Sustainability

Total Credits 27

* Baccalaureate Core Course (BCC)

Minor Code: 106

Agricultural Sciences Undergraduate Major (BS, HBS)

Also available at LaGrande and via Ecampus.

Major Code: 259

• Demonstrate professional skills/competencies and ability to adapt to diverse audiences and diverse work environments.
• Demonstrate an ability to apply scientific, and computer literacy knowledge.
• Analyze and communicate effectively how agricultural sciences integrate with contemporary, social, economic, political, and environmental issues.

### Code | Title | Credits
--- | --- | ---
AEC 211 | AGRICULTURAL AND FOOD MANAGEMENT | 4
AG 111 | INFORMATION TECHNOLOGY IN AGRICULTURE | 3
AG 421 | *WRITING IN AGRICULTURE | 3
Select one of the following: 4
SOIL 205 & SOIL 206 | SOIL SCIENCE and *SOIL SCIENCE LABORATORY FOR SOIL 205 (Corvallis) | 4
CSS 205 | *SOIL SCIENCE (Ecampus) | 4
CSS 305 | PRINCIPLES OF SOIL SCIENCE (EOU) | 4
Select 9-12 credits from the following: 9-12
AED 235 | INTRODUCTION TO AGRICULTURAL EDUCATION | 4
AED 313 | THEORY AND PRACTICUM III: FIELD | 4
AED 325 | PLANNING AND DELIVERING NON-FORMAL AGRICULTURAL EDUCATION | 4
AG 199 | SPECIAL STUDIES (Orientation to Agricultural Sciences Major) | 4

Upper-Division Electives-College of Agricultural Sciences course 4

Credits 16

AGRI 411 INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL
AGRI 411 INTRODUCTION TO FOOD SYSTEMS: LOCAL TO GLOBAL
ANTH 261/FCSJ FOOD IN AMERICAN CULTURE 261
ANTH 361/FCSJ FOOD JUSTICE 361
ANTH 486/FCSJ ANTHROPOLOGY OF FOOD 486
BOT 325 INTERSECTIONS BETWEEN PLANTS AND HUMANITY
CROP 330 WORLD FOOD CROPS
FCSJ 454 INTERNATIONAL PERSPECTIVES ON FOOD SYSTEMS
FW 224 FOOD FROM THE SEA
FW 225 GLOBAL CRISIS IN RESOURCE ECOLOGY
FW 340 MULTICULTURAL PERSPECTIVES IN NATURAL RESOURCES
FW 345 WILDLIFE IN AGRICULTURAL ECOSYSTEMS
GEOR 105 GEOGRAPHY OF THE NON-WESTERN WORLD
GEOR 240 HUMAN DIMENSIONS OF CLIMATE CHANGE
GEOR 330 GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION
GEOR 441 INTERNATIONAL WATER RESOURCES MANAGEMENT
HIST 416 FOOD IN WORLD HISTORY
NUTR 216 FOOD IN NON-WESTERN CULTURE
PHL 443/REL 443 WORLD VIEWS AND ENVIRONMENTAL VALUES
PPOL 447 INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE
PS 205 INTRODUCTION TO INTERNATIONAL RELATIONS
PS 470 GLOBAL FOOD POLITICS AND POLICY
PS 477 INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY
SOC 381 SOCIAL DIMENSIONS OF SUSTAINABILITY
SUS 103 INTRODUCTION TO CLIMATE CHANGE

External Learning Experience
Select 3-6 credits from the following courses: 3-6
AG 401 RESEARCH
AG 405 READING AND CONFERENCE
AG 406 SPECIAL PROBLEMS
AG 410 INTERNSHIP
FCSJ 422 INTERCULTURAL LEARNING COMMUNITY

Electives
Select a minimum of 10 credits from the following areas of study in the College of Agricultural Sciences: 10

- AEC Applied Economics
- AG General Agriculture
- AGRI College of Agricultural Sciences
- ANS Animal Sciences
- BEE Biological and Ecological Engineering
- BOT Botany and Plant Pathology
- BRR Bioresource Research
- CSS Crop and Soil Science
- CROP Crop Science
- ENT Entomology
- FST Food Science Technology
- FW Fisheries and Wildlife
- HORT Horticulture
- PBG Plant Breeding and Genetics
- RNG Rangeland Ecology and Management
- SOIL Soil Science
- SUS Sustainability
- TOX Toxicology

Total Credits 27-33

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Comparative International Agriculture Minor

Also available via Ecampus.

The CIA minor provides students with formal instruction in international agricultural concepts and practical experiences through global awareness coursework, language immersion via study/research abroad, and/or international fieldwork. The 27-credit curriculum prepares students for successful postbaccalaureate international careers, or those seeking graduate studies in international agriculture programs. Students critically examine current international agricultural issues and/or diversity and communications. To be eligible to apply for this minor, students must have a cumulative 2.0 GPA or higher and be in good standing with Oregon State University. Students must also be in a declared major. Participants in this minor program are able to:

1. Research the major agricultural themes and issues of another nation besides the United States of America.
2. Examine trade information to determine the key elements of agricultural trade agreements between the USA and another country.
3. Analyze the effectiveness of agricultural practices of another nation besides the USA.
4. Investigate the effect of broad social, economic, and environmental forces upon the agricultural industry of another nation besides the USA.

Minor Code: 477

All 27 credits for the minor must be completed with a C or higher grade. Students can complete 12-18 upper-division credits and a maximum of 14 lower-division credits.

Global Core
Select 12-15 credits from the following courses: 12-15

AG 301 ECO SYSTEM SCIENCE OF PACIFIC NW INDIANS
Leadership Minor

Also offered via Ecampus.

The Leadership minor is designed for all undergraduates interested in developing premier leadership, enhancing professional competencies, and fostering the skills necessary to meet the local, national, and international needs of our society. The Leadership minor is centered on leadership theory (education), trait/skill development (training), and application (development). It is designed to allow students to apply the coursework in a relevant and relational manner.

Specifically, the course work focuses on major theories of leadership including contingency, path-goal, leader-member exchange theories as well as transformational, authentic, team, and servant leadership. Within each theory and type of leadership, students will be challenged to consider leadership ethics, leadership culture, gender in leadership, and integration of leadership into personal, civic, and social change. In addition, the elective courses allow students to pursue the development of trait and skill competencies necessary for employment in their chosen field. Students will then have the opportunity to directly apply their learning through a leadership internship, service learning project, or research opportunity.

Animal and Rangeland Sciences

The multiple facets of Animal Sciences provides current information on the different production methods involved in the care and management of companion animals, livestock, and poultry. These facets address the production of meat, milk, eggs, wool, and other animal services such as companionship, work, and recreation. In addition, the department addresses the care/well-being of animals as it impacts and enhances the human/animal bond along with the production levels of those animals. Essential to this information is the knowledge generated from the field of animal behavior/bioethics, genetics, nutrition, reproduction, and physiology.

The curriculum designates university and departmental requirements for the BS degree in Animal Sciences. In addition, there are five specialized program options students can choose to pursue. These include: Animal Behavior, Animal BioHealth/Pre-Professional, Animal Production, Equine, and Rangeland Sciences. Diverse teaching and research programs allow students to gain skills, knowledge, and practical experience. This will prepare students graduating from the program to pursue an assortment of employment opportunities. Potential employment areas may include farm and ranch management; product quality assessment of meat, poultry, eggs and milk; the Cooperative Extension Service; sales or technical service with commercial feed, seed, and chemical companies and pharmaceutical firms; agricultural loan officer; government agency positions at local, state, and federal levels; animal welfare auditing; animal behavior consulting; business management; as well as journalism, mass media, and public policy. In addition, students are prepared to go on to advanced studies in animal sciences, veterinary medicine, pharmacy schools, human medicine, nursing schools, dental schools, and education.

Graduate work leading to MS or PhD degrees in Animal Sciences may involve research projects that concentrate on areas such as animal nutrition, dairy production, embryo physiology, endocrinology, growth and development, livestock management, nutritional biochemistry, and reproduction physiology.
Cooperative Programs
Students transferring after one or two years at a community college should also be able to complete the requirements for a BS after three or two years, respectively.

Rangeland Sciences
Rangeland Sciences consist of the study and sustainable management of rangelands across a variety of biomes, from arid deserts to mesic grasslands, to tropical savannahs. The program takes an interdisciplinary approach to provide advanced scientific knowledge regarding multiple ecological processes and social drivers influencing rangeland ecosystems around the globe. Students in Rangeland Sciences gain the skills and knowledge needed to fully understand and effectively manage rangelands for improved productivity and enhanced ecosystem resilience. Students graduating from the program will be able to integrate contemporary rangeland ecology and management principles into systems-based decision-making frameworks to promote ecological resilience, sustainable societies, and thriving economies in rangeland ecosystems. The Rangeland Sciences degree program is available in both on-campus and e-campus environments.

The curriculum below includes university and departmental requirements for the BS degree in Rangeland Sciences. Besides the base program, it offers specialization options in Sustainable Rangeland Ecosystem Stewardship, Habitat Management, Pastoral Systems of the World, and Sustainable Livestock Ranching. It also provides the opportunity for doing a minor in the subject of interest for the student (e.g., Animal Sciences).

There are a variety of scholarships and student employment opportunities available to students in the Rangeland Sciences program. There are opportunities all year along for students to gain practical experience in various research projects conducted by faculty in the program. Also, there are several options for summer employment with private industry, government agencies, and on range research projects.

The Rangeland Sciences program is accredited by the professional Society for Range Management (SRM). Accreditation ensures that graduates from the program have the necessary knowledge to join the rangeland science profession regardless of where in the world they may end up launching a job. Accreditation with SRM also helps to build a map to Federal OPM course requirements for multiple 400-series Biological Sciences positions (i.e., 401 Natural Resources Management and Biological Sciences; 408 Ecology Series; 454 Range Management Series; and 457 Soil Conservation Series). This is an important feature of the Rangeland Sciences program as many students go on to careers with federal or state agencies.

Graduate work leading to MAIS, MS, or PhD degrees in Rangeland Sciences may involve research on habitat management and restoration, watershed and riparian systems management, land use-environment relationships, ecohydrology, agroecology, ecophysiology, pastoral systems, and landscape ecology.

Undergraduate Programs
Majors
• Animal Sciences (p. 158)
  Options:
  • Animal Behavior
  • Animal BioHealth/Pre-Professional

Graduate Programs

Assistant Professors Bates, Boyd, Davies, Ganskopp, George, James, Louhaichi, McLean, Shelye, Svejcar
**Animal Science (ANS)**

**ANS 100, ORIENTATION TO ANIMAL AND RANGELAND SCIENCES, 1 Credit**

Designed to provide incoming Animal and Rangeland Sciences students an introduction to college life at OSU with an emphasis on the faculty, facilities, services, and the curricula of the Department of Animal and Rangeland Sciences.

**ANS 121, *INTRODUCTION TO ANIMAL SCIENCES, 4 Credits**

Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Equivalent to:** ANS 121H

Available via Ecampus

**ANS 121H, *INTRODUCTION TO ANIMAL SCIENCES, 4 Credits**

Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator

**Equivalent to:** ANS 121

**ANS 207, SOPHOMORE SEMINAR, 2 Credits**

Examination of career opportunities in animal sciences.

Available via Ecampus

**ANS 215, BEEF/DAIRY INDUSTRIES, 3 Credits**

Introduction to beef and dairy industries; history, current industry status, and demonstration and practice of basic husbandry skills.

Recommended: ANS 121

**ANS 216, SMALL RUMINANT/Swine INDUSTRIES, 3 Credits**

Introduction to the small ruminant and swine industries including history, current status and production practices, with demonstration and hands-on experience of basic husbandry practices.

Recommended: ANS 121

**ANS 217, POULTRY INDUSTRIES, 3 Credits**

Familiarization of the organizational structure and marketing arrangement of poultry industries; hands-on managerial techniques, practices and procedures carried out by the poultry industries.

**ANS 220, INTRODUCTORY HORSE SCIENCE, 3 Credits**

Introduction to horses, their history, breeds, form and function, performance evaluation, current industry status, and general management.

Recommended: ANS 121

**ANS 223, EQUINE MARKETING, 2 Credits**

Course covers practical concepts of equine marketing. Emphasis on market assessment, targeting buyers, marketing and advertising strategies, hands-on experience in product preparation and presentation, marketing legalities.

Recommended: ANS 121, ANS 220 and ANS 192

**ANS 231, LIVESTOCK EVALUATION, 3 Credits**

Focuses on an individual animal’s economic merit as compared to a sample group. Visual appraisal, performance data, and carcass merit are stressed. Includes the evaluation of both market and breeding animals. The livestock species of concentration include beef cattle, swine, sheep, and meat goats. Lec/lab.

Recommended: ANS 121

**ANS 251, PRINCIPLES OF ANIMAL FOODS TECHNOLOGY, 3 Credits**

Processing of meat, milk and eggs into human food products. Lec/lab.

Recommended: ANS 121

**ANS 280, COMPANION ANIMAL MANAGEMENT, 4 Credits**

An introduction to the challenges, responsibilities, and benefits of interaction with selected companion animals. Topics covered will provide an overview of the human-animal bond, the position of companion animals in society, ethical issues of pet ownership and potential career opportunities. In addition, the course will serve as an introduction to preventive care and normal behavior of dogs, cats, and selected exotic pets. As the Department of Animal and Rangeland Sciences curriculum offers courses addressing equine care and husbandry, horses will not be discussed in this class.

Available via Ecampus

**ANS 302, COMMON DISEASES OF COMPANION ANIMALS, 4 Credits**

An introduction to common diseases of selected companion animals. Emphasis will be placed on identifying predisposing factors, clinical signs, common diagnostic procedures and potential implications for human health. A $10 course fee will be required. Lec/rec.

**Prerequisite:** (((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D] or BI 212H [D-J]) and (BI 213 [D] or BI 213H [D-J])) or ((BI 221 [D-] or BI 221H [D-J]) and (BI 222 [D-] or BI 222H [D-J]) and (BI 223 [D-] or BI 223H [D-J]))) and CH 121 [D-] and CH 122 [D-] and CH 123 [D-]

Recommended: ANS 280

Available via Ecampus

**ANS 311, PRINCIPLES OF ANIMAL NUTRITION, 3 Credits**

Classification, digestion, absorption, and metabolism of nutrients in animals; consequences of nutritional deficiencies and toxicities.

**Prerequisite:** (((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D] or BI 212H [D-J]) or ((BI 221 [D-] or BI 221H [D-J])) and (BI 222 [D] or BI 222H [D-J]) and (BI 223 [D] or BI 223H [D-J]) and (BI 223H [D-J]))

Available via Ecampus
ANS 313, APPLIED ANIMAL NUTRITION: FEEDS AND RATION FORMULATION, 4 Credits
Discusses topics relevant to feedstuff identification and nutrient analysis, feed processing and formulation of balanced animal diets based on nutrient requirements. Provides students hands-on experiences in identifying various feedstuffs and formulating rations based on the nutrient composition of those feedstuffs.
Recommended: MTH 111
Available via Ecampus

ANS 314, ANIMAL PHYSIOLOGY, 4 Credits
Biological basis of animal performance; describes how networks of cells act cooperatively to enable locomotion, provide a stable internal environment, allocate resources, remove metabolic end-products, and counteract microorganisms.
Recommended: General principles of biology equivalent to BI 211, BI 212, BI 213 and junior standing or higher
Available via Ecampus

ANS 315, *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE, 3 Credits
Discussion of contentious issues including role of animal products and human health; use of hormones and antibiotics; new animal biotechnologies; animal rights/welfare; livestock grazing on public lands.
(Bacc Core Course).
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

ANS 316, REPRODUCTION IN DOMESTIC ANIMALS, 4 Credits
Anatomy and physiology of mammalian and avian reproductive systems; fertilization, embryonic and fetal development, placentation and parturition; reproductive technologies. Lec/rec.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) or ((BI 221 with D- or better or BI 221H with D- or better) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))) and (CH 121 [D-] or CH 221 [D-] or CH 231 [D-] or CH 231H [D-])
Recommended: ANS 121
Available via Ecampus

ANS 317, REPRODUCTION IN DOMESTIC ANIMALS LABORATORY, 1 Credit
Gross and microscopic anatomy of the reproductive tract; semen collection, evaluation and extension; evaluation of fertilization, embryo and fetal development and placentation. Lec/lab.
Prerequisite: ANS 316 (may be taken concurrently) with D- or better
Available via Ecampus

ANS 320, PRINCIPLES OF COMPANION ANIMAL NUTRITION, 3 Credits
Learn about nutrients, the digestive process, and the application of nutritional sciences to the health and welfare of companion animals. Introduction to the metabolic basis and practical preventative management for nutritional diseases in companion animals.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-])) and (BI 223 [D-] or BI 223H [D-]))
Available via Ecampus

ANS 321, AVIAN EMBRYO, 4 Credits
Discussion and experimentation involving the development and the environmental requirements for the artificial incubation of avian embryos. Lec/lab. Offered even-numbered years.
Recommended: ANS 121 and ANS 217 and BI 211

ANS 333, EQUINE STABLE MANAGEMENT, 3 Credits
Discusses developing a business plan, financial statements, and ratios, budgeting, financial planning, taxation, and employment issues within the current equine industry.
Prerequisite: ANS 220 with D- or better
Recommended: ANS 222

ANS 335, EQUINE HEALTH AND DISEASE, 3 Credits
Recognition of common diseases and disorders including their cause, treatment and prevention. Management of internal and external parasites. Recognizing common lameness issues.
Available via Ecampus

ANS 341, ANIMAL BEHAVIOR AND COGNITION, 3 Credits
Survey, discuss, and explore principles of animal behavior and cognition from a comparative perspective, taking into account the interacting influences of biology, environment, and life experience on the individual and group behavior of animals across species. Aspects of animal cognition, including reasoning, perception, memory and personality, that play an important role in animal behavior will also be addressed.
Prerequisite: BI 102 with D or better or (BI 213 with D or better or BI 213H with D or better) or (BI 222 with D or better or BI 222H with D or better) and (BI 222 [D] or BI 222H [D]) and (BI 223 [D] or BI 223H [D])
Available via Ecampus

ANS 351, ADVANCED PRINCIPLES OF ANIMAL FOODS TECHNOLOGY, 4 Credits
Provides in-depth coverage of both fresh and processed meats and eggs into products suitable for human consumption.
Recommended: ANS 251
ANS 378, ANIMAL GENETICS, 4 Credits
Fundamentals of inheritance, principles of genetic segregation, population and quantitative genetics, response to natural selection and artificial manipulation of populations.
Prerequisite: BI 211 with D- or better or BI 211H with D- or better or BI 212 with D- or better or BI 212H with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 222 with D- or better or BI 222H with D- or better or BI 223 with D- or better or BI 223H with D- or better
Recommended: ANS 121 and ST 351
Available via Ecampus

ANS 380, PRINCIPLES OF ANIMAL ANATOMY AND PHYSIOLOGY, 3 Credits
An introductory course in animal anatomy to provide a foundation for advanced courses in the Animal Science curriculum. Emphasis is on acquisition of a basic knowledge of minute and gross anatomical structures, their operation, and integration. Begins with anatomical nomenclature such as body planes and directional terms then covers the following tissues and organ systems: epithelium, connective tissue, blood and bone marrow, bone/cartilage, muscle tissue, nervous tissue, digestive system, circulatory system, reproductive system, urinary system, and respiratory system.
Prerequisite: (( (BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D]) or (BI 221 [D] or BI 221H [D]) and (BI 222 [D] or BI 222H [D]) and (BI 223 [D] or BI 223H [D]) ) ) )
Available via Ecampus

ANS 385, FOUNDATIONS OF MAMMALIAN HISTOLOGY, 3 Credits
Provides a basic knowledge of mammalian microscopic anatomy. Emphasis will be on the appearance, organization and function of minute anatomical structures that can only be observed with the help of a visual enhancer, such as a microscope. Covers basic histological techniques and histology of the following tissues and organ systems: epithelium, connective tissue, bone/cartilage, blood, muscle tissue, nervous tissue, circulatory system, digestive system, reproductive system, urinary system, respiratory system, immune system, integument, eye and ear. Also covers gametogenesis, fertilization, and early development of the vertebrate embryo. Lec/rec.
Prerequisite: (( (BI 211 with C or better or BI 211H with C or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C]) or (BI 221 [C] or BI 221H [C]) and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]) ) ) )
Available via Ecampus

ANS 390, GROSS ANATOMY OF DOMESTIC ANIMALS, 4 Credits
Provides a foundation for advanced courses in the Animal Sciences curriculum. Emphasis on gaining knowledge of mammalian anatomy. Lectures cover anatomical nomenclature, structure, operation, and integration of major organ systems. The dog is used as the general model while comparative domestic animal anatomy is also covered. Lec/lab.
Prerequisite: (( (BI 211 with D or better or BI 211H with D or better) and (BI 212 [D] or BI 212H [D]) and (BI 213 [D] or BI 213H [D]) or (BI 221 [D] or BI 221H [D]) and (BI 222 [D] or BI 222H [D]) and (BI 223 [D] or BI 223H [D]) ) )

ANS 401, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ANS 405, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 407, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 410, ANIMAL SCIENCE INTERNSHIP, 1-12 Credits
On- or off-campus, occupational work experience supervised by the department. Graded P/N.
This course is repeatable for 16 credits.
Available via Ecampus

ANS 420, ^ETHICAL ISSUES IN ANIMAL AGRICULTURE, 3 Credits
Students are provided with an opportunity to discuss, debate and write extensively about current, relevant, and controversial social issues dealing with modern animal agriculture. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC
Available via Ecampus

ANS 427, APPLIED PHYSIOLOGY OF REPRODUCTION, 5 Credits
Principles, techniques and recent development in semen collection, evaluation, extension and preservation; artificial insemination, estrus detection and synchronization; pregnancy diagnosis and embryo transfer.
Prerequisite: ANS 316 with C or better and ANS 317 [C]
Equivalent to: ANS 327

ANS 430, EQUINE SYSTEMS I: EXERCISE SCIENCE, 4 Credits
Seniors and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.
Recommended: ANS 314

ANS 431, EQUINE SYSTEMS II: NUTRITION, 3 Credits
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.
Recommended: ANS 313
ANS 432, EQUINE SYSTEMS III: REPRODUCTION, 4 Credits
Senior and graduate students explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training of laboratory techniques. Lec/lab.
Prerequisite: ANS 220 with D- or better and ANS 316 [D-]
Recommended: ANS 327

ANS 433, POULTRY MEAT PRODUCTION SYSTEMS, 3 Credits
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378

ANS 434, EGG PRODUCTION SYSTEMS, 3 Credits
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378

ANS 435, APPLIED ANIMAL BEHAVIOR, 3 Credits
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.
Recommended: ANS 314 and BI 350 or Z 350

ANS 436, SHEEP PRODUCTION SYSTEMS, 3 Credits
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.
Recommended: ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 439, DAIRY PRODUCTION SYSTEMS, 4 Credits
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.
Recommended: ANS 215 and ANS 313 and ANS 316 and ANS 378

ANS 440, DAIRY PRODUCTION SYSTEMS, 3 Credits
Decision case analysis or special topics in application of dairy management principles.
Prerequisite: ANS 439 with D- or better

ANS 441, TOPICS IN ANIMAL LEARNING, 3 Credits
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Recommended: ANS 435 or ANS 535 and (BI 350 or Z 350) and BI 213

ANS 443, BEEF PRODUCTION SYSTEMS: COW/CALF, 4 Credits
Fundamentals of nutrition, reproductive physiology, health and care, and financial management of beef cow/calf operations in the western U.S. Discussions will focus on critical management stages and practices common to the beef cow/calf production cycle. Taught at EOU La Grande campus only.
Recommended: ANS 121 and ANS 313 and (BA 321 or AEC 211)

ANS 444, BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT, 4 Credits
A continuation of the study of beef cattle management. Content will encompass the growth and development of weaned calves through slaughter for consumer beef production, with particular focus on the management of growing and yearling cattle in forage-based (stocker cattle) and drylot (feedlot) systems. Taught at EOU La Grande campus only.
Recommended: ANS 121 and ANS 313 and (BA 321 or AEC 211)

ANS 445, BEEF PRODUCTION SYSTEMS, 4 Credits
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.
Recommended: ANS 313 and ANS 316 and (BA 321 or AEC 211)

ANS 446, GRAZING LIVESTOCK PRODUCTION, 4 Credits
Equips non-animal science majors with basic ruminant livestock (beef cattle, sheep and meat goat) production knowledge, so they may communicate and collaborate effectively with livestock producers.
Prerequisite: ANS 121 with D- or better
Available via Ecampus

ANS 448, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: CROP 448, RNG 448
ANS 452, LIVESTOCK HOUSING AND WASTE MANAGEMENT, 3 Credits
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization.
Available via Ecampus

ANS 456, COMPANION ANIMAL PRODUCTION SYSTEMS, 3 Credits
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.
Prerequisite: (ANS 313 with D- or better and ANS 316 (may be taken concurrently) [D-] and ANS 317 (may be taken concurrently) [D-] and ANS 378 [D-])
Available via Ecampus

ANS 460, SWINE PRODUCTION SYSTEMS, 4 Credits
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of swine from conception through farrowing, weaning, and the growing/finishing phases. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.
Recommended: ANS 121 and ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ANS 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

ANS 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 507, GRADUATE SEMINAR, 1 Credit
Section 1: Seminar/general for all graduate students. Preparation of effective visual aids. Practice explaining the validity or significance of experimental results to an informed audience. Section 2: Seminar/ endocrinology, for graduate students interested in physiology.
This course is repeatable for 99 credits.

ANS 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ANS 509, TEACHING PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

ANS 511, DIGESTIVE PHYSIOLOGY AND NUTRITION OF RUMINANT ANIMALS, 4 Credits
Anatomy and physiology of the ruminant digestive tract including rumen microbiology and digestive processes. Nutritional biochemistry and physiology of ruminants. Feed chemistry, feed intake and principles of ration balancing. Theory of energy and protein metabolism.
Recommended: ANS 311 or ANS 313

ANS 512, MONOGASTRIC AND POULTRY NUTRITION, 3 Credits
Anatomical differences in digestive tracts of monogastrics; nutritional biochemistry of poultry; practical feeding of avian species; least-cost ration techniques; techniques for determining nutrient needs of monogastrics.
Recommended: ANS 311 and ANS 313

ANS 515, REVIEW OF APPLIED RUMINANT NUTRITION RESEARCH TECHNIQUES, 3 Credits
Review and discussion and applied techniques and methodology used for ruminant nutrition research.

ANS 530, EQUINE SYSTEMS I: EXERCISE SCIENCE, 4 Credits
Senior and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab.
Recommended: ANS 314

ANS 531, EQUINE SYSTEMS II: NUTRITION, 3 Credits
Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses.
Recommended: ANS 313

ANS 532, EQUINE SYSTEMS III: REPRODUCTION, 4 Credits
Designed for seniors and graduate students to explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training in laboratory techniques. Lec/lab.
Equivalent to: BI 532
Recommended: ANS 220 and ANS 316 and ANS 327
ANS 533, POULTRY MEAT PRODUCTION SYSTEMS, 3 Credits
Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378

ANS 534, EGG PRODUCTION SYSTEMS, 3 Credits
Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years.
Recommended: ANS 217 and ANS 313 and ANS 316 and ANS 378

ANS 535, APPLIED ANIMAL BEHAVIOR, 3 Credits
Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab.
Recommended: ANS 314 and BI 350 or Z 350

ANS 536, SHEEP PRODUCTION SYSTEMS, 3 Credits
Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool.
Recommended: ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 538, BIOLOGY OF LACTATION, 3 Credits
Physiological and environmental factors affecting mammary gland development and function. Offered alternate years.
Recommended: Z 431 or Z 531

ANS 539, DAIRY PRODUCTION SYSTEMS, 4 Credits
Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle.
Recommended: ANS 215 and ANS 313 and ANS 316 and ANS 378

ANS 540, DAIRY PRODUCTION SYSTEMS, 3 Credits
Decision case analysis or special topics in application of dairy management principles.
Recommended: ANS 439

ANS 541, TOPICS IN ANIMAL LEARNING, 3 Credits
Explore when and how the behavior of animals can be shaped by the environment, individual experiences, and interactions with other animals (including humans).
Recommended: BI 211 and BI 212 and BI 213 and (ANS 435 or ANS 535) and (BI 350 or Z 350)

ANS 543, BEEF PRODUCTION SYSTEMS: COW/CALF, 3 Credits
Fundamentals of nutrition, reproductive physiology and health programs and their applications in the care and management of beef cattle. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only.
Recommended: ANS 315 and ANS 313 and ANS 316 and ANS 378

ANS 544, BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT, 3 Credits
Continuation of the study of beef cattle management. Students will practice decision-making processes using area beef cattle operations as case studies. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only.
Recommended: ANS 443 or ANS 543

ANS 545, BEEF PRODUCTION SYSTEMS, 4 Credits
Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged.
Recommended: ANS 313 and ANS 316 and ANS 317 and ANS 378

ANS 548, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: CROP 548, RNG 548

ANS 550, ORGANIC ANIMAL PRODUCTION SYSTEMS, 3 Credits
Topics include the principles of livestock production, legislation, animal welfare, and marketing of organic production systems. Course emphasizes principles, concepts, and techniques of organic and sustainable production of animals.
Available via Ecampus
ANS 552, LIVESTOCK HOUSING AND WASTE MANAGEMENT, 3 Credits
Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization. Offered alternate years.

ANS 556, COMPANION ANIMAL PRODUCTION SYSTEMS, 3 Credits
Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness.
Recommended: ANS 313 and ANS 378 and completion or concurrent enrollment in ANS 316 and ANS 317

ANS 560, LIPID METABOLISM, 3 Credits
Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism in various tissues and metabolism of eicosanoids. Offered alternate years.
Equivalent to: NUTR 560
Recommended: BB 452 and BB 492

ANS 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ANS 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ANS 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ANS 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ANS 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ANS 607, GRADUATE SEMINAR, 1 Credit
This course is repeatable for 99 credits.

ANS 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ANS 609, TEACHING PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

ANS 662, HORMONE ACTION, 3 Credits
Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. Offered every other year, winter term.
Prerequisite: BB 551 with C or better or BB 592 with C or better
Equivalent to: PHAR 662

ANS 673, BIOLOGY OF MAMMALIAN REPRODUCTION, 4 Credits
Physiological, neuroendocrine, endocrine and environmental factors that regulate reproduction of mammals. Offered alternate years.
Equivalent to: BI 673
Recommended: ANS 316 and BB 350

ANS 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Rangeland Ecology & Management (RNG)
RNG 121, *INTRODUCTION TO WILDLAND ECOLOGY, 4 Credits
Ecological principles will be applied to understand contemporary issues related to wildlands, specifically the rangeland biomes that comprises over 50% of the Earth’s surface (FAO, SRM, USDA ERS). Topics to be covered fall into the following categories: Fundamentals of Ecology; Animals (wildlife & livestock); Disturbance (e.g., invasive species, fire, mineral extraction, etc.); Ecosystem Goods & Services (e.g., carbon sequestration, watersheds, biodiversity, recreation, etc.). The course will largely focus on U.S. wildlands, however a portion will examine the ecology and issues of international rangelands in Africa, Eurasia, Australia, and South America. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Available via Ecampus

RNG 299, SPECIAL TOPICS, 1-16 Credits
Equivalent to: RNG 299H
This course is repeatable for 16 credits.

RNG 299H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: RNG 299
This course is repeatable for 16 credits.

RNG 341, RANGLAND ECOLOGY AND MANAGEMENT, 3 Credits
Nature and management of rangelands. Integrated land use with emphasis on plant-animal-soil interactions.
Equivalent to: RNG 241
Available via Ecampus

RNG 351, RANGE ECOLOGY I-GRASSLANDS, 3 Credits
Principles and terminology of grassland ecology. Addresses the spatial-temporal dynamics of structure, function, and process in North American grassland ecosystems. Water, nutrient cycles and energy pathways are explored in context of the variable driving forces of climate (drought), herbivory, and fire.
Recommended: (BOT 313 [D-] and RNG 341 [D-])
Available via Ecampus
RNG 352, RANGE ECOLOGY II-SHRUBLANDS, 3 Credits
Introduces the ecology of shrublands using an autecological approach. Explores the effects of stressors such as temperature, drought, fire, and herbivory on plant morphology, physiology, reproduction, and growth. Covers life histories of common shrubs and descriptions of shrubland communities used to promote understanding of autecological principles.
Recommended: BOT 313 and RNG 341
Available via Ecampus

RNG 353, WILDLAND PLANT IDENTIFICATION, 4 Credits
Students will learn how to identify approximately 100 plant species found in wildlands of North America and Mexico. Individual plant species ecology, basic plant anatomy and identification characteristics observable only through a microscope or dissecting scope, and how to use a dichotomous key for plant ID will also be covered.
Equivalent to: RNG 253
Available via Ecampus

RNG 355, DESERT WATERSHED MANAGEMENT, 4 Credits
A systems-based understanding of hydrologic processes in arid and semiarid landscapes. The class is focused on gaining knowledge of multiple ecological and hydrological interactions occurring in dryland watersheds and on discussing practical methodology aimed to enhance site productivity and ecosystem resilience. Emphasis is placed on land use effects on watershed function; monitoring of soil, water, and vegetation variables; and methods of rehabilitation of degraded landscapes. The course has a strong experiential learning component through a series of ‘hands-on’ practicums and a field trip to a semiarid location in eastern Oregon. Lec/lab.
Available via Ecampus

RNG 399, SPECIAL TOPICS, 1-16 Credits
May be repeated for a total of 16 credits. This course is repeatable for 16 credits.

RNG 403, SENIOR THESIS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

RNG 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits. Available via Ecampus

RNG 411, ADVANCED PLANT ID, 2 Credits
Advanced rangeland plant taxonomy. This course is repeatable for 16 credits.

RNG 421, WILDLAND RESTORATION AND ECOLOGY, 4 Credits
Emphasis is placed on understanding the ecology of arid and semiarid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.
Recommended: Course work in soils and ecology
Available via Ecampus

RNG 441, RANGELAND ANALYSIS, 4 Credits
Techniques used to describe vegetation in shrublands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods.
Recommended: ST 351 or ST 351H
Available via Ecampus

RNG 442, RANGELAND-ANIMAL RELATIONS, 4 Credits
Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiography, and their effects on management of rangeland-animal resources.
Available via Ecampus

RNG 448, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSTLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 448, CROP 448

RNG 455, RIPARIAN ECOHYDROLOGY AND MANAGEMENT, 4 Credits
A systems approach to study ecological and hydrological relationships occurring in riparian ecosystems. The class is focused on gaining knowledge of multiple connections between soil, water, and terrestrial vegetation occurring in riparian systems. Emphasis is placed on land use effects on the riparian ecologic and hydrologic function, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e., fish, wildlife, livestock, aesthetics, recreation, and silviculture).
Recommended: RNG 355
Available via Ecampus
RNG 457, HABITAT ANALYSIS 1: HABITAT USE AND MOVEMENT, 3 Credits
Effective habitat management necessitates an understanding of how animals use and move through the landscape, including rangelands. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on site selection of terrestrial animals (wild and domestic). However, topics covered in this course are broadly analogous to other ecosystems. Emphasis will be placed on analysis of habitat use (space use) and animal movement from multiple study designs.
Prerequisite: FW 251 with D- or better and RNG 341 [D-] and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])
Available via Ecampus

RNG 458, HABITAT ANALYSIS 2: ABUNDANCE, OCCUPANCY AND DEMOGRAPHY, 3 Credits
Habitat influences abundance, occupancy, and demographic rates of wildlife. Wildlife management is often a component of land management and both benefit from land stewards that have an understanding of how habitat characteristics influence the occupancy, abundance, and performance of wildlife within an area. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on abundance, occupancy, and demographic rates of terrestrial animals.
Prerequisite: FW 251 with D- or better and RNG 341 [D-] and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])

RNG 470, PASTORAL SYSTEMS OF THE WORLD, 4 Credits
Description and evaluation of ecosystems which support grazing animals and pastoralists. Biology, ecology and management of these landscapes will be explored through climate, soils, and plant communities and human-livestock interactions. The historic role of trade and contemporary challenges to the ecological, social and economic sustainability of pastoral systems will be examined.

RNG 490, RANGELAND MANAGEMENT PLANNING, 4 Credits
Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints affecting decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.
Available via Ecampus

RNG 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

RNG 503, MASTER’S THESIS, 1-16 Credits
This course is repeatable for 999 credits.

RNG 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

RNG 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 507, SEMINAR, 1-2 Credits
This course is repeatable for 16 credits.

RNG 521, WILDLAND RESTORATION AND ECOLOGY, 4 Credits
Emphasis is placed on understanding the ecology of arid and semi-arid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.
Available via Ecampus

RNG 541, RANGELAND ANALYSIS, 4 Credits
Techniques used to describe vegetation in shrub-lands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods.
Recommended: ST 351

RNG 542, RANGELAND-ANIMAL RELATIONS, 4 Credits
Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiography, and their effects on management of rangeland-animal resources.
Recommended: RNG 341
Available via Ecampus

RNG 548, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 548, CROP 548
RNG 555, RIPARIAN ECOHYDROLOGY AND MANAGEMENT, 4 Credits
A systems approach to study ecological and hydrological relationships occurring in riparian ecosystems. The class is focused on gaining knowledge of multiple connections between soil, water, and terrestrial vegetation occurring in riparian systems. Emphasis is placed on land use effects on the riparian ecologic and hydrologic function, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e., fish, wildlife, livestock, aesthetics, recreation, and silviculture).
Recommended: RNG 355
Available via Ecampus

RNG 557, HABITAT ANALYSIS 1: HABITAT USE AND MOVEMENT, 3 Credits
Effective habitat management necessitates an understanding of how animals use and move through the landscape, including rangelands. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on site selection of terrestrial animals (wild and domestic). However, topics covered in this course are broadly analogous to other ecosystems. Emphasis will be placed on analysis of habitat use (space use) and animal movement from multiple study designs.
Recommended: ST 511 and ST 512
Available via Ecampus

RNG 558, HABITAT ANALYSIS 2: ABUNDANCE, OCCUPANCY AND DEMOGRAPHY, 3 Credits
Habitat influences abundance, occupancy, and demographic rates of wildlife. Wildlife management is often a component of land management and both benefit from land stewards that have an understanding of how habitat characteristics influence the occupancy, abundance, and performance of wildlife within an area. This is an advanced undergraduate and introductory graduate course designed to familiarize students with multiple techniques of assessing the influence of habitat on abundance, occupancy, and demographic rates of terrestrial animals.

RNG 577, AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/ NR 477 and FES 577/RNG 577.
Equivalent to: FES 577, FS 577, NR 577
Recommended: Introductory course in biology.

RNG 590, RANGELAND MANAGEMENT PLANNING, 4 Credits
Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints necessary for decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.

RNG 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

RNG 603, PH.D. THESIS, 1-16 Credits
This course is repeatable for 999 credits.

RNG 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

RNG 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

RNG 607, SEMINAR, 1-2 Credits
This course is repeatable for 16 credits.

RNG 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

RNG 643, WILDLAND PLANT ECOPHYSIOLOGY, 4 Credits
Emphasizes the physiological ecology of plants living in arid and semi-arid ecosystems. Primary class emphasis will include photosynthesis, respiration, water stress and water use efficiency, stable isotopes, root structure and function, nutrient uptake and stress, and defoliation. Offered every other winter, odd years.

RNG 662, RANGELAND ECOLOGY, 3 Credits
Studies ecological theory and related resource management implications in rangelands and arid wildlands. Topics include the history and development of rangeland ecology, plant demography, invasive species, plant population dynamics, disturbance theory, succession, vegetation classification and range condition assessments. Offered every other winter, even years.
Recommended: Basic ecology course

RNG 670, ECOLOGICAL INVASIVE PLANT MANAGEMENT, 2 Credits

RNG 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Animal Science Graduate Major (MS, PhD)

Graduate Areas of Concentration
Animal nutrition, dairy production (MS only), embryo physiology, endocrinology, growth and development, livestock management (MS only), nutritional biochemistry, reproductive physiology
The Department of Animal and Rangeland Sciences offers graduate work leading to Master of Science and Doctor of Philosophy degrees in Animal Science with concentrations listed above.

**Major Code: 1250**

**Animal Science Graduate Minor**

Minor Code: 1250

**Animal Sciences Minor**

Also available at LaGrande and via Ecampus.

**Minor Code: 125**

**Animal Sciences Undergraduate Major (BS, HBS)**

This major offers the following option(s):

- Animal Behavior
- Animal BioHealth/Pre-Professional
- Animal Production
- Equine
- Rangeland Science

Programs in animal sciences provide up-to-date information on methods of rearing livestock and poultry, that produce meat, milk, eggs, wool, and other animal products. In addition, the department addresses the care of animals that enhance human well-being through companionship, recreation, and human aid such as horses and companion animals.

Essential to this information is knowledge generated from the fields of animal behavior/bioethics, genetics, nutrition, and physiology. The various teaching and research programs explore modern areas of animal biotechnology and data processing and how they apply to present day livestock and poultry production. Study in these areas provides the core around which various curricula leading to the BS degree in Animal Sciences can be developed. To allow students flexibility in course arrangement, three specialized program options are offered.

Increasing demands for livestock and poultry products by a rapidly expanding human population mean potential employment for well-trained individuals in such areas as farm, ranch, feedlot operation; meat, poultry, egg and milk processing, meat grading with the USDA; Federal Cooperative Extension Service, county and 4-H work; sales or technical employment with commercial feed, seed, and chemical companies and pharmaceutical houses; agricultural loan officer; government agency positions at local, state and federal levels; the Peace Corps; animal welfare auditing; as well as in journalism, mass media, and public policy. The expanding support structure for companion animals has created a growing job market for graduates in areas such as animal behavior consultant; veterinary technician (animal nurse); and business management. In addition, students become prepared to go on to advanced studies in animal sciences, veterinary medicine, and education.

Graduate students may pursue research projects through the Agricultural Experiment Station as part of their programs for MS or PhD degrees. Graduate areas of concentration are offered in animal nutrition, dairy production, embryo physiology, endocrinology, ethology, growth and development, livestock management, muscle biology and meat science, nutritional biochemistry, reproductive physiology.

**Cooperative Programs**

Students transferring after one or two years at a community college should also be able to complete the requirements for a BS after three or two years, respectively.

**Rangeland Resource Management**

Rangeland resource management is one of the family of natural resources professions important to the social, economic, and political development of Oregon, the nation, and the world. It is based upon ecological principles and is concerned with the restoration, improvement, conservation, and use of rangelands. Since range management is practiced on lands producing domestic and wild animals, timber, water, and recreation, concepts of integrated land use are included in the curriculum. A balance of soil, domestic animal, wildlife, ecology, and other biological sciences is realized in the educational program.

The curriculum includes university and departmental requirements for the BS degree and provides emphasis either in science, management, ecology, or allied disciplines. The BS degree is also offered on the campus of Eastern Oregon University at La Grande through an extension of the OSU Department of Animal and Rangeland Sciences. Facilities for study include classroom and field-oriented educational environments both on-campus and at locations throughout Oregon. Field trips are taken in conjunction with specific courses.

Graduate work leading to MAIS, MS, or PhD degrees may involve research on domestic or wild animals, rangeland nutrition, community ecology, physiology of rangeland plants, rangeland improvement, rangeland watershed, and riparian zone management, rangeland restoration, utilization and management, agroforestry and landscape ecology.
Summer employment with private industry, government agencies, and on range research projects makes possible learning experiences while earning a salary. Employment opportunities include resource management, research, Extension, ranch management, college and university teaching, business and industrial activities related to rangeland resources, and foreign agricultural and resource development assistance.

The Department of Animal and Rangeland Sciences is accredited by the Society for Range Management. It is recognized throughout the country as one of the leading institutions of rangeland management.

Major Code: 125

- Recall, integrate and apply essential core information about the key components of Animal Production. As part of the Animal Science curriculum, students are required to focus part of their attention on the production systems of two different species, which include all of our traditional commodities and companion animals. While the production of each species required different methods, this outcome will address understanding of production methods in general terms because each student completes a different series production classes.
- Recall, integrate and apply essential core information about the key components of Animal Reproduction. Reproduction is a basic part of Animal Science. Production of traditional animal species requires knowledge, background and understanding in the both the academic and applied functions of the reproduction process.
- Recall, integrate and apply essential core information about the key components of Animal Nutrition. Nutrition is a basic part of Animal Science. The Nutrition of traditional animal species is well understood requires knowledge, background and understanding in the both the chemistry and biochemistry as well as the practicality of formulation animal diets.
- Recall, integrate and apply essential core information about the key components of Animal Genetics and Breeding. Genetics is a basic part of Animal Science. Understanding the basics of genetics and the consequences of breeding are an important part of the overall production of traditional animal species and requires knowledge, background and understanding in the both the molecular and applied functions of the genetics and breeding.
- Recall, integrate and apply essential core information about the ethical and behavioral components of Animal Production. In recent years the world view of animal has changed dramatically. Understanding the behavior of traditional animal species and the ethical implications of production methods of these species is critical as students move into industry.

Departmental requirements may be utilized to satisfy baccalaureate core and non-departmental minor requirements.

### Notes:

1. Baccalaureate Core Course
2. Writing Intensive Course (WIC)
3. Please reference the baccalaureate core course catalog (p. 2423) for a list of approved courses
4. No more than two courses (or lecture/lab combinations) from any one department may be used by a student to satisfy the Perspectives category of the core
5. The two courses used to fulfill the Synthesis requirement may not be in the same department
**Animal Behavior Option**

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 158)

The Animal Behavior option will provide students with skills necessary to enter professions or graduate studies related to animal behavior and welfare, service and therapy with animals, or other animal care or industry positions that include a behavior management component. Courses chosen are consistent with accepted curriculum for animal behaviorists and provide a solid foundation to those working towards related certifications.

**Option Code: 707**

Select at least 6 credits of the following:

- ANS 401 RESEARCH
- ANS 410 ANIMAL SCIENCE INTERNSHIP
- FW 328/VMB 328 WILDLIFE CAPTURE AND IMMOBILIZATION
- FW 475 WILDLIFE BEHAVIOR
- FW 481 WILDLIFE ECOLOGY
- PSY 340 COGNITIVE PSYCHOLOGY
- PSY 432 PHYSIOLOGICAL PSYCHOLOGY
- PSY 454 COGNITIVE DEVELOPMENT
- PSY 456 SOCIAL DEVELOPMENT
- RNG 442 RANGELAND-ANIMAL RELATIONS
- Z 350 ANIMAL BEHAVIOR

Total Credits: 30-31

* Research and/or internship must be related to the field of animal behavior
* Baccalaureate Core Course

**Animal BioHealth/Pre-Professional Option**

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 158)

The Animal BioSciences/Pre-Professional option prepares students for professional careers in veterinary medicine, and animal science teaching and research. Extensive training is provided in the biological and physical sciences, offering an excellent foundation for graduate study.

Requirements include the core curriculum and additional credits as required by the College of Veterinary Medicine. The Animal BioSciences/Pre-Professional option is designed for students interested in fulfilling requirements for admission to the OSU College of Veterinary Medicine. It allows students who are admitted to the college, upon completion of three years of undergraduate study, to apply credit earned during the first year of professional study toward the BS degree in Animal Sciences.

Students choosing not to attend veterinary school after the third year of this program may complete additional requirements to qualify for the BS degree in Animal Sciences.

**Option Code: 709**

Total Credits: 50-52

* Baccalaureate Core Course (BCC)
1 These courses may be double counted in the upper-division Animal Sciences courses

**Animal Production Option**

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 158)

The Animal Production option will allow students to select a species or production industry that interests them most. This option is for students that want to specialize in breeding, feeding, care, and welfare of animals. Animal production, nutrition, and management classes combined with
business and/or applied economics courses provide a solid basis for a career in industry-level positions that pertain to animal management and production.

**Option Code: 708**

At least 15 credits in the option must be upper division.

**Option Code: 708**

**Equine Option**

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 158)

The two areas of emphasis within the Equine option are designed to give students direction in regard to their future career and endeavors.

The Management or General Emphasis is designed to prepare those students wanting to not only own horses, but to manage equine facilities, event centers, or to go into areas such as nutrition, pharmaceuticals sales or marketing and promotion.

The Human or Animal Therapy Emphasis is designed to prepare students to go into the area of animal-assisted therapy. Using horses as therapy animals is becoming widely accepted and utilized. For this emphasis, the student not only needs to understand the horse itself but human nature as well.

**Option Code: 693**

27 credits with a minimum of 15 credits upper division are required.

Rangeland Science Option

This option is offered within the following major(s):

- Animal Sciences - College of Agricultural Sciences (p. 158)

Rangeland science is about the study and sustainable management of landscapes across a variety of biomes from the very arid such as deserts to the moderately mesic such as grasslands. Students working in rangeland ecosystems will gain knowledge and skills to bolster their career success.

Note: Completion of the Rangeland Ecology and Management minor alone does not qualify students for rangeland conservationist positions with the U.S. Office of Personnel Management (OPM).

Option Code: 712

28 credits are required for the option; 15 of which must be at the upper-division level.

Rangeland Ecology and Management Graduate Major (MS, PhD)

Graduate Areas of Concentration

Agroforestry, ecology of rangelands, physiology of range plants, range improvement, range nutrition, restoration ecology, riparian zone management, watershed management

The Department of Animal and Rangeland Sciences offers Master of Science and Doctor of Philosophy degrees.

The program integrates plant, soil, and animal sciences to prepare degree candidates for leadership in this professional field. Under the guidance of the rangeland faculty, graduate students study rangeland ecology, physiology of rangeland plants, rangeland nutrition, rangeland improvements, watershed management, restoration ecology, agroforestry, water quality, and riparian zone management. Through the Department of Animal and Rangeland Sciences, range management graduate students have access to greenhouse, field plot, pasture, range, and animal facilities on campus, and at the two Eastern Oregon Agricultural Research Center stations at Union and Burns.

Graduate students in rangeland ecology and management may select courses in complementary areas, including agricultural and resource economics, fisheries and wildlife, botany, soils, statistics, biology forensic, crop science, and animal science. The selection of these complementary areas depends on the interest of the students, their aptitude, and the thesis topic they have chosen. Minors are commonly elected in botany, soils, forage crops, animal nutrition, fisheries and wildlife, agricultural and resource economics, or in an integrated program of study.

Major Code: 6220

Rangeland Ecology and Management Graduate Minor

Minor Code: 6220

Rangeland Science Minor

Also available at LaGrande.

Rangeland sciences is about the study and sustainable management of landscapes across a variety of biomes from the very arid such as deserts to the moderately mesic such as grasslands. Students working in rangeland ecosystems will gain knowledge and skills to bolster their career success.

Completion of the Rangeland Sciences minor alone does not qualify students for rangeland conservationist positions with the U.S. Office of Personnel Management (OPM).

Rangeland Sciences Undergraduate Major (BS, HBS)

This major offers the following option(s):
- Habitat Management (p. 166)
- Pastoral Systems of the World (p. 167)
- Sustainable Livestock Ranching (p. 167)
- Sustainable Rangeland Ecosystem Stewardship (p. 168)

Also available at LaGrande and via Ecampus.

Rangeland sciences is about the study and sustainable management of rangelands across a variety of biomes, from arid deserts, to mesic grasslands, to tropical savannahs. The program takes an interdisciplinary approach to provide advanced scientific knowledge regarding multiple ecological processes and social drivers influencing rangeland ecosystems around the globe. Students gain the skills and knowledge needed to deeply understand and effectively manage rangelands for improved productivity and enhanced ecosystem resilience. The end goal is that students graduating from the program will be able to integrate contemporary rangeland ecology and management principles into a systems-based decision-making framework that promotes ecological resilience, sustainable societies, and thriving economies in socioecological rangeland ecosystems.

Major Code: 292

- Identify a subset of up to 100 rangeland plants. Correctly spell both common and scientific names. Describe plant species ecological characteristics.
- Students will demonstrate knowledge of appropriate use and competency using common Rangeland Analysis methods.
- Design a sustainable grazing management plan, a wildlife habitat restoration plan, or address a specific related issue using a systems approach.
- Demonstrate knowledge of the hydrologic cycle and describe the factors that influence hydrology in arid/semi-arid environments.
- Students will demonstrate understanding of ecological processes responsible for ecosystem function in arid/semi-arid environments.

Departmental requirements may be utilized to satisfy baccalaureate core and non-departmental minor requirements.

Habitat Management Option

This option is offered within the following major(s):

- Rangeland Sciences - College of Agricultural Sciences (p. 164)

Also available via Ecampus.

Habitat management is about land management, which is the focus of Rangeland Sciences. In this option students will learn how to analyze and manage the complex ecology of an area for multi-species habitat in the face of disturbance and multiple uses.

Student Learning Outcomes

- Evaluate quantity and quality of habitat with focus on habitat availability throughout life history stages; and with emphasis on multi-season habitat use
- Understand effects of complex interactions of disturbance on ecosystem function related to habitat use and demography.
- Understand how social pressures relate to habitat and develop mitigation actions to reduce conflict at the human-wildlife interface.
- Identify and monitor habitat restoration activities with focus on determination of success as increased habitat use and demographic rates.

Option Code: 853

Fish & Wildlife Sciences

Select 12 credits from the following:

- FW 311 ORNITHOLOGY
Pastoral Systems of the World Option

This option is offered within the following major(s):

• Rangeland Sciences - College of Agricultural Sciences (p. 164)

Also available via Ecampus.

Rangeland biomes (grasslands, shrublands, deserts and woodland savannas) comprise approximately 50% of the terrestrial surface of the earth. Pastoral cultures and livelihoods remain dominant on rangelands. This option will provide students with an opportunity to not only learn about pastoral systems worldwide, but also social, cultural, economic and political factors of regions worldwide that influence pastoral livelihoods. Students in this option are strongly encouraged to study abroad.

Student Learning Outcomes

• Compare and contrast pastoral systems worldwide; and to US ranching systems
• Identify social, cultural, economic, and political factors that affect the success of people living on rangeland landscapes worldwide
• Outline driving components of regional pastoral sustainability efforts to balance ecology and livelihoods
• Design a sustainable grazing management plan for a chosen pastoral system that reflects local social, cultural, economic and political factors.

Possible Career Paths

Graduates in this option will be positioned to pursue career paths with international NGOs, the US Foreign Service, United Nations programs, or bring an international pastoral systems perspective to managing livestock grazing in the US.

Sustainable Livestock Ranching Option

This option is offered within the following major(s):

• Rangeland Sciences - College of Agricultural Sciences (p. 164)

Also available via Ecampus.

This option will equip students with the knowledge and skills to manage ranching operations that balance delivery of ecosystem goods and services as well as meet ranch enterprise production goals.

Student Learning Outcomes

• Evaluate and address ecological disturbance impacts of ranch management.
• Create and trouble-shoot sustainable grazing management plans.

Sustainable Rangeland Ecosystem Stewardship Option

This option is offered within the following major(s):

• Rangeland Sciences - College of Agricultural Sciences (p. 164)

Also available via Ecampus.

This option will incorporate course work from a variety of disciplines to build on the knowledge areas of the base Rangeland program (plants, soil, water, animals) to deepen the student’s understanding of rangeland ecosystems and their management. This option also allows students to focus on a specific area and/or broadly bolster their knowledge.

Student Learning Outcomes

• Assess state of ecological structure and function in the face of disturbance, then propose approaches and methods to mitigate disturbance and bolster resiliency.
Career Opportunities for Undergraduates

Graduates may pursue a number of attractive career opportunities. Agricultural and Food Business Management (AFBM) majors may move directly into professional jobs with agribusiness firms, financial and insurance institutions, or manage their own agribusinesses. Opportunities also exist for AFBM majors to pursue graduate studies in food and agricultural management, agricultural cooperatives, and sustainable development. Environmental Economics and Policy (EEP) students can serve effectively as members of interdisciplinary teams involved in resource and environmental management, planning, and policy analysis. Government job opportunities include management, planning, and analysis positions with federal, state, and local government agencies. Private company opportunities include similar positions with utility companies, banks, consulting firms, and resource management companies. The EEP degree also provides an excellent foundation for graduate work in economics, as well as law, public policy, and urban planning.

Applied Economics Graduate Program

The Applied Economics Graduate Program offers the MA, MS, and PhD degrees in Applied Economics. Graduates pursue academic, analytical, and policy careers in universities, consulting, trade associations, firms, and government. Core course work consists of microeconomic theory, econometrics, and other quantitative methods. Field (concentration) courses include environmental and resource economics and development economics. Elective courses are available across a variety of concentrations including geographic information systems, computer science, statistics, marine and coastal resources, mathematical modeling, and forestry. Program emphasis is on applications to real-world settings, institutions, and problems. Faculty are in the Applied Economics Department; the Colleges of Forestry, Agricultural Sciences, and Liberal Arts; the College of Earth, Ocean, and Atmospheric Sciences; and the School of Public Health and Human Sciences.

AEC Graduate Faculty

The Applied Economics Graduate Program currently has 20 faculty members, drawn from three departments and two schools in five colleges.

AEC 121, DISCOVERING AGRICULTURAL AND RESOURCE ECONOMICS, 1 Credit

Explore issues, opportunities, and challenges in the dynamic and diverse employment field of agricultural and resource economics.
Equivalent to: AEC 121

AEC 199, SPECIAL TOPICS, 1-4 Credits

Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AEC 199
This course is repeatable for 8 credits.

AEC 211, AGRICULTURAL AND FOOD MANAGEMENT, 4 Credits

Economic and business principles applied to the management of firms in agricultural and food industries, including farms, ranches and nurseries, agricultural input suppliers, packers, shippers, processors and food manufacturers and distributors; firm-level goal setting, information management and financial analysis.
Prerequisite: AEC 250 with C- or better or AEC 251 with C- or better or AREC 250 with C- or better or ECON 201 with C- or better or ECON 201H with C- or better
Equivalent to: AEC 211
Available via Ecampus

AEC 221, AGRICULTURAL AND FOOD MARKETING, 3 Credits

Organization and functions of agricultural and food markets both domestic and international; market channels and supply chains for various agricultural commodities and food products; role of agribusiness, cooperatives, and government in marketing decisions.
Equivalent to: AREC 221
Available via Ecampus

AEC 240, *RURAL ECONOMICS OF PLACE AND PEOPLE, 3 Credits

Provides perspective on issues influencing rural communities and economic development in rural America. People, places and natural resources of rural communities play a vital role in economic vitality of the West, yet rural landscapes are changing faster than many urban counterparts.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: AEC 240

AEC 243, *GLOBAL POVERTY AND SUSTAINABLE DEVELOPMENT, 3 Credits

Students are introduced to the challenges of eradicating extreme poverty and achieving sustainable economic development in the world. Topics include: the measurement of poverty and inequality; analysis of food security and agricultural development; the role of health and education in economic development; credit markets; risk and insurance; climate change and biodiversity; gender equality; rural-urban and international migration; population growth and development; institutions and economic performance; the political economy of development.
Attributes: CPSI – Core, Pers, Soc Proc & Inst

AEC 250, *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY, 3 Credits

Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity.
Attributes: CPSI – Core, Pers, Soc Proc & Inst

Available via Ecampus
AEC 250H, *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY, 3 Credits
Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: AEC 250
Recommended: MTH 111

AEC 251, *INTRODUCTION TO AGRICULTURAL AND FOOD ECONOMICS, 3 Credits
An introductory applied microeconomics course focused on the unique challenges of agricultural and food systems. Topics include rational choice theory, models of supply and demand, and price formation, with particular attention on markets for agricultural and food products. Additional topics include market interdependencies, government policy, the behavior of firms, and market structure within agricultural and food systems. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Recommended: MTH 111
Available via Ecampus

AEC 253, *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS, 4 Credits
A general introduction to federal environmental law and policy in the U.S. Familiarizes students with basic legal institutions and concepts of the American legal system, outlines the transition of environmental policy from its common law roots to its modern administrative law form, and gives an overview of the major federal environmental statutes. Relationships among legal theory and process and economic principles are emphasized. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: AREC 253
Available via Ecampus

AEC 299, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AREC 299
This course is repeatable for 8 credits.

AEC 310, EXPLORING EXPERIENTIAL LEARNING OPPORTUNITIES, 2 Credits
Provides background and preparation for students’ experiential learning (EL) activities. Students will be shown examples of appropriate EL, how to find and compete for opportunities, and how to establish and define their learning objectives for EL. Resume writing, appropriate conduct in the workplace, as well as writing and oral presentation skills will be covered. A proposal for an EL activity will be prepared and presented to classmates. Graded P/N.
Recommended: WR 121

AEC 311, INTERMEDIATE APPLIED ECONOMICS I: PRODUCERS AND CONSUMERS, 4 Credits
An examination of the theories of consumer behavior and demand, production cost, the firm, supply, and competitive and monopoly market structures.
Prerequisite: ((AEC 250 with C- or better or AREC 250 with C- or better) or AEC 251 with C- or better or (ECON 201 with C- or better or ECON 201H with C- or better)) and (MTH 241 [C-] or (MTH 251 [C-] or MTH 251H [C-]))
Equivalent to: AREC 311
Available via Ecampus

AEC 313, INTERMEDIATE APPLIED ECONOMICS II: MARKETS, WELFARE & POLICY, 4 Credits
Complementing the private-decision focus in AEC 311, the present course focuses on the intermediate microeconomic theory of social welfare and public decision-making. Topics include exchange, monopoly, game theory, social welfare, externalities, public goods and choice, asymmetric information, uncertainty, and cost-benefit analysis. Substantial attention will be given to the implications of these theories for real-world problems, especially regarding resource and environmental issues.
Prerequisite: MTH 241 with C- or better or (AEC 311 with C- or better or AREC 311 with D- or better or ECON 311 with C- or better)
Equivalent to: AREC 313
Available via Ecampus

AEC 351, *NATURAL RESOURCE ECONOMICS AND POLICY, 3 Credits
Application of principles of economics to identify the causes, consequences, and ways of dealing with natural resource problems, including problems associated with fisheries, forests, water resources, and land. Conceptual topics and policy applications. Emphasis is on developing students’ skill in applying an economic way of thinking about natural resource management. (Bacc Core Course)
Attributes: CSGi – Core, Synth, Global Issues
Prerequisite: (AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better)
Equivalent to: AREC 351
Recommended: MTH 111
Available via Ecampus
AEC 352, *ENVIRONMENTAL ECONOMICS AND POLICY, 3 Credits
Provides an overview of the interrelationships between economic activity, the environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. CROSSLISTED as AEC 352/ECON 352. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Prerequisite: AEC 250 with D- or better or AREC 250 with D- or better or ECON 201 with D- or better or ECON 201H with D- or better
Equivalent to: AREC 352
Available via Ecampus

AEC 353, *INTRODUCTION TO COASTAL AND MARINE RESOURCE ECONOMICS, 3 Credits
Introduces tools of economic analysis for understanding coastal and marine resource management. Surveys a selection of current topics in the field, emphasizing innovation in production and stewardship, institutions, and sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: MTH 111 with C- or better and (AEC 250 [C-] or AREC 250 [C-] or ECON 201 [C-] or ECON 201H [C-])

AEC 372, AGRICULTURAL COOPERATIVES, 3 Credits
An introduction to and in-depth examination of the agricultural cooperative. Students will gain a working knowledge of the concepts, principles, and terminology of agricultural cooperatives through reference materials, lectures, presentations by guest speakers and a cooperatives tour. Students will consider the strengths and weaknesses of the agricultural cooperative as well as the unique management and operational challenges inherent to this form of business operation.
Prerequisite: AEC 211 with D- or better or AREC 211 with D- or better
Equivalent to: AREC 372

AEC 388, AGRICULTURAL LAW, 4 Credits
Application of legal principles to business decision making in farming, ranching, and the agricultural support industry. Consideration of the obligations arising out of contract, tort, property, water, public land, and natural resource law.
Equivalent to: AREC 388
Available via Ecampus

AEC 399, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Equivalent to: AEC 399H, AREC 399H
This course is repeatable for 8 credits.

AEC 399H, SPECIAL TOPICS, 1-4 Credits
Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ.
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 399, AREC 399
This course is repeatable for 8 credits.

AEC 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: AREC 401
This course is repeatable for 16 credits.

AEC 402, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: AREC 402
This course is repeatable for 16 credits.

AEC 403, THESIS, 1-16 Credits
Equivalent to: AREC 403
This course is repeatable for 16 credits.

AEC 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: AREC 405
This course is repeatable for 16 credits.

AEC 406, PROJECTS, 1-16 Credits
Equivalent to: AREC 406
This course is repeatable for 16 credits.
Available via Ecampus

AEC 407, SEMINAR, 1-16 Credits
Equivalent to: AEC 407H, AREC 407, AREC 407H
This course is repeatable for 16 credits.

AEC 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: AEC 407, AREC 407, AREC 407H
This course is repeatable for 16 credits.

AEC 408, WORKSHOP, 1-16 Credits
Equivalent to: AREC 408
This course is repeatable for 16 credits.

AEC 410, INTERNSHIP, 1-6 Credits
Practical on-the-job training in agricultural business, marketing, commercial agricultural production, or related private or public organizations. Graded P/N.
Equivalent to: AREC 410
This course is repeatable for 6 credits.

AEC 421, ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET, 4 Credits
Introduces students to the geography of poverty in the United States and the “social safety net” that the U.S. has constructed to reduce poverty and its negative effects. The course focuses on the geography of the social safety net, the operation and administration of the safety net, and how recent changes in the social safety net may have disadvantaged rural people and places.
Equivalent to: AREC 421, RS 421
Available via Ecampus
AEC 432, ENVIRONMENTAL LAW, 4 Credits
Legal relationships arising out of rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials.
Equivalent to: AREC 432
Available via Ecampus

AEC 434, Benefit-Cost Analysis, 4 Credits
Develops the fundamental tools for Benefit-Cost Analysis, a technique for evaluating a project or investment by comparing the economic benefits with the economic costs of the activity. Examines the tricky topic of how to measure the benefits of non-market such as good health and higher environmental quality. The methods introduced here apply to a wide variety of situations. Explores the broad issues of how to think about uncertainty and risk, how to discount future costs and benefits, to value lives saved, and other challenging topics. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: AEC 311 with C- or better or ECON 411 with C- or better
Equivalent to: AREC 434
Recommended: STAT 352 or familiarity with regression analysis
Available via Ecampus

AEC 440, The Economics of Business Organization in the Food System, 4 Credits
Application of economic analysis to questions related to the choice of an appropriate form of business organization for a wide variety of food system enterprises. Topics include costs of contracting, costs of ownership, enterprise scope and scale, and the dynamics of business ownership and structure. Particular emphasis is given to entrepreneurial enterprises and cooperative businesses in the food system.
Prerequisite: AEC 311 with D- or better or ECON 311 with D- or better

AEC 442, Agricultural Business Management, 4 Credits
Application of economic, financial, and strategic management principles to agricultural business with a focus on a case-study framework for analysis and business decision making for alternative business management strategies.
Equivalent to: AREC 442

AEC 444, Commodity Futures and Options Markets, 4 Credits
Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.
Equivalent to: AREC 444
Available via Ecampus

AEC 446, Introduction to Applied Econometrics, 4 Credits
Introduces students to applied econometrics: the use of statistical techniques to estimate and test economic relationships. Topics include multiple regression models, multicollinearity, and simultaneous equations. The applications and labs will focus on econometric analysis of real world problems pertaining to issues in environmental, food, and resource economics and policy. Lec/lab.
Prerequisite: AEC 311 with D- or better and ST 351 [D-]

AEC 447, Agricultural Price and Market Analysis, 4 Credits
Price determination for food and agricultural commodities; development of quantitative economic models that explain and predict prices and other market outcomes. Lec/lab.
Equivalent to: AREC 447
Recommended: AEC 311 and ST 351

AEC 448, Advanced Topics in Environmental and Resource Economics, 3 Credits
Reviews core concepts of economic efficiency and market failures and then focuses on the economics of environmental regulation. Develops an appreciation for the structure of key concepts that underlie the economic approach to environmental issues and applications to policy and regulations. Builds skills in assessing regulatory policies from the perspective of economics.
Prerequisite: AEC 311 with D- or better and AEC 352 [D-]

AEC 452, Marine Economics, 3 Credits
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries.
Prerequisite: AEC 351 with D- or better or AEC 352 with D- or better or AEC 351 with D- or better or AEC 352 with D- or better
Equivalent to: AREC 452

AEC 453, Conservation on Private Land, 3 Credits
Explore and experience the increasingly popular phenomenon of conservation on private land. This exploration includes the explosive growth of land trusts and the use of conservation easements to restrict the use of private land and often promote ecological goals.

AEC 454, Rural Development Economics and Policy, 3 Credits
Learn economic and regional development conceptual frameworks. Explore U.S. rural development and government interventions. Discuss differing popular local strategies for development that emphasize building current assets like local entrepreneurship to attracting resources and incomes from outside the region like amenity migration and tourism.
Equivalent to: AREC 454
Available via Ecampus
AEC 455, PROGRAM EVALUATION, 3 Credits
Explores the leading methods for evaluating the effectiveness of public programs and policies, specifically focusing on causal inference and empirical applications.
Prerequisite: (AEC 311 with C- or better or ST 351 with C- or better) and AEC 313 [C-]
Available via Ecampus

AEC 460, CAPITAL INVESTMENT ANALYSIS USING AGBIZ LOGIC, 3 Credits
Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgBiz LogicTM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.
Equivalent to: AEC 460

AEC 461, AGRICULTURAL AND FOOD POLICY ISSUES, 4 Credits
Principles of agricultural and food policy formulation; agricultural price and income policies in relation to land use, water, and food policies; interrelationships among U.S. and foreign agriculture and trade policies.
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: AEC 311 with D- or better or ECON 311 with D- or better
Equivalent to: AREC 461

AEC 465, AGRICULTURAL AND FOOD FINANCIAL MANAGEMENT, 4 Credits
Students will develop risk management strategies utilizing the AgBiz Logic program to reduce the financial, production, marketing, and human resource risks facing agribusinesses. This course is designed to help students apply financial and economic principles to business decisions under diverse and changing circumstances. The course reviews basic financial reporting statements, details accounting and financing practices specific to agricultural and food enterprises.
Prerequisite: (AEC 211 with D- or better or AREC 211 with D- or better) and AEC 311 [D-]
Equivalent to: AREC 465

AEC 466, AGRICULTURAL AND FOOD MARKETING MANAGEMENT, 4 Credits
Principles, trends, issues, barriers, policies, strategies and decisions involved in domestic and international marketing of perishable and storable agricultural commodities and food products from the point of production to the point of consumption. Topics include firm-level marketing concepts, the integration of marketing with firms’ overall strategic management goals, as well as comparative studies across multiple outlets for agricultural and food products, to include local, regional, and global markets.
Prerequisite: AEC 221 with D- or better and (AEC 250 [D-] or AEC 251 [D-] or ECON 201 [D-])

AEC 475, WRITING BUSINESS PLANS: AGRICULTURE/FOOD-RELATED ENTERPRISES, 2 Credits
Students choose an enterprise and write a comprehensive business plan that describes the business vision, marketing plan, financial projections, risk management, and implementation strategy. At the end of term selected students present their plan to a commercial lender.
Equivalent to: AREC 475
Recommended: AEC 211 and AEC 221

AEC 499, SPECIAL TOPICS, 1-16 Credits
Various topics in agricultural and resource economics of special and current interest not covered in other courses.
Equivalent to: AREC 499
This course is repeatable for 16 credits.

AEC 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

AEC 502, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

AEC 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

AEC 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

AEC 506, SPECIAL PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

AEC 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

AEC 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

AEC 512, MICROECONOMIC THEORY I, 4 Credits
Fundamental topics in microeconomic theory. Topics include utility maximization and consumer demand, profit maximization and the theory of the firm, and labor and capital markets.
Recommended: AREC 312 and MTH 252
AEC 513, MICROECONOMIC THEORY II, 4 Credits
Emphasizes principles for microeconomic theory at the master’s level. Builds upon the foundations covered in AEC 512, and extends the theory and principles to cover uncertainty, game theory, competitive market equilibrium and welfare analysis, imperfect competition, and market failures. Primary emphasis is on understanding microeconomic theory and the underlying assumptions, and how it is applied to real world settings.
Prerequisite: AEC 512 with C or better

AEC 521, ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET, 4 Credits
Introduces students to the geography of poverty in the United States and the “social safety net” that the U.S. has constructed to reduce poverty and its negative effects. The course focuses on the geography of the social safety net, the operation and administration of the safety net, and how recent changes in the social safety net may have disadvantaged rural people and places.
Equivalent to: AREC 521, RS 521
Available via Ecampus

AEC 525, APPLIED ECONOMETRICS, 4 Credits
General principles of applied econometric research are emphasized, including model building, data analysis, hypothesis testing, and evaluation and interpretation of results. A variety of estimators are applied to real data, including least squares, panel data, simultaneous equations, discrete choice, and limited dependent variable models.

AEC 532, ENVIRONMENTAL LAW, 4 Credits
Legal relationships arising out of rights to air, water, and rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials.
Equivalent to: AREC 532
Available via Ecampus

AEC 534, ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Environmental problems and misuse of natural resources are caused by humans’ behavior, and thus must be solved by changing behavior. Explores the ways economics is central to understanding the incentive behind the causes, consequences, and potential for effective solutions to environmental and resource problems involving air, water, fish, forests, climate change, and biodiversity. Builds on microeconomics principles to include theories of market failures, externalities, common-pool resources, and institutions, as well as growth and sustainability. Equips students with tools for non-market valuation and for critical evaluation of environmental policies’ benefits and costs.
Equivalent to: AREC 534
Recommended: AEC 311 or AREC 311
Available via Ecampus

AEC 540, THE ECONOMICS OF BUSINESS ORGANIZATION IN THE FOOD SYSTEM, 4 Credits
Application of economic analysis to questions related to the choice of an appropriate form of business organization for a wide variety of food system enterprises. Topics include costs of contracting, costs of ownership, enterprise scope and scale, and the dynamics of business ownership and structure. Particular emphasis is given to entrepreneurial enterprises and cooperative businesses in the food system.
Recommended: AEC 311 or ECON 311

AEC 543, INTERNATIONAL TRADE, 4 Credits
Introduction to the major theories of international trade and to models that are useful for applied policy and regional analysis. Effects of trade and trade policy on consumers, workers, and firms are emphasized.
Prerequisite: AEC 513 with C or better
Equivalent to: AREC 543

AEC 544, COMMODITY FUTURES AND OPTIONS MARKETS, 4 Credits
Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.
Equivalent to: AREC 544
Available via Ecampus

AEC 546, INTRODUCTION TO APPLIED ECONOMETRICS, 4 Credits
Introduces students to applied econometrics: the use of statistical techniques to estimate and test economic relationships. Topics include multiple regression models, multicollinearity, and simultaneous equations. The applications and labs will focus on econometric analysis of real world problems pertaining to issues in environmental, food, and resource economics and policy. Lec/lab.
Recommended: AEC 311 and ST 351

AEC 548, ADVANCED TOPICS IN ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Reviews core concepts of economic efficiency and market failures and then focuses on the economics of environmental regulation. Develops an appreciation for the structure of key concepts that underlie the economic approach to environmental issues and applications to policy and regulations. Builds skills in assessing regulatory policies from the perspective of economics.
AEC 550, ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS, 4 Credits
Presents concepts, theories, and methods used in the economic analysis of environmental and natural resource issues. The emphasis is on the economics of environmental policies and the development of decision rules regarding the efficient use of natural resources.
Prerequisite: AEC 512 with C or better
Equivalent to: AREC 550

AEC 551, APPLICATIONS OF ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS, 4 Credits
Applies and expands upon concepts, theories, and methods in environmental and natural resource economics introduced in AEC 550. Topics include non-market valuation, discounting, and benefit-cost analysis, as well as the role and importance of institutions, appropriate research methods, and the philosophical basis for normative judgments in economics.
Prerequisite: AEC 550 with C or better or AREC 550 with C or better
Equivalent to: AREC 551

AEC 552, MARINE ECONOMICS, 3 Credits
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. CROSSTLISTED as AEC 552/MRM 552.
Equivalent to: AREC 552, MRM 552
Recommended: (AEC 351 or AEC 352 or AREC 351 or AREC 352)

AEC 553, CONSERVATION ON PRIVATE LAND, 3 Credits
Explore and experience the increasingly popular phenomenon of conservation on private land. This exploration includes the explosive growth of land trusts and the use of conservation easements to restrict the use of private land and often promote ecological goals.

AEC 554, RURAL DEVELOPMENT ECONOMICS AND POLICY, 3 Credits
Learn economic and regional development conceptual frameworks. Explore U.S. rural development and government interventions. Discuss differing popular local strategies for development that emphasize building current assets like local entrepreneurship to attracting resources and incomes from outside the region like amenity migration and tourism.
Equivalent to: AREC 554
Available via Ecampus

AEC 555, PROGRAM EVALUATION, 3 Credits
Explores the leading methods for evaluating the effectiveness of public programs and policies, specifically focusing on causal inference and empirical applications.
Available via Ecampus

AEC 560, CAPITAL INVESTMENT ANALYSIS USING AGBIZ LOGIC, 3 Credits
Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgBiz LogicTM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.
Equivalent to: AREC 560

AEC 565, AGRICULTURAL AND FOOD FINANCIAL MANAGEMENT, 4 Credits
Students will develop risk management strategies utilizing the AgBiz Logic program to reduce the financial, production, marketing, and human resource risks facing agribusinesses. This course is designed to help students apply financial and economic principles to business decisions under diverse and changing circumstances. The course reviews basic financial reporting statements, details accounting and financing practices specific to agricultural and food enterprises.
Equivalent to: AREC 565
Recommended: (AEC 211 or AREC 211) and AEC 311

AEC 566, AGRICULTURAL AND FOOD MARKETING MANAGEMENT, 4 Credits
Principles, trends, issues, barriers, policies, strategies and decisions involved in domestic and international marketing of perishable and storable agricultural commodities and food products from the point of production to the point of consumption. Topics include firm-level marketing concepts, the integration of marketing with firms’ overall strategic management goals, as well as comparative studies across multiple outlets for agricultural and food products, to include local, regional, and global markets.
Recommended: AEC 221 and (AEC 250 or AEC 251 or ECON 201)

AEC 599, SPECIAL TOPICS, 0-16 Credits
Various topics in applied economics of special and current not covered in other courses. May be repeated for credit when topics differ.
Equivalent to: AREC 599
This course is repeatable for 16 credits.

