Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Equivalent to: SOC 312H
Available via Ecampus

SOC 312H, *SOCIOLOGY OF THE FAMILY, 4 Credits
Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator
Equivalent to: SOC 312

SOC 313, SOCIOLOGY OF INTIMATE RELATIONSHIPS, 4 Credits
Examines the microsociological dynamics of intimate relationships. Perceptions and expectations of intimate relationships are explored. Specific attention will be given to issues, processes, and factors that are involved in the construction and management of intimate relationships in contemporary society.

SOC 315, ^METHODS I: RESEARCH DESIGN, 4 Credits
First in a two-course sequence required of all sociology majors. Students learn to formulate researchable questions, devise measures, select data collection techniques, and examine ethical and practical dilemmas in constructing sociological research. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: SOC 415
Available via Ecampus

SOC 316, METHODS II: QUANTITATIVE ANALYSIS, 4 Credits
Second in a two-course sequence required of all sociology majors. The primary objective is to provide students with the statistical skills necessary to analyze sociological data. Covers the construction and interpretation of contingency tables, basic ideas of probability and statistical inference, and an introduction to correlation and regression.
Prerequisite: SOC 315 with C- or better
Equivalent to: SOC 416
Available via Ecampus

SOC 340, DEVIANT BEHAVIOR AND SOCIAL CONTROL, 4 Credits
Current perspectives, research and theories of deviant behavior. Review and analysis of various approaches and programs designed to prevent and deal with deviant behavior.
Available via Ecampus

SOC 341, POLICE AND SOCIETY, 4 Credits
Represents a social scientific examination of the field of policing rather than methods or tactics of crime control. Explores the culture of law enforcement and how police officers perform their duties and create their own impressions of their work. Examines how the field of law enforcement is influenced by historical trends, laws, cultural & occupational values, and social institutions. Discusses stereotypes, routine duties, occupational stressors, and deadly hazards of law enforcement which provide opportunities to practice and improve interpersonal and conflict resolution skills.
Recommended: SOC 204 and/or SOC 241

SOC 345, *CRIMES AND VIOLENCE IN INTIMATE RELATIONSHIPS, 4 Credits
Analyzes the historical, social, political, legal, cultural, and psychological aspects of domestic violence, sexual assault, and stalking. Addresses definitions of the problem, demographics, survivors, perpetrators, witnesses, bystanders, strategies and tactics of abusers and survivors, along with strategies for prevention, intervention, treatment, and social change. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus
SOC 349, SERIAL HOMICIDE, 4 Credits
Examines the extent, causes, and social characteristics of serial killers. After examining general criminological theories and the characteristics of "typical murder," investigates the popular images about serial killers, the motivations of these offenders, the distribution of their crimes over time and across geographical areas, elements surrounding these offenses, and the offenders’ methods of selecting victims. Topics include homicide investigation techniques, crime profiling, and the criminal prosecution of serial killers.
Recommended: SOC 204 and/or SOC 241

SOC 350, HEALTH, ILLNESS AND SOCIETY, 4 Credits
Social and cultural factors in the identification, course, and treatment of illness; analysis of selected health settings and professions.
Available via Ecampus

SOC 351, *SOCIOLGY OF MENTAL ILLNESS, 4 Credits
Focuses on how social and cultural context impact mental health, and how the very concepts of mental illness, abnormal or crazy are constructed in the first place, then applied by both “mental health” professionals and persons in their everyday lives. Examines major social models of “mental illness,” aiming to understand and evaluate their basic concepts and assumptions, as well as the response to “mental illness,” including how family, friends, troubled persons and professionals interpret, define and respond to “mental illness” and the processes shaping the policies and practices of the mental health enterprise.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

SOC 355, DEATH AND DYING, 4 Credits
An overview of cross-cultural and historical attitudes and practices around end of life, death and dying. Assessment of contemporary legal, professional, cultural and technological issues surrounding end of life/death and dying.
Available via Ecampus

SOC 360, *POPULATION TRENDS AND POLICY, 4 Credits
Basic socio-demographic factors affecting population size, distribution, composition and change; examination of local, national, and international trends, and demographic policy. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

SOC 371, *SOCIAL MEDIA AND EVERYDAY LIFE, 4 Credits
Examines key concepts, themes, and theories in the study of social media in today’s world. Interconnected themes include communication and the public sphere, self representation, power, and new technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

SOC 372, *POPULAR CULTURE, 4 Credits
Critical examination of contemporary popular culture from a sociological perspective. Debates in the field of cultural sociology, including a critique of the distinction between 'high' and 'low' forms of culture, the social distinction between work and leisure time, the influence of society on individual patterns of consumption and personal taste, and the sociology of everyday life. Specific topics include mass media, sports, leisure activities, fashion, youth culture, science fiction, music, talk shows, soap operas, internet chat rooms, personal ads, home shopping, and folklore.
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

SOC 381, SOCIAL DIMENSIONS OF SUSTAINABILITY, 4 Credits
Exploration of the social forces driving current views of sustainability. Specific attention will be given to values and belief systems, as well as social institutions in shaping sustainability issues related to ecologically sound, socially just, and economically viable outcomes.
Available via Ecampus

SOC 399, SPECIAL TOPICS, 1-16 Credits
Selected topics of special or current interest not covered in other courses.
Equivalent to: SOC 399H
This course is repeatable for 16 credits.

SOC 399H, SPECIAL TOPICS, 1-16 Credits
Selected topics of special or current interest not covered in other courses.
Attributes: HNRS – Honors Course Designator
Equivalent to: SOC 399
This course is repeatable for 16 credits.

SOC 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

SOC 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

SOC 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SOC 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

SOC 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SOC 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 30 credits.
Available via Ecampus
SOC 412, SOCIOLOGY OF WORK AND FAMILY, 4 Credits
Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change. Available via Ecampus

SOC 413, SOCIOLOGICAL THEORY, 4 Credits
Historical and philosophical foundations of sociological theory; major schools of thought and their major contributors. Available via Ecampus

SOC 418, QUALITATIVE RESEARCH METHODS, 4 Credits
An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined.

SOC 422, SOCIOLOGY OF ORGANIZATIONS, 4 Credits
Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations.

SOC 424, SOCIAL PSYCHOLOGY, 4 Credits
Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/identity. Contemporary research design, problems, and findings pertinent to social psychology.

SOC 426, *SOCIAL INEQUALITY, 4 Credits
Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States. (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination Available via Ecampus

SOC 430, GENDER AND SOCIETY, 4 Credits
Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men. Available via Ecampus

SOC 432, SOCIOLOGY OF AGING, 4 Credits
Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging. Available via Ecampus

SOC 437, RACE AND ETHNIC RELATIONS, 4 Credits
Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined. Available via Ecampus

SOC 438, US IMMIGRATION ISSUES IN THE 21ST CENTURY, 4 Credits
Provides a critical overview of immigration to the United States from a socio-historic perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean.

SOC 439, WELFARE AND SOCIAL SERVICES, 4 Credits
Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts. Available via Ecampus

SOC 440, JUVENILE DELINQUENCY, 4 Credits
Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents.

SOC 441, CRIMINOLOGY AND PENOLOGY, 4 Credits
Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime. Available via Ecampus

SOC 442, SOCIOLOGY OF DRUG USE AND ABUSE, 4 Credits
Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs. Available via Ecampus

SOC 444, INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION, 4 Credits
Course takes place in a state correctional facility, with OSU students learning alongside 'inside' students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. Equivalent to: SOC 444H
**SOC 444H, INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION, 4 Credits**

Course takes place in a state correctional facility, with OSU students learning alongside ‘inside’ students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. 
**Attributes:** HNRS – Honors Course Designator  
**Equivalent to:** SOC 444

**SOC 448, LAW AND SOCIETY, 4 Credits**

An introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions.  
**Recommended:** (SOC 204 or SOC 204H) with minimum grade of D-

**SOC 449, LAW, CRIME, AND POLICY, 4 Credits**

Surveys criminal justice policies aimed at enforcing laws, reducing crime, punishing violators, and rehabilitating ex-offenders. Interrogates the behavioral assumptions used in creating and evaluating policies. Examines specific crimes and the policies used to address them.  
**Available via Ecampus**

**SOC 450, SOCIOLOGY OF EDUCATION, 4 Credits**

Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics.  
**Available via Ecampus**

**SOC 452, SOCIOLOGY OF RELIGION, 4 Credits**

Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups.

**SOC 453, SOCIOLOGY OF SPORT, 4 Credits**

Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media.

**SOC 454, LEISURE AND CULTURE, 4 Credits**

Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources. (SS)  
**Attributes:** LACS – Liberal Arts Social Core  
**Available via Ecampus**

**SOC 456, *SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT, 4 Credits**

Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes. (Bacc Core Course)  
**Attributes:** CSST – Core, Synthesis, Science/Technology/Society

**SOC 460, THE SOCIOLOGY OF GLOBALIZATION, 4 Credits**

Examines the sociological effect of globalization on Western and non-Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies. (NC)  
**Attributes:** LACN – Liberal Arts Non-Western Core

**SOC 466, INTERNATIONAL DEVELOPMENT: GENDER ISSUES, 4 Credits**

Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization. (NC)  
**Attributes:** LACN – Liberal Arts Non-Western Core

**SOC 470, COLLECTIVE BEHAVIOR, 4 Credits**

Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs.

**SOC 471, *SOCIAL MOVEMENTS, 4 Credits**

Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society.  
**Attributes:** CPSI – Core, Pers, Soc Proc & Inst  
**Available via Ecampus**

**SOC 475, RURAL SOCIOLOGY, 4 Credits**

Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored.  
**Available via Ecampus**

**SOC 480, ENVIRONMENTAL SOCIOLOGY, 4 Credits**

Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts.  
**Available via Ecampus**
SOC 481, *SOCIETY AND NATURAL RESOURCES, 4 Credits
Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

SOC 482, *ENERGY, CLIMATE AND SOCIETY, 4 Credits
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

SOC 499, SPECIAL TOPICS, 1-16 Credits
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
Equivalent to: SOC 490, SOC 499H
This course is repeatable for 16 credits.

SOC 499H, SPECIAL TOPICS, 1-16 Credits
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
Attributes: HNRS – Honors Course Designator
Equivalent to: SOC 499
This course is repeatable for 16 credits.

SOC 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

SOC 502, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

SOC 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

SOC 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SOC 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

SOC 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SOC 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

SOC 510, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

SOC 512, SOCIOLOGY OF WORK AND FAMILY, 4 Credits
Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 513, SOCIOLOGICAL THEORY, 4 Credits
Historical and philosophical foundations of sociological theory; major school of thought and their major contributors.
Recommended: SOC 204 or SOC 204H

SOC 518, QUALITATIVE RESEARCH METHODS, 4 Credits
An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined.
Equivalent to: PPOL 523
Recommended: SOC 204 or SOC 204H

SOC 522, SOCIOLOGY OF ORGANIZATIONS, 4 Credits
Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations.
Recommended: SOC 204 or SOC 204H

SOC 524, SOCIAL PSYCHOLOGY, 4 Credits
Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/identity. Contemporary research design, problems, and findings pertinent to social psychology.
Recommended: SOC 204 or SOC 204H

SOC 526, SOCIAL INEQUALITY, 4 Credits
Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 530, GENDER AND SOCIETY, 4 Credits
Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men.
Recommended: SOC 204 or SOC 204H
Available via Ecampus
SOC 532, SOCIOLOGY OF AGING, 4 Credits
Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 537, RACE AND ETHNIC RELATIONS, 4 Credits
Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined.
Recommended: SOC 204 or SOC 204H

SOC 538, US IMMIGRATION ISSUES IN THE 21ST CENTURY, 4 Credits
Provides a critical overview of immigration to the United States from a socio-historic perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean.

SOC 539, WELFARE AND SOCIAL SERVICES, 4 Credits
Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts.
Recommended: SOC 204 or SOC 204H or SOC 205 or SOC 206
Available via Ecampus

SOC 540, JUVENILE DELINQUENCY, 4 Credits
Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents.
Recommended: SOC 204 or SOC 204H

SOC 541, CRIMINOLOGY AND PENOLOGY, 4 Credits
Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 542, SOCIOLOGY OF DRUG USE AND ABUSE, 4 Credits
Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs.
Available via Ecampus

SOC 544, INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION, 4 Credits
Course takes place in a state correctional facility, with OSU students learning alongside 'inside' students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects.
Recommended: SOC 204
Available via Ecampus

SOC 548, LAW AND SOCIETY, 4 Credits
An introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions.
Recommended: (SOC 204 or SOC 204H) with minimum grade of D-

SOC 549, LAW, CRIME, AND POLICY, 4 Credits
Surveys criminal justice policies aimed at enforcing laws, reducing crime, punishing violators, and rehabilitating ex-offenders. Interrogates the behavioral assumptions used in creating and evaluating policies. Examines specific crimes and the policies used to address them.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 550, SOCIOLOGY OF EDUCATION, 4 Credits
Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 552, SOCIOLOGY OF RELIGION, 4 Credits
Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups.
Recommended: SOC 204 or SOC 204H

SOC 553, SOCIOLOGY OF SPORT, 4 Credits
Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media.
Recommended: SOC 204 or SOC 204H

SOC 554, LEISURE AND CULTURE, 4 Credits
Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources.
Recommended: SOC 204 or SOC 204H
Available via Ecampus
SOC 556, SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT, 4 Credits
Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes.
Recommended: SOC 204 or SOC 204H

SOC 560, THE SOCIOLOGY OF GLOBALIZATION, 4 Credits
Examines the sociological effect of globalization on Western and non-Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies.
Recommended: SOC 204 or SOC 204H

SOC 566, INTERNATIONAL DEVELOPMENT: GENDER ISSUES, 4 Credits
Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization.
Recommended: SOC 204 or SOC 204H

SOC 570, COLLECTIVE BEHAVIOR, 4 Credits
Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/technological disasters, urban legends, collective delusions/ mass hysteria, protest/demonstrations, riots/mobs.
Recommended: SOC 204 or SOC 204H

SOC 571, SOCIAL MOVEMENTS, 4 Credits
Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society.
Recommended: SOC 204 or SOC 204H

Available via Ecampus

SOC 575, RURAL SOCIOLOGY, 4 Credits
Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 580, ENVIRONMENTAL SOCIOLOGY, 4 Credits
Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 581, SOCIETY AND NATURAL RESOURCES, 4 Credits
Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts.
Recommended: SOC 204 or SOC 204H
Available via Ecampus

SOC 582, ENERGY, CLIMATE AND SOCIETY, 4 Credits
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice.

SOC 599, SPECIAL TOPICS, 1-16 Credits
Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students.
Equivalent to: SOC 590
This course is repeatable for 16 credits.
Recommended: SOC 204 or SOC 204H

SOC 808, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

Asian Studies Minor
The minor program will provide an opportunity for students majoring in fields such as business, engineering, or sciences who will be working in Asia or with Asians. They will gain a significant degree of cultural literacy that will be critical for their professional success. In addition, the program will be an outstanding supplement to a traditional liberal arts major for students with particular interests in Asia, who want to study abroad, or who plan to go on to do graduate work in areas with concentrations in aspects of Asia.

Minor Code: 938

**Additional Requirements**

Select 19 credits of additional approved economics courses at the 300 level or above, at least 4 credits of which must be in courses numbered 411 or higher

Total credits required for graduation: 180

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

Minor Code: 885

**Economics Undergraduate Major (BA, BS, HBA, HBS)**

This major offers the following option(s):

- General Economics (p. 1304)
- Law, Economics and Policy (p. 1304)
- Managerial Economics (p. 1305)
- Mathematical Economics (p. 1305)

Also available via Ecampus (http://ecampus.oregonstate.edu/).

Businesses want employees who can think, communicate orally, write, and solve problems and who are comfortable with quantitative analysis. The traditional economics major perfectly prepares students to meet these demands.

**Major Code: 885**

- Present economic theory and applications in written and oral form.
- Demonstrate an understanding of microeconomic and macroeconomic theory.
- Apply economic theory to issues in fields of economics.
- Derive basic estimators and prove their properties, estimate economic models using data, test hypotheses, forecast, and interpret estimates.

**Economics Core Curriculum**

Mathematical Economics Option

This option is offered within the following major(s):

- Economics - College of Liberal Arts (p. 1303)

As the economics profession becomes increasingly mathematical, economics majors who plan to go to graduate school need a strong math background. The Mathematical Economics option provides the necessary mathematical preparation for graduate school bound economics majors. It also serves students who desire a more quantitative program or who come into the major with significant math preparation to apply math toward their degrees in economics.

Energy Policy Graduate Certificate

Available only via Ecampus.

Rooted in Sociology, Economics, Political Science, and various natural resource sciences, students will gain valuable interdisciplinary insights into complex challenges involving energy resources. Students are offered a choice of several courses that will prepare them with the skills and competencies needed to understand economic, social, political and cultural dynamics of energy policy, and to design and evaluate energy policy as it pertains to Oregon and other contexts.

All students must receive a grade of ‘C’ (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all courses taken toward the Law, Economics and Policy option. None of the 51 credits may be taken S/U. Students cannot receive credit toward the option for both ECON 311 and ECON 411, for both ECON 315 and ECON 415, and for both ECON 424 and ECON 427. No more than 4 credits of self-study courses (ECON 401–ECON 410) may be counted toward the 51 credit requirement.

Option Code: 888

Political Science Graduate Minor

Graduate Areas of Concentration

American politics, judicial politics, public administration, political theory, state and local government, international relations, comparative politics, gender politics, environmental policy

Graduate work in Political Science may serve as a field of study for a Master of Arts in Interdisciplinary Studies (MAIS) degree or as a minor in other advanced degree programs. The political science program aims to provide a systematic understanding of political processes, institutions, theories, and behavior. Students are encouraged to acquire competence in statistics as aids to analyzing political phenomena.

Minor Code: 9600

Students may choose the “generic” graduate minor, which simply requires 16 credits of graduate course work in political science for Master’s students and 20 credits for doctoral students. Or, students may choose one of two tracks within the minor: Environmental and Energy Politics; and International Politics. Students pursuing a track may choose any of the political science courses listed for that track. Students may also count one of the non-political science courses listed under the track toward the political science graduate minor.

For the generic graduate minor in political science, no specific courses are required. Master’s students must take 16 credits of graduate course work in political science, and PhD students must take 20 credits. Any combination of graduate political science courses will satisfy this requirement, but a maximum of 4 credits from PS 501–PS 510 may be counted toward the minor.

For one of the two tracks, Master’s students must choose four (4) courses from the list of courses for the track, at least three (3) being from political science; and PhD students much choose five (5) courses, at least four (4) being from political science. Students may take one non-political science course on the list, and may also count up to 4 credits from PS 501–PS 510 toward the option.

**Political Science Minor**

Also available at OSU-Cascades and via Ecampus.

The Political Science Program offers students the ability to augment their primary major by adding a minor in political science. Because politics and policy are relevant to all disciplines, understanding how your discipline interacts with political systems and policymaking can enhance any program of study and strengthen students’ graduate school applications and resumes for future employment.

Minor Code: 960

The structure of the Political Science minor mirrors that of the major. In both, there is a “general” program of study that provides a wide array of choices among courses, as well as three “tracks” that afford students the opportunity for specialization. All students in the minor must complete at least seven courses (28 credits), of which at least three courses (12 credits) must be taken at Oregon State University. Students must maintain a 2.0 GPA in their OSU courses. In addition, no more than four (4) credits from PS 401 – PS 410 may count toward the minor. No more than eight credits may be from courses taken S/U.

Minor Tracks

Students can select one of three concentrations in the minor: Law and Politics; International Affairs; or Environmental and Energy Politics. These tracks correspond to the options within the Political Science major.
Political Science Undergraduate Major (BA, BS, HBA, HBS)

This major offers the following option(s):

- Environmental and Energy Politics (p. 1309)
- International Affairs (p. 1310)
- Law and Politics (p. 1311)

Also available via Ecampus.

Political Science is the systematic study of politics wherever it takes place—in governmental institutions, the international arena, and civil society. Political science majors at Oregon State may choose the general political science major, or one of the three options that focus on law and politics, international affairs, or environmental and energy politics. All political science majors learn to think critically, write clearly and speak persuasively. They learn the ideas of great political thinkers, learn the political fundamentals behind the headlines, and have engaging discussions from all points of view with other students and professors.

Major Code: 960

Political Science Undergraduate Major (BA, BS, HBA, HBS)

Students selecting the Political Science major must complete 52 credits of political science course work, of which at least 36 credits must be upper-division courses. As part of these overall credit totals, Political Science majors must complete:

Total Credits: 28

Minor Code: 960

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
II. Methods/WIC
PS 300 is the research methods and WIC course. The school encourages students to take the Methods/WIC course late in their second or early in their third year.

III. Upper-Division Subfield Courses
A. For the general major, students must take one course each from at least three of the four subfields.

B. For the options, students choose from a list of courses approved for the option.

IV. Potential for Specialization
Students may choose a general political science major or may choose from one of three transcript-visible options:

1. Environmental and Energy Politics
2. International Affairs
3. Law and Politics

V. Potential for Learning Outside the Classroom.
Political science majors are strongly encouraged to pursue experiential learning and other educational opportunities outside of the classroom, and these experiences can be used to fulfill some political science graduation requirements. Such experiences can include research, thesis writing, projects, or internship. Credits will be placed in the appropriate PS 401–PS 410 subject code. A maximum of 8 credits from any combination of PS 401–PS 410 may be applied to the major, although additional credits from courses in this range may be applied to general graduation requirements. Additional experiential learning opportunities include ‘field schools’ and study abroad. Students should discuss all of these opportunities with the political science undergraduate advisor.

VI. Additional Requirements for the Major
• Majors are required to maintain a minimum cumulative 2.00 grade-point average for all political science course work.
• Majors must earn a C– grade or better in PS 300.
• Students must complete the BA or BS requirements specified by the College of Liberal Arts.

Major Code: 960

Environmental and Energy Politics Option

This option is offered within the following major(s):

• Political Science - College of Liberal Arts (p. 1308)

The Environmental and Energy Politics option under the Political Science major provides students with the opportunity to focus their undergraduate studies on topics involving:

• Historical and contemporary environmental problems
• Governmental and non-governmental efforts to address problems at the local, state, federal and international levels
• Interactions between key actors and institutions involved in environmental policymaking in the United States and internationally

Option Code: 691
additional credits from courses in this range may be applied to general graduation requirements. Additional experiential learning opportunities include ‘field schools’ and study abroad. Students should discuss all of these opportunities with the political science undergraduate advisor.

Option Code: 691

International Affairs Option

This option is offered within the following major(s):

- Political Science - College of Liberal Arts (p. 1308)

The International Affairs option provides students with the opportunity to focus their undergraduate studies on topics involving:

- The political systems and dynamics of different countries and regions around the world
- Relations among countries and non-state actors
- Global issues, problems, and institutions

Option Code: 471

Option Code: 471

Law and Politics Option

This option is offered within the following major(s):

• Political Science - College of Liberal Arts (p. 1308)

The Law and Politics option offers students the opportunity to focus their undergraduate studies on topics involving:

• Constitutional principles and interpretation
• Judicial politics and how it shapes the law
• Relationships between the various branches and levels of government in the United States
• Normative arguments regarding justice and equality in theory and in practice

Option Code: 634

Public Policy Graduate Major (EMPP, MPP, PhD)

Graduate Areas of Concentration

Energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; social policy
EMPP and MPP available via Ecampus.

Oregon State University offers graduate programs in public policy to students interested in energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy. The degrees are granted by the College of Liberal Arts and provide graduate education for students wishing to develop their interests and careers in the public and nonprofit sectors.

The EMPP is designed for mid-career professionals in the public sector who are interested in moving up in their positions or who are looking to transition from the private sector to a career in public service. The Master of Public Policy (MPP) specifically prepares students for careers in domestic and international organizations or preparation for PhD studies. The PhD in Public Policy prepares students for academic or non-academic research careers in the public, private, and nongovernmental sectors.

The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. The degrees are designed to provide individuals with analytic skills, an understanding of public policy processes, and substantive knowledge in a specific policy area.

To see details outlined in a brochure, visit the Public Policy website (http://liberalarts.oregonstate.edu/spp/graduate-programs-public-policy/).

Email: bsteel@oregonstate.edu

Major Code: 9570

MPP

The Master of Public Policy is a professional degree intended to prepare students for careers in the public, nonprofit, and international sectors and offer training for in-service students desiring professional growth and advancement. The degree is designed to be a generalist program, with an emphasis on analytic skills and policy knowledge. The degree requires a minimum of 62 graduate credits, 44 of which are in the required core. The core curriculum provides an important foundation in statistics, research methods, computer applications, public policy analysis, public administration and ethics, and economics. The remaining 18 credits support the student’s preferred area of concentration, consisting of environmental policy, international policy, rural policy, science policy, or social policy. Students with little work experience in public service, the nonprofit sector, or the international context will be required to engage in a supervised internship that will allow them to work closely with experienced mentors who will help them integrate theory with practice and introduce them to a professional network. Students with relevant work experience will substitute course work for internship credits. A final oral examination is required.

1  EMPP students can select a focus in one of several established concentrations or graduate certificate programs, or self-design a concentration with an advisor and with the approval of the OSU Public Policy Graduate Program Director. All concentrations and graduate certificates require at least 16 quarter credits. Students can take concentration and elective courses from a variety of approved programs and colleges across OSU curriculum and relevant PSU online courses. In addition, both OSU and PSU intend to develop additional concentrations and graduate certificates in the future that meet student and community needs (e.g., intersection of rural-urban policy, etc.). Each concentration and/or certificate has a faculty advisor to help students identify appropriate courses and committee members.

Major Code: 9570

Public Policy Undergraduate Major (BS, HBS)

Also available via Ecampus.

The discipline of public policy is closely connected to the practice of policy and this program ensures that students interact with policymakers as well as the knowledge-producers who support policy decisions. Graduates of the BSPP will have the skills necessary for understanding the political, economic, and social constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that animate critical policy debates. The Public Policy Major will provide students with a set of research, analytical, and management skills that will be transferable across sectors and across issue areas. The undergraduate program will prepare graduates for a career not only in public service (federal, state, and local government), but also in not-for-profit and for-profit organizations, as well as admissions to competitive graduate programs in a wide range of programs through which they may further broaden their intellectual and practical experience and expertise.

The BSPP is designed with an emphasis on substantive interdisciplinary knowledge about important policy issues, analytic skills, and policy practice. Students will have the opportunity to pursue their individual interests and passion in specialization areas, each of which is supported by a wealth of experience and expertise in both the School of Public Policy and across the OSU campus. In addition, the degree requires a supervised practicum with a public, non-profit, private, or international organization.

Major Code: 801

- Apply social science methods and policy analysis to practical problems of government, communities, regions, and/or global issues.
• Demonstrate the ability to apply oral and written communication skills in public appearances, written reports and documents.
• Follow ethical principles for citing sources, using human subjects, serving the public, and working with colleagues.
• Develop critical thinking about public policy issues and the ability to conduct professional analyses of social, political, and economic structures and bureaucratic processes.

**Rural Policy Graduate Certificate**

Available only via Ecampus.

This online certificate will prepare students with the skills and competencies needed to understand economic, social, political and cultural dynamics of rural places, and to design and evaluate rural policy as it pertains to Oregon and other contexts. Rooted in Sociology, Economics, Political Science, and various natural resource sciences, students will gain valuable inter-disciplinary insights into complex challenges facing rural places.

Sociology Graduate Minor

**Graduate Areas of Concentration**

*Environmental and natural resources, international sociology, social policy*

Sociology in the School of Public Policy serves as major and minor fields in the Master of Arts in Interdisciplinary Studies degree program and participates as a minor field in other advanced degree programs. The MAIS program is designed to meet the particular needs and interests of the individual student and features collaborative work in any two other pertinent departments.

Further information can be obtained by contacting the School of Public Policy, 300 Bexell Hall, OSU, Corvallis, OR 97331-3703

Minor Code: 980

Minor Code: 9800

Sociology Minor

Also available via Ecampus.

Undergraduate students may elect a Sociology minor to complement coursework in their major discipline.

Minor Code: 980

Minor Code: 9800

Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward the Sociology minor.

A minimum GPA of 2.00 must be earned in sociology coursework.

Minor Code: 980

**Sociology Undergraduate Major (BA, BS, HBA, HBS)**

This major offers the following option(s):

- Crime and Justice (p. 1315)
- Environmental and Natural Resource Sociology (p. 1316)

Also available via Ecampus.

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one's education and strengthens the base of understanding from which one can pursue a career or further education. There are currently two options for both Corvallis campus students and Ecampus students to choose from: Crime and Justice, and Environmental and Natural Resources.

Major Code: 980

- Recognize and interpret existing sociological knowledge.
- Construct sociological explanations for social phenomena.
- Conduct sociological inquiry.
- Make sociological sense of relevant data.
- Interpret the quantitative results and articulate the findings (1-20 pts).

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

^ Maximum of 12 at lower division.

Maximum of 8 credits in courses numbered SOC 401 to SOC 410.

Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward a degree in sociology.

A minimum grade-point average of 2.50 must be earned in sociology course work. A grade of C– or above is required in SOC 315, SOC 316, and SOC 413.

Major Code: 980

**Crime and Justice Option**

This option is offered within the following major(s):

- Sociology

Crime and Justice Option
Environmental and Natural Resource Sociology Option

This option is offered within the following major(s):

- Sociology - College of Liberal Arts (p. 1315)

Also available via Ecampus.

The option is designed to provide students with the ability to apply social science concepts and approaches to better understand and analyze relationships between crime, justice, and public policy from a sociological perspective. The option has particular relevance for sociology students aspiring to careers in criminal justice, law, or social services, as well as those preparing for advanced/graduate programs in criminology, criminal justice, or public policy. Academic internships are available in local criminal justice and social service agencies, offering a unique combination of scholarly analysis and practical experience for students seeking careers in fields such as law, policing, corrections, and social work.

Elective Courses

Select 13 credits from the following courses:

- Baccalaureate Core Course (BCC)

Option Code: 642

School of Writing, Literature, and Film

The School of Writing, Literature, and Film offers instruction in literary studies, writing (creative, critical, professional/technical), and critical film studies to students in all disciplines who seek the cultural and intellectual values of the humanities and arts, as well as the broadening influence of humanistic studies, creative expression, cultural studies, and writing for the professions. In addition, the school provides courses for those interested in the major or minor in English, especially for those who plan to teach in the elementary, secondary, or college professions, or who plan to pursue graduate work in English, writing, or film. The Writing minor, which is also offered via Ecampus (http://ecampus.oregonstate.edu/online-degrees/undergraduate/writing/), serves students interested in creative writing and/or writing for the scientific and/or technical and professional fields.

Minor Programs

The minor in English allows students to concentrate in the area of the liberal arts and develop the reading and writing skills often demanded by employers. Students taking a minor in English choose from among three areas: general English studies, English literature, and American literature.

Graduate Programs

The School of Writing, Literature, and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be in literature and culture, or rhetoric, writing, and culture. The school also offers the Master of Fine Arts degree in Creative Writing. Graduate work in the school may also be applied to the Master of Arts in Interdisciplinary Studies (MAIS) degree or to minors in other advanced degree programs.

Senior Instructors Bushnell, Delf, Drummond, Elbom, G., Elbom, E., Harrison, Larison, St. Jacques

Applied Journalism (AJ)
AJ 199, SPECIAL TOPICS, 1-3 Credits
This course is repeatable for 12 credits.
AJ 299, SPECIAL TOPICS, 1-3 Credits
This course is repeatable for 6 credits.
AJ 308, WORKSHOP, 1-3 Credits
This course is repeatable for 6 credits.

AJ 311, MEDIA STORYTELLING, 3 Credits
Introduction to community journalism, with a focus on developing storytelling methodologies for a variety of media in firsthand reporting praxis.
Prerequisite: WR 121 with B or better

AJ 312, ADVANCED MEDIA STORYTELLING, 3 Credits
Continued praxis in journalistic storytelling, with an emphasis on developing intensive hard news stories and photojournalistic essay packages through reporting government agencies.
Prerequisite: AJ 311 with B or better

AJ 313, PROFESSIONAL PRACTICES IN APPLIED JOURNALISM, 3 Credits
Faculty, staff and students connect to generate in-depth critiques of polished journalistic projects, culminating in the production and distribution of a best practices job kit.
Prerequisite: AJ 311 with B or better and AJ 312 [B]
This course is repeatable for 6 credits.

AJ 408, WORKSHOP, 1-3 Credits
This course is repeatable for 6 credits.

AJ 410, INTERNSHIP, 1 Credit
Students seeking to obtain the Applied Journalism Minor must complete three sections of AJ 410 Internship, to include reporting, production and/or editorial duties at Orange Media Network (OMN).
This course is repeatable for 6 credits.

AJ 490, MEDIA LAW AND ETHICS, 3 Credits
Exploring case studies and other analyses germane to the most relevant and pressing legal and ethical issues in contemporary journalism.
Prerequisite: AJ 311 with B or better
This course is repeatable for 6 credits.

English (ENG)
ENG 104, *INTRODUCTION TO LITERATURE: FICTION, 3 Credits
Study of fiction for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 104H
Available via Ecampus

ENG 104H, *INTRODUCTION TO LITERATURE: FICTION, 3 Credits
Study of fiction for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 104
ENG 105, *INTRODUCTION TO LITERATURE: DRAMA, 3 Credits
Study of drama for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

ENG 106, *INTRODUCTION TO LITERATURE: POETRY, 3 Credits
Study of poetry for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 106H
Available via Ecampus

ENG 106H, *INTRODUCTION TO LITERATURE: POETRY, 3 Credits
Study of poetry for greater understanding and enjoyment. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 106

ENG 107, *INTRODUCTION TO LITERATURE: CREATIVE NONFICTION, 3 Credits
An introduction to the study of creative nonfiction as a diverse genre, from journalism to memoir and essay. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Recommended: WR 121

ENG 108, *INTRODUCTION TO SCIENCE FICTION AND FANTASY, 3 Credits
Focuses on modern and contemporary examples of science fiction and fantasy with some attention paid to the roots of the genres (myths, folklore, and fairy tales). Hypothesizes that both genres reflect the anxieties and aspirations of the eras that produce and consume them. Introduces students to a range of modern classics, including contemporary science fiction and fantasy written by women and people of color. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ENG 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

ENG 200, LIBRARY SKILLS FOR LITERARY STUDY, 1 Credit
Introduction to library resources for the study of literature. Required for English majors.

ENG 201, *SHAKESPEARE, 4 Credits
The earlier plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 201H
Available via Ecampus

ENG 201H, *SHAKESPEARE, 4 Credits
The earlier plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 201

ENG 202, *SHAKESPEARE, 4 Credits
The later plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 202H

ENG 202H, *SHAKESPEARE, 4 Credits
The later plays. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 202

ENG 204, *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660, 4 Credits
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 204H
Available via Ecampus

ENG 204H, *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660, 4 Credits
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 204

ENG 205, *SURVEY OF BRITISH LITERATURE: RESTORATION TO ROMANTIC ERA, 4 Credits
English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 205H, ENG 205H

ENG 205H, ENG 205H
ENG 205H, *SURVEY OF BRITISH LITERATURE: RESTORATION TO ROMANTIC ERA, 4 Credits

English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 205

ENG 206, *SURVEY OF BRITISH LITERATURE: VICTORIAN ERA TO 20TH CENTURY, 4 Credits

English literature presented in chronological sequence. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 206H

ENG 207, *LITERATURE OF WESTERN CIVILIZATION: CLASSICAL-RENAISSANCE, 4 Credits

The great plays, poems and fiction of Western civilization. Covers the Classical World: (Greek, Hebrew, Roman) and Western European major authors through the Renaissance. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 208, *LITERATURE OF WESTERN CIVILIZATION: 18TH CENTURY TO PRESENT, 4 Credits

The great plays, poems and prose of Western civilization from the 18th century Enlightenment through Romanticism and beyond. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 210, *LITERATURES OF THE WORLD: ASIA, 4 Credits

Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Asia. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Available via Ecampus

ENG 211, *LITERATURES OF THE WORLD: AFRICA, 4 Credits

Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 211H

ENG 211H, *LITS OF THE WORLD: AFRICA, 4 Credits

Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 211

ENG 212, *LITERATURES OF THE WORLD: MESO/SOUTH AMERICA, CARIBBEAN, 4 Credits

Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Meso- and South America and the Caribbean. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ENG 213, *LITERATURES OF THE WORLD: MIDDLE EAST, 4 Credits

Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Available via Ecampus

ENG 213H, *LITERATURES OF THE WORLD: MIDDLE EAST, 4 Credits

Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core
Equivalent to: ENG 213

ENG 214, *LITERATURE OF THE WORLD: EUROPE, 4 Credits

Representative works of poetry, prose, and drama written by European authors. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture

ENG 215, *CLASSICAL MYTHOLOGY, 4 Credits

Greek and Roman mythology, its allusions, continuing influences. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
ENG 220, *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION, 4 Credits
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. CROSSLISTED as ENG 220/FILM 220. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220H, FILM 220

ENG 220H, *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION, 4 Credits
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. CROSSLISTED as ENG 220/FILM 220. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220, FILM 220

ENG 221, *AFRICAN-AMERICAN LITERATURE, 4 Credits
Reading and critical analysis of African-American literature in historical, political, and/or thematic perspective. Content changes from term to term. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 221H
This course is repeatable for 8 credits.

ENG 221H, *AFRICAN-AMERICAN LITERATURE, 4 Credits
Reading and critical analysis of African-American literature in historical, political, and/or thematic perspective. Content changes from term to term. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 221
This course is repeatable for 8 credits.

ENG 222, CHILDREN’S LITERATURE, 4 Credits
Surveys a variety of genres, including fairy tales, folktales, and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.
Available via Ecampus

ENG 225, THE ART, SCIENCE, AND LITERATURE OF FLY FISHING, 1 Credit
Designed to rapidly introduce students to some of the major themes and formal devices of literature written about fly fishing. In four days, we will gain a sense of how four different genres—the short story, the novel, poetry, and creative nonfiction—represent and understand this activity.
Corequisites: FW 112, PAC 331

ENG 240, *INTRODUCTION TO ENVIRONMENTAL LITERATURE, 4 Credits
An exploration of the key figures, themes, theories, and works of American environmental literature. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ENG 253, *SURVEY OF AMERICAN LITERATURE: COLONIAL TO 1900, 4 Credits
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 254, *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT, 4 Credits
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 254H

ENG 254H, *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT, 4 Credits
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 254

ENG 260, *LITERATURE OF AMERICAN MINORITIES, 4 Credits
Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 260H

ENG 260H, *LITERATURE OF AMERICAN MINORITIES, 4 Credits
Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 260
ENG 275, *THE BIBLE AS LITERATURE, 4 Credits
Biblical structure, literary types, ideas, influences. Not offered every year.
(H) (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
**Equivalent to:** ENG 275H
**Available via Ecampus**

ENG 275H, *THE BIBLE AS LITERATURE, 4 Credits
Biblical structure, literary types, ideas, influences. Not offered every year.
(H) (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
**Equivalent to:** ENG 275

ENG 295, *FEMINISM AND THE BIBLE, 3 Credits
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. CROSSLISTED as ENG 295/PHL 295/WGSS 295. (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts
**Equivalent to:** ENG 295H, PHL 295, PHL 295H, WGSS 295, WGSS 295H

ENG 295H, *FEMINISM AND THE BIBLE, 3 Credits
Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. CROSSLISTED as ENG 295/PHL 295/WGSS 295. (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator
**Equivalent to:** ENG 295, PHL 295, PHL 295H, WGSS 295, WGSS 295H

ENG 299, SPECIAL TOPICS, 1-16 Credits
*This course is repeatable for 16 credits.*

ENG 301, WAYS OF READING, 4 Credits
What’s the difference between reading a book for pleasure and reading it for a class? What kinds of skills are necessary for upper-level work as an English major? What exactly is literary criticism? Pursue these questions by studying a selection of texts paired with works providing historical and critical context. Learn how to think and write like a literary critic by reading carefully, discussing these works in class, and writing analytical essays.

ENG 302, ^WRITING ABOUT LITERATURE, 4 Credits
The conventions of academic writing in the English major, with the goal of developing original textual interpretations and situating those interpretations in relation to secondary sources. Develop an understanding of a broader scholarly conversation by writing about issues of difference, including but not limited to categories of gender, race, ethnicity, sexuality, class, and ability. In tandem with one-credit library lab (ENG 200), practice evaluating scholarly resources, including secondary sources and archival research.
**Attributes:** CWIC – Core, Skills, WIC
**Prerequisite:** ENG 301 with D- or better
**Corequisites:** ENG 200

ENG 304, CAREER PREPARATION FOR ENGLISH MAJORS, 2 Credits
Introduces students majoring in English to tasks and processes needed to successfully prepare for a future career. Includes exercises in self-reflection, guidance in exploring professional options and networking, and feedback on job-seeking materials.
**Prerequisite:** ENG 301 with D- or better

ENG 317, *THE AMERICAN NOVEL: BEGINNINGS TO CHOPIN, 4 Credits
Chronological survey of the novel in America. Covers from the beginnings to Chopin. (H) (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core

ENG 318, *THE AMERICAN NOVEL: MODERNIST PERIOD, 4 Credits
Chronological survey of the novel in America. Covers Modernist Period from Dreiser to Faulkner. (H) (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
**Available via Ecampus**

ENG 319, *THE AMERICAN NOVEL: POST-WORLD WAR II, 4 Credits
Chronological survey of the novel in America. Covers Post-World War II: Mailer to the present. (H) (Bacc Core Course)
**Attributes:** CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
**Available via Ecampus**
ENG 320, *STUDIES IN PAGE, STAGE, AND SCREEN, 4 Credits
Study of a particular theme, genre, movement, or author through the relations of text and performance. Topics change from term to term and may include content from film, drama, digital sources, and other visual media. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.

ENG 321, *STUDIES IN WORD, OBJECT, AND IMAGE, 4 Credits
Study of a particular theme, genre, movement, or author through the relations of texts to material artifacts and/or static visual objects (e.g., paintings, engravings, printed matter, or photographs). Topics change from term to term. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
This course is repeatable for 8 credits.

ENG 322, *STUDIES IN GLOBALISM, TEXT, AND EVENT, 4 Credits
Study of a particular theme, genre, movement, or author as informed by patterns of globalization, issues in international relations, and/or landmark moments of cultural exchange. Topics change from term to term. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CSGI – Core, Synth, Global Issues
This course is repeatable for 8 credits.

ENG 330, *THE HOLOCAUST IN LITERATURE AND FILM, 4 Credits
Study of fiction, memoir, and film representing Nazi Holocaust of European Jewry. Reviews history of racial Anti-Semitism and rise of Nazism as context for textual analysis of Holocaust literature. Examines literary and filmic form as productive to social awareness of the roots, events, and aftermath of the Holocaust. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts

ENG 340, LITERATURES OF THE COAST, 4 Credits
Introduces the diverse means by which literature and the arts represent coastal and marine life. The working thesis is that modern cultural artifacts and literary theories are reflected in and have the power to transform the societal challenges facing coastal community and ocean health. Explores the significance of such interdisciplinary translations through a variety of generic perspectives including poetry, short story, philosophy, creative nonfiction, and graphic narrative.

ENG 345, INTRODUCTION TO LITERARY CRITICISM AND THEORY, 4 Credits
Study and analysis of critical frameworks and methodologies for the interpretation of literature and culture. Required for English majors. (H)
Attributes: LACH – Liberal Arts Humanities Core
Prerequisite: ENG 200 with C- or better

ENG 360, *NATIVE AMERICAN LITERATURE, 4 Credits
An introduction to the prose and poetry written by Native Americans of the North American continent. Not offered every year. (H) (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACH – Liberal Arts Humanities Core; LACN – Liberal Arts Non-Western Core

ENG 362, *AMERICAN WOMEN WRITERS, 4 Credits
Study of important literary works of any genre by American women from historical, thematic, or formalist perspectives. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 362H

ENG 374, *MODERN SHORT STORY, 4 Credits
Survey of the short story from the 19th century to the present. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 374H

ENG 374H, *MODERN SHORT STORY, 4 Credits
Survey of the short story from the 19th century to present. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 374

ENG 375, CHILDREN’S LITERATURE, 4 Credits
Surveys a variety of genres, including fairy tales, folktales, and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.
Equivalent to: ENG 375H
Available via Ecampus

ENG 375H, CHILDREN’S LITERATURE, 4 Credits
Surveys a variety of genres, including fairy tales, folktales and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENG 375
ENG 386, A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART I, 4 Credits
The first course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. Covers Conquest to Civil War. CROSSLISTED as ART 386/ENG 386.
Equivalent to: ART 386

ENG 387, A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART II, 4 Credits
The second course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. Covers Civil War to Harlem Renaissance. CROSSLISTED as ART 387/ENG 387.
Equivalent to: ART 387

ENG 388, A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART III, 4 Credits
The third course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. Covers Great Depression to Postmodernity. CROSSLISTED as ART 388/ENG 388.
Equivalent to: ART 388

ENG 399, SELECTED TOPICS, 1-16 Credits
(H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: ENG 399H
This course is repeatable for 16 credits.

ENG 399H, SELECTED TOPICS, 1-16 Credits
(H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: ENG 399
This course is repeatable for 16 credits.

ENG 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENG 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

ENG 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ENG 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENG 406, PROJECTS, 1-16 Credits
Equivalent to: ENG 406H
This course is repeatable for 16 credits.

ENG 406H, PROJECTS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENG 406
This course is repeatable for 16 credits.

ENG 407, SEMINAR, 1-16 Credits
CROSSLISTED as AMS 407/ENG 407. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: ENG 407H
This course is repeatable for 16 credits.

ENG 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

ENG 410, INTERNSHIP IN ENGLISH, 1-16 Credits
Provides upper-division English majors with supervised, on-the-job work experience, accompanying academic readings. Graded P/N. This course is repeatable for 16 credits.
Recommended: 16 credits of literature; 6 credits of writing beyond WR 121

ENG 412, STUDIES IN BRITISH THEATER AND SOCIETY, 4 Credits
Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: Sophomore standing; 8 credits of ENG 200-level or above

ENG 416, POWER AND REPRESENTATION, 4 Credits
Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year. (H) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACH – Liberal Arts Humanities Core
Recommended: Sophomore standing; 8 credits of ENG 200-level or above

ENG 418, THE ENGLISH NOVEL: VICTORIAN PERIOD, 4 Credits
Selected English novels focusing on those from the Victorian period. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: Sophomore standing; 8 credits of ENG 200-level or above
ENG 420, *STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION, 4 Credits
Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination;
LACH – Liberal Arts Humanities Core
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 425, STUDIES IN MEDIEVAL LITERATURE, 4 Credits
Particular genres, themes, and writers in medieval literature. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 426, STUDIES IN CHAUCER, 4 Credits
The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 430, STUDIES IN EARLY MODERN LITERATURE, 4 Credits
Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 433, STUDIES IN THE LONG EIGHTEENTH CENTURY, 4 Credits
Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g., Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g., Congreve, Wycherly, Gay). Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 434, STUDIES IN ROMANTICISM, 4 Credits
Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g., Austen, Wollstonecraft, Burke). Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 435, STUDIES IN SHAKESPEARE, 4 Credits
Shakespeare’s works from a variety of critical and scholarly perspectives. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 436, STUDIES IN VICTORIAN LITERATURE, 4 Credits
Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 438, STUDIES IN MODERNISM, 4 Credits
Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890s to 1940s). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 440, STUDIES IN MODERN IRISH LITERATURE, 4 Credits
Studies in the literature and contexts of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O’Casey, Gregory, Synge, Bowen, Moore, Behan, O’Brien, Kavanagh, Cronin. Sometimes offered as a study of Joyce’s works alone. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 445, STUDIES IN NONFICTION, 4 Credits
Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term. Not offered every year. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 450, STUDIES IN SHORT FICTION, 4 Credits
Particular writers, movements, and types of short fiction. Topics change from term to term. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 454, MAJOR AUTHORS, 4 Credits
Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 460, STUDIES IN DRAMA, 4 Credits
Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 465, STUDIES IN THE NOVEL, 4 Credits
Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 470, STUDIES IN POETRY, 4 Credits
Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term. Not offered every term. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 475, STUDIES IN CRITICISM, 4 Credits
Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 16 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 480, STUDIES IN LITERATURE, CULTURE AND SOCIETY, 4 Credits
Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term. Not offered every term. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: FILM 480
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 482, STUDIES IN AMERICAN LITERATURE, CULTURE, AND THE ENVIRONMENT, 4 Credits
Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 485, STUDIES IN AMERICAN LITERATURE, 4 Credits
Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term. Not offered every term. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 486, STUDIES IN BRITISH LITERATURE, 4 Credits
Particular British writers, movements, conventions, genres, and problems. Topics change from term to term. Not offered every year. (H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 488, LITERATURE AND PEDAGOGY, 4 Credits
Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation. (H)
Attributes: LACH – Liberal Arts Humanities Core

ENG 489, WRITING, LITERATURE AND MEDICINE, 4 Credits
Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts.
ENG 490, HISTORY OF THE ENGLISH LANGUAGE, 4 Credits
A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 497, INTERNATIONAL WOMEN'S VOICES, 4 Credits
A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature. (H)
Attributes: LACH – Liberal Arts Humanities Core
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 498, WOMEN AND LITERATURE, 4 Credits
Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language.
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 499, SELECTED TOPICS, 1-16 Credits
(H)
Attributes: LACH – Liberal Arts Humanities Core
This course is repeatable for 16 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENG 502, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

ENG 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENG 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENG 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ENG 507, SEMINAR, 1-16 Credits
CROSSLISTED as AMS 507/ENG 507.
Equivalent to: AMS 507
This course is repeatable for 16 credits.

ENG 510, GRADUATE INTERNSHIP IN ENGLISH, 1-2 Credits
Provides graduate students with supervised, on-the-job work experience and professional development. Graded P/N.
This course is repeatable for 12 credits.

ENG 512, STUDIES IN BRITISH THEATER AND SOCIETY, 4 Credits
Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary.
This course is repeatable for 8 credits.

ENG 514, INTRODUCTION TO GRADUATE STUDIES, 4 Credits
Introduction to the MA program; theories and methods of English studies. Offered fall term only. Required for first-year MA students.

ENG 516, POWER AND REPRESENTATION, 4 Credits
Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year.

ENG 518, THE ENGLISH NOVEL: VICTORIAN PERIOD, 4 Credits
Selected English novels focusing on those from the Victorian period.

ENG 519, THE ENGLISH NOVEL: 20TH CENTURY, 4 Credits
Selected English novels of the 20th century.

ENG 520, STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION, 4 Credits
Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year.

ENG 525, STUDIES IN MEDIEVAL LITERATURE, 4 Credits
Particular genres, themes, and writers in medieval literature. Topics change from term to term.
This course is repeatable for 8 credits.

ENG 526, STUDIES IN CHAUCER, 4 Credits
The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term.
This course is repeatable for 8 credits.

ENG 530, STUDIES IN EARLY MODERN LITERATURE, 4 Credits
Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance.
This course is repeatable for 8 credits.
ENG 533, STUDIES IN THE LONG EIGHTEENTH CENTURY, 4 Credits
Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g., Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g., Congreve, Wycherly, Gay). Not offered every term. This course is repeatable for 8 credits.

ENG 534, STUDIES IN ROMANTICISM, 4 Credits
Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g., Austen, Wollstonecraft, Burke). Not offered every term. This course is repeatable for 8 credits.

ENG 535, STUDIES IN SHAKESPEARE, 4 Credits
Shakespeare’s works from a variety of critical and scholarly perspectives. Not offered every term. This course is repeatable for 8 credits. Recommended: At least one quarter of Shakespeare

ENG 536, STUDIES IN VICTORIAN LITERATURE, 4 Credits
Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term. This course is repeatable for 8 credits.

ENG 538, STUDIES IN MODERNISM, 4 Credits
Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890’s to 1940’s). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. This course is repeatable for 8 credits.

ENG 540, STUDIES IN MODERN IRISH LITERATURE, 4 Credits
Studies in the literature and context of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O’Casey, Gregory, Synge, Bowen, Moore, Behan, O’Brien, Kavanagh, Cronin. Sometimes offered as a study of Joyce’s works alone. Topics change from term to term. This course is repeatable for 8 credits.

ENG 545, STUDIES IN NONFICTION, 4 Credits
Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term. This course is repeatable for 16 credits.

ENG 550, STUDIES IN SHORT FICTION, 4 Credits
Particular writers, movements, and types of short fiction. Topics change from term to term. Not offered every year. This course is repeatable for 8 credits.

ENG 554, MAJOR AUTHORS, 4 Credits
Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term. Not offered every year. This course is repeatable for 8 credits.

ENG 560, STUDIES IN DRAMA, 4 Credits
Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term. Not offered every term. This course is repeatable for 8 credits.

ENG 565, STUDIES IN THE NOVEL, 4 Credits
Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term. Not offered every term. This course is repeatable for 8 credits.

ENG 570, STUDIES IN POETRY, 4 Credits
Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term. Not offered every term. This course is repeatable for 8 credits.

ENG 575, STUDIES IN CRITICISM, 4 Credits
Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term. Not offered every year. This course is repeatable for 16 credits.

ENG 580, STUDIES IN LITERATURE, CULTURE AND SOCIETY, 4 Credits
Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term. Not offered every term. Equivalent to: FILM 580 This course is repeatable for 16 credits.

ENG 582, STUDIES IN AMERICAN LITERATURE, CULTURE, AND THE ENVIRONMENT, 4 Credits
Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. This course is repeatable for 8 credits.
ENG 585, STUDIES IN AMERICAN LITERATURE, 4 Credits
Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term. Not offered every term. This course is repeatable for 8 credits.

ENG 586, STUDIES IN BRITISH LITERATURE, 4 Credits
Particular British writers, movements, conventions, genres, and problems. Topics change from term to term. Not offered every year. This course is repeatable for 8 credits.

ENG 588, LITERATURE AND PEDAGOGY, 4 Credits
Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation.

ENG 589, WRITING, LITERATURE AND MEDICINE, 4 Credits
Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts.

ENG 590, HISTORY OF THE ENGLISH LANGUAGE, 4 Credits
A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms.

ENG 595, LANGUAGE, TECHNOLOGY, AND CULTURE, 4 Credits
Explores relationship between literacy, technology, and thought.

ENG 598, WOMEN AND LITERATURE, 4 Credits
Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language. This course is repeatable for 8 credits.

Film Studies (FILM)
FILM 110, *INTRODUCTION TO FILM STUDIES: 1895-1945, 3 Credits
An introduction to the serious study of world cinema, 1895-1945. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 110

FILM 125, *INTRODUCTION TO FILM STUDIES: 1945-PRESENT, 3 Credits
Provides an introduction to the serious study of world cinema, 1945-present. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; CPWC – Core, Pers, West Culture; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 125

FILM 220, *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION, 4 Credits
A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. CROSSLISTED as ENG 220/FILM 220. (H) (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 220, ENG 220H

FILM 245, *THE NEW AMERICAN CINEMA, 4 Credits
A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core

FILM 245H, *THE NEW AMERICAN CINEMA, 4 Credits
A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course) Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 245, ENG 245H, FILM 245

Available via Ecampus

FILM 255, *WORLD CINEMA PART I: ORIGINS TO 1968, 4 Credits
A systematic introduction to the arts and history of international cinema, from the invention of the medium in 1895 to the rise of New Wave and Third Cinema in the 1960s. Weekly screenings of films such as Rashomon, Tokyo Story, Pather Parchali, Terra em Transe, and La Noire de. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core

FILM 256, *WORLD CINEMA PART II: 1968-PRESENT, 4 Credits
A systematic introduction to the arts and history of international cinema, from the decolonization movement in the 1960s and the 1970s to the dynamics of globalization that we are experiencing today. Weekly screenings include such films as A Better Tomorrow, Chungking Express, Spirited Away, Oldboy, Bombay, and City of God. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Available via Ecampus
FILM 265, *FILMS FOR THE FUTURE, 4 Credits
An interdisciplinary study of film, literary, and philosophical visions of the future. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 265

FILM 310, *FILM THEORY AND CRITICISM, 4 Credits
Survey of significant works and movements in film theory and criticism, from classical to contemporary eras. Begins with the question of what distinguishes film from other visual arts, pursuing questions about the ontology of film, medium specificity, and aesthetics. Proceeds with investigations concerning issues of technology, authorship, genre, the avant-garde, gender, race and ethnicity, commercialism, transnationalism, queer theory, and affect. Weekly screenings will supplement class readings, lectures and discussions. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Prerequisite: FILM 110 with C or better or FILM 125 with C or better

FILM 360, INTERNATIONAL FILM
FESTIVAL, 3 Credits
Critical study of a selection of films screened at the Oregon State University's International Film Festival. Topics include acting, sound, special effects, cinematography. CROSSLISTED as FILM 360/WLC 360.
Equivalent to: WLC 360
This course is repeatable for 9 credits.

FILM 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: FILM 399H
This course is repeatable for 16 credits.

FILM 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: FILM 399
This course is repeatable for 16 credits.

FILM 445, DOCUMENTARY FILM STUDIES, 4 Credits
Examines the worldwide development of documentary filmmaking. We interrogate the nature, form, and function of non-fiction cinematic forms by analyzing diverse films, filmmakers, and theoretical models, while paying attention to social, technological, and aesthetic influences. We study significant modes of documentary including the city symphony, political documentary, direct cinema/cinema verite, and postmodern documentary. Finally, we will pay special attention to the cross-fertilization of non-fiction with other filmmaking modes. Throughout the course, we seek to answer the following questions: How do documentary conventions mark the 'Real'? How is documentary film a tool for social change?

FILM 452, ^STUDIES IN FILM, 4 Credits
Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term. Lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 452, ENG 452H, FILM 452H
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

FILM 452H, ^STUDIES IN FILM, 4 Credits
Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term. Lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator; LACH – Liberal Arts Humanities Core
Equivalent to: ENG 452, FILM 452
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

FILM 480, STUDIES IN FILM, CULTURE AND SOCIETY, 4 Credits
Study of film in its relationship to society and culture; study of film culture. Topics change from term to term. (H)
Attributes: LACH – Liberal Arts Humanities Core
Equivalent to: ENG 480
This course is repeatable for 8 credits.
Recommended: Sophomore standing; 8 credits of ENG 200-level or above.

FILM 545, DOCUMENTARY FILM STUDIES, 4 Credits
Examines the worldwide development of documentary filmmaking. We interrogate the nature, form, and function of non-fiction cinematic forms by analyzing diverse films, filmmakers, and theoretical models, while paying attention to social, technological, and aesthetic influences. We study significant modes of documentary including the city symphony, political documentary, direct cinema/cinema verite, and postmodern documentary. FILM 552, STUDIES IN FILM, 4 Credits
Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term. Lecture and separate screenings each week. Film fee required. Not offered every year.
Equivalent to: ENG 552
This course is repeatable for 16 credits.

FILM 580, STUDIES IN FILM, CULTURE AND SOCIETY, 4 Credits
Study of film in its relationship to society and culture; study of film culture. Topics change from term to term.
Equivalent to: ENG 580
This course is repeatable for 8 credits.
**WR 115, INTRODUCTION TO EXPOSITORY WRITING, 3 Credits**
Introduction to rhetorical concepts and writing strategies necessary for university level written composition. Includes substantial discussion of grammar, punctuation, and usage conventions of standard written English. Does not satisfy WR 121 requirement. Graded P/N. This course is repeatable for 6 credits.

**WR 121, *ENGLISH COMPOSITION, 3 Credits***
Introduction to critical thinking, the writing process, and the forms of expository writing. Intensive writing practice, with an emphasis on revision. The term in which the student takes the course is determined alphabetically. (Bacc Core Course)
**Attributes:** CSW1 – Core, Skills, WR I
**Equivalent to:** WR 121H
**Available via Ecampus**

**WR 121H, *ENGLISH COMPOSITION, 3 Credits***
Introduction to critical thinking, the writing process, and the forms of expository writing. Intensive writing practice, with an emphasis on revision. The term in which the student takes the course is determined alphabetically. (Bacc Core Course)
**Attributes:** CSW1 – Core, Skills, WR I; HNRS – Honors Course Designator
**Equivalent to:** WR 121
**Available via Ecampus**

**WR 130, FUNDAMENTALS OF GRAMMAR, SYNTAX, AND SENTENCE BUILDING, 1 Credit***
Provides opportunities to improve writing at the sentence level. Focuses on the fundamental elements of the sentence (grammar), the principles and rules of sentence structure (syntax), and techniques for writing meaningful, compelling sentences (sentence building). WR 130 is a hybrid course; students will use online modules, activities, and quizzes to advance understanding of grammar fundamentals and to practice writing, editing, and revising sentences. In-person meetings will emphasize student questions and applying lessons to other academic writing projects. Graded P/N.
**Available via Ecampus**

**WR 199, SPECIAL STUDIES, 1-16 Credits**
This course is repeatable for 16 credits.

**WR 201, *WRITING FOR MEDIA, 3 Credits***
Introduction to newspaper style. Introduction to reporting. (Bacc Core Course)
**Attributes:** CSW2 – Core, Skills, WR II
**Equivalent to:** LS 201
**Recommended:** Grade B or higher in WR 121 or WR 121H and 30 wpm typing speed.
**Available via Ecampus**

**WR 214, *WRITING IN BUSINESS, 3 Credits***
Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in business and industry. (Bacc Core Course)
**Attributes:** CSW2 – Core, Skills, WR II
**Prerequisite:** WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
**Available via Ecampus**

**WR 220, *STORIES OF THE US-MEXICO BORDER, 4 Credits***
Analyzes stories from and about the US-Mexico border. Explores and challenges conventional ideas about undocumented immigration in the US and considers immigration as a complex phenomenon with various causes. Examines historical and current causes of migration across the US-Mexico border and the difficulties experienced on the migrant trail. Analyzes discriminatory practices of dehumanization, deportation, and detention and reveals immigrant resistance to oppression. (Bacc Core Course)
**Attributes:** CPDP – Core, Perspective, Difference/Power/Discrimination

**WR 222, *ENGLISH COMPOSITION, 3 Credits***
Continued practice in expository writing with an emphasis on argumentation and research. (Bacc Core Course)
**Attributes:** CSW2 – Core, Skills, WR II
**Prerequisite:** WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
**Available via Ecampus**

**WR 224, *INTRODUCTION TO FICTION WRITING, 3 Credits***
Discussion workshop. Student work examined in context of contemporary published work. (FA) (Bacc Core Course)
**Attributes:** CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
**Prerequisite:** WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
**Equivalent to:** WR 224H
**Available via Ecampus**

**WR 224H, *INTRODUCTION TO FICTION WRITING, 3 Credits***
Discussion workshop. Student work examined in context of contemporary published work. (FA) (Bacc Core Course)
**Attributes:** CSW2 – Core, Skills, WR II; HNRS – Honors Course Designator; LACF – Liberal Arts Fine Arts Core
**Prerequisite:** WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
**Equivalent to:** WR 224
**Available via Ecampus**
WR 228, *WRITING ABROAD, 3 Credits
Prepares students to compose thoughtful, nuanced, and journalistically-grounded writing for a Web-based audience based on experiences studying abroad. By reading deeply in the lifestyle and creative nonfiction genres, students will develop strategies for communicating their observations effectively. Instruction follows an editorial model, allowing students to practice the role of editor, freelancer, and designer, all with an eye towards publishing in a course-affiliated online magazine. To achieve success in this course, students must demonstrate knowledge of writing techniques appropriate to the genre and must demonstrate editorial skill. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with C- or better
Available via Ecampus

WR 230, *ESSENTIALS OF ENGLISH GRAMMAR, 3 Credits
Introduces students to the structure of sentences with a focus on beginning grammar. Students in WR 230 will learn the differences between clauses and phrases, how to recognize subjects and predicates in a variety of sentence types, how to avoid the most common grammatical errors in student writing, and how to use punctuation correctly--and with intention. Students will complete readings, watch videos, participate in discussions, and demonstrate understanding through weekly quizzes. They will also challenge themselves with numerous writing activities, and complete writing analysis projects. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Available via Ecampus

WR 239, INTRODUCTION TO WRITING FICTION AND CREATIVE NONFICTION, 3 Credits
Explores how to write good stories, whether real or imagined. Students will read and write in both genres, identifying the elements that make stories more vivid, more human, and more true. Students will write informal pieces and one longer work in each genre, and will workshop one story or essay. Taught via Ecampus only.

WR 240, *INTRODUCTION TO NONFICTION WRITING, 3 Credits
Discussion workshop. Student work examined in context of contemporary published work. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 121 with C- or better or WR 121H with C- or better
This course is repeatable for 9 credits.
Available via Ecampus

WR 241, *INTRODUCTION TO POETRY WRITING, 3 Credits
Discussion workshop. Rudiments of mechanics and some background in development of modern poetry. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Available via Ecampus

WR 250, *PODCAST STORYTELLING, 3 Credits
Focuses on the skills needed to write, record, and produce informative and engaging podcasts. Students develop themes, write scripts, conduct interviews, and learn to make thoughtful editing decisions in the production of audio podcasts. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with C- or better
Available via Ecampus

WR 301, *PUBLISHING AND EDITING, 3 Credits
Invites students to learn about editing and copyediting techniques, broader editorial decisions, and current publishing platforms. Students will learn about scholarly publishing in the U.S. and about how social media and public relations fit into this world. Participants will also explore editing within a rhetorical dimension, considering purpose and audience, as well as conventions of grammar, mechanics, and usage. Students will review a scholarly article reporting on research in editing and/or publishing, as well as develop a publication-ready work of their own. As part of a final project, the class will work toward a collaborative publication. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with D- or better
Available via Ecampus

WR 303, *WRITING FOR THE WEB, 3 Credits
Concerns the production of instructive, informative, and rhetorically savvy writing for Web-based locations and applications. Helps people find information, get things done, convey their opinions, build communities, and collaborate on complex projects. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with D- or better or WR 121H with D- or better
Available via Ecampus

WR 323, *ENGLISH COMPOSITION, 3 Credits
Continued practice in writing with an emphasis on the elements of style: diction, tone, precision and economy, emphasis, figurative language. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Available via Ecampus

WR 324, *SHORT STORY WRITING, 4 Credits
Study and writing of the short story. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 224 with D- or better
This course is repeatable for 8 credits.
Available via Ecampus
WR 327, *TECHNICAL WRITING, 3 Credits
Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in scientific and technological fields. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Equivalent to: WR 327H Available via Ecampus

WR 327H, *TECHNICAL WRITING, 3 Credits
Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in scientific and technological fields. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; HNRS – Honors Course Designator
Prerequisite: WR 121 with C- or better or WR 121H with C- or better or Exam for Waiver - WR 121 with a score of 1
Equivalent to: WR 327
Available via Ecampus

WR 329, WRITING FOR LAW AND LAW SCHOOL, 3 Credits
Improves the rhetorical and structural sophistication of persuasive writing, and gives practice in writing the law application essay. Provides a thorough review of logical, grammatical, usage, and sentence-level errors.
Prerequisite: WR 121 with C- or better or WR 121H with C- or better

WR 330, *UNDERSTANDING GRAMMAR, 3 Credits
Advanced study of traditional grammatical forms and conventional grammatical terms with emphasis on the assumptions underlying the structure of traditional grammar. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with C- or better or WR 121H with C- or better

WR 340, CREATIVE NONFICTION WRITING, 4 Credits
Intermediate study and writing of creative nonfiction.
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 240 with D- or better
This course is repeatable for 8 credits.
Available via Ecampus

WR 341, *POETRY WRITING, 4 Credits
Study and writing of verse. (FA) (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 241 with D- or better
This course is repeatable for 8 credits.

WR 353, WRITING ABOUT PLACES, 3 Credits
Utilizing personal experience, reading, and research, students study, discuss, and practice the conventions of writing about place far and near, global and local, for various audiences and in a range of formats.
Prerequisite: WR 121 with D- or better
Available via Ecampus

WR 362, *SCIENCE WRITING, 3 Credits
Students learn and practice the conventions for writing scientific material for a variety of audiences. Involves writing and research assignments, multimedia presentations, lecture, and in-class and online activities. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II
Prerequisite: WR 121 with C- or better or WR 121H with C- or better
Equivalent to: WR 362H
Available via Ecampus

WR 362H, *SCIENCE WRITING, 3 Credits
Students learn and practice the conventions for writing scientific material for a variety of audiences. Involves writing and research assignments, multimedia presentations, lecture, and in-class and online activities. (Bacc Core Course)
Attributes: CSW2 – Core, Skills, WR II; HNRS – Honors Course Designator
Prerequisite: WR 121 with C- or better or WR 121H with C- or better
Equivalent to: WR 362
Available via Ecampus

WR 383, FOOD WRITING, 4 Credits
Students will write about food and food issues for a variety of audiences, including print and digital, adapting their texts to become increasingly sophisticated critical thinkers and writers who can shape material effectively. Will also address food science and food studies from a historical and cultural background.
Prerequisite: (WR 121 with D- or better or WR 121H with D- or better) and (HC 199 [D-] or PHL 121 [D-] or WR 201 [D-] or WR 214 [D-] or WR 323 [D-] or WR 324 [D-] or WR 327 [D-] or WR 330 [D-] or WR 341 [D-] or WR 362 [D-])
Available via Ecampus

WR 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: WR 399H
This course is repeatable for 16 credits.

WR 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: WR 399
This course is repeatable for 16 credits.

WR 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

WR 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

WR 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

WR 404, WRITING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

WR 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
WR 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

WR 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

WR 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

WR 411, THE TEACHING OF WRITING, 4 Credits
Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on students’ own writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WR 414, ADVERTISING AND PUBLIC RELATIONS WRITING, 4 Credits
Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy.
Prerequisite: WR 121 with B or better or WR 121H with B or better
Available via Ecampus

WR 416, ADVANCED COMPOSITION, 4 Credits
The development of style and voice in both the personal and the academic essay.
Equivalent to: WR 416H
This course is repeatable for 8 credits.

WR 420, STUDIES IN WRITING, 4 Credits
Selected topics in rhetoric and composition.
This course is repeatable for 8 credits.
Available via Ecampus

WR 424, ADVANCED FICTION WRITING, 4 Credits
Workshop. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 324 with D- or better
This course is repeatable for 8 credits.
Available via Ecampus

WR 435, SCIENTIFIC, TECHNICAL, & PROFESSIONAL COMMUNICATION CAPSTONE, 1 Credit
Complete a portfolio comprised of material generated throughout previous courses in the Certificate in Scientific, Technical, and Professional Communication. CROSSLISTED as COMM 435/WR 435.
Equivalent to: COMM 435
Recommended: Completion of 18 credits towards the Scientific, Technical, and Professional Communication Certificate

WR 440, ADVANCED CREATIVE NONFICTION WRITING, 4-8 Credits
An advanced course in creative nonfiction writing, centered around workshops of polished material.
Prerequisite: WR 340 with D- or better
This course is repeatable for 8 credits.

WR 441, ADVANCED POETRY WRITING, 4 Credits
Advanced poetry workshop. (FA)
Attributes: LACF – Liberal Arts Fine Arts Core
Prerequisite: WR 341 with D- or better
This course is repeatable for 8 credits.

WR 448, MAGAZINE ARTICLE WRITING, 4 Credits
Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching.

WR 449, CRITICAL REVIEWING, 4 Credits
Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture.
Available via Ecampus

WR 462, ENVIRONMENTAL WRITING, 4 Credits
Writing about environmental topics from multiple perspectives. Includes science journalism, research and writing on current scientific issues and controversies, and theories of rhetoric and environmentalism. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: WR 121 with C- or better or WR 121H with C- or better
This course is repeatable for 12 credits.

WR 466, ADVANCED TECHNICAL WRITING, 4 Credits
Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, and ethics. Course readings concern what professional technical writers do and what theories govern their actions, bridging the gap between real-world problems and academic research. Organized with an eye towards future action and solving real-world writing and communication problems with empirical research, usability testing, and information design.
Prerequisite: WR 121 with D- or better or WR 121H with D- or better
WR 475, RHETORICS OF RACE, 4 Credits
By exploring the interrelated concepts of race, racialization, and racism, Rhetorics of Race problematizes race as a taken-for-granted phenomenon. Through reading, writing, and discussion, class participants study racial formations as historically specific and analyze contemporary forms of racism in the US. Readings and discussion pay close attention to how rhetoric and discourse have the power to reproduce and challenge white supremacy and race-based oppressions. Emphasizing the intersectionality of oppression—that racism necessarily takes place at intersections with other forms of subordination including sexism, homophobia, ableism, etc.—Rhetorics of Race draws from Queer Black Feminism, Chican@ Feminism, and Critical Race Theory.

WR 485, CONTEMPORARY RHETORIC THEORY, 4 Credits
Familiarizes students with a range of theories that have significantly contributed to or influenced the field of modern and contemporary rhetorical research. The course examines scholars, concepts, and methodologies that are central to contemporary rhetorical theory, while touching on key critical theorists who, although may be considered outside the field of rhetoric studies, impact the ways in which language, persuasion, and communication are currently understood. From this work, students develop their own perspectives and generate evidence-based arguments concerning those same issues.
Prerequisite: WR 121 with C- or better or WR 121H with C- or better

WR 493, ^THE RHETORICAL TRADITION AND THE TEACHING OF WRITING, 4 Credits
Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WR 495, ^INTRODUCTION TO LITERACY STUDIES, 4 Credits
Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

WR 497, DIGITAL LITERACY AND CULTURE, 4 Credits
From pencils to pixels, telegraphs to texts, and semaphores to social networking, Digital Literacy and Culture focuses on the relationships between human expression and the technologies that provide context, meaning, and shape to those expressions.
Prerequisite: WR 121 with C- or better or WR 121H with C- or better

WR 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

WR 500, MFA RESIDENCY, 1-20 Credits
Low-Residency Masters of Fine Arts Residency. Required course for graduate students in the Low-Residency Masters of Fine Arts in Creative Writing.
This course is repeatable for 48 credits.

WR 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

WR 502, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

WR 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

WR 504, WRITING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

WR 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

WR 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

WR 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

WR 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

WR 509, PRACTICUM, 1-16 Credits
Required practicum for graduate students teaching introduction to poetry writing.
This course is repeatable for 16 credits.

WR 511, THE TEACHING OF WRITING, 4 Credits
Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on student’s own writing.

WR 512, CURRENT COMPOSITION THEORY, 4 Credits
Current rhetoric and composition theory and its applications for teachers and writers.

WR 513, LOW-RESIDENCY MFA MENTORSHIP, 5-12 Credits
Low-Residency Masters of Fine Arts Mentorship. Required course for graduate students in the Low-Residency Masters of Fine Arts in Creative Writing.
This course is repeatable for 36 credits.

WR 514, ADVERTISING AND PUBLIC RELATIONS WRITING, 4 Credits
Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy.
WR 516, ADVANCED COMPOSITION, 4 Credits
The development of style and voice in both the personal and the academic essay. 
*This course is repeatable for 16 credits.*

WR 517, TEACHING PRACTICUM: ENGLISH COMPOSITION, 2 Credits
Required practicum for graduate students teaching English Composition.

WR 518, TEACHING PRACTICUM: WRITING IN BUSINESS, 1 Credit
Pedagogy practicum for graduate students in the teaching of professional writing and communication. This course is required for GTA’s who will teach WR 214, Writing in Business. 
*This course is repeatable for 3 credits.*

WR 519, TEACHING PRACTICUM: WR 222, 1 Credit
This practicum prepares graduate teaching assistants to teach Writing 222 (Argumentation). It includes both theoretical and practical components, providing an overview of the curriculum and addressing course development, lesson planning, and pedagogical best practices. The practicum is required for SWLF graduate students with a focus in rhetoric and composition.

WR 520, STUDIES IN WRITING, 4 Credits
Selected topics in rhetoric and composition. 
*This course is repeatable for 8 credits.* 
*Available via Ecampus*

WR 521, TEACHING PRACTICUM: FICTION WRITING, 1 Credit
Required practicum for graduate students teaching introduction to fiction writing. 
*This course is repeatable for 3 credits.*

WR 522, TEACHING PRACTICUM: POETRY WRITING, 1 Credit
Required practicum for graduate students teaching introduction to poetry writing. 
*This course is repeatable for 3 credits.*

WR 523, TEACHING PRACTICUM: NONFICTION WRITING, 1 Credit
Required practicum for graduate students teaching introduction to nonfiction writing. 
*This course is repeatable for 3 credits.*

WR 524, ADVANCED FICTION WRITING, 4 Credits
Advanced fiction workshop with an emphasis on developing longer pieces. 
*This course is repeatable for 24 credits.*

WR 525, ADVANCED SCIENTIFIC AND TECHNICAL WRITING, 4 Credits
Combines scientific and technical writing with science journalism. Students will draw on a data set (preferably their own) to draft a scientific journal article, short grant proposal, magazine article, and letter of inquiry. They will also critically evaluate and edit documents by reviewing classmates’ drafts. 
*Equivalent to: PSM 525*

WR 540, ADVANCED NONFICTION WRITING, 4 Credits
Advanced creative nonfiction workshop with an emphasis on developing longer pieces. 
*This course is repeatable for 24 credits.*

WR 541, ADVANCED POETRY WRITING, 4 Credits
Advanced poetry workshop. 
*This course is repeatable for 24 credits.*

WR 548, MAGAZINE ARTICLE WRITING, 4 Credits
Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching. 
*This course is repeatable for 8 credits.*

WR 549, CRITICAL REVIEWING, 4 Credits
Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture.

WR 562, ENVIRONMENTAL WRITING, 4 Credits
Writing about environmental topics from multiple perspectives. Includes science journalism, research and writing on current scientific issues and controversies, and theories of rhetoric and environmentalism. 
*Equivalent to: STC 562*
*This course is repeatable for 8 credits.* 
*Recommended: WR 121*

WR 566, ADVANCED TECHNICAL WRITING, 4 Credits
Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, and ethics. Course readings concern what professional technical writers do and what theories govern their actions, bridging the gap between real-world problems and academic research. Organized with an eye towards future action and solving real-world writing and communication problems with empirical research, usability testing, and information design.
WR 575, RHETORICS OF RACE, 4 Credits
By exploring the interrelated concepts of race, racialization, and
racism, Rhetorics of Race problematizes race as a taken-for-granted
phenomenon. Through reading, writing, and discussion, class participants
study racial formations as historically specific and analyze contemporary
forms of racism in the US. Readings and discussion pay close attention
to how rhetoric and discourse have the power to reproduce and challenge
white supremacy and race-based oppressions. Emphasizing the
intersectionality of oppression—that racism necessarily takes place
at intersections with other forms of subordination including sexism,
homophobia, ableism, etc.—Rhetorics of Race draws from Queer Black
Feminism, Chicana/o Feminism, and Critical Race Theory.

WR 585, CONTEMPORARY RHETORIC
THEORY, 4 Credits
Familiarizes students with a range of theories that have significantly
contributed to or influenced the field of modern and contemporary
rhetorical research. The course examines scholars, concepts, and
methodologies that are central to contemporary rhetorical theory, while
touching on key critical theorists who, although may be considered
outside the field of rhetoric studies, impact the ways in which language,
persuasion, and communication are currently understood. From this
work, students develop their own perspectives and generate evidence-
based arguments concerning those same issues.

Recommended: WR 121

WR 593, THE RHETORICAL TRADITION
AND THE TEACHING OF WRITING, 4
Credits
Major past and contemporary theories of written communication, their
historical context, and their impact on writing and the teaching of writing.

WR 595, INTRODUCTION TO LITERACY
STUDIES, 4 Credits
Literacy studies in multidisciplinary contexts. Examines historical,
theoretical, and practical relationships among reading, writing, language,
culture, and schooling.

WR 597, DIGITAL LITERACY AND
CULTURE, 4 Credits
From pencils to pixels, telegraphs to texts, and semaphores to social
networking, Digital Literacy and Culture focuses on the relationships
between human expression and the technologies that provide context,
meaning, and shape to those expressions.

Recommended: WR 121

WR 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 30 credits.

Applied Journalism Minor
The mission of the Applied Journalism minor is to provide the OSU
students already invested in journalistic careers with a formal curriculum
of classes and interactive media experiences that position contemporary
journalism as innovative, rigorous and devoted to upholding stringent
ethical standards, in which participants must implement critical thinking
skills that account for global cultural awareness and diversity, while
acknowledging the media’s multifarious and ever-expanding role in
influencing, shaping and informing society and culture.

Applied Journalism course work will not only enable OSU student
journalists to produce clear, concise, accurate stories for all types of
media, it will encourage them to develop their abilities as journalistic
entrepreneurs proficient at mobilizing whatever media forms best
circulate that information. Working with academic advisors in their
specific majors, participants in the AJ minor will determine how
best to articulate their course work in order to serve their individual
interests in audio, video, text, graphic and/or web content — with an
academic premium placed on threading any/all of these media forms into
innovative blends.

The curricular approach of the AJ minor centralizes a critical interface
of classroom study and media experience, while the rigorous internship
requirement at the center of the curriculum (one credit per term for
a minimum of three credits) keeps students immersed in hands-on
engagement via the award-winning facilities at Orange Media Network.
By practicing their hand at a variety of broadcast, multimedia and
print journalism platforms, the deep interface between curriculum and
internship will enable participants to find their journalistic ‘homes,’
revealing the media form they’ll focus on when entering the professional
world.

The course offerings coordinated by the School of Writing, Literature and
Film and the School of Art and Communication will equip participants
with a solid command of the bedrock journalistic skills germane to any
media form (data gathering, interviewing, drafting, storytelling, time
management, document organization and putting every story through
a stringent system of editing and fact-checking), while participating in
courses like AJ 490, Media Law and Ethics, and Media Studies will build
the capacity to create responsible and ethical communities. Participating
in our array of classes, along with taking a leadership role in student- and
professionally-run media outlets, will truly enable graduates in the Minor
to acquire the journalistic skills crucial to obtain stellar careers in the
global media industry.

Creative Writing Graduate Minor

Minor Code: 8920

Creative Writing Undergraduate Major (BA, HBA)

The creative writing major’s disciplinary foundations are the study of the craft of creative writing combined with rigorous study of literature. Students develop their expertise in reading literature in conjunction with their development of writing craft.

The program objectives are to produce majors who can think and write creatively and with imaginative power. They’ll have highly trained analytical, critical, technical, and editorial skills, preparing them for graduate work in a range of fields, from the MFA to law school, or for a job market with an increasing demand for imaginative thinkers and skilled writers who can construct masterful, meaningful narratives.

English Graduate Major (MA)

Graduate Areas of Concentration

Literature and culture; rhetoric, writing, and culture; film and visual studies

The School of Writing, Literature and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be literature and culture; rhetoric, writing, and culture; or film and visual studies. Graduate work in the school may also be applied to a Master of Arts in Interdisciplinary Studies degree or to minors in other advanced degree programs.
An English degree is about more than the book. English majors learn to see complex problems in their full richness and don’t take the first answer, or the simplest answer, as truth. In our courses, all kinds of texts – from medieval poems to postmodern novels, adapted screenplays to literary criticism itself – appear as windows into the cultures and conditions in which they were produced. English majors develop habits of mind attuned to the reasons why people do what they do and write what they write. Our graduates are engaged, empathetic people pursuing a creative, critical, and useful degree.

The English major includes an array of subjects ranging in literary history to film and visual culture, creative and nonfiction writing, rhetoric and literacy, and the digital humanities. We focus on the big picture and the details: close reading skills and critical analysis, how rhetoric and literacy, and the digital humanities. We focus on the big picture and the details: close reading skills and critical analysis, how literary and language change over time, and how social and historical movements are represented in texts. Reading, writing, active listening, discussing, presenting, and debating are foundational activities in our classrooms. Your first courses will prepare you to understand major themes, theories, and writing styles.

The role of context(s) in production, reception, and transmission of literary and cultural texts (across periods, histories, geographical/national spaces, and cultural differences).

Undergraduate English majors must attain proficiency in a foreign language, as certified by the School of Language, Culture, and Society, equivalent to that assumed at the end of a second-year language sequence (211/212/213).

A grade of C– or better is required for all courses used to complete major requirements.

Courses taken to satisfy major requirements may not be taken with an S/U grade.

### English Undergraduate Major (BA, HBA)

An English degree is about more than the book. English majors learn to see complex problems in their full richness and don’t take the first answer, or the simplest answer, as truth. In our courses, all kinds of texts – from medieval poems to postmodern novels, adapted screenplays to literary criticism itself – appear as windows into the cultures and conditions in which they were produced. English majors develop habits of mind attuned to the reasons why people do what they do and write what they write. Our graduates are engaged, empathetic people pursuing a creative, critical, and useful degree.

The English major includes an array of subjects ranging in literary history to film and visual culture, creative and nonfiction writing, rhetoric and literacy, and the digital humanities. We focus on the big picture and the details: close reading skills and critical analysis, how literacy and language change over time, and how social and historical movements are represented in texts. Reading, writing, active listening, discussing, presenting, and debating are foundational activities in our classrooms. Your first courses will prepare you to understand major themes, theories, and writing styles.

**Major Code:** 890

- Write effective arguments about a variety of literary and cultural texts.
- Use information literacy and new technologies to plan and conduct research appropriate to initial and advanced study in English.
- Recognize and interpret a wide variety of texts and genres (may include visual, material, inter-cultural texts), using a range of theoretical and interpretive strategies, including close reading.
- Demonstrate the role of context(s) in production, reception, and transmission of literary and cultural texts (across periods, histories, geographical/national spaces, and cultural differences).

Undergraduate English majors must attain proficiency in a foreign language, as certified by the School of Language, Culture, and Society, equivalent to that assumed at the end of a second-year language sequence (211/212/213).

A grade of C– or better is required for all courses used to complete major requirements.

Film Studies Minor

The Film Studies minor is designed to give students a coherent introduction to film criticism, theory, and history (what some of us in the field call 'critical studies') as well as more specialized and/or advanced classes in film genres, authors (auteurs), and cultural studies.

Interdisciplinary in approach, film has evolved as a co-discipline of literary studies and as a focused field of study which lends itself to OSU’s aspiration to become a truly global university. In baccalaureate core classes in film, students learn to recognize the genres, traditions, and forms of cinematic expression and the cultural contexts in which they have evolved. Building on new literacies and technologies, they learn skills of critical thinking, writing, and research. Advanced film courses contribute to the Literature and Culture area of the MA in English and to interdisciplinary MAIS programs in CLA. Elective courses in critical film studies are popular elective choices for students majoring or minoring in the arts, women’s and ethnic studies, foreign languages, anthropology, theater, and English.

Minor Code: 268

• Minimum total credits (including electives): 28
• Minimum total upper-division credits (including electives): 12
• Minimum total credits in FILM classes: 24
• Minimum total upper-division credits in FILM classes: 8

Writing Minor

Also available via Ecampus.

The School of Writing, Literature, and Film offers a Writing Minor that is distinctive and flexible. Coursework toward a the Writing Minor may be taken on-campus or through Ecampus, or with a combination of on-campus and Ecampus courses. Writing minors may also participate in on-campus and off-campus internships for credit.

A distinctive feature of the Writing Minor at OSU (Ecampus and on-campus) is that courses are taught by writing specialists (including tenure-line faculty) in the areas of creative writing and scientific, technical and professional writing. The minor is flexible: you may elect to take courses that highlight your strengths and areas of interest within the writing field, prepare for applications in graduate writing programs (such as MFA in creative writing or professional/technical communication), and enhance communication skills for the workplace.

Some students with aspirations for graduate, law or medical school studies pursue the Writing Minor to better enable themselves to write more proficiently at higher academic levels, where work is more rigorous and written output is expected to be of a very high level. Others engage in the Writing Minor for the pure joy of expressing themselves, and working with ideas and words.

Many students in the writing minor publish works in student publications on campus and in external publications.

Minor Code: 891

Students must receive a grade of C– or better in any course applied toward the minor. Such courses cannot be taken with S/U grading.

The Writing minor requires a minimum of 27 credits, as follows: a minimum of 11 credits from 100- to 300-level writing courses, plus a minimum of 12 credits from 400-level upper-division writing courses, plus one elective upper-division (300/400) 4-credit course in writing or literature.

College of Pharmacy

The College of Pharmacy's Doctor of Pharmacy (PharmD) Program and PharmD degree are jointly conferred by Oregon State University and Oregon Health & Science University. The Doctor of Pharmacy Program is accredited by the Accreditation Council for Pharmacy Education (http://www.acpe-accredit.org/), 190 S. LaSalle Street, Suite 2850, Chicago, IL 60603-3410, Phone 312-664-3575; Fax, 866-228-2631. Oregon State University College of Pharmacy is a member of the American Association of Colleges of Pharmacy.

A petition from the pharmacists of Oregon led to the establishment of the Department of Pharmacy at Oregon State College in 1898. The department grew steadily and in 1917 became the School of Pharmacy. In 1983, it became the College of Pharmacy.

There are many career options available to individuals having a pharmacy degree. Opportunities for graduates include several different options to provide patient care in community or institutional practice to private consulting and long-term practice settings. The pharmaceutical industry offers careers in many areas including, health professions education, public and government relations, manufacturing, and basic research. Pharmacy graduates are also employed in various local, state and federal health agencies, including the U.S. Public Health Service and the Department of Veterans Affairs. Individuals who decide to pursue advanced professional or graduate training may follow a career in research, advanced patient care settings, and academics.

College of Pharmacy graduates are eligible for licensure as pharmacists throughout the United States.

Pharmacy Information

Professional pharmacy education has advanced both in Oregon and throughout the United States to meet the expectations of an evolving health care system. To be eligible for admission to the PharmD program students complete the PharmD prerequisites, which typically require three to four years of college study. Completion of the pharmacy professional program requires an additional four years.

After completion of the four-year professional pharmacy program, the graduate is eligible to take a licensing exam administered by state boards of pharmacy. After passing the licensing exam, the graduate is licensed to practice as a registered pharmacist. Most graduates become licensed as pharmacists within approximately three months after graduation from Oregon State University.

PharmD Prerequisites

The College of Pharmacy Admissions committee carefully reflects on the overall preparation of each candidate. The profession of pharmacy requires pharmacists to have the knowledge, skills and perspectives necessary to work collaboratively in the provision of outstanding patient care.

Required PharmD prerequisite courses may be taken at Oregon State University or any other accredited college or university. Required courses must be taken for a letter grade, however, an exception may be made if a course is only offered pass/no pass. The student should make a specific request for waiver of grade requirement directly to the College of Pharmacy Admissions Committee prior to taking the course.

Students from community colleges or other colleges and universities can request evaluation of their transcript and planned coursework, if there are questions regarding prepharmacy coursework equivalencies. The PharmD prerequisite (http://pharmacy.oregonstate.edu/pharm-d-prerequisites/) coursework must be completed prior to beginning the professional program.

Early Assurance Program

The Early Assurance Program (https://pharmacy.oregonstate.edu/eap-oregon-early-assurance-program/) provides highly qualified students an opportunity to assure availability of a position in the College of Pharmacy Doctor of Pharmacy (PharmD) program, following completion of admission requirements. Students admitted or enrolled in an accredited community college, college, or university are eligible to apply for the Early Assurance Program. Students accepted into the Early Assurance Program are expected to maintain certain academic criteria, but also engage in professional development opportunities that will enhance readiness for their application to the professional program.

The Professional Pharmacy Program

Enrollment in the four-year professional program is limited. Students must apply for admission (http://www.pharmacas.org/) to the professional pharmacy program. Contact the OSU College of Pharmacy (http://pharmacy.oregonstate.edu/) for other information. Students are admitted to the professional program beginning fall term only.
Once admitted to the professional program, students may register only for those courses for which they have completed the stated prerequisite courses. Exceptions are allowed only after approval by the College of Pharmacy’s Academic and Professional Standards Committee. Students complete the first two years of their course work on the Oregon State University Corvallis campus. The third professional year is at the College of Pharmacy Satellite Campus at Oregon Health and Science University in Portland, Oregon. Most students choose to live in the Portland area during the third year, but a limited number of students may apply to complete part of the didactic coursework in Corvallis using distance technology. The fourth year is off-campus at various pharmacy practice sites throughout the state of Oregon and the Northwest, including Hawaii. Contact the college directly for additional information about the PharmD curriculum.

Immunization and vaccination requirements for PharmD students are stricter than for other university students. PharmD students must satisfy all college immunization and vaccination requirements before starting classes and each year in the program. Failure to meet these requirements may delay enrollment.

The four-year professional pharmacy program provides a broad, scientifically based, clinically focused education. Through appropriate selection of professional elective courses in the fourth year, a student may concentrate in such areas as community, institutional, geriatric, or managed care pharmacy; and prepare for residencies, fellowships, or other post-graduate study.

The pharmacy profession is experiencing profound changes. These changes include an increased focus toward patient care, in addition to the study of pharmaceutical products. All students will be required to give immunizations (shots), take medical histories from patients, and perform physical examinations. These experiences will involve asking sensitive questions and physically touching other people. Throughout the curriculum, students are assigned to off-campus practice sites where they are supervised by licensed pharmacists who are affiliate faculty members of the college. Completion of experiential courses at these off-campus practice sites in the fourth professional year generally requires up to 40 hours per week at the practice site. Experiential courses may include nights, evenings, and weekends. Practice sites are varied but include community pharmacies, hospitals, long-term care facilities, and outpatient clinics. PharmD students are required to provide their own transportation to sites.

The College of Pharmacy requires all pharmacy students to complete criminal background checks and recommends that all pharmacy students submit to drug screening. Criminal background checks and drug screenings have become standard requirements for employment in a pharmacy and placement in experiential rotations. Criminal background checks and drug screening may also be required for licensure. Students who cannot participate in experiential rotations due to criminal or other activities of concern that are revealed in criminal background checks or drug screenings may be unable to fulfill the requirements of the professional PharmD program. Therefore, it is in everyone’s interest to resolve any issues prior to commitment of resources by the college and by students.

PharmD students must immediately disclose any criminal activity that occurs prior to or while enrolled in the PharmD program. PharmD students must immediately reveal any action taken by a Board of Pharmacy, including but not limited to warning, probation and revocation of licensure. Failure to do so could result in dismissal from the PharmD program.

To become licensed by the state of Oregon to practice pharmacy, an individual must meet the following criteria:

1. Possess a baccalaureate or PharmD degree in pharmacy from an accredited U.S. college of pharmacy.
2. Pass the North American Pharmacist Licensing Exam (NAPLEX), the Multistate Pharmacy Jurisprudence Examination (MPJE), and

Professional Associations

Students are strongly encouraged to engage in professional development through membership in professional organizations. The Oregon State Student Pharmacists is an umbrella professional development organization for pharmacy students that includes the opportunity to be involved in several national and state professional organizations.

Professional organizations represented at Oregon State University include:

- **American Pharmacist Association, Academy of Students of Pharmacy** leads the profession and equips members for their role as the medications expert in team-based, patient-centered care across all practice settings. The Oregon State Pharmacists Association is the state affiliate of this organization.

- **American Society of Health-System Pharmacists** represents pharmacists who serve as patient care providers in acute and ambulatory care settings. The Oregon Society of Health-System Pharmacists is the state affiliate of this organization.

- **American College of Clinical Pharmacy** is a professional and scientific society that enables clinical pharmacists to achieve excellence in practice, research and education.

- **Academy of Managed Care Pharmacy** supports members to apply clinical evidence, and sound medication management principles and strategies to improve health care for all.

- **American Society of Consultant Pharmacists** represents pharmacy professionals and students devoted to optimal medication management and improved health outcomes for all older adults.

- **College of Psychiatric & Neurologic Pharmacists** is dedicated to providing individuals living with mental illness, including those with substance use and neurologic disorders, appropriate and effective treatment.

- **Industry Pharmacists Organization** supports the interests of industry pharmacists in contributing to the development, commercialization, promotion, and optimal use of medicines.

- **National Community Pharmacists Association** members are dedicated to the continuing growth and prosperity of independent community pharmacy in the United States.

- **Student National Pharmaceutical Association** is affiliated with the National Pharmaceutical Association. This organization is dedicated to representing the views and ideals of minority pharmacists and serving healthcare needs of minority communities.

- **Rho Chi Honor Society**—Membership in Beta chapter of Rho Chi, national pharmaceutical honor society, is selective and based on high scholastic achievement.
Phil Lambda Sigma—Membership in the Beta Zeta chapter of the national fraternity is limited to qualified individuals who meet requirements for professional development and leadership.

Phi Delta Chi—Membership in the Beta Iota chapter of this 100-year-old national pharmacy fraternity is limited. Individuals must meet the pledge requirements.

American Association of Colleges of Pharmacy—Any student may apply for membership in this organization that represents members and institutions engaged in pharmacy education in the U.S.

Scholarships and Loans
Information about scholarships and loans is available from the College of Pharmacy website and the Office of Financial Aid and Scholarships, 541-737-2241.

WICHE Program
The College of Pharmacy accepts students supported through the Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Program. This interstate program provides the opportunity for students from the 12 cooperating states to obtain professional training not available in their home states. Residents from the states of Alaska and Nevada are eligible to apply for support in pharmacy.

To apply, the applicant must become ‘certified’ by their home state. Applicants must apply to their home offices before October 15 prior to the academic year in which they plan to enroll. State certifying office contact information is available online (http://wiche.edu/psep/cert-off/).

Admission Standards
Equal Opportunity and Disability Accommodation
The College of Pharmacy, as a part of Oregon State University, is committed to the principle of equal opportunity. The college does not discriminate on the basis of race, color, creed, religion, national origin, gender, sexual orientation, age, marital status, disability, and disabled veteran or Vietnam-era veteran status. When requested, the college will provide reasonable accommodation to otherwise qualified students with disabilities. Disabled students must work with and be approved by the Disability Access Services office.

Essential Characteristics of Student Pharmacists
The essential characteristics of student pharmacists identified below are drawn from a number of different resources that govern the professional expectations of pharmacists and student pharmacists, including but not limited to the national Pharmacy Code of Ethics, the Oath of a Pharmacist, and the Pledge of Professionalism. Please see Appendices to view these resources. The essential characteristics are intended to ensure that student pharmacists and pharmacists educated at the College of Pharmacy (the ‘college’) have the capacity to meet federal and state regulations and policies that pertain to pharmacy, and to meet or exceed expectations that the public has for professional competence and behavior among pharmacy professionals.

Academic and professional environments present different challenges, but the essential characteristics required to succeed in pharmacy are common to both settings. Students in the college must observe and fulfill the essential characteristics, which have been divided into the following relevant categories: intellectual ability, empathetic and collegial communication skills, psychomotor skills, respect for diversity, high ethical standards, and behavioral and social expectations. Under each category are examples that describe and clarify these essential characteristics.

Intellectual Ability
- Comprehend, interpret and analyze new information
- Reason and carry out evidence-based decision making
- Use critical thinking skills and problem solving to evaluate information from multiple sources and synthesize a plan of action
- Thrive in a rigorous foundational and clinical science-based curriculum
- Participate in self- and programmatic-assessment intended to sustain a continual improvement process
- Be curious and pursue lifelong learning

Empathetic and Collegial Communication Skills
- Formulate concise, accurate synopses of essential information
- Contribute in a meaningful and collaborative manner in group discussions
- Interact constructively with other members of a health care team
- Communicate difficult concepts orally and in writing at an appropriate level for specific patients or audiences
- Listen empathetically and develop rapport
- Appropriately display and interpret nonverbal communication signals
- Communicate fluently in English
- Effectively utilize resources to communicate in non-English languages

Psychomotor Skills
- Participate effectively in preparation and distribution of sterile and non-sterile drug products
- Utilize and analyze information from varied sensory inputs
- Participate in drug administration, including injections
- Carry out tasks required for objective and subjective assessment of patient health
- Discern critical elements of a problem through observation

Students may be able to be admitted and progress to graduation while not possessing selected psychomotor skills. In the instance of a documented disability, the college will work to provide reasonable accommodation. The absence of some skills, however, may limit the variety of settings in which a pharmacist can work.

Respect for Diversity
- Communicate in a manner that respects all individuals
- Proactively seek ways to provide an inclusive environment that addresses unique patient needs
- Provide care without judgment of a patients' personal choices or situation
- Individualize care with consideration of cultural norms for the patient
- Individualize care with consideration of unique therapeutic needs or challenges

High Ethical Standards
- Maintain confidentiality
- Act with compassion, empathy and altruism
- Accept responsibility and provide leadership

1 Students may be able to be admitted and progress to graduation while not possessing selected psychomotor skills. In the instance of a documented disability, the college will work to provide reasonable accommodation. The absence of some skills, however, may limit the variety of settings in which a pharmacist can work.
To begin the first professional year, students must:

- Abstain from illicit drug use
- Act with integrity and expect the same of professional colleagues

**Behavioral and Social Expectations**

- Demonstrate a history of appropriate behavior in personal actions
- Perform effectively and display sound judgment while under stress
- Perform appropriately in academic or professional settings
- Address disagreements with tact and avoid public altercations
- Exhibit the capacity to adapt to change readily and adjust responses in dynamic, unpredictable situations
- Accept constructive criticism and adapt behavior

**Requirements for Progression**

Doctor of Pharmacy (Pharm.D.) students must meet university requirements and standards and adhere to the university Student Conduct Regulations (http://studentlife.oregonstate.edu/studentconduct/). The College of Pharmacy has adopted additional requirements to assure that all pharmacy graduates have the best possible educational background and preparation for their pharmacy practice careers. College of Pharmacy standards may vary from or exceed the university standards in order to ensure compliance with policies, regulations and expectations specific to the pharmacy profession.

Students are expected to meet specific academic and professional requirements to matriculate in the College of Pharmacy and to progress to each successive year of the professional program. Each student’s standing is reviewed at the end of every term, or at any time in the interim ‘for cause’. The review includes core pharmacy term GPA, cumulative GPA, and other characteristics identified as being essential to student pharmacists and pharmacists.

The professional Pharm. D. degree program at Oregon State University is designed to be completed within four years. The program combines didactic courses, structured clinical practice experiences, personal and professional development opportunities and, optimally, significant work experience. Our goal is to educate pharmacists that have a combination of foundational strength, and currency of knowledge and skills that will enable them to be change agents for pharmacy and societal health.

In order to assure currency and in-depth knowledge for each graduate, the professional program must be completed within a five year period.

To begin the first professional year, students must:

- Receive, and respond in a timely manner, to an offer of admission
- Complete all pre-pharmacy courses with a grade of C- or better
- Successfully complete a background check and meet College-established guidelines*
- Successfully complete a drug screen and meet College-established guidelines*
- Attend the first year professional orientation program, and verify an understanding and acceptance of College of Pharmacy policies and procedures
- Verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to experiential learning
- Fulfill the Essential Characteristics of Student Pharmacists identified by the College.
- Hold current Healthcare Provider CPR and First Aid certification from an approved provider
- Obtain an Oregon Pharmacy Intern license

To advance into the second professional year, students must:

- Successfully complete all courses included in the curriculum of the first professional year with a cumulative pharmacy GPA of 2.00 and a P in all P/N (Pass/No Pass) courses
- Have no more than one D grade in pharmacy courses
- Fulfill the Essential Characteristics of Student Pharmacists identified by the College, including expectations established for background checks and drug screening.
- Meet site specific requirements for all assigned experiential rotations*
- Verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to experiential learning
- Have a current Oregon Pharmacy Intern license
- Have a current Healthcare Provider CPR certification from an approved provider

To advance into the third professional year, students must:

- Successfully complete all courses included in the curriculum of the first two professional years with a cumulative pharmacy GPA of 2.00 and a P in all P/N (Pass/No Pass) courses;
- Have no more than one D grade in pharmacy courses
- Fulfill the Essential Characteristics of Student Pharmacists identified by the College, including expectations established for background checks and drug screening.*
- Meet site specific requirements for all assigned experiential rotations*
- Verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to experiential learning
- Have earned a bachelor’s degree
- Have a current Oregon Pharmacy Intern license
- Have a current Healthcare Provider CPR certification from an approved provider

To advance into the fourth professional year, students must:

- Successfully complete all courses included in the curriculum of the first three professional years with a cumulative pharmacy GPA of 2.00 and a P in all P/N courses
- Have no more than one D grade in pharmacy courses
- Meet all immunization requirements established by the College
- Meet site specific requirements for all assigned experiential rotations*
- Verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to experiential learning
- Fulfill the Essential Characteristics of Student Pharmacists identified by the College, including expectations established for background checks and drug screening.*
- Have a current Oregon Pharmacy Intern license
- Have a current Healthcare Provider CPR certification from an approved provider

To graduate with the Pharm.D. degree, students must:

- Have met all requirements defined for progression through the first, second, third, and fourth professional years
• Successfully complete all required and elective rotations with a passing grade; and complete all requirements associated with co-curricular (non-credit) activities

• Fulfill the Essential Characteristics of Student Pharmacists identified by the College, including expectations established for background checks and drug screening.

• Concerns revealed in background checks or drug screening which could impact progression will be evaluated on a case-by-case basis. Concerns may also impact progression by preventing licensure or placement in experiential sites

• Experiential sites may require additional background checks and drug screenings

Student Standing in the College of Pharmacy

The Academic and Professional Standards Committee (APSC) may, at any time, review a student’s standing in the college. APSC is charged with ensuring that students are aware of academic performance or behavior which is not consistent with essential characteristics of student pharmacists and that, therefore, places their completion of the PharmD program at risk. Academic performance and behavioral concerns are often evaluated independently but have equal significance in determining whether a student is meeting the essential characteristics of student pharmacists. Severe, continuing or repeated academic or behavioral problems can result in dismissal from the PharmD program.

APSC, when necessary, provides student standing information to communicate performance deficits, insufficient student progress, and lack of progress in a student addressing academic or behavioral problems. APSC and the college’s director of student services/head advisor provide students guidance regarding what the college expects from a student to increase their opportunities for success in the college. Student performance and progress are evaluated on a case-by-case basis, utilizing the experience of APSC members. APSC uses good faith, informed judgment to determine appropriate recommendations for each student’s situation.

The following student standing notifications may be received by students who are demonstrating performance deficits or insufficient progress in the PharmD program:

Warning

Warning status is cautionary and identifies student performance which may place a student’s completion of the PharmD program at risk.

Students are placed on warning status if they have a term core pharmacy GPA of less than 2.5 or receive 2 or more C grades in core or elective professional courses in a term. Students may also be placed on Warning status if they engage in behavior that does not meet the Essential Characteristics of Student Pharmacists.

• The first time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor to discuss their situation.

• The second time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor and develop a holistic action plan for overcoming academic and non-academic barriers to success. They must subsequently execute this action plan.

• The third time students are placed on Warning status, they are automatically placed on Probation.

Probation

Probation status identifies an academic or behavioral concern that places the student’s completion of the PharmD program at serious risk. Probation may be accompanied by a delay in progression at the determination of the APSC.

Students are placed on Probation status if they have a term core pharmacy GPA of less than a 2.0 or if they receive a C– or lower grade in any core or elective professional course. A third warning automatically results in Probation.

Student behavior that is a significant departure from the Essential Characteristics of Student Pharmacists will also result in Probation status. Such behavior includes, but is not limited to, violations of Academic Integrity policies, criminal violations, repeated or intentional violation of college policies, or significant breaches of the University Student Conduct Code (http://studentlife.oregonstate.edu/studentconduct/).

Students on Probation status must follow recommendations of the APSC and the Director of Student Services/Head Advisor. Students on Probation status must meet with the Director of Student Services/Head Advisor following each term to review their progress and standing in the college. Students that successfully fulfill the recommendations prescribed will be removed from Probation status.

Students that fail to follow or are unsuccessful in fulfilling the recommendations will be suspended and evaluated for dismissal from the college. Students who are placed on Probation status for the second time will also be evaluated for dismissal from the college.

Suspension

Students that have failed to make adequate progress, or who have displayed severe or repeated departures from the Essential Characteristics of Student Pharmacists, may be placed on Suspension status. The college will place an indefinite hold on the progression of a student placed on Suspension status until APSC can adequately evaluate whether the student will be allowed to continue in the PharmD program. Students engaged in an appeal of their dismissal from the college will also be placed on Suspension status.

Students placed on Suspension status will not be allowed to progress in the PharmD program. APSC will review the status of a student on Suspension no later than the beginning of the next academic term. After review, APSC may recommend immediate Dismissal from the college, recommend that the student be continued on Suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student’s Suspension status. If a plan for progression is developed by APSC, the student will be changed to Probation status. If at any time it becomes evident that the student will not be able to address concerns and graduate within the required five-year window, the student will be dismissed immediately.

Dismissal

Students will be dismissed from the professional program if they are not making adequate academic progress, or if they fail to constructively address professional or behavioral concerns.
Graduate Programs

Majors
• Pharmaceutical Sciences (p. 1356)

Minors
• Pharmaceutical Sciences (p. 1356)

Professional Programs
• Doctor of Pharmacy (p. 1356)

Faculty
Professors Bearden, Block (Emeritus), Christensen (Emeritus), Kioussi, Kradjan (Emeritus), Leid, Mahmud, McPhail, Olyaei, Stevens, Williams, Zabriskie (Emeritus)
Associate Professors Alani, DeLander, Filtz, Furuno, Hartung, Haxby (Emeritus), A. Indra, Irwin, Ismael-Leid, McGregor, Morgun, Munar, Philmus, Proteau, Sikora, Singh, Taratula
Assistant Professors Anderson, Brown, Castner, David, Herink, Lee, S. Ramirez, Sahay, Suchy, Sun, Zumach
Senior Instructor II Zweber
Senior Instructor I Linares
Instructors Chase, Morley, Olstad, Schnabel, Starwalt
Professional Faculty Allison, Alston, Austin Haney, Beaumont, Bookman, Bowers, Clark, Corwin, Davis, Mettie, Ostrogorsky, Peters, J. Ramirez

Research Faculty
Professor, Sr. Research Simonson
Associate Professors, Sr. Research G. Indra, Miranda, Taratula
Assistant Professor, Sr. Research Zielke

Courtesy Faculty and Preceptors
The College of Pharmacy utilizes practicing pharmacists, physicians, and pharmaceutical scientists as lecturers in the professional pharmacy program and in the college’s graduate education program. This group includes over 400 pharmacy preceptors that provide individualized guidance for students in Introductory and Advanced Pharmacy Practice Experiences that extend throughout the professional curriculum. All of these individuals make significant contributions to student learning and assure currency of the educational programs in the College of Pharmacy.

PHAR 001, SERVICE LEARNING, 0 Credits
Engage in a service-learning or community engagement experience where skills and knowledge are applied to meet an authentic community-identified need. The experience will integrate meaningful community service with reflection. Through readings and discussions, critically reflect on the service in order to increase understanding of the discipline, gain a broader appreciation of the discipline, enhance a sense of civic responsibility, and strengthen connections with communities.

PHAR 002, LEADERSHIP, 0 Credits
Provides basic personal and interpersonal leadership skills that can be used within and outside of a work setting. Through practice, the leadership experience helps explore motivation, decision-making, time management, power, team building, conflict, ethics, dealing with change, communication skills, and diversity issues.

PHAR 201, PHARMACY ORIENTATION, 1 Credit
Career opportunities in pharmacy including community and institutional practice, government, and industry. Discussion of available educational pathways. Open to non-pharmacy students. Graded P/N.

PHAR 210, TERMINOLOGY OF THE HEALTH SCIENCES, 2 Credits
Provides the student in any of the health science disciplines or pre-professional studies with a working knowledge of the terminology used in the health sciences. Open to non-pharmacy students. Available via ECampus

PHAR 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 405, READING & CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 407, SEMINAR, 1-16 Credits
One-credit section. Graded P/N. This course is repeatable for 16 credits.

PHAR 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

PHAR 505, READING & CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 507, SEMINAR, 1-16 Credits
One-credit section. Graded P/N. This course is repeatable for 16 credits.

PHAR 525, FOUNDATIONS OF DRUG ACTION I, 3 Credits
Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug absorption and distribution, drug design and characterization of drug interactions with specialized cellular components, and drug biotransformation or excretion.

PHAR 526, FOUNDATIONS OF DRUG ACTION III, 3 Credits
Drug actions in the autonomic nervous system (ANS) provide a template for understanding drug actions throughout the body. This course provides a complete consideration of pharmacologic and medicinal chemistry principles as they relate to drug interactions with the ANS. Treatment options for selected diseases that respond to drugs acting on the ANS are also addressed.
PHAR 527, FOUNDATIONS OF DRUG ACTION II, 3 Credits
Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug activation of biological response via biochemical or molecular transduction mechanisms, pharmacogenetics and pharmacogenomics, and drug-induced toxicities.

PHAR 537, BIOORGANIC CHEMISTRY, 3 Credits
A contemporary treatment of the chemistry, enzymology and molecular genetics techniques used in studying major natural products biosynthesis pathways in nature. Offered alternate years. Recommended: (CH 530, CH 531, CH 535) and (BB 590, BB 591, BB 592)

PHAR 547, INFECTIOUS DISEASES AND TREATMENTS, 3 Credits
Introduction to infectious disease processes and antimicrobial agents, including general clinical microbiology, and structure mechanism of action of anti-bacterial and anti-fungal agents. Recommended: Upper level biochemistry

PHAR 548, DRUG ACTIONS IN IMMUNOLOGY AND INFLAMMATION, 3 Credits
Review of foundational concepts in immunology, inflammation and tissue repair, and modification of these processes therapeutically through an understanding and application of anti-inflammatory agents and immune system modulators.

PHAR 563, CANCER AND CHEMOPREVENTION, 2 Credits
A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine. Recommended: (BB 451 or BB 551) and BI 314 and (BI 460 or BI 560) or second year standing in the PharmD program

PHAR 572, APPLIED BIOPHARMACEUTICS AND PHARMACOKINETICS, 3 Credits
Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states.

PHAR 573, CURRENT TOPICS IN PHARMACEUTICAL SCIENCES, 1-3 Credits
Critical evaluation of contemporary pharmaceutics and pharmacokinetics research articles. This course is repeatable for 9 credits.

PHAR 574, NANOMEDICINE, 3 Credits
Introduction to the interdisciplinary field of nanomedicine, the use of nanoscale (1-100 nm) phenomena and materials in biomedical applications. Reviews the basic principles of nanotechnology relevant to areas such as diagnostic/molecular imaging, drug delivery, and other novel therapeutics. Topics will be described through both survey of historical developments and the latest scientific developments in the field of nanomedicine.

PHAR 591, PHARMACOLOGY I, 5 Credits
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacological rationale for therapeutic and toxicologic treatment outcomes.

PHAR 592, PHARMACOLOGY II, 5 Credits
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes.

PHAR 593, PHARMACOLOGY III, 5 Credits
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes.

PHAR 594, ADVANCES IN MANIPULATING THE HUMAN GENOME, 3 Credits
Covers current techniques in genetic engineering used to modify the characteristics of individuals as a prelude to possible future human genetic engineering, including advances in gene manipulation from early recombinant DNA techniques to CRISPR-Cas technology. Emphasizes manipulations of the genomes of individual mammals, and characterization of the effect of those manipulations at levels from the molecular to the physiological. Explores DNA/RNA/protein extraction, polymerase chain reaction, molecular cloning, sequencing (DNA, RNA, and chromatin), expression analyses, gene overexpression, silencing and perturbation. Recommended: Advanced Biochemistry or Cell and Molecular Biology Available via Ecampus

PHAR 601, RESEARCH, 1-16 Credits
This course is repeatable for 99 credits.

PHAR 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

PHAR 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

PHAR 669, INTRODUCTION TO GRANT PROPOSAL WRITING, 2 Credits
To introduce students to the fundamentals of writing grant proposals to the National Institute of Health (NIH), different funding mechanisms, as well as the grant reviewing process. CROSSLISTED as PHAR 669/VMB 669. Equivalent to: VMB 669
This course is repeatable for 20 credits.

PHAR 699, SPECIAL TOPICS IN PHARMACEUTICAL SCIENCES, 3 Credits
This course is repeatable for 99 credits.
PHAR 701, RESEARCH AND SCHOLARSHIP, 1-8 Credits
Research conducted by professional pharmacy students under faculty supervision.
This course is repeatable for 12 credits.

PHAR 703, THESIS, 1-8 Credits
Independent study and analysis that culminates in a thesis.
This course is repeatable for 999 credits.

PHAR 704, RESEARCH SEMINAR, 1 Credit
This course is repeatable for 2 credits.
Recommended: First or second year standing PharmD program

PHAR 705, READING AND CONFERENCE, 1-8 Credits
May be repeated for credit.
This course is repeatable for 12 credits.

PHAR 706, INTRODUCTION TO HEALTH DISPARITIES, 2 Credits
An examination of the multifaceted issue of health disparities in the U.S. healthcare system. Marginalized groups with disparities based upon racial/ethnic, gender, sexual preference and identity, disability, physical and mental health, geography and socioeconomics will be examined at the individual, systematic, and institutional levels.
Recommended: PHAR 707

PHAR 707, CAREER PERSPECTIVES AND PROFESSIONAL DEVELOPMENT, 2 Credits
Students will explore the necessary knowledge, skills and abilities in order to support professional role formation and ongoing professional development. Students will practice skills related to identifying personal strengths and weaknesses, building self-awareness, creating professional job search materials, communicating professionally in written and oral formats, and participating as a team member.
Recommended: First-year standing in the PharmD program

PHAR 708, INTRODUCTORY PHARMACY PRACTICE EXPERIENCES: COMMUNITY CARE I, 2 Credits
Students will be placed in community pharmacies for experiential rotations. Students will gain an understanding of the scope of practice and roles of pharmacy personnel while demonstrating skills related to processing and dispensing functions in the community setting. Students will observe patient counseling and have an opportunity to conduct medication reviews to identify any drug-related problems. In-class discussions of patient cases will explore concepts relating to ethical decision-making, cultural sensitivity and coordinated pharmacy practice topics with other first-year courses.
Recommended: PHAR 707

PHAR 709, INTRODUCTORY PHARMACY PRACTICE EXPERIENCES: COMMUNITY CARE II, 2 Credits
Students will be placed in community pharmacies for experiential rotations. Students will gain an understanding of the scope of practice and roles of pharmacy personnel while demonstrating skills related to processing and dispensing functions in the community setting. Students will observe patient counseling and have an opportunity to conduct medication reviews to identify any drug-related problems. In-class discussions of patient cases will explore concepts relating to ethical decision-making, cultural sensitivity and coordinated pharmacy practice topics with other first-year courses.
Recommended: PHAR 708

PHAR 711, FUNDAMENTALS OF INTERPROFESSIONAL COLLABORATION, 1 Credit
The first professional year IPE Series is a yearlong course focusing on interprofessional education for students from local colleges (LBCC/OSU/WesternU) representing programs in medical assistant, pharmacy, nursing and osteopathic medicine. Students develop a positive perspective of working with other disciplines, enhanced understanding of their specific role and responsibilities on an interprofessional team, recognize the value of other disciplines providing patient-centered care, and develop a shared accountability for providing patients with safe, high-quality health care.
Recommended: First-year standing in the PharmD program

PHAR 712, FOUNDATIONS OF PATIENT SAFETY AND INTERPROFESSIONAL PRACTICE, 1 Credit
Techniques, best practices and opportunities for improving patient safety through interprofessional teamwork. Graded P/N.

PHAR 713, SPANISH FOR PHARMACY PROFESSIONALS, 2 Credits
For the pharmacy professional with little or no Spanish language background (those with some Spanish language skills would find it beneficial). The course is presented in a video format with in-class facilitator for discussion. Provides basic Spanish grammar instruction but the focus will be on vocabulary and communication in a community pharmacy environment.

PHAR 714, COMPLEMENTARY MEDICINE, 3 Credits
Covers vitamins and microminerals and their role in biochemical processes, maintaining health and preventing disease. The course also covers the etiology of obesity and treatment modalities. The course builds upon the general background of students in biochemistry and physiology to provide a common baseline of knowledge and allow for integration of concepts required to understand preventive medicine.
Recommended: PHAR 729 and PHAR 735
PHAR 715, PRESCRIPTION DRUG ABUSE, 2 Credits
Examines the issue of prescription drug abuse among the general population. Graded P/N.

PHAR 717, SENIOR CARE PHARMACY, 2 Credits
Provides an overview of senior care pharmacy practice including an introduction to the senior patient, the senior care healthcare environment, medication-related problems in the elderly, the role of the pharmacist as a member of the interdisciplinary senior healthcare team, and employment opportunities in senior care pharmacy. Graded P/N.
Equivalent to: PHAR 721
Recommended: First-year standing PharmD program and PHAR 723 and PHAR 735 and PHAR 739

PHAR 718, DEVELOPMENT AND MECHANISMS OF ACTION OF CANCER DRUGS, 2 Credits
Analysis of the development and mechanisms of action of cancer chemotherapeutic drugs, with an emphasis on natural product sources for lead compounds and biological targets. Discussion of mainstay cancer drugs illustrates historical, current and emerging cancer drug development paradigms. Provides an understanding of how cancer therapeutic agents have evolved and how they intercept pharmacologic targets.
Recommended: Second-year standing in PharmD program

PHAR 719, POISONS AND TOXINS, 2 Credits
Covers many different types of substances, including common household poisons, poisonous plants and mushrooms, toxic gases/metals, shellfish toxins, and other natural toxins. Aspects of the chemistry and pharmacology of the poisons, antidotes/treatments, and occasional case studies will be covered. Historical examples and current events will also be incorporated into the course materials.
Equivalent to: PHAR 723
Recommended: PHAR 735

PHAR 720, PHARMACY PRACTICE I-PRINCIPLES OF INTEGRATED PATIENT CARE, 4 Credits
Pathophysiology of common conditions, self-care therapeutics, clinical data collection and documentation, prescription drug information and education, patient counseling skills, basic pharmacy calculations.
Recommended: First-year standing in PharmD program

PHAR 721, PHARMACY PRACTICE II, 3 Credits
Pathophysiology of common conditions, self-care therapeutics, clinical data collection and documentation, prescription drug information and education, patient counseling skills, basic pharmacy calculations.
Recommended: PHAR 720

PHAR 722, PHARMACY PRACTICE III: PRINCIPLES OF INTEGRATED PATIENT CARE, 4 Credits
Pathophysiology of common conditions, self-care therapeutics, clinical data collection and documentation, prescription drug information and education, patient counseling skills, basic pharmacy calculations.
Recommended: PHAR 721

PHAR 726, PRINCIPLES OF EVIDENCE-BASED MEDICINE II: DRUG LIT EVAL, 3 Credits
Students will learn to critique and evaluate health-related scientific journal articles using valid established techniques.
Recommended: Second-year standing in PharmD program

PHAR 728, PHARMACY LAW, 2 Credits
Introduces the student to the federal and state agencies and regulations that govern pharmacy practice and provides students with foundational knowledge and skills to comply with state and federal regulations. Emphasis will be on regulations from the Food and Drug Administration, Drug Enforcement Administration, and Oregon Board of Pharmacy.
Recommended: First year standing in PharmD program

PHAR 729, PRINCIPLES OF EVIDENCE-BASED MEDICINE I: INFORMATION SCIENCE, 3 Credits
Students will learn to identify appropriate information resources and will systematically collect, arrange, and analyze pertinent information related to a particular patient or drug product problem.
Equivalent to: PHAR 739
Recommended: First-year standing in PharmD program

PHAR 733, PHARMACEUTICS I, 3 Credits
Foundational perspectives in physical pharmacy with an emphasis on liquid and parenteral products. Properties and processes that influence compatibility and stability in drug formulation are discussed. Varied types of sterile and non-sterile formulations, including product optimization for drug delivery and patient specific considerations, are examined.
Recommended: PHAR 735

PHAR 734, PHARMACEUTICS II, 3 Credits
Preformulation and formulation factors affecting the development, production and use of pharmaceutical dosage forms, including ingredients in, and physical, chemical, and biological properties affecting storage, stability, and handling of dosage forms. Lec/lab. Approved for use on a graduate program of study.
Recommended: PHAR 733 and PHAR 735

PHAR 735, DRUG ACTION I: MEDICINAL CHEMISTRY AND PHARMACEUTICS, 3 Credits
Introductory course exploring interactions of chemicals with physiological systems. Concepts encompass drug design and characterization of drug interactions with specialized cellular components, drug absorption and distribution, and drug biotransformation or excretion. Approved for a graduate program of study.
PHAR 736, DRUG ACTION III: AUTONOMIC
DRUG ACTION, 3 Credits
Drug actions in the autonomic nervous system (ANS) provide a template
for understanding drug actions throughout the body. This course provides
a complete consideration of pharmacologic and medicinal chemistry
principles as they relate to drug interactions with the ANS. Treatment
options for selected diseases that respond to drugs acting on the ANS
are also addressed.
Recommended: PHAR 735 and PHAR 737

PHAR 737, DRUG ACTION II:
PHARMACOGENOMICS, PHARMACOLOGY
& TOXICOLOGY, 3 Credits
Introductory course presenting actions of chemicals on physiological
systems. Concepts encompass drug activation of biological response via
biochemical or molecular transduction mechanisms, pharmacogenetics
and pharmacogenomics, and drug-induced toxicities. Approved for use on
graduate program of study.
Recommended: PHAR 735

PHAR 738, HEALTHCARE SYSTEMS I, 3
Credits
Examination of the U.S. healthcare industry and how it relates to
pharmacy. Emphasis is given to changing relationships between
healthcare systems, patients, providers of care, hospitals, insurers,
employers and the government.
Recommended: First-year standing in the PharmD program

PHAR 739, HEALTHCARE SYSTEMS II, 2
Credits
Population-based strategies for improving health and wellness with an
emphasis on prevention rather than treatment. We will also look at how
social determinants of health affect peoples’ ability to be healthy and
how the safety net seeks to close the gap for those who have limited
access or resources.
Recommended: PHAR 738

PHAR 740, PHARMACY PRACTICE IV, 3
Credits
Basic physical assessment skills and identification of therapeutic
endpoints and monitoring parameters for drugs presented in the
medicinal chemistry/pharmacology sequence. Students will gain
experience in basic physical assessment skills, interviewing skills, history
taking, organizing pharmacy notes, and documenting information.
Recommended: PHAR 722 and concurrent enrollment in PHAR 752

PHAR 741, PHARMACY PRACTICE V, 3
Credits
Basic physical assessment skills and identification of therapeutic
endpoints and monitoring parameters for drugs presented in the
medicinal chemistry/pharmacology sequence. Students will gain
experience in basic physical assessment skills, interviewing skills, history
taking, organizing pharmacy notes, and documenting information. Lec/
lab.
Recommended: PHAR 740. Concurrent enrollment in PHAR 744 and
PHAR 753

PHAR 742, PHARMACY PRACTICE VI, 3
Credits
Basic physical assessment skills and identification of therapeutic
endpoints and monitoring parameters for drugs presented in the
medicinal chemistry/pharmacology sequence. Students will gain
experience in basic physical assessment skills, interviewing skills, history
taking, organizing pharmacy notes, and documenting information. Lec/
lab.
Recommended: PHAR 741. Concurrent enrollment in PHAR 745 and
PHAR 754

PHAR 743, INTRODUCTORY PHARMACY
PRACTICE EXPERIENCE: COMMUNITY III,
2 Credits
Students are assigned to community, institutional and ambulatory
care pharmacy settings, and experiences emphasize topics and
communication methods covered in the corresponding pharmacy
practice course.
Recommended: Concurrent enrollment in PHAR 740

PHAR 744, INTRODUCTORY PHARMACY
PRACTICE EXPERIENCE: AMBULATORY
CARE I, 2 Credits
Students are assigned to institutional or ambulatory care pharmacy
settings, and experiences emphasize topics and communication methods
covered in the corresponding pharmacy practice course.
Recommended: Concurrent enrollment in PHAR 741 and PHAR 753

PHAR 745, INTRODUCTORY PRACTICE
EXPERIENCES: AMBULATORY CARE II, 2
Credits
Students are assigned to institutional or ambulatory care pharmacy
settings, and experiences emphasize topics and communication methods
covered in the corresponding pharmacy practice course. Graded P/N.
Recommended: Concurrent enrollment in PHAR 742 and PHAR 754

PHAR 746, PHARMACY MANAGEMENT, 3
Credits
Using a case-based format, students will work in groups to “solve” (using
SOAP notes) real-world scenarios based in different pharmacy settings.
The cases are organized around the major focus areas listed in the
schedule. Each group will present their solution and a recap of the actual
outcome will be provided whenever available.

PHAR 747, INFECTIOUS DISEASES AND
TREATMENTS, 3 Credits
Introduction to infectious disease processes and antimicrobial agents,
including general clinical microbiology, and structure mechanism of
action of anti-bacterials and anti-fungal agents. Approved for a graduate
program of study.
Recommended: Upper level biochemistry
PHAR 748, DRUG ACTIONS IN IMMUNOLOGY AND INFLAMMATION, 3 Credits
Review of foundational concepts in immunology, inflammation and tissue repair; and modification of these processes therapeutically through an understanding and application of anti-inflammatory agents and immune system modulators. Approved for a graduate program of study.

PHAR 750, PHARMACOKINETICS AND BIOPHARMACEUTICS, 4 Credits
Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states. Approved for use on a graduate program of study.
Recommended: PHAR 735

PHAR 752, INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS I, 7 Credits
Drug therapy of central nervous system disorders; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations.
Recommended: PHAR 756

PHAR 753, INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS II, 7 Credits
Drug therapy of pulmonary and cardiovascular disorders; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations.
Recommended: PHAR 752

PHAR 754, INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS III, 7 Credits
Drug therapy of endocrine disorders, and men’s and women’s health issues; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations.
Recommended: PHAR 753

PHAR 760, INTRODUCTORY PHARMACY PRACTICE EXPERIENCES: INSTITUTIONAL, 2 Credits
Students gain familiarity with the provision of patient centered care through the variety of pharmacy services within a health system. Experiences include introduction to acute care services, transitions of care, and introduction to health systems pharmacy. Emphasis is on learning how to ensure patient medication safety by understanding the process of preparing and distributing medication, collecting and analyzing relevant patient information, and providing guidance regarding medication administration and monitoring.
This course is repeatable for 6 credits.
Recommended: Concurrent enrollment in PHAR 761 and PHAR 764

PHAR 761, ADVANCED INTEGRATED DRUG THERAPY I, 8 Credits
Pathophysiologic basis of disease and drug therapy management.
Recommended: Concurrent enrollment in PHAR 764 and PHAR 770

PHAR 762, ADVANCED INTEGRATED DRUG THERAPY II, 8 Credits
Pathophysiologic basis of disease and drug therapy management.
Recommended: Concurrent enrollment in PHAR 765

PHAR 764, PHARMACY PRACTICE VII, 3 Credits
Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 752, 753, 754, 761 and PHAR 762. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems and communicate findings in SOAP notes, care plans, and case presentations.
Recommended: PHAR 742 and concurrent enrollment in PHAR 761

PHAR 765, PHARMACY PRACTICE VIII, 3 Credits
Development of skills for application of didactic learning to case-based drug therapy problem identification, assessment, and plan. Content draws on PHAR 761, and PHAR 762, as well as earlier course work. Students will integrate knowledge from multiple courses to problem-solve drug therapy concerns, and communicate findings both orally and in written format.
Recommended: PHAR 761 and PHAR 764. Concurrent enrollment in PHAR 762

PHAR 767, PRE-APPE READINESS AND COMPLEX CASE ANALYSIS, 3 Credits
Confidence and competence needed for advanced practice settings are enhanced utilizing a mixture of benchmark assessment tools and small case discussions of complex patient cases. The focus is to assure readiness to integrate into inter-professional collaborative health care settings and serve diverse patient populations. Knowledge, skills, attitudes, and professional values are assessed and developed. Formative and summative feedback delivered through faculty, peer and self-evaluation help guide student preparation for advanced experiences and life-long learning. Graded P/N.
Recommended: PHAR 760 and PHAR 762 and PHAR 765 and PHAR 773
PHAR 768, ETHICAL AND LEGAL DECISION MAKING, 1 Credit
Student understanding of pharmacy law is assessed, and discussed in the context of pharmacists' ability to properly respond when legal concepts may not align with ethical decision making in a health profession. Students will apply a framework for ethical decision making and identify personal strategies to maintain currency in pharmacy law and applied ethical decision making.
Recommended: PHAR 760 and PHAR 762 and PHAR 765 and PHAR 773

PHAR 770, ADVANCED PHARMACOKINETICS, 4 Credits
A physiologic approach to understanding advanced pharmacokinetic principles. Approved for use on a graduate program of study.
Recommended: PHAR 750

PHAR 773, EVIDENCE BASED MEDICINE III, 3 Credits
Covering the principles required for evidence-based medicine, including interpreting and applying results from clinical, humanistic, and economic research to medical decision-making.
Recommended: PHAR 726

PHAR 774, EVIDENCE BASED MEDICINE IV, 3 Credits
Covers a variety of topics related to drug policy and drug use management. Population-based strategies to improve drug use will be emphasized along with developing an evidence-based process for evaluating new drugs. A major course project, evaluating a new drug, will focus on application of principles taught in this and previous courses.
Recommended: PHAR 773

PHAR 776, PHARMA-CSI, 2 Credits
Application of PK, PD, and P'genomic concepts, principles, and equations in computer workshops to solve drug therapy misadventures. Approved for use on a graduate program of study.
Recommended: PHAR 770 and third-year standing in the PharmD program

PHAR 777, ACUTE MEDICAL EMERGENCIES, 2 Credits
Drug therapy management in the critically ill patient. Graded P/N.
Recommended: PHAR 762

PHAR 778, ADVANCED ADULT MEDICINE, 2 Credits
Adult medicine elective utilizes actual patient cases to enhance knowledge of pharmacy and the pharmacologic basis of therapeutics in the setting of adult medicine, emphasizing application or current guidelines and major clinical trials for commonly encountered disease states. Graded P/N.
Recommended: Third-year standing in PharmD program and PHAR 761 and PHAR 762 and PHAR 764 and PHAR 765

PHAR 780, COMMUNITY PHARMACY CLERKSHIP, 8 Credits
Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information. Graded P/N.
Equivalent to: PHAR 785
This course is repeatable for 32 credits.
Recommended: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774

PHAR 785, AMBULATORY PRIMARY CARE CLERKSHIP, 8 Credits
Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information to patients and health care professionals.
Graded P/N.
This course is repeatable for 32 credits.
Recommended: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774

PHAR 790, GENERAL INTERNAL MEDICINE CLERKSHIP, 8 Credits
Supervised advanced professional education located in internal medicine inpatient pharmacy practice environment. Emphasis is placed on the application of biomedical and pharmaceutical sciences to direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess, and monitor pharmacotherapy involved in a wide variety of acute and chronic diseases. In addition, students will provide drug information to other health care professionals and patients. Graded P/N.
This course is repeatable for 32 credits.
Recommended: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774

PHAR 792, HOSPITAL/HEALTH SYSTEMS PATIENT CARE CLERKSHIP, 8 Credits
Supervised advanced professional education located in various hospital or health care systems patient care-oriented settings. Emphasis is placed on application of pharmaceutical sciences and pharmacotherapy to patient care. Graded P/N.
This course is repeatable for 24 credits.
Recommended: Fourth-year standing in the PharmD program
**PHAR 795, PATIENT CARE ELECTIVE CLERKSHIP, 8 Credits**
Supervised advanced professional education located in various patient care-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to direct and indirect pharmaceutical care. Specialties include but are not limited to geriatrics, pediatrics, infectious disease, oncology, general patient care, nutrition support, nuclear pharmacy, home infusion, critical care, anticoagulation, pain management, etc. Graded P/N. This course is repeatable for 24 credits. Recommended: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774

**PHAR 797, ELECTIVE CLERKSHIP, 8 Credits**
Supervised advanced professional education located in various pharmacy-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to a variety of environments involving pharmacy. Specialties include but are not limited to managed care, drug information, administration, pharmaceutical research, pharmaceutical industry, professional pharmacy organizations, etc. Graded P/N. This course is repeatable for 24 credits. Recommended: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774

**PHAR 798, PHARMACY HEALTH ADMINISTRATION, 8 Credits**
Provides students the opportunity to integrate and apply leadership and business principles necessary to operate and manage a pharmacy business or department in a diverse organizational environment. This course is repeatable for 16 credits. Recommended: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and reading and understanding of the Advanced Experiential Manual

**PHAR 799, SELECTED TOPICS, 1-16 Credits**
This course is repeatable for 16 credits.

**Pharmaceutical Sciences Graduate Major (MS, PhD)**

**Graduate Areas of Concentration**
Biopharmaceutics, medicinal chemistry, natural products chemistry, pharmaceutics, pharmacoeconomics, pharmacokinetics, pharmacology, toxicology

Faculty in the department are involved foundational research that aims to identify novel chemicals and characterize the therapeutic potential of new agents from unusual microbes, plants, and other biological sources; design and develop nanoparticles for highly targeted delivery of new drug types; discover and investigate new drug targets to treat drug-resistant infections, cancer, muscle, skeletal and other diseases; and explore the impact of the human microbiome on health and disease using advanced computational methods and systems approaches.

**Major Code: 4790**

**Pharmaceutical Sciences Graduate Minor**

**Minor Code: 4795**

**Pharmacy Professional Major (PHARMD)**
The Doctor of Pharmacy degree (Pharm.D.) is a four year professional degree that prepares students for a career in pharmacy and is required for licensure as a pharmacist.

The professional program expands upon a student’s background in the biomedical sciences, to include expertise in the pharmaceutical and clinical sciences.

Students concurrently engage in a diversity of experiential opportunities, learning to apply their expertise to solve complex healthcare concerns for individuals and populations.

The Pharm.D. program provides students the opportunity to pursue a broad array of career options within the profession; ranging from traditional roles in community or institutional pharmacy to emerging roles in ambulatory care or a variety of specialties.

**Major Code: 4780**

College of Public Health and Human Sciences (PHHS)

Inspired by our mission as a leading land grant university, we create synergy in teaching, research, and outreach to develop the next generation of globally minded public health and human sciences professionals. Through interdisciplinary research and innovative curricula, we advance knowledge, policies, and practices that improve population health in communities across Oregon and beyond.

The College of Public Health and Human Sciences offers a comprehensive array of undergraduate and graduate education programs under the public health umbrella.

Our graduates are employed in a wide variety of research, education, service, management, and leadership positions in business, government, industry, education, and agencies related to health, nutrition, education, community development, and family relationships.

The college’s scholarly and creative work improves the lives of individuals, families, and communities. Reflecting the strength and diversity of our faculty and disciplines, this work includes laboratory-based investigations of nutrition and physiology.

Our outreach and engagement initiatives and programs serve individuals, families, professionals, and communities across the campus, Oregon, the nation, and the world. This outreach includes OSU Extension’s Family and Community Health program, 4-H Youth Development, active continuing education initiatives ranging from credit and noncredit courses to full degrees, and service programs that serve OSU students, faculty, staff, as well as individuals and families.
**Degree Programs**

Advanced degrees include the Master of Public Health (MPH), the Master of Science (MS), the Master of Athletic Training (MATRN), the Master of Adapted Physical Education (MAPE) and Doctor of Philosophy (PhD). The MS and PhD degrees are offered in units of the college. Some of our academic programs also participate in the Master of Arts Interdisciplinary Studies (MAIS) graduate degree program.

**Advising**

The Office of Student Success is a primary source of information for all College of Public Health and Human Sciences undergraduate students. Students receive accurate, thorough, and timely information regarding their degree requirements, academic progress, job opportunities, and campus activities. Professional advisors are assigned to all undergraduate students in the college. Faculty members also serve a vital role to undergraduates by providing professional and career advice. Faculty members often involve students in research and professional activities that create opportunities for leadership, personal growth, and discovery.

**Internships and Practicums**

To help prepare students in the College of Public Health and Human Sciences for careers, many of the degree programs include internships and/or practicum experiences as part of their academic programs. These opportunities provide students with invaluable work experience in their field of study and may lead to postgraduate employment. Faculty members help place students and assist in the structure of these experiences. Additional information is available on the PHHS website (http://health.oregonstate.edu/internships/).

**Double Degrees**

Undergraduates with majors in the College of Public Health and Human Sciences can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

**Scholarships**

The College of Public Health and Human Sciences offers a variety of scholarships to deserving students. Many are reserved for students in designated majors or for first-year students. A list of scholarships and application forms are available from the college’s website (http://health.oregonstate.edu/students/current/undergraduate/scholarships/).

Additional scholarship information is also available at the OSU Office of Financial Aid and Scholarships.

A grade of C– or higher is required for all courses in a student’s undergraduate program of study.

- This includes all courses and associated prerequisite courses in a student’s undergraduate program of study for a major, minor or certificate as listed in the online course catalog.
- Some programs have additional grade and/or GPA criteria, which must be met in addition to this grade policy.
- Baccalaureate core courses are not subject to this policy unless they serve as courses required in or prerequisites for a student’s major, minor, or certificate.

**Effective calendar year 2017-2018 (June 2017–May 2018):**

The College of Public Health and Human Sciences does not accept third-course attempts either at the university or transferred in from other institutions to meet individual course requirements within any major effective Fall term 2014.

- Third or subsequent attempts taken prior to Fall term 2014 may be considered to meet major program of study requirements.¹

¹ The Exercise and Sport Science and Athletic Training majors stopped allowing third or subsequent course attempts effective Fall term 2013.

  **Options:**

  **Options:**

  **Options:**
  - Early Childhood
  - General Human Development and Family Sciences (p. 1484)

Options:

MINORS
• Global Health (p. 1453)
• Human Development and Family Sciences (p. 1483)
• Public Health

CERTIFICATES

Graduate Programs

Majors
• Adapted Physical Education (p. 1451)
• Human Development and Family Studies (p. 1485)
• Kinesiology (p. 1454)
  Option:
  • Adapted Physical Activity (p. 1454)
• Nutrition (p. 1457)
• Public Health (p. 1407)
  Options:
  • Biostatistics (p. 1407)
  • Environmental and Occupational Health (p. 1408)
  • Epidemiology (p. 1408)
  • Global Health (p. 1408)
• Health Promotion and Health Behavior (p. 1408)
• Health Systems and Policy
• Physical Activity
• Public Health Practice

Minors
• Epidemiology (https://catalog.oregonstate.edu/college-departments/public-health-human-sciences/school-social-behavioral-health-sciences/epidemiology-graduate-minor/)
• Ergonomics (https://catalog.oregonstate.edu/college-departments/public-health-human-sciences/school-social-behavioral-health-sciences/ergonomics-graduate-minor/)
• Public Health (p. 1410)

Certificates
• Public Health (p. 1406)

Professional Programs
• Doctor of Physical Therapy (p. 1461)

Health and Human Sciences (HHS)

HHS 001, SERVICE LEARNING, 0 Credits
Engage in a service-learning or community engagement experience where skills and knowledge are applied to meet an authentic community-identified need. The experience will integrate meaningful community service with reflection. Through readings and discussions, critically reflect on the service in order to increase understanding of the discipline, gain a broader appreciation of the discipline, enhance a sense of civic responsibility, and strengthen connections with communities.

HHS 002, LEADERSHIP, 0 Credits
Provides basic personal and interpersonal leadership skills that can be used within and outside of a work setting. Through practice, the leadership experience helps explore motivation, decision-making, time management, power, team building, conflict, ethics, dealing with change, communication skills, and diversity issues.
HHS 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

HHS 199, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HHS 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits. Available via Ecampus

HHS 231, *LIFETIME FITNESS FOR HEALTH, 2 Credits
Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness
Equivalent to: HHP 231, HHS 231H Available via Ecampus

HHS 231H, *LIFETIME FITNESS FOR HEALTH, 2 Credits
Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness; HNRS – Honors Course Designator
Equivalent to: HHS 231

HHS 241, *LIFETIME FITNESS, 1 Credit
Assessment, evaluation and practice of physical fitness and health behaviors leading to the development of a personal fitness program. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness
Available via Ecampus

HHS 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 18 credits.

HHS 440, GLOBAL NUTRITION, 3 Credits
Examines causes and consequences of nutritional problems including malnutrition, both under- and overnutrition, that impact health, developmental capacity, and economic well-being of populations in developing societies. Explores policies, practices, and cultural approaches to improving nutritional status at the household, local and international levels. Available via Ecampus

HHS 513, INTEGRATED APPROACH TO PUBLIC HEALTH I, 6 Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health. This course is the first of a two-part course sequence. Available via Ecampus

HHS 514, INTEGRATED APPROACH TO PUBLIC HEALTH II, 6 Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including; evidence-based approaches to public health; public health and health care systems; planning and management to promote health; and policy in public health. This course is the second of a two part course sequence. Prerequisite: HHS 513 with B- or better Available via Ecampus

HHS 517, CASE STUDIES IN PUBLIC HEALTH PRACTICE, 3 Credits
Case-based learning to illustrate the complexity of public health issues and to demonstrate the need for integrated approaches for developing and implementing successful strategies in public health practice. Students will apply a wide range of knowledge and skills essential to public health practice that relate to outbreak investigation, policy analysis, regulatory decision-making, ethics, program development, program evaluation, research synthesis, screening programs, working with stakeholders, health risk communication, and disaster preparedness. Prerequisite: H 513 with B- or better or HHS 514 with B- or better Available via Ecampus

HHS 526, LINEAR REGRESSION IN PUBLIC HEALTH, 2 Credits
Biostatistical tools for scientific applications in public health using linear regression analysis. Confounding, effect modification, variable selection, assessing model fit, observational studies, and exploratory data analysis. Emphasis on the use of statistical packages for analyzing public health data. Prerequisite: H 524 with B- or better This course is repeatable for 4 credits. Available via Ecampus

HHS 527, LOGISTIC REGRESSION IN PUBLIC HEALTH, 2 Credits
Biostatistical tools for scientific applications in public health using logistic regression analysis. Confounding, effect modification, variable selection, assessing model fit, exploratory data analysis, and observational studies. Emphasis on the use of statistical packages for analyzing public health data. Prerequisite: H 524 with B- or better
HHS 537, EVIDENCE-BASED LEADERSHIP IN PUBLIC HEALTH, 3 Credits
Examines how collaboration differs from working together, and offer opportunities to develop skills for successful and effective group functioning. Students will be challenged to examine personal strengths (and the strengths of others) as they relate to leadership and followership. Explores evidence-based management – identifying and using organizational and scientific data in decision making.
Prerequisite: H 536 with B- or better
Available via Ecampus

HHS 540, GLOBAL NUTRITION, 3 Credits
Examines causes and consequences of nutritional problems including malnutrition, both under- and overnutrition, that impact health, developmental capacity, and economic well-being of populations in developing societies. Explores policies, practices, and cultural approaches to improving nutritional status at the household, local and international levels.
Available via Ecampus

HHS 541, PUBLIC HEALTH PERSPECTIVE ON GLOBAL FOOD SECURITY, 3 Credits
Explore food insecurity and hunger in the U.S. and global contexts, including examination of the causes, correlates, and consequences of hunger and community, national, and international food safety nets.

HHS 550, COMMUNICATING FOR PUBLIC HEALTH POLICY IMPACT, 3 Credits
Successful public health professionals communicate clearly and in compelling ways with non-scientific audiences. In this hands-on course, the theory and practice of effective public health communication will be explored, with a focus on advancing a public health policy. Through a selected public health policy topic, students will develop and enhance skills in planning and implementing impactful public health communications, including message development, data visualization, media interviewing, engaging through social media and presenting to policymakers. Professionals in the field, including those in legislative and media roles, will share examples of effective communication and provide constructive feedback on students’ work.

HHS 578, EVIDENCE-BASED PUBLIC HEALTH I, 3 Credits
Evidence-based public health is the process of integrating science-based interventions with community preferences to improve the health of populations. This is the first in a two-course series and provides theoretical and practical bases to identify, implement and evaluate evidence-based research (i.e. programs, surveillance, policies). Students will develop skills to select and adapt evidence-based public health programming for a specific community and/or population.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

HHS 579, EVIDENCE-BASED PUBLIC HEALTH II, 3 Credits
Evidence-based public health is the process of integrating science-based interventions with community preferences to improve the health of populations. This is the second in a two-course series. Applies science and adaptation frameworks learned in the first course to the development of a program plan. Provides instruction and application of program planning and program evaluation frameworks. Course learning is synthesized through the development of a grant proposal for adapted public-health program plus evaluation plan.
Prerequisite: H 575 with B- or better and HHS 578 [B-]
Available via Ecampus

HHS 580, GRANT WRITING FOR PUBLIC HEALTH PRACTITIONERS, 4 Credits
Provides an introduction to principles of grant writing, with an emphasis on grants seeking funding from national, regional, or local entities (e.g., CDC, foundations) that support research and program that aim to improve community health through health promotion. There will be a focus on grants that MPH-level practitioners seek to conduct research, enhance practice, and/or support delivery of programs within communities. Students will have the opportunity to integrate skills developed through prior courses in the context of writing a grant proposal.
Prerequisite: H 515 with C- or better and H 575 [C-] and H 576 [C-]

HHS 584, SURVEILLANCE AND FIELD EPIDEMIOLOGY FOR PUBLIC HEALTH, 3 Credits
A review of public health surveillance systems, and the continuum of communicable disease surveillance into field epidemiology and other responses to identified events.
Prerequisite: H 524 with B- or better or HHS 514 with B- or better
Available via Ecampus

HHS 590, PUBLIC HEALTH LAW, 2 Credits
Explores the use of law and policy tools to promote access to health and healthy living conditions. Examines the legal powers and duties of government at the federal, state, and local levels to ensure the conditions required for people to be healthy. Discussion of individual rights as limitations on the power of the government to act in furtherance of public health goals.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

HHS 597, GLOBAL HEALTH SYSTEMS, 3 Credits
Explores key components of global health systems, using case studies of institutions, processes, and health outcomes.
Available via Ecampus

HHS 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HHS 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Human Development and Family Sciences (HDFS)
HDFS 101, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 199, SPECIAL PROJECTS, 1-16 Credits
Special projects designed with instructor Graded P/N.
This course is repeatable for 16 credits.

HDFS 201, *CONTEMPORARY FAMILIES IN THE U.S., 3 Credits
An introduction to families with application to personal life. Focuses on diversity in family structure, social class, race, gender, work and other social institutions. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: FCS 201
Available via Ecampus

HDFS 209, HUMAN SERVICES PRACTICUM, 4 Credits
Field experience to learn, primarily through observation, how to apply human service strategies and skills to helping individuals and families served by professional agencies. Supervision by agency and instructor. Requires 90 hours of work on-site. Seminar introduces basic theories and skills through readings, discussion and reflective exercises.
Prerequisite: HDFS 107 with C- or better
This course is repeatable for 8 credits.

HDFS 240, *HUMAN SEXUALITY, 3 Credits
Physiological, psychological, social, and historical influences on sexuality; emphasis on developmental and relationship aspects. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

HDFS 262, INTRODUCTION TO HUMAN SERVICES, 3 Credits
An exploration of the human services profession. Emphasis on prevention and early intervention concepts and programs. Development of internship search skills, including an introduction to a wide range of human services organizations.
Equivalent to: HDFS 107
Available via Ecampus

HDFS 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 310, HUMAN SERVICES PRACTICUM, 4 Credits
Field experience to learn, primarily through observation, how to apply human service intervention strategies and skills to helping individuals and families served by professional agencies and organizations. Supervision by agency and instructor. Requires 90 hours of work on-site. Supplementary bi-weekly seminar, readings, and reports. Graded P/N.
Prerequisite: HDFS 262 with C- or better
Equivalent to: HDFS 209
This course is repeatable for 8 credits.

HDFS 311, INFANT AND CHILD DEVELOPMENT, 4 Credits
Research and theory on development from infancy through middle childhood. Discussion of biological, familial, and sociocultural influences. Development of skills in observing children’s behavior.
Equivalent to: HDFS 211
Available via Ecampus

HDFS 312, PARENTING RESEARCH AND APPLICATION, 4 Credits
Research and theory regarding parenting and parent education, including parenting styles and practices, discipline, parent-child interactions, attachment, and the family context with an emphasis on professional implications for promoting child health and well-being.
Equivalent to: HDFS 312X
Available via Ecampus

HDFS 313, ADOLESCENT DEVELOPMENT, 4 Credits
Advanced theories and research on physical, social and psychological development during adolescence; emphasizes influences of family, peers, schools and community.
Available via Ecampus

HDFS 314, ADULT DEVELOPMENT AND AGING, 4 Credits
Advanced theories and research related to developmental changes and stability in early, middle, and late adulthood. Gender issues, personality, cognition, and adaptation.
Available via Ecampus

HDFS 330, FOSTERING LEARNING IN EARLY CHILDHOOD DEVELOPMENT, 4 Credits
Development of skills in applying theoretical approaches to observing, recording, and interpreting the behavior of young children in order to design interactions that support learning in group settings.
Prerequisite: HDFS 311 with C- or better
HDFS 331, DIRECTED EXPERIENCE IN EARLY CHILDHOOD, 3 Credits
Placement in early childhood program to focus on guidance techniques, classroom management, and implementation of curricula, based on developmental observation, research, and theory. Supplementary weekly seminar, readings, and reports. Lab/rec. Taught on the OSU-Cascades campus only.
Prerequisite: (HDFS 311 with C- or better or HDFS 211 with C- or better) and HDFS 330 [C-]
Equivalent to: HDFS 330

HDFS 341, FAMILY STUDIES, 4 Credits
Study of family forms, family formation, and family change over the human life course is sociohistorical, economic, political, and cultural context.
Available via Ecampus

HDFS 360, CRITICAL THINKING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 4 Credits
Explores foundations of critical thinking, especially methods for sustaining open-minded inquiry and evaluating evidence and arguments. Current controversies in human development and family policy are targets of debate.
Available via Ecampus

HDFS 361, APPLIED RESEARCH METHODS, 4 Credits
Basic research methods as they are applied in human development and family studies.
Available via Ecampus

HDFS 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 401, RESEARCH, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 405, READING AND CONFERENCE, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 406, PROJECTS, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

HDFS 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 410, HUMAN SERVICES INTERNSHIP, 6-12 Credits
Field experience to apply theory and evidence-based practices to individual, family, and community problems in professional settings. Supervision by agency and instructor. Requires 300 hours of work on-site. Seminar includes reflection and constructive criticism processes. Can be taken across 2 consecutive terms (150 hours each) within the same agency. Graded P/N.
Prerequisite: HDFS 107 with C- or better and HDFS 209 [P] and HDFS 462 [C-]
Equivalent to: HDFS 436
This course is repeatable for 12 credits.

HDFS 430, CHILD DEVELOPMENT CENTER INTERNSHIP, 12 Credits
Participate in an internship in a research-based model early childhood program focused on early childhood education, program development and evaluation, parent education and administration.
Prerequisite: HDFS 330 with C- or better

HDFS 431, FAMILY, SCHOOL, AND COMMUNITY COLLABORATION, 3 Credits
Focus on family, school, community environments and interactions for children from infancy to adolescence. Resources and skills for enhancing child development across these settings are emphasized.
Prerequisite: HDFS 311 with C- or better or HDFS 313 with C- or better
Equivalent to: HDFS 436
Available via Ecampus

HDFS 432, CHILDREN AND YOUTH WITH DISABILITIES, 3 Credits
Developmental, educational, and family issues related to children and youth with disabilities. Highlights a broad range of human exceptionality, including giftedness.
Equivalent to: HDFS 420
Recommended: 6 credits of HDFS, SOC or PSY.
Available via Ecampus

HDFS 433, EARLY CHILDHOOD INTERNSHIP, 10 Credits
Students will complete an internship in a Pre-Kindergarten, Kindergarten or First Grade classroom and will focus on curriculum development, implementation and evaluation, individualizing for diverse student needs and communication with students.
Prerequisite: HDFS 311 with C- or better and HDFS 330 [C-] and HDFS 331 [C-]
Recommended: HDFS 261

HDFS 444, FAMILY VIOLENCE AND NEGLECT, 4 Credits
Examination of the causes and consequences of family abuse and neglect, including child abuse, domestic violence and elder abuse.
Recommended: 6 credits of HDFS, SOC or PSY.
Available via Ecampus
HDFS 447, *FAMILIES AND POVERTY, 4 Credits
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: HDFS 446, HDFS 447H
Available via Ecampus

HDFS 447H, *FAMILIES AND POVERTY, 4 Credits
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: HDFS 447

HDFS 460, FAMILY POLICY, 4 Credits
Family policies aim to protect, promote, and strengthen families by addressing one or more of the five explicit functions families perform: (a) family formation, (b) partner relationships, (c) economic support, (d) childrearing, and (e) caregiving. This course will explore the relationships between family policies and family functioning using state, federal, and international policy examples. By reviewing theoretical frameworks for conceptualizing family policy, students will assess the consequences policies may have for family well-being.
Available via Ecampus

HDFS 461, ^PROGRAM DEVELOPMENT AND PROPOSAL WRITING, 4 Credits
Principles of program development and evaluation applied to the development of a proposal for a human services program; analysis of needs and resources, identification of empirically-based strategies, and assessment. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: HDFS 360 with C- or better and HDFS 361 [C-]
Available via Ecampus

HDFS 462, PROFESSIONAL HELPING SKILLS, 4 Credits
Explores collaborative, strengths-based methods to resolve individual, family, and community problems. Applies ethical standards to case study, with emphasis on the values of human dignity and social justice. Develops basic helping skills within an empowerment framework.
Prerequisite: HDFS 262 with C- or better and HDFS 310 (may be taken concurrently) [P]

HDFS 465, TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 3 Credits
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
Equivalent to: HDFS 465H
This course is repeatable for 18 credits.
Recommended: 6 credits of HDFS, SOC or PSY.

HDFS 465H, TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 3 Credits
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
Attributes: HNRS – Honors Course Designator
Equivalent to: HDFS 465
This course is repeatable for 18 credits.
Recommended: 6 credits of HDFS, SOC or PSY

HDFS 469, SPECIAL TOPICS, 1-16 Credits
Available via Ecampus

HDFS 499H, SPECIAL TOPICS, 1-16 Credits
Available via Ecampus

HDFS 501, RESEARCH, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 502, INDEPENDENT STUDY, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

HDFS 505, READING AND CONFERENCE, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 506, SPECIAL PROBLEMS/SPECIAL PROJECTS, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.
HDFS 510, INTERNSHIP, 3-15 Credits
This course is repeatable for 16 credits.

HDFS 511, THEORIES OF HUMAN DEVELOPMENT, 4 Credits
Critical examination of significant theories of human development. Emphasizes evolution of theories and impact on current human development research.

HDFS 516, CHILD DEVELOPMENT, 4 Credits
Study of theories, concepts, and issues related to physical, cognitive, social, and emotional development in infants and children. Covers family contexts, risk and resilience, nature/nurture issues, critical/sensitive periods, the importance of early experience, and the relationship between basic and applied research. Recommended: 15 quarter credits of social and behavioral sciences.

HDFS 517, ADOLESCENT DEVELOPMENT, 4 Credits
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development in adolescents. Covers identity formation, family contexts, adolescent sexuality, societal contexts for adolescent development, and risk and resilience processes. Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 518, ADULT DEVELOPMENT AND AGING, 4 Credits
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development throughout adulthood. Covers life transitions, stress-related growth, optimal aging, wisdom, and developmental methods. Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 519, THE LIFE COURSE, 4 Credits
Introduces students to key concepts, principles, and controversies in life-course studies. Emphasizes how the nature and rhythm of the life course is structured by time and place. Examines how the lives of individuals and groups are shaped by history, demography, social institutions, states and policies, and culture. Recommended: Undergraduate statistics and 12 credits of social science courses.

HDFS 529, INTRODUCTORY DATA ANALYSIS WITH SAS, 1 Credit
Introduction to basic statistical concepts and the use of the SAS software for data analysis. Graded P/N.

HDFS 530, RESEARCH IN HUMAN DEVELOPMENT AND FAMILY SCIENCES I, 4 Credits
An overview of research design, measurement, sampling and evaluation research. Introduces computer applications for data collection and analysis. Lec/lab. Recommended: Undergraduate statistics and 12 credits of social science courses.

HDFS 531, APPLIED QUANTITATIVE METHODS I: ANOVA, 4 Credits
Principles and application of general linear models for categorical predictors and repeated measures designs (e.g., ANOVA). Prerequisite: HDFS 529 with B- or better

HDFS 532, APPLIED QUANTITATIVE METHODS II: LINEAR REGRESSION, 4 Credits
Principles and application of general linear models for continuous predictors (e.g., multiple regression). Prerequisite: HDFS 531 with B- or better Equivalent to: HDFS 632

HDFS 533, SOCIAL POLICY AND HUMAN DEVELOPMENT, 4 Credits
Probes how policies and governments affect human development over the life course. Examines experiences in family, education, work, and health. Families are a central lens for examining effects. Offered alternate years. Equivalent to: HOEC 533

HDFS 534, SOCIAL PROGRAM AND POLICY EVALUATION, 4 Credits
Models of evaluation and application of applied research methods to social programs and policies. Prerequisite: HDFS 531 with C or better Equivalent to: HOEC 534

HDFS 538, QUALITATIVE RESEARCH METHODS I, 4 Credits
Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches. Equivalent to: HDFS 635 Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 539, QUALITATIVE METHODS II, 4 Credits
Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches. Application of qualitative methods through completion of a qualitative research project. Prerequisite: HDFS 538 with C or better

HDFS 541, FAMILY STUDIES, 4 Credits
Critical survey of current research in family studies with a focus on diverse family structures and processes. Recommended: 15 quarter credits of behavioral and social sciences.
HDFS 546, THEORIES OF FAMILY STUDIES, 4 Credits
An overview of the major theoretical perspectives used in the study of families. Issues of theory construction and evaluation are also covered. Course goal is to enable the student to apply conceptual frameworks to a particular area of interest.
Equivalent to: HDFS 547

HDFS 547, FAMILIES AND POVERTY, 3 Credits
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families.
Equivalent to: HDFS 546

HDFS 565, TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 3 Credits
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
This course is repeatable for 18 credits.
Recommended: 6 credits of HDFS, SOC or PSY.

HDFS 587, SOCIAL GERONTOLOGY, 3 Credits
An introduction to aging research targeted toward understanding demographics of aging societies, lifespan theories, methods of aging research, psychosocial aging processes, family and caregiving issues, housing and long-term care, and current social policies.

HDFS 601, RESEARCH, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 602, INDEPENDENT STUDY, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 603, DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

HDFS 605, READING AND CONFERENCE, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 606, SPECIAL PROJECTS, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 610, PRACTICUM/INTERNSHIP, 3-15 Credits
This course is repeatable for 16 credits.

HDFS 630, QUANTITATIVE METHODS IN FAMILY AND INDIVIDUAL DEVELOPMENT, 3 Credits
Advanced quantitative techniques in human development and family studies. Includes longitudinal designs, structural equation modes.
Content varies with each offering.
Prerequisite: HDFS 532 with B- or better
This course is repeatable for 9 credits.

HDFS 639, COMMUNITY-BASED PARTICIPATORY RESEARCH, 4 Credits
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotions.
Recommended: 9 credits of public health or HDFS graduate coursework

HDFS 665, TEACHING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 1 Credit
Principles and practices of pedagogy in human development and family sciences related to both on-campus and Ecampus instruction. Graded P/N.
This course is repeatable for 6 credits.

HDFS 685, RACE, CLASS, CULTURE AND AGING, 4 Credits
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSTLISTED as H 685/HDFS 685.
Equivalent to: H 685
Recommended: 9 credits of public health or HDFS graduate coursework

HDFS 699, SPECIAL TOPICS, 1-4 Credits
This course is repeatable for 8 credits.

HDFS 808, WORKSHOP, 1-16 Credits
PREREQ: Application to Early Childhood Leadership Directions.
This course is repeatable for 16 credits.
Kinesiology (KIN)

KIN 131, INTRODUCTION TO KINESIOLOGY, 1 Credit
Overview of the field; career opportunities in exercise and sport science and other professions dealing with the discipline of human movement; orientation to support services. Graded P/N.
Equivalent to: EXSS 131
Available via Ecampus

KIN 132, INTRODUCTION TO THE ALLIED HEALTH PROFESSIONS, 1 Credit
Overview of allied health professions including physical and occupational therapy, physician assistant, nursing, athletic training and others. Discuss job responsibilities, employment opportunities and educational requirements.
Equivalent to: EXSS 132

KIN 160, INTRODUCTION TO INJURY MANAGEMENT FOR THE PHYSICALLY ACTIVE, 3 Credits
Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals).
Equivalent to: EXSS 160

KIN 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: EXSS 199
This course is repeatable for 16 credits.

KIN 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

KIN 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

KIN 230, INTRODUCTION TO ADVENTURE PROGRAMS, 3 Credits
Foundation course for leadership opportunities in the Adventure Leadership Institute (ALI). Provides overview of history, theoretical foundations, and utilization of adventure programs in education, recreation, and therapy.
Equivalent to: EXSS 230

KIN 231, HUMAN GROUP DYNAMICS, 3 Credits
Provides students with the fundamental concepts and theories essential for understanding dynamics that occur in groups in recreation, leisure, and everyday settings.
Equivalent to: EXSS 231

KIN 232, BACKCOUNTRY LEADERSHIP, 3 Credits
Prepares students to be leaders in outdoor settings by building the practical and logistical skills needed in the effective delivery of courses and/or trips. Covers the teaching skills and essentials for trip leaders in the wilderness, including trip planning, logistics, risk management, and group interaction in the backcountry.
Prerequisite: (EXSS 230 with C or better or KIN 230 with C or better) and PAC 301 [C] and PAC 303 [C] and PAC 329 [C]
Equivalent to: EXSS 232

KIN 233, TEACHING TECHNIQUES FOR OUTDOOR ACTIVITIES, 3 Credits
Gateway course for students pursuing the Level Three Adventure Leadership Certificate. Emphasizes teaching outdoor activities at a professional level. Students work individually with the course instructor to develop, plan and implement an activity course (land or water based) for the Adventure Leadership Institute.
Prerequisite: EXSS 232 with C or better or KIN 232 with C or better
Equivalent to: EXSS 233

KIN 299, SPECIAL TOPICS, 1-3 Credits
Equivalent to: EXSS 299
This course is repeatable for 24 credits.

KIN 301, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 301
This course is repeatable for 16 credits.

KIN 305, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

KIN 306, PROJECTS, 1-16 Credits
This course is repeatable for 36 credits.

KIN 307, SEMINAR, 1-3 Credits
Section 2: Seminar Pre-Internship (1 credit).
Equivalent to: EXSS 307
This course is repeatable for 36 credits.

KIN 311, MOTOR BEHAVIOR, 4 Credits
Underlying mechanisms and factors affecting movement function, skill acquisition, and changes in movement behavior across the lifespan.
Prerequisite: BI 232 with C- or better or BI 332 with C- or better
Equivalent to: EXSS 311
Available via Ecampus
KIN 312, *SOCIOCULTURAL DIMENSIONS OF PHYSICAL ACTIVITY, 4 Credits
Physical activity in contemporary society. Relationships with the social processes; interrelationships between physical activity and cultural institutions. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture
Equivalent to: EXSS 312
Recommended: Social processes course
Available via Ecampus

KIN 314, INTRODUCTION TO ADAPTED PHYSICAL ACTIVITY, 3 Credits
Overview of cognitive, neuromuscular, sensory and orthopedic disabilities; understanding accessible physical activity programs for individuals with disabilities.
Equivalent to: EXSS 314
Available via Ecampus

KIN 321, BIOMECHANICS OF HUMAN MOVEMENT, 4 Credits
Integration of the physical laws and anatomical structures governing human movement; qualitative analytical processes emphasized.
Prerequisite: ((BI 231 with C- or better and BI 241 [C-]) or (BI 331 [C-] and BI 341 [C-])) and (MTH 112 [C-] or MTH 251 [C-])
Equivalent to: EXSS 321
Available via Ecampus

KIN 324, EXERCISE PHYSIOLOGY, 4 Credits
Physiological effects of acute and chronic exercise; factors affecting human performance; exercise training principles.
Prerequisite: (BI 233 with C- or better or BI 333 with C- or better) and (BI 231 [C] or BI 331 [C] or BI 232 [C] or BI 233 [C] or BI 234 [C])
Equivalent to: EXSS 324
Available via Ecampus

KIN 325, FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION, 3 Credits
Introduction to lab- and field-based physical fitness assessments and the skills needed to design safe and effective exercise programs for apparently healthy adults. Lec/lab.
Prerequisite: KIN 324 with C- or better or EXSS 324 with C- or better
Equivalent to: EXSS 325

KIN 333, KINESIOLOGY PRACTICUM, 2 Credits
Field experience in kinesiology under professional supervision.
Equivalent to: EXSS 333

KIN 334, KINESIOLOGY PRACTICUM, 2 Credits
Field experience in kinesiology under professional supervision.
Prerequisite: KIN 333 with C- or better
Equivalent to: EXSS 334

KIN 335, KINESIOLOGY PRACTICUM, 2 Credits
Field experience in kinesiology under professional supervision.
Equivalent to: EXSS 335

KIN 341, NUTRITION FOR EXERCISE, 4 Credits
Review of the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals.
CROSSLISTED as KIN 341/NUTR 341.
Prerequisite: KIN 324 with C- or better and NUTR 240 [C-]
Equivalent to: EXSS 341, NUTR 341
Available via Ecampus

KIN 343, PRE-THERAPY/ALLIED HEALTH SEMINAR, 1 Credit
Provides knowledge in professional school preparation and current issues related to the allied health professions.
Prerequisite: (KIN 132 with C or better or BI 109 with C or better) and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C]
Equivalent to: EXSS 343
Recommended: Overall GPA of 3.0

KIN 344, PRE-THERAPY/ALLIED HEALTH PRACTICUM, 1 Credit
Clinical field experiences under the supervision of a licensed professional in the allied health or related setting enhanced with classroom discussion.
Prerequisite: KIN 132 with C or better and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C]
Corequisites: KIN 343
Equivalent to: EXSS 344
This course is repeatable for 2 credits.
Recommended: Overall GPA of 3.0

KIN 345, ALLIED HEALTH PRACTICUM, 1-2 Credits
Field experience under professional supervision in an allied health or related setting. Includes arranged consultations with the instructor to discuss current issues related to the allied health professions.
Equivalent to: EXSS 345
This course is repeatable for 2 credits.
Recommended: Overall GPA 2.75

KIN 353, PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM, 2 Credits
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.
Equivalent to: EXSS 353
Recommended: OSU GPA 2.00, KIN GPA 2.50, and completion or concurrent enrollment in KIN 422 or KIN 423
KIN 354, PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM, 2 Credits
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.
Equivalent to: EXSS 354
Recommended: OSU GPA 2.00, KIN GPA 2.50 and concurrent enrollment in KIN 422 or KIN 423

KIN 355, PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM, 2 Credits
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.
Equivalent to: EXSS 355
Recommended: OSU GPA 2.00, KIN GPA 2.50 and concurrent enrollment in KIN 422 or KIN 423

KIN 356, INJURY MANAGEMENT FOR THE PHYSICALLY ACTIVE, 3 Credits
Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals) and pre-professional.
Available via Ecampus

KIN 370, PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY, 3 Credits
Interaction between psychological variables and human motor performance.
Equivalent to: EXSS 370
Available via Ecampus

KIN 380, THERAPEUTIC MODALITIES, 4 Credits
Indications, contraindication, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and diseases.
Equivalent to: EXSS 380

KIN 385, THERAPEUTIC EXERCISE, 4 Credits
Principles and techniques of therapeutic exercise; rehabilitative activities and programs for musculoskeletal injuries, conditions, and diseases. Lec/lab.
Prerequisite: KIN 321 with C- or better or EXSS 321 with C- or better
Equivalent to: EXSS 385

KIN 394, PROFESSIONAL ACTIVITIES: RESISTANCE TRAINING PROGRAM DESIGN, 3 Credits
Presents the conceptual basis for optimizing resistance training program designs, exercise routines for all ages and fitness levels, correct exercise techniques. Lec/lab.
Prerequisite: KIN 324 with C- or better and KIN 325 [C-]
Equivalent to: EXSS 394

KIN 395, PROFESSIONAL ACTIVITIES: GROUP FITNESS, 3 Credits
Application of biomechanical, physiological, psychological and safety principles for the development of group exercise classes in a variety of modes and settings. Lec/lab.
Prerequisite: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])
Equivalent to: EXSS 395

KIN 396, PROFESSIONAL ACTIVITIES: AQUATICS, 3 Credits
Aquatic overview; emphasis on underlying hydrodynamic principles; includes safety, survival, stroke mechanics, aquatic exercise, training, games. Lec/lab/activity.
Equivalent to: EXSS 396
Recommended: PAC 250

KIN 399, SPECIAL TOPICS, 1-3 Credits
Equivalent to: EXSS 399, KIN 399H
This course is repeatable for 18 credits.

KIN 399H, SPECIAL TOPICS, 1-3 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: KIN 399
This course is repeatable for 18 credits.

KIN 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 401
This course is repeatable for 16 credits.

KIN 403, THESIS, 1-16 Credits
Equivalent to: EXSS 403
This course is repeatable for 16 credits.

KIN 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: EXSS 405
This course is repeatable for 16 credits.

KIN 406, PROJECTS, 1-16 Credits
Equivalent to: EXSS 406
This course is repeatable for 16 credits.

KIN 407, SEMINAR, 1-16 Credits
Equivalent to: EXSS 407
This course is repeatable for 16 credits.

KIN 408, WORKSHOP, 1-16 Credits
Equivalent to: EXSS 408
This course is repeatable for 16 credits.

KIN 409, PRACTICUM, 1-16 Credits
Available via Ecampus
KIN 410, INTERNSHIP, 1-15 Credits
Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required.
Equivalent to: EXSS 410
This course is repeatable for 20 credits.
Recommended: Completion of required courses, cumulative Kinesiology program GPA of 2.25, KIN overall GPA of 2.50 and completion of 165 credits
Available via Ecampus

KIN 411, NEUROMUSCULAR CONTROL OF HUMAN MOVEMENT, 3 Credits
Exploration and understanding of the neurological basis of human movement with emphasis on models of motor function and dysfunction.
Prerequisite: KIN 311 with C- or better

KIN 422, FACILITATING PHYSICAL ACTIVITY FOR CHILDREN AND YOUTH, 3 Credits
Students learn skills for facilitating physical activity programs for children and youth in a variety of settings, including information on the benefits of physical activity, program design, implementation and management techniques.
Prerequisite: KIN 311 with C- or better or EXSS 311 with C- or better
Equivalent to: EXSS 422

KIN 423, QUALITATIVE MOVEMENT ANALYSIS, 3 Credits
Develop observational skills to perform systematic qualitative analyses of selected physical activity performances and other human movements.
Prerequisite: (KIN 311 with C- or better or EXSS 311 with C- or better) and (KIN 321 [C-] or EXSS 321 [C-])
Equivalent to: EXSS 423

KIN 425, ANATOMICAL KINESIOLOGY, 4 Credits
Anatomical aspects of human movement; actions of bones and muscles in motor activities. Application of physical principles to factors governing anatomical function in health and injury.
Prerequisite: EXSS 321 with C- or better or KIN 321 with C- or better
Equivalent to: EXSS 425

KIN 432, PHYSICAL ACTIVITY ASSESSMENT, 3 Credits
Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations.
Equivalent to: EXSS 432

KIN 434, APPLIED MUSCLE PHYSIOLOGY, 3 Credits
Skeletal muscle structure, function, and metabolism; applications to muscle fatigue, exercise training, inactivity, and aging.
Prerequisite: KIN 324 with C- or better or EXSS 324 with C- or better
Equivalent to: EXSS 434

KIN 435, PHYSICAL ACTIVITY PROMOTION, 3 Credits
Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities.
Prerequisite: KIN 370 with C- or better
Equivalent to: EXSS 435

KIN 437, PHYSICAL ACTIVITY, AGING, AND CHRONIC DISEASE, 4 Credits
Addresses the consequences of primary and secondary aging from an individual and public health perspective. Physiological changes associated with aging and chronic disease, functional assessment of older adults, and exercise prescription for older adults with and without chronic exercise will be emphasized.
Prerequisite: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])
Equivalent to: EXSS 437

KIN 444, ADVANCED ADAPTED PHYSICAL ACTIVITY, 3 Credits
Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities. Lec/lab.
Prerequisite: (KIN 314 with C- or better or EXSS 314 with C- or better)
Equivalent to: EXSS 444

KIN 462, BEHAVIORAL DIMENSIONS OF PHYSICAL ACTIVITY, 4 Credits
Adopting and maintaining an active, healthy lifestyle is difficult. This course explores 'why' this might be the case and 'how' to improve upon the situation.
Prerequisite: KIN 312 with C- or better and KIN 370 [C-]

KIN 474, EXERCISE PHYSIOLOGY LAB METHODS, 3 Credits
Practical experience and projects in exercise physiology lab methods, including measurement of submaximal and maximal oxygen consumption body composition, anaerobic power, and electrocardiography.
Prerequisite: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])
Equivalent to: EXSS 474

KIN 475, *POWER AND PRIVILEGE IN SPORT, 3 Credits
Issues of power and privilege in sport including race, gender, sexual orientation, disability and aggression and the consequences of long held society norms and stereotypes. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisite: (KIN 312 with C- or better or EXSS 312 with C- or better)
Equivalent to: EXSS 475
Recommended: 6 credits of social science
Available via Ecampus
KIN 481, "ANALYSIS OF CRITICAL ISSUES IN KINESIOLOGY, 3 Credits
Reading and interpreting current research, and using writing as a tool for learning on a critical issue in kinesiology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: KIN 381
Available via Ecampus

KIN 483, TISSUE INJURY AND REPAIR, 3 Credits
Mechanics of tissue injury and the body's response and repair following injury of bone, muscle, tendon, ligament, cartilage and nervous system tissue.
Prerequisite: (BI 231 with C- or better or BI 331 with C- or better) and (BI 241 [C-] or BI 341 [C-]) and (BI 232 [C-] or BI 332 [C-]) and (BI 242 [C-] or BI 342 [C-]) and (BI 233 [C-] or BI 333 [C-]) and (BI 243 [C-] or BI 343 [C-]) or ((Z 331 [C-] and Z 332 [C-] and Z 333 [C-] and Z 341 [C-] and Z 342 [C-] and Z 343 [C-]))
Equivalent to: EXSS 483

KIN 490, SCIENTIFIC INQUIRY IN KINESIOLOGY, 4 Credits
Principles and techniques of organization, administration, interpretation and evaluation of exercise science-related data. Includes human subjects training and certification, research design, and statistical analysis using SPSS and Excel including central tendency, correlation and regression, probability, and inferential statistics (t-tests and ANOVA). Lec/lab.
Prerequisite: KIN 325 with C- or better and MTH 112 [C-]

KIN 499, SELECTED TOPICS, 1-5 Credits
Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: EXSS 499
This course is repeatable for 24 credits.

KIN 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 501
This course is repeatable for 16 credits.

KIN 503, THESIS, 1-16 Credits
Equivalent to: EXSS 503
This course is repeatable for 999 credits.

KIN 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: EXSS 505
This course is repeatable for 16 credits.

KIN 506, PROJECTS, 1-16 Credits
Equivalent to: EXSS 506
This course is repeatable for 16 credits.

KIN 507, SEMINAR, 1-16 Credits
Section 1: Seminar (1). Graduate research seminar that emphasizes student oral presentations of current research topics in exercise and sport science. One credit required for all graduate students. Section 2: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N.
Equivalent to: EXSS 507
This course is repeatable for 16 credits.

KIN 508, WORKSHOP, 1-16 Credits
Equivalent to: EXSS 508
This course is repeatable for 16 credits.

KIN 509, PRACTICUM, 1-16 Credits
This course is repeatable for 35 credits.

KIN 510, INTERNSHIP, 1-16 Credits
Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required.
Equivalent to: EXSS 510
This course is repeatable for 26 credits.

KIN 511, INTRODUCTION TO ATHLETIC TRAINING, 4 Credits
Practice domains include injury and illness prevention and wellness protection, clinical evaluation and diagnosis, immediate and emergency care, treatment and rehabilitation, and organizational and professional health and well-being. Lec/lab.

KIN 512, APPLIED MOTOR LEARNING, 3 Credits
Application of research and theory to the teaching of motor skills with emphasis on development of instructional strategies related to modeling, knowledge of results, practice, and motivational aspects of learning.
Equivalent to: EXSS 512
Recommended: KIN 311

KIN 513, MOTOR DEVELOPMENT: AN INTEGRATIVE APPROACH, 3 Credits
Addresses the social, cultural, biological and psychological processes and health-related factors (e.g., physical activity) that jointly influence lifespan motor development (emphasis on the early years).

KIN 515, MOTOR CONTROL AND MOVEMENT DYSFUNCTION, 3 Credits
Contemporary motor control theories and their application to the development of instructional and training programs for individuals with movement disorders caused by neurological disease and/or trauma.
Equivalent to: EXSS 515
Recommended: KIN 311 and (KIN 314 or KIN 444)
KIN 520, ORTHOPEDIC ASSESSMENT OF UPPER EXTREMITY INJURIES, 4 Credits
Prevention, assessment and management of upper extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab.
Prerequisite: KIN 511 with C or better

KIN 521, ORTHOPEDIC ASSESSMENT OF LOWER EXTREMITY INJURIES, 4 Credits
Prevention, assessment and management of lower extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab.
Prerequisite: KIN 511 with C or better

KIN 522, ORTHOPEDIC ASSESSMENT OF SPINE, 4 Credits
Prevention, assessment and management of spinal injuries and conditions commonly encountered by the athletic trainer. Lec/lab.
Prerequisite: KIN 520 with C or better and KIN 521 [C]

KIN 523, BIOMECHANICS OF MOTOR ACTIVITIES, 3 Credits
Kinematic and kinetic analysis of volitional human movement with emphasis on analytical techniques and quantitative problem solving.
Equivalent to: EXSS 523
Recommended: KIN 323 or PH 201

KIN 525, BIOMECHANICS OF MUSCULOSKELETAL INJURY, 3 Credits
Mechanical causes and effects of forces applied to the musculoskeletal system, material properties of human tissues, pathomechanics of injury, and degenerative changes across the lifespan. Not offered every year.
Equivalent to: EXSS 525

KIN 531, PHYSIOLOGY OF PHYSICAL ACTIVITY AND INACTIVITY, 3 Credits
Physiologic responses to acute and chronic physical activity and inactivity with emphasis on underlying mechanisms and health outcomes.

KIN 532, PHYSICAL ACTIVITY ASSESSMENT, 3 Credits
Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations.
Equivalent to: EXSS 532

KIN 533, ENERGETICS AND BIOCHEMISTRY OF EXERCISE, 3 Credits
Metabolic and energetic responses to acute and chronic physical activity; emphasis on recent research.
Equivalent to: EXSS 533
Recommended: Undergraduate course in biochemistry or exercise physiology.

KIN 535, PHYSICAL ACTIVITY PROMOTION, 3 Credits
Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities.
Recommended: KIN 370

KIN 536, PHYSICAL ACTIVITY IN DIVERSE POPULATIONS, 3 Credits
Addresses the social, cultural, political, and environmental determinants of physical activity and health among diverse populations. Includes examination of intersecting issues related to race, ethnicity, gender, age, disability, geography, income status, and other societal factors across the lifespan for promoting physical activity through public health strategies.

KIN 541, INTEGRATED BEHAVIORAL HEALTH IN ATHLETIC TRAINING, 3 Credits
Explores integrated behavioral health in athletic training focusing on patient-centered care. Emphasizes the multidisciplinary approach in the individualized care of behavioral health conditions including suicidal ideation, depression, eating disorders and the associated necessary referrals to additional clinical personnel.
Prerequisite: KIN 521 with C or better

KIN 544, ADVANCED ADAPTED PHYSICAL ACTIVITY, 3 Credits
Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities. Lec/lab.
Equivalent to: EXSS 544
Recommended: KIN 314

KIN 547, INCLUSION IN PHYSICAL ACTIVITY, 3 Credits
Effectiveness of physical activity programs provided in inclusive settings. This will include a lifespan/non-categorical approach to program development.
Equivalent to: EXSS 547
Recommended: KIN 314 or KIN 444

KIN 548, ASSESSMENT AND PROGRAMMING FOR SPECIAL POPULATIONS, 3 Credits
Use of appropriate assessment procedures for developing effective psychomotor programs for the disabled.
Equivalent to: EXSS 548
Recommended: KIN 314 or KIN 444
KIN 549, PHYSICAL ACTIVITY FOR PERSONS WITH SEVERE DISABILITIES, 3 Credits
Plan, develop and implement appropriate physical activity programs, functional program design, assistive technology, instructional strategies, behavior management practices, and data analysis systems that address the needs for psychomotor performance of persons with low incidence disabilities.
Equivalent to: EXSS 549
Recommended: KIN 314 or KIN 444

KIN 550, HEALTH PROMOTION FOR PEOPLE WITH DISABILITIES, 3 Credits
Discussion will focus on disability and health, theory driving health promotion program development, guidelines for developing a program for individuals with disabilities, and program evaluation.
Equivalent to: EXSS 550

KIN 551, CURRENT TRENDS AND ISSUES IN PHYSICAL EDUCATION, 4 Credits
Current trends and issues in physical education, including curriculum development, professional ethics, instructional practices, and physical activity for the school community.
Equivalent to: EXSS 551

KIN 553, INSTRUCTIONAL ANALYSIS TECHNIQUES I, 3 Credits
Introduction to techniques of instructional analysis. Provides in-depth information and training in systematic observation techniques, raw data conversion and inter/intraobserver reliability.
Equivalent to: EXSS 553

KIN 554, INSTRUCTIONAL ANALYSIS TECHNIQUES II, 3 Credits
Laboratory/seminar experience to accompany student teaching winter and spring terms. Provides continued application of systematic observation techniques throughout the elementary student teaching experience.
Equivalent to: EXSS 554

KIN 555, SKILL ANALYSIS AND ASSESSMENT IN K-12, 3 Credits
Develop proficiency in assessing movement skills, execution of sport techniques, and game play performance. Assessment trends and practices utilized in physical education programs are included.
Equivalent to: EXSS 555

KIN 556, INSTRUCTIONAL SKILLS I, 3 Credits
Skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12.
Equivalent to: EXSS 556

KIN 557, INSTRUCTIONAL SKILLS II, 2 Credits
Applying and refining skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12.
Equivalent to: EXSS 557

KIN 558, PHYSICAL EDUCATION CURRICULUM DESIGN AND ORGANIZATION, 3 Credits
Curricular programs and variations from kindergarten through grade 12, administrative policies and practices.
Equivalent to: EXSS 558

KIN 559, THE PHYSICAL EDUCATOR AS A PROFESSIONAL, 1 Credit
Transitioning to teaching, developing a portfolio, certification, obtaining a position, teacher burnout, professionalism, problems of first-year teachers, developing patterns of behavior that lead to a successful career.
Equivalent to: EXSS 559

KIN 560, MOTIVATION IN PHYSICAL ACTIVITY, 3 Credits
A social psychological approach to understanding the role of self-perceptions and cognitions in explaining motivated behavior in sport and exercise settings.
Equivalent to: EXSS 560
Recommended: KIN 370

KIN 561, PSYCHOSOCIAL FACTORS IN PHYSICAL ACTIVITY, 3 Credits
A social psychological approach to understanding the role of social interactions and contextual factors in explaining human behavior in sport and exercise settings.
Equivalent to: EXSS 561
Recommended: KIN 560

KIN 562, LIFESPAN SPORT AND EXERCISE PSYCHOLOGY, 3 Credits
Social-psychological issues across the lifespan in the context of sport and exercise.
Equivalent to: EXSS 562
Recommended: KIN 561

KIN 564, PROGRAM CAPSTONE AND SYNTHESIS, 3 Credits
Capstone course in which teacher candidates will review and update their teaching philosophy; showcase their Physical Education master’s portfolio; and develop a plan for professional development.
Prerequisite: KIN 510 with C- or better
KIN 565, MANAGEMENT OF EMERGENT CONDITIONS IN ATHLETIC TRAINING, 3 Credits
Examines the knowledge and skills required to care for emergent conditions encountered by the athletic trainer. Includes the management of a patient experiencing shock, cardiovascular emergency, respiratory emergency, head injury, spinal injury, fracture, dislocation, and conditions related to environmental factors.
Prerequisite: KIN 566 with C or better

KIN 566, GENERAL MEDICAL ASSESSMENT, 4 Credits
Prevention, evaluation, diagnosis, and management of general medical conditions commonly encountered by the athletic trainer.
Prerequisite: KIN 565 with C or better

KIN 567, PHARMACOLOGY IN ATHLETIC TRAINING, 3 Credits
Pharmacology in sports medicine, topics including, but not limited to, the mechanisms and actions of drugs commonly administered and prescribed in sports medicine environments.
Prerequisite: KIN 566 with C or better

KIN 568, ADMINISTRATIVE ISSUES IN ATHLETIC TRAINING, 3 Credits
Examines administrative aspects of athletic training program management. Including principles of risk management, strategic and operational planning, medical-legal aspects of athletic healthcare, confidentiality and documentation of patient health information, insurance and third-party reimbursement, personnel issues, and current professional issues.
Prerequisite: KIN 569 with C or better

KIN 569, RESEARCH INFORMED PRACTICE, 3 Credits
Examine the principles and skills underlying the utilization of evidence to enhance clinical practice decision-making. Includes the development of clinical questions, review and appraisal of relevant literature, and utilization of patient-centered outcome measures.
Prerequisite: KIN 520 with C or better

KIN 573, MEASUREMENT IN HUMAN MOVEMENT, 3 Credits
Equivalent to: EXSS 573
Recommended: ST 511

KIN 575, RESEARCH IN HUMAN MOVEMENT, 3 Credits
Investigation and evaluation of research methods applicable to human movement study and professional physical education
Equivalent to: EXSS 575
Recommended: ST 511

KIN 583, CONCUSSION MANAGEMENT, 3 Credits
Examines concussions and other traumatic brain injuries encountered by the athletic trainer. Includes the prevention, assessment, rehabilitation, and management of concussions.
Prerequisite: KIN 565 with C or better

KIN 584, PHYSIOLOGY AND MANAGEMENT OF MUSCULOSKELETAL INJURIES, 3 Credits
Mechanics of musculoskeletal tissue injuries; physiologic response and repair processes of various tissues; and effects of physical agents commonly used by athletic trainers in the care and treatment of musculoskeletal injuries.
Prerequisite: KIN 511 with C or better

KIN 585, REHABILITATION II, 4 Credits
Explores the theoretical foundation and techniques of rehabilitation management in the physically active patient. Emphasizes therapeutic exercise of injuries and conditions of the upper extremity, cervical and thoracic spine using techniques of program design learned in KIN 586. Examine theory and apply manual therapy interventions.
Prerequisite: KIN 586 with C or better

KIN 586, REHABILITATION I, 4 Credits
Explores the theoretical foundation and techniques of rehabilitation management in the physically active patient. Emphasizes therapeutic exercise of injuries and conditions of the lower extremity, lumbar spine, pelvis and ribs with a focus on program design, implementation and interpretation of patient’s physical status.
Prerequisite: KIN 522 with C or better

KIN 599, SPECIAL TOPICS, 1-3 Credits
Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated when topics differ.
Equivalent to: EXSS 599
This course is repeatable for 99 credits.

KIN 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 601
This course is repeatable for 16 credits.

KIN 603, THESIS, 1-16 Credits
Equivalent to: EXSS 603
This course is repeatable for 999 credits.

KIN 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: EXSS 605
This course is repeatable for 16 credits.

KIN 606, PROJECTS, 1-16 Credits
Equivalent to: EXSS 606
This course is repeatable for 16 credits.
KIN 607, SEMINAR, 1-16 Credits
Section 1: Graduate Research (1). Seminar emphasizes student oral presentations of current research topics in exercise and sport science. One credit required of all graduate students. Section 3: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N.
Equivalent to: EXSS 607
This course is repeatable for 16 credits.

KIN 610, PROFESSIONAL INTERNSHIP: PHYSICAL EDUCATION, 1-15 Credits
Field experience in which the term will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples.
Equivalent to: EXSS 610
This course is repeatable for 25 credits.

KIN 647, CURRENT TOPICS AND RESEARCH IN ADAPTED PHYSICAL ACTIVITY, 3 Credits
Current trends and critical research issues in adapted physical activity; focus on international and national trends. Topic will be variable.
Equivalent to: EXSS 647

KIN 699, SPECIAL TOPICS, 1-16 Credits
Current issues, trends, and topics in KIN research. May be repeated for credit with different topics.
Equivalent to: EXSS 699
This course is repeatable for 25 credits.

Nursing (NUR)
NUR 411, INFORMATICS IN NURSING, 1 Credit
Provides an overview of nursing informatics as a means to improve information management in healthcare. Consideration of healthcare technologies with ethical and financial criteria in relation to the quality of their outcomes.

NUR 412, TRANSITION TO PROFESSIONAL NURSING, 3 Credits
Provides an overview of the nursing metaparadigm: client, nurse, health/illness and environment. Nursing theoretical perspectives will be discussed as a foundation for professional nursing practice as care provider and manager of care. Special emphasis will be on the practice of the baccalaureate nurse.

NUR 413, ADVANCED HEALTH ASSESSMENT, 3 Credits
Builds on previous health assessment knowledge and skills, focusing on comprehensive health assessment skills. Using a lifespan approach, students examine the physical, cultural, psychosocial, spiritual and nutritional variables through the use of health history and health assessment.

NUR 414, NURSING EPIDEMIOLOGY, 3 Credits
Presents the basic concepts and methods of epidemiology applied to population focused health care and nursing practice. Emphasis is placed on the use of epidemiologic reasoning in deriving inferences about the etiology of health outcomes from population data and in guiding the design of health service programs.
Prerequisite: ST 201 with D- or better

NUR 415, *NURSING PRACTICE IN A MULTICULTURAL SOCIETY, 3 Credits
Provides an overview of the influence of culture on health care practices and the delivery of nursing care for individuals, groups, and communities. Emphasis is on increasing awareness of culturally diverse nursing care and the impact of cultural beliefs, values, and practices upon health and health care delivery.
Attributes: CPCD – Core, Pers, Cult Diversity

NUR 416, POPULATION-FOCUSED AND COMMUNITY-BASED NURSING PRACTICE I, 4 Credits
Introduces the concepts and principles of community health and the practice of evidence-based community health nursing. The nursing process is applied to the care of individuals, families, and groups within the community. Emphasis on health promotion and illness prevention. Consideration of cultural competence in nursing care. Application of community health nursing principles occurs in the 54-hour independent clinical practicum under the supervision of the faculty.
Prerequisite: NUR 413 with C- or better
Recommended: Completion of at least 12 credits in the RN to BSN program

NUR 417, POPULATION-FOCUSED AND COMMUNITY-BASED NURSING PRACTICE II, 5 Credits
Builds on NUR 416 through the application of the theories and principles of population-focused nursing in a community setting. Emphasis will be on community health measures which promote and maintain the health of the community. Application of community health nursing principles occurs in the 54-hour independent clinical practicum under the supervision of the faculty.
Prerequisite: NUR 416 with C- or better

NUR 418, HEALTH CARE SYSTEM ISSUES IN NURSING PRACTICE, 3 Credits
Consideration of the current and emerging forces that will affect health care delivery across the health care continuum. Issues related to health care relevant policy, finance, and regulation, with special attention to the impacts on nursing care will be included.
NUR 419, HEALTH CARE QUALITY IN NURSING PRACTICE, 2 Credits
Explores strategies that contribute to building a culture of safe, quality nursing practice. The focus is on incorporating quality assessment and improvement strategies as evidence based practice in an interdisciplinary environment.

NUR 420, NURSING RESEARCH AND EVIDENCE-BASED PRACTICE, 4 Credits
Overview of the research process and utilization in professional nursing practice. Discussion of evidence-based practice as the foundation for safe, quality care. Reading and interpreting current research, and using writing as a tool for learning on a critical issue in nursing will be the focus of this course. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: NUR 414 with D- or better
Recommended: WR II requirement

NUR 421, AGING AND END OF LIFE ISSUES IN NURSING, 3 Credits
Overview of the impact of the aging population on health care. Common ethical dilemmas encountered in health care will be explored. Application of ethical principles to the complicated situations encountered by interprofessional teams, with special consideration of those related to end-of-life care for the professional nurse.

NUR 422, HEALTH PROMOTION IN NURSING PRACTICE, 3 Credits
Builds on prior learning and focuses on preventative health care and health promotion for individuals, families, and communities. Consideration is given to the influence of culture and lifespan development. Using biophysical, environmental, spiritual, sociocultural and economic determinants of health, the focus is on the role of nurses in improving health outcomes with individuals, families, and communities.
Prerequisite: NUR 413 with C- or better

NUR 423, NURSING LEADERSHIP, 4 Credits
Explores the role of the nurse leader, integrating prior learning with an understanding of the nature of leadership as well as leadership and management theories. An introduction to the principles of project management with application to a clinical leadership project is included. Consideration of individual student growth, particularly related to the student outcomes of the program and personal goals for future growth will be a focus. Application of the content will occur in the 54-hour independent clinical practicum, under the direction of the faculty, to develop and implement a clinical leadership project.