AEC 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: AREC 601
This course is repeatable for 16 credits.

AEC 602, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: AREC 605
This course is repeatable for 16 credits.

AEC 603, THESIS, 1-16 Credits
Equivalent to: AREC 603
This course is repeatable for 999 credits.

AEC 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: AREC 605
This course is repeatable for 16 credits.
AEC 606, SPECIAL PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

AEC 607, SEMINAR, 1-16 Credits
Equivalent to: AREC 607
This course is repeatable for 16 credits.

AEC 608, WORKSHOP, 1-16 Credits
Equivalent to: AREC 608
This course is repeatable for 16 credits.

AEC 611, ADVANCED MICROECONOMIC THEORY I, 4 Credits
A rigorous development of the theory of consumption and production, with emphasis on duality.
Prerequisite: (AEC 512 with C or better and AEC 513 [C])
Recommended: MTH 254

AEC 612, ADVANCED MICROECONOMIC THEORY II, 4 Credits
A rigorous extension of the theory of the consumer and firm to aggregate and heterogeneous populations, decision making under uncertainty, and related game theory concepts.
Prerequisite: AEC 611 with C or better

AEC 613, ADVANCED MICROECONOMIC THEORY III, 4 Credits
A rigorous development of the theory of competitive equilibrium, market power, public goods, and information.
Prerequisite: AEC 612 with C or better

AEC 625, ADVANCED ECONOMETRICS I, 4 Credits
Emphasizes the basic theory underlying the main types of estimators used in econometrics, as well as their application in empirical research. Includes derivation, properties, and application of method of moments, maximum likelihood, ordinary and generalized least squares, and instrumental variables estimators, statistical inference and hypothesis testing, and model building and specification analysis. Provides the necessary foundation for estimation techniques covered in AEC 626. Lec/lab.
Prerequisite: AEC 525 with C or better

AEC 626, ADVANCED ECONOMETRICS II, 4 Credits
Extensions to the generalized linear regression model are considered: discrete choice, limited dependent variable, panel data, and simultaneous equations models, and new solutions to identification problems. Strong applied orientation, emphasizing problems of data measurement, model selection and specification.
Prerequisite: AEC 625 with C or better

AEC 627, COMPUTATIONAL ECONOMICS, 4 Credits
Covers the numerical analysis of static optimization models and stochastic dynamic models in resource and development economics, emphasizing formulation, solution, and simulation of dynamic optimization, rational expectations, and arbitrage pricing models. Lec/lab.

AEC 640, SUSTAINABLE DEVELOPMENT, 3 Credits
Surveys research on the quantitative economic analysis of sustainable development, with an emphasis on integrated assessment methods and models and their application to agriculture and rural development policy, agricultural technology impact assessment, and climate change impact assessment.
Prerequisite: AEC 611 with D- or better and AEC 612 [D-] and AEC 625 [D-]
Equivalent to: AREC 640

AEC 643, ADVANCED TOPICS IN DEVELOPMENT ECONOMICS, 3 Credits
Introduces students to key issues in the economics of development and equips them with the theoretical and empirical tools required to conduct advanced research in these topics.
Prerequisite: AEC 613 with C or better and AEC 626 [C]
Equivalent to: AREC 643

AEC 651, ADVANCED NATURAL RESOURCE ECONOMICS, 3 Credits
Contemporary economic theory of dynamic natural resource allocation is introduced. Assignments focus on analytical and numerical methods for solving dynamic optimization problems in resource and environmental management. Lecture and readings emphasize current research trends in the field and relevant advances in quantitative methodology.
Prerequisite: AEC 611 with C or better
Equivalent to: AREC 651

AEC 652, ADVANCED ENVIRONMENTAL ECONOMICS, 3 Credits
Interrelationships of natural resource use and the environment; applied welfare and benefit-cost analysis; externalities and pollution abatement; non-market valuation of resources; property rights; legal and social constraints; policy approaches.
Prerequisite: (AEC 513 with C or better or AREC 513 with C or better) and (AEC 525 [C] or AREC 525 [C])
Equivalent to: AREC 652

AEC 653, EMPIRICAL ENVIRONMENTAL AND RESOURCE ECONOMICS, 3 Credits
Introduces empirical methods at the current frontiers of research in environmental and resource economics. General topics may include the identification of non-market values, revealed and stated preference methods, environmental policy evaluation, equilibrium sorting models, and climate econometrics.
Prerequisite: AEC 513 with C or better and AEC 525 [C]
Equivalent to: AREC 653
AEC 699, SPECIAL TOPICS, 1-16 Credits

Various topics in applied economics of special and current interest not covered in other courses.

Equivalent to: AREC 699

This course is repeatable for 16 credits.

Agricultural and Food Business Management Minor

Also available via Ecampus.

The Agricultural and Food Business Management minor offers students an opportunity to expand their skill sets and business acumen as they prepare for careers in production agricultural and related industries. This minor emphasizes the development of general skills in business administration and economic analysis relevant to the operations of farms, ranches, nurseries and the businesses that provide inputs, services and market outlets for them.

The Agricultural and Food Business Management minor is available to students who are not pursuing the AFBM major. Business Administration majors planning to minor in Agricultural and Food Business Management must see both a College of Business advisor and a Department of Applied Economics advisor to discuss certain course restrictions in the minor. Business majors must choose alternate courses to replace the credits that are also in the Business Administration major.

Minor Code: 959

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a student's major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student's major.

- Agricultural and Food Business Management (AFBM) majors may not elect to complete an Agricultural and Food Business Management.
- Environmental Economics and Policy (EEP) majors may not elect to complete an Environmental Economics and Policy or Environmental Law and Policy minor

Agricultural and Food Business Management Undergraduate Major (BS, HBS)

This degree blends course work in agricultural economics, business, agricultural sciences, computer science, arts, and humanities so that graduates can respond to the unique challenges and opportunities in agribusiness vocations.

Major Code: 897

- Explain microeconomic theory at the intermediate level, including producer theory, and how markets work and prices are formulated.
- Analyze and evaluate agricultural and food business problems and management decisions employing commonly used business software, utilizing various forms of capital and cash-flow budgeting, as well as historic and pro forma firm financial statements.
- Utilize and apply regression and other statistical methods to analyze commodity markets and economic data.
- Formulate agricultural and food business strategies and marketing plans for both generic commodities and specialized products.
- Explain how external forces such as law, environmental regulation, and government policies impact agribusiness decision making.

Courses require a grade of C- or higher

Four courses from AEC or additional upper division courses approved by advisor. Must be a minimum of two AEC courses

Must be in different departments

Only two courses allowed in the same department

**Applied Economics Graduate Major (MA, MS, PhD)**

**Major Code:** 897

**Graduate Areas of Concentration**

Resource and environmental economics, trade and development, public health economics, and transportation economics (MA, MS only)

The Applied Economics Graduate Program provides students with a strong foundation in economic theory, and quantitative methods while preserving sufficient flexibility to specialize in their areas of interest. The core curriculum includes courses in microeconomic and macroeconomic theory, in quantitative methods, and includes a set of qualifying examinations. Additional course work is required in the areas of concentration, which include: research and environmental economics, trade and development, public health economics, transportation economics, and an open area of concentration. The open area can accommodate students' interests in applied economic policy, sustainable development, food and climate policy, and marine issues. The hallmark of the Applied Economics Graduate Program is the training of students to understand and utilize economic theories, principles, and methods to examine real-world problems with significant attention to data, institutions, and context.

Since faculty from across campus are members of the graduate faculty in Applied Economics and are potential research advisors, the Applied Economics Graduate Program allows students to work with faculty who most closely match their interests.

These faculty reside in many academic departments at Oregon State University, including the Department of Applied Economics, the School of Public Policy, the Department of Forest Ecosystems and Society, the Department of Forest Resources, Engineering and Management, and the College of Public Health and Human Sciences. Many students are supported by graduate teaching or graduate research assistantships. The Graduate School website also provides information related to financing your graduate education.

For detailed information on the Applied Economics Graduate Program, please review the webpage (https://appliedecon.oregonstate.edu/applied-economics-graduate-program/).

**Minor Code:** 1290
Environmental Economics and Policy Minor

Also available via Ecampus.

The Environmental Economics and Policy minor offers students an opportunity to expand their skill sets in preparation for careers in environmental consulting, resource management, and policy analysis. This minor emphasizes the development and application of economic tools towards identifying the role that humans play in affecting environmental problems, and how policy solutions can be developed that alter human behavior and improve environmental quality.

The Environmental Economics and Policy minor is available to students who are not pursuing the EEP major.

Minor Code: 962

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student’s major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student’s major.

1 Baccalaureate Core Course (BCC)

Students will work with the academic advisor in the Department of Applied Economics to select additional courses for a total of 27 credits

Environmental Economics and Policy Undergraduate Major (BS, HBS)

Also available via Ecampus.

The BS degree in Environmental Economics and Policy focuses on the development of strong economic and statistical skills and their use in the analysis while providing flexibility to incorporate interests in the biological, physical or social sciences. They also will focus on course work in environmental sciences, political sciences, and related subject areas with a greater focus on the socioeconomic dimensions of environmental sciences.

Major Code: 237

- Explain microeconomic theory at the intermediate level, including producer theory, how markets work and prices are formulated, market failure and its causes, and welfare theory.
- Analyze natural resource and environmental management issues, including the management of specific resources (such as fishery, forests, land, and water), by applying relevant economic theory and tools.
- Apply statistics and regression techniques to economic data and models and evaluate results.
- Communicate the process and results of economic analysis of environmental and natural resource issues through a variety of written and oral methods.
- Demonstrate the powers and constraints of US legal structures and policy tools to address environmental and natural resource issues.

Grade Requirements

All EEP majors must complete the core list of courses with a grade of C– or higher.

Select from one of the areas below:

**2-6**

- AEC 401 RESEARCH AND SCHOLARSHIP
- AEC 406 PROJECTS (Development, Analysis or Service Project)
- AEC 410 INTERNSHIP

**3-4**

- AG 111 INFORMATION TECHNOLOGY IN AGRICULTURE
- or CS 101 COMPUTERS: APPLICATIONS AND IMPLICATIONS

**3-4**

- FW 303 SURVEY OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCE
- or GEDG 360 GISCIENCE I: GEOGRAPHIC INFORMATION SYSTEMS AND THEORY
- or HORT 414 PRECISION AGRICULTURE

**4**

- MTH 111 *COLLEGE ALGEBRA
- or MTH 241 *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE
- or MTH 251 *DIFFERENTIAL CALCULUS

**4**

- ST 351 INTRODUCTION TO STATISTICAL METHODS
- ST 352 INTRODUCTION TO STATISTICAL METHODS

**3**

- WR 323 *ENGLISH COMPOSITION
- or WR 327 *TECHNICAL WRITING

Total credits required for graduation **180**
BioResource Research Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Animal Reproduction and Development (p. 182)
- Applied Genetics (p. 183)
- Bioproducts and Bioenergy (p. 183)
- Biotechnology (p. 184)
- Climate and Biosystems Modeling (p. 184)
- Environmental Chemistry (p. 185)
- Food Quality (p. 185)
- Genomics/Bioinformatics (p. 185)
- Pest Biology and Management (p. 186)
- Plant Growth and Development (p. 186)
- Sustainable Ecosystems (p. 187)

- Toxicology (p. 188)
- Water Resources (p. 189)

BioResource Research (BRR) is an interdisciplinary biosciences major centered around research aimed at understanding and protecting the planet’s biological resources and exploring their novel and sustainable uses. BRR students complete a comprehensive mentored research experience, in a cutting-edge area of agricultural, biological, chemical, environmental, food, or health science. BRR faculty research mentors come from across OSU, as well as from extension stations and state and federal agencies. Each student’s upper-division curriculum is individualized based on choice of option and research project. In addition to research expertise, BRR students graduate with a strong background in biosciences, job training, and problem-solving and communication skills. These skills lead to careers in industrial or academic research, natural resource management, and graduate and professional programs in the life sciences and medicine.

Minor Code: 961
Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student’s major. At least 12 of the 27 credits must be upper division. ^ Writing Intensive Course (WIC)  
1 One option specialization is required (more are often possible). More research may be possible. Course work for each option must total 27 credits.

**Animal Reproduction and Development** 

This option is offered within the following major(s):  
- Bioresource Research - College of Agricultural Sciences (p. 181)

Animal reproduction and development entails the study of life processes in cells, organs, and whole animals to enhance efficient production of high-quality animals and animal food products. Students use antibody-based assays, molecular genetics, protein chemistry, embryo and tissue culture, electron chemistry, and other modern laboratory techniques.
in research in areas of animal reproduction, development and growth, preparing them for positions or graduate programs in the bioscience/biomedical/veterinary/agricultural fields.

Total Credits 27-31

* Baccalaureate Core Course (BCC)

**Option Code: 127**

**Applied Genetics Option**

This option is offered within the following major(s):  
• Bioresource Research - College of Agricultural Sciences (p. 181)

Applied genetics is directed at changing the genomes of organisms, to increase their utility to humans. Techniques are derived from cytogenetics, molecular biology, and Mendelian and quantitative genetics. Typically, applied geneticists have expertise in one or more related fields of study such as agronomy, biochemistry, botany, entomology, food processing, forestry, microbiology, pathology, physiology, and statistics.

The goals of applied genetics include:

1. improving the quality of food and fiber products,  
2. improving the cost efficiency of a given product, and  
3. minimizing adverse environmental effects of food or fiber production.

Students in this option will be well prepared for positions in biosciences and agriculture, or in graduate and professional programs.

Specialization and Breadth Courses  
Select 18 to 21 credits approved by option faculty and research mentor.  
Total Credits 29-32

**Option Code: 815**

**Bioproducts and Bioenergy Option**

This option is offered within the following major(s):  
• Bioresource Research - College of Agricultural Sciences (p. 181)

The Bioproducts and Bioenergy option is concerned with the innovative discovery and production of biomaterials (e.g. biodegradable plastics and composites), bioenergy (e.g. fuel ethanol, hydrogen and biodiesel), or biochemicals (e.g. antibiotics, pharmaceuticals and herbicides) from plant, animal, or microbial biomass. Switching to an economy where the basic building blocks for materials, chemicals, and energy are derived from renewable biological resources could improve health, transform manufacturing practices, increase agricultural productivity, boost rural economies, and mitigate climate change. Students in this option will be prepared for interesting careers in industry and bioinnovation, as well as graduate programs.

Students must choose option classes from four categories, to provide:

1. Background appropriate to the systems that their research concerns (e.g. forests, agricultural crops, microbes);  
2. An upper-division laboratory class;  
3. A class in economics, business, innovation, or marketing;  
4. Specialization and breadth courses, depending on the student's choice of research.

Biotechnology Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Biotechnology refers to laboratory-based techniques such as genetic engineering, recombinant DNA, tissue culture, and horizontal gene transfer, to make or modify products, to improve plants or animals, or to develop useful microorganisms. Examples include gene transfer to increase plant yield or disease resistance; cell and tissue culture to clonally propagate plants or animals; manipulation of microorganisms or cultured cells for the production of fermented food and beverages or the development of vaccines; production of antibodies for detection of animal and plant diseases; drug discovery and development. Students will gain laboratory and/or field experience in modern techniques of biotechnology, preparing them for biosciences or biomedical graduate/professional schools or careers in biotechnology.

Option Code: 116

Climate and Biosystems Modeling Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

The Climate and Biosystems Modeling option applies general systems theory to the analysis of climate, environmental and agricultural systems, and their interactions. Systems theory provides a method of analyzing overall system behavior by examining the relations among—and the behavior of—individual components, and synthesizing these relationships into a mathematical framework that describes the total system. Computer simulation using this mathematical framework can predict and analyze the response to various changes in the inputs to, and/or structure of, the system, providing a powerful tool for the development of comprehensive solutions to problems. Examples of topics for student research could include studying the effects of climate change on vectored disease transmission, marine biodiversity, distributions of crops and crop pathogens, the carbon and nitrogen cycles, and wildfire cycles. The option is flexible; students design personalized programs and may complete a double major or minor if desired. This option will prepare students for challenging careers in governmental regulatory agencies and environmental consulting companies, or for graduate programs.

BRR students interested in climate and/or ecosystem research but not modeling should investigate the Sustainable Ecosystems option.

Option Code: 115

Biotechnology Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

Option Code: 815
Environmental chemistry focuses on the basic principles that control the fate of chemicals in the environment. A bewildering variety of chemicals, an inevitable result of modern industrial civilization, are released daily; some of them persist in soil, water, or air. The extent to which these chemicals are a health hazard depends in part on where, how much, and in what form they accumulate. OSU scientists use state-of-the-art methods to detect trace amounts of chemicals in the environment, and address emerging applications in life sciences, biotechnology, and medicine, and will be prepared for careers or graduate programs in this new, rapidly growing field.

**Option Code: 117**

**Environmental Chemistry Option**

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Environmental chemistry focuses on the basic principles that control the fate of chemicals in the environment. A bewildering variety of chemicals, an inevitable result of modern industrial civilization, are released daily; some of them persist in soil, water, or air. The extent to which these chemicals are a health hazard depends in part on where, how much, and in what form they accumulate. OSU scientists use state-of-the-art methods to detect trace amounts of chemicals in the environment, at levels as low as one part per trillion, and track their movement and transformations. Students will acquire laboratory skills that will be in high demand as the worldwide public concern with environmental quality increases.

**Genomics/Bioinformatics Option**

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Technological advances in the life sciences have led to a virtual explosion of genomics, proteomics, metabolomics and related ‘omics’ data that give unprecedented global and molecular views of living systems. The Genomics/Bioinformatics Option focuses on computational analyses of these data, using state-of-the-art methods. Computational areas of emphasis within this option include sequence (DNA and protein) analysis and alignment, biological network analysis, and quantitative modeling. Students will be able to use these data to answer research questions and address emerging applications in life sciences, biotechnology, and medicine, and will be prepared for careers or graduate programs in this new, rapidly growing field.

Pest Biology and Management Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Pest biology and management involves the study of living organisms, such as insects, fungal and bacterial pathogens, vertebrates, and weeds, that limit agricultural productivity. Students with an interest in entomology may study identification, biology and control of insects, including integrated plant protection, biocontrol, and use of beneficial insects. Research approaches range from basic laboratory studies to field experiments. Students will develop research skills in pest biology, development of management strategies, and assessment of pest impact on plants or livestock, preparing them for a variety of regulatory and research positions and graduate programs.

Plant Growth and Development Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Plant growth and development involves the study of the control and coordination of processes in cells, organs, and/or whole plants, including, for example, changes in gene expression in response to environmental conditions such as climate change. Students will develop research skills and knowledge about the regulation of plant growth and development, metabolism, structure and function of macromolecules (i.e., enzymes, storage proteins, and nucleic acids), and whole plant physiology, preparing them for agricultural and biosciences positions or graduate programs.

Option Code: 149

Pest Biology and Management Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Pest biology and management involves the study of living organisms, such as insects, fungal and bacterial pathogens, vertebrates, and weeds, that limit agricultural productivity. Students with an interest in entomology may study identification, biology and control of insects, including integrated plant protection, biocontrol, and use of beneficial insects. Research approaches range from basic laboratory studies to field experiments. Students will develop research skills in pest biology, development of management strategies, and assessment of pest impact on plants or livestock, preparing them for a variety of regulatory and research positions and graduate programs.
Sustainable Ecosystems Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Sustainable Ecosystems research addresses the sustainability of agricultural, forest, rangeland, coastal/marine, and native ecosystems, in which environmental soundness can result from the conscious interaction of humans with wildlife and other components of the systems. The field is multidisciplinary: insights from sociology, political science, anthropology, or philosophy may combine with concepts from biology, chemistry, and physics to support research. Research projects may cover very diverse interdisciplinary fields; students will acquire appropriate background and perspective by choosing among a broad variety of courses. Students in this option pursue careers in ecological/natural resource research and management, sustainable agriculture, consulting, government agencies, and graduate programs in sciences, policy and law.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Toxicology Option

**This option is offered within the following major(s):**

- Bioresource Research - College of Agricultural Sciences (p. 181)

Toxicology concerns potentially hazardous chemicals in food, drugs, and the environment, and their effects on biological life. Toxicology research encompasses environmental, agricultural, and human-health related areas, and may focus on mechanisms of toxicity, human and environmental risks from exposure, and means for reducing risks. Research could include the movement and bioaccumulation of pesticides and pharmaceuticals in the environment; the effects of specific toxicants on humans and animal models; and testing the effects of novel anti-cancer drugs. Employment opportunities in toxicology include research in academic and industrial fields, product safety evaluation, consulting, public service, and legal regulation. The Toxicology Option also can prepare students to apply for a variety of health and medicine-related graduate and professional programs.

**Option Code: 142**

### Toxicology Option

#### Required Courses

- **TOX 360** +THE WORLD OF POISONS 3
- **TOX 411** FUNDAMENTALS OF TOXICOLOGY 3

Select one Risk Assessment course from the following:

- **TOX 413** ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT 3
- **TOX 455** ECOTOXICOLOGY: AQUATIC ECOSYSTEMS
- **TOX 499** SPECIAL TOPICS (Systems Biological Approaches to Risk Analysis in Environmental Health)

#### Specialization and Breadth Courses

Select 18 credits from the following:

- **ATS 413** ATMOSPHERIC CHEMISTRY
- **BB 360** INTRODUCTION TO NEUROSCIENCE
- **BB 314** CELL AND MOLECULAR BIOLOGY
- **BB 460** ADVANCED CELL BIOLOGY
- **BB 484** CHROMATIN AND EPIGENETICS
- **BI 231** INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY
- **& BI 232** and INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY
- **& BI 233** and INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY
- **BI 331** ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
- **& BI 332** and ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
- **& BI 333** and ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
- **CH 324** QUANTITATIVE ANALYSIS
- **CH 361** EXPERIMENTAL CHEMISTRY I
- **& CH 362** and EXPERIMENTAL CHEMISTRY I
- **CH 390** ENVIRONMENTAL CHEMISTRY
- **CH 440** PHYSICAL CHEMISTRY
- **& CH 441** and PHYSICAL CHEMISTRY
- **& CH 442** and PHYSICAL CHEMISTRY
- **CH 461** EXPERIMENTAL CHEMISTRY II
- **& CH 462** and *EXPERIMENTAL CHEMISTRY II
- **FW 366** ENVIRONMENTAL CONTAMINANTS IN FISH AND WILDLIFE
- **H 344** FOUNDATIONS OF ENVIRONMENTAL HEALTH
- **H 448** PUBLIC HEALTH TOXICOLOGY
- **MB 302** GENERAL MICROBIOLOGY
- **& MB 303** and GENERAL MICROBIOLOGY LABORATORY
- **MB 456** MICROBIAL GENETICS AND BIOTECHNOLOGY
- **MCB 554** GENOME ORGANIZATION, STRUCTURE, AND MAINTENANCE
- **MCB 555** GENOME EXPRESSION AND REGULATION
- **PHAR 525** FOUNDATIONS OF DRUG ACTION I

- Baccalaureate Core Course (BCC)
- Writing Intensive Course (WIC)
- Select courses from five categories: Ecology, Biology and Systematics, Environmental Methods, Social/Policy, and Integrative/Management/Conservation. Select additional elective courses for a total of 27 option credits

**Option Code: 993**
Option Code: 993

Water Resources Option

This option is offered within the following major(s):

- Bioresource Research - College of Agricultural Sciences (p. 181)

Water resources research involves the use of science and policy tools to identify contaminants and make assessments of water quality. Students will acquire laboratory skills to detect water contaminants and track their movements and transformations while learning related policy and management concerns. Research areas could include microbial contaminants, the impact of urbanization on water quality, and marine and estuarine water quality and its impact on fisheries and shellfish industries. Option course work covers water sciences and hydrology, environmental policy and management. Students completing this option will be prepared for graduate school or for positions in environmental consulting, research, and natural resource management.

Option Code: 626

Botany and Plant Pathology

Undergraduate Studies

Botany and plant pathology are concerned with the study of plants at all levels of biological organization, from molecular and cellular processes to the global ecosystem. This breadth of field reflects the wide range of issues and problems that confront plant biologists. In addition to addressing fundamental questions in plant biology, plant scientists in the 21st century will be called upon to provide information useful for producing food, fiber, and medicine for an increasing population, and for increasing our understanding of the diversity of plant and ecological systems and their interactions with humans. Students studying botany and plant pathology at OSU receive the basic science background necessary for such contributions, and may choose to focus in a particular area within plant science.

The undergraduate program in the Department of Botany and Plant Pathology is designed for students who wish to receive a BS in Botany major and for students pursuing degrees in other fields that require a knowledge of plant biology. For example, students who have an undergraduate major in biology or environmental sciences may wish to emphasize botany courses in their upper-division course work.

Completion of the undergraduate curriculum in botany can qualify students for graduate work in various areas of plant biology and plant pathology, and for positions in state and federal agencies, and industries concerned with plants and their products.

Prospective botany majors should obtain a strong background in the biological and physical sciences at the high school level. Specifically recommended are a minimum of three years of high school mathematics, including algebra, geometry, and some exposure to trigonometry, one year of chemistry, one year of biology, one year of physics, and courses designed to develop computer and writing skills. Students without an adequate background in mathematics and science may make up these deficiencies early in their college careers.

Graduate Studies

The Department of Botany and Plant Pathology offers graduate programs in the following areas of concentration: ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, and systematics.

Students with majors in any one area may incorporate into their programs minors in other areas within the department or in other departments and colleges. Integrated minors, and interdisciplinary programs in plant...
physiology, molecular and cellular biology, genetics, and environmental sciences are also available.

The MS and PhD degrees offered by the Department of Botany and Plant Pathology require, in addition to course work, research resulting in presentation and defense of a thesis. A nonthesis MS degree also is available. PhD candidates must pass a written and oral preliminary examination upon completion of their course work. In addition, PhD students are required to be a teaching assistant for two quarters.

Inquiries concerning graduate studies can be forwarded to the chairperson of the department’s Graduate Studies Committee (Andrew.Jones@oregonstate.edu (john.fowler@oregonstate.edu)) and additional details are available online (http://bpp.oregonstate.edu/content/graduate-programs/).

Undergraduate Programs

Major

• Biological Data Sciences (p. 198)
  Options:
  • Genomics (p. 202)
  • Ecological and Environmental Informatics (p. 201)
  • Computational Biology (p. 201)
• Botany (p. 203)
  Options:
  • Comprehensive Botany (p. 206)
  • Customizable (p. 206)
  • Ecology, Evolution, and Conservation (p. 207)
  • Molecular, Cellular, and Genomic Botany (p. 207)
  • Plant Pathology (p. 207)

Minor

• Biological Data Sciences (p. 197)
• Botany (p. 203)

Biological Data Sciences (BDS)

BDS 211, USE AND ABUSE OF DATA: CRITICAL THINKING IN SCIENCE, 3 Credits

Critically examine how data analysis can support legitimate conclusions from biological datasets and also how deceptive visualizations, misleading comparisons, and spurious reasoning can lead to false conclusions. Analyze data to break down the logical flow of an argument and identify key assumptions, even when they are not stated explicitly. 

Prerequisite: (MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better) or MTH 227 with C- or better or MTH 241 with C- or better or MTH 245 with C- or better.

BDS 311, COMPUTATIONAL APPROACHES FOR BIOLOGICAL DATA, 3 Credits

The theory and practice underlying widely used computational methods for biological data analysis. Focuses on the analysis and visualization of large data sets using Python, with broad applications to genomics, ecology, and other disciplines. Topics may include image processing, time series analysis, dimensionality reduction, and resampling methods. Develops student expertise in designing and implementing algorithms in the Python programming language.

Prerequisite: (BI 223 with C- or better or BI 223H with C- or better) and (MTH 252 [C-] or MTH 252H [C-] or MTH 228 [C-]) and (CS 261 [C-] or BOT 476 [C-]).

BDS 406, SPECIAL PROJECTS, 1-99 Credits

This course is repeatable for 99 credits.

BDS 411, ANALYSIS OF BIOLOGICAL DATA: CASE STUDIES, 3 Credits

Case studies; synthesize previously acquired knowledge and skills in biology, mathematics, statistics, and computer science to implement, in writing, an analysis strategy. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

Prerequisite: ((BI 311 with C- or better or BI 311H with C- or better) or (BB 314 with C- or better or BB 314H with C- or better) or MB 310 with C- or better) and (MTH 252 [C-] or MTH 252H [C-] or MTH 228 [C-]) and (CS 161 [C-] or BOT 476 [C-]).
BDS 474X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatins; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Prerequisite: BI 311 (may be taken concurrently) with C- or better or BB 314 (may be taken concurrently) with C- or better
Equivalent to: BOT 474X

BDS 475, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Prerequisite: (BB 314 with D- or better or BB 314H with D- or better) and (BI 311 [D] or BI 311H [D] or BB 314H with D-)
Equivalent to: BOT 475
Recommended: Basic working knowledge of cell and molecular biology and genetics

BDS 478, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BOT 460, BOT 478

BDS 491, CAPSTONE PROJECTS IN BIOLOGICAL DATA SCIENCE I, 3 Credits
Quantitative skills and biological thinking will be used to analyze and draw conclusions from real-world biological datasets. Projects will be completed in the context of small groups. Draws on skills in mathematics, statistics, computer science, and biology.
Prerequisite: (ST 352 with C- or better or ST 412 with C- or better) and (CS 162 [C-] or BOT 476 [C-] or BB 485 [C-] or MTH 427 [C-])

BDS 492, CAPSTONE PROJECTS IN BIOLOGICAL DATA SCIENCE II, 3 Credits
Quantitative skills and biological thinking will be used to analyze and draw conclusions from biological datasets retrieved in BDS 412. This is a synthesis course that draws skills in mathematics, statistics, computer science, and biology, in which the students will process their curated datasets and draw conclusions.
Prerequisite: BDS 491 with C- or better

BDS 574X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatins; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Equivalent to: BOT 574X

BDS 575, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Equivalent to: BOT 575, MCB 575
Recommended: BB 314 and (BI 311 or PBG 430) and basic working knowledge of cell and molecular biology and genetics

BDS 578, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems. CROSSLISTED as BDS 478/BOT 478 and BDS 578/BOT 578.
Equivalent to: BOT 560, BOT 578

BDS 599, SPECIAL TOPICS, 1-4 Credits
This course is repeatable for 99 credits.
Botany and Plant Pathology (BOT)

BOT 101, *BOTANY: A HUMAN CONCERN, 4 Credits
Introductory botany for non-majors, emphasizing the role of plants in the environment, agriculture and society. Includes molecular approaches to the study of plant function and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science

BOT 220, *INTRODUCTION TO PLANT BIOLOGY, 4 Credits
Introduction to plant biology including an overview of major groups of plants, plant cells and cell types, plant anatomy and architecture, physiology and function, and ecology and the roles of plants in the environment. Laboratory exercises build on lecture themes and provide hands-on learning experiences including field trips. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science

BOT 313, PLANT STRUCTURE, 4 Credits
The structural components of vascular plants and how plant structure relates to function, development, environment, evolution, and human use of plants. Field trip. Lec/lab.
Prerequisite: ((BI 212 with D- or better or BI 212H with D- or better) and ((BI 211 with D- or better or BI 211H with D- or better) or (BI 213 with D- or better or BI 213H with D- or better))) or ((BI 221 with D- or better or BI 221H with D- or better) and (BI 222 [D-] or BI 222H [D-]) or (BI 205 [D-] and BI 206 [D-]))
Recommended: BI 213 or BI 213H or BI 223 or BI 223H
Available via Ecampus

BOT 321, PLANT SYSTEMATICS, 4 Credits
Vascular plant classification, diversity, and evolutionary relationships. Lab emphasizes the collection and identification of ferns, gymnosperms, and flowering plants in Oregon. Field trips. Lec/lab.
Recommended: BI 213 or BI 213H or BI 223 or BI 223H
Available via Ecampus

BOT 322, ECONOMIC AND ETHNOBOTANY: ROLE OF PLANTS IN HUMAN CULTURE, 3 Credits
Economic and cultural (ethnobotanical) uses of plants and fungi by humans, including domesticated cultivated plants as well as wild-growing plants, and uses of plants and fungi by indigenous cultures. Ecampus course only.
Available via Ecampus

BOT 323, ^FLOWERING PLANTS OF THE WORLD, 3 Credits
Global perspective of plant biodiversity with a focus on evolutionary origins, classification, and evolutionary relationships of the major groups of plants. Development and application of scientific writing and utilization of online information resources in plant evolutionary biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: (BI 211, BI 212, BI 213) or (BI 221, BI 222, BI 223) or (BI 204, BI 205, BI 206)
Available via Ecampus

BOT 324, *FUNGI IN SOCIETY, 3 Credits
Explores the diverse roles played by fungi in relation to human civilization and the natural environment. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: One course in biological sciences.
Available via Ecampus

BOT 325, *INTERSECTIONS BETWEEN PLANTS AND HUMANITY, 3 Credits
The unique attributes of plants—including aspects of their biochemistry, growth, structure, and physiology—have influenced all aspects of life on earth, from biogeochemical cycles to the rise and expansion of human civilizations. Plants are sources of medicines, stimulants, hallucinogens, fibers and woods, resins and latex, oils and waxes; plants have inspired technological innovation, exploration, and exploitation of people and the environment. This course critically examines the intersections of plants with society and technology by exploring the roles plants have played in both historical and modern contexts. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: One course in biological sciences and junior standing.

BOT 331, PLANT PHYSIOLOGY, 4 Credits
Survey of physiological processes in plants, including photosynthesis and plant metabolism, mineral nutrition and ion uptake processes, plant cell/water relations, regulation of plant growth and development, and transpiration and translocation. Lec/rec.
Prerequisite: ((BI 212 with D- or better or BI 212H with D- or better) and (BI 213 [D-] or BI 213H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) or (BI 205 [D-] and BI 206 [D-]) and (CH 123 [D-] or (CH 233 [D-] and CH 263 [D-])))
Recommended: (BI 213 or BI 213H or BI 223 or BI 223H) and (CH 123 and CH 263)
Available via Ecampus

BOT 332, LABORATORY TECHNIQUES IN PLANT BIOLOGY, 3 Credits
Laboratory experiences in the manipulation and observation of physiological processes in plant systems. Analysis and interpretation of physiological data generated in experimentation with plant systems. Training in basic laboratory skills, including the principles and procedures involved in the use of common items of laboratory instrumentation. Lab.
Recommended: BOT 331 or BI 314 or BB 314
Available via Ecampus
BOT 341, PLANT ECOLOGY, 4 Credits
Study of higher plants in relation to their environment. The relationship of plant physiology and reproduction to environmental factors; competition and other species interactions; the structure, dynamics and analysis of vegetation. Field trips. Lec/lab. 
Recommended: BOT 321 and ((BI 213 or BI 213H) or (BI 223 or BI 223H))
Available via Ecampus

BOT 350, INTRODUCTORY PLANT PATHOLOGY, 4 Credits
Symptoms, causal agents, diagnosis, and prevention of plant diseases, with emphasis on fungi, bacteria, nematode, and virus pathogens. Lec/lab.
Prerequisite: ( BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) or (BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]) or (BI 204 [D-] and BI 205 [D-] and BI 206 [D-])
Available via Ecampus

BOT 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BOT 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

BOT 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BOT 406, PROJECTS: CURATORIAL ASSISTANT, 1-6 Credits
Students assist with curatorial projects in the OSU Herbarium. Admission is by application to the Department of Botany & Plant Pathology. This course is repeatable for 6 credits.

BOT 407, SEMINAR, 1 Credit
Section 1: Departmental seminar. Section 2: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussing of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.
Equivalent to: BI 407H, BOT 407H
This course is repeatable for 16 credits.

BOT 407H, SEMINAR, 1 Credit
Section 1: Departmental seminar. Section 3: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussing of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BOT 407
This course is repeatable for 16 credits.

BOT 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 413, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 413/FOR 413.
Prerequisite: BI 204 with C or better or BI 212 with C or better or BI 212H with C or better or BI 213 with C or better or BI 213H with C or better or BI 221 with C or better or BI 221H with C or better
Equivalent to: FOR 413

BOT 414, AGROSTOLOGY, 4 Credits
Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab.
Recommended: BOT 321

BOT 416, AQUATIC BOTANY, 4 Credits
Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab.
Recommended: (BI 213 or BI 213H) or (BI 223 or BI 223H)

BOT 417X, PHYCOLOGY, 4 Credits
A field and laboratory based introduction to micro- and macro-algal biology, reproduction and evolution. Emphasis is placed on how the endosymbiosis theory ties algae together as a functional group. Algal diversity will be explored through lectures, laboratory and field trips. The laboratory experience will include methods for isolation, culturing and maintenance of algae for aquaculture and research.
Recommended: One year of biology

BOT 425, FLORA OF THE PACIFIC NORTHWEST, 3 Credits
Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab.
Recommended: BOT 321

BOT 440, FIELD METHODS IN PLANT ECOLOGY, 4 Credits
Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student’s location, and student projects.
Recommended: Course in ecology and a course in statistics.
Available via Ecampus

BOT 442, PLANT POPULATION ECOLOGY, 3 Credits
Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab.
Recommended: BOT 341
BOT 458, ECOSYSTEMS GENOMICS, 3 Credits
Genomic approaches used to understand species interactions with a focus on plant-associated microbes. Learning the conceptual framework and computational techniques of genomics to study the ecology of plant-microbe interactions at the ecosystem level.
Prerequisite: (BI 311 with D- or better or BI 311H with D- or better) and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-] or BB 314H [D-])

BOT 460, FUNCTIONAL GENOMICS, 3 Credits
Functional genomics describes a set of conceptual approaches and associated laboratory techniques that rely on large-scale DNA sequence datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. This course will provide an overview of these techniques, including a) approaches to predicting protein function based on sequence analysis, b) large-scale genetic approaches to identifying novel genotype-phenotype associations, and c) transcriptomic, proteomic and metabolomic approaches that reveal gene functions by measuring changes in abundance/modification of associated RNA transcripts, proteins and metabolites.
Prerequisite: (BI 311 with C- or better or BI 311H with C- or better) and (BI 314 [C-] or BI 314H [C-] or BB 314 [C-] or BB 314H [C-])

BOT 461, MYCOLOGY, 4 Credits
Broad taxonomic survey of the fungi and their biology. Examines fungal life histories, systematics, ecology, and genetics, as well as ethnomycology. Introduces approaches to mycology in the field, including collection and preparation of specimens.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or ((BI 221 [C-] or BI 221H [C-]) and BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])

BOT 465, LICHENOLOGY, 4 Credits
Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: (BI 213 or BI 213H) or (BI 223 or BI 223H) and two botany courses

BOT 466, BRYOLOGY, 4 Credits
Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: (BI 213 or BI 213H) or (BI 223 or BI 223H) and two botany courses

BOT 474X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatins; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Prerequisite: BI 311 (may be taken concurrently) with C- or better or BB 314 (may be taken concurrently) with C- or better
Equivalent to: BDS 474X

BOT 475, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Prerequisite: (BB 314 with D- or better or BB 314H with D- or better) and (BI 311 [D-] or BI 311H [D-] or BBG 430 [D-])
Equivalent to: BDS 475
Recommended: Basic working knowledge of cell and molecular biology and genetics

BOT 476, INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES, 3 Credits
Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences.
Recommended: Cell and molecular biology or genetics. Familiarity with text editing software and unix/linux operating system is advantageous

BOT 478, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BDS 478, BOT 460
BOT 480, PHOTOSYNTHESIS AND PHOTOBIOLOGY, 3 Credits
Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems.
Recommended: One course in plant physiology or ecology

BOT 488, ENVIRONMENTAL PHYSIOLOGY OF PLANTS, 3 Credits
Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab.
Recommended: One course in plant physiology or one course in ecology.

BOT 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: BOT 499H
This course is repeatable for 16 credits.

BOT 499H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BOT 499
This course is repeatable for 16 credits.

BOT 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

BOT 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BOT 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BOT 507, SEMINAR, 1-16 Credits
Section 1: Departmental seminar (F, W, S). Section 2: Communication in Ecology (F). Section 3: Community and Habitat Analyses (W). Section 4: Lichens and Bryophytes Research (S). Weekly one-hour meetings for reporting and discussions of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Graded P/N.
This course is repeatable for 16 credits.

BOT 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 513, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 513/FOR 513.
Equivalent to: FOR 513
Recommended: BI 204 or BI 212 or BI 212H or BI 213 or BI 213H

BOT 514, AGROSTOLOGY, 4 Credits
Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab.
Recommended: BOT 321

BOT 516, AQUATIC BOTANY, 4 Credits
Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab.
Recommended: BI 213 or BI 213H

BOT 517X, PHYCOLOGY, 4 Credits
A field and laboratory based introduction to micro- and macro-algal biology, reproduction and evolution. Emphasis is placed on how the endosymbiosis theory ties algae together as a functional group. Algal diversity will be explored through lectures, laboratory and field trips. The laboratory experience will include methods for isolation, culturing and maintenance of algae for aquaculture and research.
Recommended: One year of biology

BOT 525, FLORA OF THE PACIFIC NORTHWEST, 3 Credits
Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab.
Recommended: BOT 321

BOT 540, FIELD METHODS IN PLANT ECOLOGY, 4 Credits
Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student's location, and student projects.
Recommended: Course in ecology and a course in statistics.
Available via Ecampus

BOT 542, PLANT POPULATION ECOLOGY, 3 Credits
Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab.
Recommended: BOT 341

BOT 543, PLANT COMMUNITY ECOLOGY, 3 Credits
The structure, diversity, and successional dynamics of terrestrial plant communities; methods of analysis. Lec/lab.
Recommended: BOT 341 or equivalent.
BOT 547, NUTRIENT CYCLING, 3 Credits
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as BOT 547/SOIL 547.
Equivalent to: FS 547, SOIL 547
Recommended: College-level chemistry and biology and one class in ecology (eg. BI 370) and/or soils (eg. SOIL 205)

BOT 550, PLANT PATHOLOGY, 5 Credits
Causal agents of plant disease, diagnosis, pathogenesis, epidemiology, and disease management principles and strategies. Field trip. Lec/lab/rec. Offered alternate years.
Recommended: BI 213 or BI 213H

BOT 552, PLANT DISEASE MANAGEMENT, 4 Credits
Analysis of host, pathogen, and environmental factors influencing the increase and spread of plant disease. Epidemiological theory will be used as a basis for developing and evaluating principles and concepts of plant disease management. Lec/lab/rec. Offered alternate years.
Recommended: BOT 350 or BOT 550

BOT 553, PLANT DISEASE DIAGNOSIS, 3 Credits
Diagnosis of plant diseases and identification of causal agents. Laboratory practice in identification techniques. Observation of symptoms exhibited by diseased plants in greenhouse and field locations. Field trips. Lec/lab. Offered alternate years in summer term.
Recommended: BOT 350 or BOT 550

BOT 554, BIOLOGY OF NEMATODES, 4 Credits
Survey of basic biology and biodiversity of nematodes. Includes taxonomy, identification, life cycles, ecology and pathology, and interaction with other organisms. Lec/lab. Offered alternate years. This course is repeatable for 4 credits.
Recommended: Plant pathology

BOT 558, ECOSYSTEMS GENOMICS, 3 Credits
Genomic approaches used to understand species interactions with a focus on plant-associated microbes. Learning the conceptual framework and computational techniques of genomics to study the ecology of plant-microbe interactions at the ecosystem level.
Recommended: BI 311 and BI 314

BOT 560, FUNCTIONAL GENOMICS, 3 Credits
Functional genomics describes a set of conceptual approaches and associated laboratory techniques that rely on large-scale DNA sequence datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. This course will provide an overview of these techniques, including a) approaches to predicting protein function based on sequence analysis, b) large-scale genetic approaches to identifying novel genotype-phenotype associations, and c) transcriptomic, proteomic and metabolomic approaches that reveal gene functions by measuring changes in abundance/modification of associated RNA transcripts, proteins and metabolites.
Recommended: (BI 311 or BI 311H) and (BI 314 or BI 314H)

BOT 561, MYCOLOGY, 4 Credits
Broad taxonomic survey of the fungi and their biology. Examines fungal life histories, systematics, ecology, and genetics, as well as ethnomycolgy. Introduces approaches to mycology in the field, including collection and preparation of specimens.

BOT 565, LICHENOLOGY, 4 Credits
Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: (BI 213 or BI 213H) and two botany courses.

BOT 566, BRYOLOGY, 4 Credits
Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years.
Recommended: (BI 213 or BI 213H) and two botany courses.

BOT 570, COMMUNITY STRUCTURE AND ANALYSIS, 4 Credits
Quantitative methods for the analysis of biotic communities, including community concepts, estimation of community composition parameters, theoretical aspects of multivariate methods of analyzing species-importance data, and overview of multivariate tools; hands-on computer analysis of data sets. Lec/lab.
Equivalent to: BI 570
Recommended: BI 370 and (ST 412 or ST 512) and calculus

BOT 574X, INTRODUCTION TO GENOME BIOLOGY, 3 Credits
Explores how genomes underlie and influence biological phenomena, across the diversity of life, from prokaryotic microbes to eukaryotic multicellular organisms. Covers genome organization: the structure of chromosomes and chromatin; genes and gene families; and mechanisms that remodel genomes, such as mutation, recombination and transposable elements in the first part of the course. Focuses on genome expression and regulation: gene expression, cellular functions and biochemical pathways; transcriptional and post-transcriptional regulatory mechanisms; and genotype-to-phenotype relationships in the second part of the course. Emphasizes the use of recent technological advances and genome-wide assays that enable investigation of these topics.
Equivalent to: BDS 574X
BOT 575, COMPARATIVE GENOMICS, 4 Credits
Explores principles of comparative genomics. Examines methods for genome assembly and annotation. Discusses genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. CROSSTLISTED as BDS 475/BOT 475 and BDS 575/BOT 575/MCB 575.
Equivalent to: BDS 575, MCB 575
Recommended: BB 314 and (BI 311 or PBG 430) and basic working knowledge of cell and molecular biology and genetics

BOT 578, FUNCTIONAL GENOMICS, 3 Credits
Introduces conceptual approaches and associated laboratory techniques that rely on genome-scale datasets to investigate the function of, and interactions between, genes as well as their RNA/protein products. Examples include: predicting protein function based on nucleotide and amino acid sequence analysis; large-scale genetic approaches to identifying novel genotype-phenotype associations; and analysis of transcriptomic, proteomic and metabolomic datasets, which measure changes in RNA transcripts, proteins and metabolites, respectively, to explore gene function and cellular/organismal networks. Provides a conceptual framework for understanding how the wide range of available large-scale technologies can be applied to solve biological problems. CROSSTLISTED as BDS 478/BOT 478 and BDS 578/BOT 578.
Equivalent to: BDS 578, BOT 560

BOT 580, PHOTOSYNTHESIS AND PHOTOBIOLOGY, 3 Credits
Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems.
Recommended: One course in plant physiology or ecology

BOT 588, ENVIRONMENTAL PHYSIOLOGY OF PLANTS, 3 Credits
Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab.
Recommended: One course in plant physiology or ecology

BOT 590, SELECTED TOPICS IN MYCOLOGY, 1-3 Credits
Advanced topics in mycology through analysis of current literature. Detailed study of an aspect of mycology beyond those covered in regular classes. Seminar and discussion format.
This course is repeatable for 16 credits.
Recommended: BOT 461 or BOT 561

BOT 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BOT 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

BOT 603, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

BOT 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BOT 607, SEMINAR, 1 Credit
Section 1. Departmental seminar
This course is repeatable for 16 credits.

BOT 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

BOT 651, MOLECULAR BASIS OF PLANT PATHOGENESIS, 3 Credits
Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years.
Equivalent to: MCB 651
Recommended: BOT 550

BOT 668, PLANT DISEASE DYNAMICS, 4 Credits
Evaluation of processes affecting the dynamics of plant disease and pathogen populations through analysis of current literature. Students will be expected to conduct extensive reading and analysis of literature and to meet with the instructor for small group discussions. Offered alternate years.
Recommended: BOT 550 and ST 412

BOT 691, SELECTED TOPICS-PLANT ECOLOGY, 1-3 Credits
Recent advances and developing problems in plant ecology, with critical evaluation of current literature. Topics vary from year to year.
This course is repeatable for 99 credits.
Recommended: Graduate-level ecology.

BOT 692, SELECTED TOPICS: PLANT PATHOLOGY, 1-3 Credits
Selected topics concerning plant pathogens and plant disease processes, emphasizing current literature and theory. Topics vary from year to year.
Equivalent to: MCB 692
This course is repeatable for 99 credits.
Recommended: BOT 550

BOT 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Biological Data Sciences Minor
Students in the BDS Minor take courses in the life sciences, computer science, and statistics.
**Minor Code: 929**

**Total Credits**

27

- Baccalaureate Core Course (BCC)
- Writing Intensive Course (WIC)

**Minor Code: 929**

**Biological Data Sciences Undergraduate Major (BS, HBS)**

This major offers the following option(s):

- Computational Biology (p. 201)
- Ecological and Environmental Informatics (p. 201)
- Genomics (p. 202)

The BDS undergraduate program provides trans-disciplinary education that intersects the life sciences, computer science, statistics, and mathematics.

**Major Code: 858**

- Apply the process of scientific investigation to real world biological datasets.
- Use appropriate quantitative and visual methods in scientific investigation.
- Demonstrate proficiency in using appropriate methods to organize and manipulate large datasets.
- Demonstrate effective communication and functioning in trans-disciplinary teams.
- Perform work in a professional and ethical manner.
- Apply the core concepts in the biological sciences, mathematics, statistics, and computer science to scientific investigation.

### Biological Data Sciences Undergraduate Major (BS, HBS)

#### Third Year

**Fall**
- BI 370  **ECOLOGY**  3
- BI 311  **GENETICS**  4
- MTH 341  **LINEAR ALGEBRA I**  3

**Bacc Core: Cultural Diversity**  3
**Bacc Core: Science, Technology and Society**  3

**Credits**  14

**Winter**
- EEI Elective: Pop., Comm; Eco.Ecology  3
- Bacc Core: Western Culture  3
- Bacc Core: Social Processes & Institutions  3
- Bacc Core: Difference, Power & Discrimination  3

**Credits**  16

**Spring**
- BI 445  **EVOLUTION**  3
- EEI Elective: Pop., Comm; Eco.Ecology  4
- BOT 458  **ECOSYSTEMS GENOMICS**  3
- BDS 411  **ANALYSIS OF BIOLOGICAL DATA: CASE STUDIES**  3
- BOT 401  **RESEARCH**  2

**Credits**  15

#### Fourth Year

**Fall**
- EEI Elective: Env.Info  4
- BDS 406  **SPECIAL PROJECTS**  1
- Elective  4
- Elective  4
- MTH 427  **INTRODUCTION TO MATHEMATICAL BIOLOGY**  3

**Credits**  16

**Winter**
- EEI Elective: Pop., Comm; Eco.Ecology  3
- Elective  4
- BDS 491  **CAPSTONE PROJECTS IN BIOLOGICAL DATA SCIENCE I**  3
- Elective  4

**Credits**  14

**Spring**
- EEI Elective: Phys.EnvScii  4
- BDS 492  **CAPSTONE PROJECTS IN BIOLOGICAL DATA SCIENCE II**  3
- Elective  4
- Elective  3

**Credits**  14

### Computational Biology Option

#### First Year

**Fall**
- BI 221  **PRINCIPLES OF BIOLOGY: CELLS**  4
- CH 231  **GENERAL CHEMISTRY**  4
- CH 261  **LABORATORY FOR CHEMISTRY 231**  1
- MTH 251  **DIFFERENTIAL CALCULUS**  4
- WR 121  **ENGLISH COMPOSITION**  3

**Credits**  16

**Winter**
- BI 222  **PRINCIPLES OF BIOLOGY: ORGANISMS**  4
- CS 161  **INTRODUCTION TO COMPUTER SCIENCE I**  4
- MTH 252  **INTEGRAL CALCULUS**  4
- COMM 111  **PUBLIC SPEAKING**  3

**Credits**  15

#### Second Year

**Fall**
- MTH 254  **VECTOR CALCULUS I**  4
- CS 261  **DATA STRUCTURES**  4
- ST 351  **INTRODUCTION TO STATISTICAL METHODS**  4
- Bacc Core: Cultural Diversity  3

**Credits**  15

**Winter**
- Elective  3
- Bacc Core: Western Culture  3
- ST 411  **METHODS OF DATA ANALYSIS**  4
- WR 327  **TECHNICAL WRITING**  3
- HHS 231  **LIFETIME FITNESS FOR HEALTH**  2

**Credits**  15

**Spring**
- MTH 256  **APPLIED DIFFERENTIAL EQUATIONS**  4
- Elective  3
- ST 412  **METHODS OF DATA ANALYSIS**  4
- BDS 311  **COMPUTATIONAL APPROACHES FOR BIOLOGICAL DATA**  3
- PAC XXX  **Physical Activity Course**  1

**Credits**  15

#### Third Year

**Fall**
- MTH 341  **LINEAR ALGEBRA I**  3
- Elective  3
- Bacc Core: Social Processes & Institutions  3
- Elective  3

**Credits**  16

**Winter**
- CB Elective: Bio/Bioinfo/ST  3
- Elective  3
- CS 325  **ANALYSIS OF ALGORITHMS**  4
- Bacc Core: Bacc Core: Science, Technology and Society  3
- Elective  3

**Credits**  16

**Spring**
- BI 445  **EVOLUTION**  3
- Elective  3
- CB Elective: Adv. CS  4
- BDS 411  **ANALYSIS OF BIOLOGICAL DATA: CASE STUDIES**  3
- BOT 401  **RESEARCH**  1

**Credits**  14

#### Fourth Year

**Fall**
- CB Elective: Bio/Bioinfo/ST  3
- BDS 406  **SPECIAL PROJECTS**  1
- Elective  4
- MTH 427  **INTRODUCTION TO MATHEMATICAL BIOLOGY**  3

**Credits**  14

**Winter**
- CB Elective: Adv. CS  3
- Bacc Core: Difference, Power & Discrimination  3
- Bacc Core: Literature & The Arts  3
Computational Biology Option

This option is offered within the following major(s):

- Biological Data Sciences - College of Agricultural Sciences (p. 198)

Students in the Computational Biology Option take classes in computer science, bioinformatics, statistics and mathematical biology.

Option Code: 918

ST 415 | DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS | 4
Other course with advisor approval | | 4

Option Code: 914

Botany and Plant Pathology Graduate Major (MS, PhD)

Graduate Areas of Concentration

Ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, systematics

The Department of Botany and Plant Pathology offers graduate programs leading to the Master of Science, and Doctor of Philosophy degrees in the field of botany and plant pathology.

Within this major field, students may elect to specialize in one of the approved areas of concentration.

The selection of an area of concentration is optional. Students may major in botany and plant pathology without selecting an area of concentration. The approved areas of concentration are described below.

• **Ecology** includes physiological, population, community, ecosystem and global studies in ecology.

• **Genetics** includes molecular, classical and population studies of the genetics of plants, fungi, and plant-associated microorganisms.

• **Genomics and computational biology** include the functional, comparative and structural study of plant, fungal, viral and bacterial genomes and the development and application of bioinformatic algorithms and tools used in the analysis of genomic data.

• **Molecular and cellular biology** include studies of molecular and cellular mechanisms active during plant development, molecular aspects of plant-pathogen interactions, and various aspects of gene regulation, signal transduction, and the cytoskeleton.

• **Mycology** includes the systematics, ecology, and population genetics of lichenized and nonlichenized fungi.

• **Plant pathology** includes studies in the areas of bacteriology, nematology, virology, forest pathology, epidemiology of plant diseases, the physiology of parasitism, and the molecular and biochemical basis of plant host-pathogen interactions.

• **Plant physiology** includes investigations of the regulation of plant growth and development, the molecular and physiological basis of plant-microbe interactions, nitrogen metabolism and the nitrogen cycle, and problems in environmental and stress physiology in plant systems.

• **Systematics** includes investigations of the taxonomy, phylogeny, and biogeography of plants, fungi, and lichens.

Students majoring in any one area of concentration may incorporate into their programs minors in other areas within the department or minors in other departments and colleges. Integrated minors, and interdisciplinary programs in plant physiology, molecular and cellular biology, genetics, and environmental sciences are also available.

The MS and PhD degrees offered by the Department of Botany and Plant Pathology require, in addition to course work, research resulting in the presentation and defense of a thesis. A nonthesis MS degree also is available for students with specific career goals. PhD candidates must pass a preliminary examination upon completion of their course work. In addition, PhD students are required to be a teaching assistant for two quarters.

Inquiries concerning graduate studies may be forwarded to the chair of the department's Graduate Studies Committee (Andrew.Jones@oregonstate.edu (john.fowler@oregonstate.edu)).
for increasing our understanding of the diversity of plant and ecological systems and their interactions with humans. Students studying botany and plant pathology at OSU receive the basic science background necessary for such contributions, and may choose to focus in a particular area within plant science.

The undergraduate program in the Department of Botany and Plant Pathology is designed for students who wish to receive a BS in Botany degree and for students pursuing degrees in other fields that require a knowledge of plant biology. For example, students who have an undergraduate major in biology or environmental sciences may wish to emphasize botany courses in their upper-division course work.

Completion of the undergraduate curriculum in botany can qualify students for graduate work in various areas of plant biology and plant pathology, and for positions in state and federal agencies, and industries concerned with plants and their products.

Prospective botany majors should obtain a strong background in the biological and physical sciences at the high school level. Specifically recommended are a minimum of three years of high school mathematics, including algebra, geometry, and some exposure to trigonometry, one year of chemistry, one year of biology, one year of physics, and courses designed to develop computer and writing skills. Students without an adequate background in mathematics and science may make up these deficiencies early in their college careers.

Botany and Plant Pathology Graduate Minor

Also available via Ecampus.

Botany Minor

Also available via Ecampsus.

1 Excluding BOT 101 but may include BOT 401, BOT 405, BOT 407, BOT 410

The minor requirements listed above are subject to the following constraints:

- Courses required for a major and taken in the major department may not count toward a minor.
- An individual course may not count toward more than one minor.
- At least 12 credits of the minor must be upper division.

Botany Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Comprehensive Botany (p. 206)
- Customizable (p. 206)
- Ecology, Evolution, and Conservation (p. 207)
- Molecular, Cellular, and Genomic Botany (p. 207)
- Plant Pathology (p. 207)

Also available via Ecampsus.

Botany and plant pathology are concerned with the study of plants at all levels of biological organization, from molecular and cellular processes to the global ecosystem. This breadth of field reflects the wide range of issues and problems that confront plant biologists. In addition to addressing fundamental questions in plant biology, plant scientists in the 21st century will be called upon to provide information useful for producing food, fiber, and medicine for an increasing population, and
experiential learning activity allows students to fulfill their individual education goals and prepare for career aspirations.

All Botany undergraduate majors are required to do the following:

1. Complete the core course curriculum meeting the requirements of the university, College of Agricultural Sciences, and Botany academic requirements.
2. Select and complete the course curriculum of a 21-credit option to obtain advanced scientific background and skills in a particular area of plant science. Students may select a pre-determined botany option from the catalog or create a customized option with approval of a BOT advisor. Course work delivered in the options provides students with advanced knowledge and skills related to the study of plants and plant-like organisms in natural and managed ecosystems and in the laboratory.

1. Comprehensive Botany
2. Customizable Option
3. Ecology, Evolution, and Conservation
4. Molecular, Cellular, and Genomic Botany
5. Plant Pathology

3. Participate in an experiential learning and subsequent student seminar. Every Botany major is required to have an experiential learning (EL) component in their curriculum that is not part of a scheduled academic course. The EL component can take many forms but must involve a minimum of 60 hours of work and must have a substantial educational objective that is related to the BOT degree. Academic credit is not required but may be earned by enrolling in research (BOT 401) or internship (BOT 410). Paid and voluntary positions are both acceptable. To meet the requirement, the student and the EL supervisor must make a written agreement that is approved by a Botany advisor. After completion of the EL project, the student is required to participate in a 1-credit student seminar during Fall term of the senior year (BOT 407), to reflect on the EL project and to incorporate it into future career planning activities.

Free Elective Courses 2

23-29

Total credits required for graduation is 180

* Baccalaureate Core Course (BCC)

  ^ Writing Intensive Course (WIC)

1 Includes 21 credits of coursework in fulfillment of one of the BOT transcript-visible options

2 Students are encouraged to speak with an academic advisor to ensure that electives best fit the desired career path or interests

Major Code: 515

This outline is generally valid for students pursuing any of the botany options. Certain major requirements can be fulfilled by taking courses from each SELECT menu, such as the Math requirement, Additional Quantitative Skills, WIC, and Non-vascular plants. For clarity, the term-by-term map does not show all of these choices, which are dictated by a student’s math placement, interests, and option. At least one of each type of course requirement is shown in the plan, and the full menus are provided at the end of the term-by-term. Students should be aware that some of these courses are needed to fulfill requirements for specific options. Students should also be aware that the Experiential Learning requirement should be completed before the start of the senior year.

Credits 16
Comprehensive Botany Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 203)

The Comprehensive Botany option is aimed at the student who wants broadly-based and high-level botanical knowledge and skills appropriate for botany careers and graduate education.

Option Code: 932

The Comprehensive Botany option requires 16–17 credits of 400-level BOT courses that provide a broad and sophisticated education in the five learning objectives of the botany core: structure, systematics, ecology, physiology, and genomics (list A). These courses cover aquatic botany, a second course in non-vascular plants, plant population ecology, environmental physiology/photobiology, and genome-enabled plant biology. Students choose an additional 4–5 credits of course work with permission of the advisor. These courses may be BOT advanced courses or courses in other departments (e.g., BI, BB, CROP, CSS, HORT, PBG). Up to 3 credits of approved Experiential Learning can also be applied to the option.

To create a customizable option, the student must do the following:

1. Define career goals and objectives.
2. Articulate a custom option title that briefly encompasses those professional goals (title is not transcripted).
3. Work with the botany advisor to create a program of courses for the option. The course program should meet all of these criteria:
   1. minimum of 21 credits, at least 15 being upper division
   2. all program courses must be taken for a grade (no S/U)
   3. courses may not double count with the BOT degree core requirements except for a WIC course or an “additional quantitative skills” course
   4. a maximum of 3 credits of experiential learning units may be applied
   5. up to 9 transfer credits may be applied with advisor approval
4. Plan how the courses will be scheduled, so that the option can be completed in a timely way. Remember that some courses are offered on an alternate year basis.
5. Write a one-page proposal that describes the career goals and outlines how each course in the program will relate to those goals.
6. Fill out a Customizable option form and submit it to your advisor along with your proposal. The advisor will review the plan and either approve it or make recommendations for revision.
7. When the plan is approved (signed), the course program needs to be submitted to MyDegrees. The Customizable option courses will appear below the Major Block under “student program of study”.
8. The Customizable option plan is locked, but can be modified if necessary, in consultation with your advisor.

Option Code: 932

Customizable Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 203)

Also available via Ecampus.

The Customizable option is for students who have well-defined educational goals and career aspirations that do not fit easily within the existing options. The Customizable option allows students to have a transcript-visible program of upper-division courses that are tailored to their particular interests and professional objectives.

Option Code: 931

To create a customizable option, the student must do the following:

1. Define career goals and objectives.
2. Articulate a custom option title that briefly encompasses those professional goals (title is not transcripted).
3. Work with the botany advisor to create a program of courses for the option. The course program should meet all of these criteria:
   1. minimum of 21 credits, at least 15 being upper division
   2. all program courses must be taken for a grade (no S/U)
   3. courses may not double count with the BOT degree core requirements except for a WIC course or an “additional quantitative skills” course
   4. a maximum of 3 credits of experiential learning units may be applied
   5. up to 9 transfer credits may be applied with advisor approval
4. Plan how the courses will be scheduled, so that the option can be completed in a timely way. Remember that some courses are offered on an alternate year basis.
5. Write a one-page proposal that describes the career goals and outlines how each course in the program will relate to those goals.
6. Fill out a Customizable option form and submit it to your advisor along with your proposal. The advisor will review the plan and either approve it or make recommendations for revision.
7. When the plan is approved (signed), the course program needs to be submitted to MyDegrees. The Customizable option courses will appear below the Major Block under “student program of study”.
8. The Customizable option plan is locked, but can be modified if necessary, in consultation with your advisor.

B. Electives

Select additional 4-5 credits from BOT or other courses with permission of advisor

Total Credits 21-24

1 One elective may double count for another BCC or BOT requirement, such as a Bacc Core synthesis course or an additional quantitative skills class.

Up to 3 credits of approved Experiential Learning can be applied in this category.

Option Code: 932

Customizable Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 203)

Also available via Ecampus.

The Customizable option is for students who have well-defined educational goals and career aspirations that do not fit easily within the existing options. The Customizable option allows students to have a transcript-visible program of upper-division courses that are tailored to their particular interests and professional objectives.

Option Code: 931

To create a customizable option, the student must do the following:

1. Define career goals and objectives.
2. Articulate a custom option title that briefly encompasses those professional goals (title is not transcripted).
3. Work with the botany advisor to create a program of courses for the option. The course program should meet all of these criteria:
   1. minimum of 21 credits, at least 15 being upper division
   2. all program courses must be taken for a grade (no S/U)
   3. courses may not double count with the BOT degree core requirements except for a WIC course or an “additional quantitative skills” course
   4. a maximum of 3 credits of experiential learning units may be applied
   5. up to 9 transfer credits may be applied with advisor approval
4. Plan how the courses will be scheduled, so that the option can be completed in a timely way. Remember that some courses are offered on an alternate year basis.
5. Write a one-page proposal that describes the career goals and outlines how each course in the program will relate to those goals.
6. Fill out a Customizable option form and submit it to your advisor along with your proposal. The advisor will review the plan and either approve it or make recommendations for revision.
7. When the plan is approved (signed), the course program needs to be submitted to MyDegrees. The Customizable option courses will appear below the Major Block under “student program of study”.
8. The Customizable option plan is locked, but can be modified if necessary, in consultation with your advisor.
Option Code: 931

Ecology, Evolution, and Conservation Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 203)

The option in Ecology, Evolution, and Conservation (EEC) combines 4 required advanced BOT undergraduate courses in aspects of ecology, environmental plant physiology, and plant diversity, with at least 3 elective courses drawn from a list of BOT, BI, FES, FW and ST courses covering population dynamics, symbiosis, restoration, and conservation. To encourage students in the option to learn actively and obtain practical skills, up to 3 credits of approved Experiential Learning can be applied to the option. The EEC option courses are all approved electives within the BOT major. The core course requirements of the BOT major are not changed by doing the option, and no additional course credits are required to complete it.

Option Code: 934

The total requirements of the Botany Core are shown in the university catalog. The BOT core includes courses in ecology, physiology, evolution, systematics, statistics, and genetics that form the general background in this area of botany. Outside of the core courses, the option required courses (A list) include advanced physiology and ecology courses, a WIC course (BOT 323 or BI 371) can be used for both WIC and option requirements, and a choice plant diversity courses. The B list electives offer the student a broad range of theoretical, applied, molecular, and quantitative classes.

B. Select at least 9 additional credits of the following:

- BI 301  *HUMAN IMPACTS ON ECOSYSTEMS
- BI 358  SYMBIOSES AND THE ENVIRONMENT
- BI 456  PHYLOGENETICS
- BOT 475  COMPARATIVE GENOMICS
- FES 445/FW 445  ECOLOGICAL RESTORATION
- FES 452/FW 452  BIODIVERSITY CONSERVATION IN MANAGED FORESTS
- FW 320  INTRODUCTORY POPULATION DYNAMICS
- FW 321  APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY
- Up to 3 credits of approved Experiential Learning
- Other courses with advisor approval

Total Credits 21-22

Option Code: 935

Molecular, Cellular, and Genomic Botany Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 203)

The option in Molecular, Cellular, and Genomic Botany (MCG) is designed for Botany undergraduates with career interests in molecular, cellular and genomic biology, by providing a curriculum that provides them with specialized knowledge and skills for work and graduate school.

Option Code: 934

Plant Pathology Option

This option is offered within the following major(s):

- Botany - College of Agricultural Sciences (p. 203)

The Plant Pathology option (PP) combines plant pathology, microbiology, mycology and entomology to provide botany students with necessary additional background to pursue careers in this important field. The courses are drawn from upper-division undergraduate offerings in botany, microbiology, entomology and forestry (FES). To encourage students
in the option to learn actively and obtain practical skills, up to 3 credits of approved experiential learning can be applied to the option. The PP option credits are drawn from approved elective course credits. The core course requirements of the BOT major are not changed by doing the option, and no additional course credits are required to complete it.

Option Code: 933

The total requirements of the Botany Core are shown in the university catalog. The BOT core includes courses in plant structure, ecology, physiology, evolution, systematics, statistics, and genomics that form the botanical background for this field. Outside of the core courses, BOT majors have 44–49 elective credits that can be chosen from a group of approved courses. Up to 16 credits of the PP option can be drawn from the approved electives. The 5 credits of mycology (BOT 461) also fulfill the BOT requirement for a non-vascular plant course.

Up to 3 credits of approved Experiential Learning

Total Credits 21

Option Code: 933

Crop and Soil Science Department

The discipline of crop science provides the knowledge and understanding of technologies that contribute directly to improvements in production and quality of food, feed, fiber, seed, energy, and nutraceutical crops for the world. The art and science of plant improvement are key elements in efforts to feed, clothe and provide energy for the world’s ever-growing population. Conventional and molecular tools assist in the development of new genetic strains of food and energy crops. Crop plants play an important role in the future of sustainable food and energy production.

The discipline of soil science provides the basic understanding of the physical, chemical, and biological properties of this important natural resource. Why is soil important? Soil is the fundamental substrate for life on terrestrial landscapes. Soil plays a vital role in sustaining human welfare and assuring future agricultural productivity and environmental stability. An understanding of global and local ecology depends on an awareness of the soil and its properties. Global information and mapping systems are essential tools for characterizing the landscape and its constituent soils.

Agronomists are crop and soil scientists who work to improve crops and agricultural productivity while effectively managing pests and weeds. Students in crop and soil science explore important contemporary issues faced by our society, including water quality and management, sustainability of different types of crop production, organic crop production, erosion and sedimentation, growing crops for biofuel

production, land use and reclamation, genetic modification of crop plants, and soil quality and sustainability. An array of careers is available.

Career Opportunities

Careers for crop scientists are available in business, industry, farming, research, agricultural chemical industries, seed production, seed technology, communications, conservation, and education. Positions are available in agricultural experiment stations and extension services, state departments of agriculture, food processing companies, insurance agencies, lending institutions, and commercial firms, both domestic and international, dealing in the processing and sale of farm products, chemicals, and seed.

Careers for soil scientists are available in agriculture, forestry, education, state and federal resource agencies, private consulting, and research. Farms, ranches, and agricultural supply companies employ soil scientists as managers or field representatives. Soil scientists may become teachers of vocational agriculture or environmental education, or they may become county extension agents in agriculture or natural resources. The U.S. Department of Agriculture’s Forest Service and Natural Resources Conservation Service often employ soil scientists, as do private consulting firms in environmental engineering and land use planning.

Academic Advising

Undergraduate curricula in crop and soil science are flexible enough to provide for the student’s individual professional needs and interests and for a broad-based general education by allowing electives in other colleges throughout the university. Undergraduate advising is a vital part of the program, and the department is well known for excellence in advising. The department has a head advisor who meets with all students each term. Advisors and faculty provide curricular guidance and aid in professional extracurricular activities, career decisions, and job placement.

Scholarships

The Department of Crop and Soil Science administers a number of scholarships available only to students majoring in the department. Over $40,000 is given to students each year.

Student Clubs

The department supports a Crop Science Club that provides valuable co-curricular professional development, a collegiate Soil Judging Team that participates in both regional and national competitions, the OSU Organic Growers Club that provides hands-on experience in organic production of vegetable crops, and the OSU Bug Club, a student club whose members are actively engaged in insect education outreach to local schools and communities. Graduate students in soil science also have a student club.

Undergraduate Programs

Major

- Crop and Soil Science (p. 222)

Options:

- Agronomy
- Plant Breeding and Genetics
- Soil Science
Minors
• Crop Science (p. 229)
• Soil Science (p. 230)

Graduate Programs

Majors
• Crop Science (p. 228)
Options:
• Entomology
• Plant Breeding and Genetics
• Soil Science (p. 230)

Minors
• Crop Science (p. 229)
• Soil Science (p. 230)

Faculty
Professors Bottomley, Butler (emeritus), Corp, Dragila, Hannaway, Hayes, Karow (emeritus), Kling (sr. research), Lajtha, Machado, Macnab, Mallory-Smith, Myrold, Noller, Rao, Reitz, Ross, Shock, Stephenson, Tuck, Young (emeritus), Zemetra
Associate Professors Angima, Baham (emeritus), Bohle, Chastain, Elias (sr. research), Felix, Flowers, Hulting, Kleber, Lutcher, Nonogaki, Parke (sr. research), Rondon, Roseberg, Schrumpf (seed certification, emeritus), D. Sullivan, Walenta, Wysocki
Assistant Professors N. Anderson, Dreves (sr. research), Leonard (sr. research), Pett-Ridge, C. Sullivan, Townsend (sr. research)
Senior Instructors Cassidy, Charlton, Fery, McMorran (seed certification)
Instructors Buhrig, Burr (seed certification), A. Hunt, Japhet, Maley, Shafa (seed certification), S. Smith (seed certification), Zielinski (seed certification)

Courtesy Faculty
Professors Brillman, Brown, Griffith, Olszyk, Peterson
Associate Professors Henning, Mueller-Warrant, Riera-Lizaraz, Vales
Assistant Professors M. Johnson, M. Rogers, Weisbrod

Professional Faculty
Curry, Garay, Lewis, Lundeen

Crop Science (CROP)

CROP 101, INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE, 1 Credit
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. CROSSLISTED as CROP 101/ENT 101/SOIL 101.
Equivalent to: ENT 101, HORT 101, SOIL 101
Available via Ecampus

CROP 199, SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE, 1-16 Credits
Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: CROP 199H
This course is repeatable for 16 credits.

CROP 200, CROP ECOLOGY AND MORPHOLOGY, 3 Credits
An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science courses. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance.
Equivalent to: CSS 200
Available via Ecampus

CROP 280, INTRODUCTION TO THE COMPLEXITY OF OREGON CROPPING SYSTEMS, 4 Credits
An introduction to field cropping systems of western Oregon. Provides students with a broad overview of the complexity of cropping systems and the knowledge required to grow and produce a crop–plant physiology, seed biology, plant pathology, soil fertility, entomology, and weed science. Students will observe a crop under different management strategies to enhance understanding of management approaches.
Available via Ecampus

CROP 300, CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS, 4 Credits
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as CROP 300/HORT 300.
Equivalent to: CSS 300, HORT 300
Recommended: One year of general biology
Available via Ecampus
CROP 310, FORAGE PRODUCTION, 4 Credits
Importance of, and current production practices for, forage crops. Lec/lab.
Equivalent to: CSS 310
Recommended: (CSS 300 or CROP 300 or HORT 300) and (CSS 305 or CSS 205 or SOIL 205)
Available via Ecampus

CROP 325, AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH, 3 Credits
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. CROSSLISTED as CROP 325/AM 205/AM 325. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: AM 325, ECON 325

CROP 330, WORLD FOOD CROPS, 3 Credits
Origin, production, utilization, and improvement of the world’s major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. 
(Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: CSS 330
Recommended: CSS 200 or CROP 200
Available via Ecampus

CROP 340, PENS AND PLOWS: WRITINGS OF WORKING THE LAND, 3 Credits
A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. 
(Bacc Core Course) Taught via Ecampus only.
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: CSS 340
Available via Ecampus

CROP 355, ORGANIC CERTIFICATION, 3 Credits
Learn about the USDA National Organic Program (NOP) standards relating to certified operations, inspection, certification processes, and labeling. Focus on the crops, processing, and livestock aspects of organic certification for farms and food manufacturing operations.
Available via Ecampus

CROP 401, RESEARCH, 1-16 Credits
Equivalent to: CSS 401
This course is repeatable for 16 credits.

CROP 403, THESIS, 1-16 Credits
Independent, original study and preparation of a senior thesis.
Equivalent to: CSS 403
This course is repeatable for 16 credits.

CROP 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CROP 405H, CSS 405
This course is repeatable for 16 credits.

CROP 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CROP 405, CSS 405H
This course is repeatable for 16 credits.

CROP 407, SEMINAR, 1 Credit
Equivalent to: HORT 407, SOIL 407
Available via Ecampus

CROP 410, INTERNSHIP, 1-6 Credits
Professional work experience previously approved and supervised by the department, written report required.
Equivalent to: CSS 410
This course is repeatable for 12 credits.