Nutrition (NUTR)

NUTR 104, ORIENTATION TO THE NUTRITION MAJOR, 1 Credit
Discuss and explore the academic and professional requirements for successful entry into professional careers in dietetics, foodservice systems management, and human nutrition sciences majors. Identify professional resources, career opportunities, markets and trends in these OSU Nutrition major options. Graded P/N.
Equivalent to: NFM 104
Available via Ecampus

NUTR 199, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

NUTR 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

NUTR 216, FOOD IN NON-WESTERN CULTURE, 3 Credits
Cultural determinants influencing food habits of humans. Interrelation of eating patterns and socio-cultural, ecological, psychological and economic factors in cross-cultural settings. Roles of men and women in food provision. Lec/rec. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: NFM 216
Available via Ecampus

NUTR 225, GENERAL HUMAN NUTRITION, 3 Credits
The relationship of food, its nutrients and other components to the promotion of health and fitness with emphasis on the young adult. Current health concerns on a national and international level. This course is for non-majors; NES majors and those in the health sciences should take NUTR 240.
Equivalent to: NFM 225
Available via Ecampus

NUTR 235, SCIENCE OF FOODS, 5 Credits
Composition, functional properties, and structure of foods, including modified ingredients. Principles underlying preparation of food products of standard quality. Lec/lab.
Prerequisite: CH 123 with C- or better or CH 223 with C- or better or ((CH 263 with C- or better or CH 263H with C- or better or CH 273 with C- or better) and (CH 233 [C-] or CH 233H [C-I]))
Equivalent to: NFM 235
Available via Ecampus

NUTR 240, HUMAN NUTRITION, 3 Credits
An introductory nutrition course for exercise science, nutrition, dietetics, food science, and health science majors who have taken general chemistry. Concepts of nutrient metabolism and utilization, nutrient deficiencies and toxicities and their relationship to disease prevention and treatment.
Prerequisite: (CH 121 with C- or better or CH 224H with C- or better or (CH 221 with C- or better or CH 231 with C- or better or CH 231H with C- or better))
Equivalent to: NFM 240
Available via Ecampus
NUTR 241, APPLICATIONS IN HUMAN NUTRITION, 1 Credit
Application of nutrition theory from NUTR 240 using a dietary project and hands-on recitation activities. A key focus of the course will be on applying nutrition theory. Rec.
Prerequisite: NUTR 240 (may be taken concurrently) with C- or better
Equivalent to: NFM 241
Available via Ecampus

NUTR 299, SPECIAL TOPICS, 1-16 Credits
Equivalent to: NFM 299
This course is repeatable for 16 credits.

NUTR 306, PROJECTS, 1-16 Credits
This course is repeatable for 36 credits.

NUTR 307, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

NUTR 311, FOODSERVICE PRODUCTION AND PURCHASING, 4 Credits
Food production, purchasing, facility and materials management in foodservice operations. Quantity production styles, safety and sanitation, service methods and equipment. Lec/lab/rec.
Prerequisite: NUTR 235 with C- or better
Equivalent to: NFM 311

NUTR 312, *ISSUES IN NUTRITION AND HEALTH, 3 Credits
Impact of nutrition as one component of complex environmental, behavioral, social, and genetic factors significant to health promotion. Apply scientific knowledge to current health issues of changing dietary patterns, technological development in food products and nutrition controversies. Recognize economic and public policy implications. Lec/rec. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: NUTR 225 with C- or better or NUTR 240 with C- or better
Equivalent to: NFM 312
Recommended: Completion of science requirement in Bacc Core
Available via Ecampus

NUTR 319, PROMOTING FOOD AND NUTRITION, 3 Credits
Strategies in promoting products, services or ideas; negotiating, advertising, public policy, consumer service, social marketing, market research, trends and strategies. Lec/lab.
Prerequisite: NUTR 240 with C- or better and NUTR 241 [C-]
Equivalent to: NUTR 219

NUTR 325, NUTRITION THROUGH THE LIFE CYCLE, 3 Credits
Nutritional needs and concerns in pregnancy and lactation, infancy, childhood, adolescence, adult and later years.
Prerequisite: (NUTR 240 with C- or better or NUTR 225 with C- or better) and NUTR 241 [C-]
Equivalent to: NFM 325
Recommended: Junior standing
Available via Ecampus

NUTR 341, NUTRITION FOR EXERCISE, 4 Credits
Review of the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSLISTED as KIN 341/NUTR 341.
Prerequisite: KIN 324 with C- or better and NUTR 240 [C-]
Equivalent to: EXSS 341, KIN 341
Available via Ecampus

NUTR 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: NFM 399
This course is repeatable for 16 credits.

NUTR 401, RESEARCH, 1-16 Credits
Equivalent to: NFM 401
This course is repeatable for 16 credits.

NUTR 403, THESIS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 403
This course is repeatable for 16 credits.

NUTR 405, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: NFM 405
This course is repeatable for 16 credits.

NUTR 406, SPECIAL PROBLEMS; PROJECTS, 1-16 Credits
Equivalent to: NFM 406
This course is repeatable for 16 credits.

NUTR 407, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: NFM 407
This course is repeatable for 16 credits.

NUTR 408, WORKSHOP, 1-16 Credits
Graded P/N.
Equivalent to: NFM 408
This course is repeatable for 16 credits.

NUTR 409, PRACTICUM, 1-16 Credits
Equivalent to: NFM 409
This course is repeatable for 16 credits.

NUTR 410, FIELD EXPERIENCE, 1-15 Credits
Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. For advanced students. Applications made and approved term preceding enrollment. Graded P/N.
Equivalent to: NFM 410
This course is repeatable for 50 credits.
Available via Ecampus
NUTR 416, ^CULTURAL ASPECTS OF FOODS, 3 Credits
Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec./lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: NUTR 235 with C- or better
Equivalent to: NFM 416

NUTR 417, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Prerequisite: BB 350 with C- or better
Equivalent to: NFM 417
Recommended: One physiology course

NUTR 418, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Prerequisite: NUTR 417 with C- or better
Equivalent to: NFM 418
Recommended: Biochemistry and physiology

NUTR 423, COMMUNITY NUTRITION, 4 Credits
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist.
Prerequisite: NUTR 325 with C- or better
Equivalent to: NFM 423

NUTR 430, MEDICAL NUTRITION THERAPY I, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec.
Prerequisite: (BB 350 with C- or better or BB 450 with C- or better and BB 451 [C-]) and (BI 233 [C-] or BI 332 [C-]) and (BI 242 [C-] or BI 342 [C-]) and (BI 233 [C-] or BI 333 [C-]) and (BI 243 [C-] or BI 343 [C-]) and NUTR 417 (may be taken concurrently) [C-] and NUTR 439 [C-]

NUTR 431, MEDICAL NUTRITION THERAPY 2, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Prerequisite: NUTR 430 with C- or better

NUTR 432, MEDICAL NUTRITION THERAPY 3, 3 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Prerequisite: NUTR 431 with C- or better

NUTR 439, ^COMMUNICATIONS IN DIETETICS, 3 Credits
Theory and practice in food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: NUTR 325 with C- or better
Equivalent to: NFM 439

NUTR 446, MANAGING FOOD AND NUTRITION SERVICES, 4 Credits
Overview of organizational structure, functions of managers in food and nutrition service organizations: human and financial resources, regulatory influences, health care organizations, current issues in operations. Lec/rec.
Prerequisite: NUTR 311 with C- or better
Equivalent to: NFM 446

NUTR 447, MANAGEMENT OF FOOD SYSTEMS LABORATORY, 3 Credits
Application of theory in managing a university food service as part of a student team: planning, production, projecting resource needs, evaluation of outcomes and financial goals.
Equivalent to: NFM 447
Recommended: NUTR 446 or NUTR 546

NUTR 499, SPECIAL TOPICS IN DIETETICS, 1-16 Credits
Current issues, trends, and topics in nutrition and dietetics. May be repeated for credit when topic varies.
Equivalent to: NFM 499
This course is repeatable for 16 credits.

NUTR 501, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: NFM 501
This course is repeatable for 16 credits.

NUTR 502, INDEPENDENT STUDY, 1-16 Credits
Graded P/N.
Equivalent to: NFM 502
This course is repeatable for 16 credits.

NUTR 503, THESIS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 503
This course is repeatable for 999 credits.

NUTR 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: NFM 505
This course is repeatable for 16 credits.
Available via Ecampus
NUTR 506, SPECIAL PROBLEMS; PROJECTS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 506
This course is repeatable for 16 credits.
Available via Ecampus

NUTR 507, SEMINAR, 1-16 Credits
1 credit graded P/N.
Equivalent to: NFM 507
This course is repeatable for 16 credits.

NUTR 508, WORKSHOP, 1-16 Credits
Graded P/N.
Equivalent to: NFM 508
This course is repeatable for 16 credits.

NUTR 509, PRACTICUM, 1-16 Credits
Graded P/N.
Equivalent to: NFM 509
This course is repeatable for 16 credits.

NUTR 510, FIELD EXPERIENCE: INTERNSHIP, 1-16 Credits
Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. Limited to students admitted to degree program. Application made and approved in the term preceding enrollment. No more than 6 credits may be applied to a master’s degree program.
Equivalent to: NFM 510
This course is repeatable for 6 credits.
Available via Ecampus

NUTR 514, HEALTH BENEFITS OF FUNCT FOODS, NUTRACEUT, DIETARY SUPPLEMEN, 3 Credits
Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. CROSSLISTED as FST 514/NUTR 514.
Equivalent to: FST 514, NFM 514
Recommended: BB 350 and CH 332

NUTR 516, CULTURAL ASPECTS OF FOODS, 3 Credits
Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab.
Equivalent to: NFM 516
Recommended: NUTR 235

NUTR 517, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Equivalent to: NFM 517
Recommended: BB 350 and one physiology course

NUTR 518, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Prerequisite: NUTR 517 with C or better
Equivalent to: NFM 518
Recommended: biochemistry, physiology.

NUTR 523, COMMUNITY NUTRITION, 4 Credits
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist.
Equivalent to: NFM 523
Recommended: NUTR 325

NUTR 525, ORGANIC FOOD AND HEALTH: EVIDENCE AND CONSUMER PERCEPTIONS, 3 Credits
Overview of organic food including an understanding of the definition, certifications and labeling; basic production comparisons with conventional foods, evidence for comparisons between organic and conventionally produced foods; consumer attitudes and perceptions regarding organic foods.
Available via Ecampus

NUTR 530, MEDICAL NUTRITION THERAPY I, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec.
Recommended: (BB350 or (BB450 and BB 451)) and (BI 232 or BI 332) and (BI 242 or BI 342) and (BI 233 or BI 333) and (BI 243 or BI 343) and NUTR 439 and completion or concurrent enrollment in NUTR 417

NUTR 531, MEDICAL NUTRITION THERAPY 2, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Recommended: NUTR 430

NUTR 532, MEDICAL NUTRITION THERAPY 3, 3 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Recommended: NUTR 431
NUTR 535, NUTRITION AND EXERCISE: MACRONUTRIENTS AND ENERGY METABOLISM, 3 Credits
Current research examining the interrelationship of macronutrients and exercise and energy balance will be reviewed, including their roles in health, disease prevention and exercise performance.
Equivalent to: NFM 535
Recommended: NUTR 517 or KIN 533

NUTR 539, COMMUNICATIONS IN DIETETICS, 3 Credits
Theory and practice of food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies.
Equivalent to: NFM 539
Recommended: NUTR 325

NUTR 546, FOODSERVICE ORGANIZATIONS, 3 Credits
Overview of organizational structure, functions of managers in foodservice organizations: human resources, regulatory influences, health care organizations, current issues in operations. Lec/rec.
Equivalent to: NFM 546
Recommended: NUTR 311 and NUTR 445

NUTR 550, NUTRITIONAL STATUS, 4 Credits
Research studies with emphasis on estimation of nutrient intake and assessment of nutritional status, including biochemical, clinical, epidemiological and anthropometric measures. Interpretation of status indicators.
Equivalent to: NFM 550
Recommended: NUTR 418 or NUTR 518

NUTR 551, ADVANCED MEDICAL NUTRITION THERAPY, 4 Credits
This advanced course includes evidence-based practices and standards of care available to address complex scenarios for which medical nutrition therapy is an integral part of patient care. Students will build on prior assessment, nutritional diagnostic, implementation, monitoring, evaluation and documentation skills relevant to dietetics practice. Lecture, readings, case studies including professional documentation and expert guests will be used to illustrate medical nutrition therapy addressing topics such as as domestic malnutrition, nutrition support, pediatric nutrition, eating disorders, diabetes and geriatric nutrition. Available via Ecampus

NUTR 552, FOOD AND NUTRITION PROGRAM MANAGEMENT AND EVALUATION, 4 Credits
Introduction to the evaluation of outcomes and impacts of food/nutrition-related systems, performance, interventions, programs and/or policies. Application of methods used to appraise problems or activities, as well to conceptualize, create, implement and administer evaluations in order to make decisions regarding their outcomes, impacts, efficiency and cost effectiveness. A case study approach across a range of food and nutrition-related public, government and private organizations will introduce the breadth of approaches in such evaluations.
Available via Ecampus

NUTR 553, DIETARY BEHAVIOR AND COUNSELING, 4 Credits
Strategies for navigating dietary behavior using collaborative, patient centered, goal-oriented approaches. Introduces the theoretical framework around dietary behavior and motivational interviewing with methods regarding the language of change and creating client/patient interest in change. Guided practice and focus on development of skills.

NUTR 559, SPECIAL TOPICS IN NUTRITION, 1-16 Credits
Current issues, trends, and topics in nutrition and health. May be repeated for credit when topic varies.
Equivalent to: NFM 599
This course is repeatable for 16 credits.

NUTR 601, RESEARCH, 1-16 Credits
Equivalent to: NFM 601
This course is repeatable for 16 credits.

NUTR 602, INDEPENDENT STUDY, 1-16 Credits
Graded P/N.
Equivalent to: NFM 602
This course is repeatable for 16 credits.

NUTR 603, THESIS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 603
This course is repeatable for 999 credits.

NUTR 605, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: NFM 605
This course is repeatable for 16 credits.

NUTR 607, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: NFM 607
This course is repeatable for 16 credits.

NUTR 609, PRACTICUM, 1-16 Credits
Equivalent to: NFM 609
This course is repeatable for 16 credits.
NUTR 610, INTERNSHIP, 1-16 Credits
Graded P/N.
Equivalent to: NFM 610
This course is repeatable for 16 credits.

NUTR 617, ADVANCED MACRONUTRIENT METABOLISM, 3 Credits
Focuses on human macronutrient metabolism. Macronutrient topics include water, carbohydrate, lipid, amino acid/protein, lipid and carbohydrate and energy metabolism. Emphasis is placed on the integration of metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to macronutrient metabolism and human disease. Offered every even years in spring term.
Equivalent to: NFM 617
Recommended: NUTR 418 or NUTR 518

NUTR 618, ADVANCED MICRONUTRIENT METABOLISM, 3 Credits
Focus is on human micronutrient metabolism. Topics include micronutrients (vitamins and minerals), phytochemicals and mammalian metabolism. Emphasis will be placed on the integration of micronutrient/phytochemical metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to micronutrient/phytochemical metabolism and human disease.
Equivalent to: NFM 618
Recommended: NUTR 418 or NUTR 518 and basic knowledge of biochemistry and physiology

NUTR 699, SPECIAL TOPICS IN NUTRITION RESEARCH, 1-16 Credits
Current issues, trends, and topics in nutrition research. May be repeated for credit when topic varies.
Equivalent to: NFM 699
This course is repeatable for 16 credits.

Physical Activity Courses (PAC)
PAC 100, ADAPTED PHYSICAL ACTIVITY, 1 Credit
Individual workout for students with permanent or temporary physical disabilities and for students enrolled in another PAC who sustain an injury.
This course is repeatable for 11 credits.

PAC 102, AQUA AEROBICS, 1 Credit
Fitness class using a variety of movements in shallow and deep water, mostly in a vertical position. Do not need swimming skills.
Equivalent to: PAC 101
This course is repeatable for 11 credits.

PAC 103, DEEP WATER FITNESS, 1 Credit
Fitness class using a variety of movements in a deep water pool, mostly in a vertical position. Should be comfortable in deep water.
This course is repeatable for 11 credits.

PAC 104, ARCHERY, 1 Credit
Basic mechanics and introduction to archery. Exposure to varying archery techniques and equipment, including recurve and compound bow shooting.
This course is repeatable for 11 credits.

PAC 105, CPR/FIRST AID, 1 Credit
Introduces cardiac and first aid emergency response procedures. Emphasis placed on safe response, chain of survival, quality CPR (adults, children, infants and team responses), use of an AED, medical emergencies, injury emergencies and environmental emergencies. Students successfully completing the American Heart Association certification requirements will be issued a Heartsaver First Aid and BLS (Basic Life Support) for the Healthcare Provider certification at the end of the course.
This course is repeatable for 11 credits.

PAC 106, BEAVER FIT, 1 Credit
A conditioning class for those of all fitness levels that focuses on mobility, functional movement, and high-intensity interval training as a means to improve cardiovascular fitness, muscular fitness, and flexibility.
This course is repeatable for 11 credits.

PAC 108, STEP AEROBICS, 1 Credit
Low-impact, high intensity workout adjustable to all fitness levels utilizing adjustable height benches. Strengthening and flexibility exercises included.
This course is repeatable for 11 credits.

PAC 110, INTRODUCTION TO WHITE WATER KAYAKING, 2 Credits
Students will learn fundamentals of white water kayaking in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks.
This course is repeatable for 11 credits.

PAC 111, INTRODUCTION TO CANOEING, 2 Credits
Students will learn fundamentals of canoeing in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks.
This course is repeatable for 11 credits.

PAC 112, LEARNING KAYAK ROLLING BASICS, 2 Credits
Students learn fundamentals of rolling a kayak in an indoor pool-based environment. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course.
This course is repeatable for 10 credits.
PAC 113, BADMINTON I, 1 Credit
Singles and doubles skills, practice, rules, strategies and play.  
This course is repeatable for 11 credits.

PAC 114, BADMINTON II, 1 Credit
Intermediate skill development in badminton. 
This course is repeatable for 11 credits. 
Recommended: Fundamental skills, rules and strategy of singles and doubles play.

PAC 115, OUTDOOR LIVING SKILLS, 2 Credits
Educates and introduces students on how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. Classroom and field (lab) experience. Includes one mandatory weekend overnight outing. CROSSLISTED as PAC 115/TRAL 115.  
Equivalent to: TRAL 115 
This course is repeatable for 4 credits.

PAC 116, BASKETBALL I (MEN/WOMEN), 1 Credit
Fundamental basketball skills, drills, rules, strategies, and practice. Game play appropriate for the skill level.  
This course is repeatable for 11 credits.

PAC 117, BASKETBALL COMPETITIVE, 1 Credit
Team play, individual and team skills developed and refined, competitive round robin tournaments.  
This course is repeatable for 11 credits. 
Recommended: Prior competitive experience.

PAC 118, LABORATORY FOR OUTDOOR LIVING SKILLS, 1 Credit
Practical field application of concepts learned in PAC 115/TRAL 115, Outdoor Living Skills. Field (lab) experience includes one mandatory weekend overnight. Introduces how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. CROSSLISTED as PAC 118/TRAL 118.  
Corequisites: PAC 115 
Equivalent to: TRAL 118  
This course is repeatable for 2 credits.

PAC 120, MOUNTAIN BIKING, 1 Credit
Touring trails in Corvallis area; riding techniques, safety, maintenance, environmental concerns. Required equipment: mountain bike, tire repair kit, helmet.  
This course is repeatable for 11 credits.

PAC 121, BILLIARDS, 1 Credit
Skills, technique, strategy, game knowledge as introduction to billiards (pool), a 'cue' sport; rules and gaming for variations of pocket billiards; practice and class tournament play.  
This course is repeatable for 11 credits.

PAC 122, BODY SCULPTING, 1 Credit
Fitness workout set to music using lighter resistance training aids such as dumbbells, resistance tubing, bands, and aerobic steps.  
This course is repeatable for 11 credits.

PAC 123, BOWLING I, 1 Credit
Fundamentals of the game including etiquette, spot bowling, natural hook and straight ball delivery, scoring, handicap computation, spare pickup, and error correction. Additional fee; equipment supplied.  
This course is repeatable for 11 credits.

PAC 124, BOWLING II, 1 Credit
Review and refinement of basic fundamentals of bowling. Emphasis on spot bowling, adjusting for lane conditions, choices in equipment, league play, and mental training.  
This course is repeatable for 11 credits. 
Recommended: Bowling I or the ability to bowl above a 110 average

PAC 126, CARDIO KICKBOXING I, 1 Credit
High intensity group workout set to motivational music and combining skills and techniques from boxing, kickboxing, and other martial arts.  
This course is repeatable for 11 credits. 
Available via Ecampus

PAC 130, CONDITIONING, 1 Credit
Total body approach to fitness, cardiorespiratory conditioning, muscular strength and endurance; flexibility emphasized. May follow a specific training format, e.g., ROTC section follows Army conditioning format.  
This course is repeatable for 11 credits. 
Available via Ecampus

PAC 131, SNOWBOARD-SKI CONDITIONING, 1 Credit
Strength, muscular endurance, flexibility, balance, and cardiovascular exercises specific to downhill skiing and snowboarding; designed to help prepare students for participation in these sports.  
This course is repeatable for 11 credits.

PAC 133, DANCE: TAP I, 1 Credit
Individual and group dance with specialized shoes; basic step technique and vocabulary; warm up exercises progressing into rhythmic combinations performed to music; culminates in full routine to music.  
This course is repeatable for 11 credits.

PAC 136, DANCE: BALLET I, 1 Credit
Introduction to basic ballet technique and aesthetics, terminology, alignment, stretch and strength exercises. No previous dance experience needed. Additional fee for accompanist.  
This course is repeatable for 11 credits.
PAC 137, DANCE: BALLET II, 1 Credit
Review and practice of beginning ballet technique, introduction of more advanced stretches, steps, and combinations. Additional fee for accompanist.
This course is repeatable for 11 credits.
Recommended: Ballet I or previous ballet experience.

PAC 138, DANCE: BALLET III, 1 Credit
Intermediate and advanced ballet technique, comprehensive exploration of the discipline. Additional fee for accompanist.
This course is repeatable for 11 credits.
Recommended: Ballet II, previous comparable experience

PAC 139, HIP HOP DANCE, 1 Credit
Aerobic/energetic experience consisting of a warm-up/conditioning and choreographic combinations.
This course is repeatable for 11 credits.

PAC 140, DANCE: JAZZ I, 1 Credit
Introduction to jazz dance, technique, isolations, and combinations. Different jazz styles are explored. No previous dance experience is necessary.
This course is repeatable for 11 credits.

PAC 141, DANCE: JAZZ II, 1 Credit
Intermediate jazz technique, isolations and combinations.
This course is repeatable for 11 credits.
Recommended: Jazz I or comparable experience.

PAC 145, DANCE: MODERN I, 1 Credit
Introduction to modern dance movement fundamentals. Technique, stretch, strength, and alignment are included, as well as an appreciation for movement expression. No previous dance experience needed.
Additional fee for accompanist.
Equivalent to: PAC 145H
This course is repeatable for 11 credits.

PAC 145H, DANCE: MODERN I, 1 Credit
Introduction to modern dance movement fundamentals. Technique, stretch, strength, and alignment are included, as well as an appreciation for movement expression. No previous dance experience needed.
Additional fee for accompanist.
Attributes: HNRS – Honors Course Designator
Equivalent to: PAC 145
This course is repeatable for 11 credits.

PAC 146, DANCE: MODERN II, 1 Credit
An intermediate level of modern dance technique and movement expression. Additional fee for accompanist.
This course is repeatable for 11 credits.
Recommended: Modern Dance I or comparable experience.

PAC 148, DANCE: CUBAN SALSA I (LEAD/FOLLOW), 1 Credit
Foundations of Cuban Salsa (Casino) as well as Rueda de Casino with focus on musical development and fundamentals of leading and following in partner dance.
This course is repeatable for 11 credits.

PAC 149, DANCE: CUBAN SALSA II, 1 Credit
Higher concepts of Cuban Salsa (Casino) as well as Rueda de Casino, with focus on musical development and fundamentals of leading and following in partner dance.
This course is repeatable for 11 credits.
Recommended: Cuban Salsa I or comparable experience.

PAC 151, COUNTRY LINE DANCE, 1 Credit
Non-partner dance routines in country western style; musical interpretation, footwork, and sequencing of 20 different routines.
This course is repeatable for 11 credits.

PAC 152, DANCE: SALSA I, 1 Credit
Steps and rhythmic accent of Salsa and Merengue style; fundamentals of leading and following; basic moves and combinations. No prior experience needed.
This course is repeatable for 11 credits.

PAC 153, DANCE: SALSA II, 1 Credit
Intermediate moves, rhythmic accents and step combinations of Salsa; development of leading and following.
Prerequisite: PAC 152 with C- or better
This course is repeatable for 11 credits.

PAC 154, DANCE: COUNTRY WESTERN I (LEAD/FOLLOW), 1 Credit
Focus on traditional Country Western Swing patterns. Emphasizes fundamentals of leading and following. Also including introduction to waltz, two-step, cowboy cha-cha and 10-step polka.
Equivalent to: PAC 144
This course is repeatable for 11 credits.

PAC 155, DANCE: COUNTRY WESTERN II (LEAD/FOLLOW), 1 Credit
Build on CW I with advanced waltz, two-step, and cha-cha patterns; introduces schottishe and East Coast swing.
This course is repeatable for 11 credits.
Recommended: Country Western I or comparable experience

PAC 156, DANCE: COUNTRY WESTERN III (LEAD/FOLLOW), 1 Credit
Advanced two-step patterns and styling with a focus on musical interpretation; development of leading and following.
Prerequisite: PAC 155 with C- or better
This course is repeatable for 11 credits.

PAC 158, DANCE: BEGINNING SWING (LEAD/FOLLOW), 1 Credit
Introduction to single time, double time, and triple time (jitterbug) swing; variations for each style, covering most swing music rhythms. Emphasizes fundamentals of leading and following.
This course is repeatable for 11 credits.
PAC 159, DANCE: BALLROOM I (LEAD/FOLLOW), 1 Credit
Posture and alignment, fundamentals of leading and following, basic steps and variations for waltz, foxtrot, swing, tango, and cha-cha.
Equivalent to: PAC 134
This course is repeatable for 11 credits.

PAC 160, DANCE: BALLROOM II (LEAD/FOLLOW), 1 Credit
Additional steps and patterns of popular ballroom dances.
Prerequisite: PAC 159 with C- or better
Equivalent to: PAC 135
This course is repeatable for 11 credits.

PAC 161, DANCE: BALLROOM III (LEAD/FOLLOW), 1 Credit
Styling; additional dances: rhumba, silver fox trot, and Viennese waltz; advanced dance figures for tango and cha-cha.
Prerequisite: PAC 160 with C- or better
This course is repeatable for 11 credits.

PAC 163, DANCE: LATIN I, 1 Credit
Latin dances including cha-cha, mambo, salsa, rhumba, merengue, bolero, salsa, and paso doble. Emphasis on proper styling and technical execution of each dance; effective leading and following techniques.
Prerequisite: PAC 159 with C- or better
This course is repeatable for 11 credits.

PAC 165, DANCE: WEST COAST SWING (LEAD/FOLLOW), 1 Credit
Focus on style, technique and many different step patterns of the west coast swing dance.
Prerequisite: PAC 154 with C- or better or PAC 159 with C- or better
Equivalent to: PAC 162
This course is repeatable for 11 credits.

PAC 166, BALLROOM 2 STEP, HUSTLE (LEAD/FOLLOW), 1 Credit
Smooth, romantic social dance that is neither ballroom, Latin, nor swing but a rhythm dance identified as club-style, danced to contemporary ballad-like music. Hustle is fast-paced, swing-related dance to disco beat. Class encompasses intermediate step patterns, technique and styling, stationary, traveling patterns.
Prerequisite: PAC 160 with C- or better
This course is repeatable for 11 credits.

PAC 167, DANCE: LINDY HOP, 1 Credit
Ballroom dance style based on original eight-count swing dance evolved in Harlem ballrooms during the late 1920s; styling emphasized.
Prerequisite: PAC 158 with C- or better or PAC 159 with C- or better
This course is repeatable for 11 credits.

PAC 168, DANCE: LINDY HOP II (LEAD/FOLLOW), 1 Credit
Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation in the Lindy Hop style; development of leading and following.
Prerequisite: PAC 167 with C- or better
This course is repeatable for 11 credits.

PAC 169, COOL SHOES, BALLROOM PERFORMANCE, 2 Credits
Learn and perform ballroom dance routines on an intermediate level. This course is a full year commitment ending with a dance concert in the spring.
This course is repeatable for 12 credits.

PAC 170, DANCE: WEST COAST SWING II (LEAD/FOLLOW), 1 Credit
Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation; development of leading and following.
Prerequisite: PAC 165 with C- or better
This course is repeatable for 11 credits.

PAC 173, INTERMEDIATE ROCK CLIMBING, 2 Credits
Introduces variety of basic skills, gear and systems that will allow them to safely participate in a single pitch rock climbing environment based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Presents students with various technical skills that will serve as a foundation for future land-based outdoor disciplines. Students will be introduced to gear, such as software (ropes, webbing, harnesses) and hardware (carabiners, friction devices); skills, such as knots, belaying, rappelling, lead climbing; and systems such as anchors and basic rescue techniques. CROSSLISTED as PAC 173/TRAL 173.
Equivalent to: TRAL 173
This course is repeatable for 10 credits.

PAC 174, FLAG FOOTBALL, 1 Credit
Skill instruction and practice; drills; strategies, game play of American football; emphasis on teamwork and sportsmanship in a competitive but non-threatening or stressful environment.
This course is repeatable for 11 credits.

PAC 178, FLY FISHING I, 1 Credit
Casting and fishing techniques, lure making, equipment selection, terminology, and regulation for fishing in Oregon’s marine environment.
This course is repeatable for 11 credits.

PAC 179, FLY FISHING II, 1 Credit
Advanced fly casting and fly fishing techniques for trout, fly-tying, equipment selection, basic aquatic organism identification, terminology, and regulations for fishing in Oregon’s freshwater environment.
This course is repeatable for 11 credits.

PAC 180, STEELHEAD FISHING, 1 Credit
Casting and fishing techniques, lure making, equipment selection, terminology, and regulations for fishing in Oregon’s marine environment for steelhead.
This course is repeatable for 11 credits.
PAC 182, DISC GOLF I, 1 Credit
Techniques for throwing discs; equipment, knowledge, etiquette, and rules associated with playing a disc golf course; experience playing practice and official disc golf courses. 
This course is repeatable for 11 credits.

PAC 184, GOLF I, 1 Credit
Basic fundamental principles in all phases of golf; rules, terminology, etiquette, safety and scoring. Equipment provided. 
This course is repeatable for 11 credits.

PAC 185, GOLF II, 1 Credit
Individual practice and course play; skill refinement as continuation of Golf I. Equipment available. Course play expected, additional fee. 
This course is repeatable for 11 credits.
Recommended: Golf I

PAC 186, GOLF III, 1 Credit
Advanced skills, knowledge involved in competitive play. Course play expected, additional fee. 
This course is repeatable for 11 credits.
Recommended: Handicap below 15 or Golf II; competitive play.

PAC 188, GYMNASTICS, 1 Credit
Fundamental techniques on vault, bars, beam, and floor. 
This course is repeatable for 11 credits.

PAC 189, GYMNASTICS II, 1 Credit
Build upon previous gymnastics experiences or classes; floor exercise, uneven parallel bars, vault, mini-trampoline and beam apparatus are available. 
This course is repeatable for 11 credits.
Recommended: Gymnastics I or competitive experience.

PAC 190, KARATE, 1 Credit
Instruction in traditional Japanese karate basic striking and blocking techniques, kata (forms), philosophy, conditioning, and etiquette. Self-defense applications are also emphasized. 
Equivalent to: PAC 183
This course is repeatable for 11 credits.

PAC 191, BRAZILIAN JIU-JITSU, 1 Credit
Basic level grappling self-defense techniques and applying them in sparring sessions along with understanding the core principles which make this martial arts system effective. An introduction to the history of Brazilian Jiu-jitsu along with proper gym etiquette, vocabulary, and culture. 
This course is repeatable for 11 credits.

PAC 192, JUDO I, 1 Credit
Skill instruction in landing, throwing, pins, chokes in Kodokan Judo style; principles of Seiryoku-Zenyou and Jita-Kyouei designed to help individuals become better members of society through training body and mind; instruction for competition knowledge and skills. Judo etiquette for practice and competition expected. 
This course is repeatable for 11 credits.
Recommended: Judo I or comparable experience

PAC 193, JUDO II, 1 Credit
Intermediate skill instruction in landing, throwing, pins, chokes in Kodokan Judo style; principles of Seiryoku-Zenyou and Jita-Kyouei designed to help individuals become better members of society through training body and mind; instruction for competition knowledge and skills. Judo etiquette for practice and competition expected. 
This course is repeatable for 11 credits.

PAC 194, PILATES, 1 Credit
Non-impact, invigorating approach to physical conditioning and mind/body awareness; helps develop core body strength, improve posture and balance, and increase muscle endurance, tone, flexibility. 
This course is repeatable for 11 credits.
Available via Ecampus

PAC 195, PILATES II, 1 Credit
Progression of Joseph Pilates mat exercises; emphasis on intermediate and advanced levels; application of Pilates’ principles to new exercises; use of props; application of principles to daily living. 
This course is repeatable for 11 credits.
Recommended: PAC 194, Pilates.

PAC 197, PICKLEBALL, 1 Credit
Fast-paced, self-officiated net game with similarities to tennis, badminton, table tennis, and racquetball. Course covers rules, strategies, technique, preparation for play, and includes extensive active practice and play; played with two, three, or four people. 
This course is repeatable for 11 credits.

PAC 199, SPECIAL TOPICS, 1-3 Credits
Experimental or new classes. 
This course is repeatable for 11 credits.

PAC 201, RELAXATION, 1 Credit
Introduction to techniques that promote relaxation of the nervous system. These may include, but are not limited to: meditation, imagery, yoga postures, and self-massage. Students will be encouraged to reflect on how life choices influence their nervous system. 
This course is repeatable for 11 credits.
Available via Ecampus

PAC 202, MEDITATION, 1 Credit
Examine the application of building simple awareness, how to manage thoughts in productive and compassionate ways, and how to transfer these skills into healthy relationships. Explore strategies for managing mental and physical difficulties including anxiety, pain, and overall stress through experiential learning and personal sharing of experiences. 
This course is repeatable for 11 credits.

PAC 203, OBSERVATION & ASSISTANT INSTRUCTIONAL PRACTICE IN PHYS ACT, 1 Credit
Observe and begin physical activity instruction within dance, yoga, sports, fitness, aquatics, martial arts, or cross-disciplinary physical activities. Used in several of the leadership training program curriculums. 
This course is repeatable for 11 credits.
PAC 204, LEAD INSTRUCTIONAL PRACTICE IN PHYSICAL ACTIVITY, 1 Credit
Lead physical activity curriculum within dance, yoga, fitness, aquatics, sports, martial arts, or cross-disciplinary physical activities. Gain experience implementing already designed lesson plans, assessment, and leading peers through basic exercise, while supervised by university and program personnel.
Prerequisite: PAC 203 with C- or better
This course is repeatable for 11 credits.

PAC 205, ROWING, CREW I (MEN/ WOMEN), 1 Credit
Introduction to the sport of rowing; designed for the novice (beginner). Includes basic technique and terminology, related water safety, and development of strength, endurance, and flexibility.
This course is repeatable for 11 credits.
Recommended: Swim Test (1).

PAC 208, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

PAC 212, RUNNING, JOGGING, 1 Credit
Cardiorespiratory fitness with scenic running routes; training, nutrition, and physiology. Beginning and intermediate level.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 213, RUNNING: 10K TRAINING, 1 Credit
Intermediate to advanced conditioning and training program for road racing.
This course is repeatable for 11 credits.
Recommended: Prior training in running.

PAC 214, HALF MARATHON TRAINING, 2 Credits
Progressive training combining walking, running, core strengthening, interval techniques in preparation for a 13.1 mile (1/2 marathon) event. Open to all levels; may choose to walk, walk/run, or run.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 215, RUGBY, TOUCH, 1 Credit
Basic skills of open field rugby; emphasis on ball handling and attacking strategy; rules and history; game play.
This course is repeatable for 11 credits.

PAC 217, SELF DEFENSE, 1 Credit
Nonviolent self-defense. Develop self-confidence and skills for assault situations. Conditioning and practical skills. Men and women, all levels.
This course is repeatable for 11 credits.

PAC 224, TELEMARK SKIING, 1 Credit
Winter sport that is a cross between cross country and downhill skiing. Requires telemark equipment where the heel is unattached. Class accommodates all levels and practices on the downhill slopes. Additional fee covers bus transportation, lessons, and lift ticket. Rental of equipment is not included.
This course is repeatable for 11 credits.

PAC 225, DOWNHILL SKIING, 1 Credit
Travel to area facilities, 1-1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced, racer. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals.
This course is repeatable for 11 credits.

PAC 227, SNOWBOARDING, 1 Credit
Travel to area facilities, 1 1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals.
This course is repeatable for 11 credits.

PAC 229, SOCCER I, 1 Credit
Basic skills of controlling the ball; conditioning; lead-up games; team play.
Equivalent to: PAC 211
This course is repeatable for 11 credits.

PAC 230, SOCCER II, 1 Credit
Review of basic skills of offense and defense in controlled game play; concepts of team position and play, pressure and attack.
This course is repeatable for 11 credits.
Recommended: Previous soccer experience.

PAC 231, SOCCER III, 1 Credit
High level soccer skills; team play and transition concepts; set plays and alignments for both offense and defense.
This course is repeatable for 11 credits.
Recommended: Soccer II or competitive playing experience.

PAC 233, SOCCER: INDOOR, 1 Credit
Skill instruction and development; strategies and rules for indoor play; game play in indoor gymnasium.
This course is repeatable for 11 credits.

PAC 236, SOFTBALL, WHIFFLEBALL, 1 Credit
Skills, rules, strategies, practice, and game play of the popular outdoor slow pitch game. Modified softball with whiffleball when play is indoors.
This course is repeatable for 11 credits.

PAC 242, SCUBA: OPEN WATER, 2 Credits
Lecture includes physiology, water environment, equipment, and techniques for fundamental SCUBA diving. Laboratory includes practice in techniques, skills, and equipment usage, sessions held in pool and open water. Successful completion leads to PADI certification. Additional fee covers most equipment, texts, certification, and open water dive trip.
This course is repeatable for 11 credits.
Recommended: 200-yard swim, 10-minute survival skills and good health
PAC 243, SCUBA: ADVANCED OPEN WATER, 1 Credit
Classroom lecture and laboratory in hypothermics, natural navigation, dive physiology, compass navigation, night and limited visibility procedures, boat diving, search and salvage techniques, deep diving procedures, health for diving, and an introduction to dive rescue. Successful completion of this course can lead to PADI certification. Additional fee.
Equivalent to: PAC 228
This course is repeatable for 11 credits.
Recommended: PAC 242 or PADI Open Water Certification

PAC 244, SCUBA: RESCUE DIVER, 1 Credit
Techniques, skills, knowledge, and practice in self-rescue and rescue of others in underwater emergencies; may lead to PADI certification; lecture and pool laboratory; open water dive required. Additional fee.
This course is repeatable for 11 credits.
Recommended: PAC 243 or PADI Advanced Open Water Certification

PAC 245, SCUBA SPECIAL TOPICS, 1 Credit
Specialized courses requiring previous certification in SCUBA. Check the current schedule of classes for more information and prerequisites. Possible classes: altitude diver, night diver, search and recovery, deep diver, underwater navigation, equipment specialist. Additional fee.
This course is repeatable for 11 credits.
Recommended: PAC 242 or PADI Open Water Certification

PAC 246, DIVE MASTER TRAINING, 2 Credits
Entry level PADI certification course for preparation to instruct SCUBA; lecture, lab, open water experience; must take two consecutive terms.
This course is repeatable for 11 credits.
Recommended: PAC 244. PADI Advanced, Advanced Plus, Rescue Diver certifications and 20 logged dives

PAC 247, SURFING, 1 Credit
Knowledge and fundamental skills of this aquatic sport including history, terminology, safety precautions, the ocean environment, and equipment. Additional fee.
This course is repeatable for 11 credits.

PAC 248, SWIM: NON-SWIMMER, 1 Credit
Skills for self-rescue; fundamental skills in swimming and safety. Designed for people with a fear of water. Recommended S/U grading.
Equivalent to: PAC 219
This course is repeatable for 11 credits.

PAC 249, LIFEGUARD TRAINING, 1 Credit
Trains participants in the skills required to become a lifeguard. Emphasis on professional behavior, water rescues, safe response, quality CPR (adults, children, infants, and team responses), use of an AED and first aid. Students successfully completing the American Red Cross certification requirements will be issued a lifeguarding certification at the end of the course.
This course is repeatable for 11 credits.
Recommended: Basic swimming skills

PAC 250, SWIM I, 1 Credit
Swimming concepts, survival and breathing techniques, front crawl and elementary backstroke as minimum instruction.
This course is repeatable for 11 credits.
Recommended: Basic swimming skills: float, tread water, bobbing

PAC 252, SWIM II, 1 Credit
Fitness swimming, swimming strokes and skills.
Equivalent to: PAC 221
This course is repeatable for 11 credits.
Recommended: Swim I or the ability to front crawl continuously for 75 yards

PAC 253, SWIM TRAINING WORKOUT, 1 Credit
Competitive skills and strokes; emphasis on training.
This course is repeatable for 11 credits.
Recommended: Ability to do interval training.

PAC 254, COMPETITIVE SWIMMING, 1 Credit
Prepares students for competitive swimming and emphasizes lifetime aquatic fitness; interval swim workouts designed for speed and endurance; instruction on legal techniques of strokes and turns; culminates in intra-class swim meet; 2,000-3,000 yards/day.
This course is repeatable for 11 credits.
Recommended: Swim II or previous interval training experience up to 400 yard distances

PAC 256, TAIJI, TAI CHI I, 1 Credit
Introduction to ancient Chinese ‘internal martial art’ based upon concepts of Yin and Yang; detailed slow and relaxed form movements provide benefits to body, mind, and spirit.
This course is repeatable for 11 credits.

PAC 257, TAIJI, TAI CHI II, 1 Credit
Continuation of study of the Yang-style Taiji form; more in-depth exploration of underlying principles and push-hands exercises.
This course is repeatable for 11 credits.

PAC 260, TENNIS I, 1 Credit
Introduction to fundamental strokes, singles and doubles play, scoring, and basic concepts in tennis.
Equivalent to: PAC 234
This course is repeatable for 11 credits.

PAC 261, TENNIS II, 1 Credit
Review and refinement of fundamental strokes; volley, lob, return of serve; introduction to singles and doubles strategy.
Equivalent to: PAC 235
This course is repeatable for 11 credits.
Recommended: Tennis I or competitive tennis experience

PAC 262, TENNIS III, 1 Credit
Focus on ground stroke, serve consistency; approach shots and overheads; tactics for net and baseline play.
This course is repeatable for 11 credits.
Recommended: Tennis II
PAC 265, TUMBLING I, 1 Credit
Technical instruction, progressions, and practice in basic, intermediate, and advanced tumbling skills; emphasis on safety and fitness concepts; floor and mini-trampoline skills; no apparatus instruction. This course is repeatable for 11 credits.

PAC 266, TUMBLING II, 1 Credit
Technical instruction, progressions, safety, and practice building upon skills taught in PAC 265, Tumbling I. Recommended: Tumbling I or prior experience.

PAC 268, TRIATHLON TRAINING, 2 Credits
Training in swimming, running, and bicycling to prepare for triathlon participation. Strategies, transitioning technique, and weight training information; training plan formation; event planning; culminates in class or community event. This course is repeatable for 11 credits.

PAC 271, ULTIMATE FRISBEE, 1 Credit
Fundamentals for the beginning and intermediate player; individual skill development, rules, game play, and strategy. This course is repeatable for 11 credits.

PAC 273, VOLLEYBALL I, 1 Credit
Fundamental volleyball skills, drills, rules, strategies, and practice. Game play appropriate for skill level. This course is repeatable for 11 credits.

PAC 274, VOLLEYBALL II, 1 Credit
Fundamental skills and knowledge refined; intermediate skills developed, competitive play. Recommended: Volleyball I and good fundamental skills.

PAC 275, VOLLEYBALL III, 1 Credit
Skill refinement and development; intense, highly competitive drills and game situations, doubles through sixes play. Recommended: Volleyball II or varsity-level experience.

PAC 278, FITNESS WALKING, 1 Credit
Establishment of personal fitness programs through walking with emphasis on technique and aerobic components. This course is repeatable for 11 credits.

PAC 282, WATER POLO, 1 Credit
Team game, played in deep water; instruction in skills, drills, strategies, techniques; game play; knowledge of rules and terminology. Recommended: Swim I skills.

PAC 285, WATER POLO II, 1 Credit
Advanced level of training in water polo; instruction in advanced skills, techniques; competitive play. Recommended: Water Polo I or varsity-level experience.

PAC 286, WEIGHT TRAINING: CIRCUITS, 1 Credit
Fast-paced fitness class using stations of resistance training exercises. Designed to improve cardiovascular fitness and muscular endurance more than strength. This course is repeatable for 11 credits.

PAC 287, WEIGHT TRAINING I, 1 Credit
Exercise techniques in both free and fixed resistance training equipment; safety procedures, terminology, and principles of exercise. This course is repeatable for 11 credits.

PAC 288, WEIGHT TRAINING II, 1 Credit
Intermediate level of weight training in free and fixed weights. Prerequisite: PAC 287 with C+ or better. This course is repeatable for 11 credits.

PAC 292, WRESTLING, 1 Credit
Collegiate wrestling fall and winter terms; freestyle and Greco wrestling spring term. All levels. Recommended: Wrestling I or varsity-level experience.

PAC 293, INTERDISCIPLINARY YOGA, 1 Credit
Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement. Equivalent to: PAC 293H. This course is repeatable for 11 credits.

PAC 293H, INTERDISCIPLINARY YOGA, 1 Credit
Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement. Attributes: HNRS – Honors Course Designator. Equivalent to: PAC 293. This course is repeatable for 11 credits.

PAC 294, YOGA I, 1 Credit
Principles and practice of basic yoga postures, techniques of posture alignment, yogi breathing styles and their impact on the body and mind. Students will be exposed to a variety of forms of yoga, as well as basic yoga philosophy. This course is repeatable for 11 credits. Available via Ecampus.

PAC 295, YOGA II, 1 Credit
Building off Yoga I, this is an intermediate level course meant to develop a deeper understanding of yoga practice. Equivalent to: PAC 256. This course is repeatable for 11 credits. Recommended: Yoga I or previous yoga experience. Available via Ecampus.

PAC 296, VINYASA YOGA, 1 Credit
Dynamic flow that connects movement and breath encouraging meditation in motion. May include sustained yoga postures. Equivalent to: PAC 257. This course is repeatable for 11 credits. Recommended: Yoga I or previous yoga experience.
PAC 297, YOGATHON, 1 Credit
Expands on knowledge and skills learned in Yoga I or Fitness Yoga through three to five class sessions, each 3-6 hours; longer sessions provide students with an intensive mental and physical experience centering on the concepts of yoga; includes introductory relaxation and meditation skills.
This course is repeatable for 11 credits.
Recommended: PAC 294 and PAC 295 and PAC 296 and (Yoga I or Fitness Yoga)

PAC 298, RESTORATIVE YOGA, 1 Credit
An emphasis on floor postures, supported postures, and longer holds that cultivate a relationship with ease. Techniques will be used to help students facilitate greater personal awareness. Students will use self reflection practices for personal well-being.
This course is repeatable for 11 credits.

PAC 299, SPECIAL TOPICS, 1-3 Credits
Advanced information, skills, practice, and application; experimental and new classes. May have additional fee.
This course is repeatable for 11 credits.
Recommended: Intermediate to advanced skills in an activity area

PAC 300, ALI: HIKING LOCAL TRAILS, 1 Credit
Covers the fundamentals of hiking as a recreational activity and an outdoor travel skill. Content will cover local trails, place history, hiking techniques, clothing and equipment selection, elemental first aid and safety concerns, leave-no-trace principles, and map basics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 301, ALI: CHALLENGE COURSE EXPERIENCE, 1 Credit
Emphasis on gaining practical experience and understanding of various components that occur in challenge course activities/programs; group dynamic mental and physical challenges; cooperative games and initiatives that promote communication, problem solving skills and leadership; Low and High challenge course activities that promote self-confidence and agility. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 302, ALI: CHALLENGE COURSE PRACTICES AND FACILITATION, 1 Credit
Covers the set up and facilitation of various challenge course low and high course elements as they pertain to ALI’s Challenge Course programming. Students will learn facilitation skills, risk management concepts, operational procedures, and technical rescue skills. A passing grade in this course will result in a certificate of completion from the OSU ALI Challenge Course. PAC courses may not be used to fulfill upper-division requirements.
Prerequisite: PAC 301 with C- or better
This course is repeatable for 11 credits.
Recommended: Climbing wall instructor, efficient climbers toolbox, self-rescue

PAC 303, ALI: CAMP CRAFT, 1 Credit
Provides basic front-country camping skills such as packing, trip planning, how to dress for different climates/weather, storm-proofing, knife and axe techniques and safety, stove and kitchen operations, and fire building. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 304, ALI: BACKPACKING, 1 Credit
Hiking and camping while carrying all gear; tent set-up, camp site selection, operation of single-burner stoves, loading a backpack, water infiltration, navigation, proper hiking technique, energy conservation; leave-no-trace principles in every aspect of the trip and class; includes classroom instruction and required overnight trip. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 307, ALI: RAFTING, 1 Credit
An introduction to white water rafting. Students will learn the fundamentals of safe rafting, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 308, ALI: CANOEING, 1 Credit
Designed as an introduction to canoeing. Students learn the fundamentals of safe canoeing, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 309, ALI: KAYAKING I, 1 Credit
Focuses on developing technical kayaking skills in flat water and moving water up to Class I. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 311, ALI: STAND UP PADDLEBOARD, 1 Credit
Covers the curriculum for level 1 and 2 American Canoe Association standup paddle board skill courses. Skills include equipment, environmental factors, techniques, preparation and planning, emergency management, and environmental ethics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 313, ALI: CANYONEERING, 1 Credit
Students will learn the fundamentals of canyoneering, including efficient hiking techniques, safe anchoring, belaying and rappelling techniques, and environmental mitigation skills. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 314, ALI: BOULDERING, 1 Credit
Introduction to the sport of bouldering, a subset of rock climbing using an indoor climbing facility; emphasis on safety, spotting, climbing movement, training techniques and improvement; provides activities that promote muscular strength and endurance, flexibility, and cardiovascular endurance. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.
PAC 315, ALI: ROCK CLIMBING I, 1 Credit
Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at on-campus indoor climbing center. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

PAC 316, ALI: ROCK CLIMBING II, 1 Credit
Focuses on developing technical climbing skills related to lead climbing and anchor construction. Includes a one-day outdoor experience. PAC courses may not be used to fulfill upper-division requirements.  
**Prerequisite:** PAC 315 with C- or better
*This course is repeatable for 11 credits.*

PAC 317, ALI: ROCK CLIMBING III, 1 Credit
Focuses on developing technical climbing skills in an outdoor setting. Includes a weekend long outdoor experience and cover skills ranging from building anchors using natural protection, to advanced outdoor movement skills. PAC courses may not be used to fulfill upper-division requirements.  
**Prerequisite:** PAC 315 with C- or better and PAC 316 [C-]  
*This course is repeatable for 11 credits.*

**Recommended:** Intermediate to advanced skills in an activity area

PAC 319, ALI: TECHNICAL RAPPELLING, 1 Credit
Students will learn, practice and hone their skills in the art of technical rappelling. Introduces many different styles, techniques and equipment used for rappelling in a variety of situations. Throughout the course, students will be provided with simple to advanced challenges to overcome. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

PAC 320, ALI: MOUNTAINEERING I, 1 Credit
Snow climbing techniques, anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics; classroom instruction and required overnight alpine trip. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

PAC 321, ALI: MOUNTAINEERING II, 1 Credit
Building on skills learned in Mountaineering I; rope team/glacier travel experience, fundamentals of crevasse rescue, advanced snow climbing techniques, safe anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements.  
**Prerequisite:** PAC 320 with C- or better  
*This course is repeatable for 11 credits.*

PAC 322, ALI: ICE CLIMBING, 1 Credit
Students will learn the fundamentals of ice climbing, including efficient ice climbing techniques, safe anchoring, belaying and rappelling techniques and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

PAC 323, ALI: MOUNTAIN RESCUE BASICS, 1 Credit
Focuses on developing technical skills in a mountain rescue system. PAC courses may not be used to fulfill upper-division requirements.  
**Prerequisite:** PAC 320 with D- or better  
*This course is repeatable for 11 credits.*

PAC 324, ALI: WHITE WATER RESCUE, 1 Credit
Provides an introduction to white water rescue; students learn the fundamentals of white water rescue, scene management, and the necessary gear to perform rescues. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

PAC 325, ALI: WILDERNESS FIRST AID, 1 Credit
Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements.  
**Equivalent to:** PAC 325H  
*This course is repeatable for 11 credits.*

PAC 325H, ALI: WILDERNESS FIRST AID, 1 Credit
Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements.  
**Attributes:** HNRS – Honors Course Designator  
**Equivalent to:** PAC 325  
*This course is repeatable for 11 credits.*

PAC 326, ALI: BUSH CRAFT, 1 Credit
Basic wilderness living techniques, knowledge and skills needed for a student to be ethical and efficient, and have the ability to survive in the outdoors. Special emphasis is placed on building shelters, water purification, navigation, awareness, fire, self-sufficiency and caring for groups in the wilderness. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

PAC 327, ALI: ROCK GUIDE SCHOOL, 1 Credit
Serves as an opportunity to learn the skills for being a rock guide for the ALI. With five days of training and practice in the field at two climbing sites in Oregon, it serves to help students understand the unique challenges of instructing climbing in the outdoor environment. This course may end with Sport Climbing Instructor certification through the Professional Climbing Instructors of America. PAC courses may not be used to fulfill upper-division requirements.  
*This course is repeatable for 11 credits.*

**Recommended:** Efficient climbers toolbox, self-rescue, climbing wall instructor--lead certification
PAC 328, ALI: RAFT GUIDE SCHOOL, 1 Credit
Provides students the skills and guided practice time needed to become competent paddle raft guides. It is a nine-day course that focuses on the development of water reading, raft maneuvering, risk management, and whitewater rescue skills needed by raft guides. Successful completion of the course will result in a certificate of completion from the American Canoe Association (ACA). PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 329, ALI: WILDERNESS FIRST RESPONDER, 2 Credits
Fundamentals of emergency care in a non-urban environment, including physiology, injury assessment, short-term care, anatomy, and small-group rescues. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 330, ALI: SNOW TRAVEL AND CAMPING, 1 Credit
An introduction to traveling in the backcountry in adverse weather conditions that often accompany winter. Topics covered include cross country touring, snow shoeing, winter camping techniques, and winter safety considerations including introducing avalanche safety. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 332, ALI: AVALANCHE AWARENESS, 1 Credit
Focuses on what causes avalanches, how to safely travel in avalanche terrain, and resources to pursue in understanding the avalanche risk where you are traveling. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

Physical Therapy/Therapist (PT)

PT 700, PROFESSIONALISM AND INTERPROFESSIONAL PRACTICE, 2 Credits
Introduction to the role of the professional in physical therapy practice. Topics of application include communication, professional behavior and abilities, ethics, legal issues, and responsibility for professional development.

PT 711, ANALYTICAL ANATOMY AND IMAGING, 4 Credits
Detailed kinesiologic analysis of appendicular, spine, head, neck, and face muscles. Lecture, clinical demonstration, and practical experiences.

PT 712, NEUROANATOMY AND NEUROSCIENCE, 5 Credits
Organized approach to structures in the brain, spinal cord and peripheral nervous systems. Detailed analysis of Neurophysiologic mechanisms underlying normal and abnormal motor sensory function.

PT 713, MUSCULOSKELETAL ANATOMY, 6 Credits
Musculoskeletal anatomy, innervation, blood supply, and function: intensive study of the head, neck, trunk, and limbs.

PT 716, CULTURAL COMPETENCE IN PHYSICAL THERAPY, 2 Credits
An exploration of how cultural competence is a critical core component of professional practice in physical therapy and should be considered as a part of the best practice in providing physical therapy care.

PT 717, GERIATRICS IN PHYSICAL THERAPY, 2 Credits
An overview of the Physical and Psycho-Behavior aspects of aging in adulthood. An introduction to usual and pathological changes and treatment issues relevant to older patients.

PT 718, PSYCHOSOCIAL ASPECTS OF DISABILITY, 2 Credits
A study of behavior, social structures and beliefs, and interaction patterns to support the scientific basis of the effective interactions of physical therapists with patients.

PT 719, PHYSICAL THERAPY IN RURAL COMMUNITIES, 2 Credits
An overview of major issues in the rural health care system and the environment in which physical therapists, as rural health clinicians, must function. Provides students with an understanding of the healthcare delivery system in rural America with a concentration on the diverse populations of the Northwest region of the United States.

PT 720, MOTOR DEVELOPMENT, 3 Credits
Examination of normal development of gross motor, fine motor, language, cognition, psychosocial, and play skills across the lifespan from in utero to young adulthood.

PT 721, MOTOR CONTROL AND LEARNING ACROSS THE LIFE SPAN, 4 Credits
Introduction to sensorimotor systems, overview of current perspectives in motor control and learning from fetus through late adulthood, and clinical tests of motor proficiency.

PT 722, PREVENTION WELLNESS AND POPULATION HEALTH, 3 Credits
A study of the development of wellness plans for individuals or families in the community. Students will learn to assess family health care needs, seek out community resources, and educate community members on specific issues related to their own health and well-being.

PT 730, APPLIED PHYSIOLOGY, 3 Credits
Selected subjects in cellular and systems physiology. Emphasis on molecular and cellular aspects of neuromuscular function, also renal and endocrine physiology.
PT 731, CLINICAL EXERCISE PHYSIOLOGY, 4 Credits
Adaptation of the human body to exercise and the use of exercise to modify human function.

PT 740, THERAPEUTIC EXERCISE I, 3 Credits
Theoretical principles for evaluation of exercise need and prescription of exercise programs. Emphasis on approaches for patients with musculoskeletal deficits.

PT 741, THERAPEUTIC EXERCISE II, 3 Credits
Examination of needs analysis and prescription of exercise programs for special patient populations and assessment of current community trends in exercise and wellness.

PT 743, BUSINESS AND ADMINISTRATION IN PHYSICAL THERAPY, 3 Credits
Examination on the factors affecting patients entry into and progression through the healthcare system, including the effect of current financial, legal and regulatory policies that affect the patient, the patient/professional relationship, and the practice of physical therapy. Provides an overview of primary business disciplines including market research and strategy, marketing, finance, operations, and management.

PT 745, BASICS OF PATIENT MANAGEMENT, 1,6 Credit
Development of basic decision-making skills, professional behaviors and impairment assessment in patients with musculoskeletal, neurologic and/or cardiopulmonary dysfunction.
This course is repeatable for 6 credits.

PT 746, DISORDERS OF THE MUSCULOSKELETAL SYSTEM, 3 Credits
Regional description of pathology and pathophysiological mechanisms of disorders of bone, connective tissue, and joints.

PT 748, THERAPEUTIC MODALITIES, 3 Credits
An introduction to the management of pain and dysfunction using thermal, electrical and mechanical modalities used by Physical Therapists in general practice.

PT 750, CLINICAL BIOMECHANICS & GAIT, 5 Credits
Introduction to the principles of biomechanics as they apply to physical therapy practice. Emphasis on joint structure and function and tissue mechanics. Introduction to both normal and pathological gait including examination of joint kinematics, kinetics, and muscle activity.

PT 752, PROSTHETICS AND ORTHOTICS, 3 Credits
The examination of pathological gait of patients using prosthetic and orthotic devices. The course emphasizes types of orthotic and prosthetic devices, assessments, reassessment and corrections of gait deviations using therapeutic interventions geared toward functional interventions, patient/family education, exercises, and balance and coordination techniques.

PT 760, PHARMACOLOGY, 2 Credits
The study of prescription and/or over-the-counter medications used in the management of a variety of patient conditions encountered during physical therapy management.

PT 761, RESEARCH METHODS AND EVIDENCE BASED PRACTICE, 2 Credits
Introduction to evidence-based practice, scientific methods, and clinical research methodologies.

PT 780, DIFFERENTIAL DIAGNOSIS, 4 Credits
Consideration of principles of differential diagnosis with emphasis on mastering this skill.

PT 791, MANAGEMENT OF CARDIOPULMONARY DYSFUNCTION, 2 Credits
Physical therapy evaluation and intervention in the care of patients with circulatory, cardiac, or pulmonary dysfunction.

Public Health (H)
See also Health and Human Sciences (HHS) for additional Public Health courses.

H 100, INTRODUCTION TO PUBLIC HEALTH, 4 Credits
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Equivalent to: H 100H
Available via Ecampus

H 100H, INTRODUCTION TO PUBLIC HEALTH, 4 Credits
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 100

H 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.
**H 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits**
*This course is repeatable for 16 credits.*

**H 206, PROJECTS, 1-16 Credits**
*This course is repeatable for 16 credits.*
Available via Ecampus

**H 210, *INTRODUCTION TO THE HEALTH CARE SYSTEM, 3 Credits***
Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)
*Attributes: CPSI – Core, Pers, Soc Proc & Inst*  
Available via Ecampus

**H 220, INTRODUCTION TO HEALTH DATA ANALYSIS, 3 Credits**
Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems.  
*Recommended: MTH 105 or MTH 111 or higher mathematics.*
Available via Ecampus

**H 225, *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS, 4 Credits***
Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)
*Attributes: CPSI – Core, Pers, Soc Proc & Inst*  
Available via Ecampus

**H 250, INTRODUCTION TO HEALTH CARE MANAGEMENT, 3 Credits**
Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc.
*Prerequisite: H 210 (may be taken concurrently) with C- or better*  
Available via Ecampus

**H 309, PRACTICUM IN HEALTH CARE SERVICES, 3-6 Credits**
Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N.  
*This course is repeatable for 12 credits.*

**H 310, HEALTH FIELD EXPERIENCES, 3-6 Credits**
Introductory field experience in a health or health-related worksite.  
Graded P/N.  
*Prerequisite: H 210 with C- or better*  
*This course is repeatable for 12 credits.*  
Available via Ecampus

**H 312, HIV/AIDS AND STIS IN MODERN SOCIETY, 3 Credits**
Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases.  
Available via Ecampus

**H 319, INTRODUCTION TO HEALTH POLICY, 3 Credits**
Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative.  
*Prerequisite: H 210 with C- or better*  
Available via Ecampus

**H 320, INTRODUCTION TO HUMAN DISEASE, 3 Credits**
Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.  
Available via Ecampus

**H 333, *GLOBAL PUBLIC HEALTH, 3 Credits***
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
*Equivalent to: H 333H*  
Available via Ecampus

**H 333H, *GLOBAL PUBLIC HEALTH, 3 Credits***
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
*Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator*  
*Equivalent to: H 333*
H 344, *FOUNDATIONS OF ENVIRONMENTAL HEALTH, 3 Credits
Identifies environmentally-linked disease, population growth, and health concerns associated with toxic substances, food quality, air pollution, water pollution, noise, solid and hazardous waste, and pesticide use. Explores scientific topics related to environmental health in a global context that impact our collective environment. Compares and contrasts select environmental problems in the US to those that occur in the global community.
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

H 349, PEER HELPER SKILLS DEVELOPMENT, 3 Credits
Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

H 364, DRUGS, SOCIETY AND HUMAN BEHAVIOR, 3 Credits
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Prerequisite: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364H

H 364H, DRUGS, SOCIETY AND HUMAN BEHAVIOR, 3 Credits
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Attributes: HNRS – Honors Course Designator
Prerequisite: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364

H 376, EVIDENCE-BASED HEALTH PROMOTION, 3 Credits
Future health professionals will learn what makes a successful health promotion program. Students will learn about research-tested programs that are effective for promoting health in community, clinical, and educational settings. Students will begin to develop the skills needed to critically examine evidence in the field and select programs to address current public health issues.
Prerequisite: H 100 with C- or better and H 225 [C-]
Available via Ecampus

H 385, SAFETY AND HEALTH STANDARDS AND LAWS, 3 Credits
Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.
Available via Ecampus

H 388, *GLOBAL ENVIRONMENTAL HEALTH, 3 Credits
An overview of global environmental issues, including climate change, air pollution, water, e-waste, and metals, and their impacts on human health. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

H 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: H 399H
This course is repeatable for 16 credits.

H 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: H 399
This course is repeatable for 16 credits.

H 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

H 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

H 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 407, SEMINAR, 2 Credits
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Equivalent to: H 407H
Recommended: H 480 for students in EOH (Environmental and Occupational Health) minors. H 250 for students in the HMP (Health Management and Policy) option. H 225 and H 320 for students in the HPHB (Health Promotion and Health Behavior) option
Available via Ecampus
H 407H, SEMINAR, 2 Credits
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 407
Recommended: H 480 for students in EOH (Environmental and Occupational Health) minors. H 250 for students in the HMP (Health Management and Policy) option. H 225 and H 320 for students in the HPHB (Health Promotion and Health Behavior) option

H 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 409, PRACTICUM, 1-6 Credits
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for 16 credits.

H 410, INTERNSHIP, 1-12 Credits
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N.
Prerequisite: H 407 with C- or better
This course is repeatable for 24 credits.
Recommended: H 436 (for HMP students). H 225 and H 320 and H 476 (for HPHB students)

H 414, BE THE CHANGE FOR GLOBAL HEALTH TRANSFORMATION, 3 Credits
Learn how stigma and discrimination create differences in access to resources and lead to health injustice and disparities. Draw on social justice and community mobilization frameworks to explore health-related social movements and social change necessary to improve public health throughout the world. Contextualize local work to eliminate health disparities in the United States within a global context and as part of global processes. Learn how community mobilization can lead to the transformation of structures, systems, and ideologies that drive discrimination and health disparities.
Prerequisite: H 100 with C- or better

H 415, PEOPLE ON THE MOVE: MIGRATION AND GLOBAL HEALTH, 3 Credits
Overview of migration as an issue of global health importance; social determinants of migrant health and disparities; migrant health and sustainable development.
Prerequisite: H 100 with C- or better

H 416, GLOBAL POVERTY AND HEALTH DISPARITIES, 3 Credits
Learn why poverty remains a primary factor in poor health outcomes around the world, driving limited access to clean water and sanitation, healthful food, education, safety, basic rights, and health care. Examine global poverty, including the causes and consequences of global poverty and the ways in which social structures, identities, and policies shape wealth and health. Discuss global distribution of wealth, the wealth-health gradient and social determinants of health in a global context, causes and consequences of global poverty, and policy and programmatic intervention strategies aimed at reducing material hardship and global inequality.
Prerequisite: H 100 with C- or better

H 418, PUBLIC HEALTH ETHICS AND ISSUES, 3 Credits
Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology.

H 421, MENTAL HEALTH, 3 Credits
Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders.
Prerequisite: H 225 with C- or better and H 320 [C-]

H 422, HEALTH, AGING AND CONTROL OF CHRONIC DISEASES, 4 Credits
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.
Recommended: 9 credits of health course work.

H 425, FOUNDATIONS OF EPIDEMIOLOGY, 3 Credits
Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec.
Prerequisite: H 220 with C- or better or ST 201 with C- or better or ST 314 with C- or better or ST 351 with C- or better
Available via Ecampus

H 432, ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE, 3 Credits
Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Prerequisite: (ECON 201 with C- or better or ECON 201H with C- or better) and H 210 [C-]
Available via Ecampus
H 434, HEALTH CARE LAW AND REGULATION, 3 Credits
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: H 210 with C or better and H 250 [C-] and WR 222 [C-]
Available via Ecampus

H 436, ADVANCED TOPICS IN HEALTH CARE MANAGEMENT, 3 Credits
Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care.
Prerequisite: H 210 with C- or better and H 250 [C-]
Available via Ecampus

H 445, OCCUPATIONAL HEALTH, 3 Credits
Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

H 448, PUBLIC HEALTH TOXICOLOGY, 3 Credits
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health
Prerequisite: H 344 with C- or better
Recommended: One term of basic chemistry
Available via Ecampus

H 449, MASS MEDIA AND HEALTH, 3 Credits
Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns.
Prerequisite: H 225 with C- or better and H 320 [C-]

H 457, FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS, 3 Credits
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Prerequisite: H 210 with C- or better and H 250 [C-] and BA 315 [C-]
Available via Ecampus

H 458, REIMBURSEMENT MECHANISMS, 3 Credits
Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system.
Prerequisite: H 210 with C- or better
Available via Ecampus

H 461, SEXUALITY: A HEALTH SCIENCE PERSPECTIVE, 3 Credits
Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined.

H 465, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Recommended: 6 credits in public health.

H 468, FINANCING AND ADMINISTRATION OF LONG-TERM CARE, 3 Credits
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 474, PUBLIC HEALTH AND VIOLENCE IN SOCIETY, 3 Credits
Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476, PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS, 4 Credits
A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: H 225 with C- or better and H 320 [C-] and H 376 [C-]

H 477, DIETARY INTERVENTIONS FOR PUBLIC HEALTH, 3 Credits
A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators.
Prerequisite: NUTR 225 with C- or better
Equivalent to: NUTR 477
H 480, UNDERGRADUATE EOH SEMINAR, 1 Credit
Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion. Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N. 
This course is repeatable for 2 credits.
Available via Ecampus

H 489, EMERGENCY AND DISASTER MANAGEMENT, 3 Credits
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491, SELECTED TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Equivalent to: H 491H
This course is repeatable for 6 credits.

H 491H, SPECIAL TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 491
This course is repeatable for 6 credits.

H 494, APPLIED ERGONOMICS, 3 Credits
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 495, DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH, 3 Credits
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

H 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

H 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 507, SEMINAR, 1-16 Credits
Section 1. Internship (1). Graded P/N.
This course is repeatable for 16 credits.

H 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 509, PRACTICUM, 1-16 Credits
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. 
This course is repeatable for 16 credits.

H 510, INTERNSHIP, 1-16 Credits
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. 
This course is repeatable for 16 credits.

H 511, COMMUNITY, CULTURE, AND GLOBAL HEALTH, 3 Credits
Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.

H 512, INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES, 3 Credits
Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.
Available via Ecampus

H 513, INTEGRATED APPROACH TO PUBLIC HEALTH, 12 Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.

H 514, ENVIRONMENT, SAFETY AND HEALTH SEMINAR, 1 Credit
One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research.
This course is repeatable for 3 credits.

H 515, RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES, 3 Credits
Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.
H 516, RESEARCH METHODS IN GLOBAL HEALTH, 3 Credits
Overview of research methods used to understand health, illness, health care, and health-seeking behavior in international settings. Special emphasis on the use of qualitative and mixed methods in international health research.

H 518, PUBLIC HEALTH ETHICS AND ISSUES, 3 Credits
Explores key ethical issues in the context of public health practice; codes and guidelines for ethical conduct of public health practice; issues related to social accountability, vulnerable populations, and ethical framework for community engagement.

Available via Ecampus

H 519, DISPLACEMENT, MIGRATION, AND GLOBAL HEALTH, 3 Credits
Critical examination of health of displaced/migrant populations with an emphasis on health disparities and social determinants. Understanding intersections of humanitarianism, migration, vulnerability, and displacement from a global health perspective.

Available via Ecampus

H 520, HEALTH DISPARITIES, 3 Credits
Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.

Available via Ecampus

H 521, MENTAL HEALTH, 3 Credits
Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.

H 522, HEALTH, AGING AND CONTROL OF CHRONIC DISEASES, 4 Credits
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.

Recommended: 9 credits of public health course work.

H 523, FOUNDATIONS OF PUBLIC HEALTH, 4 Credits
Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health.

Available via Ecampus

H 524, INTRODUCTION TO BIOSTATISTICS, 4 Credits
Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.

Available via Ecampus

H 525, EPIDEMIOLOGICAL METHODS I, 3 Credits
Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.

Prerequisite: H 513 with B- or better or H 535 with B- or better

H 526, EPIDEMIOLOGIC METHODS II, 3 Credits
Concepts and methods of epidemiological analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research.

Prerequisite: H 524 with B- or better and H 525 [B-]

H 527, CRITICAL ASSESSMENT OF INTERNATIONAL HEALTH PROGRAMS, 3 Credits
Introduces the critical evaluation framework of assessing international health development programs, based on self-determination and community ownership principles. The framework of assessment method includes three levels: upstream evaluation, midstream evaluation, and downstream evaluation.

Recommended: H 528 and H 529

H 528, GLOBAL HEALTH ISSUES, 3 Credits
Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.

H 529, INTERNATIONAL HEALTH, 3 Credits
Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.

H 530, HEALTH POLICY ANALYSIS AND POLITICS, 3 Credits
Examination of current health policy issues affecting health care programs, services, and organization as well as the role of politics in public health and health policy. Exploration of processes by which health policy proposals are generated, promoted, defeated, modified and implemented.

Prerequisite: H 513 with B- or better or HHS 514 with B- or better

Available via Ecampus

H 532, ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE, 3 Credits
Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.

Recommended: ECON 201
H 533, HEALTH SYSTEMS ORGANIZATION, 3 Credits
Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.
Available via Ecampus

H 534, HEALTH CARE LAW AND REGULATION, 3 Credits
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

H 535, INTERPRETING EPIDEMIOLOGIC EVIDENCE, 3 Credits
Intended for students in the human sciences and allied health fields. Introduces basic epidemiology concepts. Topics will include measures of disease frequency, assessing population health, causal logic, quantifying associations between exposures and health outcomes, epidemiologic study design, and threats to study validity (random error, bias, confounding). Examples focus on application of epidemiological methods to a variety of health-related fields.

H 536, HEALTHCARE ORGANIZATION LEADERSHIP THEORY AND BEHAVIOR, 3 Credits
Overview of organization theory and behavior in health care organizations. Emphasis is on developing an understanding of the factors and forces that influence the structures, behaviors, and operations of health care delivery organizations. This understanding will be developed through consideration of organizations, their environments, and the roles of individuals working in management.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

H 537, INJURY EPIDEMIOLOGY, 3 Credits
An overview of the distribution and determinants of injuries, methodological issues specific to injury epidemiology, and approaches to injury control.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 513 with B- or better
Recommended: Graduate epidemiology training

H 538, PUBLIC AND PRIVATE HEALTH INSURANCE, 3 Credits
Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 540, WATER AND HUMAN HEALTH, 3 Credits
Critically examine the complex relationship between water quality, human activities, and population health.

H 541, AIR QUALITY AND HUMAN HEALTH, 3 Credits
Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 542, ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT, 3 Credits
Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.

H 543, EXPOSURE SCIENCE I, 4 Credits
Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.

H 544, ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY, 3 Credits
Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health.
Prerequisite: H 525 with C or better
Recommended: Graduate level statistics course

H 546, PHYSICAL AGENTS AND HUMAN HEALTH, 3 Credits
Focus on physical agents (heat, noise, vibration, radiation) and health risks associated with these agents. It covers the range and sources of exposure to physical agents, methods of characterizing these exposures, effects on human health, and the regulations/standards that set limits for physical agents. Lec/lab.

H 547, GIS AND PUBLIC HEALTH, 4 Credits
Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health who have no (or introductory level) knowledge of GIS. Lec/lab.

H 548, PUBLIC HEALTH TOXICOLOGY, 3 Credits
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.
Recommended: H 344 with a grade of C- or better and one term of basic chemistry.
Available via Ecampus
H 549, MASS MEDIA AND HEALTH, 3 Credits
Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
Prerequisite: H 571 with C or better

H 550, SOCIAL EPIDEMIOLOGY, 3 Credits
Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health.
Prerequisite: H 525 with B or better
Recommended: Introductory course in epidemiology

H 551, APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA, 3 Credits
Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results.
Prerequisite: H 526 with B- or better and H 560 [B-] and H 580 [B-]

H 552, DISASTER EPIDEMIOLOGY, 3 Credits
Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 554, EPIDEMIOLOGY OF AGING, 3 Credits
An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 555, CANCER EPIDEMIOLOGY, 3 Credits
Introduction to basic concepts and methodology in cancer epidemiology.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 556, STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS, 3 Credits
Theories and methodologies of long-range planning and strategic management in health care organizations.

H 557, FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS, 3 Credits
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Recommended: H 210 and H 250

H 558, REIMBURSEMENT MECHANISMS, 3 Credits
Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature.

H 560, PUBLIC HEALTH SURVEILLANCE, 3 Credits
An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis.
Prerequisite: H 524 with B- or better and H 525 [B-]

H 562, INFECTIOUS DISEASE EPIDEMIOLOGY, 3 Credits
Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or H 514 with B- or better

H 563, PHYSICAL ACTIVITY EPIDEMIOLOGY, 3 Credits
Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better
Recommended: H 524

H 564, COMPUTING TOOLS AND HEALTH DATA ANALYSIS, 3 Credits
Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed.
Corequisites: H 524

H 565, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.
Equivalent to: BA 565
Recommended: 6 credits in public health.
H 566, DATA MINING IN PUBLIC HEALTH, 3 Credits
An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health.

Recommended: H 581 and H 564

H 568, FINANCING AND ADMINISTRATION OF LONG-TERM CARE, 3 Credits
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 569, MATERNAL AND CHILD HEALTH, 3 Credits
Women’s reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 571, PRINCIPLES OF HEALTH BEHAVIOR, 3 Credits
Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

Available via Ecampus

H 572, COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION, 3 Credits
History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.

H 573, INTRODUCTION TO MULTILEVEL/HIERARCHICAL MODELS, 3 Credits
Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks.

Recommended: H 581

H 575, EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS, 3 Credits
Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program.

Prerequisite: H 513 with B- or better or H 515 with B- or better or HHS 514 with B- or better

Available via Ecampus

H 576, PROGRAM PLANNING FOR HEALTH/HUMAN SERVICES, 4 Credits
Provides students with an introduction to the principles of program planning and the development of program plans, with a focus on evidence-based public health/human services. Students will have the opportunity to integrate skills developed through prior courses in the context of writing a program plan.

Prerequisite: (H 515 with C- or better or HHS 514 with C- or better) and H 571 [C-] and H 575 [C-]

H 578, INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I, 3 Credits
A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis.

Prerequisite: (H 524 with C or better and H 526 [C])

Recommended: Knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation)

H 580, LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA, 4 Credits
Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/lab.

Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 581, GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS, 4 Credits
Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab.

Recommended: H 580
H 582, ANALYSIS OF CORRELATED HEALTH DATA, 3 Credits
Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations.
Prerequisite: H 581 with C or better

H 583, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT, 4 Credits
Studies the design and management principles and practices in the environment, safety and health field.

H 584, ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS, 3 Credits
Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 585, ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW, 3 Credits
Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals.
Recommended: H 385

H 586, BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH, 3 Credits
An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health.
Prerequisite: H 581 with C or better

H 587, TIME TO EVENT ANALYSIS OF HEALTH DATA, 3 Credits
Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 588, APPLIED OCCUPATIONAL SAFETY AND HEALTH, 3 Credits
The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.

H 589, EMERGENCY AND DISASTER MANAGEMENT, 3 Credits
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 590, OCCUPATIONAL ERGONOMICS AND BIOMECHANICS, 3 Credits
Examines the advanced theories, applications, and contemporary topics of occupational ergonomics and biomechanics. Topics include muscle physiology, work-related musculoskeletal disorders, assessing biomechanical exposure in the workplace, various material handling assessment tools, 3-Dimensional Static Strength Prediction Program, human vibrations, and implementing ergonomic interventions.

H 591, SELECTED TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
This course is repeatable for 9 credits.

H 592, SPATIAL EPIDEMIOLOGY, 3 Credits
An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining patterns and associations.
Prerequisite: H 547 with C or better and H 581 [C]

H 593, REPRODUCTIVE EPIDEMIOLOGY, 3 Credits
Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better
Recommended: H 524

H 594, APPLIED ERGONOMICS, 3 Credits
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595, DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH, 3 Credits
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 596, HEALTHCARE EPIDEMIOLOGY, 3 Credits
Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic testing, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better
Recommended: H 524
Available via Ecampus
H 597, METHODS IN FOODBORNE DISEASE OUTBREAK INVESTIGATION, 3 Credits
Focuses on the practical basis for developing and implementing methods for foodborne disease outbreak detection, investigation and control, using recent outbreaks to highlight underlying principles. Biological characteristics of major foodborne disease pathogens, clinical features of the illnesses its causes and epidemiologic presentations of foodborne outbreaks will be reviewed. The implications of these characteristics will be discussed in a problem solving, interactive format that examines theory and practice in the context of recent outbreaks. Strategies to promote timely decision-making will be emphasized.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 598, HEALTH POLICY ANALYSIS METHODS, 3 Credits
Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens. Health services research methods, including data sources for health policy research and health policy literature.
Prerequisite: H 513 with B- or better and H 533 [B-]

H 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 24 credits.

H 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

H 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

H 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 610, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 611, INTRODUCTION TO SYSTEMATIC LITERATURE REVIEWS, 3 Credits
Students will learn how to apply systematic review methodology to a research question of their choice and understand how literature reviews inform evidence-based decision-making. Examples will focus on applying literature reviews to public health, clinical science, and biomedical research.

H 612, DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE, 1 Credit
Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health.
This course is repeatable for 9 credits.

H 613, INDEPENDENT RESEARCH PROJECT, 1-9 Credits
Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N.
This course is repeatable for 9 credits.

H 614, RESEARCH MANUSCRIPT, 4 Credits
PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

H 615, ADVANCED EVALUATION AND RESEARCH DESIGN, 3 Credits
Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors.
Recommended: H 515 and H 575

H 620, ADVANCED TOPICS IN GLOBAL HEALTH INTERVENTION AND PRACTICE, 3 Credits
Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decision-making in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored. Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.

H 622, GLOBAL HEALTH SYSTEMS, POLICY AND POLITICS, 3 Credits
Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.
H 626, GLOBAL HEALTH SYSTEM FINANCE AND STRENGTHENING, 3 Credits
Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.

H 630, QUANTITATIVE HEALTH POLICY RESEARCH METHODS I, 4 Credits
Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature.
Prerequisite: H 524 with B- or better

H 632, APPLIED HEALTH ECONOMICS, 4 Credits
Advanced doctoral-level quantitative health policy/services research methods emphasizing causal inference when potential endogeneity is present.
Prerequisite: H 630 with B- or better

H 635, COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE, 3 Credits
The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

H 638, PUBLIC AND PRIVATE HEALTH INSURANCE, 3 Credits
Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method.
Prerequisite: H 533 with C or better

H 639, COMMUNITY-BASED PARTICIPATORY RESEARCH, 4 Credits
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion.
Recommended: 9 credits of public health or HDFS graduate coursework

H 642, ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT, 3 Credits
Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.

H 650, REPORTING RESULTS: WRITING FOR EPIDEMIOLOGY, 3 Credits
Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer.
Prerequisite: H 526 with B- or better and H 551 [B-] and H 580 [B-]

H 651, ADVANCED EPIDEMIOLOGICAL METHODS, 4 Credits
Covers advanced topics in epidemiology. Course expands on many of the same topics as H 526, and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models, directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics.
Prerequisite: H 526 with B- or better and H 581 [B-]

H 652, CAUSAL INFEERENCE IN EPIDEMIOLOGY, 3 Credits
Discussion of the theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics.
Applied examples will be used for illustration.
Prerequisite: H 651 with B- or better

H 659, QUANTITATIVE HEALTH POLICY RESEARCH METHODS II, 4 Credits
Advanced doctoral-level quantitative health policy/services research methods emphasizing health care utilization, expenditures, and outcomes data.
Prerequisite: H 630 with B- or better

H 662, ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY, 3 Credits
Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods.
Prerequisite: H 526 with B- or better and H 562 [B-]

H 671, ADVANCED THEORIES OF HEALTH BEHAVIOR, 3 Credits
Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing).
Recommended: H 571
H 672, ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR, 3 Credits
Provides an in-depth examination of the use of qualitative methods in health behavior research and practice.
Recommended: H 515 and SOC 518 and HDFS 538

H 673, MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS, 4 Credits
Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts.
Recommended: H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (eg. sociology or psychology or health promotion or education programs)

H 675, DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS, 3 Credits
Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice.
Recommended: H 571 and H 575 and H 576

H 676, ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR, 3 Credits
Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior.
This course is repeatable for 6 credits.
Recommended: H 515 and H 571

H 683, ADVANCED RESEARCH METHODS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH, 3 Credits
Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.

H 685, RACE, CLASS, CULTURE AND AGING, 4 Credits
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSTILLED as H 685/HDFS 685.
Equivalent to: HDFS 685
Recommended: 9 credits of public health or HDFS graduate coursework

H 699, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

Public Health Graduate Certificate

Available via Ecampus (http://ecampus.oregonstate.edu/).

The online Graduate Certificate in Public Health is designed for public health practitioners and others seeking professional development and continuing education within the field of public health. The certificate consists of 18 graduate credits focusing on key domains in public health. All of the courses are available online.

Certificate Code: CG10

Certificate Code: CG10
Public Health Graduate Major (MPH, PhD)

This major offers the following option(s):

- Biostatistics (p. 1407)
- Environmental and Occupational Health (p. 1408)
- Epidemiology (p. 1408)
- Global Health (p. 1408)
- Health Promotion and Health Behavior (p. 1408)
- Health Systems and Policy (p. 1409)
- Physical Activity (p. 1409)
- Public Health Practice (p. 1409)

Graduate Areas of Concentration

Biostatistics (MPH only); environmental and occupational health (MPH, PhD); epidemiology (MPH, PhD); health systems and policy (MPH only); health policy (PhD only); health promotion and health behavior (MPH, PhD); global health (MPH, PhD); physical activity (MPH only); public health practice (MPH only)

Also available via Ecampus.

The public health graduate degree programs include the Master of Public Health (MPH) and the PhD in Public Health. The MPH degree includes several transcript-visible options. The PhD in Public Health is a research-oriented degree requiring in-depth study in a specialty area within the field of public health.

For further information about graduate programs in public health, visit the website (http://health.oregonstate.edu/degrees/graduate/public-health/).

The College of Public Health and Human Sciences is accredited by the Council on Education for Public Health (http://ceph.org/accredited/) (CEPD).

Major Code: 7580

Doctor of Philosophy (PhD) in Public Health

The PhD in Public Health is for individuals who wish to prepare themselves for careers in university teaching, research, consulting, policy development, or other high-level public health positions. There are currently five areas of concentration offered for the PhD degree:

1. Environmental and occupational health
2. Epidemiology
3. Global health
4. Health policy
5. Health promotion and health behavior

A master's degree in a relevant field is required before admission into the PhD program.

The PhD program consists of a minimum of 109 credits, including at least 36 graduate credits devoted to preparation of the thesis. Doctoral students take courses in public health knowledge, research methods and statistics, their concentration area, and other relevant areas. Each student and their doctoral committee jointly determine the student's specific program of doctoral study. This process allows students to design a course of study uniquely suited to their particular needs and career goals. Further information about these requirements is available on the PhD in Public Health website (http://health.oregonstate.edu/degrees/graduate/public-health/phd-program/).

Master of Public Health (MPH)

The College of Public Health and Human Sciences offers the following options within the MPH degree:

1. Biostatistics
2. Environmental and Occupational Health
3. Epidemiology
4. Global Health
5. Health Management and Policy
6. Health Promotion and Health Behavior
7. Physical Activity
8. Public Health Practice

All MPH students take the integrated core course, H 513 (12 credits) or the combination of HHS 513 (6 credits) and HHS 514 (6 credits). These courses introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.

All MPH students must complete a 6-credit internship through enrollment in H 510.

MPH students must complete final assessments or oral examinations based upon the academic option in which they are enrolled.

See handbooks (http://health.oregonstate.edu/degrees/graduate/public-health/graduate-handbooks/) for other degree requirements.

Major Code: 7580

Biostatistics Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 1407)

The Biostatistics graduate option of the MPH program will train students in statistics applied to public health and healthcare settings. Graduates will be able to work in health departments, medical schools, nongovernmental agencies, and CDC and WHO field programs.

Option Code: 7581

Environmental and Occupational Health Graduate Option

This option is offered within the following major(s):

• Public Health - College of Public Health and Human Sciences (p. 1407)

The Environmental and Occupational Health graduate option of the MPH program focuses on understanding the impact of environmental and occupational hazards on human health and society, as well as developing effective interventions that will control and prevent exposure to hazards.

Global Health Graduate Option

This option is offered within the following major(s):

• Public Health - College of Public Health and Human Sciences (p. 1407)

The Global Health graduate option of the MPH program prepares students for public health leadership roles in international health, with an emphasis on health development for those in middle- and low-income nations. Courses focus on understanding complex issues, problem solving and developing analytical skills to critically view global health issues in order to promote progressive, comprehensive, sustainable and equitable community ownership of health development. As part of this interdisciplinary program, students acquire wide-ranging knowledge of international health while also developing an individually designed specialization.

Health Promotion and Health Behavior Graduate Option

This option is offered within the following major(s):

• Public Health - College of Public Health and Human Sciences (p. 1407)

In the Health Promotion and Health Behavior graduate option of the MPH program, students will gain an understanding of the role of behavioral and social influences in public health and learn to apply the principles and practices of health promotion and behavior to address current and emerging public health problems.

Option Code: 7585
Health Systems and Policy Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 1407)

In the Health Systems and Policy graduate option of the MPH program, students will develop the ability to think about public health problems in practical ways using sound conceptual frameworks. Public health problems will be viewed from the perspective of those who receive, provide, finance and regulate care.

Option Code: 7585

Physical Activity Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 1407)

The Physical Activity graduate option of the MPH program is designed primarily for those future professionals interested in the science of physical activity and its application in populations. This option prepares physical activity program specialists for a variety of careers that involve developing, implementing, and evaluating community-based programs designed to promote physically active lifestyles. These careers are in state and local health departments; federal agencies; Extension offices; prevention research centers; professional, commercial, and nonprofit organizations; worksites; and schools.

Option Code: 7591

Public Health Practice Graduate Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 1407)

Available only via Ecampus.

The online Public Health Practice graduate option of the MPH program prepares students for work in applied public health settings such as local, state, and national agencies; non-governmental organizations, healthcare systems, and private industry. The interdisciplinary curriculum incorporates key domains of public health work, including science, community, management and leadership, and policy and systems. This non-thesis, practice-based option can be completed in two years or six quarters; students also have the flexibility of completing the program on a part-time basis. Students will be able to add electives such as data analysis modules and other OSU online graduate level courses to enhance their program of study.

Option Code: 7592
The Bachelor of Science degree in Public Health is offered through the School of Social and Behavioral Health Sciences (http://health.oregonstate.edu/sbhs/).

The School of Biological and Population Health Sciences houses the Masters in Public Health (http://health.oregonstate.edu/degrees/graduate/public-health/mph/) (MPH) options of biostatistics, epidemiology, global health, environmental and occupational health, and physical activity. Environmental and Occupational Health, Epidemiology, and Global Health are also areas of concentration within the Public Health doctoral program (http://health.oregonstate.edu/degrees/graduate/public-health/phd-program/).

Master's and doctoral degrees are available in Nutrition (http://health.oregonstate.edu/degrees/graduate/nutrition/) and Kinesiology (http://health.oregonstate.edu/degrees/graduate/kinesiology/).

### Undergraduate Studies

#### Preparation

Entering first-year and undergraduate transfer students should prepare to enter the College of Public Health and Human Sciences with a strong foundation in the sciences, balanced with good writing and critical thinking skills. Students transferring from other institutions are best prepared for the college curriculum if they have taken chemistry or biology or both.

#### Admission

Any student who has met the admission requirements of Oregon State University may be admitted to a nutrition or exercise and sport science program of study. To transfer from another OSU college, the student must meet with an academic advisor in the College of Public Health and Human Sciences’ Office of Student Success.

#### Physical Activity Courses

The Physical Activity Course (PAC) Program is an elective, academic-credit program designed to provide OSU students with the opportunity to learn and engage in a wide variety of physical activities with the goal of promoting health and lifelong participation in physical activity. Students may take any number of PAC credits, but only 11 credits may be counted toward graduation. Successful completion of any PAC section will satisfy the one-credit laboratory requirement of the fitness category of the baccalaureate core. Courses may be repeated for credit and a grade. There is a PAC fee for each class, and some courses have additional fees. All fees are listed in the Schedule of Classes (https://classes.oregonstate.edu/). Student accounts are billed upon registration. Refunds of the PAC fee are automatic upon dropping or withdrawing from the course and follow university policies as listed in the OSU Academic Catalog. Some additional fees are refunded through the PAC Office (Langton 123). Some courses are available as Non-Credit (https://health.oregonstate.edu/pac/non-credit/) options. Social dance classes are listed with a men’s and a women’s section in order help balance the number of students in the traditional lead-and-follow roles within the same class.

### Undergraduate Programs

#### Majors

- Kinesiology (p. 1454)
- Nutrition (p. 1458)
- Pre-therapy and Allied Health
Options:
- Pre-Dietetics
- Dietetics
- Nutrition and Health Sciences
- Nutrition in Foodservice, Culinary and Food Systems (p. 1460)

Minors
- Environmental and Occupational Health (p. 1452)
- Exercise Physiology (p. 1453)
- Global Health (p. 1453)
- Nutrition (p. 1457)

Graduate Programs

Majors
- Adapted Physical Education (p. 1451)
- Athletic Training (p. 1451)
- Kinesiology (p. 1454)
  Option:
  - Adapted Physical Activity
  - Nutrition (p. 1457)

Minors
- Epidemiology (p. 1452)
- Ergonomics (p. 1452)
- Kinesiology (p. 1454)
- Nutrition (p. 1457)

Professional Programs
- Doctor of Physical Therapy (p. 1461)

Russell Turner, Interim Head
127 Milam Hall
Oregon State University
Corvallis, OR 97331

Faculty Listings: https://health.oregonstate.edu/directory (https://health.oregonstate.edu/directory/)

Health and Human Sciences (HHS)

HHS 001, SERVICE LEARNING, 0 Credits
Engage in a service-learning or community engagement experience where skills and knowledge are applied to meet an authentic community-identified need. The experience will integrate meaningful community service with reflection. Through readings and discussions, critically reflect on the service in order to increase understanding of the discipline, gain a broader appreciation of the discipline, enhance a sense of civic responsibility, and strengthen connections with communities.

HHS 002, LEADERSHIP, 0 Credits
Provides basic personal and interpersonal leadership skills that can be used within and outside of a work setting. Through practice, the leadership experience helps explore motivation, decision-making, time management, power, team building, conflict, ethics, dealing with change, communication skills, and diversity issues.

HHS 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

HHS 199, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HHS 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

HHS 231, *LIFETIME FITNESS FOR HEALTH, 2 Credits
Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness
Equivalent to: HHP 231, HHS 231H
Available via Ecampus

HHS 231H, *LIFETIME FITNESS FOR HEALTH, 2 Credits
Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness; HNRS – Honors Course Designator
Equivalent to: HHS 231

HHS 241, *LIFETIME FITNESS, 1 Credit
Assessment, evaluation and practice of physical fitness and health behaviors leading to the development of a personal fitness program. (Bacc Core Course)
Attributes: CSFT – Core, Skills, Fitness
Available via Ecampus

HHS 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 18 credits.

HHS 440, GLOBAL NUTRITION, 3 Credits
Examines causes and consequences of nutritional problems including malnutrition, both under- and overnutrition, that impact health, developmental capacity, and economic well-being of populations in developing societies. Explores policies, practices, and cultural approaches to improving nutritional status at the household, local and international levels.
Available via Ecampus
HHS 513, INTEGRATED APPROACH TO PUBLIC HEALTH I, 6 Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health. This course is the first of a two-part course sequence.
Available via Ecampus

HHS 514, INTEGRATED APPROACH TO PUBLIC HEALTH II, 6 Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including: evidence-based approaches to public health; public health and health care systems; planning and management to promote health; and policy in public health. This course is the second of a two part course sequence.
Prerequisite: HHS 513 with B- or better
Available via Ecampus

HHS 517, CASE STUDIES IN PUBLIC HEALTH PRACTICE, 3 Credits
Case-based learning to illustrate the complexity of public health issues and to demonstrate the need for integrated approaches for developing and implementing successful strategies in public health practice. Students will apply a wide range of knowledge and skills essential to public health practice that relate to outbreak investigation, policy analysis, regulatory decision-making, ethics, program development, program evaluation, research synthesis, screening programs, working with stakeholders, health risk communication, and disaster preparedness.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

HHS 526, LINEAR REGRESSION IN PUBLIC HEALTH, 2 Credits
Biostatistical tools for scientific applications in public health using linear regression analysis. Confounding, effect modification, variable selection, assessing model fit, observational studies, and exploratory data analysis. Emphasis on the use of statistical packages for analyzing public health data.
Prerequisite: H 524 with B- or better
This course is repeatable for 4 credits.
Available via Ecampus

HHS 527, LOGISTIC REGRESSION IN PUBLIC HEALTH, 2 Credits
Biostatistical tools for scientific applications in public health using logistic regression analysis. Confounding, effect modification, variable selection, assessing model fit, exploratory data analysis, and observational studies. Emphasis on the use of statistical packages for analyzing public health data.
Prerequisite: H 524 with B- or better

HHS 537, EVIDENCE-BASED LEADERSHIP IN PUBLIC HEALTH, 3 Credits
Examines how collaboration differs from working together, and offer opportunities to develop skills for successful and effective group functioning. Students will be challenged to examine personal strengths (and the strengths of others) as they relate to leadership and followership. Explores evidence-based management – identifying and using organizational and scientific data in decision making.
Prerequisite: H 536 with B- or better
Available via Ecampus

HHS 540, GLOBAL NUTRITION, 3 Credits
Examines causes and consequences of nutritional problems including malnutrition, both under- and overnutrition, that impact health, developmental capacity, and economic well-being of populations in developing societies. Explores policies, practices, and cultural approaches to improving nutritional status at the household, local and international levels.
Available via Ecampus

HHS 541, PUBLIC HEALTH PERSPECTIVE ON GLOBAL FOOD SECURITY, 3 Credits
Explore food insecurity and hunger in the U.S. and global contexts, including examination of the causes, correlates, and consequences of hunger and community, national, and international food safety nets.

HHS 550, COMMUNICATING FOR PUBLIC HEALTH POLICY IMPACT, 3 Credits
Successful public health professionals communicate clearly and in compelling ways with non-scientific audiences. In this hands-on course, the theory and practice of effective public health communication will be explored, with a focus on advancing a public health policy. Through a selected public health policy topic, students will develop and enhance skills in planning and implementing impactful public health communications, including message development, data visualization, media interviewing, engaging through social media and presenting to policymakers. Professionals in the field, including those in legislative and media roles, will share examples of effective communication and provide constructive feedback on students’ work.