CROP 414, PRECISION AGRICULTURE, 4 Credits
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab. CROSSLISTED as CROP 414/HORT 414.
Equivalent to: HORT 414
Available via Ecampus

CROP 418, TOXIC PLANTS IN PNW PASTURES, 1 Credit
Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only.
Equivalent to: CSS 418
Recommended: College-level plant biology and/or taxonomy courses.

CROP 420, SEED SCIENCE AND TECHNOLOGY, 3 Credits
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.
Equivalent to: CSS 420
Recommended: Biology, plant anatomy and/or physiology courses
Available via Ecampus
CROP 433, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSTLISTED as CROP 433/HORT 433 and CROP 533/HORT 533. 
Prerequisite: BI 102 with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 223 with D- or better or BI 223H with D- or better or BI 311 with D- or better or BI 311H with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or PBG 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better 
Equivalent to: HORT 433

CROP 440, WEED MANAGEMENT, 4 Credits
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec. 
Equivalent to: CSS 440 
Recommended: One year biological science and one course in organic chemistry. Available via Ecampus

CROP 448, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSTLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548. 
Equivalent to: ANS 448, RNG 448

CROP 460, SEED PRODUCTION, 3 Credits
Equivalent to: CSS 460 
Recommended: CROP 200 or CSS 200 
Available via Ecampus

CROP 463, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered every years. Lec/lab. CROSSTLISTED as CROP 463/HORT 463 and CROP 563/HORT 563. 
Equivalent to: HORT 463

CROP 470, OILSEEDS AND ESSENTIAL OIL CROPS, 3 Credits
Provides students with an understanding of the principles and the latest research information of field crop production, chemistry, oil extraction and utilization of OEOC. Includes the importance of OEOC, their uses, current trends, production systems for major crops, harvesting, drying, processing, and other post-harvest operations, fixed (fatty acid) and essential oil extraction methods, and oil utilization. Relevant recent research and review papers will be also included and the information discussed and assessed. 
Prerequisite: CROP 200 with D- or better 

CROP 480, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSTLISTED as CROP 480/HORT 480 and CROP 580/HORT 580. 
Equivalent to: HORT 480 
Recommended: CROP 300 or HORT 300 
Available via Ecampus

CROP 499, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 1-16 Credits
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. 
Equivalent to: CROP 499H, CSS 499 
This course is repeatable for 16 credits. Available via Ecampus

CROP 499H, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 1-16 Credits
Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. 
Attributes: HNRS – Honors Course Designator 
Equivalent to: CROP 499, CSS 499H 
This course is repeatable for 16 credits.

CROP 501, RESEARCH, 1-16 Credits
Equivalent to: CSS 501 
This course is repeatable for 16 credits.

CROP 503, THESIS, 1-16 Credits
Equivalent to: CSS 503 
This course is repeatable for 999 credits.

CROP 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CSS 505 
This course is repeatable for 16 credits.

CROP 506, PROJECTS, 1-16 Credits
Equivalent to: CSS 506 
This course is repeatable for 16 credits.
CROP 507, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: CSS 507
This course is repeatable for 99 credits.

CROP 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as CROP 509/ENT 509/PBG 509/SOIL 509.
Equivalent to: CSS 509, ENT 509, PBG 509, SOIL 509
This course is repeatable for 9 credits.

CROP 514, PRECISION AGRICULTURE, 4 Credits
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors. Lec/lab.

CROP 520, SEED SCIENCE AND TECHNOLOGY, 3 Credits
Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only.
Equivalent to: CSS 520
Recommended: Biology, plant anatomy and/or physiology courses
Available via Ecampus

CROP 530, ORGANIC SOIL AND CROP MANAGEMENT, 3 Credits
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies. CROSSLISTED as CROP 530/SOIL 530.
Equivalent to: SOIL 530
Recommended: SOIL 525, CROP 200, SOIL 205 or introductory biology. Completion or concurrent enrollment in AGRI 520
Available via Ecampus

CROP 533, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as CROP 433/HORT 433 and CROP 533/HORT 533.
Equivalent to: CSS 533, HORT 533
Recommended: BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or PBG 430 or HORT 450 or CSS 450 or PBG 450

CROP 540, WEED MANAGEMENT, 4 Credits
Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec.
Equivalent to: CSS 540
Recommended: One year biological science and one course in organic chemistry.
Available via Ecampus

CROP 548, LIVESTOCK PRODUCTION ON PASTURE, 4 Credits
Focuses on grazing management in cultivated pastures in Oregon and other regions with similar agro-ecological conditions. Become familiar with the basic principles of pasture production, grazing management and feed planning and management in large and small ruminant production systems. Provides information on the underlying factors affecting pasture and animal production and product quality in pasture-based production systems. CROSSLISTED as ANS 448/CROP 448/RNG 448 and ANS 548/CROP 548/RNG 548.
Equivalent to: ANS 548, RNG 548

CROP 560, SEED PRODUCTION, 3 Credits
Equivalent to: CSS 560
Recommended: CROP 200 or CSS 200
Available via Ecampus

CROP 563, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROSSLISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: HORT 563
CROP 570, OILSEEDS AND ESSENTIAL OIL CROPS, 3 Credits
Provides students with an understanding of the principles and the latest research information of field crop production, chemistry, oil extraction and utilization of OEOC. Includes the importance of OEOC, their uses, current trends, production systems for major crops, harvesting, drying, processing, and other post-harvest operations, fixed (fatty acid) and essential oil extraction methods, and oil utilization. Relevant recent research and review papers will be also included and the information discussed and assessed.
Prerequisite: CROP 200 with D- or better
Recommended: Horticulture, biology or chemistry course

CROP 580, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: HORT 580
Recommended: CROP 300 or HORT 300
Available via Ecampus

CROP 590, EXPERIMENTAL DESIGN IN AGRICULTURE, 4 Credits
Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. Lec/rec.
Equivalent to: CSS 590
Recommended: ST 351
Available via Ecampus

CROP 599, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 0-16 Credits
Technical knowledge and skills development courses offered in a wide variety of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: CSS 599
This course is repeatable for 16 credits.

CROP 601, RESEARCH, 1-16 Credits
Equivalent to: CSS 601
This course is repeatable for 16 credits.

CROP 603, THESIS, 1-16 Credits
Equivalent to: CSS 603
This course is repeatable for 999 credits.

CROP 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CSS 605
This course is repeatable for 16 credits.

CROP 606, PROJECTS, 1-16 Credits
Equivalent to: CSS 606
This course is repeatable for 16 credits.

CROP 607, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: CSS 607
This course is repeatable for 99 credits.

CROP 608, WORKSHOP, 1-16 Credits
Equivalent to: CSS 608
This course is repeatable for 16 credits.

CROP 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: ENT 609, PBG 609, SOIL 609
This course is repeatable for 9 credits.

CROP 660, HERBICIDE SCIENCE, 4 Credits
Absorption, movement, and mechanism of action in plants; behavior of herbicides in soil. Offered alternate years.
Recommended: BOT 331 and (CSS 440 or CSS 540 or CROP 440 or CROP 540)

CROP 670, PHYSIOLOGY OF CROP YIELD, 3 Credits
Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature.
Equivalent to: CSS 670
Recommended: BOT 331

CROP 699, SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE, 1-16 Credits
Equivalent to: CSS 699
This course is repeatable for 16 credits.

Crop and Soil Science (CSS)
CSS 205, *SOIL SCIENCE, 4 Credits
Introduction to the chemical, physical and biological nature of soils. Examines the functions of soil as a medium for plant growth, a recycling system for nutrients and wastes, a modifier of atmospheric chemistry, a habitat for soil organisms, a system for water purification, and an engineering medium. Field and laboratory projects provide an understanding of fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec/lab. (Bacc Core Course) Taught via Ecampus only.
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Equivalent to: CSS 205, SOIL 205
Available via Ecampus

CSS 305, PRINCIPLES OF SOIL SCIENCE, 4 Credits
Origin, formation, classification, physical, chemical, and biological characteristics; ecosystem functions of soils; effects of soil management on agricultural and forest crop production. Field trips. Taught at EOU LaGrande campus only.
Equivalent to: CSS 205, SOIL 205
Recommended: Two quarters of college chemistry and CSS 306
CSS 306, PROBLEM SOLVING: SOIL SCIENCE APPLICATIONS, 1 Credit
Problem solving for, and in-depth exploration of, Principles of Soil Science (CSS 305). Real-world problems requiring knowledge of soil physical, chemical, and biological properties. Taught at EOU LaGrande campus only.
Corequisites: CSS 305

CSS 315, NUTRIENT MANAGEMENT AND CYCLING, 4 Credits
Nutrient forms, transformations, and plant availability as influenced by chemical and biological reactions in soils; soil pH and management of acid and alkaline soils; characteristics and use of fertilizers, soil amendments and organic wastes. Labs include routine soil testing procedures, computer applications for soil fertility management, and field trips. Lec/lab. (Writing Intensive Course) Taught at EOU LaGrande campus only.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CSS 305 with D- or better
Recommended: CH 122 and courses in computers

CSS 320, PRINCIPLES OF OIL AND FIBER CROP PRODUCTION, 1 Credit
An overview of production practices and characteristics of oil seed, essential oil, and fiber crops. Taught at EOU LaGrande campus only.
Recommended: CSS 300 and CSS 305

CSS 321, PRINCIPLES OF CEREAL CROP PRODUCTION, 1 Credit
An overview of the principles underlying small grain production practices in the Pacific Northwest. Taught at EOU LaGrande campus only.
Recommended: CSS 300 and CSS 305

CSS 322, PRINCIPLES OF POTATO PRODUCTION, 1 Credit
Principles and practices governing all aspects of potato production, storage and use. Taught at EOU LaGrande campus only.
Recommended: CSS 300 and CSS 305

Plant Breeding and Genetics (PBG)
PBG 199H, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PBG 199H
This course is repeatable for 16 credits.
PBG 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 199
This course is repeatable for 16 credits.
PBG 299, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PBG 299H
This course is repeatable for 16 credits.
PBG 299H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 299
This course is repeatable for 16 credits.

PBG 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
PBG 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
PBG 403, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.
PBG 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: PBG 405H
This course is repeatable for 16 credits.
PBG 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 405
This course is repeatable for 16 credits.
PBG 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
PBG 409, TEACHING PRACTICUM, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.
PBG 410, INTERNSHIP, 1-12 Credits
Offered via Ecampus only.
This course is repeatable for 12 credits.
PBG 430, PLANT GENETICS, 3 Credits
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.
Equivalent to: HORT 430
Recommended: One year of biology and chemistry.
Available via Ecampus

PBG 431, PLANT GENETICS RECITATION, 1 Credit

PBG 431, PLANT GENETICS RECITATION, 1 Credit

PBG 441, PLANT TISSUE CULTURE, 4 Credits
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. CROSSLISTED as PBG 441 and MCB 541/PBG 541.
Equivalent to: HORT 441
Recommended: (BI 311 and BOT 331) or PBG 430 or CSS 430
PBG 450, PLANT BREEDING, 4 Credits
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.
Prerequisite: PBG 430 with D- or better
Equivalent to: CSS 450, HORT 450
Recommended: BI 311 or PBG 430

PBG 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PBG 499H
This course is repeatable for 16 credits.

PBG 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PBG 499
This course is repeatable for 16 credits.

PBG 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PBG 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

PBG 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PBG 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PBG 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

PBG 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as CROP 509/ENT 509/ PBG 509/SOIL 509.
Equivalent to: CROP 509, ENT 509, SOIL 509
This course is repeatable for 9 credits.

PBG 510, INTERNSHIP, 4 Credits
Offered via Ecampus only.
This course is repeatable for 12 credits.

PBG 513, PLANT GENETIC ENGINEERING, 3 Credits
Principles, methods, and recent developments in the genetic engineering of higher plants. Offered alternate years.
Equivalent to: HORT 513
Recommended: (BI 311 and BOT 331) or (CSS 430 or CSS 530) or (HORT 430 or HORT 530) or (PBG 430 or PBG 530)

PBG 519, CURRENT TOPICS IN PLANT BREEDING AND GENETICS, 2 Credits
Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as HORT 519/PBG 519.
Equivalent to: HORT 519
This course is repeatable for 12 credits.

PBG 530, PLANT GENETICS, 3 Credits
Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes.
Equivalent to: HORT 530
Recommended: One year of biology and chemistry.

PBG 541, PLANT TISSUE CULTURE, 4 Credits
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. CROSSLISTED as PBG 441 and MCB 541/PBG 541.
Equivalent to: HORT 541, MCB 541
Recommended: (BI 311 and BOT 331) or PBG 430

PBG 550, PLANT BREEDING, 4 Credits
An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Example are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab.
Equivalent to: CSS 550, HORT 550
Recommended: BI 311 or PBG 430 or PBG 530

PBG 551, BREEDING CLONAL CROPS, 1 Credit
The overall goal of the course is to gain fundamental knowledge of breeding methods for clonal crops; these methods are different from those used for seed-propagated crops. Specific examples from a wide array of plant species (tree fruits, berries, tree nuts, potato, sweet potato, cassava, cacao) will be provided to illustrate application of the fundamental knowledge.
Prerequisite: PBG 450 with C or better or PBG 550 with C or better
PBG 552, PLANT BREEDING AND SEED PRODUCTION IN ORGANIC SYSTEMS, 3 Credits
Genetic improvement and seed propagation of self-pollinated and cross-pollinated crops bred for and used in organic production. The philosophical basis for organic agriculture will be reviewed in the context of what breeding technologies are allowed and why. Important traits for adaptation to organic production will be described. Models for organic plant breeding and examples of such programs are provided.
Prerequisite: PBG 530 with D or better
Recommended: BI 311 or PBG 430

PBG 556, CROP PLANT DOMESTICATION, 2 Credits
Learning is based on discussion of the contemporary literature on crop plant origins and domestication. The major agronomic and horticultural crops will be covered. Topics include primary centers of domestication, traits altered by domestication, effect of genetic architecture and local ecology on domestication, and importance of genetic diversity to current plant improvement efforts.

PBG 557, PLANTS AND PATENTS, 2 Credits
Learn about different methods of intellectual property protection in agriculture with a focus on plant patents, plant variety protection and utility patents. The rights, current issues and restrictions that different types of patents allow will be presented through reading the current literature.

PBG 591, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PBG 603, DISSERTATION, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

PBG 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PBG 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

PBG 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, ENT 609, SOIL 609
This course is repeatable for 9 credits.

PBG 620, INTRODUCTION TO MOLECULAR MARKERS, 2 Credits
Principles and methods for molecular marker discovery and analysis. Offered even years. CROSSLISTED as MCB 620/PBG 620.
Equivalent to: MCB 620
Recommended: BI 311 or PBG 430 or PBG 530 or HORT 430 or HORT 530

PBG 621, GENETIC MAPPING AND ASSOCIATION, 2 Credits
Principles and methods for genetic map construction and genome-wide association studies. Offered even years. CROSSLISTED as MCB 621/PBG 621.
Equivalent to: MCB 621
Recommended: BI 311 or PBG 430 or PBG 530 or HORT 430 or HORT 530

PBG 622, MAPPING QUANTITATIVE TRAIT LOCI, 1 Credit
Principles and methods for mapping genes underlying phenotypically complex traits. Offered alternate years. CROSSLISTED as MCB 622/PBG 622.
Equivalent to: CSS 622, MCB 622
Recommended: CROP 590 or CSS 590 or ST 513

PBG 650, ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS, 3 Credits
Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S~1~-, and S~2~- family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and family selection experiments. Offered odd years.
Equivalent to: CSS 650
Recommended: (CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530) and (CSS 450 or CSS 550 or PBG 450 or PBG 550 or HORT 450 or HORT 550) and (ST 411 or ST 511) and (ST 412 or ST 512) and (ST 413 or ST 513)

PBG 691, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PBG 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Soil Science (SOIL)

SOIL 101, INTRODUCTION TO CROP, SOIL, AND INSECT SCIENCE, 1 Credit
Introduces students with interests in crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. CROSSLISTED as CROP 101/ENT 101/ SOIL 101.
Equivalent to: CROP 101, ENT 101, HORT 101
Available via Ecampus
SOIL 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: SOIL 199H
This course is repeatable for 16 credits.

SOIL 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 199
This course is repeatable for 16 credits.

SOIL 205, SOIL SCIENCE, 3 Credits
Introduction to the chemical, physical and biological nature of soils. Examines how soils function in terms of plant growth, nutrient supply, the global carbon cycle, ecological habitat, and water purification. Community-based learning projects provide hands-on experience with fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec. (Bacc Core Course if taken with SOIL 206 or FOR 206)
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Corequisites: SOIL 205

SOIL 206, *SOIL SCIENCE LABORATORY FOR SOIL 205, 1 Credit
Students will gain hands-on experience with soil science concepts and applications. Laboratory exercises and field trips will help students develop proficiency in the methods/tools for analyzing soil chemistry, biology, morphology, physical properties, and soil forming factors. Skills will be taught in the context of soils' social, economic, and environmental importance. (Bacc Core Course if taken with SOIL 205)
Attributes: CPBL – Core, Pers, BioSci Attached Lec; CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: SOIL 206 (may be taken concurrently) with D- or better or FOR 206 (may be taken concurrently) with D- or better
Equivalent to: CSS 205, CSS 305

SOIL 299, SPECIAL TOPICS, 1-16 Credits
Equivalent to: SOIL 299H
This course is repeatable for 16 credits.

SOIL 299H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 299
This course is repeatable for 16 credits.

SOIL 316, NUTRIENT CYCLING IN AGROECOSYSTEMS, 4 Credits
Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Labs include soil sampling and testing procedures, data collection on soil and plants, computer applications for soil fertility management, and field trips. Lec/ lab.
Prerequisite: (CH 121 with D- or better or CH 231 with D- or better) and (SOIL 205 [C] or CSS 205 [C] or CSS 305 [C])

SOIL 325, ^AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH, 3 Credits
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. CROSSTLISTED as CROP 325/SOIL 325/SUS 325. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: CROP 325, SUS 325

SOIL 360, SOIL MANAGEMENT FOR ORGANIC PRODUCTION, 3 Credits
This is a skills-based soil management course that is part lecture and part student-centered learning. Significant class time will be devoted to making field-scale management decisions. The course includes individual and group work, presentation, and discussion. The intent is to prepare students for real-world application of soil management decisions in certified organic systems. Using the National Organic Program as a starting point as well as farm system descriptions with extensive long-term data sets, we will interpret soil nutrient analyses, cover cropping systems, and organic amendments, to design soil management plans for two model cropping systems (annual and perennial).
Prerequisite: (SOIL 205 with C or better and (SOIL 206 [C] or FOR 206 [C])) or CSS 205 [C]
Recommended: Introductory soil science course with lab
Available via Ecampus

SOIL 366, ECOSYSTEMS OF WILDLAND SOILS, 3 Credits
Focuses on soils that occur in relatively undisturbed ecosystems such as forests and rangelands. Topics covered include properties and processes specific to understanding and managing the soil resource in these areas. An overview of US Soil Taxonomy will also be given.
Prerequisite: SOIL 205 with D- or better or CSS 205 with D- or better or CSS 305 with D- or better
Recommended: An understanding and appreciation of environmental chemistry, biology, ecology, and physics
Available via Ecampus

SOIL 388, SOIL SYSTEMS AND PLANT GROWTH, 4 Credits
Introduces soils as providers of critical resources for plant growth. Explains how soils supply water, air, thermal energy and nutrients to plants. Shows that sustainable management of soil resources requires substantial understanding of their role in the functioning of natural, forest, and agricultural systems. Explains controls on stocks and availabilities of individual soil resources and mechanisms making these resources plant-available.
Prerequisite: ((SOIL 205 with D- or better and (SOIL 206 [D-] or FOR 206 [D-])) or CSS 205 [D-]) and (CH 121 [D-] or CH 231 [D-]) and (BOT 220 [D-] or (BI 204 [D-] or BI 205 [D-] or BI 206 [D-]) or (BI 211 [D-] or BI 212 [D-] or BI 213 [D-]) or (BI 211H [D-] or BI 212H [D-] or BI 213H [D-]) or (BI 221 [D-] or BI 222 [D-] or BI 223 [D-]) or (BI 221H [D-] or BI 222H [D-] or BI 223H [D-]))
Available via Ecampus
SOIL 395, **WORLD SOIL RESOURCES, 3 Credits**
The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. Offered via Ecampus only. (Bacc Core Course) (Writing Intensive Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; CWIC – Core, Skills, WIC
Prerequisite: CH 121 with D- or better or CH 122 with D- or better or CH 123 with D- or better or CH 201 with D- or better or CH 202 with D- or better or CH 231 with D- or better or CH 231H with D- or better or CH 232 with D- or better or CH 232H with D- or better or CH 233 with D- or better or CH 233H with D- or better
Equivalent to: CSS 395
Recommended: One term of chemistry
Available via Ecampus

SOIL 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 401, RESEARCH, 1-16 Credits
Equivalent to: CSS 401
This course is repeatable for 16 credits.

SOIL 403, THESIS, 1-16 Credits
Independent, original study and preparation of a senior thesis.
Equivalent to: CSS 403
This course is repeatable for 16 credits.

SOIL 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: SOIL 405H
This course is repeatable for 16 credits.

SOIL 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 405
This course is repeatable for 16 credits.

SOIL 407, SEMINAR, 1 Credit
Equivalent to: CROP 407, HORT 407
Available via Ecampus

SOIL 408, WORKSHOP, 1-16 Credits
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
Equivalent to: CSS 408
This course is repeatable for 16 credits.

SOIL 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 410, INTERNSHIP, 1-6 Credits
Professional work experience previously approved and supervised by the department, written report required.
Equivalent to: CSS 410
This course is repeatable for 12 credits.

SOIL 435, ENVIRONMENTAL SOIL PHYSICS, 3 Credits
Covers principles of soil physical properties and processes as they relate to agricultural, hydrological and environmental problems. Lec/lab. Offered odd years.
Prerequisite: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better
Equivalent to: CSS 435
Recommended: CH 123 and MTH 241 and PH 201
Available via Ecampus

SOIL 445, ENVIRONMENTAL SOIL CHEMISTRY, 3 Credits
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.
Equivalent to: CSS 445

SOIL 455, BIOLOGY OF SOIL ECOSYSTEMS, 4 Credits
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles.
Lec/rec/lab.
Equivalent to: CSS 455
Recommended: (CSS 305 or CSS 205 or SOIL 205). Courses in chemistry, physics, and microbiology

SOIL 466, SOIL MORPHOLOGY AND CLASSIFICATION, 4 Credits
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab.
Prerequisite: SOIL 205 with D- or better or CSS 205 with D- or better or CSS 305 with D- or better
Equivalent to: CSS 466
Available via Ecampus

SOIL 468, SOIL LANDSCAPE ANALYSIS, 4 Credits
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system and landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered even years.
Prerequisite: SOIL 466 (may be taken concurrently) with D- or better or CSS 466 (may be taken concurrently) with D- or better
Equivalent to: CSS 468
Available via Ecampus

SOIL 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
SOIL 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: SOIL 499
This course is repeatable for 16 credits.

SOIL 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 503, THESIS/DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

SOIL 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 508, WORKSHOP, 1-16 Credits
Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems.
Equivalent to: CSS 508
This course is repeatable for 16 credits.

SOIL 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as CROP 509/ENT 509/PBG 509/SOIL 509.
Equivalent to: CROP 509, ENT 509, PBG 509
This course is repeatable for 9 credits.

SOIL 510, INTERNSHIP, 1-6 Credits
Professional work experience previously approved and supervised by the department, written report required.
This course is repeatable for 6 credits.

SOIL 511, SOIL: A NATURAL AND SOCIETAL RESOURCE, 3 Credits
Serves degree- and non-degree-seeking graduate learners wanting soil science knowledge but having minimal science background. Understanding soil physical, chemical, and biological properties promotes informed soil management while supporting individual to global societal values. Established curriculum facilitates graduate degrees or certificates, continuing education, professional certification, and self-improvement goals. A highly interactive social media framework supports weekly student-student and instructor-student learning interactions.
Available via Ecampus

SOIL 512, METHODS OF SOIL ANALYSIS - FIELD, 1 Credit
Recognition and quantitative description of soil properties in agroecosystems. Assessments of soil environments used for crop production in Oregon. Demonstration and practice of volumetric and bulk soil sampling techniques as well as the application of pedotransfer functions. Each participant will be responsible for analyzing at least one soil sample in the chemical level. Five-day duration with four overnight stays at campgrounds. Participants will use their own or borrowed camping equipment.
Recommended: SOIL 205 with a minimum grade of C

SOIL 514, METHODS OF SOIL ANALYSIS - LABORATORY, 2 Credits
Provide the theoretical background, as well as practical experience needed to plan, select, execute, and interpret soil chemical and physical analyses such as those typically used for nutrient management recommendations. Individual and group activities involve classroom presentations, as well as hands-on work in a teaching laboratory. Samples processed are those collected in SOIL 512, Methods of Soil Analysis - Field. Duration is five full work days.
Prerequisite: SOIL 512 (may be taken concurrently) with C or better
Recommended: SOIL 205 and successful completion of EH&S Laboratory

SOIL 515, SOIL FERTILITY MANAGEMENT, 3 Credits
Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils.
Equivalent to: CSS 515
Recommended: CSS 315 and courses in statistics, chemistry and plant physiology.

SOIL 523, PRINCIPLES OF STABLE ISOTOPES, 3 Credits
An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Offered even years.
Equivalent to: CSS 523

SOIL 525, MINERAL-ORGANIC MATTER INTERACTIONS, 3 Credits
Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties.
Equivalent to: CSS 525
Recommended: CSS 305 or CSS 205 or SOIL 205
SOIL 530, ORGANIC SOIL AND CROP MANAGEMENT, 3 Credits
Overview of organic soil and crop management, organic soil system management, soil microbiology under organic systems, cropping systems, organic cereal production systems, organic forage production system, organic horticultural systems management, organic field and horticulture cropping systems; recent research and case studies.
CROSSLISTED as CROP 530/SOIL 530.
Equivalent to: CROP 530
Recommended: (SOIL 525, CROP 200 and SOIL 205 or introductory biology) and completion or concurrent enrollment in AGRI 520
Available via Ecampus

SOIL 535, SOIL PHYSICS, 3 Credits
Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Offered fall term in even years.
Equivalent to: CSS 535
Recommended: CSS 305, CSS 205, SOIL 205, MTH 241, CH 123, PH 201

SOIL 536, VADOSE ZONE HYDROLOGY LABORATORY, 1 Credit
Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Offered even years.
Equivalent to: CSS 536
Recommended: CH 123 and PH 201

SOIL 545, ENVIRONMENTAL SOIL CHEMISTRY, 3 Credits
Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.
Equivalent to: CSS 545

SOIL 547, NUTRIENT CYCLING, 3 Credits
Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. CROSSLISTED as BOT 547/SOIL 547.
Equivalent to: BOT 547, FS 547
Recommended: College-level chemistry and biology and one class in ecology (eg. BI 370) and/or soils (eg. SOIL 205)

SOIL 555, BIOLOGY OF SOIL ECOSYSTEMS, 4 Credits
A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab.
Equivalent to: CSS 555
Recommended: CSS 305 or CSS 205 or SOIL 205. Courses in chemistry, physics, and microbiology

SOIL 566, SOIL MORPHOLOGY AND CLASSIFICATION, 4 Credits
Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. Offered odd years.
Equivalent to: CSS 566
Recommended: CSS 305 or CSS 205 or SOIL 205

SOIL 568, SOIL LANDSCAPE ANALYSIS, 4 Credits
Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered odd years.
Prerequisite: CSS 566 (may be taken concurrently) with C or better or SOIL 566 (may be taken concurrently) with C or better
Equivalent to: CSS 568

SOIL 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 603, THESIS/DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

SOIL 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SOIL 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.
SOIL 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N.
Equivalent to: CROP 609, ENT 609, PBG 609
This course is repeatable for 9 credits.

SOIL 635, ADVANCED SOIL PHYSICS, 3 Credits
Explores theoretical development of a key topic in soil physics. Topics may include evaporation from porous media, multiphase fluid movement, soil deformation, and soil salinization, with respect to either historical development, present day understanding or future needs of the field. Course structure incorporates lectures and discussion requiring intensive student participation. Offered odd years.
Prerequisite: CSS 535 with C or better or SOIL 535 with C or better
Recommended: A working knowledge of soil physics and a passing grade in a graduate-level soil physics course

SOIL 645, SOIL MICROBIAL ECOLOGY, 3 Credits
An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Offered even years.
Equivalent to: CSS 645
Recommended: SOIL 455 or CSS 455 or MB 448

SOIL 684, GLOBAL BIOGEOCHEMICAL CYCLES, 4 Credits
An in-depth treatment of global biogeochemical cycles, focusing on cycles of carbon, oxygen, nitrogen, phosphorus, and sulfur in the atmosphere, hydrosphere, and lithosphere. CROSSLISTED as GEO 684/SOIL 684.
Equivalent to: GEO 684
Recommended: One year of college-level physics and chemistry, including introductory biology. One year of graduate coursework in soil, earth, ocean, atmospheric or forest science

SOIL 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Sustainability (SUS)

SUS 102, *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY, 4 Credits
An introduction to the science behind critical environmental issues and the biological basis of creating and maintaining sustainable ecosystems. Focus on such questions as: how do we decide what to believe about environmental issues? How do we quantify, restore, and value biodiversity? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: SOIL 102
Available via Ecampus

SUS 103, *INTRODUCTION TO CLIMATE CHANGE, 4 Credits
An introduction to the principles of climate change science with an emphasis on the empirical evidence for climate change. Students will learn critical thinking skills to assess such questions as: How do we determine the processes controlling global warming? How do we predict trends in climate change? How do we calculate and understand uncertainty in these predictions? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

SUS 304, *SUSTAINABILITY ASSESSMENT, 4 Credits
Explores theories and application of sustainability assessment techniques and analysis methods. Practical application of globally recognized assessment protocol, including checklists, footprinting, life-cycle analysis and the indicators used to conduct these analyses. Emphasis on ecological and social indicators, although economic indicators are explored. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

SUS 325, ^AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH, 3 Credits
Analyze controversial agricultural and environmental issues, synthesize information from diverse sources, and apply scientific knowledge to recommend specific courses of action to solve real world problems. Develop oral and written communication skills through individual and group work. CROSSLISTED as CROP 325/SOIL 325/SUS 325. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: CROP 325, SOIL 325

SUS 331, *SUSTAINABILITY, JUSTICE, AND ENGAGEMENT, 3 Credits
Many sustainability crises are local, and the people most impacted tend to be groups already experiencing difference, lack of power, and discrimination. Transformational responses led by those most affected will be examined – responses that address the environmental problem while also building social and economic power for those affected. The tools and tactics used to achieve positive changes will be analyzed. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: SUS 331H
Available via Ecampus
SUS 331H, *SUSTAINABILITY, JUSTICE, AND ENGAGEMENT, 3 Credits
Many sustainability crises are local, and the people most impacted tend to be groups already experiencing difference, lack of power, and discrimination. Transformational responses led by those most affected will be examined – responses that address the environmental problem while also building social and economic power for those affected. The tools and tactics used to achieve positive changes will be analyzed.
(Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: SUS 331

SUS 350, *SUSTAINABLE COMMUNITIES, 4 Credits
Introduction to the concept of sustainable communities from a multidisciplinary perspective. Instructors from a broad array of disciplines and professions. Development of holistic thinking skills and innovative solutions to complex problems. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: NR 350
Available via Ecampus

SUS 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

SUS 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

SUS 420, SOCIAL DIMENSIONS OF SUSTAINABILITY, 3 Credits
Focuses on the social aspects of sustainability, including how the environment, the economy, social life interact to create the world we live in. Explores how social institutions (school, government, business, family) contribute to sustainability and promote or discourage social and environmental justice at local and global scales. Also offered at OSU-Cascades and via Ecampus.
Available via Ecampus

SUS 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SUS 514, SUSTAINABILITY PLANNING AND ASSESSMENT, 4 Credits
Sustainability is fundamentally about balancing social, economic and ecological systems. This course examines a range of different methodologies for measuring and evaluating performance towards established sustainability criteria and indicators. Students will critically evaluate tools for making sustainable decisions and understand the limitations of individual assessment approaches in different contexts. Specific assessment techniques to be explored include ecological footprinting, sustainable community indicators, greenhouse gas emissions inventories, sustainability checklists, environmental management systems (ISO standards), life-cycle analysis, and business sustainability reporting. Students will leave the course with the fundamental skills required to complete sustainability assessments via globally relevant approaches.

SUS 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

Crop and Soil Science Undergraduate Major (BS, HBS)
This major offers the following option(s):
• Agronomy (p. 222)
• Plant Breeding and Genetics (p. 224)
• Soil Science (p. 226)
Also available at LaGrande and via Ecampus.
Major Code: 120

Agronomy Option
This option is offered within the following major(s):
• Crop and Soil Science - College of Agricultural Sciences (p. 222)
Also available at LaGrande and via Ecampus.

Students in the Agronomy option will gain the knowledge and skills necessary to be active participants in producing food, feed, fiber, and energy crops for our world. Increased production of field crops—wheat, corn, rice, sorghum, soybeans, forages, cotton, etc.—will be essential to meet the basic needs of the world’s ever-growing population and
such production will need to be accomplished in a world of diminishing soil, water, mineral, and petrochemical resources. As an agronomic professional, you will have the knowledge and skill to access the potentials of a given production system and to choose plant materials and plant production practices that will optimize production while minimizing environmental impact. Maximum sustainable production will be your goal and you will need in-depth knowledge of plants, plant genetics, plant pests, soils, soil fertility, production equipment, economics, and politics to achieve this goal. Agronomists work for field crop production companies, as managers of small to large farms and ranches, and as managers of their own farming operations. Agronomists also work for federal, state, or local government agencies as educators, researchers, or field technicians. Others hold teaching, research, or extension positions in universities. Some work for private research laboratories, environmental service companies, insurance companies, or land appraisal firms.

Option Code: 784

Plant Breeding and Genetics Option

This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 222)
- Horticulture - College of Agricultural Sciences (p. 284)

An interdisciplinary approach to applied plant breeding is the cornerstone of the Plant Breeding and Genetics option. After completing this degree, you will have gained fundamental knowledge in plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.
Graduates of the Plant Breeding and Genetics option often enter public or private sector breeding programs, or go on to attend graduate school.

**Active Learning**

As a student studying Plant Breeding and Genetics, you'll gain practical experience in breeding and genetic analysis working in the greenhouse, field, and lab. You’ll also be able to take advantage of OSU’s extensive, cross-campus interdisciplinary plant science network and the Pacific Northwest’s largest plant breeding program to explore your research interests.

You can get either a B.S. in Horticulture or a B.S in Crop and Soil Science with an option in Plant Breeding and Genetics.

**Option Code: 785**

Soil Science Option

This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 222)

Also available at LaGrande and via Ecampus.

The study of soil as a science provides students with a basic understanding of the physical, chemical, and biological properties of this essential natural resource. Soil is the fundamental substrate for life in terrestrial systems. Our food, fiber, and renewable energy are dependent on soils. Our understanding of soils is critical in the successful siting of buildings and construction of roadways and other transportation infrastructure. Our understanding of global and local ecology depends on an awareness of soil and its properties. Soils are the filters of our water and play active roles in storing carbon and other materials that are essential in human existence. As a soil science student, you will explore issues including water quality and management, organic crop production,
erosion and sedimentation, land use and reclamation, and soil quality and sustainability. As a soil science professional you will be able to use your knowledge and skills to solve real-world, sustainable living problems in urban, agricultural, forest, rangeland, and other natural systems. Many soil scientists work for the Natural Resource Conservation Service. Some work for other federal, state, or local government agencies as extension educators, researchers, or surveyors. Others hold teaching or research positions in colleges and universities. Soil scientists also work for fertilizer companies, private research laboratories, environmental service companies, insurance companies, and land appraisal firms.

Crop Science Graduate Major (MS, PhD)

This major offers the following option(s):

- Entomology (p. 228)
- Plant Breeding and Genetics (p. 229)

Graduate Areas of Concentration

Crop breeding, genetics and cytogenetics (cereals, oilseeds, potatoes); forage and pasture management; grain crop production; post-harvest seed technology; seed biology; seed crop physiology; seed production; weed biology; weed management

Specific areas of crop science in which a student can prepare for their thesis include cereal breeding and genetics, grass breeding and genetics, forage and pasture management, seed production and technology, seed crop physiology, seed biology, post-harvest seed technology, and weed science.

Major Code: 1200

### Entomology Graduate Option

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 228)
- Horticulture - College of Agricultural Sciences (p. 283)

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching, and extension in the context of understanding the basic biology of insects and, with
this knowledge, then working with insects in natural and/or managed environments. The discipline of entomology at Oregon State University covers behavior, ecology, evolution, physiology, systematics, molecular biology, chemical ecology, plant-insect interactions, pollination by honey bees and native bees, biological control, integrated pest management, and insecticide toxicology. Oregon State Entomology addresses insect-related issues in aquatic and terrestrial systems in natural, agricultural, forested, and urban environments. Entomologists collaborate with plant scientists, physiologists, pathologists, soil scientists, geneticists, molecular biologists, and experts in other fields.

Students in the Entomology option will conduct thesis research related to insects under the supervision of an entomologist associated with the graduate faculty in Crops or Horticulture, and take courses that provide knowledge and understanding about insects. After completing their degree, students will have gained fundamental knowledge in entomology that may be applied in agricultural, aquatic, forested, natural, and urban environments.

Option Code: 5333

### Plant Breeding and Genetics Graduate Option

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 228)
- Horticulture - College of Agricultural Sciences (p. 283)

The Plant Breeding and Genetics (PBG) graduate option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomics, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics graduate option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students’ career goals including further graduate study, as well as direct entry into public or private sector breeding programs. After completing the degree, students will have the fundamental knowledge of plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

### Crop Science Graduate Minor

Minor Code: 1200

Approximately two-thirds (30 graduate credits) of the 45-credit total required for a graduate degree should be listed in the major field and one-third (15 graduate credits) in the minor field. The student's advisory committee must include a member from the minor department.

Minor Code: 1200

### Crop Science Minor

Also available at LaGrande.

Minor Code: 119

Students pursuing a minor in Crop Science are required to receive a grade of C or better in all CROP, CSS, ENT, HORT, PBG, and SOIL courses taken to complete the minor.

To earn the Crop Science minor, students must complete the courses listed below to total 27 credits.

Soil Science Graduate Major (MS, PhD)

Graduate Areas of Concentration

**Environmental soil science, forest soils, nutrient cycling, soil geochemistry, soil conservation and land use, soil fertility and plant nutrition, soil genesis and classification, soil microbiology, soil physics**

Faculty research specializations in soil science include ecosystem services, forest soils, management of soil nutrients, mineral-organic matter interactions, soil archeology, soil biogeochemistry, soil microbial ecology, sustainable cropping systems, soil geomorphology, soil genesis, and soil hydrology. Amongst research institutions worldwide, Oregon State campus lands present the most soil diversity for the study of associated problems.

**Minor Code: 160**

**Entomology**

Graduate students have the option of obtaining their degree in the specific academic department of their major professor.

**Graduate Area of Concentration**

Graduate students pursuing an entomology area of concentration have the opportunity to study and conduct research within a number of graduate programs across the university in the Departments of Horticulture, Crop and Soil Science, Fisheries and Wildlife, and Forest Ecosystems and Society. Graduate students obtain their degree within the academic department of their major professor.

Entomologists continue to be at the forefront of basic and applied research in molecular biology, ecology, evolutionary biology, biodiversity, and pest management. The modern fields of physiology, ecology and systematics have their origins in research originally undertaken with insects, and entomologists help lead these disciplines today. Given the unique importance of insects in biodiversity and ecosystem processes, their roles in crop production and public health, and their value as model
organisms for the exploration of basic scientific questions, there is
demand for graduates who have acquired entomological expertise.

The Entomology Program is a component of the Agricultural Experiment
Station, which has many research facilities for students and staff,
including farms, greenhouses, an aquatic insect laboratory, and a forest
insect research laboratory. In addition to OSU faculty, state and federal
entomologists stationed across the state are available for consultation
in their fields of specialization. The Oregon State Arthropod Collection
has nearly 3,000,000 specimens of insects and mites and is a recognized
center for research in insect systematics and biodiversity.

ENT 101, INTRODUCTION TO CROP, SOIL,
AND INSECT SCIENCE, 1 Credit
Introduces students with interests in crop, soil, and insect sciences to
educational and professional opportunities in these disciplines. Speakers
will discuss opportunities in research and academia as well as in the
applied professional job market. CROSSTLISTED as CROP 101/ENT 101/
SOIL 101.
Equivalent to: CROP 101, HORT 101, SOIL 101
Available via Ecampus

ENT 300, *PLAGUES, PESTS, AND
POLITICS, 3 Credits
Integration and interaction of agricultural and public health aspects of
entomology in society and history. CROSSTLISTED as ENT 300/HORT 330.
(Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: BI 300, HORT 330
Available via Ecampus

ENT 311, INTRODUCTION TO INSECT PEST
MANAGEMENT, 4 Credits
Identification, biology and management of injurious and beneficial
insects. Concurrent laboratory is designed to provide hands-on
experience with identification of insect groups of relevance to agricultural
cropping systems. Lec/lab.
Equivalent to: CSS 311
Recommended: Entomology course work or one year college biology.
Available via Ecampus

ENT 322, HONEY BEE BIOLOGY AND
BEEKEEPING, 3 Credits
In this introduction to the fascinating honey bee and its biology, honey
bees are used as model organisms to illustrate general principles of
biology, entomology, and sociobiology. Students will learn the basics of
beekeeping, have an opportunity to manipulate honey bee colonies, and
gain hands-on experience, prevailing winter weather permitting.
Available via Ecampus

ENT 331, POLLINATORS IN PERIL, 3
Credits
Pollinators, human influences on pollination systems, and the potential
consequences of pollinator decline. An introduction to the skills needed
to investigate media reports and multidisciplinary scientific research.
Effects of pesticides, habitat fragmentation, climate change, invasive
species, pests, pathogens, and other threats to pollinators in critical
natural and agricultural systems around the world.
Equivalent to: HORT 331
Recommended: Completion of a Baccalaureate Core biological science
course.
Available via Ecampus

ENT 401, RESEARCH, 1-16 Credits
Work on approved problems carried on in the library, laboratory or field.
This course is repeatable for 16 credits.

ENT 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ENT 405, READING AND CONFERENCE,
1-16 Credits
Reading and discussions on special topics.
This course is repeatable for 16 credits.

ENT 407, SEMINAR, 1-2 Credits
Graded P/N.
This course is repeatable for 16 credits.

ENT 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.
ENT 420, INSECT ECOLOGY, 3 Credits
Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered on even years.
Recommended: BI 370

ENT 440, ISSUES IN INSECT TOXICOLOGY, 3 Credits
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.
Recommended: Background in basic chemistry and biology
Available via Ecampus

ENT 444, INSECT AGROECOLOGY, 3 Credits
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 444/HORT 444 and ENT 544/HORT 544.
Equivalent to: HORT 444
Recommended: General background or previous course work in entomology.

ENT 499, SPECIAL TOPICS, 1-6 Credits
Equivalent to: FW 499
This course is repeatable for 6 credits.

ENT 501, RESEARCH, 1-16 Credits
Work on approved problems carried on in the library, laboratory or field. This course is repeatable for 16 credits.

ENT 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENT 505, READING AND CONFERENCE, 1-16 Credits
Reading and discussions on special topics. This course is repeatable for 16 credits.

ENT 507, SEMINAR, 1-2 Credits
Graded P/N. This course is repeatable for 16 credits.

ENT 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ENT 509, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. CROSSLISTED as CROP 509/ENT 509/ PBG 509/SOIL 509.
Equivalent to: CROP 509, PBG 509, SOIL 509
This course is repeatable for 9 credits.

ENT 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENT 518, CURRENT TOPICS IN ENTOMOLOGY, 2 Credits
A core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as ENT 518/HORT 518.
Equivalent to: HORT 518
This course is repeatable for 12 credits.

ENT 520, INSECT ECOLOGY, 3 Credits
Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered even years.
Recommended: BI 370 and Z 365

ENT 523, ORGANIC BEEKEEPING AND HONEY PRODUCTION, 3 Credits
In this introduction to the fascinating honey bee and its biology, honey bees are used as model organisms to illustrate general principles of biology, entomology, and sociobiology. Learn the basics of beekeeping, organic beekeeping and honey production. Examine the culture and certification of organic and conventional systems of honey production. Available via Ecampus

ENT 540, ISSUES IN INSECT TOXICOLOGY, 3 Credits
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.
Recommended: Background in basic chemistry and biology
Available via Ecampus

ENT 550, ISSUES IN INSECT TOXICOLOGY, 3 Credits
Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology.
Recommended: Background in basic chemistry and biology
Available via Ecampus
ENT 542, PRINCIPLES OF INTEGRATED PEST MANAGEMENT: SYSTEMS DESIGN, 4 Credits
Principles of integrated pest management design focusing on the use of systems analysis as a means to integrate management tactics, environmental and biological monitoring, pest control models, and implementation elements into a cohesive whole. Introduction to integrated pest management on websites. Students will design a hypothetical crop-pest management system. Lec/lab. Equivalent to: HORT 542 Recommended: ENT 311

ENT 544, INSECT AGROECOLOGY, 3 Credits
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 444/HORT 444 and ENT 544/HORT 544. Equivalent to: HORT 544 Recommended: General background or previous course work in entomology.

ENT 548, INTEGRATED PEST MANAGEMENT IN ORGANIC SYSTEMS, 3 Credits
Prevention, detection, and management of pests and diseases in organic plant production systems. Content includes activities that require students to expand their experience of pest management in their locality by incorporating new and emergent technology for monitoring, diagnosing and managing insects, pathogen, and weed pests and their impacts on crops. Discussions will be centered on the logistics and potential of new technologies in pest management, incorporating biological, ecological and sustainable agriculture concepts. Recommended: ENT 311 with minimum grade of D-Available via Ecampus

ENT 599, SPECIAL TOPICS, 1-16 Credits
Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering. This course is repeatable for 16 credits.

ENT 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ENT 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENT 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENT 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ENT 609, PRACTICUM IN TEACHING, 1-3 Credits
Developing skills and competence in teaching under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Graded P/N. Equivalent to: CROP 609, PBG 609, SOIL 609 This course is repeatable for 9 credits.

ENT 699, SPECIAL TOPICS, 1-16 Credits
Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering. This course is repeatable for 16 credits.

Entomology Graduate Major (MA, MS, PhD)
Graduate Areas of Concentration
Entomology
The Entomology Graduate Program offers qualified candidates opportunities for graduate study and research leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. In keeping with traditional areas of strength at the university, a number of major research programs in entomology deal with problems in agriculture, forestry, and environmental quality. Integrated pest management techniques are emphasized in the solution of many of these problems.

For additional information on the Entomology Graduate Program, see the program website (http://entomology.oregonstate.edu/).

Major Code: 5350
There are no specific course requirements for entomology graduate degrees. Each student will work with their major professor and/or graduate committee to establish a program of study.

Major Code: 5350

Entomology Graduate Minor
Minor Code: 5350

Entomology Minor
The Entomology minor is available to all OSU students.

Minor Code: 472
A minimum of 27 credits is required, at least 12 of which must be upper-division credits.

</table>
our very first faculty member was hired into the original Dept. Of Agricultural Chemistry here at OSU. Over the past 125 years, our department changed and adapted to the ever-evolving fields of agricultural sciences and toxicology, and in 1998 was reorganized and renamed Environmental and Molecular Toxicology to more clearly communicate the breadth, depth and research and training emphases of our current programs.

Our Mission
The integrated mission of the Department of Environmental & Molecular Toxicology (EMT) is to educate students in the toxicological sciences, to conduct research on the effects of chemicals and other agents on humans and the environment and to engage the public through extension and outreach. The EMT Department focuses on creating, disseminating, and applying new knowledge to enhance the treatment and prevention of human disease and to ensure the protection of the environment and public health.

Programs We Offer
We offer PhD & Master Degree Programs in Toxicology (https://emt.oregonstate.edu/emt/prospectivegrads/), Undergraduate Minor (https://emt.oregonstate.edu/emt/undergraduate-students/), and an Accelerated Masters Platform Degree (https://emt.oregonstate.edu/emt/graduate-programs/accelerated-masters/) in Toxicology and Risk Analysis.

Research Expertise
Our nineteen faculty direct state-of-the-art and internationally competitive research programs collectively aimed at understanding environmental hazards and their impacts on biological systems in order to protect human health and the environment. EMT research expertise is in 4 areas: Experimental Toxicology, Environmental Chemistry, Extensions Service Pesticide Information and Data Science.

Career Paths
Training in toxicology prepares students for careers in industry, government, and academic institutions. Biochemical, chemical, and molecular research approaches are emphasized, focusing on the following areas: analytical and exposure assessment, aquatic, biochemical, comparative, environmental, food, immuno- and neurotoxicology.

Financial Support
Financial support is available to doctoral students in the program through graduate research assistantships or from an NIEHS environmental health predoctoral training program. Typically Masters students are not eligible for graduate research assistantships.

Application Deadline
Completing the application by the end of December for full consideration for the fall of that year.

Prerequisite/Curriculum
Students who wish to enter the program should have a BS degree (or equivalent) in a science-related field and are expected to select an MS or PhD curriculum related to their own area of specialization. Students will take a core set of courses typically completed within the first 1.5 years (27 credits) and will attend and participate in the toxicology seminar class. Upon entry into the EMT graduate program, students experience a one-week rotation in each faculty member’s research environment during the Fall quarter. After this, Masters students will have an opportunity to identify a thesis mentor (if a thesis option is desired) and PhD students will identify faculty to conduct their Winter and Spring quarter rotation. Courses in toxicology also may be taken by students in engineering or the basic sciences.

Program Requirements for Applicants
PREREQUISITES
Applicants to the Dept. of EMT must have:

- Bachelor’s Degree in chemistry, biochemistry, biology, pharmacy, or other closely related fields
- One year of biology
- One year of organic chemistry
- One year of physics
- Mathematics through integral calculus
- GPA of 3.25 or higher on a 4.0 scale
• GRE aptitude score - GRE test scores must be supplied to the Graduate School, but there is no minimum required score.
• Foreign applicants must score 550 or higher on the Test of English as a Foreign Language (TOEFL)

*Students who do not meet all of these requirements may be admitted if their academic record is otherwise outstanding.

Applications are also invited from students with the M.S. degree in chemistry, pharmacology, toxicology, and related fields, or the D.V.M. or M.D. degree. Advanced placement can be accomplished by transfer of relevant course work to Oregon State University provided these courses meet the basic objectives of the EMT Graduate Program and are approved for transfer by the research (thesis) advisor, Dept. Head, and the Graduate School.

Reference Letters
Three letters of professional reference are required of all students. Please use the on-line program from the Graduate School to submit letters.

GRE Scores
GRE scores should be sent to: Institution Code: 4586 | Department Code: 0219 | Major Code: 9930. Applicants that have or will have a Master’s Degree by the term they enter the TOX program does not require a GRE score.

TOEFL Score
All applicants whose native language is not English, or did not receive a bachelor or higher degree in an English speaking country, must meet the minimum English language proficiency requirements (https://gradschool.oregonstate.edu/admissions/international/#english-language) for admission. The ETS institution code for OSU is 004586.

Current PhD Student Preliminary Exam Guidelines

Objective
The overall objective of the preliminary examination for advancement to PhD candidacy should assess whether a graduate student has the capacity and promise to:
1. understand the basic science of environmental and molecular toxicology;
2. be a creative and critical thinker;
3. understand the scientific literature;
4. conduct original and independent research; and
5. communicate the ideas and results of experiments.

Thus, the ideal examination format would select from these characteristics and prepare the student for the selective pressures that will be encountered upon completing the Environmental and Molecular Toxicology PhD degree program. In order to maintain high standards and produce quality graduate students, the examination must be rigorous and challenging. In addition, the exam format should set specific limits on the amount of time that the student dedicates to this process.

Exam Format

The preliminary examination format outlined below consists of both oral and written elements. This examination must be completed no later than the end of the eighth academic term (not including summer terms) after entering the program. In most cases, the student would schedule the exam in the fall term of the third year of residence although students may take the exam earlier, after completing at least one year in the program. The examination consists of a written and oral presentation of a research proposal that cannot be closely related to the student’s thesis project. As outlined, the student’s ability to develop, research, and defend original scientific ideas would be evaluated. The student is expected to demonstrate a capacity for critical thinking and a command of the specific field of focus. In addition, the student’s general knowledge of environmental and molecular toxicology would be evaluated.

Procedural Outline

Research Proposal (written/oral)

1. Student submits outline descriptions (required elements listed below) of two potential research projects. The subject of each project must be chosen by the student based on their knowledge and review of the literature, and must describe original, hypothesis-driven research. The proposed projects cannot have been defined previously in published or unpublished form (i.e., manuscript, abstract, database of funded projects, submitted grant application, etc.), or cannot be known to be in progress. Proposed research also must not be closely related to the thesis research of the student. ‘Closely related’ is defined as any research that conceivably could be part of the student’s thesis or that conceivably might be initiated by the student’s major professor.

Project outlines (limited to one page each) must include:
a. Description of an unresolved question relevant to the field of environmental and molecular toxicology. (1–3 sentences)
b. Statement of specific hypothesis to be tested. (1–2 sentences)
c. Description of an experimental approach designed to test the hypothesis, including a minimum of two specific aims, and a statement of the rationale (justification) for the proposed approach. (2–6 sentences)
d. Statement of the significance of the proposed research. (1–2 sentences)

2. The student’s graduate committee reviews both outlines and approves one topic to be developed into a written proposal. The research topic is chosen based on originality, quality, potential significance, and the likelihood of expanding the student’s education and training. Approval of the topic would occur within one week after the outlines are submitted. During this period, the outlines would be returned to the student, and the student would receive feedback from the committee concerning the quality and design of the outlined projects. Major strengths and weaknesses in the experimental design or rationale would be identified.

3. The student develops a written research proposal using the format and topic guidelines of application for the EPA, NIH, NSF, or other appropriate granting agency. The written proposal must be completed and returned to the committee within four weeks after the topic was approved. The scope of the project will be equivalent to that of a ‘pilot project’ proposal and if conducted would be expected to take approximately one year of research time. The proposal is limited in length to 10 pages of double-spaced text (12 point font with 0.5-inch margins), and must include the following elements:
a. Specific Aims. State concisely and realistically what the research described in this application is intended to accomplish and what hypothesis is to be tested. Do not exceed one page.
b. Background and Significance. Briefly describe the background to the present proposal, critically evaluating the existing literature and specifically identifying gaps, which the project is intended to fill. State concisely the importance of the research described...
in this application, and relate the specific aims to the long-term objectives. Limited to two pages.

c. Research Design and Methods. Discuss in detail the experimental design and procedures to be used to accomplish the specific aims of the project. Describe the protocols to be used and the tentative sequence of investigation. Include the means by which the data will be analyzed and interpreted. Discuss the potential difficulties and limitations of the proposed research and alternative approaches to achieve the aims. Point out any procedures, situations, or materials that may be hazardous to personnel and the precautions to be exercised. Limited to seven pages.

d. Literature Cited. Do not scatter literature citations throughout the text. List them at the end of the proposal. All papers cited in the text must be listed in the reference list and vice versa. The list of literature citations at the end of the proposal does not count toward the 10-page limit.

e. Appendix. Students may include additional figures in an appendix, limited to five pages. The appendix may not be used to circumvent the page limits of the proposal.

4. The oral exam should be scheduled within two weeks of completion of the written proposal. This deadline can be extended with the approval of the student’s graduate committee.

5. During the exam, the student would present the research plan and defend the experimental approach. The presentation would involve a seminar format with slides/overheads and would be expected to last no longer than 30 minutes. Following the presentation, the student would be judged on the soundness of the hypothesis, their understanding of the subject matter, their ability to defend the proposed experimental design, and their general knowledge of the field of environmental and molecular toxicology. The exam is expected to last approximately two hours and is limited in length to three hours.

Examination Committee

The examination committee is the graduate student’s doctoral committee. The doctoral committee consists of a minimum of five members of the graduate faculty, including at least two members of the major department and a representative of the Graduate Council. If a minor is declared, the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student’s committee. The major professor would serve as the chairperson of the committee to oversee the exam. The decision concerning whether the student merits advancement to PhD candidacy would be the responsibility of the examination committee.

Evaluation

The basic question for the committee is whether or not they believe the student is adequately prepared to conduct doctoral level research and has a good chance of successfully completing such research. Following a discussion of the student’s performance on the examination, each committee member is then asked to vote on the basic question. It is appropriate for secret ballots to be used, and secret ballots must be used if requested by any committee member.

If there is one negative vote on this question, the student will pass. If there are two or more negative votes on this question, the student will not pass.
TOX 360, *THE WORLD OF POISONS, 3 Credits
Provides a basic understanding of how we are exposed and respond to chemicals, examples of human diseases associated with toxic insult, the role of technology and the interface of society and toxicology in risk perception and legislation. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: One 3-credit course in chemistry or one 3-credit course in biology.

TOX 401, RESEARCH, 1-16 Credits
Equivalent to: AC 401
This course is repeatable for 16 credits.

TOX 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: AC 405
This course is repeatable for 16 credits.

TOX 411, FUNDAMENTALS OF TOXICOLOGY, 3 Credits
Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/ response relations.
Prerequisite: BB 350 (may be taken concurrently) with D- or better or BB 450 (may be taken concurrently) with D- or better or BB 490 (may be taken concurrently) with D- or better

TOX 413, ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits
Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed.
Prerequisite: TOX 411 with D- or better

TOX 429, TOXIC SUBSTANCES IN FOOD, 3 Credits
Toxicology and epidemiology of human exposures to pesticides and food toxicants.
Prerequisite: BB 350 (may be taken concurrently) with D- or better or BB 450 (may be taken concurrently) with D- or better or BB 490 (may be taken concurrently) with D- or better
Equivalent to: TOX 429H

TOX 430, CHEMICAL BEHAVIOR IN THE ENVIRONMENT, 3 Credits
Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment.
Prerequisite: CH 123 with D- or better or CH 331 with D- or better

TOX 435, *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MBB 535/TOX 535. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: One quarter each of biology and chemistry
Available via Ecampus

TOX 435H, *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MBB 535/TOX 535. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: BI 435, BI 435H, FES 435, FS 435, FS 435H, TOX 435
Recommended: One quarter each of biology and chemistry

TOX 455, ECOTOXICOLOGY: AQUATIC ECOSYSTEMS, 3 Credits
Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish.
Prerequisite: CH 331 with D- or better

TOX 480, COMPUTATIONAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits
Provides an in-depth understanding of the current systems biology paradigm for chemical risk and drug safety assessment. Learn about novel technologies in computational chemistry, molecular biology and systems biology used to develop methods for risk assessment, including approaches for chemical prioritization for screening and testing, predictive models for high-throughput hazard identification and utilization of “big data” to determine chemical mechanisms of action and toxicity pathways. Apply these approaches to specific case studies in risk analysis, environmental health and toxicology.
Recommended: One year college chemistry and biology plus introductory toxicology or biochemistry

TOX 490, ENVIRONMENTAL FORENSIC CHEMISTRY, 3 Credits
Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations.
Recommended: One year of college chemistry and one term of organic chemistry.

TOX 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

TOX 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
TOX 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

TOX 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

TOX 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

TOX 511, FUNDAMENTALS OF TOXICOLOGY, 3 Credits
Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations.
Prerequisite: BB 550 (may be taken concurrently) with C or better or BB 590 (may be taken concurrently) with C or better

TOX 512, TARGET ORGAN TOXICOLOGY, 3 Credits
Examination of toxicological effects of chemicals at organ level. Normal physiology of the organ system is received.
Prerequisite: TOX 511 with C or better

TOX 513, ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits
Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed.
Prerequisite: TOX 511 with C or better

TOX 529, TOXIC SUBSTANCES IN FOOD, 3 Credits
Toxicology and epidemiology of human exposures to pesticides and food toxicants.
Recommended: Completion or concurrent enrollment in BB 350, BB 450 or BB 490

TOX 530, CHEMICAL BEHAVIOR IN THE ENVIRONMENT, 3 Credits
Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment.
Recommended: CH 106 and CH 331 and graduate standing.

TOX 535, GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535.
Equivalent to: BI 535, FES 535, FS 535, MCB 535
Recommended: One quarter each of biology and chemistry
Available via Ecampus

TOX 555, ECOTOXICOLOGY: AQUATIC ECOSYSTEMS, 3 Credits
Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish.
Recommended: CH 331

TOX 557, SCIENTIFIC SKILLS AND ETHICS, 3 Credits
Acquire a multitude of skills to launch and maintain productive extramurally funded careers as research scientists. Explore the ethical practices, data sharing approaches, and compliance requirements needed to conduct research. Examine the ethical use of human subjects and animals in research. Explore the changing landscape of intellectual property and commercialization policies for scientists. Introduces communication strategies for effective interactions with scientific peers, the general public and research sponsors.
Equivalent to: MCB 557

TOX 575, ADVANCED XENOBIOTIC METABOLISM AND DISPOSITION, 2 Credits
Course will focus on structure, function and regulation of specific proteins that function in uptake, distribution, metabolism, and excretion of drugs and other chemicals that are foreign to the body (xenobiotics). The course will focus on proteins which are termed Phase I and Phase II xenobiotic metabolizing enzymes and xenobiotic transporters. There will be an emphasis on Cytochrome P450 enzymes and hepatic and renal xenobiotic transporter proteins and their key roles in xenobiotic metabolism and excretion.
Recommended: TOX 512

TOX 580, COMPUTATIONAL TOXICOLOGY AND RISK ASSESSMENT, 3 Credits
Provides an in-depth understanding of the current systems biology paradigm for chemical risk and drug safety assessment. Learn about novel technologies in computational chemistry, molecular biology and systems biology used to develop methods for risk assessment, including approaches for chemical prioritization for screening and testing, predictive models for high-throughput hazard identification and utilization of “big data” to determine chemical mechanisms of action and toxicity pathways. Apply these approaches to specific case studies in risk analysis, environmental health and toxicology.
Recommended: One year college chemistry and biology plus introductory toxicology or biochemistry

TOX 590, ENVIRONMENTAL FORENSIC CHEMISTRY, 3 Credits
Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations.
Recommended: One year of college chemistry and one term of organic chemistry.

TOX 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

TOX 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
TOX 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

TOX 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

TOX 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

TOX 611, TESTING FOR GENOTOXICITY, 4 Credits
A lab-based course geared toward toxicology, biochemistry, biology, food science, nutrition, pharmacy and MCB students. Introduces principles and methods of several key assays used to screen for DNA damage and mutation. These tests will include the following: (i) Salmonella mutagenicity assay ('Ames test'), (ii) single cell gel electrophoresis ('comet') assay, (iii) micronucleus assay, and (iv) PCR-based single strand conformation polymorphism (SSCP) screening for oncogene/tumor suppressor gene mutation in cancers. This 2-week, intensive lab/lecture class runs Mon-Fri in the LPSC during the first session of summer term. Each day includes laboratory work and a 2-hour lecture covering basic principles of the assays, as well as technical details of the experiment for the day.

Prerequisite: TOX 514 with C or better
Recommended: BB 400 series, prior course work on DNA repair and mutagenesis

TOX 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

TOX 808, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

Toxicology Graduate Major (MS, PhD)

Graduate Areas of Concentration

Environmental chemistry and ecotoxicology, mechanistic toxicology, molecular and cellular toxicology, neurotoxicology

The Department of Environmental and Molecular Toxicology provides students with a fundamental knowledge of toxicology that prepares them for responsible positions in research and development, academia, government, professional services, or research foundations.

The graduate faculty includes scientists with a special interest in the application of chemistry, biochemistry, molecular biology, pharmacology, pathology, neuroscience, immunology and ecology to problems in toxicology. The concentration in neurotoxicology is an interinstitutional alliance with Oregon Health and Science University (OHSU). Students will be affiliated with and advised by associated faculty.

Minimal prerequisites for admission include one year each of biology, organic chemistry, physics, and statistics. Students who do not meet all of these requirements may be admitted if their academic record is otherwise outstanding.

Major Code: 9930

Toxicology Graduate Minor

Minor Code: 9930

Toxicology Minor

The Toxicology minor provides basic and applied science majors sufficient background for technical work in toxicology.

Minor Code: 618

Fisheries and Wildlife

Fisheries and wildlife prepares students for professional careers in fisheries and wildlife as research scientists, biologists, managers, educators, and administrators. Oregon State University is strategically located for the study of fisheries and wildlife, surrounded by diverse ecosystems including the Pacific Ocean and coastal estuaries, many small and large rivers, lowland valleys, mountains and the high desert. Courses include traditional classroom experiences and laboratories, often enriched by field trips to nearby state fish hatcheries, national forests and wildlife refuges. We also offer experiential learning opportunities at the Hatfield Marine Science Center on the coast in Newport. In addition to our full-time faculty, FW students benefit from courses and mentoring provided by scientists with the Oregon Cooperative Fish and Wildlife Research Unit, Oregon Department of Fish and Wildlife, and several federal research centers.

The undergraduate curriculum is designed to develop a solid background in biology and ecology for our students as the basis for careers in resource science, conservation and management. However, FW is not simply a biological discipline. Professionals must weigh social considerations when formulating conservation and management
strategies and policies. Consequently, biological, social, economic, and political science courses are integrated into the curriculum. The undergraduate curriculum is composed of core courses and a specialization. The core represents the educational foundation for fish and wildlife conservation while the specialization provides each student with an opportunity to build a curriculum to meet specific goals. Our capstone courses emphasize critical thinking in natural resource science and management, as well as science communication and outreach. Students planning to transfer to FW should focus on courses in general biology, general chemistry, physical science, and mathematics during their freshman and sophomore years.

**Transfer Students**

Because of the technical and professional nature of the college’s curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college's curricular requirements. In general, equivalent college-level courses successfully completed at an accredited college or university are accepted. OSU students requesting a transfer to the College of Agricultural Sciences’ Department of Fisheries and Wildlife must be a student in good academic standing at the university. Please contact the departmental head advisor at 541-737-1941 for additional information.

**Graduate Program**

Graduate programs leading to the PSM, MS, or PhD (and participation in the MAIS degree program) permit intensive study in special areas of interest under the guidance of nationally known scientists. Advanced study in fisheries science may be pursued in stream ecology, aquaculture, population dynamics in response to exploitation, ecology of marine and freshwater fishes, taxonomy and systematics, genetics, toxicology, and parasites and diseases of fish. Advanced study in wildlife science can involve almost any invertebrate or vertebrate species, biotic community or habitat. Research emphasis may be placed on population dynamics and utilization, life history and ecology, conservation biology, habitats, nutrition, physiology, behavior, and organization of animal communities. Opportunities exist for work in terrestrial, marine and aquatic systems.

**Undergraduate Programs**

**Major**

- Fisheries and Wildlife Sciences (p. 254)

**Minors**

- Fisheries and Wildlife Sciences (p. 253)
- Marine Conservation and Management (p. 259)

**Graduate Programs**

**Majors**

- Fisheries and Wildlife Administration (p. 252)
- Fisheries Science (p. 259)
- Wildlife Science (p. 260)

**Minors**

- Fisheries Science (p. 259)
- Wildlife Science (p. 261)

**Certificates**

- Fisheries Management (p. 258)
- Wildlife Management (p. 260)

**Faculty**

**Emeritus** Coblenz, Gregory, Hall, Horton, Kennedy, Markle, Mate

**Professors** Baker, Banks, Bartholomew, Brandt, B. Dugger, Edge, Se. Heppell, Langdon, Miller, Noakes, Robinson, Sampson

**Professors, Senior Research** Egna, Kauffman

**Associate Professors, Senior Research** Hagen, Palacios

**Assistant Professors** Armstrong, Arismendi, Biedenweg, Hutchinson, Torres, White

**Assistant Professors, Senior Research** Ellsworth, Janousek, Orben

**Assistant Professor or Practice** Gladics

**Senior Instructors** Duplaix, Hanschumaker, Moore, Painter, Paoletti, Reese, Shinderman

**Instructors** Albertson, Allen, Arbuckle, Campbell, Cheung, Diebel, Donaghy-Cannon, S. Dunham, Finley, Jarkowsky, Kelly, Konstantinidis
FW 107, ORIENTATION TO FISHERIES AND WILDLIFE, 1 Credit
Information relevant to academic pathways and career planning in the fields of fisheries and wildlife. Graded P/N.

Available via Ecampus

FW 113, INTRODUCTION TO MARINE LIFE IN THE SEA-MARINE BIRDS AND MAMMALS, 1 Credit
Introduces first- and second-year undergraduates, teachers and non-degree students to the breadth of marine science course offerings and research at Oregon State University’s Hatfield Marine Science Center located in Newport, Oregon. Using an experiential based format, students collect field data to better understand marine mammals (whales, dolphins and porpoises), seabirds, and their interactions with their environment. Lec/lab. Graded P/N.

Available via Ecampus

FW 199, SPECIAL STUDIES, 1-16 Credits
Graded P/N.
Equivalent to: FW 199H
This course is repeatable for 16 credits.

FW 199H, SPECIAL STUDIES, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 199
This course is repeatable for 16 credits.

FW 209, CAREER SKILLS IN FISHERIES AND WILDLIFE SCIENCES, 1 Credit
A foundation for life-long career development in fisheries and wildlife sciences. Practice the skills needed to search, apply, and attain internships and jobs.

Prerequisite: FW 107 with P or better
Available via Ecampus

FW 251, PRINCIPLES OF FISH AND WILDLIFE CONSERVATION, 3 Credits
History of conservation and natural resource use; ecological principles, and social and economic limitations of conservation; principles and practices of wildlife and fisheries management; role of research in management.

Recommended: One course in introductory biology
Available via Ecampus

FW 255, FIELD SAMPLING OF FISH AND WILDLIFE, 3 Credits
Introduction to sampling populations and communities of vertebrate animals emphasizing sampling design, collection and management of data, and communication of results.

Recommended: WR 121 and familiarity with personal computers.
Available via Ecampus

FW 289, COMMUNICATION SKILLS FOR FISHERIES AND WILDLIFE PROFESSIONALS, 4 Credits
Introduces students to the theoretical and practical dimensions of interpersonal and public communication in a natural resource management field. Lec/rec.

Recommended: FW 251
Available via Ecampus

FW 301, FIELD TECHNIQUES FOR MARINE MAMMAL CONSERVATION, 1 Credit
A laboratory and hands-on experience covering field techniques, computer software for data organization and analyses, and understanding the practical management conservation application for students who are taking or have taken FW/BI 302, Biology and Conservation of Marine Mammals. Taught summer term at HMSC, Newport, OR.

Prerequisite: BI 302 (may be taken concurrently) with D- or better or FW 302 (may be taken concurrently) with D- or better

FW 302, BIOLOGY AND CONSERVATION OF MARINE MAMMALS, 4 Credits
An examination of the biology of whales, pinnipeds, and other marine mammals, including general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions; including conservation issues. Taught at Hatfield Marine Science Center OR online through Ecampus.
Equivalent to: BI 302
Recommended: One year of introductory biology
Available via Ecampus

FW 303, SURVEY OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCE, 3 Credits
Concepts underlying geographic information systems, global positioning system, and remote sensing; application to management and research, data quality issues, and case studies. Not a lab/skills class.
Available via Ecampus

FW 307, SPECIALIZATION DEVELOPMENT, 1 Credit
Students will examine career alternatives, develop career goals, learn what knowledge, skills, and abilities are important for diverse careers in fisheries and wildlife conservation, and develop an academic and lifelong plan for achieving their career goals. This course is intended to assist students in developing a specialization in fisheries and wildlife sciences.
Graded P/N.
Equivalent to: FW 207
Recommended: FW 209
Available via Ecampus
FW 311, ORNITHOLOGY, 3 Credits
Survey of the adaptations of birds to a diverse array of habitats. Topics include origins, anatomy, reproductive strategies, migration, flight, behavior, physiology, nutrition, and conservation. Recommended: One year introductory biology. Available via Ecampus

FW 312, SYSTEMATICS OF BIRDS, 2 Credits
External anatomy, classification of birds of the world, and field identification of birds by sight and song. Field trips required. Recommended: One year introductory biology. Available via Ecampus

FW 315, ICHTHYOLOGY, 3 Credits
A survey of the diversity of biological adaptations of fishes. Topics include physiological and zoogeographical adaptations, reproduction, evolution, cladogenesis, morphology, behavior, and genetics. Equivalent to: FW 313 Recommended: One year introductory biology. Available via Ecampus

FW 316, SYSTEMATICS OF FISHES, 3 Credits
Phylogenetic diversity, evolution, relationships and identification of the world's fishes, with particular focus on Oregon fishes. Includes identification, anatomy, use of keys, introduction to the comparative method, systematic theory, taxonomy, field collection and specimen curation. Lec/lab. Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 212H [D-] or BI 222 [D-] or BI 222H [D-] or BI 205 [D-]) and (BI 213 [D-] or BI 213H [D-] or BI 223 [D-] or BI 223H [D-] or BI 206 [D-]) Recommended: FW 315 Available via Ecampus

FW 317, MAMMALOLOGY, 3 Credits
A survey of the origins, evolution, diversity, and adaptations of mammals to diverse environments. Topics include taxonomy, reproduction, sensory perception, herbivory, population cycles and behavior. Recommended: One year introductory biology. Available via Ecampus

FW 318, SYSTEMATICS OF MAMMALS, 2 Credits
A survey of the phylogenetic diversity of the mammals in Oregon from a habitat/community perspective. Identifying, using keys, and measuring specimens will be stressed. Recommended: One year introductory biology. Available via Ecampus

FW 320, INTRODUCTORY POPULATION DYNAMICS, 4 Credits
Principles and concepts of population dynamics related to fish and wildlife populations; methods of estimating abundance, mortality, sustainable harvest levels and extinction risk; hands-on introduction to models for population analysis. Lec/lab. Prerequisite: BI 370 (may be taken concurrently) with D- or better or BI 370H (may be taken concurrently) with D- or better or BI 371 (may be taken concurrently) with D- or better Recommended: Introductory statistics and mathematics equivalent to MTH 245 or higher Available via Ecampus

FW 321, APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY, 3 Credits
Perspectives in community and ecosystem ecology, and their use in management of fisheries and wildlife resource systems. Prerequisite: FW 320 (may be taken concurrently) with D- or better Available via Ecampus

FW 323, MANAGEMENT PRINCIPLES OF PACIFIC SALMON IN THE NORTHWEST, 3 Credits
Explores the nature of the salmon problem in the Northwest. Experts from diverse disciplines describe principles of salmon biology, habitat ecology and management, socioeconomics of direct and indirect users, and government policies. Available via Ecampus

FW 324, *FOOD FROM THE SEA, 3 Credits
Where does seafood come from, and how does seafood arrive on a plate? How productive are the world's oceans, and can the oceans continue to produce enough to feed (and employ) the masses? How do different cultures, ethnicities, and regions of the world rely upon food from the sea for daily meals? Food from the Sea is an exploration of the cultural, societal, economic, practical, and environmental features of the protein that feeds billions. (Bacc Core Course) Attributes: CSGI – Core, Synth, Global Issues Available via Ecampus

FW 325, *GLOBAL CRISIS IN RESOURCE ECOLOGY, 3 Credits
Historical and contemporary implications of the impacts of burgeoning human populations on rates and patterns of global ecological change. Changes in ecosystem processes and crises of species extinction in the context of cultural and political institutions. (Bacc Core Course). Attributes: CSGI – Core, Synth, Global Issues Available via Ecampus

FW 326, INTEGRATED WATERSHED MANAGEMENT, 3 Credits
A comprehensive approach to watershed management, one that includes biophysical, socioeconomic, planning and education related topics. Intended for students interested in the sustainable management of natural resources. Recommended: FW 251 Available via Ecampus
**FW 328, WILDLIFE CAPTURE AND IMMOBILIZATION, 2 Credits**

Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations. 

*This course is repeatable for 4 credits.*

Available via Ecampus

**FW 331, ECOLOGY OF MARINE AND ESTUARINE BIRDS, 4 Credits**

Focusing on how marine and estuarine birds are adapted for life at sea. Topics include morphology, physiology, foraging ecology, and biogeography as well as introductory oceanography. Field trips.

*Recommended: One year introductory biology.*

**FW 340, *MULTICULTURAL PERSPECTIVES IN NATURAL RESOURCES, 3 Credits**

Explores multicultural influences on development of natural resources in the American West. Effects of diverse social values on changes in the physical landscape and biodiversity. (Bacc Core Course)

*Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination* 

*Equivalent to: FW 340H* 

Available via Ecampus

**FW 341, FISH AND WILDLIFE LAW ENFORCEMENT, 2 Credits**

Introduction to the philosophy, purposes, and methods of enforcing natural resource laws, emphasizing fish and wildlife laws.

**FW 345, *GLOBAL CHANGE BIOLOGY, 3 Credits**

Global Change Biology is the study of the impact of climate change on natural systems and actions to mitigate (slow) or adapt to climate change. Global climate change is having dramatic effects on natural resources including fish and wildlife populations and their habitats. Students will gain an understanding of the role that natural ecosystems (oceans, forests, wetlands, grasslands etc.) play in regulating the climate; how land use affects the earth's climate; how climate change will affect fish, wildlife and their habitats; and the role that managers and researchers can play in mitigating and adapting to climate change. (Bacc Core Course)

*Attributes: CSGI – Core, Synth, Global Issues* 

*Recommended: Introductory biology and ecology courses such as BI 370* 

**FW 350, *ENDANGERED SPECIES, SOCIETY AND SUSTAINABILITY, 3 Credits**

Provides a general background to endangered species biology, and the social and economic implications of the legislation enacted to conserve endangered species (Endangered Species Act, CITES Treaty). (Bacc Core Course)

*Attributes: CSST – Core, Synthesis, Science/Technology/Society* 

*Recommended: FW 251* 

Available via Ecampus

**FW 356, *CITIZEN SCIENCE, 3 Credits**

Citizen science involves non-specialists in scientific studies addressing large challenges best solved through collaboration. Citizens contribute data scientists may not otherwise be able to obtain, while improving their understanding of the scientific process, integrating technology into the learning process, and generating new knowledge for society. (Bacc Core Course)

*Attributes: CSST – Core, Synthesis, Science/Technology/Society* 

Available via Ecampus

**FW 360, *ORIGINS OF F&W MANAGEMENT-EVOLUTION, GENETICS, AND ECOLOGY, 3 Credits**

Examines genetics and human interactions with fisheries and wildlife from an ecological and evolutionary perspective. Basic principles of environmental interactions, and how humans interact with other species and their environments in the disciplines commonly recognized as fisheries, wildlife and conservation sciences. (Baccalaureate Core Course)

*Attributes: CSST – Core, Synthesis, Science/Technology/Society* 

*Recommended: Two terms of coursework at OSU* 

Available via Ecampus

**FW 366, ENVIRONMENTAL CONTAMINANTS IN FISH AND WILDLIFE, 3 Credits**

Environmental contamination is an important threat to many fish and wildlife populations and the habitats and prey upon which they rely. The field of ecotoxicology links the ecology of fish and wildlife with toxicology of environmental contaminants, and so spans political, scientific, and public relations realms. Through the pairing of introductory concepts with key case studies, this course provides students with a preparatory framework for understanding toxicological issues of importance for those focused on studying, managing or conserving fish and wildlife populations.

*Prerequisite: (BI 204 with D- or better or BI 211 with D- or better or BI 211H with D- or better) and (BI 205 [D-] or BI 212 [D-] or BI 212H [D-]) * Available via Ecampus

**FW 370, CONSERVATION GENETICS, 4 Credits**

A foundational course in preparation for a degree in Fisheries and Wildlife or other degrees focused on conservation of natural resources. Covers a broad range of topics associated with issues surrounding genetics that working professionals in the biological sciences should be conversant about. One of the most important aspects of the course is the development of problem-solving and critical-thinking skills.

*Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 212H [D-] or BI 222 [D-] or BI 222H [D-] or BI 205 [D-] and (BI 213 [D-] or BI 213H [D-] or BI 223 [D-] or BI 223H [D-] or BI 206 [D-]) * 

Available via Ecampus

**FW 370, CONSERVATION GENETICS, 4 Credits**

A foundational course in preparation for a degree in Fisheries and Wildlife or other degrees focused on conservation of natural resources. Covers a broad range of topics associated with issues surrounding genetics that working professionals in the biological sciences should be conversant about. One of the most important aspects of the course is the development of problem-solving and critical-thinking skills.

*Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 204 with D- or better) and (BI 212 [D-] or BI 212H [D-] or BI 222 [D-] or BI 222H [D-] or BI 205 [D-] and (BI 213 [D-] or BI 213H [D-] or BI 223 [D-] or BI 223H [D-] or BI 206 [D-]) * 

Available via Ecampus
FW 391, *RIDGE TO REEF: SUSTAINABLE RESOURCE MANAGEMENT IN PALAU, 4 Credits
How do small islands address issues of natural resource management, food security, and sustainability? What role do communities, governments, and non-profits play in addressing these issues? Can traditional ecological knowledge help solve these challenges? What about climate change on small Islands? The Republic of Palau will be our classroom. Students will work with and learn from fishers, farmers, community leaders, traditional chiefs, terrestrial and marine biologists, and policy makers. Key topics include food security/production, climate change adaptation, protected area management, biocultural conservation, sustainable forest management, watershed management, sustainable development, coral reef and fisheries management, biodiversity measurement methods and ecosystem restoration.

Attributes: CSGI – Core, Synth, Global Issues

FW 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 403, THESIS, 1-16 Credits
This course is repeatable for 32 credits.

FW 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 407, SEMINAR, 1-16 Credits
Graded P/N. Taught at Hatfield Marine Science Center.
Equivalent to: FW 407H
This course is repeatable for 16 credits.
Available via Ecampus

FW 407H, SEMINAR, 1-16 Credits
Graded P/N. Taught at Hatfield Marine Science Center.
Attributes: HNRS – Honors Course Designator
Equivalent to: FW 407
This course is repeatable for 16 credits.

FW 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

FW 410, INTERNSHIP, 1-6 Credits
This course is repeatable for 99 credits.
Available via Ecampus

FW 415, FISHERIES AND WILDLIFE LAW AND POLICY, 3 Credits
Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources.
Recommended: PS 201 or other introductory political science course.
Available via Ecampus

FW 418, URBAN ECOLOGY, 3 Credits
Understand how an increasing human population increases pressure on fish and wildlife communities and resources within ecosystems. Examines the interactions between humans and animal species within urban areas and the effects of urbanization on species, communities, and ecosystems. Topics include conserving biodiversity, invasive species, human health and well-being, and urban planning.
Recommended: FW 255, BI 370
Available via Ecampus

FW 419, THE NATURAL HISTORY OF WHALES AND WHALING, 3 Credits
Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management.
Recommended: Some background in vertebrate ecology and evolution or genetics
Available via Ecampus

FW 421, AQUATIC BIOLOGICAL INVASIONS, 4 Credits
An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center OR online through Ecampus.
Equivalent to: BI 421
Recommended: One year of university-level biology.
Available via Ecampus

FW 422, INTRODUCTION TO OCEAN LAW, 3 Credits
Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.
Available via Ecampus

FW 426, COASTAL ECOLOGY AND RESOURCE MANAGEMENT, 5 Credits
Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab.

FW 427, PRINCIPLES OF WILDLIFE DISEASES, 4 Credits
Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations.
Available via Ecampus
FW 433, POPULATION DYNAMICS FOR CONSERVATION, 4 Credits
A synthesis of the principles of population dynamics from the viewpoint of a resource manager. Particular attention is paid to populations structured by age, size, or over space, and considering both fisheries and wildlife management. Laboratory work uses computer programming in the R language to implement examples from lecture.
Prerequisite: (FW 320 with C or better or BI 483 with C or better) and ((MTH 227 with C or better or MTH 228 with C or better) or (MTH 251 with C or better or MTH 252 with C or better))

FW 434, ESTUARINE ECOLOGY, 4 Credits
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as FW 434/OC 434 and FW 534/OC 534.
Equivalent to: OC 434
Available via Ecampus

FW 435, ^WILDLIFE IN AGRICULTURAL ECOSYSTEMS, 3 Credits
Examines the relationships between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required; transportation fee charged. OSU Ecampus students are not required to attend field trips. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: BI 370 and FW 251
Available via Ecampus

FW 439, ^HUMAN DIMENSIONS OF FISHERIES AND WILDLIFE MANAGEMENT, 3 Credits
Examines the human dimensions of fisheries and wildlife including economics, policy, communications, and management. Focuses on the application of social scientific theories and approaches to fisheries and wildlife issues. Independent and group work with a substantial writing component. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: FW 255, FW 289 and completion of human dimensions coursework
Available via Ecampus

FW 445, ECOLOGICAL RESTORATION, 4 Credits
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FES 445/FW 445 and FES 545/FW 545.
Equivalent to: FES 445, FOR 445
Recommended: BI 370 or BI 370H

FW 451, AVIAN CONSERVATION AND MANAGEMENT, 3 Credits
Identification, classification, life history strategies, ecology and management of upland and migratory birds.
Recommended: FW 311
Available via Ecampus

FW 452, BIODIVERSITY CONSERVATION IN MANAGED FORESTS, 3 Credits
Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSLISTED as FES 452/FW 452.
Equivalent to: FES 452
Recommended: FES 240 or FES 341 or BI 370
Available via Ecampus

FW 454, ^FISHERY BIOLOGY, 4 Credits
Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: FW 315 with D- or better and FW 320 [D-]
Available via Ecampus

FW 456, FRESHWATER ECOLOGY AND CONSERVATION, 5 Credits
Physical, chemical, biological, and environmental concepts in continental aquatic systems. Includes techniques related to assessing aquatic resources their management and conservation. Lec/lab.
Prerequisite: BI 370 with D- or better or BI 371 with D-
Recommended: 9 credits of upper-division biological sciences
Available via Ecampus

FW 458, MAMMAL CONSERVATION AND MANAGEMENT, 4 Credits
A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs.
Recommended: 9 credits of upper-division biological sciences.
Available via Ecampus

FW 462, ECOSYSTEM SERVICES, 3 Credits
Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts.
Recommended: BI 370
Available via Ecampus
FW 464, MARINE CONSERVATION BIOLOGY, 3 Credits
Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats.
Prerequisite: BI 370 with D- or better or BI 370H with D- or better
Equivalent to: BI 464

FW 465, MARINE FISHERIES, 4 Credits
A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered fall term in odd years.
Recommended: FW 315

FW 467, ANTARCTIC SCIENCE AND CONSERVATION, 4 Credits
Explores the history, geology, climate, and ecosystems of Antarctica, with an emphasis on current research and conservation issues. Focuses on critical thinking skills developed through independent research on a topic of interest, an internal peer review project, and discussions of relevant case studies in Antarctic research.
Available via Ecampus

FW 469, METHODS IN PHYSIOLOGY AND BEHAVIOR OF MARINE MEGAFAUNA, 4 Credits
An in-depth study of marine megafauna (mammals, birds, turtles) with an emphasis on methods and analyses of behavior and physiology for conservation. Lab and field exercises include investigations into the behavior–physiology nexus of diving, migration, thermoregulation, energy expenditure, and mating systems. Research techniques to be explored will include, for example, tracking and remote biotelemetry monitoring technologies, respirometry, genetics, and direct field study observation. Theoretical approaches, field techniques and statistical analyses will help prepare students for a career in fisheries or wildlife science. Lec/lab. Taught at HMSC.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Recommended: FW 302, FW 320, FW 331 and FW 475

FW 471, ENVIRONMENTAL PHYSIOLOGY OF FISHES, 4 Credits
Principles of the functional biology of fishes with emphasis on environmental interactions and management implications.
Recommended: FW 315 and (BI 370 or BI 371)

FW 473, FISH ECOLOGY, 4 Credits
Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems. Lec/lab/rec.
Prerequisite: (BI 370 with D- or better or BI 370H with D- or better) and FW 315 [D-]
Available via Ecampus

FW 474, EARLY LIFE HISTORY OF FISHES, 4 Credits
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years.
Recommended: FW 315

FW 475, WILDLIFE BEHAVIOR, 4 Credits
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 476, FISH PHYSIOLOGY, 4 Credits
Physiological specializations and adaptations of major groups of fishes.
Prerequisite: FW 315 with D- or better
Available via Ecampus

FW 477, WILDLIFE ECOLOGY, 3 Credits
Interrelationships of wildlife, environmental change. Predicting and measuring responses of wildlife to altered habitat conditions.
Prerequisite: BI 370 with D- or better or BI 370H with D- or better or BI 371 with D- or better
Available via Ecampus

FW 481, WILDLIFE ECOLOGY, 3 Credits
Interrelationships of wildlife, environmental change. Predicting and measuring responses of wildlife to altered habitat conditions.
Prerequisite: BI 370 with D- or better or BI 370H with D- or better or BI 371 with D- or better
Available via Ecampus
FW 488, PROBLEM SOLVING IN FISHERIES AND WILDLIFE SCIENCE, 3 Credits
A capstone course designed to introduce students to the synthesis of scientific information on species, habitats and ecosystems and the use of such data in shaping fisheries and wildlife conservation, management and policy. Includes a group problem-solving project and case studies. For FW majors in their senior year.
Prerequisite: FW 320 with D- or better and FW 321 (may be taken concurrently) [D-]
Recommended: 400-level FW course work (e.g., FW 426 or FW 454 or FW 481)
Available via Ecampus

FW 489, EFFECTIVE COMMUNICATIONS IN FISHERIES AND WILDLIFE SCIENCE, 3 Credits
Centers on the synthesis and interpretation of data and effective communication of that information in written and oral communication to diverse audiences including scientists, managers, administrators and the general public.
Available via Ecampus

FW 491, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: MB 491
Recommended: 9 credits of upper-division fisheries biology.

FW 493, FIELD METHODS FOR MARINE RESEARCH, 3 Credits
The primary focus is providing hands-on experience in a small class exploring various field sampling methodologies, research planning logistics, and field operations in estuary and nearshore environments. Topics covered include measurement and collection methods, animal handling techniques, equipment care and handling, sampling strategy, experimental design, data management planning and, if possible, small boat work.
Recommended: One year of biology

FW 496, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596.
Equivalent to: MB 496
Recommended: MB 303 or other upper-division laboratory course.

FW 497, AQUACULTURE, 3 Credits
Principles and practices for the aquaculture of fish, shellfish, and algae. (Writing Intensive Course.)
Attributes: CWIC – Core, Skills, WIC
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 498, AQUACULTURE LABORATORY, 3 Credits
Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center.
Recommended: 9 credits of upper-division biology.

FW 499, SPECIAL TOPICS IN FISHERIES AND WILDLIFE, 0-16 Credits
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: ENT 499
This course is repeatable for 16 credits.
Available via Ecampus

FW 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 502, TEACHING METHODS IN FISHERIES AND WILDLIFE, 1 Credit
This is a discussion course designed to help new GTAs and instructors who are learning the trials and tribulations of university-level teaching in our department. This is a great course for students who are interested in hearing more about teaching approaches, grading and assessment, student communication, problem students, and development of teaching skills.
Graded P/N.

FW 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
Available via Ecampus

FW 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

FW 506, PROJECTS, 1-6 Credits
Projects are synthesis papers or outreach products that are developed with a mentor from campus, a natural resource agency, or the student’s place of employment. The purpose of your project is to contribute to the field of study with a product that reflects the principles and applications learned in your classes.
This course is repeatable for 12 credits.
Available via Ecampus

FW 507, SEMINAR, 1-16 Credits
Selected Topics. Taught at Hatfield Marine Science Center and Corvallis campus.
This course is repeatable for 16 credits.
Available via Ecampus
FW 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

FW 510, PROFESSIONAL INTERNSHIP, 1-16 Credits
This course is repeatable for 10 credits.
Available via Ecampus

FW 514, PROFESSIONAL DEVELOPMENT: MEETING COMMUNICATIONS, 1-3 Credits
Fisheries and wildlife professionals use meetings of scientists, managers and stakeholders to communicate key findings and develop consensus recommendations for policy. This experiential learning course exposes students to a scientific or management meeting in their chosen field (fisheries, wildlife, ecology, or conservation biology) and gets them to think about how meetings function as well as their content.
This course is repeatable for 3 credits.
Available via Ecampus

FW 515, FISHERIES AND WILDLIFE LAW AND POLICY, 3 Credits
Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources.
Recommended: PS 201 or other introductory political science course.
Available via Ecampus

FW 518, URBAN ECOLOGY, 3 Credits
Understand how an increasing human population increases pressure on fish and wildlife communities and resources within ecosystems. Examines the interactions between humans and animal species within urban areas and the effects of urbanization on species, communities, and ecosystems. Topics include conserving biodiversity, invasive species, human health and well-being, and urban planning.
Available via Ecampus

FW 519, THE NATURAL HISTORY OF WHALES AND WHALING, 3 Credits
Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management.
Recommended: Some background in vertebrate ecology and evolution or genetics
Available via Ecampus

FW 521, AQUATIC BIOLOGICAL INVASIONS, 4 Credits
An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center OR online through Ecampus.
Recommended: One year of university-level biology.
Available via Ecampus

FW 522, INTRODUCTION TO OCEAN LAW, 3 Credits
Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.
Available via Ecampus

FW 523, MONITORING WILDLIFE POPULATIONS AND THEIR HABITATS, 3 Credits
An overview of monitoring plan design and the conceptual background needed to understand and critique monitoring plans, and have the basic skills to develop and implement a monitoring program as part of an interdisciplinary team.
Recommended: Introductory course in statistics and introductory course in ecology.
Available via Ecampus

FW 524, INTRODUCTION TO FISHERIES ASSESSMENT, 3 Credits
Fisheries management strategies rely on models that predict a population’s responses to exploitation. This course introduces approaches commonly used to assess and evaluate the dynamics and status of a population. Provides an overview of the terminology, data requirements, underlying rationale, assumptions, limitations and uncertainty associated with stock assessments.
Recommended: College algebra, introductory statistics and, if unfamiliar with data collection and analysis methods in fisheries, FW 454/554
Available via Ecampus

FW 526, COASTAL ECOLOGY AND RESOURCE MANAGEMENT, 5 Credits
Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab.

FW 527, PRINCIPLES OF WILDLIFE DISEASES, 4 Credits
Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations.
Available via Ecampus
FW 528, DIVERSITY AND IDENTIFICATION OF LARVAL FISHES, 3 Credits
Research on early life history stages of fishes has increased considerably in recent years, due to its importance in many research fields, such as fisheries science and oceangraphy, species conservation, systematics and morphology. Simultaneously, the ability to identify ichthyo plankton has decreased. This course is intended to provide students with an understanding of the evolutionary diversity of ichthyo plankton of the world.
Recommended: A completed 300-level systematics of fishes, ichthyology or comparative anatomy course.
Available via Ecampus

FW 529, Ichthyo plankton Identification Laboratory, 2 Credits
Larval fishes are important in many research fields, and are part of many natural history collections. However, often museums are unable to provide the curatorial needs due to the lack of trained personnel. The lab will provide students with the necessary practical skills to identify larval fishes. Distinctive from the course 528, where students learn about the diversity and evolution of larval fish characters, the laboratory is designed to the identification of larvae from a real collection. Students are encouraged to bring unidentified ichthyo plankton samples or mixed species lots to the course to help with their identification.

FW 533, POPULATION DYNAMICS FOR CONSERVATION, 4 Credits
A synthesis of the principles of population dynamics from the viewpoint of a resource manager. Particular attention is paid to populations structured by age, size, or over space, and considering both fisheries and wildlife management. Laboratory work uses computer programming in the R language to implement examples from lecture.
Prerequisite: IB 592 with C or better
Recommended: (MTH 227 and MTH 228) or (MTH 251 and MTH 252)

FW 534, ESTUARINE ECOLOGY, 4 Credits
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSTLISTED as FW 434/OC 434 and FW 534/OC 534.
Equivalent to: OC 534
Available via Ecampus

FW 535, WILDLIFE IN AGRICULTURAL ECOSYSTEMS, 3 Credits
Examines the relationships between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required, transportation fee charged. OSU Ecampus students are not required to attend field trips.
Recommended: BI 370 and FW 251
Available via Ecampus

FW 537, STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT, 2 Credits
Structured decision making (SDM) is used for making natural resource management and policy decisions. It is an ideal framework for interdisciplinary teams to cooperate and identify the most effective management strategies. Graduate students from diverse backgrounds (natural resources, political science, others) are provided with an understanding of the SDM process.
Recommended: One year of college-level mathematics and one quarter of fish and wildlife management
Available via Ecampus

FW 538, STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT LAB, 2 Credits
Students who are taking or have taken FW 537 are provided with the understanding of and ability to employ the techniques needed to build models that are used during the structured decision-making process. The laboratory emphasizes the use of graphical models and basic statistical techniques for building decision-making models. Lec/lab.
Prerequisite: FW 537 (may be taken concurrently) with D- or better

FW 540, VERTEBRATE POPULATION DYNAMICS, 4 Credits
Concepts in population ecology and quantitative approaches to managing wildlife populations; methods of parameter estimation, model structure, assumptions, and analysis, applications to common management issues.
Recommended: Upper-division population ecology and basic statistics courses

FW 544, QUANTITATIVE DECISION ANALYSIS FOR FISH AND WILDLIFE MANAGEMENT, 4 Credits
Decision analysis allows decision makers to examine the expected effects of different strategies before implementation; incorporate multiple objectives and values of stakeholders; determine the relative influence of various sources of uncertainty; and estimate the value of collecting additional data. Quantitatively oriented graduate students in natural resources are provided with an in-depth overview of decision analysis and adaptive management, emphasizing animal population management. Lec/lab.
Recommended: ST 511 and ST 512 or equivalent, basic background in animal population dynamics and management.

FW 545, ECOLOGICAL RESTORATION, 4 Credits
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSTLISTED as FES 445/FW 445 and FES 545/FW 545.
Equivalent to: FES 545, FOR 545
Recommended: BI 370 or BI 370H
FW 549, HISTORY OF FISHERIES SCIENCE, 3 Credits
Surveys the development of fisheries science, professionalization of the discipline, patronage, and the political, economic, and social context in which fisheries science operates. 
Available via Ecampus

FW 550, TROPHIC CASCADES, 2-3 Credits
Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. CROSSLISTED as FES 550/FW 550. 
Equivalent to: FES 550, FOR 547, FW 547 
This course is repeatable for 3 credits. 

FW 551, AVIAN CONSERVATION AND MANAGEMENT, 3 Credits
Identification, classification, life history strategies, ecology and management of upland and migratory birds. 
Recommended: FW 311 or equivalent course work. 
Available via Ecampus

FW 552, FOREST WILDLIFE HABITAT MANAGEMENT, 4 Credits
Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. CROSSLISTED as FES 552/FW 552. 
Equivalent to: FES 552 
Recommended: FOR 341 or equivalent course in ecology. 
Available via Ecampus

FW 554, FISHERY BIOLOGY, 4 Credits
Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management. 
Recommended: FW 315 and FW 320 
Available via Ecampus

FW 556, FRESHWATER ECOLOGY AND CONSERVATION, 5 Credits
Physical, chemical, biological, and environmental concepts in continental aquatic systems. Includes techniques related to assessing aquatic resources their management and conservation. Lec/lab. 
Recommended: BI 370 or BI 371 or 9 credits of upper-division biological sciences 
Available via Ecampus

FW 558, MAMMAL CONSERVATION AND MANAGEMENT, 4 Credits
A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs. 
Recommended: 9 credits of upper-division biological sciences. 
Available via Ecampus

FW 560, PSYCHOLOGY OF ENVIRONMENTAL DECISIONS, 3 Credits
Natural resource management and conservation programs have one thing in common: to be effective, they must consider how and why humans make decisions. This course approaches this topic from a psychological lens and will cover the psychological processes associated with making individual and group decisions, common biases and heuristics in our decision-making, and how these apply to diverse natural resource management and conservation issues. Students will learn how to take these aspects of human decision making into consideration when participating in or facilitating collaborative environmental programs. 
Available via Ecampus

FW 562, ECOSYSTEM SERVICES, 3 Credits
Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts. 
Recommended: BI 370 or equivalent course work. 
Available via Ecampus

FW 563, CONSERVATION BIOLOGY OF WILDLIFE, 3 Credits
Overview of the field of conservation biology with emphasis on the relationship to conservation and management of wildlife. 
Available via Ecampus

FW 564, MARINE CONSERVATION BIOLOGY, 3 Credits
Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats. 
Equivalent to: BI 564 
Recommended: BI 370 or BI 370H

FW 565, MARINE FISHERIES, 4 Credits
A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered fall term in odd years. 
Recommended: FW 315

FW 567, ANTARCTIC SCIENCE AND CONSERVATION, 4 Credits
Explores the history, geology, climate, and ecosystems of Antarctica, with an emphasis on current research and conservation issues. Focuses on critical thinking skills developed through independent research on a topic of interest, an internal peer review project, and discussions of relevant case studies in Antarctic research. 
Available via Ecampus
FW 569, BEHAVIOR AND PHYSIOLOGY OF MARINE MEGAFAUNA, 4 Credits
An in-depth study of marine megafauna (mammals, birds, turtles) with an emphasis on methods and analyses of behavior and physiology for conservation. Lab and field exercises include investigations into the behavior–physiology nexus of diving, migration, thermoregulation, energy expenditure, and mating systems. Research techniques to be explored will include, for example, tracking and remote biotelemetry monitoring technologies, respirometry, genetics, and direct field study observation. Theoretical approaches, field techniques and statistical analyses will help prepare students for a career in fisheries or wildlife science. Lec/lab. Taught at HMSC.
Recommended: FW 302, FW 320, FW 331, and FW 475

FW 570, ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN, 3 Credits
Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities.
Equivalent to: HSTS 570
Recommended: (HST 201 and HST 202 and HST 203) or BI 370

FW 571, ENVIRONMENTAL PHYSIOLOGY OF FISHES, 4 Credits
Principles of the functional biology of fishes with emphasis on environmental interactions and management implications.
Recommended: FW 315 and (BI 370 or BI 371)

FW 573, FISH ECOLOGY AND CONSERVATION, 4 Credits
Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems.
Recommended: BI 370 and FW 315
Available via Ecampus

FW 574, EARLY LIFE HISTORY OF FISHES, 4 Credits
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years.
Equivalent to: OC 574
Recommended: FW 315

FW 575, WILDLIFE BEHAVIOR, 4 Credits
Equivalent to: FW 585
Recommended: 9 credits of upper-division biology.
Available via Ecampus

FW 576, FISH PHYSIOLOGY, 4 Credits
Physiological specializations and adaptations of major groups of fishes.
Recommended: FW 315
Available via Ecampus

FW 579, WETLANDS AND RIPARIAN ECOLOGY, 3 Credits
Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored.
Recommended: BI 370 or BI 371
Available via Ecampus

FW 580, STREAM ECOLOGY, 3 Credits
Structure and function of stream ecosystems, with emphasis on biological processes; physical and chemical relations; riparian influences and landscape perspectives.
Recommended: 9 credits of upper-division science.
Available via Ecampus

FW 581, WILDLIFE ECOLOGY, 3 Credits
Interrelationships of wildlife, environment and humans. Evaluation of properties and habitats of wildlife populations.
Recommended: (BI 370 or BI 371) and FW 311 and FW 320 and ST 351
Available via Ecampus

FW 583, SPECIES RECOVERY PLANNING AND RESTORATION, 3 Credits
The importance of communication in science is stressed and a broad knowledge of endangered species-related information is provided. Students develop the ability to critically evaluate published information in scientific literature and to present and summarize it as part of the collaborative species recovery planning process with a varied audience of stakeholders.
Recommended: FW 563 and FW 573
Available via Ecampus

FW 591, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: MB 591
Recommended: 9 credits of upper-division fisheries biology.

FW 596, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596.
Equivalent to: MB 596
Recommended: MB 303 or other upper-division laboratory course.

FW 597, AQUACULTURE, 3 Credits
Principles and practices for the aquaculture of fish, shellfish, and algae.
Recommended: 9 credits of upper-division biology.
Available via Ecampus
FW 598, AQUACULTURE LABORATORY, 3 Credits
Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center.
Recommended: 9 credits of upper-division biology.

FW 599, SPECIAL TOPICS IN FISHERIES AND WILDLIFE, 0-16 Credits
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: ENT 499
This course is repeatable for 99 credits.

FW 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

FW 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
Available via Ecampus

FW 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FW 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FW 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

FW 620, ECOLOGICAL POLICY, 3 Credits
Policy issues associated with ecosystem management, risk assessment, biological diversity, ecosystem health, sustainability, invasive species, bioregionalism, globalization and transnational factors, and rights, ethics, and morals.
Recommended: Background in natural resources, environmental sciences, ecological sciences, ecological economics, political science, or similar discipline.
Available via Ecampus

FW 661, ANALYSIS OF ANIMAL POPULATIONS, 5 Credits
Quantitative methods for estimating parameters (abundance, survival, population stability) of animal populations. Emphasis is on vertebrate animals and statistical methods of hypothesis testing, parameter estimation, and inference testing. Offered odd-numbered years.
Recommended: ST 511 and ST 512 or equivalent

FW 699, SPECIAL TOPICS IN FISHERIES AND WILDLIFE, 1-4 Credits
Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus.
This course is repeatable for 8 credits.

FW 808, WORKSHOP, 1-16 Credits

Fisheries and Wildlife Administration Graduate Major (PSM)

Also available via Ecampus.

The Professional Science Master’s degree in Fisheries and Wildlife Administration (PSMFWA) provides advanced training for early- and mid-career professionals employed by natural resources agencies, non-government organizations, and other entities with a need for expertise in fisheries and wildlife science. The PSMFWA degree will help employers meet workforce planning goals and contribute to self-improvement goals of current employees.

It is taught primarily as a distance, online curriculum via Ecampus, although some students may choose to work toward the PSMFWA degree while in residence at OSU or at the Hatfield Marine Science Center.

The PSMFWA degree is offered as a non-thesis program only. Students have an advisor and graduate committee to review their program of study, provide career and internship advice, and evaluate a final report based on the internship experience.

For general information about the FW PSM program, email fw.gradadvising@oregonstate.edu.

Major Code: 1331

The 45-credit PSMFWA curriculum is organized into six main sections:

1. Biology, Ecology, and Habitat core (15-16 credits)
2. Technical Skills core (6-8 credits)
3. Social Sciences core (9-10 credits)
4. Communication and Management Skills core (6-8 credits)
5. Ethics (1 course)
6. Internship (6 credits)

SNR 522  BASIC ETHICS IN NATURAL RESOURCES

Internship
FW 510  PROFESSIONAL INTERNSHIP
or FW 506  PROJECTS

Total Credits 45

All courses on these lists are available online. Students taking on-campus or hybrid courses may find logical substitutions that can be approved by the program director.

Major Code: 1331

Fisheries and Wildlife Sciences Minor

Also available at LaGrande and via Ecampus.

Minor Code: 734

A sequence in general biology equivalent to BI 221, BI 222, BI 223 or BI 204, BI 205, BI 206 is a prerequisite to the Fisheries and Wildlife Sciences minor. A minimum of 27 credits is required with a combination of the following courses. Double counting restrictions, when applicable, are listed for each section. Double counting towards baccalaureate core is permitted.

Total Credits 27

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
1 Double counting is allowed in this section
2 Two courses in this section may be double counted
3 None of these courses may be double counted

Minor Code: 734

Fisheries and Wildlife Sciences Undergraduate Major (BS, HBS)

The undergraduate curriculum for the Fisheries and Wildlife Sciences BS degree (180 credits) is composed of core courses as well as specializations of 24 credits. The core represents the educational foundation of fish and wildlife conservation, and the specializations provide students with an opportunity to build their curriculum to meet specific goals. Working with faculty in formal and informal settings, students are encouraged to become engaged in designing their own education. The core courses required of all students seeking the BS degree are listed below.

For further information, see the Fisheries and Wildlife website (http://fw.oregonstate.edu/).

Specializations

Through the specialization, undergraduate students are encouraged to become engaged in designing their own education. Students work with faculty in formal and informal settings to define career and life goals and then develop a course of study to achieve those goals. Specialization plans should be developed during the junior year and will be presented to the faculty for review and comment. Specializations must contain at least 24 credits and must be upper division with four lower-division credits allowed. No courses included may be taken for a satisfactory/unsatisfactory (S/U) grade. A maximum of two courses may be completed prior to approval of the specialization. Additional upper-division credits taken prior to approval of the specialization may be allowed through petition to advisor. Double counting (when credit is given twice for a course) is not permitted between the specialization and other university or departmental course work except in the following circumstances:

- The writing intensive courses (WIC) may double count with the OSU Baccalaureate Core requirements;
- Students completing their first BS degree may apply 12 credits from the minor towards the specialization (requires approval by advisor in minor department and FW advisor);
- Postbaccalaureate students who are completing their second degree may use a maximum of 12 credits from their first degree towards their specialization (approved by FW advisor).
Specializations are given titles to reflect their content, but titles must not substantially duplicate titles of existing degree programs. Examples of specializations include forest wildlife management, stream ecology, fish and wildlife law enforcement, marine fisheries, aquaculture, avian conservation and management, conservation education and extension, fisheries business, human dimensions of resource management, conservation biology, and many others. Specializations may include typical on-campus courses, special field courses (when college credit is earned), a full term of course work at the Hatfield Marine Science Center in Newport, Oregon, or one or more terms of international exchange. A maximum of 12 credits in any combination of FW 401 and FW 410 can be used towards the specialization. Combined with required internships and a capstone course, fisheries and wildlife sciences graduates will be well-prepared to begin professional careers in fish and wildlife conservation, or to continue their education in graduate school. For those students unsure of their professional goals or seeking diversity in course work, a broad specialization may be declared.

Specialization guidelines (http://fw.oregonstate.edu/department-fisheries-and-wildlife/undergraduate/curricula-course-offerings/) are available online.

**Internships**

One of the best avenues to a permanent job in fisheries and wildlife is through a strong internship and temporary employment or volunteer positions. Students are required to complete a minimum of two internships or other approved alternative experiences (one of each type) for their degree. There are two types of internships: exploratory (1–2 credits) and intensive (3–6 credits). Students are encouraged to start gaining professional experience by volunteering or interning with a natural resource agency as early as possible, and no later than their junior year. This requirement is listed as FW 410, (2 required) (4–6), under the Fisheries and Wildlife Core.

**Major Code: 733**

- Understand the physical and ecological elements and processes sustaining ecosystems, and recognize the implications of altering those components.
- Apply conservation principles in developing conservation approaches for ecosystems or organisms within ecosystems.
- Incorporate social information in fisheries and wildlife management.
- Understand the biology, ecology, and evolution of at least one major vertebrate taxon, and explain how the structure, behavior, and physiology of animals in that taxon adapts them to their environment and influences their ecology.
- Interpret, represent, and present data in accordance with professional standards.
- Recognize biases and assumptions in published and unpublished scientific writing.
- Use logic, reasoning, analysis, and synthesis to arrive at defensible conclusions.
- Demonstrate the capacity to clearly and effectively express themselves in written communication.
- Develop and learn about the importance of professional collegiality and team building.

Physical and Earth Sciences (9-14 credits)

Select three courses from the following categories:

- **Physics, Math, and Chemistry**
  - Select no more than two courses from the following (cannot double count with FW core):
    - CH 130 General Chemistry of Living Systems
    - CH 331 Organic Chemistry
    - CH 332 Organic Chemistry
    - CH 390 Environmental Chemistry
    - MTH 227 *Calculus and Probability for the Life Sciences I
    - MTH 228 *Calculus and Probability for the Life Sciences II
    - MTH 241 *Calculus for Management and Social Science
    - MTH 251 *Differential Calculus
    - MTH 252 Integral Calculus
    - OC 450 Chemical Oceanography
    - PH 201 *General Physics
    - PH 202 *General Physics
    - PH 205 *Solar System Astronomy
    - PH 206 *Stars and Stellar Evolution

- **Habitats and Ecosystems**
  - Select one course from the following:
    - BI 231 General Chemistry
    - & CH 251 *Laboratory for Chemistry 231
    - CH 232 General Chemistry
    - & CH 252 *Laboratory for Chemistry 232
    - CH 233 General Chemistry
    - & CH 263 *Laboratory for Chemistry 233
    - BI 370 ECOLOGY 3
    - FW 107 ORIENTATION TO FISHERIES AND WILDLIFE 1
    - FW 209 CAREER SKILLS IN FISHERIES AND WILDLIFE SCIENCES 1
    - FW 251 PRINCIPLES OF FISH AND WILDLIFE CONSERVATION 3
    - FW 255 FIELD SAMPLING OF FISH AND WILDLIFE 3
    - FW 289 COMMUNICATION SKILLS FOR FISHERIES AND WILDLIFE PROFESSIONALS 4
    - FW 307 SPECIALIZATION DEVELOPMENT 1
    - FW 320 INTRODUCTORY POPULATION DYNAMICS 4
    - FW 321 APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY 3
    - FW 410 INTERNSHIP 4-6
    - FW 488 PROBLEM SOLVING IN FISHERIES AND WILDLIFE SCIENCE 3

    - or MTH 241 *Calculus for Management and Social Science
    - or MTH 245 *Mathematics for Management, Life, and Social Sciences
    - or MTH 251 *Differential Calculus
    - ST 351 INTRODUCTION TO STATISTICAL METHODS 8
    - & ST 352 and INTRODUCTION TO STATISTICAL METHODS

- **Vertebrate Biology (7-11 credits)**
  - Select one course from the following:
    - FW 302 BIOLOGY AND CONSERVATION OF MARINE MAMMALS 3-4
    - FW 311 ORNITHOLOGY
    - FW 315 ICHTHYOLOGY
    - FW 317 MAMMALLOGY
    - FW 331 ECOLOGY OF MARINE AND ESTUARINE BIRDS
    - Z 473 HERPETOLOGY
  - Select one course from the following:
    - FW 312 SYSTEMATICS OF BIRDS 2-3
    - FW 316 SYSTEMATICS OF FISHES
    - FW 318 SYSTEMATICS OF MAMMALS
  - Select one additional course from the following:
    - 3-4
  - **Advanced Core (18-26 credits)**
    - Select one course from each of the following categories, and one additional course from any category:
      - Genetics and Evolution
        - Select one course from the following:
          - 3-4
        - ANS 378 ANIMAL GENETICS
        - BI 311 GENETICS
        - BI 345 *INTRODUCTION TO EVOLUTION
        - FW 370 CONSERVATION GENETICS
        - PBG 430 PLANT GENETICS
      - Behavior and Physiology
        - Select one course from the following:
          - 3-4
        - ANS 311 PRINCIPLES OF ANIMAL NUTRITION
        - ANS 314 ANIMAL PHYSIOLOGY
        - FW 469 METHODS IN PHYSIOLOGY AND BEHAVIOR OF MARINE MEGAFANA
        - FW 471 ENVIRONMENTAL PHYSIOLOGY OF FISHES
        - FW 475 WILDLIFE BEHAVIOR
        - FW 476 FISH PHYSIOLOGY
        - Z 350 ANIMAL BEHAVIOR
        - Z 423 ENVIRONMENTAL PHYSIOLOGY
        - Z 431 VERTEBRATE PHYSIOLOGY I
        - Z 432 VERTEBRATE PHYSIOLOGY II

- 24

**Total credits required for graduation**
- 180

**Notes:**
- This is a sample plan for first-year entering students on the Corvallis Campus; individual plans will be developed after consultation with our head advisor.
- Ecampus students will consult with their advisor for course planning.
- Year 1: CH 231—CH 233 and CH 261—CH 263 series is optional. WR I and COMM requirement taken this year (COMM 111 or COMM 114).
- Year 2: FW 255: Field Sampling of Fish & Wildlife can be taken any term. WR II requirement taken this year.
- Year 3: ST 351 and 352 can be taken F, W or W, S. *FW 410: Intensive term. WR II requirement taken this year.
- Year 4: WIC course can double count with other FW requirement.
Fisheries Management Graduate Certificate

Current graduate students must notify the Department of Fisheries and Wildlife of their intention to pursue this certificate. Upon consultation with the certificate program coordinator, they will be given instructions regarding listing courses on their program of study and obtaining the required signature for that form.

For more information, please see our program site (http://ecampus.oregonstate.edu/online-degrees/graduate/fisheries-management/), the departmental website (http://fw.oregonstate.edu) or contact the Certificate Program Director Dr. Bruce Dugger and Graduate Program Coordinator Dr. Susie Dunham at fw.gradadvising@oregonstate.edu.

Certificate Code: CG08

- A minimum of 5 courses and 18 credits of total course work
- A Capstone Project (applying knowledge and skills to a fisheries management issue), equivalent in time and effort to a 3-credit course (FW 506 Projects)
- One Core course (FW 554 Fishery Biology)
- A minimum of one course from the Human Dimensions area
- Two to three courses from the Fisheries Sciences and Management Subject Area
- For further information, please see our website or email: fw.gradadvising@oregonstate.edu

Courses are offered through Corvallis, at Hatfield Marine Science Center, and through Ecampus. Check the course catalog and schedule of classes for location and term offered.

Fisheries Science and Management Subject Area

Select two to three courses from either of the following subject areas: 7-8

Fish Science and Management
FW 514 PROFESSIONAL DEVELOPMENT: MEETING COMMUNICATIONS
FW 519 THE NATURAL HISTORY OF WHALES AND WHALING
FW 524 INTRODUCTION TO FISHERIES ASSESSMENT
FW 549 HISTORY OF FISHERIES SCIENCE
FW 554 MARINE CONSERVATION BIOLOGY
FW 564 MARINE FISHERIES
FW 571 ENVIRONMENTAL PHYSIOLOGY OF FISHES
FW 573 FISH BIOLOGY AND CONSERVATION
FW 574/OC 574 EARLY LIFE HISTORY OF FISHES
FW 576 FISH PHYSIOLOGY
FW 597 AQUACULTURE

Aquatic Science, Habitat Restoration, and Management
FW 521 AQUATIC BIOLOGICAL INVASIONS
FW 526 COASTAL ECOLOGY AND RESOURCE MANAGEMENT
FW 534/OC 534 ESTUARINE ECOLOGY
FW 545/FES 545 ECOCENTRAL RESTORATION
FW 556 FRESHWATER ECOLOGY AND CONSERVATION
FW 562 ECOLOGY SERVICES
FW 579 WETLANDS AND RIVERS ECOLOGY
FW 580 STREAM ECOLOGY

Total Credits: 17-19

1 Other courses may be substituted upon approval of the certificate director

Certificate Code: CG08

Fisheries Science Graduate Minor

Minor Code: 1300

Fisheries Science Graduate Minor

Minor Code: 1300

Marine Conservation and Management Minor

Also available via Ecampus.

The Marine Conservation and Management minor focuses on marine vertebrates, conservation science, and management of living marine resources. The core is organized around the three main themes in OSU’s strategic plan of healthy planet, healthy economy, and healthy people. The elective section is broken into two groups of courses, one on species and habitats, the other on experiential learning and skills.

A series in general biology equivalent to the BI 221, BI 222, BI 223 or BI 204, BI 205, BI 206 is a recommended prerequisite to the Marine Conservation and Management Minor.

Minor Code: 788

A minimum of 27 credits is required. Double counting restrictions are listed for each section. Double counting towards the baccalaureate core is permitted in all sections.

Wildlife Management Graduate Certificate

Also available via Ecampus.

Current graduate students must notify the Department of Fisheries and Wildlife of their intention to pursue this certificate. Upon consultation with the certificate program coordinator, they will be given instructions regarding listing courses on their program of study and obtaining the required signature for that form.

For more information, please see our program site (https://ecampus.oregonstate.edu/online-degrees/graduate/wildlifemanagement/), the departmental website (http://fw.oregonstate.edu) or contact Certificate Program Director Dr. Bruce Dugger and Graduate Program Coordinator Dr. Susie Dunham at fw.gradadvising@oregonstate.edu

Certificate Code: CG12

- A minimum of 5 courses and 18 credits of total coursework
- A Capstone Project (applying knowledge and skills to a wildlife management issue), equivalent in time and effort to a 3-credit course (FW 506)
- A minimum of one course from the Human Dimensions area
- Three to four courses from the Wildlife Sciences and Management Subject Area

- For further information, please see our website or email: fw.gradadvising@oregonstate.edu

Courses are offered through Corvallis, at Hatfield Marine Science Center, and through Ecampus.

Total Credits 18-19

Wildlife Science Graduate Major (MS, PhD)

Graduate Areas of Concentration

Animal-habitat relationships; behavior; biology of big game and small mammals; conservation biology; community studies; ecology of avian and mammalian predators; ecology of waterfowl and upland gamebirds; effects of parasites, diseases, and environmental contaminants; nutrition; population; population dynamics; reproductive biology; toxicology of pesticides; wildlife ecology; wildlife-forestry interactions; wildlife science
The Department of Fisheries and Wildlife offers graduate work leading to the Master of Science and Doctor of Philosophy degrees (and participation in the MAIS degree program) with majors in wildlife science.

The wildlife graduate program in the Department of Fisheries and Wildlife includes wildlife research concerning the interaction of wildlife with land uses, migratory waterfowl, upland game birds, forest bird communities, endangered species, population dynamics, and conservation biology.

The Oregon Cooperative Fish and Wildlife Research Unit has active research programs funded in part by the Oregon Department of Fish and Wildlife and U.S. Geological Survey. The Agricultural Experiment Station, the Sea Grant program, Forest Science Laboratory and other organizations fund major research projects. The department maintains extensive collections of vertebrate species, maintained by Peter Konstantinidis as curator of vertebrates, with emphasis on larval fishes.

For more information, visit the website (http://fw.oregonstate.edu) or email fw.gradadvising@oregonstate.edu

Major Code: 1750

Wildlife Science Graduate Minor

Minor Code: 1750

Food Science and Technology

Food science and technology concerns the chemistry and engineering necessary to deliver safe, convenient food products from the farm gate to the food marketer. The academic program integrates principles and concepts in the physical, biological, and engineering sciences, and applies them to the scientific and technological aspects of food and beverage processing. The role of the food scientist is to successfully integrate these disciplines to assure an abundant, high quality, and nutritious food supply.

Graduate programs leading to the MS or PhD degree in food science permit intensified study in subject areas of special interest. Research areas in the department include both basic and applied aspects of chemistry/biochemistry, microbiology/biotechnology, sensory analysis, and food engineering. Research in food processing operations covers a number of food commodities such as cereal products, dairy products, fruits, vegetables, meats, seafood, wines and beers.

Departmental facilities include well-equipped laboratories, a pilot plant, a winery, a pilot research brewery, and an artisan cheese-making plant for instruction and research. Research facilities also are available at the Coastal Oregon Marine Experiment Station Seafood Laboratory at Astoria and the Food Innovation Center in Portland, Oregon.

Work Experience and Internships

Because of the educational value of professional work experience, the department strongly encourages students to gain practical work experience during summer and other terms. Students typically work in brewing, wineries, dairy processing, and seasonal fruit and vegetable processing. Students may earn internship credit with prior approval of the department and of the employer. OSU students may also participate in international internship programs.

Scholarships

The College of Agricultural Sciences, the department, the food industry, and the Institute of Food Technologists offer over 25 merit and financial need scholarships to encourage students preparing for careers in the food industry. For more information, contact the department, 541-737-3131, and the Office of Financial Aid and Scholarships, 541-737-2241.

Career Opportunities

Food science graduates have had excellent success in finding positions (median nationwide entry level salary for bachelor of science degree holders is $50,000) in an industry that possesses tremendous variety, mobility and opportunity for advancement. Career opportunities in the food, brewing, distilling, and enology industries include management, research and development, process and production supervision, quality assurance, distribution, sales, marketing, consulting, and trade associations. Governmental agencies employ food scientists for work in regulatory control, research, and the development of food standards.

Graduates of a master’s or doctoral program hold positions in teaching, colleges and university research and extension, and in industry.

Undergraduate Programs

Major

• Food Science and Technology (p. 268)
  Options:
  • Enology and Viticulture
  • Fermentation Science
  • Food Science

Minors

• Fermentation Science (p. 266)
• Food Manufacturing (p. 267)
• Food Science (p. 273)
• Food Technology (p. 273)

Graduate Programs

Faculty

Professors DeWittl, Goddik, McGorrin, Park (Jae), Qian, Ross, Shay, Shellhammer, Stone, Zhao
FST 273, *WINE IN THE WESTERN WORLD, 3 Credits
A study of wine throughout history, from its accidental discovery and refinement through today, with a focus on the profound role wine plays in agriculture, social rituals, human health, economics, and the ambivalent pursuit of pleasure. (Baccalaureate Core Course)
Attributes: CPWC – Core, Pers, West Culture
Available via ECampus

FST 280, FOOD AND BEVERAGE FERMENTATION, 2 Credits
Investigates different types of fermentation processes, related techniques, and products. Engages in laboratory activities on cider fermentation and sensory evaluation. Lec/lab.
Prerequisite: CH 231 (may be taken concurrently) with C- or better and CH 261 (may be taken concurrently) [C-]

FST 315, PILOT PLANT EXPERIENCES, 2 Credits
Students will be working in one of the FST pilot plants (dairy, vegetables/fruit, brewing, wine making, distilling) and will be assisting with the manufacturing of foods or beverages. Students must have available blocks of time in their schedules to contribute significantly to a production run. Production schedules for each pilot plant will be determined in advance of registration for each term. Not all pilot plants will be available each term. Lab.

FST 360, FOOD SAFETY AND SANITATION, 3 Credits
Principles, practices, and regulations governing and ensuring the microbiological safety of our food supply through risk assessment, surveillance, and intervention.
Prerequisite: (BI 211 with D- or better or BI 211H with D- or better or BI 212 with D- or better or BI 212H with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 221 with D- or better or BI 221H with D- or better or BI 222 with D- or better or BI 222H with D- or better or BI 223 with D- or better or BI 223H with D- or better) and (CH 121 [D-] or CH 221 [D-] or CH 221H [D-] or CH 231 [D-] or CH 231H [D-])

FST 370, INDUSTRY PREPARATION/ HACCP, 3 Credits
Assists students in preparation for internships and employment in the food industry by introducing compliance with food safety regulations, HACCP, and audits.
Recommended: One year of chemistry and one year of biology.

FST 385, ^COMMUNICATING FOOD AND FERMENTATION SCIENCE, 3 Credits
This writing intensive course (WIC) will guide students in the investigation and critical evaluation of literature on a topic of current interest in food or fermentation science, and the development of their ability to write concisely and with precision about technical subject matter in this discipline. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: WR 121 with C- or better and FST 360 [D-] and MB 302 (may be taken concurrently) [D-]
Recommended: Completion of Bacc Core Writing II requirement
FST 399, SPECIAL TOPICS, 0-16 Credits
Equivalent to: FST 399H
This course is repeatable for 16 credits.

FST 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: FST 399
This course is repeatable for 16 credits.

FST 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

FST 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

FST 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FST 407, SENIOR SEMINAR, 1 Credit

FST 410, INTERNSHIP, 1-16 Credits
A work internship to give students practical on-the-job training in the food processing or related industries. Graded P/N.
This course is repeatable for 16 credits.

FST 420, SENSORY EVALUATION OF FOOD, 4 Credits
Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab.
Prerequisite: (ST 351 with C- or better or ST 411 with C- or better) and (ST 352 (may be taken concurrently) [D-] or ST 412 (may be taken concurrently) [D-])

FST 421, *FOOD LAW, 3 Credits
Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

FST 422, FOOD CHEMISTRY FUNDAMENTALS, 4 Credits
An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, and carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec.
Prerequisite: (BB 350 with D- or better or BB 450 with D- or better or BB 450H with D- or better) and (CH 332 [C-] or CH 336 [C-]) and (MTH 228 (may be taken concurrently) [D-] or MTH 252 (may be taken concurrently) [D-] or MTH 252H (may be taken concurrently) [D-])

FST 423, FOOD ANALYSIS, 4 Credits
An integrated laboratory/lecture course covering methods used for the quantitative analysis of the chemical composition of foods and agricultural products.
Recommended: CH 324 and CH 337 and BB 350

FST 425, FOOD SYSTEMS CHEMISTRY, 4 Credits
The chemistry of food components in real-world food systems. Focused on water, proteins, carbohydrates, lipids, and food polymers, their interactions, and the effects of food processing and storage. Integrates writing as a learning tool and means of professional communication. Lec/lab/rec.
Prerequisite: FST 422 with D- or better

FST 430, FOOD PRODUCT DEVELOPMENT, 3 Credits
Provides technical background and hand-on experience in food product development and food innovation.
Recommended: Junior or senior standing
Available via Ecampus

FST 437, CHEMISTRY AND BIOCHEMISTRY OF DISTILLED SPIRITS, 3 Credits
The underlying science of the production of the distilled spirits will be discussed systematically. The course will cover the requirements for water, the major raw materials (eg. cereals, fruits, agave, syrups, and woods for maturation) and the conversion of these into fermentable extract. The scientific principles of fermentation will be explored, in the context of both ethanol and secondary metabolite production. Distillation will be considered, in terms of the physics and chemistry of liquid-liquid separations, before discussing post-fermentation options such as blending, maturation and product finishing.
Prerequisite: FST 251 with C- or better and BB 350 (may be taken concurrently) [D-]
Available via Ecampus

FST 438, PRODUCTION AND ANALYSIS OF DISTILLED SPIRITS, 3 Credits
Building on the prerequisite course, this course compares and contrasts different approaches to the manufacture of distilled spirits by using some of the major spirit categories as examples. The management of a distilled spirits production plant in terms of legislative, safety and process/ product quality will be discussed before explicit consideration of the requirements for establishing a distilled spirits production plant. Successful completion of this course will provide students with a broad understanding of the distilled spirits sector.
Prerequisite: FST 437 with D- or better
This course is repeatable for 3 credits.
FST 455X, FOOD FOR CHANGE, 3 Credits
Focus on traditional regional recipes, explore and document how global change has affected food production and demand until today and how projected climate change will affect it in the future by analyzing the ingredient lists. Focus on one recipe/ingredient, find maps of past/current crop ranges, document changes, establish the carbon footprint, and identify possible replacement ingredients projecting future culinary solutions.
Available via Ecampus

FST 460, CHEMISTRY AND BIOCHEMISTRY OF BEER, 3 Credits
Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality.
Prerequisite: (BI 212 with C- or better or BI 212H with C- or better or BI 221 with C- or better or BI 221H with C- or better) and CH 331 [C-] and CH 332 [C-]
Recommended: Completion or concurrent enrollment in BEE 472 and MB 302

FST 461, PRODUCTION AND ANALYSIS OF BEER, 3 Credits
Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab.
Prerequisite: FST 460 with D- or better and MB 302 [D-]

FST 466, WINE PRODUCTION PRINCIPLES, 3 Credits
Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines.
Prerequisite: (BI 212 with C- or better or BI 212H with C- or better or BI 221 with C- or better or BI 221H with C- or better) and CH 331 [C-] and CH 332 [C-]
Recommended: BB 350 and MB 302

FST 467, PRODUCTION AND ANALYSIS OF WINE, 5 Credits
Examines the practical fundamentals of red and white wine production and the key analysis techniques used to assess grapes and wines. Wine will be produced and monitored from grape to bottle using standard chemical, microbial, and sensorial techniques.
Prerequisite: FST 466 with D- or better and FST 479 (may be taken concurrently) [D-]

FST 479, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
Crosslisted as FST 479/MB 479 and FST 579/MB 579.
Prerequisite: (BI 212 with C- or better or BI 212H with C- or better) or (BI 221 with C- or better or BI 221H with C- or better) or (BI 223 [C-] or BI 223H [C-]) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
Equivalent to: MB 479

FST 480, TOPICS IN FERMENTATION, 0-2 Credits
Selected topics in fermentation science will be presented by department faculty and invited outside experts. Topics and format will change each quarter. Students may take the course for 1 or 2 credits as the topics change. Lec/lab.
This course is repeatable for 8 credits.

FST 490, FOOD PROCESSING CALCULATIONS, 2 Credits
Application of engineering principles to produce safe processed foods meeting consumer expectations for safety and quality. Validate process engineering models by comparing predicted values with new experimental data.
Prerequisite: BEE 472 with D- or better and FST 360 [D-]
Corequisites: FST 491

FST 491, FOOD PROCESSING CALCULATIONS LABORATORY, 1 Credit
Experiments in a pilot plant supported by a computer laboratory. Prepare samples of novel process technology products.
Corequisites: FST 490
Recommended: Microsoft Excel skills.

FST 495, FOOD PACKAGING, 3 Credits
Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, glass, metal, and paperboard. Modeling of gas and water permeation and accelerated shelf testing. Regulations in food contact surface and related to indirect food additives.
Prerequisite: MTH 111 with C- or better and PH 201 [C-] and CH 331 [C-]

FST 499, SPECIAL STUDIES, 0-16 Credits
This course is repeatable for 16 credits.

FST 501, RESEARCH, 1-16 Credits
Prereq: Departmental approval required.
This course is repeatable for 16 credits.

FST 503, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

FST 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
FST 507, SEMINAR, 1 Credit
This course is repeatable for 4 credits.

FST 509, PRACTICUM IN TEACHING, 1-16 Credits
This course is repeatable for 16 credits.

FST 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FST 514, HEALTH BENEFITS OF FUNCTIONAL FOODS, NUTRACEUTICALS AND DIETARY SUPPLEMENTS, 3 Credits
Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sports and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. CROSSLISTED as FST 514/NUTR 514.
Equivalency to: NFM 514, NUTR 514
Recommended: BB 350 and CH 332

FST 520, SENSORY EVALUATION OF FOOD, 4 Credits
Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab.
Recommended: Completion of ST 351 or ST 411 and completion or concurrent enrollment in ST 352 or ST 412

FST 521, FOOD LAW, 3 Credits
Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food.

FST 522, FOOD CHEMISTRY FUNDAMENTALS, 4 Credits
An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, and carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec.
Recommended: (BB 350 or BB 450 or BB 450H) and (CH 332 or CH 336) and (MTH 228 or MTH 252 or MTH 252H)

FST 523, FOOD ANALYSIS, 4 Credits
An integrated laboratory/lecture course covering methods used for the quantitative analysis of the chemical composition of foods and agricultural products.
Recommended: CH 324 and CH 337 and BB 350

FST 525, FOOD SYSTEMS CHEMISTRY, 4 Credits
The chemistry of food components in real-world food systems. Focused on water, proteins, carbohydrates, lipids, and food polymers, their interactions, and the effects of food processing and storage. Integrates writing as a learning tool and means of professional communication. Lec/lab/rec.
Prerequisite: FST 522 with C or better

FST 537, CHEMISTRY AND BIOCHEMISTRY OF DISTILLED SPIRITS, 3 Credits
The underlying science of the production of the distilled spirits will be discussed systematically. The course will cover the requirements for water, the major raw materials (eg. cereals, fruits, agave, syrups, and woods for maturation) and the conversion of these into fermentable extract. The scientific principles of fermentation will be explored, in the context of both ethanol and secondary metabolite production. Distillation will be considered, in terms of the physics and chemistry of liquid-liquid separations, before discussing post-fermentation options such as blending, maturation and product finishing.
Available via Ecampus

FST 538, PRODUCTION AND ANALYSIS OF DISTILLED SPIRITS, 3 Credits
Building on the prerequisite course, this course compares and contrasts different approaches to the manufacture of distilled spirits by using some of the major spirit categories as examples. The management of a distilled spirits production plant in terms of legislative, safety and process/ product quality will be discussed before explicit consideration of the requirements for establishing a distilled spirits production plant. Successful completion of this course will provide students with a broad understanding of the distilled spirits sector.
Prerequisite: FST 537 with D- or better
This course is repeatable for 3 credits.

FST 555X, FOOD FOR CHANGE, 3 Credits
Focus on traditional regional recipes, explore and document how global change has affected food production and demand until today and how projected climate change will affect it in the future by analyzing the ingredient lists. Focus on one recipe/ingredient, find maps of past/current crop ranges, document changes, establish the carbon footprint, and identify possible replacement ingredients projecting future culinary solutions.
Equivalent to: ENSC 555X
Available via Ecampus

FST 560, CHEMISTRY AND BIOCHEMISTRY OF BEER, 3 Credits
Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality.
Recommended: (BI 212 or BI 212H or BI 221 or BI 221H) and CH 331 and CH 332 and completion or concurrent enrollment in BEE 472 and MB 302
FST 561, PRODUCTION AND ANALYSIS OF BEER, 3 Credits
Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab.
Prerequisite: FST 560 with D- or better

FST 566, WINE PRODUCTION PRINCIPLES, 3 Credits
Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines.
Recommended: (BI 212 or BI 212H or BI 221 or BI 221H) and CH 331, CH 332, BB 350 and MB 302

FST 567, PRODUCTION AND ANALYSIS OF WINE, 5 Credits
Examines the practical fundamentals of red and white wine production and the key analysis techniques used to assess grapes and wines. Wine will be produced and monitored from grape to bottle using standard chemical, microbial, and sensorial techniques.
Prerequisite: FST 566 with C or better and FST 579 (may be taken concurrently) [C]

FST 579, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
Equivalent to: MB 579
Recommended: ((BI 212 or BI 212H) or ((BI 221 or BI 221H) and (BI 223 or BI 223H))) and CH 331, CH 332, (BB 350 or BB 450) and MB 302

FST 595, FOOD PACKAGING, 3 Credits
Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, glass, metal, and paperboard. Modeling of gas and water permeation and accelerated shelf testing. Regulations in food contact surface and related to indirect food additives.

FST 599, SPECIAL STUDIES, 0-16 Credits
This course is repeatable for 16 credits.

FST 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

FST 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FST 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FST 607, SEMINAR, 1 Credit
This course is repeatable for 4 credits.

FST 620, ADVANCED TOPICS IN SENSORY SCIENCE, 2 Credits
Current and/or advanced subjects in human sensory science. Includes 1) topics in human flavor perception that covers human psychophysics, neuroscience, and related fields, and 2) sensory evaluation techniques and data handling methods that are advanced in nature. Different points of view regarding above topics will be discussed.
Prerequisite: FST 520 with C or better
This course is repeatable for 4 credits.

FST 628, FLAVOR CHEMISTRY, 3 Credits
The definition of flavor, analytical methods in flavor chemistry, and mechanisms of odor interaction in food system will be discussed. In addition, an integrated approach will be used to study the flavor chemistry of economically-important agricultural products in the Pacific Northwest such as dairy products, fruits, and alcoholic beverages.
Recommended: FST 522 and FST 523

FST 639, FOOD POLYMER SCIENCE, 3 Credits
Investigates the theoretical principles and structure-function relationships of food macromolecules. The theoretical principles are related, where possible, to observable phenomena during thermal processing and storage of foods.
Recommended: (FST 422 or FST 522) and (FST 425 or FST 525)

FST 641, PROCESSING WHEAT AND OTHER SMALL GRAINS: A MOLECULAR VIEW, 3 Credits
Provides a fundamental overview of wheat and other cereals from the perspective of the molecular level events that are important in milling, baking, and other processes. Uses cereal processing (focused primarily on bread-making) as the vehicle for placing elements of food chemistry, food polymer science, physical chemistry, and rheology into the cohesive framework of a single food category. Students will experience how the sciences of chemistry, physics, engineering, microbiology, biochemistry, nutrition, etc. amalgamate in the production of the selected cereal products. Lec/lab.

FST 666, ADVANCED TOPICS IN ENOLOGY, 3 Credits
An in-depth investigation of advanced wine processing techniques and wine research, focusing on their impact on production and wine quality.
Prerequisite: FST 566 with B or better and FST 567 (may be taken concurrently) [B]
Recommended: Viticulture course such as HORT 454 and good understanding of how vineyard practices influence grape quality

Fermentation Science Minor
Minor Code: 141
Electives
Select 15 credits of the following: 15

- BIOE 457 BIOREACTORS
- FST 360 FOOD SAFETY AND SANITATION
- FST 460 CHEMISTRY AND BIOCHEMISTRY OF BEER
- FST 466 WINE PRODUCTION PRINCIPLES
- FST 467 PRODUCTION AND ANALYSIS OF WINE
- FST 479 FERMENTATION MICROBIOLOGY
- FST 480 TOPICS IN FERMENTATION (take 1–2 credits per class for up to 4 credits)
- MB 440 FOOD MICROBIOLOGY
- MB 441 FOOD MICROBIOLOGY LABORATORY

Total Credits 27

Minor Code: 141

Food Manufacturing Minor

The Food Manufacturing minor introduces students to several engineering and operations concepts. A key component of the minor is a three-month manufacturing internship at a food processing facility. Prior to the internship, students will work within the department’s pilot plants, producing at least one of cheese, beer, wine, liquors, or fruit and vegetable products.

Food Science and Technology Graduate Major (MS, PhD)

Graduate Areas of Concentration

Brewing, enology, flavor chemistry, food chemistry/biochemistry, food engineering, food microbiology/biotechnology, food and seafood processing, sensory evaluation

The Department of Food Science and Technology offers graduate programs leading toward the Master of Science and Doctor of Philosophy degrees. A variety of research specializations is available covering the chemical, physical, microbiological, and sensory properties of foods.

Food processing and engineering research deals with basic and applied aspects of contemporary food technologies. Areas of emphasis include the measurement and modeling of thermo-physical properties of foods and the modeling of heat and mass transfer phenomena. Other studies deal with the use of high pressure as a means of food preservation and the use of edible food coatings to enhance the nutritional quality of fresh fruits and vegetables.

Wine-related studies include relationships between sensory and chemical data and the effects of processing, wine microorganisms, and vineyard practices on quality.

Dairy processing research concerns milk quality, cheese technology, and cheese economics.

With over 75 years of history breeding and studying hops at OSU, the brewing research within FST connects to this long history by examining the flavor and stability of hops and hoppy aroma in beer as well as improved economics.

Studies in food microbiology focus on food safety and the application of beneficial microorganisms in food production. Included in this topic area are studies dealing with the effect of processing conditions on microbial viability and the characterization of yeast strains involved in fermented products.

Sensory science projects focus on an understanding of the fundamental nature of sensory phenomena and characterization of the sensory attributes of selected products.

Food chemistry research concerns the occurrence, role, formation, stability and analysis of various food constituents. Studies involving flavor chemistry and sensory evaluation aim to identify the flavor-active compounds of a wide variety of foods and beverages. Other studies focus on understanding the functional properties of cereal grains and development of environmentally sustainable chemical and biological processes for converting food wastes and related renewable waste streams into useful byproducts.

Investigations on seafood processing and by-product utilization are being conducted on the campus, and at the Coastal Oregon Marine Experiment Station Seafood Laboratory in Astoria, Oregon.

The Food Innovation Center in Portland, Oregon—OSU’s most unusual agricultural experiment station—provides entrepreneurs advice, testing and feedback on product development, packaging and shelf-life evaluation, sensory and consumer testing, marketing planning and access and business development.

Students desiring to pursue graduate study must have a BS degree or equivalent. Students from related fields of study (chemistry, microbiology, biology, etc.) should have a strong background in the basic sciences and must have earned at least a B (GPA 3.0) average during their last two years of undergraduate study.

Major Code: 1350

Food Science and Technology Graduate Minor

Minor Code: 1350
Minor Code: 1350

Food Science and Technology Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Enology and Viticulture (p. 269)
- Fermentation Science (p. 271)
- Food Science (p. 272)

A bachelor’s degree in Food Science and Technology provides the necessary foundation to pursue any of the many possible food and beverage related career paths. The program integrates principles and concepts in the physical, biological and engineering sciences (including courses in general chemistry, organic chemistry, biology, physics, math and statistics, biochemistry, microbiology, and food engineering) and applies them to the scientific and technical aspects of food and beverage processing. Students who achieve at least a 2.00 GPA in the required foundation courses in chemistry additionally earn a Chemistry minor.

In addition to completing the Food Science and Technology Core, students must select from among three options (areas of concentration):

1. Enology and Viticulture
2. Fermentation Science
3. Food Science

All curricula are approved by the Higher Education Committee of the Institute of Food Technologists, making students eligible for national and Oregon IFT scholarships, as well as providing universal degree recognition within the food industry. Beyond choosing an option, students are able to further customize their studies through a menu of elective credits, facilitating the development of additional expertise in food related areas such as microbiology, toxicology, nutrition, horticulture, and animal sciences, and crediting formalized career and professional development experiences. Among minors that complement the Food Science and Technology major are Business and Entrepreneurship, Microbiology, and Nutrition.

Major Code: 135

- Identify and explain essential foundational principles in Food Science: Food Chemistry and Analysis, Food Safety and Microbiology, Food Processing and Engineering, Sensory Science.
- Demonstrate the ability to integrate and apply scientific principles to describe complex food systems and solve problems in Food Science.
- Effectively express themselves orally, graphically, and in writing.
- Engage in activities that enhance their professional development.

Grade Requirements

All courses required for completion of the Food Science and Technology major must be passed, graded on the A–F scale. Included are both ‘core’ and ‘option’ courses in FST, as well as supporting courses in math, sciences, and written and oral communication.

1. A C– grade, or better, must be earned in the specified prerequisites for the following courses. (These courses have additional prerequisites, but the C– minimum applies to the prerequisites listed below).

2. Students must earn at least a 2.00 ‘major’ GPA. The major GPA is a cumulative GPA calculated on a list of courses particular to each option. Selected core and option courses are included, as specified in the list accompanying requirements of each option.

Earning the Degree

To earn a Bachelor of Science (BS) degree in Food Science and Technology (http://oregonstate.edu/foodscl/prospective-undergraduate-students/), students must fulfill all of the FST major core requirements, and those of any one of three options: Enology and Viticulture, Fermentation Science, or Food Science.

The Baccalaureate Core (general studies) component of an OSU bachelor’s degree is considered fulfilled by the student’s first degree. Additionally, the university requires that a minimum of 45 credits applied to this degree (32 if the first degree is from OSU) must be completed with Oregon State University course work completed while enrolled in this degree program.

Additional information for prospective postbaccalaureate students is available at the FST undergraduate department website (http://oregonstate.edu/foodscl/home/).

## Postbaccalaureate Study in FST

Students holding a bachelor’s degree from an accredited institution who are otherwise admissible to Oregon State University (http://oregonstate.edu/admissions/main/post-baccalaureate/) will be accepted into the Food Science and Technology major upon meeting the following additional criteria:

All of the following courses (or equivalents) must be completed with a cumulative GPA of 2.25 (4.00 maximum scale). In the case of repeated courses, the second grade earned in the course will be used in the GPA calculation.

### Major Code: 135

## Enology and Viticulture Option

This option is offered within the following major(s):

- Food Science and Technology - College of Agricultural Sciences  
  (p. 268)

The wine industry in the United States is centered on the West Coast, which produces about 95 percent of our nation’s wines. Oregon is third in the nation in terms of the number of wineries and fourth in the nation in total volume of wine produced. The Oregon wine industry is a rapidly growing industry and is becoming increasingly important to the larger Oregon economy.

The Enology and Viticulture option within the Department of Food Science and Technology prepares students to become successful winemakers. Courses in enology, taught by food science faculty, provide a scientifically-based understanding of wine production. Supporting course work in horticulture, botany and crop and soil science, helps students develop an understanding of the interaction between grape production and winemaking. Graduates in this option will possess the necessary breadth and depth of knowledge and associated practical skills to become independently thinking and successful winemakers.

---

1. Competitive selection and/or departmental approval required.
2. Students may not earn internship credit in all states. Consult with internship coordinator for list of eligible states.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)
The Fermentation Science option, one of just a handful of such programs in the nation, is a hands-on applied science addressing the biological, chemical and physical processes of fermented foods, including those used in the production of wine, beer, and spirits, as well as a variety of other fermented foods such as cheese, yogurt, soy sauce, pickles, breads, and fermented vegetables. Graduates enjoy a wide variety of employment opportunities—including some of the nation’s largest wineries and breweries, artisan cheese plants, coffee, soy, and pickle companies, among others. Graduates of the Fermentation Science option can readily cross over from the beverage industry to the food industry with good preparedness.

Option Code: 141

**Food Science Option**

This option is offered within the following major(s):

- Food Science and Technology - College of Agricultural Sciences (p. 268)

Food scientists belong to one of the world's largest industries—the food industry. From the farm gate to the market, food scientists develop foods and beverages in response to society's needs and demands, working to make foods safe, nutritious, convenient, economical, and tasty. Food scientists look for better ways to select, preserve, process, and package food products, including the ingredients that go into them. Society's focus on food has increased as a heightened awareness of diet, health, and biosecurity (or food safety) has increased worldwide.

Graduates of the Food Science option are typically interested in research and development of new products, food safety, sensory and flavor qualities, quality control or quality assurance. Some even work as freelance food technologists.

1. At least 5 credits must be upper division

### Minor Code: 136

**Food Technology Minor**

**Minor Code: 137**
The General Horticulture option is an online option and is especially recommended for students already working in the horticultural industry, whose careers will benefit from post-secondary education in the horticultural sciences.

The Horticultural Research option prepares students to assist in research or to pursue graduate studies.

The Plant Breeding and Genetics option provides an interdisciplinary approach to applied plant breeding and practical experience in breeding and genetic analysis working in the greenhouse, field, and laboratory.

The Sustainable Horticultural Production option prepares students for careers dealing directly or indirectly with the production, breeding, post-harvest handling, marketing, and scientific study of horticultural crops.

The Therapeutic Horticulture option prepares students to design healing and adapted gardens and to provide therapy programs used to improve the quality of people’s lives.

The Viticulture and Enology option prepares students for careers in Oregon’s growing vineyard and winery industry.

All options allow the student considerable flexibility to pursue a minor or to tailor course work to meet individual goals. Qualified students interested in the business aspects of horticulture are encouraged to pursue a minor in business. All undergraduates are required to complete either an approved internship or an undergraduate research project.

A high school student preparing for the program should follow a well-balanced college preparatory curriculum. Course work in biology, chemistry, and mathematics is strongly recommended. Course work in the social sciences, humanities, arts, and foreign languages is also encouraged, and the student should develop public speaking and writing abilities.

The program was designed to facilitate timely completion of degree requirements by transfer and postbaccalaureate students. Students intending to transfer into the program from a two- or four-year institution should complete as many of the lower-division requirements as possible. Some professional-technical courses from community colleges may be equivalent to lower-division horticulture courses. Equivalent credit can be given for such courses. Contact a departmental advisor for further information.

For additional information about the program, contact one of the undergraduate advisors: Kelly Donegan (head advisor, all options) and Sarah McDonald (advisor for the General Horticulture option).

**Undergraduate Program Major**

- Horticulture (p. 284)

  **Options:**
  - Ecological Management Turf, Landscape & Urban Horticulture (p. 285)
  - General Horticulture (p. 287)
  - Horticultural Research (p. 289)
  - Plant Breeding and Genetics (p. 291)
  - Sustainable Horticultural Production (p. 293)
  - Therapeutic Horticulture (p. 296)
  - Viticulture and Enology (p. 297)
Minors

- Entomology (p. 233)
- Horticulture (p. 284)
- Turf and Landscape Management (p. 299)

Certificate

- Organic Farming Systems (p. 299)
- Urban Agriculture (p. 300)

Graduate Programs

Major

- Horticulture (p. 283)
  Options:
  - Entomology
  - Plant Breeding and Genetics

Minor

- Horticulture (p. 284)

Adjunct Faculty

Bondi, Kennedy, Landgren, Stephenson

HORT 112, INTRODUCTION TO HORTICULTURAL SYSTEMS, PRACTICES AND CAREERS, 2 Credits
Overview of horticultural systems and practices, with an emphasis on the Pacific Northwest. Exploration of career opportunities in horticulture. Includes viticulture, environmental landscaping, turf management, greenhouse and nursery production, farming, education, and research. Required field trips.
Available via Ecampus

HORT 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: HORT 199H
This course is repeatable for 16 credits.

HORT 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 199
This course is repeatable for 16 credits.

HORT 212, INTRODUCTION TO ORGANIC AGRICULTURAL SYSTEMS, 4 Credits
An introduction to organic agricultural systems with a focus on history, regulations, principles and practices, performance, trends, and careers. Available via Ecampus

HORT 217, *SOCIAL IMPACTS OF SCIENCE, 3 Credits
Contemporary societies provide funding for scientific research, at the same time they struggle with existing and emerging societal problems. This course will discuss how social problems can be addressed by science and technology, and how the impacts of research are quantified. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

HORT 226, LANDSCAPE PLANT MATERIALS I: DECIDUOUS HARDWOODS AND CONIFERS, 4 Credits
Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on deciduous hardwoods and conifers. Available via Ecampus

HORT 228, LANDSCAPE PLANT MATERIALS II: SPRING FLOWERING TREES AND SHRUBS, 4 Credits
Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on spring flowering trees and shrubs. Lec/rec.
Available via Ecampus

HORT 251, TEMPERATE TREE FRUIT, BERRIES, GRAPES, AND NUTS, 2 Credits
Covers fruit and nut crops for temperate zones. Emphasis placed on scientific and common names, plant adaptation, basic morphology, major cultivars, and markets. Offered alternate years.

HORT 255, HERBACEOUS ORNAMENTAL PLANT MATERIALS, 3 Credits
Identification and culture of herbaceous plants used in the landscape. Offered via Ecampus only.
Available via Ecampus
HORT 260, ORGANIC FARMING AND GARDENING, 3 Credits
Organic farming and gardening methods are discussed in class and practiced in the field. The philosophical background of organic farming as well as the biological, environmental and social factors involved in organic food production are covered. Emphasis is on hands-on application of scientific principles to create sustainable food production systems. Lec/lab.
Available via Ecampus

HORT 270, INTRODUCTION TO THERAPEUTIC HORTICULTURE, 2 Credits
An introduction to the history, benefits, and methods of therapeutic horticulture. Surveys program models for vocational, social/recreational, wellness and therapeutic applications of horticulture.