HHS 578, EVIDENCE-BASED PUBLIC HEALTH I, 3 Credits
Evidence-based public health is the process of integrating science-based interventions with community preferences to improve the health of populations. This is the first in a two-course series and provides theoretical and practical bases to identify, implement and evaluate evidence-based research (i.e. programs, surveillance, policies). Students will develop skills to select and adapt evidence-based public health programming for a specific community and/or population.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus
HHS 579, EVIDENCE-BASED PUBLIC HEALTH II, 3 Credits
Evidence-based public health is the process of integrating science-based interventions with community preferences to improve the health of populations. This is the second in a two-course series. Applies science and adaptation frameworks learned in the first course to the development of a program plan. Provides instruction and application of program planning and program evaluation frameworks. Course learning is synthesized through the development of a grant proposal for adapted public-health program plus evaluation plan.
Prerequisite: H 575 with B- or better and HHS 578 [B-]
Available via Ecampus

HHS 580, GRANT WRITING FOR PUBLIC HEALTH PRACTITIONERS, 4 Credits
Provides an introduction to principles of grant writing, with an emphasis on grants seeking funding from national, regional, or local entities (e.g., CDC, foundations) that support research and program that aim to improve community health through health promotion. There will be a focus on grants that MPH-level practitioners seek to conduct research, enhance practice, and/or support delivery of programs within communities. Students will have the opportunity to integrate skills developed through prior courses in the context of writing a grant proposal.
Prerequisite: H 515 with C- or better and H 575 [C-] and H 576 [C-]

HHS 584, SURVEILLANCE AND FIELD EPIDEMIOLOGY FOR PUBLIC HEALTH, 3 Credits
A review of public health surveillance systems, and the continuum of communicable disease surveillance into field epidemiology and other responses to identified events.
Prerequisite: H 524 with B- or better or HHS 514 with B- or better
Available via Ecampus

HHS 590, PUBLIC HEALTH LAW, 2 Credits
Explores the use of law and policy tools to promote access to health and healthy living conditions. Examines the legal powers and duties of government at the federal, state, and local levels to ensure the conditions required for people to be healthy. Discussion of individual rights as limitations on the power of the government to act in furtherance of public health goals.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

HHS 597, GLOBAL HEALTH SYSTEMS, 3 Credits
Explores key components of global health systems, using case studies of institutions, processes, and health outcomes.
Available via Ecampus

HHS 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HHS 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Kinesiology (KIN)
KIN 131, INTRODUCTION TO KINESIOLOGY, 1 Credit
Overview of the field; career opportunities in exercise and sport science and other professions dealing with the discipline of human movement; orientation to support services. Graded P/N.
Equivalent to: EXSS 131
Available via Ecampus

KIN 132, INTRODUCTION TO THE ALLIED HEALTH PROFESSIONS, 1 Credit
Overview of allied health professions including physical and occupational therapy, physician assistant, nursing, athletic training and others. Discuss job responsibilities, employment opportunities and educational requirements.
Equivalent to: EXSS 132

KIN 160, INTRODUCTION TO INJURY MANAGEMENT FOR THE PHYSICALLY ACTIVE, 3 Credits
Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals).
Equivalent to: EXSS 160

KIN 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: EXSS 199
This course is repeatable for 16 credits.

KIN 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

KIN 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

KIN 230, INTRODUCTION TO ADVENTURE PROGRAMS, 3 Credits
Foundation course for leadership opportunities in the Adventure Leadership Institute (ALI). Provides overview of history, theoretical foundations, and utilization of adventure programs in education, recreation, and therapy.
Equivalent to: EXSS 230

KIN 231, HUMAN GROUP DYNAMICS, 3 Credits
Provides students with the fundamental concepts and theories essential for understanding dynamics that occur in groups in recreation, leisure, and everyday settings.
Equivalent to: EXSS 231
KIN 232, BACKCOUNTRY LEADERSHIP, 3 Credits
Prepares students to be leaders in outdoor settings by building the practical and logistical skills needed in the effective delivery of courses and/or trips. Covers the teaching skills and essentials for trip leaders in the wilderness, including trip planning, logistics, risk management, and group interaction in the backcountry.
Prerequisite: (EXSS 230 with C or better or KIN 230 with C or better) and PAC 301 [C] and PAC 303 [C] and PAC 329 [C]
Equivalent to: EXSS 232

KIN 233, TEACHING TECHNIQUES FOR OUTDOOR ACTIVITIES, 3 Credits
Gateway course for students pursuing the Level Three Adventure Leadership Certificate. Emphasizes teaching outdoor activities at a professional level. Students work individually with the course instructor to develop, plan and implement an activity course (land or water based) for the Adventure Leadership Institute.
Prerequisite: EXSS 232 with C or better or KIN 232 with C or better
Equivalent to: EXSS 233

KIN 299, SPECIAL TOPICS, 1-3 Credits
This course is repeatable for 24 credits.

KIN 301, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

KIN 305, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

KIN 306, PROJECTS, 1-16 Credits
This course is repeatable for 36 credits.

KIN 307, SEMINAR, 1-3 Credits
Section 2: Seminar Pre-Internship (1 credit).
Equivalent to: EXSS 307
This course is repeatable for 36 credits.

KIN 311, MOTOR BEHAVIOR, 4 Credits
Underlying mechanisms and factors affecting movement function, skill acquisition, and changes in movement behavior across the lifespan.
Prerequisite: BI 232 with C- or better or BI 332 with C- or better
Available via Ecampus

KIN 312, *SOCIOCULTURAL DIMENSIONS OF PHYSICAL ACTIVITY, 4 Credits
Physical activity in contemporary society. Relationships with the social processes; interrelationships between physical activity and cultural institutions. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture
Equivalent to: EXSS 312
Recommended: Social processes course

KIN 314, INTRODUCTION TO ADAPTED PHYSICAL ACTIVITY, 3 Credits
Overview of cognitive, neuromuscular, sensory and orthopedic disabilities; understanding accessible physical activity programs for individuals with disabilities.
Equivalent to: EXSS 314
Available via Ecampus

KIN 321, BIOMECHANICS OF HUMAN MOVEMENT, 4 Credits
Integration of the physical laws and anatomical structures governing human movement; qualitative analytical processes emphasized.
Prerequisite: ((BI 231 with C- or better and BI 241 [C-]) or (BI 331 [C-] and BI 341 [C-]) and (MTH 112 [C-] or MTH 251 [C-])
Equivalent to: EXSS 321
Available via Ecampus

KIN 324, EXERCISE PHYSIOLOGY, 4 Credits
Physiological effects of acute and chronic exercise; factors affecting human performance; exercise training principles.
Prerequisite: (BI 233 with C- or better or BI 333 with C- or better) and (BI 231 [C-] or BI 331 [C-] or CH 121 [C-]) or (CH 231 [C-]) or (CH 232 [C-]) or (CH 232H [C-]) or (CH 122 [C-]) or (CH 233 [C-]) or (CH 323 [C-]) or (CH 323H [C-]) or (CH 130 [C-])
Equivalent to: EXSS 324
Available via Ecampus

KIN 325, FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION, 3 Credits
Introduction to lab- and field-based physical fitness assessments and the skills needed to design safe and effective exercise programs for apparently healthy adults. Lec/lab.
Prerequisite: KIN 324 with C- or better or EXSS 324 with C- or better
Equivalent to: EXSS 325

KIN 333, KINESIOLOGY PRACTICUM, 2 Credits
Field experience in kinesiology under professional supervision.
Equivalent to: EXSS 333

KIN 334, KINESIOLOGY PRACTICUM, 2 Credits
Field experience in kinesiology under professional supervision.
Prerequisite: KIN 333 with C- or better
Equivalent to: EXSS 334
KIN 335, KINESIOLOGY PRACTICUM, 2 Credits
Field experience in kinesiology under professional supervision.
Equivalent to: EXSS 335

KIN 341, NUTRITION FOR EXERCISE, 4 Credits
Review of the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSTLISTED as KIN 341/NUTR 341.
Prerequisite: KIN 324 with C- or better and NUTR 240 [C]
Equivalent to: EXSS 341, NUTR 341
Available via Ecampus

KIN 343, PRE-THERAPY/ALLIED HEALTH SEMINAR, 1 Credit
Provides knowledge in professional school preparation and current issues related to the allied health professions.
Prerequisite: (KIN 132 with C or better or BI 109 with C or better) and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C]
Equivalent to: EXSS 343
Recommended: Overall GPA of 3.0

KIN 344, PRE-THERAPY/ALLIED HEALTH PRACTICUM, 1 Credit
Clinical field experiences under the supervision of a licensed professional in the allied health or related setting enhanced with classroom discussion.
Prerequisite: (KIN 132 with C or better and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C])
Corequisites: KIN 343
Equivalent to: EXSS 344
This course is repeatable for 2 credits.
Recommended: Overall GPA of 3.0

KIN 345, ALLIED HEALTH PRACTICUM, 1-2 Credits
Field experience under professional supervision in an allied health or related setting. Includes arranged consultations with the instructor to discuss current issues related to the allied health professions.
Equivalent to: EXSS 345
This course is repeatable for 2 credits.
Recommended: Overall GPA 2.75

KIN 353, PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM, 2 Credits
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.
Equivalent to: EXSS 353
Recommended: OSU GPA 2.00, KIN GPA 2.50, and completion or concurrent enrollment in KIN 422 or KIN 423

KIN 354, PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM, 2 Credits
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.
Equivalent to: EXSS 354
Recommended: OSU GPA 2.00, KIN GPA 2.50 and concurrent enrollment in KIN 422 or KIN 423

KIN 355, PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM, 2 Credits
Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting.
Equivalent to: EXSS 355
Recommended: OSU GPA 2.00, KIN GPA 2.50 and concurrent enrollment in KIN 422 or KIN 423

KIN 360, INJURY MANAGEMENT FOR THE PHYSICALLY ACTIVE, 3 Credits
Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals) and pre-professional.
Available via Ecampus

KIN 370, PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY, 3 Credits
Interaction between psychological variables and human motor performance.
Equivalent to: EXSS 370
Available via Ecampus

KIN 380, THERAPEUTIC MODALITIES, 4 Credits
Indications, contraindication, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and diseases.
Equivalent to: EXSS 380

KIN 385, THERAPEUTIC EXERCISE, 4 Credits
Principles and techniques of therapeutic exercise; rehabilitative activities and programs for musculoskeletal injuries, conditions, and diseases. Lec/lab.
Prerequisite: KIN 321 with C- or better or EXSS 321 with C- or better
Equivalent to: EXSS 385

KIN 394, PROFESSIONAL ACTIVITIES: RESISTANCE TRAINING PROGRAM DESIGN, 3 Credits
Presents the conceptual basis for optimizing resistance training program designs, exercise routines for all ages and fitness levels, correct exercise technique. Lec/lab.
Prerequisite: KIN 324 with C- or better and KIN 325 [C-]
Equivalent to: EXSS 394
KIN 395, PROFESSIONAL ACTIVITIES: GROUP FITNESS, 3 Credits
Application of biomechanical, physiological, psychological and safety principles for the development of group exercise classes in a variety of modes and settings. Lec/lab.
Prerequisite: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])
Equivalent to: EXSS 395

KIN 396, PROFESSIONAL ACTIVITIES: AQUATICS, 3 Credits
Aquatic overview; emphasis on underlying hydrodynamic principles; includes safety, survival, stroke mechanics, aquatic exercise, training, games. Lec/lab/activity.
Equivalent to: EXSS 396
Recommended: PAC 250

KIN 399, SPECIAL TOPICS, 1-3 Credits
Equivalent to: EXSS 399, KIN 399H
This course is repeatable for 18 credits.

KIN 399H, SPECIAL TOPICS, 1-3 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: KIN 399
This course is repeatable for 18 credits.

KIN 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 401
This course is repeatable for 16 credits.

KIN 403, THESIS, 1-16 Credits
Equivalent to: EXSS 403
This course is repeatable for 16 credits.

KIN 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: EXSS 405
This course is repeatable for 16 credits.

KIN 406, PROJECTS, 1-16 Credits
Equivalent to: EXSS 406
This course is repeatable for 16 credits.

KIN 407, SEMINAR, 1-16 Credits
Equivalent to: EXSS 407
This course is repeatable for 16 credits.

KIN 408, WORKSHOP, 1-16 Credits
Equivalent to: EXSS 408
This course is repeatable for 16 credits.

KIN 409, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

KIN 410, INTERNSHIP, 1-15 Credits
Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required.
Equivalent to: EXSS 410
This course is repeatable for 20 credits.
Recommended: Completion of required courses, cumulative Kinesiology program GPA of 2.25, KIN overall GPA of 2.50 and completion of 165 credits
Available via Ecampus

KIN 411, NEUROMUSCULAR CONTROL OF HUMAN MOVEMENT, 3 Credits
Exploration and understanding of the neurological basis of human movement with emphasis on models of motor function and dysfunction.
Prerequisite: KIN 311 with C- or better

KIN 422, FACILITATING PHYSICAL ACTIVITY FOR CHILDREN AND YOUTH, 3 Credits
Students learn skills for facilitating physical activity programs for children and youth in a variety of settings, including information on the benefits of physical activity, program design, implementation and management techniques.
Prerequisite: KIN 311 with C- or better or EXSS 311 with C- or better
Equivalent to: EXSS 422

KIN 423, QUALITATIVE MOVEMENT ANALYSIS, 3 Credits
Develop observational skills to perform systematic qualitative analyses of selected physical activity performances and other human movements.
Prerequisite: (KIN 311 with C- or better or EXSS 311 with C- or better) and (KIN 321 [C-] or EXSS 321 [C-])
Equivalent to: EXSS 423

KIN 425, ANATOMICAL KINESIOLOGY, 4 Credits
Anatomical aspects of human movement; actions of bones and muscles in motor activities. Application of physical principles to factors governing anatomical function in health and injury.
Prerequisite: EXSS 321 with C- or better or KIN 321 with C- or better
Equivalent to: EXSS 425

KIN 432, PHYSICAL ACTIVITY ASSESSMENT, 3 Credits
Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations.
Equivalent to: EXSS 432

KIN 434, APPLIED MUSCLE PHYSIOLOGY, 3 Credits
Skeletal muscle structure, function, and metabolism; applications to muscle fatigue, exercise training, inactivity, and aging.
Prerequisite: KIN 324 with C- or better or EXSS 324 with C- or better
Equivalent to: EXSS 434
KIN 435, PHYSICAL ACTIVITY PROMOTION, 3 Credits
Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities.
Prerequisite: KIN 370 with C- or better
Equivalent to: EXSS 435

KIN 437, PHYSICAL ACTIVITY, AGING, AND CHRONIC DISEASE, 4 Credits
Addresses the consequences of primary and secondary aging from an individual and public health perspective. Physiological changes associated with aging and chronic disease, functional assessment of older adults, and exercise prescription for older adults with and without chronic exercise will be emphasized.
Prerequisite: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])
Equivalent to: EXSS 437

KIN 444, ADVANCED ADAPTED PHYSICAL ACTIVITY, 3 Credits
Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities. Lec/lab.
Prerequisite: (KIN 314 with C- or better or EXSS 314 with C- or better)
Equivalent to: EXSS 444

KIN 462, BEHAVIORAL DIMENSIONS OF PHYSICAL ACTIVITY, 4 Credits
Adopting and maintaining an active, healthy lifestyle is difficult. This course explores 'why' this might be the case and 'how' to improve upon the situation.
Prerequisite: KIN 312 with C- or better and KIN 370 [C-]

KIN 474, EXERCISE PHYSIOLOGY LAB METHODS, 3 Credits
Practical experience and projects in exercise physiology lab methods, including measurement of submaximal and maximal oxygen consumption body composition, anaerobic power, and electrocardiography.
Prerequisite: (KIN 324 with C- or better or EXSS 324 with C- or better) and (KIN 325 [C-] or EXSS 325 [C-])
Equivalent to: EXSS 474

KIN 475, *POWER AND PRIVILEGE IN SPORT, 3 Credits
Issues of power and privilege in sport including race, gender, sexual orientation, disability and aggression and the consequences of long held society norms and stereotypes. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisite: (KIN 312 with C- or better or EXSS 312 with C- or better)
Equivalent to: EXSS 475
Recommended: 6 credits of social science
Available via Ecampus

KIN 481, ^ANALYSIS OF CRITICAL ISSUES IN KINESIOLOGY, 3 Credits
Reading and interpreting current research, and using writing as a tool for learning on a critical issue in kinesiology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: KIN 381
Available viaEcampus

KIN 483, TISSUE INJURY AND REPAIR, 3 Credits
Mechanics of tissue injury and the body's response and repair following injury of bone, muscle, tendon, ligament, cartilage and nervous system tissue.
Prerequisite: (BI 231 with C- or better or BI 331 with C- or better) and (BI 241 [C-] or BI 341 [C-]) and (BI 232 [C-] or BI 332 [C-]) and (BI 242 [C-] or BI 342 [C-]) and (BI 233 [C-] or BI 333 [C-]) and (BI 243 [C-] or BI 343 [C-]) or ((Z 331 [C-] and Z 332 [C-]) and Z 333 [C-] and Z 341 [C-] and Z 342 [C-] and Z 343 [C-])
Equivalent to: EXSS 483

KIN 490, SCIENTIFIC INQUIRY IN KINESIOLOGY, 4 Credits
Principles and techniques of organization, administration, interpretation and evaluation of exercise science-related data. Includes human subjects training and certification, research design, and statistical analysis using SPSS and Excel including central tendency, correlation and regression, probability, and inferential statistics (t-tests and ANOVA). Lec/lab.
Prerequisite: KIN 325 with C- or better and MTH 112 [C-]

KIN 499, SELECTED TOPICS, 1-5 Credits
Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated for credit when topics differ.
Equivalent to: EXSS 499
This course is repeatable for 24 credits.

KIN 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 501
This course is repeatable for 16 credits.

KIN 503, THESIS, 1-16 Credits
Equivalent to: EXSS 503
This course is repeatable for 999 credits.

KIN 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: EXSS 505
This course is repeatable for 16 credits.

KIN 506, PROJECTS, 1-16 Credits
Equivalent to: EXSS 506
This course is repeatable for 16 credits.
KIN 507, SEMINAR, 1-16 Credits
Section 1: Seminar (1). Graduate research seminar that emphasizes student oral presentations of current research topics in exercise and sport science. One credit required for all graduate students. Section 2: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N. Equivalent to: EXSS 507
This course is repeatable for 16 credits.

KIN 508, WORKSHOP, 1-16 Credits
Equivalent to: EXSS 508
This course is repeatable for 16 credits.

KIN 509, PRACTICUM, 1-16 Credits
This course is repeatable for 35 credits.

KIN 510, INTERNSHIP, 1-16 Credits
Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required. Equivalent to: EXSS 510
This course is repeatable for 26 credits.

KIN 511, INTRODUCTION TO ATHLETIC TRAINING, 4 Credits
Practice domains include injury and illness prevention and wellness protection, clinical evaluation and diagnosis, immediate and emergency care, treatment and rehabilitation, and organizational and professional health and well-being. Lec/lab.

KIN 512, APPLIED MOTOR LEARNING, 3 Credits
Application of research and theory to the teaching of motor skills with emphasis on development of instructional strategies related to modeling, knowledge of results, practice, and motivational aspects of learning. Equivalent to: EXSS 512
Recommended: KIN 311

KIN 513, MOTOR DEVELOPMENT: AN INTEGRATIVE APPROACH, 3 Credits
Addresses the social, cultural, biological and psychological processes and health-related factors (e.g., physical activity) that jointly influence lifespan motor development (emphasis on the early years).

KIN 515, MOTOR CONTROL AND MOVEMENT DYSFUNCTION, 3 Credits
Contemporary motor control theories and their application to the development of instructional and training programs for individuals with movement disorders caused by neurological disease and/or trauma. Equivalent to: EXSS 515
Recommended: KIN 311 and (KIN 314 or KIN 444)

KIN 520, ORTHOPEDIC ASSESSMENT OF UPPER EXTREMITY INJURIES, 4 Credits
Prevention, assessment and management of upper extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab. Prerequisite: KIN 511 with C or better

KIN 521, ORTHOPEDIC ASSESSMENT OF LOWER EXTREMITY INJURIES, 4 Credits
Prevention, assessment and management of lower extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab. Prerequisite: KIN 511 with C or better

KIN 522, ORTHOPEDIC ASSESSMENT OF SPINE, 4 Credits
Prevention, assessment and management of spinal injuries and conditions commonly encountered by the athletic trainer. Lec/lab. Prerequisite: KIN 520 with C or better and KIN 521 [C]

KIN 523, BIOMECHANICS OF MOTOR ACTIVITIES, 3 Credits
Kinematic and kinetic analysis of volitional human movement with emphasis on analytical techniques and quantitative problem solving. Equivalent to: EXSS 523
Recommended: KIN 323 or PH 201

KIN 525, BIOMECHANICS OF MUSCULOSKELETAL INJURY, 3 Credits
Mechanical causes and effects of forces applied to the musculoskeletal system, material properties of human tissues, pathomechanics of injury, and degenerative changes across the lifespan. Not offered every year. Equivalent to: EXSS 525

KIN 531, PHYSIOLOGY OF PHYSICAL ACTIVITY AND INACTIVITY, 3 Credits
Physiologic responses to acute and chronic physical activity and inactivity with emphasis on underlying mechanisms and health outcomes.

KIN 532, PHYSICAL ACTIVITY ASSESSMENT, 3 Credits
Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations. Equivalent to: EXSS 532

KIN 533, ENERGETICS AND BIOCHEMISTRY OF EXERCISE, 3 Credits
Metabolic and energetic responses to acute and chronic physical activity; emphasis on recent research. Equivalent to: EXSS 533
Recommended: Undergraduate course in biochemistry or exercise physiology.
KIN 535, PHYSICAL ACTIVITY PROMOTION, 3 Credits
Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities.
Recommended: KIN 370

KIN 536, PHYSICAL ACTIVITY IN DIVERSE POPULATIONS, 3 Credits
Addresses the social, cultural, political, and environmental determinants of physical activity and health among diverse populations. Includes examination of intersecting issues related to race, ethnicity, gender, age, disability, geography, income status, and other societal factors across the lifespan for promoting physical activity through public health strategies.

KIN 541, INTEGRATED BEHAVIORAL HEALTH IN ATHLETIC TRAINING, 3 Credits
Explores integrated behavioral health in athletic training focusing on patient-centered care. Emphasizes the multidisciplinary approach in the individualized care of behavioral health conditions including suicidal ideation, depression, eating disorders and the associated necessary referrals to additional clinical personnel.
Prerequisite: KIN 521 with C or better

KIN 544, ADVANCED ADAPTED PHYSICAL ACTIVITY, 3 Credits
Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities.
Lec/lab.
Equivalent to: EXSS 544
Recommended: KIN 314

KIN 547, INCLUSION IN PHYSICAL ACTIVITY, 3 Credits
Effectiveness of physical activity programs provided in inclusive settings. This will include a lifespan/non-categorical approach to program development.
Equivalent to: EXSS 547
Recommended: KIN 314 or KIN 444

KIN 548, ASSESSMENT AND PROGRAMMING FOR SPECIAL POPULATIONS, 3 Credits
Use of appropriate assessment procedures for developing effective psychomotor programs for the disabled.
Equivalent to: EXSS 548
Recommended: KIN 314 or KIN 444

KIN 549, PHYSICAL ACTIVITY FOR PERSONS WITH SEVERE DISABILITIES, 3 Credits
Plan, develop and implement appropriate physical activity programs, functional program design, assistive technology, instructional strategies, behavior management practices, and data analysis systems that address the needs for psychomotor performance of persons with low incidence disabilities.
Equivalent to: EXSS 549
Recommended: KIN 314 or KIN 444

KIN 550, HEALTH PROMOTION FOR PEOPLE WITH DISABILITIES, 3 Credits
Discussion will focus on disability and health, theory driving health promotion program development, guidelines for developing a program for individuals with disabilities, and program evaluation.
Equivalent to: EXSS 550

KIN 551, CURRENT TRENDS AND ISSUES IN PHYSICAL EDUCATION, 4 Credits
Current trends and issues in physical education, including curriculum development, professional ethics, instructional practices, and physical activity for the school community.
Equivalent to: EXSS 551

KIN 553, INSTRUCTIONAL ANALYSIS TECHNIQUES I, 3 Credits
Introduction to techniques of instructional analysis. Provides in-depth information and training in systematic observation techniques, raw data conversion and inter/intraobserver reliability.
Equivalent to: EXSS 553

KIN 554, INSTRUCTIONAL ANALYSIS TECHNIQUES II, 3 Credits
Laboratory/seminar experience to accompany student teaching winter and spring terms. Provides continued application of systematic observation techniques throughout the elementary student teaching experience.
Equivalent to: EXSS 554

KIN 555, SKILL ANALYSIS AND ASSESSMENT IN K-12, 3 Credits
Develop proficiency in assessing movement skills, execution of sport techniques, and game play performance. Assessment trends and practices utilized in physical education programs are included.
Equivalent to: EXSS 555

KIN 556, INSTRUCTIONAL SKILLS I, 3 Credits
Skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12.
Equivalent to: EXSS 556
KIN 557, INSTRUCTIONAL SKILLS II, 2 Credits
Applying and refining skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12.
Equivalent to: EXSS 557

KIN 558, PHYSICAL EDUCATION CURRICULUM DESIGN AND ORGANIZATION, 3 Credits
Curricular programs and variations from kindergarten through grade 12, administrative policies and practices.
Equivalent to: EXSS 558

KIN 559, THE PHYSICAL EDUCATOR AS A PROFESSIONAL, 1 Credit
Transitioning to teaching, developing a portfolio, certification, obtaining a position, teacher burnout, professionalism, problems of first-year teachers, developing patterns of behavior that lead to a successful career.
Equivalent to: EXSS 559

KIN 560, MOTIVATION IN PHYSICAL ACTIVITY, 3 Credits
A social psychological approach to understanding the role of self-perceptions and cognitions in explaining motivated behavior in sport and exercise settings.
Equivalent to: EXSS 560
Recommended: KIN 370

KIN 561, PSYCHOSOCIAL FACTORS IN PHYSICAL ACTIVITY, 3 Credits
A social psychological approach to understanding the role of social interactions and contextual factors in explaining human behavior in sport and exercise settings.
Equivalent to: EXSS 561
Recommended: KIN 560

KIN 562, LIFESPAN SPORT AND EXERCISE PSYCHOLOGY, 3 Credits
Social-psychological issues across the lifespan in the context of sport and exercise.
Equivalent to: EXSS 562
Recommended: KIN 561

KIN 564, PROGRAM CAPSTONE AND SYNTHESIS, 3 Credits
Capstone course in which teacher candidates will review and update their teaching philosophy; showcase their Physical Education master’s portfolio; and develop a plan for professional development.
Prerequisite: KIN 510 with C- or better

KIN 565, MANAGEMENT OF EMERGENT CONDITIONS IN ATHLETIC TRAINING, 3 Credits
Examines the knowledge and skills required to care for emergent conditions encountered by the athletic trainer. Includes the management of a patient experiencing shock, cardiovascular emergency, respiratory emergency, head injury, spinal injury, fracture, dislocation, and conditions related to environmental factors.
Prerequisite: KIN 566 with C or better

KIN 566, GENERAL MEDICAL ASSESSMENT, 4 Credits
Prevention, evaluation, diagnosis, and management of general medical conditions commonly encountered by the athletic trainer.
Prerequisite: KIN 566 with C or better

KIN 567, PHARMACOLOGY IN ATHLETIC TRAINING, 3 Credits
Pharmacology in sports medicine, topics including, but not limited to, the mechanisms and actions of drugs commonly administered and prescribed in sports medicine environments.
Prerequisite: KIN 566 with C or better

KIN 568, ADMINISTRATIVE ISSUES IN ATHLETIC TRAINING, 3 Credits
Examines administrative aspects of athletic training program management. Including principles of risk management, strategic and operational planning, medical-legal aspects of athletic healthcare, confidentiality and documentation of patient health information, insurance and third-party reimbursement, personnel issues, and current professional issues.
Prerequisite: KIN 569 with C or better

KIN 569, RESEARCH INFORMED PRACTICE, 3 Credits
Examine the principles and skills underlying the utilization of evidence to enhance clinical practice decision-making. Includes the development of clinical questions, review and appraisal of relevant literature, and utilization of patient-centered outcome measures.
Prerequisite: KIN 520 with C or better

KIN 573, MEASUREMENT IN HUMAN MOVEMENT, 3 Credits
Equivalent to: EXSS 573
Recommended: ST 511

KIN 575, RESEARCH IN HUMAN MOVEMENT, 3 Credits
Investigation and evaluation of research methods applicable to human movement study and professional physical education
Equivalent to: EXSS 575
Recommended: ST 511
KIN 583, CONCUSSION MANAGEMENT, 3 Credits
Examines concussions and other traumatic brain injuries encountered by the athletic trainer. Includes the prevention, assessment, rehabilitation, and management of concussions.
Prerequisite: KIN 565 with C or better

KIN 584, PHYSIOLOGY AND MANAGEMENT OF MUSCULOSKELETAL INJURIES, 3 Credits
Mechanics of musculoskeletal tissue injuries; physiologic response and repair processes of various tissues; and effects of physical agents commonly used by athletic trainers in the care and treatment of musculoskeletal injuries.
Prerequisite: KIN 511 with C or better

KIN 585, REHABILITATION II, 4 Credits
Explores the theoretical foundation and techniques of rehabilitation management in the physically active patient. Emphasizes therapeutic exercise of injuries and conditions of the upper extremity, cervical and thoracic spine using techniques of program design learned in KIN 586. Examine theory and apply manual therapy interventions.
Prerequisite: KIN 586 with C or better

KIN 586, REHABILITATION I, 4 Credits
Explores the theoretical foundation and techniques of rehabilitation management in the physically active patient. Emphasizes therapeutic exercise of injuries and conditions of the lower extremity, lumbar spine, pelvis and ribs with a focus on program design, implementation and interpretation of patient's physical status.
Prerequisite: KIN 522 with C or better

KIN 599, SPECIAL TOPICS, 1-3 Credits
Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated when topics differ.
Equivalent to: EXSS 599
This course is repeatable for 99 credits.

KIN 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: EXSS 601
This course is repeatable for 16 credits.

KIN 603, THESIS, 1-16 Credits
Equivalent to: EXSS 603
This course is repeatable for 999 credits.

KIN 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: EXSS 605
This course is repeatable for 16 credits.

KIN 606, PROJECTS, 1-16 Credits
Equivalent to: EXSS 606
This course is repeatable for 16 credits.

KIN 607, SEMINAR, 1-16 Credits
Section 1: Graduate Research (1). Seminar emphasizes student oral presentations of current research topics in exercise and sport science. One credit required of all graduate students. Section 3: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N.
Equivalent to: EXSS 607
This course is repeatable for 16 credits.

KIN 610, PROFESSIONAL INTERNSHIP: PHYSICAL EDUCATION, 1-15 Credits
Field experience in which the term will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples.
Equivalent to: EXSS 610
This course is repeatable for 25 credits.

KIN 647, CURRENT TOPICS AND RESEARCH IN ADAPTED PHYSICAL ACTIVITY, 3 Credits
Current trends and critical research issues in adapted physical activity; focus on international and national trends. Topic will be variable.
Equivalent to: EXSS 647

KIN 699, SPECIAL TOPICS, 1-16 Credits
Current issues, trends, and topics in KIN research. May be repeated for credit with different topics.
Equivalent to: EXSS 699
This course is repeatable for 25 credits.

Nutrition (NUTR)

NUTR 104, ORIENTATION TO THE NUTRITION MAJOR, 1 Credit
Discuss and explore the academic and professional requirements for successful entry into professional careers in dietetics, foodservice systems management, and human nutrition sciences majors. Identify professional resources, career opportunities, markets and trends in these OSU Nutrition major options. Graded P/N.
Equivalent to: NFM 104
Available via Ecampus

NUTR 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: NFM 199
This course is repeatable for 16 credits.

NUTR 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.
NUTR 216, *FOOD IN NON-WESTERN CULTURE, 3 Credits
Cultural determinants influencing food habits of humans. Interrelation of eating patterns and socio-cultural, ecological, psychological and economic factors in cross-cultural settings. Roles of men and women in food provision. Lec/rec. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: NFM 216
Available via Ecampus

NUTR 225, GENERAL HUMAN NUTRITION, 3 Credits
The relationship of food, its nutrients and other components to the promotion of health and fitness with emphasis on the young adult. Current health concerns on a national and international level. This course is for non-majors; NES majors and those in the health sciences should take NUTR 240.
Equivalent to: NFM 225
Available via Ecampus

NUTR 235, SCIENCE OF FOODS, 5 Credits
Composition, functional properties, and structure of foods, including modified ingredients. Principles underlying preparation of food products of standard quality. Lec/lab.
Prerequisite: CH 123 with C- or better or CH 223 with C- or better or (CH 263 with C- or better or CH 263H with C- or better or CH 273 with C- or better) and (CH 233 [C-] or CH 233H [C-])
Equivalent to: NFM 235

NUTR 240, HUMAN NUTRITION, 3 Credits
An introductory nutrition course for exercise science, nutrition, dietetics, food science, and health science majors who have taken general chemistry. Concepts of nutrient metabolism and utilization, nutrient deficiencies and toxicities and their relationship to disease prevention and treatment.
Prerequisite: CH 121 with C- or better or CH 224H with C- or better or (CH 221 with C- or better or CH 231 with C- or better or CH 231H with C- or better)
Equivalent to: NFM 240
Available via Ecampus

NUTR 241, APPLICATIONS IN HUMAN NUTRITION, 1 Credit
Application of nutrition theory from NUTR 240 using a dietary project and hands-on recitation activities. A key focus of the course will be on applying nutrition theory. Rec.
Prerequisite: NUTR 240 (may be taken concurrently) with C- or better
Equivalent to: NFM 241
Available via Ecampus

NUTR 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Equivalent to: NFM 299

NUTR 306, PROJECTS, 1-16 Credits
This course is repeatable for 36 credits.

NUTR 307, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

NUTR 311, FOODSERVICE PRODUCTION AND PURCHASING, 4 Credits
Food production, purchasing, facility and materials management in foodservice operations. Quantity production styles, safety and sanitation, service methods and equipment. Lec/lab/rec.
Prerequisite: NUTR 235 with C- or better
Equivalent to: NFM 311

NUTR 312, *ISSUES IN NUTRITION AND HEALTH, 3 Credits
Impact of nutrition as one component of complex environmental, behavioral, social, and genetic factors significant to health promotion. Apply scientific knowledge to current health issues of changing dietary patterns, technological development in food products and nutrition controversies. Recognize economic and public policy implications. Lec/rec. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: NUTR 225 with C- or better or NUTR 240 with C- or better
Equivalent to: NFM 312
Recommended: Completion of science requirement in Bacc Core
Available via Ecampus

NUTR 319, PROMOTING FOOD AND NUTRITION, 3 Credits
Strategies in promoting products, services or ideas; negotiating, advertising, public policy, consumer service, social marketing, market research, trends and strategies. Lec/lab.
Prerequisite: NUTR 240 with C- or better and NUTR 241 [C-]
Equivalent to: NUTR 219
Available via Ecampus

NUTR 325, NUTRITION THROUGH THE LIFE CYCLE, 3 Credits
Nutritional needs and concerns in pregnancy and lactation, infancy, childhood, adolescence, adult and later years.
Prerequisite: (NUTR 240 with C- or better or NUTR 225 with C- or better) and NUTR 241 [C-]
Equivalent to: NFM 325
Recommended: Junior standing
Available via Ecampus

NUTR 341, NUTRITION FOR EXERCISE, 4 Credits
Review of the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSLISTED as KIN 341/NUTR 341.
Prerequisite: KIN 324 with C- or better and NUTR 240 [C-]
Equivalent to: EXSS 341, KIN 341
Available via Ecampus

NUTR 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Equivalent to: NFM 399

NUTR 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
Equivalent to: NFM 401
NUTR 403, THESIS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 403
This course is repeatable for 16 credits.

NUTR 405, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: NFM 405
This course is repeatable for 16 credits.

NUTR 406, SPECIAL PROBLEMS; PROJECTS, 1-16 Credits
Equivalent to: NFM 406
This course is repeatable for 16 credits.

NUTR 407, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: NFM 407
This course is repeatable for 16 credits.

NUTR 408, WORKSHOP, 1-16 Credits
Graded P/N.
Equivalent to: NFM 408
This course is repeatable for 16 credits.

NUTR 409, PRACTICUM, 1-16 Credits
Equivalent to: NFM 409
This course is repeatable for 16 credits.

NUTR 410, FIELD EXPERIENCE, 1-15 Credits
Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. For advanced students. Applications made and approved term preceding enrollment. Graded P/N.
Equivalent to: NFM 410
This course is repeatable for 50 credits.
Available via Ecampus

NUTR 416, ^CULTURAL ASPECTS OF FOODS, 3 Credits
Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: NUTR 235 with C- or better
Equivalent to: NFM 416

NUTR 417, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Prerequisite: BB 350 with C- or better
Equivalent to: NFM 417
Recommended: One physiology course

NUTR 418, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Prerequisite: NUTR 417 with C- or better
Equivalent to: NFM 418
Recommended: Biochemistry and physiology

NUTR 423, COMMUNITY NUTRITION, 4 Credits
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist.
Prerequisite: NUTR 325 with C- or better
Equivalent to: NFM 423

NUTR 430, MEDICAL NUTRITION THERAPY I, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec.
Prerequisite: (BB 350 with C- or better or (BB 450 with C- or better and BB 451 [C-]) and (BI 233 [C-] or BI 332 [C-]) and (BI 242 [C-] or BI 342 [C-]) and (BI 233 [C-] or BI 333 [C-]) and (BI 243 [C-] or BI 343 [C-]) and NUTR 417 (may be taken concurrently) [C-] and NUTR 439 [C-]

NUTR 431, MEDICAL NUTRITION THERAPY 2, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Prerequisite: NUTR 430 with C- or better

NUTR 432, MEDICAL NUTRITION THERAPY 3, 3 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Prerequisite: NUTR 431 with C- or better

NUTR 439, ^COMMUNICATIONS IN DIETETICS, 3 Credits
Theory and practice in food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: NUTR 325 with C- or better
Equivalent to: NFM 439
NUTR 446, MANAGING FOOD AND NUTRITION SERVICES, 4 Credits
Overview of organizational structure, functions of managers in food and nutrition service organizations: human and financial resources, regulatory influences, health care organizations, current issues in operations. Lec/rec.
Prerequisite: NUTR 311 with C- or better
Equivalent to: NFM 446

NUTR 447, MANAGEMENT OF FOOD SYSTEMS LABORATORY, 3 Credits
Application of theory in managing a university food service as part of a student team: planning, production, projecting resource needs, evaluation of outcomes and financial goals.
Equivalent to: NFM 447
Recommended: NUTR 446 or NUTR 546

NUTR 499, SPECIAL TOPICS IN DIETETICS, 1-16 Credits
Current issues, trends, and topics in nutrition and dietetics. May be repeated for credit when topic varies.
Equivalent to: NFM 499
This course is repeatable for 16 credits.

NUTR 501, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: NFM 501
This course is repeatable for 16 credits.

NUTR 502, INDEPENDENT STUDY, 1-16 Credits
Graded P/N.
Equivalent to: NFM 502
This course is repeatable for 16 credits.

NUTR 503, THESIS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 503
This course is repeatable for 999 credits.

NUTR 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: NFM 505
This course is repeatable for 16 credits.
Available via Ecampus

NUTR 506, SPECIAL PROBLEMS; PROJECTS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 506
This course is repeatable for 16 credits.
Available via Ecampus

NUTR 507, SEMINAR, 1-16 Credits
1 credit graded P/N.
Equivalent to: NFM 507
This course is repeatable for 16 credits.

NUTR 508, WORKSHOP, 1-16 Credits
Graded P/N.
Equivalent to: NFM 508
This course is repeatable for 16 credits.

NUTR 509, PRACTICUM, 1-16 Credits
Graded P/N.
Equivalent to: NFM 509
This course is repeatable for 16 credits.

NUTR 510, FIELD EXPERIENCE: INTERNSHIP, 1-16 Credits
Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. Limited to students admitted to degree program. Application made and approved in the term preceding enrollment. No more than 6 credits may be applied to a master's degree program.
Equivalent to: NFM 510
This course is repeatable for 6 credits.
Available via Ecampus

NUTR 514, HEALTH BENEFITS OF FUNCT FOODS, NUTRACEUT, DIETARY SUPPLEMEN, 3 Credits
Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. CROSSLISTED as FST 514/NUTR 514.
Equivalent to: FST 514, NFM 514
Recommended: BB 350 and CH 332

NUTR 516, CULTURAL ASPECTS OF FOODS, 3 Credits
Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab.
Equivalent to: NFM 516
Recommended: NUTR 235

NUTR 517, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Equivalent to: NFM 517
Recommended: BB 350 and one physiology course

NUTR 518, HUMAN NUTRITION SCIENCE, 4 Credits
Application of biochemistry and physiology to nutrition of the individual.
Prerequisite: NUTR 517 with C or better
Equivalent to: NFM 518
Recommended: biochemistry, physiology.
NUTR 523, COMMUNITY NUTRITION, 4 Credits
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist.
Equivalent to: NFM 523
Recommended: NUTR 325

NUTR 525, ORGANIC FOOD AND HEALTH: EVIDENCE AND CONSUMER PERCEPTIONS, 3 Credits
Overview of organic food including an understanding of the definition, certifications and labeling; basic production comparisons with conventional foods, evidence for comparisons between organic and conventionally produced foods; consumer attitudes and perceptions regarding organic foods.
Available via Ecampus

NUTR 530, MEDICAL NUTRITION THERAPY I, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Recommended: (BB350 or (BB450 and BB 451)) and (BI 232 or BI 332) and (BI 242 or BI 342) and (BI 233 or BI 333) and (BI 243 or BI 343) and NUTR 439 and completion or concurrent enrollment in NUTR 417

NUTR 531, MEDICAL NUTRITION THERAPY 2, 4 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Recommended: NUTR 430

NUTR 532, MEDICAL NUTRITION THERAPY 3, 3 Credits
Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions addressed during the three-course sequence using lecture, case studies and assessment recitation sessions.
Recommended: NUTR 431

NUTR 535, NUTRITION AND EXERCISE: MACRONUTRIENTS AND ENERGY METABOLISM, 3 Credits
Current research examining the interrelationship of macronutrients and exercise and energy balance will be reviewed, including their roles in health, disease prevention and exercise performance.
Equivalent to: NFM 535
Recommended: NUTR 517 or KIN 533

NUTR 539, COMMUNICATIONS IN DIETETICS, 3 Credits
Theory and practice of food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies.
Equivalent to: NFM 539
Recommended: NUTR 325

NUTR 546, FOODSERVICE ORGANIZATIONS, 3 Credits
Overview of organizational structure, functions of managers in foodservice organizations: human resources, regulatory influences, health care organizations, current issues in operations. Lec/rec.
Equivalent to: NFM 546
Recommended: NUTR 311 and NUTR 445

NUTR 550, NUTRITIONAL STATUS, 4 Credits
Research studies with emphasis on estimation of nutrient intake and assessment of nutritional status, including biochemical, clinical, epidemiological and anthropometric measures. Interpretation of status indicators.
Equivalent to: NFM 550
Recommended: NUTR 418 or NUTR 518

NUTR 551, ADVANCED MEDICAL NUTRITION THERAPY, 4 Credits
This advanced course includes evidence-based practices and standards of care available to address complex scenarios for which medical nutrition therapy is an integral part of patient care. Students will build on prior assessment, nutritional diagnostic, implementation, monitoring, evaluation and documentation skills relevant to dietetics practice. Lecture, readings, case studies including professional documentation and expert guests will be used to illustrate medical nutrition therapy addressing topics such as as domestic malnutrition, nutrition support, pediatric nutrition, eating disorders, diabetes and geriatric nutrition.
Available via Ecampus

NUTR 552, FOOD AND NUTRITION PROGRAM MANAGEMENT AND EVALUATION, 4 Credits
Introduction to the evaluation of outcomes and impacts of food/nutrition-related systems, performance, interventions, programs and/or policies. Application of methods used to appraise problems or activities, as well to conceptualize, create, implement and administer evaluations in order to make decisions regarding their outcomes, impacts, efficiency and cost effectiveness. A case study approach across a range of food and nutrition-related public, government and private organizations will introduce the breadth of approaches in such evaluations.
Available via Ecampus
NUTR 553, DIETARY BEHAVIOR AND COUNSELING, 4 Credits
Strategies for navigating dietary behavior using collaborative, patient centered, goal-oriented approaches. Introduces the theoretical framework around dietary behavior and motivational interviewing with methods regarding the language of change and creating client/patient interest in change. Guided practice and focus on development of skills.

NUTR 599, SPECIAL TOPICS IN NUTRITION, 1-16 Credits
Current issues, trends, and topics in nutrition and health. May be repeated for credit when topic varies.
Equivalent to: NFM 599
This course is repeatable for 16 credits.

NUTR 601, RESEARCH, 1-16 Credits
Equivalent to: NFM 601
This course is repeatable for 16 credits.

NUTR 602, INDEPENDENT STUDY, 1-16 Credits
Graded P/N.
Equivalent to: NFM 602
This course is repeatable for 16 credits.

NUTR 603, THESIS, 1-16 Credits
Graded P/N.
Equivalent to: NFM 603
This course is repeatable for 999 credits.

NUTR 605, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: NFM 605
This course is repeatable for 16 credits.

NUTR 607, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: NFM 607
This course is repeatable for 16 credits.

NUTR 609, PRACTICUM, 1-16 Credits
Equivalent to: NFM 609
This course is repeatable for 16 credits.

NUTR 610, INTERNSHIP, 1-16 Credits
Graded P/N.
Equivalent to: NFM 610
This course is repeatable for 16 credits.

NUTR 617, ADVANCED MACRONUTRIENT METABOLISM, 3 Credits
Focuses on human macronutrient metabolism. Macronutrient topics include water, carbohydrate, lipid, amino acid/protein, lipid and carbohydrate and energy metabolism. Emphasis is placed on the integration of metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to macronutrient metabolism and human disease. Offered even years in spring term.
Equivalent to: NFM 617
Recommended: NUTR 418 or NUTR 518

NUTR 618, ADVANCED MICRONUTRIENT METABOLISM, 3 Credits
Focus is on human micronutrient metabolism. Topics include micronutrients (vitamins and minerals), phytochemicals and mammalian metabolism. Emphasis will be placed on the integration of micronutrient/phytochemical metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to micronutrient/phytochemical metabolism and human disease.
Equivalent to: NFM 618
Recommended: NUTR 418 or NUTR 518 and basic knowledge of biochemistry and physiology

NUTR 699, SPECIAL TOPICS IN NUTRITION RESEARCH, 1-16 Credits
Current issues, trends, and topics in nutrition research. May be repeated for credit when topic varies.
Equivalent to: NFM 699
This course is repeatable for 16 credits.

Physical Activity Courses (PAC)
PAC 100, ADAPTED PHYSICAL ACTIVITY, 1 Credit
Individual workout for students with permanent or temporary physical disabilities and for students enrolled in another PAC who sustain an injury.
This course is repeatable for 11 credits.

PAC 102, AQUA AEROBICS, 1 Credit
Fitness class using a variety of movements in shallow and deep water, mostly in a vertical position. Do not need swimming skills.
Equivalent to: PAC 101
This course is repeatable for 11 credits.

PAC 103, DEEP WATER FITNESS, 1 Credit
Fitness class using a variety of movements in a deep water pool, mostly in a vertical position. Should be comfortable in deep water.
This course is repeatable for 11 credits.

PAC 104, ARCHERY, 1 Credit
Basic mechanics and introduction to archery. Exposure to varying archery techniques and equipment, including recurve and compound bow shooting.
This course is repeatable for 11 credits.
PAC 105, CPR/FIRST AID, 1 Credit
Introduces cardiac and first aid emergency response procedures. Emphasis placed on safe response, chain of survival, quality CPR (adults, children, infants and team responses), use of an AED, medical emergencies, injury emergencies and environmental emergencies. Students successfully completing the American Heart Association certification requirements will be issued a Heartsaver First Aid and BLS (Basic Life Support) for the Healthcare Provider certification at the end of the course. This course is repeatable for 11 credits.

PAC 106, BEAVER FIT, 1 Credit
A conditioning class for those of all fitness levels that focuses on mobility, functional movement, and high-intensity interval training as a means to improve cardiovascular fitness, muscular fitness, and flexibility. This course is repeatable for 11 credits.

PAC 108, STEP AEROBICS, 1 Credit
Low-impact, high intensity workout adjustable to all fitness levels utilizing adjustable height benches. Strengthening and flexibility exercises included. This course is repeatable for 11 credits.

PAC 110, INTRODUCTION TO WHITE WATER KAYAKING, 2 Credits
Students will learn fundamentals of white water kayaking in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks. This course is repeatable for 11 credits.

PAC 111, INTRODUCTION TO CANOEING, 2 Credits
Students will learn fundamentals of canoeing in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks. This course is repeatable for 11 credits.

PAC 112, LEARNING KAYAK ROLLING BASICS, 2 Credits
Students learn fundamentals of rolling a kayak in an indoor pool-based environment. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course is repeatable for 10 credits.

PAC 113, BADMINTON I, 1 Credit
Singles and doubles skills, practice, rules, strategies and play. This course is repeatable for 11 credits.

PAC 114, BADMINTON II, 1 Credit
Intermediate skill development in badminton. This course is repeatable for 11 credits. Recommended: Fundamental skills, rules and strategy of singles and doubles play.

PAC 115, OUTDOOR LIVING SKILLS, 2 Credits
Educates and introduces students on how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. Classroom and field (lab) experience. Includes one mandatory weekend overnight outing. CROSSLISTED as PAC 115/TRAL 115. Equivalent to: TRAL 115. This course is repeatable for 4 credits.

PAC 116, BASKETBALL I (MEN/WOMEN), 1 Credit
Fundamental basketball skills, drills, rules, strategies, and practice. Game play appropriate for the skill level. This course is repeatable for 11 credits.
Recommended: Prior competitive experience.

PAC 117, BASKETBALL COMPETITIVE, 1 Credit
Team play, individual and team skills developed and refined, competitive round robin tournaments. This course is repeatable for 11 credits.

PAC 118, LABORATORY FOR OUTDOOR LIVING SKILLS, 1 Credit
Practical field application of concepts learned in PAC 115/TRAL 115, Outdoor Living Skills. Field (lab) experience includes one mandatory weekend overnight. Introduces how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. CROSSLISTED as PAC 118/TRAL 118. Corequisites: PAC 115. Equivalent to: TRAL 118. This course is repeatable for 2 credits.

PAC 120, MOUNTAIN BIKING, 1 Credit
Touring trails in Corvallis area; riding techniques, safety, maintenance, environmental concerns. Required equipment: mountain bike, tire repair kit, helmet. This course is repeatable for 11 credits.

PAC 121, BILLIARDS, 1 Credit
Skills, technique, strategy, game knowledge as introduction to billiards (pool), a ‘cue’ sport; rules and gaming for variations of pocket billiards; practice and class tournament play. This course is repeatable for 11 credits.

PAC 122, BODY SCULPTING, 1 Credit
Fitness workout set to music using lighter resistance training aids such as dumbbells, resistance tubing, bands, and aerobic steps. This course is repeatable for 11 credits.
PAC 123, BOWLING I, 1 Credit
Fundamentals of the game including etiquette, spot bowling, natural hook and straight ball delivery, scoring, handicap computation, spare pickup, and error correction. Additional fee; equipment supplied.
This course is repeatable for 11 credits.

PAC 124, BOWLING II, 1 Credit
Review and refinement of basic fundamentals of bowling. Emphasis on spot bowling, adjusting for lane conditions, choices in equipment, league play, and mental training.
This course is repeatable for 11 credits.
Recommended: Bowling I or the ability to bowl above a 110 average

PAC 126, CARDIO KICKBOXING I, 1 Credit
High intensity group workout set to motivational music and combining skills and techniques from boxing, kickboxing, and other martial arts.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 129, CARDIO COMBO, 1 Credit
Combination of aerobic training classes that use music such as Cardio Kickboxing, Body Sculpture, Sports Conditioning, and/or Step Aerobics. Actual curriculum may vary with instructors.
This course is repeatable for 11 credits.

PAC 130, CONDITIONING, 1 Credit
Total body approach to fitness, cardiorespiratory conditioning, muscular strength and endurance; flexibility emphasized. May follow a specific training format, e.g., ROTC section follows Army conditioning format.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 131, SNOWBOARD-SKI CONDITIONING, 1 Credit
Strength, muscular endurance, flexibility, balance, and cardiovascular exercises specific to downhill skiing and snowboarding; designed to help prepare students for participation in these sports.
This course is repeatable for 11 credits.

PAC 133, DANCE: TAP I, 1 Credit
Individual and group dance with specialized shoes; basic step technique and vocabulary; warm up exercises progressing into rhythmic combinations performed to music; culminates in full routine to music.
This course is repeatable for 11 credits.

PAC 136, DANCE: BALLET I, 1 Credit
Introduction to basic ballet technique and aesthetics, terminology, alignment, stretch and strength exercises. No previous dance experience needed. Additional fee for accompanist.
This course is repeatable for 11 credits.

PAC 137, DANCE: BALLET II, 1 Credit
Review and practice of beginning ballet technique, introduction of more advanced stretches, steps, and combinations. Additional fee for accompanist.
This course is repeatable for 11 credits.
Recommended: Ballet I or previous ballet experience.

PAC 138, DANCE: BALLET III, 1 Credit
Intermediate and advanced ballet technique, comprehensive exploration of the discipline. Additional fee for accompanist.
This course is repeatable for 11 credits.
Recommended: Ballet II, previous comparable experience

PAC 139, HIP HOP DANCE, 1 Credit
Aerobic/energetic experience consisting of a warm-up/conditioning and choreographic combinations.
This course is repeatable for 11 credits.

PAC 140, DANCE: JAZZ I, 1 Credit
Introduction to jazz dance, technique, isolations, and combinations. Different jazz styles are explored. No previous dance experience is necessary.
This course is repeatable for 11 credits.

PAC 141, DANCE: JAZZ II, 1 Credit
Intermediate jazz technique, isolations and combinations.
This course is repeatable for 11 credits.
Recommended: Jazz I or comparable experience.

PAC 145, DANCE: MODERN I, 1 Credit
Introduction to modern dance movement fundamentals. Technique, stretch, strength, and alignment are included, as well as an appreciation for movement expression. No previous dance experience needed. Additional fee for accompanist.
Equivalent to: PAC 145H
This course is repeatable for 11 credits.

PAC 145H, DANCE: MODERN I, 1 Credit
Introduction to modern dance movement fundamentals. Technique, stretch, strength, and alignment are included, as well as an appreciation for movement expression. No previous dance experience needed.
Additional fee for accompanist.
Attributes: HNRS – Honors Course Designator
Equivalent to: PAC 145
This course is repeatable for 11 credits.

PAC 146, DANCE: MODERN II, 1 Credit
An intermediate level of modern dance technique and movement expression. Additional fee for accompanist.
This course is repeatable for 11 credits.
Recommended: Modern Dance I or comparable experience.

PAC 148, DANCE: CUBAN SALSA I (LEAD/FOLLOW), 1 Credit
Foundations of Cuban Salsa (Casino) as well as Rueda de Casino with focus on musical development and fundamentals of leading and following in partner dance.
This course is repeatable for 11 credits.

PAC 149, DANCE: CUBAN SALSA II, 1 Credit
Higher concepts of Cuban Salsa (Casino) as well as Rueda de Casino, with focus on musical development and fundamentals of leading and following in partner dance.
This course is repeatable for 11 credits.
Recommended: Cuban Salsa I or comparable experience.
PAC 151, COUNTRY LINE DANCE, 1 Credit
Non-partner dance routines in country western style; musical interpretation, footwork, and sequencing of 20 different routines. This course is repeatable for 11 credits.

PAC 152, DANCE: SALSA I, 1 Credit
Steps and rhythmic accent of Salsa and Merengue style; fundamentals of leading and following; basic moves and combinations. No prior experience needed. This course is repeatable for 11 credits.

PAC 153, DANCE: SALSA II, 1 Credit
Intermediate moves, rhythmic accents and step combinations of Salsa; development of leading and following. Prerequisite: PAC 152 with C- or better This course is repeatable for 11 credits.

PAC 154, DANCE: COUNTRY WESTERN I (LEAD/FOLLOW), 1 Credit
Focus on traditional Country Western Swing patterns. Emphasizes fundamentals of leading and following. Also including introduction to waltz, two-step, cowboy cha-cha and 10-step polka. Equivalent to: PAC 144 This course is repeatable for 11 credits.

PAC 155, DANCE: COUNTRY WESTERN II (LEAD/FOLLOW), 1 Credit
Build on CW I with advanced waltz, two-step, and cha-cha patterns; introduces schottishe and East Coast swing. This course is repeatable for 11 credits. Recommended: Country Western I or comparable experience

PAC 156, DANCE: COUNTRY WESTERN III (LEAD/FOLLOW), 1 Credit
Advanced two-step patterns and styling with a focus on musical interpretation; development of leading and following. Prerequisite: PAC 155 with C- or better This course is repeatable for 11 credits.

PAC 158, DANCE: BEGINNING SWING (LEAD/FOLLOW), 1 Credit
Introduction to single time, double time, and triple time (jitterbug) swing; variations for each style, covering most swing music rhythms. Emphasizes fundamentals of leading and following. This course is repeatable for 11 credits.

PAC 159, DANCE: BALLROOM I (LEAD/FOLLOW), 1 Credit
Posture and alignment, fundamentals of leading and following, basic steps and variations for waltz, foxtrot, swing, tango, and cha-cha. Equivalent to: PAC 134 This course is repeatable for 11 credits.

PAC 160, DANCE: BALLROOM II (LEAD/FOLLOW), 1 Credit
Additional steps and patterns of popular ballroom dances. Prerequisite: PAC 159 with C- or better Equivalent to: PAC 135 This course is repeatable for 11 credits.

PAC 161, DANCE: BALLROOM III (LEAD/FOLLOW), 1 Credit
Styling; additional dances: rhumba, silver fox trot, and Viennese waltz; advanced dance figures for tango and cha-cha. Prerequisite: PAC 160 with C- or better This course is repeatable for 11 credits.

PAC 163, DANCE: LATIN I, 1 Credit
Latin dances including cha-cha, mambo, salsa, rhumba, merengue, bolero, salsa, and paso doble. Emphasis on proper styling and technical execution of each dance; effective leading and following techniques. Prerequisite: PAC 159 with C- or better This course is repeatable for 11 credits.

PAC 165, DANCE: WEST COAST SWING (LEAD/FOLLOW), 1 Credit
Focus on style, technique and many different step patterns of the west coast swing dance. Prerequisite: PAC 154 with C- or better or PAC 159 with C- or better Equivalent to: PAC 162 This course is repeatable for 11 credits.

PAC 166, BALLROOM 2 STEP, HUSTLE (LEAD/FOLLOW), 1 Credit
Smooth, romantic social dance that is neither ballroom, Latin, nor swing but a rhythm dance identified as club-style, danced to contemporary ballad-like music. Hustle is fast-paced, swing-related dance to disco beat. Class encompasses intermediate step patterns, technique and styling, stationery, traveling patterns. Prerequisite: PAC 160 with C- or better This course is repeatable for 11 credits.

PAC 167, DANCE: LINDY HOP, 1 Credit
Ballroom dance style based on original eight-count swing dance evolved in Harlem ballrooms during the late 1920s; styling emphasized. Prerequisite: PAC 158 with C- or better or PAC 159 with C- or better This course is repeatable for 11 credits.

PAC 168, DANCE: LINDY HOP II (LEAD/FOLLOW), 1 Credit
Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation in the Lindy Hop style; development of leading and following. Prerequisite: PAC 167 with C- or better This course is repeatable for 11 credits.
PAC 169, COOL SHOES, BALLROOM PERFORMANCE, 2 Credits
Learn and perform ballroom dance routines on an intermediate level. This course is a full year commitment ending with a dance concert in the spring. This course is repeatable for 12 credits.

PAC 170, DANCE: WEST COAST SWING II (LEAD/FOLLOW), 1 Credit
Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation; development of leading and following. Prerequisite: PAC 165 with C- or better This course is repeatable for 11 credits.

PAC 173, INTERMEDIATE ROCK CLIMBING, 2 Credits
Introduces variety of basic skills, gear and systems that will allow them to safely participate in a single pitch rock climbing environment based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Presents students with various technical skills that will serve as a foundation for future land-based outdoor disciplines. Students will be introduced to gear, such as software (ropes, webbing, harnesses) and hardware (carabiners, friction devices); skills, such as knots, belaying, rappelling, lead climbing; and systems such as anchors and basic rescue techniques. CROSSTEXTED as PAC 173/TRAL 173. Equivalent to: TRAL 173 This course is repeatable for 10 credits.

PAC 174, FLAG FOOTBALL, 1 Credit
Skill instruction and practice; drills; strategies, game play of American football; emphasis on teamwork and sportsmanship in a competitive but non-threatening or stressful environment. This course is repeatable for 11 credits.

PAC 178, FLY FISHING I, 1 Credit
Casting and fishing techniques, lure making, equipment selection, terminology, and regulation for fishing in Oregon's marine environment. This course is repeatable for 11 credits.

PAC 179, FLY FISHING II, 1 Credit
Advanced fly casting and fly fishing techniques for trout, fly-tying, equipment selection, basic aquatic organism identification, terminology, and regulations for fishing in Oregon's freshwater environment. This course is repeatable for 11 credits.

PAC 180, STEELHEAD FISHING, 1 Credit
Casting and fishing techniques, lure making, equipment selection, terminology, and regulations for fishing in Oregon's marine environment for steelhead. This course is repeatable for 11 credits.

PAC 182, DISC GOLF I, 1 Credit
Techniques for throwing discs; equipment, knowledge, etiquette, and rules associated with playing a disc golf course; experience playing practice and official disc golf courses. This course is repeatable for 11 credits.

PAC 184, GOLF I, 1 Credit
Basic fundamental principles in all phases of golf; rules, terminology, etiquette, safety and scoring. Equipment provided. This course is repeatable for 11 credits.

PAC 185, GOLF II, 1 Credit
Individual practice and course play; skill refinement as continuation of Golf I. Equipment available. Course play expected, additional fee. This course is repeatable for 11 credits. Recommended: Golf I

PAC 186, GOLF III, 1 Credit
Advanced skills, knowledge involved in competitive play. Course play expected, additional fee. This course is repeatable for 11 credits. Recommended: Handicap below 15 or Golf II; competitive play.

PAC 188, GYMNASTICS, 1 Credit
Fundamental techniques on vault, bars, beam, and floor. This course is repeatable for 11 credits.

PAC 189, GYMNASTICS II, 1 Credit
Advanced skills, knowledge involved in competitive play. Course play expected, additional fee. This course is repeatable for 11 credits. Recommended: Gymnastics I or competitive experience.

PAC 190, KARATE, 1 Credit
Instruction in traditional Japanese karate basic striking and blocking techniques, kata (forms), philosophy, conditioning, and etiquette. Self-defense applications are also emphasized. Equivalent to: PAC 183 This course is repeatable for 11 credits.

PAC 191, BRAZILIAN JIU-JITSU, 1 Credit
Basic level grappling self-defense techniques and applying them in sparring sessions along with understanding the core principles which make this martial arts system effective. An introduction to the history of Brazilian Jiu-jitsu along with proper gym etiquette, vocabulary, and culture. This course is repeatable for 11 credits.

PAC 192, JUDO I, 1 Credit
Skill instruction in landing, throwing and grappling for this style of martial arts; etiquette for practice and competition; basic knowledge of vocabulary, rules and scoring. This course is repeatable for 11 credits.

PAC 193, JUDO II, 1 Credit
Intermediate skill instruction in landing, throwing, pins, chokes in Kodokan Judo style; principles of Seiryoku-Zenyou and Jita-Kyouei designed to help individuals become better members of society through training body and mind; instruction for competition knowledge and skills. Judo etiquette for practice and competition expected. This course is repeatable for 11 credits. Recommended: Judo I or comparable experience.
PAC 194, PILATES, 1 Credit
Non-impact, invigorating approach to physical conditioning and mind/body awareness; helps develop core body strength, improve posture and balance, and increase muscle endurance, tone, flexibility. 
This course is repeatable for 11 credits.
Available via Ecampus

PAC 195, PILATES II, 1 Credit
Progression of Joseph Pilates mat exercises; emphasis on intermediate and advanced levels; application of Pilates’ principles to new exercises; use of props; application of principles to daily living. 
This course is repeatable for 11 credits.
Recommended: PAC 194, Pilates.

PAC 197, PICKLEBALL, 1 Credit
Fast-paced, self-officiated net game with similarities to tennis, badminton, table tennis, and racquetball. Course covers rules, strategies, technique, preparation for play, and includes extensive active practice and play; played with two, three, or four people.
This course is repeatable for 11 credits.

PAC 199, SPECIAL TOPICS, 1-3 Credits
Experimental or new classes.
This course is repeatable for 11 credits.

PAC 201, RELAXATION, 1 Credit
Introduction to techniques that promote relaxation of the nervous system. These may include, but are not limited to: meditation, imagery, yoga postures, and self-massage. Students will be encouraged to reflect on how life choices influence their nervous system.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 202, MEDITATION, 1 Credit
Examine the application of building simple awareness, how to manage thoughts in productive and compassionate ways, and how to transfer these skills into healthy relationships. Explore strategies for managing mental and physical difficulties including anxiety, pain, and overall stress through experiential learning and personal sharing of experiences.
This course is repeatable for 11 credits.

PAC 203, OBSERVATION & ASSISTANT INSTRUCTIONAL PRACTICE IN PHYS ACT, 1 Credit
Observe and begin physical activity instruction within dance, yoga, sports, fitness, aquatics, martial arts, or cross-disciplinary physical activities. Used in several of the leadership training program curriculums.
This course is repeatable for 11 credits.

PAC 204, LEAD INSTRUCTIONAL PRACTICE IN PHYSICAL ACTIVITY, 1 Credit
Lead physical activity curriculum within dance, yoga, fitness, aquatics, sports, martial arts, or cross-disciplinary physical activities. Gain experience implementing already designed lesson plans, assessment, and leading peers through basic exercise, while supervised by university and program personnel.
Prerequisite: PAC 203 with C- or better
This course is repeatable for 11 credits.

PAC 205, ROWING, CREW I (MEN/WOMEN), 1 Credit
Introduction to the sport of rowing; designed for the novice (beginner). Includes basic technique and terminology, related water safety, and development of strength, endurance, and flexibility.
This course is repeatable for 11 credits.
Recommended: Swim Test (1).

PAC 208, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

PAC 212, RUNNING, JOGGING, 1 Credit
Cardiorespiratory fitness with scenic running routes; training, nutrition, and physiology. Beginning and intermediate level.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 213, RUNNING: 10K TRAINING, 1 Credit
Intermediate to advanced conditioning and training program for road racing.
This course is repeatable for 11 credits.
Recommended: Prior training in running.

PAC 214, HALF MARATHON TRAINING, 2 Credits
Progressive training combining walking, running, core strengthening, interval techniques in preparation for a 13.1 mile (1/2 marathon) event. Open to all levels; may choose to walk, walk/run, or run.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 217, SELF DEFENSE, 1 Credit
Nonviolent self-defense. Develop self-confidence and skills for assault situations. Conditioning and practical skills. Men and women, all levels.
This course is repeatable for 11 credits.

PAC 224, TELEMARK SKIING, 1 Credit
Winter sport that is a cross between cross country and downhill skiing. Requires telemark equipment where the heel is unattached. Class accommodates all levels and practices on the downhill slopes. Additional fee covers bus transportation, lessons, and lift ticket. Rental of equipment is not included.
This course is repeatable for 11 credits.

PAC 225, DOWNHILL SKIING, 1 Credit
Travel to area facilities, 1-1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced, racer. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals.
This course is repeatable for 11 credits.
PAC 227, SNOWBOARDING, 1 Credit
Travel to area facilities, 1 1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals.
This course is repeatable for 11 credits.

PAC 229, SOCCER I, 1 Credit
Basic skills of controlling the ball; conditioning; lead-up games; team play.
Equivalent to: PAC 211
This course is repeatable for 11 credits.

PAC 230, SOCCER II, 1 Credit
Review of basic skills of offense and defense in controlled game play; concepts of team position and play, pressure and attack.
This course is repeatable for 11 credits.
Recommended: Previous soccer experience.

PAC 231, SOCCER III, 1 Credit
High level soccer skills; team play and transition concepts; set plays and alignments for both offense and defense.
This course is repeatable for 11 credits.

PAC 233, SOCCER: INDOOR, 1 Credit
Skill instruction and development; strategies and rules for indoor play; game play in indoor gymnasium.
This course is repeatable for 11 credits.

PAC 236, SOFTBALL, WHIFFLEBALL, 1 Credit
Skills, rules, strategies, practice, and game play of the popular outdoor slow pitch game. Modified softball with whiffleball when play is indoors.
This course is repeatable for 11 credits.

PAC 242, SCUBA: OPEN WATER, 2 Credits
Lecture includes physiology, water environment, equipment, and techniques for fundamental SCUBA diving. Laboratory includes practice in techniques, skills, and equipment usage; sessions held in pool and open water. Successful completion leads to PADI certification. Additional fee covers most equipment, texts, certification, and open water dive trip.
This course is repeatable for 11 credits.
Recommended: 200-yard swim, 10-minute survival skills and good health.

PAC 243, SCUBA: ADVANCED OPEN WATER, 1 Credit
Classroom lecture and laboratory in hypothermics, natural navigation, dive physiology, compass navigation, night and limited visibility procedures, boat diving, search and salvage techniques, deep diving procedures, health for diving, and an introduction to dive rescue. Successful completion of this course can lead to PADI certification. Additional fee.
Equivalent to: PAC 228
This course is repeatable for 11 credits.
Recommended: PAC 242 or PADI Open Water Certification

PAC 244, SCUBA: RESCUE DIVER, 1 Credit
Techniques, skills, knowledge, and practice in self-rescue and rescue of others in underwater emergencies; may lead to PADI certification; lecture and pool laboratory; open water dive required. Additional fee.
This course is repeatable for 11 credits.
Recommended: PAC 243 or PADI Advanced Open Water Certification

PAC 245, SCUBA SPECIAL TOPICS, 1 Credit
Specialized courses requiring previous certification in SCUBA. Check the current schedule of classes for more information and prerequisites. Possible classes: altitude diver, night diver, search and recovery, deep diver, underwater navigation, equipment specialist. Additional fee.
This course is repeatable for 11 credits.
Recommended: PAC 228

PAC 246, DIVEMASTER TRAINING, 2 Credits
Entry level PADI certification course for preparation to instruct SCUBA; lecture, lab, open water experience; must take two consecutive terms.
This course is repeatable for 11 credits.
Recommended: PAC 244. PADI Advanced, Advanced Plus, Rescue Diver certifications and 20 logged dives

PAC 247, SURFING, 1 Credit
Knowledge and fundamental skills of this aquatic sport including history, terminology, safety precautions, the ocean environment, and equipment. Additional fee.
This course is repeatable for 11 credits.

PAC 248, SWIM: NON-SWIMMER, 1 Credit
Skills for self-rescue; fundamental skills in swimming and safety. Recommended for people with a fear of water. Recommended S/U grading.
Equivalent to: PAC 219
This course is repeatable for 11 credits.

PAC 249, LIFEGUARD TRAINING, 1 Credit
Trains participants in the skills required to become a lifeguard. Emphasis on professional behavior, water rescues, safe response, quality CPR (adults, children, infants, and team responses), use of an AED and first aid. Students successfully completing the American Red Cross certification requirements will be issued a lifeguarding certification at the end of the course.
This course is repeatable for 11 credits.
Recommended: Basic swimming skills

PAC 250, SWIM I, 1 Credit
Swimming concepts, survival and breathing techniques, front crawl and elementary backstroke as minimum instruction.
This course is repeatable for 11 credits.
Recommended: Basic swimming skills: float, tread water, bobbing

PAC 252, SWIM II, 1 Credit
Fitness swimming, swimming strokes and skills.
Equivalent to: PAC 221
This course is repeatable for 11 credits.
Recommended: Swim I or the ability to front crawl continuously for 75 yards
PAC 253, SWIM TRAINING WORKOUT, 1 Credit
Competitive skills and strokes; emphasis on training. 
This course is repeatable for 11 credits. 
Recommended: Ability to do interval training.

PAC 254, COMPETITIVE SWIMMING, 1 Credit
Prepares students for competitive swimming and emphasizes lifetime aquatic fitness; interval swim workouts designed for speed and endurance; instruction on legal techniques of strokes and turns; culminates in intra-class swim meet; 2,000-3,000 yards/day. 
This course is repeatable for 11 credits. 
Recommended: Swim II or previous interval training experience up to 400 yard distances

PAC 256, TAIJI, TAI CHI I, 1 Credit
Introduction to ancient Chinese 'internal martial art' based upon concepts of Yin and Yang; detailed slow and relaxed form movements provide benefits to body, mind, and spirit. 
This course is repeatable for 11 credits.

PAC 257, TAIJI, TAI CHI II, 1 Credit
Continuation of study of the Yang-style Taiji form; more in-depth exploration of underlying principles and push-hands exercises. 
This course is repeatable for 11 credits. 

PAC 260, TENNIS I, 1 Credit
Introduction to fundamental strokes, singles and doubles play, scoring, and basic concepts in tennis. 
Equivalent to: PAC 234 
This course is repeatable for 11 credits. 

PAC 261, TENNIS II, 1 Credit
Review and refinement of fundamental strokes; volley, lob, return of serve; introduction to singles and doubles strategy. 
Equivalent to: PAC 235 
This course is repeatable for 11 credits. 
Recommended: Tennis I or competitive tennis experience

PAC 262, TENNIS III, 1 Credit
Focus on ground stroke, serve consistency; approach shots and overheads; tactics for net and baseline play. 
This course is repeatable for 11 credits. 
Recommended: Tennis II

PAC 265, TUMBLING I, 1 Credit
Technical instruction, progressions, and practice in basic, intermediate, and advanced tumbling skills; emphasis on safety and fitness concepts; floor and mini-trampoline skills; no apparatus instruction. 
This course is repeatable for 11 credits.

PAC 266, TUMBLING II, 1 Credit
Technical instruction, progressions, safety, and practice building upon skills taught in PAC 265, Tumbling I. 
This course is repeatable for 11 credits. 
Recommended: Tumbling I or prior experience.

PAC 268, TRIATHLON TRAINING, 2 Credits
Training in swimming, running, and bicycling to prepare for triathlon participation. Strategies, transitioning technique, and weight training information; training plan formation; event planning; culminates in class or community event. 
This course is repeatable for 11 credits. 
Recommended: Experience in at least one of the three activities.

PAC 271, ULTIMATE FRISBEE, 1 Credit
Fundamentals for the beginning and intermediate player; individual skill development, rules, game play, and strategy. 
This course is repeatable for 11 credits.

PAC 273, VOLLEYBALL I, 1 Credit
Fundamental volleyball skills, drills, rules, strategies, and practice. Game play appropriate for skill level. 
This course is repeatable for 11 credits. 

PAC 277, VOLLEYBALL III, 1 Credit
Skill refinement and development; intense, highly competitive drills and game situations, doubles through sixes play. 
This course is repeatable for 11 credits. 
Recommended: Volleyball II or varsity-level experience

PAC 278, FITNESS WALKING, 1 Credit
Establishment of personal fitness programs through walking with emphasis on technique and aerobic components. 
This course is repeatable for 11 credits.

PAC 282, WATER POLO, 1 Credit
Team game, played in deep water; instruction in skills, drills, strategies, techniques; game play; knowledge of rules and terminology. 
This course is repeatable for 11 credits. 
Recommended: Swim I skills.

PAC 286, WEIGHT TRAINING: CIRCUITS, 1 Credit
Fast-paced fitness class using stations of resistance training exercises. Designed to improve cardiovascular fitness and muscular endurance more than strength. 
This course is repeatable for 11 credits.

PAC 287, WEIGHT TRAINING I, 1 Credit
Exercise techniques in both free and fixed resistance training equipment; safety procedures, terminology, and principles of exercise. 
This course is repeatable for 11 credits.

PAC 288, WEIGHT TRAINING II, 1 Credit
Intermediate level of weight training in free and fixed weights. 
Prerequisite: PAC 287 with C+ or better 
This course is repeatable for 11 credits.
PAC 292, WRESTLING, 1 Credit
Collegiate wrestling fall and winter terms; freestyle and Greco wrestling
spring term. All levels.
This course is repeatable for 11 credits.

PAC 293, INTERDISCIPLINARY YOGA, 1 Credit
Basic yoga poses (asanas) using specific techniques and sequences
to promote flexibility, strength, relaxation, and a sense of well-being
will be used. Integrative concepts between yoga and our daily life will
be examined as well as yoga in relationship to other forms of physical
movement.
Equivalent to: PAC 293H
This course is repeatable for 11 credits.

PAC 293H, INTERDISCIPLINARY YOGA, 1 Credit
Basic yoga poses (asanas) using specific techniques and sequences
to promote flexibility, strength, relaxation, and a sense of well-being
will be used. Integrative concepts between yoga and our daily life will
be examined as well as yoga in relationship to other forms of physical
movement.
Attributes: HNRS – Honors Course Designator
Equivalent to: PAC 293
This course is repeatable for 11 credits.

PAC 294, YOGA I, 1 Credit
Principles and practice of basic yoga postures, techniques of posture
alignment, yogi breathing styles and their impact on the body and mind.
Students will be exposed to a variety of forms of yoga, as well as basic
yoga philosophy.
This course is repeatable for 11 credits.
Available via Ecampus

PAC 295, YOGA II, 1 Credit
Building off Yoga I, this is an intermediate level course meant to develop a
deeper understanding of yoga practice.
Equivalent to: PAC 256
This course is repeatable for 11 credits.
Recommended: Yoga I or previous yoga experience.
Available via Ecampus

PAC 296, VINYASA YOGA, 1 Credit
Dynamic flow that connects movement and breath encouraging
meditation in motion. May include sustained yoga postures.
Equivalent to: PAC 257
This course is repeatable for 11 credits.
Recommended: Yoga I or previous yoga experience

PAC 297, YOGATHON, 1 Credit
Expands on knowledge and skills learned in Yoga I or Fitness Yoga
through three to five class sessions, each 3-6 hours; longer sessions
provide students with an intensive mental and physical experience
centering on the concepts of yoga; includes introductory relaxation and
meditation skills.
This course is repeatable for 11 credits.
Recommended: PAC 294 and PAC 295 and PAC 296 and (Yoga I or Fitness
Yoga)

PAC 298, RESTORATIVE YOGA, 1 Credit
An emphasis on floor postures, supported postures, and longer holds
that cultivate a relationship with ease. Techniques will be used to help
students facilitate greater personal awareness. Students will use self
reflection practices for personal well-being.
This course is repeatable for 11 credits.

PAC 299, SPECIAL TOPICS, 1-3 Credits
Advanced information, skills, practice, and application; experimental and
new classes. May have additional fee.
This course is repeatable for 11 credits.
Recommended: Intermediate to advanced skills in an activity area

PAC 300, ALI: HIKING LOCAL TRAILS, 1 Credit
Covers the fundamentals of hiking as a recreational activity and an
outdoor travel skill. Content will cover local trails, place history, hiking
techniques, clothing and equipment selection, elemental first aid and
safety concerns, leave-no-trace principles, and map basics. PAC courses
may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 301, ALI: CHALLENGE COURSE
EXPERIENCE, 1 Credit
Emphasis on gaining practical experience and understanding of various
components that occur in challenge course activities/programs; group
dynamic mental and physical challenges; cooperative games and
initiatives that promote communication, problem solving skills and
leadership; Low and High challenge course activities that promote self-
confidence and agility. PAC courses may not be used to fulfill upper-
division requirements.
This course is repeatable for 11 credits.

PAC 302, ALI: CHALLENGE COURSE
PRACTICES AND FACILITATION, 1 Credit
Covers the set up and facilitation of various challenge course low
and high course elements as they pertain to ALI’s Challenge Course
programming. Students will learn facilitation skills, risk management
concepts, operational procedures, and technical rescue skills. A passing
grade in this course will result in a certificate of completion from the
OSU ALI Challenge Course. PAC courses may not be used to fulfill upper-
division requirements.
Prerequisite: PAC 301 with C- or better
This course is repeatable for 11 credits.
Recommended: Climbing wall instructor, efficient climbers toolbox, self-
rescue

PAC 303, ALI: CAMP CRAFT, 1 Credit
Provides basic front-country camping skills such as packing, trip
planning, how to dress for different climates/weather, storm-proofing,
knife and axe techniques and safety, stove and kitchen operations,
and fire building. PAC courses may not be used to fulfill upper-division
requirements.
This course is repeatable for 11 credits.
PAC 304, ALI: BACKPACKING, 1 Credit
Hiking and camping while carrying all gear; tent set-up, camp site selection, operation of single-burner stoves, loading a backpack, water infiltration, navigation, proper hiking technique, energy conservation; leave-no-trace principles in every aspect of the trip and class; includes classroom instruction and required overnight trip. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 307, ALI: RAFTING, 1 Credit
An introduction to white water rafting. Students will learn the fundamentals of safe rafting, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 308, ALI: CANOEING, 1 Credit
Designed as an introduction to canoeing. Students learn the fundamentals of safe canoeing, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 309, ALI: KAYAKING I, 1 Credit
Focuses on developing technical kayaking skills in flat water and moving water up to Class I. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 311, ALI: STAND UP PADDLEBOARD, 1 Credit
Covers the curriculum for level 1 and 2 American Canoe Association standup paddle board skill courses. Skills include equipment, environmental factors, techniques, preparation and planning, emergency management, and environmental ethics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 313, ALI: CANYONEERING, 1 Credit
Students will learn the fundamentals of canyoneering, including efficient hiking techniques, safe anchoring, belaying and rappelling techniques, and environmental mitigation skills. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 314, ALI: BOULDERING, 1 Credit
Introduction to the sport of bouldering, a subset of rock climbing using an indoor climbing facility; emphasis on safety, spotting, climbing movement, training techniques and improvement; provides activities that promote muscular strength and endurance, flexibility, and cardiovascular endurance. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 315, ALI: ROCK CLIMBING I, 1 Credit
Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at on-campus indoor climbing center. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 316, ALI: ROCK CLIMBING II, 1 Credit
Focuses on developing technical climbing skills related to lead climbing and anchor construction. Includes a one-day outdoor experience. PAC courses may not be used to fulfill upper-division requirements.
Prerequisite: PAC 315 with C- or better
This course is repeatable for 11 credits.

PAC 317, ALI: ROCK CLIMBING III, 1 Credit
Focuses on developing technical climbing skills in an outdoor setting. Includes a weekend long outdoor experience and cover skills ranging from building anchors using natural protection, to advanced outdoor movement skills. PAC courses may not be used to fulfill upper-division requirements.
Prerequisite: PAC 315 with C- or better and PAC 316 [C-]
This course is repeatable for 11 credits.
Recommended: Intermediate to advanced skills in an activity area

PAC 319, ALI: TECHNICAL RAPPELLING, 1 Credit
Students will learn, practice and hone their skills in the art of technical rappelling. Introduces many different styles, techniques and equipment used for rappelling in a variety of situations. Throughout the course, students will be provided with simple to advanced challenges to overcome. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 320, ALI: MOUNTAINEERING I, 1 Credit
Snow climbing techniques, anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics; classroom instruction and required overnight alpine trip. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 321, ALI: MOUNTAINEERING II, 1 Credit
Building on skills learned in Mountaineering I; rope team/glacier travel experience, fundamentals of crevasse rescue, advanced snow climbing techniques, safe anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements.
Prerequisite: PAC 320 with C- or better
This course is repeatable for 11 credits.

PAC 322, ALI: ICE CLIMBING, 1 Credit
Students will learn the fundamentals of ice climbing, including efficient ice climbing techniques, safe anchoring, belaying and rappelling techniques and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements.
This course is repeatable for 11 credits.

PAC 323, ALI: MOUNTAIN RESCUE BASICS, 1 Credit
Focuses on developing technical skills in a mountain rescue system. PAC courses may not be used to fulfill upper-division requirements.
Prerequisite: PAC 320 with D- or better
This course is repeatable for 11 credits.
PAC 324, ALI: WHITE WATER RESCUE, 1 Credit
Provides an introduction to white water rescue; students learn the fundamentals of white water rescue, scene management, and the necessary gear to perform rescues. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 325, ALI: WILDERNESS FIRST AID, 1 Credit
Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements. Equivalent to: PAC 325H This course is repeatable for 11 credits.

PAC 325H, ALI: WILDERNESS FIRST AID, 1 Credit
Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements. Attributes: HNRS – Honors Course Designator Equivalent to: PAC 325 This course is repeatable for 11 credits.

PAC 326, ALI: BUSH CRAFT, 1 Credit
Basic wilderness living techniques, knowledge and skills needed for a student to be ethical and efficient, and have the ability to survive in the outdoors. Special emphasis is placed on building shelters, water purification, navigation, awareness, fire, self-sufficiency and caring for groups in the wilderness. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 327, ALI: ROCK GUIDE SCHOOL, 1 Credit
Serves as an opportunity to learn the skills for being a rock guide for the ALI. With five days of training and practice in the field at two climbing sites in Oregon, it serves to help students understand the unique challenges of instructing climbing in the outdoor environment. This course may end with Sport Climbing Instructor certification through the Professional Climbing Instructors of America. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits. Recommended: Efficient climbers toolbox, self-rescue, climbing wall instructor–lead certification

PAC 328, ALI: RAFT GUIDE SCHOOL, 1 Credit
Provides students the skills and guided practice time needed to become competent paddle raft guides. It is a nine-day course that focuses on the development of water reading, raft maneuvering, risk management, and whitewater rescue skills needed by raft guides. Successful completion of the course will result in a certificate of completion from the American Canoe Association (ACA). PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 329, ALI: WILDERNESS FIRST RESPONDER, 2 Credits
Fundamentals of emergency care in a non-urban environment, including physiology, injury assessment, short-term care, anatomy, and small-group rescues. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 330, ALI: SNOW TRAVEL AND CAMPING, 1 Credit
An introduction to traveling in the backcountry in adverse weather conditions that often accompany winter. Topics covered include cross country touring, snow shoeing, winter camping techniques, and winter safety considerations including introducing avalanche safety. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

PAC 332, ALI: AVALANCHE AWARENESS, 1 Credit
Focuses on what causes avalanches, how to safely travel in avalanche terrain, and resources to pursue in understanding the avalanche risk where you are traveling. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for 11 credits.

Physical Therapy/Therapist (PT)
PT 700, PROFESSIONALISM AND INTERPROFESSIONAL PRACTICE, 2 Credits
Introduction to the role of the professional in physical therapy practice. Topics of application include communication, professional behavior and abilities, ethics, legal issues, and responsibility for professional development.

PT 711, ANALYTICAL ANATOMY AND IMAGING, 4 Credits
Detailed kinesiologic analysis of appendicular, spine, head, neck, and face muscles. Lecture, clinical demonstration, and practical experiences.

PT 712, NEUROANATOMY AND NEUROSCIENCE, 5 Credits
Organized approach to structures in the brain, spinal cord and peripheral nervous systems. Detailed analysis of Neuropysiologic mechanisms underlying normal and abnormal motor sensory function.
PT 713, MUSCULOSKELETAL ANATOMY, 6 Credits
Musculoskeletal anatomy, innervation, blood supply, and function: intensive study of the head, neck, trunk, and limbs.

PT 716, CULTURAL COMPETENCE IN PHYSICAL THERAPY, 2 Credits
An exploration of how cultural competence is a critical core component of professional practice in physical therapy and should be considered as a part of the best practice in providing physical therapy care.

PT 717, GERIATRICS IN PHYSICAL THERAPY, 2 Credits
An overview of the Physical and Psycho-Behavior aspects of aging in adulthood. An introduction to usual and pathological changes and treatment issues relevant to older patients.

PT 718, PSYCHOSOCIAL ASPECTS OF DISABILITY, 2 Credits
A study of behavior, social structures and beliefs, and interaction patterns to support the scientific basis of the effective interactions of physical therapists with patients.

PT 719, PHYSICAL THERAPY IN RURAL COMMUNITIES, 2 Credits
An overview of major issues in the rural health care system and the environment in which physical therapists, as rural health clinicians, must function. Provides students with an understanding of the healthcare delivery system in rural America with a concentration on the diverse populations of the Northwest region of the United States.

PT 720, MOTOR DEVELOPMENT, 3 Credits
Examination of normal development of gross motor, fine motor, language, cognition, psychosocial, and play skills across the lifespan from in utero to young adulthood.

PT 721, MOTOR CONTROL AND LEARNING ACROSS THE LIFE SPAN, 4 Credits
Introduction to sensorimotor systems, overview of current perspectives in motor control and learning from fetus through late adulthood, and clinical tests of motor proficiency.

PT 722, PREVENTION WELLNESS AND POPULATION HEALTH, 3 Credits
A study of the development of wellness plans for individuals or families in the community. Students will learn to assess family health care needs, seek out community resources, and educate community members on specific issues related to their own health and well-being.

PT 730, APPLIED PHYSIOLOGY, 3 Credits
Selected subjects in cellular and systems physiology. Emphasis on molecular and cellular aspects of neuromuscular function, also renal and endocrine physiology.

PT 731, CLINICAL EXERCISE PHYSIOLOGY, 4 Credits
Adaptation of the human body to exercise and the use of exercise to modify human function.

PT 740, THERAPEUTIC EXERCISE I, 3 Credits
Theoretical principles for evaluation of exercise need and prescription of exercise programs. Emphasis on approaches for patients with musculoskeletal deficits.

PT 741, THERAPEUTIC EXERCISE II, 3 Credits
Examination of needs analysis and prescription of exercise programs for special patient populations and assessment of current community trends in exercise and wellness.

PT 743, BUSINESS AND ADMINISTRATION IN PHYSICAL THERAPY, 3 Credits
Examination on the factors affecting patients entry into and progression through the healthcare system, including the effect of current financial, legal and regulatory policies that affect the patient, the patient/professional relationship, and the practice of physical therapy. Provides an overview of primary business disciplines including market research and strategy, marketing, finance, operations, and management.

PT 745, BASICS OF PATIENT MANAGEMENT, 1,6 Credit
Development of basic decision-making skills, professional behaviors and impairment assessment in patients with musculoskeletal, neurologic and/or cardiopulmonary dysfunction.
This course is repeatable for 6 credits.

PT 746, DISORDERS OF THE MUSCULOSKELETAL SYSTEM, 3 Credits
Regional description of pathology and pathophysiological mechanisms of disorders of bone, connective tissue, and joints.

PT 748, THERAPEUTIC MODALITIES, 3 Credits
An introduction to the management of pain and dysfunction using thermal, electrical and mechanical modalities used by Physical Therapists in general practice.

PT 750, CLINICAL BIOMECHANICS & GAIT, 5 Credits
Introduction to the principles of biomechanics as they apply to physical therapy practice. Emphasis on joint structure and function and tissue mechanics. Introduction to both normal and pathological gait including examination of joint kinematics, kinetics, and muscle activity.
PT 752, PROSTHETICS AND ORTHOTICS, 3 Credits
The examination of pathological gait of patients using prosthetic and orthotic devices. The course emphasizes types of orthotic and prosthetic devices, assessments, reassessment and corrections of gait deviations using therapeutic interventions geared toward functional interventions, patient/family education, exercises, and balance and coordination techniques.

PT 760, PHARMACOLOGY, 2 Credits
The study of prescription and/or over-the-counter medications used in the management of a variety of patient conditions encountered during physical therapy management.

PT 761, RESEARCH METHODS AND EVIDENCE BASED PRACTICE, 2 Credits
Introduction to evidence based practice, scientific methods, and clinical research methodologies.

PT 780, DIFFERENTIAL DIAGNOSIS, 4 Credits
Consideration of principles of differential diagnosis with emphasis on mastering this skill.

PT 791, MANAGEMENT OF CARDIOPULMONARY DYSFUNCTION, 2 Credits
Physical therapy evaluation and intervention in the care of patients with circulatory, cardiac, or pulmonary dysfunction.

Public Health (H)

H 100, INTRODUCTION TO PUBLIC HEALTH, 4 Credits
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Equivalent to: H 100H
Available via Ecampus

H 100H, INTRODUCTION TO PUBLIC HEALTH, 4 Credits
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 100

H 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

H 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

H 210, *INTRODUCTION TO THE HEALTH CARE SYSTEM, 3 Credits
Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

H 220, INTRODUCTION TO HEALTH DATA ANALYSIS, 3 Credits
Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems.
Recommended: MTH 105 or MTH 111 or higher mathematics.
Available via Ecampus

H 225, *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS, 4 Credits
Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

H 250, INTRODUCTION TO HEALTH CARE MANAGEMENT, 3 Credits
Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc.
Prerequisite: H 210 (may be taken concurrently) with C- or better
Available via Ecampus

H 309, PRACTICUM IN HEALTH CARE SERVICES, 3-6 Credits
Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N.
This course is repeatable for 12 credits.
H 310, HEALTH FIELD EXPERIENCES, 3-6 Credits
Introductory field experience in a health or health-related worksite.
Graded P/N.
Prerequisite: H 210 with C- or better
This course is repeatable for 12 credits.
Available via Ecampus

H 312, HIV/AIDS AND STIS IN MODERN SOCIETY, 3 Credits
Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases.
Available via Ecampus

H 319, INTRODUCTION TO HEALTH POLICY, 3 Credits
Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative.
Prerequisite: H 210 with C- or better
Available via Ecampus

H 320, INTRODUCTION TO HUMAN DISEASE, 3 Credits
Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.
Available via Ecampus

H 333, *GLOBAL PUBLIC HEALTH, 3 Credits
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: H 333H
Available via Ecampus

H 333H, *GLOBAL PUBLIC HEALTH, 3 Credits
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: H 333

H 344, *FOUNDATIONS OF ENVIRONMENTAL HEALTH, 3 Credits
Identifies environmentally-linked disease, population growth, and health concerns associated with toxic substances, food quality, air pollution, water pollution, noise, solid and hazardous waste, and pesticide use.
Explores scientific topics related to environmental health in a global context that impact our collective environment. Compares and contrasts select environmental problems in the US to those that occur in the global community.
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

H 349, PEER HELPER SKILLS DEVELOPMENT, 3 Credits
Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

H 364, DRUGS, SOCIETY AND HUMAN BEHAVIOR, 3 Credits
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual’s value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Prerequisite: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364H

H 364H, DRUGS, SOCIETY AND HUMAN BEHAVIOR, 3 Credits
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual’s value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Attributes: HNRS – Honors Course Designator
Prerequisite: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364

H 376, EVIDENCE-BASED HEALTH PROMOTION, 3 Credits
Future health professionals will learn what makes a successful health promotion program. Students will lean about research-tested programs that are effective for promoting health in community, clinical, and educational settings. Students will begin to develop the skills needed to critically examine evidence in the field and select programs to address current public health issues.
Prerequisite: H 100 with C- or better and H 225 [C-]
Available via Ecampus
H 385, SAFETY AND HEALTH STANDARDS AND LAWS, 3 Credits
Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.
Available via Ecampus

H 388, *GLOBAL ENVIRONMENTAL HEALTH, 3 Credits
An overview of global environmental issues, including climate change, air pollution, water, e-waste, and metals, and their impacts on human health.
(Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

H 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: H 399H
This course is repeatable for 16 credits.

H 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: H 399
This course is repeatable for 16 credits.

H 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

H 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

H 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 407, SEMINAR, 2 Credits
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Equivalent to: H 407H
Recommended: H 480 for students in EOH (Environmental and Occupational Health) minors. H 250 for students in the HMP (Health Management and Policy) option. H 225 and H 320 for students in the HPHB (Health Promotion and Health Behavior) option
Available via Ecampus

H 407H, SEMINAR, 2 Credits
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 407
Recommended: H 480 for students in EOH (Environmental and Occupational Health) minors. H 250 for students in the HMP (Health Management and Policy) option. H 225 and H 320 for students in the HPHB (Health Promotion and Health Behavior) option

H 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 409, PRACTICUM, 1-6 Credits
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N.
This course is repeatable for 16 credits.

H 410, INTERNSHIP, 1-12 Credits
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N.
Prerequisite: H 407 with C- or better
This course is repeatable for 24 credits.
Recommended: H 436 (for HMP students). H 225 and H 320 and H 476 (for HPHB students)

H 414, BE THE CHANGE FOR GLOBAL HEALTH TRANSFORMATION, 3 Credits
Learn how stigma and discrimination create differences in access to resources and lead to health injustice and disparities. Draw on social justice and community mobilization frameworks to explore health-related social movements and social change necessary to improve public health throughout the world. Contextualize local work to eliminate health disparities in the United States within a global context and as part of global processes. Learn how community mobilization can lead to the transformation of structures, systems, and ideologies that drive discrimination and health disparities.
Prerequisite: H 100 with C- or better

H 415, PEOPLE ON THE MOVE: MIGRATION AND GLOBAL HEALTH, 3 Credits
Overview of migration as an issue of global health importance; social determinants of migrant health and disparities; migrant health and sustainable development.
Prerequisite: H 100 with C- or better
H 416, GLOBAL POVERTY AND HEALTH DISPARITIES, 3 Credits
Learn why poverty remains a primary factor in poor health outcomes around the world, driving limited access to clean water and sanitation, healthful food, education, safety, basic rights, and health care. Examine global poverty, including the causes and consequences of global poverty and the ways in which social structures, identities, and policies shape wealth and health. Discuss global distribution of wealth, the wealth-health gradient and social determinants of health in a global context, causes and consequences of global poverty, and policy and programmatic intervention strategies aimed at reducing material hardship and global inequality.
Prerequisite: H 100 with C- or better

H 418, PUBLIC HEALTH ETHICS AND ISSUES, 3 Credits
Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology.

H 421, MENTAL HEALTH, 3 Credits
Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders.
Prerequisite: H 225 with C- or better and H 320 [C-]

H 422, HEALTH, AGING AND CONTROL OF CHRONIC DISEASES, 4 Credits
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.
Recommended: 9 credits of health course work.