HORT 271, TECHNIQUES AND ADAPTIVE STRATEGIES IN THERAPEUTIC HORTICULTURE, 2 Credits
An introduction to the characteristics of therapeutic gardens. Survey of year-round, indoor and outdoor therapeutic horticultural programming adaptations, strategies and techniques for different special populations.
Prerequisite: HORT 270 with D- or better

HORT 272, BASIC THERAPEUTIC SKILLS I, 2 Credits
The assessment and evaluation process in therapeutic horticulture. Development of communication strategies, helping skills, and horticultural skills for therapeutic situations.
Prerequisite: HORT 271 with D- or better

HORT 273, BASIC THERAPEUTIC SKILLS II, 2 Credits
Assessment and documentation tools in therapeutic horticulture. Treatment issues related to different types of physical and mental issues. Conduct and evaluate therapeutic horticultural activity sessions.
Prerequisite: HORT 272 with D- or better

HORT 274, THERAPEUTIC HORTICULTURAL PROGRAMS FOR OLDER ADULTS/CHILDREN, 2 Credits
Benefits and applications of therapeutic horticulture to older adults and special needs children.
Prerequisite: HORT 273 with D- or better

HORT 275, THERAPEUTIC GARDEN DESIGN, MAINTENANCE AND PROGRAMMING, 2 Credits
The history, characteristics and design of the therapeutic garden. The use of the garden in therapeutic horticultural programming.
Prerequisite: HORT 274 with D- or better and HORT 280 [D-]

HORT 283, INTRODUCTION TO URBAN AGRICULTURE, 3 Credits
Focuses on the adaption of agricultural principles to the urban environment, specifically the production of plant crops. Topics include: (I) urban environments and infrastructure, (II) urban crop production practices, (III) urban markets and farm management. Exposes students to the breadth of items that they should consider in order to be a successful urban grower.
Recommended: General background or previous coursework in agriculture
Available via Ecampus

HORT 285, PERMACULTURE DESIGN AND THEORY: CERTIFICATE COURSE, 4 Credits
Permaculture design course meets internationally recognized standards for certification. Lectures, hands-on activities, experiential learning, group discussions, readings, student projects and presentations. Two mandatory weekend days. Design intensive, utilizing graphic and verbal presentation skills. Research into other functioning permaculture systems through literature, websites, and as observed on field trips. Lec/lab.
This course is repeatable for 8 credits.
Available via Ecampus

HORT 283H, SPECIAL TOPICS, 0-16 Credits
Equivalent to: HORT 283H
This course is repeatable for 16 credits.

HORT 283H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 283
This course is repeatable for 16 credits.

HORT 300, CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS, 4 Credits
Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as CROP 300/HORT 300.
Equivalent to: CROP 300, CSS 300
Recommended: One year of general biology
Available via Ecampus

HORT 301, GROWTH AND DEVELOPMENT OF HORTICULTURAL CROPS, 3 Credits
Gain fundamental knowledge of plant growth and development of horticultural crops from a micro- to macro-level starting at double fertilization through fruit growth–covering seed-to-seed. The last section specifically examines how environmental factors affect growth and development. Lec/lab.
Recommended: General biology or botany sequence.
Available via Ecampus
HORT 303, HORTICULTURAL PROJECTS, 2 Credits
Student-managed crop production projects with emphasis on container grown, greenhouse crops. Crop scheduling, propagation and planting, selecting temperature and lighting regimes, specifying growth regulator applications, nutrient management, irrigation management, pest monitoring, and problem diagnosis and correction.
Recommended: HORT 301

HORT 306, INPUTS IN ORGANIC CROPPING SYSTEMS: SOURCING AND EFFICACY, 2 Credits
Applied course focused on the regulation, sourcing, and efficacy of organic inputs including soil amendments, fertilizers, and pesticides. Gain experience using science-, practice-, and regulation-based information to source and determine effectiveness of inputs in certified organic cropping systems.
Prerequisite: HORT 212 with C- or better and CROP 355 [C-]

HORT 307, ORGANIC SYSTEM PREDICAMENTS, 3 Credits
Analyze controversial organic agriculture and systems issues while developing critical- and systems-thinking skills. Synthesis of information from diverse sources and application of scientific knowledge will be required to recommend possible solutions to real world organic agriculture predicaments.
Available via Ecampus

HORT 308, WEED MANAGEMENT IN ORGANIC CROPPING SYSTEMS, 3 Credits
Applied organic weed identification and management course. Learn real-world application of science-, practice-, and regulation-based weed management information while designing and evaluating organic weed management plans for certified organic farming systems.
Available via Ecampus

HORT 310, PRINCIPLES OF PLANT PROPAGATION, 3 Credits
Plant propagation is the regeneration of plants using vegetative plant parts or seeds to maintain the desired genetic makeup. Theory and principles of horticultural and physiological concepts applicable for laboratory, greenhouse, nursery, field, and orchard propagators.
Prerequisite: HORT 301 with D- or better
Available via Ecampus

HORT 311, PLANT PROPAGATION, 4 Credits
The regeneration of plants from vegetative and reproductive tissue and organs. Horticultural and physiological principles, methods, and techniques for laboratory, greenhouse nursery, field, and orchard.
Prerequisite: HORT 301 with D- or better
Available via Ecampus

HORT 314, PRINCIPLES OF TURFGRASS MAINTENANCE, 4 Credits
Identification and adaptation of common turfgrasses. Physiology of turfgrass growth and response to cultural and environmental stresses. Cultural practices including establishment, general maintenance, and pest control. Field trips required.
Recommended: (CSS 205 or CSS 305 or SOIL 205)
Available via Ecampus

HORT 315, SUSTAINABLE LANDSCAPES: MAINTENANCE, CONSERVATION, RESTORE, 4 Credits
Sustainable care and maintenance practices for non-turf landscape areas. Low input pruning, planting, fertilization, and pest control with an emphasis on IPM. Plant responses to stress, particularly those encountered in the urban environment. Outdoor labs required.
Recommended: Basic knowledge of plant physiology
Available via Ecampus

HORT 316, PLANT NUTRITION, 4 Credits
Basic concepts and principles of plant mineral nutrition that provide a basis for solving practical nutritional problems in horticultural crops. Areas covered include mineral nutrients, nutrient availability in the soil and plant uptake, nutrient deficiencies and toxicities and their causes and remedies, and plant and soil analysis. Lec/lab/rec.
Prerequisite: CSS 205 with D- or better or CSS 305 with D- or better or SOIL 205 with D- or better
Available via Ecampus

HORT 318, APPLIED ECOLOGY OF MANAGED ECOSYSTEMS, 3 Credits
Survey of ecological processes in managed ecosystems emphasizing ecological management techniques. Ecosystem services; biodiversity management; weed dynamics; agroecology; urban ecology; restoration and mitigation; landscape management. Field trip required. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Available via Ecampus

HORT 319, RESTORATION HORTICULTURE, 3 Credits
As world population increases to some 9 billion plus by 2044, the importance of ecologically sound horticultural practices becomes increasingly apparent. Integration of ecological concepts and theory in management and development of created landscapes is critical for the preservation of many ecological services currently provided by undeveloped areas. Offered via Ecampus only.
Recommended: WR 121 with proficiency in writing skills and ability to communicate through writing. Basic ecology course or practical experience providing understanding of ecological principals and concepts
Available via Ecampus
HORT 330, PLAGUES, PESTS, AND POLITICS, 3 Credits
Integration and interaction of agricultural and public health aspects of entomology in society and history. CROSSLISTED as ENT 300/HORT 330. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: BI 300, ENT 300
Available via Ecampus

HORT 331, POLLINATORS IN PERIL, 3 Credits
Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world.
Equivalent to: ENT 331
Recommended: Completion of a Baccalaureate Core biological science course.
Available via Ecampus

HORT 344, INSECT AND DISEASE MANAGEMENT IN ORGANIC CROPPING SYSTEMS, 3 Credits
A skills-based course on the science, practice, and regulations related to insect and disease management in organic cropping systems.
Prerequisite: BOT 350 with C- or better and ENT 311 [C-]
This course is repeatable for 3 credits.
Available via Ecampus

HORT 349, DIAGNOSING PLANT PROBLEMS, 3 Credits
Basic principles of problem diagnosis in crop, garden, and landscape plants are covered. Problems caused by cultural and environmental issues, plant diseases, insect pests, and other causes are addressed. Students will gain familiarity with resources for plant problem diagnosis. Offered via Ecampus only.
Recommended: Background in basic biology, plant pathology and/or entomology from a university or practical setting

HORT 350, URBAN FORESTRY, 3 Credits
Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. CROSSLISTED as FES 350/HORT 350.
Equivalent to: FES 350, FOR 350
Recommended: Foundational forestry and horticulture courses
Available via Ecampus

HORT 351, FLORICULTURE AND GREENHOUSE SYSTEMS, 4 Credits
For students interested in growing plants in commercial or educational greenhouses. Actively explores the production and scheduling of floriculture crops for various markets. Combines the practical aspects of growing floral crops under environments created by traditional and technologically advanced greenhouses. Greenhouse structures and crop environment manipulation will be emphasized. Students actively manage a floriculture crop and are responsible for developing and implementing production schedules, and for making key decisions on the culture of diverse floral crops.
Recommended: HORT 301

HORT 358, LANDSCAPE CONSTRUCTION TECHNIQUES, 4 Credits
Study of landscape construction process from initial site analysis to finished landscape. Techniques used in building hardscape and landscape areas. Field trips required. Lec/lab.

HORT 360, IRRIGATION AND DRAINAGE, 4 Credits
Familiarizes students with the principles and practices of irrigation and drainage systems. Optimum use of water, irrigation and drainage system design, installation, repairs, and troubleshooting are emphasized. Lec/lab. Prerequisite: CSS 305 with D- or better or SOIL 205 with D- or better or (SOIL 205 with D- or better

HORT 361, PLANT NURSERY SYSTEMS, 4 Credits
Covers how to grow shrubs and trees, and herbaceous annuals and perennials in nurseries for use in urban landscapes and managed ecosystems such as forestry and restoration. Plant nursery systems are diverse and require intensive management involving a dynamic decision making process. This course actively explores field and container production systems as well as the marketing of plants, an overview of plant growth regulation and post-production handling, the influence of efficient production practices on plant quality, integrating pest management strategies, and natural resource utilization.
Recommended: HORT 301

HORT 380, SUSTAINABLE LANDSCAPE DESIGN, 3 Credits
The assessment of design problems/situations, the development of solutions and the communication of those solutions to the client through the design. Specific topics include designing for ecosystem maintenance/enhancement, introduction to computer-aided design (CAD), using color in landscape designs and rendering section/elevation views.

HORT 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HORT 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
HORT 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

HORT 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

HORT 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: HORT 405H
This course is repeatable for 16 credits.

HORT 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 405
This course is repeatable for 16 credits.

HORT 406, PROJECTS: DATA PRESENTATIONS, 1 Credit
For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students’ posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. CROSSLISTED as BRR 406/HORT 406.
Equivalent to: BRR 406

HORT 407, SEMINAR, 1 Credit
Equivalent to: CROP 407, SOIL 407
Available via Ecampus

HORT 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HORT 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

HORT 410, INTERNSHIP, 1-12 Credits
Work internship to acquaint horticulture majors with the practices of the horticulture industry. Under direction of departmental internship committee. Requires approved statement of intent, submission of employer and employee evaluation forms and written report. This course is repeatable for 12 credits.
Available via Ecampus

HORT 411, HORTICULTURE BOOK CLUB, 1 Credit
Reading and discussion of noteworthy books and associated topics relating to agriculture, society and the environment. This course is repeatable for 2 credits.

HORT 412, CAREER EXPLORATION: INTERNSHIPS AND RESEARCH PROJECTS, 1 Credit
Provides orientation to the horticulture major internship and research project requirement. Covers procedures for selecting, performing, and reporting on an internship or research project. Includes guidance and skill development valuable in the pursuit of horticultural career goals, such as cover letter and resume preparation and interviewing experience.
Available via Ecampus

HORT 414, PRECISION AGRICULTURE, 4 Credits
Provides insight into the technology available to support precision agriculture and data management planning applications. Examines the concepts and applications of precision agriculture to teach practical use of hardware, equipment and software. An overview of current technology including autonomous vehicles, GPS, soil and crop proximal sensors, imagery and mapping, variable rate control systems, and yield monitors.
Lec/lab. CROSSLISTED as CROP 414/HORT 414.
Equivalent to: CROP 414
Available via Ecampus

HORT 418, GOLF COURSE MAINTENANCE, 4 Credits
Basic aspects of golf course maintenance under temperate zone conditions. Lec/lab.
Recommended: HORT 314

HORT 421, HERBS, SPICES, AND MEDICINAL PLANTS, 3 Credits
Principles of crop ecology, morphology, chemistry and utilization of natural products of herbs, spices, and medicinal plants (HSMP). Examines the history and importance of HSMP, their historic and modern uses, current market trends, botany, collection in the wild, fundamentals of production systems for HSMP, harvesting, drying, and other postharvest operations, natural products and their uses, regulations and legal concerns of herbal products.
Recommended: CROP 200 or equivalent horticulture course
Available via Ecampus

HORT 433, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. CROSSLISTED as CROP 433/HORT 433 and CROP 533/HORT 533.
Prerequisite: BI 102 with D- or better or BI 213 with D- or better or BI 213H with D- or better or BI 223 with D- or better or BI 223H with D- or better or BI 311 with D- or better or BI 311H with D- or better or HORT 430 with D- or better or CSS 430 with D- or better or PBG 430 with D- or better or HORT 450 with D- or better or CSS 450 with D- or better or PBG 450 with D- or better
Equivalent to: CROP 433
HORT 444, INSECT AGROECOLOGY, 3 Credits
Agroecology incorporates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of the principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROS LISTED as ENT 444/HORT 444 and ENT 544/HORT 544.
Equivalent to: ENT 444
Recommended: General background or previous course work in entomology.

HORT 447, ARBORICULTURE, 4 Credits
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROS LISTED as FES 447/HORT 447 and FES 547/HORT 547.
Equivalent to: FES 447, FOR 447
Recommended: (FES 141 or FES 241 or Hort 226 or Hort 228) and (FOR 111 or Hort 112)
Available via Ecampus

HORT 451, TREE FRUIT PHYSIOLOGY AND CULTURE, 4 Credits
Plant growth and development in relation to tree fruit production; emphasis on canopy development and pruning theory, flowering and fruit set, and development, dormancy, and cold acclimation. Field trips required.
Recommended: Completion or concurrent enrollment in HORT 301 and BOT 331

HORT 452, BERRY AND GRAPE PHYSIOLOGY AND CULTURE, 4 Credits
Production of wine grapes, caneberries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years.
Recommended: HORT 301

HORT 453, GRAPEVINE GROWTH AND PHYSIOLOGY, 3 Credits
The physiological aspects of grapevine growth and development including dormancy, flowering and fruit set, vegetative growth, fruit development and water relations. Additional topics include taxonomy, morphology and physiological influences of vineyard mesoclimate and vine microclimate. Lec/lab.
Prerequisite: HORT 301 with C- or better
Recommended: HORT 301

HORT 454, PRINCIPLES AND PRACTICES OF VINEYARD PRODUCTION, 3 Credits
The relationship of vineyard and canopy management to grapevine physiology and fruit quality. Nutrient/water relations within the soil/vine continuum. Vineyard microclimate, floor management, and pests will also be discussed. Lec/lab.
Prerequisite: HORT 301 with D- or better
Recommended: Completion or concurrent enrollment in HORT 453

HORT 455, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROS LISTED as FES 455/HORT 455 and FES 555/HORT 555.
Prerequisite: FES 350 with C- or better or HORT 350 with C- or better
Equivalent to: FES 455, FOR 455
Available via Ecampus

HORT 456, PHYSIOLOGY AND PRODUCTION OF BERRY CROPS, 4 Credits
Physiology and production systems of blueberries, red and black raspberries, blackberries, and other berry crops. Emphasis on plant growth and development; flower and fruit development; cultivars; pruning and training systems; irrigation; harvesting; nutrient management; and conventional and organic production systems.
Prerequisite: HORT 301 with D- or better
Available via Ecampus

HORT 463, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROS LISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: CROP 463, HORT 363

HORT 480, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROS LISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: CROP 480
Recommended: CROP 300 or HORT 300
Available via Ecampus

HORT 481, HORTICULTURE PRODUCTION CASE STUDIES, 4 Credits
Field-based case studies investigate production issues encountered in horticultural crops; individual and group activities; discussion of processes for troubleshooting, decision-making and management recommendations; assessment of economic, practical and logistical feasibility. Prior knowledge of plant physiology, soils, entomology, and plant nutrition are required. Multiple field trips required. A field trip fee will be charged.
Prerequisite: HORT 301 with D- or better
HORT 482, DESIGN AND MANAGEMENT OF ORGANIC CROPPING SYSTEMS, 3 Credits
This capstone course is the final stage of the Organic Farming Systems Certificate Program. Iteratively design and evaluate organic farming system management plans. Apply real-world science-, practice-, and regulation-based information to the design and management of organic farming systems.
Prerequisite: HORT 212 with C- or better and CROP 355 [C-] and HORT 306 (may be taken concurrently) [C-] and HORT 307 (may be taken concurrently) [C-] and HORT 308 (may be taken concurrently) [C-] and HORT 344 (may be taken concurrently) [C-] and SOIL 360 (may be taken concurrently) [C-]

HORT 483, CASE STUDIES IN URBAN AGRICULTURE, 3 Credits
Provides an overview of the diversity of endeavors that are available to potential urban agriculturists. These include urban and peri-urban farms (for profit and non-profit), community and school gardens, controlled climate facilities, rooftop farms and gardens, and more. For each case study, we will specifically examine: (1) the market where the farmer sells goods, (2) methods of achieving growth, particularly while avoiding debt, (3) increasing livelihood reliance upon on-farm income.
Recommended: General background or previous coursework in agriculture
Available via Ecampus

HORT 485, ADVANCED PERMACULTURE DESIGN TOOLS FOR CLIMATE RESILIENCE, 3 Credits
Understand how permaculture as a design system can create sustainable human habitation that is beneficial to the natural world. Use tools specific to permaculture designers to assess, analyze, and project future climate scenarios and respond to them with appropriate design. Climate analogue identification and climate change forecasting provide the basis for a student assessment project that addresses current and future climatic conditions. Assessment and mapping assignments utilize Google Earth Pro, Google Docs, and Google Sheets.
Prerequisite: HORT 285 with B or better
Available via Ecampus

HORT 495, HORTICULTURAL MANAGEMENT PLANS, 3 Credits
Develop an integrated management plan for a horticultural enterprise. This course is repeatable for 6 credits.

HORT 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: HORT 499H
This course is repeatable for 16 credits.

HORT 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HORT 499
This course is repeatable for 16 credits.

HORT 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
HORT 520, CURRENT TOPICS IN HORTICULTURAL RESEARCH, 2 Credits
This is a core course in the horticulture graduate program. Students gain an advanced understanding of horticulture science and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to their peers. Instructors, topics and specific learning objectives vary from term to term.
This course is repeatable for 12 credits.

HORT 521, HERBS, SPICES, AND MEDICINAL PLANTS, 3 Credits
Principles of crop ecology, morphology, chemistry and utilization of natural products of herbs, spices, and medicinal plants (HSMP). Examines the history and importance of HSMP; their historic and modern uses, current market trends, botany, collection in the wild, fundamentals of production systems for HSMP; harvesting, drying, and other postharvest operations, natural products and their uses, regulations and legal concerns of herbal products.
Recommended: CROP 200 or equivalent course in HORT.
Available via Ecampus

HORT 533, SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS, 4 Credits
Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered every year. CROSSLISTED as CROP 433/HORT 433 and CROP 533/HORT 533.
Equivalent to: CROP 533
Recommended: BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or HORT 450 or CSS 450

HORT 540, ORGANIC VEGETABLE PRODUCTION SYSTEMS: DESIGN AND MANAGEMENT, 3 Credits
Design, management, and troubleshooting in organic vegetable production systems. Students learn to integrate knowledge from various technical disciplines and explore the social, economic, and environmental dimensions of vegetable production to analyze and evaluate organic vegetable farm enterprises.
Recommended: CROP/SOIL 530 and ENT 548
Available via Ecampus

HORT 544, INSECT AGROECOLOGY, 3 Credits
Agroecology integrates ecological concepts and principles to the design and management of sustainable agricultural systems. Topics include: the role of insects in sustainable agricultural systems; application of principles of insect ecology to better manage insect pests and maximize crop yield; conserving beneficial insects and other natural resources in agroecosystems and the surrounding landscape. CROSSLISTED as ENT 444/HORT 444 and ENT 544/HORT 544.
Equivalent to: ENT 544
Recommended: General background or previous course work in entomology.

HORT 547, ARBORICULTURE, 4 Credits
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSLISTED as FES 447/HORT 447 and FES 547/HORT 547.
Equivalent to: FES 547
Available via Ecampus

HORT 552, BERRY AND GRAPE PHYSIOLOGY AND CULTURE, 4 Credits
Production of wine grapes, caneberries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years.
Recommended: HORT 301

HORT 555, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 455/HORT 455 and FES 555/HORT 555.
Equivalent to: FES 555, FOR 555
Recommended: FOR 350 or FES 350 or HORT 350
Available via Ecampus

HORT 556, PHYSIOLOGY AND PRODUCTION OF BERRY CROPS, 4 Credits
Physiology and production systems of blueberries, red and black raspberries, blackberries, and other berry crops. Emphasis on plant growth and development; flower and fruit development; cultivars; pruning and training systems; irrigation; harvesting; nutrient management; and conventional and organic production systems.
Available via Ecampus

HORT 563, SEED BIOLOGY, 3 Credits
Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. Lec/lab. CROSSLISTED as CROP 463/HORT 463 and CROP 563/HORT 563.
Equivalent to: CROP 563, HORT 363

HORT 580, CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT, 4 Credits
Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/HORT 480 and CROP 580/HORT 580.
Equivalent to: CROP 580
Recommended: CROP 300 or HORT 300
Available via Ecampus
**HORT 581, HORTICULTURE PRODUCTION CASE STUDIES, 4 Credits**

Field-based case studies investigate production issues encountered in horticultural crops; individual and group activities; discussion of processes for troubleshooting, decision-making and management recommendations; assessment of economic, practical and logistical feasibility. Prior knowledge of plant physiology, soils, entomology, and plant nutrition are required. Multiple field trips required. A field trip fee will be charged. Recommended: HORT 301

**HORT 599, SPECIAL TOPICS, 0-16 Credits**

This course is repeatable for 16 credits.

**HORT 601, RESEARCH, 1-16 Credits**

This course is repeatable for 16 credits.

**HORT 603, DISSERTATION, 1-16 Credits**

This course is repeatable for 999 credits.

**HORT 605, READING & CONFERENCE, 1-16 Credits**

This course is repeatable for 16 credits.

**HORT 606, PROJECTS, 1-16 Credits**

This course is repeatable for 16 credits.

**HORT 607, SEMINAR, 1-16 Credits**

This course is repeatable for 16 credits.

**HORT 608, WORKSHOP, 1-16 Credits**

This course is repeatable for 16 credits.

**HORT 699, SPECIAL TOPICS, 1-16 Credits**

This course is repeatable for 16 credits.

**Horticulture Graduate Major (MS, PhD)**

This major offers the following option(s):

- Entomology (p. 283)
- Plant Breeding and Genetics (p. 284)

The Department of Horticulture offers graduate work leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees. The MS and PhD degrees culminate in original research reported in a thesis and are often pursued by students interested in research related careers, or who wish direct training in research methods.

The Department of Horticulture has strengths and expertise in:

**Breeding, Genetics, and Biotechnology.** Faculty and students explore fundamental questions related to the control and regulation of plant traits using a variety of techniques and tools including molecular biology, genomics and bioinformatics. Faculty and students also apply fundamental knowledge to make genetic improvements to crop plants and to modify plant growth and productivity. Current breeding programs exist in berry, hazelnut and vegetable systems.

**Sustainable Crop Production.** Faculty and students explore basic and applied questions related to the design and management of sustainable and productive horticultural cropping and farming systems. The program integrates a diverse set of disciplines and tools including basic plant sciences, applied crop management, and field experimentation and analysis. Program areas include viticulture and enology, berries and small fruit, tree fruit and nuts, vegetables, nursery and greenhouse production, and entomology.

**Community and Landscape Horticultural Systems.** Faculty and students explore basic and applied questions related to the design and function of urban and community landscapes including golf courses, sports fields, gardens, parks and open space. Program areas include turf and landscape management, community food systems, pollinator ecology, sustainable landscapes, and entomology.

For more information, visit our website (http://horticulture.oregonstate.edu), contact a member of the graduate faculty, or contact John Lambrinos, Graduate Coordinator, Department of Horticulture, 4017 Agricultural and Life Sciences Building, OSU, Corvallis, OR 97331-7304, email: john.lambrinos@oregonstate.edu

**Major Code:** 1450

**Major Code:** 1450

**Entomology Graduate Option**

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 228)
- Horticulture - College of Agricultural Sciences (p. 283)

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching, and extension in the context of understanding the basic biology of insects and, with this knowledge, then working with insects in natural and/or managed environments. The discipline of entomology at Oregon State University covers behavior, ecology, evolution, physiology, systematics, molecular biology, chemical ecology, plant-insect interactions, pollination by honey bees and native bees, biological control, integrated pest management, and insecticide toxicology. Oregon State Entomology addresses insect-related issues in aquatic and terrestrial systems in natural, agricultural, forested, and urban environments. Entomologists collaborate with plant scientists, physiologists, pathologists, soil scientists, geneticists, molecular biologists, and experts in other fields.

Students in the Entomology option will conduct thesis research related to insects under the supervision of an entomologist associated with the graduate faculty in Crops or Horticulture, and take courses that provide knowledge and understanding about insects. After completing their degree, students will have gained fundamental knowledge in entomology that may be applied in agricultural, aquatic, forested, natural, and urban environments.

Plant Breeding and Genetics Graduate Option

This option is offered within the following major(s):

- Crop Science - College of Agricultural Sciences (p. 228)
- Horticulture - College of Agricultural Sciences (p. 283)

The Plant Breeding and Genetics (PBG) graduate option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics graduate option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students’ career goals including further graduate study, as well as direct entry into public or private sector breeding programs. After completing the degree, students will have the fundamental knowledge of plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and genomics.

Horticulture Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Ecological Management of Turf, Landscape and Urban Horticulture (p. 285)
- General Horticulture (p. 287)
- Horticultural Research (p. 289)
- Plant Breeding and Genetics (p. 291)
- Sustainable Horticultural Production (p. 293)
- Therapeutic Horticulture (p. 296)
- Viticulture and Enology (p. 297)

Also available via Ecampus.

Grow with us in the Horticulture Major. Our graduates go on to do sustainable farming; vineyard management; greenhouse & nursery production; breeding of new plant varieties; therapeutic horticulture; ecological management of golf courses, athletic fields, parks, botanical gardens, landscapes, urban centers and natural environments; and research on horticultural crops and systems.

We emphasize active learning and stress broad knowledge, critical thinking, field-based problem solving, analysis of novel situations, and application and synthesis from many areas. Our courses tackle contemporary real-world decisions faced by professional horticulturists. They include hands-on labs, diagnostics, landscape construction, and student-managed projects. Research opportunities are available. You will become skilled at finding and synthesizing information in order to manage the novel situations you will face during your horticultural career.

Option Code: 1210

Horticulture Graduate Minor

Minor Code: 1450

Minor Code: 1450

Horticulture Minor

Also available via Ecampus.

The Horticulture minor is an effective way for students, including majors outside the College of Agricultural Sciences, to meet their interests. The goals of students minoring in horticulture may vary widely. With just five credits in the minor core, students will be able to tailor their additional horticulture coursework to personal goals.

Minor Code: 145

Students are required to earn a grade of C− or better in all HORT and PBG courses taken to complete the minor.

Select 22 additional HORT credits (at least 10 must be upper division) 1

Total Credits: 27

1 Course selection must be approved by the departmental academic advisor

Minor Code: 145
• Find, interpret and integrate data and theory from horticultural systems and sciences, and related disciplines.
• Assess horticultural systems, diagnose horticultural problems and recommend solutions, and create novel systems based on data and theory from horticultural sciences and related disciplines.
• Comprehend and demonstrate how horticultural sciences integrate with contemporary social, economic, political and environmental issues.
• Demonstrate proficiency in oral and written communication.

Grade Requirements for Horticulture Major

Students pursuing a major in horticulture are required to receive a grade of C− or better in all HORT (horticulture) and PBG (plant breeding and genetics) courses that are required for completion of their major and option. If a grade below C− is received in a HORT or PBG course required for their major and option a student will need to re-take the course and receive a grade of C− or better. If the grade below a C− is received for a course that is part of a group of courses where the student can select which courses to take (i.e., they do not need to take all of the courses, just a specified number of courses or credits) then it would be acceptable for the student to substitute a course for the one that they had received a grade below a C−. For example, in most of our options, a student needs to complete three of four plant identification courses. If a student received a grade lower than a C− in one of the classes, they could either re-take the same course or complete the other three courses with a grade of C− or better.

Grade Requirements for Horticulture Major – Plant Breeding and Genetics Option

Students pursuing an option in Plant Breeding and Genetics, under the Horticulture Major, and under the Crop and Soil Science Major, are required to receive a grade of C− or better in all BOT, CROP, CSS, FOR, HORT, MB, PBG, SOIL and ST courses required within their major and option.

Horticultural Research option requires the CH 231/CH 261, CH 232/CH 262, CH 233/CH 263 chemistry series.

Ecological Management of Turf, Landscape and Urban Horticulture Option

This option is offered within the following major(s):

• Horticulture - College of Agricultural Sciences (p. 284)
The turf, landscape, and urban horticulture industries are large and diverse, offering careers in golf course and athletic field management; landscape design, construction, management, and ecological restoration; conservation; park, botanical, and public garden management; urban horticulture and forestry policy and management; research; and consulting.

The Turf Management program works to develop ecological and sustainable ways to manage large grassed areas, such as golf courses, athletic fields, and parks. A natural fit for the grass seed capital of the U.S., the Willamette Valley, the Turf Management program allows you to integrate horticulture, biology, soil science, and pest management in your studies. Today’s turf landscapes are managed with a focus on sustainability and ecosystem enhancement, and Oregon State leads the way. In addition to sustainable methods, you’ll learn about the environmental benefits of turf, like pollutant filtration and flood control, and you’ll become an expert in understanding how to maintain native wildlife and bird populations while using cutting edge turf management techniques.

Recent graduates who have focused on Turf Management have become golf course supervisors, athletic field managers, and caretakers of the parks and grounds of cities, counties, and school districts. The program focuses on science, technology, ‘in-field’ hands-on experience, and decision making in real-world settings. Activities stress networking and exposure to multiple work environments to help students integrate quickly into the industry.

In the Landscape and Urban Horticulture program, students will learn about sustainable landscape management, urban forestry, and the ecosystem services provided by the built environment, such as carbon sequestration and climate regulation, temperature modulation, waste decomposition and detoxification, purification of water and air, storm and rainwater management, crop pollination, pest and disease control, nutrient dispersal and cycling, seed dispersal, intellectual and spiritual inspiration, recreational experiences, and scientific discovery.

Landscape professionals design, build, and manage aesthetically pleasing, functional, and environmentally responsible natural spaces where we all live, work, and play. Some focus is on ecological restoration of disturbed habitats. In recent years, the industry has expanded and rapidly become more sophisticated to meet the challenges of today’s urban environment. Consequently, there is great demand for creative, motivated individuals who love the outdoors and enjoy working with plants, soil, water, nature, and people.

Active Learning
As a student studying Turf Management, you’ll spend time conducting field research trials at our turfgrass research facility at Lewis-Brown Farm. You’ll also have the opportunity to compete in the yearly Collegiate Turf Bowl at the GCSAA Education Conference and the Golf Industry Show. Most students also join the Turf Club, as there you’ll get to meet industry members, visit their golf courses and athletic fields, perform community service, and play golf at a local golf course - for free!

As a student studying Ecological Landscape and Urban Horticulture, you’ll spend time in one of our greenhouses, learning the best methods to grow and propagate plants and at the Oak Creek Center for Urban Horticulture, working on permaculture and landscape design, construction and management projects. You’ll also learn from faculty in the College of Forestry, to explore the latest urban forest management techniques. Student teams will also attend the Collegiate Competition at the Annual Meeting of the National Association of Landscape Professionals. The Department of Horticulture encourages students to get out of the classroom and take a hands-on approach to learning and skill development.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

† Meets Synthesis requirements. Each course must be from a different department

### Option Code: 792

**General Horticulture Option**

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (p. 284)

**Available via Ecampus only.**

The online General Horticulture option curriculum is built on a strong foundation in horticultural science. This option is especially recommended for students already working in the horticultural industry or research facilities, whose careers will benefit from post-secondary education in the horticultural sciences. Students learn horticultural principles and practices associated with horticultural production within the context of plant biology, pest management, soils, ecology, and economics with applications in plant nutrition, pest management, business, and marketing. In addition, students are well-informed about the latest technology and trends in the field. The option provides sufficiently broad electives for the student to build their curriculum to meet specific goals.

Our graduates are skilled in finding and using information, as well as synthesizing information from many sources to solve problems. On-campus students benefit from field and lab experiences, research projects, and internships. Ecampus students will benefit from these same hands-on opportunities. With departmental support, the online student will identify opportunities for field, laboratory, internship, and research experiences, which will be vetted by the Department of Horticulture. Some lab experiences will be in the form of kits that the student will purchase and receive by mail; others will be virtual lab experiences created collaboratively between Department of Horticulture faculty and the curriculum design team in Ecampus.
The internship provides professional-level interaction with growers, managers, field reps, and consultants, and provides hands-on experience. Similarly, the research project familiarizes students with research topics and connects them with researchers in academia, public agencies, and private industry. Mentoring and advising will assist online students in taking advantage of departmental strengths.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

Horticultural Research Option

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (p. 284)

The Horticultural Research option is designed for students interested in graduate school and/or a career in academic or industrial research. It provides you with an excellent foundation in the natural sciences and horticulture, and accommodates your specific research interests. Your studies will involve you in critical thinking, and allow you to seek out, synthesize, and apply information from many sources to analyze novel situations and solve problems.

You will complete a research project under the guidance of a faculty mentor, and will write an undergraduate thesis. Many theses focus...
on problems and challenges found in Oregon horticulture and provide Oregonians with innovative solutions.

Recent graduates have gone on to Masters and Ph.D. programs at Oregon State, U.C. Davis and Cornell University, received a Fulbright Scholarship to study abroad and have studied diverse topics such as plant breeding, green roof technology, entomology, and weed science.

Active Learning
Our undergraduates have worked at local research institutions including the United States Department of Agriculture-Agricultural Research Service laboratories, the National Clonal Germplasm Repository in Corvallis, the Corvallis Plant Materials Center of the National Resources Conservation Service, and the North Willamette Research and Extension Center. With your faculty mentor, you’ll determine the best setting for your research.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

Option Code: 614

In addition to the required Horticulture major Core courses, students in this proposed option will complete the following courses:

**Total Credits 169-190**

**Plant Breeding and Genetics Option**

This option is offered within the following major(s):

- Crop and Soil Science - College of Agricultural Sciences (p. 222)
- Horticulture - College of Agricultural Sciences (p. 284)

An interdisciplinary approach to applied plant breeding is the cornerstone of the Plant Breeding and Genetics option. After completing this degree, you will have gained fundamental knowledge in plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

Graduates of the Plant Breeding and Genetics option often enter public or private sector breeding programs, or go on to attend graduate school.

**Active Learning**

As a student studying Plant Breeding and Genetics, you'll gain practical experience in breeding and genetic analysis working in the greenhouse, field, and lab. You'll also be able to take advantage of OSU’s extensive, cross-campus interdisciplinary plant science network and the Pacific Northwest’s largest plant breeding program to explore your research interests.
You can get either a B.S. in Horticulture or a B.S in Crop and Soil Science with an option in Plant Breeding and Genetics.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

---

**Sustainable Horticultural Production Option**

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (p. 284)

As a student focusing on the Sustainable Horticultural Production option at Oregon State University, you will gain the skills and knowledge necessary to manage integrated and organic fruit, berry, vegetable, nursery and/or greenhouse production systems. You will gain knowledge and experience in integrated pest management, plant propagation, plant nutrition, soil science, ecology, economics and business.

Recent graduates who have focused on Sustainable Horticultural Production have become plant breeders, started small farms, worked as field scouts and crop advisors, managed retail gardens and nurseries, and gone to graduate school.

**Active Learning**

As a student studying Sustainable Horticultural Production, you’ll spend time in our greenhouses and out in the field, studying the best production methods. The Department of Horticulture encourages students to get out of the classroom and take

---

2020-2021.pdf | 293
a hands-on approach to learning so that they become proficient in the knowledge and skills they need to succeed in their horticultural career.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

Therapeutic Horticulture Option

This option is offered within the following major(s):

- Horticulture - College of Agricultural Sciences (p. 284)

As a Therapeutic Horticulture student, you will acquire the skills and knowledge needed to design healing and adapted gardens and to provide therapy programs that improve the quality of people's lives. Our curriculum stresses effectively treating such clients as senior citizens struggling with physical or cognitive issues, individuals with developmental disabilities, and at-risk youth with the restorative powers of gardens, landscapes, and greenspaces.

As a horticultural therapist, you'll help treat patients with significant health or emotional problems through the healing influence of nature. Horticultural therapy is practiced throughout the world in a wide diversity of settings and cultures, including mental health settings, physical rehabilitation, vocation services, corrections, long-term care and hospice, special education programs, and youth and community services. Memory can be improved through learning a gardening process, coordination can be strengthened by planting, and connections can be made between the earth and those with emotional and mental disabilities.

Graduates of the Therapeutic Horticultural option may become Registered Horticultural Therapists, Community Garden Coordinators, and Rehabilitation Program Coordinators.

Active Learning

As a Therapeutic Horticulture student, you'll attend some of your classes at Legacy Healthcare System in Portland in their award-winning therapy gardens. By working closely with patients in their renowned Horticultural Therapy program, you will enhance your patient care skills while gaining real world experience.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

Option Code: 632

- Confirm coursework requirements for Professional Registration by the American Horticultural Therapy Association (http://ahta.org/ professional-registration/) (AHTA).
- All course work must have a passing grade of C– or above or a pass for a pass/fail course.
- A 480-hour AHTA approved and supervised internship is also required for Professional Registration by the AHTA.

- SOC 439 | WELFARE AND SOCIAL SERVICES
- SOC 440 | JUVENILE DELINQUENCY
- SOC 442 | SOCIOLOGY OF DRUG USE AND ABUSE
Our Viticulture and Enology option is designed to support your learning about sustainable wine grape production practices that consider vine and vineyard health while also emphasizing the profitability of the vineyard and winery business. This learning, along with a strong basic horticultural sciences background, will be critical to your growth as a professional in vineyard production science and to your ability to contribute effectively to the wine grape industry upon graduation. As only one of five universities in the nation with programs in both grape and wine production sciences, the Viticulture and Enology option through the Department of Horticulture is an excellent program for you if you are interested in vineyard production, vine growth and physiology, as well as enology.

Vineyard and winery production and the wine sales and agri-tourism associated with the industry is a significant component of the Oregon economy; it is estimated to contribute $2.7 billion annually. The increase in acreage, number of wineries and total wine sales in the past ten years shows that Oregon’s reputation as a well-respected wine production region continues to grow. As a student of this program, you will help bolster this reputation by becoming an expert in sustainable viticulture production methods with a strong background in basic sciences, horticultural production, agriculture, and viticulture sciences.

Recent graduates of the Viticulture and Enology option have become vineyard managers, viticulturists, consultants, and winemakers.

**Active Learning**

As a student studying Viticulture and Enology, you’ll spend time conducting trials and research projects at Woodhall Vineyard, Oregon State’s research vineyard. Students will also visit Willamette Valley vineyards to learn about problems and opportunities facing local producers. VITIS Club, the student organization for those interested in vineyards to learn about problems and opportunities facing local producers. VITIS Club, the student organization for those interested in vineyards to learn about problems and opportunities facing local producers. Weekly meetings and lab experiments support this approach to learning and research in viticulture and enology.

For more information, visit the Horticulture website (https://horticulture.oregonstate.edu/horticulture/students/undergraduate-students/).

**Option Code: 613**

In addition to the required Horticulture Major Core courses, students in this proposed option will complete the following courses:

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Organic Farming Systems Certificate

Available only via Ecampus.

This certificate is available as a standalone program (https://registrar.oregonstate.edu/standalone-certificates/).

The online Undergraduate Organic Farming Systems Certificate will provide you with technical skills and knowledge in organic farming production and regulation. The program emphasizes organic management of soil health, pests and diseases, weeds, and inputs while also providing understanding of organic regulations, policy, economics, and social implications. ‘Systems thinking’ will be utilized and cultivated throughout the courses to help illuminate interconnections and underline how management decisions influence all dimensions of sustainability (environmental, social and economic).

While most of your schoolwork will be completed online, you will be required to complete hands-on lab experiences, either through purchased kits or through virtual lab projects created collaboratively between Horticulture faculty and the curriculum design team in Ecampus. In addition, your schedule’s flexibility may allow you to accept an internship or work in one of our many facilities. An internship provides professional-level interaction with growers, managers, field reps, and consultants; and provides hands-on experience.

Turf and Landscape Management Minor

The Turf and Landscape Management minor is an effective way for students, including majors outside of the College of Agricultural Sciences, to meet their interests. The two areas of focus, turf or landscape, allow students to tailor their course work to personal goals.

Minor Code: 147

Students must receive a grade of C– or better in all HORT and PBG courses taken to complete the minor.

Horticulture Certificate

**Urban Agriculture Certificate**

Available only via Ecampus.

This certificate is available as a standalone program (https://registrar.oregonstate.edu/standalone-certificates/).

The Urban Agriculture Certificate Program will prepare the next generation of urban agriculture leaders in Oregon, and beyond. The program will emphasize critical aspects of urban agriculture, including site selection and design, soil management, variety selection, pest management, and accessing and developing markets for urban agricultural products and/or urban agri-tourism. Students will investigate and analyze a diversity of urban agricultural systems that vary in location, scale, cropping and non-crop systems, production methods, and market opportunities, including edible and ornamental crops, non-crop urban landscapes and public/private gardens, residential and community scale agriculture, non-profit and commercial urban farms.

**Certificate Code: C610**

- Demonstrate advanced knowledge of soils, plants, pests, and crops, and skills in urban farming and gardening.

**Objective of Urban Agriculture Certificate**

- Show in-depth understanding of the environmental, social, economic, and regulatory factors that influence and are influenced by urban agricultural systems.
- Generate a functional management plan for an urban agriculture project utilizing skills and knowledge gained.
- Evaluate the broader global and social justice implications of agricultural endeavors in urban and peri-urban areas.

Total Credits 27

* Baccalaureate Core Course (BCC)

**Certificate Code: C610**

This online Graduate Certificate in Organic Agriculture addresses the current educational gap created by a rapidly-growing global industry and the needs of this industry for trained, experienced professionals.

**Organic Agriculture Graduate Certificate**

Available only via Ecampus.

The organic agriculture graduate certificate offers a program in five concentrations:

1. **Minors in Agricultural and Food Science:**
   - Agroecology and Sustainability
   - Sustainable Food Systems
   - Sustainable Food Systems
   - Sustainable Food Systems
   - Sustainable Food Systems
   - Sustainable Food Systems

2. **Interdisciplinary Majors:**
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment

3. **Interdisciplinary Minors:**
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment

4. **Interdisciplinary Certificates:**
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment

5. **Interdisciplinary Advances:**
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment
   - Food, Agriculture, and Environment

Total Credits 27

* Baccalaureate Core Course (BCC)

1 A minimum of 12 upper-division credits taken as core or elective courses are required in the total of 27

**Certificate Code: C610**

This online Graduate Certificate in Organic Agriculture addresses the current educational gap created by a rapidly-growing global industry and the needs of this industry for trained, experienced professionals.
The objective of this program is to provide necessary expertise, and produce graduates who will then be able to effectively work in organic food production, processing, distribution, policy-making, education, or potentially beginning their own organic-related businesses.

Courses from a student’s major course of study will count towards minor requirements. Completion of the Sustainability minor requires 27 credits (including a minimum of 12 upper-division credits) within the 180-credit minimum for graduation.

Certificate Code: CG20

### Sustainability Minor

Also available at OSU-Cascades and via Ecampus.

The Sustainability Minor includes core sustainability courses (5) and tailored elective courses to expand students’ knowledge and experience of their primary major in the context of sustainability principles and frameworks.

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)

Students will work with their primary academic advisor and the Sustainability academic advisor to select electives in the theme relevant to their interests for a total of 7–10 credits. Students should discuss with Sustainability advisor to apply elective courses that may not be listed. In addition to the required credits, students must work with the Sustainability advisor to select elective courses relevant to their discipline and career path interests.

Minor Code: 871

Sustainability Undergraduate Major (BS, HBS)

Also available at OSU-Cascades and via Ecampus.

The Sustainability undergraduate major is a concurrent degree subject to Academic Regulation 26 (p. 22). This interdisciplinary double degree pairs well with all undergraduate majors.

OSU-Corvallis and Ecampus Contact
Agricultural and Life Sciences Building (ALS)

Email: matt.shinderman@osucascades.edu

Major Code: 870

- Apply principles and theories of ecological science to issues of concern in environmental science, such as loss of biodiversity and use of nonrenewable resources (scientific literacy). Applies to Degree and Minor students.
- Read and interpret graphs and data, and explain sources of uncertainty in scientific data and environmental model predictions (scientific literacy). Applies to Degree and Minor students.
- Demonstrate proficiency with sustainability assessment tools and their application to various human systems. Applies to Degree and Minor students.
- Interpret and apply available data and information to create sustainable solutions for desired future community/organizational conditions. Applies to Degree and Minor students.
- Communicate sustainability while collaborating with multiple audiences with diverse backgrounds and interests. Be able to write and talk with both experts and lay people about their special interest in sustainability. Applies to Sustainability Double Degree students only (not Minors).

All OSU undergraduate students may obtain a second degree in Sustainability by completing 32 credits in addition to the 180 credits required for one Bachelor degree, for a total of 212 credits. Post-baccalaureate students may obtain a degree in Sustainability by completing the requirements below and the requirements for a subsequent degree as outlined in Academic Regulation 26b (p. 22).

Courses in the major may be taken S/U.

**College of Business**

At the College of Business, we offer more than 25 business and design degrees and degree options with the support and insight of more than 185 area and national businesses. This means you — and your skills — are in demand in the job market when you graduate. We are committed to degree programs that focus on excellent career prospects, and we are committed to being a business school that understands the rapidly transforming business landscape.

We serve students through three locations in Oregon (Corvallis, Bend and Portland) as well as fully online. The virtual fourth campus, Ecampus, is among the top-ranked in the nation, and accessible to students all over the world.
Our accredited business programs and design programs will prepare you with the knowledge, skills and network you need to excel in the workplace.

We offer Bachelor of Arts (BA), Bachelor of Science (BS), Master of Business Administration (MBA), Master of Science in Business (MSB), and Doctor of Philosophy (Ph.D.). The undergraduate and graduate programs in business and the undergraduate program in accounting are all accredited by the Association to Advance Collegiate Schools of Business.

Accreditation
Our undergraduate and graduate business programs and our accounting program are accredited by AACSB International (https://www.aacsb.edu/accreditation/) - The Association to Advance Collegiate Schools of Business. Less than 5 percent of the more than 16,000 schools worldwide granting business degrees have earned AACSB Accreditation and only 1% separately accredit Accounting. To achieve accreditation, a business school must meet a broad range of quality standards and be committed to continuous improvement relating to curriculum, faculty credentials, admissions, degree requirements, information resources, research and scholarship.

High School Preparation
Students planning to enroll in the College of Business are recommended to complete the following high school courses: English, four years; mathematics, four years; history and social studies, three years; foreign language, two years; natural science, two years. In addition, competence in computer word processing, spreadsheet and database software is recommended.

Advising: Transfer Students
We've built transfer partnerships and pathways that support learning and degree completion for our students coming from community colleges, other four-year universities and well as those already in the workforce. We have dedicated, full-time professional academic advisors to support your smooth transfer to the College of Business, and we incorporate our nationally award-winning Blueprint curriculum into your coursework.

Minor Programs
No matter your true passion, there is a business side to every occupation — that is how the world works. As you are investing in your education and your future, we want you to think about the advantages that skills such as entrepreneurial thinking and business innovation can bring to your sphere of expertise — and how business fundamentals are an important part of any career, whether with a global corporation, expanding startup or local family business. We have multiple transcript-visible minors for both College of Business students and students majoring in other disciplines. Contact the College of Business Advising Office, Austin Hall 122, 541-737-3716 for information.

Experiential Learning and Blueprint
Business owners, entrepreneurs, inventors, leaders or community volunteers — you are all welcome here. In the College of Business, our goal is to empower and prepare you to succeed throughout college and into your career. Regardless of major, you'll develop professional skills like leadership, teamwork, critical thinking, decision-making and communication.

You'll also learn how to think like an entrepreneur and embrace innovation. That means learning to adapt to a challenging situation and to approach problems with a range of ideas. These are skills that will benefit you in any career.

Experiential learning provides opportunities to develop knowledge and skills through experiences both inside and outside the classroom. Along with running a microbusiness your first year, you will have access to internships, service-learning projects, undergraduate research, study abroad and other creative and professional work projects.

We have a master plan for you, quite literally, and it's called Blueprint (https://business.oregonstate.edu/blueprint/) — an award-winning series of classes focused on professional and leadership development and financial literacy. We keep you on track to graduate on time, with the skills and network to choose your career, and the savvy to make the big decisions at the right time.

The College of Business Blueprint is now recognized as a breakout success and national paradigm for best practices in education-to-career training.

Our awesome students become our awesome alumni: successful, plugged-in leaders who know how to navigate the world. You'll feel pride in joining our community from the moment you arrive.

The resources of the OSU Career Development Center (http://career.oregonstate.edu/) and College of Business Career Success Center (http://business.oregonstate.edu/careers/) are available to all students seeking information concerning career development and interviews with visiting firms.

The Arthur Stonehill International Business Exchange Program
The College of Business administers the largest college-administered international business exchange program in the state. This opportunity allows qualified students to study abroad in one of #13 carefully selected and approved programs. Successful completion of course work enables students to earn their option in International Business through this one term of study. A one-credit orientation class is required the term prior to departure, and a reflection paper is due upon return. All courses are taught in English and focus on various aspects of international finance, management, and marketing. Financial aid applies to most programs.

Austin Family Business Program
Maria Schell, Senior Director for Advancement
Since 1985, the College of Business has been a prominent resource for family enterprises in the region and the advisers that support their success. Students can earn a family business minor and a family business option within our business administration degree.

CENTER OF EXCELLENCE FOR BUSINESS ANALYTICS
Bin Zhu, Associate Professor
The Center of Excellence for Business Analytics connects businesses, professionals, students, and faculty with a mission to educate and to exchange ideas on gaining competitive advantages from data. We connect students with corporate-sponsored projects that provide opportunities for students to integrate and apply what they have learned from different classes, to practice communicating with clients/supervisors, and to develop solutions with real-world impact.
CENTER FOR ADVANCING FINANCIAL EDUCATION (OSU CAFE)
Kayleen Salchenberg, Program Manager

The Oregon State University Center for Advancing Financial Education (CAFE) works with students, their families and community members to promote financial literacy through research-based education and support to students at OSU and to communities across the state.

CENTER FOR THE ADVANCEMENT OF WOMEN IN leadership
Anne Sinkey, Program Manager

The Center for the Advancement of Women in Leadership empowers students, alumni, business professionals, corporations, and people of all genders with tools, education, and training to foster inclusiveness in the workplace.

CENTER OF EXCELLENCE FOR MARKETING AND CONSUMER INSIGHTS
Johnny Chen, Director

As a marketing research agency, the Center for Marketing and Consumer Insights (CMCI) delivers professional market research and consulting services that provide insight into markets, businesses, and today's consumers. Our teams are led by marketing faculty who mentor teams of students in the field and in the classroom - providing students with experiential learning opportunities that prepare them for marketing careers.

CENTER FOR supply chain excellence
Zhaohui Wu, Professor

The mission of The Center for Supply Chain Excellence is to be a leading source of knowledge creation and dissemination and experiential learning in supply chain and analytics. We connect students and faculty with industry-defined projects to incorporate real-world case analysis into the classroom experience.

InnovationX Program
Michelle Marie, Program Manager

InnovationX, the Center of Excellence for Innovation and Entrepreneurship, is Oregon State's hub for student entrepreneurs, innovators and change-makers. We provide the resources, education and community that can help students capture, share and test ideas and turn them into reality.

sales academy
Caitlyn Gill, Director

Our Sales Academy introduces sales fundamentals to students through hands-on workshops and sessions led by industry sponsors. Students are given the opportunity to interact and network with industry sales executives and participate in regional and nationwide sales competitions.

Continuing and Professional Education
Melanie Mitchell, Director

Learn. Upskill. Master. Transform your life through OSU College of Business' Continuing and Professional Education courses. Our wide variety of certificates cover topics such as digital marketing, human resources, lean six sigma and management. Take just one course, or a suite of courses to complete your certificate. This will give you the tools to stand out in your current role, a new role or a new career. You'll learn from experts in the field, who are on top of the latest advancements and best approaches for meeting the challenges of their area. We offer online certificates, Portland executive training and custom corporate training programs taught by College of Business faculty and industry experts. Available courses can be found online (https://business.oregonstate.edu/continuing-and-professional-education/).

Students wanting to earn a bachelor of arts degree in the College of Business will need to:

1. Demonstrate proficiency through the second year of a foreign language (foreign language is defined as completing the 213 level of that language with a C or better or getting a signed letter from the School of Language, Culture, and Society that states they have determined the student has that level of proficiency without needing the course work), and
2. Demonstrate cultural awareness by either:
   a. Completing 6 credits of upper-division course work focusing on the culture of regions that commonly use the foreign language in which the student is proficient, or
   b. Successfully complete a study abroad, global internship, or research experience of at least 10 weeks in a non-English speaking foreign country while enrolled at OSU. This experience must be clearly documented for audit purposes.

Academic and Professional Standards

The standards set forth below apply to all students enrolled in the College of Business and are in addition to those standards applicable to all students in the university. Students are responsible for satisfying these requirements.

Prerequisite Grade Requirements
A grade of C– or better is required for all classes within a College of Business degree program. A higher grade is required in some classes as noted in the catalog.

Academic Progression Standards

Academic progression standards specify the requirements a student must meet in order to graduate with a degree from the College of Business. OSU has minimum GPA standards. The College of Business has additional GPA requirements and standards. Students must satisfy both OSU and College of Business standards to earn their business degree. College requirements apply to minors unless stated otherwise.

The College of Business Progression Standards require that students:

- Achieve a minimum grade of C– or better in all classes used to complete their degree program.
- Maintain a minimum 2.5 GPA over all course work completed within their degree program.
- Complete over fifty percent of the degree program and discipline course work at OSU.
- Resolve all incomplete (I) grades in any classes within the degree program within one year, or prior to graduation, whichever occurs first.
• Make satisfactory progress toward the completion of the degree program in a timely fashion.

The College of Business degree program includes all College of Business classes (ACTG, BA, DSGN, FIN, MGMT, MRKT) taken for major and elective credit and non-College classes that are part of the degree requirements (see table below). Any course used to satisfy College of Business degree requirements must be taken using the A–F grade mode. The Satisfactory/Unsatisfactory (S/U) grade basis may not be used.

Transfer grades in College of Business degree program classes may be used to satisfy coursework requirements but are not used in the overall College of Business GPA calculation used to determine graduation. They are, however, used in the All Inclusive Business GPA. Thus, if a course is completed at OSU and must be repeated to earn a higher grade, then the course must be repeated at OSU for the grade to be included in the GPA calculation.

Lower-division classes (100–200 level) completed at any accredited college or university with a grade of C– or higher may be used to satisfy lower-division core requirements, but will not be included in the overall College of Business GPA calculation. These transfer courses will be used in the All Inclusive Business GPA.

Upper-division classes (300-level and above) completed with a grade of C– or higher at school(s) accredited by the Association to Advance Collegiate Schools of Business may be used to satisfy upper-division core and discipline-specific course work requirements, but will not be included in the overall College of Business GPA calculation. These transfer courses will be used in the All-Inclusive Business GPA.

General Statement on Professional Conduct and Academic Integrity

The Guiding Professional Standards for the College of Business Community, as a member of the College of Business community, you should strive to:

• treat others with honesty, respect, and courtesy;
• maintain the highest levels of academic integrity;
• act in accordance with ethical and social responsibilities;
• foster a professional learning environment; and
• act in a professional manner.

You are also expected to comply with the law as well as all university regulations and policies that apply to you. Those university policies include, but are not limited to, the University Student Conduct Regulations, the university's Discrimination and Harassment Policies and the university's Policy on Acceptable Use of Computing Resources. Failure to comply with these laws, regulations, and policies may result in the pursuit of disciplinary action by the college, as detailed further below.

College of Business Corrective Actions for Failure to Meet Academic or Professional Standards

The College of Business Corrective Actions govern the college's response to a student's failure to progress adequately academically in the college or a violation of the law or University regulations and policies that apply to the student, including the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university's Discrimination and Harassment Policies, or the university's Policy on Acceptable Use of Computing Resources. As is the case for all students, College of Business students are also subject to the University's Student Conduct Regulations and the procedures for enforcement of those regulations.
A failure by the student to progress adequately academically or a violation by the student of any of the college or university standards or policies listed in the above paragraph may result in the pursuit of one or more of the actions detailed below, including dismissal of the student from the college. The college will notify a student against whom it pursues such action with information about the effect of the action on the student’s status in the college and information regarding how the student may respond to or appeal the action.

A student against whom the college pursues such action will be issued one of the following notices, depending on the student’s academic status or the severity or frequency of the behavior resulting in the action:

**Warning For Academic and Professional Behavior**

‘Warning’ status is cautionary and is issued for one or more of the following academic reasons:

- Earning a ‘D’ or ‘F’ grade in a College of Business degree program class.
- A small deviation below the minimum 2.50 College of Business GPA requirement.
- Failure to complete College of Business degree program coursework in a timely fashion.

A warning may also be issued to identify student behavior, which may place a student’s enrollment status in the college at risk. The warning status may be removed following satisfactory resolution of behavioral concerns, as determined by the college.

**Probation for Academic and Professional Behavior**

If a student has larger deviations from the College of Business academic progression standards than those defined for a warning, or if the student continues to be out of compliance with any of the College of Business academic progression standards following a Warning, the student may be placed on probation and may be required to take specific action to correct the problem(s).

Student behavior that is a significant departure from the law, college or university regulations and policies that apply to the student may also result in ‘Probation’ status. Such behavior includes, but is not limited to, academic dishonesty, criminal violations, repeated or intentional violation of University policies, or significant breaches of the University Student Conduct Regulations, the University’s Policy on Discrimination and Harassment or the University’s Policy on Acceptable Use of Computing Resources.

A student on probation status must follow recommendations of the college in order to avoid suspension or dismissal. Students on probation status should meet with an advisor each term to review their progress and standing in the college until the probation status is removed. Students who successfully fulfill the recommendations will be removed from probation status. Students who fail to follow recommendations from advisors or are unsuccessful in correcting deficiencies will be placed on suspension and evaluated for dismissal from the college.

Probation may also be continued if a student is still out of compliance with academic or behavioral requirements but is taking steps to correct the problem(s) identified.

**Suspension for Academic and Professional Behavior**

A student may be placed on suspension and be evaluated for dismissal from the college if the student does not take steps to become compliant with the college’s academic progression standards (such as retaking a class the student has failed), or the student is not making adequate progress in correcting the student’s academic problems.

A student may be placed on suspension and evaluated for dismissal from the college if the student’s behavior is a sufficiently severe and significant departure from the law, college or university regulations and policies that apply to the student, or the student fails to constructively address previous behavioral concerns after college actions.

In the event of a second instance of academic dishonesty, the student will be suspended and evaluated for dismissal from the college.

A student placed on suspension status for academic or behavioral reasons will not be allowed to progress in the college.

**Dismissal from the College**

Students placed on suspension status will be evaluated for dismissal from the college. The college will review the student’s record, including any interim proof of progress. After review, the college may recommend immediate dismissal from the college, recommend that the student be continued on suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student’s suspension status. If a plan for progression is developed by the college, the student will be placed on probation status pending satisfactory progress.

If dismissed from the college, the student must wait a minimum of one term before reapplying for admission to the college and must meet current criteria for admissions to the college.

If the student was dismissed and later qualifies for readmission, and the college’s academic standards or requirements have changed since the student was last a College of Business major, the student will be subject to the more recent standards or requirements.

**Appeal of Academic or Corrective Status**

Students engaged in an appeal of their dismissal from the college will remain on suspension status pending resolution of their appeal.

1. Any student who wishes to challenge the student’s academic or corrective status at the college must submit an appeal in writing to the dean of the college within seven (7) calendar days following the issuance of a notice from the college identifying the student’s status. The request for an appeal must include specific justification, including errors, failure to consider all of the evidence presented, or any other action, including any new evidence not known at the time of the original meeting, that may change the outcome. The dean may refer the issue back to the college’s standing committee for review, if warranted. Following the review, the dean will notify the affected student of their decision by mail or email.

2. The student may appeal the dean’s decision to the Oregon State University Provost in writing within seven (7) calendar days following the issuance of a decision by the dean. The provost’s decision on the appeal is the university’s final decision.

Our faculty are committed professors and passionate mentors. They also
are corporate leaders, experienced entrepreneurs, industry experts and
renowned researchers. That means you’re learning the foundations of
business from the best. You’re sharing a classroom with thinkers who
are ahead of the curve and ahead of the very textbooks they use to teach (and may be updating in their spare time).

They run businesses, hold patents, practice law, speak several languages and publish in prestigious academic journals as well as well-known business magazines. They are committed to building a unique experience for your college journey. And they want you to achieve excellence.

**School Leadership**

The College of Business, responding to an increase in students, academic programs and student success services over the past years, has grown to include 138 research faculty and instructors. In light of this growth, we've announced the formation of three new schools.

The schools are designed to support faculty by providing additional research support, cross-disciplinary thought leadership and mentoring, and also professional development opportunities. We also aim to streamline communications between our growing faculty and college executives with this new leadership paradigm.

Each school is home to three academic programs and close to 1,500 students, allowing for increased attention on experiential learning opportunities within the school and across academic disciplines.

**School of Accounting, Finance, and IS**

**Senior Instructors** Lewis

**Accounting (ACTG)**

**ACTG 317, EXTERNAL REPORTING I, 4 Credits**

Examines the theory and practice of financial accounting, the processing and controls phases of the accounting system, and reporting to external parties. Emphasis is placed on the accounting cycle and financial statement structure and content. The emphasis on the accounting cycle includes the processing and tracing of transaction data from source documents to financial statements.  
**Prerequisite:** (BA 211 with C or better or BA 211H with C or better) and (BA 213 [C] or BA 213H [C])  
**Equivalent to:** BA 317

**ACTG 318, EXTERNAL REPORTING II, 4 Credits**

Continuation from ACTG 317 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.  
**Prerequisite:** ACTG 317 with C or better  
**Equivalent to:** BA 318

**ACTG 319, EXTERNAL REPORTING III, 4 Credits**

Continuation from ACTG 318 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.  
**Prerequisite:** ACTG 318 with C or better  
**Equivalent to:** BA 319

**ACTG 321, COST MANAGEMENT I, 4 Credits**

Reinforces and builds on the language and concepts of management accounting. Emphasizes different models for product costing and examines their effects on profit planning, budgeting, motivation, and control.  
**Prerequisite:** ACTG 317 with C or better  
**Equivalent to:** BA 321
ACTG 326, ACCOUNTING RESEARCH METHODS AND TOPICS, 2 Credits
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level, as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level, it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisite: ACTG 318 with C or better and (ACTG 378 [C] or ACTG 378H [C])

ACTG 378, ACCOUNTING INFORMATION MANAGEMENT, 4 Credits
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/rec.
Prerequisite: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 276 [C])
Equivalent to: ACTG 378H, BA 378

ACTG 378H, ACCOUNTING INFORMATION MANAGEMENT, 4 Credits
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 276 [C])
Equivalent to: ACTG 378

ACTG 379, ACCOUNTING ANALYTICS, 4 Credits
Covers the analysis of data as it pertains to accounting professionals. The focuses include analytic techniques for decision making and the examination of “big data” involving accounting information. Hands-on experiences will develop skills with select software tools used in data analytics for accounting professionals.
Prerequisite: ACTG 318 with C or better and (ACTG 378 [C] or ACTG 378H [C])

ACTG 405, READING & CONFERENCE, 1-6 Credits
This course is repeatable for 12 credits.

ACTG 414, FORENSIC ACCOUNTING, 2 Credits
Explores the forensic accountant’s role in today’s economy. Topics covered include fraud detection and fraud investigation techniques, valuation of closely held businesses, lost profits analyses, and various types of litigation support services. Fundamental legal concepts governing expert witness testimony are also examined, and students are required to quantify economic damages in cases.
Prerequisite: ACTG 319 with C or better

ACTG 415, GOVERNMENTAL AND NOT-FOR-PROFIT, 2 Credits
Introduction to accounting and financial reporting for governmental and not-for-profit organizations. Topics include state, local and federal governmental accounting, including fund accounting and reporting, and accounting for not-for-profit hospitals, universities, and health/welfare organizations.
Prerequisite: ACTG 319 with C or better

ACTG 416, ACCOUNTING RESEARCH AND ANALYSIS, 2 Credits
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisite: ACTG 319 with C or better

ACTG 417, ADVANCED ACCOUNTING, 4 Credits
An advanced course in financial accounting theory. Covers corporate combinations, consolidated financial statements, and government and not-for-profit accounting.
Prerequisite: ACTG 319 with C or better
Equivalent to: BA 417

ACTG 420, IT AUDITING, 4 Credits
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.
Prerequisite: (ACTG 319 with C or better or BA 372 with C or better) and (ACTG 378 [C])
Equivalent to: BA 420

ACTG 422, STRATEGIC COST MANAGEMENT, 4 Credits
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.
Prerequisite: ACTG 319 with C or better and ACTG 321 [C] and BA 357 [C]
Equivalent to: BA 422
ACTG 424, TAXATION I, 4 Credits
Covers concepts related to business taxation and focuses primarily on 1) basic income tax law as it relates to businesses, 2) the role of income taxes in decision making processes, and 3) basic income tax research. In addition, the course is intended to assist students in preparation to become a professional, and thus contains components designed to aid in the development of technical, analytical, problem-solving and communication skills.
Prerequisite: ACTG 319 with C or better
Equivalent to: ACTG 325

ACTG 425, ADVANCED TAXATION, 4 Credits
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.
Prerequisite: ACTG 424 with C or better

ACTG 427, ASSURANCE AND ATTESTATION SERVICES, 4 Credits
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.
Prerequisite: ACTG 319 with C or better
Equivalent to: BA 427
Available via Ecampus

ACTG 428, ADVANCED AUDIT ANALYTICS, 4 Credits
An advanced four-credit course covering audit theory, current audit practice and auditor professional skills. The equivalent of three credits (30 hours) relates to in-class activities, readings, presentations, research and group discussions of relevant advanced audit topics. The equivalent of one credit (10 hours) relates to understanding the use and future of data analytics in the audit profession. Theory, current audit practice and auditor professional skills.
Prerequisite: ACTG 427 with C or better

ACTG 429, TOPICS IN ACCOUNTING, 1-4 Credits
Analysis of current topics in accounting. Topics will vary from term to term.
Equivalent to: BA 429

ACTG 516, ACCOUNTING RESEARCH AND ANALYSIS, 3 Credits
Emphasis on financial accounting, tax and auditing research and analysis and communication of conclusions in the context of accounting case studies.

ACTG 517, ADVANCED ACCOUNTING, 4 Credits
An advanced course in financial accounting theory. Corporate combinations, consolidated financial statements, foreign operations and subsidiaries, partnerships, and sole proprietorships; contemporary issues in financial accounting.
Equivalent to: BA 517
Recommended: ACTG 319

ACTG 518, ACCOUNTING THEORY AND PRACTICE I, 3 Credits
Expands and integrates knowledge of US and international generally accepted accounting principles (GAAP) in a rigorous study of the design, selection, and consequences of various models of financial reporting.
Prerequisite: (ACTG 516 with C or better and ACTG 517 [C])

ACTG 519, ACCOUNTING THEORY AND PRACTICE II, 3 Credits
Study of the design, selection, and consequences of various models of financial reporting. Research accounting treatments for complex facts and circumstances with ambiguous accounting guidance. Build on financial reporting models to develop in-depth understanding and application of accounting practice.
Prerequisite: ACTG 518 with C or better

ACTG 520, IT AUDITING, 4 Credits
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.
Recommended: (ACTG 319 or BA 372) and ACTG 378

ACTG 522, STRATEGIC COST MANAGEMENT, 4 Credits
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.
Recommended: ACTG 319, ACTG 321 and BA 357

ACTG 524, INTRODUCTION TO TAXATION, 4 Credits
Meets two major objectives. First, it is a technical introduction to U.S. income tax with emphasis on general and business related topics. Second, it provides a framework for students to launch further study in the tax area. Students will be encouraged to supplement text materials with readings from the Internal Revenue Code and Regulations as well as secondary tax research services.
Prerequisite: BA 528 with C or better

ACTG 525, ADVANCED TAXATION, 4 Credits
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.
Recommended: ACTG 424
ACTG 527, ASSURANCE AND ATTESTATION SERVICES, 4 Credits
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.
Equivalent to: BA 527
Recommended: ACTG 319

ACTG 529, TOPICS IN ACCOUNTING, 1-4 Credits
Analysis of current topics in accounting. Topics will vary from term to term.
Equivalent to: BA 529

ACTG 620, FOUNDATIONS OF ACCOUNTING RESEARCH, 3 Credits
Introduces first-year doctoral students to accounting research by discussing the development of modern accounting theory, relating it to theories in economics and finance, and exposing students to the different areas of and methodologies used in accounting research. Also begins a survey of classic and contemporary literature in the area of financial accounting research. Specific financial accounting topics may change from quarter to quarter, but sample topics include earnings management, earnings quality, and voluntary disclosure.

ACTG 621, FINANCIAL ACCOUNTING RESEARCH, 3 Credits
Surveys classic and contemporary research in the area of financial accounting. Specific topics may change from quarter to quarter, but sample topics include the value relevance of accounting information, post earnings announcement drift, the residual income model, analysts’ use accounting information, and market-based assessments of the usefulness and limitations of alternative accounting measurements and disclosures.

ACTG 622, ACCOUNTING, JUDGMENT AND ACCOUNTABILITY, 3 Credits
Surveys classic and contemporary research in areas related to management, judgment, and accountability in accounting. Specific topics may change from quarter to quarter, but sample topics include research on management incentives and compensation, performance measurement, auditing, corporate governance, and research using behavioral methods.

ACTG 623, TAX RESEARCH, 3 Credits
Surveys classic and contemporary research in the area of taxation. Specific topics may change from quarter to quarter, but sample topics include tax vs. nontax costs in business decisions, book-tax differences, taxes and financial reporting, multijurisdictional tax issues, and tax avoidance.

Business Administration (BA)

BA 004, INTERNSHIP, 0 Credits
Provides basic personal and professional skills that can be used within and outside of a work setting. Through practice, this experience guides students in building and maintaining positive professional relationships, networking/mentoring relationships, and enhances students’ understanding of the connection between theory and practice in their respective disciplines.

BA 101, BUSINESS NOW, 6 Credits
Presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. Introduces theory and develops basic skills in the areas of management, finance, accounting and marketing. Lec/lab/rec.
Available via Ecampus

BA 140, FINANCIAL LITERACY FOR COLLEGE LIFE, 2 Credits
Helps you learn the fundamentals of personal finance. It is crucial you are prepared to be prudent managers of your financial resources, enabling you to achieve long- and short-term financial goals and security. In addition, this course will examine how your background experiences, values, goals, and decisions can impact your financial future.
Available via Ecampus

BA 150, EXPLORING ENTREPRENEURSHIP, 1 Credit
Participants are challenged with economic concepts and projects. Inspirational speakers address key topics concerning all aspects of business and leadership development. Students must be registered for Young Entrepreneurs Business Week Camp to receive credit for the course. Graded P/N.

BA 151, EXPLORING INVESTING, 1 Credit
Students participating in Investing Week will learn about basic investment vehicles and the principles of evaluating a potential investment. Students will also learn how to understand the financial market system and how it affects their personal and business life. Students will be assigned a role as a junior analyst with Toots, Toots and Peabody, and critically assess the benefits and strengths of individual investment vehicles. Graded P/N.

BA 152, EXPLORING SOCIAL ENTREPRENEURSHIP, 1 Credit
Provides an immersive experience regarding responsible business practices. In addition, from an entrepreneurial prospective, students have the opportunity to explore ways in which real social change is being conducted worldwide. Graded P/N.

BA 153, EXPLORING FINANCE, 1 Credit
Students will establish real world financial literacy in a business capacity. Through this course, students will complete a case study involving a business financial plan.

BA 154, EXPLORING MARKETING, 1 Credit
Students will understand the process of developing and executing a marketing plan in the context of a business model. Each student will participate in a Case Study conducting a small business-marketing plan.
BA 160, B-ENGAGED, 3 Credits
Understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Opportunity to connect with faculty and peers with common interests in a supportive learning environment.
Equivalent to: BA 160H, BA 163
Available via Ecampus

BA 160H, B-ENGAGED, 3 Credits
Understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Opportunity to connect with faculty and peers with common interests in a supportive learning environment.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 160, BA 160H

BA 161, INNOVATION NATION-- AWARENESS TO ACTION, 3 Credits
First course in a two-course sequence. Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Builds a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career.
Equivalent to: BA 161H, BA 167

BA 161H, INNOVATION NATION-- AWARENESS TO ACTION, 3 Credits
First course in a two-course sequence. Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Builds a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 161, BA 161H

BA 162, INNOVATION NATION--IDEAS TO REALITY, 3 Credits
Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market.
Prerequisite: BA 161 with C- or better or BA 161H with C- or better
Equivalent to: BA 162H, BA 168

BA 162H, INNOVATION NATION--IDEAS TO REALITY, 3 Credits
Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market.
Attributes: HNRS – Honors Course Designator
Prerequisite: BA 161 with C- or better or BA 161H with C- or better
Equivalent to: BA 162, BA 168

BA 163, B-ENGAGED, 3 Credits
The first term is a critical time for college students. B-Engaged helps the student transition to the OSU academic community and college learning expectations. B-Engaged will help the student understand and accomplish college-level academic work and explore OSU resources and options that will enhance their college experience and success. Additionally, B-Engaged is the student's opportunity to connect with a faculty member and peers with common interests in a supportive learning environment.
Equivalent to: BA 160, BA 160H

BA 167, LAUNCH PAD I, 3 Credits
Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Focused on building a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career. BA 167/BA 168 presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. The series introduces theory and develops basic skills in the areas of management, finance, accounting, and marketing. Departmental approval required.
Equivalent to: BA 161, BA 161H

BA 168, LAUNCH PAD II, 3 Credits
Continues the conversation on self-management, focused on building a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career. BA 167/BA 168 presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. The series introduces theory and develops basic skills in the areas of management, finance, accounting, and marketing. Departmental approval required.
Equivalent to: BA 162, BA 162H

BA 162 – BA 184 is a series of three one-credit courses taken during a student’s first year. These courses, along with the respective 2nd to 4th year one-credit courses, are designed to help the student navigate college successfully and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the first-year series provides incoming first-year students with the skills to be successful during college. BA 182 covers personal development skills; BA 183 covers professional development skills; and BA 184 covers leadership development skills.
BA 183, FIRST YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT II, 1 Credit

BA182 – BA184 is a series of three one-credit courses taken during a student's first year. These courses, along with the respective 2nd to 4th year one-credit courses, are designed to help the student navigate college successfully and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the first-year series provides incoming first-year students with the skills to be successful during college. BA 182 covers personal development skills; BA 183 covers professional development skills; and BA 184 covers leadership development skills.

BA 184, FIRST YEAR PERSONAL PROFESSIONAL LEADERSHIP DEVELOPMENT III, 1 Credit

BA 182 – BA 184 is a series of three one-credit courses taken during a student's first year. These courses along with the respective 2nd to 4th year one-credit courses are designed to help the student navigate college successfully and develop lifelong skills that are practical, meaningful, and useful. These courses revolve around personal, professional and leadership development, and the first-year series provides incoming first-year students with the skills to be successful during college. BA 182 covers personal development skills; BA 183 covers professional development skills; and BA 184 covers leadership development skills.

BA 199, SPECIAL STUDIES, 1-6 Credits

Graded P/N.

This course is repeatable for 12 credits.

BA 210, INTERNSHIP, 1-6 Credits

Planned and supervised work experience at selected cooperating business firms. Supplementary training, conference, reports, and appraisals. Graded P/N.

This course is repeatable for 16 credits.

BA 211, FINANCIAL ACCOUNTING, 4 Credits

Accounting information from the perspective of external users, principally investors and creditors. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, and asset valuation.

Prerequisite: (MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better) or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 60

Equivalent to: BA 211H

Available via Ecampus

BA 211H, FINANCIAL ACCOUNTING, 4 Credits

Accounting information from the perspective of external users, principally investors and creditors. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, and asset valuation.

Attributes: HNRS – Honors Course Designator

Prerequisite: MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 60

Equivalent to: BA 211

BA 213, MANAGERIAL ACCOUNTING, 4 Credits

Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control.

Prerequisite: BA 211 with C- or better or BA 211H with C- or better

Equivalent to: BA 213H

Available via Ecampus

BA 213H, MANAGERIAL ACCOUNTING, 4 Credits

Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control.

Attributes: HNRS – Honors Course Designator

Prerequisite: BA 211 with C- or better or BA 211H with C- or better

Equivalent to: BA 213

BA 223, PRINCIPLES OF MARKETING, 4 Credits

Covers concepts and principles used by marketing professionals. Designed explicitly for business majors, it’s an introduction to the relationships between customers, products, and companies in a competitive and dynamically evolving marketplace.

Prerequisite: ECON 201 with C- or better or ECON 201H with C- or better

Equivalent to: BA 223H, BA 390, BA 390H

BA 223H, PRINCIPLES OF MARKETING, 4 Credits

Covers concepts and principles used by marketing professionals. Designed explicitly for business majors, it’s an introduction to the relationships between customers, products, and companies in a competitive and dynamically evolving marketplace.

Attributes: HNRS – Honors Course Designator

Prerequisite: ECON 201 with C- or better or ECON 201H with C- or better

Equivalent to: BA 223, BA 390, BA 390H

BA 230, BUSINESS LAW I, 4 Credits

Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.

Equivalent to: BA 230H, BA 330

Available via Ecampus
BA 230H, BUSINESS LAW I, 4 Credits
Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 230

BA 240, FINANCE, 4 Credits
Introduces basic tools of finance and applications of financial theory in use today. These tools include rates of return, the time value of money, those that can be applied to capital budgeting decisions, and the logic and fundamentals of financial statements. It is designed to enhance a student's approach to financial decision-making and emphasizes quantitative approaches to decision making. This course will also introduce students to equity and debt markets and securities, and serves as a stepping stone to advanced courses in finance.
Prerequisite: (BA 211 with C- or better or BA 211H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 240H, BA 360, BA 360H

BA 240H, FINANCE, 4 Credits
Introduces basic tools of finance and applications of financial theory in use today. These tools include rates of return, the time value of money, those that can be applied to capital budgeting decisions, and the logic and fundamentals of financial statements. It is designed to enhance a student's approach to financial decision-making and emphasizes quantitative approaches to decision making. This course will also introduce students to equity and debt markets and securities, and serves as a stepping stone to advanced courses in finance.
Attributes: HNRS – Honors Course Designator
Prerequisite: (BA 211 with C- or better or BA 211H with C- or better) and (ECON 201 [C-] or ECON 201H [C-])
Equivalent to: BA 240, BA 360, BA 360H

BA 253, PROFESSIONAL DEVELOPMENT, 4 Credits
Designed to improve the ability of students to describe their accomplishments and sell their ideas in situations like professional networking, company meetings, response to proposals for services, and interviews. It teaches writing skills and workplace integration for new jobs. Particular emphasis is put on verbal communication and preparation for verbal communication. Students will learn to create career plans that require them to research career options and potential employers, and prepare a developmental roadmap that will lead them to success within the chosen profession.
Attributes: HNRS – Honors Course Designator
Prerequisite: (BA 101 with C- or better or BA 162 with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-])
Equivalent to: BA 253, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253

BA 253H, PROFESSIONAL DEVELOPMENT, 4 Credits
Designed to improve the ability of students to describe their accomplishments and sell their ideas in situations like professional networking, company meetings, response to proposals for services, and interviews. It teaches writing skills and workplace integration for new jobs. Particular emphasis is put on verbal communication and preparation for verbal communication. Students will learn to create career plans that require them to research career options and potential employers, and prepare a developmental roadmap that will lead them to success within the chosen profession.
Attributes: HNRS – Honors Course Designator
Prerequisite: (BA 101 with C- or better or BA 162 with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-])
Equivalent to: BA 253, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253

BA 260, INTRODUCTION TO ENTREPRENEURSHIP, 4 Credits
Topics include evaluating entrepreneurial capabilities, creativity, business plan creation, opportunity assessment and feasibility analysis, business implementation, new product introduction, and seeking funds.
Equivalent to: BA 260H
Available via Ecampus

BA 260H, INTRODUCTION TO ENTREPRENEURSHIP, 4 Credits
Topics include evaluating entrepreneurial capabilities, creativity, business plan creation, opportunity assessment and feasibility analysis, business implementation, new product introduction, and seeking funds.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 260

BA 270, BUSINESS PROCESS MANAGEMENT, 4 Credits
Introduces and integrates some core concepts from Operations Management (OM) and Business Information System (BIS) disciplines by introducing a process-oriented view of the flows of materials, information, products and services through and across organizational functions. Helps students to: identify information-bearing events and actors, model and analyze business processes, assess and improve process efficiency, recognize probabilistic components of business processes and understand the interactions between human behavior and process design. Hands-on, case-based assignments allow for practicing some principles and concepts addressed in the course.
Prerequisite: BA 275 with C- or better or BA 275H with C- or better
Equivalent to: BA 270H, BA 302, BA 302H
Available via Ecampus

**BA 270H, BUSINESS PROCESS MANAGEMENT, 4 Credits**
Introduces and integrates some core concepts from Operations Management (OM) and Business Information System (BIS) disciplines by introducing a process-oriented view of the flows of materials, information, products and services through and across organizational functions. Helps students to: identify information-bearing events and actors, model and analyze business processes, assess and improve process efficiency, recognize probabilistic components of business processes and understand the interactions between human behavior and process design. Hands-on, case-based assignments allow for practicing some principles and concepts addressed in the course.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** BA 275 with C- or better or BA 275H with C- or better

**Equivalent to:** BA 270, BA 302, BA 302H

---

**BA 272, BUSINESS APPLICATION DEVELOPMENT, 4 Credits**
Introduction to business computer programming. Beginning computer programming skills and concepts for scripting and console applications using the Python programming language. Available via Ecampus

---

**BA 275, FOUNDATIONS OF STATISTICAL INFERENCE, 4 Credits**
An introductory course on statistical inference with an emphasis on business applications. Coverage includes descriptive statistics, random variables, probability distributions, sampling and sampling distributions, statistical inference for means and proportions using one and two samples, and linear regression analysis.

**Prerequisite:** MTH 111 with C- or better or MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or Math Placement - ALEKS with a score of 046

**Equivalent to:** BA 275H, BA 276

Available via Ecampus

---

**BA 275H, FOUNDATIONS OF STATISTICAL INFERENCE, 4 Credits**
An introductory course on statistical inference with an emphasis on business applications. Coverage includes descriptive statistics, random variables, probability distributions, sampling and sampling distributions, statistical inference for means and proportions using one and two samples, and linear regression analysis.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** MTH 241 with C- or better or MTH 251 with C- or better or MTH 251H with C- or better or Math Placement - ALEKS with a score of 046

**Equivalent to:** BA 275, BA 276

---

**BA 280, BUSINESS INSIGHTS, 2 Credits**
Connect with faculty and peers and explore OSU resources designed to enhance your college experience and success. Engage in professional development activities and cultivate the soft skills employers are looking for in their future employees.

**Equivalent to:** BA 170
Available via Ecampus

---

**BA 281, PROFESSIONAL DEVELOPMENT, 3 Credits**
Designed to give students an early start on the process of career planning and development. The process involves thoughtful self-assessment, career exploration, planning and follow-through with preliminary employment strategies.

**Equivalent to:** BA 253, BA 253H, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253
Available via Ecampus

---

**BA 281H, PROFESSIONAL DEVELOPMENT, 3 Credits**
Designed to give students an early start on the process of career planning and development. The process involves thoughtful self-assessment, career exploration, planning and follow-through with preliminary employment strategies.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** BA 253, BA 253H, BA 281, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253

---

**BA 282, DRAFTING YOUR CAREER BLUEPRINT, 1 Credit**
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include characteristics of exemplary leadership, analyzing own strengths and talents, and developing a plan for strengthening leadership capacity.

**Equivalent to:** DSGN 282
Available via Ecampus

---

**BA 283, CREATIVITY, CULTURE, AND THE WORKPLACE, 1 Credit**
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include exploration of students’ unique talents; understanding of how teams as well as organizations can benefit from diverse and inclusive communities.

**Equivalent to:** DSGN 283
Available via Ecampus

---

**BA 284, FOUNDATIONS OF PERSONAL FINANCE I, 1 Credit**
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. First of four courses dedicated to the foundations of personal finances. Topics include basics of personal finances and resources available; setting academic plan; setting strategic financial goals; budgeting.

**Equivalent to:** DSGN 284
Available via Ecampus

---

**BA 290, INTRODUCTION TO CAREERS IN MARKETING, 3 Credits**
Explores marketing through the perspectives of current marketing professionals. Introductory language and principles of marketing are introduced and examined through real world examples. Presents various careers within marketing.

Available via Ecampus
BA 291, BLUEPRINT - TRANSFER TRANSITIONS - SECOND YEAR FALL EXTERNAL, 4 Credits
Customized entry course for transfer students that provides a 'welcome to OSU and the College of Business' component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis. Appropriate for second year external transfer students matriculating to the College in the Fall term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 382, BA 384, BA 385, DSGN 253

BA 292, BLUEPRINT - TRANSFER TRANSITIONS - SECOND YR WINTER EXTERNAL, 4 Credits
Customized entry course for transfer students that provides a 'welcome to OSU and the College of Business' component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis. Appropriate for second year external transfer students matriculating to the College in the Winter term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253

BA 293, BLUEPRINT-TRANSFER TRANSITIONS-SECOND YEAR SPRING EXTERNAL, 4 Credits
Customized entry course for transfer students that provides a 'welcome to the College of Business' component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture. Appropriate for second year external transfer students matriculating to the College in the Spring term.

BA 294, BLUEPRINT - TRANSFER TRANSITIONS - SECOND YEAR FALL INTERNAL, 4 Credits
Customized entry course for transfer students that provides a 'welcome to the College of Business' component, and Professional Development content, including business writing and verbal communication. Appropriate for second year internal transfer students matriculating to the College in the Fall term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253

BA 295, BLUEPRINT - TRANSFER TRANSITIONS - SECOND YR WINTER INTERNAL, 4 Credits
Customized entry course for transfer students that provides a 'welcome to the College of Business' component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis. Appropriate for second year internal transfer students matriculating to the College in the Winter term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 353, BA 381, BA 382, BA 384, BA 385, DSGN 253

BA 296, BLUEPRINT-TRANSFER TRANSITIONS-SECOND YEAR SPRING INTERNAL, 4 Credits
Customized entry course for transfer students that provides a 'welcome to the College of Business' component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture. Appropriate for second year internal transfer students matriculating to the College in the Spring term.

BA 302, BUSINESS PROCESS MANAGEMENT, 4 Credits
Integrates core concepts from Business Information Systems (BIS) with those of Operations Management and introduces a process-oriented view of the flows of materials, information and services through and across organizations. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. Hands-on, case-based assignments and labs allow students to practice the principles addressed.
Prerequisite: BA 275 with C- or better or BA 276 with C- or better
Equivalent to: BA 270, BA 270H, BA 302H

BA 302H, BUSINESS PROCESS MANAGEMENT, 4 Credits
Integrates core concepts from Business Information Systems (BIS) with those of Operations Management and introduces a process-oriented view of the flows of materials, information and services through and across organizations. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. Hands-on, case-based assignments and labs allow students to practice the principles addressed.
Prerequisite: BA 275 with C- or better or BA 276 with C- or better
Equivalent to: BA 270, BA 270H, BA 302

BA 311, FRAMING YOUR CAREER PLAN, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Course topics are designed to help the student explore different types of business communications and how to effectively communicate their ideas in a variety of methods.
Equivalent to: DSGN 311
Available via Ecampus

BA 312, FOUNDATIONS OF PERSONAL FINANCE II, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. The second of a four course series in Blueprint that is dedicated to the foundations of personal finances for life here at OSU.
Equivalent to: DSGN 312
Available via Ecampus
BA 313, THE ORANGE AND BLACK CASE COMPETITION, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include leadership practices; business ethics case competition.
Prerequisite: (BA 260 with C- or better or BA 260H with C- or better) and (BA 213 [C-] or BA 213H [C-])
Equivalent to: DSGN 313
Available via Ecampus

BA 314, SUSTAINABLE BUSINESS OPERATIONS, 4 Credits
Operations are the processes by which an organization transforms inputs (e.g., labor, material, and knowledge) into outputs (products and services). Operations managers are responsible for designing, running and improving the processes and systems to efficiently accomplish this for production or service businesses. This course focuses on the concepts and tools employed by operations managers to provide their organization a competitive advantage. Topics include statistical tools and quantitative methods (descriptive statistics, probabilities, sampling, interval estimation and hypothesis testing) and operations management concepts (strategies, forecasting, process design, capacity utilization, quality systems, supply chain management, inventory management, resource planning, sustainability and lean systems.)
Available via Ecampus

BA 315, ACCOUNTING FOR DECISION MAKING, 4 Credits
Looks at how the accounting model reflects business transactions and events. Students are introduced to both financial and managerial accounting and the creation, interpretation, and analysis of financial statements. In addition, students obtain an understanding of the determination, organization, and management of costs and revenues including management decisions based upon this information.
Equivalent to: BA 215
Recommended: Third-year (junior) standing
Available via Ecampus

BA 330, LEGAL ENVIRONMENT OF BUSINESS, 4 Credits
Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.
Equivalent to: BA 230, BA 230H
Recommended: Third-year (junior) standing
Available via Ecampus

BA 347, INTERNATIONAL BUSINESS, 4 Credits
Integrated view of international business including current patterns of international business, socioeconomic and geopolitical systems within countries as they affect the conduct of business, major theories explaining international business transactions, financial forms and institutions that facilitate international transactions, and the interface between nation states and the firms conducting foreign business activities.
Prerequisite: (ECON 202 with C- or better or ECON 202H with C- or better) and (BA 230 [C-] or BA 230H [C-] or BA 330 [C-])
Equivalent to: BA 347H
Available via Ecampus

BA 347H, INTERNATIONAL BUSINESS, 4 Credits
Integrated view of international business including current patterns of international business, socioeconomic and geopolitical systems within countries as they affect the conduct of business, major theories explaining international business transactions, financial forms and institutions that facilitate international transactions, and the interface between nation states and the firms conducting foreign business activities.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ECON 202 with C- or better or ECON 202H with C- or better) and (BA 230 [C-] or BA 230H [C-] or BA 330 [C-])
Available via Ecampus

BA 348, INTERNATIONAL EXCHANGE ORIENTATION, 1 Credit
Consists of large-group sessions as well as small-group break-out sessions for each country individually. It is vital to attend all sessions as valuable information pertaining to your study abroad opportunity will be presented. Graded P/N.

BA 349, IMPACT OF CULTURE ON BUSINESS, 1 Credit
A requirement of all students participating in a College of Business-approved international exchange program and for completing the College of Business International Business option. The major emphasis is for students to reflect on their experience while studying, living and traveling in a foreign culture and for them to determine how the foreign culture impacts how they would conduct business in that country. Graded P/N.

BA 351, MANAGING ORGANIZATIONS, 4 Credits
A systems perspective to understanding the management functions of planning, organizing, leading and controlling. Ethical and diversity issues are addressed as they are relevant in entrepreneurial and established ventures.
Available via Ecampus
**BA 352, MANAGING INDIVIDUAL AND TEAM PERFORMANCE, 4 Credits**
Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course.

**Prerequisite:** (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])

**Equivalent to:** BA 352H

**Available via Ecampus**

**BA 352H, MANAGING INDIVIDUAL AND TEAM PERFORMANCE, 4 Credits**
Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])

**Equivalent to:** BA 352

**BA 354, MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY, 4 Credits**
Introduces contemporary issues that business professionals face making ethical and socially responsible decisions in an increasingly fast-paced, transparent, and global environment. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisite:** (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])

**Equivalent to:** BA 354H, MGMT 459

**Available via Ecampus**

**BA 354H, MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY, 4 Credits**
Introduces contemporary issues that business professionals face making ethical and socially responsible decisions in an increasingly fast-paced, transparent, and global environment. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC; HNRS – Honors Course Designator

**Prerequisite:** (COMM 111 with C- or better or COMM 111H with C- or better or COMM 114 with C- or better or COMM 114H with C- or better or COMM 218 with C- or better or COMM 218H with C- or better) and (WR 222 [C-] or WR 323 [C-] or WR 327 [C-] or WR 327H [C-] or HC 199 [C-])

**Equivalent to:** BA 354, MGMT 459

**BA 357, OPERATIONS MANAGEMENT, 4 Credits**
Provides an overview of the functional activities necessary for the creation/delivery of goods and services. Topics covered include: productivity; strategy in a global business environment; project management; quality management; location and layout strategies; supply chain and inventory management; material requirements planning; JIT; work-place safety; maintenance and reliability; sourcing and sustainability.

**Prerequisite:** (BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better) and (BA 270 [C-] or BA 270H [C-] or BA 302 [C-] or BA 302H [C-])

**Equivalent to:** BA 357H

**Available via Ecampus**

**BA 357H, OPERATIONS MANAGEMENT, 4 Credits**
Provides an overview of the functional activities necessary for the creation/delivery of goods and services. Topics covered include: productivity; strategy in a global business environment; project management; quality management; location and layout strategies; supply chain and inventory management; material requirements planning; JIT; work-place safety; maintenance and reliability; sourcing and sustainability.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better and (BA 270 [C-] or BA 270H [C-] or BA 302 [C-] or BA 302H [C-])

**Equivalent to:** BA 357

**BA 360, INTRODUCTION TO FINANCIAL MANAGEMENT, 4 Credits**
Explores the issues facing a financial manager in new business ventures, small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations.

**Prerequisite:** (BA 211 with C- or better or BA 211H with C- or better) or (BA 215 with C- or better or BA 215H with C- or better) or BA 315 with C- or better and (ECON 201 with C- or better or ECON 201H with C- or better) or (AEC 250 with C- or better or AEC 250H with C- or better) or (AEC 251 with C- or better)

**Equivalent to:** BA 240, BA 240H, BA 360H

**Available via Ecampus**
BA 360H, INTRODUCTION TO FINANCIAL MANAGEMENT, 4 Credits
Explore the issues facing a financial manager in new business ventures, small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations.
Attributes: HNRS – Honors Course Designator
Prerequisite: ((BA 211 with C- or better or BA 211H with C- or better) or (BA 215 with C- or better or BA 215H with C- or better) or BA 315 with C- or better) and ((ECON 201 with C- or better or ECON 201H with C- or better) or (AEC 250 with C- or better or AEC 250H with C- or better) or AEC 251 with C- or better)
Equivalent to: BA 240, BA 240H, BA 360

BA 362, SOCIAL ENTREPRENEURSHIP AND SOCIAL INITIATIVES, 4 Credits
The core concepts of entrepreneurship, using entrepreneurship to craft innovative responses to social problems. Entrepreneurial skills are as valuable in the social sector as they are in business. Includes both profit and non-profit firms that have programs designed to create social value.

BA 363, TECHNOLOGY AND INNOVATION MANAGEMENT, 4 Credits
Introduces students to the fundamentals of managing innovation and technology toward the production of intellectual assets; how innovations are created, evaluated and leveraged within business strategy; and how innovation is managed within various business environments.
Available via Ecampus

BA 365, FAMILY BUSINESS MANAGEMENT, 4 Credits
Focuses on the opportunities and the problems characteristic of family businesses: entrepreneurship, management succession, transfer of ownership, mixing family and business roles, family conflicts, personnel issues, non-family employees, and outside advisors.
Available via Ecampus

BA 367, LAUNCH ACADEMY, 3 Credits
The Oregon State Launch Academy is an incubator for student entrepreneurs who want to be immersed in an innovative, high-energy environment that promotes the creation, evolution and implementation of business ideas. Launch Academy students earn academic credit for working on their businesses and have access to seed funding, prototyping equipment, co-working space, mentoring and training to help them advance their ideas. Launch Academy students learn about developing new products or services, marketing their ideas, building teams and securing funding, among other critical elements of entrepreneurial success.
Available via Ecampus

BA 368, ADVANCED LAUNCH ACADEMY, 1-3 Credits
The Oregon State Launch Academy is an incubator for student entrepreneurs who want to be immersed in an innovative, high-energy environment that promotes the creation, evolution and implementation of business ideas. Launch Academy students earn academic credit for working on their businesses and have access to seed funding, prototyping equipment, co-working space, mentoring and training to help them advance their ideas. In BA 368 Advanced Launch Academy students/teams will receive coaching from the instructor to move their business ideas forward. Students will secure and engage mentors, complete and test prototypes of their ideas, market their ideas, and prepare to secure funding for their ideas. Graded P/N.
Prerequisite: BA 367 with C- or better
This course is repeatable for 12 credits.

BA 370, BUSINESS INFORMATION SYSTEMS OVERVIEW, 4 Credits
Introduce students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, and the development and implementation of information systems. Use relational database models to design a real-world case study.
Prerequisite: BA 270 with C- or better or BA 270H with C- or better or BA 302 with C- or better
Equivalent to: BA 370H
Available via Ecampus

BA 370H, BUSINESS INFORMATION SYSTEMS OVERVIEW, 4 Credits
Introduce students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, and the development and implementation of information systems. Use relational database models to design a real-world case study.
Attributes: HNRS – Honors Course Designator
Prerequisite: BA 270 with C- or better or BA 270H with C- or better or BA 302 with C- or better
Equivalent to: BA 370

BA 371, BUSINESS DATA MANAGEMENT, 4 Credits
Exploration of business data management technologies including but not limited to relational database modeling, data retrieval, database triggers and stored procedures, NoSQL databases, programmatic database querying.
Prerequisite: BA 272 with C- or better and (ACTG 378 [C-] or ACTG 378H [C-] or BA 370 [C-] or BA 370H [C-])
BA 372, BUSINESS INFORMATION SYSTEMS DESIGN AND DEVELOPMENT, 4 Credits
Logical and physical design of computer-based information systems; tools and techniques that underlie the design processes. Design of an enterprise information system with CASE tools. Alternative approaches to systems design with emphasis on object-orientation. Lec/rec.
Prerequisite: BA 272 with C- or better and (ACTG 378 [C-] or ACTG 378H [C-] or BA 370 [C-] or BA 370H [C-])
Recommended: BA 371

BA 375, APPLIED QUANTITATIVE METHODS, 4 Credits
Introduces students to the basics of data science and data analytics for handling of large-scale databases. It provides an overview of the main data-analytic techniques and topics including data visualization, linear and nonlinear regression analysis, time series analysis and forecasting, classification, and clustering methods.
Prerequisite: BA 275 with C- or better or BA 275H with C- or better
Equivalent to: BA 375H
Available via Ecampus

BA 375H, APPLIED QUANTITATIVE METHODS, 4 Credits
Introduces students to the basics of data science and data analytics for handling of large-scale databases. It provides an overview of the main data-analytic techniques and topics including data visualization, linear and nonlinear regression analysis, time series analysis and forecasting, classification, and clustering methods.
Attributes: HNRS – Honors Course Designator
Prerequisite: BA 275 with C- or better or BA 275H with C- or better
Equivalent to: BA 375

BA 381, PERSONAL AND PROFESSIONAL DEVELOPMENT, 4 Credits
Designed to help students transition to the OSU and COB communities, identify and employ academic success strategies, and start the process of career planning and development. Teaches students how to set financial goals.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 382, BA 384, BA 385, DSGN 253
Available via Ecampus

BA 382, BLUEPRINT-TRANSFER TRANSITIONS - THIRD YR WINTER EXTERNAL, 4 Credits
Customized entry course for transfer students that provides a ‘welcome to OSU and College of Business’ component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture; Map to Graduation; Paying for College; Managing Professional Career Opportunities and Personal Fit. Appropriate for third year external transfer students matriculating to the College in the Winter term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 384, BA 385, DSGN 253

BA 383, BLUEPRINT-TRANSFER TRANSITIONS-THIRD YEAR SPRING EXTERNAL, 4 Credits
Customized entry course for transfer students that provides a ‘welcome to the College of Business’ component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture; Map to Graduation; Paying for College; Managing Professional Career Opportunities and Personal Fit; Investing, Taxes, Credit/Banking. Appropriate for third year external transfer students matriculating to the College in the Spring term.

BA 384, BLUEPRINT-TRANSFER TRANSITIONS - THIRD YEAR FALL INTERNAL, 4 Credits
Customized entry course for transfer students that provides a ‘welcome to the College of Business’ component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture; Map to Graduation; and Paying for College. Appropriate for third year internal transfer students matriculating to the College in the Fall term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 385, DSGN 253

BA 385, BLUEPRINT-TRANSFER TRANSITIONS - THIRD YR WINTER INTERNAL, 4 Credits
Customized entry course for transfer students that provides a ‘welcome to the College of Business’ component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture; Map to Graduation; Paying for College; Managing Professional Career Opportunities and Personal Fit. Appropriate for third year internal transfer students matriculating to the College in the Winter term.
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, DSGN 253

BA 386, BLUEPRINT-TRANSFER TRANSITIONS-THIRD YEAR SPRING INTERNAL, 4 Credits
Customized entry course for transfer students that provides a ‘welcome to the College of Business’ component, and Professional Development content, including business writing and verbal communication; CliftonStrengths; Gap Analysis; Corporate Culture; Map to Graduation; Paying for College; Managing Professional Career Opportunities and Personal Fit; Investing, Taxes, Credit/Banking. Appropriate for third year internal transfer students matriculating to the College in the Spring term.
BA 390, PRINCIPLES OF MARKETING, 4 Credits
Explores consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Develops an understanding of distribution processes, marketing problems, and marketing principles. 
Prerequisite: ECON 201 with C- or better or ECON 201H with C- or better or AREC 250 with C- or better or AEC 250 with C- or better or AEC 251 with C- or better 
Equivalent to: BA 223, BA 223H, BA 390H
Available via Ecampus

BA 390H, PRINCIPLES OF MARKETING, 4 Credits
Explores consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Develops an understanding of distribution processes, marketing problems, and marketing principles. 
Attributes: HNRS – Honors Course Designator
Prerequisite: ECON 201 with C- or better or ECON 201H with C- or better or AREC 250 with C- or better or AEC 250 with C- or better or AEC 251 with C- or better 
Equivalent to: BA 223, BA 223H, BA 390

BA 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

BA 405, READING AND CONFERENCE, 1-16 Credits
Supervised individual work in some field of special application and interest. Subjects chosen must be approved by professor in charge. 
This course is repeatable for 16 credits.

BA 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits. 
Available via Ecampus

BA 407, SEMINAR, 1-16 Credits
Equivalent to: BA 407H
This course is repeatable for 16 credits. 

BA 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator 
Equivalent to: BA 407
This course is repeatable for 16 credits.

BA 410, BUSINESS INTERNSHIP, 1-12 Credits
Planned and supervised work experience at selected cooperating business firms. Supplementary training, conference, reports, and appraisals. Graded P/N. 
This course is repeatable for 16 credits. 
Available via Ecampus

BA 411, NAVIGATING YOUR WORKPLACE, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Builds a foundation of financial planning, offering students the tools to successfully manage their career pathways. Topics include: analyzing job offers and benefits packages, negotiating a job’s salary/benefits, strategizing the first 90 days on the job, and advocating for opportunities at work. 
Equivalent to: DSGN 411
Available via Ecampus

BA 412, FINANCIAL PLANNING I, 1 Credit
Part of Blueprint – a 12-course professional development course series to guide the student from college to career. Continues to build a foundation of financial planning, offering students the tools to successfully prepare for future wealth. Topics include: budgeting for life after graduation, planning for new earnings and income, saving for your future self, and keeping your money and yourself secure. 
Equivalent to: DSGN 412
Available via Ecampus

BA 413, FINANCIAL PLANNING II, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Fourth of four courses dedicated to the foundations of professional financial planning so the student can have the tools needed to successfully manage their career pathway. 
Equivalent to: DSGN 413
Available via Ecampus

BA 432, *ENVIRONMENTAL LAW, SUSTAINABILITY AND BUSINESS, 3 Credits
Explores fundamental business, legal, and policy issues raised by environmental law, sustainable business practices, and clean energy policies, and their impact on business and management practices. 
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

BA 447, TOPICS IN INTERNATIONAL BUSINESS, 1-4 Credits
Analysis of current topics in international business. Topics will vary from term to term. 
Prerequisite: BA 347 with C- or better or BA 347H with C- or better

BA 451, SUPPLY AND SOURCING MANAGEMENT, 3 Credits
Use of operations and supply chain management to make sourcing and supply decisions in international business contexts. Topics include purchasing/procurement procedures and policy, supply organization, specifications, sourcing strategy, supplier evaluation, competitive bidding, and e-procurement. Global contexts and environmentally and socially responsible supply management are emphasized. 
Prerequisite: BA 270 with C- or better or BA 270H with C- or better
Available via Ecampus
BA 453, SUPPLY CHAIN MODELING AND DECISION ANALYSIS, 4 Credits
Introduce decision modeling and analysis tools with a particular emphasis on linear programming and stochastic decision making tools for solving various business decision problems pertaining to supply chain management. The major goals are to enhance students’ ability to think, formulate and analyze business problems using optimization and stochastic simulation (Monte Carlo simulation and discrete-event simulation). The case study approach, lectures, discussions and computer-aided problem solving will be used to develop and apply the relevant concepts and methodologies.
Prerequisite: BA 375 with C- or better

BA 454, LEAN ENTERPRISE MANAGEMENT AND CAPSTONE, 3 Credits
Analyze business cases that address global value creation and production/delivery systems. Complete integrated business projects to identify critical operations and supply chain management issues, apply multidisciplinary knowledge, analyze and evaluate alternative solutions and write and present reports recommending firm strategies. International business and cross-cultural competencies are emphasized.
Prerequisite: BA 459 with C- or better and MGMT 457 [C-]
Available via Ecampus

BA 456, TECHNOLOGY APPLICATIONS IN SUPPLY CHAIN MANAGEMENT, 4 Credits
Introduction to the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Basic understanding of accounting, finance, production cost, scheduling, and the link between supply chain and overall financial performance. Management of a company’s integrated supply chain using a sophisticated ERP system.
Prerequisite: BA 375 with C- or better
Equivalent to: MGMT 456
Recommended: a minimum grade of C- or better. Senior standing.

BA 458, INNOVATION AND NEW PRODUCT DEVELOPMENT, 4 Credits
Strategic management of an organization’s system and technologies in support of innovation and new product/service development. Application experience with new product/service development process using problem solving skills, information management, and critical thinking.
Prerequisite: BA 223 with C- or better or BA 223H with C- or better or BA 390 with C- or better or BA 390H with C- or better

BA 459, SERVICE OPERATIONS MANAGEMENT, 3 Credits
Focus on the management of global service operations including designing and managing systems to coordinate global information and material flows within and between firms in a supply chain. Covers planning operations, evaluating system alternatives, designing and researching global supply networks, examining complex adaptive systems and evaluating value stream synchronization.
Prerequisite: BA 375 with C- or better or BA 375H with C- or better
Available via Ecampus

BA 460, VENTURE MANAGEMENT, 4 Credits
Entrepreneurial and innovation processes applied to new business start-ups, existing small businesses, and new ventures within larger organizations; new venture planning, project management, and productivity improvement. Cases and projects are used to apply concepts and to develop communication skills.
Prerequisite: (BA 260 with C- or better or BA 260H with C- or better) and (BA 351 [C-] or BA 352 [C-] or BA 352H [C-]) and (BA 223 [C-] or BA 223H [C-] or BA 390 [C-] or BA 390H [C-])
Available via Ecampus

BA 463, FAMILY ENTERPRISE GOVERNANCE, 4 Credits
Explores and analyzes family enterprise governance practices. Addresses the governance of established family enterprises as distinct from publicly-held firms. Examines succession, stewardship, conflict resolution, communications, legal, and financial aspects, estate planning, strategy, philanthropy and other topics that drive successful family enterprise governance.
Available via Ecampus

BA 464, NEW VENTURE FINANCING, 4 Credits
Explore financial issues facing entrepreneurial business ventures: cash flow and budgets, financial analysis, financial statement forecasting, financial controls, asset management, and understanding the funding options at different points in the business life cycle including SBA loans, angel investment, venture capital, bank loans, and going public.
Prerequisite: ((BA 260 with C- or better or BA 260H with C- or better) and (BA 240 [C-] or BA 240H [C-] or BA 360 [C-] or BA 360H [C-] or FIN 340 [C-] or FIN 340H [C-]))
Available via Ecampus

BA 465, SYSTEMS THINKING AND PRACTICE, 4 Credits
Hard and soft system theories examined, methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions.
Equivalent to: BA 465H

BA 465H, SYSTEMS THINKING AND PRACTICE, 4 Credits
Hard and soft system theories examined, methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions.
Attributes: HNRS – Honors Course Designator
Equivalent to: BA 465
BA 466, INTEGRATIVE STRATEGIC EXPERIENCE, 4 Credits
Provides students with an overview of the basic concepts in strategic management. Students learn frameworks and models to understand and analyze a firm's external environment and internal resources in an effort to create sustainable competitive advantages. Analysis and critique of conventional conceptions of business ethics. Evaluation of ethical issues involving businesses at firm, national, and international levels.
Prerequisite: ((BA 240 with C- or better or BA 240H with C- or better or FIN 340 with C- or better or FIN 340H with C- or better or BA 360 with C- or better or BA 360H with C- or better) and (BA 352 [C-] or BA 352H [C-]) and (BA 357 [C-] or BA 357H [C-]) and (BA 223 [C-] or BA 223H [C-] or BA 390 [C-] or BA 390H [C-]))
Equivalent to: BA 466H
Available via Ecampus

BA 466H, INTEGRATIVE STRATEGIC EXPERIENCE, 4 Credits
Provides students with an overview of the basic concepts in strategic management. Students learn frameworks and models to understand and analyze a firm's external environment and internal resources in an effort to create sustainable competitive advantages. Analysis and critique of conventional conceptions of business ethics. Evaluation of ethical issues involving businesses at firm, national, and international levels.
Attributes: HNRS – Honors Course Designator
Prerequisite: ((BA 240 with C- or better or BA 240H with C- or better or FIN 340 with C- or better or FIN 340H with C- or better or BA 360 with C- or better or BA 360H with C- or better) and (BA 352 [C-] or BA 352H [C-]) and (BA 357 [C-] or BA 357H [C-]) and (BA 223 [C-] or BA 223H [C-] or BA 390 [C-] or BA 390H [C-]))
Equivalent to: BA 466

BA 467, NEW VENTURE LABORATORY, 4 Credits
Entrepreneurship capstone course. Fully develop a business plan including product specs with prototype, financial analysis, market analysis, marketing plan, management structure and proposed financing.
Prerequisite: (BA 357 with C- or better or BA 357H with C- or better) and BA 458 [C-]
Equivalent to: ENGR 467

BA 468, TECHNOLOGY COMMERCIALIZATION, 2-4 Credits
Hands on’ class in which students will exercise commercialization concepts on recently awarded Oregon State University patents or individual commercialization projects. Students will learn a process and tools to assess the business viability of a technical idea, and to develop the best business approach for commercialization.
Prerequisite: BA 363 with C- or better
Equivalent to: BA 468X
This course is repeatable for 8 credits.

BA 474, DATA MANAGEMENT, 3 Credits
Familiarize students with the major activities involved in collecting and managing data for a data analytics project, including extracting information from relational databases, mapping organizational requirements into a data design, transforming data into information, and exploring basic concepts underlying noSQL data management and analysis methods.
Prerequisite: BA 481 with C- or better or BA 483 with C- or better
Available via Ecampus

BA 475, DATA EXPLORATION AND VISUALIZATION, 3 Credits
Exploring and visualizing data in business analytics projects. We will focus on exploring and wrangling data to discover interesting analysis questions and prepare for other analytics activities. We will pay special attention to data visualization methods and their overall place in data science and business analytics.
Prerequisite: BA 481 with C- or better or BA 483 with C- or better
Available via Ecampus

BA 476, DATA AND TEXT MINING, 3 Credits
Introduces the concepts and applications of data and text mining. As the core of business analytics, mining structured and unstructured information is critical for better decision making by deriving valuable insights from your enterprise data repositories regardless of source or format. It allows deep, rich analysis of information. Data/text mining can help organizations surface undetected problems, fix process inefficiencies, improve customer service and corporate accountability, reduce operating costs and risks and discover new revenue opportunities. Student groups will implement a comprehensive project of data/text analytics.
Prerequisite: BA 474 with C- or better and BA 475 [C-]

BA 478, SUPPLY CHAIN ANALYTICS, 3 Credits
Explores modeling methods for design, analysis, execution and integration of supply chains. Introduces students to a variety of modeling and optimization techniques for the analysis of strategic, tactical and operational supply chain problems, including demand forecasting, risk analysis, revenue management, distribution and facility location.
Prerequisite: (BA 357 with C- or better or BA 357H with C- or better) and (BA 375 [C-] or BA 375H [C-])
Available via Ecampus

BA 479, BUSINESS TELECOMMUNICATIONS AND NETWORKING, 4 Credits
Provide a fundamental understanding of the five-layer Internet model and its effects on the business environment and enterprise-wide computing. Assignments relate to network administration in a virtualized cloud environment.
Prerequisite: BA 270 with C- or better or BA 270H with C- or better
BA 480, INFORMATION SYSTEMS SECURITY, 4 Credits
Covers security risk mitigation methods and procedures such as access control, identity management, intrusion prevention and detection, network and physical security, etc. These and other topics will be placed in both the operational and strategic context of the business. Addresses several IS governance and IS security frameworks within which the various security concepts, aspects, policies and procedures can be viewed and discussed.
Prerequisite: (ACTG 378 with C- or better or ACTG 378H with C- or better or BA 370 with C- or better or BA 370H with C- or better) and BA 479 [C-]

BA 481, INTRODUCTION TO BUSINESS ANALYTICS, 4 Credits
How organizations can successfully collect, evaluate and apply information for better decision making. Emerging technologies such as transaction processing systems, RFID, weblogs, social networks, website usage, and online communities have the potential to reveal market trends, suppliers’ preferences, and competitors’ next moves. The success of an organization largely depends on its ability to take advantage of those data sets that are already available to it. The class starts with basic IT strategy concepts for the identification of the opportunities for BI solutions, and ends with hands-on experience using Business Intelligence tools to implement such solutions.
Equivalent to: BA 483
Available via Ecampus

BA 482, INFORMATION SECURITY GOVERNANCE, 4 Credits
As a discipline cybersecurity covers software, hardware, networking, systems, individuals, organizations and applicable policies, laws and standards, among others. Given societies’ dependence on the security of global infrastructure and the increasing complexity of maintaining the security of those systems, there is a growing need for an interdisciplinary approach to study this topic. This course introduces several well-regarded and well-used IT and IT security governance frameworks which can be used to apply and govern security policies and protocols in organizations. The course also delves into SOC IT auditing.
Available via Ecampus

BA 483, BUSINESS ANALYTICS, 4 Credits
Presents how organizations can successfully collect, evaluate and apply information for better decision making. Technologies such as transaction processing systems, RFID, weblogs, social networks, website usage, and online communities have the potential to reveal market trends, suppliers’ preferences, and competitors’ next moves. The success of an organization largely depends on its ability to take advantage of those data sets that are already available to it.
Prerequisite: BA 371 with C- or better and BA 479 [C-]
Equivalent to: BA 481

BA 487, HOSPITALITY FINANCIAL MANAGEMENT, 4 Credits
Introduces students to the evaluation of investments in competitive products and services as sustainable strategies for the hospitality industry.
Prerequisite: BA 360 with C- or better and BA 486 [C-]
BA 514, OPERATIONS MANAGEMENT, 3 Credits
Provides a foundation for business managers in statistics and operations management. Emphasis on quantitative tools for sampling, interval estimation and hypothesis testing as well as operations management concepts for processes, quality systems, supply chain management, inventory management, resource planning, and sustainable lean systems. Recommended: College algebra (including probabilities). Available via Ecampus

BA 515, MANAGERIAL DECISION TOOLS, 3 Credits
Develop business management skills by learning the principles of managerial and financial accounting. Emphasis will be placed on understanding financial statements, cost analysis, and funding decisions. Focuses on integrating the theoretical framework of accounting and finance with the “hands on” technical skills needed to evaluate financial decisions within an organization. Recommended: College algebra. Available via Ecampus

BA 516, CREATING VALUE IN EXCHANGE, 3 Credits
A graduate-level survey course that provides a foundation for business managers in the concepts of marketing. The student will develop an understanding of marketing principles and an awareness of marketing challenges. Recommended: Microeconomics. Available via Ecampus

BA 517, MARKETS AND VALUATION, 3 Credits
Introduces students to the basic questions facing a financial manager and the tools a financial manager uses to find answers to these questions. Introduces the basic tools of finance and applications of financial theory in use today. Students will be introduced to legal, ethical, technology, and global issues facing a financial manager. The course is designed to enhance a student’s approach to financial decision making and emphasizes technical analysis and quantitative approaches to decision making. Available via Ecampus

BA 518, ADOPTING THE ENTREPRENEURIAL MINDSET, 3 Credits
Introduces the fundamentals of entrepreneurship and innovation, and exposes the concepts, practice, and tools of the entrepreneurial world. Available via Ecampus

BA 528, FINANCIAL AND COST ANALYSIS, 3 Credits
Analysis of the balance sheet and income statement to determine profitability, risk, and rate of return; preparation of pro forma financial statements; cost measurement for products, projects, jobs, customers, and markets; strategic cost decision making for pricing and resource allocation. Recommended: BA 213 with a grade of C- or higher. Available via Ecampus

BA 531, BUSINESS LAW - TECHNOLOGY/NEW VENTURES, 3 Credits
An integrative course on managing legal and ethical issues for new ventures. Focuses on business law for founders of start-up companies including formation of new business entities, protecting intellectual property, workforce management and global issues. Topics presented from an entrepreneurial perspective and include technology law, e-commerce law and government regulation. Students develop skills to identify and resolve legal and ethical issues, deal with administrative agencies, and proactively manage legal liability. Considerations of ethics and corporate responsibility are emphasized. Recommended: BA 230 or BA 330 or BA 513 with a minimum grade of B-

BA 532, ENVIRONMENTAL LAW, SUSTAINABILITY, AND BUSINESS, 4 Credits
Explores fundamental business, legal, and policy issues raised by environmental law, sustainable business practices, and clean energy policies, and their impact on business and management practices.

BA 533, BUSINESS LAW FOR MANAGERS, 3 Credits
Develops knowledge and skills about business law used by managers in global organizations. Topics covered include establishing lawful and ethical business practices; preventing and responding to compliance failures, infringement and other legal threats; effective use of contracts; and resolving disputes through litigation and alternative dispute resolution. Recommended: BA 230 and BA 233 and BA 513 and PHAR 707 and PHAR 708 Available via Ecampus

BA 540, CORPORATE FINANCE, 3 Credits
Emphasizes analytical tools to measure and manage firm value, through corporate strategies such as mergers and acquisitions, leveraged buyouts, international expansion, and new venture development. Recommended: (BA 340 or FIN 340 or FIN 340H) with a minimum grade of C. Available via Ecampus

BA 543, FINANCIAL MARKETS AND INSTITUTIONS, 3 Credits
Investigates the five major financial markets: common stock, bond, derivatives, mortgage, and currency. The course examines the agents in each of these markets, the rules of trading, and the rationale of the agents participating in the different markets. Recommended: (BA 340 or FIN 340 or FIN 340H) with a minimum grade of C. Available via Ecampus

BA 550, ORGANIZATION LEADERSHIP AND MANAGEMENT, 3 Credits
Organization-wide implementation issues driven by change. Provides a balanced view of the structural and human sides of organization design. Recommended: BA 352 with a minimum grade of C. Available via Ecampus
BA 551, SUPPLY AND SOURCING MANAGEMENT, 3 Credits
Use of operations and supply chain management to make sourcing and supply decisions in international business contexts. Topics include purchasing/procurement procedures and policy, supply organization, specifications, sourcing strategy, supplier evaluation, competitive bidding, and e-procurement. Global contexts and environmentally and socially responsible supply management are emphasized.

Available via Ecampus

BA 554, LEAN ENTERPRISE MANAGEMENT AND CAPSTONE, 3 Credits
Analyze business cases that address global value creation and production/delivery systems. Complete integrated business projects to identify critical operations and supply chain management issues, apply multidisciplinary knowledge, analyze and evaluate alternative solutions and write and present reports recommending firm strategies. International business and cross-cultural competencies are emphasized.

Prerequisite: BA 559 with B- or better and BA 561 [B-]

Available via Ecampus

BA 555, PRACTICAL BUSINESS ANALYSIS, 3 Credits
Advanced survey of quantitative business methods useful for aiding management decisions. Topics include a review of basic statistics, mathematical programming, business simulation, statistical process control, advanced regression analysis and forecasting.

Recommended: BA 275 with a minimum grade of C- or higher

Available via Ecampus

BA 557, GLOBAL LOGISTICS MANAGEMENT: FUNDAMENTALS AND STRATEGY, 3 Credits
Students will learn key concepts, basic strategies, and decision-making tools relevant to logistics management, and apply them to real-world logistics problems faced by companies in the context of managing their global supply chains.

Prerequisite: BA 551 with B or better and BA 552 [B] and BA 561 [B]

Available via Ecampus

BA 559, SERVICE OPERATIONS MANAGEMENT, 3 Credits
Focus on the management of global service operations including designing and managing systems to coordinate global information and material flows within and between firms in a supply chain. Covers planning operations, evaluating system alternatives, designing and researching global supply networks, examining complex adaptive systems and evaluating value stream synchronization.

Prerequisite: BA 551 with B- or better and BA 555 [B-]

Equivalent to: BA 552

Available via Ecampus

BA 560, VENTURE PLANNING, 3 Credits
Entrepreneurial and innovation processes applied to new business start-ups, existing small businesses, and new ventures within larger organizations; emphasis on venture planning with project management.

Lec/rec

Recommended: (BA 340 or BA 340H or FIN 340 or FIN 340H) and (BA 390 or BA 390H) with a minimum grade of C-

BA 561, SUPPLY CHAIN MANAGEMENT, 3 Credits
Covers tools and concepts needed to manage the entire supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains.

Recommended: (BA 357 and BA 555) with a minimum grade of C-

Available via Ecampus

BA 562, MANAGING PROJECTS, 3 Credits
Covers tools and concepts used by managers to plan and initiate business projects. Computer applications, cases and a project.

Recommended: (BA 352 and BA 357) with a minimum grade of C-

Available via Ecampus

BA 563, FAMILY ENTERPRISE GOVERNANCE, 4 Credits
Builds on the introductory family business management course to examine the required elements of a successful enterprise, a diversified and multigenerational organization comprised of multiple business lines.

Recommended: BA 365

Available via Ecampus

BA 567, SELECTED TOPICS IN MANAGEMENT, 0-4 Credits
Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. Lec/rec.

This course is repeatable for 16 credits.

BA 568, INTEGRATED BUSINESS PROJECT, 3 Credits
The project requires students to complete a business plan, as a means of directing the development of a business. A business plan can help focus a business idea, chart a course for strategic business development, and facilitate setting objectives and creating evaluative benchmarks of progress. To be taken during the last year of the MBA program.

BA 569, ADVANCED STRATEGIC MANAGEMENT, 3 Credits
Advanced integrative case-based course on the process of systematically developing and managing firm strategies. Topics are covered from a general management perspective and include setting corporate goals and objectives, analyzing external competitive environments, understanding business models, identifying strategy options, and designing appropriate organization systems and structure for implementation of plans.

International and e-business issues are integrated throughout.

Recommended: All foundation courses

Available via Ecampus
BA 570, INNOVATION STRATEGY, IP, AND NPD, 3 Credits
Enables students who are aspiring entrepreneurs forming new ventures or corporate managers leading existing businesses to understand the fundamental drivers of the success or failure of new products, from the perspective of the strategic management of technological innovation.
Prerequisite: BA 560 with B- or better

BA 571, HEALTHCARE AND BIOMEDICAL INNOVATION, 3 Credits
An integrative learning experience intended to provide current and future managerial, analytical, clinical, and technical professionals in health-related fields with an understanding of the full range of strategic issues associated with innovation management, intellectual property (IP) protection, and new product development. Through the use of conceptual frameworks, relevant case studies, simulations, and product/service examples drawn from the global healthcare ecosystem, explore the effective use of IP to reduce and manage risk, facilitate market entry, and enhance competitive positioning.

BA 572, ADVANCED INFORMATION SYSTEMS, 3 Credits
The development, implementation and management of information technology applications will be addressed. Topics will address the development and application of technology to support linkages within the organization and outside the organization. Projects will be assigned to illustrate the topics.
Available via Ecampus

BA 573, DATA ANALYTICS FOR COMPETITIVE ADVANTAGE, 3 Credits
Case studies, hands-on data analysis experience, and a class project will introduce basic concepts of data analytics, sketch the lifecycle of a data analytics project, and connect analytics to business consequences. Students will use representative analytic tools to support decision making.
Available via Ecampus

BA 574, DATA MANAGEMENT, 3 Credits
Familiarize students with the major activities involved in collecting and managing data for a data analytics project, including extracting information from relational databases, mapping organizational requirements into a data design, transforming data into information, exploring data warehouse concepts, and exploring basic concepts underlying Hadoop and other noSQL data management and analysis methods.
Prerequisite: BA 573 with C or better
Available via Ecampus

BA 575, DATA EXPLORATION AND VISUALIZATION, 3 Credits
In this course we concentrate on the initial, exploratory phases of business analytic data analysis. We explore different types of data and the types of analysis they allow; aggregating and disaggregating data and issues of validity with both selecting and collecting data. We also start exploring one or more datasets relating to our Integrated Business Analytics Project (BA 577).
Prerequisite: BA 573 with C or better
Available via Ecampus

BA 576, DATA AND TEXT MINING, 3 Credits
Examine how data/text analysis technologies can be used to improve decision making. The class covers the fundamental principles and techniques of data mining, text analysis, and uses real-world examples and cases to place data-mining techniques in context. Students will have hands-on experience with data/text mining software.
Prerequisite: BA 574 with C or better and BA 575 [C]
Available via Ecampus

BA 577, INTEGRATED BUSINESS ANALYTICS PROJECT, 3 Credits
Students will integrate what they have learned to solve industry-sponsored problems. The goal of the class is to provide students with opportunities to design, implement, and evaluate analytic solutions for a real-world enterprise. Student teams will examine the data requirements, technical requirements, and organizational requirements necessary for the success of analytical solutions. The project will give students the experience of leading and managing an analytical team, much as a Chief Analytics Officer (CAO) would be expected to do.
Prerequisite: BA 555 with C or better and BA 574 [C] and BA 575 [C]
Available via Ecampus

BA 578, SUPPLY CHAIN ANALYTICS, 3 Credits
Explores modeling methods for design, analysis, execution and integration of supply chains. Introduces students to a variety of modeling and optimization techniques for the analysis of strategic, tactical and operational supply chain problems including demand forecasting, risk analysis, revenue management, distribution and facility location.
Prerequisite: BA 555 with B- or better
Available via Ecampus

BA 590, MARKETING MANAGEMENT, 3 Credits
Provides students with an understanding of how a market-orientation can help firms to profitably deliver value to their targeted customers. Through a combination of lectures, in-class exercises, and case discussions, students will learn how to analyze complex marketing challenges, and make strategic decisions based on established marketing management principles.
Recommended: BA 390 with a minimum grade of C-
Available via Ecampus

BA 599, SPECIAL TOPICS IN BUSINESS ADMINISTRATION, 1-4 Credits
This course is repeatable for 16 credits.

BA 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 32 credits.

BA 602, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 32 credits.
BA 603, THESIS/DISSERTATION, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

BA 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 32 credits.

BA 607, SEMINAR, 1-16 Credits
This course is repeatable for 32 credits.

BA 611, TEACHING EFFECTIVENESS, 1-6 Credits
Provides an overview of a broad range of effective teaching techniques and common issues associated with teaching at the college level (e.g., defining learning outcomes, common pitfalls, assessing of student learning, etc.).
This course is repeatable for 6 credits.

BA 612, FOUNDATIONS OF BUSINESS RESEARCH, 3 Credits
Introduces first-year business doctoral students to concepts fundamental to conducting research in business as a social science. Specific topics may change from quarter to quarter, but sample topics include the academic environment in business, research paradigms, ethics in research, fundamentals of scientific research, constructs, validity, sampling, and analysis and interpretation.

BA 613, SEMINAR IN BUSINESS RESEARCH METHODS, 3 Credits
Provides first-year business PhD students with an in-depth introduction to the most common research methodologies used by current business faculty across multiple functional disciplines. Specific research methods covered may change from quarter to quarter, but sample topics include use of basic econometric models for analysis of archival data, experimental methodologies, qualitative research techniques, and survey research.

BA 660, FOUNDATIONS OF ENTREPRENEURSHIP RESEARCH, 3 Credits
Provides a broad overview of the foundations of entrepreneurship research, including theoretical underpinnings of the field as well as some of the common and/or promising approaches to the study of entrepreneurial phenomena.

BA 661, DOCTORAL SEMINAR IN ORGANIZATIONAL THEORY, 3 Credits
Surveys research on classic and contemporary developments in basic organizational theory.

BA 662, CORPORATE ENTREPRENEURSHIP AND NEW VENTURES, 3 Credits
Surveys research in the area of corporate entrepreneurship and venturing, focusing on relevant theoretical underpinnings and core concepts in the corporate entrepreneurship, entrepreneurship, and strategy literatures.

BA 663, STRATEGIC MANAGEMENT, 3 Credits
Surveys research exploring the central question in strategy: Why do some firms outperform others? The course considers a wide variety of foundational and contemporary issues in the field, and while specific topics may change from quarter to quarter, sample topics include competitive and cooperative interactions, the resource-based view and firm capabilities, organizational learning and adaptation, and industry evolution.

BA 664, TECHNOLOGY AND INNOVATION MANAGEMENT, 3 Credits
Surveys research on the management of innovation and technology in organizations, focusing on innovation as an outcome (product, service, technology, practice) and on the process of generation, adoption, and implementation of innovation in organizations.

BA 808, WORKSHOPS, 0-16 Credits
Workshops aimed at practicing professionals in the discipline. Topics may vary.

Design (DSGN)

DSGN 121, COMPUTER AIDED DESIGN, 3 Credits
Introduction to the Adobe Creative Suite: Illustrator and Photoshop. Instruction in drawing, image editing, flat illustrations and textile design. Lec/studio.
Equivalent to: DSGN 221
Available via Ecampus

DSGN 199, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 12 credits.

DSGN 226, SPECIFICATION BUYING, 4 Credits
Introduction to terminology, assembly process, quality factors, and costs in the development of sewn product specifications. Lec/lab.

DSGN 244, COLOR INNOVATION, 4 Credits
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Equivalent to: DSGN 244H

DSGN 244H, COLOR INNOVATION, 4 Credits
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 244
DSGN 253, PROFESSIONAL DEVELOPMENT, 3 Credits
Introduces career management process. Emphasizes ongoing, systematic nature of process. Topics include self-assessment, career exploration, preliminary employment strategies.
Prerequisite: DSGN 121 with C- or better
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385

DSGN 255, TEXTILES, 4 Credits
Equivalent to: DHE 255

DSGN 276, INTRODUCTION TO MERCHANDISING MANAGEMENT, 4 Credits
Provides the introductory knowledge necessary to prepare students for working in the retail industry. Introduces students to the retail industry including basic terminology, industry history, and to merchandising management decisions. Prepares students for more advanced knowledge acquired in the Merchandising Management concentration.

DSGN 281, DRAWING AND SKETCHING, 4 Credits
Designed for both beginning drawers and those wanting to improve their skills. Focuses exclusively on hand drawing skills with an emphasis on technical drawing skills, observational and perspective drawing, as well as imagination and creativity. Students develop a working knowledge of visual methods for communicating design concepts. Class format includes a combination of quick drawing activities, demonstrations, lectures, critiques, and work time on drawing assignments. Throughout the term students are introduced to the drawings of several prominent designers and artists.

DSGN 282, DRAFTING YOUR CAREER BLUEPRINT, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include understanding and developing one's own talents and strengths and beginning the initial stages of career exploration.
Equivalent to: BA 282

DSGN 283, CREATIVITY, CULTURE, AND THE WORKPLACE, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Explores students' unique talents and how teams as well as organizations can benefit from diverse and inclusive communities.
Equivalent to: BA 283

DSGN 284, FOUNDATIONS OF PERSONAL FINANCE I, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include foundations of personal finance, helping students navigate paying-for-college resources and aiding them in developing and sticking to a realistic budget while in school.
Equivalent to: BA 284

DSGN 287, STUDIO I: DESIGN COMMUNICATION, 4 Credits
Focuses on design communication through electronic media. Students use AutoCAD, SketchUp, and the Adobe Creative Cloud to create 2D and 3D visualizations and presentations of interiors. Lec/studio.

DSGN 311, FRAMING YOUR CAREER PLAN, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Course topics are designed to help the student explore different types of business communications and how to effectively communicate their ideas in a variety of methods.
Equivalent to: BA 311

DSGN 312, FOUNDATIONS OF PERSONAL FINANCE II, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Second of four course in Blueprint that is dedicated to learning the foundations of personal finance. Topics include Taxes, Credit, Loans & Cars, and Investing.
Equivalent to: BA 312

DSGN 313, THE ORANGE AND BLACK CASE COMPETITION, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Strengthens students' foundational business knowledge, critical thinking abilities, and team collaboration skills through a college-wide case competition.
Prerequisite: BA 260 with C- or better or BA 260H with C- or better
Equivalent to: BA 313

DSGN 327, PERFORMANCE APPAREL INNOVATION I, 4 Credits
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisite: DSGN 226 with C- or better

DSGN 328, DIGITAL DESIGN FOR APPAREL, 3 Credits
Computer-aided flat pattern, grading and marker techniques using industry relevant pattern development software.
Prerequisite: DSGN 327 with C- or better
DSGN 329, SPORTSWEAR INDUSTRY COLLABORATION, 3 Credits
Industry lead team project. Creation of briefs, sketch, pattern, design textile prints, construct prototypes based on identified consumer and company.
Prerequisite: DSGN 327 with C- or better

DSGN 330, FASHION FORECASTING AND MARKET ANALYSIS, 4 Credits
Forecasting and market analysis processes applied to fashion goods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: WR 222 with C- or better or WR 323 with C- or better or WR 327 with C- or better
Equivalent to: DHE 330

DSGN 333, HISTORY OF CONTEMPORARY FASHION, 4 Credits
Historic analysis of fashion change in men’s and women’s apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion.

DSGN 341, DESIGN THINKING AND PROCESS INNOVATION, 4 Credits
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Equivalent to: DSGN 341H

DSGN 341H, DESIGN THINKING AND PROCESS INNOVATION, 4 Credits
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 341

DSGN 342, INTRODUCTION TO DESIGN MANAGEMENT, 4 Credits
Introduces the foundations and concepts of design strategy and creative development.
Prerequisite: DSGN 341 with C- or better

DSGN 343, IDEA VISUALIZATION, 4 Credits
Focuses on the design process through visual communication of ideation and sketching.
Prerequisite: DSGN 342 with C- or better

DSGN 356, SPECIFICATION AND EVALUATION OF PERFORMANCE MATERIALS, 3 Credits
Specification of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisite: DSGN 255 with C- or better

DSGN 357, EVALUATION OF PERFORMANCE MATERIALS LABORATORY, 1 Credit
Evaluation of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisite: DSGN 255 with C- or better and DSGN 327 [C-]
Corequisites: DSGN 356
Recommended: Concurrent enrollment with DSGN 356

DSGN 372, MERCHANDISE PLANNING AND CONTROL, 4 Credits
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisite: DSGN 276 with C or better
Equivalent to: DSGN 472

DSGN 377, RETAIL AND MERCHANDISING, 4 Credits
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisite: DSGN 372 with C- or better or DSGN 472 with C- or better

DSGN 383, BUILDING CONSTRUCTION AND MATERIALS, 3 Credits
An introduction to the manufacture, characteristics, sustainability, and use of construction materials in commercial and residential construction.
Equivalent to: DHE 283

DSGN 387, STUDIO III: ADVANCED DESIGN COMMUNICATION, 4 Credits
Development of presentation and Building Information Modeling (BIM) skills through various computer programs including Adobe Illustrator, Adobe PhotoShop, Sketchup, and Revit Architecture. In-class exercises and take-home assignments.
Prerequisite: DSGN 287 with C- or better

DSGN 388, STUDIO IV: HOSPITALITY DESIGN, 4 Credits
Study and design of hospitality spaces in compliance with building codes and industry standards, with emphasis on sustainability, safety, and cultural context.
Prerequisite: DSGN 387 with C- or better

DSGN 394, STUDIO V: LIGHTING DESIGN, 4 Credits
Lighting design and documentation for residential and small commercial projects. The commercial projects include space planning and lighting design for workspace and retail environments. Lec/Studio.
Prerequisite: DSGN 388 with C- or better
Equivalent to: DHE 394

DSGN 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.
DSGN 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: DHE 405
This course is repeatable for 16 credits.

DSGN 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

DSGN 407, SEMINAR, 1-16 Credits
Equivalent to: DHE 407
This course is repeatable for 16 credits.

DSGN 408, WORKSHOP, 1-16 Credits
Equivalent to: DHE 408
This course is repeatable for 16 credits.

DSGN 409, PRACTICUM, 1-16 Credits
Equivalent to: DHE 409
This course is repeatable for 16 credits.

DSGN 410, DESIGN INTERNSHIP, 1-6 Credits
Planned and supervised work experience at selected cooperating business firms. Supplementary training, conference, reports, and appraisals. Graded P/N.
Equivalent to: DHE 410
This course is repeatable for 16 credits.

DSGN 411, NAVIGATING YOUR WORKPLACE, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Builds a foundation of financial planning, offering students the tools to successfully manage their career pathways. Topics include: analyzing job offers and benefits packages, negotiating a job's salary/benefits, strategizing the first 90 days on the job, and advocating for opportunities at work.
Equivalent to: BA 411

DSGN 412, FINANCIAL PLANNING I, 1 Credit
Part of Blueprint – a 12-course professional development course series to guide the student from college to career. Continues to build a foundation of financial planning, offering students the tools to successfully prepare for future wealth. Topics include: budgeting for life after graduation, planning for new earnings and income, saving for your future self, and keeping your money and yourself secure.
Equivalent to: BA 412

DSGN 413, FINANCIAL PLANNING II, 1 Credit
Part of Blueprint – a 12-course professional development course series to guide the student from college to career. Finalizes the foundations of financial planning, offering students the tools to successfully outline long-term financial goals. Topics include: addressing debt and buying a home, managing risk and insurance, planning for retirement, and creating a long-term legacy.
Equivalent to: BA 413

DSGN 427, PERFORMANCE APPAREL INNOVATION II, 4 Credits
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisite: DSGN 327 with C- or better

DSGN 428, TECHNICAL SPORTSWEAR SIZING AND FIT, 4 Credits
Development of sizing and grading systems used in sportswear and evaluation of garment fit by use of virtual and physical prototypes.
Prerequisite: DSGN 327 with C- or better

DSGN 429, FUNCTIONAL DESIGN AND PRODUCT DEVELOPMENT, 4 Credits
Design processes and research methods used to create functional designs. Students will identify design problems and develop design brief and functional product line for identified target company. Lec/lab.
Prerequisite: DSGN 428 with C- or better

DSGN 440, DESIGN RESEARCH, 4 Credits
Surveys design principles, methods and applications in business outcomes. Application of design research is investigated and analyzed in group projects.
Prerequisite: DSGN 343 with C- or better

DSGN 441, SERVICE DESIGN INNOVATION, 4 Credits
Focuses on the impact that service design has on business enterprises. Creative ideation, critical analysis, and innovative thinking are integrated as foundations for service design outcomes.
Prerequisite: DSGN 440 with C- or better

DSGN 442, MATERIALITY AND MAKING FIELD PROJECT, 4 Credits
Focuses on material properties and specifications. Students work in the makerspace to design product outcomes.
Prerequisite: DSGN 440 with C- or better
Equivalent to: DHE 442

DSGN 464, CONTEMPORARY HISTORY OF INTERIORS AND HOUSING, 3 Credits
History of interior design from the mid-19th century to the present.
Prerequisite: ART 204 with C- or better or ART 205 with C- or better or ART 206 with C- or better

DSGN 471, RETAIL PRESENTATION STRATEGIES, 4 Credits
Provides an overview of, and examines competitive presentation strategies within, retail environments and channels (e.g., in-store, catalog, online, mobile) by integrating the principles and elements of design with sensory marketing.
Prerequisite: DSGN 377 with C- or better and (BA 390 [C-] or BA 390H [C-] or BA 223 [C-] or BA 223H [C-] or MRKT 390 [C-])
DSGN 473, RETAIL STRATEGIES PRACTICUM, 4 Credits
Explores the role that retail strategies play within a value delivery network. Looks at how retailing helps deliver value created in manufacturing and in services. Examines how these organizations develop strategies to attract consumers and also how consumers develop strategies to acquire goods and services from retailers. Provides a foundation for students who plan to work in retailing or related disciplines.
Prerequisite: DSGN 377 with C- or better

DSGN 475, *GLOBAL SOURCING OF TEXTILES, APPAREL, AND FOOTWEAR, 4 Credits
Trade theory and the effects of trade policy, cultural values, and economics on the global production, distribution, and consumption of textiles, apparel, and footwear. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

DSGN 488, STUDIO VI: HEALTHCARE DESIGN, 4 Credits
Interior design project development with emphasis on healthcare design, contract documents, and building codes.
Prerequisite: DSGN 394 with C- or better

DSGN 495, STUDIO VII: SENIOR THESIS II, 4 Credits
Individual design project development of programming document and construction drawings.
Prerequisite: DSGN 488 with C- or better
Equivalent to: DHE 495

Finance (FIN)

FIN 341, INVESTMENTS, 4 Credits
Risk and reward characteristics of investments; sources of investment information, domestic and international security markets; investment characteristics of common stocks, debt securities, convertible securities, option contracts, and investment companies; real property investment; economic market analysis; technical market analysis; tax aspects of investments; and investment management.
Prerequisite: BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better or FIN 340 with C or better or FIN 340H with C or better
Equivalent to: BA 341

FIN 342, ADVANCED FINANCIAL MANAGEMENT, 4 Credits
Capital market theory and the valuation of risky assets, capital budgeting, valuing the firm’s securities, capital structure theory, long-term financing alternatives, cost of capital, dividend policy, working capital management, financial analysis and planning, mergers, and takeovers.
Prerequisite: FIN 340 with C or better or FIN 340H with C or better or BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better
Equivalent to: BA 342

FIN 343, CFA PREPARATION, 2-4 Credits
Provides students with structure and guidance in their preparation for the Chartered Financial Analyst (CFA) Level exam. Students systematically prepare for and are tested on the 18 sections of the exam.
Equivalent to: BA 434
This course is repeatable for 4 credits.

FIN 347, APPLIED PORTFOLIO MANAGEMENT, 2 Credits
Hands-on experience of managing two investment portfolios. Each member in the Oregon State Investment Group (OSIG) should act as a financial analyst to analyze a chosen company by performing the Discounted Cash Flow (DCF) or Residual Income Model (RIM), the relative valuation, and the SWOT analyses. The weekly seminar offers opportunities for students to present their analyses and offer comments and suggestions to other’s presentations.
Equivalent to: BA 437

FIN 348, APPLIED PORTFOLIO MANAGEMENT II, 1 Credit
Each student will act as a financial analyst to analyze a chosen company using models learned in FIN 437. Provides students with an opportunity to practice security valuation and get familiar with the tools. In addition, this course will focus on various measures of portfolio performance.
Prerequisite: FIN 437 with C- or better or BA 437 with C- or better
Equivalent to: BA 438

FIN 439, APPLIED PORTFOLIO MANAGEMENT III, 1 Credit
Each student will act as a financial analyst to analyze a chosen company using models learned from FIN 437. Provides students additional opportunity to practice security valuation and strengthen their understanding of the tools. In addition, this course will introduce ways to develop an efficient portfolio.
Prerequisite: FIN 437 with C- or better or BA 437 with C- or better
Equivalent to: BA 439

FIN 440, FIXED INCOME SECURITIES, 4 Credits
Provides students with intermediate knowledge of fixed income assets, interest rate and interest rate theory, the tools for estimating values, and managing portfolios of fixed income assets. The course can also serve as a partial coverage of material expected of applicants planning on seeking the Certified Financial Analyst designation.
Prerequisite: FIN 341 with C- or better

FIN 441, FINANCIAL INSTITUTIONS, 4 Credits
Introduction of markets and institutions that form the economic system of trading financial and real assets both domestically and internationally. The introduction of concepts of financial theory, institutional detail, regulatory environments, and the history of financial markets. Topics include legal, ethical, technological, and global issues facing financial managers, markets, and institutions.
Prerequisite: BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better or FIN 340 with C or better or FIN 340H with C or better
Equivalent to: BA 441
FIN 442, FINANCIAL STATEMENT ANALYSIS, 4 Credits
Student develop the understanding and skill to use financial statements for investment decisions, credit decisions, performance analysis, and forecasting. Three main topic areas: analysis overview, accounting analysis, and financial analysis.
Prerequisite: FIN 342 with C- or better
Equivalent to: BA 445

FIN 443, PORTFOLIO MANAGEMENT, 4 Credits
An introduction to the construction, revision, and performance evaluation of financial asset portfolios.
Prerequisite: FIN 341 with C- or better or BA 341 with C- or better
Equivalent to: BA 443
Available via Ecampus

FIN 444, FINANCIAL RISK MANAGEMENT, 4 Credits
Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs.
Prerequisite: FIN 341 with C- or better
Equivalent to: BA 444

FIN 445, INTERNATIONAL FINANCIAL MANAGEMENT, 4 Credits
International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance.
Prerequisite: FIN 540 with B- or better
Equivalent to: BA 445

FIN 499, SELECTED TOPICS IN FINANCE, 1-4 Credits
Examination of the impact of recent advances in finance on contemporary business. Topic will vary from term to term.
This course is repeatable for 16 credits.

FIN 542, INVESTMENTS, 3 Credits
Introduction to the tools and concepts of security analysis and investments; basic security types, including stocks, bonds, options and futures, respective markets and to how these securities are traded; fundamental valuation techniques and theory for stocks and bonds.
Recommended: BA 360

FIN 543, PORTFOLIO MANAGEMENT, 4 Credits
An introduction to the construction, revision, and performance evaluation of financial asset portfolios.
Prerequisite: FIN 542 with C or better

FIN 544, FINANCIAL RISK MANAGEMENT, 4 Credits
Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs.
Prerequisite: FIN 442 with C- or better
Equivalent to: BA 544
Recommended: FIN 542

FIN 545, INTERNATIONAL FINANCIAL MANAGEMENT, 3 Credits
International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance.
Prerequisite: FIN 540 with B- or better
Equivalent to: BA 545
Recommended: FIN 341 and FIN 342 and (FIN 440 or FIN 442 or FIN 443 or FIN 444 or FIN 499)

FIN 546, ADVANCED CORPORATE FINANCE, 3 Credits
The second course in the Corporate Finance sequence. Examines corporate payout policies and capital structure choices, choices in debt financing, financial planning and working capital management, and valuation of projects using a real-options approach.
Prerequisite: FIN 540 with B- or better

FIN 549, MERGERS AND ACQUISITIONS, 3 Credits
Provides an in-depth examination of the theory and practice of the market for corporate control, primarily focusing on mergers and acquisitions (M&A). The objective of the course is to provide an understanding of how to structure, value, and implement an M&A transaction. Students will be expected to apply the appropriate tools and skills to evaluate M&A transactions.
Prerequisite: FIN 546 with B- or better

FIN 550, FUNDAMENTALS OF FINANCIAL PLANNING, 4 Credits
Professional conduct and regulation, general financial planning principles, and education planning.

FIN 551, INSURANCE PLANNING AND TAX PLANNING, 4 Credits
Risk management and insurance planning; tax fundamentals and income tax planning.
Prerequisite: FIN 550 with B- or better

FIN 552, FINANCIAL PLANNING II, 3 Credits
Retirement planning; qualified and non-qualified retirement plans; IRAs; legal, tax, financial and non-financial aspects of estate planning; trusts; wills; wealth transfers.
Prerequisite: FIN 551 with C or better
FIN 553, FINANCIAL PLANNING III, 6 Credits
Synthesis and integration of financial planning fundamentals to develop a comprehensive financial plan; client communication.
Prerequisite: FIN 552 with C or better

FIN 599, SELECTED TOPICS IN FINANCE, 1-4 Credits
This course is repeatable for 16 credits.

FIN 640, FOUNDATIONS OF FINANCIAL RESEARCH, 3 Credits
Provides an in-depth introduction to the foundations of financial research with an emphasis on theoretical developments and empirical research methods. Specific topics may change from quarter to quarter, but sample topics include theory of the firm, capital structure theory, dividend policy, and event study methodology.

FIN 641, CORPORATE FINANCE SEMINAR, 3 Credits
Survey classic and contemporary research in the area of corporate finance. Specific topics may change from quarter to quarter, but sample topics include capital structure, dividend policy, agency theory, adverse selection and signaling, and non-cooperative games with and without complete information.

FIN 642, CAPITAL MARKETS, 3 Credits
Surveys research on capital markets. Specific topics may change from quarter to quarter, but sample topics include asset pricing models, efficient markets vs behavioral finance, market volatility, volume, new issues market, and emerging markets.

Hospitality Management (HM)

HM 101, INTRODUCTION TO HOSPITALITY, 4 Credits
Introduction to the food-service, lodging, and tourism components of the hospitality industry, and the essential leadership and management skills necessary for success in the field. Background information, current issues, and future challenges in various segments of the industry are included.

HM 210, HOSPITALITY INTERNSHIP, 3 Credits
Students are required to complete this internship so that OSU and the sponsoring company can offer a platform from where students can apply the management concepts learned in class and acquire the necessary hands-on experience in a hotel, restaurant/food service and/or tourism industry to eventually qualify for a supervisory of managerial level role.
Prerequisite: HM 101 with C- or better

HM 230, LODGING MANAGEMENT, 4 Credits
Provides a comprehensive introduction to the management of hotels and lodging properties. Focuses on operations, service, management and financials of the lodging industry.
Prerequisite: HM 101 with C- or better

HM 235, HOSPITALITY LAW AND LABOR RELATIONS, 4 Credits
Provides insight into the laws and regulations governing the hospitality industry with an emphasis on labor relations and human resources best practices. Addresses the general concepts of tort, contracts, liability, risk management, employment practices, licensing and insurance needs. Explores the legal issues that today’s hospitality professionals face such as privacy, labor laws, the common law system for innkeepers and newer hospitality products in the shared economy such as AirBnB or VRBO.

HM 240, HOSPITALITY COST CONTROL, 4 Credits
Introduces the basic techniques and control procedures used in the hospitality industry to maximize profit and minimize costs. Examines and discusses methods employed to protect and uphold the investors/owners strategic financial goals. Students will focus on all aspects of hospitality control objectives; from food and beverage costs, purchasing, labor costs, menu pricing, establishing room rates, cash flow, theft and loss prevention, to computer applications. The principles of effective budgeting, important hospitality financial ratios and the factors that determine hospitality profitability will also be reviewed.

HM 310, INTERNSHIP II, 3 Credits
Hospitality Internship II builds on the knowledge students have gained from their course work internship (HM 210). Students are required to complete this internship in a hotel, restaurant/food service and/or related hospitality sector. In cooperation with OSU and the sponsoring company, students will apply the HM concepts learned in class to a real-world business environment.

HM 320, SERVICE AUTOMATION AND TECHNOLOGY, 4 Credits
Students discover the basic concepts of hospitality technology and service automation. The hospitality industry continues to see significant changes in all facets of business due to changing customer expectations, new and cheaper technology, and a challenging labor market. The result of these forces has led the hospitality industry to increasingly turn to automation of basic job tasks to stay competitive. Examines new technologies shaping the hospitality industry and how industry leaders are taking advantage of these new technologies to improve efficiency and service.
Available via Ecampus

HM 321, HOSPITALITY TECHNOLOGY LABORATORY, 4 Credits
Technology is critical to attracting, servicing and retaining hospitality customers. The Hospitality Technology Lab course introduces the student to each facet of technology in the industry. The course provides an opportunity for hands-on practical experience with the latest technology. At the end of the course, the student will have a basic working knowledge of Food 3D printers, hotel property management systems, global distribution systems, booking engines, revenue management solutions and other automation tools like Botlr.
HM 325, ONLINE MARKETING AND REPUTATION MANAGEMENT, 4 Credits
Students are introduced to Online Internet Marketing techniques in the hospitality industry. The course will focus on online marketing, advertising strategies and the importance of a strong internet presence in order to maximize revenue. The course will show how organizations can encourage & capitalize on customer generated content practices to effectively retain customers and generate recurring revenue streams. Available via Ecampus

HM 340, VACATION PROPERTY MANAGEMENT, 4 Credits
The vacation property market is one of the largest segments of the hospitality industry and is forecast to grow further over the next ten years. This course looks at each facet of this market including property development, contracts, management, promotion and financing. The course also explores the additional challenges and opportunities associated with the shared economy such as managing owner relations, homeowner associations, renovations and public policy.

HM 399, SPECIAL TOPICS, 4 Credits
This course is repeatable for 16 credits.

HM 410, HOSPITALITY INTERNSHIP III, 3 Credits
Hospitality Internship III builds on the knowledge the students have gained from their course work and their previous internships (HM 210 & HM 310). Students are required to complete this internship in a hotel, restaurant/food service and/or related hospitality sector. In cooperation with OSU and the sponsoring company, students apply the HM concepts learned in class to a real-world environment. Prerequisite: HM 310 with C- or better

HM 420, REVENUE MANAGEMENT AND PRICING, 4 Credits
Revenue management is critical to the hospitality industry due to the perishable nature of a service-based product. The fundamental principles and concepts of revenue management covered are capacity management, duration control, demand and revenue forecasting, discounting, overbooking practices, displacement analysis, channel management, and pricing execution. Available via Ecampus

HM 425, ADVANCED RESTAURANT MANAGEMENT AND OWNERSHIP, 4 Credits
Covers concept development, design and funding of a new restaurant, and best practices in operations and management of a full-service foodservice operation. Intended for students wishing to develop their knowledge of foodservice entrepreneurialism, creation, operations and management/ownership.