H 425, FOUNDATIONS OF EPIDEMIOLOGY, 3 Credits
Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec.
Prerequisite: H 220 with C- or better or ST 201 with C- or better or ST 314 with C- or better or ST 351 with C- or better
Available via Ecampus

H 432, ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE, 3 Credits
Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Prerequisite: (ECON 201 with C- or better or ECON 201H with C- or better) and H 210 [C-]
Available via Ecampus

H 434, HEALTH CARE LAW AND REGULATION, 3 Credits
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: H 210 with C or better and H 250 [C-] and WR 222 [C-]
Available via Ecampus

H 436, ADVANCED TOPICS IN HEALTH CARE MANAGEMENT, 3 Credits
Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care.
Prerequisite: H 210 with C- or better and H 250 [C-]
Available via Ecampus

H 445, OCCUPATIONAL HEALTH, 3 Credits
Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies.
(Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

H 448, PUBLIC HEALTH TOXICOLOGY, 3 Credits
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health
Prerequisite: H 344 with C- or better
Recommended: One term of basic chemistry
Available via Ecampus

H 449, MASS MEDIA AND HEALTH, 3 Credits
Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns.
Prerequisite: H 225 with C- or better and H 320 [C-]

H 457, FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS, 3 Credits
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Prerequisite: H 210 with C- or better and H 250 [C-] and BA 315 [C-]
Available via Ecampus

H 458, REIMBURSEMENT MECHANISMS, 3 Credits
Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system.
Prerequisite: H 210 with C- or better
Available via Ecampus
H 461, SEXUALITY: A HEALTH SCIENCE PERSPECTIVE, 3 Credits
Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined.

H 465, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Recommended: 6 credits in public health.

H 468, FINANCING AND ADMINISTRATION OF LONG-TERM CARE, 3 Credits
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 474, PUBLIC HEALTH AND VIOLENCE IN SOCIETY, 3 Credits
Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476, PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS, 4 Credits
A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: H 225 with C- or better and H 320 [C-] and H 376 [C-]

H 477, DIETARY INTERVENTIONS FOR PUBLIC HEALTH, 3 Credits
A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators.
Prerequisite: NUTR 225 with C- or better
Equivalent to: NUTR 477

H 480, UNDERGRADUATE EOH SEMINAR, 1 Credit
Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion. Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N.
This course is repeatable for 2 credits.
Available via Ecampus

H 489, EMERGENCY AND DISASTER MANAGEMENT, 3 Credits
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491, SELECTED TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Equivalent to: H 491H
This course is repeatable for 6 credits.

H 491H, SPECIAL TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 491
This course is repeatable for 6 credits.

H 494, APPLIED ERGONOMICS, 3 Credits
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 495, DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH, 3 Credits
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

H 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

H 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
H 507, SEMINAR, 1-16 Credits
Section 1. Internship (1). Graded P/N. This course is repeatable for 16 credits.

H 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 509, PRACTICUM, 1-16 Credits
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for 16 credits.

H 510, INTERNSHIP, 1-16 Credits
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for 16 credits. Available via Ecampus

H 511, COMMUNITY, CULTURE, AND GLOBAL HEALTH, 3 Credits
Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.

H 512, INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES, 3 Credits
Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures. Available via Ecampus

H 513, INTEGRATED APPROACH TO PUBLIC HEALTH, 12 Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.

H 514, ENVIRONMENT, SAFETY AND HEALTH SEMINAR, 1 Credit
One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for 3 credits.

H 515, RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES, 3 Credits
Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.

H 516, RESEARCH METHODS IN GLOBAL HEALTH, 3 Credits
Overview of research methods used to understand health, illness, health care, and health-seeking behavior in international settings. Special emphasis on the use of qualitative and mixed methods in international health research.

H 518, PUBLIC HEALTH ETHICS AND ISSUES, 3 Credits
Explores key ethical issues in the context of public health practice; codes and guidelines for ethical conduct of public health practice; issues related to social accountability, vulnerable populations, and ethical framework for community engagement. Available via Ecampus

H 519, DISPLACEMENT, MIGRATION, AND GLOBAL HEALTH, 3 Credits
Critical examination of health of displaced/migrant populations with an emphasis on health disparities and social determinants. Understanding intersections of humanitarianism, migration, vulnerability, and displacement from a global health perspective.

H 520, HEALTH DISPARITIES, 3 Credits
Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations. Available via Ecampus

H 521, MENTAL HEALTH, 3 Credits
Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.

H 522, HEALTH, AGING AND CONTROL OF CHRONIC DISEASES, 4 Credits
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. Recommended: 9 credits of public health course work.

H 523, FOUNDATIONS OF PUBLIC HEALTH, 4 Credits
Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health. Available via Ecampus

H 524, INTRODUCTION TO BIOSTATISTICS, 4 Credits
Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression. Available via Ecampus
H 525, EPIDEMIOLOGICAL METHODS I, 3 Credits
Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.
Prerequisite: H 513 with B- or better or H 535 with B- or better

H 526, EPIDEMIOLOGICAL METHODS II, 3 Credits
Concepts and methods of epidemiological analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research.
Prerequisite: H 524 with B- or better and H 525 [B-]

H 527, CRITICAL ASSESSMENT OF INTERNATIONAL HEALTH PROGRAMS, 3 Credits
Introduces the critical evaluation framework of assessing international health development programs, based on self-determination and community ownership principles. The framework of assessment method includes three levels: upstream evaluation, midstream evaluation, and downstream evaluation.
Recommended: H 528 and H 529

H 528, GLOBAL HEALTH ISSUES, 3 Credits
Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.

H 529, INTERNATIONAL HEALTH, 3 Credits
Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.

H 530, HEALTH POLICY ANALYSIS AND POLITICS, 3 Credits
Examination of current health policy issues affecting health care programs, services, and organization as well as the role of politics in public health and health policy. Exploration of processes by which health policy proposals are generated, promoted, defeated, modified and implemented.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

H 532, ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE, 3 Credits
Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Recommended: ECON 201

H 533, HEALTH SYSTEMS ORGANIZATION, 3 Credits
Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.
Available via Ecampus

H 534, HEALTH CARE LAW AND REGULATION, 3 Credits
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

H 535, INTERPRETING EPIDEMIOLOGIC EVIDENCE, 3 Credits
Intended for students in the human sciences and allied health fields. Introduces basic epidemiology concepts. Topics will include measures of disease frequency, assessing population health, causal logic, quantifying associations between exposures and health outcomes, epidemiologic study design, and threats to study validity (random error, bias, confounding). Examples focus on application of epidemiological methods to a variety of health-related fields.

H 536, HEALTHCARE ORGANIZATION LEADERSHIP THEORY AND BEHAVIOR, 3 Credits
Overview of organization theory and behavior in health care organizations. Emphasis is on developing an understanding of the factors and forces that influence the structures, behaviors, and operations of health care delivery organizations. This understanding will be developed through consideration of organizations, their environments, and the roles of individuals working in management.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

H 537, INJURY EPIDEMIOLOGY, 3 Credits
An overview of the distribution and determinants of injuries, methodological issues specific to injury epidemiology, and approaches to injury control.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 513 with B- or better
Recommended: Graduate epidemiology training

H 538, PUBLIC AND PRIVATE HEALTH INSURANCE, 3 Credits
Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 540, WATER AND HUMAN HEALTH, 3 Credits
Critically examine the complex relationship between water quality, human activities, and population health.
H 541, AIR QUALITY AND HUMAN HEALTH, 3 Credits
Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 542, ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT, 3 Credits
Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.

H 543, EXPOSURE SCIENCE I, 4 Credits
Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.

H 544, ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY, 3 Credits
Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health.
Prerequisite: H 525 with C or better
Recommended: Graduate level statistics course

H 546, PHYSICAL AGENTS AND HUMAN HEALTH, 3 Credits
Focus on physical agents (heat, noise, vibration, radiation) and health risks associated with these agents. It covers the range and sources of exposure to physical agents, methods of characterizing these exposures, effects on human health, and the regulations/standards that set limits for physical agents. Lec/lab.

H 547, GIS AND PUBLIC HEALTH, 4 Credits
Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health who have no (or introductory level) knowledge of GIS. Lec/lab.

H 548, PUBLIC HEALTH TOXICOLOGY, 3 Credits
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.
Recommended: H 344 with a grade of C- or better and one term of basic chemistry.
Available via Ecampus

H 549, MASS MEDIA AND HEALTH, 3 Credits
Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
Prerequisite: H 571 with C or better

H 550, SOCIAL EPIDEMIOLOGY, 3 Credits
Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health.
Prerequisite: H 525 with B or better
Recommended: Introductory course in epidemiology

H 551, APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA, 3 Credits
Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results.
Prerequisite: H 526 with B- or better and H 560 [B-] and H 580 [B-]

H 552, DISASTER EPIDEMIOLOGY, 3 Credits
Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 554, EPIDEMIOLOGY OF AGING, 3 Credits
An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 555, CANCER EPIDEMIOLOGY, 3 Credits
Introduction to basic concepts and methodology in cancer epidemiology.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 556, STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS, 3 Credits
Theories and methodologies of long-range planning and strategic management in health care organizations.
H 557, FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS, 3 Credits
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Recommended: H 210 and H 250

H 558, REIMBURSEMENT MECHANISMS, 3 Credits
Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature.

H 559, MATERNAL AND CHILD HEALTH, 3 Credits
Women’s reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 560, PUBLIC HEALTH SURVEILLANCE, 3 Credits
An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis. 
Prerequisite: H 524 with B- or better and H 525 [B-]

H 561, EPIDEMIOLOGY, 3 Credits
Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or H 514 with B- or better

H 562, INFECTIOUS DISEASE EPIDEMIOLOGY, 3 Credits
Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or H 514 with B- or better

H 563, PHYSICAL ACTIVITY EPIDEMIOLOGY, 3 Credits
Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health. 
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better
Recommended: H 524

H 564, COMPUTING TOOLS AND HEALTH DATA ANALYSIS, 3 Credits
Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed.
Corequisites: H 524

H 565, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.
Equivalent to: BA 565
Recommended: 6 credits in public health.

H 566, DATA MINING IN PUBLIC HEALTH, 3 Credits
An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health.
Recommended: H 581 and H 564

H 567, COMPUTATIONAL TOOLS AND BIOMEDICAL DATA ANALYSIS, 3 Credits
Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed.
Corequisites: H 524

H 568, FINANCING AND ADMINISTRATION OF LONG-TERM CARE, 3 Credits
Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 569, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.
Equivalent to: BA 565
Recommended: 6 credits in public health.

H 570, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.
Equivalent to: BA 565
Recommended: 6 credits in public health.

H 571, PRINCIPLES OF HEALTH BEHAVIOR, 3 Credits
Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.
Available via Ecampus

H 572, COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION, 3 Credits
History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.

H 573, INTRODUCTION TO MULTILEVEL/HIERARCHICAL MODELS, 3 Credits
Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks.
Recommended: H 581
H 575, EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS, 3 Credits
Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program.
Prerequisite: H 513 with B- or better or H 515 with B- or better or HHS 514 with B- or better
Available via Ecampus

H 576, PROGRAM PLANNING FOR HEALTH/HUMAN SERVICES, 4 Credits
Provides students with an introduction to the principles of program planning and the development of program plans, with a focus on evidence-based public health/human services. Students will have the opportunity to integrate skills developed through prior courses in the context of writing a program plan.
Prerequisite: (H 515 with C- or better or HHS 514 with C- or better) and H 571 [C-] and H 575 [C-]

H 578, INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I, 3 Credits
A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis.
Prerequisite: (H 524 with C or better and H 526 [C])
Recommended: Knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation)

H 580, LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA, 4 Credits
Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/lab.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 581, GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS, 4 Credits
Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear models and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab.
Recommended: H 580

H 582, ANALYSIS OF CORRELATED HEALTH DATA, 3 Credits
Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations.
Prerequisite: H 581 with C or better

H 583, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT, 4 Credits
Studies the design and management principles and practices in the environment, safety and health field.

H 584, ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS, 3 Credits
Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 585, ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW, 3 Credits
Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals.
Recommended: H 385

H 586, BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH, 3 Credits
An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health.
Prerequisite: H 581 with C or better

H 587, TIME TO EVENT ANALYSIS OF HEALTH DATA, 3 Credits
Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 588, APPLIED OCCUPATIONAL SAFETY AND HEALTH, 3 Credits
The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.
H 589, EMERGENCY AND DISASTER MANAGEMENT, 3 Credits
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 590, OCCUPATIONAL ERGONOMICS AND BIOMECHANICS, 3 Credits
Examines the advanced theories, applications, and contemporary topics of occupational ergonomics and biomechanics. Topics include muscle physiology, work-related musculoskeletal disorders, assessing biomechanical exposure in the workplace, various material handling assessment tools, 3-Dimensional Static Strength Prediction Program, human vibrations, and implementing ergonomic interventions.

H 591, SELECTED TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
This course is repeatable for 9 credits.

H 592, SPATIAL EPIDEMIOLOGY, 3 Credits
An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining patterns and associations.
Prerequisite: H 547 with C or better and H 581 [C]

H 593, REPRODUCTIVE EPIDEMIOLOGY, 3 Credits
Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better
Recommended: H 524

H 594, APPLIED ERGONOMICS, 3 Credits
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595, DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH, 3 Credits
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 596, HEALTHCARE EPIDEMIOLOGY, 3 Credits
Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic testing, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better
Recommended: H 524
Available via Ecampus

H 597, METHODS IN FOODBORNE DISEASE OUTBREAK INVESTIGATION, 3 Credits
Focuses on the practical basis for developing and implementing methods for foodborne disease outbreak detection, investigation and control, using recent outbreaks to highlight underlying principles. Biological characteristics of major foodborne disease pathogens, clinical features of the illnesses its causes and epidemiologic presentations of foodborne outbreaks will be reviewed. The implications of these characteristics will be discussed in a problem solving, interactive format that examines theory and practice in the context of recent outbreaks. Strategies to promote timely decision-making will be emphasized.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 598, HEALTH POLICY ANALYSIS METHODS, 3 Credits
Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens. Health services research methods, including data sources for health policy research and health policy literature.
Prerequisite: H 513 with B- or better and H 533 [B-]

H 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 24 credits.

H 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

H 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

H 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 610, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 611, INTRODUCTION TO SYSTEMATIC LITERATURE REVIEWS, 3 Credits
Students will learn how to apply systematic review methodology to a research question of their choice and understand how literature reviews inform evidence-based decision-making. Examples will focus on applying literature reviews to public health, clinical science, and biomedical research.
H 612, DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE, 1 Credit
Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. 
This course is repeatable for 9 credits.

H 613, INDEPENDENT RESEARCH PROJECT, 1-9 Credits
Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N. 
This course is repeatable for 9 credits.

H 614, RESEARCH MANUSCRIPT, 4 Credits
PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

H 615, ADVANCED EVALUATION AND RESEARCH DESIGN, 3 Credits
Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors. 
Recommended: H 515 and H 575

H 620, ADVANCED TOPICS IN GLOBAL HEALTH INTERVENTION AND PRACTICE, 3 Credits
Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decision-making in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored. Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.

H 622, GLOBAL HEALTH SYSTEMS, POLICY AND POLITICS, 3 Credits
Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.

H 626, GLOBAL HEALTH SYSTEM FINANCE AND STRENGTHENING, 3 Credits
Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.

H 630, QUANTITATIVE HEALTH POLICY RESEARCH METHODS I, 4 Credits
Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature. 
Prerequisite: H 524 with B- or better

H 632, APPLIED HEALTH ECONOMICS, 4 Credits
Advanced doctoral-level quantitative health policy/services research methods emphasizing causal inference when potential endogeneity is present. 
Prerequisite: H 630 with B- or better

H 635, COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE, 3 Credits
The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

H 638, PUBLIC AND PRIVATE HEALTH INSURANCE, 3 Credits
Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method. 
Prerequisite: H 533 with C or better

H 639, COMMUNITY-BASED PARTICIPATORY RESEARCH, 4 Credits
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion. 
Recommended: 9 credits of public health or HDFS graduate coursework

H 642, ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT, 3 Credits
Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.
H 650, REPORTING RESULTS: WRITING FOR EPIDEMIOLOGY, 3 Credits
Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer.
Prerequisite: H 526 with B- or better and H 551 [B-] and H 580 [B-]

H 651, ADVANCED EPIDEMIOLOGICAL METHODS, 4 Credits
Covers advanced topics in epidemiology. Course expands on many of the same topics as H 526, and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models, directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics.
Prerequisite: H 526 with B- or better and H 581 [B-]

H 652, CAUSAL INFERENCE IN EPIDEMIOLOGY, 3 Credits
Discussion of the theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics. Applied examples will be used for illustration.
Prerequisite: H 526 with B- or better

H 659, QUANTITATIVE HEALTH POLICY RESEARCH METHODS II, 4 Credits
Advanced doctoral-level quantitative health policy/services research methods emphasizing health care utilization, expenditures, and outcomes data.
Prerequisite: H 630 with B- or better

H 662, ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY, 3 Credits
Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods.
Prerequisite: H 526 with B- or better and H 562 [B-]

H 672, ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR, 3 Credits
Provides an in-depth examination of the use of qualitative methods in health behavior research and practice.
Recommended: H 515 and SOC 518 and HDFS 538

H 673, MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS, 4 Credits
Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts.
Recommended: H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (e.g. sociology or psychology or health promotion or education programs)

H 675, DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS, 3 Credits
Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice.
Recommended: H 571 and H 575 and H 576

H 676, ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR, 3 Credits
Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior.
This course is repeatable for 6 credits.
Recommended: H 515 and H 571

H 681, ADVANCED TOPICS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY, 3 Credits
Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY: MOVING FROM RESEARCH TO PRACTICE, 3 Credits
An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering.
H 683, ADVANCED RESEARCH METHODS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH, 3 Credits
Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.

H 685, RACE, CLASS, CULTURE AND AGING, 4 Credits
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as H 685/HDFS 685.
Equivalent to: HDFS 685
Recommended: 9 credits of public health or HDFS graduate coursework

H 699, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

Adapted Physical Education Graduate Major (MAPE)
The Master of Adapted Physical Education is a professional preparation program grounded in applied experiences and proficiency. Oregon State University provides a unique approach to training physical educators/adapted physical educators with a specific emphasis on the health and wellbeing of all students through the promotion of physical activity.
Major Code: 3010

Athletic Training Graduate Major (MATRN)
The Athletic Training graduate major is a two-year program leading to the Master of Athletic Training degree, MATRN.

Upon graduation, students are eligible to sit for the Board of Certification examination. Successful completion of this examination is the prerequisite to obtaining registration as an Athletic Trainer in the state of Oregon.

The clinical education of students in the athletic training program primarily takes place during rotations with various OSU intercollegiate athletic teams, some of the most culturally diverse groups on the OSU campus. This experience helps students develop sensitivity to varying cultures, strategies for overcoming potential cultural barriers to communication, and interpersonal skills that serve them well outside the campus community.
Environmental and Occupational Health Minor

Also available via Ecampus.

Provides undergraduate students with academic and professional experience that will enable them to understand the impact of environmental and occupational hazards on human health and society, as well as developing effective interventions that will control and prevent exposure to hazards. This knowledge will enable them to apply scientific principles and management strategies in the fields of environmental protection, occupational health and safety, and public health.

Ergonomics Graduate Minor

The Graduate Minor in Ergonomics is for masters and doctoral level students who seek additional formal training and mentoring in Ergonomic practice. Students pursuing a Minor in Ergonomics must include at least one Environmental and Occupational Health faculty member on their committee. This faculty member must be engaged in the development of the student's Program of Study and in the case of Doctoral students, their dissertation research; therefore, it is recommended that this faculty member be identified early in the doctoral program.

Minor Code: 7715
Select at least one additional course (3 credits for Masters) or two additional courses (6 credits for Doctoral) from the following:

1 Other courses, as approved by Minor Professor, from the Human Centered Design (http://hcd.oregonstate.edu/) Courses at OSU or other courses as approved by Minor Professor

**Minor Code: 7715**

**Exercise Physiology Minor**

*Also available at OSU-Cascades.*

With an emphasis on movement and the functioning of human body due to long- or short-term exercise, the Exercise Physiology minor is an excellent addition for students interested in incorporating fitness/wellness into their major, or for those who love to exercise and be active and just want to understand more about how the body responds.

**Minor Code: 752**

Kinesiology majors may not add the Exercise Physiology minor. Only non-KIN majors are eligible for this minor. Students must have:

- Have a minimum OSU GPA of 2.0
- All courses must be taken for a letter (A-F) grade
- No more than two attempts at any course or prerequisite

As of Fall 2017, non-PHHS students will be required to have a minimum C-grade in any course or prerequisite.

Select one of the following groups:

**Group A**

- BI 231 & BI 232 & BI 233
  - INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY
  - and INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY

**Group B**

- BI 241 & BI 242 & BI 243
  - INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
  - and INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
  - and INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY

**Global Health Minor**

*Available only via Ecampus.*

The minor provides a solid foundation in social determinants of health and prepares students interested in the allied health services and sciences, as well as those primarily focused on public health, to apply principles of health equity, cultural competence and humility, and global thinking. Students learn about the global health processes (e.g., migration, discrimination, and polarization) that shape health outcomes. This program is fully online.

**Minor Code: 079**

- Develop interdisciplinary skills necessary in allied health sciences and services.
- Practice principles of community-based research to address social determinants of health.
- Evaluate the importance of community development and policy change for eliminating health disparities.
- Apply health equity and social justice frameworks to critically evaluate global health processes, problems, and dynamics.

This minor is available to all majors at OSU, including Public Health majors with options in Health Promotion & Behavior and Health Management & Policy.

- Students must have a minimum OSU GPA of 2.0.
- All courses must be taken for a letter grade (A-F).
- No more than two attempts at any course or prerequisite are permitted.
- Graduation from the program requires the completion of a minimum of 27 credits: 22 credits from required courses and 5 credits of self-selected electives.
- All CPHHS courses have to be completed with a grade of C- or higher.

- H 225 | *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS | 5 |
Kinesiology Graduate Major (MS, PhD)

This major offers the following option(s):

• Adapted Physical Activity (p. 1454)

Graduate Areas of Concentration

Biophysical kinesiology, psychosocial kinesiology

The graduate program in kinesiology offers courses and learning experiences in the theoretical and practical study of physical activity (including exercise and sport) for the promotion of optimal health and disease prevention.

Graduate fields in kinesiology include biophysical kinesiology and psychosocial kinesiology.

The MS degree can be completed via a thesis or project. The PhD degree requires the completion of a dissertation. For further information about the graduate program in Kinesiology, visit the school’s website (http://health.oregonstate.edu/bphs/).

Major Code: 7700

Adapted Physical Activity Graduate Option

This option is offered within the following major(s):

• Kinesiology - College of Public Health and Human Sciences (p. 1454)

This graduate option is focused on the development of leadership personnel in the area of disability and will build competencies to serve individuals with disabilities as effective teachers, scholars, and advocates.

Option Code: 7720

The major faculty advisor(s) and a faculty member from the Adapted Physical Activity program must approve the option in Adapted Physical Activity.

Option Code: 7720

Kinesiology Graduate Minor

For more information, see the school advisor.

Minor Code: 7710

Kinesiology Undergraduate Major (BS, HBS)

This major offers the following option(s):

• Pre-Therapy and Allied Health (p. 1455)

Also available at OSU-Cascades.

The Kinesiology major prepares students for careers in physical activity and fitness/wellness such as organizing, directing or managing physical fitness programs; personal trainer; fitness instructor; exercise physiologist; strength and fitness coach; and fitness entrepreneur. The degree can also serve as preparation for applications to a master’s level physical education teacher education program, medical school, a professional program in the allied health professions (e.g., physical or occupational therapy, nursing, physician assistant) or other graduate education. Students interested in entry into professional schools of physical or occupational therapy, nursing, medical school, or physicians assistant should take the Pre-Therapy and Allied Health option of the Kinesiology major, which has entry standards that must be met after completion of 90 credits.

Major Code: 840
• Understand the methods by which public health identifies potential causes of population health status, and identifies potential targets for intervention.
• Describe the fundamental roles of public health and how those roles are operationalized in public health organization, funding, workforce, and regulations.
• Describe the role of physical activity in health and wellness.
• Demonstrate knowledge of scientific concepts related to physical activity.
• Apply scientific concepts towards assessing, promoting, or enhancing physical health, fitness, or performance.
• Demonstrate skill in communication.

Minimum Grade Policy
A grade of C– or better is required in all courses fulfilling Kinesiology major requirements (Kinesiology Core, Required Supporting Courses, and KIN Courses Beyond the Core).

Repeated Courses Policy
The university’s repeated courses policy will be followed (AR 20). Kinesiology students are allowed at most two attempts to meet individual course degree requirements. Students who do not receive the minimum grade required for a course after two attempts (including courses transferred from other institutions) will not be allowed to have grades earned in subsequent attempts count toward meeting Kinesiology degree requirements. As a result, such students may not be able to complete a degree and/or an option in Kinesiology.

Pre-Therapy and Allied Health Option
This option is offered within the following major(s):

• Kinesiology - College of Public Health and Human Sciences (p. 1454)

This program is designed for students interested in pursuing admission to medical school or a professional program in the allied health professions, such as athletic training, nursing, occupational therapy, physical therapy, or physician assistant.

The Pre-Therapy and Allied Health option requires the completion of one of six professional tracks:

1. Pre-Athletic Training
2. Pre-Medicine
3. Pre-Nursing
4. Pre-Occupational Therapy
5. Pre-Physical Therapy
6. Pre-Physician Assistant

Option Code: 732

Pre-Therapy and Allied Health is an undergraduate option that may be added to the Kinesiology major once the following admission standards
Pre-Therapy and Allied Health Option

students may apply for admission to the PT AH option after completion of 90 credits. Requirements for admission include:

- Cumulative GPA of 3.0 and,
- A grade of ‘C’ or better and average GPA of 2.7 or higher in one of the anatomy and physiology series:
  - BI 231—BI 233 and BI 241—BI 243
  - BI 331—BI 333 and BI 341—BI 343
  - Z 331-Z 333 and Z 341-Z 343 (these courses have terminated but will still be accepted if they were taken)

The School of Biological and Population Health Sciences offers graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees in nutrition. The program of study integrates multiple disciplines relevant to nutrition, including molecular, biochemical, physiological and clinical nutrition. The overall goal of the program is for the student to gain a ‘cutting-edge’ understanding of contemporary issues in nutrition and apply these concepts to human health.

Research in nutrition is focused on human nutrition and nutrient effects on physiological systems impacting human health. Our research programs seek the discovery of new knowledge, information, techniques and/or interventions that can promote the optimal health of individuals and families in Oregon, nationally, and worldwide. Either thesis or non-thesis based original research is required for the MS degree. Successful defense of scholarly research in a doctoral dissertation must be completed as part of the requirements for the PhD degree.

Since nutrition builds upon the natural sciences, entering graduate students should have a strong background in chemistry, physiology, nutrition, statistics, and biochemistry.

Depending upon their concentration, graduates are prepared for positions in academic research and teaching or research and development in industry or government or practice in dietetics.

Information on the nutrition graduate program graduate fellowships and assistantships is available at the website (http://health.oregonstate.edu/degrees/graduate/nutrition/). Click on the ‘Application and Admission Requirements’ link.

For additional information about the college and school, visit the website (http://health.oregonstate.edu/).

Major Code: 4660

MS

Thesis track requires a minimum of 45 credits, including 6 thesis credits; courses are selected in consultation with their Nutrition Faculty Advisor.

Non-thesis track requires a minimum of 45 credits, including 6 credits for a capstone project; course are selected in consultation with their Nutrition Faculty Advisor.

PhD

A minimum of 108 credits. Courses selected in consultation with their Nutrition Faculty Advisor.

Major Code: 4660

Nutrition Graduate Minor

For more details, see the school advisor.

Minor Code: 4660

Nutrition Minor

Minor Code: 426
This minor requires 35 credits, including 22 credits at the upper-division level.

Students are strongly encouraged to consult an advisor in the School of Biological and Population Health Sciences to be sure that prerequisites are taken.

Total Credits: 35

* Baccalaureate Core Course (BCC)

**Minor Code: 426**

**Nutrition Undergraduate Major (BS, HBS)**

This major offers the following option(s):

- Dietetics (p. 1458)
- Nutrition and Health Sciences (p. 1459)
- Nutrition in Foodservice, Culinary and Food Systems (p. 1460)
- Pre-Dietetics (p. 1460)

**Major Code: 466**

**Pre-Nutrition Major Code: 463**

- Understand the methods by which public health identifies potential causes of population health status, and identifies potential targets for interventions.
- Describe the fundamental roles of public health and how those roles are operationalized in public health organization, funding, workforce, and regulations.
- Locate, interpret, evaluate and use evidence-based literature in critical thinking activities.
- Use current information technologies.
- Demonstrate effective and professional oral and written communication.
- Identify food sources for obtaining adequate nutrients across the life span.

**Nutrition and Foodservice Systems**

**Nutrition and Health Sciences**

| Total credits required for graduation | 180 |

**Major Code: 466**

**Pre-Nutrition Major Code: 463**

**Dietetics Option**

This option is offered within the following major(s):

- Nutrition - College of Public Health and Human Sciences (p. 1458)

Dietitians provide guidance to the public regarding nutrition, diet and their relationship to disease. The Dietetics option at OSU is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and prepares students to become Registered Dietitians (RD). This option provides the course work and preparation to enter a supervised dietetic internship, pass the Registered Dietitian Exam and become a leader in the profession. Graduates from OSU’s program consistently exceed the national average for placement into accredited dietetic internships and for passing the RD Exam the first time.

Before taking the Dietetics option, students must first complete the Pre-Dietetics option.

Students must apply to and be accepted into the Dietetics option in Nutrition. See Pre-Dietetics courses and Dietetics Admission Requirements.

**Nutrition and Health Sciences Option**

This option is offered within the following major(s):

- Nutrition - College of Public Health and Human Sciences (p. 1458)

The Nutrition and Health Sciences option is designed for students who want to focus on the scientific basis of nutrition for careers in medicine and the health sciences or in nutrition science research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/or health-related research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

**Option Code: 467**

Total credits must be sufficient (together with baccalaureate and NUTR cores) to ensure 180 total credits (60 credits must be upper division).

Nutrition in Foodservice, Culinary and Food Systems Option

The Nutrition in Foodservice, Culinary and Food Systems option offers either a Culinary track or a Food Systems track. Both prepares graduates for professional careers directing foodservice operations and/or work in food systems. The option focus is on serving healthy and appealing menu options in venues that strive to achieve sustainable food production and service. Opportunities exist in both non-commercial food operations including schools, universities, and healthcare, and in retail restaurants, industry and agriculture. This program integrates coursework taken at OSU and the Culinary Arts program at Linn-Benton Community College.

Please contact Dr. Mary M. Cluskey, 541-737-0960, cluskeym@oregonstate.edu for more information

Option Code: 091

- Upper division credits required is 60
- Maximum S/U credits is 36 (departmental courses within major may not be taken S/U)

### Pre-Dietetics Option

This option is offered within the following major(s):

- Nutrition - College of Public Health and Human Sciences (p. 1458)

Dietitians provide guidance to the public regarding nutrition, diet and their relationship to disease.

### Dietetics Admission Requirements

To be considered for admission to the Dietetics option within the Nutrition major, students must complete the Pre-Dietetics courses listed with a grade of B– or higher in each of the NUTR courses listed, a grade of C– or higher in each of the other courses listed, and a grade-point average of 3.0 or higher for the listed courses as a whole. Applicants to the Dietetics option must achieve an overall GPA of 3.0 or higher based on completing at least 60 quarter credits (OSU institutional) and
Physical Therapy Professional Major (DPT)

Available only at OSU-Cascades.

This program will be admitting students from Fall 2021. Please contact Christine Pollard for more information.

The Doctor of Physical Therapy (DPT) degree program at OSU-Cascades will produce graduates who are skilled physical therapists to meet workforce demands and produce citizens who are ethically responsible and committed to social justice. The vision for the Physical Therapy profession is to transform society by optimizing movement to improve the human experience.

Physical therapists (PTs) are healthcare professionals who treat individuals of all ages, from newborns to the very oldest who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives. In addition, PTs work with individuals and groups to prevent the loss of ability before it occurs by developing fitness-and-wellness-oriented programs and other population health interventions for healthier and more active lifestyles. PTs provide care for people in a variety of settings including hospitals, private practices, outpatient clinics, home health agencies, schools, sports and fitness facilities, work settings, and nursing homes.

State licensure is required in each state in which a physical therapist practices. To practice as a physical therapist in the United States (US), a student must earn a DPT degree from an accredited physical therapist education program and pass a state licensure exam. The Commission on Accreditation in Physical Therapy Education (CAPTE) governs DPT accreditation in the US.

School of Social and Behavioral Health Sciences

The School of Social and Behavioral Health Sciences comprises the fields of health management and policy, health promotion and health behavior, and human development and family sciences. These disciplinary approaches use social and behavioral sciences to improve understanding of the factors that influence the health and well-being of individuals, families, and communities. In addition, these fields develop sound policy, programs, and interventions to improve health and well-being at multiple levels. Finally, through our curricula, we develop the next generation of globally minded public health and human sciences professionals.

The School of Social and Behavioral Health Sciences houses the undergraduate degrees of Human Development and Family Sciences and Public Health.

The school also houses the MS and PhD in Human Development and Family Studies (http://health.oregonstate.edu/degrees/graduate/hdfs/).

The school houses the following options of the Master of Public Health (http://health.oregonstate.edu/degrees/graduate/public-health/mph/): health systems and policy, and health promotion and health behavior.

The school also houses the following concentrations of the Public Health doctoral program (http://health.oregonstate.edu/degrees/graduate/public-health/phd-program/): health policy, and health promotion and health behavior.

Undergraduate Programs

Majors
- Human Development and Family Sciences (p. 1483)
  Options:
  - Child Development
  - Early Childhood
  - General Human Development and Family Sciences
  - Human Services
- Public Health (p. 1486)
  Options:
  - Health Management and Policy
  - Health Promotion and Health Behavior

Minors
- Early Childhood Development and Education (p. 1480)
- Health Management and Policy (p. 1482)
- Human Development and Family Sciences (p. 1483)
- Public Health (p. 1486)

Certificate
- Gerontology Certificate (p. 1481)

Graduate Programs

Majors
- Human Development and Family Studies (p. 1485)

Minors
- Aging Sciences (p. 1480)
- Gerontology (p. 1482)
- Human Development and Family Studies (p. 1486)

Certificate
- Health Management and Policy (p. 1482)

Human Development and Family Sciences (HDFS)

HDFS 101, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 199, SPECIAL PROJECTS, 1-16 Credits
Special projects designed with instructor Graded P/N.
This course is repeatable for 16 credits.

HDFS 201, *CONTEMPORARY FAMILIES IN THE U.S., 3 Credits
An introduction to families with application to personal life. Focuses on diversity in family structure, social class, race, gender, work and other social institutions. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: FCS 201
Available via Ecampus

HDFS 209, HUMAN SERVICES PRACTICUM, 4 Credits
Field experience to learn, primarily through observation, how to apply human service strategies and skills to helping individuals and families served by professional agencies. Supervision by agency and instructor. Requires 90 hours of work on-site. Seminar introduces basic theories and skills through readings, discussion and reflective exercises.
Prerequisite: HDFS 107 with C- or better
This course is repeatable for 8 credits.

HDFS 240, *HUMAN SEXUALITY, 3 Credits
Physiological, psychological, social, and historical influences on sexuality; emphasis on developmental and relationship aspects. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus
HDFS 262, INTRODUCTION TO HUMAN SERVICES, 3 Credits
An exploration of the human services profession. Emphasis on prevention and early intervention concepts and programs. Development of internship search skills, including an introduction to a wide range of human services organizations.
Equivalent to: HDFS 107
Available via Ecampus

HDFS 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 300, HUMAN SERVICES PRACTICUM, 4 Credits
Field experience to learn, primarily through observation, how to apply human service intervention strategies and skills to helping individuals and families served by professional agencies and organizations.
Supervision by agency and instructor. Requires 90 hours of work on-site. Supplementary bi-weekly seminar, readings, and reports. Graded P/N.
Prerequisite: HDFS 262 with C- or better
Equivalent to: HDFS 209
This course is repeatable for 8 credits.

HDFS 310, HUMAN SERVICES PRACTICUM, 4 Credits
Field experience to learn, primarily through observation, how to apply human service intervention strategies and skills to helping individuals and families served by professional agencies and organizations.
Supervision by agency and instructor. Requires 90 hours of work on-site. Supplementary bi-weekly seminar, readings, and reports. Graded P/N.
Prerequisite: HDFS 262 with C- or better
Equivalent to: HDFS 209
This course is repeatable for 8 credits.

HDFS 311, INFANT AND CHILD DEVELOPMENT, 4 Credits
Research and theory on development from infancy through middle childhood. Discussion of biological, familial, and sociocultural influences.
Development of skills in observing children’s behavior.
Equivalent to: HDFS 211
Available via Ecampus

HDFS 312, PARENTING RESEARCH AND APPLICATION, 4 Credits
Research and theory regarding parenting and parent education, including parenting styles and practices, discipline, parent-child interactions, attachment, and the family context with an emphasis on professional implications for promoting child health and well-being.
Equivalent to: HDFS 312X
Available via Ecampus

HDFS 313, ADOLESCENT DEVELOPMENT, 4 Credits
Advanced theories and research on physical, social and psychological development during adolescence; emphasizes influences of family, peers, schools and community.
Available via Ecampus

HDFS 314, ADULT DEVELOPMENT AND AGING, 4 Credits
Advanced theories and research related to developmental changes and stability in early, middle, and late adulthood. Gender issues, personality, cognition, and adaptation.
Available via Ecampus

HDFS 330, FOSTERING LEARNING IN EARLY CHILDHOOD DEVELOPMENT, 4 Credits
Development of skills in applying theoretical approaches to observing, recording, and interpreting the behavior of young children in order to design interactions that support learning in group settings.
Prerequisite: HDFS 311 with C- or better

HDFS 331, DIRECTED EXPERIENCE IN EARLY CHILDHOOD, 3 Credits
Placement in early childhood program to focus on guidance techniques, classroom management, and implementation of curricula, based on developmental observation, research, and theory. Supplementary weekly seminar, readings, and reports. Lab/rec. Taught on the OSU-Cascades campus only.
Prerequisite: (HDFS 311 with C- or better or HDFS 211 with C- or better) and HDFS 330 [C-]
Equivalent to: HDFS 330

HDFS 341, FAMILY STUDIES, 4 Credits
Study of family forms, family formation, and family change over the human life course is sociohistorical, economic, political, and cultural context.
Available via Ecampus

HDFS 360, CRITICAL THINKING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 4 Credits
Explores foundations of critical thinking, especially methods for sustaining open-minded inquiry and evaluating evidence and arguments. Current controversies in human development and family policy are targets of debate.
Available via Ecampus

HDFS 361, APPLIED RESEARCH METHODS, 4 Credits
Basic research methods as they are applied in human development and family studies.
Available via Ecampus

HDFS 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 401, RESEARCH, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 405, READING AND CONFERENCE, 1-6 Credits
This course is repeatable for 16 credits.
HDFS 406, PROJECTS, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

HDFS 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 410, HUMAN SERVICES INTERNSHIP, 6-12 Credits
Field experience to apply theory and evidence-based practices to individual, family, and community problems in professional settings. Supervision by agency and instructor. Requires 300 hours of work on-site. Seminar includes reflection and constructive criticism processes. Can be taken across 2 consecutive terms (150 hours each) within the same agency. Graded P/N.
Prerequisite: HDFS 107 with C- or better and HDFS 209 [P] and HDFS 462 [C-]
This course is repeatable for 12 credits.

HDFS 430, CHILD DEVELOPMENT CENTER INTERNSHIP, 12 Credits
Participate in an internship in a research-based model early childhood program focused on early childhood education, program development and evaluation, parent education and administration.
Prerequisite: HDFS 330 with C- or better

HDFS 431, FAMILY, SCHOOL, AND COMMUNITY COLLABORATION, 3 Credits
Focus on family, school, community environments and interactions for children from infancy to adolescence. Resources and skills for enhancing child development across these settings are emphasized.
Prerequisite: HDFS 311 with C- or better and HDFS 313 with C- or better
Equivalent to: HDFS 436
Available via Ecampus

HDFS 432, CHILDREN AND YOUTH WITH DISABILITIES, 3 Credits
Developmental, educational, and family issues related to children and youth with disabilities. Highlights a broad range of human exceptionality, including giftedness.
Equivalent to: HDFS 420
Recommended: 6 credits of HDFS, SOC or PSY.
Available via Ecampus

HDFS 433, EARLY CHILDHOOD INTERNSHIP, 10 Credits
Students will complete an internship in a Pre-Kindergarten, Kindergarten or First Grade classroom and will focus on curriculum development, implementation and evaluation, individualizing for diverse student needs and communication with students.
Prerequisite: HDFS 311 with C- or better and HDFS 330 [C] and HDFS 331 [C]
Recommended: HDFS 261

HDFS 444, FAMILY VIOLENCE AND NEGLECT, 4 Credits
Examination of the causes and consequences of family abuse and neglect, including child abuse, domestic violence and elder abuse.
Recommended: 6 credits of HDFS, SOC or PSY.
Available via Ecampus

HDFS 447, *FAMILIES AND POVERTY, 4 Credits
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: HDFS 446, HDFS 447H
Available via Ecampus

HDFS 447H, *FAMILIES AND POVERTY, 4 Credits
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: HDFS 447

HDFS 460, FAMILY POLICY, 4 Credits
Family policies aim to protect, promote, and strengthen families by addressing one or more of the five explicit functions families perform: (a) family formation, (b) partner relationships, (c) economic support, (d) childrearing, and (e) caregiving. This course will explore the relationships between family policies and family functioning using state, federal, and international policy examples. By reviewing theoretical frameworks for conceptualizing family policy, students will assess the consequences policies may have for family well-being.
Available via Ecampus

HDFS 461, *PROGRAM DEVELOPMENT AND PROPOSAL WRITING, 4 Credits
Principles of program development and evaluation applied to the development of a proposal for a human services program; analysis of needs and resources, identification of empirically-based strategies, and assessment. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: HDFS 360 with C- or better and HDFS 361 [C]
Available via Ecampus

HDFS 462, PROFESSIONAL HELPING SKILLS, 4 Credits
Explores collaborative, strengths-based methods to resolve individual, family, and community problems. Applies ethical standards to case study, with emphasis on the values of human dignity and social justice. Develops basic helping skills within an empowerment framework.
Prerequisite: HDFS 262 with C- or better and HDFS 310 (may be taken concurrently) [P]
HDFS 465, TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 3 Credits
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
Equivalent to: HDFS 465H
This course is repeatable for 18 credits.
Recommended: 6 credits of HDFS, SOC or PSY.

HDFS 465H, TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 3 Credits
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
Attributes: HNRS – Honors Course Designator
Equivalent to: HDFS 465
This course is repeatable for 18 credits.
Recommended: 6 credits of HDFS, SOC or PSY

HDFS 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: HDFS 499H
This course is repeatable for 16 credits.

HDFS 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: HDFS 499
This course is repeatable for 16 credits.

HDFS 501, RESEARCH, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 502, INDEPENDENT STUDY, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

HDFS 505, READING AND CONFERENCE, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 506, SPECIAL PROBLEMS/SPECIAL PROJECTS, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 510, INTERNSHIP, 3-15 Credits
This course is repeatable for 16 credits.

HDFS 511, THEORIES OF HUMAN DEVELOPMENT, 4 Credits
Critical examination of significant theories of human development. Emphasizes evolution of theories and impact on current human development research.

HDFS 516, CHILD DEVELOPMENT, 4 Credits
Study of theories, concepts, and issues related to physical, cognitive, social, and emotional development in infants and children. Covers family contexts, risk and resilience, nature/nurture issues, critical/sensitive periods, the importance of early experience, and the relationship between basic and applied research.
Recommended: 15 quarter credits of social and behavioral sciences.

HDFS 517, ADOLESCENT DEVELOPMENT, 4 Credits
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development in adolescents. Covers identity formation, family contexts, adolescent sexuality, societal contexts for adolescent development, and risk and resilience processes.
Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 518, ADULT DEVELOPMENT AND AGING, 4 Credits
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development throughout adulthood. Covers life transitions, stress-related growth, optimal aging, wisdom, and developmental methods.
Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 519, THE LIFE COURSE, 4 Credits
Introduces students to key concepts, principles, and controversies in life-course studies. Emphasizes how the nature and rhythm of the life course is structured by time and place. Examines how the lives of individuals and groups are shaped by history, demography, social institutions, states and policies, and culture.

HDFS 529, INTRODUCTORY DATA ANALYSIS WITH SAS, 1 Credit
Introduction to basic statistical concepts and the use of the SAS software for data analysis. Graded P/N.

HDFS 530, RESEARCH IN HUMAN DEVELOPMENT AND FAMILY SCIENCES I, 4 Credits
An overview of research design, measurement, sampling and evaluation research. Introduces computer applications for data collection and analysis. Lec/lab.
Recommended: Undergraduate statistics and 12 credits of social science courses.
HDFS 531, APPLIED QUANTITATIVE METHODS I: ANOVA, 4 Credits
Principles and application of general linear models for categorical predictors and repeated measures designs (e.g., ANOVA).
Prerequisite: HDFS 529 with B- or better

HDFS 532, APPLIED QUANTITATIVE METHODS II: LINEAR REGRESSION, 4 Credits
Principles and application of general linear models for continuous predictors (e.g., multiple regression).
Prerequisite: HDFS 531 with B- or better
Equivalent to: HDFS 632

HDFS 533, SOCIAL POLICY AND HUMAN DEVELOPMENT, 4 Credits
Probes how policies and governments affect human development over the life course. Examines experiences in family, education, work, and health. Families are a central lens for examining effects. Offered alternate years.
Equivalent to: HOEC 533

HDFS 534, SOCIAL PROGRAM AND POLICY EVALUATION, 4 Credits
Models of evaluation and application of applied research methods to social programs and policies.
Prerequisite: HDFS 531 with C or better
Equivalent to: HOEC 534

HDFS 538, QUALITATIVE RESEARCH METHODS I, 4 Credits
Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches.
Equivalent to: HDFS 635
Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 539, QUALITATIVE METHODS II, 4 Credits
Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches. Application of qualitative methods through completion of a qualitative research project.
Prerequisite: HDFS 538 with C or better

HDFS 541, FAMILY STUDIES, 4 Credits
Critical survey of current research in family studies with a focus on diverse family structures and processes.
Recommended: 15 quarter credits of behavioral and social sciences.

HDFS 546, THEORIES OF FAMILY STUDIES, 4 Credits
An overview of the major theoretical perspectives used in the study of families. Issues of theory construction and evaluation are also covered. Course goal is to enable the student to apply conceptual frameworks to a particular area of interest.
Equivalent to: HDFS 547

HDFS 547, FAMILIES AND POVERTY, 3 Credits
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families.
Equivalent to: HDFS 546

HDFS 556, TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 3 Credits
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan.
This course is repeatable for 18 credits.
Recommended: 6 credits of HDFS, SOC or PSY.

HDFS 587, SOCIAL GERONTOLOGY, 3 Credits
An introduction to aging research targeted toward understanding demographics of aging societies, lifespan theories, methods of aging research, psychosocial aging processes, family and caregiving issues, housing and long-term care, and current social policies.

HDFS 601, RESEARCH, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 602, INDEPENDENT STUDY, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 603, DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

HDFS 605, READING AND CONFERENCE, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 606, SPECIAL PROJECTS, 1-6 Credits
This course is repeatable for 16 credits.

HDFS 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

HDFS 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.
HDFS 610, PRACTICUM/INTERNSHIP, 3-15 Credits
This course is repeatable for 16 credits.

HDFS 630, QUANTITATIVE METHODS IN FAMILY AND INDIVIDUAL DEVELOPMENT, 3 Credits
Advanced quantitative techniques in human development and family studies. Includes longitudinal designs, structural equation modes. Content varies with each offering.
Prerequisite: HDFS 532 with B- or better
This course is repeatable for 9 credits.

HDFS 639, COMMUNITY-BASED PARTICIPATORY RESEARCH, 4 Credits
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotions.
Recommended: 9 credits of public health or HDFS graduate coursework

HDFS 665, TEACHING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES, 1 Credit
Principles and practices of pedagogy in human development and family sciences related to both on-campus and Ecampus instruction. Graded P/N.
This course is repeatable for 6 credits.

HDFS 685, RACE, CLASS, CULTURE AND AGING, 4 Credits
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as H 685/HDFS 685.
Equivalent to: H 685
Recommended: 9 credits of public health or HDFS graduate coursework

HDFS 699, SPECIAL TOPICS, 1-4 Credits
This course is repeatable for 8 credits.

HDFS 808, WORKSHOP, 1-16 Credits
PREREQ: Application to Early Childhood Leadership Directions.
This course is repeatable for 16 credits.

Public Health (H)

H 100, INTRODUCTION TO PUBLIC HEALTH, 4 Credits
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Equivalent to: H 100H
Available via Ecampus

H 100H, INTRODUCTION TO PUBLIC HEALTH, 4 Credits
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 100

H 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

H 201, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 206, PROJECTS, 1-16 Credits
Available via Ecampus

H 210, *INTRODUCTION TO THE HEALTH CARE SYSTEM, 3 Credits
Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

H 220, INTRODUCTION TO HEALTH DATA ANALYSIS, 3 Credits
Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems.
Recommended: MTH 105 or MTH 111 or higher mathematics.
Available via Ecampus

H 225, *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS, 4 Credits
Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus
H 250, INTRODUCTION TO HEALTH CARE MANAGEMENT, 3 Credits
Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc.
Prerequisite: H 210 (may be taken concurrently) with C- or better
Available via Ecampus

H 309, PRACTICUM IN HEALTH CARE SERVICES, 3-6 Credits
Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N.
This course is repeatable for 12 credits.

H 310, HEALTH FIELD EXPERIENCES, 3-6 Credits
Introductory field experience in a health or health-related worksite.
Graded P/N.
Prerequisite: H 210 with C- or better
This course is repeatable for 12 credits.
Available via Ecampus

H 312, HIV/AIDS AND STIS IN MODERN SOCIETY, 3 Credits
Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases.
Available via Ecampus

H 319, INTRODUCTION TO HEALTH POLICY, 3 Credits
Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative.
Prerequisite: H 210 with C- or better
Available via Ecampus

H 320, INTRODUCTION TO HUMAN DISEASE, 3 Credits
Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.
Available via Ecampus

H 333, *GLOBAL PUBLIC HEALTH, 3 Credits
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: H 333H
Available via Ecampus

H 333H, *GLOBAL PUBLIC HEALTH, 3 Credits
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; HNRS – Honors Course Designator
Equivalent to: H 333

H 344, *FOUNDATIONS OF ENVIRONMENTAL HEALTH, 3 Credits
Identifies environmentally-linked disease, population growth, and health concerns associated with toxic substances, food quality, air pollution, water pollution, noise, solid and hazardous waste, and pesticide use. Explores scientific topics related to environmental health in a global context that impact our collective environment. Compares and contrasts select environmental problems in the US to those that occur in the global community.
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

H 349, PEER HELPER SKILLS DEVELOPMENT, 3 Credits
Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

H 364, DRUGS, SOCIETY AND HUMAN BEHAVIOR, 3 Credits
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Prerequisite: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364H
H 364H, DRUGS, SOCIETY AND HUMAN BEHAVIOR, 3 Credits
Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual’s value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention.
Attributes: HNRS – Honors Course Designator
Prerequisite: PSY 201 with C- or better or PSY 202 with C- or better
Equivalent to: H 364

H 376, EVIDENCE-BASED HEALTH PROMOTION, 3 Credits
Future health professionals will learn what makes a successful health promotion program. Students will lean about research-tested programs that are effective for promoting health in community, clinical, and educational settings. Students will begin to develop the skills needed to critically examine evidence in the field and select programs to address current public health issues.
Prerequisite: H 100 with C- or better and H 225 [C-]
Available via Ecampus

H 385, SAFETY AND HEALTH STANDARDS AND LAWS, 3 Credits
Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.
Available via Ecampus

H 388, *GLOBAL ENVIRONMENTAL HEALTH, 3 Credits
An overview of global environmental issues, including climate change, air pollution, water, e-waste, and metals, and their impacts on human health. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

H 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: H 399H
This course is repeatable for 16 credits.

H 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: H 399
This course is repeatable for 16 credits.

H 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 402, INDEPENDENT STUDY, 1-16 Credits
This course is repeatable for 16 credits.

H 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

H 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 407, SEMINAR, 2 Credits
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Equivalent to: H 407H
Recommended: H 480 for students in EOH (Environmental and Occupational Health) minors. H 250 for students in the HMP (Health Management and Policy) option. H 225 and H 320 for students in the HPHB (Health Promotion and Health Behavior) option
Available via Ecampus

H 407H, SEMINAR, 2 Credits
Seminar to prepare students for their internship in public health. Focus is on professionalism, leadership skills, identifying strengths, and transitioning from college to graduate school or the working world.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 407
Recommended: H 480 for students in EOH (Environmental and Occupational Health) minors. H 250 for students in the HMP (Health Management and Policy) option. H 225 and H 320 for students in the HPHB (Health Promotion and Health Behavior) option

H 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 409, PRACTICUM, 1-6 Credits
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N.
This course is repeatable for 16 credits.

H 410, INTERNSHIP, 1-12 Credits
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N.
Prerequisite: H 407 with C- or better
This course is repeatable for 24 credits.
Recommended: H 436 (for HMP students). H 225 and H 320 and H 476 (for HPHB students)

H 414, BE THE CHANGE FOR GLOBAL HEALTH TRANSFORMATION, 3 Credits
Learn how stigma and discrimination create differences in access to resources and lead to health injustice and disparities. Draw on social justice and community mobilization frameworks to explore health-related social movements and social change necessary to improve public health throughout the world. Contextualize local work to eliminate health disparities in the United States within a global context and as part of global processes. Learn how community mobilization can lead to the transformation of structures, systems, and ideologies that drive discrimination and health disparities.
Prerequisite: H 100 with C- or better
H 415, PEOPLE ON THE MOVE: MIGRATION AND GLOBAL HEALTH, 3 Credits
Overview of migration as an issue of global health importance; social determinants of migrant health and disparities; migrant health and sustainable development.
Prerequisite: H 100 with C- or better

H 416, GLOBAL POVERTY AND HEALTH DISPARITIES, 3 Credits
Learn why poverty remains a primary factor in poor health outcomes around the world, driving limited access to clean water and sanitation, healthful food, education, safety, basic rights, and health care. Examine global poverty, including the causes and consequences of global poverty and the ways in which social structures, identities, and policies shape wealth and health. Discuss global distribution of wealth, the wealth-health gradient and social determinants of health in a global context, causes and consequences of global poverty, and policy and programmatic intervention strategies aimed at reducing material hardship and global inequality.
Prerequisite: H 100 with C- or better

H 418, PUBLIC HEALTH ETHICS AND ISSUES, 3 Credits
Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology.

H 421, MENTAL HEALTH, 3 Credits
Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders.
Prerequisite: H 225 with C- or better and H 320 [C-]

H 422, HEALTH, AGING AND CONTROL OF CHRONIC DISEASES, 4 Credits
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.
Recommended: 9 credits of health course work.

H 425, FOUNDATIONS OF EPIDEMIOLOGY, 3 Credits
Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec.
Prerequisite: H 220 with C- or better or ST 201 with C- or better or ST 314 with C- or better or ST 351 with C- or better
Available via Ecampus

H 432, ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE, 3 Credits
Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Prerequisite: (ECON 201 with C- or better or ECON 201H with C- or better) and H 210 [C-]

H 433, *HEALTH CARE LAW AND REGULATION, 3 Credits
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: H 210 with C or better and H 250 [C-] and WR 222 [C-]
Available via Ecampus

H 436, ADVANCED TOPICS IN HEALTH CARE MANAGEMENT, 3 Credits
Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care.
Prerequisite: H 210 with C- or better and H 250 [C-]
Available via Ecampus

H 445, *OCCUPATIONAL HEALTH, 3 Credits
Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

H 448, PUBLIC HEALTH TOXICOLOGY, 3 Credits
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health
Prerequisite: H 344 with C- or better
Recommended: One term of basic chemistry
Available via Ecampus

H 449, MASS MEDIA AND HEALTH, 3 Credits
Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns.
Prerequisite: H 225 with C- or better and H 320 [C-]
H 457, FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS, 3 Credits
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Prerequisite: H 210 with C- or better and H 250 [C-] and BA 315 [C-]
Available via Ecampus

H 458, REIMBURSEMENT MECHANISMS, 3 Credits
Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system.
Prerequisite: H 210 with C- or better
Available via Ecampus

H 459, SEXUALITY: A HEALTH SCIENCE PERSPECTIVE, 3 Credits
Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined.

H 460, *PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Recommended: 6 credits in public health.

H 461, FINANCING AND ADMINISTRATION OF LONG-TERM CARE, 3 Credits
Examines the financing and administration of long-term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 462, PUBLIC HEALTH AND VIOLENCE IN SOCIETY, 3 Credits
Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 463, PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS, 4 Credits
A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: H 225 with C- or better and H 320 [C-] and H 376 [C-]

H 464, DIETARY INTERVENTIONS FOR PUBLIC HEALTH, 3 Credits
A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators.
Prerequisite: NUTR 225 with C- or better
Equivalent to: NUTR 477

H 465, UNDERGRADUATE EOH SEMINAR, 1 Credit
Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion. Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N.
This course is repeatable for 2 credits.
Available via Ecampus

H 467, EMERGENCY AND DISASTER MANAGEMENT, 3 Credits
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 468, SELECTED TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Equivalent to: H 491
This course is repeatable for 6 credits.

H 490, SPECIAL TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
Attributes: HNRS – Honors Course Designator
Equivalent to: H 491
This course is repeatable for 6 credits.

H 491, APPLIED ERGONOMICS, 3 Credits
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 492, DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH, 3 Credits
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

H 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
H 505, READING AND CONFERENCE, 1-16
Credits
This course is repeatable for 16 credits.

H 506, PROJECTS, 1-16
Credits
This course is repeatable for 16 credits.

H 507, SEMINAR, 1-16
Credits
This course is repeatable for 16 credits.

H 508, WORKSHOP, 1-16
Credits
This course is repeatable for 16 credits.

H 509, PRACTICUM, 1-16
Credits
Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for 16 credits.

H 510, INTERNSHIP, 1-16
Credits
Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for 16 credits.
Available via Ecampus

H 511, COMMUNITY, CULTURE, AND GLOBAL HEALTH, 3
Credits
Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.

H 512, INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES, 3
Credits
Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.
Available via Ecampus

H 513, INTEGRATED APPROACH TO PUBLIC HEALTH, 12
Credits
An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.

H 514, ENVIRONMENT, SAFETY AND HEALTH SEMINAR, 1
Credit
One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for 3 credits.

H 515, RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES, 3
Credits
Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.

H 516, RESEARCH METHODS IN GLOBAL HEALTH, 3
Credits
Overview of research methods used to understand health, illness, health care, and health-seeking behavior in international settings. Special emphasis on the use of qualitative and mixed methods in international health research.

H 518, PUBLIC HEALTH ETHICS AND ISSUES, 3
Credits
Explores key ethical issues in the context of public health practice; codes and guidelines for ethical conduct of public health practice; issues related to social accountability, vulnerable populations, and ethical framework for community engagement.
Available via Ecampus

H 519, DISPLACEMENT, MIGRATION, AND GLOBAL HEALTH, 3
Credits
Critical examination of health of displaced/migrant populations with an emphasis on health disparities and social determinants. Understanding intersections of humanitarianism, migration, vulnerability, and displacement from a global health perspective.

H 520, HEALTH DISPARITIES, 3
Credits
Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.
Available via Ecampus

H 521, MENTAL HEALTH, 3
Credits
Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.

H 522, HEALTH, AGING AND CONTROL OF CHRONIC DISEASES, 4
Credits
Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging.
Recommended: 9 credits of public health course work.
H 523, FOUNDATIONS OF PUBLIC HEALTH, 4 Credits
Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health.
Available via Ecampus

H 524, INTRODUCTION TO BIOSTATISTICS, 4 Credits
Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.
Available via Ecampus

H 525, EPIDEMIOLOGICAL METHODS I, 3 Credits
Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.
Prerequisite: H 513 with B- or better or H 535 with B- or better

H 526, EPIDEMIOLOGIC METHODS II, 3 Credits
Concepts and methods of epidemiological analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research.
Prerequisite: H 524 with B- or better and H 525 [B-]

H 527, CRITICAL ASSESSMENT OF INTERNATIONAL HEALTH PROGRAMS, 3 Credits
Introduces the critical evaluation framework of assessing international health development programs, based on self-determination and community ownership principles. The framework of assessment method includes three levels: upstream evaluation, midstream evaluation, and downstream evaluation.
Recommended: H 528 and H 529

H 528, GLOBAL HEALTH ISSUES, 3 Credits
Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.

H 529, INTERNATIONAL HEALTH, 3 Credits
Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.

H 530, HEALTH POLICY ANALYSIS AND POLITICS, 3 Credits
Examination of current health policy issues affecting health care programs, services, and organization as well as the role of politics in public health and health policy. Exploration of processes by which health policy proposals are generated, promoted, defeated, modified and implemented.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus

H 532, ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE, 3 Credits
Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets.
Recommended: ECON 201

H 533, HEALTH SYSTEMS ORGANIZATION, 3 Credits
Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.
Available via Ecampus

H 534, HEALTH CARE LAW AND REGULATION, 3 Credits
Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

H 535, INTERPRETING EPIDEMIOLOGIC EVIDENCE, 3 Credits
Intended for students in the human sciences and allied health fields. Introduces basic epidemiology concepts. Topics will include measures of disease frequency, assessing population health, causal logic, quantifying associations between exposures and health outcomes, epidemiologic study design, and threats to study validity (random error, bias, confounding). Examples focus on application of epidemiological methods to a variety of health-related fields.

H 536, HEALTHCARE ORGANIZATION LEADERSHIP THEORY AND BEHAVIOR, 3 Credits
Overview of organization theory and behavior in health care organizations. Emphasis is on developing an understanding of the factors and forces that influence the structures, behaviors, and operations of health care delivery organizations. This understanding will be developed through consideration of organizations, their environments, and the roles of individuals working in management.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better
Available via Ecampus
H 537, INJURY EPIDEMIOLOGY, 3 Credits
An overview of the distribution and determinants of injuries, methodological issues specific to injury epidemiology, and approaches to injury control.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 513 with B- or better
Recommended: Graduate epidemiology training

H 538, PUBLIC AND PRIVATE HEALTH INSURANCE, 3 Credits
Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 540, WATER AND HUMAN HEALTH, 3 Credits
Critically examine the complex relationship between water quality, human activities, and population health.

H 541, AIR QUALITY AND HUMAN HEALTH, 3 Credits
Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 542, ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT, 3 Credits
Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.

H 543, EXPOSURE SCIENCE I, 4 Credits
Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.

H 544, ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY, 3 Credits
Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health.
Prerequisite: H 525 with C or better
Recommended: Graduate level statistics course

H 546, PHYSICAL AGENTS AND HUMAN HEALTH, 3 Credits
Focus on physical agents (heat, noise, vibration, radiation) and health risks associated with these agents. It covers the range and sources of exposure to physical agents, methods of characterizing these exposures, effects on human health, and the regulations/standards that set limits for physical agents. Lec/lab.

H 547, GIS AND PUBLIC HEALTH, 4 Credits
Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health who have no (or introductory level) knowledge of GIS. Lec/lab.

H 548, PUBLIC HEALTH TOXICOLOGY, 3 Credits
Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health.
Recommended: H 544 with a grade of C- or better and one term of basic chemistry.
Available via Ecampus

H 549, MASS MEDIA AND HEALTH, 3 Credits
Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
Prerequisite: H 571 with C or better

H 550, SOCIAL EPIDEMIOLOGY, 3 Credits
Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health.
Prerequisite: H 525 with B or better
Recommended: Introductory course in epidemiology

H 551, APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA, 3 Credits
Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results.
Prerequisite: H 526 with B- or better and H 560 [B-] and H 580 [B-]

H 552, DISASTER EPIDEMIOLOGY, 3 Credits
Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 554, EPIDEMIOLOGY OF AGING, 3 Credits
An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better
H 555, CANCER EPIDEMIOLOGY, 3 Credits
Introduction to basic concepts and methodology in cancer epidemiology.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better

H 556, STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS, 3 Credits
Theories and methodologies of long-range planning and strategic management in health care organizations.

H 557, FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS, 3 Credits
Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies.
Recommended: H 210 and H 250

H 558, REIMBURSEMENT MECHANISMS, 3 Credits
Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature.

H 559, MATERNAL AND CHILD HEALTH, 3 Credits
Women’s reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 560, PUBLIC HEALTH SURVEILLANCE, 3 Credits
An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis.
Prerequisite: H 524 with B- or better and H 525 [B-]

H 562, INFECTIOUS DISEASE EPIDEMIOLOGY, 3 Credits
Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or H 514 with B- or better

H 563, PHYSICAL ACTIVITY EPIDEMIOLOGY, 3 Credits
Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better
Recommended: H 524

H 564, COMPUTING TOOLS AND HEALTH DATA ANALYSIS, 3 Credits
Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed.
Corequisites: H 524

H 565, PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES, 3 Credits
Public health approach to the identification of women’s health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability.
Equivalent to: BA 565
Recommended: 6 credits in public health.

H 566, DATA MINING IN PUBLIC HEALTH, 3 Credits
An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health.
Recommended: H 581 and H 564

H 568, FINANCING AND ADMINISTRATION OF LONG-TERM CARE, 3 Credits
Examines the financing and administration of long-term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 571, PRINCIPLES OF HEALTH BEHAVIOR, 3 Credits
Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.
Available via Ecampus

H 572, COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION, 3 Credits
History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grassroots methods and social change.

H 573, INTRODUCTION TO MULTILEVEL/HIERARCHICAL MODELS, 3 Credits
Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks.
Recommended: H 581
H 575, EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS, 3 Credits
Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program. 
Prerequisite: H 513 with B- or better or H 515 with B- or better or HHS 514 with B- or better
Available via Ecampus

H 576, PROGRAM PLANNING FOR HEALTH/HUMAN SERVICES, 4 Credits
Provides students with an introduction to the principles of program planning and the development of program plans, with a focus on evidence-based public health/human services. Students will have the opportunity to integrate skills developed through prior courses in the context of writing a program plan.
Prerequisite: (H 515 with C- or better or HHS 514 with C- or better) and H 571 [C-] and H 575 [C-]

H 578, INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I, 3 Credits
A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis.
Prerequisite: (H 524 with C or better and H 526 [C])
Recommended: Knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation)

H 580, LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA, 4 Credits
Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/lab.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 581, GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS, 4 Credits
Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab.
Recommended: H 580

H 582, ANALYSIS OF CORRELATED HEALTH DATA, 3 Credits
Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations.
Prerequisite: H 581 with C or better

H 583, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT, 4 Credits
Studies the design and management principles and practices in the environment, safety and health field.

H 584, ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS, 3 Credits
Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 585, ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW, 3 Credits
Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals.
Recommended: H 385

H 586, BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH, 3 Credits
An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health.
Prerequisite: H 581 with C or better

H 587, TIME TO EVENT ANALYSIS OF HEALTH DATA, 3 Credits
Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research.
Prerequisite: (H 524 with C or better or HDFS 530 with C or better)

H 588, APPLIED OCCUPATIONAL SAFETY AND HEALTH, 3 Credits
The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.
H 589, EMERGENCY AND DISASTER MANAGEMENT, 3 Credits
Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 590, OCCUPATIONAL ERGONOMICS AND BIOMECHANICS, 3 Credits
Examines the advanced theories, applications, and contemporary topics of occupational ergonomics and biomechanics. Topics include muscle physiology, work-related musculoskeletal disorders, assessing biomechanical exposure in the workplace, various material handling assessment tools, 3-Dimensional Static Strength Prediction Program, human vibrations, and implementing ergonomic interventions.

H 591, SELECTED TOPICS, 1-3 Credits
Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year.
This course is repeatable for 9 credits.

H 592, SPATIAL EPIDEMIOLOGY, 3 Credits
An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining patterns and associations.
Prerequisite: H 547 with C or better and H 581 [C]

H 593, REPRODUCTIVE EPIDEMIOLOGY, 3 Credits
Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health.
Prerequisite: H 513 with B- or better or HHS 514 with B- or better or H 525 with B- or better or H 535 with B- or better
Recommended: H 524

H 594, APPLIED ERGONOMICS, 3 Credits
Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595, DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH, 3 Credits
Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes.

H 596, HEALTHCARE EPIDEMIOLOGY, 3 Credits
Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic testing, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better
Recommended: H 524
Available via Ecampus

H 597, METHODS IN FOODBORNE DISEASE OUTBREAK INVESTIGATION, 3 Credits
Focuses on the practical basis for developing and implementing methods for foodborne disease outbreak detection, investigation and control, using recent outbreaks to highlight underlying principles. Biological characteristics of major foodborne disease pathogens, clinical features of the illnesses its causes and epidemiologic presentations of foodborne outbreaks will be reviewed. The implications of these characteristics will be discussed in a problem solving, interactive format that examines theory and practice in the context of recent outbreaks. Strategies to promote timely decision-making will be emphasized.
Prerequisite: H 513 with B- or better or H 525 with B- or better or H 535 with B- or better or HHS 514 with B- or better

H 598, HEALTH POLICY ANALYSIS METHODS, 3 Credits
Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens. Health services research methods, including data sources for health policy research and health policy literature.
Prerequisite: H 513 with B- or better and H 533 [B-]

H 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 24 credits.

H 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

H 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

H 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

H 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

H 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

H 610, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

H 611, INTRODUCTION TO SYSTEMATIC LITERATURE REVIEWS, 3 Credits
Students will learn how to apply systematic review methodology to a research question of their choice and understand how literature reviews inform evidence-based decision-making. Examples will focus on applying literature reviews to public health, clinical science, and biomedical research.
H 612, DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE, 1 Credit
Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. This course is repeatable for 9 credits.

H 613, INDEPENDENT RESEARCH PROJECT, 1-9 Credits
Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N. This course is repeatable for 9 credits.

H 614, RESEARCH MANUSCRIPT, 4 Credits
PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

H 615, ADVANCED EVALUATION AND RESEARCH DESIGN, 3 Credits
Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors. Recommended: H 515 and H 575

H 620, ADVANCED TOPICS IN GLOBAL HEALTH INTERVENTION AND PRACTICE, 3 Credits
Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decision-making in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored. Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.

H 622, GLOBAL HEALTH SYSTEMS, POLICY AND POLITICS, 3 Credits
Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.

H 626, GLOBAL HEALTH SYSTEM FINANCE AND STRENGTHENING, 3 Credits
Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.

H 630, QUANTITATIVE HEALTH POLICY RESEARCH METHODS I, 4 Credits
Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature. Prerequisite: H 524 with B- or better

H 632, APPLIED HEALTH ECONOMICS, 4 Credits
Advanced doctoral-level quantitative health policy/services research methods emphasizing causal inference when potential endogeneity is present. Prerequisite: H 630 with B- or better

H 635, COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE, 3 Credits
The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

H 638, PUBLIC AND PRIVATE HEALTH INSURANCE, 3 Credits
Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method. Prerequisite: H 533 with C or better

H 639, COMMUNITY-BASED PARTICIPATORY RESEARCH, 4 Credits
Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion. Recommended: 9 credits of public health or HDFS graduate coursework

H 642, ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT, 3 Credits
Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.
H 650, REPORTING RESULTS: WRITING FOR EPIDEMIOLOGY, 3 Credits
Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer.
Prerequisite: H 526 with B- or better and H 551 [B-] and H 580 [B-]

H 651, ADVANCED EPIDEMIOLOGICAL METHODS, 4 Credits
Covers advanced topics in epidemiology. Course expands on many of the same topics as H 526, and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models, directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics.
Prerequisite: H 526 with B- or better and H 581 [B-]

H 652, CAUSAL INference IN EPIDEMIOLOGY, 3 Credits
Discussion of the theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics.
Applied examples will be used for illustration.
Prerequisite: H 651 with B- or better

H 659, QUANTITATIVE HEALTH POLICY RESEARCH METHODS II, 4 Credits
Advanced doctoral-level quantitative health policy/services research methods emphasizing health care utilization, expenditures, and outcomes data.
Prerequisite: H 630 with B- or better

H 662, ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY, 3 Credits
Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods.
Prerequisite: H 526 with B- or better and H 562 [B-]

H 672, ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR, 3 Credits
Provides an in-depth examination of the use of qualitative methods in health behavior research and practice.
Recommended: H 515 and SOC 518 and HDFS 538

H 673, MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS, 4 Credits
Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts.
Recommended: H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (eg. sociology or psychology or health promotion or education programs)

H 675, DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS, 3 Credits
Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice.
Recommended: H 571 and H 575 and H 576

H 676, ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR, 3 Credits
Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior.
This course is repeatable for 6 credits.
Recommended: H 515 and H 571

H 681, ADVANCED TOPICS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY, 3 Credits
Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY: MOVING FROM RESEARCH TO PRACTICE, 3 Credits
An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering.
H 683, ADVANCED RESEARCH METHODS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH, 3 Credits
Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.

H 685, RACE, CLASS, CULTURE AND AGING, 4 Credits
Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as H 685/HDFS 685.
Equivalent to: HDFS 685
Recommended: 9 credits of public health or HDFS graduate coursework

H 699, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

Aging Sciences Graduate Minor
This graduate minor provides interdisciplinary graduate education in the aging sciences through formal course work, research requirements and experiential learning that is aligned with the student’s career goals in aging.

Minor Code: 3755
The Aging Sciences minor requires that master’s students select 15 credits from the following courses. Doctoral students must select 18 credits.

Minor Code: 407
Gerontology Certificate

This certificate is available as a standalone program ([https://registrar.oregonstate.edu/standalone-certificates/](https://registrar.oregonstate.edu/standalone-certificates/)).

Carolyn Aldwin, Director  
Program on Gerontology  
Waldo Hall 437  
Oregon State University  
Corvallis, OR 97331-5102  
541-737-2024  
Email: carolyn.aldwin@oregonstate.edu  
(oregonaldwin@oregonstate.edu)  
Website: [http://health.oregonstate.edu/sbhs/gerontology](http://health.oregonstate.edu/sbhs/gerontology)

The Gerontology Certificate offers an interdisciplinary approach to the study of aging. Because aging involves physiological, sociological, and psychological processes, gerontology education and research is relevant to many disciplines. Career opportunities in gerontology are extremely diverse and include positions in community services, health sciences, nutrition and dietetics, housing, health and physical education, pharmacy, counseling, health care administration, business, public policy, and many other areas.

Recognizing the diversity of relevant disciplines and career opportunities, the Gerontology Certificate offers course work in gerontology through 7 schools/departments. The program is administered through the School of Social and Behavioral Health Sciences.

To be considered a gerontology course, the course content must address gerontology-related issues. Further, students are required to do any class projects, including term papers, on aging topics.

In addition to gerontology courses, seminars, field study (310/410), research (401), and projects (406) in gerontology can be offered through the Gerontology Program. Field study, research, and projects in gerontology may also be available through other schools/departments. Students register for field study, research, or projects credit in the school or department that best meets their needs for supervision given the nature of the experience.

For additional information about the program, visit the Gerontology website ([https://health.oregonstate.edu/gerontology/](https://health.oregonstate.edu/gerontology/)).

*  Baccalaureate Core Course (BCC)  
^ Writing Intensive Course (WIC)  
1 Courses must be taken from a minimum of two different subject codes (H, HDFS, KIN, NUTR, PHL, PSY or SOC)

### Field study or field projects in Gerontology — Any Department **

In addition to gerontology courses, seminars, field study (310/410), research (401), and projects (406) in gerontology are offered through the Gerontology Program.

- 3-6 credits of an approved field experience or an approved research field project are required. No more than 6 credits of field study will count toward certificate completion.
- Field Experience or Internships involve professional level work experience in an agency or organization that serves older adults. To be considered a gerontology field placement, at least half of the student’s time must be spent working with or for older individuals.
- 9 credits of gerontology course work must be completed prior to beginning field study. Exceptions may be approved by the Gerontology Program Director.
- Specific requirements for field study are cooperatively developed by the faculty supervisor, student, and a community agency. The type of field study selected should reflect the student’s career interests, as well as the student’s competencies and the community agency’s needs.
- Field study in gerontology must be approved by the Program on Gerontology if it is to be used to meet Certificate requirements. Approval forms are available from the Program on Gerontology.

### Additional Requirements

1. A grade of ‘C’ or better in all gerontology courses. Overall GPA of 2.5.
2. Formal application to the program; forms available from the program office in 437 Waldo Hall.
3. Certificate requirements fulfilled within five years following graduation. Students who have not completed certificate requirements upon receipt of the degree may continue as special, postbaccalaureate, or graduate students.

Major Code: C437
Gerontology Graduate Minor

Graduate Areas of Concentration

Gerontology

Gerontology refers to the study of aging, and also includes adult development. The existence of large numbers of individuals over the age of 65 is unprecedented in the history of humankind. In the next ten years, the number of older adults is expected to double in developed countries and quadruple in the developing world. This growth will pose major challenges for societies in addressing the health, economic, and social needs of this population.

To address these challenges, students, researchers, and practitioners in the field of aging will need to take a multidisciplinary approach to solving these challenges, which will require an understanding of biological, psychological, sociocultural, and design and engineering factors. Accordingly, we have designed a multidisciplinary minor, drawing upon faculty across campus, which is tailored to individual student needs.

Minor Code: 4370

Students are required to have a 3.0 GPA and to have one of the gerontology faculty on their committee. Students must take 18 credits but can decide the classes in conjunction with their committee. Sample classes include:

Health Management and Policy Minor

Also available via Ecampus.

The Health Management and Policy minor provides students with a background in public health, with an emphasis on the management of healthcare programs and agencies, including hospitals, medical clinics, health insurance plans, and public health organizations. It is ideal for students interested in learning more about the U.S. health care system, including Business, Pre-Medicine, Pre-Physical Therapy students.

Students pursuing a Public Health major cannot add a Health Management and Policy minor.

Minor Code: 465

Students with this minor may not take any of the required courses listed below with S/U grading and must earn a grade of C- or better in all minor coursework and prerequisites, including the ‘any other H course’ requirement. Students may, however, take additional public health courses not required for the minor with S/U grading.

Human Development and Family Sciences Minor

Also available at OSU-Cascades and via Ecampus.

Students minoring in Human Development and Family Sciences will learn how people change across the life course within the contexts of families, schools, work and society. This minor is a perfect complement to majors such as business, education, psychology, sociology, public health and a wide variety of allied health professions, and women, gender, and sexuality studies.

A minor in HDFS will enable students to:

- Explore how individuals develop and become resilient over time – particularly within the context of family, school, work and society.
- Discover how significant relationships with parents, partners, teachers and friends can influence the ways in which we develop over time.
- Consider how difficult circumstances, such as poverty, make lives and relationships more difficult to navigate.
- Appreciate the diverse ways in which individuals and families thrive and survive.

Total Credits 28-31

* Baccalaureate Core Course (BCC)

Human Development and Family Sciences Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Child Development (p. 1484)
- Early Childhood (p. 1484)

- General Human Development and Family Sciences (p. 1484)
- Human Services (p. 1485)

Also available at OSU-Cascades and via Ecampus.

HDFS majors explore how individuals develop and become resilient over time – particularly within the contexts of family, school, work and society. They discover how significant relationships with parents, partners, teachers and friends can influence the ways in which we develop. HDFS majors consider how difficult environments, such as living in poverty, can make lives and relationships more challenging. Finally, they learn to appreciate the diverse ways in which individuals and families thrive and survive.

The BS in Human Development and Family Sciences can be pursued through one of four required options listed below:

1. Child Development (p. 1484) (Corvallis campus only)
2. Early Childhood (p. 1484) (Cascades campus only)
3. General (p. 1484) (All campuses, including Ecampus)
4. Human Services (p. 1485) (Corvallis and Cascades)

Note: It is possible to choose more than one option. Students should meet with an advisor in the college’s Office of Student Success in the Women’s Building 105 for additional information.

Major Code: 447

Pre-Human Development and Family Sciences Major Code: 457

- Understand the methods by which public health identifies potential causes of population health status, and identifies potential targets for intervention.
- Describe the fundamental roles of public health and how those roles are operationalized in public health organization, funding, workforce, and regulations.
- Translate and apply relevant theory and research to practice with individuals, families, and communities.
- Demonstrate an understanding of the ecological contexts in which individuals and families develop.
- Demonstrate a value for diversity in practice with individuals, families and communities.
- Critically evaluate public policy with relevance to individual and family wellbeing.

180 credits are needed to graduate, 60 of which must be upper division. Credits include baccalaureate core courses, HDFS core courses, classes required for each option, and electives.

This option is offered within the following major(s):

- Human Development and Family Sciences - College of Public Health and Human Sciences (p. 1483)

Through classes and internships, the Child Development option provides students with research-based strategies for supporting children's development. Students develop a strong foundation for careers in preschools, early intervention, positive youth development, and parenting education. Students will be prepared for graduate work in HDFS, education, special education, developmental psychology, and other fields related to child development.

With a double degree in human development and family sciences and education, students can earn dual licensure at the pre-kindergarten and elementary school levels.

Early Childhood Option

This option is offered within the following major(s):

- Human Development and Family Sciences - College of Public Health and Human Sciences (p. 1483)

Available only at OSU-Cascades.

This option prepares students to promote lifelong development, learning, and well-being of children and families. Through a focus on the early childhood period from prenatal through age 8 years, students examine dynamics among children, families, schools, communities, and cultures that have lasting impacts throughout life. Practicum and internship experiences prepare students to work directly with children and families in preschools, Head Start programs, child care, early intervention/early childhood special education, or parent and family support. Graduates also create and implement prevention and intervention programs, and pursue graduate study in fields such as education, special education, counseling, human development and family science, psychology, sociology, and social work.

General Human Development and Family Sciences Option

This option is offered within the following major(s):

- Human Development and Family Sciences - College of Public Health and Human Sciences (p. 1483)
Also available at OSU-Cascades.

Students majoring in the General HDFS Option explore development across the life span within the contexts of families, schools, work and society. This unique program provides current knowledge, practical skills and opportunities for hands-on learning to help students excel in fields dedicated to improving the lives of individuals and families.

The General HDFS Option is ideal for students interested in education, social work, allied health sciences, or other helping professions. It is a perfect complement to a minor or a second major in business, education, psychology, sociology, public health and a wide variety of allied health professions, and women, gender, and sexuality studies.

**Human Services Option**

This option is offered within the following major(s):

- Human Development and Family Sciences - College of Public Health and Human Sciences (p. 1483)

Also available at OSU-Cascades.

Students pursuing an HDFS Human Services Option explore collaborative, strengths-based methods to resolve individual, family, and community problems. They develop cultural competence to engage in ethical helping practices that promote human dignity, social justice, and empowerment. They also learn effective helping skills such as empathy, rapport building, and active listening. Students gain an understanding of the social and human service delivery systems and two internship experiences are required for degree completion.

Students will be prepared to pursue career and graduate work in HDFS and aligned fields such as counseling, marriage and family therapy, social work, nonprofit administration, and other behavioral and social sciences.

**Human Development and Family Studies Graduate Major (MS, PhD)**

**Graduate Areas of Concentration**

**Human development and family studies**

The School of Social and Behavioral Health Sciences offers course work and programs of study in the area of human development and family studies. The Gerontology Program is also administered by the College of Public Health and Human Sciences through the school. Areas of study and degrees granted are described below.

Human Development and Family Studies offers graduate work leading to master of science and doctor of philosophy degrees. Graduate programs take a multidisciplinary approach, preparing students for college and university teaching and research, as well as development, administration, and evaluation of programs serving individuals and families across the lifespan.

Our research is interdisciplinary with signature themes in

- a. transitions across the life course,
- b. risk and resilience across the life span, and
- c. developmental and family research methods.

Our faculty recognizes the critical importance of culture and gender, diversity, and contemporary global perspectives in the discovery...
Human Development and Family Studies Graduate Minor

Research is an important focus of the Graduate Program in Human Development and Family Studies. The HDFS faculty includes nationally recognized scholars who are widely published in areas such as families and aging; family communication and conflict; child, adolescent, and adult development; intergenerational family relationships; family structure; and gender. We emphasize both quantitative and qualitative methodology.

For more information, contact the Graduate Program in Human Development and Family Studies, College of Public Health and Human Sciences, 437 Waldo Hall, OSU, Corvallis, OR 97331-5102.

Public Health Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Health Management and Policy (p. 1487)
- Health Promotion and Health Behavior (p. 1487)

Also available via Ecampus.

Public health is an exciting and diverse field for those interested in the health and well-being of populations and their environments. Careers in the public and private sectors offer opportunities to work locally, regionally, nationally, and internationally to promote health and prevent disease. Recognizing that multiple and complex factors affect the public's health, our faculty and students examine environmental issues, access to health care services, health policies, and social and contextual factors as determinants of health.

Students in this major will choose one of the following major options:

- Health Management and Policy
- Health Promotion and Health Behavior

Both options provide students with the prerequisites for graduate programs in public health.

For further information about undergraduate programs in public health, visit the website (https://health.oregonstate.edu/academics/public-health/)

The College of Public Health and Human Sciences is accredited by the Council on Education for Public Health (http://ceph.org/accredited/) (CEPH).

Health Management and Policy Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 1486)

Also available via Ecampus.

The Health Management and Policy option provides training and skills in the management of public health and health care programs and agencies, and in the analysis of public health policies. The program is appropriate for those who want to manage health programs in a wide range of institutions, both public and private, and is particularly well-suited for students interested in the business aspects associated with the delivery and financing of health services. Students can also focus on administration in assisted living facilities, continuing care retirement centers and nursing homes, and receive a Certificate in Gerontology.

Option Code: 242

- Identify the main components and issues of the organization, financing, and delivery of health services in the U.S.
- Apply the appropriate principles and metrics to address performance issues within and between healthcare organizations.
- Establish, build, and sustain professional contacts for the purpose of building networks of people with similar goals and that support similar interests.

Only grades of C- or better in Public Health major coursework (including prerequisites) will be applied to Public Health major requirements (no S/U grades). Only two attempts at courses will be permitted and applied to the degree.

Health Promotion and Health Behavior Option

This option is offered within the following major(s):

- Public Health - College of Public Health and Human Sciences (p. 1486)

Also available via Ecampus.

This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

Option Code: 241

- Evaluate the sociocultural determinants of health behavior across the lifespan in diverse populations.
- Participate in the planning and implementation of messages and programs to promote health.
- Identify and appraise evidence-based public health practices and programs and adapt them for diverse populations and communities.

College of Science

We offer internationally recognized undergraduate and graduate programs across the life, physical, mathematical and computational sciences. Specifically, we offer courses of study in biology, biochemistry and biophysics, biochemistry and molecular biology, biohealth sciences, chemistry, microbiology, mathematics, physics, statistics and zoology. We also offer 12 pre-professional programs to prepare students for careers in healthcare or medical professions. Students have opportunities to make original discoveries through research while working alongside world-class scientists.

The College of Science is a nucleus of learning, societal engagement, achievement, and discovery. It offers students an inclusive, welcoming and intellectually stimulating environment to a diverse community.

Research and teaching in the College of Science are enhanced through OSU's outstanding professional schools in engineering, oceanography, agriculture, forestry and pharmacy. Science students can enrich their degrees with courses from these areas.

Majors

The majors of the College of Science are informally divided into these areas:

**COMPUTATIONAL AND MATHEMATICAL SCIENCES**

- Mathematics and Statistics (graduate only)

**Life Sciences**

- Biochemistry and Biophysics, Biochemistry and Molecular Biology, BioHealth Sciences, Biology, Microbiology, Molecular and Cellular Biology (graduate only), Zoology

**Physical Sciences**

- Chemistry and Physics

**Double Degrees**

Undergraduates with majors in the College of Science can earn a second degree in education, innovation management, international studies, or sustainability. For more information, visit the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog.

**Pre-Professional Programs**

The College of Science offers special programs in health-related fields to help students meet entrance requirements for professional schools in clinical laboratory science, dentistry, medicine, optometry, pharmacy, physical therapy, physician assistant, podiatry and veterinary medicine.

**Curricula in Science**

Curricula in science lead to the following degrees: Bachelor of Arts (BA), Bachelor of Science (BS), Master of Arts (MA), Master of Science (MS), Professional Science Master’s (PSM), and Doctor of Philosophy (Ph.D.). (See the Graduate School for advanced degree requirements.) The College also offers a Master of Arts in Interdisciplinary Studies (MAIS).

**Teacher Certification**

All professional teacher education is offered through the College of Education. The following majors in the College of Science are good options for students interested in teaching middle school and high school. The College of Science offers an education option in biology (pre-education), chemistry (chemistry education), mathematics (secondary teaching emphasis) and physics (physics education).

Certain mathematics courses (MTH 211, MTH 212, MTH 390) are highly recommended for students who plan to teach elementary or secondary
mathematics. See the College of Education section of this catalog for admission to the teacher licensure programs.

**Summer Courses for Secondary School Science and Mathematics Teachers**

During summer session, the College of Science offers a number of courses designed for high school teachers of science and/or mathematics. For offerings and full descriptions, visit the OSU Summer Session (http://summer.oregonstate.edu/) website.

**Scholarships**

The College of Science offers many scholarships to incoming and current students (with at least 24 credits at OSU). To learn more or apply, visit our website (https://www.science.oregonstate.edu/scholarships/).

To graduate with a BS degree in the College of Science, undergraduate students must fulfill the following requirements:

- University Baccalaureate Core (48)
- College of Science Requirements (these credits can also fulfill part of the baccalaureate core requirements)
- Mathematical sciences (12)
- Physical, earth, and/or biological sciences (15) to include a two-term sequence (At least one term in biological science and one term in physical or earth science. Must include a two-term sequence in one of these sciences)
- Department requirements (see each department)

Some departments also grant a BA degree that requires a full year of a college-level (200-level or above) foreign language and at least 9 credits of College of Liberal Arts electives in addition to credits required for the baccalaureate core. See the department listings for specific requirements.

A minimum 2.00 GPA is required in College of Science majors and minors; (S/U grading is not allowed in science majors or minors).

The curricula are shown for each major; some substitutions can be made with department and college approval. Unless otherwise indicated, the conditions and credits for research, thesis, reading and conference, and seminar are to be arranged with the instructor involved.

**Biochemistry and Biophysics (BB)**

**BB 100, THE MOLECULES OF LIFE, 2 Credits**

A brief introduction to molecular biology for nonspecialists. Subjects vary, but have included biochemical basis of the origin of life, biochemical genetics, biochemical aspects of memory and behavior, mutagenesis, bioenergetics and nutrition, and environmental biochemistry.

**Equivalent to: BB 100H**

**BB 111, INTRODUCTION TO BIOCHEMISTRY AND BIOPHYSICS RESEARCH, 1 Credit**

Designed to introduce biochemistry and biophysics students to departmental research opportunities and advisors.

**BB 211, PROFESSIONAL DEVELOPMENT II: MOLECULAR, MICROBIAL, BIOHEALTH, 1 Credit**

Develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N. CROSSTagged as BB 211/BHS 211.

**Equivalent to: BHS 211**

**BB 314, CELL AND MOLECULAR BIOLOGY, 4 Credits**

Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.

**Prerequisite:** (( (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])

**Available via Ecampus**

**BB 314H, CELL AND MOLECULAR BIOLOGY, 4 Credits**

Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** ((( (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])

**Equivalent to: BB 314, BI 314, BI 314H**

**BB 315, MOLECULAR BIOLOGY LABORATORY, 3 Credits**

Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.

**Equivalent to: BI 315**

**BB 317, ^SCIENTIFIC THEORY AND PRACTICE, 3 Credits**

Teaches students the practice of biological science. Topics cover scientific theory, communications, ethics and critical evaluation. CROSSTagged as BB 317/BI 317. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisite:** ((( (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])

**Equivalent to: BI 317**
BB 331, *INTRODUCTION TO MOLECULAR BIOLOGY, 3 Credits
Course dealing with the molecular basis of cellular function, with emphasis upon modern developments, and the foundation for practical applications of this knowledge. The course will involve the conceptual background necessary to appreciate the applications of molecular biology. Throughout the course opportunities will be given to discuss public policy issues and questions: What are the moral and practical problems that flow from identification of an individual as being at risk for a late-appearing genetic disorder, such as Huntington's disease or certain cancers? Does the scientific or public value of knowing the entire DNA sequence of the human genome justify a situation in which individual or small-scale research cannot be supported? What issues arise when the fruits of biological research, mostly publicly funded, are commercialized? Should a novel organism be patented? How can biotechnology be applied to environmental problems? (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: CH 122 with D- or better or CH 202 with D- or better or CH 222 with D- or better or CH 225H with D- or better or CH 232 with D- or better or CH 232H with D- or better or CH 262H with D- or better or CH 272 with D- or better)
Available via Ecampus

BB 332, *MOLECULAR MEDICINE, 3 Credits
Provides students an understanding of medical advances from a rapidly evolving molecular point of view. Advances in knowledge of the human genome arising from DNA sequencing efforts and major leaps in understanding of the regulating cellular growth and division are presented in an easy-to-understand fashion appropriate for students in all majors. Course discussions and assignments will cover implications of advances in molecular medicine from ethical, economic, technical and societal standpoints. The aim of the course is to present technical material in a way that non-scientists will understand and conversely to summarize ethical, economic, and philosophical considerations in a way that the scientists understand the implications of these technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Any biology course.

BB 345, INTRODUCTION TO BIOLOGICAL SEQUENCE ANALYSIS, 2 Credits
Introduction to computer-based analyses of biomolecular data, particularly nucleic acid and protein sequences, with the Python programming language. Topics include reading and writing of sequence files, subsequences, reverse complement, finding sequence patterns, subroutines, control structures, and parsing complex data files.

BB 350, ELEMENTARY BIOCHEMISTRY, 4 Credits
Service course for students desiring a short introduction to biochemistry. Four lectures weekly.
Prerequisite: CH 331 with D- or better and CH 332 (may be taken concurrently) [D-
Available via Ecampus

BB 360, INTRODUCTION TO NEUROSCIENCE, 3 Credits
An introduction to the field of neuroscience. Topics include structure of neurons, outline of signaling in the central nervous system, Nernst equation, action potentials, synaptic transmission, chemical signaling in vision, disease and drugs.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))) and (CH 233 [C-] or CH 233H [C-] and (CH 263 [C-] or CH 263H [C-])
Available via Ecampus

BB 361, NEUROSCIENCE OF SENSORY AND MOTOR SYSTEMS, 3 Credits
Provides advanced knowledge and understanding of the structure and function of the sensory and motor systems and the interactions between them. These systems will be considered in the context of human physiology.
Prerequisite: BB 360 with C- or better

BB 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: BB 399H
This course is repeatable for 16 credits.

BB 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 399
This course is repeatable for 16 credits.

BB 401, UNDERGRADUATE RESEARCH, 1-16 Credits
Equivalent to: BB 401H
This course is repeatable for 16 credits.

BB 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

BB 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BB 405H
This course is repeatable for 16 credits.

BB 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 405
This course is repeatable for 16 credits.

BB 407, BIOCHEMISTRY/BIOPHYSICS SEMINAR, 1-16 Credits
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. Graded P/N.
Equivalent to: BB 407H
This course is repeatable for 99 credits.
BB 407H, BIOCHEMISTRY/BIOPHYSICS SEMINAR, 1-16 Credits
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics.
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 407
This course is repeatable for 99 credits.

BB 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

BB 450, GENERAL BIOCHEMISTRY, 4 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures.
Prerequisite: CH 332 with D- or better or CH 336 with D- or better
Equivalent to: BB 450H
Available via Ecampus

BB 451, GENERAL BIOCHEMISTRY, 3 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures.
Prerequisite: BB 450 with D- or better or BB 450H with D- or better
Equivalent to: BB 451H
Available via Ecampus

BB 453, BIOCHEMISTRY AND MOLECULAR BIOLOGY LABORATORY TECHNIQUES, 4 Credits
Laboratory course for non-majors that introduces students to biochemistry and molecular biology techniques used to investigate the functional relationship between nucleic acid sequence, gene expression, and protein function.
Prerequisite: BB 451 with C- or better

BB 460, ADVANCED CELL BIOLOGY, 3 Credits
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology. Offered every other fall in odd years.
Prerequisite: BB 314 with C- or better or BI 314 with C- or better or BI 314H with C- or better or BB 451 with C- or better or BB 492 with C- or better

BB 481, MACROMOLECULAR STRUCTURE, 3 Credits
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.
Prerequisite: BB 450 with D- or better or BB 490 with D- or better
Available via Ecampus

BB 482, BIOPHYSICS, 3 Credits
Examines quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
Prerequisite: BB 481 with D- or better and CH 440 [D-]

BB 483, ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE, 3 Credits
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
Prerequisite: BB 482 with D- or better or BB 582 with D- or better

BB 484, CHROMATIN AND EPIGENETICS, 3 Credits
An in-depth look at ‘chromatin’ (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of ‘epigenetic’ gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.
Prerequisite: (BI 314 with C- or better or BI 314H with C- or better or BB 314 with C- or better or BB 314H with C- or better and (BI 315 [C-] or BB 315 [C-] or BB 493 [C-] or BB 493H [C-])

BB 485, APPLIED BIOINFORMATICS, 3 Credits
Fundamental concepts needed to understand the software and methods used in bioinformatics. Includes contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Available via Ecampus
BB 486, ADVANCED MOLECULAR GENETICS, 3 Credits
Covers aspects of transmission genetics (Mendel's laws, mapping strategies) informed by the machineries required for genetic information storage, transcription, translation, and protein processing. Analyses of state-of-the-art primary literature and lectures give a perspective on important "model" organisms, including examples from among bacteria, plants, fungi, and animals.
Prerequisite: (BB 314 with C- or better or BB 314H with C- or better) and (BB 492 [C-] or BB 451 [C-])

BB 490, BIOCHEMISTRY 1: STRUCTURE AND FUNCTION, 3 Credits
Examines how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.
Prerequisite: (CH 332 with C- or better or CH 336 with C- or better) and (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-])) or ((BI 221 [C-] or BI 221H [C-]) or (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) )

BB 491, BIOCHEMISTRY 2: METABOLISM, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisite: BB 490 with D- or better or BB 590 with D- or better

BB 492, BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisite: (BB 490 with D- or better or BB 590 with D- or better) and (BB 491 [D-] or BB 591 [D-])

BB 493, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, 3 Credits
Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisite: (BB 451 with D- or better or BB 451H with D- or better) or BB 492 with D- or better
Equivalent to: BB 493H

BB 494, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, 3 Credits
Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisite: BB 493 with D- or better or BB 593 with D- or better or BB 315 with D- or better or BB 492 with D- or better
Equivalent to: BB 494H

BB 498, ASBMB CERTIFICATION EXAM, 0 Credits
A comprehensive, standardized test administered by the American Society of Biochemistry and Molecular Biology and used as a direct assessment of the discipline specific knowledge of seniors in the majors administered by the Biochemistry and Biophysics department. A pass will be given to all students who complete the exam. Contact the Biochemistry and Biophysics Program for more information.

BB 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
This course is repeatable for 16 credits.

BB 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BB 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BB 507, SEMINAR, 1-2 Credits
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented.
This course is repeatable for 16 credits.

BB 550, GENERAL BIOCHEMISTRY, 4 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.
Recommended: CH 332
Available via Ecampus

BB 551, GENERAL BIOCHEMISTRY, 3 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.
Recommended: BB 550
Available via Ecampus

BB 560, ADVANCED CELL BIOLOGY, 3 Credits
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology
Recommended: BB 314 or BI 314 or BI 314H or BB 492 or BB 451
BB 581, MACROMOLECULAR STRUCTURE, 3 Credits
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.
Recommended: BB 450 or BB 490

Available via Ecampus

BB 582, BIOPHYSICS, 3 Credits
Examines quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
Prerequisite: BB 581 with D- or better

BB 583, ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE, 3 Credits
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
Prerequisite: BB 582 with C or better

BB 584, CHROMATIN AND EPIGENETICS, 3 Credits
An in-depth look at ‘chromatin’ (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of ‘epigenetic’ gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.
Recommended: (BI 314 or BI 314H) and BI 315

BB 585, APPLIED BIOINFORMATICS, 3 Credits
Fundamental concepts needed to understand the software and methods used in bioinformatics. Includes contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.
Recommended: BB 314 or BB 314H

Available via Ecampus

BB 586, ADVANCED MOLECULAR GENETICS, 3 Credits
Covers aspects of transmission genetics (Mendel's laws, mapping strategies) informed by the machineries required for genetic information storage, transcription, translation, and protein processing. Analyses of state-of-the-art primary literature and lectures give a perspective on important “model” organisms, including examples from among bacteria, plants, fungi, and animals.
Recommended: (BI 314 or BI 314H) and BI 315 and BB 492

BB 590, BIOCHEMISTRY 1: STRUCTURE AND FUNCTION, 3 Credits
Examines how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.

BB 591, BIOCHEMISTRY 2: METABOLISM, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisite: BB 590 with C or better

BB 592, BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisite: BB 590 with C or better and BB 591 [C]

BB 593, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, 3 Credits
Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Recommended: (BB 451 or BB 451H) or BB 492

BB 594, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, 3 Credits
Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Recommended: BB 493 or BB 593 or BB 315 or BI 315

BB 599, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
This course is repeatable for 16 credits.

BB 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BB 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
BB 605, READING & CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BB 607, SEMINAR, 1-2 Credits
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented.
This course is repeatable for 16 credits.

BB 650, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, cell cycle and cancer, neurochemistry, oxidative stress, cell adhesion and motility. Most courses offered alternate years.
This course is repeatable for 18 credits.

BB 651, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include cell surfaces, enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years.
This course is repeatable for 18 credits.

BB 652, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years.
This course is repeatable for 18 credits.

BB 699, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BioHealth Sciences (BHS)

BHS 107, HEALTH PROFESSIONS: DENTAL, 1 Credit
Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.

BHS 110, BIOHEALTH SCIENCES ORIENTATION, 1 Credit
Introduction of incoming BioHealth Sciences students to college life with an emphasis on faculties, facilities, services, and curricula in BHS. Exposure to career opportunities for students interested in the BioHealth Sciences. Graded P/N.

BHS 199, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
Equivalent to: GS 199
This course is repeatable for 16 credits.

BHS 211, PROFESSIONAL DEVELOPMENT II: MOLECULAR, MICROBIAL, BIOHEALTH, 1 Credit
Develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N. CROSSLISTED as BB 211/BHS 211.
Equivalent to: BB 211

BHS 255, *ALLIED HEALTH MICROBIOLOGY, 4 Credits
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSLISTED as BHS 255/MB 255.
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 255
Available via Ecampus

BHS 316, PRINCIPLES OF IMMUNOLOGY, 3 Credits
Interactions of the innate and adaptive immune responses in the context of infectious diseases, autoimmune diseases, immunodeficiencies and immunotherapies. This course is designed for non-microbiology majors.
Prerequisite: MB 230 with C- or better or (BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

BHS 320, HUMAN BACTERIOLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: MB 320
Available via Ecampus
BHS 323, ^MICROBIAL INFLUENCES ON HUMAN HEALTH, 3 Credits
How microorganisms contribute in beneficial and detrimental ways to human health. Emphasis on microbial contributions to cancer, gut health, chronic infection and autoimmune diseases. This course is part of the Writing Intensive Curriculum for the BioHealth Sciences major. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MB 302 with D- or better or (BB 314 with D- or better or BB 314H with D- or better) or BB 450 with D- or better
Available via Ecampus

BHS 329, MECHANISMS OF DISEASE: INTRODUCTION TO GENERAL PATHOLOGY, 3 Credits
An introduction to basic principles of disease, focused on structural and functional changes of cells, tissues and organs, and their relationships to clinical disease. The emphasis of the course is at the cellular to organ level, but will cover some on molecular mechanisms as pertinent.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-])) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]))
Available via Ecampus

BHS 340, HUMAN VIROLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: MB 340
Available via Ecampus

BHS 410, SCIENCE INTERNSHIP, 1-12 Credits
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
Equivalent to: GS 410
This course is repeatable for 12 credits.

BHS 415, ONE HEALTH IN PRACTICE, 3 Credits
One health is the concept that human, animal and environmental health are all intertwined. Utilizes current one health issues such as disease outbreaks and antimicrobial resistance to encourage students from diverse fields to develop interdisciplinary collaboration and communication skills. CROSSLISTED as BHS 415/VMB 415.
Equivalent to: VMB 415
Recommended: At least third-year standing.

BHS 499, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

Biology (BI)
BI LD1, GENERAL CREDIT, 1-16 Credits
BI LD2, GENERAL CREDIT, 1-16 Credits
BI 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

BI 101, *ENVIRONMENTAL BIOLOGY: ECOLOGY, CONSERVATION, GLOBAL CHANGE, 4 Credits
Introduction to ecosystems, including biodiversity, species interactions, human impacts, and conservation biology. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 102 or 103. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Available via Ecampus
BI 102, *ANIMAL BIOLOGY: GENES, BEHAVIOR AND EVOLUTION OF LIFE, 4 Credits
Introduction to how genetics shapes life on Earth, including how understandings of DNA and environmental factors are leading to biotechnological advances. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 103. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BI 102H
Available via Ecampus

BI 103, *HUMAN BIOLOGY: ANATOMY, PHYSIOLOGY AND DISEASE, 4 Credits
Introduction to the biology of humans, including aspects of human health and disease. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 102. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BI 103H

BI 109, HEALTH PROFESSIONS: MEDICAL, 1 Credit
Discussion of matters relating to a medical career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education, and related matters. Speakers are included. Graded P/N.

BI 111, INTRODUCTION TO MARINE LIFE IN THE SEA: MARINE HABITATS, 1 Credit
A field-focused learning experience exploring the varied marine life and habitats on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays and estuaries. Students will also be introduced to the breadth of marine science course offerings and research at Oregon State University's Hatfield Marine Science Center located in Newport, Oregon. Graded P/N.
Equivalent to: FW 111
Available via Ecampus

BI 150, INTRODUCTION TO MARINE BIOLOGY, 3 Credits
Survey of marine organisms, the environments they inhabit, and their evolutionary adaptations for thriving in those environments. The course will also highlight current conservation challenges that threaten marine life, such as climate change, overfishing, and pollution.

BI 175, *GENOMES, IDENTITIES AND SOCIETIES, 3 Credits
DNA's roles in shaping our senses of identity, individuality, and societal interconnectivity will be analyzed. New advances in genetic technology will be explored, along with their potential impacts on society. The relationships between genetics and discrimination will be examined with focus on cases from Oregon, America, and the world. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

BI 197, PROFESSIONAL DEVELOPMENT I: HEALTH PROFESSIONS, 1 Credit
Integrative Biology faculty and other professionals introduce a variety of human health professions including dentistry, medicine, pharmacy and others (veterinary medicine students take BI 198). Emphasizes professional development through exploring relevant social and cognitive concepts, as well as engaging in experiential learning and networking. Departmental and campus student success resources are highlighted. Graded P/N.

BI 198, PROFESSIONAL DEVELOPMENT I: BIOLOGY AND ZOOLOGY, 1 Credit
Integrative Biology faculty and biology professionals introduce life science careers outside of human health professions (human health profession students take BI 197). Emphasizes professional development through exploring relevant social and cognitive concepts, as well as engaging in experiential learning and networking. Departmental and campus student success resources are highlighted. Graded P/N.
Available via Ecampus

BI 199, SELECTED TOPICS, 1-16 Credits
Field Ecology.
Equivalent to: BI 199H
This course is repeatable for 16 credits.

BI 199H, SELECTED TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 199
This course is repeatable for 16 credits.

BI 204, *INTRODUCTORY BIOLOGY I, 4 Credits
Foundations of biological sciences including scientific inquiry, genetics, evolution, and ecology. Significant emphasis throughout on the application of core concepts to solve human and environmental problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Available via Ecampus
BI 205, *INTRODUCTORY BIOLOGY II, 4 Credits
Fundamental concepts in molecular and cellular biology, beginning with biomolecules and the origin of life, and ending with genomics. Significant emphasis throughout on applications of biotechnology to solve human problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) D- or CH 261H (may be taken concurrently) D-) or CH 271 (may be taken concurrently) D- or CH 271H (may be taken concurrently) D-))
Available via Ecampus

BI 206, *INTRODUCTORY BIOLOGY III, 4 Credits
Basic plant and animal physiology from an evolutionary perspective. Significant emphasis on topics of importance to human society, including human and plant disease. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health professional students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) D- or CH 261H (may be taken concurrently) D-) or CH 271 (may be taken concurrently) D- or CH 271H (may be taken concurrently) D-))
Available via Ecampus

BI 211, *PRINCIPLES OF BIOLOGY, 4 Credits
Origins of life, energy transformations, plant and animal diversity. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BI 211H

BI 211H, *PRINCIPLES OF BIOLOGY, 4 Credits
Origins of life, energy transformations, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: BI 211

BI 212, *PRINCIPLES OF BIOLOGY, 4 Credits
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better or CH 261 (may be taken concurrently) D- or CH 261H (may be taken concurrently) D-) or CH 271 (may be taken concurrently) D-)
Equivalent to: BI 212H

BI 212H, *PRINCIPLES OF BIOLOGY, 4 Credits
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better or CH 261 (may be taken concurrently) D- or CH 261H (may be taken concurrently) D-) or CH 271 (may be taken concurrently) D-)
Equivalent to: BI 212

BI 213, *PRINCIPLES OF BIOLOGY, 4 Credits
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213H

BI 213H, *PRINCIPLES OF BIOLOGY, 4 Credits
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213
**BI 221, *PRINCIPLES OF BIOLOGY: CELLS, 4 Credits**

Introduction to fundamental biological concepts and theories about the chemical and molecular basis of life, structure and function, transformation of energy and matter and information flow at a cellular and molecular level. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Prerequisite:** (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])

Equivalent to: BI 221H

**BI 221H, *PRINCIPLES OF BIOLOGY: CELLS, 4 Credits**

Introduction to fundamental biological concepts and theories about the chemical and molecular basis of life, structure and function, transformation of energy and matter and information flow at a cellular and molecular level. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator

**Prerequisite:** (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])

Equivalent to: BI 221

**BI 222, *PRINCIPLES OF BIOLOGY: ORGANISMS, 4 Credits**

Introduction to fundamental biological concepts and theories about plant, animal physiology, evolution, and ecology; specifically, evolutionary relationship, transformation of energy and matter, information flow and systems at an organismal level and systems at an organismal level. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Prerequisite:** BI 221 with D- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])

Equivalent to: BI 222H

**BI 222H, *PRINCIPLES OF BIOLOGY: ORGANISMS, 4 Credits**

Introduction to fundamental biological concepts and theories about plant, animal physiology, evolution, and ecology; specifically, evolutionary relationship, transformation of energy and matter, information flow and systems at an organismal level and systems at an organismal level. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Prerequisite:** BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])

Equivalent to: BI 222

**BI 223, *PRINCIPLES OF BIOLOGY: POPULATIONS, 4 Credits**

Introduction to fundamental biological concepts and theories about diversity, evolution, and ecology; specifically, evolutionary relationship, transformation of energy and matter, information flow and systems at a population level or above. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Prerequisite:** BI 221 with D- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])

Equivalent to: BI 223H

**BI 223H, *PRINCIPLES OF BIOLOGY: POPULATIONS, 4 Credits**

Introduction to fundamental biological concepts and theories about diversity, evolution, and ecology; specifically, evolutionary relationship, transformation of energy and matter, information flow and systems at a population level or above. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Prerequisite:** BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])

Equivalent to: BI 223

**BI 231, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits**

The first of a three-term introductory series. Using a strong gross anatomy focus, course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeleton, muscular and integumentary systems. BI 231 is a required prerequisite to BI 232 and BI 233. The BI 241 Lab is optional but prerequisite for either of the subsequent BI 242 or BI 243 lab courses in the series. Lec.
**BI 232, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits**
The second of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the human nervous, endocrine and reproductive systems. Lec.
**Prerequisite:** BI 231 (may be taken concurrently) with C- or better

**BI 233, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits**
The third of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Lec.
**Prerequisite:** BI 231 (may be taken concurrently) with C- or better

**BI 241, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits**
The first of a three-term introductory series. Using the human cadaver (prosection), course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeletal, muscular and integumentary systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
**Prerequisite:** BI 231 (may be taken concurrently) with C- or better

**BI 242, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits**
The second of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
**Prerequisite:** BI 231 (may be taken concurrently) with C- or better and BI 232 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

**BI 243, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits**
The third of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
**Prerequisite:** BI 231 (may be taken concurrently) with C- or better and BI 233 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

**BI 298, PROFESSIONAL DEVELOPMENT FOR BIOLOGISTS II, 1 Credit**
Students will develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N.
**Equivalent to:** BI 298H
**Available via Ecampus**

**BI 299, SPECIAL TOPICS, 1-16 Credits**
*This course is repeatable for 16 credits.*

**BI 301, *HUMAN IMPACTS ON ECOSYSTEMS, 3 Credits**
Selected human impacts on ecosystems are examined in depth, including air quality, global climate change, management of agricultural and forest resources, and threats to biological diversity. The causes, approaches to investigating, and potential solutions for each issue are discussed from a scientific and social perspective. Adverse effects on ecosystems that result from each environmental problem are examined. (Bacc Core Course)
**Attributes:** CSGI – Core, Synth, Global Issues
**Recommended:** One year of college biology or chemistry

**BI 306, *ENVIRONMENTAL ECOLOGY, 3 Credits**
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course)
**Attributes:** CSGI – Core, Synth, Global Issues
**Equivalent to:** BI 306H
**Recommended:** One year of college biology and chemistry

**BI 306H, *ENVIRONMENTAL ECOLOGY, 3 Credits**
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course)
**Attributes:** CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
**Equivalent to:** BI 306
**Recommended:** One year of college biology and chemistry

**BI 309, TEACHING PRACTICUM, 1-6 Credits**
Introductory experience for students assisting with instruction in Biology or Zoology courses. Admission is by application. See Cordley 3029 for details.
*This course is repeatable for 6 credits.*
BI 311, GENETICS, 4 Credits
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 311H
Available via Ecampus

BI 311H, GENETICS, 4 Credits
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

BI 315, MOLECULAR BIOLOGY LABORATORY, 3 Credits
Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BI 311

BI 319, THEORY, PRACTICE AND DISCOURSE IN THE LIFE SCIENCES, 3 Credits
The practice of science and the critical evaluation of scientific claims are explored through writings, discussions and presentations. Topics including the scientific method, ethics and the role of science in society are examined along with implications for professionals ranging from health care to environmental biology. Strategies for effectively communicating science with diverse audiences are emphasized. (Writing Intensive Course).
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

BI 331, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The first of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the skeletal, muscular and integumentary systems. Lec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (CH 123 [C-] or ((CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-]))) and BI 341 (may be taken concurrently) [C-]

BI 332, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The second of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Lec.
Prerequisite: BI 331 with C- or better and BI 342 (may be taken concurrently) [C-]

BI 333, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The third part of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the cardiovascular, respiratory, urinary and digestive systems. Lec.
Prerequisite: BI 332 with C- or better and BI 343 (may be taken concurrently) [C-]

BI 341, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The first of a three-term advanced series. Using the human cadaver (prosection) and physiological data acquisition equipment, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the human skeletal, muscular and integumentary systems. Lab.
Corequisites: BI 331

BI 342, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The second of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human nervous, endocrine and reproductive systems. Lab.
Corequisites: BI 332
BI 343, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The third of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human cardiovascular, respiratory, urinary and digestive systems. Lab.
Corequisites: BI 333

BI 345, *INTRODUCTION TO EVOLUTION, 3 Credits
Elements of evolutionary theory; origin and history of life; evolutionary controversy; origins of species, sex, and humans. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: Z 345
Available via Ecampus

BI 347, *OCEANS IN PERIL, 3 Credits
The interactions of society and the marine environment, emphasizing the ecological, biogeochemical, economic, sociological, and political significance of the oceans. Topics of current critical importance will include marine pollution, protecting marine habitats, conserving marine biodiversity, fisheries and aquaculture, ocean energy, biogeochemical change, global warming, ocean acidification, and sea level rise. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 101 with C- or better or BI 102 with C- or better or BI 211 with C- or better or BI 211H with C- or better or BI 213 with C- or better or BI 213H with C- or better or BI 204 with C- or better or BI 150 with C- or better or BI 221 with C- or better or BI 221H with C- or better
Available via Ecampus

BI 348, *HUMAN ECOLOGY, 3 Credits
The impact of humans on the environment, emphasizing the political, sociological, and ecological consequences of human population growth. Topics of current critical importance will include global warming trends, destruction of the ozone layer, consequences of pollution, habitat destruction, the loss of biodiversity, and conservation biology. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 101 with C- or better or BI 102 with C- or better or BI 211 with C- or better or BI 211H with C- or better or BI 213 with C- or better or BI 213H with C- or better or BI 204 with C- or better or BI 150 with C- or better or BI 221 with C- or better or BI 221H with C- or better
Available via Ecampus

BI 351, MARINE ECOLOGY, 3 Credits
Ecological interactions and principles in different marine habitats. Topics include the organisms (plants, invertebrates, vertebrates) found in major habitats and interactions between organisms. Habitats discussed include coral reefs, rocky shores, kelp forests, near-shore waters, open-ocean waters, and the deep sea. Emphasis is placed on how organism-organism interactions produce varying patterns of distribution, abundance, body size, diversity, stability, and succession.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: Z 351
Available via Ecampus

BI 353, PACIFIC NORTHWEST COASTAL ECOSYSTEMS, 4 Credits
A field-based introduction to the diversity of ecosystems of the Pacific Northwest coast. Biological and physical processes affecting the distribution, structure, community composition and physical features of these systems are explored through a variety of lectures and field trips. Ecosystem services and human impacts are examined.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 358, SYMBIOSES AND THE ENVIRONMENT, 3 Credits
Overview of the diversity of mutualistic symbioses and their roles in the natural environment. Integrative approach, from ecosystem to molecule, to the examination of certain key mutualisms. Lec. Offered alternate years.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or (CH 233 [C-] or CH 233H [C-]) or (CH 263 [C-] or CH 263H [C-]))

BI 370, ECOLOGY, 3 Credits
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))
Equivalent to: BI 370H
Available via Ecampus

BI 370H, ECOLOGY, 3 Credits
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Attributes: HNRS – Honors Course Designator
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))
Equivalent to: BI 370

BI 371, ^ECOLOGICAL METHODS, 3 Credits
Experimental design, data collection, analysis and synthesis in ecological studies; local ecosystems emphasized. May have field trip fee. Lec/lab.
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: BI 370 with D- or better or BI 370H with D- or better
BI 373, *FIELD METHODS IN MARINE ECOLOGY, 3 Credits
Exposure to research methods used in field studies of the marine rocky intertidal ecosystem. Research projects and writing exercises provide students with hands-on experience of collecting, analyzing, and presenting marine ecological data. Field trip fee. Lab fee. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (BI 351 may be taken concurrently with D- or better or BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])
Recommended: ST 352

BI 375, FIELD METHODS IN ECOLOGICAL RESTORATION, 4 Credits
Observation and application of theory and practice in ecological restoration. Using site visits and hands-on research, explores the roles in restoration of fire, local adaptation, disturbance history, natural history, beaver, and soils, including visits to several active and completed restoration projects and overnights in the field. Lab.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

BI 399, SPECIAL TOPICS, 0-16 Credits
May be repeated for 16 total credits.
Equivalent to: BI 399H
This course is repeatable for 16 credits.

BI 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: BI 401H
This course is repeatable for 16 credits.

BI 401H, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 401
This course is repeatable for 16 credits.

BI 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BI 405H
This course is repeatable for 16 credits.

BI 406, PROJECTS: CURATORIAL ASSISTANT, 1-6 Credits
Students assist with curatorial projects in OSU biological collections. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 407, SEMINAR, 1 Credit
Departmental seminar. Graded P/N.
Equivalent to: BI 407H, BI 407H, BOT 407, BOT 407H
This course is repeatable for 16 credits.

BI 407H, SEMINAR, 1 Credit
Departmental seminar. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 407
This course is repeatable for 16 credits.

BI 409, ADVANCED TEACHING PRACTICUM, 1-6 Credits
Advanced practicum experience for students assisting in Biology or Zoology courses. Includes advanced training in course content and development of instructional materials. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 410, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.
Available via Ecampus

BI 420, *VIRUSES IN MODERN SOCIETY, 3 Credits
Impact of viruses on modern civilization. Molecular mechanisms of viral infectivity. Approaches to the prevention and cure of viral diseases. Role of viruses in agriculture and industry. Offered alternate years. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 311 with D- or better or BI 311H with D- or better or BI 314 with D- or better or BI 314H with D- or better

BI 427, PALEOBIOLOGY, 4 Credits
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: Z 427

BI 445, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Prerequisite: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445H

BI 445H, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Attributes: HNRS – Honors Course Designator
Prerequisite: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445
BI 450, *MARINE BIOLOGY AND ECOLOGY, 15 Credits
A comprehensive lecture and laboratory introduction to the flora and fauna of the marine environment approached from the level of the organism to ecosystem. Ecological patterns and processes characteristic of marine communities will be emphasized. Lec/lab. Taught at Hatfield Marine Science Center, Newport, OR. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])
Recommended: ST 352
Available via Ecampus

BI 451, FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM, 4 Credits
In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. BI 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.
Prerequisite: ((BI 231 with D- or better and BI 241 [D-]) or (BI 331 [D-] and BI 341 [D-])) and ((BI 232 [D-] and BI 242 [D-]) or (BI 332 [D-] and BI 342 [D-])) and ((BI 233 [D-] and BI 243 [D-]) or (BI 333 [D-] and BI 343 [D-]))
Equivalent to: Z 451

BI 454, EVOLUTIONARY GENOMICS, 3 Credits
Examines the evolutionary forces that have produced such varied and complex genomes across the tree of life. The processes by which genomes can be structured, maintained, and remodeled (by nature or by humans) are explored through scientific literature. Special emphasis will be given to recent technological advances in genomics, along with their potential impacts on individuals and society.
Prerequisite: BI 311 with D- or better or BI 311H with D- or better

BI 456, PHYLOGENETICS, 4 Credits
Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.
Prerequisite: (ST 351 with D- or better or ST 351H with D- or better) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-] and (BI 311 [D-] or BI 311H [D-] or BI 445 [D-] or BI 445H [D-])

BI 483, POPULATION BIOLOGY, 3 Credits
Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.
Prerequisite: (MTH 241 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better or MTH 227 with D- or better) and (ST 351 [D-] or ST 351H [D-]) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-] and (BI 311 [D-] or BI 311H [D-] or BI 370 [D-] or BI 370H [D-])
Available via Ecampus

BI 485, MONSTER BIOLOGY, 3 Credits
Scientists seek to explain what exists and why things are. An alternative approach is to ask why things are not. Biological and physical laws are used to critically and rigorously assess why monsters from literature, television and film are not possible in the real world.
Prerequisite: (BI 311 (may be taken concurrently) with D- or better or BI 311H (may be taken concurrently) with D- or better) and (BI 370 (may be taken concurrently) [D-] or BI 370H (may be taken concurrently) [D-])

BI 495, DISEASE ECOLOGY, 3 Credits
An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.
Prerequisite: BI 370 with C- or better or BI 370H with C- or better

BI 498, SENIOR BIOLOGY FIELD TEST, 0 Credits
A comprehensive, two-hour exam to assess the biological knowledge of Biology and Zoology seniors. Students must complete the exam in their final undergraduate term or during spring term if graduating during summer when it is not offered. A pass will be given to all students who complete the exam. More details at http://ib.oregonstate.edu/advising/MFT-info.
Available via Ecampus

BI 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
Equivalent to: BI 499H
This course is repeatable for 16 credits.

BI 499H, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 499
This course is repeatable for 16 credits.

BI 481, BIOGEOGRAPHY, 3 Credits
Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today’s rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.
Prerequisite: BI 370 with D- or better or BI 370H with D- or better
Equivalent to: Z 481
Chemistry (CH)

CH 101, FOUNDATIONAL SKILLS FOR GENERAL CHEMISTRY, 3 Credits
Provides some extra preparation for students before enrolling in a general chemistry course. Emphasizes the skills required to be successful in general chemistry and the use of those skills in the context of chemistry concepts.
Prerequisite: Math Placement - ALEKS with a score of 046 or MTH 095 (may be taken concurrently) with C- or better or MTH 105 (may be taken concurrently) with C- or better or MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 241 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 228 (may be taken concurrently) with C- or better

CH 110, *ROYGBIV: THE CHEMISTRY OF COLORS, 4 Credits
An introduction to the concepts of chemistry and the importance of these concepts in understanding color. Lec/lab.
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

CH 121, GENERAL CHEMISTRY, 5 Credits
A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122, CH 123 are Bacc Core Courses)
Equivalent to: CH 104
Available via Ecampus

CH 122, *GENERAL CHEMISTRY, 5 Credits
A general chemistry sequence intended for majors in fields other than the physical sciences. Lec/lab/rec. (CH 122 and CH 123 are Bacc Core courses.)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 121 with C- or better or (CH 201 with C- or better or (CH 231 with C- or better or CH 231H with C- or better))
Available via Ecampus

CH 123, *GENERAL CHEMISTRY, 5 Credits
A general chemistry sequence intended for majors in fields other than the physical sciences. (CH 122 and CH 123 are Bacc Core courses.) Lec/rec/lab.
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 122 with C- or better or ((CH 232 with C- or better or CH 232H with C- or better) and (CH 262 [C-] or CH 262H [C-] or CH 272 [C-]) or (CH 202 [C-] and CH 205 [C-])
Available via Ecampus

CH 124, GENERAL CHEMISTRY, 3 Credits
A bridge course, allowing students who have taken one term of General Chemistry (CH 121) to complete the equivalent of one full semester of general chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab.
Prerequisite: CH 121 with D- or better

CH 125, GENERAL CHEMISTRY, 2 Credits
A bridge course, allowing students who also take one term of General Chemistry (CH 123) to complete the equivalent of one full semester of General Chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec./lab. Offered via Ecampus only.
Prerequisite: CH 121 with D- or better and CH 124 [D-]
Recommended: One semester of general chemistry at another institution

CH 130, GENERAL CHEMISTRY OF LIVING SYSTEMS, 4 Credits
Introduction to organic chemistry and the chemistry of biological systems. Organic nomenclature and fundamental reactions, emphasizing topics such as amino acids, proteins, biochemical energy, and nucleic acids (DNA and RNA). Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Lec/lab. Does not count toward a chemistry minor.
Available via Ecampus

CH 140, GENERAL, ORGANIC, AND BIOLOGICAL CHEMISTRY, 6 Credits
An introduction to general, organic, and biological chemistry. Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Offered via Ecampus only.
Recommended: Entering students should have a working knowledge of high school algebra, logarithms, and scientific notation
Available via Ecampus

CH 199, SPECIAL TOPICS, 1-3 Credits
This course is repeatable for 3 credits.

CH 201, CHEMISTRY FOR ENGINEERING MAJORS, 3 Credits
A sequence of selected chemistry topics for pre-engineering students. Lec.
Prerequisite: MTH 111 (may be taken concurrently) with D- or better or MTH 112 (may be taken concurrently) with D- or better or MTH 251 (may be taken concurrently) with D- or better or MTH 251H (may be taken concurrently) with D- or better or MTH 252 (may be taken concurrently) with D- or better or MTH 252H (may be taken concurrently) with D- or better or MTH 254 (may be taken concurrently) with D- or better or Math Placement - ALEKS with a score of 060
Available via Ecampus
CH 202, CHEMISTRY FOR ENGINEERING MAJORS, 3 Credits
A sequence of selected chemistry topics for pre-engineering students. Lec.
Prerequisite: CH 121 with C- or better or CH 201 with C- or better or CH 231 with C- or better or CH 231H with C- or better
Available via Ecampus

CH 205, LABORATORY FOR CH 202, 1 Credit
Three-hour weekly session for the development of laboratory skills in general chemistry for engineers. Lec/lab.
Prerequisite: CH 202 (may be taken concurrently) with D- or better

CH 211, RECITATION FOR CHEMISTRY 201, 1 Credit
80-minute weekly session for the development of problem-solving skills in general chemistry for engineers. Lec.
Corequisites: CH 201

CH 212, RECITATION FOR CHEMISTRY 202, 1 Credit
One-hour weekly session for the development of problem-solving skills in general chemistry for engineers. Rec.
Corequisites: CH 202

CH 220, CAREERS IN CHEMISTRY, 1 Credit
Course for chemistry majors that discusses strategies for success in the study of chemistry and the varied career opportunities available. Topics range from surviving freshman chemistry to choices of advanced classes, study abroad opportunities, internships, getting into and succeeding in graduate school, choices of chemical careers in academia, industry, government, non-governmental organizations, and using chemistry as a foundation for careers in other areas such as law and business. Graded P/N.

CH 231, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231 is a lecture course; CH 261H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 254 (may be taken concurrently) with C- or better or MTH 254H (may be taken concurrently) with C- or better or Math Placement - ALEKS with a score of 060
Equivalent to: CH 231
Available via Ecampus

CH 231H, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231H is a lecture course; CH 261H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 254 (may be taken concurrently) with C- or better or MTH 254H (may be taken concurrently) with C- or better or Math Placement - ALEKS with a score of 060
Equivalent to: CH 231
Available via Ecampus

CH 232, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pre-pharmacy, and chemical engineering. CH 232 is a lecture course; CH 262 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: CH 231 with C- or better or CH 231H with C- or better or CH 221 with C- or better
Equivalent to: CH 222, CH 225H, CH 232H
Available via Ecampus

CH 232H, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pre-pharmacy, and chemical engineering. CH 232H is a lecture course; CH 262H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisite: CH 231 with C- or better or CH 231H with C- or better or CH 221 with C- or better
Equivalent to: CH 222 with C- or better or CH 232H with C- or better

CH 233, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233 is a lecture course; CH 263 is the laboratory component. (Bacc Core Course if taken with CH 263)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: CH 232 with C- or better or CH 232H with C- or better or CH 222 with C- or better
Equivalent to: CH 233

CH 233H, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233H is a lecture course; CH 263H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisite: CH 232 with C- or better or CH 232H with C- or better or CH 222 with C- or better
Equivalent to: CH 233
CH 261, *LABORATORY FOR CHEMISTRY 231, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231)
Attributes: CPPS – Core, Pers, Physical Science
Corequisites: CH 231
Equivalent to: CH 261H, CH 271

CH 261H, *LABORATORY FOR CHEMISTRY 231H, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Corequisites: CH 231H
Equivalent to: CH 261

CH 262, *LABORATORY FOR CHEMISTRY 232, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 261 with D- or better or CH 261H with D- or better or CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232
Equivalent to: CH 262H, CH 272

CH 262H, *LABORATORY FOR CHEMISTRY 232H, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisite: CH 261 with D- or better or CH 261H with D- or better or CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232H
Equivalent to: CH 262

CH 263, *LABORATORY FOR CHEMISTRY 233, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233
Equivalent to: CH 263H, CH 273

CH 263H, *LABORATORY FOR CHEMISTRY 233H, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisite: CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233H
Equivalent to: CH 263

CH 271, *LABORATORY FOR CH 231 FOR CHEMISTRY MAJORS, 1 Credit
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 231)
Attributes: CPPS – Core, Pers, Physical Science
Corequisites: CH 231
Equivalent to: CH 271H

CH 272, *LABORATORY FOR CH 232 FOR CHEMISTRY MAJORS, 1 Credit
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 232)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232
Equivalent to: CH 272H

CH 273, *LABORATORY FOR CH 233 FOR CHEMISTRY MAJORS, 1 Credit
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 233)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233
Equivalent to: CH 273H

CH 324, QUANTITATIVE ANALYSIS, 4 Credits
A basic course in modern chemical analysis. Self-paced laboratory. CH 130 does not meet the prerequisites for this course.
Prerequisite: CH 123 with D- or better or CH 223 with D- or better or CH 226H with D- or better or (CH 233 with D- or better or CH 233H with D- or better) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-])
Recommended: One year of general chemistry

CH 331, ORGANIC CHEMISTRY, 4 Credits
Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec. CH 130 does not meet the prerequisites for this course.
Prerequisite: CH 123 with C- or better or CH 223 with C- or better or CH 226H with C- or better or (CH 233 with C- or better or CH 233H with C- or better) and (CH 263 [C-] or CH 263H [C-] or CH 273 [C-])
Recommended: One year of general chemistry
Available via Ecampus
CH 332, ORGANIC CHEMISTRY, 4 Credits
Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec.
Prerequisite: CH 331 with C- or better
Recommended: one year of general chemistry.
Available via Ecampus

CH 334, ORGANIC CHEMISTRY, 3 Credits
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisite: CH 123 with D- or better or CH 223 with D- or better or CH 226H with D- or better or ((CH 233 with D- or better or CH 233H with D- or better) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-]))
Recommended: One year of general chemistry

CH 335, ORGANIC CHEMISTRY, 3 Credits
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisite: CH 334 with D- or better
Recommended: One year of general chemistry

CH 336, ORGANIC CHEMISTRY, 3 Credits
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisite: CH 335 with D- or better
Recommended: One year of general chemistry

CH 337, ORGANIC CHEMISTRY LABORATORY, 4 Credits
Laboratory course in organic chemistry for nonmajors, designed to supplement CH 331, CH 332 and CH 334, CH 335, CH 336. Lec/lab.
Prerequisite: (CH 331 with D- or better and CH 332 [D-]) or (CH 334 [D-] and CH 335 [D-] or CH 336 [D-])
Available via Ecampus

CH 361, EXPERIMENTAL CHEMISTRY I, 3 Credits
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: (CH 221 with D- or better and CH 222 [D-] and CH 223 [D-] or (CH 224H [D-] and CH 225H [D-] and CH 226H [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233H [D-]) and (CH 263H [D-] or CH 273 [D-]) and (CH 231H [D-] and (MTH 251 (may be taken concurrently) [D-]) or MTH 251H (may be taken concurrently) [D-] or MTH 251 (may be taken concurrently) [D-] and (PH 201 (may be taken concurrently) [D-] or PH 211 (may be taken concurrently) [D-] and CH 334 (may be taken concurrently) [D-])
Equivalent to: CH 361H

CH 361H, EXPERIMENTAL CHEMISTRY I, 3 Credits
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: (CH 221 with D- or better and CH 222 [D-] and CH 223 [D-] or (CH 224H [D-] and CH 225H [D-] and CH 226H [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233H [D-]) and (CH 263H [D-] or CH 273 [D-]) and (CH 231H [D-] and (MTH 251 (may be taken concurrently) [D-]) or MTH 251H (may be taken concurrently) [D-] or MTH 251 (may be taken concurrently) [D-] and (PH 201 (may be taken concurrently) [D-] or PH 211 (may be taken concurrently) [D-] and CH 334 (may be taken concurrently) [D-])
Equivalent to: CH 361

CH 362, EXPERIMENTAL CHEMISTRY I, 3 Credits
First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Prerequisite: (CH 361 with D- or better or CH 361H with D- or better) and CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362H

CH 362H, EXPERIMENTAL CHEMISTRY I, 3 Credits
First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: (CH 361 with D- or better or CH 361H with D- or better) and CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362

CH 374, *TECHNOLOGY, ENERGY, AND RISK, 3 Credits
Decision-making in a technical, democratic society. Discussion of current issues such as acid rain, toxic organic chemicals in the environment, energy resources, etc. Does not meet the prereq for any other chemistry course. Does not meet requirements for chemistry minor. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Completion of Bacc Core in physical science

CH 390, ENVIRONMENTAL CHEMISTRY, 3 Credits
Sources, reactions, transport, effects, and fates of chemical species in water, soil, air, and living environments and the effects of technology thereon.
Prerequisite: CH 331 with D- or better or CH 334 with D- or better
Available via Ecampus
CH 399, SPECIAL TOPICS, 1-16 Credits
Discussion of special topics in chemistry.
This course is repeatable for 99 credits.
Recommended: Completion of Bacc Core in the physical sciences

CH 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CH 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CH 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CH 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CH 407, SEMINAR, 1-16 Credits
Equivalent to: CH 407H
This course is repeatable for 16 credits.

CH 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CH 407
This course is repeatable for 16 credits.

CH 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CH 411, INORGANIC CHEMISTRY, 3 Credits
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, and metal-ligand complexes.
Recommended: One year of general chemistry and one year of college physics

CH 412, INORGANIC CHEMISTRY, 3 Credits
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry.
Prerequisite: CH 411 with D- or better

CH 418, NUCLEAR CHEMISTRY, 3 Credits
Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation.
Recommended: Concurrent enrollment in (CH 440 or CH 540) or PH 314

CH 421, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data.
Recommended: One year of general chemistry and one year of college physics. Concurrent enrollment in CH 440 or CH 540

CH 422, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data.
Recommended: One year of general chemistry and one year of college physics. Concurrent enrollment in CH 441 or CH 541

CH 424, BIOANALYTICAL CHEMISTRY, 3 Credits
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year.
Recommended: One year of organic chemistry and one term of organic chemistry laboratory.

CH 435, STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS, 3 Credits
Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules.
Prerequisite: CH 336 with D- or better and (CH 442 [D-] or CH 542 [D-])

CH 440, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisite: MTH 254 with D- or better or MTH 254H with D- or better
Recommended: One year of general chemistry and one year of college physics
Available via Ecampus

CH 441, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisite: (CH 440 with C- or better or CHE 311 with C- or better) and (MTH 254 [C-] or MTH 254H [C-])
Available via Ecampus

CH 442, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisite: (MTH 254 with D- or better or MTH 254H with D- or better) and CH 441 [D-]
Recommended: One year of general chemistry and one year of college physics

CH 450, INTRODUCTORY QUANTUM CHEMISTRY, 3 Credits
Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year.
Prerequisite: CH 442 with D- or better or CH 542 with D- or better
Recommended: One year college physics
CH 461, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken concurrently) [D-]
Equivalent to: CH 461H

CH 461H, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic and physical chemistry. Lec/Lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken concurrently) [D-]
Equivalent to: CH 461

CH 462, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-])
Equivalent to: CH 462H
Recommended: CH 422

CH 462H, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-])
Equivalent to: CH 462H
Recommended: CH 422

CH 463, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-]) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 463H

CH 463H, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-]) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 463

CH 464, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464H
Recommended: CH 461 or CH 461H or CH 324

CH 464H, EXPERIMENTALCHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464
Recommended: CH 461 or CH 461H or CH 324

CH 470, FOUNDATIONS OF INNOVATION, 2 Credits
Learn the basic language and the initial skill set needed to address how scientific ideas and research results become innovations – solutions that address societal and market needs. Acquire the skills to become innovators and to create value for all types of academic, small-company, industrial, governmental, and non-profit research and development organizations. Students work in areas aligned with their scientific interests either individually or in a team. CROSSLISTED as CH 470/SCI 470 and CH 570/SCI 570.
Equivalent to: SCI 470
Recommended: Science and engineering majors

CH 471, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies.
Prerequisite: CH 336 with D- or better or CH 337 with D- or better
CH 490, COMPUTER PROGRAMMING FOR SCIENTISTS, 3 Credits
Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry.
Prerequisite: MTH 252 with D- or better or MTH 252H with D- or better

CH 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

CH 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CH 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CH 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CH 507, SEMINAR, 1-16 Credits
Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. Graded P/N.
This course is repeatable for 16 credits.

CH 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CH 511, INORGANIC CHEMISTRY, 4 Credits
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, metal-ligand complexes, sol-gel chemistry and nanotechnology.
Recommended: CH 442 or CH 542

CH 512, INORGANIC CHEMISTRY, 4 Credits
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry.
Prerequisite: CH 511 with C or better

CH 513, SOLID STATE CHEMISTRY, 3-4 Credits
Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature.
This course is repeatable for 4 credits.
Recommended: CH 442 or CH 542

CH 516, RADIOCHEMISTRY, 4 Credits
Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab.
CROSSTEXLISTED as CH 516/NSE 516.
Prerequisite: NE 531 with C or better or (RHP 531 with C or better and RHP 536 [C])
Equivalent to: CHE 516, NE 516, NSE 516, RHP 516
This course is repeatable for 12 credits.

CH 518, NUCLEAR CHEMISTRY, 3 Credits
Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation.
Recommended: Concurrent enrollment in (CH 440 or CH 540) or PH 314

CH 521, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data.
Recommended: One year of college chemistry and physics. Concurrent enrollment in CH 540

CH 522, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data.
Recommended: One year of college chemistry and physics. Concurrent enrollment in CH 541

CH 524, BIOANALYTICAL CHEMISTRY, 3 Credits
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year.
Equivalent to: VM 524, VMB 524
Recommended: One year of organic chemistry and one term of organic chemistry laboratory.

CH 535, STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS, 3 Credits
Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules.
Recommended: CH 336 and (CH 442 or CH 542)

CH 540, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Recommended: MTH 254 and one year of college chemistry and one year of college physics
CH 541, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Recommended: (CH 440 or CHE 311) AND (MTH 254 or MTH 254H)

CH 542, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Recommended: CH 541

CH 550, INTRODUCTORY QUANTUM CHEMISTRY, 3 Credits
Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year.
Prerequisite: CH 542 with C or better
Recommended: One year college physics

CH 553, CHEMICAL THERMODYNAMICS, 3 Credits
The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena, and magnetic systems. Not offered every year.
Recommended: CH 542

CH 570, FOUNDATIONS OF INNOVATION, 2 Credits
Learn the basic language and the initial skill set needed to address how scientific ideas and research results become innovations – solutions that address societal and market needs. Acquire the skills to become innovators and to create value for all types of academic, small-company, industrial, governmental, and non-profit research and development organizations. Students work in areas aligned with their scientific interests either individually or in a team. CROSSLISTED as CH 470/SCI 470 and CH 570/SCI 570.
Equivalent to: SCI 570

CH 571, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochromatic outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies.
Recommended: CH 336 or CH 337

CH 582, CHEMISTRY AND MATERIALS OF BATTERIES AND SUPER CAPACITORS, 3 Credits
Examines the chemistry and materials currently in use and proposed for future primary and secondary batteries and supercapacitors. After a brief historical review, we will examine in detail the state-of-the-art technologies including lithium-ion, lithium, and sodium-sulfur batteries and electrochemical double-layer capacitors, and future technologies such as metal-air and lithium-sulfur. Class discussions will focus on structure/performance relationships and other issues such as environmental impact, safety and cost. Offered via Ecampus only.
Recommended: Full year of general chemistry, college-level physics and materials science background

CH 584, INSTRUMENTS AND ONLINE INTERACTIONS IN THE SCIENCES, 3 Credits
Examine methods and technologies for and incorporating virtual instruments and online interactions into laboratory courses to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in science.
Recommended: Basic computer literacy and one year of general chemistry, physics or biology
Available via Ecampus

CH 590, COMPUTER PROGRAMMING FOR SCIENTISTS, 3 Credits
Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry.
Recommended: MTH 252

CH 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CH 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CH 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CH 607, SEMINAR, 1-16 Credits
Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs.
This course is repeatable for 16 credits.
CH 614, SELECTED TOPICS IN INORGANIC CHEMISTRY, 4 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in fields such as solid state chemistry, theoretical inorganic chemistry, spectroscopy and magnetism, chemistry of coordination compounds, kinetics and mechanisms of inorganic reactions, acid-base theory and reactions in nonaqueous solvents, organometallic chemistry, and chemistry of the less familiar elements. Not offered every year.
Equivalent to: CH 514
This course is repeatable for 8 credits.
Recommended: CH 413 or CH 513

CH 615, SELECTED TOPICS IN INORGANIC CHEMISTRY, 4 Credits
Focus is on cutting edge research topics in inorganic materials chemistry, which will evolve from year-to-year to stay up-to-date. Current journal articles, software programs, and lab demonstrations will be utilized. Students will learn both content of a research area, as well as tools used in the practice.

CH 616, CRYSTALLOGRAPHY AND X-RAY DIFFRACTION, 4 Credits
Principles of crystallography and x-ray diffraction as applied to the structural characterization of both single crystals, powders, and thin films.
Equivalent to: CH 516
Recommended: At least one upper-level undergraduate inorganic chemistry course

CH 630, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year.
Equivalent to: CH 530
Recommended: CH 336 and (CH 442 or CH 542)

CH 631, ADVANCED ORGANIC CHEMISTRY, 4 Credits
Carbon-carbon bond forming reactions, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year.
Equivalent to: CH 531
Recommended: CH 630

CH 632, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year.
Equivalent to: CH 532
Recommended: CH 336 and (CH 442 or CH 542)

CH 633, HYPOTHESIS, EVIDENCE, AND ARGUMENT IN ORGANIC CHEMISTRY, 2 Credits
Immerses the student in the tools of scientific method as applied to current research topics in the chemical literature. The student will perform an extensive review of a modern topic in organic chemistry, prepare a written summary and analysis of this literature review and make a public oral presentation and discussion.
Prerequisite: CH 632 with C or better
This course is repeatable for 4 credits.

CH 636, SELECTED TOPICS IN ORGANIC CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year.
Equivalent to: CH 536
This course is repeatable for 12 credits.

CH 637, SELECTED TOPICS IN ORGANIC CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with advances in organic chemistry, specifically focusing on biosynthesis of natural products and enzyme reaction mechanisms. CH 636, CH 637, CH 638 need not be taken in order.
Equivalent to: CH 537
This course is repeatable for 12 credits.

CH 638, SELECTED TOPICS IN ORGANIC CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year.
Equivalent to: CH 538
This course is repeatable for 12 credits.

CH 651, QUANTUM MECHANICS OF ATOMS AND MOLECULES, 3 Credits
Not offered every year.
Equivalent to: CH 551
Recommended: CH 450 or CH 550

CH 652, QUANTUM MECHANICS OF MOLECULAR SPECTROSCOPY, 3 Credits
Not offered every year.
Equivalent to: CH 552
Recommended: CH 651
CH 660, SPECTROCHEMICAL ANALYSIS, 3 Credits
Theoretical concepts and methodology of optical spectrochemical methods of analysis, components of spectrometers, flame and electrothermal atomic spectrophotometry, ICP atomic emission spectrometry, molecular absorption and fluorescence spectrometry.
Equivalent to: CH 560
Recommended: CH 442 or CH 542

CH 661, SEPARATIONS: CHROMATOGRAPHY AND RELATED METHODS, 4 Credits
Theory, instrumentation, and practice of modern separation techniques (gas chromatography, liquid chromatography, electrokinetic separations) and sample preparation methods; handling and interpretation of chromatographic and electrophoretic data.
Equivalent to: CH 561
Recommended: CH 440 or CH 540

CH 662, ANALYTICAL ELECTROCHEMISTRY, 4 Credits
Study of current, voltage and time relationships in electrochemical cells. Offered alternate years.
Equivalent to: CH 562
Recommended: CH 442

CH 680, SELECTED TOPICS IN PHYSICAL CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear, multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year.
Equivalent to: CH 580
This course is repeatable for 12 credits.

CH 682, SELECTED TOPICS IN PHYSICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year.
Equivalent to: CH 582
This course is repeatable for 12 credits.

CH 683, SELECTED TOPICS IN ANALYTICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
Equivalent to: CH 583
This course is repeatable for 12 credits.

CH 684, SELECTED TOPICS IN ANALYTICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
Equivalent to: CH 584
This course is repeatable for 12 credits.

CH 685, SELECTED TOPICS IN ANALYTICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
Equivalent to: CH 585
This course is repeatable for 12 credits.

CH 686, SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
Equivalent to: CH 586
This course is repeatable for 12 credits.

CH 687, SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
Equivalent to: CH 587
This course is repeatable for 12 credits.
CH 688, SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
Equivalent to: CH 588
This course is repeatable for 12 credits.

CH 692, ENVIRONMENTAL TRANSFORMATION OF ORGANIC COMPOUNDS, 3 Credits
Chemical, photochemical, and biological transformation reactions of organic compounds in the environment. Test methods and predictive models for determining the persistence of organic compounds in the environment. Offered alternate years.
Recommended: CH 336 and CH 440

CH 697, MASS SPECTROMETRY OF ORGANIC COMPOUNDS, 4 Credits
Physical principles of mass spectrometric instrumentation and interpretation of the mass spectra of organic compounds and biomolecules. Not offered every year.
Equivalent to: TOX 637

General Science (GS)
GS 199, SPECIAL STUDIES, 1-16 Credits
Equivalent to: BHS 199
This course is repeatable for 16 credits.

GS 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

GS 401, RESEARCH, 1-16 Credits
Equivalent to: BHS 401
This course is repeatable for 16 credits.

GS 403, THESIS, 1-16 Credits
Equivalent to: BHS 403
This course is repeatable for 16 credits.

GS 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BHS 405
This course is repeatable for 16 credits.

GS 407, SEMINAR, 1-16 Credits
One-credit sections. Graded P/N.
Equivalent to: BHS 407
This course is repeatable for 16 credits.

GS 410, SCIENCE INTERNSHIP, 1-12 Credits
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
Equivalent to: BHS 410
This course is repeatable for 12 credits.

Integrative Biology (IB)
IB 501, RESEARCH, 1-16 Credits
Graduate-level research completed under faculty supervision.
Equivalent to: Z 501
This course is repeatable for 16 credits.

IB 503, THESIS, 1-16 Credits
Master's thesis, completed under faculty supervision.
Equivalent to: Z 503
This course is repeatable for 999 credits.

IB 505, READING AND CONFERENCE, 1-16 Credits
For graduate students working toward a master's degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest.
Equivalent to: Z 505
This course is repeatable for 16 credits.

IB 506, PROJECTS: OUTREACH, 1-16 Credits
Graded P/N.
Equivalent to: BI 506
This course is repeatable for 16 credits.

IB 507, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: Z 507
This course is repeatable for 16 credits.

IB 510, INTERNSHIP, 1-16 Credits
Equivalent to: Z 510
This course is repeatable for 16 credits.

IB 511, INTEGRATIVE BIOLOGY GRADUATE STUDENT ORIENTATION, 2 Credits
Introduction to the graduate program in Integrative Biology and at OSU in general. Class introduces students to various skills for success in graduate school and beyond. Exploration of career options for those holding a degree in IB are explored. Graded P/N.

IB 512, INTEGRATIVE BIOLOGY GTA TRAINING AND DEVELOPMENT, 1 Credit
Provides instructional support and professional development for first year graduate teaching assistants (GTAs) in Integrative Biology. Focuses on developing a foundation for quality instruction, facilitation, and leadership as GTAs and professionals. Best practices, skills, theory and knowledge necessary for effective teaching, facilitation, and assessment of student learning are explored.
This course is repeatable for 3 credits.
IB 513, GRANT WRITING AND ETHICS, 3 Credits
Participants will write and submit a grant proposal by the end of the term. We discuss the main components of a typical grant proposal. Participants read and critique proposal drafts written by participants. Ethical issues are discussed as they are encountered.
Equivalent to: Z 585
This course is repeatable for 6 credits.

IB 515, SCIENCE COMMUNICATION: MAKING YOUR SCIENCE MATTER, 2 Credits
A practical, hands-on course designed to help science graduate students build knowledge and skills for engaging with audiences beyond their scientific peers. The science of science communication, the cultures of journalism and public policy, the changing roles of scientists in society, and science advocacy will be explored through lectures, invited talks, in-class discussions and exercises.

IB 518, SCIENCE AND POLICY, 2 Credits
An introduction to the science-policy interface in a 'post-truth' society. The formulation of state and federal public policy is examined, as well as and role of science and scientist in informing policy, management decisions and public understanding. Current topics are emphasized.

IB 522, COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY, 5 Credits
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
Equivalent to: Z 522

IB 523, ENVIRONMENTAL PHYSIOLOGY, 3 Credits
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
Equivalent to: Z 523

IB 525, EMBRYOLOGY AND DEVELOPMENT, 5 Credits
Equivalent to: Z 525

IB 527, PALEOBIOLOGY, 0-4 Credits
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Equivalent to: BI 527

IB 531, VERTEBRATE PHYSIOLOGY I, 4 Credits
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in IB 531, IB 532 series.

IB 532, VERTEBRATE PHYSIOLOGY II, 3 Credits
Systems/concepts covered include blood, immune, lymphatic, cardiovascular, and pulmonary. Second in the IB 531, IB 532 series.
Equivalent to: Z 532

IB 538, BEHAVIORAL NEUROBIOLOGY, 3 Credits
Equivalent to: Z 538

IB 540, INSECT PHYSIOLOGY, 3 Credits
Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. The contributions of insect physiology to general physiological principles and biorational methods of insect pest control are discussed.
Equivalent to: Z 540

IB 545, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Equivalent to: BI 545

IB 551, FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM, 4 Credits
In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. IB 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.
Equivalent to: BI 551
Recommended: ((BI 231 and 241) or (BI 331 and 341)) and ((BI 232 and 242) or (BI 332 and 342)) and ((BI 233 and 243) or (BI 333 and 343))
IB 554, EVOLUTIONARY GENOMICS, 3 Credits
Examines the evolutionary forces that have produced such varied and complex genomes across the tree of life. The processes by which genomes can be structured, maintained, and remodeled (by nature or by humans) are explored through scientific literature. Special emphasis will be given to recent technological advances in genomics, along with their potential impacts on individuals and society.

Equivalent to: BI 556

IB 561, MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY, 4 Credits
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center.

Equivalent to: Z 561

IB 573, HERPETOLOGY, 3 Credits
World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature.

Equivalent to: Z 573

IB 574, SYSTEMATIC HERPETOLOGY, 2 Credits
A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab.

Equivalent to: Z 574

IB 577, AQUATIC ENTOMOLOGY, 4 Credits
Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab.

Equivalent to: Z 577

IB 581, BIOGEOGRAPHY, 3 Credits
Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today's rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.

Equivalent to: BI 581

IB 583, POPULATION BIOLOGY, 3 Credits
Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.

Equivalent to: BI 583

IB 592, THEORETICAL ECOLOGY, 4 Credits
A treatment of the central concepts of theoretical ecology, with emphasis on the analysis and modeling of single populations and multispecies communities. Topics include discrete- and continuous-time models of population growth, stochastic and deterministic processes, and the response of populations and communities to pulse and press perturbations.

Equivalent to: BI 592

IB 593, BEHAVIORAL ECOLOGY, 5 Credits
Behavioral ecology with emphasis on both theoretical and empirical approaches. Offered alternate years.

Equivalent to: Z 593

IB 594, COMMUNITY ECOLOGY, 5 Credits
Theory and analysis of multispecies associations. Emphasis on extent to which existing ecological theory is supported by natural phenomena. Course considers how biotic and abiotic mechanisms interact to regulate community organization and stability in marine, freshwater, and terrestrial habitats. Offered alternate years.

Equivalent to: Z 594

IB 595, DISEASE ECOLOGY, 3 Credits
An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.

Equivalent to: Z 595

IB 599, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary. Grading mode TBA. Taught at Hatfield Marine Science Center and Corvallis campus.

This course is repeatable for 16 credits.

IB 601, RESEARCH, 1-16 Credits
Doctoral-level research under faculty supervision. Graded P/N.

This course is repeatable for 16 credits.

IB 603, THESIS, 1-16 Credits
Doctoral thesis completed under faculty supervision.

This course is repeatable for 999 credits.

IB 605, READING AND CONFERENCE, 1-16 Credits
For graduate students working toward doctoral degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest.

This course is repeatable for 16 credits.

Microbiology (MB)

MB 110, ORIENTATION TO MICROBIOLOGY, 1 Credit
Introduction of incoming microbiology students to college life with an emphasis on faculties, facilities, services, and curricula in microbiology. Exposure to career opportunities in microbiology. Graded P/N.
MB 201, LABORATORY SKILLS, 1-16 Credits
These credits are designed for students who are doing experiential learning in a research laboratory on campus, performing basic laboratory tasks that are not elevated to the level of an independent research project. Graded P/N. This course is repeatable for 16 credits.

MB 230, *INTRODUCTORY MICROBIOLOGY, 4 Credits
Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 230H Available via Ecampus

MB 255, *ALLIED HEALTH MICROBIOLOGY, 4 Credits
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSLISTED as BHS 255/MB 255.
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BHS 255 Available via Ecampus

MB 290, SUCCESS IN MICROBIOLOGY, 1 Credit
Science skills, science literacy, ethics, and professional development to build a successful career in Microbiology. Learn the process of research, access and analyze primary literature, evaluate user-generated science content, practice professional skills, and identify and plan for experience-building opportunities such as jobs, research and internships. Sophomore standing or higher.

MB 299, SPECIAL TOPICS, 1-16 Credits
May be repeated for credit when topic varies.
Equivalent to: MB 299H This course is repeatable for 16 credits.

MB 299H, SPECIAL TOPICS, 1-16 Credits
May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 299 This course is repeatable for 16 credits.

MB 302, GENERAL MICROBIOLOGY, 3 Credits
Emphasis on cytology, physiology, virology, growth and control of growth with coverage of the role of microorganisms in nature, in disease, and as useful tools.
Prerequisite: (CH 332 with C- or better or CH 335 with C- or better) and ((BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C-] or BI 213H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or (((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-])
Available via Ecampus

MB 303, GENERAL MICROBIOLOGY LABORATORY, 2 Credits
Development of laboratory techniques; exercises designed to reinforce concepts covered in MB 302. MB 302 is a prereq that may be taken prior to or concurrently with MB 303. Lec/lab.
Prerequisite: MB 302 (may be taken concurrently) with D- or better
Equivalent to: MB 303H
Recommended: Two terms organic chemistry

MB 310, BACTERIAL MOLECULAR GENETICS, 3 Credits
Introductory concepts of bacterial molecular genetics. Topics include DNA replication, mutation, DNA repair, DNA recombination, transposons, bacteriophages, genetic manipulation, and gene regulation.
Prerequisite: MB 302 with D- or better and (BB 314 [D-] or BB 314H [D-]) and (BB 450 [D-] or BB 490 [D-]) and (BB 451 (may be taken concurrently) [D-] or BB 491 (may be taken concurrently) [D-])
Equivalent to: MB 306

MB 311, ^MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE, 3 Credits
Scientific writing, laboratory notebook composition, experimental design, and laboratory experiments in bacterial molecular biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 310 (may be taken concurrently) [D-]
Equivalent to: MB 307

MB 312, BACTERIAL PHYSIOLOGY AND METABOLISM, 3 Credits
Molecular structure and function, macromolecular assembly, energy production and use, and cellular growth.
Prerequisite: MB 310 with D- or better and BB 451 [D-]
Equivalent to: MB 304
Recommended: BB 450

MB 314, AQUATIC MICROBIOLOGY, 3 Credits
A survey of the diversity, ecology, and physiology of microbes in aquatic systems, with emphasis on their roles in food webs, chemical cycling, and human health. Provides the background knowledge and quantitative/analytical skills necessary to interpret and critique current and historical research in the fields of general aquatic microbiology.
Prerequisite: (CH 231 with D- or better or CH 231H with D- or better or CH 121 with D- or better) and (CH 232 [D-] or CH 232H [D-] or CH 122 [D-] and (CH 233 [D-] or CH 233H [D-] or CH 123 [D-])
Available via Ecampus
MB 320, HUMAN BACTERIOLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: BHS 320
Available via Ecampus

MB 330, *DISEASE AND SOCIETY, 3 Credits
Infectious disease has many effects on the development of society, and likewise, human interactions affect the development of disease. The course examines these interactions with a focus on the role of race, class, and economic status in the development of epidemics. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

MB 340, HUMAN VIROLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: BHS 340
Available via Ecampus

MB 385, EMERGING INFECTIOUS DISEASES AND EPIDEMICS, 3 Credits
Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Equivalent to: BI 385

MB 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: MB 399H
This course is repeatable for 16 credits.

MB 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 399
This course is repeatable for 16 credits.

MB 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

MB 405, READING AND CONFERENCE, 1-16 Credits
Conference: Instruction in microbiology.
This course is repeatable for 16 credits.

MB 406, SPECIAL PROJECTS, 1-16 Credits
Reading and Conference/Instructor in Microbiology.
This course is repeatable for 16 credits.

MB 407, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MB 410, OCCUPATIONAL INTERNSHIP, 1-10 Credits
Supervised work experience at selected cooperating institutions, agencies, laboratories, clinics or companies. Maximum of 10 credits allowed but no more than 3 credits may be used to satisfy microbiology major requirement of 36 credits. Graded P/N.
This course is repeatable for 10 credits.

MB 416, IMMUNOLOGY, 3 Credits
Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.
Prerequisite: BB 450 with D- or better or BB 490 with D- or better

MB 417, IMMUNOLOGY LABORATORY, 2 Credits
Laboratory on the applications of current immunological techniques.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better)

MB 420, MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY, 3 Credits
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust.
Prerequisite: BB 451 with D- or better

MB 422, AQUATIC MICROBIOLOGY LABORATORY, 2 Credits
Examine patterns of microbiological communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.
Prerequisite: MB 303 with D- or better

MB 422, AQUATIC MICROBIOLOGY LABORATORY, 2 Credits
Examine patterns of microbiological communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.
Prerequisite: MB 303 with D- or better
Corequisites: MB 314
MB 430, BACTERIAL PATHOGENESIS, 3 Credits
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection.
Prerequisite: MB 302 with D- or better and MB 310 [D-] and BB 451 [D-] or BB 491 [D-]

MB 434, VIROLOGY, 3 Credits
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease.
Prerequisite: (BB 450 with D- or better or BB 450H with D- or better) and (BB 451 [D-] or BB 451H [D-]) or (BB 490 [D-] and BB 491 [D-] and BB 492 [D-])

MB 435, PATHOGENIC MICROBES LABORATORY, 2 Credits
Laboratory experiments to illustrate concepts presented in MB 430 and/or MB 434, focusing on pathogenic microorganisms.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 302 [D-] and (MB 430 (may be taken concurrently) [D-] or MB 434 (may be taken concurrently) [D-])

MB 436, THE HUMAN MICROBIOME, 3 Credits
Examines the biodiversity, function, and medical importance of the communities of microorganisms that inhabit the human body. A diverse array of topics will be discussed, including how the human microbiome is studied, case studies of specific aspects of the human microbiome, and emerging theories of how the microbiome influences human health.
Prerequisite: BI 314 with D- or better or BB 314 with D- or better or BI 314H with D- or better or MB 302 with D- or better

MB 440, FOOD MICROBIOLOGY, 3 Credits
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption.
Prerequisite: MB 302 with D- or better

MB 441, FOOD MICROBIOLOGY LABORATORY, 2 Credits
Laboratory techniques to accompany MB 440/MB 540.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 440 (may be taken concurrently) [D-]
Recommended: MB 302

MB 448, MICROBIAL ECOLOGY, 3 Credits
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life.
Prerequisite: MB 302 with D- or better

MB 456, MICROBIAL GENETICS AND BIOTECHNOLOGY, 3 Credits
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized.
Prerequisite: MB 302 with D- or better and (BB 450 [D-] or BB 490 [D-]) and (BB 451 [D-] or BB 491 [D-]) and (MB 310 [D-] or BB 492 [D-])

MB 479, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. CROSSLISTED as FST 479/MB 479 and FST 579/MB 579.
Prerequisite: (BI 212 with C- or better or BI 212H with C- or better) or ((BI 221 with C- or better or BI 221H with C- or better) and (BI 223 [C-] or BI 223H [C-]) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
Equivalent to: FST 479

MB 480, GENERAL PARASITOLOGY, 3 Credits
Covers a broad overview of parasitology with emphasis on medical parasitology. Explores important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) or (BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]) or (BI 204 [D-] and BI 205 [D-] and BI 206 [D-])
Available via Ecampus

MB 490, MICROBIOLOGY CAPSTONE EXPERIENCE, 2 Credits
Capstone experience for microbiology students to practice professional skills necessary to sustain a career in science. Students will work in teams to analyze research data and communicate this analysis, in addition to explore career opportunities and learn how to successfully compete for jobs. Graded P/N.
Prerequisite: MB 302 with D- or better

MB 491, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: FW 491
Recommended: 9 credits of upper-division fisheries or biology.
MB 496, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSTLISTED as FW 496/MB 496 and FW 596/MB 596.
Equivalent to: FW 496
Recommended: MB 303 or other upper-division laboratory course.

MB 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.
Recommended: One term of biology

MB 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

MB 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MB 506, SPECIAL PROJECTS, 1-6 Credits
This course is repeatable for 6 credits.

MB 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 99 credits.

MB 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

MB 511, SCIENTIFIC SKILLS, 1 Credit
Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.

MB 512, HIGHLIGHTS OF MICROBIOLOGY, 1 Credit
Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.

MB 513, MICROBIAL SYSTEMS, 3 Credits
Presentation of a modern view of microbiology through the lens of microbes’ influences on our planet’s habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many cross-disciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.

MB 516, IMMUNOLOGY, 3 Credits
Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.
Recommended: BB 450 or BB 490

MB 517, IMMUNOLOGY LABORATORY, 2 Credits
Laboratory on the applications of current immunological techniques.
Recommended: (MB 303 or MB 303H) and completion or concurrent enrollment in MB 516

MB 520, MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY, 3 Credits
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust.
Recommended: BB 451 or BB 551

MB 522, AQUATIC MICROBIOLOGY LAB, 2 Credits
Examine patterns of microbiological communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.

MB 530, BACTERIAL PATHOGENESIS, 3 Credits
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection.
Recommended: MB 302 and MB 310 and (BB 451 or BB 491)

MB 534, VIROLOGY, 3 Credits
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease.
Recommended: ((BB 450 or BB 450H) and (BB 451 or BB 451H)) or (BB 490 and BB 491 and BB 492)

MB 540, FOOD MICROBIOLOGY, 3 Credits
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption.
Recommended: MB 302

MB 541, FOOD MICROBIOLOGY LABORATORY, 2 Credits
Laboratory techniques to accompany MB 440/MB 540.
Prerequisite: MB 540 (may be taken concurrently) with C or better
Recommended: MB 302 and MB 303

MB 548, MICROBIAL ECOLOGY, 3 Credits
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life.
Recommended: MB 302
MB 555, BIOLOGY OF THE PROKARYOTES, 3 Credits
An integrative graduate course examining bacterial and archaeal life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term.
Recommended: BB 450 and MB 310 and MB 312

MB 556, MICROBIAL GENETICS AND BIOTECHNOLOGY, 3 Credits
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized.
Recommended: MB 302 and (BB 450 or BB 490) and (BB 451 or BB 491) and (MB 310 or BB 492)

MB 579, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
Equivalent to: FST 579
Recommended: ((BI 212 or BI 212H) or ((BI 221 or BI 221H) and (BI 223 or BI 223H))) and CH 331, CH 332, (BB 350 or BB 450) and MB 302

MB 580, GENERAL PARASITOLOGY, 3 Credits
Covers a broad overview of parasitology with emphasis on medical parasitology. Explores important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. Available via Ecampus

MB 591, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: FW 591
Recommended: 9 credits of upper-division fisheries or biology.

MB 599, SELECTED TOPICS, 0-6 Credits
This course is repeatable for 24 credits.

MB 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 603, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

MB 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MB 607, SEMINAR, 1 Credit
Graded P/N. This course is repeatable for 99 credits.

MB 610, INTERNSHIP, 1-9 Credits
This course is repeatable for 16 credits.

MB 668, MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION, 4 Credits
Theoretical and practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.
Equivalent to: MCB 668

MB 699, SPECIAL TOPICS, 0-16 Credits
Lec/lab. This course is repeatable for 16 credits.

Mathematics (MTH)

MTH 065, ELEMENTARY ALGEBRA, 3 Credits
Arithmetic of signed numbers, order of operations, simplifying algebraic expressions, solutions of linear equations, and inequalities. Rules of exponents, addition, subtraction, and multiplication of polynomials, factoring, solution of quadratic equations by factoring, reducing rational expressions. Word problems involving linear equations, graphing of linear equations, inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: Math Placement Test with a score of 05 or Math Placement - ALEKS with a score of 015
Available via Ecampus
MTH 095, *INTERMEDIATE ALGEBRA, 3 Credits
Addition, subtraction, multiplication, and division of rational expressions, long division of polynomials, solutions of fractional equations, applications involving linear equations. Fractional equations, inequalities, literal equations, and variations. Negative and fractional exponents, radicals, solutions of quadratic equations, and complex numbers. Cartesian coordinates, graphs of linear equations and inequalities, distance formula, slope, equations of lines, solutions of systems of linear equations in two unknowns and inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 065 with C- or better or Math Placement Test with a score of 11 or Math Placement - ALEKS with a score of 030

MTH 102, ALGEBRAIC FOUNDATIONS, 3 Credits
This course is designed primarily for EOP students. They will use various computing technologies to explore realistic and interesting situations in which algebra is used. As they work through explorations, they will work with many of the fundamental ideas of algebra, ideas they will find important in their daily lives.

MTH 103, ALGEBRAIC REASONING, 4 Credits
Graphing data, functions, rate of change, linear equations, systems of linear equations, linear inequalities, linear functions, absolute value functions, quadratic functions, exponential functions. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 065 with C- or better or Math Placement Test with a score of 11 or Math Placement - ALEKS with a score of 030
Available via Ecampus

MTH 105, *INTRODUCTION TO CONTEMPORARY MATHEMATICS, 3 Credits
Elementary linear programming, combinatorics, descriptive statistics, elementary probability, exponential growth and decay, examples of major mathematical ideas and models. Lec/rec. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Recommended: MTH 095 or MTH 103 or (MPT=Math Placement Test score of 17; MPAL=Math Placement Test-ALEKS score of 46%)
Available via Ecampus

MTH 111, *COLLEGE ALGEBRA, 4 Credits
Polynomial equations and inequalities, polynomial functions and graphs, inverse functions, exponential and logarithmic functions, elementary mathematical modeling and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with a C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 095 with C- or better or MTH 103 with C- or better or Math Placement Test with a score of 17 or Math Placement - ALEKS with a score of 046
Available via Ecampus

MTH 112, *ELEMENTARY FUNCTIONS, 4 Credits
Triangle trigonometry, circular functions and graphs, trigonometric equations and identities, inverse trigonometric functions, polar coordinates, vectors and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 150X
Available via Ecampus

MTH 199, SPECIAL TOPICS, 1-16 Credits
Maximum 3 credits per term, 9 credits total. Does not meet university group requirement in physical science.
This course is repeatable for 9 credits.

MTH 211, *FOUNDATIONS OF ELEMENTARY MATHEMATICS, 4 Credits
Introduction to problem solving, sets, whole numbers, number theory, fractions. Intended primarily for prospective elementary teachers. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 095 with C- or better or MTH 103 with C- or better or MTH 111 with C- or better or MTH 112 with C- or better or Math Placement Test with a score of 17 or Math Placement - ALEKS with a score of 046

MTH 212, FOUNDATIONS OF ELEMENTARY MATHEMATICS, 4 Credits
Math 212 is the second of a three-term sequence of courses designed to help prepare prospective elementary and middle school teachers. Topics covered include fractions, decimals, percent, ratio and proportion, integers, rational numbers, real numbers, probability and statistics.
Prerequisite: MTH 211 with C- or better

MTH 227, *CALCULUS AND PROBABILITY FOR THE LIFE SCIENCES I, 4 Credits
Review of exponential and trigonometric functions, including examples of exponential and periodic behavior; discrete probability; examples of biologically motivated difference equations; differentiation of polynomials, exponential and trigonometric functions with applications to optimization. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 75
Equivalent to: MTH 227X
MTH 228, CALCULUS AND PROBABILITY FOR THE LIFE SCIENCES II, 4 Credits
Continuation of MTH 227 with more general population growth models. Antidifferentiation; The Fundamental Theorem of Calculus applied to solving continuous growth models. Continuous random variables. Basic linear algebra of small systems sufficient to calculate eigenvalues and eigenvectors and appreciate their use in life science applications. Lec/rec.
Prerequisite: MTH 227 with C- or better or MTH 227X with C- or better

MTH 231, ELEMENTS OF DISCRETE MATHEMATICS, 4 Credits
Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 231H
Available via Ecampus

MTH 231H, ELEMENTS OF DISCRETE MATHEMATICS, 4 Credits
Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 231

MTH 241, *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE, 4 Credits
Elementary differential calculus of polynomial, logarithmic, and exponential functions and their applications to business, management and social sciences. Lec/rec. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Available via Ecampus

MTH 245, *MATHEMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES, 4 Credits
Techniques of counting, probability and elements of statistics including binomial and normal distributions. Introductory matrix algebra. Elements of linear programming. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Available via Ecampus

MTH 251, *DIFFERENTIAL CALCULUS, 4 Credits
Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075
Equivalent to: MTH 251H
Available via Ecampus

MTH 251H, *DIFFERENTIAL CALCULUS, 4 Credits
Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math; HNRS – Honors Course Designator
Prerequisite: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075
Equivalent to: MTH 251

MTH 252, INTEGRAL CALCULUS, 4 Credits
Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252H
Available via Ecampus

MTH 252H, INTEGRAL CALCULUS, 4 Credits
Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252
MTH 253, INFINITE SERIES AND SEQUENCES, 4 Credits
Indeterminate forms. Improper integrals. Sequences and series, especially Taylor's formula and power series. Applications to numerical estimation with error analysis. Series with complex terms and the Euler identities. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 253H

MTH 254, VECTOR CALCULUS I, 4 Credits
Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254H
Available via Ecampus

MTH 254H, VECTOR CALCULUS I, 4 Credits
Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254H

MTH 255, VECTOR CALCULUS II, 4 Credits
Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255H

MTH 255H, VECTOR CALCULUS II, 4 Credits
Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255

MTH 256, APPLIED DIFFERENTIAL EQUATIONS, 4 Credits
First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler's identities is highly desirable.) Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256H
Available via Ecampus

MTH 256H, APPLIED DIFFERENTIAL EQUATIONS, 4 Credits
First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler's identities is highly desirable.) All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256

MTH 264, INTRODUCTION TO MATRIX ALGEBRA, 2 Credits
Introduction to matrix algebra: systematic solution to systems of linear equations; linear transformations; eigenvalue problems.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Available via Ecampus

MTH 264H, INTRODUCTION TO MATRIX ALGEBRA, 2 Credits
Introduction to matrix algebra: systematic solution to systems of linear equations; linear transformations; eigenvalue problems.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better

MTH 265, INTRODUCTION TO SERIES, 2 Credits
Convergence and divergence of numerical series, including geometric series. Series of functions. Power series and their analytic properties. Taylor series expansions and Taylor polynomials.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Available via Ecampus

MTH 265H, INTRODUCTION TO SERIES, 2 Credits
Convergence and divergence of numerical series, including geometric series. Series of functions. Power series and their analytic properties. Taylor series expansions and Taylor polynomials.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 265
MTH 299, SPECIAL TOPICS, 0-16 Credits
Maximum 3 credits per term, 9 credits total.
This course is repeatable for 9 credits.

MTH 306, MATRIX AND POWER SERIES METHODS, 4 Credits
Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306H

MTH 306H, MATRIX AND POWER SERIES METHODS, 4 Credits
Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306

MTH 311, ADVANCED CALCULUS I, 4 Credits
Rigorous development of calculus, axiomatic properties of the real numbers, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 254 with C- or better or MTH 254H with C- or better) and MTH 355 [C-]

MTH 312, ADVANCED CALCULUS II, 4 Credits
Rigorous development of calculus, axiomatic properties of R, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 311 with C- or better

MTH 321, INTRODUCTORY APPLICATIONS OF MATHEMATICAL SOFTWARE, 3 Credits
An introduction to select mathematical software packages to support problem solving and applications. Topics include using computational resources to solve basic numerical and symbolic problems in mathematics, visualization and presentation of data, creation of simple programming scripts, and applications of basic programming techniques to promote mathematical understanding. The scientific typesetting language LaTeX will also be covered. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: MTH 341 with C- or better or (MTH 264 with C- or better or MTH 264H with C- or better) or (MTH 306 with C- or better or MTH 306H with C- or better)

MTH 323, ^MATHEMATICAL MODELING, 3 Credits
A variety of mathematical modeling techniques will be introduced. Students will formulate models in response to practical problems drawn from the literature of ecology, environmental sciences, engineering or other fields. Informal writing assignments in class and formal written presentation of the models will be required. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 333, ^FUNDAMENTAL CONCEPTS OF TOPOLOGY, 3 Credits
Open and closed sets, continuity, compactness, connectedness, winding number, fixed point theorems in the plane. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MTH 341 with C- or better or MTH 355 with C- or better

MTH 338, ^NON-EUCLIDEAN GEOMETRY, 3 Credits
Introduction to non-Euclidean geometries. Selected topics such as hyperbolic and elliptic geometry, spherical geometry, projective geometry, geometries arising from alternative metrics. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MTH 341 (may be taken concurrently) with C- or better

MTH 341, LINEAR ALGEBRA I, 3 Credits
Matrix algebra, determinants, systems of linear equations, subspaces, an introductory study of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Available via Ecampus

MTH 342, LINEAR ALGEBRA II, 4 Credits
Abstract (real or complex) vector spaces, linear transformations, inner product spaces, orthogonality, eigenspaces and diagonalization, spectral theorems, singular value decomposition. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better
MTH 343, INTRODUCTION TO MODERN ALGEBRA, 4 Credits
Introduction to algebraic abstraction, with an emphasis on structures and logical communication by way of proofs. Material includes an introduction to groups, rings and fields. Emphasis is on symmetry groups, the integers as a ring, and polynomial rings; selected applications. Generalizing from examples to mathematical statements, reading proofs, and both creating and editing proofs. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better and MTH 355 [C-]

MTH 351, INTRODUCTION TO NUMERICAL ANALYSIS, 3 Credits
Introduction to the computation of approximate solutions to mathematical problems that cannot be solved by hand: analysis of errors; rootfinding for nonlinear equations in one variable; interpolation of functions; numerical integration. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 253 with C- or better or (MTH 306 with C- or better or MTH 306H with C- or better) or ((MTH 264 with C- or better or MTH 264H with C- or better) and (MTH 265 [C-] or MTH 265H [C-]))
Recommended: Programming experience

MTH 355, DISCRETE MATHEMATICS, 3 Credits
Proof analysis and development in the context of discrete mathematics for math majors transitioning to upper-division course work. Topics include elementary logic and set theory, quantifiers, basic counting principles, elementary combinatorics, equivalence relations, the binomial theorem, and mathematical induction. Additional topics may include recurrence relations, generating functions, and introductory graph theory. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 253 with C- or better
Recommended: MTH 341

MTH 361, INTRODUCTION TO PROBABILITY, 3 Credits
Probability problem solving using concepts developed in calculus. Topics include probability models, discrete and continuous random variables, expectation and variance, the law of large numbers, and the central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 253 with C- or better or (MTH 306 with C- or better or MTH 306H with C- or better) or (MTH 265 with C- or better or MTH 265H with C- or better) and (MTH 265 [C-] or MTH 265H [C-])
Equivalent to: MTH 361H

MTH 390, FOUNDATIONS OF ELEMENTARY MATHEMATICS, 4 Credits
Math 390 is the third of a three-term sequence of classes designed to help prepare prospective elementary and middle school teachers. Topics covered include informal geometry, measurement, congruence, similarity, coordinate and transformational geometry.
Prerequisite: MTH 211 with C- or better and MTH 212 [C-]

MTH 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: MTH 399H
This course is repeatable for 16 credits.

MTH 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: MTH 399
This course is repeatable for 16 credits.

MTH 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MTH 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

MTH 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MTH 406, PROJECTS, 1-3 Credits
Graded P/N.
This course is repeatable for 16 credits.

MTH 407, SEMINAR, 3 Credits
This course is repeatable for 99 credits.

MTH 410, OCCUPATIONAL INTERNSHIP, 3-12 Credits
Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N.
This course is repeatable for 16 credits.

MTH 411, REAL ANALYSIS, 3 Credits
Properties of metric spaces and normed spaces, including lp spaces. Completeness and applications, including fixed point theorems. Compactness. Equicontinuity and the Arzela-Ascoli theorem. Uniform continuity and uniform convergence, including applications.
Prerequisite: MTH 312 with B+ or better and MTH 341 [B+] 
This course is repeatable for 18 credits.

MTH 412, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini’s theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 411 with C- or better or MTH 511 with C- or better
This course is repeatable for 18 credits.

MTH 413, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini’s theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 412 with C- or better or MTH 512 with C- or better
This course is repeatable for 18 credits.

MTH 419, MULTIVARIABLE ADVANCED CALCULUS, 3 Credits
A rigorous development of multivariable advanced calculus, including continuity and compactness in multivariable Euclidean spaces, differentiation and approximation of multivariable functions, the inverse function theorem and the implicit function theorem, integration in several variables.
Prerequisite: MTH 312 with B or better
MTH 420, MODELS AND METHODS OF APPLIED MATHEMATICS, 3 Credits
Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 427, INTRODUCTION TO MATHEMATICAL BIOLOGY, 3 Credits
Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 428, STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY, 3 Credits
An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation.
Prerequisite: MTH 341 with C or better and (MTH 361 [C] or MTH 463 [C] or MTH 563 [C])

MTH 430, METRIC SPACES AND TOPOLOGY, 3 Credits
Fundamental notions of metric space topology. Examples of Euclidean, non-Euclidean and other fundamental metric spaces including the Hilbert Cube and two-dimensional surfaces. Characterization and classification results for metric spaces. Selected applications of topology, possibly including the structure of molecules and/or networks. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 311 with C- or better
Recommended: MTH 311

MTH 434, INTRODUCTION TO DIFFERENTIAL GEOMETRY, 3 Credits
Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 255 with C- or better or MTH 255H with C- or better) and MTH 342 [C-]
Recommended: MTH 311

MTH 435, DIFFERENTIAL GEOMETRY, 3 Credits
Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 434 with C- or better or MTH 534 with C- or better

MTH 437, GENERAL RELATIVITY, 3 Credits
Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 434 with C- or better or MTH 534 with C- or better)
Recommended: MTH 311

MTH 440, COMPUTATIONAL NUMBER THEORY, 3 Credits
Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptography. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 231 with C- or better or MTH 343 with C- or better or MTH 355 with C- or better

MTH 441, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 343 with C- or better and (MTH 342 [C-] or MTH 440 [C-] or MTH 540 [C-])

MTH 442, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 441 with C- or better or MTH 541 with C- or better
MTH 443, ABSTRACT LINEAR ALGEBRA, 3 Credits
Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 342 with C- or better or MTH 343 with C- or better

MTH 451, NUMERICAL LINEAR ALGEBRA, 3 Credits
Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better
Recommended: Programming experience, MTH 342 and MTH 351

MTH 452, NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and ((MTH 306 with C- or better or MTH 306H with C- or better) or MTH 341 with C- or better or (MTH 264 with C- or better or MTH 264H with C- or better)) and (MTH 253 [C-] or (MTH 265 [C-] or MTH 265H [C-]))
Recommended: MTH 351 or MTH 451 or MTH 551

MTH 453, NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 452 with C- or better or MTH 552 with C- or better

MTH 463, PROBABILITY I, 3 Credits
An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 311 (may be taken concurrently) with C- or better

MTH 464, PROBABILITY II, 3 Credits
Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 463 with C- or better or MTH 563 with C- or better) and MTH 341 [C-]

MTH 465, PROBABILITY III, 3 Credits
Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 464 with C- or better or MTH 564 with C- or better

MTH 467, ACTUARIAL MATHEMATICS, 3 Credits
Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 463 with C- or better or MTH 563 with C- or better or ST 421 with C- or better

MTH 480, SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Systems of two first-order differential equations, phase portraits, linearization and the stability of equilibria, conservative systems, reversible systems, limit cycles and the Poincare-Bendixson Theorem. Additional topics selected from Hamiltonian systems, Hopf bifurcation or Lorenz equations and chaos. MTH 480 and MTH 481 cannot both be taken for credit. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 481, APPLIED ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 253 with C- or better or MTH 253H with C- or better) or (MTH 264 with C- or better or MTH 264H with C- or better) or (MTH 306 with C- or better or MTH 306H with C- or better) and (MTH 341 [C-] or (MTH 265 [C-] or MTH 265H [C-]))

MTH 482, APPLIED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 480 with C- or better or MTH 481 with C- or better and MTH 341 [C-]

MTH 483, COMPLEX VARIABLES, 3 Credits
Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 253 [C-] or (MTH 306 [C-] or MTH 306H [C-]) or (MTH 265 [C-] or MTH 265H [C-]))
MTH 490, INTENSIVE SUMMER RESEARCH IN MATHEMATICS, 12 Credits
Combination of seminar, lectures, and individual research projects designed to introduce students to research mathematics. 
This course is repeatable for 99 credits.

MTH 491, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better

MTH 492, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Major results of Euclidean geometry, axioms systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tessellations, isometries and similarities of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 491 with C- or better or MTH 591 with C- or better

MTH 493, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 492 with C- or better or MTH 592 with C- or better

MTH 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

MTH 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MTH 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

MTH 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MTH 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MTH 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

MTH 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

MTH 510, OCCUPATIONAL INTERNSHIP, 3-12 Credits
Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N. 
This course is repeatable for 16 credits.

MTH 511, REAL ANALYSIS, 3 Credits
Properties of metric spaces and normed spaces, including lp spaces. Completeness and applications, including fixed point theorems. Compactness. Equicontinuity and the Arzela-Ascoli theorem. Uniform continuity and uniform convergence, including applications. 
This course is repeatable for 18 credits.
Recommended: MTH 312 and MTH 341

MTH 512, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini's theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 511 with C- or better
This course is repeatable for 18 credits.

MTH 513, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini’s theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 512 with C- or better
This course is repeatable for 18 credits.

MTH 520, MODELS AND METHODS OF APPLIED MATHEMATICS, 3 Credits
Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 256 or MTH 256H) and MTH 341

MTH 524, DYNAMICAL SYSTEMS THEORY AND APPLICATIONS, 3 Credits
Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: MTH 341 and MTH 342 and MTH 311 and MTH 312 and MTH 361
**MTH 525, DYNAMICAL SYSTEMS THEORY AND APPLICATIONS, 3 Credits**

Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for 6 credits.

**Recommended:** MTH 341 and MTH 342 and MTH 311 and MTH 312 and MTH 361

**MTH 527, INTRODUCTION TO MATHEMATICAL BIOLOGY, 3 Credits**

Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from experimental analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better.

**Recommended:** (MTH 256 or MTH 256H) and MTH 341

**MTH 528, STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY, 3 Credits**

An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better.

**Recommended:** MTH 341 and (MTH 361 or MTH 463 or MTH 563)

**MTH 531, GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS, 3 Credits**

Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 341 and (MTH 342 or MTH 440 or MTH 540)

**MTH 532, GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS, 3 Credits**

Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 441 or MTH 541

**MTH 534, INTRODUCTION TO DIFFERENTIAL GEOMETRY, 3 Credits**

Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** (MTH 255 or MTH 255H) and MTH 342 and MTH 311

**MTH 535, DIFFERENTIAL GEOMETRY, 3 Credits**

Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 434 or MTH 534

**MTH 537, GENERAL RELATIVITY, 3 Credits**

Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Prerequisite:** MTH 434 with C or better or MTH 534 with C or better

**Recommended:** MTH 311

**MTH 540, COMPUTATIONAL NUMBER THEORY, 3 Credits**

Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptography. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 231 or MTH 343 or MTH 355

**MTH 541, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits**

Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 343 and (MTH 342 or MTH 440 or MTH 540)

**MTH 542, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits**

Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 441 or MTH 541

**MTH 543, ABSTRACT LINEAR ALGEBRA, 3 Credits**

Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C or better.

**Recommended:** MTH 342 and MTH 343
MTH 551, NUMERICAL LINEAR ALGEBRA, 3 Credits
Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341, MTH 342, MTH 351 and programming experience

MTH 552, NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: Programming experience and (MTH 256 or MTH 256H) and (MTH 306 or MTH 306H or MTH 341) and (MTH 351 or MTH 451 or MTH 551)

MTH 553, NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 452 or MTH 552

MTH 563, PROBABILITY I, 3 Credits
An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 312

MTH 564, PROBABILITY II, 3 Credits
Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341 and (MTH 463 or MTH 563)

MTH 565, PROBABILITY III, 3 Credits
Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 464 or MTH 564

MTH 567, ACTUARIAL MATHEMATICS, 3 Credits
Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 463 or MTH 563) or ST 421.

MTH 578, PROBABILITY AND DATA ANALYSIS IN K-8 MATHEMATICS, 3 Credits
Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 390

MTH 581, APPLIED ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 256 or MTH 256H) and (((MTH 253 or MTH 253H) and MTH 341) or (MTH 306 or MTH 306H))

MTH 582, APPLIED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations, Bessel’s and Legendre’s equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 480 or MTH 481 or MTH 581

MTH 583, COMPLEX VARIABLES, 3 Credits
Introduction to the complex differential and integral calculus: Cauchy’s theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 256 or MTH 256H) and (MTH 253 or MTH 306) or (MTH 306 or MTH 306H)

MTH 590, TOPICS IN SECONDARY MATHEMATICS, 3 Credits
Key ideas and topics in discrete mathematics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 390
MTH 591, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341

MTH 592, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tessellations, isometries and similarities of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 491 or MTH 591

MTH 593, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 492 or MTH 592

MTH 598, PROBABILITY AND DATA ANALYSIS IN SECONDARY MATHEMATICS, 3 Credits
Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 390

MTH 599, SPECIAL TOPICS, 0-16 Credits
Topics may vary.
This course is repeatable for 18 credits.

MTH 601, RESEARCH, 1-16 Credits
This course is repeatable for 18 credits.

MTH 603, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

MTH 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MTH 606, SPECIAL PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MTH 607, SEMINAR, 1-16 Credits
This course is repeatable for 99 credits.

MTH 611, COMPLEX ANALYSIS, 3 Credits
Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 411 or MTH 511

MTH 612, COMPLEX ANALYSIS, 3 Credits
Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 611

MTH 614, FUNCTIONAL ANALYSIS, 3 Credits
Topological vector spaces, generalized functions, operator theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 513

MTH 619, TOPICS IN ANALYSIS, 1-12 Credits
This course is repeatable for 12 credits.

MTH 621, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: 6 credits of senior-level analysis

MTH 622, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 621 with C or better
This course is repeatable for 6 credits.
MTH 623, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the third one in year-long sequence. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 621 with C or better and MTH 622 [C]
This course is repeatable for 6 credits.

MTH 627, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered fall term in odd years. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: MTH 413 or MTH 513

MTH 628, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered winter term in even years. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: MTH 627

MTH 634, ALGEBRAIC TOPOLOGY, 3 Credits
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 532

MTH 635, ALGEBRAIC TOPOLOGY, 3 Credits
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 532 and MTH 634

MTH 636, ALGEBRAIC TOPOLOGY, 3 Credits
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 532 and MTH 635

MTH 644, ABSTRACT ALGEBRA I, 3 Credits
Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 443 or MTH 543

MTH 645, ABSTRACT ALGEBRA II, 3 Credits
Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 644

MTH 649, TOPICS IN ALGEBRA AND NUMBER THEORY, 3 Credits
This course is repeatable for 27 credits.

MTH 654, NUMERICAL ANALYSIS, 3 Credits
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 12 credits.
Recommended: Familiarity with numerical methods

MTH 655, NUMERICAL ANALYSIS, 3 Credits
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 12 credits.
Recommended: Familiarity with numerical methods

MTH 656, NUMERICAL ANALYSIS, 3 Credits
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 12 credits.
Recommended: Familiarity with numerical methods

MTH 657, TOPICS IN APPLIED MATHEMATICS, 1-12 Credits
Previous topics have included turbulence, financial mathematics and probability methods in partial differential equations.
This course is repeatable for 12 credits.

MTH 658, TOPICS IN MATHEMATICAL MODELING, 1-12 Credits
Mathematical treatment of topics of current interest in the physical and biological sciences and technology. May be repeated for credit when topic varies.
This course is repeatable for 12 credits.
MTH 659, TOPICS IN NUMERICAL ANALYSIS, 1-12 Credits
This course is repeatable for 12 credits.

MTH 664, PROBABILITY THEORY, 3 Credits
General theory of probability measures and random variables, including weak convergence, characteristic functions, central limit theorem, conditional expectations, martingales. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 411 or MTH 511

MTH 665, PROBABILITY THEORY, 3 Credits
General theory of probability measures and random variables, including weak convergence, characteristic functions, the central limit theorem, and the Brownian motion process. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 664

MTH 669, TOPICS IN STOCHASTIC PROCESSES, 1-12 Credits
Previous topics have included Markov processes, martingales, branching processes, and stochastic differential equations.
This course is repeatable for 12 credits.

MTH 674, DIFFERENTIAL GEOMETRY OF MANIFOLDS, 3 Credits
Differentiable manifolds, tangent bundles, vector fields and flows, submanifolds, Riemannian metrics, differential forms, integration on manifolds. Selected topics such as foliations, Lie groups, and de Rham cohomology. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341 and (MTH 411 or MTH 511)

MTH 675, DIFFERENTIAL GEOMETRY OF MANIFOLDS, 3 Credits
Differentiable manifolds, connections in linear bundles, Riemannian manifolds and submanifolds. Selected topics such as variational theory of geodesics, harmonic forms, and characteristic classes. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 674

MTH 676, TOPICS IN TOPOLOGY, 3 Credits
This course is repeatable for 27 credits.

MTH 679, TOPICS IN GEOMETRY, 1-12 Credits
This course is repeatable for 12 credits.

MTH 682, TEACHING AND LEARNING PROBABILITY AND STATISTICS, 3 Credits
Experimental, activity-based approaches to introductory probability and statistics are explored. Topics include computer simulations, exploratory data analysis, misuses of statistics, and misconceptions of probability. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 684, COMPUTERS AND MATHEMATICS, 3 Credits
A variety of mathematical problems are investigated with a laboratory approach using microcomputers and a wide variety of software. Problems may be taken from number theory, calculus, geometry, probability, and elementary numerical analysis. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: Ability to program in either BASIC or PASCAL

MTH 685, ADVANCED PROBLEM SOLVING, 3 Credits
Mathematical problem solving using the heuristic approach of George Polya. Problems may be taken from a variety of areas, including number theory, calculus, geometry, probability, abstract and linear algebra. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 689, TOPICS IN MATHEMATICS EDUCATION, 1-12 Credits
Topics may vary.
This course is repeatable for 12 credits.

MTH 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Physics (PH)
PH 104, *DESCRIPTIVE ASTRONOMY, 4 Credits
Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 104H

PH 104H, *DESCRIPTIVE ASTRONOMY, 4 Credits
Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Equivalent to: PH 104
PH 106, *PERSPECTIVES IN PHYSICS, 4 Credits
A descriptive and non-mathematical study of the development of physical concepts and their historical and philosophical context. The emphasis is on the origin, meaning, significance, and limitations of these concepts and their role in the evolution of current understanding of the universe. Concepts to be covered include Copernican astronomy, Newtonian mechanics, energy, electricity and magnetism, relativity, and quantum theory. Intended primarily for non-science students. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 111, *INQUIRING INTO PHYSICAL PHENOMENA, 4 Credits
Development of conceptual understandings through investigation of everyday phenomena. Emphasis is on questioning, predicting, exploring, observing, discussing, and writing in physical science contexts. Students document their initial thinking, record their evolving understandings, and write reflections upon how their thinking changed and what fostered their learning. Lec/lab. (Baccalaureate Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 198, FIRST-YEAR ORIENTATION, 1 Credit
Introduction to the Physics Department including educational, research, and career opportunities. Recommended for all freshman and transfer physics majors, but open to all students interested in learning about opportunities in Physics.

PH 199, SPECIAL STUDIES, 1-16 Credits
One-credit sections are graded pass/no pass. This course is repeatable for 99 credits.

PH 201, *GENERAL PHYSICS, 5 Credits
Introductory survey course covering a broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 201H
Recommended: MTH 111 and MTH 112
Available via Ecampus

PH 202, *GENERAL PHYSICS, 5 Credits
Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 202H
Recommended: MTH 111 and MTH 112 and PH 201
Available via Ecampus

PH 203, *GENERAL PHYSICS, 5 Credits
Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 203H
Recommended: MTH 111 and MTH 112 and PH 202
Available via Ecampus

PH 205, *SOLAR SYSTEM ASTRONOMY, 4 Credits
History, laws, and tools of astronomy. Composition, motion, and origin of the sun, planets, moons, asteroids, and comets. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 206, *STARS AND STELLAR EVOLUTION, 4 Credits
Properties of stars; star formation, evolution, and death; supernovae, pulsars, and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 207, *GALAXIES, COSMOLOGY, LIFE IN THE UNIVERSE, 4 Credits
Nature and content of galaxies, properties of quasars, and the cosmic background radiation. Emphasis on the Big-Bang model and its features. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 211, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 211H
Recommended: MTH 251 and concurrent enrollment in MTH 252 and a PH 221 recitation section
PH 211H, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec.
(Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Equivalent to: PH 211
Recommended: MTH 251 and concurrent enrollment in MTH 252 and a PH 211 recitation section

PH 212, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab.
(Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: PH 211 with D- or better or PH 211H with D- or better
Equivalent to: PH 212H, PH 212H
Recommended: MTH 252 and concurrent enrollment in PH 222 and MTH 254

PH 212H, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab.
(Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: PH 211 with D- or better or PH 211H with D- or better
Equivalent to: PH 212
Recommended: MTH 252 and concurrent enrollment in PH 222 and MTH 254

PH 213, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec.
(Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 213H
Recommended: MTH 254 and (PH 212 or PH 212H). Concurrent enrollment in a recitation section is strongly recommended.

PH 213H, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec.
(Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Equivalent to: PH 213
Recommended: MTH 254 and (PH 212 or PH 212H). Concurrent enrollment in a recitation section is strongly recommended.