HM 430, SERVICE MANAGEMENT, 4 Credits
With growing access to information and alternative products, customers can choose where to do business based on the level of service they receive. This course will study and analyze service delivery systems for the hospitality industry with particular emphasis on implementing a consumer driven quality service program. This course will review customer service philosophy and techniques. Quality issues, service design and delivery, customer interaction systems, complaint handling and service recovery are also addressed. Available via Ecampus

HM 460, HOSPITALITY INVESTMENT AND ASSET MANAGEMENT, 4 Credits
Covers the principles of hospitality investment and asset management. Provides future hospitality owners/executives with the tools and knowledge to evaluate real estate investments in new hospitality ventures. Tools for financial analysis and assessment, debt and equity financing (public and private), and the use of industry benchmarks are discussed and practiced. Students explore the financial feasibility of a specific hospitality investment while considering financial risk, new income streams, competitor analysis and market forecasting, investment and asset management.

HM 470, ^ADVANCED HOSPITALITY, 4 Credits
Capstone course for the hospitality management degree. Provides students with an in-depth understanding of the importance of core competencies in the hospitality and tourism industry. A broader interpretation of the hospitality industry is gained and the student will discover new and innovative practices within the industry. Students will apply the knowledge gained in this course and the program as a whole to a capstone project with an industry partner. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC

Management (MGMT)

MGMT 364, PROJECT MANAGEMENT, 4 Credits
Covers the tools available to project managers, the human and organizational dimensions in different project environments, some computer applications, cases, and a project. Prerequisite: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better Equivalent to: BA 364 Available via Ecampus

MGMT 446, CROSS-CULTURAL MANAGEMENT, 4 Credits
Provides a comprehensive understanding of cross-cultural management issues including leading culturally diverse workforces and managing diversity in the workplace. Students will not only learn theoretical foundations and best practices to address regarding global work practices, but also learn how to transfer and apply the course materials in this course to their Prerequisite: BA 352 with C or better or BA 352H with C or better Available via Ecampus
MGMT 448, EMPLOYEE RECRUITMENT AND SELECTION, 4 Credits
Provides an in-depth coverage of best practices pertaining to the process of attracting, selecting, and hiring new employees in modern organizations. Topics that will be emphasized include recruitment tactics, legal issues related to staffing, the criteria organizations use to make hiring decisions, and the strengths and weaknesses of various techniques used to evaluate prospective applicants throughout the selection process. The implications of what we discuss for the organization, the hiring manager, and the job-seeker are considered.
Prerequisite: BA 352 with C or better or BA 352H with C or better
Available via Ecampus

MGMT 449, COMPENSATION MANAGEMENT, 4 Credits
Students will understand and design methods of compensation aimed at motivating and rewarding employee contributions to the organization. Employee contributions may include behavior, skills and goods/services that employees produce as individuals, teams, business units, projects or organizations. Topics include pay strategies and structures, performance measurement and evaluation, and various non-salary incentives.
Prerequisite: BA 352 with C or better

MGMT 452, LEADERSHIP, 4 Credits
In-depth study of leadership research, theory and skills. Emphasis on analysis of organizational leadership situations and application of leadership skills in the workplace.
Prerequisite: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 452
Available via Ecampus

MGMT 453, HUMAN RESOURCES MANAGEMENT, 4 Credits
Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management.
Prerequisite: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 453
Available via Ecampus

MGMT 455, INFLUENCE AND NEGOTIATION, 4 Credits
Focuses on analysis, skill development and application of management research to real-life organizational influence, persuasion, negotiation and conflict management situations.
Prerequisite: BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 455
Available via Ecampus

MGMT 457, SUPPLY CHAIN STRATEGY, 4 Credits
Covers tools and concepts needed to manage the supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains.
Prerequisite: BA 357 with C- or better or BA 357H with C- or better
Equivalent to: BA 457
Available via Ecampus

MGMT 477, INTEGRATED HUMAN RESOURCE ANALYTICS PROJECT, 4 Credits
Students will integrate what they have learned to solve industry-sponsored problems. The goal of the class is to provide students with opportunities to design, implement, and evaluate analytic solutions for a real-world enterprise. Student teams will examine the data requirements, technical requirements, and organizational requirements necessary for the success of analytical solutions. The specific goal of the class is to provide students real-world case studies that examine the role of analytics in an organization. Special emphasis will be given to the implementation and leadership of the analytical function in an enterprise.
Prerequisite: BA 474 with C- or better and BA 475 [C-]

MGMT 499, SELECTED TOPICS IN MANAGEMENT, 1-4 Credits
Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. This course is repeatable for 16 credits.

MGMT 546, CROSS-CULTURAL MANAGEMENT, 3 Credits
Develop comprehensive skills to navigate and manage cross-cultural management issues, leveraging best practices for a globalized era. Based on recent evidence-based research, (1) identify the role of culture and its influence on employee behavior at intercultural work settings; (2) develop a perspective to explore the challenges modern organizations face when leading and managing globalizing employees and (3) develop a capacity to effectively manage diverse workforces in cross-cultural settings by enhanced cultural awareness of, and adaptability for different cultures and business norms.
Prerequisite: BA 550 with B- or better

MGMT 548, EMPLOYEE RECRUITMENT AND SELECTION, 4 Credits
Provides an in-depth coverage of best practices pertaining to the process of attracting, selecting, and hiring new employees in modern organizations. Topics that will be emphasized include recruitment tactics, legal issues related to staffing, the criteria organizations use to make hiring decisions, and the strengths and weaknesses of various techniques used to evaluate prospective applicants throughout the selection process. The implications of what we discuss for the organization, the hiring manager, and the job-seeker are considered.
Available via Ecampus
MGMT 549, COMPENSATION MANAGEMENT, 4 Credits
Students will understand and design methods of compensation aimed at motivating and rewarding employee contributions to the organization. Employee contributions may include behavior, skills and goods/services that employees produce as individuals, teams, business units, projects or organizations. Topics include pay strategies and structures, performance measurement and evaluation, and various non-salary incentives.

MGMT 552, ORGANIZATIONAL BEHAVIOR, 3 Credits
Provides evidence-based study of human behavior within organizations with the goal of applying theories of human behavior to effective organizational administration. Topics include understanding individual differences, employee motivation, job design, the evaluation and motivation of employees, group dynamics and team management, effective communications, conflict management, employee stress, and work-life balance.

MGMT 553, HUMAN RESOURCES MANAGEMENT, 4 Credits
Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management.
Equivalent to: BA 553
Recommended: (BA 351 or BA 352 or BA 352H) with a minimum grade of C-
Available via Ecampus

MGMT 555, INFLUENCE AND NEGOTIATION, 4 Credits
Focuses on analysis, skill development and application of management research to real life organizational influence, persuasion, negotiation and conflict management situations.
Prerequisite: BA 516 with C or better
Equivalent to: MGMT 574
Available via Ecampus

MGMT 559, MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY, 3 Credits
Introduces students to contemporary issues managers face making ethical and socially-responsible decisions in an increasingly competitive, transparent, and global environment. Practical examples and cases, as well as contemporary behavioral ethics research and theory are incorporated throughout the course.
Available via Ecampus

MGMT 572, STRATEGIC HUMAN RESOURCE MANAGEMENT, 3 Credits
Students will learn the theories of human resource management, the legal requirements for human resource practices, and how to create an HR measurement system that aligns with an organization’s strategy.
Prerequisite: BA 550 with C- or better
Recommended: BA 516 or equivalent with a minimum grade of C-
Available via Ecampus

MGMT 574, NEGOTIATIONS, 3 Credits
Students will learn the theories of negotiation and the techniques to develop an effective negotiation style.
Equivalent to: MGMT 555
Recommended: BA 516 with a minimum grade of C
Available via Ecampus

MGMT 575, INTEGRATIVE CAPSTONE I, 3 Credits
First course in a two-course sequence spanning the final two quarters of the OLMBA program. Students will conduct an extensive analysis of the student’s organization, the industry and external environment, the organization’s competitors, internal organization, and business level strategy.
Prerequisite: BA 562 with B or better
Available via Ecampus

MGMT 576, INTEGRATIVE CAPSTONE II, 3 Credits
Second course in a two-course sequence spanning the final two quarters of the OLMBA program. Students start from the final proposal in MGMT 575 and formulate an integrative project plan through the application of multidisciplinary knowledge.
Prerequisite: MGMT 575 with B or better
Available via Ecampus

MGMT 650, ORGANIZATIONAL BEHAVIOR, 3 Credits
Surveys research on individual differences, psychological states, and team processes related to work motivation, decision-making and performance.

Marketing (MRKT)
MRKT 323, ADVANCED APPLICATION OF MARKETING PRINCIPLES, 4 Credits
Develop an understanding of how a market-orientation can help firms to profitably deliver value to targeted customers. Through a combination of case discussions, preparation of a client project, lectures and in-class activities, analyze complex marketing challenges; make strategic decisions for products, services, and brands, based on marketing principles; and persuasively communicate decisions.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better
Equivalent to: MRKT 390

MRKT 390, BUILDING AND MANAGING PRODUCTS, SERVICES, AND BRANDS, 4 Credits
Covers concepts and principles used by marketing professionals. Designed explicitly for Marketing majors, it is an introduction to the relationships between customers, products, and companies in a competitive and dynamically evolving marketplace.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better
MRKT 396, FUNDAMENTALS OF MARKETING RESEARCH, 4 Credits
Introduction to the fundamentals of market research. Provides a basic understanding of marketing research and relevant decisions in the process.
Prerequisite: (BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better or ST 202 with C- or better) and (BA 223 [C] or BA 223H [C] or BA 390 [C] or BA 390H [C])
Equivalent to: BA 396
Available via Ecampus

MRKT 477, INTEGRATED MARKETING ANALYTICS PROJECT, 4 Credits
Students will integrate what they have learned to solve industry-sponsored problems. The goal of the class is to provide students with opportunities to design, implement, and evaluate analytic solutions for a real-world enterprise. Student teams will examine the data requirements, technical requirements, and organizational requirements necessary for the success of analytical solutions. The specific goal of the class is to provide students real-world case studies that examine the role of analytics in an organization. Special emphasis will be given to the implementation and leadership of the analytical function in an enterprise.
Prerequisite: BA 474 with C- or better and BA 475 [C-]

MRKT 484, DIGITAL MARKETING PLATFORMS, 4 Credits
Examines the major digital channels and platforms for digital marketing, theories and techniques of digital marketing, implementation considerations, and associated risks and limitations.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Available via Ecampus

MRKT 485, SEARCH MARKETING, 4 Credits
Examines the fundamentals of Search Engine Optimization (SEO) and Search Engine Marketing (SEM) and how they can be integrated into an overall marketing strategy to maximize brand visibility and performance.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Available via Ecampus

MRKT 486, CUSTOMER RELATIONSHIP MANAGEMENT, 4 Credits
An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer life time value, technology solutions that track customer data and employee performance.
Prerequisite: BA 396 with C- or better or MRKT 396 with C- or better
Equivalent to: BA 486
Available via Ecampus

MRKT 488, PROFESSIONAL SALES, 4 Credits
Emphasizes coverage and utilization of principles and theory of personal selling to address sales opportunities in a variety of contexts. Focuses on the use of sales skills by professional salespeople.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 491

MRKT 489, PERSONAL SELLING SKILLS AND TECHNIQUES, 4 Credits
Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 489
Available via Ecampus

MRKT 491, QUALITATIVE RESEARCH METHODS, 4 Credits
Students will gain an overall understanding of qualitative research and methods such as focus groups, in-depth interviews, and observational research. Explores qualitative research methods through hands-on learning and experiences.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Available via Ecampus

MRKT 492, CONSUMER BEHAVIOR, 4 Credits
Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 492
Available via Ecampus
MRKT 493, INTEGRATED MARKETING COMMUNICATIONS, 4 Credits
Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/Advertising managers in implementing the promotion mix.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 493
Available via Ecampus

MRKT 495, RETAIL MANAGEMENT, 4 Credits
Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-middle management decisions.
Prerequisite: BA 390 with C- or better or BA 390H with C- or better or BA 223 with C- or better or BA 223H with C- or better
Equivalent to: BA 495
Available via Ecampus

MRKT 496, MARKETING RESEARCH PRACTICUM, 4 Credits
Provides the student with practical experience in the collection, analysis and interpretation of primary data.
Prerequisite: MRKT 396 with C or better or BA 396 with C or better
Equivalent to: BA 496
Available via Ecampus

MRKT 497, GLOBAL MARKETING, 4 Credits
Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market.
Prerequisite: (BA 347 with C- or better or BA 347H with C- or better) and (BA 390 [C-] or BA 390H [C-] or BA 223 [C-] or BA 223H [C-])
Equivalent to: BA 497

MRKT 498, SERVICES MARKETING, 4 Credits
Formulation of strategic and tactical marketing plans for organizations (both profit and not-for-profit) in the service sector of the economy. Projects or cases are used to provide a comprehensive experience.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 498
Available via Ecampus

MRKT 499, MARKETING STRATEGY, 4 Credits
Market and competitive analysis for developing overall strategies and tactics to achieve the marketing objectives of the business enterprise. Projects or cases are used to provide a comprehensive experience.
Prerequisite: MRKT 396 with C or better or BA 396 with C or better
Equivalent to: BA 499

MRKT 581, APPLIED QUANTITATIVE MARKETING ANALYSIS, 4 Credits
Includes a comprehensive presentation of quantitative methods used in marketing management. It is designed to prepare students to use quantitative techniques in making marketing decisions. Topics include ANOVA, regression, discriminant and logit analysis, factor analysis, cluster analysis, and structural equation modeling.
Prerequisite: BA 596 with C or better or MRKT 596 with C or better

MRKT 582, APPLIED QUALITATIVE MARKETING ANALYSIS, 3 Credits
Explores the uses and application of qualitative research methods to inform and improve marketing decision-making. Students will be introduced to such methods as focus group interviews, individual in-depth interviews, observational research methods, participant observation, and ethnographic immersion. Students will learn appropriate analytic strategies and reporting methodologies.
Prerequisite: BA 596 with C or better or MRKT 596 with C or better

MRKT 584, DIGITAL MARKETING PLATFORMS, 4 Credits
Examines the major digital channels and platforms for digital marketing, theories and techniques of digital marketing, implementation considerations, and associated risks and limitations.
Prerequisite: BA 516 with B- or better
Available via Ecampus

MRKT 585, SEARCH MARKETING, 4 Credits
Examines the fundamentals of Search Engine Optimization (SEO) and Search Engine Marketing (SEM) and how they can be integrated into an overall marketing strategy to maximize brand visibility and performance.
Prerequisite: BA 516 with B- or better
Available via Ecampus

MRKT 586, CUSTOMER RELATIONSHIP MANAGEMENT, 4 Credits
An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer life time value, technology solutions that track customer data and employee performance.
Prerequisite: BA 516 with B- or better
Recommended: MRKT 396 with a minimum grade of C-
Available via Ecampus

MRKT 587, DESIGNING CUSTOMER EXPERIENCES, 3 Credits
Allows students to explore the process of designing customer experiences in ways that allow firms to successfully deliver value in a complex, dynamic competitive environment. Building on knowledge developed through collaboration, generation of customer insights, and mapping exercises, students will work in teams to design a customer experience for an industry client. Lec/studio.
Prerequisite: BA 590 with B- or better and MRKT 592 [B-]
MRKT 588, PROFESSIONAL SALES, 4 Credits
Emphasizes coverage and utilization of principles and theory of personal selling to address sales opportunities in a variety of contexts. Focuses on the use of sales skills by professional salespeople.

MRKT 589, PERSONAL SELLING SKILLS DEVELOPMENT, 4 Credits
Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments.
Recommended: BA 491 or MRKT 488 with a minimum grade of C-
Available via Ecampus

MRKT 592, CONSUMER BEHAVIOR, 3 Credits
Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered.
Prerequisite: BA 516 with B- or better
Equivalent to: BA 592
Available via Ecampus

MRKT 593, INTEGRATED MARKETING COMMUNICATIONS, 3 Credits
Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/advertising managers in implementing the promotional mix.
Prerequisite: BA 516 with B- or better
Equivalent to: BA 593
Available via Ecampus

MRKT 595, RETAIL MANAGEMENT, 4 Credits
Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-management decisions.
Equivalent to: BA 595
Recommended: (BA 390 or BA 390H or BA 590) with a minimum grade of C-
Available via Ecampus

MRKT 596, MARKETING RESEARCH DESIGN AND METHODS, 3 Credits
Focuses on articulating research problems, creating appropriate research design to address information needs (i.e., understanding markets, competitors, and customers), ethics (to include IRB training), and the application of diverse data collection methods, including secondary, qualitative, and quantitative methods. Measurement, sampling, and data preparation will also be addressed.
Equivalent to: BA 596
Recommended: BA 390

MRKT 597, GLOBAL MARKETING, 4 Credits
Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution, and promotion alternatives in a global market.
Equivalent to: BA 597
Recommended: BA 347 and (BA 390 or BA 390H or BA 590) with a minimum grade of C-

MRKT 599, SELECTED TOPICS IN MARKETING, 1-4 Credits
Concepts and methods in advanced marketing management practice. Latest theoretical developments and quantitative methods in marketing, with particular relevance to managerial applications. Topics will vary from term to term.
Equivalent to: BA 599
This course is repeatable for 16 credits.

MRKT 690, MARKETING AND COMMERCIALIZATION, 3 Credits
Surveys marketing research related to innovation. Specific topics may change from quarter to quarter, but sample topics include research on marketing strategy, consumer behavior, brand equity, brand management, and product management, each from the perspective of the consumer and the firm.

Accountancy Graduate Major (MAC)
The Master of Accountancy is a one-year master’s program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master’s degree during their five years of university study required to become a CPA. As an integrated program, the MAC is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MAC is also designed to accommodate post-baccalaureate students wishing to prepare for accounting careers by completing a two-year plan of study.

Accountancy Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Accounting Information Systems (p. 346)
- Dean’s Academy (p. 347)
- International Business (p. 347)

The Accountancy degree at OSU prepares students for high-demand careers in accounting, business and consulting. Our program combines core accounting principles with technology, analytics, qualitative skills, quantitative skills, and critical thinking to help students develop the knowledge and abilities necessary to compete in a rapidly changing business environment. We want our students to be future leaders and key decision makers in their firms, and many recruiters seek our Accountancy majors for internships and full-time positions.

Accountancy students learn the language of business through their interactions with faculty who emphasize both the theoretical and applied aspects of accounting. The faculty in accounting are recognized for their teaching innovations and cutting-edge research. The Accountancy program is ranked in the top 10 universities worldwide for research in accounting systems, and our faculty bring their research and business experience into the classroom. The Accountancy program is also accredited by the AACSB.

Accountancy students must meet all university and college core requirements and progression standards. Students also complete a minimum of 60 credits in upper-division courses (300–400 level) and a minimum of 180 credits to graduate. The Oregon State Board of Accountancy requires a minimum of 225 credits in order to take the Uniform Certified Public Accounting Exam, and the Accountancy program recommends specific courses to complete these hours and prepare for the CPA profession. The Certified Management Accountant program requires 180 credits.

Major Code: 641

- Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
- Understand the implementation issues including financial, legal, operational and administrative procedures involved in starting new business ventures.
- Communicate effectively and professionally in business situations through physical or virtual presence, writing, speaking, listening, and electronic media.
- Demonstrate the ability to lead by using team building skills and facilitating collaborative behaviors in the accomplishment of group goals and objectives.
- Recognize basic concepts and theories related to business ethics and social responsibility.
- Demonstrate knowledge of the ethical behavior appropriate to specific business situations.
- Identify and analyze business problems and opportunities and formulate recommendations for courses of action.
- Use quantitative and qualitative tools and methodologies to support organizational decision making.
- Assess how organizations create value in their global supply chains through the integrated production and distribution of goods, services and information.
- Describe the concept of competitive advantage and how it may be achieved through strategic and tactical methods.
- Analyze the information content of organizational processes.
- Define markets and apply marketing concepts and principles using a customer focus to effectively sell products and services.
- Recognize and appropriately respond to ethical, legal and strategic concerns relating to human resource and organizational management.
- Make basic investment and financing decisions for a business using financial management concepts, and methods.

Accountancy major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division accountancy and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU. Students entering OSU on the Corvallis campus as their first college experience are required to participate in Innovation Nation, the College of Business Living-Learning Community (LLC).

Total Credits: 95

¹ 11 credits from pre-business major satisfy University General Education Requirements.
² 3 credits from the upper-division business core satisfy University General Education Requirements.
Accounting Information Systems Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)

The Accounting Information Systems (AIS) option prepares students for entry-level positions and successful careers in the information management or information systems auditing fields. The program builds on the business, accounting, and computer skills classes required of all accounting students, and prepares students specifically to apply the information technologies to accounting, auditing, and other business tasks.

The program of study that includes the accounting major and these selected courses has been certified by the Information Systems Audit and Control Association. Graduates of this program qualify for one year of work experience toward the Certified Information Systems Auditor designation.

Option Code: 236

Second Year

- BA 272 BUSINESS APPLICATION DEVELOPMENT (or equivalent programming course) 4
- Credits 4

Third Year

- ACTG 378 ACCOUNTING INFORMATION MANAGEMENT 1 4
- BA 371 BUSINESS DATA MANAGEMENT 4
- BA 372 BUSINESS INFORMATION SYSTEMS DESIGN AND DEVELOPMENT 4
- MGMT 364 PROJECT MANAGEMENT 4
- Credits 16

Fourth Year

- ACTG 420 IT AUDITING 4
- BA 479 BUSINESS TELECOMMUNICATIONS AND NETWORKING 4
- BA 480 INFORMATION SYSTEMS SECURITY 4
- BA 483 BUSINESS ANALYTICS 4
- Credits 16
- Total Credits 36

1 The professional business program requires completion of either BA 370 or ACTG 378. ACTG 378 is not included in the total credits completed within the option.

Option Code: 236
Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean’s Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean’s Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Business Administration - College of Business (p. 357)
- Business Information Systems - College of Business (p. 368)
- Finance - College of Business (p. 377)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Option Code: 190

1 Completed on an approved international exchange or study aboard program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

Option Code: 190

Accounting Certificate

Available only at OSU-Cascades.

The Post-Baccalaureate Accounting Certificate program at OSU-Cascades is designed for students who have earned a Bachelor’s degree in a non-accounting field. The curriculum supports the preparation for the Uniform Certified Public Accountant (CPA) Examination, and employment in professional accounting (public, private, or governmental).
Students who are interested in applying to the program should meet with the OSU-Cascades Business Advisor, Maribeth Erlich, to review program and application requirements.

maribeth.erlich@osucascades.edu
541-322-2090

Certificate Code: C191

The Post-Baccalaureate Accounting Certificate (PBAC) is designed for students who have earned one or more baccalaureate degrees and who wish to complete course work in preparation for taking the Uniform Certified Public Accountant examination and/or the Certified Management Accountant examination. The PBAC program includes courses in accounting directly related to preparation for the exams, as well as professional preparation for public or industry accounting.

Application Criteria

The following requirements must be fulfilled prior to registering for the PBAC program. Students must also have earned a baccalaureate degree recognized by the OSU Office of Admissions.

At least 20 of the 36 credits required for the PBAC must be taken in residence at OSU. Any courses transferred from another university must be pre-approved as equivalents and upper division work must be taken from an AACSB accredited business program. A grade of “C” or better is required in each course to remain in the PBAC program.

Certificate Code: C191

Apparel Design Undergraduate Major (BS, HBS)

This major offers the following option(s):

• Dean’s Academy (p. 351)

The apparel design program focuses on market and consumer driven design. The program is designed to prepare students to be professionally ready for jobs in the athletic and outdoor industry. Graduates of the program will be literate in the business of fashion, design, production and marketing.

The Apparel Design major is a professional program (major code 400) offered through the College of Business. Entering students are designated as Pre-Apparel Design majors (major code 453). The lower-division pre-design program requires completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division design curricula. These courses must be completed before the student is eligible for admission to the upper-division studio-based curricula. The lower-division pre-design core coursework may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Admission to the upper-division studio-based Apparel Design major is competitive and is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment may be limited to the number of students who can be served by the faculty and facilities. To apply and be considered for admission, students must meet the following requirements:

* Be declared as a Pre-Apparel Design major.
* Have a minimum OSU cumulative GPA of 2.5, and a minimum cumulative GPA of 2.5 in all lower-division Pre-Apparel Design.
* Have completed and received a C– or better in ALL courses within the lower-division pre-design core by the end of spring term before applying.

Students who have completed their lower-division design courses at a college or university other than OSU must be admitted to the pre-apparel design major their first term and apply to the apparel design major during the normal selection process (typically at the end of spring term each year). Admission into the apparel design major requires completion of DSGN 226 and submission of a portfolio. The portfolio will expect students to submit work that demonstrates competency in fundamental design skills and concepts.

The following courses are recommended for students who need to further develop those design skills:

ART 115 2-D CORE STUDIO
ART 117 3-D CORE STUDIO

Major Code: 400

Pre-Apparel Design Major Code: 453
Identify, define, and describe relevant aspects of a design problem (goals, objectives).

Create a technical package that incorporates technical illustration, construction details, measurement specifications, and material, trim, prints, coloration, and finish details.

Explain how social, environmental, political, cultural, and economic systems, as well as geography relate to the planning, creation, production, merchandising, distribution, and consumption of textile, apparel, and footwear products and resulting company performance.

Create a technical package that incorporates technical illustration, construction details, measurement specifications, and material, trim, prints, coloration, and finish details.

Develop logical product creation strategies regarding materials, trims, construction, print, coloration, and finishes for a specific end use.

Evaluate the prototype in terms of fit, construction, aesthetics, and marketability and make revisions to improve the design.

Demonstrate the ability to select and specify furniture, fixtures, equipment and finish materials in interior spaces.

Recognize and apply design thinking and visual thinking processes to understand the framework of problem solving.

Identify, define and describe design management practice in relation to various types of businesses and business models.

21 credits from lower-division coursework satisfy University General Education Requirements

11 credits from upper-division coursework satisfy University General Education Requirements

* Baccalaureate Core Course (BCC)

A Writing Intensive Course (WIC)

* Courses cannot be counted twice to fulfill requirements of the major

** Students entering design programs should have basic art and illustration skills. ART 115 and ART 117 are highly recommended elective courses

For students who transfer into College of Business business-related programs, the Blueprint transition courses meet the same outcomes as the professional development (Blueprint) course series accounting for the student’s academic year when they transfer into the business program.
The Dean's Academy Option provides students with:

- responsible citizens.
- students who are academically accomplished, visionary leaders and active engagement in the educational process, and seeks to graduate experience. The Dean's Academy encourages intellectual curiosity and maximize both the educational and experiential aspects of their college experience.

The option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean's Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

Option Code: 754

Business Administration Graduate Major (MBA, PhD)

This major offers the following option(s):

- Accounting
- Business Analytics
- Corporate Finance (p. 353)
- Human Resource Management
- Innovation Management
- Marketing
- Organizational Leadership
- Research Thesis
- Strategy, Entrepreneurship and Innovation
- Supply Chain and Logistics Management

Also available via Ecampus.

The Master of Business Administration program features an innovative, advanced business curriculum that ties together the functional disciplines of business. It is open to both business and non-business undergraduates. Core courses include business law, accounting, finance, operations, management and marketing.

The program provides the knowledge and skills that effective leaders need—preparing graduates to create, build and manage global enterprises that are socially responsible. Sustainable businesses operate deftly to simultaneously meet economic, social and environmental challenges. That's why applied projects are woven into our curriculum—so our graduates are ready to make smart, bold moves that solve complex problems and make a positive impact on the world.

The MBA program is a place for students to pursue their dreams and push their boundaries. Students learn to build and lead teams, integrate disciplines, work under pressure and multitask—the same skills they will rely on when they leave campus.

For more information, email OSUMBA@oregonstate.edu or call 541-737-5510
Accounting Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

Graduate option for the PhD in Business Administration.

The primary objective of the accounting option is to train doctoral students for careers as professors at high-quality research-oriented universities. This training includes providing them with a program of course work that will prepare them to conduct quality accounting research, involving them in faculty-sponsored research projects as co-investigators and co-authors, and assimilating them into all aspects of the academic accounting profession (e.g., teaching, research, and service).

Business Analytics Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

Also available via Ecampus.

The MBA Business Analytics graduate option supports a rapidly-growing interest from organizations that need people who can integrate data sets and tools to address opportunities and risks. The information value of both in-house and third-party data sets can now be leveraged using powerful emerging technologies. Increasingly organizations leverage advances in software interoperability, data exchange mechanisms and data mining and visualization techniques to better understand their operations, customers, and markets. This trend has become known as ‘data mining,’ ‘business analytics,’ ‘business intelligence’ or, nowadays, ‘big data’.

Candidates with an undergraduate business major or minor can complete an MBA with business analytics in nine intensive months as full-time
Corporate Finance Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

The Corporate Finance graduate option, within the Master of Business Administration (MBA) program, will provide training for students in financial issues at the firm level. These issues include the process by which companies raise capital, decide on a capital structure, implement hedging strategies, and develop governance structures. The option culminates in a capstone course in the market for corporate control where students will develop the ability to conduct analyses and valuation of transactions in this market. Graduates from this program will be well-suited for careers in traditional corporate finance settings, as well as in investment banking.

Candidates with an undergraduate business major or minor may be able to complete an MBA with a Corporate Finance graduate option in nine intensive months as full-time students. Other college graduates can take Core-1 courses over the summer and join the cohort in the fall. Part-time students can complete the MBA over a longer time frame.

Human Resource Management Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

Human Resource Managers are tasked with finding and attracting diverse and global talent, creating fair and safe workplaces for all employees, developing and maintaining employees through their career stages, and helping people thrive in changing work environments. OSU’s Human Resource Management graduate option focuses on evidence-based and analytics-driven practices and includes course work that spans the traditional functions of the HR office, including best practices related to recruiting, hiring, on-boarding, compensation, and benefits.
Candidates with an undergraduate business major or minor may be able to complete an MBA with a Human Resource Management graduate option in nine intensive months as full-time students. Other college graduates can take Core-1 courses over the summer and join the cohort in the fall. Part-time students can complete the MBA over a longer time frame.

**Option Code: 2065**

The Human Resource Management graduate option within the MBA degree program requires 60 credits of coursework, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 18 credits within the Human Resource Management graduate option.

Total Credits: 60

1 Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

**Option Code: 2065**

**Innovation Management Graduate Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

Also available via Ecampus.

The Innovation Management graduate option, within the Master of Business Administration (MBA) program, emphasizes innovation, technology commercialization, and entrepreneurship to prepare graduates to assume leadership roles in emerging businesses. This MBA graduate option provides the student background, tools and experiential learning in the management of innovative business and technical concepts. A core element of the Innovation Management graduate option is the completion of a self-paced experiential project based on development/analysis of an innovative business or technical concept.

**Length:** The MBA curriculum can be completed within an intensive one-year timeframe. Part-time students, taking six to nine credits per quarter, can complete the program in two years on campus or in Portland.

**Learning Outcomes:**

- Develop a research-driven, investor-ready lean canvas business model and plan to take an innovative idea to market
- Present a compelling argument for funding

Marketing Graduate Option

This option is offered within the following major(s):

• Business Administration - College of Business (p. 351)

Also available via Ecampus.

Marketing is the science of identifying, measuring, and satisfying the demand of a market and is the key driver of firm strategy and the marketing perspective requires managers to consider every interaction the customer has with the company. Marketing students learn to incorporate customer insights and innovative problem-solving to develop and communicate marketing strategy in the digital age. OSU’s Marketing MBA emphasizes marketing theory and application, strategic thinking, and sustainable and ethical decision-making. The Marketing (MRKT) option prepares students for careers in digital marketing and multinational marketing at entities including Fortune 500 companies and other for-profit businesses, government, and non-governmental entities with “in-house” market research departments.

Option Code: 2054

This option requires 60 credit hours of coursework including 15 credit hours of Business Foundations (Core 1) coursework, 27 credit hours of general MBA coursework (Core 2), and 18 credit hours of marketing coursework. Students will complete a comprehensive option capstone project in MRKT 592.

Organizational Leadership Graduate Option

This option is offered within the following major(s):

• Business Administration - College of Business (p. 351)

Also available via Ecampus.

The Organizational Leadership graduate option, within the Master of Business Administration (MBA) program, is designed to serve leaders and professionals from any industry. The program will be delivered on the Corvallis campus, and in Portland as an online/hybrid program in partnership with OSU Ecampus. The number of in-person sessions required for each individual online/hybrid course will depend on the courses learning objectives, with in-person sessions delivered in the Collaborative Life Sciences facility in Portland.

Key Benefits:

• Flexible and affordable program that helps prepare students for leadership roles in established and emerging business organizations.
• Online/hybrid classes blend face-to-face and online sessions to maximize learning and flexibility.
• Management and leadership course content similar to educational content provided in top ranking executive MBA programs.

Length: Part-time students, taking at most two courses per academic quarter, can complete the program in 21 months.

Learning Outcomes: Upon completion of this graduate degree option, graduates will be able to:

• Understand, analyze, and apply ethics frameworks to facilitate corporate social responsibility and ethical decision making (MGMT 559).
• Understand, analyze, and apply human resource management information to facilitate executive level strategic decision making. (MGMT 572).
• Understand, analyze, and apply classical and modern leadership theories and techniques to facilitate leadership effectiveness. (BA 550, MGMT 559).
• Understand, analyze and apply negotiation techniques toward attainment of organizational objectives. (MGMT 574).

Option Code: 2061

The Organizational Leadership graduate option requires 60 credits of course work, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 12 credits within the Organizational Leadership graduate option, and 6 credits for the Integrative Capstone Experience.
The Research Thesis graduate option requires a minimum of 46 credits of course work, including 33 credits of general MBA courses and a minimum of 13 credits within the Research Thesis graduate option.

Option Code: 2064

Strategy, Entrepreneurship, and Innovation Graduate Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

Graduate option for the PhD in Business Administration.

The primary objective of the Strategy, Entrepreneurship and Innovation option is to train doctoral students for careers as professors at high-quality research-oriented universities. This training includes providing them with a program of course work that will prepare them to conduct quality research in strategy and entrepreneurship as well as management and marketing, involving them in faculty-sponsored research projects as co-investigators and co-authors, and assimilating them into all aspects of academics related to innovation and commercialization (e.g., teaching, research, and service).

Sample courses include (but are not limited to):

- AEC 611 ADVANCED MICROECONOMIC THEORY I
- AEC 612 MICROECONOMIC THEORY II
- AEC 625 APPLIED ECONOMETRICS
- AEC 627 COMPUTATIONAL ECONOMICS
- ST 511 METHODS OF DATA ANALYSIS

Additional Courses to Fulfill PhD Requirements

Sample courses include (but are not limited to):

- AEC 611 ADVANCED MICROECONOMIC THEORY I
- ECON 520 GAME THEORY
- ECON 550 INDUSTRIAL ORGANIZATION THEORY AND POLICY
- ST 512 METHODS OF DATA ANALYSIS
- ST 513 METHODS OF DATA ANALYSIS
- ST 551 STATISTICAL METHODS
The SCLM graduate option requires 60 credits of coursework, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 15 credits within the SCLM graduate option, and 3 credits from a list of electives.

**Option Code: 2064**

**Supply Chain and Logistics Management Graduate Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 351)

Also available via Ecampus (http://ecampus.oregonstate.edu/).

The Supply Chain and Logistics Management (SCLM) graduate option, within the Master of Business Administration (MBA) program, offers students an alternative focus for their MBA that includes acquiring a solid mastery of international operations and supply chain and logistics management concepts and methods.

This MBA graduate option prepares graduates for operations, logistics and supply chain management in the service and manufacturing industries. In the past two decades, the loss of manufacturing jobs in the U.S. triggered attrition of innovation capabilities across many sectors of the economy contributing to the current anemic economic recovery. The U.S. needs a professionally-trained workforce that is able to manage internal operations and global supply chains in the manufacturing and service sectors and in government agencies. Well-trained operations and supply chain managers are also needed in global companies that operate outside the U.S., including companies that operate in the Asia-Pacific Rim.

**Learning Outcomes:** Graduates will acquire a solid mastery of global supply chain and international operations management concepts and methods.

- Effectively use concepts of operations and supply chain management and qualitative and quantitative methods to make appropriate decisions in international business contexts that include new and unfamiliar situations.
- Design appropriate management plans for global supply chains that are lawful, ethical and environmentally and socially responsible.
- Develop a global outlook that reflects changes experienced and anticipated by firms and industries and understand the requirements for effective change management in global operations and supply chains.

**Length:** The MBA curriculum can be completed within an intensive one-year time frame. Part-time students, taking six to nine credits per quarter, can complete the program in two years on campus or in Portland.

**Option Code: 2060**

The SCLM graduate option requires 60 credits of coursework, including 15 credits of Core-1 courses, 27 credits of Core-2 courses, 15 credits within the SCLM graduate option, and 3 credits from a list of electives.

1 BA 611 is a one-credit course which must be taken twice.

Total Credits: 60

1 Core-1 requirements may be waived if a candidate has a recent undergraduate major in business, or has completed equivalent course work within an undergraduate business minor.

**Option Code: 2060**

**Business Administration Graduate Minor**

Non-College of Business graduate students interested in the Business Administration minor should contact Graduate Business Programs, College of Business, Austin Hall 326, OSU, Corvallis, OR 97331-2603 or email osumba@bus.oregonstate.edu

**Minor Code: 2049**

**Business Administration Undergraduate Major (BA, BS, HBA, HBS)**

This major offers the following option(s):

- Dean’s Academy (p. 360)
- Digital Marketing (p. 360)
- Entrepreneurship for Business Majors (p. 360)
- Family Business (p. 361)
• General Business (p. 361)
• Hospitality Management (p. 361)
• International Business (p. 361)
• Marketing (p. 362)
• Merchandising Management (p. 362)
• Retail Management (p. 362)
• Supply Chain and Logistics Management (p. 363)

Also available at OSU-Cascades, OSU-Portland and via Ecampus.

The business administration degree provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Students may choose to complete one of the options offered by the College of Business for this degree program, or complete it without an option, providing flexibility to students in how they reach 180 credits.

Major Code: 181

• Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
• Understand the implementation issues including financial, legal, operational and administrative procedures involved in starting new business ventures.
• Communicate effectively and professionally in business situations through physical or virtual presence, writing, speaking, listening, and electronic media.
• Demonstrate the ability to lead by using team building skills and facilitating collaborative behaviors in the accomplishment of group goals and objectives.
• Recognize basic concepts and theories related to business ethics and social responsibility.
• Demonstrate knowledge of the ethical behavior appropriate to specific business situations.
• Identify and analyze business problems and opportunities and formulate recommendations for courses of action.
• Use quantitative and qualitative tools and methodologies to support organizational decision making.
• Assess how organizations create value in their global supply chains through the integrated production and distribution of goods, services and information.
• Describe the concept of competitive advantage and how it may be achieved through strategic and tactical methods.
• Analyze the information content of organizational processes.
• Define markets and apply marketing concepts and principles using a customer focus to effectively sell products and services.
• Recognize and appropriately respond to ethical, legal and strategic concerns relating to human resource and organizational management.
• Make basic investment and financing decisions for a business using financial management concepts, and methods.

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Business Administration major requirements are divided into two parts—lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

1 MTH 241 and ECON 201 and ECON 202, WR 222, WR 322, WR 323 or WR 327, and COMM 111 or COMM 114 or COMM 218 meet the university’s Baccalaureate Core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other Baccalaureate Core requirements and the other requirements for baccalaureate degrees. (See Requirements for Baccalaureate Degrees.)

2 For students who transfer into College of Business business-related programs, the Blueprint transition courses meet the same outcomes as the professional development (Blueprint) course series accounting for the student’s academic year when they transfer into the business program.
400-level courses are considered upper-division courses. Any Honors (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

### Entrepreneurship for Business Majors Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

The Entrepreneurship for Business Majors option prepares students to establish their own business, to operate in growing businesses, to become involved in family-owned businesses, or to work with innovative divisions within larger organizations. The program combines classroom study with case analysis to provide students with the knowledge and skills necessary for success.

Family Business Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

Family businesses are the dominant form of economic organization within the state of Oregon and the Pacific Northwest. It is vital to understand the dynamics within a family business to arm family members and non-family consultants and executives with the knowledge they need to help the family firm succeed.

The curriculum of the Family Business option is intended to prepare students for leadership positions within a family firm. With a focus on entrepreneurship, it offers students the opportunity to develop their entrepreneurial talents while providing a solid foundation on the risks and challenges facing a family firm, including finances, legal issues, marketing and succession planning. The curriculum will prepare future family business leaders to balance the well-being of the business, the family, and individuals, as they address the challenges and opportunities which inevitably arise, day to day and during succession.

Option Code: 786

The Family Business option requires a total of 24 credits beyond the undergraduate business core.

Total Credits 24

Option Code: 786

General Business Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

Also available at OSU-Cascades and via Ecampus.

Option Code: 201

All students in the General Business option must take 24 credits of upper-division College of Business courses in addition to the undergraduate business core curriculum. A minimum of 12 credits must be 400 level. Courses must be pre-approved by an advisor prior to beginning this option.

Option Code: 201

Hospitality Management Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

Also available at OSU-Cascades and via Ecampus.

Course work within the Hospitality Management Option is aimed at developing the students’ knowledge of strategic thinking and its application to the hospitality industry. We define the hospitality industry as including all organizations that provide overnight accommodations and/or food service, to include hotels, destination resorts, hospitals, residence halls, cruise ships, etc.

The proposed courses were selected based on research on workforce development needs, feedback from industry partners/advisors and how these courses would compliment the existing business major curriculum. Input from prospective and existing students in the Hospitality Management Degree was also considered. Specifically, the decision to offer the option through Ecampus was primarily driven from this feedback.

Students graduating from the program are required to possess knowledge of forces in the hospitality industry’s environment that drive change. Furthermore, they should be able to assess the impact of these forces on the hospitality industry, which will enable them to appreciate the cause and effect relationship between the forces that drive change and the firms within the industry. This, in essence, will provide students with the tools to be effective leaders in the hospitality industry.

Total Credits 24

Option Code: 491

International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Business Administration - College of Business (p. 357)
- Business Information Systems - College of Business (p. 368)
- Finance - College of Business (p. 377)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)

Also available at OSU-Cascades.

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact
business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Select a minimum of 18 credits of business or business related course work

Total Credits 24

1. Completed on an approved international exchange or study aboard program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

**Option Code: 753**

**Merchandising Management Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

Students in the Merchandising Management option prepare for retail management positions, merchandising positions related to product development and manufacturing, and merchandising positions related to retail. In a global, diverse, and fast-paced, competitive environment, merchandisers are involved in market analysis, business planning, assortment planning, sourcing, pricing, distribution and visual presentation of apparel and textile products to satisfy the needs of the consumer.

^ Writing Intensive Course (WIC)

**Option Code: 782**

**Retail Management Option**

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

Also available via Ecampus.

The Retail Management option covers management and marketing strategies for the retail industry. The program includes all the steps required to bring the customers into the store and fulfill their buying needs. A retail store manager is responsible for ensuring that a store operates efficiently and profitably and that its employees perform adequately. They are responsible for a store’s sales and employee schedule, resolving problems that arise in the store and coordinating a store’s activities.

All courses in the Retail Management option are offered via Ecampus.

**Option Code: 753**
Option Code: 744

Supply Chain and Logistics Management Option

This option is offered within the following major(s):

- Business Administration - College of Business (p. 357)

The Supply Chain and Logistics Management (SCLM) option, within the Business Administration (BA) undergraduate major, offers students an alternative focus that includes acquiring a solid mastery of international operations and supply chain and logistics management concepts and methods.

This undergraduate option prepares graduates for operations, logistics, procurement and supply chain management in the service and manufacturing industries. In the past two decades, the loss of manufacturing jobs in the U.S. triggered attrition of innovation capabilities across many sectors of the economy contributing to the current anemic economic recovery. The U.S. needs a professionally-trained workforce that is able to manage internal operations and global supply chains in the manufacturing and service sectors and in government agencies. Well-trained operations and supply chain managers are also needed in global companies that operate outside the U.S., including companies that operate in the Asia-Pacific Rim.

Option Code: 694

Business Analytics Graduate Certificate

Also available at OSU-Portland and via Ecampus.

Today's organizations—businesses, corporations, nonprofits and others—want to better utilize available information in operational, tactical, and strategic decision making. The information value of both in-house and third party data sets can now be leveraged using powerful emerging technologies. Increasingly organizations leverage advances in software interoperability, data exchange mechanisms and data mining and visualization techniques to better understand their operations, customers, and markets. This trend has become known as ‘data mining,’ ‘business analytics,’ ‘business intelligence’ or, nowadays, ‘big data.’

This certificate is targeted at three types of professionals:

- Managers seeking to expand the use of data analytics within their organizations.
- Information systems professionals charged with marshaling available organizational data for analytical processes.
- Business analytics professionals performing data analysis to support decision making, strategy formation, and operational improvement.

Business Analytics Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Dean’s Academy (p. 365)
- Digital Marketing Analytics (p. 366)
- Human Resource Analytics (p. 366)
- Market Research and Consumer Analytics (p. 366)

Also available via Ecampus.
In the business analytics core, students will be introduced to topics and techniques associated with data mining, data visualization, text mining, and advanced statistical tools and techniques.

**Major Code: 899**

- Identify and describe complex business problems in terms of analytical models.
- Apply the primary statistical, quantitative and business analytics tools and techniques to support common business decision-making applications.
- Analyze the applications of business analytics in real-world business situations.
- Communicate technical information to both technical and non-technical audiences in writing and with visualizations.
- Demonstrate ethical decision-making in structured or unstructured and ambiguous situations.

Business Analytics major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division Business Analytics and business curricula. The lower-division business core coursework may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

### Code Title Credits

**Summary of Requirements**

The coursework completed must satisfy all degree requirements and total to a minimum of 180 credit hours to earn the degree

</table>

**Total credits required for graduation** 180

1. 11 credits from lower-division business core satisfy University General Education Requirements
2. 3 credits from upper-division business core satisfy University General Education Requirements

### Business Analytics Core Curriculum (85-91)

The business analytics core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate coursework and further develop decision-making skills through the analysis of business cases.

#### First Year

Students entering OSU on the Corvallis campus as their first college experience are required to participate in Innovation Nation, the College of Business Living-Learning Community (LLC). These students, as well as students who transfer in the winter term into the business analytics major from another college or university, will complete the following three-course sequence during their first year:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 160</td>
<td>B-ENGAGED</td>
</tr>
</tbody>
</table>

or BA 163 or B-ENGAGED

<table>
<thead>
<tr>

**Dean’s Academy Option**

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

**Option Code: 754**

To earn the Dean's Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

**Human Resource Analytics Option**

This option is offered within the following major(s):

- Business Analytics - College of Business (p. 363)

Also available via Ecampus.

Although broadly defined, human resources analytics is basically a sector within the broader field of analytics that involves the application of analytic processes within a human resource department for the purpose of improving employee performance. Specifically, human resources analytics involves providing insight regarding the process of gathering data and making advantageous, relevant decisions about how human resource processes can be improved upon. The Human Resource Analytics option trains students to use a data-driven approach to managing people-related issues, such as recruiting, performance evaluation, hiring and promotion, compensation, and employee retention.

**Option Code: 902**

**Market Research and Consumer Analytics Option**

This option is offered within the following major(s):

- Business Analytics - College of Business (p. 363)

Also available via Ecampus.

Market research analysts collect and analyze data to study market conditions and help businesses to promote their services and products. These professionals gather and interpret data on consumer demographics, needs, preferences and buying habits by using statistical techniques and software.

**Option Code: 904**
Business Fundamentals Graduate Certificate

Also available via Ecampus.

The BFGC program provides a means for individuals with undergraduate degrees in fields other than business to gain exposure to, and understanding of, basic functional business skills. Skills acquired in this program can expand performance and career opportunities in both not-for-profit and for-profit organizations. The curriculum can be completed in as little as one summer, or on a part time basis.

Business Graduate Major (MSB)

This major offers the following option(s):

- Finance (http://catalog.oregonstate.edu/college-departments/business/business-msb/finance-option/)
- Financial Analytics (http://catalog.oregonstate.edu/college-departments/business/business-msb/financial-analytics-option/)
- Financial Planning (p. 367)
- Marketing Insights and Analytics (p. 367)
- Supply Chain Analytics (p. 368)

Also available via Ecampus.

The MSB provides students a focused exploration of a specific business discipline or topic. The degree program offers two specializations: Financial Planning and Supply Chain Analytics.

Financial Planning encompasses individual wealth management planning including such topics as tax planning, estate planning, insurance, retirement planning, and portfolio allocation. An MSB in Financial Planning leads to a candidate earning a Certified Financial Planning designation.

Supply Chain Analytics is a combination of the disciplines of Supply Chain and Logistics Management and Business Analytics. Supply Chain and Logistics Management develops a solid mastery of international operations, logistics, and supply chain management concepts and methods. Business Analytics leverages advances in software interoperability, data exchange mechanisms and data mining and visualization techniques to better understand their operations, customers, and markets enabling graduates to manage internal operations and global supply chains in the manufacturing and service sectors and in government agencies. The combination of these two disciplines into Supply Chain Analytics is a unique focus on the uses of data management and data analytics to explore the characteristics of supply chains and identify value-enhancing efficiencies.

Major Code: 2067

The MSB requires 45 credit hours of coursework. The curriculum includes:

- Five courses of general business foundational knowledge for 15 credits
- Minimum of 30 credits specific to the desired concentration

Financial Planning Graduate Option

This option is offered within the following major(s):

- Business (MSB) - College of Business (p. 367)

This option gives current wealth management professionals a graduate credential and qualify them to seek the Certified Financial Planner designation. Financial Planning focuses on the individual and the discipline around wealth management, tax, estate, retirement, and insurance planning. The role of the financial planner is to both understand the goals and resources of a client and to plan and communicate options for the client to achieve these goals. At many levels, the financial planner is tasked with aiding clients to form a realistic understanding of their economic condition and prospects and to aid in maintaining and building their clients’ economic standing.

Marketing Insights and Analytics Graduate Option

This option is offered within the following major(s):

- Business (MSB) - College of Business (p. 367)
Marketing is the science of identifying, measuring, and satisfying the demand of a market. Marketing is a key driver of firm strategy and the marketing perspective requires managers to consider every interaction the customer has with the company. Marketing students learn to incorporate customer insights and innovative problem-solving to develop and communicate marketing strategy. Data analytics leverages advances in software interoperability, data exchange mechanisms, and data mining/visualization techniques to better understand operations, customers, and markets. The combination of Marketing Insights, which provides the theoretical understanding of determinants of customer behavior, and Business Analytics, which provides the big data analytical techniques, helps to provide the critical link between the promise of abundant data and actionable insights gleaned from these data.

This option targets the efficient allocation of resources marshalled for an economic purpose and to inform this process utilizing the wealth of business data available. Supply Chain Analytics specifically stimulates economic growth and social progress through the optimization of processes throughout the supply chain based on the collection and analysis of substantial data.

### Option Code: 2069

**Business Information Systems Undergraduate Major (BA, BS, HBA, HBS)**

This major offers the following option(s):

- Dean’s Academy (p. 370)
- International Business (p. 371)

This major offers the following option(s):

- Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
- Understand the implementation issues including financial, legal, operational and administrative procedures involved in starting new business ventures.
- Communicate effectively and professionally in business situations through physical or virtual presence, writing, speaking, listening, and electronic media.
- Demonstrate the ability to lead by using team building skills and facilitating collaborative behaviors in the accomplishment of group goals and objectives.
- Recognize basic concepts and theories related to business ethics and social responsibility.
- Demonstrate knowledge of the ethical behavior appropriate to specific business situations.
- Identify and analyze business problems and opportunities and formulate recommendations for courses of action.
- Use quantitative and qualitative tools and methodologies to support organizational decision making.
- Assess how organizations create value in their global supply chains through the integrated production and distribution of goods, services and information.
- Describe the concept of competitive advantage and how it may be achieved through strategic and tactical methods.
• Analyze the information content of organizational processes.
• Define markets and apply marketing concepts and principles using a customer focus to effectively sell products and services.
• Recognize and appropriately respond to ethical, legal and strategic concerns relating to human resource and organizational management.
• Make basic investment and financing decisions for a business using financial management concepts, and methods.

BIS major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division BIS and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU. Students entering OSU as the professional development (Blueprint) course series accounting program for the student’s academic year when they transfer into the business programs, the Blueprint transition courses meet the same outcomes and institutions, writing II, and speech, respectively. All students must meet the other Baccalaureate Core requirements and the other requirements for baccalaureate degrees. (See Requirements for Baccalaureate Degrees.)

For students who transfer into College of Business business-related programs, the Blueprint transition courses meet the same outcomes as the professional development (Blueprint) course series accounting for the student’s academic year when they transfer into the business program.

Business Administration Core Curriculum (95) ¹

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

## Dean’s Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.
The Dean’s Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean’s Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Business Administration - College of Business (p. 357)
- Business Information Systems - College of Business (p. 368)
- Finance - College of Business (p. 377)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Option Code: 190

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

Option Code: 190

Business Minor

Also available at OSU-Cascades and via Ecampus (http://ecampus.oregonstate.edu/online-degrees/undergraduate/minors/).

The Business Minor allows students to attain a basic understanding of the fundamentals of business essential to any career path. Students will develop an understanding of the language of business that will enable them to comprehend and communicate financial information, organizational behavior, marketing and operations.

Interested students must view an online orientation (http://business.oregonstate.edu/advising/business-entrepreneurship-minor/) and meet requirements stated therein before they can declare the minor.

Design and Human Environment Graduate Major (MA, MS, PhD)

Graduate Areas of Concentration

Apparel design, cultural and historic aspects of the near environment, human behavior in the near environment, interior design, merchandising management, and textiles

Admission to the Design and Human Environment graduate major has been suspended, November 2015.

The School of Design and Human Environment offers graduate work leading toward Master of Science, Master of Arts, and Doctor of Philosophy degrees in Design and Human Environment.

Areas of concentration for MS and MA degrees include apparel design, cultural and historic aspects of the near environment, human behavior in the near environment, interior design, merchandising management, and textiles.

Areas of concentration for the PhD degree include cultural and historic aspects of the near environment, human behavior in the near environment, merchandising management, and textiles.

Graduate programs in DHE prepare students for college and university teaching, research and creative scholarship; careers in design, product development, product quality assurance or merchandising; historic/cultural research, collection management, and preservation of textile and architectural artifacts; and public policy.

Research is a central component of the DHE graduate program. Students have an opportunity to work on research and creative scholarships with internationally recognized faculty members who have published in the areas of historic costume, human behavior and the near environment, apparel design, interior design, fashion theory, consumer behavior, and housing.

For further information, visit the College of Business website (http://gradschool.oregonstate.edu/programs/4410/design-and-human-environment-phd-ma-ms-minor/), email MBAInfo@bus.oregonstate.edu or call 541-737-5510.

Design and Human Environment Graduate Minor

Minor Code: 4410

Minor Code: 4410

Design and Innovation Management Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Dean’s Academy (p. 374)

The Design and Innovation Management Major is a professional program offered through the College of Business. This program is designed for students who want a management role in a design field. Gain necessary skills in marketing, finance, leadership, strategy, and supply chain. This option provides students with an integrated focus on the role of design in the creation and management of strategic and sustainable advantage.

Major Code: 912

- Identify, define, and describe relevant aspects of a design problem (goals, objectives).
- Create a technical package that incorporates technical illustration, construction details, measurement specifications, and material, trim, prints, coloration, and finish details.
- Explain how social, environmental, political, cultural, and economic systems, as well as geography relate to the planning, creation, production, merchandising, distribution, and consumption of textile, apparel, and footwear products and resulting company performance.
- Create a technical package that incorporates technical illustration, construction details, measurement specifications, and material, trim, prints, coloration, and finish details.
- Develop logical product creation strategies regarding materials, trims, construction, print, coloration, and finishes for a specific end use.
- Evaluate the prototype in terms of fit, construction, aesthetics, and marketability and make revisions to improve the design.
- Demonstrate the ability to select and specify furniture, fixtures, equipment and finish materials in interior spaces.
- Recognize and apply design thinking and visual thinking processes to understand the framework of problem solving.
- Identify, define and describe design management practice in relation to various types of businesses and business models.

The Design and Innovation Management major requirements are divided into two parts—lower-division and upper-division. The lower-division design core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division design curricula. The lower-division design core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU. Students entering design programs should have basic art and illustration skills. ART 115 and ART 117 are highly recommended elective courses.

^MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY

^RESPONSIBILITY
Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean's Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

Option Code: 754
Entrepreneurship and Innovation Management Graduate Minor

The graduate minor in Entrepreneurship and Innovation Management emphasizes innovation, technology commercialization, and entrepreneurship to prepare graduate students to create research-driven, investor-ready lean canvas business models and plans to take an innovative idea to market.

Only non-COB graduate students are eligible to complete the Entrepreneurship and Innovation Management graduate minor.

Minor Code: 2066

This minor requires 15 credits of course work for Master’s programs and 18 credits of course work for Doctoral programs.

Doctoral students take one additional graduate course from the College of Business as an elective (3 credits)

Minor Code: 2066

Entrepreneurship Minor

The Entrepreneurship minor teaches you to recognize business opportunities, equips you with skills to secure funding, and provides insight on how to manage the commercialization of the business opportunity. Fundamental business classes are combined with those designed to specifically address the challenges of launching a new venture or an idea within an existing organization. With an innovative curriculum taught by dedicated professors, the Entrepreneurship minor provides a fundamental stepping-stone on the road to identifying and commercializing business opportunities in any type of organization.

Minor Code: 809

Required Courses

**Microeconomics**

AEC 250  *INTRODUCTION TO ECONOMICS AND POLICY*  3
or ECON 201  *INTRODUCTION TO MICROECONOMICS*
or ENGR 390  ENGINEERING ECONOMY

**Accounting**

BA 211  FINANCIAL ACCOUNTING  4
& BA 213  and MANAGERIAL ACCOUNTING
or BA 315  ACCOUNTING FOR DECISION MAKING

**Introduction to Entrepreneurial Processes**

BA 167  LAUNCH PAD I  4-6
& BA 168  and LAUNCH PAD II
or BA 260  INTRODUCTION TO ENTREPRENEURSHIP

**Venture Finance**

BA 464  NEW VENTURE FINANCING  4

**Innovation Management**

BA 363  TECHNOLOGY AND INNOVATION MANAGEMENT  4

Electives  8

Complete a minimum of 8 credits from the following list of courses

BA 362  SOCIAL ENTREPRENEURSHIP AND SOCIAL INITIATIVES
BA 365  FAMILY BUSINESS MANAGEMENT
BA 367  LAUNCH ACADEMY
BA 368  ADVANCED LAUNCH ACADEMY
BA 458  INNOVATION AND NEW PRODUCT DEVELOPMENT
BA 460  VENTURE MANAGEMENT
BA 467  NEW VENTURE LABORATORY
BA 468  TECHNOLOGY COMMERCIALIZATION

Discipline-Specific Electives

**Forestry Electives**

Wood Science

WSE 250  CAD: COMPUTER AIDED DESIGN
WSE 350  WOODWORKING FOR ART AND DESIGN
WSE 351  ADVANCED CAD: COMPUTER AIDED DESIGN
WSE 406  PROJECTS
WSE 450  FURNITURE DESIGN I
WSE 451  FURNITURE DESIGN II
WSE 455  INDUSTRIAL MARKETING IN THE FOREST SECTOR

Forest Engineering

FE 312  FORESTRY FIELD SCHOOL
FE 370  HARVESTING OPERATIONS
FE 371  HARVESTING PROCESS ENGINEERING
FE 440  FOREST OPERATIONS ANALYSIS
FE 456/FOR 459  FOREST MANAGEMENT PLANNING AND DESIGN I
FE 460  FOREST OPERATIONS REGULATIONS AND POLICY ISSUES
FE 469/FOR 469  FOREST MANAGEMENT PLANNING AND DESIGN II
FE 471  HARVESTING MANAGEMENT
FE 480  FOREST ENGINEERING PRACTICE AND PROFESSIONALISM

Public Health and Human Sciences

**Public Health**

H 210  *INTRODUCTION TO THE HEALTH CARE SYSTEM*
H 225  *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS*
H 250  INTRODUCTION TO HEALTH CARE MANAGEMENT
H 319  INTRODUCTION TO HEALTH POLICY
H 320  INTRODUCTION TO HUMAN DISEASE
H 422  ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE
H 436  ADVANCED TOPICS IN HEALTH CARE MANAGEMENT
H 457  FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS
H 458  REIMBURSEMENT MECHANISMS
H 468  FINANCING AND ADMINISTRATION OF LONG-TERM CARE
H 476  *PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS*
H 489  EMERGENCY AND DISASTER MANAGEMENT
H 495  DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH

**Human Development and Family Science**

HDFS 341  FAMILY STUDIES
HDFS 360  CRITICAL THINKING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES
HDFS 431  FAMILY SCHOOL, AND COMMUNITY COLLABORATION
HDFS 444  FAMILY VIOLENCE AND NEGLECT
HDFS 447  *FAMILIES AND POVERTY*
HDFS 460  FAMILY POLICY

**Nutrition**

NUTR 311  FOODSERVICE PRODUCTION AND PURCHASING
NUTR 312  *ISSUES IN NUTRITION AND HEALTH*
NUTR 319  PROMOTING FOOD AND NUTRITION
NUTR 423  COMMUNITY NUTRITION
Family Business Minor

Family businesses are the dominant form of economic organization within the state of Oregon and the Pacific Northwest. It is vital to understand the dynamics within a family business to arm family members and non-family consultants and executives with the knowledge they need to help the family firm succeed.

The Family Business minor is intended to prepare students for leadership positions within a family firm. With a focus on entrepreneurship, it offers students the opportunity to develop their entrepreneurial talents while providing a solid foundation on the risks and challenges facing a family firm, including finances, legal issues, marketing and succession planning. The curriculum will prepare future family business leaders to balance the well-being of the business, the family and individuals, as they address
the challenges and opportunities which inevitably arise, day to day and during succession.

Minor Code: 783

The College of Business Finance Minor allows students to expand their field of study and specialize within a quantitative and applied business discipline. The minor is best-suited for students with either a current quantitative major, or a strong interest in working with numbers. Within the minor students may pursue either a general finance, corporate finance, or investment specialization. The minor will offer potential opportunities for students who wish to leverage their existing major and distinguish themselves for employment within many business settings.

Finance Minor

Minor Code: 783

Finance Undergraduate Major (BA, BS, HBA, HBS)

This major offers the following option(s):

- Dean's Academy (p. 380)
- International Business (p. 380)

Also available via Ecampus.

The goal of the finance program at OSU is to prepare students for careers in institutional finance, which includes careers in banking, brokerage, insurance and other fields. Individuals entering a career with a financial institution have many opportunities open to them. Many who go into banking select career paths in either operations or lending. Within the lending area, finance majors can specialize in installment credit lending to consumers of durable goods, mortgage lending to home builders and buyers, or commercial lending to help finance the growth of businesses.

People entering the securities industry find careers as stock and bond brokers, security analysts or portfolio managers. Individuals choosing the area of insurance typically enter company operations through either claims or underwriting positions. Those with sales positions can choose to work either with corporations or individuals as a client base. In addition, many decide to work for the government as finance personnel in charge of revenue and expenditure programs.

Financial managers engage in many activities designed to ensure the efficient use of an individual's or organization's capital resources. The finance field involves the management of funds in our economic system. Because financial managers deal with other people's money, finance is a career choice for individuals who enjoy working with people and who desire challenging assignments. The BS/BA in finance has been accepted into the Chartered Financial Analyst® (CFA) Institute University Recognition Program (http://www.cfainstitute.org/community/university/Pages/recognition_program_for_universities.aspx). This status is granted to institutions whose degree program or programs incorporate at least 70 percent of the CFA Program Candidate Body of Knowledge (CBOK), which

provides students with a solid grounding in the CBOK and positions them well for the CFA exams.

Major Code: 182

- Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
- Understand the implementation issues including financial, legal, operational and administrative procedures involved in starting new business ventures.
- Communicate effectively and professionally in business situations through physical or virtual presence, writing, speaking, listening, and electronic media.
- Demonstrate the ability to lead by using team building skills and facilitating collaborative behaviors in the accomplishment of group goals and objectives.
- Recognize basic concepts and theories related to business ethics and social responsibility.
- Demonstrate knowledge of the ethical behavior appropriate to specific business situations.
- Identify and analyze business problems and opportunities and formulate recommendations for courses of action.
- Use quantitative and qualitative tools and methodologies to support organizational decision making.
- Assess how organizations create value in their global supply chains through the integrated production and distribution of goods, services and information.
- Describe the concept of competitive advantage and how it may be achieved through strategic and tactical methods.
- Analyze the information content of organizational processes.
- Define markets and apply marketing concepts and principles using a customer focus to effectively sell products and services.
- Recognize and appropriately respond to ethical, legal and strategic concerns relating to human resource and organizational management.
- Make basic investment and financing decisions for a business using financial management concepts, and methods.

Finance major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division finance and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

1 Writing Intensive Course (WIC)

1 MTH 241; ECON 201 and ECON 202; WR 222, WR 323 or WR 327, and COMM 111, COMM 114 or COMM 218 meet the university’s Baccalaureate Core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other Baccalaureate Core requirements and the other requirements for baccalaureate degrees. (See Requirements for Baccalaureate Degrees.)

For students who transfer into College of Business business-related programs, the Blueprint transition courses meet the same outcomes as the professional development (Blueprint) course series accounting for the student’s academic year when they transfer into the business program.

International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Business Administration - College of Business (p. 357)
- Business Information Systems - College of Business (p. 368)
- Finance - College of Business (p. 377)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Option Code: 190

Hospitality Management Undergraduate Major (BA, BS, HBA, HBS)

Available only at OSU-Cascades and via Ecampus.

The undergraduate curriculum in hospitality management provides students with the knowledge necessary to become leaders, executives and owners in the hospitality industry. The course work provides students with skills in service, operations management, hospitality technology, food and beverage operations as well as basic business fundamentals in marketing and accounting.

Major Code: 291

- Develop an awareness of the various career opportunities and options within the hospitality industry.
- Understand the importance of outstanding guest service quality, server-guest relationships, and ethics. Comprehend, synthesize, and evaluate elements of professional service management.
- Provide students with a ‘real life’ experience in the hospitality industry.
- Demonstrate the skills and behaviors required during customer involvement to analyze, judge, and act in ways that contribute to customer satisfaction.
- Define and explain food production terms and principles, including food safety and sanitations practices, apply key principles in operating foodservice establishments, and evaluate and critique the effectiveness of such applications.
- Evaluate, analyze and determine the application of human resource theories and principles in maximizing employee performance, employee retention and customer (internal and external) service.
- Explain the application of technology in various hospitality industry segments and in different organizational functional areas.
- Apply strategic management principles to hospitality business operations in maximizing the accomplishment of organizational goals and objectives.
- Evaluate, analyze and determine the application of service marketing theories and principles in promoting hospitality businesses.
- Demonstrate knowledge of and experience in operations relative to the provision of goods and services in Hospitality Management.
- Describe physical and perpetual inventory systems.
- Acquire knowledge of a global perspective and diversity issues as related to hospitality management.

Innovation Management Undergraduate Major (BA, BS, HBA, HBS)

The Innovation Management major is a double-degree program. It can only be added to a primary OSU non-business major. See Academic Regulation 26a (https://catalog.oregonstate.edu/regulations/).

Graduates of the IMDD program will gain expertise in developing new ideas and inventions and learn how to take these ideas through the innovation and commercialization process. The intent is to build upon the "technical" skills developed by students in their primary major while giving them the tools to become more productive and innovative members of the organizations where they will work. It will provide students with a foundation in business basics, such as marketing and accounting, while also building students’ expertise in the innovation and commercialization process.

This major is limited to 45 qualified students per year. Interested students should consult with the College of Business Advising Office, Austin Hall 122, 541-737-3716, for more detail about the declaration requirements and process.

Major Code: 851

- Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
- Generate, select and implement innovative ideas for business success.

A College of Business GPA of 2.50 (OSU grades only) and a minimum grade of C– or above is required in all completed BA course work that is relevant to the degree program. Students may not S/U courses in this major.

- BA 464 NEW VENTURE FINANCING 4
- MRKT 488 PROFESSIONAL SALES 4

Total credits required for graduation 180

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Major Code: 851

Interior Design Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Dean’s Academy (p. 384)

The Interior Design option offers students the opportunity to focus on commercial design with an emphasis on space planning, heating and lighting plans, and interior construction specifications.

The Interior Design major is a professional program (major code 458) offered through the College of Business. Entering students are designated as Pre-Interior Design majors (major code 454). The lower-division pre-design program requires completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division design curriculum. These courses must be completed before the student is eligible for admission to the upper-division studio-based curricula. The lower-division pre-design core coursework may be completed at OSU or any accredited college or university that offers equivalent courses transferrable to OSU.

Admission to the upper-division studio-based Interior Design major is competitive and is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment may be limited to the number of students who can be served.

Major Code: 851
by the faculty and facilities. To apply and be considered for admission, students must meet the following requirements:

- Be declared as a Pre-Interior Design major.
- Have a minimum OSU cumulative GPA of 2.5, and a minimum cumulative GPA of 2.5 in all lower-division pre-Interior Design courses.
- Have completed and received a C– or better in ALL courses within the lower-division pre-design core by the end of spring term before applying.

Students who have completed their lower-division design courses at a college or university other than OSU must be admitted to the pre-Interior design major their first term and apply to the Interior design major during the normal selection process (typically at the end of spring term each year). Admission into the Interior design major requires completion of DSGN 287 and submission of a portfolio. The portfolio will expect students to submit work that demonstrates competency in fundamental design skills and concepts.

The following courses are recommended for students who need to further develop those design skills:

ART 115 2-D CORE STUDIO
ART 117 3-D CORE STUDIO

Major Code: 458

Pre-Interior Design Major Code: 454

- Identify, define, and describe relevant aspects of a design problem (goals, objectives).
- Create a technical package that incorporates technical illustration, construction details, measurement specifications, and material, trim, prints, coloration, and finish details.
- Explain how social, environmental, political, cultural, and economic systems, as well as geography relate to the planning, creation, production, merchandising, distribution, and consumption of textile, apparel, and footwear products and resulting company performance.
- Develop logical product creation strategies regarding materials, trims, construction, print, coloration, and finishes for a specific end use.
- Evaluate the prototype in terms of fit, construction, aesthetics, and marketability and make revisions to improve the design.
- Demonstrate the ability to select and specify furniture, fixtures, equipment and finish materials in interior spaces.
- Recognize and apply design thinking and visual thinking processes to understand the framework of problem solving.
- Identify, define and describe design management practice in relation to various types of businesses and business models.

Interior Design major requirements are divided into two parts. The first part (the pre-design major), usually taken in the first two years, must be completed before formal admission into the major. The second part (Professional School) is usually taken in the last two years after formal admission into the Interior Design major.

</tbody>
</table>

Students entering OSU on the Corvallis campus as their first college experience are required to participate in Innovation Nation, the College of Business Living-Learning Community (LLC). These students will complete the following three-course sequence during their first year:

BA 160 B-ENGAGED
BA 161 INNOVATION NATION–AWARENESS TO ACTION
BA 162 INNOVATION NATION–IDEAS TO REALITY

All other students will complete the following course:

BA 101 BUSINESS NOW

6

All students should also complete:

<table>
<thead>
<tr>
<th>First Year</th>

Second Year

Pre-Interior Design Major Code: 454

Dean’s Academy Option

This option is offered within the following major(s):

- Accounting - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean’s Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean’s Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H). All 300- and
400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

**Management Undergraduate Major** *(BA, BS, HBA, HBS)*

This major offers the following option(s):

- Dean’s Academy (p. 387)
- International Business (p. 388)

**Also available via Ecampus.**

The Management curriculum helps prepare students for careers as professionals and /or supervisors in goods-producing and service organizations. Students obtain theory-driven and practical knowledge for the management of systems, personnel, projects, and quality. The integrative focus of the management program also provides excellent preparation for graduate-level studies in business, law, urban and regional planning, public services administration, and health care administration. Management is the process of planning, organizing, leading and controlling all that encompasses human, material and financial resources in an organizational environment. A management specialization means that you have learned the concepts of getting things done through and with others within organizations.

**Major Code: 196**

- Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
- Understand the implementation issues including financial, legal, operational and administrative procedures involved in starting new business ventures.
- Communicate effectively and professionally in business situations through physical or virtual presence, writing, speaking, listening, and electronic media.
- Demonstrate the ability to lead by using team building skills and facilitating collaborative behaviors in the accomplishment of group goals and objectives.
- Recognize basic concepts and theories related to business ethics and social responsibility.
- Demonstrate knowledge of the ethical behavior appropriate to specific business situations.
- Identify and analyze business problems and opportunities and formulate recommendations for courses of action.
- Use quantitative and qualitative tools and methodologies to support organizational decision making.
- Assess how organizations create value in their global supply chains through the integrated production and distribution of goods, services and information.
- Describe the concept of competitive advantage and how it may be achieved through strategic and tactical methods.
- Analyze the information content of organizational processes.
- Define markets and apply marketing concepts and principles using a customer focus to effectively sell products and services.
- Recognize and appropriately respond to ethical, legal and strategic concerns relating to human resource and organizational management.
- Make basic investment and financing decisions for a business using financial management concepts, and methods.

Management major requirements are divided into two parts – lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division management and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

**Management Program Requirements (180)**

**Management Curriculum (32)**

Management students must complete 32 credits: 16 credits in required courses, 12 credits in an elective management course, and 4 credits of experiential learning.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
The Dean’s Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean’s Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean’s Academy Option provides students with:

• A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.

• Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.

• Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean’s Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

Option Code: 754

International Business Option

This option is offered within the following major(s):

• Accountancy - College of Business (p. 344)
• Business Administration - College of Business (p. 357)
• Business Information Systems - College of Business (p. 368)
• Finance - College of Business (p. 377)
• Management - College of Business (p. 385)
• Marketing - College of Business (p. 389)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

1 Completed on an approved international exchange or study aboard program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

Option Code: 190

Marketing Minor

The Marketing minor provides students with marketing skills and leadership training. Opportunities exist for individuals with marketing skills in a wide variety of positions and career options, including advertising and communications, brand management, market research, sales, retail management, purchasing management and more.

Marketing is the process of “creating, communicating, delivering, and exchanging offerings that have value for customers, clients, partners, and society at large” (American Marketing Association). Marketing consists of a sequence of activities: identifying customer needs, developing goods and services to satisfy those needs, communicating information about products, services, or ideas to potential customers, and distributing to products customers.

Electives

Select 3 courses from the following: 11-12
The heart of marketing is matching supply and demand in a complex, advanced economy. Marketing consists of a sequence of activities: identifying customer needs, developing goods and services to satisfy those needs, communicating information about products to potential customers, and distributing the products to customers. In small firms, a few people must carry out all the marketing functions or activities. Large corporations, on the other hand, tend to hire people with specific skills and leadership training. Opportunities exist for marketing graduates in a wide variety of organizations, including manufacturing firms, service firms, retailers, wholesalers, advertising agencies, the communications media and government agencies. Career options (http://business.oregonstate.edu/marketing/marketing-career-options/) include sales, advertising, retailing, brand management, logistics management, market research, purchasing management and more.

The marketing curriculum provides students with technical marketing skills and leadership training. Opportunities exist for marketing graduates in a wide variety of organizations, including manufacturing firms, service firms, retailers, wholesalers, advertising agencies, the communications media and government agencies. Career options (http://business.oregonstate.edu/marketing/marketing-career-options/) include sales, advertising, retailing, brand management, logistics management, market research, purchasing management and more.

Marketing Undergraduate Major (BA, BS, HBA, HBS)

This major offers the following option(s):

- Dean's Academy (p. 392)
- International Business (p. 392)

Also available via Ecampus.

The marketing curriculum provides students with technical marketing skills and leadership training. Opportunities exist for marketing graduates in a wide variety of organizations, including manufacturing firms, service firms, retailers, wholesalers, advertising agencies, the communications media and government agencies. Career options (http://business.oregonstate.edu/marketing/marketing-career-options/) include sales, advertising, retailing, brand management, logistics management, market research, purchasing management and more.

The heart of marketing is matching supply and demand in a complex, advanced economy. Marketing consists of a sequence of activities: identifying customer needs, developing goods and services to satisfy those needs, communicating information about products to potential customers, and distributing the products to customers. In small firms, a few people must carry out all the marketing functions or activities. Large corporations, on the other hand, tend to hire people with specific potential or skills to fill more specialized job requirements.

**Major Code: 799**

- Recognize entrepreneurial opportunities for new business ventures and evaluate their potential for business success.
- Understand the implementation issues including financial, legal, operational and administrative procedures involved in starting new business ventures.
- Communicate effectively and professionally in business situations through physical or virtual presence, writing, speaking, listening, and electronic media.
- Demonstrate the ability to lead by using team building skills and facilitating collaborative behaviors in the accomplishment of group goals and objectives.
- Recognize basic concepts and theories related to business ethics and social responsibility.
- Demonstrate knowledge of the ethical behavior appropriate to specific business situations.
- Identify and analyze business problems and opportunities and formulate recommendations for courses of action.
- Use quantitative and qualitative tools and methodologies to support organizational decision making.
- Assess how organizations create value in their global supply chains through the integrated production and distribution of goods, services and information.
- Describe the concept of competitive advantage and how it may be achieved through strategic and tactical methods.
- Analyze the information content of organizational processes.
- Define markets and apply marketing concepts and principles using a customer focus to effectively sell products and services.
- Recognize and appropriately respond to ethical, legal and strategic concerns relating to human resource and organizational management.
- Make basic investment and financing decisions for a business using financial management concepts, and methods.