PH 221, RECITATION FOR PHYSICS 211, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Prerequisite: PH 211 (may be taken concurrently) with D- or better or PH 211H (may be taken concurrently) with D- or better
Equivalent to: PH 221H

PH 221H, RECITATION FOR PHYSICS 211, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Attributes: HNRS – Honors Course Designator
Prerequisite: PH 211 (may be taken concurrently) with D- or better or PH 211H (may be taken concurrently) with D- or better
Equivalent to: PH 221

PH 222, RECITATION FOR PHYSICS 212, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Graded P/N.
Prerequisite: PH 212 (may be taken concurrently) with D- or better or PH 212H (may be taken concurrently) with D- or better
Equivalent to: PH 222H

PH 222H, RECITATION FOR PHYSICS 212, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Attributes: HNRS – Honors Course Designator
Prerequisite: PH 212 (may be taken concurrently) with D- or better or PH 212H (may be taken concurrently) with D- or better
Equivalent to: PH 222
Recommended: Concurrent enrollment in PH 212 or PH 212H

PH 223, RECITATION FOR PHYSICS 213, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Prerequisite: PH 213 (may be taken concurrently) with D- or better or PH 213H (may be taken concurrently) with D- or better
Equivalent to: PH 223H
PH 223H, RECITATION FOR PHYSICS 213, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Attributes: HNRS – Honors Course Designator
Prerequisite: PH 213 (may be taken concurrently) with D- or better or PH 213H (may be taken concurrently) with D- or better
Equivalent to: PH 223
Recommended: Concurrent enrollment in PH 213

PH 265, SCIENTIFIC COMPUTING, 3 Credits
Basic computational tools and techniques for courses in science and engineering. Project approach to problem solving using symbolic and compiled languages with visualization. Basic computer literacy assumed.
Equivalent to: CS 265
Recommended: Concurrent enrollment in MTH 251

PH 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PH 313, *ENERGY ALTERNATIVES, 3 Credits
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: PH 313H
Recommended: Upper-division standing and 12 credits of introductory science. Available via Ecampus

PH 313H, *ENERGY ALTERNATIVES, 3 Credits
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: PH 313
Recommended: Upper-division standing and 12 credits of introductory science

PH 315, PHYSICS OF CONTEMPORARY CHALLENGES, 3 Credits
An introduction to thermal and quantum physics in the context of contemporary challenges faced by our society, such as power generation, energy efficiency, and global warming.
Recommended: PH 211

PH 317, *EXPERIMENTAL PHYSICS, 3 Credits
Conducting experiments, understanding equipment, modeling physical phenomena, analyzing and presenting data, sources of variation and uncertainty. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: PH 213 with C- or better and PH 315 [C-] and PH 335 [C-]
Equivalent to: PH 317X

PH 317X, EXPERIMENTAL PHYSICS, 3 Credits
Conducting experiments, understanding equipment, modeling physical phenomena, analyzing and presenting data, data-driven conclusions and inferences, statistical analysis
Prerequisite: PH 213 with C- or better and PH 315 [C-] and PH 335 [C-]

PH 331, *SOUND, HEARING, AND MUSIC, 3 Credits
Basic course in the physics, technology, and societal implications of sound. Intended for students in nontechnical majors. Topics include wave motion, hearing and the perception of sound, noise pollution, music and musical instruments, architectural acoustics, and sound recording and reproduction. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Upper-division standing and one year of university science

PH 332, *LIGHT, VISION, AND COLOR, 3 Credits
Basic physics of light, optical instruments (lenses, telescopes, microscopes), the eye and visual perception, colors, photography, environmental lighting, lasers and holography. For nontechnical majors. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Upper-division standing and one year of university science

PH 335, TECHNIQUES OF THEORETICAL MECHANICS, 3 Credits
Newtonian, Lagrangian, and Hamiltonian classical mechanics. Special relativity with relativistic mechanics.
Recommended: PH 212 and MTH 254

PH 365, COMPUTATIONAL PHYSICS LAB, 1 Credit
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisite: PH 213 with C- or better
Equivalent to: PH 365X
Recommended: Concurrent enrollment in Paradigms
PH 366, COMPUTATIONAL PHYSICS LAB, 1 Credit
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisite: PH 213 with C- or better
Recommended: Concurrent enrollment in Paradigms

PH 367, COMPUTATIONAL PHYSICS LAB, 1 Credit
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisite: PH 213 with C- or better
Recommended: Concurrent enrollment in Paradigms

PH 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PH 399H
This course is repeatable for 16 credits.

PH 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PH 399
This course is repeatable for 16 credits.

PH 401, RESEARCH, 1-16 Credits
A research project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for 16 credits.

PH 403, ^THESIS, 1-16 Credits
A research project leading to a thesis under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

PH 405, READING AND CONFERENCE, 1-16 Credits
An independent study project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for 16 credits.

PH 407, SEMINAR, 1-16 Credits
Departmental seminars or colloquium. Graded P/N.
Equivalent to: PH 407H
This course is repeatable for 16 credits.

PH 409, PHYSICS TEACHING PRACTICUM, 1-6 Credits
Physics practicum experience for students assisting in Physics courses. Includes training in course content and development of instructional materials. Admission is by application. See the department office in Weniger 301 for details. This course is repeatable for 6 credits.

PH 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

PH 411, ELECTRONICS, 3 Credits
Covers how to build and analyze basic circuits. Topics include passive dc and ac circuits including filters, complex impedance, Fourier analysis, operational amplifiers, semiconductor diodes, and transistors.
Recommended: PH 213

PH 415, COMPUTER INTERFACING AND INSTRUMENTATION, 3 Credits
Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments.
Recommended: Upper-division and PH 412/PH 512 or equivalent background in electronics

PH 422, PARADIGMS IN PHYSICS: STATIC FIELDS, 3 Credits
Theory of static electric, magnetic, and gravitational potentials and fields using the techniques of vector calculus in three dimensions.
Equivalent to: PH 322
Recommended: PH 213 and MTH 255

PH 423, PARADIGMS IN PHYSICS: ENERGY AND ENTROPY, 3 Credits
Thermodynamics and canonical statistical mechanics.
Equivalent to: PH 323
Recommended: PH 213

PH 424, PARADIGMS IN PHYSICS: OSCILLATIONS AND WAVES, 3 Credits
Dynamics of mechanical and electrical oscillation using Fourier series and integrals; time and frequency representations for driven damped oscillators, resonance; one-dimensional waves in classical mechanics and electromagnetism; normal modes.
Recommended: PH 213 and PH 411 and MTH 256

PH 425, PARADIGMS IN PHYSICS: QUANTUM FUNDAMENTALS, 3 Credits
Introduction to quantum mechanics through Stern-Gerlach spin measurements. Probability, eigenvalues, operators, measurement, state reduction, Dirac notation, matrix mechanics, time evolution. Quantum behavior of a one-dimensional well.
Recommended: PH 213 and concurrent enrollment in MTH 341
PH 426, PARADIGMS IN PHYSICS: CENTRAL FORCES, 3 Credits
Gravitational and electrostatic forces; angular momentum and spherical harmonics, separation of variables in classical and quantum mechanics, hydrogen atom.
Recommended: PH 213 and PH 422 and PH 425 and concurrent enrollment in PH 335

PH 427, PARADIGMS IN PHYSICS: PERIODIC SYSTEMS, 3 Credits
Quantum waves in position and momentum space; Bloch waves in one-dimensional periodic systems, and the reciprocal lattice; coupled harmonic oscillators; phonons.
Recommended: PH 424 and PH 425 and concurrent enrollment in PH 315

PH 431, CAPSTONES IN PHYSICS: ELECTROMAGNETISM, 3 Credits
Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation.
Recommended: (PH 424 or 524) and (PH 426 or PH 526)

PH 441, CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS, 3 Credits
Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations.
Recommended: (PH 423 or PH 523) and (PH 451 or PH 551)

PH 451, CAPSTONES IN PHYSICS: QUANTUM MECHANICS, 3 Credits
Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications.
Recommended: (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 455, ASTROPHYSICS, 3 Credits
Physics of stars and the cosmos.
Recommended: PH 213; PH 315 or equivalent junior-level background in modern physics and thermodynamics.

PH 464, SCIENTIFIC COMPUTING II, 3 Credits
Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.
Equivalent to: PH 365

PH 465, COMPUTATIONAL PHYSICS, 3 Credits
The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics.
Recommended: PH 464 or PH 564

PH 481, PHYSICAL OPTICS, 4 Credits
Wave propagation, polarization, interference, diffraction, and selected topics in modern optics.
Recommended: PH 431 or PH 531

PH 482, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582.
Equivalent to: ECE 482
Recommended: ECE 391 or (PH 481 or PH 581)

PH 483, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583.
Equivalent to: ECE 483
Recommended: Completion or concurrent enrollment in ECE 391 or PH 481

PH 495, INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS, 3 Credits
Elementary particles and forces, nuclear structure and reactions.
Recommended: PH 451 or PH 551

PH 499, SPECIAL TOPICS, 1-16 Credits
Topics vary from year to year. May be repeated for credit. Not offered every year.
This course is repeatable for 16 credits.

PH 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PH 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

PH 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PH 507, SEMINAR, 1-16 Credits
Section 1: Departmental Colloquium. Section 3: Nuclear and Particle Physics. Section 5: Atomic, Molecular, and Optical Physics. Section 7: Solid State Physics. Section 9: Computational Physics. One-credit options are graded P/N.
This course is repeatable for 16 credits.

PH 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.
PH 511, ELECTRONICS, 3 Credits
Covers how to build and analyze basic circuits. Topics include passive dc and ac circuits including filters, complex impedance, Fourier analysis, operational amplifiers, semiconductor diodes, and transistors.
Recommended: PH 213

PH 515, COMPUTER INTERFACING AND INSTRUMENTATION, 3 Credits
Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments.
Recommended: PH 412 or PH 512 or equivalent background in electronics

PH 531, CAPSTONES IN PHYSICS: ELECTROMAGNETISM, 3 Credits
Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation.
Recommended: (PH 424 or PH 524) and (PH 426 or PH 526)

PH 541, CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS, 3 Credits
Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations.
Recommended: (PH 423 or PH 523) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 551, CAPSTONES IN PHYSICS: QUANTUM MECHANICS, 3 Credits
Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications.
Recommended: (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 555, ASTROPHYSICS, 3 Credits
Physics of stars and the cosmos.
Recommended: PH 213; PH 315 or equivalent junior-level background in modern physics and thermodynamics.

PH 562, MATHEMATICAL PHYSICS, 3 Credits
Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green's functions; complex analysis.

PH 564, SCIENTIFIC COMPUTING II, 3 Credits
Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.
Equivalent to: PH 365

PH 575, INTRODUCTION TO SOLID STATE PHYSICS, 3 Credits
Introduction to condensed matter physics for majors in physics, chemistry, and engineering. Topics include band structure, free electron behavior, optical properties, magnetism, and lattice excitations.
Recommended: (PH 451 or PH 551) and concurrent enrollment in PH 427 or PH 527

PH 581, PHYSICAL OPTICS, 4 Credits
Wave propagation, polarization, interference, diffraction, and selected topics in modern optics.
Recommended: PH 431 or PH 531

PH 582, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582.
Equivalent to: ECE 582
Recommended: PH 481 or PH 581

PH 583, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583.
Equivalent to: ECE 583
Recommended: Completion or concurrent enrollment in ECE 391 or PH 481/581

PH 585, ATOMIC, MOLECULAR, AND OPTICAL PHYSICS, 3 Credits
Atomic and molecular structure, interaction with electromagnetic fields, atomic and molecular spectra, spectroscopic techniques, laser theory, nonlinear optics.
Recommended: (PH 431 or PH 531) or (PH 451 or PH 551)

PH 591, BIOLOGICAL PHYSICS, 3 Credits
Basic physics principles applied to the kinetics and dynamics of molecular and cellular processes. Ion channels, two-state systems, dynamics of molecular motors, cell signalling, and multicellular phenomena.
Recommended: PH 320, PH 421, PH 422 and PH 423 or junior-level background in classical mechanics, electromagnetism, and thermodynamics

PH 595, INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS, 3 Credits
Elementary particles and forces, nuclear structure and reactions.
Recommended: PH 451 or PH 551

PH 599, SPECIAL TOPICS, 1-16 Credits
(See PH 499 for description.)
This course is repeatable for 16 credits.

PH 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

PH 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.
PH 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PH 607, SEMINAR, 1-16 Credits
Section 1: Departmental Colloquium. Section 3: Nuclear and Particle Physics. Section 5: Atomic, Molecular, and Optical Physics. Section 7: Solid State Physics. Section 9: Computational Physics. One-credit options are graded P/N. This course is repeatable for 16 credits.

PH 609, PRACTICUM IN TEACHING, 1-6 Credits
This course is repeatable for 6 credits.

PH 621, DYNAMICS OF SINGLE- AND MULTI-PARTICLE SYSTEMS, 3 Credits
Introduction to theory of non-linear systems. Chaos in Hamiltonian and dissipative systems. Lyapunov exponents, fractal geometries. Recommended: PH 435 or PH 535

PH 631, ELECTROMAGNETIC THEORY, 3 Credits
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. Recommended: PH 431 or PH 531

PH 632, ELECTROMAGNETIC THEORY, 3 Credits
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. Recommended: PH 631 and (PH 431 or PH 531)

PH 633, ELECTROMAGNETIC THEORY, 3 Credits
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. Recommended: PH 632 and (PH 431 or PH 531)

PH 641, STATISTICAL THERMOPHYSICS, 3 Credits
Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation. Recommended: PH 435 or PH 535

PH 642, STATISTICAL THERMOPHYSICS, 3 Credits
Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation. Recommended: PH 641

PH 651, QUANTUM MECHANICS, 3 Credits
Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. Recommended: (PH 435 or PH 535) and (PH 451 or PH 551)

PH 652, QUANTUM MECHANICS, 3 Credits
Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. Recommended: (PH 435 or PH 535) and (PH 451 or PH 551) and PH 651

PH 653, QUANTUM MECHANICS, 3 Credits
Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. Recommended: (PH 435 or PH 535) and (PH 451 or PH 551) and PH 652

PH 654, ADVANCED QUANTUM THEORY, 3 Credits
Scattering theory, second quantization and many body theory, relativistic quantum mechanics, quantization of fields, quantum electrodynamics, and elementary particles. Recommended: PH 653

PH 671, SOLID STATE PHYSICS, ELECTRON TRANSPORT, 3 Credits
Fundamentals of solid state physics, Boltzmann transport, phonon and defect scattering, quantum transport, transport in magnetic field, localization, Mott-insulator transition, electron tunneling, superconductivity. Not offered every year. Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 672, SOLID STATE PHYSICS, THEORY, 3 Credits
The many-body problem, density functional theory, excited states properties, BCS theory of superconductivity. Not offered every year. Prerequisite: PH 575 with D- or better and PH 654 [D-]
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 673, SOLID STATE PHYSICS, NANOSCIENCE AND NANOTECHNOLOGY, 3 Credits
Introduction to nanoscience and nanotechnology; semiconductor quantum wells, wires, and dots; bulk metals vs nanoparticles; molecular ensembles vs single molecules; fabrication of nanoparticles and nanostructured materials; scanning probe microscopy; advanced optical imaging and manipulation. Not offered every year. Recommended: Basic knowledge of electromagnetism and quantum mechanics
PH 674, SOLID STATE PHYSICS, MAGNETISM, 2 Credits
Magnetism of atoms; interaction between magnetic atoms, magnetic ordering in crystalline solids; excitations in magnetic solids; temperature dependent phenomena in magnetic solids; magnetism of metals, alloys, insulators and semiconductors; topics of considerable interest in contemporary research. 
Recommended: Basic knowledge of electromagnetism and quantum mechanics.

PH 681, ATOMIC, MOLECULAR AND OPTICAL PHYSICS, MODERN OPTICS, 3 Credits
Maxwell’s equations in matter; refraction, phase and group indices; material and geometry dispersion; effective-medium regime. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 682, ATOMIC, MOLECULAR, OPTICAL PHYSICS, SEMICONDUCTOR OPTICS, 3 Credits
Linear response theory; polarization effects; interband excitations and emissions; low dimensional systems; excitons; phonons; semiconductor lasers; photovoltaics. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 683, ATOMIC, MOLECULAR AND OPTICAL PHYSICS, NONLINEAR OPTICS, 3 Credits
Coherent nonlinear electromagnetic phenomena; harmonic generation and parametric mixing; quantum mechanical description of multi-photon interactions; incoherent multi-photon interactions; coherent nonlinear optical phenomena and spectroscopies. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 684, ATOMIC, MOLECULAR AND OPTICAL PHYSICS, ULTRAFAST OPTICS, 2 Credits
Introduction of ultrafast optical science; short pulse propagation in linear media; pulse stretching and compressing; Q-switching and mode-locking; characterization of femtosecond lasers; coherent optical effects. Offered in alternate years.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 699, SPECIAL TOPICS: BIOLOGICAL PHYSICS, 3 Credits
Topics vary from year to year. Not offered every year. This course is repeatable for 9 credits.
ST 314, INTRODUCTION TO STATISTICS FOR ENGINEERS, 3 Credits
Probability, common probability distributions, sampling distributions, estimation, hypothesis testing, control charts, regression analysis, experimental design.
Prerequisite: MTH 252 with D- or better or MTH 252H with D- or better
Equivalent to: ST 314H
Available via Ecampus

ST 351, INTRODUCTION TO STATISTICAL METHODS, 4 Credits
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Equivalent to: ST 351H
Recommended: High school algebra with statistics
Available via Ecampus

ST 351H, INTRODUCTION TO STATISTICAL METHODS, 4 Credits
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: ST 351
Recommended: High school algebra with statistics

ST 352, INTRODUCTION TO STATISTICAL METHODS, 4 Credits
Randomization tests and other nonparametric tests for one- and two-sample inference, simple and multiple linear regression, correlation, one- and two-way analysis of variance, logistic regression. Lec/lab.
Prerequisite: ST 351 with D- or better or ST 351H with D- or better
Available via Ecampus

ST 406, PROJECTS, 1-16 Credits
Section 1: Projects, graded P/N. Section 2: Teaching Experience, graded P/N. Section 3: Directed Work, graded P/N.
This course is repeatable for 16 credits.

ST 407, SEMINAR, 1 Credit
Attendance at consulting practicum. Graded P/N.

ST 410, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ST 411, METHODS OF DATA ANALYSIS, 4 Credits
Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab.
Recommended: ST 351

ST 412, METHODS OF DATA ANALYSIS, 4 Credits
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab.
Prerequisite: ST 411 with D- or better
Recommended: ST 351

ST 413, METHODS OF DATA ANALYSIS, 4 Credits
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab.
Prerequisite: ST 412 with D- or better
Recommended: ST 351

ST 415, DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS, 3 Credits
Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components.
Prerequisite: ST 352 with D- or better or ST 411 with D- or better or ST 511 with D- or better

ST 421, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions.
Recommended: MTH 253

ST 422, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing.
Prerequisite: ST 421 with D- or better
Recommended: MTH 253

ST 431, SAMPLING METHODS, 3 Credits
Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods.
Recommended: ST 411 or ST 511

ST 435, QUANTITATIVE ECOCY, 3 Credits
Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods.
Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year.
Prerequisite: ST 412 with D- or better or ST 512 with D- or better
ST 439, SURVEY METHODS, 3 Credits
Survey design, data collection and analysis, general methodology.
Prerequisite: ST 201 with D- or better or ST 351 with D- or better
Available via Ecampus

ST 441, PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS, 4 Credits
Prerequisite: ST 422 with D- or better or ST 522 with D- or better
Recommended: Experience with a high-level programming language or mathematical computation package

ST 443, APPLIED STOCHASTIC MODELS, 3 Credits
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques.
Prerequisite: ST 421 with D- or better or ST 521 with D- or better
Recommended: Experience with a high-level programming language or mathematical computation package

ST 499, SPECIAL TOPICS, 1-4 Credits
May be repeated for credit.
This course is repeatable for 8 credits.

ST 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ST 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ST 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ST 506, PROJECTS, 1-16 Credits
Section 1: Projects. Section 2: Teaching Experience. Section 3: Directed Work.
This course is repeatable for 16 credits.

ST 507, SEMINAR, 1 Credit
Section 1: Attendance at consulting practicum, 1 credit. Section 3: Research Seminar, 1 credit. Section 4: Computing Facilities, 1 credit. All sections graded P/N.
This course is repeatable for 99 credits.

ST 509, CONSULTING PRACTICUM, 2 Credits
The student provides statistical advice, under faculty guidance, on university-related research projects.
This course is repeatable for 99 credits.
Recommended: ST 507 and ST 553

ST 510, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ST 511, METHODS OF DATA ANALYSIS, 4 Credits
Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab.
Recommended: ST 351

ST 512, METHODS OF DATA ANALYSIS, 4 Credits
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab.
Prerequisite: ST 511 with C or better
Recommended: ST 351

ST 513, METHODS OF DATA ANALYSIS, 4 Credits
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics.
Lec/lab.
Prerequisite: ST 512 with C or better
Recommended: ST 351

ST 515, DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS, 3 Credits
Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components.
Recommended: ST 352 or (ST 411 or ST 511)
Available via Ecampus

ST 516, FOUNDATIONS OF DATA ANALYTICS, 4 Credits
Foundations of estimation and hypothesis testing; desirable properties of estimators; maximum likelihood; one- and two-sample problems; theoretical results are explored through simulations and analysis using R. Offered via Ecampus only.
Recommended: ST 351
Available via Ecampus

ST 517, DATA ANALYTICS I, 4 Credits
Methods for modeling quantitative data and statistical learning–simple and multiple linear regression; linear mixed effects models; data imputation; prediction and cross-validation; scaling up to large datasets. Simulations and data analysis using R. Offered via Ecampus only.
Prerequisite: ST 516 with C+ or better
Available via Ecampus

ST 518, DATA ANALYTICS II, 4 Credits
Statistical methods and data analysis techniques for count data. Topics include tests for tables of counts, logistic regression, log-linear regression, generalized linear mixed models, and issues for large datasets. Data analysis in R.
Prerequisite: ST 517 with C+ or better
Available via Ecampus
ST 521, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions.
Recommended: MTH 253

ST 522, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing.
Prerequisite: ST 521 with C or better
Recommended: MTH 253

ST 525, APPLIED SURVIVAL ANALYSIS, 3 Credits
Statistical methods for analyzing survival data or time-to-event data, which may be censored and/or truncated. Specific topics can vary term to term, and could include Kaplan-Meier estimator; K-sample hypothesis tests for survival data; Accelerated failure time model; Cox proportional hazard regression model.
Prerequisite: ST 516 with C or better and ST 517 [C] and ST 518 [C]
Available via Ecampus

ST 531, SAMPLING METHODS, 3 Credits
Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods.
Recommended: ST 411 or ST 511

ST 535, QUANTITATIVE ECOLOGY, 3 Credits
Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year.
Recommended: ST 412 or ST 512

ST 537, DATA VISUALIZATION, 3 Credits
Perceptual principles for displaying data; critique and improvement of data visualizations; use of color in visualization; principles of tidy data; strategies for data exploration; select special topics.
Prerequisite: ST 512 with C or better or ST 517 with C or better or ST 552 with C or better
Recommended: Familiarity with linear regression and using R
Available via Ecampus

ST 538, MODERN STATISTICAL METHODS FOR LARGE AND COMPLEX DATA SETS, 3 Credits
Provides students with the tools and experience to analyze big and messy data and work effectively in a data science team. Covers the tools to handle big data and answer statistical questions based on the data. Includes three big data analysis projects that students work on in groups. Focuses on proper use of modern data analysis techniques related to regression, classification and clustering for data coming from a variety of application fields. R will be the lingua franca.
Prerequisite: ST 512 with C or better or ST 517 with C or better or ST 552 with C or better or ST 412 with C or better
Available via Ecampus

ST 539, SURVEY METHODS, 3 Credits
Survey design, data collection and analysis, general methodology.
Recommended: ST 201 or ST 351
Available via Ecampus

ST 541, PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS, 4 Credits
Recommended: ST 422 or ST 522

ST 543, APPLIED STOCHASTIC MODELS, 3 Credits
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques.
Recommended: (ST 421 or ST 521) and experience with a high-level programming language or mathematical computation package.

ST 551, STATISTICAL METHODS, 4 Credits
Properties of t, chi-square and F tests; randomized experiments; sampling distributions and standard errors of estimators, delta method, comparison of several groups of measurements; two-way tables of measurements.
Recommended: Concurrent enrollment in MTH 341 and (ST 422 or ST 522)

ST 552, STATISTICAL METHODS, 4 Credits
Simple and multiple linear regression including polynomial regression, indicator variables, weighted regression, and influence statistics, non-linear regression and linear models for binary data.
Prerequisite: ST 551 with C or better
Recommended: ST 422 or ST 522.

ST 553, STATISTICAL METHODS, 4 Credits
Principles and analysis of designed experiments, including factorial experiments, analysis of covariance, random and mixed effect models. Lec/lab.
Prerequisite: ST 552 with C or better
ST 555, ADVANCED EXPERIMENTAL DESIGN, 3 Credits
Designs leading to mixed models including split plots, repeated measures, crossovers and incomplete blocks. Introduction to experimental design in industry including confounding, fractional factorials and response surface methodology. Analysis of unbalanced data.
Prerequisite: ST 553 with C or better

ST 557, APPLIED MULTIVARIATE ANALYSIS, 3 Credits
Multivariate data structures, linear combinations; principal components, factor and latent structure analysis, canonical correlations, discriminant analysis; cluster analysis, multidimensional scaling. Not offered every year.
Recommended: (ST 412 or ST 512) and (MTH 252 or MTH 245)

ST 558, MULTIVARIATE ANALYTICS, 3 Credits
Basics of matrix algebra, principal components analysis, cluster analysis, factor analysis, multidimensional scaling.
Prerequisite: ST 518 with C- or better
Available via Ecampus

ST 559, BAYESIAN STATISTICS, 3 Credits
Bayesian statistics for data analysis. Characterizations of probability; comparative (Bayesian versus frequentist) inference; prior, posterior and predictive distributions; hierarchical modeling. Computational methods include Markov Chain Monte Carlo for posterior simulation.
Recommended: ST 562

ST 561, THEORY OF STATISTICS, 4 Credits
Distributions of functions of random variables, joint and conditional distributions, sampling distributions, convergence concepts, order statistics. Lec/rec.
Recommended: ST 422 or ST 522

ST 562, THEORY OF STATISTICS, 4 Credits
Sufficiency, exponential families, location and scale families; point estimation: maximum likelihood, Bayes, and unbiased estimators; asymptotic distributions of maximum likelihood estimators; Taylor series approximations.
Prerequisite: ST 561 with C or better
Recommended: ST 422 or ST 522

ST 563, THEORY OF STATISTICS, 4 Credits
Hypothesis testing: likelihood ratio, Bayesian, and uniformly most powerful tests; similar tests in exponential families; asymptotic distributions of likelihood ratio test statistics; confidence intervals.
Prerequisite: ST 562 with C or better
This course is repeatable for 4 credits.
Recommended: ST 422 or ST 522

ST 565, TIME SERIES, 3 Credits
Analysis of serially correlated data in both time and frequency domains. Autocorrelation and partial autocorrelation functions, autoregressive integrated moving average models, model building, forecasting; filtering, smoothing, spectral analysis, frequency response studies. Offered winter term in even years.
Recommended: (ST 412 or ST 512) and (ST 422 or ST 522)

ST 566, TIME SERIES ANALYTICS, 3 Credits
Focuses on statistical and analytical tools for analyzing data that are observed sequentially over time. Specific topics can vary term to term, and could include methods for exploratory time series analysis, linear time series models (ARMA, ARIMA), forecasting, spectral analysis and state-space models. The focus will be on applied problems, though some mathematical statistics is necessary for a solid understanding of the statistical issues. This course is designed for students in Data Analytics MS and Certificate programs.
Prerequisite: ST 516 with C or better and ST 517 [C] and ST 518 [C]
Available via Ecampus

ST 567, SPATIAL STATISTICS, 3 Credits
The analysis of spatial data. Graphical tools for exploring spatial data, geostatistics, variogram estimation, kriging, areal models, hierarchical spatial models, and spatio-temporal modelling. Offered winter term in odd years.
Recommended: (ST 412 or ST 512) and (ST 422 or ST 522)

ST 591, INTRODUCTION TO QUANTITATIVE GENOMICS, 3 Credits
Provides an overview of how genomic data is generated and analyzed. It focuses on the underlying biological motivation, theoretical concepts, and analytical challenges associated with genomic research, especially the generation of statistics that summarize genomic data. The class is organized as a combination of lectures and group literature review discussions. Students are expected to actively participate in the class. Students from diverse backgrounds, including quantitative, biological, and computations sciences, are encouraged to enroll.
Recommended: ST 411 or ST 511
Available via Ecampus

ST 592, STATISTICAL METHODS FOR GENOMICS RESEARCH, 3 Credits
Lectures include an overview of statistical methods commonly applied in genomics research. Specific methods can vary term to term, and could include cluster analysis, decision trees, dimension reduction tools, regression models, multiple testing adjustment, variable selection methods, etc. Journal clubs include team-based review and presentations of landmark papers in both statistical methodology and genomics research. Research experience includes whole-term collaboration between students from statistics and other disciplines on real projects.
Recommended: ST 411 or ST 511 or a higher level course such as ST 551
Available via Ecampus

ST 595, CAPSTONE PROJECT, 3 Credits
Provides an opportunity for students to integrate and apply the analytics skills learned in MS in Data Analytics program to solve real-world problems and to interpret and communicate their results. Student teams will engage in the entire process of solving data science projects in realistic settings, from placing the problem into appropriate statistical framework to applying suitable analytic methods to the problem. Problem solving, written and oral communication skills will be emphasized.
Prerequisite: ST 516 with C or better and ST 517 [C] and ST 518 [C] and ST 558 [C]
Available via Ecampus
**ST 599, SPECIAL TOPICS, 1-4 Credits**  
May be repeated for credit when topic varies.  
*This course is repeatable for 16 credits.*

**ST 601, RESEARCH, 1-16 Credits**  
*This course is repeatable for 16 credits.*

**ST 603, THESIS, 1-16 Credits**  
*This course is repeatable for 999 credits.*

**ST 606, PROJECTS, 1-16 Credits**  
Section 1: Projects; Section 2: Teaching Experience, graded P/N; Section 3: Directed Work, graded P/N.  
*This course is repeatable for 16 credits.*

**ST 623, GENERALIZED REGRESSION MODELS, 3 Credits**  
Maximum likelihood analysis for frequency data; regression-type models for binomial and Poisson data; iterative weighted least squares and maximum likelihood; analysis of deviance and residuals; over-dispersion and quasilikelihood models; log-linear models for multidimensional contingency tables.  
**Prerequisite:** ST 553 with C or better and ST 563 [C]

**ST 625, SURVIVAL ANALYSIS, 3 Credits**  
Prepares students to understand and analyze survival data. Concepts to be discussed include: hazard function (failure rate function); nonparametric likelihood; empirical processes; empirical distribution function; censoring (mostly right independent censoring); Kaplan-Meier estimator; Bias of the KM estimator; Cox proportional hazards model; Accelerated Failure Time Model; Partial Likelihood; log-rank test.  
**Prerequisite:** ST 553 with C or better or ST 563 with C or better

**ST 651, LINEAR MODEL THEORY, 3 Credits**  
Least squares estimation, best linear unbiased estimation, parameterizations, multivariate normal distributions, distributions of quadratic forms, testing linear hypotheses, simultaneous confidence intervals. Offered alternate years.  
**Recommended:** ST 553 and ST 563

**ST 652, LINEAR MODEL THEORY, 3 Credits**  
Advanced topics including classification models, mixed-effects models and multivariate models. Offered alternate years.  
**Prerequisite:** ST 651 with C or better  
**Recommended:** ST 553 and ST 563

**ST 663, ADVANCED THEORY OF STATISTICS, 3 Credits**  
First-order and higher-order asymptotics; likelihood ratio, score, and Wald tests; Edgeworth and saddlepoint approximations. Offered alternate years.  
**Prerequisite:** ST 662 with C or better  
**Recommended:** ST 563 and MTH 511

**Zoology (Z)**

**Z 349, *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION, 3 Credits**  
The earth’s biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth’s ecosystems, and methods used to conserve biodiversity for future generations. (Bacc Core Course)  
**Attributes:** CSGI – Core, Synth, Global Issues  
**Equivalent to:** BI 349  
Available via Ecampus

**Z 350, ANIMAL BEHAVIOR, 3 Credits**  
Concepts of behavior; sensory receptors, internal mechanisms governing responses; learning and habituation; social organization and communication.  
**Prerequisite:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])  
**Equivalent to:** BI 350  
Available via Ecampus

**Z 361, INVERTEBRATE BIOLOGY, 3 Credits**  
Exploration of the diversity and evolutionary relationships among major invertebrate phyla with an emphasis on morphological features, functional aspects, and life history for each phylum.  
**Prerequisite:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

**Z 362, INVERTEBRATE BIOLOGY LABORATORY, 2 Credits**  
Morphology and anatomy of representative invertebrates introduced in Z 361; diversity within phyla. Study is by dissections and both microscopic and macroscopic examination; field trip fee. Lab fee. Lec/lab.  
**Prerequisite:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) and Z 361 (may be taken concurrently) [C-]
Z 364, DIVERSITY OF LIFE: INVERTEBRATES, 5 Credits
Exploration of the diversity and evolutionary relationships among major invertebrate groups with an emphasis on building and interpreting phylogenetic trees as well as comparing and contrasting morphology, function, and life history within each group. Laboratory activities build scientific skills by exploring current hypotheses and tools for the study of invertebrate evolution.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C]) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 365, BIOLOGY OF INSECTS, 4 Credits
Introduction to the study of insects, focusing on the biological attributes responsible for the success and dominance of insects. Emphasis on taxonomy, morphology, behavior, ecology, and coevolutionary interrelationships. Required field trips. Lec/lab.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C]) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 371, VERTEBRATE BIOLOGY, 3 Credits
Overview of vertebrate origins and phylogeny integrating several disciplines (anatomy, ecology, genetics, developmental biology, physiology, behavior, and evolution) to explore the structural and functional adaptations and evolutionary history of vertebrates. Lec.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C]) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Recommended: Completion or concurrent enrollment in Z 372

Z 372, VERTEBRATE BIOLOGY LABORATORY, 2 Credits
Classification, identification, and natural history of vertebrates. Includes laboratory examination of specimens and frequent field trips (fee charged) emphasizing Oregon fauna. Lab fee.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C]) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 374, DIVERSITY OF LIFE: VERTEBRATES, 5 Credits
Examination of vertebrate origins and phylogeny, integrating several disciplines (molecular biology, anatomy, behavioral ecology, and evolution). Emphasizes critical thinking and the scientific process to explore the structural/functional adaptations and evolutionary history of vertebrates. Laboratory activities build scientific skills by exploring current hypotheses and tools for the study of vertebrate evolution.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C]) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 422, COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY, 5 Credits
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) and (CH 332 (may be taken concurrently) [D-] or CH 335 (may be taken concurrently) [D-])

Z 423, ENVIRONMENTAL PHYSIOLOGY, 3 Credits
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ionic, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 425, EMBRYOLOGY AND DEVELOPMENT, 5 Credits
Prerequisite: (BI 311 with D- or better or BI 311H with D- or better) and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-] or BB 314H [D-])

Z 431, VERTEBRATE PHYSIOLOGY I, 4 Credits
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in Z 431, Z 432/Z 442 series. Lec/rec.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C] and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C]))) and (CH 332 (may be taken concurrently) [C-] or CH 335 (may be taken concurrently) [C-])

Z 432, VERTEBRATE PHYSIOLOGY II, 3 Credits
Prerequisite: Z 431 with C- or better
Z 438, BEHAVIORAL NEUROBIOLOGY, 3 Credits
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C]) and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C])) or (BI 204 [C] and BI 205 [C] and BI 206 [C]) and (CH 123 [C] or CH 233 [C] or CH 233H [C]) and (CH 263 [C] or CH 263H [C])

Z 442, VERTEBRATE PHYSIOLOGY LABORATORY, 2 Credits
Experiments and exercises in vertebrate physiology covering systems studied in Z 431 and Z 432. Available to Biology majors. Lab fee.
Prerequisite: Z 431 with C- or better and Z 432 (may be taken concurrently) [C-]

Z 461, MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY, 4 Credits
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C]) and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C])) or (BI 204 [C] and BI 205 [C] and BI 206 [C])

Z 473, HERPETOLOGY, 4 Credits
Exploration of global herpetofauna focusing on taxa of the Pacific Northwest of North America. Identification and natural history of amphibians and reptiles are emphasized, along with a phylogenetic framework, to explore and discuss ideas involving their behavior, evolution, ecology, and conservation. Student projects examine important topics in the field.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C]) and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C])) or (BI 204 [C] and BI 205 [C] and BI 206 [C])

Z 477, AQUATIC ENTOMOLOGY, 4 Credits
Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C] or BI 212H [C]) and (BI 213 [C] or BI 213H [C])) or ((BI 221 [C] or BI 221H [C]) and (BI 222 [C] or BI 222H [C]) and (BI 223 [C] or BI 223H [C])) or (BI 204 [C] and BI 205 [C] and BI 206 [C])

Z 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
Equivalent to: Z 499H
This course is repeatable for 16 credits.

Z 499H, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary.
Equivalent to: Z 499
This course is repeatable for 16 credits.

Chemistry
The Department of Chemistry offers BS, BA, MS, MA, MAIS, and PhD degrees in Chemistry. The facilities, faculty, and curricular offerings in this department are approved by the American Chemical Society.

Chemistry provides a gateway to many professions. An undergraduate chemistry degree may serve as preparation for professional work in chemistry and related sciences; as a foundation to pursue applied fields including pharmaceutical chemistry, forensics, biotechnology, medicine, chemical processing, electronics, agricultural and food science, oceanography, marketing of scientific equipment or supplies, environmental sciences, and atmospheric science. It may also serve as a core for pre-professional students pursuing graduate work in pure or applied chemistry, and for those seeking positions as research chemists and technical experts in commercial laboratories and chemical industries, positions in local, state, and federal government facilities, and for postgraduate work leading to teaching positions in universities, colleges, community colleges, and high schools.

There are several degree programs available to undergraduate chemistry majors. All curricula involve general, organic, analytical, physical, and inorganic chemistry course work, plus two to three years of laboratory work in chemistry.

All chemistry majors take part or all of Experimental Chemistry, a six-term laboratory course sequence consisting of 22 project-style experiments. This program replaces the traditional separate divisional laboratory courses in chemistry taught at many universities. Students in this Integrated Laboratory Program work on two to five projects per term, each of which includes components of synthesis, analysis, theory and report writing spanning all areas of modern chemistry. One goal of the program is to provide students intensive hands-on experience in modern chemical instrumentation and computers as a foundation for both graduate studies and employment in science after graduation.

Most chemistry majors take advantage of the opportunity to become involved in research projects in the department. Working with a research group is an exciting way to apply ideas and skills acquired in formal course work. Students work closely with a faculty member and research group to set up their projects. Undergraduates also have the opportunity to present their research as a poster at the annual departmental poster session entitled ‘Chemistry in Action.’ Scheduling research time is flexible but three hours of work per week are required per credit. Areas of research available are highly varied and include synthesis of new compounds and materials, development and applications of chemical instrumentation, laser spectroscopy, surface science, reaction mechanisms, design and synthesis of polymers and optical materials, environmental chemistry, bioanalytical methods, and nuclear chemistry. Research experience is helpful when considering graduate work in chemistry and provides valuable experience for entering the job market. Students may also obtain valuable experience and credits for internships.

Graduate Studies
The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in analytical chemistry, inorganic chemistry, nuclear and radiation chemistry,
organic chemistry, physical chemistry, and solid state chemistry. The major emphasis of the PhD program is on research. A non-thesis master’s degree is available. Most graduate students working on a thesis in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

Undergraduate Programs

Major

- Chemistry (p. 1561)
  Track One Options:
  - Advanced Biochemistry (p. 1564)
  - Advanced Chemistry (p. 1565)
- Chemistry (p. 1561)
  Track Two Options:
  - Biochemistry (p. 1565)
  - Business (p. 1565)
  - Chemistry Education (p. 1566)
  - Chemical Engineering (p. 1566)
  - Environmental Chemistry (p. 1567)
  - Forensic Science (p. 1567)
  - Materials Science (p. 1568)
  - Pre-Medicine (p. 1568)

Minor

- Chemistry (p. 1561)

Graduate Programs

Major

- Chemistry (p. 1560)

Minor

- Chemistry (p. 1561)

Faculty

Professors
- Carter, Evans, Gable, Ingle, Keszler, Kong, Lerner, Loveland, Maier, Nibler, Nyman, Remcho, Simonich, Subramanian, White

Associate Professors
- Beaudry, Blakemore, Cheong, Fang, Ji

Assistant Professors
- Koley, Loesgen, Stylianou

Senior Instructors
- Haak, Myles, Nafshun, Pastorek, Walker

Senior Instructors
- Barth, Gautschi (Cascades), Sleszynski, Weiss

Instructors
- Knutson, Siler, Wojcinski, Geddes (Cascades), Towne (Cascades)

Professors of Practice
- Giordan

Adjunct Faculty

- Beckman, Cann, Field, Herman, Mahmud, McPhear, Mehl, Paulenova, Philmus, Qiu, Tate, Zabriskie

CH 101, FOUNDATIONAL SKILLS FOR GENERAL CHEMISTRY, 3 Credits

Provides some extra preparation for students before enrolling in a general chemistry course. Emphasizes the skills required to be successful in general chemistry and the use of those skills in the context of chemistry concepts.

Prerequisite: Math Placement - ALEKS with a score of 046 or MTH 095 (may be taken concurrently) with C- or better or MTH 103 (may be taken concurrently) with C- or better or MTH 105 (may be taken concurrently) with C- or better or MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 241 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 228 (may be taken concurrently) with C- or better

CH 110, *ROYGBIV: THE CHEMISTRY OF COLORS, 4 Credits

An introduction to the concepts of chemistry and the importance of these concepts in understanding color. Lec/lab.

Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

CH 121, GENERAL CHEMISTRY, 5 Credits

A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122, CH 123 are Bacc Core Courses)

Equivalent to: CH 104
Available via Ecampus

CH 122, *GENERAL CHEMISTRY, 5 Credits

A general chemistry sequence intended for majors in fields other than the physical sciences. Lec/lab/rec. (CH 122 and CH 123 are Bacc Core courses.)

Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 121 with C- or better or (CH 201 with C- or better or (CH 231 with C- or better or CH 231H with C- or better))
Available via Ecampus

CH 123, *GENERAL CHEMISTRY, 5 Credits

A general chemistry sequence intended for majors in fields other than the physical sciences. (CH 122 and CH 123 are Bacc Core courses.) Lec/rec/lab.

Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 122 with C- or better or ((CH 232 with C- or better or CH 232H with C- or better) and (CH 262 [C-] or CH 262H [C-] or CH 272 [C-]) or (CH 202 [C-] and CH 205 [C-]))
Available via Ecampus

CH 124, GENERAL CHEMISTRY, 3 Credits

A bridge course, allowing students who have taken one term of General Chemistry (CH 121) to complete the equivalent of one full semester of general chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab.

Prerequisite: CH 121 with D- or better
CH 125, GENERAL CHEMISTRY, 2 Credits
A bridge course, allowing students who also take one term of General Chemistry (CH 123) to complete the equivalent of one full semester of General Chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab. Offered via Ecampus only.
Prerequisite: CH 121 with D- or better and CH 124 [D-]
Recommended: One semester of general chemistry at another institution

CH 130, GENERAL CHEMISTRY OF LIVING SYSTEMS, 4 Credits
Introduction to organic chemistry and the chemistry of biological systems. Organic nomenclature and fundamental reactions, emphasizing topics such as amino acids, proteins, biochemical energy, and nucleic acids (DNA and RNA). Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Lec/lab. Does not count toward a chemistry minor.
Available via Ecampus

CH 140, GENERAL, ORGANIC, AND BIOLOGICAL CHEMISTRY, 6 Credits
An introduction to general, organic, and biological chemistry. Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Offered via Ecampus only.
Recommended: Entering students should have a working knowledge of high school algebra, logarithms, and scientific notation
Available via Ecampus

CH 199, SPECIAL TOPICS, 1-3 Credits
This course is repeatable for 3 credits.

CH 201, CHEMISTRY FOR ENGINEERING MAJORS, 3 Credits
A sequence of selected chemistry topics for pre-engineering students. Lec.
Prerequisite: MTH 111 (may be taken concurrently) with D- or better or MTH 112 (may be taken concurrently) with D- or better or MTH 251 (may be taken concurrently) with D- or better or MTH 252 (may be taken concurrently) with D- or better or MTH 251H (may be taken concurrently) with D- or better or MTH 252H (may be taken concurrently) with D- or better or MTH 254H (may be taken concurrently) with D- or better or Math Placement - ALEKS with a score of 060
Available via Ecampus

CH 202, CHEMISTRY FOR ENGINEERING MAJORS, 3 Credits
A sequence of selected chemistry topics for pre-engineering students. Lec.
Prerequisite: CH 121 with C- or better or CH 201 with C- or better or CH 231 with C- or better or CH 231H with C- or better
Available via Ecampus

CH 205, LABORATORY FOR CH 202, 1 Credit
Three-hour weekly session for the development of laboratory skills in general chemistry for engineers. Lec/lab.
Prerequisite: CH 202 (may be taken concurrently) with D- or better

CH 211, RECITATION FOR CHEMISTRY 201, 1 Credit
80-minute weekly session for the development of problem-solving skills in general chemistry for engineers. Rec.
Corequisites: CH 201

CH 212, RECITATION FOR CHEMISTRY 202, 1 Credit
One-hour weekly session for the development of problem-solving skills in general chemistry for engineers. Rec.
Corequisites: CH 202

CH 220, CAREERS IN CHEMISTRY, 1 Credit
Course for chemistry majors that discusses strategies for success in the study of chemistry and the varied career opportunities available. Topics range from surviving freshman chemistry to choices of advanced classes, study abroad opportunities, internships, getting into and succeeding in graduate school, choices of chemical careers in academia, industry, government, non-governmental organizations, and using chemistry as a foundation for careers in other areas such as law and business. Graded P/N.

CH 231, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231 is a lecture course; CH 261 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 254H (may be taken concurrently) with C- or better or Math Placement - ALEKS with a score of 060
Equivalent to: CH 221, CH 221H, CH 224H, CH 231H
Available via Ecampus

CH 231H, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231H is a lecture course; CH 261H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisite: MTH 111 (may be taken concurrently) with C- or better or MTH 112 (may be taken concurrently) with C- or better or MTH 251 (may be taken concurrently) with C- or better or MTH 251H (may be taken concurrently) with C- or better or MTH 252 (may be taken concurrently) with C- or better or MTH 252H (may be taken concurrently) with C- or better or MTH 254H (may be taken concurrently) with C- or better or Math Placement - ALEKS with a score of 060
Equivalent to: CH 231
CH 232, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pre-pharmacy, and chemical engineering. CH 232 is a lecture course; CH 262 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: (CH 231 with C- or better or CH 231H with C- or better) or CH 221 with C- or better
Equivalent to: CH 222, CH 225H, CH 232H
Available via Ecampus

CH 232H, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pre-pharmacy, and chemical engineering. CH 232H is a lecture course; CH 262H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisite: (CH 231 with C- or better or CH 231H with C- or better) or CH 221 with C- or better
Equivalent to: CH 232

CH 233, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233 is a lecture course; CH 263 is the laboratory component. (Bacc Core Course if taken with CH 263)
Attributes: CPPL – Core, Pers, PhySci Attached Lec
Prerequisite: (CH 232 with C- or better or CH 232H with C- or better) or CH 222 with C- or better
Equivalent to: CH 223, CH 226H, CH 233H
Available via Ecampus

CH 233H, GENERAL CHEMISTRY, 4 Credits
A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233H is a lecture course; CH 263H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263H)
Attributes: CPPL – Core, Pers, PhySci Attached Lec; HNRS – Honors Course Designator
Prerequisite: (CH 232 with C- or better or CH 232H with C- or better) or CH 222 with C- or better
Equivalent to: CH 232

CH 261, *LABORATORY FOR CHEMISTRY
231, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231)
Attributes: CPPS – Core, Pers, Physical Science
Corequisites: CH 231
Equivalent to: CH 261H, CH 271

CH 261H, *LABORATORY FOR CHEMISTRY
231H, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Corequisites: CH 231H
Equivalent to: CH 261

CH 262, *LABORATORY FOR CHEMISTRY
232, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 261 with D- or better or CH 261H with D- or better or CH 271 with D- or better or CH 221 with D- or better or CH 222H with D- or better
Corequisites: CH 232
Equivalent to: CH 262H, CH 272

CH 262H, *LABORATORY FOR CHEMISTRY
232H, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232H)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 261 with D- or better or CH 261H with D- or better or CH 271 with D- or better or CH 221 with D- or better or CH 222H with D- or better
Corequisites: CH 232
Equivalent to: CH 262

CH 263, *LABORATORY FOR CHEMISTRY
233, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better or CH 222 with D- or better or CH 223H with D- or better
Corequisites: CH 233
Equivalent to: CH 263H, CH 273
CH 263H, *LABORATORY FOR CHEMISTRY 233H, 1 Credit
A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233H)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisite: CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233H
Equivalent to: CH 263

CH 271, *LABORATORY FOR CH 231 FOR CHEMISTRY MAJORS, 1 Credit
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 231)
Attributes: CPPS – Core, Pers, Physical Science
Corequisites: CH 231
Equivalent to: CH 271H

CH 272, *LABORATORY FOR CH 232 FOR CHEMISTRY MAJORS, 1 Credit
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 232)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 271 with D- or better or CH 221 with D- or better or CH 224H with D- or better
Corequisites: CH 232
Equivalent to: CH 272H

CH 273, *LABORATORY FOR CH 233 FOR CHEMISTRY MAJORS, 1 Credit
A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 233)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: CH 272 with D- or better or CH 222 with D- or better or CH 225H with D- or better
Corequisites: CH 233
Equivalent to: CH 273H

CH 324, QUANTITATIVE ANALYSIS, 4 Credits
A basic course in modern chemical analysis. Self-paced laboratory. CH 130 does not meet the prerequisites for this course.
Prerequisite: CH 123 with D- or better or CH 223 with D- or better or CH 226H with D- or better or ((CH 233 with D- or better or CH 233H with D- or better) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-]))
Recommended: One year of general chemistry

CH 331, ORGANIC CHEMISTRY, 4 Credits
Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec.
Prerequisite: CH 331 with C- or better
Recommended: One year of general chemistry
Available via Ecampus

CH 332, ORGANIC CHEMISTRY, 4 Credits
Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec.
Prerequisite: CH 331 with C- or better
Recommended: One year of general chemistry
Available via Ecampus

CH 334, ORGANIC CHEMISTRY, 3 Credits
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisite: CH 123 with D- or better or CH 223 with D- or better or CH 226H with D- or better or ((CH 233 with D- or better or CH 233H with D- or better) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-]))
Recommended: One year of general chemistry

CH 335, ORGANIC CHEMISTRY, 3 Credits
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisite: CH 334 with D- or better
Recommended: One year of general chemistry

CH 336, ORGANIC CHEMISTRY, 3 Credits
Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches.
Prerequisite: CH 335 with D- or better
Recommended: One year of general chemistry

CH 337, ORGANIC CHEMISTRY LABORATORY, 4 Credits
Laboratory course in organic chemistry for nonmajors, designed to supplement CH 331, CH 332 and CH 334, CH 335, CH 336. Lec/lab.
Prerequisite: (CH 331 with D- or better and CH 332 [D-]) or (CH 334 [D-] and CH 335 [D-] and CH 336 [D-])
Available via Ecampus

CH 361, EXPERIMENTAL CHEMISTRY I, 3 Credits
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Prerequisite: (CH 221 with D- or better and CH 222 [D-] and CH 223 [D-]) or (CH 224H [D-] and CH 225H [D-] and CH 226H [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233H [D-]) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-])) and (MTH 251 (may be taken concurrently) [D-] or MTH 251H (may be taken concurrently) [D-] and (PH 201 (may be taken concurrently) [D-] or PH 211 (may be taken concurrently) [D-] or PH 211H (may be taken concurrently) [D-] and CH 334 (may be taken concurrently) [D-])
Equivalent to: CH 361H
CH 361H, EXPERIMENTAL CHEMISTRY I, 3 Credits
First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: (CH 221 with D- or better and CH 222 [D-] and CH 223 [D-]) or (CH 224H [D-] and CH 225H [D-] and CH 226H [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233H [D-]) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-]) and (MTH 251 (may be taken concurrently) [D-] or MTH 251H (may be taken concurrently) [D-]) and (PH 201 (may be taken concurrently) [D-]) or PH 211H (may be taken concurrently) [D-] and CH 334 (may be taken concurrently) [D-])
Equivalent to: CH 361

CH 362, EXPERIMENTAL CHEMISTRY I, 3 Credits
First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, and organic physical chemistry. Lec/lab.
Prerequisite: (CH 361 with D- or better or CH 361H with D- or better) and CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362H

CH 362H, EXPERIMENTAL CHEMISTRY I, 3 Credits
First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, and organic physical chemistry. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: (CH 361 with D- or better or CH 361H with D- or better) and CH 335 (may be taken concurrently) [D-]
Equivalent to: CH 362

CH 374, *TECHNOLOGY, ENERGY, AND RISK, 3 Credits
Decision-making in a technical, democratic society. Discussion of current issues such as acid rain, toxic organic chemicals in the environment, energy resources, etc. Does not meet the prerequisite for any other chemistry course. Does not meet requirements for chemistry minor. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Completion of Bacc Core in physical science

CH 390, ENVIRONMENTAL CHEMISTRY, 3 Credits
Sources, reactions, transport, effects, and fates of chemical species in water, soil, air, and living environments and the effects of technology thereon.
Prerequisite: CH 331 with D- or better or CH 334 with D- or better
Available via Ecampus

CH 399, SPECIAL TOPICS, 1-16 Credits
Discussion of special topics in chemistry.
This course is repeatable for 99 credits.
Recommended: Completion of Bacc Core in the physical sciences

CH 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CH 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CH 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CH 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CH 407, SEMINAR, 1-16 Credits
Equivalent to: CH 407H
This course is repeatable for 16 credits.

CH 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CH 407
This course is repeatable for 16 credits.

CH 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CH 411, INORGANIC CHEMISTRY, 3 Credits
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, and metal-ligand complexes.
Recommended: One year of general chemistry and college-level physics
Available via Ecampus

CH 412, INORGANIC CHEMISTRY, 3 Credits
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry.
Prerequisite: CH 411 with D- or better

CH 418, NUCLEAR CHEMISTRY, 3 Credits
Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation.
Recommended: Concurrent enrollment in (CH 440 or CH 540) or PH 314

CH 421, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data.
Recommended: One year of general chemistry and one year of college physics. Concurrent enrollment in CH 440 or CH 540
CH 422, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data.
Recommended: One year of general chemistry and one year of college physics. Concurrent enrollment in CH 441 or CH 541

CH 424, BIOANALYTICAL CHEMISTRY, 3 Credits
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Not offered every year.
Recommended: One year of organic chemistry and one term of organic chemistry laboratory.

CH 435, STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS, 3 Credits
Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules.
Prerequisite: CH 336 with D- or better and (CH 442 [D-] or CH 542 [D-])

CH 440, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisite: MTH 254 with D- or better or MTH 254H with D- or better
Recommended: One year of general chemistry and one year of college physics
Available via Ecampus

CH 441, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisite: (CH 440 with C- or better or CHE 311 with C- or better) and (MTH 254 [C-] or MTH 254H [C-])
Available via Ecampus

CH 442, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Prerequisite: (MTH 254 with D- or better or MTH 254H with D- or better) and CH 441 [D-]
Recommended: One year of general chemistry and one year of college physics

CH 450, INTRODUCTORY QUANTUM CHEMISTRY, 3 Credits
Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year.
Prerequisite: CH 442 with D- or better or CH 542 with D- or better
Recommended: One year college physics

CH 461, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab.
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken concurrently) [D-]
Equivalent to: CH 461H

CH 461H, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic and physical chemistry. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 421 (may be taken concurrently) [D-] and CH 440 (may be taken concurrently) [D-]
Equivalent to: CH 461

CH 462, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-])
Equivalent to: CH 462H
Recommended: CH 422

CH 462H, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 441 (may be taken concurrently) [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-])
Equivalent to: CH 462

CH 463, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-]) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 463H
CH 463H, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-]) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 463

CH 464, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464H
Recommended: CH 461 or CH 461H or CH 324

CH 464H, EXPERIMENTAL CHEMISTRY II, 3 Credits
Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (CH 362 with D- or better or CH 362H with D- or better) and CH 442 (may be taken concurrently) [D-]
Equivalent to: CH 464
Recommended: CH 461 or CH 461H or CH 324

CH 470, FOUNDATIONS OF INNOVATION, 2 Credits
Learn the basic language and the initial skill set needed to address how scientific ideas and research results become innovations – solutions that address societal and market needs. Acquire the skills to become innovators and to create value for all types of academic, small-company, industrial, governmental, and non-profit research and development organizations. Students work in areas aligned with their scientific interests either individually or in a team. CROSSLISTED as CH 470/SCI 470 and CH 570/SCI 570.
Equivalent to: SCI 470
Recommended: Science and engineering majors

CH 471, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies.
Prerequisite: CH 336 with D- or better or CH 337 with D- or better

CH 490, COMPUTER PROGRAMMING FOR SCIENTISTS, 3 Credits
Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry.
Prerequisite: MTH 252 with D- or better or MTH 252H with D- or better

CH 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

CH 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CH 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CH 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CH 507, SEMINAR, 1-16 Credits
Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. Graded P/N.
This course is repeatable for 16 credits.

CH 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CH 511, INORGANIC CHEMISTRY, 4 Credits
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, metal-ligand complexes, sol-gel chemistry and nanochemistry.
Recommended: CH 442 or CH 542

CH 512, INORGANIC CHEMISTRY, 4 Credits
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry.
Prerequisite: CH 511 with C or better

CH 513, SOLID STATE CHEMISTRY, 3-4 Credits
Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature.
This course is repeatable for 4 credits.
Recommended: CH 442 or CH 542
CH 516, RADIOCHEMISTRY, 4 Credits
Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. CROSSLISTED as CH 516/NSE 516.
Prerequisite: NE 531 with C or better or (RHP 531 with C or better and RHP 536 [C])
Equivalent to: CHE 516, NE 516, NSE 516, RHP 516
This course is repeatable for 12 credits.

CH 518, NUCLEAR CHEMISTRY, 3 Credits
Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation.
Recommended: Concurrent enrollment in (CH 440 or CH 540) or PH 314

CH 521, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data.
Recommended: One year of college chemistry and physics. Concurrent enrollment in CH 540

CH 522, ANALYTICAL CHEMISTRY, 3 Credits
A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data.
Recommended: One year of college chemistry and physics. Concurrent enrollment in CH 541

CH 524, BIOANALYTICAL CHEMISTRY, 3 Credits
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year.
Equivalent to: VM 524, VMB 524
Recommended: One year of organic chemistry and one term of organic chemistry laboratory.

CH 535, STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS, 3 Credits
Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules.
Recommended: CH 336 and (CH 442 or CH 542)

CH 540, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Recommended: MTH 254 and one year of college chemistry and one year of college physics

CH 541, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Recommended: (CH 440 or CHE 311) AND (MTH 254 or MTH 254H)

CH 542, PHYSICAL CHEMISTRY, 3 Credits
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy.
Recommended: CH 541

CH 550, INTRODUCTORY QUANTUM CHEMISTRY, 3 Credits
Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year.
Prerequisite: CH 542 with C or better
Recommended: One year college physics

CH 553, CHEMICAL THERMODYNAMICS, 3 Credits
The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena, and magnetic systems. Not offered every year.
Recommended: CH 542

CH 570, FOUNDATIONS OF INNOVATION, 2 Credits
Learn the basic language and the initial skill set needed to address how scientific ideas and research results become innovations – solutions that address societal and market needs. Acquire the skills to become innovators and to create value for all types of academic, small-company, industrial, governmental, and non-profit research and development organizations. Students work in areas aligned with their scientific interests either individually or in a team. CROSSLISTED as CH 470/SCI 470 and CH 570/SCI 570.
Equivalent to: SCI 570

CH 571, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies.
Recommended: CH 336 or CH 337
CH 582, CHEMISTRY AND MATERIALS OF BATTERIES AND SUPER CAPACITORS, 3 Credits
Examines the chemistry and materials currently in use and proposed for future primary and secondary batteries and supercapacitors. After a brief historical review, we will examine in detail the state-of-the-art technologies including lithium-ion, lithium, and sodium-sulfur batteries and electrochemical double-layer capacitors, and future technologies such as metal-air and lithium-sulfur. Class discussions will focus on structure/performance relationships and other issues such as environmental impact, safety and cost. Offered via Ecampus only. Recommended: Full year of general chemistry, college-level physics and materials science background

CH 584, INSTRUMENTS AND ONLINE INTERACTIONS IN THE SCIENCES, 3 Credits
Examine methods and technologies for and incorporating virtual instruments and online interactions into laboratory courses to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in science. Recommended: Basic computer literacy and one year of general chemistry, physics or biology Available via Ecampus

CH 590, COMPUTER PROGRAMMING FOR SCIENTISTS, 3 Credits
Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry. Recommended: MTH 252

CH 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CH 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CH 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CH 607, SEMINAR, 1-16 Credits
Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. This course is repeatable for 16 credits.

CH 614, SELECTED TOPICS IN INORGANIC CHEMISTRY, 4 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in fields such as solid state chemistry, theoretical inorganic chemistry, spectroscopy and magnetism, chemistry of coordination compounds, kinetics and mechanisms of inorganic reactions, acid-base theory and reactions in nonaqueous solvents, organometallic chemistry, and chemistry of the less familiar elements. Not offered every year. Equivalent to: CH 514 This course is repeatable for 8 credits. Recommended: CH 413 or CH 513

CH 615, SELECTED TOPICS INORGANIC CHEMISTRY, 4 Credits
Focus is on cutting edge research topics in inorganic materials chemistry, which will evolve from year-to-year to stay up-to-date. Current journal articles, software programs, and lab demonstrations will be utilized. Students will learn both content of a research area, as well as tools used in the practice.

CH 616, CRYSTALLOGRAPHY AND X-RAY DIFFRACTION, 4 Credits
Principles of crystallography and x-ray diffraction as applied to the structural characterization of both single crystals, powders, and thin films. Equivalent to: CH 516 Recommended: At least one upper-level undergraduate inorganic chemistry course

CH 630, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. Equivalent to: CH 530 Recommended: CH 336 and (CH 442 or CH 542)

CH 631, ADVANCED ORGANIC CHEMISTRY, 4 Credits
Carbon-carbon bond forming reactions, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. Equivalent to: CH 531 Recommended: CH 630

CH 632, ADVANCED ORGANIC CHEMISTRY, 3 Credits
Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. Equivalent to: CH 532 Recommended: CH 336 and (CH 442 or CH 542)
CH 633, HYPOTHESIS, EVIDENCE, AND ARGUMENT IN ORGANIC CHEMISTRY, 2 Credits
Immerses the student in the tools of scientific method as applied to current research topics in the chemical literature. The student will perform an extensive review of a modern topic in organic chemistry, prepare a written summary and analysis of this literature review and make a public oral presentation and discussion.
Prerequisite: CH 632 with C or better
This course is repeatable for 4 credits.

CH 636, SELECTED TOPICS IN ORGANIC CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year.
Equivalent to: CH 536
This course is repeatable for 12 credits.

CH 637, SELECTED TOPICS IN ORGANIC CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with advances in organic chemistry, specifically focusing on biosynthesis of natural products and enzyme reaction mechanisms. CH 636, CH 637, CH 638 need not be taken in order.
Equivalent to: CH 537
This course is repeatable for 12 credits.

CH 638, SELECTED TOPICS IN ORGANIC CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year.
Equivalent to: CH 538
This course is repeatable for 12 credits.

CH 651, QUANTUM MECHANICS OF ATOMS AND MOLECULES, 3 Credits
Not offered every year.
Equivalent to: CH 551
Recommended: CH 450 or CH 550

CH 652, QUANTUM MECHANICS OF MOLECULAR SPECTROSCOPY, 3 Credits
Not offered every year.
Equivalent to: CH 552
Recommended: CH 651

CH 660, SPECTROCHEMICAL ANALYSIS, 3 Credits
Theoretical concepts and methodology of optical spectrochemical methods of analysis, components of spectrometers, flame and electrothermal atomic spectrophotometry, ICP atomic emission spectrometry, molecular absorption and fluorescence spectrometry.
Equivalent to: CH 560
Recommended: CH 442 or CH 542

CH 661, SEPARATIONS: CHROMATOGRAPHY AND RELATED METHODS, 4 Credits
Theory, instrumentation, and practice of modern separation techniques (gas chromatography, liquid chromatography, electrokinetic separations) and sample preparation methods; handling and interpretation of chromatographic and electrophoretic data.
Equivalent to: CH 561
Recommended: CH 440 or CH 540

CH 662, ANALYTICAL ELECTROCHEMISTRY, 4 Credits
Study of current, voltage and time relationships in electrochemical cells. Offered alternate years.
Equivalent to: CH 562
Recommended: CH 442

CH 680, SELECTED TOPICS IN PHYSICAL CHEMISTRY, 3 Credits
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure dynamics determination (UV-visible, near-IR light sources, x-ray, electron and neutron diffraction), spectroscopy (ultrafast, nonlinear, multidimensional, multiphoton, magnetic resonance, photoelectron), physical chemistry of condensed phase systems (biomolecules, aqueous solution, novel materials, ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules, structural dynamics of complex systems. Need not be taken in order. Not offered every year.
Prerequisite: CH 550 with B- or better
Equivalent to: CH 580
This course is repeatable for 12 credits.

CH 681, SELECTED TOPICS IN PHYSICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year.
Equivalent to: CH 581
This course is repeatable for 12 credits.
CH 682, SELECTED TOPICS IN PHYSICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Mössbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year.
Equivalent to: CH 582
This course is repeatable for 12 credits.

CH 683, SELECTED TOPICS IN ANALYTICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
Equivalent to: CH 583
This course is repeatable for 12 credits.

CH 684, SELECTED TOPICS IN ANALYTICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
Equivalent to: CH 584
This course is repeatable for 12 credits.

CH 685, SELECTED TOPICS IN ANALYTICAL CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year.
Equivalent to: CH 585
This course is repeatable for 12 credits.

CH 686, SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
Equivalent to: CH 586
This course is repeatable for 12 credits.

CH 687, SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
Equivalent to: CH 587
This course is repeatable for 12 credits.

CH 688, SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY, 2 Credits
Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year.
Equivalent to: CH 588
This course is repeatable for 12 credits.

CH 692, ENVIRONMENTAL TRANSFORMATION OF ORGANIC COMPOUNDS, 3 Credits
Chemical, photochemical, and biological transformation reactions of organic compounds in the environment. Test methods and predictive models for determining the persistence of organic compounds in the environment. Offered alternate years.
Recommended: CH 336 and CH 440

CH 697, MASS SPECTROMETRY OF ORGANIC COMPOUNDS, 4 Credits
Physical principles of mass spectrometric instrumentation and interpretation of the mass spectra of organic compounds and biomolecules. Not offered every year.
Equivalent to: TOX 637

Chemistry Graduate Major (MA, MS, PhD)
Graduate Areas of Concentration
Analytical chemistry, inorganic chemistry, materials chemistry, nuclear chemistry, organic chemistry, physical chemistry

The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in Chemistry with concentrations in analytical chemistry, inorganic chemistry, nuclear chemistry, organic chemistry, physical chemistry and solid state chemistry.

All students are required, early in their graduate study, to take a series of graduate courses in their major area. For the PhD, the required written preliminary examinations take the form of a number of ‘cumulative examinations.’ Exceptions to this include the concentration in nuclear chemistry, which requires only a single written examination, and concentrations in inorganic chemistry, solid state chemistry or physical chemistry, which require only an oral exam. For each field, there is a list of courses representing subject matter in which competence is required of those electing that field for PhD work, but the major emphasis of the PhD program is on research rather than formal courses. All degrees require a research thesis except for the Master of Science nonthesis degree. There is no departmental requirement of a foreign language. Most graduate students in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

Major Code: 5200
Major Code: 5200
Chemistry Undergraduate Major (BA, BS, HBA, HBS)

This major offers the following option(s):

- Advanced Biochemistry (p. 1564)
- Advanced Chemistry (p. 1565)
- Biochemistry (p. 1565)
- Business (p. 1565)
- Chemical Engineering (p. 1566)
- Chemistry Education (p. 1566)
- Environmental Chemistry (p. 1567)
- Forensic Science (p. 1567)
- Materials Science (p. 1568)
- Pre-Medicine (p. 1568)

BS Degree in Chemistry

The BS degree in Chemistry features two tracks, each with a chemistry core and a selection of accompanying options. Students in either track or any option with good academic records and letters of recommendation will be well prepared and competitive for continued graduate education in chemistry or related areas.

- **Track One** is well suited for students intending to pursue a graduate degree in chemistry or a closely related area. It provides the most rigorous and complete chemistry background and the most extensive laboratory experience. The curriculum is approved by the American Chemical Society (ACS) and has two options: advanced biochemistry and advanced chemistry. Both options include 6–12 credits of career-supportive electives (CSE) in advanced chemistry or related disciplines. These CSE courses are approved by the advisor and are intended to strengthen the student’s background in areas related to career goals. Students choosing the advanced chemistry option must take at least 3 credits in advanced laboratory courses or research. Track-One graduates are eligible for ACS certification by the department chair and can become full members of the ACS without the requirement of work experience.

- **Track Two** is suited for chemistry majors who want to gain extensive experience in a secondary area, target a particular career direction or continue with graduate education in chemistry or related areas. **Track Two options include biochemistry, business, chemistry education, chemical engineering, environmental chemistry, forensic science, materials science, and pre-medicine.** The multidisciplinary approach of Track Two enhances preparation and opportunities for employment in electronics, polymers, or biotechnology (the biochemistry, chemical engineering, or materials science options), for careers in environmental science (environmental chemistry option), work in crime labs (forensic science option), or teaching in high schools (chemistry education option). The Track Two curriculum is not approved by the American Chemical Society. It consists of a core of chemistry courses (79–81 credits) and a combination of 8 to 11 courses (30–37 credits) that defines each option.

BA Degree in Chemistry

The BA degree in Chemistry is appropriate for chemistry students interested in obtaining a broader academic background through a second-language requirement and additional liberal arts courses (9 credits). It also includes 6–12 credits of approved career-supportive electives to allow students to choose courses in advanced chemistry or
related disciplines to support their career goals. At least 3 credits are to be in advanced laboratory courses or research. This degree may lead to international opportunities, especially if coupled with the International Degree Program at OSU.

Major Code: 520

• Recall, integrate, and apply essential core information about the key components of Chemistry.
• Demonstrate competency in basic laboratory techniques, laboratory safety, chemical synthesis, and measurement of chemical properties and phenomena.
• Communicate ideas effectively orally and in writing.
• Demonstrate the ability to analyze data, access information and integrate information from various sources in order to solve problems.

All Undergraduate Chemistry Degrees

Completion of an option is required to earn a degree in Chemistry.

The baccalaureate core requirements are met by:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HHS 231</td>

<td>37-38</td>
</tr>
</tbody>
</table>

The quarters in which these are taken are flexible, except that synthesis courses must be taken at the junior and senior level. Chemistry majors or minors may not use S/U grading in courses that meet Department of Chemistry or College of Science requirements.

The timing of courses for all degrees and options can be critical, especially because of prerequisites. More detailed information and suggestions about when to take courses are found on the Chemistry Department website (http://chemistry.oregonstate.edu/). Students should meet with their advisor every term. For many options in Track Two, students will also be directed to an additional advisor in another department for courses in that option.

For any option involving biochemistry courses, it is strongly recommended that students select BB 314 and BI 221 (as the biology course to fulfill the baccalaureate core requirement).

For options in which CH 462 is the recommended WIC course, it is strongly recommended that CH 422 be taken as a corequisite.

Chemistry offers the following courses through the Honors College (HC). Chemistry students in the HC may substitute these courses for courses in the regular sequences:

Advanced Biochemistry Option

This option is offered within the following major(s):

- Chemistry · College of Science (p. 1561)

This track-one option leads to a degree approved by the American Chemical Society. It is designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. It provides a rigorous chemistry foundation with extensive laboratory experience. The mix of advanced courses in the option...
is modified to emphasize biochemistry principles and laboratory techniques.

**Career-supportive electives (CSE) 1**

Total Credits: **30**

^ Writing Intensive Course (WIC)

1 Courses approved by the advisor by the end of the winter quarter of the junior year

**Advanced Chemistry Option**

**This option is offered within the following major(s):**

• Chemistry - College of Science (p. 1561)

This track-one option leads to a degree approved by the American Chemical Society. Designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. This provides the most rigorous and complete chemistry foundation with the most extensive laboratory experience. Undergraduate research is strongly encouraged. Knowledge and skills are developed in organic, analytical, physical and inorganic chemistry. Six advanced laboratory courses are required. Students have a choice of electives that support their career goals.

**Option Code: 521**

**Biochemistry Option**

This option is offered within the following major(s):

• Chemistry - College of Science (p. 1561)

The Biochemistry option is for students interested in working in biotechnology areas. Students can earn a BS degree in Chemistry in four years while targeting a career direction in biotechnology or preparing for graduate studies in chemistry. This option includes nine courses in biology, biochemistry including lab, and genetics and molecular biology.

The Biochemistry option is designed for the Track-Two BS degree in Chemistry.

**Option Code: 518**

**Advanced Chemistry Option**

**This option is offered within the following major(s):**

The Biochemistry option is for students interested in working in biotechnology areas. Students can earn a BS degree in Chemistry in four years while targeting a career direction in biotechnology or preparing for graduate studies in chemistry. This option includes nine courses in biology, biochemistry including lab, and genetics and molecular biology.

The Biochemistry option is designed for the Track-Two BS degree in Chemistry.

**Option Code: 518**

**Business Option**

This option is offered within the following major(s):

• Chemistry - College of Science (p. 1561)

The Business option is designed for chemists interested in, for example, opening a small business, working in sales and marketing, or as preparation for entering the MBA program at OSU. Students earn a BS degree in Chemistry in four years and can also fulfill course work required as part of the minor in Business and Entrepreneurship. This option is also a good stepping stone for law school or graduate studies in chemistry. The option includes six courses in accounting, law, finance, organizational systems.
The Chemical Engineering option is designed for the Track-Two BS degree in Chemistry. This option includes nine courses in basic engineering and chemical engineering including mass and fluid transport, reaction engineering, and separations processes.

The Chemical Engineering option is designed for the Track-Two BS degree in Chemistry.

Option Code: 523

Chemical Engineering Option

This option is offered within the following major(s):

• Chemistry - College of Science (p. 1561)

The Chemical Engineering option offers selected chemical engineering concepts that may enhance career opportunities in areas such as electronics, polymers, and biotechnology, or prepare students for graduate studies in chemistry or related fields. Students can earn a BS degree in Chemistry in four years while targeting a career direction. This option includes nine courses in basic engineering and chemical engineering including mass and fluid transport, reaction engineering, and separations processes.

The Chemical Engineering option is designed for the Track-Two BS degree in Chemistry.

Option Code: 303

The track-two core requirements are slightly modified for the Chemical Engineering option:

Chemistry Education Option

This option is offered within the following major(s):

• Chemistry - College of Science (p. 1561)

The Chemistry Education option is directed at students planning to teach high school chemistry or continuing on with graduate education and teaching careers at community colleges. Students can earn a BS degree in Chemistry in four years and obtain experience that can be useful when applying for the Master of Science in Science Education from OSU. This option includes 11 courses covering teaching methods, a secondary area, and undergraduate teaching internship and seminar in chemistry.

The Chemistry Education option is designed for the Track-Two BS degree in Chemistry.

Total Credits 35-41

* Baccalaureate Core Course (BCC)

Option Code: 505

Forensic Science Option

This option is offered within the following major(s):

- Chemistry - College of Science (p. 1561)

The Forensic Science option is appropriate for students interested in working in a crime lab or pursuing a graduate degree in forensic science or chemistry. Students can earn a BS degree in Chemistry in four years and also take a combination of courses that enhance a chemistry major’s background in biology, biochemistry, and related areas that can be important in forensic science.

The Forensic Science option is designed for the Track-Two BS degree in Chemistry.

**Option Code: 505**

The track-two core requirements are slightly modified for the Forensic Science option as follows:

**Required for Core:**

Replace CH 324 with:

- CH 421 ANALYTICAL CHEMISTRY
- CH 422 ANALYTICAL CHEMISTRY
- CH 461 EXPERIMENTAL CHEMISTRY II

Only one term of inorganic chemistry:

- CH 411 INORGANIC CHEMISTRY
- or CH 412 INORGANIC CHEMISTRY

Materials Science Option

This option is offered within the following major(s):

• Chemistry - College of Science (p. 1561)

The Materials Science option is customized to include applied courses in a variety of materials areas to enhance career opportunities in, for example, electronics, polymers and biotechnology. Students can earn a BS degree in Chemistry in four years while targeting a career in this field or preparing for graduate school in chemistry or related areas.

The Materials Science option is designed for the Track-Two BS degree in Chemistry.

Option Code: 522

The track-two core requirements are slightly modified for the Materials Science option:

Pre-Medicine Option

This option is offered within the following major(s):

• Chemistry - College of Science (p. 1561)

The Pre-Medicine option is directed at students planning to apply to medical or dental school who also wish to target chemistry as a career pathway. A degree in chemistry provides a strong foundation for many professions and postgraduate degrees in chemistry or related areas. Students can earn a BS degree in Chemistry in four years while also taking Pre-Medicine option courses in biology, biochemistry, and related areas that are important components for application to medical school.

The Pre-Medicine option is designed for the Track-Two BS degree in Chemistry.

Option Code: 690

Mathematics

The department offers programs leading to the BS, MA, MS, and PhD degrees in Mathematics. Undergraduate minors are offered in Mathematics and Actuarial Science.

Students interested in teaching mathematics at the secondary level should contact a departmental advisor and discuss the Secondary Teaching Emphasis option available under the Mathematics major. Likewise, students interested in careers in the area of financial mathematics or as actuaries should meet with a member of the departmental Actuarial Sciences Committee.
Additional information pamphlets about both the undergraduate and graduate programs are available on the Department of Mathematics website.

The Mathematics major requirements at the upper division comprise about 45 credits of course work. This leaves about 45 credits of free electives that can be used to design a degree program in mathematics that is tailored to each major's particular interests.

**Undergraduate Programs**

**Major**
- Mathematics (p. 1583)
  - Options:
    - Applied and Computational Mathematics
    - Mathematical Biology
    - Secondary Teaching Emphasis
    - Statistics

**Minors**
- Actuarial Science (p. 1582)
- Mathematics (p. 1583)

**Graduate Programs**

**Major**
- Mathematics (p. 1583)

**Minor**
- Mathematics (p. 1583)

William Bogley, Department Head
368I Kidder Hall
Oregon State University

Email: bill.bogley@oregonstate.edu (enrique.thomann@oregonstate.edu)
Website: http://www.math.oregonstate.edu/

**Faculty**

**Professors** Bogley, Bokil, De Leenheer, Dick, Dray, Escher, Faridani, Finch, Higdon, Kovchegov, Ossiander, Peszynska, Pohjanpelto, Restrepo, Schmidt, Showalter, Swisher, Thomann

**Associate Professors** Beisiegel, Cozzi, Dascaliuc, Gibson, Guo, Lockwood, Petsche

**Assistant Professors** Dalziel

**Adjunct Professors** Batten (ME), Manogue (PH)

**Adjunct Associate Professor** Medlock (VBS), Zhang (ECE)

**MTH 065, ELEMENTARY ALGEBRA, 3 Credits**

Arithmetic of signed numbers, order of operations, simplifying algebraic expressions, solutions of linear equations, and inequalities. Rules of exponents, addition, subtraction, and multiplication of polynomials, factoring, solution of quadratic equations by factoring, reducing rational expressions. Word problems involving linear equations, graphing of linear equations, inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better.

**Prerequisite:** Math Placement Test with a score of 05 or Math Placement - ALEKS with a score of 015

*Available via Ecampus*

**MTH 095, INTERMEDIATE ALGEBRA, 3 Credits**

Addition, subtraction, multiplication, and division of rational expressions, long division of polynomials, solutions of fractional equations, applications involving linear equations. Fractional equations, inequalities, literal equations, and variations. Negative and fractional exponents, radicals, solutions of quadratic equations, and complex numbers. Cartesian coordinates, graphs of linear equations and inequalities, distance formula, slope, equations of lines, solutions of systems of linear equations in two unknowns and inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better.

**Prerequisite:** MTH 065 with C- or better or Math Placement Test with a score of 11 or Math Placement - ALEKS with a score of 030

*Available via Ecampus*

**MTH 102, ALGEBRAIC FOUNDATIONS, 3 Credits**

This course is designed primarily for EOP students. They will use various computing technologies to explore realistic and interesting situations in which algebra is used. As they work through explorations, they will work with many of the fundamental ideas of algebra, ideas they will find important in their daily lives.

**MTH 103, ALGEBRAIC REASONING, 4 Credits**

Graphing data, functions, rate of change, linear equations, systems of linear equations, linear inequalities, linear functions, absolute value functions, quadratic functions, exponential functions. All courses used to satisfy MTH prerequisites must be completed with C- or better.

**Prerequisite:** MTH 065 with C- or better or Math Placement Test with a score of 11 or Math Placement - ALEKS with a score of 030

*Available via Ecampus*

**MTH 105, *INTRODUCTION TO CONTEMPORARY MATHEMATICS, 3 Credits**

Elementary linear programming, combinatorics, descriptive statistics, elementary probability, exponential growth and decay, examples of major mathematical ideas and models. Lec/rec. (Bacc Core Course)

**Attributes:** CSMA - Core, Skills, Math

**Recommended:** MTH 095 or MTH 103 or (MPT=Math Placement Test score of 17; MPAL=Math Placement Test-ALEKS score of 46%)

*Available via Ecampus*
MTH 111, *COLLEGE ALGEBRA, 4 Credits
Polynomial equations and inequalities, polynomial functions and graphs, inverse functions, exponential and logarithmic functions, elementary mathematical modeling and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with a C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 095 with C- or better or MTH 103 with C- or better or Math Placement Test with a score of 17 or Math Placement - ALEKS with a score of 046
Available via Ecampus

MTH 112, *ELEMENTARY FUNCTIONS, 4 Credits
Triangle trigonometry, circular functions and graphs, trigonometric equations and identities, inverse trigonometric functions, polar coordinates, vectors and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 150X
Available via Ecampus

MTH 199, SPECIAL TOPICS, 1-16 Credits
Maximum 3 credits per term, 9 credits total. Does not meet university group requirement in physical science.
This course is repeatable for 9 credits.

MTH 211, *FOUNDATIONS OF ELEMENTARY MATHEMATICS, 4 Credits
Introduction to problem solving, sets, whole numbers, number theory, fractions. Intended primarily for prospective elementary teachers. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 095 with C- or better or MTH 103 with C- or better or MTH 111 with C- or better or MTH 112 with C- or better or Math Placement Test with a score of 17 or Math Placement - ALEKS with a score of 046
Equivalent to: MTH 231H
Available via Ecampus

MTH 212, FOUNDATIONS OF ELEMENTARY MATHEMATICS, 4 Credits
Math 212 is the second of a three-term sequence of courses designed to help prepare prospective elementary and middle school teachers. Topics covered include fractions, decimals, percent, ratio and proportion, integers, rational numbers, real numbers, probability and statistics.
Prerequisite: MTH 211 with C- or better

MTH 227, *CALCULUS AND PROBABILITY FOR THE LIFE SCIENCES I, 4 Credits
Review of exponential and trigonometric functions, including examples of exponential and periodic behavior; discrete probability; examples of biologically motivated difference equations; differentiation of polynomials, exponential and trigonometric functions with applications to optimization. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 75
Equivalent to: MTH 227X

MTH 228, CALCULUS AND PROBABILITY FOR THE LIFE SCIENCES II, 4 Credits
Continuation of MTH 227 with more general population growth models. Antidifferentiation; The Fundamental Theorem of Calculus applied to solving continuous growth models. Continuous random variables. Basic linear algebra of small systems sufficient to calculate eigenvalues and eigenvectors and appreciate their use in life science applications. Lec/rec.
Prerequisite: MTH 227 with C- or better or MTH 227X with C- or better

MTH 231, ELEMENTS OF DISCRETE MATHEMATICS, 4 Credits
Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 231H
Available via Ecampus

MTH 231H, ELEMENTS OF DISCRETE MATHEMATICS, 4 Credits
Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Equivalent to: MTH 231
Available via Ecampus

MTH 241, *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE, 4 Credits
Elementary differential calculus of polynomial, logarithmic, and exponential functions and their applications to business, management and social sciences. Lec/rec. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Available via Ecampus
MTH 245, *MATHEMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES, 4 Credits

Techniques of counting, probability and elements of statistics including binomial and normal distributions. Introductory matrix algebra. Elements of linear programming. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 111 with C- or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 060
Available via Ecampus

MTH 251, *DIFFERENTIAL CALCULUS, 4 Credits

Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with a C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075
Equivalent to: MTH 251H
Available via Ecampus

MTH 251H, *DIFFERENTIAL CALCULUS, 4 Credits

Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course)
Attributes: CSMA – Core, Skills, Math
Prerequisite: MTH 112 with C- or better or MTH 150X with C- or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 075
Equivalent to: MTH 251

MTH 252, INTEGRAL CALCULUS, 4 Credits

Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252H

MTH 252H, INTEGRAL CALCULUS, 4 Credits

Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 251 with C- or better or MTH 251H with C- or better
Equivalent to: MTH 252

MTH 253, INFINITE SERIES AND SEQUENCES, 4 Credits

Indeterminate forms. Improper integrals. Sequences and series, especially Taylor's formula and power series. Applications to numerical estimation with error analysis. Series with complex terms and the Euler identities. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 253H

MTH 254, VECTOR CALCULUS I, 4 Credits

Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254H
Available via Ecampus

MTH 254H, VECTOR CALCULUS I, 4 Credits

Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 254

MTH 255, VECTOR CALCULUS II, 4 Credits

Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255H
MTH 255H, VECTOR CALCULUS II, 4 Credits
Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 255

MTH 256, APPLIED DIFFERENTIAL EQUATIONS, 4 Credits
First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler’s identities is highly desirable.) All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256H
Available via Ecampus

MTH 256H, APPLIED DIFFERENTIAL EQUATIONS, 4 Credits
First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler’s identities is highly desirable.) All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Equivalent to: MTH 256

MTH 264, INTRODUCTION TO MATRIX ALGEBRA, 2 Credits
Introduction to matrix algebra: systematic solution to systems of linear equations; linear transformations; eigenvalue problems.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Available via Ecampus

MTH 264H, INTRODUCTION TO MATRIX ALGEBRA, 2 Credits
Introduction to matrix algebra: systematic solution to systems of linear equations; linear transformations; eigenvalue problems.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better

MTH 265, INTRODUCTION TO SERIES, 2 Credits
Convergence and divergence of numerical series, including geometric series. Series of functions. Power series and their analytic properties. Taylor series expansions and Taylor polynomials.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Available via Ecampus

MTH 265H, INTRODUCTION TO SERIES, 2 Credits
Convergence and divergence of numerical series, including geometric series. Series of functions. Power series and their analytic properties. Taylor series expansions and Taylor polynomials.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 265

MTH 299, SPECIAL TOPICS, 0-16 Credits
Maximum 3 credits per term, 9 credits total. This course is repeatable for 9 credits.

MTH 306, MATRIX AND POWER SERIES METHODS, 4 Credits
Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306H

MTH 306H, MATRIX AND POWER SERIES METHODS, 4 Credits
Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C- or better or MTH 252H with C- or better
Equivalent to: MTH 306

MTH 311, ADVANCED CALCULUS I, 4 Credits
Rigorous development of calculus, axiomatic properties of the real numbers, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 254 with C- or better or MTH 254H with C- or better) and MTH 355 [C-]
MTH 312, ADVANCED CALCULUS II, 4 Credits
Rigorous development of calculus, axiomatic properties of R, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 311 with C- or better

MTH 321, INTRODUCTORY APPLICATIONS OF MATHEMATICAL SOFTWARE, 3 Credits
An introduction to select mathematical software packages to support problem solving and applications. Topics include using computational resources to solve basic numerical and symbolic problems in mathematics, visualization and presentation of data, creation of simple programming scripts, and applications of basic programming techniques to promote mathematical understanding. The scientific typesetting language LaTeX will also be covered. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: MTH 341 with C- or better or (MTH 264 with C- or better or MTH 264H with C- or better) or (MTH 306 with C- or better or MTH 306H with C- or better)

MTH 323, ^MATHEMATICAL MODELING, 3 Credits
A variety of mathematical modeling techniques will be introduced. Students will formulate models in response to practical problems drawn from the literature of ecology, environmental sciences, engineering or other fields. Informal writing assignments in class and formal written presentation of the models will be required. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 333, ^FUNDAMENTAL CONCEPTS OF TOPOLOGY, 3 Credits
Open and closed sets, continuity, compactness, connectedness, winding number, fixed point theorems in the plane. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MTH 341 with C- or better or MTH 355 with C- or better

MTH 338, ^NON-EUCLIDEAN GEOMETRY, 3 Credits
Introduction to non-Euclidean geometries. Selected topics such as hyperbolic and elliptic geometry, spherical geometry, projective geometry, geometries arising from alternative metrics. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MTH 341 (may be taken concurrently) with C- or better

MTH 341, LINEAR ALGEBRA I, 3 Credits
Matrix algebra, determinants, systems of linear equations, subspaces, an introductory study of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 254 with C- or better or MTH 254H with C- or better
Available via Ecampus

MTH 342, LINEAR ALGEBRA II, 4 Credits
Abstract (real or complex) vector spaces, linear transformations, inner product spaces, orthogonality, eigenspaces and diagonalization, spectral theorems, singular value decomposition. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better

MTH 343, INTRODUCTION TO MODERN ALGEBRA, 4 Credits
Introduction to algebraic abstraction, with an emphasis on structures and logical communication by way of proofs. Material includes an introduction to groups, rings and fields. Emphasis is on symmetry groups, the integers as a ring, and polynomial rings; selected applications. Generalizing from examples to mathematical statements, reading proofs, and both creating and editing proofs. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better and MTH 355 [C-]

MTH 351, INTRODUCTION TO NUMERICAL ANALYSIS, 3 Credits
Introduction to the computation of approximate solutions to mathematical problems that cannot be solved by hand: analysis of errors; rootfinding for nonlinear equations in one variable; interpolation of functions; numerical integration. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 253 with C- or better or (MTH 256 with C- or better or MTH 306 with C- or better or MTH 306H with C- or better) and (MTH 264 with C- or better or MTH 264H with C- or better) or (MTH 256 with C- or better or MTH 256H with C- or better) or (MTH 265 with C- or better or MTH 265H with C- or better)
Recommended: Programming experience

MTH 355, DISCRETE MATHEMATICS, 3 Credits
Proof analysis and development in the context of discrete mathematics for math majors transitioning to upper-division course work. Topics include elementary logic and set theory, quantifiers, basic counting principles, elementary combinatorics, equivalence relations, the binomial theorem, and mathematical induction. Additional topics may include recurrence relations, generating functions, and introductory graph theory. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 253 with C- or better
Recommended: MTH 341
MTH 361, INTRODUCTION TO PROBABILITY, 3 Credits
Probability problem solving using concepts developed in calculus. Topics include probability models, discrete and continuous random variables, expectation and variance, the law of large numbers, and the central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 253 with C- or better or (MTH 306 with C- or better or MTH 306H with C- or better) or (MTH 265 with C- or better or MTH 265H with C- or better)
Equivalent to: MTH 361H

MTH 390, FOUNDATIONS OF ELEMENTARY MATHEMATICS, 4 Credits
Math 390 is the third of a three-term sequence of classes designed to help prepare prospective elementary and middle school teachers. Topics covered include informal geometry, measurement, congruence, similarity, coordinate and transformational geometry.
Prerequisite: MTH 211 with C- or better and MTH 212 [C-]

MTH 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: MTH 399H
This course is repeatable for 16 credits.

MTH 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: MTH 399
This course is repeatable for 16 credits.

MTH 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MTH 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

MTH 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MTH 406, PROJECTS, 1-3 Credits
Graded P/N.
This course is repeatable for 16 credits.

MTH 407, SEMINAR, 3 Credits
This course is repeatable for 99 credits.

MTH 410, OCCUPATIONAL INTERNSHIP, 3-12 Credits
Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N.
This course is repeatable for 16 credits.

MTH 411, REAL ANALYSIS, 3 Credits
Properties of metric spaces and normed spaces, including lp spaces. Completeness and applications, including fixed point theorems. Compactness. Equicontinuity and the Arzela-Ascoli theorem. Uniform continuity and uniform convergence, including applications.
Prerequisite: MTH 312 with B+ or better and MTH 341 [B+]
This course is repeatable for 18 credits.

MTH 412, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini’s theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 411 with C- or better or MTH 511 with C- or better
This course is repeatable for 18 credits.

MTH 413, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini’s theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 412 with C- or better or MTH 512 with C- or better
This course is repeatable for 18 credits.

MTH 419, MULTIVARIABLE ADVANCED CALCULUS, 3 Credits
A rigorous development of multivariable advanced calculus, including continuity and compactness in multivariable Euclidean spaces, differentiation and approximation of multivariable functions, the inverse function theorem and the implicit function theorem, integration in several variables.
Prerequisite: MTH 312 with B or better

MTH 420, MODELS AND METHODS OF APPLIED MATHEMATICS, 3 Credits
Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 427, INTRODUCTION TO MATHEMATICAL BIOLOGY, 3 Credits
Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]
MTH 428, STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY, 3 Credits
An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation.
Prerequisite: MTH 341 with C or better and (MTH 361 [C] or MTH 463 [C] or MTH 563 [C])

MTH 430, METRIC SPACES AND TOPOLOGY, 3 Credits
Fundamental notions of metric space topology. Examples of Euclidean, non-Euclidean and other fundamental metric spaces including the Hilbert Cube and two-dimensional surfaces. Characterization and classification results for metric spaces. Selected applications of topology, possibly including the structure of molecules and/or networks. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 311 with C- or better
Recommended: MTH 311

MTH 434, INTRODUCTION TO DIFFERENTIAL GEOMETRY, 3 Credits
Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 255 with C- or better or MTH 255H with C- or better) and MTH 342 [C-]
Recommended: MTH 311

MTH 435, DIFFERENTIAL GEOMETRY, 3 Credits
Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 434 with C- or better or MTH 534 with C- or better

MTH 437, GENERAL RELATIVITY, 3 Credits
Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 434 with C- or better or MTH 534 with C- or better)
Recommended: MTH 311

MTH 440, COMPUTATIONAL NUMBER THEORY, 3 Credits
Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptography. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 231 with C- or better or MTH 343 with C- or better or MTH 355 with C- or better

MTH 441, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 343 with C- or better and (MTH 342 [C-] or MTH 440 [C-] or MTH 540 [C-])

MTH 442, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 441 with C- or better or MTH 541 with C- or better

MTH 443, ABSTRACT LINEAR ALGEBRA, 3 Credits
Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 342 with C- or better or MTH 343 with C- or better

MTH 451, NUMERICAL LINEAR ALGEBRA, 3 Credits
Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better
Recommended: Programming experience, MTH 342 and MTH 351

MTH 452, NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 305 with C- or better or MTH 305H with C- or better) or MTH 341 with C- or better or (MTH 264 with C- or better or MTH 264H with C- or better)) and (MTH 253 [C-] or (MTH 265 [C-] or MTH 265H [C-]))
Recommended: MTH 351 or MTH 451 or MTH 551

MTH 453, NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 452 with C- or better or MTH 552 with C- or better
MTH 463, PROBABILITY I, 3 Credits
An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 311 (may be taken concurrently) with C- or better

MTH 464, PROBABILITY II, 3 Credits
Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 463 with C- or better or MTH 563 with C- or better) and MTH 341 [C-]

MTH 465, PROBABILITY III, 3 Credits
Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 464 with C- or better or MTH 564 with C- or better

MTH 467, ACTUARIAL MATHEMATICS, 3 Credits
Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 463 with C- or better or MTH 563 with C- or better

MTH 480, SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Systems of two first-order differential equations, phase portraits, linearization and the stability of equilibria, conservative systems, reversible systems, limit cycles and the Poincare-Bendixson Theorem. Additional topics selected from Hamiltonian systems, Hopf bifurcation or Lorenz equations and chaos. MTH 480 and MTH 481 cannot both be taken for credit. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and MTH 341 [C-]

MTH 481, APPLIED ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 253 with C- or better or MTH 253H with C- or better) or (MTH 265 with C- or better or MTH 265H with C- or better) and (MTH 341 [C-] or (MTH 264 [C-] or MTH 264H [C-]) or (MTH 306 [C-] or MTH 306H [C-])

MTH 482, APPLIED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: MTH 480 with C- or better or MTH 481 with C- or better or MTH 581 with C- or better

MTH 483, COMPLEX VARIABLES, 3 Credits
Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with a C- or better.
Prerequisite: (MTH 256 with C- or better or MTH 256H with C- or better) and (MTH 253 [C-] or (MTH 306 [C-] or MTH 306H [C-]) or (MTH 265 [C-] or MTH 265H [C-]))

MTH 490, INTENSIVE SUMMER RESEARCH IN MATHEMATICS, 12 Credits
Combination of seminar, lectures, and individual research projects designed to introduce students to research mathematics.
This course is repeatable for 99 credits.

MTH 491, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 341 with C- or better

MTH 492, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tesselations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 491 with C- or better or MTH 591 with C- or better

MTH 493, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better.
Prerequisite: MTH 492 with C- or better or MTH 592 with C- or better
MTH 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

MTH 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MTH 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

MTH 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MTH 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MTH 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

MTH 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

MTH 510, OCCUPATIONAL INTERNSHIP, 3-12 Credits
Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N.
This course is repeatable for 16 credits.

MTH 511, REAL ANALYSIS, 3 Credits
Properties of metric spaces and normed spaces, including lp spaces. Completeness and applications, including fixed point theorems. Compactness. Equicontinuity and the Arzela-Ascoli theorem. Uniform continuity and uniform convergence, including applications.
This course is repeatable for 18 credits.
Recommended: MTH 312 and MTH 341

MTH 512, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini's theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 511 with C- or better
This course is repeatable for 18 credits.

MTH 513, REAL ANALYSIS, 3 Credits
Measure and integration theory, basic convergence theorems, Lebesgue spaces, Fubini's theorem, Radon-Nikodym theorem, and applications. Banach spaces including Baire category theorems, and Hilbert spaces.
Prerequisite: MTH 512 with C- or better
This course is repeatable for 18 credits.