Marketing major requirements are divided into two parts — lower-division and upper-division. The lower-division business core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-division finance and business curricula. The lower-division business core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Business Administration Core Curriculum

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

**Option Code: 754**

To earn the Dean's Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an “H” designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean’s Academy option requirements.

**Option Code: 754**

### International Business Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Business Administration - College of Business (p. 357)
- Business Information Systems - College of Business (p. 368)
- Finance - College of Business (p. 377)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific
assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in an international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within a business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management, and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

1 Completed on an approved international exchange or study abroad program

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

Option Code: 190

**Merchandising Management Minor**

This program was suspended per proposal 94292, July 13, 2015. The Merchandising Management minor emphasizes the merchandising of textile products such as apparel, outdoor gear, and home furnishings.

Minor Code: 416

The following are prerequisites for upper-division courses in the minor:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 215</td>
<td>FUNDAMENTALS OF ACCOUNTING (or equivalent)</td>

<tr>
<td>DHE 271</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

Students in the Merchandising Management program prepare for a variety of positions centered on researching, planning, and executing customer-right assortments of products and services. Graduates from this program can be found working for apparel, footwear, and hardline manufacturers as merchants who assist retailers in building product assortments, as product development coordinators who work with merchants and designers, as demand planners who predict what and how much needs to be produced for a given season, and as product creation support. They can also be found working for retailers as buyers and planners who work together to identify the right quantities and the right products to include in assortments, as merchants who work with buyers and design teams, as in-store merchandisers, and as store managers.

Major Code: 416

- Explain how social, environmental, political, cultural, and economic systems, as well as geography relate to the planning, creation, production, merchandising, distribution, and consumption of textile, apparel, and footwear products and resulting company performance.
- Apply market research skills throughout the line planning and development process to establish line direction in terms of color, style, materials, separates/coordinates balance, and pricing.
- Development assortment plans that are in line with specific target markets, company location and/or selling format, marketplace trends, and performance goals.
- Develop merchandise budgets and analyze and update budgets to meet company performance goals.
- Use industry-relevant technology to formulate and communicate merchandising decisions.
- Apply visual and promotional strategies across different selling formats that would potentially enhance company performance.

Merchandising Management major requirements are divided into two parts—lower-division and upper-division. The lower-division design core program involves completion of courses within the first and second year (see core curriculum below) that build a solid foundation for the upper-
division merchandising curricula. The lower-division design core course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

### Merchandising Management Program Requirements (180)

**Merchandising Management Core Curriculum (98-103)**

The Merchandising Management core curriculum provides students with a broad overview of design thinking and processes.

**Merchandising Management Major (180)**

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests.

### Merchandising Management Major

**First Year**

Students entering OSU on the Corvallis campus as their first college experience are required to participate in Innovation Nation, the College of Business Living-Learning Community (LLC). These students, as well as students who transfer in the winter term into the merchandising management major from another college or university, will complete the following three-course sequence during their first year:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 160</td>
<td>B-ENGAGED</td>
<td>3</td>
</tr>
<tr>
<td>BA 161</td>
<td>INNOVATION NATION—AWARENESS TO ACTION</td>
<td>3</td>
</tr>
<tr>
<td>BA 162</td>
<td>INNOVATION NATION—IDEAS TO REALITY</td>
<td>4</td>
</tr>
</tbody>
</table>

All other students will complete the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 101</td>
<td>BUSINESS NOW</td>
<td>6</td>
</tr>
</tbody>
</table>

Students should also complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 101</td>
<td>*INTRODUCTION TO THE VISUAL ARTS</td>
<td>3</td>
</tr>
<tr>
<td>COMM 111</td>
<td>*PUBLIC SPEAKING</td>
<td>3</td>
</tr>
<tr>
<td>COMM 114</td>
<td>or *ARGUMENT AND CRITICAL DISCOURSE</td>
<td></td>
</tr>
<tr>
<td>COMM 218</td>
<td>or *INTERPERSONAL COMMUNICATION</td>
<td></td>
</tr>
<tr>
<td>DSGN 121</td>
<td>COMPUTER AIDED DESIGN</td>
<td>3</td>
</tr>
<tr>
<td>MTH 111</td>
<td>*COLLEGE ALGEBRA</td>
<td>4</td>
</tr>
<tr>
<td>WR 121</td>
<td>*ENGLISH COMPOSITION</td>
<td>4</td>
</tr>
</tbody>
</table>

General baccalaureate Core courses 20-23

Note: Students entering design programs should have basic art and illustration skills. ART 115, Foundations: 2-D (4), and ART 117, Foundations: 3-D (4), are highly recommended elective courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

Dean's Academy Option

This option is offered within the following major(s):

- Accountancy - College of Business (p. 344)
- Apparel Design - College of Business (p. 348)
- Business Administration - College of Business (p. 357)
- Business Analytics - College of Business (p. 363)
- Business Information Systems - College of Business (p. 368)
- Design and Innovation Management - College of Business (p. 372)
- Finance - College of Business (p. 377)
- Interior Design - College of Business (p. 382)
- Management - College of Business (p. 385)
- Marketing - College of Business (p. 389)
- Merchandising Management - College of Business (p. 393)

The Dean's Academy is designed for high achieving students who wish to maximize both the educational and experiential aspects of their college experience. The Dean's Academy encourages intellectual curiosity and active engagement in the educational process, and seeks to graduate students who are academically accomplished, visionary leaders and responsible citizens.

The Dean's Academy Option provides students with:

- A small, cohort-based program that promotes lifelong learning through personal engagement, intellectual involvement, and a sense of community.
- Designated classes that are smaller, allowing students to engage in thoughtful discussion with their professors and with each other.
- Exclusive opportunities to attend workshops, forums, seminars, and events featuring thought-leaders in business.

Option Code: 754

To earn the Dean's Academy Option, students must complete a minimum of 21 credits, 15 of which must be at the upper-division level, of business or design course work that have been designated as honors sections (i.e., the course has an "H" designation such as BA 160H). All 300- and 400-level courses are considered upper-division courses. Any Honors section offered in the College of Business can be used to satisfy the Dean's Academy option requirements.

Organizational Leadership Graduate Minor

Also available via Ecampus.

The Graduate Minor in Organizational Leadership provides an evidence-based exploration of organizational behavior, negotiations, team management, job design, evaluation and motivation of employees, human resource management, conflict management, employee stress, and work-life balance for non-College of Business graduate students. These skills are applicable across a wide range of disciplines for both Masters and Ph.D. graduate students. Students can customize their minor with a minimum of three to six credits of approved elective credits.

Professional Sales Minor

The Professional Sales minor provides students with skills necessary for success in a sales career, and more broadly, skills useful for building mutually beneficial professional relationships. The ability to sell—that is, the ability to effectively communicate the value of an idea, product, service, or person, and to create win-win situations—is vital to success in a wide variety of positions and career options, including for-profit industry, non-profit organizations, government, and more. Further, many high-level executives and organization leaders start their careers as salespeople and rise to the top of their professions by effectively using sales skills.

Professional selling is the process of initiating, developing, and enhancing customer relationships, and meeting needs by creating, communicating, and delivering value. It consists of a sequence of activities, including: prospecting for potential customers, gaining an understanding of customer needs, communicating the value of an offering as a means of satisfying those needs, earning commitment from a customer, and maintaining and enhancing long-term customer relationships.

Accounting (ACTG)

ACTG 317, EXTERNAL REPORTING I, 4 Credits

Examines the theory and practice of financial accounting, the processing and controls phases of the accounting system, and reporting to external parties. Emphasis is placed on the accounting cycle and financial statement structure and content. The emphasis on the accounting cycle includes the processing and tracing of transaction data from source documents to financial statements.

Prerequisite: (BA 211 with C or better or BA 211H with C or better) and (BA 213 [C] or BA 213H [C])

Equivalent to: BA 317

ACTG 318, EXTERNAL REPORTING II, 4 Credits

Continuation from ACTG 317 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.

Prerequisite: ACTG 317 with C or better

Equivalent to: BA 318

ACTG 319, EXTERNAL REPORTING III, 4 Credits

Continuation from ACTG 318 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources.

Prerequisite: ACTG 318 with C or better

Equivalent to: BA 319
ACTG 321, COST MANAGEMENT I, 4 Credits
Reinforces and builds on the language and concepts of management accounting. Emphasizes different models for product costing and examines their effects on profit planning, budgeting, motivation, and control.
Prerequisite: ACTG 317 with C or better
Equivalent to: BA 321

ACTG 326, ACCOUNTING RESEARCH METHODS AND TOPICS, 2 Credits
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level, as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level, it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisite: (BA 211 with C or better or BA 211H with C or better) and (BA 213 [C] or BA 213H [C])

ACTG 378, ACCOUNTING INFORMATION MANAGEMENT, 4 Credits
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/ rec.
Prerequisite: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 275 [C])
Equivalent to: ACTG 378H, BA 378

ACTG 378H, ACCOUNTING INFORMATION MANAGEMENT, 4 Credits
Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/ rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (BA 213 with C or better or BA 213H with C or better) and (BA 270 [C] or BA 270H [C] or BA 302 [C]) and (BA 275 [C] or BA 275H [C] or BA 275 [C])
Equivalent to: ACTG 378

ACTG 379, ACCOUNTING ANALYTICS, 4 Credits
Covers the analysis of data as it pertains to accounting professionals. The focuses include analytic techniques for decision making and the examination of "big data" involving accounting information. Hands-on experiences will develop skills with select software tools used in data analytics for accounting professionals.
Prerequisite: ACTG 318 with C or better and (ACTG 378 [C] or ACTG 378H [C])

ACTG 405, READING & CONFERENCE, 1-6 Credits
This course is repeatable for 12 credits.

ACTG 414, FORENSIC ACCOUNTING, 2 Credits
Explores the forensic accountant’s role in today's economy. Topics covered include fraud detection and fraud investigation techniques, valuation of closely held businesses, lost profits analyses, and various types of litigation support services. Fundamental legal concepts governing expert witness testimony are also examined, and students are required to quantify economic damages in cases.
Prerequisite: ACTG 319 with C or better

ACTG 415, GOVERNMENTAL AND NOT-FOR-PROFIT, 2 Credits
Introduction to accounting and financial reporting for governmental and not-for-profit organizations. Topics include state, local and federal governmental accounting, including fund accounting and reporting, and accounting for not-for-profit hospitals, universities, and health/welfare organizations.
Prerequisite: ACTG 319 with C or better

ACTG 416, ACCOUNTING RESEARCH AND ANALYSIS, 2 Credits
Covers the theory and practice of corporate financial reporting. It highlights the development of generally accepted accounting principles (GAAP) and accounting policy choices from two perspectives. First, it examines accounting policy making at the macro (standard setter) level as well as to examine the past, present, and future role of standard setters in formulating accounting policy. Second, from the micro or company level it will use cases involving decisions in financial reporting to evaluate accounting conventions, particularly with regard to how those decisions reflect economic reality and the quality of earnings. It will also conduct applied accounting research.
Prerequisite: ACTG 319 with C or better

ACTG 417, ADVANCED ACCOUNTING, 4 Credits
An advanced course in financial accounting theory. Covers corporate combinations, consolidated financial statements, and government and not-for-profit accounting.
Prerequisite: ACTG 319 with C or better
Equivalent to: BA 417
ACTG 420, IT AUDITING, 4 Credits
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.
Prerequisite: (ACTG 319 with C or better or BA 372 with C or better) and ACTG 378 [C]
Equivalent to: BA 420

ACTG 422, STRATEGIC COST MANAGEMENT, 4 Credits
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.
Prerequisite: ACTG 319 with C or better and ACTG 321 [C] and BA 357 [C]
Equivalent to: BA 422

ACTG 424, TAXATION I, 4 Credits
Covers concepts related to business taxation and focuses primarily on 1) basic income tax law as it relates to businesses, 2) the role of income taxes in decision making processes, and 3) basic income tax research. In addition, the course is intended to assist students in preparation to become a professional, and thus contains components designed to aid in the development of technical, analytical, problem-solving and communication skills.
Prerequisite: ACTG 319 with C or better
Equivalent to: ACTG 325

ACTG 425, ADVANCED TAXATION, 4 Credits
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.
Prerequisite: ACTG 424 with C or better

ACTG 427, ASSURANCE AND ATTESTATION SERVICES, 4 Credits
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.
Prerequisite: ACTG 319 with C or better
Equivalent to: BA 427
Available via Ecampus

ACTG 428, ADVANCED AUDIT ANALYTICS, 4 Credits
An advanced four-credit course covering audit theory, current audit practice and auditor professional skills. The equivalent of three credits (30 hours) relates to in-class activities, readings, presentations, research and group discussions of relevant advanced audit topics. The equivalent of one credit (10 hours) relates to understanding the use and future of data analytics in the audit profession. Theory, current audit practice and auditor professional skills.
Prerequisite: ACTG 427 with C or better

ACTG 429, TOPICS IN ACCOUNTING, 1-4 Credits
Analysis of current topics in accounting. Topics will vary from term to term.
Equivalent to: BA 429

ACTG 516, ACCOUNTING RESEARCH AND ANALYSIS, 3 Credits
Emphasis on financial accounting, tax and auditing research and analysis and communication of conclusions in the context of accounting case studies.

ACTG 517, ADVANCED ACCOUNTING, 4 Credits
An advanced course in financial accounting theory. Corporate combinations, consolidated financial statements, foreign operations and subsidiaries, partnerships, and sole proprietorships; contemporary issues in financial accounting.
Equivalent to: BA 517
Recommended: ACTG 319

ACTG 518, ACCOUNTING THEORY AND PRACTICE I, 3 Credits
Expands and integrates knowledge of US and international generally accepted accounting principles (GAAP) in a rigorous study of the design, selection, and consequences of various models of financial reporting.
Prerequisite: (ACTG 516 with C or better and ACTG 517 [C])

ACTG 519, ACCOUNTING THEORY AND PRACTICE II, 3 Credits
Study of the design, selection, and consequences of various models of financial reporting. Research accounting treatments for complex facts and circumstances with ambiguous accounting guidance. Build on financial reporting models to develop in-depth understanding and application of accounting practice.
Prerequisite: ACTG 518 with C or better

ACTG 520, IT AUDITING, 4 Credits
Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills.
Recommended: (ACTG 319 or BA 372) and ACTG 378

ACTG 522, STRATEGIC COST MANAGEMENT, 4 Credits
Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques.
Recommended: ACTG 319, ACTG 321 and BA 357
ACTG 524, INTRODUCTION TO TAXATION, 4 Credits
Meets two major objectives. First, it is a technical introduction to U.S. income tax with emphasis on general and business related topics. Second, it provides a framework for students to launch further study in the tax area. Students will be encouraged to supplement text materials with readings from the Internal Revenue Code and Regulations as well as secondary tax research services.
Prerequisite: BA 528 with C or better

ACTG 525, ADVANCED TAXATION, 4 Credits
Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues.
Recommended: ACTG 424

ACTG 527, ASSURANCE AND ATTESTATION SERVICES, 4 Credits
Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting.
Equivalent to: BA 527
Recommended: ACTG 319

ACTG 529, TOPICS IN ACCOUNTING, 1-4 Credits
Analysis of current topics in accounting. Topics will vary from term to term.
Equivalent to: BA 529

ACTG 620, FOUNDATIONS OF ACCOUNTING RESEARCH, 3 Credits
Introduces first-year doctoral students to accounting research by discussing the development of modern accounting theory, relating it to theories in economics and finance, and exposing students to the different areas of and methodologies used in accounting research. Also begins a survey of classic and contemporary literature in the area of financial accounting research. Specific financial accounting topics may change from quarter to quarter, but sample topics include earnings management, judgment, and accountability in accounting. Specific topics may change from quarter to quarter, but sample topics include research on management incentives and compensation, performance measurement, auditing, corporate governance, and research using behavioral methods.

ACTG 622, ACCOUNTING, JUDGMENT AND ACCOUNTABILITY, 3 Credits
Surveys classic and contemporary research in areas related to management, judgment, and accountability in accounting. Specific topics may change from quarter to quarter, but sample topics include research on management incentives and compensation, performance measurement, auditing, corporate governance, and research using behavioral methods.

ACTG 623, TAX RESEARCH, 3 Credits
Surveys classic and contemporary research in the area of taxation. Specific topics may change from quarter to quarter, but sample topics include tax vs. nontax costs in business decisions, book-tax differences, taxes and financial reporting, multijurisdictional tax issues, and tax avoidance.

Finance (FIN)
FIN 341, INVESTMENTS, 4 Credits
Risk and reward characteristics of investments; sources of investment information; domestic and international security markets; investment characteristics of common stocks, debt securities, convertible securities, option contracts, and investment companies; real property investment; economic market analysis; technical market analysis; tax aspects of investments; and investment management.
Prerequisite: BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better or FIN 340 with C or better or FIN 340H with C or better
Equivalent to: BA 341

FIN 342, ADVANCED FINANCIAL MANAGEMENT, 4 Credits
Capital market theory and the valuation of risky assets, capital budgeting, valuing the firm’s securities, capital structure theory, long-term financing alternatives, cost of capital, dividend policy, working capital management, financial analysis and planning, mergers, and takeovers.
Prerequisite: FIN 340 with C or better or FIN 340H with C or better or BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better
Equivalent to: BA 342

FIN 434, CFA PREPARATION, 2-4 Credits
Provides students with structure and guidance in their preparation for the Chartered Financial Analyst (CFA) Level exam. Students systematically prepare for and are tested on the 18 sections of the exam.
Equivalent to: BA 434
This course is repeatable for 4 credits.

FIN 437, APPLIED PORTFOLIO MANAGEMENT, 2 Credits
Hands-on experience of managing two investment portfolios. Each member in the Oregon State Investment Group (OSIG) should act as a financial analyst to analyze a chosen company by performing the Discounted Cash Flow (DCF) or Residual Income Model (RIM), the relative valuation, and the SWOT analyses. The weekly seminar offers opportunities for students to present their analyses and offer comments and suggestions to other’s presentations.
Equivalent to: BA 437
FIN 438, APPLIED PORTFOLIO MANAGEMENT II, 1 Credit
Each student will act as a financial analyst to analyze a chosen company using models learned in FIN 437. Provides students with an opportunity to practice security valuation and get familiar with the tools. In addition, this course will focus on various measures of portfolio performance.  
Prerequisite: FIN 437 with C- or better or BA 437 with C- or better  
Equivalent to: BA 438

FIN 439, APPLIED PORTFOLIO MANAGEMENT III, 1 Credit
Each student will act as a financial analyst to analyze a chosen company using models learned from FIN 437. Provides students additional opportunity to practice security valuation and strengthen their understanding of the tools. In addition, this course will introduce ways to develop an efficient portfolio.  
Prerequisite: FIN 437 with C- or better or BA 437 with C- or better  
Equivalent to: BA 439

FIN 440, FIXED INCOME SECURITIES, 4 Credits
Provides students with intermediate knowledge of fixed income assets, interest rate and interest rate theory, the tools for estimating values, and managing portfolios of fixed income assets. The course can also serve as a partial coverage of material expected of applicants planning on seeking the Certified Financial Analyst designation.  
Prerequisite: FIN 341 with C- or better

FIN 441, FINANCIAL INSTITUTIONS, 4 Credits
Introduction of markets and institutions that form the economic system of trading financial and real assets both domestically and internationally. The introduction of concepts of financial theory, institutional detail, regulatory environments, and the history of financial markets. Topics include legal, ethical, technological, and global issues facing financial managers, markets, and institutions.  
Prerequisite: BA 240 with C or better or BA 240H with C or better or BA 360 with C or better or BA 360H with C or better or FIN 340 with C or better or FIN 340H with C or better  
Equivalent to: BA 441

FIN 442, FINANCIAL STATEMENT ANALYSIS, 4 Credits
Student develop the understanding and skill to use financial statements for investment decisions, credit decisions, performance analysis, and forecasting. Three main topic areas: analysis overview, accounting analysis, and financial analysis.  
Prerequisite: FIN 342 with C- or better  
Equivalent to: BA 435

FIN 443, PORTFOLIO MANAGEMENT, 4 Credits
An introduction to the construction, revision, and performance evaluation of financial asset portfolios.  
Prerequisite: FIN 341 with C- or better or BA 341 with C- or better  
Equivalent to: BA 443  
Available via Ecampus

FIN 444, FINANCIAL RISK MANAGEMENT, 4 Credits
Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs.  
Prerequisite: FIN 341 with C- or better  
Equivalent to: BA 444

FIN 445, INTERNATIONAL FINANCIAL MANAGEMENT, 4 Credits
International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance.  
Prerequisite: FIN 341 with C- or better and FIN 342 [C-] and (FIN 440 [C-] or FIN 442 [C-] or FIN 443 [C-] or FIN 444 [C-] or FIN 499 [C-])  
Equivalent to: BA 445

FIN 499, SELECTED TOPICS IN FINANCE, 1-4 Credits
Examination of the impact of recent advances in finance on contemporary business. Topic will vary from term to term. This course is repeatable for 16 credits.

FIN 542, INVESTMENTS, 3 Credits
Introduction to the tools and concepts of security analysis and investments; basic security types, including stocks, bonds, options and futures, respective markets and to how these securities are traded; fundamental valuation techniques and theory for stocks and bonds.  
Recommended: BA 360

FIN 543, PORTFOLIO MANAGEMENT, 4 Credits
An introduction to the construction, revision, and performance evaluation of financial asset portfolios.  
Prerequisite: FIN 542 with C or better

FIN 544, FINANCIAL RISK MANAGEMENT, 4 Credits
Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs.  
Equivalent to: BA 544  
Recommended: FIN 542
FIN 545, INTERNATIONAL FINANCIAL MANAGEMENT, 3 Credits
International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance.
Prerequisite: BA 540 with B- or better
Equivalent to: BA 545
Recommended: FIN 341 and FIN 342 and (FIN 440 or FIN 442 or FIN 443 or FIN 444 or FIN 499)

FIN 546, ADVANCED CORPORATE FINANCE, 3 Credits
The second course in the Corporate Finance sequence. Examines corporate payout policies and capital structure choices, choices in debt financing, financial planning and working capital management, and valuation of projects using a real-options approach.
Prerequisite: BA 540 with B- or better

FIN 549, MERGERS AND ACQUISITIONS, 3 Credits
Provides an in-depth examination of the theory and practice of the market for corporate control, primarily focusing on mergers and acquisitions (M&A). The objective of the course is to provide an understanding of how to structure, value, and implement an M&A transaction. Students will be expected to apply the appropriate tools and skills to evaluate M&A transactions.
Prerequisite: FIN 546 with B- or better

FIN 550, FUNDAMENTALS OF FINANCIAL PLANNING, 4 Credits
Professional conduct and regulation, general financial planning principles, and education planning.

FIN 551, INSURANCE PLANNING AND TAX PLANNING, 4 Credits
Risk management and insurance planning; tax fundamentals and income tax planning.
Prerequisite: FIN 550 with B- or better

FIN 552, FINANCIAL PLANNING II, 3 Credits
Retirement planning; qualified and non-qualified retirement plans; IRAs; legal, tax, financial and non-financial aspects of estate planning; trusts; wills; wealth transfers.
Prerequisite: FIN 551 with C or better

FIN 553, FINANCIAL PLANNING III, 6 Credits
Synthesis and integration of financial planning fundamentals to develop a comprehensive financial plan; client communication.
Prerequisite: FIN 552 with C or better

FIN 599, SELECTED TOPICS IN FINANCE, 1-4 Credits
This course is repeatable for 16 credits.

FIN 640, FOUNDATIONS OF FINANCIAL RESEARCH, 3 Credits
Provides an in-depth introduction to the foundations of financial research with an emphasis on theoretical developments and empirical research methods. Specific topics may change from quarter to quarter, but sample topics include theory of the firm, capital structure theory, dividend policy, and event study methodology.

FIN 641, CORPORATE FINANCE SEMINAR, 3 Credits
Survey classic and contemporary research in the area of corporate finance. Specific topics may change from quarter to quarter, but sample topics include capital structure, dividend policy, agency theory, adverse selection and signaling, and non-cooperative games with and without complete information.

FIN 642, CAPITAL MARKETS, 3 Credits
Surveys research on capital markets. Specific topics may change from quarter to quarter, but sample topics include asset pricing models, efficient markets vs behavioral finance, market volatility, volume, new issues market, and emerging markets.

Management (MGMT)

MGMT 364, PROJECT MANAGEMENT, 4 Credits
Covers the tools available to project managers, the human and organizational dimensions in different project environments, some computer applications, cases, and a project.
Prerequisite: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 364
Available via Ecampus

MGMT 446, CROSS-CULTURAL MANAGEMENT, 4 Credits
Provides a comprehensive understanding of cross-cultural management issues including leading culturally diverse workforces and managing diversity in the workplace. Students will not only learn theoretical foundations and best practices to address regarding global work practices, but also learn how to transfer and apply the course materials in this course to their
Prerequisite: BA 352 with C or better or BA 352H with C or better
Available via Ecampus

MGMT 448, EMPLOYEE RECRUITMENT AND SELECTION, 4 Credits
Provides an in-depth coverage of best practices pertaining to the process of attracting, selecting, and hiring new employees in modern organizations. Topics that will be emphasized include recruitment tactics, legal issues related to staffing, the criteria organizations use to make hiring decisions, and the strengths and weaknesses of various techniques used to evaluate prospective applicants throughout the selection process. The implications of what we discuss for the organization, the hiring manager, and the job-seeker are considered.
Prerequisite: BA 352 with C or better or BA 352H with C or better
Available via Ecampus

MGMT 449, COMPENSATION MANAGEMENT, 4 Credits
Students will understand and design methods of compensation aimed at motivating and rewarding employee contributions to the organization. Employee contributions may include behavior, skills and goods/services that employees produce as individuals, teams, business units, projects or organizations. Topics include pay strategies and structures, performance measurement and evaluation, and various non-salary incentives.
Prerequisite: BA 352 with C or better

MGMT 452, LEADERSHIP, 4 Credits
In-depth study of leadership research, theory and skills. Emphasis on analysis of organizational leadership situations and application of leadership skills in the workplace.
Prerequisite: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 452
Available via Ecampus

MGMT 453, HUMAN RESOURCES MANAGEMENT, 4 Credits
Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management.
Prerequisite: BA 351 with C or better or BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 453
Available via Ecampus

MGMT 455, INFLUENCE AND NEGOTIATION, 4 Credits
Focuses on analysis, skill development and application of management research to real-life organizational influence, persuasion, negotiation and conflict management situations.
Prerequisite: BA 352 with C or better or BA 352H with C or better
Equivalent to: BA 455
Available via Ecampus

MGMT 457, SUPPLY CHAIN STRATEGY, 4 Credits
Covers tools and concepts needed to manage the supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains.
Prerequisite: BA 357 with C- or better or BA 357H with C- or better
Equivalent to: BA 457
Available via Ecampus

MGMT 477, INTEGRATED HUMAN RESOURCE ANALYTICS PROJECT, 4 Credits
Students will integrate what they have learned to solve industry-sponsored problems. The goal of the class is to provide students with opportunities to design, implement, and evaluate analytic solutions for a real-world enterprise. Student teams will examine the data requirements, technical requirements, and organizational requirements necessary for the success of analytical solutions. The specific goal of the class is to provide students real-world case studies that examine the role of analytics in an organization. Special emphasis will be given to the implementation and leadership of the analytical function in an enterprise.
Prerequisite: BA 474 with C- or better and BA 475 [C-]

MGMT 499, SELECTED TOPICS IN MANAGEMENT, 1-4 Credits
Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. This course is repeatable for 16 credits.
MGMT 546, CROSS-CULTURAL MANAGEMENT, 3 Credits
Develop comprehensive skills to navigate and manage cross-cultural management issues, leveraging best practices for a globalized era. Based on recent evidence-based research, (1) identify the role of culture and its influence on employee behavior at intercultural work settings; (2) develop a perspective to explore the challenges modern organizations face when leading and managing globalizing employees and (3) develop a capacity to effectively manage diverse workforces in cross-cultural settings by enhanced cultural awareness of, and adaptability for different cultures and business norms.
Prerequisite: BA 550 with B- or better

MGMT 548, EMPLOYEE RECRUITMENT AND SELECTION, 4 Credits
Provides an in-depth coverage of best practices pertaining to the process of attracting, selecting, and hiring new employees in modern organizations. Topics that will be emphasized include recruitment tactics, legal issues related to staffing, the criteria organizations use to make hiring decisions, and the strengths and weaknesses of various techniques used to evaluate prospective applicants throughout the selection process. The implications of what we discuss for the organization, the hiring manager, and the job-seeker are considered.
Available via Ecampus

MGMT 549, COMPENSATION MANAGEMENT, 4 Credits
Students will understand and design methods of compensation aimed at motivating and rewarding employee contributions to the organization. Employee contributions may include behavior, skills and goods/services that employees produce as individuals, teams, business units, projects or organizations. Topics include pay strategies and structures, performance measurement and evaluation, and various non-salary incentives.

MGMT 552, ORGANIZATIONAL BEHAVIOR, 3 Credits
Provides evidence-based study of human behavior within organizations with the goal of applying theories of human behavior to effective organizational administration. Topics include understanding individual differences, employee motivation, job design, the evaluation and motivation of employees, group dynamics and team management, effective communications, conflict management, employee stress, and work-life balance.

MGMT 553, HUMAN RESOURCES MANAGEMENT, 4 Credits
Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management.
Equivalent to: BA 553
Recommended: (BA 351 or BA 352 or BA 352H) with a minimum grade of C
Available via Ecampus

MGMT 555, INFLUENCE AND NEGOTIATION, 4 Credits
Focuses on analysis, skill development and application of management research to real life organizational influence, persuasion, negotiation and conflict management situations.
Prerequisite: BA 516 with C or better
Equivalent to: MGMT 574
Available via Ecampus

MGMT 559, MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY, 3 Credits
Introduces students to contemporary issues managers face making ethical and socially-responsible decisions in an increasingly competitive, transparent, and global environment. Practical examples and cases, as well as contemporary behavioral ethics research and theory are incorporated throughout the course.
Available via Ecampus

MGMT 572, STRATEGIC HUMAN RESOURCE MANAGEMENT, 3 Credits
Students will learn the theories of human resource management, the legal requirements for human resource practices, and how to create an HR measurement system that aligns with an organization's strategy.
Prerequisite: BA 550 with C- or better
Recommended: BA 516 or equivalent with a minimum grade of C-
Available via Ecampus

MGMT 574, NEGOTIATIONS, 3 Credits
Students will learn the theories of negotiation and the techniques to develop an effective negotiation style.
Equivalent to: MGMT 555
Recommended: BA 516 with a minimum grade of C-
Available via Ecampus

MGMT 575, INTEGRATIVE CAPSTONE I, 3 Credits
First course in a two-course sequence spanning the final two quarters of the OLMBA program. Students will conduct an extensive analysis of the student's organization, the industry and external environment, the organization's competitors, internal organization, and business level strategy.
Prerequisite: BA 562 with B or better
Available via Ecampus

MGMT 576, INTEGRATIVE CAPSTONE II, 3 Credits
Second course in a two-course sequence spanning the final two quarters of the OLMBA program. Students start from the final proposal in MGMT 575 and formulate an integrative project plan through the application of multidisciplinary knowledge.
Prerequisite: MGMT 575 with B or better
Available via Ecampus
MGMT 650, ORGANIZATIONAL BEHAVIOR, 3 Credits
Surveys research on individual differences, psychological states, and team processes related to work motivation, decision-making and performance.

School of Marketing, Analytics and Design
Undergraduate Programs

MAJORS
- Apparel Design (p. 348)
  Option:
  • Dean’s Academy
- Business Analytics (p. 363)
  Options:
  • Dean’s Academy
  • Digital Marketing Analytics
  • Human Resource Analytics
  • Market Research and Consumer Analytics
- Design and Innovation Management (p. 372)
  Option:
  • Dean’s Academy
- Interior Design (p. 382)
  Option:
  • Dean’s Academy
- Marketing (p. 389)
  Options:
  • Dean’s Academy
  • International Business
- Merchandising Management (p. 393)
  Option:
  • Dean’s Academy

MINORS
- Marketing (p. 388)
- Merchandising Management (p. 393)
- Professional Sales (p. 397)

Graduate Programs

MAJOR
- Design and Human Environment (p. 372)

MINOR
- Design and Human Environment (p. 372)

CERTIFICATE
- Business Analytics (p. 363)

Design (DSGN)

DSGN 121, COMPUTER AIDED DESIGN, 3 Credits
Introduction to the Adobe Creative Suite: Illustrator and Photoshop. Instruction in drawing, image editing, flat illustrations and textile design. Lec/studio.
Equivalent to: DSGN 221
Available via Ecampus

DSGN 199, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 12 credits.

DSGN 226, SPECIFICATION BUYING, 4 Credits
Introduction to terminology, assembly process, quality factors, and costs in the development of sewn product specifications. Lec/lab.

DSGN 244, COLOR INNOVATION, 4 Credits
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Equivalent to: DSGN 244H

DSGN 244H, COLOR INNOVATION, 4 Credits
The aesthetics, meaning, and perception of color provide the foundational knowledge in this course.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 244

DSGN 253, PROFESSIONAL DEVELOPMENT, 3 Credits
Introduces career management process. Emphasizes ongoing, systematic nature of process. Topics include self-assessment, career exploration, preliminary employment strategies.
Prerequisite: DSGN 121 with C- or better
Equivalent to: BA 253, BA 253H, BA 281, BA 281H, BA 291, BA 292, BA 294, BA 295, BA 353, BA 381, BA 382, BA 384, BA 385

DSGN 255, TEXTILES, 4 Credits
Equivalent to: DHE 255

DSGN 276, INTRODUCTION TO MERCHANDISING MANAGEMENT, 4 Credits
Provides the introductory knowledge necessary to prepare students for working in the retail industry. Introduces students to the retail industry including basic terminology, industry history, and to merchandising management decisions. Prepares students for more advanced knowledge acquired in the Merchandising Management concentration.
DSGN 281, DRAWING AND SKETCHING, 4 Credits
Designed for both beginning drawers and those wanting to improve their skills. Focuses exclusively on hand drawing skills with an emphasis on technical drawing skills, observational and perspective drawing, as well as imagination and creativity. Students develop a working knowledge of visual methods for communicating design concepts. Class format includes a combination of quick drawing activities, demonstrations, lectures, critiques, and work time on drawing assignments. Throughout the term students are introduced to the drawings of several prominent designers and artists.

DSGN 282, DRAFTING YOUR CAREER BLUEPRINT, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include understanding and developing one's own talents and strengths and beginning the initial stages of career exploration.
Equivalent to: BA 282

DSGN 283, CREATIVITY, CULTURE, AND THE WORKPLACE, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Explores students' unique talents and how teams as well as organizations can benefit from diverse and inclusive communities.
Equivalent to: BA 283

DSGN 284, FOUNDATIONS OF PERSONAL FINANCE I, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Topics include foundations of personal finance, helping students navigate paying-for-college resources and aiding them in developing and sticking to a realistic budget while in school.
Equivalent to: BA 284

DSGN 287, STUDIO I: DESIGN COMMUNICATION, 4 Credits
Focuses on design communication through electronic media. Students use AutoCAD, SketchUp, and the Adobe Creative Cloud to create 2D and 3D visualizations and presentations of interiors. Lec/studio.

DSGN 311, FRAMING YOUR CAREER PLAN, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Course topics are designed to help the student explore different types of business communications and how to effectively communicate their ideas in a variety of methods.
Equivalent to: BA 311

DSGN 312, FOUNDATIONS OF PERSONAL FINANCE II, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Second of four course in Blueprint that is dedicated to learning the foundations of personal finance. Topics include Taxes, Credit, Loans & Cars, and Investing.
Equivalent to: BA 312

DSGN 313, THE ORANGE AND BLACK CASE COMPETITION, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Strengthens students' foundational business knowledge, critical thinking abilities, and team collaboration skills through a college-wide case competition.
Prerequisite: BA 260 with C- or better or BA 260H with C- or better
Equivalent to: BA 313

DSGN 327, PERFORMANCE APPAREL INNOVATION I, 4 Credits
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisite: DSGN 226 with C- or better

DSGN 328, DIGITAL DESIGN FOR APPAREL, 3 Credits
Computer-aided flat pattern, grading and marker techniques using industry relevant pattern development software.
Prerequisite: DSGN 327 with C- or better

DSGN 329, SPORTSWEAR INDUSTRY COLLABORATION, 3 Credits
Industry lead team project. Creation of briefs, sketch, pattern, design textile prints, construct prototypes based on identified consumer and company.
Prerequisite: DSGN 327 with C- or better

DSGN 330, FASHION FORECASTING AND MARKET ANALYSIS, 4 Credits
Forecasting and market analysis processes applied to fashion goods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: WR 222 with C- or better or WR 323 with C- or better or WR 327 with C- or better
Equivalent to: DHE 330

DSGN 333, HISTORY OF CONTEMPORARY FASHION, 4 Credits
Historic analysis of fashion change in men's and women's apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion.

DSGN 341, DESIGN THINKING AND PROCESS INNOVATION, 4 Credits
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Equivalent to: DSGN 341H
DSGN 341H, DESIGN THINKING AND PROCESS INNOVATION, 4 Credits
Application of a qualitative, multi-method approach to gain insight into how the consumer experience can be improved within a given context. Application of design thinking principles to identify and develop solutions to improve consumer experience within a given context.
Attributes: HNRS – Honors Course Designator
Equivalent to: DSGN 341

DSGN 342, INTRODUCTION TO DESIGN MANAGEMENT, 4 Credits
Introduces the foundations and concepts of design strategy and creative development.
Prerequisite: DSGN 341 with C- or better

DSGN 343, IDEA VISUALIZATION, 4 Credits
Focuses on the design process through visual communication of ideation and sketching.
Prerequisite: DSGN 342 with C- or better

DSGN 356, SPECIFICATION AND EVALUATION OF PERFORMANCE MATERIALS, 3 Credits
Specification of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisite: DSGN 255 with C- or better

DSGN 357, EVALUATION OF PERFORMANCE MATERIALS LABORATORY, 1 Credit
Evaluation of materials for athletic and outdoor apparel to enhance human comfort, safety, and performance.
Prerequisite: DSGN 255 with C- or better and DSGN 327 [C-]
Corequisites: DSGN 356
Recommended: Concurrent enrollment with DSGN 356

DSGN 372, MERCHANDISE PLANNING AND CONTROL, 4 Credits
Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles.
Prerequisite: DSGN 276 with C or better
Equivalent to: DSGN 472

DSGN 377, RETAIL AND MERCHANDISING, 4 Credits
Evaluation of performance within the merchandising functions of an organization. Development of merchandising plans based on quantitative and qualitative analysis, as well merchandising principles.
Prerequisite: DSGN 372 with C- or better or DSGN 472 with C- or better

DSGN 383, BUILDING CONSTRUCTION AND MATERIALS, 3 Credits
An introduction to the manufacture, characteristics, sustainability, and use of construction materials in commercial and residential construction.
Equivalent to: DHE 283

DSGN 387, STUDIO III: ADVANCED DESIGN COMMUNICATION, 4 Credits
Development of presentation and Building Information Modeling (BIM) skills through various computer programs including Adobe Illustrator, Adobe Photoshop, Sketchup, and Revit Architecture. In-class exercises and take-home assignments.
Prerequisite: DSGN 287 with C- or better

DSGN 388, STUDIO IV: HOSPITALITY DESIGN, 4 Credits
Study and design of hospitality spaces in compliance with building codes and industry standards, with emphasis on sustainability, safety, and cultural context.
Prerequisite: DSGN 387 with C- or better

DSGN 394, STUDIO V: LIGHTING DESIGN, 4 Credits
Lighting design and documentation for residential and small commercial projects. The commercial projects include space planning and lighting design for workspace and retail environments. Lec/Studio.
Prerequisite: DSGN 388 with C- or better
Equivalent to: DHE 394

DSGN 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

DSGN 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: DHE 405
This course is repeatable for 16 credits.

DSGN 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

DSGN 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

DSGN 408, WORKSHOP, 1-16 Credits
Equivalent to: DHE 408
This course is repeatable for 16 credits.

DSGN 409, PRACTICUM, 1-16 Credits
Equivalent to: DHE 409
This course is repeatable for 16 credits.
DSGN 410, DESIGN INTERNSHIP, 1-6
Credits
Planned and supervised work experience at selected cooperating business firms. Supplementary training, conference, reports, and appraisals. Graded P/N.
Equivalent to: DHE 410
This course is repeatable for 16 credits.

DSGN 411, NAVIGATING YOUR WORKPLACE, 1 Credit
Part of Blueprint – a 12 course professional development course series to guide the student from college to career. Builds a foundation of financial planning, offering students the tools to successfully manage their career pathways. Topics include: analyzing job offers and benefits packages, negotiating a job’s salary/benefits, strategizing the first 90 days on the job, and advocating for opportunities at work.
Equivalent to: BA 411

DSGN 412, FINANCIAL PLANNING I, 1 Credit
Part of Blueprint – a 12-course professional development course series to guide the student from college to career. Continues to build a foundation of financial planning, offering students the tools to successfully manage their career pathways. Topics include: budgeting for life after graduation, planning for new earnings and income, saving for your future self, and keeping your money and yourself secure.
Equivalent to: BA 412

DSGN 413, FINANCIAL PLANNING II, 1 Credit
Part of Blueprint – a 12-course professional development course series to guide the student from college to career. Finalizes the foundations of financial planning, offering students the tools to successfully outline long-term financial goals. Topics include: addressing debt and buying a home, managing risk and insurance, planning for retirement, and creating a long-term legacy.
Equivalent to: BA 413

DSGN 427, PERFORMANCE APPAREL INNOVATION II, 4 Credits
Develop innovative performance apparel from technical specifications or prototypes. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs. Lec/lab.
Prerequisite: DSGN 327 with C- or better

DSGN 428, TECHNICAL SPORTSWEAR SIZING AND FIT, 4 Credits
Development of sizing and grading systems used in sportswear and evaluation of garment fit by use of virtual and physical prototypes.
Prerequisite: DSGN 327 with C- or better

DSGN 429, FUNCTIONAL DESIGN AND PRODUCT DEVELOPMENT, 4 Credits
Design processes and research methods used to create functional designs. Students will identify design problems and develop design brief and functional product line for identified target company. Lec/lab.
Prerequisite: DSGN 428 with C- or better

DSGN 440, DESIGN RESEARCH, 4 Credits
Surveys design principles, methods and applications in business outcomes. Application of design research is investigated and analyzed in group projects.
Prerequisite: DSGN 343 with C- or better

DSGN 441, SERVICE DESIGN INNOVATION, 4 Credits
Focuses on the impact that service design has on business enterprises. Creative ideation, critical analysis, and innovative thinking are integrated as foundations for service design outcomes.
Prerequisite: DSGN 440 with C- or better

DSGN 442, MATERIALITY AND MAKING FIELD PROJECT, 4 Credits
Focuses on material properties and specifications. Students work in the makerspace to design product outcomes.
Prerequisite: DSGN 440 with C- or better
Equivalent to: DHE 442

DSGN 464, CONTEMPORARY HISTORY OF INTERIORS AND HOUSING, 3 Credits
History of interior design from the mid-19th century to the present.
Prerequisite: ART 204 with C- or better or ART 205 with C- or better or ART 206 with C- or better

DSGN 471, RETAIL PRESENTATION STRATEGIES, 4 Credits
Provides an overview of, and examines competitive presentation strategies within, retail environments and channels (e.g., in-store, catalog, online, mobile) by integrating the principles and elements of design with sensory marketing.
Prerequisite: DSGN 377 with C- or better and (BA 390 [C-] or BA 390H [C-] or BA 223 [C-] or BA 223H [C-] or MRKT 390 [C-])

DSGN 473, RETAIL STRATEGIES PRACTICUM, 4 Credits
Explores the role that retail strategies play within a value delivery network. Looks at how retailing helps deliver value created in manufacturing and in services. Examines how these organizations develop strategies to attract consumers and also how consumers develop strategies to acquire goods and services from retailers. Provides a foundation for students who plan to work in retailing or related disciplines.
Prerequisite: DSGN 377 with C- or better

DSGN 475, GLOBAL SOURCING OF TEXTILES, APPAREL, AND FOOTWEAR, 4 Credits
Trade theory and the effects of trade policy, cultural values, and economics on the global production, distribution, and consumption of textiles, apparel, and footwear. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
DSGN 488, STUDIO VI: HEALTHCARE DESIGN, 4 Credits
Interior design project development with emphasis on healthcare design, contract documents, and building codes.
Prerequisite: DSGN 394 with C- or better

DSGN 495, STUDIO VII: SENIOR THESIS II, 4 Credits
Individual design project development of programming document and construction drawings.
Prerequisite: DSGN 488 with C- or better
Equivalent to: DHE 495

Marketing (MRKT)
MRKT 323, ADVANCED APPLICATION OF MARKETING PRINCIPLES, 4 Credits
Develop an understanding of how a market-orientation can help firms to profitably deliver value to targeted customers. Through a combination of case discussions, preparation of a client project, lectures and in-class activities, analyze complex marketing challenges; make strategic decisions for products, services, and brands, based on marketing principles; and persuasively communicate decisions.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better
Equivalent to: MRKT 390

MRKT 390, BUILDING AND MANAGING PRODUCTS, SERVICES, AND BRANDS, 4 Credits
Covers concepts and principles used by marketing professionals. Designed explicitly for Marketing majors, it is an introduction to the relationships between customers, products, and companies in a competitive and dynamically evolving marketplace.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better
Available via Ecampus

MRKT 396, FUNDAMENTALS OF MARKETING RESEARCH, 4 Credits
Introduction to the fundamentals of market research. Provides a basic understanding of marketing research and relevant decisions in the process.
Prerequisite: (BA 275 with C- or better or BA 275H with C- or better or BA 276 with C- or better or ST 202 with C- or better) and (BA 223 [C] or BA 223H [C] or BA 390 [C] or BA 390H [C])
Equivalent to: BA 396
Available via Ecampus

MRKT 477, INTEGRATED MARKETING ANALYTICS PROJECT, 4 Credits
Students will integrate what they have learned to solve industry-sponsored problems. The goal of the class is to provide students with opportunities to design, implement, and evaluate analytic solutions for a real-world enterprise. Student teams will examine the data requirements, technical requirements, and organizational requirements necessary for the success of analytical solutions. The specific goal of the class is to provide students real-world case studies that examine the role of analytics in an organization. Special emphasis will be given to the implementation and leadership of the analytical function in an enterprise.
Prerequisite: BA 474 with C- or better and BA 475 [C-]

MRKT 484, DIGITAL MARKETING PLATFORMS, 4 Credits
Examines the major digital channels and platforms for digital marketing, theories and techniques of digital marketing, implementation considerations, and associated risks and limitations.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Available via Ecampus

MRKT 485, SEARCH MARKETING, 4 Credits
Examines the fundamentals of Search Engine Optimization (SEO) and Search Engine Marketing (SEM) and how they can be integrated into an overall marketing strategy to maximize brand visibility and performance.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Available via Ecampus

MRKT 486, CUSTOMER RELATIONSHIP MANAGEMENT, 4 Credits
An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer life time value, technology solutions that track customer data and employee performance.
Prerequisite: BA 396 with C- or better or MRKT 396 with C- or better
Equivalent to: BA 486
Available via Ecampus

MRKT 488, PROFESSIONAL SALES, 4 Credits
Emphasizes coverage and utilization of principles and theory of personal selling to address sales opportunities in a variety of contexts. Focuses on the use of sales skills by professional salespeople.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 491
MRKT 489, PERSONAL SELLING SKILLS AND TECHNIQUES, 4 Credits
Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 489
Available via Ecampus

MRKT 491, QUALITATIVE RESEARCH METHODS, 4 Credits
Students will gain an overall understanding of qualitative research and methods such as focus groups, in-depth interviews, and observational research. Explores qualitative research methods through hands-on learning and experiences.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Available via Ecampus

MRKT 492, CONSUMER BEHAVIOR, 4 Credits
Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 492
Available via Ecampus

MRKT 493, INTEGRATED MARKETING COMMUNICATIONS, 4 Credits
Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/advertising managers in implementing the promotional mix.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 493
Available via Ecampus

MRKT 495, RETAIL MANAGEMENT, 4 Credits
Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-middle management decisions.
Prerequisite: BA 390 with C- or better or BA 390H with C- or better or BA 223 with C- or better or BA 223H with C- or better
Equivalent to: BA 495
Available via Ecampus

MRKT 496, MARKETING RESEARCH PRACTICUM, 4 Credits
Provides the student with practical experience in the collection, analysis and interpretation of primary data.
Prerequisite: MRKT 396 with C or better or BA 396 with C or better
Equivalent to: BA 496
Available via Ecampus

MRKT 497, GLOBAL MARKETING, 4 Credits
Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market.
Prerequisite: (BA 347 with C- or better or BA 347H with C- or better) and (BA 390 [C-] or BA 390H [C-] or BA 223 [C-] or BA 223H [C-])
Equivalent to: BA 497

MRKT 498, SERVICES MARKETING, 4 Credits
Formulation of strategic and tactical marketing plans for organizations (both profit and not-for-profit) in the service sector of the economy. Projects or cases are used to provide a comprehensive experience.
Prerequisite: BA 223 with C or better or BA 223H with C or better or BA 390 with C or better or BA 390H with C or better or MRKT 390 with C or better
Equivalent to: BA 498
Available via Ecampus

MRKT 499, MARKETING STRATEGY, 4 Credits
Market and competitive analysis for developing overall strategies and tactics to achieve the marketing objectives of the business enterprise. Projects or cases are used to provide a comprehensive experience.
Prerequisite: MRKT 396 with C or better or BA 396 with C or better
Equivalent to: BA 499

MRKT 581, APPLIED QUANTITATIVE MARKETING ANALYSIS, 4 Credits
Includes a comprehensive presentation of quantitative methods used in marketing management. It is designed to prepare students to use quantitative techniques in making marketing decisions. Topics include ANOVA, regression, discriminant and logit analysis, factor analysis, cluster analysis, and structural equation modeling.
Prerequisite: BA 596 with C or better or MRKT 596 with C or better
MRKT 582, APPLIED QUALITATIVE MARKETING ANALYSIS, 3 Credits
Explores the uses and application of qualitative research methods to inform and improve marketing decision-making. Students will be introduced to such methods as focus group interviews, individual in-depth interviews, observational research methods, participant observation, and ethnographic immersion. Students will learn appropriate analytic strategies and reporting methodologies.
Prerequisite: BA 596 with C or better or MRKT 596 with C or better

MRKT 584, DIGITAL MARKETING PLATFORMS, 4 Credits
Examines the major digital channels and platforms for digital marketing, theories and techniques of digital marketing, implementation considerations, and associated risks and limitations.
Prerequisite: BA 516 with B- or better
Available via Ecampus

MRKT 585, SEARCH MARKETING, 4 Credits
Examines the fundamentals of Search Engine Optimization (SEO) and Search Engine Marketing (SEM) and how they can be integrated into an overall marketing strategy to maximize brand visibility and performance.
Prerequisite: BA 516 with B- or better
Available via Ecampus

MRKT 586, CUSTOMER RELATIONSHIP MANAGEMENT, 4 Credits
An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer life time value, technology solutions that track customer data and employee performance.
Prerequisite: BA 516 with B- or better
Recommended: MRKT 396 with a minimum grade of C-
Available via Ecampus

MRKT 587, DESIGNING CUSTOMER EXPERIENCES, 3 Credits
Allows students to explore the process of designing customer experiences in ways that allow firms to successfully deliver value in a complex, dynamic competitive environment. Building on knowledge developed through collaboration, generation of customer insights, and mapping exercises, students will work in teams to design a customer experience for an industry client. Lec/studio.
Prerequisite: BA 590 with B- or better and MRKT 592 [B-]

MRKT 588, PROFESSIONAL SALES, 4 Credits
Emphasizes coverage and utilization of principles and theory of personal selling to address sales opportunities in a variety of contexts. Focuses on the use of sales skills by professional salespeople.

MRKT 589, PERSONAL SELLING SKILLS DEVELOPMENT, 4 Credits
Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments.
Recommended: BA 491 or MRKT 488 with a minimum grade of C-
Available via Ecampus

MRKT 592, CONSUMER BEHAVIOR, 3 Credits
Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered.
Prerequisite: BA 516 with B- or better
Equivalent to: BA 592
Available via Ecampus

MRKT 593, INTEGRATED MARKETING COMMUNICATIONS, 3 Credits
Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/advertising managers in implementing the promotional mix.
Prerequisite: BA 516 with B- or better
Equivalent to: BA 593
Available via Ecampus

MRKT 595, RETAIL MANAGEMENT, 4 Credits
Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-management decisions.
Equivalent to: BA 595
Recommended: (BA 390 or BA 390H or BA 590) with a minimum grade of C-
Available via Ecampus

MRKT 596, MARKETING RESEARCH DESIGN AND METHODS, 3 Credits
Focuses on articulating research problems, creating appropriate research design to address information needs (i.e., understanding markets, competitors, and customers), ethics (to include IRB training), and the application of diverse data collection methods, including secondary, qualitative, and quantitative methods. Measurement, sampling, and data preparation will also be addressed.
Equivalent to: BA 596
Recommended: BA 390
MRKT 597, GLOBAL MARKETING, 4 Credits
Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market.
Equivalent to: BA 597
Recommended: BA 347 and (BA 390 or BA 390H or BA 590) with a minimum grade of C-

MRKT 599, SELECTED TOPICS IN MARKETING, 1-4 Credits
Concepts and methods in advanced marketing management practice. Latest theoretical developments and quantitative methods in marketing, with particular relevance to managerial applications. Topics will vary from term to term.
Equivalent to: BA 599
This course is repeatable for 16 credits.

MRKT 690, MARKETING AND COMMERCIALIZATION, 3 Credits
Surveys marketing research related to innovation. Specific topics may change from quarter to quarter, but sample topics include research on marketing strategy, consumer behavior, brand equity, brand management, and product management, each from the perspective of the consumer and the firm.

Supply Chain and Logistics Management Graduate Certificate

The SCLM certificate program provides a means for individuals to acquire a solid mastery of international operations and supply chain and logistics management concepts and methods. This graduate certificate prepares individual for operations, logistics and supply chain management in the service and manufacturing industries. In the past two decades, the loss of manufacturing jobs in the U.S. triggered attrition of innovation in the service and manufacturing industries. In the past two decades, the service and manufacturing industries. In the past two decades, the service and manufacturing industries. In the past two decades, the service and manufacturing industries. In the past two decades, the service and manufacturing industries. Certificate Code: CG19

College of Earth, Ocean, and Atmospheric Sciences

The Earth is a complex system shaped by natural and human forces. Oregon State University's College of Earth, Ocean, and Atmospheric Sciences (CEOAS) is renowned for excellence in basic and applied research on Earth systems. Our work is global, extending from the Pacific Northwest to both poles, from the bottom of the ocean to the upper reaches of the atmosphere, from human interactions with the environment to studies of other planets in our solar system. CEOAS faculty, staff, and students contribute to the success of the global science enterprise by serving as intellectual leaders, innovators, and stewards of critical research infrastructure for Oregon and the nation.

Academic programs in CEDAS are interwoven with research and combine classroom excellence with experiential learning, including extensive field experiences. Novel undergraduate programs in Ocean Science, Climate Science, and Geography and Geospatial Science are paired with highly successful undergraduate programs in Geology and Environmental Sciences. Our graduate programs are recognized as among the best in the world and include interdisciplinary majors Marine Resource Management and Ocean, Earth, and Atmospheric Sciences as well as disciplinary foci in Geology and Geography. All our programs successfully place students in academic, government, nonprofit, and private sector jobs.

Undergraduate Programs

Program Requirements
The University Baccalaureate Core requirements are explained in a separate section, Earning a Degree at Oregon State University (p. 2418). The major and option requirements are explained below. If you want to add a minor program or certificate, you will also need to complete

Earning a Degree at Oregon State University

The University Baccalaureate Core requirements are explained in a separate section, Earning a Degree at Oregon State University (p. 2418). The major and option requirements are explained below. If you want to add a minor program or certificate, you will also need to complete.
the requirements for that minor or certificate. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog.

**Academic Advising**

Undergraduates within CEOAS are assigned a professional advisor based on the student's major program of study. Advisors help to monitor academic progress through the degree programs, assist students with defining goals within the major, help in navigating university policies and regulations, and provide referrals to campus-wide resources. Faculty within CEOAS are involved as mentors for undergraduates—to guide students on professional and career-related decisions and to help connect students with research opportunities.

**Internships and Experiential Learning**

CEOAS places a strong emphasis in gaining experience outside of the classroom and offers specialized support to all students for internships and undergraduate research through a designated experiential learning coordinator available to all undergraduates within the college.

**Teacher Education**

The Earth Sciences and Environmental Sciences majors provide excellent scientific preparation for teaching middle school and high school science. All professional teacher licensure certification occurs in the College of Education.

**Double Degrees**

Undergraduates with majors in CEOAS can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

**College Undergraduate Graduation Requirements**

Along with fulfilling the university-level, baccalaureate core, and major requirements for BS degrees within CEOAS, students must meet the following college requirements:

- A grade of at least C– minus is required for all upper-division (300 level and above) courses taken to fulfill major requirements.
- A minimum 2.00 GPA in major requirement courses (excluding baccalaureate core and electives) is required for all CEOAS majors.
- ‘S/U’ grading is not allowed for courses taken to fulfill major requirements.

**Graduate Programs**

**Requirements for Admission to the Graduate Programs in the College**

1. A bachelor’s degree with a major (40 quarter credits or more) in a relevant discipline (see individual program requirements) such as physics, mathematics, chemistry, biology, geology, atmospheric science, computer science, or engineering. Geography and Marine Resource Management applicants also have a bachelor’s degree in the social or political sciences, geography, economics, business administration, or fisheries.
2. A minimum cumulative grade-point average of 3.00 on a 4.00 scale for the last 90 quarter credits of undergraduate work.
3. A solid foundation in prerequisites (see individual program requirements).
4. Graduate Record Examination (GRE) scores (general).
5. Three letters of recommendation.
6. For TOEFL requirements, please see the OSU Admissions Web pages for graduate requirements and contact the CEOAS Student Services Office for specific information.

**Early January** is the deadline to apply for the following fall term admission. Early application is strongly recommended.

**Master’s Programs**

All students in College of Earth, Ocean, and Atmospheric Sciences graduate majors must satisfy the minimum program requirements (45 credits including 6 credits of thesis) established by the Graduate School. Some graduate credits earned at other institutions may be approved for inclusion in the program. The Marine Resource Management graduate program requires additional course work credits. Please contact the Student Services for more information.

A two-hour, final oral examination is required for completion of the master’s program (thesis option only).

**Doctor of Philosophy Program**

The content of PhD programs, other than core requirements, is determined by individual students and their committees. Specific university requirements are formulated by the Graduate School. Approximately 80 credits of courses in the graduate major (including the core courses and 30 to 35 credits of thesis) are usually included in the major. The dissertation is based on an original investigation in some area of the graduate major.

One year of courses taken as a part of a master’s program is normally transferable into the PhD program.

**Majors**

- Earth Sciences (p. 442)
  - Options:
    - Climate Science
    - Geology
    - Ocean Science
  - Environmental Sciences (p. 446)
  - Options:
    - Alternative Energy
    - Applied Ecology
    - Aquatic Biology
    - Chemistry and the Environment
• Conservation, Resources, and Sustainability
• Earth Systems
• Environmental Agriculture
• Environmental Policy and Economics
• Environmental Science Education
• Environmental Water Resources
• Geography and Geospatial Science (p. 457)

Minors
• Earth Sciences (p. 441)
• Environmental Sciences (p. 445)
• Geography (p. 460)
• Geology (p. 461)
• Oceanography (p. 464)

Certificates
• Geographic Information Science (p. 456)

Graduate Programs

Majors
• Geography (p. 460)
• Geology (p. 461)
• Marine Resource Management (p. 462)
• Ocean, Earth and Atmospheric Sciences (p. 463)

Minors
• Geography (p. 460)
• Geology (p. 461)
• Marine Resource Management (p. 462)
• Ocean, Earth and Atmospheric Sciences (p. 464)
• Risk and Uncertainty Quantification in Earth Systems (p. 465)
• Water Conflict Management and Transformation (p. 467)

Certificates
• Geographic Information Science (p. 456)
• Water Conflict Management and Transformation (p. 466)
• Marine Resource Management (p. 462)

Atmospheric Sciences (ATS)

ATS 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

ATS 004, INTERNSHIP, 0 Credits
Provides basic personal and professional skills that can be used within and outside of a work setting. Through practice, this experience guides students in building and maintaining positive professional relationships, networking/mentoring relationships, and enhances students’ understanding of the connection between theory and practice in their respective disciplines.

ATS 201, *CLIMATE SCIENCE, 4 Credits
Physical laws governing the Earth's climate and their interactions with chemical and biological processes on land and in the atmosphere, oceans, and cryosphere. Past, present, and potential future climate changes due to natural and human causes are assessed using a variety of observations, models, and laboratory exercises. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

ATS 295, OBSERVING CLIMATE, 3 Credits
One-week course taught during Spring Break at field sites near Corvallis, with ten hours of preparatory meetings on campus. Make and analyze observations of properties of the atmosphere, ocean, biosphere, and cryosphere that reflect processes relevant to regional and global climate. Serves as an introduction to upper-division course work in climate science. Field trip(s) required; transportation fee charged. Lec/lab.
Prerequisite: ATS 201 with C- or better or ATS 320 with C- or better

ATS 301, CLIMATE DATA ANALYSIS, 4 Credits
Quantitative methods to characterize the physical climate system and detect change. Interpret data based on source timescale, and statistics; communicate conclusions and uncertainties regarding past climate and future changes.
Prerequisite: ATS 201 with C- or better and ST 351 [C-]

ATS 302, MATHEMATICAL APPLICATIONS IN THE EARTH SCIENCES, 4 Credits
An introductory survey of mathematical applications in climate science, meteorology, oceanography, geology, and geophysics. Topics may include conservation laws, harmonic motion, exponential growth/decay, linear approximations, numerical methods, waves, diffusion, fluid flow, systems of equations, inverse problems, and data analysis.
Prerequisite: MTH 252 with C- or better
Recommended: PH 201 or PH 211

ATS 310, METEOROLOGY, 4 Credits
The study of the atmosphere, in particular atmospheric phenomena that we experience as weather. Key physical concepts in meteorology are introduced and explored. The physics of the atmosphere necessary to understand why atmospheric phenomena occur and how these are forecast is discussed. Meteorological data from observations and models will be analyzed to explore concepts introduced in the context of the weather we experience. Lec/Lab.
Prerequisite: (MTH 251 with C- or better or MTH 251H with C- or better) and (PH 201 [D-] or PH 201H [D-] or PH 211 [D-] or PH 211H [D-]) and (PH 202 (may be taken concurrently) [D-] or PH 202H (may be taken concurrently) [D-] or PH 212 (may be taken concurrently) [D-] or PH 212H (may be taken concurrently) [D-] or CH 121 (may be taken concurrently) [D-] or CH 231 (may be taken concurrently) [D-] or CH 231H (may be taken concurrently) [D-])
ATS 341, *SNOW, SMOKE, AND STORMS: CLIMATE CHANGE IMPACTS IN THE PNW, 3 Credits

Climate change will alter mountain snowpack, water availability, coastal storms, erosion, and sea level in the Pacific Northwest. Increasing temperatures and changing precipitation patterns will lead to more extreme drought and flooding events, wildfire seasons, and insect and disease outbreaks in forests. These changes will impact the region’s natural resource economy; heritage and quality of life; water, transportation, and energy infrastructure; and health and social systems. Case studies of past extreme years highlight the close interrelationships between the climate, the natural and built environment, and the health and well-being of the Pacific Northwest’s residents.

Attributes: CSST – Core, Synthesis, Science/Technology/Society

ATS 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: ATS 399H
This course is repeatable for 12 credits.

ATS 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ATS 399
This course is repeatable for 12 credits.

ATS 401, RESEARCH, 1-16 Credits
This course is repeatable for 24 credits.

ATS 403, THESIS, 1-16 Credits
This course is repeatable for 24 credits.

ATS 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ATS 406, PROJECTS, 1-16 Credits
This course is repeatable for 24 credits.

ATS 407, SEMINAR, 1 Credit
One-credit sections. Graded P/N.
This course is repeatable for 12 credits.

ATS 408, WORKSHOP, 0-12 Credits
May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

ATS 410, INTERNSHIP, 1-12 Credits
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 48 credits.
Recommended: 12 credits of upper-division college courses

ATS 411, THERMODYNAMICS AND CLOUD MICROPHYSICS, 4 Credits
Thermodynamic processes in the atmosphere, and an introduction to cloud microphysics. Offered annually.
Prerequisite: (MTH 254 with C- or better or MTH 254H with D- or better) and (PH 213 (D-) or PH 213H (D-))

ATS 412, ATMOSPHERIC RADIATION, 3 Credits
Examines properties of radiation and the electromagnetic spectrum. Explores reflection and refraction; radiative properties of natural surfaces; thermal emission; atmospheric transmission and emission; absorption by atmospheric gases; broadband fluxes and heating rates; introduction to the radiative transfer equation; scattering and absorption by particles.
Prerequisite: (MTH 254 with C- or better or MTH 254H with C- or better or ATS 302 with C- or better) and (PH 202 [C-] or PH 212 [C-])

ATS 413, ATMOSPHERIC CHEMISTRY, 3 Credits
Principles of atmospheric chemistry; chemical fundamentals, sampling principles, sources, reactions, scavenging, and deposition of sulfur, nitrogen, ozone, and carbon compounds. Atmospheric aerosol size distribution, mechanics, optics, and scavenging. Offered annually.
Recommended: (CH 121 [D-] or CH 201 [D-] or CH 231 [D-] or CH 231H [D-]) and (MTH 251 [D-] or MTH 241[D-])

ATS 415, ATMOSPHERIC DYNAMICS, 4 Credits
Prerequisite: ATS 301 with C- or better and ATS 310 [C-] and (ATS 302 (may be taken concurrently) [C-] or MTH 254 (may be taken concurrently) [C-]) and (PH 202 (may be taken concurrently) [C-] or PH 212 (may be taken concurrently) [C-])

ATS 417, WEATHER SYSTEM DYNAMICS AND FORECASTING, 4 Credits
Dynamics of weather systems and basic forecasting methods. Mid-latitude storm formation and structure; basic dynamical equations and applications to real-time weather; map analysis; description and interpretation of weather prediction models; forecasting methods; Pacific NW weather. Lec/Lab.
Prerequisite: ATS 310 with C- or better or ME 311 with C- or better or ME 311H with C- or better or BEE 311 with C- or better or CE 311 with C- or better

ATS 420, CLIMATE PHYSICS, 4 Credits
Prerequisite: (MTH 252 with C- or better or MTH 252H with C- or better) and (PH 202 [C-] or PH 212 [C-]) and (ATS 301 [C-] or (PH 365 [C-] and PH 366 [C-])) and (ATS 310 [C-] or PH 315 [C-])
ATS 421, CLIMATE MODELING, 4 Credits
Numerical models of the physics, chemistry, biology, and geology of the climate system. A range of climate models from a simple, single equation to complex state-of-the-science systems used for future projections. Theoretical concepts will be linked to practical applications through hands-on programming exercises and data analysis.
Prerequisite: ATS 420 with C- or better and (ATS 301 [C-] or (PH 365 [C-] and PH 366 [C-])) and (MTH 254 [C-] or ATS 302 [C-])

ATS 441, NORTHWEST CLIMATE AND WEATHER, 4 Credits
A survey of climate and weather phenomena that are consequential in the northwestern United States. The Pacific Ocean, the North Pacific jet and storm track, mountain and coastal meteorology, and topographic features like the region's mountains and Columbia River Gorge all affect the climate and weather of the Northwest, which in turn affect the region's hydrologic characteristics, vegetation, and numerous other natural and human systems. Preexisting content knowledge and analytical skills are used to produce a comprehensive written report and oral presentation for a regional stakeholder. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ATS 301 with C- or better and ATS 420 [C-]

ATS 475, PLANETARY ATMOSPHERES, 3 Credits
Origin and evolution of planetary atmospheres; vertical structure of atmospheres; hazes and clouds; atmospheric motions and general circulation. Presentation of recent observations and current research issues, focusing on Venus, Earth, Mars, Jupiter, Saturn, and Titan. Emphasis on comparative aspects and simple models.
Prerequisite: (MTH 254 with D- or better or MTH 254H with D- or better) and (PH 213 [D-] or PH 213H [D-])

ATS 499, SPECIAL TOPICS, 0-4 Credits
Equivalent to: ATS 499H
This course is repeatable for 12 credits.

ATS 501, RESEARCH, 1-16 Credits
This course is repeatable for 24 credits.

ATS 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ATS 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ATS 506, PROJECTS, 1-16 Credits
This course is repeatable for 72 credits.

ATS 507, SEMINAR, 1 Credit
One-credit sections. Graded P/N.
This course is repeatable for 48 credits.

ATS 508, WORKSHOP, 0-12 Credits
May be repeated when topic varies.
This course is repeatable for 12 credits.

ATS 511, THERMODYNAMICS AND CLOUD MICROPHYSICS, 4 Credits
Thermodynamic processes in the atmosphere, and an introduction to cloud microphysics. Offered annually.
Recommended: MTH 254 and PH 213

ATS 512, ATMOSPHERIC RADIATION, 3 Credits
Examines properties of radiation and the electromagnetic spectrum. Explores reflection and refraction; radiative properties of natural surfaces; thermal emission; atmospheric transmission and emission; absorption by atmospheric gases; broadband fluxes and heating rates; introduction to the radiative transfer equation; scattering and absorption by particles.

ATS 513, ATMOSPHERIC CHEMISTRY, 3 Credits
Principles of atmospheric chemistry; chemical fundamentals, sampling principles, sources, reactions, scavenging, and deposition of sulfur, nitrogen, ozone, and carbon compounds. Atmospheric aerosol size distribution, mechanics, optics, and scavenging. Offered annually.
Recommended: (CH 121 or CH 201 or CH 221 or CH 231 or CH 231H or CH 224) and (MTH 251 or MTH 241)

ATS 515, ATMOSPHERIC DYNAMICS, 4 Credits
Prerequisite: OEAS 530 with C- or better
Recommended: One year of college calculus and physics

ATS 516, ATMOSPHERIC DYNAMICS II, 4 Credits
Review of basic equations; scale analysis and approximations. Turbulence and boundary layers. Dry and moist convection; convective storms. Frontogenesis; symmetric instability; internal gravity waves and mountain waves; differentially heated circulations including sea breezes. Slope flows and urban circulations. Offered alternate years.
Prerequisite: ATS 515 with C or better

ATS 517, WEATHER SYSTEM DYNAMICS AND FORECASTING, 4 Credits
Dynamics of weather systems and basic forecasting methods. Mid-latitude storm formation and structure; basic dynamical equations and applications to real-time weather; map analysis; description and interpretation of weather prediction models; forecasting methods; Pacific NW weather. Lec/Lab.
Prerequisite: OEAS 530 with C- or better
ATS 520, CLIMATE PHYSICS, 4 Credits
Prerequisite: OEAS 530 with C- or better

ATS 521, CLIMATE MODELING, 4 Credits
Numerical models of the physics, chemistry, biology, and geology of the climate system. A range of climate models from a simple, single equation to complex state-of-the-science systems used for future projections. Theoretical concepts will be linked to practical applications through hands-on programming exercises and data analysis.
Prerequisite: ATS 520 with C- or better or OEAS 530 with C- or better
Recommended: One year of college calculus and physics. Python programming experience or concurrent enrollment in ATS 508 (Python for Climate Modeling)

ATS 541, NORTHWEST CLIMATE AND WEATHER, 4 Credits
A survey of climate and weather phenomena that are consequential in the northwestern United States. The Pacific Ocean, the North Pacific jet and storm track, mountain and coastal meteorology, and topographic features like the region’s mountains and Columbia River Gorge all affect the climate and weather of the Northwest, which in turn affect the region’s hydrologic characteristics, vegetation, and numerous other natural and human systems. Preexisting content knowledge and analytical skills are used to produce a comprehensive written report and oral presentation for a regional stakeholder.
Prerequisite: OEAS 530 with C- or better or ATS 520 with C- or better

ATS 546, EXPERIMENTAL ENERGY AND GAS EXCHANGE, 4 Credits
Experimental methods to quantify the atmospheric carbon dioxide, water, methane, heat, momentum, and radiative exchange at the vegetation-land-ocean-air interface. Techniques include bulk and gradient approaches, and eddy covariance. The central activity consists of student teams designing and conducting a field experiment, analyzing and interpreting observations, and presenting results. Lec/lab/discussion/activity.
Recommended: ATS 516 [D-] or ATS 564 [D-] or FS 564 [D-]

ATS 557, PLANETARY ATMOSPHERES, 3 Credits
Origin and evolution of planetary atmospheres; vertical structure of atmospheres; hazes and clouds; atmospheric motions and general circulation. Presentation of recent observations and current research issues, focusing on Venus, Earth, Mars, Jupiter, Saturn, and Titan. Emphasis on comparative aspects and simple models.
Recommended: MTH 254 and PH 213

ATS 590, SPECIAL TOPICS, 0-4 Credits
May be repeated when topic varies.
This course is repeatable for 12 credits.

ATS 601, RESEARCH, 1-16 Credits
This course is repeatable for 36 credits.

ATS 603, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

ATS 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ATS 606, PROJECTS, 1-16 Credits
This course is repeatable for 84 credits.

ATS 607, SEMINAR, 1 Credit
One-credit sections. Graded P/N.
This course is repeatable for 48 credits.

ATS 608, WORKSHOP, 0-12 Credits
May be repeated when topic varies.
This course is repeatable for 12 credits.

ATS 615, LARGE-SCALE INTERACTIONS OF THE OCEAN AND ATMOSPHERE, 3 Credits
Ocean-atmosphere circulations in the time-mean and seasonal cycles, equatorial wave modes, El Nino-Southern Oscillation, Madden-Julian oscillation, teleconnections and atmospheric bridges, mid-latitude air-sea interactions, Pacific and Atlantic decadal variability, the North Atlantic oscillation/Arctic oscillation.
Prerequisite: (ATS 515 with C or better or OC 670 with C or better)

ATS 690, SELECTED TOPICS, 0-4 Credits
May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

Environmental Sciences (ENSC)

ENSC 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.
ENSC 004, INTERNSHIP, 0 Credits
Provides basic personal and professional skills that can be used within and outside of a work setting. Through practice, this experience guides students in building and maintaining positive professional relationships, networking/mentoring relationships, and enhances students’ understanding of the connection between theory and practice in their respective disciplines.

ENSC 101, ENVIRONMENTAL SCIENCES ORIENTATION, 1 Credit
Introduction to the Environmental Sciences Program and related professional and educational opportunities. Recommended for all freshman and first-year transfer environmental sciences majors, but open to all students interested in learning about career options in the environmental sciences. Graded P/N.

ENSC 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: ENSC 399H
This course is repeatable for 16 credits.

ENSC 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 24 credits.
Available via Ecampus

ENSC 402, INDEPENDENT STUDIES, 1-16 Credits
This course is repeatable for 24 credits.

ENSC 403, THESIS, 1-16 Credits
This course is repeatable for 24 credits.

ENSC 405, READING AND CONFERENCE, 1-12 Credits
Equivalent to: ENSC 405H
This course is repeatable for 16 credits.

ENSC 406, PROJECTS, 1-16 Credits
This course is repeatable for 24 credits.

ENSC 407, SEMINAR, 1-16 Credits
Equivalent to: ENSC 407H
This course is repeatable for 12 credits.

ENSC 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENSC 407
This course is repeatable for 12 credits.
Available via Ecampus

ENSC 408, WORKSHOP, 1-16 Credits
This course is repeatable for 12 credits.

ENSC 410, ENVIRONMENTAL SCIENCE INTERNSHIP, 1-12 Credits
Supervised practical experience working with professionals at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
This course is repeatable for 48 credits.
Available via Ecampus

ENSC 452, ENVIRONMENTAL ASSESSMENT, 3 Credits
Environmental site assessment is a primary tool for environmental science professionals. Apply environmental science concepts to evaluate features of a specific natural area and conduct a land suitability analysis. Create a conceptual site design and management plan that complies with federal, state, and local regulations and environmental laws.
CROSSLISTED as ENSC 452/GEOG 452 and GEOG 552.
Equivalent to: GEOG 452
Available via Ecampus

ENSC 479, ^ENVIRONMENTAL CASE STUDIES, 3 Credits
Improves students’ ability to ask questions, gather and synthesize information, and communicate ideas on environmental topics. Instruction and information necessary for the course is entirely Web based. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: BOT 479
Recommended: One year of college biology or chemistry
Available via Ecampus

ENSC 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 503, THESIS, 1-16 Credits
PREREQ: Departmental approval required.
This course is repeatable for 999 credits.
Available via Ecampus

ENSC 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

ENSC 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 508, WORKSHOP, 1-16 Credits
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.
Available via Ecampus