MTH 520, MODELS AND METHODS OF APPLIED MATHEMATICS, 3 Credits
Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 256 or MTH 256H) and MTH 341

MTH 524, DYNAMICAL SYSTEMS THEORY AND APPLICATIONS, 3 Credits
Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: MTH 341 and MTH 342 and MTH 311 and MTH 312 and MTH 361

MTH 525, DYNAMICAL SYSTEMS THEORY AND APPLICATIONS, 3 Credits
Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: MTH 341 and MTH 342 and MTH 311 and MTH 312 and MTH 361

MTH 527, INTRODUCTION TO MATHEMATICAL BIOLOGY, 3 Credits
Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better.
Recommended: (MTH 256 or MTH 256H) and MTH 341
MTH 528, STOCHASTIC ELEMENTS IN MATHEMATICAL BIOLOGY, 3 Credits
An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better.
Recommended: MTH 341 and (MTH 361 or MTH 463 or MTH 563)

MTH 531, GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS, 3 Credits
Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 532, GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS, 3 Credits
Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 534, INTRODUCTION TO DIFFERENTIAL GEOMETRY, 3 Credits
Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 255 or MTH 255H) and MTH 342 and MTH 311

MTH 535, DIFFERENTIAL GEOMETRY, 3 Credits
Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 434 or MTH 534

MTH 537, GENERAL RELATIVITY, 3 Credits
Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 434 with C or better or MTH 534 with C or better
Recommended: MTH 311

MTH 540, COMPUTATIONAL NUMBER THEORY, 3 Credits
Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptology. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 231 or MTH 343 or MTH 355

MTH 541, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 343 and (MTH 342 or MTH 440 or MTH 540)

MTH 542, APPLIED AND COMPUTATIONAL ALGEBRA, 3 Credits
Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 441 or MTH 541

MTH 543, ABSTRACT LINEAR ALGEBRA, 3 Credits
Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 342 and MTH 343

MTH 551, NUMERICAL LINEAR ALGEBRA, 3 Credits
Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341, MTH 342, MTH 351 and programming experience

MTH 552, NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: Programming experience and (MTH 256 or MTH 256H) and (MTH 306 or MTH 306H or MTH 341) and (MTH 351 or MTH 451 or MTH 551)
MTH 553, NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 452 or MTH 552

MTH 563, PROBABILITY I, 3 Credits
An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 452 or MTH 552

MTH 564, PROBABILITY II, 3 Credits
Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341 and (MTH 463 or MTH 563)

MTH 565, PROBABILITY III, 3 Credits
Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 464 or MTH 564

MTH 567, ACTUARIAL MATHEMATICS, 3 Credits
Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 463 or MTH 563) or ST 421.

MTH 578, PROBABILITY AND DATA ANALYSIS IN K-8 MATHEMATICS, 3 Credits
Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 390

MTH 581, APPLIED ORDINARY DIFFERENTIAL EQUATIONS, 3 Credits
Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 256 or MTH 256H) and (((MTH 253 or MTH 253H) and MTH 341) or (MTH 306 or MTH 306H))

MTH 582, APPLIED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations, Bessel’s and Legendre’s equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 480 or MTH 481 or MTH 581

MTH 583, COMPLEX VARIABLES, 3 Credits
Introduction to the complex differential and integral calculus: Cauchy’s theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: (MTH 256 or MTH 256H) and (MTH 253 or MTH 306 or MTH 306H)

MTH 590, TOPICS IN SECONDARY MATHEMATICS, 3 Credits
Key ideas and topics in discrete mathematics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 390

MTH 591, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya’s problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 491 or MTH 591

MTH 592, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler’s formula, tilings and tessellations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 491 or MTH 591
MTH 593, ALGEBRA AND GEOMETRIC TRANSFORMATIONS, 3 Credits
Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 492 or MTH 592

MTH 598, PROBABILITY AND DATA ANALYSIS IN SECONDARY MATHEMATICS, 3 Credits
Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 390

MTH 599, SPECIAL TOPICS, 0-16 Credits
Topics may vary.
This course is repeatable for 18 credits.

MTH 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MTH 603, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

MTH 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MTH 606, SPECIAL PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MTH 607, SEMINAR, 1-16 Credits
This course is repeatable for 99 credits.

MTH 611, COMPLEX ANALYSIS, 3 Credits
Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 411 or MTH 511

MTH 612, COMPLEX ANALYSIS, 3 Credits
Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 611

MTH 614, FUNCTIONAL ANALYSIS, 3 Credits
Topological vector spaces, generalized functions, operator theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 513

MTH 619, TOPICS IN ANALYSIS, 1-12 Credits
This course is repeatable for 12 credits.

MTH 621, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: 6 credits of senior-level analysis

MTH 622, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 621 with C or better
This course is repeatable for 6 credits.

MTH 623, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the third one in year-long sequence. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 621 with C or better and MTH 622 [C]
This course is repeatable for 6 credits.

MTH 627, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered fall term in odd years. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.

MTH 631, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered fall term in odd years. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.

MTH 614, FUNCTIONAL ANALYSIS, 3 Credits
Topological vector spaces, generalized functions, operator theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 513

MTH 619, TOPICS IN ANALYSIS, 1-12 Credits
This course is repeatable for 12 credits.

MTH 621, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
Recommended: 6 credits of senior-level analysis

MTH 622, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 621 with C or better
This course is repeatable for 6 credits.

MTH 623, PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the third one in year-long sequence. All courses used to satisfy MTH prerequisites must be completed with C or better.
Prerequisite: MTH 621 with C or better and MTH 622 [C]
This course is repeatable for 6 credits.

MTH 627, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered fall term in odd years. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.

MTH 631, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered fall term in odd years. All courses used to satisfy MTH prerequisites must be completed with C or better.
This course is repeatable for 6 credits.
MTH 628, ADVANCED PARTIAL DIFFERENTIAL EQUATIONS, 3 Credits
Advanced theory including existence proofs and distributional approach. Normally offered winter term in even years. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for 6 credits.
Recommended: MTH 627

MTH 634, ALGEBRAIC TOPOLOGY, 3 Credits
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 532

MTH 635, ALGEBRAIC TOPOLOGY, 3 Credits
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 532 and MTH 634

MTH 636, ALGEBRAIC TOPOLOGY, 3 Credits
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 532 and MTH 635

MTH 644, ABSTRACT ALGEBRA I, 3 Credits
Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 443 or MTH 543

MTH 645, ABSTRACT ALGEBRA II, 3 Credits
Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 644

MTH 649, TOPICS IN ALGEBRA AND NUMBER THEORY, 3 Credits
This course is repeatable for 27 credits.

MTH 654, NUMERICAL ANALYSIS, 3 Credits
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for 12 credits.
Recommended: Familiarity with numerical methods

MTH 655, NUMERICAL ANALYSIS, 3 Credits
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for 12 credits.
Recommended: Familiarity with numerical methods

MTH 656, NUMERICAL ANALYSIS, 3 Credits
Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for 12 credits.
Recommended: Familiarity with numerical methods

MTH 657, TOPICS IN APPLIED MATHEMATICS, 1-12 Credits
Previous topics have included turbulence, financial mathematics and probability methods in partial differential equations. This course is repeatable for 12 credits.

MTH 658, TOPICS IN MATHEMATICAL MODELING, 1-12 Credits
Mathematical treatment of topics of current interest in the physical and biological sciences and technology. May be repeated for credit when topic varies. This course is repeatable for 12 credits.

MTH 659, TOPICS IN NUMERICAL ANALYSIS, 1-12 Credits
This course is repeatable for 12 credits.

MTH 664, PROBABILITY THEORY, 3 Credits
General theory of probability measures and random variables, including weak convergence, characteristic functions, central limit theory, conditional expectations, martingales. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 411 or MTH 511
MTH 665, PROBABILITY THEORY, 3 Credits
General theory of probability measures and random variables, including weak convergence, characteristic functions, the central limit theorem, and the Brownian motion process. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 664

MTH 669, TOPICS IN STOCHASTIC PROCESSES, 1-12 Credits
Previous topics have included Markov processes, martingales, branching processes, and stochastic differential equations.
This course is repeatable for 12 credits.

MTH 674, DIFFERENTIAL GEOMETRY OF MANIFOLDS, 3 Credits
Differentiable manifolds, tangent bundles, vector fields and flows, submanifolds, Riemannian metrics, differential forms, integration on manifolds. Selected topics such as foliations, Lie groups, and de Rham cohomology. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 341 and (MTH 411 or MTH 511)

MTH 675, DIFFERENTIAL GEOMETRY OF MANIFOLDS, 3 Credits
Differentiable manifolds, connections in linear bundles, Riemannian manifolds and submanifolds. Selected topics such as variational theory of geodesics, harmonic forms, and characteristic classes. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: MTH 674

MTH 676, TOPICS IN TOPOLOGY, 3 Credits
This course is repeatable for 27 credits.

MTH 679, TOPICS IN GEOMETRY, 1-12 Credits
This course is repeatable for 12 credits.

MTH 682, TEACHING AND LEARNING PROBABILITY AND STATISTICS, 3 Credits
Experimental, activity-based approaches to introductory probability and statistics are explored. Topics include computer simulations, exploratory data analysis, misuses of statistics, and misconceptions of probability. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 684, COMPUTERS AND MATHEMATICS, 3 Credits
A variety of mathematical problems are investigated with a laboratory approach using microcomputers and a wide variety of software. Problems may be taken from number theory, calculus, geometry, probability, and elementary numerical analysis. All courses used to satisfy MTH prerequisites must be completed with C or better.
Recommended: Ability to program in either BASIC or PASCAL

MTH 685, ADVANCED PROBLEM SOLVING, 3 Credits
Mathematical problem solving using the heuristic approach of George Polya. Problems may be taken from a variety of areas, including number theory, calculus, geometry, probability, abstract and linear algebra. All courses used to satisfy MTH prerequisites must be completed with C or better.

MTH 689, TOPICS IN MATHEMATICS EDUCATION, 1-12 Credits
Topics may vary.
This course is repeatable for 12 credits.

MTH 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Total Credits: 28-30

* Baccalaureate Core Course (BCC)

The Actuarial Science minor must include 28 credits, at least 12 of which must be upper-division credits.

- Except for MTH 306 and MTH 341, upper-division courses used to satisfy a student's major requirements may not also be used to satisfy requirements for the Actuarial Science minor.
- Except for MTH 306 and MTH 341, upper-division courses used to satisfy a student's additional minor program may not also be used to satisfy requirements for the Actuarial Science minor.

Mathematics Graduate Major (MA, MS, PhD)

Graduate Areas of Concentration

Actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematical biology, mathematics education, number theory, numerical analysis, topology, probability.

The Department of Mathematics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Graduate areas of concentration are actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematical biology, mathematics education, number theory, numerical analysis, topology, probability.

For the MS and MA, a thesis, an expository paper, or successful completion of the PhD qualifying examination is required.

* Baccalaureate Core Course (BCC)

1 MTH 390 may not be used for credit in the Mathematics minor

Minor Code: 560

Mathematics Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Applied and Computational Mathematics (p. 1584)
- Mathematical Biology (p. 1585)
- Secondary Teaching Emphasis (p. 1585)
- Statistics (p. 1586)

The BS degree in Mathematics requires a common core of courses at the lower-division level and junior-level followed by senior-level depth and breadth requirements. The upper-division requirements in the major total 45–50 credits. Thus, a mathematics major has ample opportunity to take further mathematics courses focused toward specific interests and career goals. Programs supporting interdisciplinary interests are strongly encouraged.

Major Code: 560

- Demonstrate mathematical reasoning skills by reading, writing, and explaining formal definitions, theorems, and proofs.
- Analyze mathematical problems by applying the theory and techniques from a variety of mathematical perspectives.
- Use computational technology to support problem solving and mathematical understanding.
- Use mathematical concepts and techniques to recognize, formulate and analyze questions from another discipline.
- Communicate mathematics effectively.

The following requirements are specific to the BS degree in Mathematics. Students must also satisfy OSU degree and baccalaureate core requirements.

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

Applied and Computational Mathematics Option

This option is offered within the following major(s):

• Mathematics - College of Science (p. 1583)

The Applied and Computational option offers Mathematics majors an opportunity to concentrate much of their upper-division course work in the area of applied and computational mathematics. This degree option is designed to allow students to focus on applied mathematics, modeling, and computation after completing core junior and lower-division mathematics requirements.

Option Code: 692

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

The lower-division requirements for the Applied and Computational Mathematics option are the same as those for the Mathematics BS degree. The upper-division requirements are as follows.

Total Credits

1  Mathematics courses at the 400 level are offered in the 6 areas listed. Five 400-level classes satisfying (a) and (b) are required.
(a) Depth requirement: A pair of classes from one of the 6 areas is required. Some exceptions are noted.
(b) Breadth requirement: One course each from the 3 of the 5 remaining areas.

2  This includes non-blanket numbered (not X99- or X0X-numbered) upper-division MTH courses, upper-division ST courses, or other courses of a mathematical nature approved by the departmental head advisor. MTH 390 is not allowed.

3  MTH 480 and MTH 481 cannot both be used to satisfy program requirements

*  Baccalaureate Core Course (BCC)

^  Writing Intensive Course (WIC)

Major Code: 560

1  Either MTH 453 or MTH 482 must be included. (Note: Only one of MTH 480 and MTH 481 can be used to satisfy requirements for a degree in Mathematics.)
This includes non-blanket numbered (not X99- or X0X-numbered) upper-division MTH courses, upper-division ST courses, or other courses of a mathematical nature approved by the departmental head advisor. MTH 390 is not allowed.

Writing Intensive Course (WIC)

Option Code: 692

Mathematical Biology Option

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1583)

In addition to the usual required lower-division mathematics courses and the junior core courses, mathematics majors in the Mathematical Biology option have an opportunity to concentrate much of their further course work on applied mathematics, mathematical biology, modeling and computation.

Option Code: 737

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

Option Code: 737

Secondary Teaching Emphasis Option

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1583)

Students preparing for careers teaching mathematics at the secondary level may major in mathematics with the following transcript-visible option. This option helps prepare students to pursue a teaching licensure program in their fifth year.

Option Code: 234

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

Statistics Option

This option is offered within the following major(s):

- Mathematics - College of Science (p. 1583)

The Statistics option offers Mathematics majors an opportunity to concentrate their senior level course work in the area of statistics and probability after completing core junior and lower-division mathematics requirements. This degree option is designed to allow a focus on the study of the mathematical theory underlying statistics while simultaneously developing expertise in statistical applications.

Option Code: 234

A grade of at least C– and a GPA of 2.25 are required in all upper-division mathematics courses used to fulfill degree requirements.

- Students wanting a stronger background in statistics may substitute ST 421 for ST 351.
- Students wanting a stronger background in probability may substitute MTH 463, Probability I, (usually taken in the senior year) for MTH 361.
- Students wanting a stronger background in mathematics should choose some electives from the 400-level courses listed in the Mathematics major.

Option Code: 658

A grade of at least C– and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken S/U.

The lower-division requirements for the Statistics option are the same as those for the Mathematics BS degree. The upper-division requirements are as follows.

### Part A. Required Mathematics Core Classes

Total Credits: 55-56

¹ MTH 321 can be substituted for one of the two area classes.
^ Writing Intensive Course (WIC)

Option Code: 658
Physics

Physics is the study of the fundamental structure of matter and the interactions of its constituents. Physicists are concerned with the development of concepts needed for a precise description of nature and with experiments to test such concepts.

For students of science and engineering, the study of physics provides the basic foundation needed to understand the complex workings of the material world, from the forces that build atoms to those that build bridges. For students of the liberal arts, the study of physics provides an introduction to modern ideas about the most fundamental and elemental aspects of nature and how those ideas developed in their cultural and historical context. Physics is a basic and indispensable tool in all technical fields, and its development figures prominently in any discussion of the intellectual history of our civilization.

Undergraduate Degree Programs

The department offers several programs leading to degrees in physics. A basic physics curriculum in the College of Science stresses the detailed and advanced preparation needed for graduate work or employment in physics.

Options are available within the physics degree program that prepare students for graduate work or employment in an allied field, such as applied physics, biophysics, chemical physics, geophysics, mathematical physics, optical physics, and physics teaching.

Other programs are offered that train students for careers in physics teaching. A Physics minor is available for students majoring in other areas of science and engineering.

The Department of Physics offers the upper-division curriculum, Paradigms in Physics. Many of the junior-year courses are taught in 2-credit intensive modules, meeting seven hours a week for about three weeks.

Graduate Degrees

Graduate programs leading to the MA, MS, and PhD are offered, emphasizing theoretical or experimental studies in the areas of atomic physics, computational physics, nuclear physics, optical physics, particle physics, and solid state physics. The MS degree has both thesis and nonthesis options. Comprehensive written and oral examinations must be passed before the student can become a candidate for an advanced degree.

Careers

A multitude of opportunities exists for students who complete undergraduate degrees in physics. They include employment in technological industries, including electronics, computers, optics, materials science, and aerospace; graduate study leading to an advanced degree in physics or a related area such as mathematics, Earth sciences, computer science, engineering, or astronomy; and degree programs leading to professions such as law or medicine, with specialties in areas in which a physics background is essential.

Preparation

Recommended high school preparation for students who plan to major in physics includes one year each of chemistry and physics and four years of mathematics through analytic geometry. Mathematics preparation is especially important; students who are not ready to start calculus (MTH 251) upon entering may be delayed in their progress toward a degree. Students anticipating transfer to OSU from another institution are encouraged to contact the Department of Physics as early as possible to discuss their placement in the course curricula.

Advising

Each undergraduate student is assigned an advisor who helps select the most appropriate degree program and assists in planning the curriculum. Minor variations in the requirements for degrees are possible, but must be discussed with the advisor and approved at an early stage in curriculum planning. Near the end of the degree program, the advisor can help the student to apply for employment or admission to graduate programs.

Options

Students desiring to combine the study of physics with that of another related subject should consider the options below, or should consult with a Department of Physics advisor about substituting upper-division work in a related field for certain of the upper-division physics requirements. All such substitutions must constitute a coherent program in related areas and must be approved in advance by the Department of Physics. In each case, the program must include at least 3 credits of PH 403 to satisfy the university’s writing intensive course (WIC) requirements.

Astronomy

The Department of Physics offers an introductory course, PH 104. Three online courses (PH 205, PH 206, PH 207) and several on-campus special topics courses also are offered. Students who desire careers in astronomy can design a curriculum under the Geophysics option, which includes related course work in geology and in atmospheric sciences. This curriculum would qualify the student for graduate work in astronomy.

All undergraduate students must satisfy the university requirements for graduation (see OSU Baccalaureate Core (p. 2423) in this Catalog) and the college requirements (see the College of Science (p. 1489) section).

Grades of C– or better must be attained in all courses required for the Physics major. Courses in which a lower grade is received must be repeated until a satisfactory grade is received.

Faculty

Professors: Jansen, Lee, Manogue, McIntyre, Schellman, Tate
Associate Professors: Giebultowicz, Lazzati, Minot, Ostroverkhova, Roundy, Schneider
Assistant Professors: Gire, Graham, Qiu, Sun
Instructor: Bannon, Coffin, Hadley, Ketter, Milstein, Walsh

Adjunct Faculty
Herman, Keszler, Kornilovich

PH 104, *DESCRIPTIVE ASTRONOMY, 4 Credits
Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 104H

PH 104H, *DESCRIPTIVE ASTRONOMY, 4 Credits
Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Equivalent to: PH 104

PH 106, *PERSPECTIVES IN PHYSICS, 4 Credits
A descriptive and non-mathematical study of the development of physical concepts and their historical and philosophical context. The emphasis is on the origin, meaning, significance, and limitations of these concepts and their role in the evolution of current understanding of the universe. Concepts to be covered include Copernican astronomy, Newtonian mechanics, energy, electricity and magnetism, relativity, and quantum theory. Intended primarily for non-science students. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 111, *INQUIRING INTO PHYSICAL PHENOMENA, 4 Credits
Development of conceptual understandings through investigation of everyday phenomena. Emphasis is on questioning, predicting, exploring, observing, discussing, and writing in physical science contexts. Students document their initial thinking, record their evolving understandings, and write reflections upon how their thinking changed and what fostered their learning. Lec/lab. (Baccalaureate Core Course)
Attributes: CPPS – Core, Pers, Physical Science

PH 198, FIRST-YEAR ORIENTATION, 1 Credit
Introduction to the Physics Department including educational, research, and career opportunities. Recommended for all freshman and transfer physics majors, but open to all students interested in learning about opportunities in Physics.

PH 199, SPECIAL STUDIES, 1-16 Credits
One-credit sections are graded pass/no pass. This course is repeatable for 99 credits.

PH 201, *GENERAL PHYSICS, 5 Credits
Introductory survey course covering a broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 201H
Recommended: MTH 111 and MTH 112
Available via Ecampus

PH 202, *GENERAL PHYSICS, 5 Credits
Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 202H
Recommended: MTH 111 and MTH 112 and PH 201
Available via Ecampus

PH 203, *GENERAL PHYSICS, 5 Credits
Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 203H
Recommended: MTH 111 and MTH 112 and PH 202
Available via Ecampus
PH 205, *SOLAR SYSTEM ASTRONOMY, 4 Credits
History, laws, and tools of astronomy. Composition, motion, and origin of the sun, planets, moons, asteroids, and comets. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

PH 206, *STARS AND STELLAR EVOLUTION, 4 Credits
Properties of stars, star formation, evolution, and death; supernovae, pulsars, and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

PH 207, *GALAXIES, COSMOLOGY, LIFE IN THE UNIVERSE, 4 Credits
Nature and content of galaxies, properties of quasars, and the cosmic background radiation. Emphasis on the Big-Bang model and its features. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

PH 211, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 211H
Recommended: MTH 251 and concurrent enrollment in MTH 252 and a PH 211 recitation section

PH 211H, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 211
Recommended: MTH 251 and concurrent enrollment in MTH 252 and a PH 211 recitation section

PH 212, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Prerequisite: PH 211 with D- or better or PH 211H with D- or better
Equivalent to: PH 212H, PH 212H
Recommended: MTH 252 and concurrent enrollment in PH 222 and MTH 254

PH 212H, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Prerequisite: PH 211 with D- or better or PH 211H with D- or better
Equivalent to: PH 212
Recommended: MTH 252 and concurrent enrollment in PH 222 and MTH 254

PH 213, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: PH 213H
Recommended: MTH 254 and (PH 212 or PH 212H). Concurrent enrollment in a recitation section is strongly recommended.

PH 213H, *GENERAL PHYSICS WITH CALCULUS, 4 Credits
A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science; HNRS – Honors Course Designator
Equivalent to: PH 213
Recommended: MTH 254 and (PH 212 or PH 212H). Concurrent enrollment in a recitation section is strongly recommended.
PH 221, RECITATION FOR PHYSICS 211, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Prerequisite: PH 211 (may be taken concurrently) with D- or better or PH 211H (may be taken concurrently) with D- or better
Equivalent to: PH 221

PH 221H, RECITATION FOR PHYSICS 211, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Attributes: HNRS – Honors Course Designator
Prerequisite: PH 211 (may be taken concurrently) with D- or better or PH 211H (may be taken concurrently) with D- or better
Equivalent to: PH 221

PH 222, RECITATION FOR PHYSICS 212, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Graded P/N.
Prerequisite: PH 212 (may be taken concurrently) with D- or better or PH 212H (may be taken concurrently) with D- or better
Equivalent to: PH 222
Recommended: Concurrent enrollment in PH 212 or PH 212H

PH 223, RECITATION FOR PHYSICS 213, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Prerequisite: PH 213 (may be taken concurrently) with D- or better or PH 213H (may be taken concurrently) with D- or better
Equivalent to: PH 223
Recommended: Concurrent enrollment in PH 213

PH 223H, RECITATION FOR PHYSICS 213, 1 Credit
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N.
Attributes: HNRS – Honors Course Designator
Prerequisite: PH 213 (may be taken concurrently) with D- or better or PH 213H (may be taken concurrently) with D- or better
Equivalent to: PH 223H

PH 225, SCIENTIFIC COMPUTING, 3 Credits
Basic computational tools and techniques for courses in science and engineering. Project approach to problem solving using symbolic and compiled languages with visualization. Basic computer literacy assumed.
Equivalent to: CS 265
Recommended: Concurrent enrollment in MTH 251

PH 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

PH 313, *ENERGY ALTERNATIVES, 3 Credits
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: PH 313
Recommended: Upper-division standing and 12 credits of introductory science
Available via Ecampus

PH 313H, *ENERGY ALTERNATIVES, 3 Credits
Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: PH 313
Recommended: Upper-division standing and 12 credits of introductory science

PH 315, PHYSICS OF CONTEMPORARY CHALLENGES, 3 Credits
An introduction to thermal and quantum physics in the context of contemporary challenges faced by our society, such as power generation, energy efficiency, and global warming.
Recommended: PH 211

PH 317, *EXPERIMENTAL PHYSICS, 3 Credits
Conducting experiments, understanding equipment, modeling physical phenomena, analyzing and presenting data, sources of variation and uncertainty. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: PH 213 with C- or better and PH 315 [C-] and PH 335 [C-]

PH 317X, EXPERIMENTAL PHYSICS, 3 Credits
Conducting experiments, understanding equipment, modeling physical phenomena, analyzing and presenting data, data-driven conclusions and inferences, statistical analysis
Prerequisite: PH 213 with C- or better and PH 315 [C-] and PH 335 [C-]
PH 331, *SOUND, HEARING, AND MUSIC, 3 Credits
Basic course in the physics, technology, and societal implications of sound. Intended for students in nontechnical majors. Topics include wave motion, hearing and the perception of sound, noise pollution, music and musical instruments, architectural acoustics, and sound recording and reproduction. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Upper-division standing and one year of university science

PH 332, *LIGHT, VISION, AND COLOR, 3 Credits
Basic physics of light, optical instruments (lenses, telescopes, microscopes), the eye and visual perception, colors, photography, environmental lighting, lasers and holography. For nontechnical majors. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Upper-division standing and one year of university science

PH 335, TECHNIQUES OF THEORETICAL MECHANICS, 3 Credits
Newtonian, Lagrangian, and Hamiltonian classical mechanics. Special relativity with relativistic mechanics.
Recommended: PH 212 and MTH 254

PH 365, COMPUTATIONAL PHYSICS LAB, 1 Credit
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisite: PH 213 with C- or better
Equivalent to: PH 365X
Recommended: Concurrent enrollment in Paradigms

PH 366, COMPUTATIONAL PHYSICS LAB, 1 Credit
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisite: PH 213 with C- or better
Recommended: Concurrent enrollment in Paradigms

PH 367, COMPUTATIONAL PHYSICS LAB, 1 Credit
A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence.
Prerequisite: PH 213 with C- or better
Recommended: Concurrent enrollment in Paradigms

PH 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: PH 399H
This course is repeatable for 16 credits.

PH 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: PH 399
This course is repeatable for 16 credits.

PH 401, RESEARCH, 1-16 Credits
A research project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for 16 credits.

PH 403, ^THESIS, 1-16 Credits
A research project leading to a thesis under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
This course is repeatable for 16 credits.

PH 405, READING AND CONFERENCE, 1-16 Credits
An independent study project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for 16 credits.

PH 407, SEMINAR, 1-16 Credits
Departmental seminars or colloquium. Graded P/N.
Equivalent to: PH 407H
This course is repeatable for 16 credits.

PH 407H, SEMINAR, 1-16 Credits
Departmental seminars or colloquium.
Attributes: HNRS – Honors Course Designator
Equivalent to: PH 407
This course is repeatable for 16 credits.

PH 409, PHYSICS TEACHING PRACTICUM, 1-6 Credits
Physics practicum experience for students assisting in Physics courses. Includes training in course content and development of instructional materials. Admission is by application. See the department office in Weniger 301 for details.
This course is repeatable for 6 credits.

PH 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

PH 411, ELECTRONICS, 3 Credits
Covers how to build and analyze basic circuits. Topics include passive dc and ac circuits including filters, complex impedance, Fourier analysis, operational amplifiers, semiconductor diodes, and transistors.
Recommended: PH 213
PH 415, COMPUTER INTERFACING AND INSTRUMENTATION, 3 Credits
Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments. 
Recommended: Upper-division and PH 412/PH 512 or equivalent background in electronics

PH 422, PARADIGMS IN PHYSICS: STATIC FIELDS, 3 Credits
Theory of static electric, magnetic, and gravitational potentials and fields using the techniques of vector calculus in three dimensions. 
Equivalent to: PH 322 
Recommended: PH 213 and MTH 255

PH 423, PARADIGMS IN PHYSICS: ENERGY AND ENTROPY, 3 Credits
Thermodynamics and canonical statistical mechanics. 
Equivalent to: PH 323 
Recommended: PH 213

PH 424, PARADIGMS IN PHYSICS: OSCILLATIONS AND WAVES, 3 Credits
Dynamics of mechanical and electrical oscillation using Fourier series and integrals; time and frequency representations for driven damped oscillators, resonance; one-dimensional waves in classical mechanics and electromagnetism; normal modes. 
Recommended: PH 213 and PH 411 and MTH 256

PH 425, PARADIGMS IN PHYSICS: QUANTUM FUNDAMENTALS, 3 Credits
Introduction to quantum mechanics through Stern-Gerlach spin measurements. Probability, eigenvalues, operators, measurement, state reduction, Dirac notation, matrix mechanics, time evolution. Quantum behavior of a one-dimensional well. 
Recommended: PH 213 and concurrent enrollment in MTH 341

PH 426, PARADIGMS IN PHYSICS: CENTRAL FORCES, 3 Credits
Gravitational and electrostatic forces; angular momentum and spherical harmonics, separation of variables in classical and quantum mechanics, hydrogen atom. 
Recommended: PH 213 and PH 422 and PH 425 and concurrent enrollment in PH 335

PH 427, PARADIGMS IN PHYSICS: PERIODIC SYSTEMS, 3 Credits
Quantum waves in position and momentum space; Bloch waves in one-dimensional periodic systems, and the reciprocal lattice; coupled harmonic oscillators; phonons. 
Recommended: PH 424 and PH 425 and concurrent enrollment in PH 315

PH 431, CAPSTONES IN PHYSICS: ELECTROMAGNETISM, 3 Credits
Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation. 
Recommended: (PH 424 or 524) and (PH 426 or PH 526)

PH 441, CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS, 3 Credits
Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations. 
Recommended: (PH 423 or PH 523) and (PH 451 or PH 551)

PH 451, CAPSTONES IN PHYSICS: QUANTUM MECHANICS, 3 Credits
Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications. 
Recommended: (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 455, ASTROPHYSICS, 3 Credits
Physics of stars and the cosmos. 
Recommended: PH 213; PH 315 or equivalent junior-level background in modern physics and thermodynamics.

PH 464, SCIENTIFIC COMPUTING II, 3 Credits
Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab. 
Equivalent to: PH 365

PH 465, COMPUTATIONAL PHYSICS, 3 Credits
The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics. 
Recommended: PH 464 or PH 564

PH 481, PHYSICAL OPTICS, 4 Credits
Wave propagation, polarization, interference, diffraction, and selected topics in modern optics. 
Recommended: PH 431 or PH 531

PH 482, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582. 
Equivalent to: ECE 482 
Recommended: ECE 391 or (PH 481 or PH 581)

PH 483, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583. 
Equivalent to: ECE 483 
Recommended: Completion or concurrent enrollment in ECE 391 or PH 481
PH 495, INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS, 3 Credits
Elementary particles and forces, nuclear structure and reactions.
Recommended: PH 451 or PH 551

PH 499, SPECIAL TOPICS, 1-16 Credits
Topics vary from year to year. May be repeated for credit. Not offered every year.
This course is repeatable for 16 credits.

PH 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

PH 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

PH 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PH 507, SEMINAR, 1-16 Credits
Section 1: Departmental Colloquium. Section 3: Nuclear and Particle Physics. Section 5: Atomic, Molecular, and Optical Physics. Section 7: Solid State Physics. Section 9: Computational Physics. One-credit options are graded P/N.
This course is repeatable for 16 credits.

PH 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

PH 511, ELECTRONICS, 3 Credits
Covers how to build and analyze basic circuits. Topics include passive dc and ac circuits including filters, complex impedance, Fourier analysis, operational amplifiers, semiconductor diodes, and transistors.
Recommended: PH 213

PH 515, COMPUTER INTERFACING AND INSTRUMENTATION, 3 Credits
Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments.
Recommended: PH 412 or PH 512 or equivalent background in electronics

PH 531, CAPSTONES IN PHYSICS: ELECTROMAGNETISM, 3 Credits
Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation.
Recommended: (PH 424 or PH 524) and (PH 426 or PH 526)

PH 541, CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS, 3 Credits
Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations.
Recommended: (PH 423 or PH 523) and (PH 451 or PH 551)

PH 551, CAPSTONES IN PHYSICS: QUANTUM MECHANICS, 3 Credits
Wave mechanics, Schrödinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications.
Recommended: (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 555, ASTROPHYSICS, 3 Credits
Physics of stars and the cosmos.
Recommended: PH 213; PH 315 or equivalent junior-level background in modern physics and thermodynamics.

PH 562, MATHEMATICAL PHYSICS, 3 Credits
Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green’s functions; complex analysis.

PH 564, SCIENTIFIC COMPUTING II, 3 Credits
Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.
Equivalent to: PH 365

PH 575, INTRODUCTION TO SOLID STATE PHYSICS, 3 Credits
Introduction to condensed matter physics for majors in physics, chemistry, and engineering. Topics include band structure, free electron behavior, optical properties, magnetism, and lattice excitations.
Recommended: (PH 451 or PH 551) and concurrent enrollment in PH 427 or PH 527

PH 581, PHYSICAL OPTICS, 4 Credits
Wave propagation, polarization, interference, diffraction, and selected topics in modern optics.
Recommended: PH 431 or PH 531

PH 582, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582.
Equivalent to: ECE 582
Recommended: PH 481 or PH 581
PH 583, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab.
Equivalent to: ECE 583
Recommended: Completion or concurrent enrollment in ECE 391 or PH 481/581

PH 585, ATOMIC, MOLECULAR, AND OPTICAL PHYSICS, 3 Credits
Atomic and molecular structure, interaction with electromagnetic fields, atomic and molecular spectra, spectroscopic techniques, laser theory, nonlinear optics.
Recommended: (PH 431 or PH 531) or (PH 451 or PH 551)

PH 591, BIOLOGICAL PHYSICS, 3 Credits
Basic physics principles applied to the kinetics and dynamics of molecular and cellular processes. Ion channels, two-state systems, dynamics of molecular motors, cell signalling, and multicellular phenomena.
Recommended: PH 320, PH 421, PH 422 and PH 423 or junior-level background in classical mechanics, electromagnetism, and thermodynamics

PH 595, INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS, 3 Credits
Elementary particles and forces, nuclear structure and reactions.
Recommended: PH 451 or PH 551

PH 599, SPECIAL TOPICS, 1-16 Credits
(See PH 499 for description.)
This course is repeatable for 16 credits.

PH 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

PH 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

PH 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

PH 607, SEMINAR, 1-16 Credits
Section 1: Departmental Colloquium. Section 3: Nuclear and Particle Physics. Section 5: Atomic, Molecular, and Optical Physics. Section 7: Solid State Physics. Section 9: Computational Physics. One-credit options are graded P/N.
This course is repeatable for 16 credits.

PH 609, PRACTICUM IN TEACHING, 1-6 Credits
This course is repeatable for 6 credits.

PH 621, DYNAMICS OF SINGLE- AND MULTI-PARTICLE SYSTEMS, 3 Credits
Introduction to theory of non-linear systems. Chaos in Hamiltonian and dissipative systems. Lyapunov exponents, fractal geometries.
Recommended: PH 435 or PH 535

PH 631, ELECTROMAGNETIC THEORY, 3 Credits
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.
Recommended: PH 431 or PH 531

PH 632, ELECTROMAGNETIC THEORY, 3 Credits
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.
Recommended: PH 631 and (PH 431 or PH 531)

PH 633, ELECTROMAGNETIC THEORY, 3 Credits
Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields.
Recommended: PH 632 and (PH 431 or PH 531)

PH 641, STATISTICAL THERMOPHYSICS, 3 Credits
Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation.
Recommended: PH 435 or PH 535

PH 642, STATISTICAL THERMOPHYSICS, 3 Credits
Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation.
Recommended: PH 641

PH 651, QUANTUM MECHANICS, 3 Credits
Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering.
Recommended: (PH 435 or PH 535) and (PH 451 or PH 551)

PH 652, QUANTUM MECHANICS, 3 Credits
Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering.
Recommended: (PH 435 or PH 535) and (PH 451 or PH 551) and PH 651

PH 653, QUANTUM MECHANICS, 3 Credits
Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering.
Recommended: (PH 435 or PH 535) and (PH 451 or PH 551) and PH 652

PH 654, ADVANCED QUANTUM THEORY, 3 Credits
Scattering theory, second quantization and many body theory, relativistic quantum mechanics, quantization of fields, quantum electrodynamics, and elementary particles.
Recommended: PH 653
PH 671, SOLID STATE PHYSICS, ELECTRON TRANSPORT, 3 Credits
Fundamentals of solid state physics, Boltzmann transport, phonon and defect scattering, quantum transport, transport in magnetic field, localization, Mott-insulator transition, electron tunneling, superconductivity. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 672, SOLID STATE PHYSICS, THEORY, 3 Credits
The many-body problem, density functional theory, excited states properties, BCS theory of superconductivity. Not offered every year.
Prerequisite: PH 575 with D- or better and PH 654 [D-]
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 673, SOLID STATE PHYSICS, NANOSCIENCE AND NANOTECHNOLOGY, 3 Credits
Introduction to nanoscience and nanotechnology; semiconductor quantum wells, wires, and dots; bulk metals vs nanoparticles; molecular ensembles vs single molecules; fabrication of nanoparticles and nanostructured materials; scanning probe microscopy; advanced optical imaging and manipulation. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 674, SOLID STATE PHYSICS, MAGNETISM, 2 Credits
Magnetism of atoms; interaction between magnetic atoms, magnetic ordering in crystalline solids; excitations in magnetic solids; temperature dependent phenomena in magnetic solids; magnetism of metals, alloys, insulators and semiconductors; topics of considerable interest in contemporary research.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 681, ATOMIC, MOLECULAR AND OPTICAL PHYSICS, MODERN OPTICS, 3 Credits
Maxwell’s equations in matter; refraction, phase and group indices; material and geometry dispersion; effective-medium regime. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 682, ATOMIC, MOLECULAR, OPTICAL PHYSICS, SEMICONDUCTOR OPTICS, 3 Credits
Linear response theory; polarization effects; interband excitations and emissions; low dimensional systems; excitons; phonons; semiconductor lasers; photovoltaics. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 683, ATOMIC, MOLECULAR AND OPTICAL PHYSICS, NONLINEAR OPTICS, 3 Credits
Coherent nonlinear electromagnetic phenomena; harmonic generation and parametric mixing; quantum mechanical description of multi-photon interactions; incoherent multi-photon interactions; coherent nonlinear optical phenomena and spectroscopies. Not offered every year.
Recommended: Basic knowledge of electromagnetism and quantum mechanics

PH 684, ATOMIC, MOLECULAR AND OPTICAL PHYSICS, ULTRAFAST OPTICS, 2 Credits
Introduction of ultrafast optical science; short pulse propagation in linear media; pulse stretching and compressing; Q-switching and mode-locking; characterization of femtosecond lasers; coherent optical effects. Offered in alternate years.
Recommended: Basic knowledge of electromagnetism and quantum mechanics.

PH 699, SPECIAL TOPICS: BIOLOGICAL PHYSICS, 3 Credits
Topics vary from year to year. Not offered every year.
This course is repeatable for 9 credits.

Physics Graduate Major (MA, MS, PhD)
Graduate Areas of Concentration
Atomic physics, computational physics, nuclear physics, optical physics, particle physics, physics education, relativity, solid state physics

The Department of Physics offers courses and research experience leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Advanced-degree candidates may pursue thesis research in experimental, computational, or theoretical AMO (atomic, molecular, and optical) physics, nuclear and particle physics, or solid state physics. Special programs are available for students who are preparing for careers in undergraduate teaching. Thesis and nonthesis programs are offered that lead to the MS and MA degrees. A written comprehensive examination must be passed prior to the nonthesis master’s final oral or the PhD preliminary oral examination. There are no foreign language requirements.

The department maintains a vigorous colloquium program in which well-known physicists present lectures on current research. Students are invited to participate in topical seminars offered regularly in each of the major research areas for the discussion of research results and for studies of specialized subjects at an advanced level.

Fellowships and assistantships are offered to qualified graduate students. A descriptive brochure is available from the Department of Physics.

**Electives**

Select 12 credits of upper division courses approved by the head undergraduate advisor.

Total Credits: 27

* Baccalaureate Core Course (BCC)

**Minor Code:** 590

**Physics Undergraduate Major (BA, BS, HBA, HBS)**

This major offers the following option(s):

- Applied Physics (p. 1598)
- Biological Physics (p. 1598)
- Chemical Physics (p. 1599)
- Computational Physics (p. 1599)
- Geophysics (p. 1600)
- Mathematical Physics (p. 1600)
- Optical Physics (p. 1601)
- Physics Teaching/Physics (p. 1601)

**Major Code:** 590

- Organize and carry out long, complex physics problems.
- Decide on strategies to be used and assumptions that need to be made.
- Determine what constitutes sufficient evidence for a conclusion.
- Use both algebraic and geometric approaches in problem-solving.
- Computationally model the behavior of physical systems.
- Troubleshoot difficulties encountered in experiments or computations.
- Translate physical descriptions into mathematical equations, and conversely, explain the physical meaning of mathematical results.
- Examine intermediate results or other quantities that could be used to ensure a solution is physically reasonable.
- Identify what they don’t understand, and ask specific questions in order to gain understanding.
- Articulate where they experience difficulty, and take actions to move beyond that difficulty.
- Write effectively using professional norms.
- Present work verbally using professional norms.

- Use graphs and diagrams to convey their results.
- Write down clear step-by-step mathematical reasoning and equations.
- Collaborate with other students.
- Design an experiment to measure a given physical quantity.
- Make measurements on physical systems.
- Estimate sources of error in a measurement.
- Interpret their measurements, taking into account the limitations of the measurements and the limitations of models.

All physics majors must complete the following courses:

**Baccalaureate Core**

Select one of the following: 15-22

- Baccalaureate Core Course (BCC)
- Writing Intensive Course (WIC)

**Bachelor of Science in Physics**

For graduation with a Bachelor of Science degree in Physics under the basic physics option, additional course requirements consist of:
Bachelor of Arts in Physics

To graduate with a Bachelor of Arts degree in Physics, additional course requirements consist of:

- Total Credits: 180
- Physics: 74
- PH Elective must be 400 level course (not 40x)
- Not shown are the Baccalaureate Core courses required by the university: Skills (Fitness, Speech, WR I, WR II), Perspectives (Cultural Diversity, Literature & the Arts, Social Processes & Institutions, Western Culture, and Difference, Power, & Discrimination), Synthesis (Contemporary Global Issues and Science, Technology, & Society)

### Major Code: 590

- Select two of the following:
  - PH 431 CAPSTONE IN PHYSICS: ELECTROMAGNETISM
  - PH 441 CAPSTONE IN PHYSICS: THERMAL AND STATISTICAL PHYSICS
  - PH 451 CAPSTONE IN PHYSICS: QUANTUM MECHANICS

Select 9 credits of approved electives

Total Credits: 15

The student must complete 9 credits of approved electives in the College of Liberal Arts and must complete or demonstrate proficiency in the second year of a foreign language.

---

**Biological Physics Option**

This option is offered within the following major(s):

- Physics - College of Science (p. 1596)

The Biological Physics option allows students to focus part of their course load on work in the field of biophysics.

**Option Code: 586**

- PH 403 *THESIS

### Mathematical Physics Electives

Select 15 credits

### Total Credits

114

15 credits of approved upper-division courses in physics or optics at the 400 level or beyond, including at least one laboratory course, which form a coherent set. At least 8 of these credits must be in optics.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)
BB 314, CELL AND MOLECULAR BIOLOGY, 4 Credits

Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.

Prerequisite: ( [(BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])] or ([(BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])] ) ) or ([(BI 204 [C-] and BI 205 [C-] and BI 206 [C-])] ) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])

Equivalent to: BB 314H, BI 314, BI 314H

Available via Ecampus

BB 314H, CELL AND MOLECULAR BIOLOGY, 4 Credits

Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.

Attributes: HNRS – Honors Course Designator

Prerequisite: ( [(BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])] or ([(BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])] ) ) or ([(BI 204 [C-] and BI 205 [C-] and BI 206 [C-])] ) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])

Equivalent to: BB 314, BI 314, BI 314H

BB 315, MOLECULAR BIOLOGY LABORATORY, 3 Credits

Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.

Prerequisite: BB 314 with C- or better or BB 314H with C- or better

Equivalent to: BI 315

BB 317, ^SCIENTIFIC THEORY AND PRACTICE, 3 Credits

Teaches students the practice of biological science. Topics cover scientific theory, communications, ethics and critical evaluation.

CROSSLISTED as BB 317/BI 317. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

Prerequisite: ( [(BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])] or ([(BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])] ) ) or ([(BI 204 [C-] and BI 205 [C-] and BI 206 [C-])] ) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])

Equivalent to: BI 317
BB 331, *INTRODUCTION TO MOLECULAR BIOLOGY, 3 Credits
Course dealing with the molecular basis of cellular function, with emphasis upon modern developments, and the foundation for practical applications of this knowledge. The course will involve the conceptual background necessary to appreciate the applications of molecular biology. Throughout the course opportunities will be given to discuss public policy issues and questions: What are the moral and practical problems that flow from identification of an individual as being at risk for a late-appearing genetic disorder, such as Huntington's disease or certain cancers? Does the scientific or public value of knowing the entire DNA sequence of the human genome justify a situation in which individual or small-scale research cannot be supported? What issues arise when the fruits of biological research, mostly publicly funded, are commercialized? Should a novel organism be patented? How can biotechnology be applied to environmental problems? (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: CH 122 with D- or better or CH 202 with D- or better
Available via Ecampus

BB 332, *MOLECULAR MEDICINE, 3 Credits
Provides students an understanding of medical advances from a rapidly evolving molecular point of view. Advances in knowledge of the human genome arising from DNA sequencing efforts and major leaps in understanding of the regulating cellular growth and division are presented in an easy-to-understand fashion appropriate for students in all majors. Course discussions and assignments will cover implications of advances in molecular medicine from ethical, economic, technical and societal standpoints. The aim of the course is to present technical material in a way that non-scientists will understand and conversely to summarize ethical, economic, and philosophical considerations in a way that the scientists understand the implications of these technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Any biology course.

BB 345, INTRODUCTION TO BIOLOGICAL SEQUENCE ANALYSIS, 2 Credits
Introduction to computer-based analyses of biomolecular data, particularly nucleic acid and protein sequences, with the Python programming language. Topics include reading and writing of sequence files, subsequences, reverse complement, finding sequence patterns, subroutines, control structures, and parsing complex data files.

BB 350, ELEMENTARY BIOCHEMISTRY, 4 Credits
Service course for students desiring a short introduction to biochemistry. Four lectures weekly.
Prerequisite: CH 331 with D- or better and CH 332 (may be taken concurrently) [D-]
Available via Ecampus

BB 360, INTRODUCTION TO NEUROSCIENCE, 3 Credits
An introduction to the field of neuroscience. Topics include structure of neurons, outline of signaling in the central nervous system, Nernst equation, action potentials, synaptic transmission, chemical signaling in vision, disease and drugs.
Prerequisite: (( BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-I]) and (BI 213 [C-] or BI 213H [C-I])) or ((BI 221 [C-] or BI 221H [C-I]) and (BI 222 [C-] or BI 222H [C-I]) and (BI 223 [C-] or BI 223H [C-I])) and (CH 233 [C-] or CH 233H [C-I]) and (CH 263 [C-] or CH 263H [C-I])
Available via Ecampus

BB 361, NEUROSCIENCE OF SENSORY AND MOTOR SYSTEMS, 3 Credits
Provides advanced knowledge and understanding of the structure and function of the sensory and motor systems and the interactions between them. These systems will be considered in the context of human physiology.
Prerequisite: BB 360 with C- or better

BB 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: BB 399H
This course is repeatable for 16 credits.

BB 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 399
This course is repeatable for 16 credits.

BB 401, UNDERGRADUATE RESEARCH, 1-16 Credits
Equivalent to: BB 401H
This course is repeatable for 16 credits.

BB 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

BB 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BB 405H
This course is repeatable for 16 credits.

BB 407, BIOCHEMISTRY/BIOPHYSICS SEMINAR, 1-16 Credits
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. Graded P/N.
Equivalent to: BB 407H
This course is repeatable for 99 credits.
**BB 407H, BIOCHEMISTRY/BIOPHYSICS SEMINAR, 1-16 Credits**
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics.
**Attributes:** HNRS – Honors Course Designator
**Equivalent to:** BB 407
This course is repeatable for 99 credits.

**BB 410, INTERNSHIP, 1-16 Credits**
This course is repeatable for 16 credits.

**BB 450, GENERAL BIOCHEMISTRY, 4 Credits**
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures.
**Prerequisite:** CH 332 with D- or better or CH 336 with D- or better
**Equivalent to:** BB 450H
Available via Ecampus

**BB 451, GENERAL BIOCHEMISTRY, 3 Credits**
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures.
**Prerequisite:** BB 450 with D- or better or BB 450H with D- or better
**Equivalent to:** BB 451H
Available via Ecampus

**BB 453, BIOCHEMISTRY AND MOLECULAR BIOLOGY LABORATORY TECHNIQUES, 4 Credits**
Laboratory course for non-majors that introduces students to biochemistry and molecular biology techniques used to investigate the functional relationship between nucleic acid sequence, gene expression, and protein function.
**Prerequisite:** BB 451 with C- or better

**BB 460, ADVANCED CELL BIOLOGY, 3 Credits**
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology. Offered every other fall in odd years.
**Prerequisite:** BB 314 with C- or better or BB 451 with C- or better

**BB 481, MACROMOLEULAR STRUCTURE, 3 Credits**
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.
**Prerequisite:** BB 450 with D- or better or BB 490 with D- or better
Available via Ecampus

**BB 482, BIOPHYSICS, 3 Credits**
Examines quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
**Prerequisite:** BB 481 with D- or better and CH 440 [D-]

**BB 483, ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE, 3 Credits**
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
**Prerequisite:** BB 482 with D- or better or BB 582 with D- or better

**BB 484, CHROMATIN AND EPIGENETICS, 3 Credits**
An in-depth look at ‘chromatin’ (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of ‘epigenetic’ gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.
**Prerequisite:** (BI 314 with C- or better or BI 314H with C- or better or BB 314 with C- or better or BB 314H with C- or better) and (BI 315 [C-] or BB 315 [C-] or BB 493 [C-] or BB 493H [C-])

**BB 485, APPLIED BIOINFORMATICS, 3 Credits**
Fundamental concepts needed to understand the software and methods used in bioinformatics. Includes contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChiP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.
**Prerequisite:** BB 314 with C- or better or BB 314H with C- or better
Available via Ecampus
BB 486, ADVANCED MOLECULAR GENETICS, 3 Credits
Covers aspects of transmission genetics (Mendel's laws, mapping strategies) informed by the machineries required for genetic information storage, transcription, translation, and protein processing. Analyses of state-of-the-art primary literature and lectures give a perspective on important “model” organisms, including examples from among bacteria, plants, fungi, and animals.
Prerequisite: (BB 314 with C- or better or BB 314H with C- or better) and (BB 492 [C-] or BB 451 [C-])

BB 490, BIOCHEMISTRY 1: STRUCTURE AND FUNCTION, 3 Credits
Examines how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.
Prerequisite: (CH 332 with C- or better or CH 336 with C- or better) and (((Bi 211 with C- or better or Bi 211H with C- or better) and (Bi 212 [C-] or Bi 212H [C-])) or ((Bi 213 [C-] or Bi 213H [C-]) or ((Bi 221 [C-] or Bi 221H [C-]) or (Bi 222 [C-] or Bi 222H [C-])))

BB 491, BIOCHEMISTRY 2: METABOLISM, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisite: BB 490 with D- or better or BB 590 with D- or better

BB 492, BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisite: (BB 490 with D- or better or BB 590 with D- or better) and (BB 491 [D-] or BB 591 [D-])

BB 493, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, 3 Credits
Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisite: (BB 451 with D- or better or BB 451H with D- or better) or BB 492 with D- or better
Equivalent to: BB 493H

BB 494, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, 3 Credits
Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisite: BB 493 with D- or better or BB 593 with D- or better or BB 315 with D- or better or BI 315 with D- or better
Equivalent to: BB 494H

BB 498, ASBMB CERTIFICATION EXAM, 0 Credits
A comprehensive, standardized test administered by the American Society of Biochemistry and Molecular Biology and used as a direct assessment of the discipline specific knowledge of seniors in the majors administered by the Biochemistry and Biophysics department. A pass will be given to all students who complete the exam. Contact the Biochemistry and Biophysics Program for more information.

BB 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
This course is repeatable for 16 credits.

BB 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BB 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BB 507, SEMINAR, 1-2 Credits
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented.
This course is repeatable for 16 credits.

BB 550, GENERAL BIOCHEMISTRY, 4 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.
Recommended: CH 332
Available via Ecampus

BB 551, GENERAL BIOCHEMISTRY, 3 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.
Recommended: BB 550
Available via Ecampus

BB 560, ADVANCED CELL BIOLOGY, 3 Credits
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology
Recommended: BB 314 or BI 314 or BI 314H or BB 492 or BB 451
**BB 581, MACROMOLECULAR STRUCTURE, 3 Credits**

An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.

**Recommended:** BB 450 or BB 490

*Available via Ecampus*

**BB 582, BIOPHYSICS, 3 Credits**

Examines quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.

**Prerequisite:** BB 581 with D- or better

**BB 583, ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE, 3 Credits**

Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.

**Prerequisite:** BB 582 with C or better

**BB 584, CHROMATIN AND EPIGENETICS, 3 Credits**

An in-depth look at ‘chromatin’ (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of ‘epigenetic’ gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.

**Recommended:** (BI 314 or BI 314H) and BI 315

**BB 585, APPLIED BIOINFORMATICS, 3 Credits**

Fundamental concepts needed to understand the software and methods used in bioinformatics. Includes contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.

**Recommended:** BB 314 or BB 314H

*Available via Ecampus*

**BB 586, ADVANCED MOLECULAR GENETICS, 3 Credits**

Covers aspects of transmission genetics (Mendel’s laws, mapping strategies) informed by the machineries required for genetic information storage, transcription, translation, and protein processing. Analyses of state-of-the-art primary literature and lectures give a perspective on important “model” organisms, including examples from among bacteria, plants, fungi, and animals.

**Recommended:** (BI 314 or BI 314H) and BI 315 and BB 492

**BB 590, BIOCHEMISTRY 1: STRUCTURE AND FUNCTION, 3 Credits**

Examines how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.

**BB 591, BIOCHEMISTRY 2: METABOLISM, 3 Credits**

Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.

**Prerequisite:** BB 590 with C or better

**BB 592, BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, 3 Credits**

Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.

**Prerequisite:** BB 590 with C or better and BB 591 [C]

**BB 593, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, 3 Credits**

Laboratory course to accompany BB 450, BB 451 or BB 499, BB 491, BB 492. Lec/lab.

**Recommended:** (BB 451 or BB 451H) or BB 492

**BB 594, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, 3 Credits**

Laboratory to accompany BB 450, BB 451 or BB 499, BB 491, BB 492. Lec/lab.

**Recommended:** BB 493 or BB 593 or BB 315 or BI 315

**BB 599, SPECIAL TOPICS, 0-16 Credits**

Topics and credits vary. 

*This course is repeatable for 16 credits.*

**BB 601, RESEARCH, 1-16 Credits**

*This course is repeatable for 16 credits.*

**BB 603, THESIS, 1-16 Credits**

*This course is repeatable for 999 credits.*
BB 605, READING & CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BB 607, SEMINAR, 1-2 Credits
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented. 
This course is repeatable for 16 credits.

BB 650, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, cell cycle and cancer, neurochemistry, oxidative stress, cell adhesion and motility. Most courses offered alternate years. This course is repeatable for 18 credits.

BB 651, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include cell surfaces, enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years. This course is repeatable for 18 credits.

BB 652, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years. This course is repeatable for 18 credits.

BB 699, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BioHealth Sciences (BHS)
BHS 107, HEALTH PROFESSIONS: DENTAL, 1 Credit
Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.

BHS 110, BIOHEALTH SCIENCES ORIENTATION, 1 Credit
Introduction of incoming BioHealth Sciences students to college life with an emphasis on faculties, facilities, services, and curricula in BHS. Exposure to career opportunities for students interested in the BioHealth Sciences. Graded P/N.

BHS 199, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
Equivalent to: GS 199
This course is repeatable for 16 credits.

BHS 211, PROFESSIONAL DEVELOPMENT II: MOLECULAR, MICROBIAL, BIOHEALTH, 1 Credit
Develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N. CROSSLISTED as BB 211/BHS 211.
Equivalent to: BB 211

BHS 255, *ALLIED HEALTH MICROBIOLOGY, 4 Credits
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSLISTED as BHS 255/MB 255.
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 255
Available via Ecampus

BHS 316, PRINCIPLES OF IMMUNOLOGY, 3 Credits
Interactions of the innate and adaptive immune responses in the context of infectious diseases, autoimmune diseases, immunodeficiencies and immunotherapies. This course is designed for non-microbiology majors. Prerequisite: MB 230 with C- or better or (BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C- or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

BHS 320, HUMAN BACTERIOLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C- and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C- or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-])
Available via Ecampus
BHS 323, *MICROBIAL INFLUENCES ON HUMAN HEALTH, 3 Credits
How microorganisms contribute in beneficial and detrimental ways to human health. Emphasis on microbial contributions to cancer, gut health, chronic infection and autoimmune diseases. This course is part of the Writing Intensive Curriculum for the BioHealth Sciences major. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MB 302 with D- or better or (BB 314 with D- or better or BB 314H with D- or better) or BB 450 with D- or better
Available via Ecampus

BHS 329, MECHANISMS OF DISEASE: INTRODUCTION TO GENERAL PATHOLOGY, 3 Credits
An introduction to basic principles of disease, focused on structural and functional changes of cells, tissues and organs, and their relationships to clinical disease. The emphasis of the course is at the cellular to organ level, but will cover some on molecular mechanisms as pertinent.
Prerequisite: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D] or BI 212H [D-]) or ((BI 221 [D] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]))
Available via Ecampus

BHS 340, HUMAN VIROLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: MB 340
Available via Ecampus

BHS 410, SCIENCE INTERNSHIP, 1-12 Credits
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
Equivalent to: GS 410
This course is repeatable for 12 credits.

BHS 415, ONE HEALTH IN PRACTICE, 3 Credits
One health is the concept that human, animal and environmental health are all intertwined. Utilizes current one health issues such as disease outbreaks and antimicrobial resistance to encourage students from diverse fields to develop interdisciplinary collaboration and communication skills. CROSSLISTED as BHS 415/VMB 415.
Equivalent to: VMB 415
Recommended: At least third-year standing.

BHS 499, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

Biology (BI)
BI LD1, GENERAL CREDIT, 1-16 Credits
BI LD2, GENERAL CREDIT, 1-16 Credits
BI 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

BI 101, *ENVIRONMENTAL BIOLOGY: ECOLOGY, CONSERVATION, GLOBAL CHANGE, 4 Credits
Introduction to ecosystems, including biodiversity, species interactions, human impacts, and conservation biology. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 102 or 103. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Available via Ecampus
**BI 102, *ANIMAL BIOLOGY: GENES, BEHAVIOR AND EVOLUTION OF LIFE, 4 Credits**

Introduction to how genetics shapes life on Earth, including how understandings of DNA and environmental factors are leading to biotechnological advances. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 103. Lec/lab/rec. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

Equivalent to: BI 102H

Available via Ecampus

**BI 103, *HUMAN BIOLOGY: ANATOMY, PHYSIOLOGY AND DISEASE, 4 Credits**

Introduction to the biology of humans, including aspects of human health and disease. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 102. Lec/lab/rec. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

Equivalent to: BI 103H

**BI 109, HEALTH PROFESSIONS: MEDICAL, 1 Credit**

Discussion of matters relating to a medical career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education, and related matters. Speakers are included. Graded P/N.

**BI 111, INTRODUCTION TO MARINE LIFE IN THE SEA: MARINE HABITATS, 1 Credit**

A field-focused learning experience exploring the varied marine life and habitats on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays and estuaries. Students will also be introduced to the breadth of marine science course offerings and research at Oregon State University’s Hatfield Marine Science Center located in Newport, Oregon. Graded P/N.

Equivalent to: FW 111

Available via Ecampus

**BI 150, INTRODUCTION TO MARINE BIOLOGY, 3 Credits**

Survey of marine organisms, the environments they inhabit, and their evolutionary adaptations for thriving in those environments. The course will also highlight current conservation challenges that threaten marine life, such as climate change, overfishing, and pollution.

**BI 175, *GENOMES, IDENTITIES AND SOCIETIES, 3 Credits**

DNA’s roles in shaping our senses of identity, individuality, and societal interconnectivity will be analyzed. New advances in genetic technology will be explored, along with their potential impacts on society. The relationships between genetics and discrimination will be examined with focus on cases from Oregon, America, and the world. (Bacc Core Course)

Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

**BI 197, PROFESSIONAL DEVELOPMENT I: HEALTH PROFESSIONS, 1 Credit**

Integrative Biology faculty and other professionals introduce a variety of human health professions including dentistry, medicine, pharmacy and others (veterinary medicine students take BI 198). Emphasizes professional development through exploring relevant social and cognitive concepts, as well as engaging in experiential learning and networking. Departmental and campus student success resources are highlighted. Graded P/N.

**BI 198, PROFESSIONAL DEVELOPMENT I: BIOLOGY AND ZOOLOGY, 1 Credit**

Integrative Biology faculty and biology professionals introduce life science careers outside of human health professions (human health profession students take BI 197). Emphasizes professional development through exploring relevant social and cognitive concepts, as well as engaging in experiential learning and networking. Departmental and campus student success resources are highlighted. Graded P/N.

Available via Ecampus

**BI 199, SELECTED TOPICS, 1-16 Credits**

Field Ecology.

Equivalent to: BI 199H

This course is repeatable for 16 credits.

**BI 199H, SELECTED TOPICS, 1-16 Credits**

Attributes: HNRS – Honors Course Designator

Equivalent to: BI 199

This course is repeatable for 16 credits.

**BI 204, *INTRODUCTORY BIOLOGY I, 4 Credits**

Foundations of biological sciences including scientific inquiry, genetics, evolution, and ecology. Significant emphasis throughout on the application of core concepts to solve human and environmental problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)

Attributes: CPBS – Core, Pers, Biological Science

Available via Ecampus
BI 205, *INTRODUCTORY BIOLOGY II, 4 Credits
Fundamental concepts in molecular and cellular biology, beginning with biomolecules and the origin of life, and ending with genomics. Significant emphasis throughout on applications of biotechnology to solve human problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-] or CH 271H (may be taken concurrently) [D-]))
Available via Ecampus

BI 206, *INTRODUCTORY BIOLOGY III, 4 Credits
Basic plant and animal physiology from an evolutionary perspective. Significant emphasis on topics of importance to human society, including human and plant disease. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health professional students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-] or CH 271H (may be taken concurrently) [D-]))
Available via Ecampus

BI 211, *PRINCIPLES OF BIOLOGY, 4 Credits
Origins of life, energy transformations, plant and animal diversity. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BI 211H

BI 211H, *PRINCIPLES OF BIOLOGY, 4 Credits
Origins of life, energy transformations, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: BI 211

BI 212, *PRINCIPLES OF BIOLOGY, 4 Credits
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])
Equivalent to: BI 212H

BI 212H, *PRINCIPLES OF BIOLOGY, 4 Credits
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 212

BI 213, *PRINCIPLES OF BIOLOGY, 4 Credits
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213H

BI 213H, *PRINCIPLES OF BIOLOGY, 4 Credits
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213
BI 221, *PRINCIPLES OF BIOLOGY: CELLS, 4 Credits
Introduction to fundamental biological concepts and theories about the chemical and molecular basis of life, structure and function, transformation of energy and matter and information flow at a cellular and molecular level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 221H

BI 221H, *PRINCIPLES OF BIOLOGY: CELLS, 4 Credits
Introduction to fundamental biological concepts and theories about the chemical and molecular basis of life, structure and function, transformation of energy and matter and information flow at a cellular and molecular level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 221

BI 222, *PRINCIPLES OF BIOLOGY: ORGANISMS, 4 Credits
Introduction to fundamental biological concepts and theories about plant, and animal physiology, evolution, structure and function, transformation of energy and matter and systems at an organismal level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with D- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 222H

BI 222H, *PRINCIPLES OF BIOLOGY: ORGANISMS, 4 Credits
Introduction to fundamental biological concepts and theories about plant, and animal physiology, evolution, structure and function, transformation of energy and matter and systems at an organismal level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 222

BI 223, *PRINCIPLES OF BIOLOGY: POPULATIONS, 4 Credits
Introduction to fundamental biological concepts and theories about diversity, evolution, and ecology; specifically, evolutionary relationships, transformation of energy and matter, information flow and systems at a population level or above. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 223H

BI 223H, *PRINCIPLES OF BIOLOGY: POPULATIONS, 4 Credits
Introduction to fundamental biological concepts and theories about diversity, evolution, and ecology; specifically, evolutionary relationships, transformation of energy and matter, information flow and systems at a population level or above. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 223

BI 231, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The first of a three-term introductory series. Using a strong gross anatomy focus, course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeleton, muscular and integumentary systems. BI 231 is a required prerequisite to BI 232 and BI 233. The BI 241 Lab is optional but prerequisite for either of the subsequent BI 242 or BI 243 lab courses in the series. Lec.
BI 232, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The second of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the human nervous, endocrine and reproductive systems. Lec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better

BI 233, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The third of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human nervous, endocrine and reproductive systems. Lec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better

BI 241, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The first of a three-term introductory series. Using the human cadaver (prosection), course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeletal, muscular and integumentary systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better

BI 242, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The second of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better and BI 232 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 243, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The third of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better and BI 233 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 298, PROFESSIONAL DEVELOPMENT FOR BIOLOGISTS II, 1 Credit
Students will develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N.
Equivalent to: BI 298H
Available via Ecampus

BI 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BI 301, *HUMAN IMPACTS ON ECOSYSTEMS, 3 Credits
Selected human impacts on ecosystems are examined in depth, including air quality, global climate change, management of agricultural and forest resources, and threats to biological diversity. The causes, approaches to investigating, and potential solutions for each issue are discussed from a scientific and social perspective. Adverse effects on ecosystems that result from each environmental problem are examined. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: One year of college biology or chemistry

BI 306, *ENVIRONMENTAL ECOLOGY, 3 Credits
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: BI 306H
Recommended: One year of college biology and chemistry

BI 306H, *ENVIRONMENTAL ECOLOGY, 3 Credits
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: BI 306
Recommended: One year of college biology and chemistry

BI 309, TEACHING PRACTICUM, 1-6 Credits
Introductory experience for students assisting with instruction in Biology or Zoology courses. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.
BI 311, GENETICS, 4 Credits
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) or (BI 213 [C-] or BI 213H [C-]) or (BI 219 [C-] or BI 219H [C-]) or (BI 221 [C-] or BI 221H [C-]) or BI 222 [C-] or BI 222H [C-])
Equivalent to: BI 311H
Available via Ecampus

BI 311H, GENETICS, 4 Credits
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: BI 311

BI 315, MOLECULAR BIOLOGY LABORATORY, 3 Credits
Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BB 315

BI 319, THEORY, PRACTICE AND DISCOURSE IN THE LIFE SCIENCES, 3 Credits
The practice of science and the critical evaluation of scientific claims are explored through writings, discussions and presentations. Topics including the scientific method, ethics and the role of science in society are examined along with implications for professionals ranging from health care to environmental biology. Strategies for effectively communicating science with diverse audiences are emphasized. (Writing Intensive Course).
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) or (BI 213 [C-] or BI 213H [C-]) or (BI 219 [C-] or BI 219H [C-]) or (BI 221 [C-] or BI 221H [C-]) or BI 222 [C-] or BI 222H [C-]) and (ST 351 [D-] or ST 351H [D-])
Available via Ecampus

BI 331, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The first of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the skeletal, muscular and integumentary systems. Lec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) and (CH 123 [C-] or (CH 233 [C-] or CH 233H [C-]) or (CH 263 [C-] or CH 263H [C-])) and BI 341 (may be taken concurrently) [C-]

BI 332, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The second of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Lec.
Prerequisite: BI 331 with C- or better and BI 342 (may be taken concurrently) [C-]

BI 333, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The third part of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the cardiovascular, respiratory, urinary and digestive systems. Lec.
Prerequisite: BI 332 with C- or better and BI 343 (may be taken concurrently) [C-]

BI 341, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The first of a three-term advanced series. Using the human cadaver (prosection) and physiological data acquisition equipment, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the human skeletal, muscular and integumentary systems. Lab.
Corequisites: BI 331

BI 342, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The second of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human nervous, endocrine and reproductive systems. Lab.
Corequisites: BI 332
BI 343, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The third of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human cardiovascular, respiratory, urinary and digestive systems. Lab.
Corequisites: BI 333

BI 345, *INTRODUCTION TO EVOLUTION, 3 Credits
Elements of evolutionary theory; origin and history of life; evolutionary controversy; origins of species, sex, and humans. (Bacc Core Course) Attributes: CSST – Core, Synthesis, Science/Technology/Society Equivalent to: Z 345 Available via Ecampus

BI 347, *OCEANS IN PERIL, 3 Credits
The interactions of society and the marine environment, emphasizing the ecological, biogeochemical, economic, sociological, and political significance of the oceans. Topics of current critical importance will include marine pollution, protecting marine habitats, conserving marine biodiversity, fisheries and aquaculture, ocean energy, biogeochemical change, global warming, ocean acidification, and sea level rise. (Bacc Core Course) Attributes: CSST – Core, Synthesis, Science/Technology/Society Prerequisite: BI 101 with C- or better or BI 102 with C- or better or BI 211 with C- or better or BI 211H with C- or better or BI 213 with C- or better or BI 213H with C- or better or BI 204 with C- or better or BI 150 with C- or better or BI 221 with C- or better or BI 221H with C- or better Available via Ecampus

BI 348, *HUMAN ECOLOGY, 3 Credits
The impact of humans on the environment, emphasizing the political, sociological, and ecological consequences of human population growth. Topics of current critical importance will include global warming trends, destruction of the ozone layer, consequences of pollution, habitat destruction, the loss of biodiversity, and conservation biology. (Bacc Core Course) Attributes: CSST – Core, Synthesis, Science/Technology/Society Equivalent to: Z 348 Available via Ecampus

BI 351, MARINE ECOLOGY, 3 Credits
Ecological interactions and principles in different marine habitats. Topics include the organisms (plants, invertebrates, vertebrates) found in major habitats and interactions between organisms. Habitats discussed include coral reefs, rocky shores, kelp forests, near-shore waters, open-ocean waters, and the deep sea. Emphasis is placed on how organism-organism interactions produce varying patterns of distribution, abundance, body size, diversity, stability, and succession. Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))
Equivalent to: Z 351 Available via Ecampus

BI 353, PACIFIC NORTHWEST COASTAL ECOSYSTEMS, 4 Credits
A field-based introduction to the diversity of ecosystems of the Pacific Northwest coast. Biological and physical processes affecting the distribution, structure, community composition and physical features of these systems are explored through a variety of lectures and field trips. Ecosystem services and human impacts are examined. Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 358, SYMBIOSES AND THE ENVIRONMENT, 3 Credits
Overview of the diversity of mutualistic symbioses and their roles in the natural environment. Integrative approach, from ecosystem to molecule, to the examination of certain key mutualisms. Lec. Offered alternate years. Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or (CH 233 [C-] and CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-]))

BI 370, ECOLOGY, 3 Credits
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization. Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or (BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])))
Equivalent to: BI 370H Available via Ecampus

BI 370H, ECOLOGY, 3 Credits
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization. Attributes: HNRS – Honors Course Designator Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])))

BI 371, ^ECOLOGICAL METHODS, 3 Credits
Experimental design, data collection, analysis and synthesis in ecological studies; local ecosystems emphasized. May have field trip fee. Lec/lab. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC Prerequisite: BI 370 with D- or better or BI 370H with D- or better
BI 373, *FIELD METHODS IN MARINE ECOCOLGY, 3 Credits
Exposure to research methods used in field studies of the marine rocky intertidal ecosystem. Research projects and writing exercises provide students with hands-on experience of collecting, analyzing, and presenting marine ecological data. Field trip fee. Lab fee. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (BI 351 (may be taken concurrently) with D- or better or BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])
Recommended: ST 352

BI 375, FIELD METHODS IN ECOLOGICAL RESTORATION, 4 Credits
Observation and application of theory and practice in ecological restoration. Using site visits and hands-on research, explores the roles in restoration of fire, local adaptation, disturbance history, natural history, beaver, and soils, including visits to several active and completed restoration projects and overnight in the field. Lab.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 399, SPECIAL TOPICS, 0-16 Credits
May be repeated for 16 total credits.
Equivalent to: BI 399H
This course is repeatable for 16 credits.

BI 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: BI 401H
This course is repeatable for 16 credits.

BI 401H, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 401
This course is repeatable for 16 credits.

BI 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BI 405H
This course is repeatable for 16 credits.

BI 406, PROJECTS: CURATORIAL ASSISTANT, 1-6 Credits
Students assist with curatorial projects in OSU biological collections. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 407, SEMINAR, 1 Credit
Departmental seminar. Graded P/N.
Equivalent to: BI 407H, BI 407H, BOT 407, BOT 407H
This course is repeatable for 16 credits.

BI 407H, SEMINAR, 1 Credit
Departmental seminar. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 407
This course is repeatable for 16 credits.

BI 409, ADVANCED TEACHING PRACTICUM, 1-6 Credits
Advanced practicum experience for students assisting in Biology or Zoology courses. Includes advanced training in course content and development of instructional materials. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 410, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.
Available via Ecampus

BI 420, *VIRUSES IN MODERN SOCIETY, 3 Credits
Impact of viruses on modern civilization. Molecular mechanisms of viral infectivity. Approaches to the prevention and cure of viral diseases. Role of viruses in agriculture and industry. Offered alternate years. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 311 with D- or better or BI 311H with D- or better or BI 314 with D- or better or BI 314H with D- or better
Equivalent to: Z 427

BI 427, PALEOBIOLOGY, 4 Credits
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))
Equivalent to: Z 427

BI 445, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Prerequisite: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445H

BI 445H, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Attributes: HNRS – Honors Course Designator
Prerequisite: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445
BI 450, *MARINE BIOLOGY AND ECOLOGY, 15 Credits*
A comprehensive lecture and laboratory introduction to the flora and fauna of the marine environment approached from the level of the organism to ecosystem. Ecological patterns and processes characteristic of marine communities will be emphasized. Lec/lab. Taught at Hatfield Marine Science Center, Newport, OR. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])
Recommended: ST 352
Available via Ecampus

BI 451, FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM, 4 Credits
In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. BI 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.
Prerequisite: ((BI 231 with D- or better and BI 241 (D-)] or (BI 331 [D-] and BI 341 [D-])) and (BI 232 [D-] and BI 242 [D-]) or (BI 332 [D-] and BI 342 [D-]) and ((BI 233 [D-] and BI 243 [D-]) or (BI 333 [D-] and BI 343 [D-]))
Equivalent to: Z 451

BI 454, EVOLUTIONARY GENOMICS, 3 Credits
Examines the evolutionary forces that have produced such varied and complex genomes across the tree of life. The processes by which genomes can be structured, maintained, and remodeled (by nature or by humans) are explored through scientific literature. Special emphasis will be given to recent technological advances in genomics, along with their potential impacts on individuals and society.
Prerequisite: BI 311 with D- or better or BI 311H with D- or better

BI 456, PHYLOGENETICS, 4 Credits
Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.
Prerequisite: (ST 351 with D- or better or ST 351H with D- or better) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-]) and (BI 311 [D-] or BI 311H [D-] or BI 445 [D-] or BI 445H [D-])

BI 481, BIOGEOGRAPHY, 3 Credits
Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today's rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.
Prerequisite: BI 370 with D- or better or BI 370H with D- or better
Equivalent to: Z 481

BI 483, POPULATION BIOLOGY, 3 Credits
Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.
Prerequisite: (MTH 241 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better or MTH 227 with D- or better) and (ST 351 [D-] or ST 351H [D-]) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-]) and (BI 311 [D-] or BI 311H [D-] or BI 370 [D-] or BI 370H [D-])
Available via Ecampus

BI 485, MONSTER BIOLOGY, 3 Credits
Scientists seek to explain what exists and why things are. An alternative approach is to ask why things are not. Biological and physical laws are used to critically and rigorously assess why monsters from literature, television and film are not possible in the real world.
Prerequisite: (BI 311 (may be taken concurrently) with D- or better or BI 311H (may be taken concurrently) with D- or better) and (BI 370 (may be taken concurrently) [D-] or BI 370H (may be taken concurrently) [D-])

BI 495, DISEASE ECOLOGY, 3 Credits
An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.
Prerequisite: BI 370 with C- or better or BI 370H with C- or better

BI 498, SENIOR BIOLOGY FIELD TEST, 0 Credits
A comprehensive, two-hour exam to assess the biological knowledge of Biology and Zoology seniors. Students must complete the exam in their final undergraduate term or during spring term if graduating during summer when it is not offered. A pass will be given to all students who complete the exam. More details at http://ib.oregonstate.edu/advising/MFT-info.
Available via Ecampus

BI 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
Equivalent to: BI 499H
This course is repeatable for 16 credits.

BI 499H, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 499
This course is repeatable for 16 credits.

BI 499H, SPECIAL STUDIES, 1-16 Credits
Topics and credits vary.
Equivalent to: BHS 199
This course is repeatable for 16 credits.

GS 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

GS 401, RESEARCH, 1-16 Credits
Equivalent to: BHS 401
This course is repeatable for 16 credits.
GS 403, THESIS, 1-16 Credits
Equivalent to: BHS 403
This course is repeatable for 16 credits.

GS 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BHS 405
This course is repeatable for 16 credits.

GS 407, SEMINAR, 1-16 Credits
One-credit sections. Graded P/N.
Equivalent to: BHS 407
This course is repeatable for 16 credits.

GS 410, SCIENCE INTERNSHIP, 1-12 Credits
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
Equivalent to: BHS 410
This course is repeatable for 12 credits.

Integrative Biology (IB)
IB 501, RESEARCH, 1-16 Credits
Graduate-level research completed under faculty supervision.
Equivalent to: Z 501
This course is repeatable for 16 credits.

IB 503, THESIS, 1-16 Credits
Master’s thesis, completed under faculty supervision.
Equivalent to: Z 503
This course is repeatable for 999 credits.

IB 505, READING AND CONFERENCE, 1-16 Credits
For graduate students working toward a master’s degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest.
Equivalent to: Z 505
This course is repeatable for 16 credits.

IB 506, PROJECTS: OUTREACH, 1-16 Credits
Graded P/N.
Equivalent to: BI 506
This course is repeatable for 16 credits.

IB 507, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: Z 507
This course is repeatable for 16 credits.

IB 510, INTERNSHIP, 1-16 Credits
Equivalent to: Z 510
This course is repeatable for 16 credits.

IB 511, INTEGRATIVE BIOLOGY GRADUATE STUDENT ORIENTATION, 2 Credits
Introduction to the graduate program in Integrative Biology and at OSU in general. Class introduces students to various skills for success in graduate school and beyond. Exploration of career options for those holding a degree in IB are explored. Graded P/N.

IB 512, INTEGRATIVE BIOLOGY GTA TRAINING AND DEVELOPMENT, 1 Credit
Provides instructional support and professional development for first year graduate teaching assistants (GTAs) in Integrative Biology. Focuses on developing a foundation for quality instruction, facilitation, and leadership as GTAs and professionals. Best practices, skills, theory and knowledge necessary for effective teaching, facilitation, and assessment of student learning are explored.
This course is repeatable for 3 credits.

IB 513, GRANT WRITING AND ETHICS, 3 Credits
Participants will write and submit a grant proposal by the end of the term. We discuss the main components of a typical grant proposal. Participants read and critique proposal drafts written by participants. Ethical issues are discussed as they are encountered.
Equivalent to: Z 585
This course is repeatable for 6 credits.

IB 515, SCIENCE COMMUNICATION: MAKING YOUR SCIENCE MATTER, 2 Credits
A practical, hands-on course designed to help science graduate students build knowledge and skills for engaging with audiences beyond their scientific peers. The science of science communication, the cultures of journalism and public policy, the changing roles of scientists in society, and science advocacy will be explored through lectures, invited talks, in-class discussions and exercises.

IB 518, SCIENCE AND POLICY, 2 Credits
An introduction to the science-policy interface in a ‘post-truth’ society. The formulation of state and federal public policy is examined, as well as and role of science and scientist in informing policy, management decisions and public understanding. Current topics are emphasized.

IB 522, COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY, 5 Credits
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
Equivalent to: Z 522
IB 523, ENVIRONMENTAL PHYSIOLOGY, 3 Credits
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
Equivalent to: Z 523

IB 525, EMBRYOLOGY AND DEVELOPMENT, 5 Credits
Equivalent to: Z 525

IB 527, PALEOBIOLGY, 0-4 Credits
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Equivalent to: BI 527

IB 531, VERTEBRATE PHYSIOLOGY I, 4 Credits
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in IB 531, IB 532 series.
Equivalent to: Z 531

IB 532, VERTEBRATE PHYSIOLOGY II, 3 Credits
Systems/concepts covered include blood, immune, lymphatic, cardiovascular, and pulmonary. Second in the IB 531, IB 532 series.
Equivalent to: Z 532

IB 538, BEHAVIORAL NEUROBIOLOGY, 3 Credits
Equivalent to: Z 538

IB 540, INSECT PHYSIOLOGY, 3 Credits
Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. The contributions of insect physiology to general physiological principles and biorational methods of insect pest control are discussed.
Equivalent to: Z 540

IB 545, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Equivalent to: BI 545

IB 551, FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM, 4 Credits
In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. IB 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.
Equivalent to: BI 551
Recommended: ((BI 231 and 241) or (BI 331 and 341)) and ((BI 232 and 242) or (BI 332 and 342)) and ((BI 233 and 243) or (BI 333 and 343))

IB 554, EVOLUTIONARY GENOMICS, 3 Credits
Examines the evolutionary forces that have produced such varied and complex genomes across the tree of life. The processes by which genomes can be structured, maintained, and remodeled (by nature or by humans) are explored through scientific literature. Special emphasis will be given to recent technological advances in genomics, along with their potential impacts on individuals and society.

IB 556, PHYLOGENETICS, 4 Credits
Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.
Equivalent to: BI 556

IB 561, MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY, 4 Credits
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center.
Equivalent to: Z 561

IB 573, HERPETOLOGY, 3 Credits
World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature.
Equivalent to: Z 573

IB 574, SYSTEMATIC HERPETOLOGY, 2 Credits
A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab.
Equivalent to: Z 574
IB 577, AQUATIC ENTOMOLOGY, 4 Credits
Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab.
Equivalent to: Z 577

IB 581, BIOGEOGRAPHY, 3 Credits
Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today’s rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.
Equivalent to: BI 581

IB 583, POPULATION BIOLOGY, 3 Credits
Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.
Equivalent to: BI 583

IB 592, THEORETICAL ECOLOGY, 4 Credits
A treatment of the central concepts of theoretical ecology, with emphasis on the analysis and modeling of single populations and multispecies communities. Topics include discrete- and continuous-time models of population growth, stochastic and deterministic processes, and the response of populations and communities to pulse and press perturbations.
Equivalent to: BI 592

IB 593, BEHAVIORAL ECOLOGY, 5 Credits
Behavioral ecology with emphasis on both theoretical and empirical approaches. Offered alternate years.
Equivalent to: Z 593

IB 594, COMMUNITY ECOLOGY, 5 Credits
Theory and analysis of multispecies associations. Emphasis on extent to which existing ecological theory is supported by natural phenomena. Course considers how biotic and abiotic mechanisms interact to regulate community organization and stability in marine, freshwater, and terrestrial habitats. Offered alternate years.
Equivalent to: Z 594

IB 595, DISEASE ECOLOGY, 3 Credits
An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.
Equivalent to: BI 595

IB 599, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary. Grading mode TBA. Taught at Hatfield Marine Science Center and Corvallis campus.
Equivalent to: Z 599
This course is repeatable for 16 credits.

IB 601, RESEARCH, 1-16 Credits
Doctoral-level research under faculty supervision. Graded P/N.
Equivalent to: Z 601
This course is repeatable for 16 credits.

IB 603, THESIS, 1-16 Credits
Doctoral thesis completed under faculty supervision.
Equivalent to: Z 603
This course is repeatable for 999 credits.

IB 605, READING AND CONFERENCE, 1-16 Credits
For graduate students working toward doctoral degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest.
Equivalent to: Z 605
This course is repeatable for 16 credits.

Microbiology (MB)
MB 110, ORIENTATION TO MICROBIOLOGY, 1 Credit
Introduction of incoming microbiology students to college life with an emphasis on faculties, facilities, services, and curricula in microbiology. Exposure to career opportunities in microbiology. Graded P/N.

MB 201, LABORATORY SKILLS, 1-16 Credits
These credits are designed for students who are doing experiential learning in a research laboratory on campus, performing basic laboratory tasks that are not elevated to the level of an independent research project. Graded P/N.
This course is repeatable for 16 credits.

MB 230, *INTRODUCTORY MICROBIOLOGY, 4 Credits
Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 230H
Available via Ecampus

MB 255, *ALLIED HEALTH MICROBIOLOGY, 4 Credits
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSLISTED as BHS 255/MB 255.
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BHS 255
Available via Ecampus

MB 290, SUCCESS IN MICROBIOLOGY, 1 Credit
Science skills, science literacy, ethics, and professional development to build a successful career in Microbiology. Learn the process of research, access and analyze primary literature, evaluate user-generated science content, practice professional skills, and identify and plan for experience-building opportunities such as jobs, research and internships. Sophomore standing or higher.
MB 299, SPECIAL TOPICS, 1-16 Credits
May be repeated for credit when topic varies.
Equivalent to: MB 299H
This course is repeatable for 16 credits.

MB 302, GENERAL MICROBIOLOGY, 3 Credits
Emphasis on cytology, physiology, virology, growth and control of growth with coverage of the role of microorganisms in nature, in disease, and as useful tools.
Prerequisite: (CH 332 with C- or better or CH 335 with C- or better) and ((BI 212 with C- or better or BI 212H with C- or better) and (BI 213H [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

MB 303, GENERAL MICROBIOLOGY LABORATORY, 2 Credits
Development of laboratory techniques; exercises designed to reinforce concepts covered in MB 302. MB 302 is a prereq that may be taken prior to or concurrently with MB 303. Lec/lab.
Prerequisite: MB 302 (may be taken concurrently) with D- or better
Equivalent to: MB 303H
Recommended: Two terms organic chemistry

MB 310, BACTERIAL MOLECULAR GENETICS, 3 Credits
Introductory concepts of bacterial molecular genetics. Topics include DNA replication, mutation, DNA repair, DNA recombination, transposons, bacteriophages, genetic manipulation, and gene regulation.
Prerequisite: MB 302 with D- or better and (BB 314 [D-] or BB 314H [D-]) and (CH 231 with D- or better or CH 231H with D- or better or CH 121 with D- or better) and (CH 232 [D-] or CH 232H [D-] or CH 122 [D-]) and (CH 233 [D-] or CH 233H [D-] or CH 123 [D-])
Equivalent to: MB 306

MB 311, *MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE, 3 Credits
Scientific writing, laboratory notebook composition, experimental design, and laboratory experiments in bacterial molecular biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 310 (may be taken concurrently) [D-]
Equivalent to: MB 307

MB 312, BACTERIAL PHYSIOLOGY AND METABOLISM, 3 Credits
Molecular structure and function, macromolecular assembly, energy production and use, and cellular growth.
Prerequisite: MB 310 with D- or better and BB 461 [D-]
Equivalent to: MB 304
Recommended: BB 450

MB 314, AQUATIC MICROBIOLOGY, 3 Credits
A survey of the diversity, ecology, and physiology of microbes in aquatic systems, with emphasis on their roles in food webs, chemical cycling, and human health. Provides the background knowledge and quantitative/analytical skills necessary to interpret and critique current and historical research in the fields of general aquatic microbiology.
Prerequisite: (CH 231 with D- or better or CH 231H with D- or better or CH 121 with D- or better) and (CH 232 [D-] or CH 232H [D-] or CH 122 [D-]) and (CH 233 [D-] or CH 233H [D-] or CH 123 [D-])

MB 320, HUMAN BACTERIOLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Equivalent to: BHS 320
Available via Ecampus

MB 330, *DISEASE AND SOCIETY, 3 Credits
Infectious disease has many effects on the development of society, and likewise, human interactions affect the development of disease. The course examines these interactions with a focus on the role of race, class, and economic status in the development of epidemics. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

MB 340, HUMAN VIROLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: BHS 340
Available via Ecampus
MB 385, ^EMERGING INFECTIOUS DISEASES AND EPIDEMICS, 3 Credits
Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Equivalent to: BI 385

MB 399, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

MB 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 399
This course is repeatable for 16 credits.

MB 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

MB 405, READING AND CONFERENCE, 1-16 Credits
Conference: Instruction in microbiology.
This course is repeatable for 16 credits.

MB 406, SPECIAL PROJECTS, 1-16 Credits
Reading and Conference/Instructor in Microbiology.
This course is repeatable for 16 credits.

MB 407, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MB 410, OCCUPATIONAL INTERNSHIP, 1-10 Credits
Supervised work experience at selected cooperating institutions, agencies, laboratories, clinics or companies. Maximum of 10 credits allowed but no more than 3 credits may be used to satisfy microbiology major requirement of 36 credits. Graded P/N.
This course is repeatable for 10 credits.

MB 416, IMMUNOLOGY, 3 Credits
Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.
Prerequisite: BB 450 with D- or better or BB 490 with D- or better

MB 417, IMMUNOLOGY LABORATORY, 2 Credits
Laboratory on the applications of current immunological techniques.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 416 (may be taken concurrently) [D-]

MB 420, MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY, 3 Credits
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust.
Prerequisite: BB 451 with D- or better

MB 422, AQUATIC MICROBIOLOGY LABORATORY, 2 Credits
Examine patterns of microbial communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.
Prerequisite: MB 303 with D- or better
Corequisites: MB 314

MB 430, BACTERIAL PATHOGENESIS, 3 Credits
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection.
Prerequisite: MB 302 with D- or better and MB 310 [D-] and (BB 451 [D-] or BB 491 [D-])

MB 434, VIROLOGY, 3 Credits
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease.
Prerequisite: ((BB 450 with D- or better or BB 450H with D- or better) and (BB 451 [D-] or BB 451H [D-]) or (BB 490 [D-] and BB 491 [D-] and BB 492 [D-]))

MB 435, PATHOGENIC MICROBES LABORATORY, 2 Credits
Laboratory experiments to illustrate concepts presented in MB 430 and/or MB 434, focusing on pathogenic microorganisms.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 302 [D-] and (MB 430 (may be taken concurrently) [D-] or MB 434 (may be taken concurrently) [D-])
MB 436, THE HUMAN MICROBIOME, 3 Credits
Examines the biodiversity, function, and medical importance of the communities of microorganisms that inhabit the human body. A diverse array of topics will be discussed, including how the human microbiome is studied, case studies of specific aspects of the human microbiome, and emerging theories of how the microbiome influences human health.
Prerequisite: BI 314 with D- or better or BB 314 with D- or better or BI 314H with D- or better or MB 302 with D- or better

MB 440, FOOD MICROBIOLOGY, 3 Credits
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption.
Prerequisite: MB 302 with D- or better

MB 441, FOOD MICROBIOLOGY LABORATORY, 2 Credits
Laboratory techniques to accompany MB 440/MB 540.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 440 (may be taken concurrently) [D-]
Recommended: MB 302

MB 448, MICROBIAL ECOLOGY, 3 Credits
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life.
Prerequisite: MB 302 with D- or better

MB 456, MICROBIAL GENETICS AND BIOTECHNOLOGY, 3 Credits
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized.
Prerequisite: MB 302 with D- or better and (BB 450 [D-] or BB 490 [D-]) and (BB 451 [D-] or BB 491 [D-]) and (MB 310 [D-] or BB 492 [D-])

MB 479, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.
CROSSLISTED as FST 479/MB 479 and FST 579/MB 579.
Prerequisite: ((BI 212 with C- or better or BI 212H with C- or better) or (BI 221 with C- or better or BI 221H with C- or better) and (BI 223 [C-] or BI 223H [C-])) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
Equivalent to: FST 479

MB 480, GENERAL PARASITOLOGY, 3 Credits
Covers a broad overview of parasitology with emphasis on medical parasitology. Explores important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals.
Prerequisite: (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]) or (BI 204 [D-] and BI 205 [D-] and BI 206 [D-])
Available via Ecampus

MB 490, MICROBIOLOGY CAPSTONE EXPERIENCE, 2 Credits
Capstone experience for microbiology students to practice professional skills necessary to sustain a career in science. Students will work in teams to analyze research data and communicate this analysis, in addition to explore career opportunities and learn how to successfully compete for jobs. Graded P/N.
Prerequisite: MB 302 with D- or better

MB 491, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.
Equivalent to: FW 491
Recommended: 9 credits of upper-division fisheries or biology.

MB 496, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596.
Equivalent to: FW 496
Recommended: MB 303 or other upper-division laboratory course.

MB 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.
Recommended: One term of biology

MB 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

MB 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MB 506, SPECIAL PROJECTS, 1-6 Credits
This course is repeatable for 6 credits.
MB 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 99 credits.

MB 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

MB 511, SCIENTIFIC SKILLS, 1 Credit
Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.

MB 512, HIGHLIGHTS OF MICROBIOLOGY, 1 Credit
Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.

MB 513, MICROBIAL SYSTEMS, 3 Credits
Presentation of a modern view of microbiology through the lens of microbes’ influences on our planet’s habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many cross-disciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.

MB 516, IMMUNOLOGY, 3 Credits
Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases. Recommended: BB 450 or BB 490

MB 517, IMMUNOLOGY LABORATORY, 2 Credits
Laboratory on the applications of current immunological techniques. Recommended: (MB 303 or MB 303H) and completion or concurrent enrollment in MB 516

MB 520, MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY, 3 Credits
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. Recommended: BB 451 or BB 551

MB 522, AQUATIC MICROBIOLOGY LAB, 2 Credits
Examine patterns of microbiological communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.

MB 530, BACTERIAL PATHOGENESIS, 3 Credits
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. Recommended: MB 302 and MB 310 and (BB 451 or BB 491)

MB 534, VIROLOGY, 3 Credits
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. Recommended: ((BB 450 or BB 450H) and (BB 451 or BB 451H)) or (BB 490 and BB 491 and BB 492)

MB 540, FOOD MICROBIOLOGY, 3 Credits
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and genticidal treatment during processing, preparing, and distributing food for consumption. Recommended: MB 302

MB 541, FOOD MICROBIOLOGY LABORATORY, 2 Credits
Laboratory techniques to accompany MB 440/MB 540. Prerequisite: MB 540 (may be taken concurrently) with C or better Recommended: MB 302 and MB 303

MB 548, MICROBIAL ECOLOGY, 3 Credits
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. Recommended: MB 302

MB 555, BIOLOGY OF THE PROKARYOTES, 3 Credits
An integrative graduate course examining bacterial and archaeal life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term. Recommended: BB 450 and MB 310 and MB 312

MB 556, MICROBIAL GENETICS AND BIOTECHNOLOGY, 3 Credits
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized. Recommended: MB 302 and (BB 450 or BB 490) and (BB 451 or BB 491) and (MB 310 or BB 492)
**MB 579, FERMENTATION MICROBIOLOGY, 3 Credits**

An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors.

Equivalent to: FST 579
Recommended: ((BI 212 or BI 212H) or ((BI 221 or BI 221H) and (BI 223 or BI 223H))) and CH 331, CH 332, (BB 350 or BB 450) and MB 302

**MB 580, GENERAL PARASITOLOGY, 3 Credits**

Covers a broad overview of parasitology with emphasis on medical parasitology. Explores important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals.

Available via Ecampus

**MB 591, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits**

Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591.

Equivalent to: FW 591
Recommended: 9 credits of upper-division fisheries or biology.

**MB 596, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits**

This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596.

Equivalent to: FW 596
Recommended: MB 303 or other upper-division laboratory course.

**MB 599, SELECTED TOPICS, 0-6 Credits**

This course is repeatable for 24 credits.

**MB 601, RESEARCH, 1-16 Credits**

This course is repeatable for 16 credits.

**MB 603, THESIS, 1-16 Credits**

This course is repeatable for 999 credits.

**MB 605, READING AND CONFERENCE, 1-16 Credits**

This course is repeatable for 16 credits.

**MB 607, SEMINAR, 1 Credit**

Graded P/N.

This course is repeatable for 99 credits.

**MB 610, INTERNSHIP, 1-9 Credits**

This course is repeatable for 16 credits.

**MB 668, MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION, 4 Credits**

Theoretical and practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.

Equivalent to: MCB 668

**MB 699, SPECIAL TOPICS, 0-16 Credits**

This course is repeatable for 16 credits.

**Zoology (Z)**

**Z 349, *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION, 3 Credits**

The earth’s biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth’s ecosystems, and methods used to conserve biodiversity for future generations. (Bacc Core Course)

Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: BI 349
Available via Ecampus

**Z 350, ANIMAL BEHAVIOR, 3 Credits**

Concepts of behavior; sensory receptors, internal mechanisms governing responses; learning and habituation; social organization and communication.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Equivalent to: BI 350
Available via Ecampus

**Z 361, INVERTEBRATE BIOLOGY, 3 Credits**

Exploration of the diversity and evolutionary relationships among major invertebrate phyla with an emphasis on morphological features, functional aspects, and life history for each phylum.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Z 362, INVERTEBRATE BIOLOGY LABORATORY, 2 Credits
Morphology and anatomy of representative invertebrates introduced in Z 361; diversity within phyla. Study is by dissections and both microscopic and macroscopic examination; field trip fee. Lab fee. Lec/lab.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) or (BI 223 [C-] or BI 223H [C-]) and Z 361 (may be taken concurrently) [C-]

Z 364, DIVERSITY OF LIFE: INVERTEBRATES, 5 Credits
Exploration of the diversity and evolutionary relationships among major invertebrate groups with an emphasis on building and interpreting phylogenetic trees as well as comparing and contrasting morphology, function, and life history within each group. Laboratory activities build scientific skills by exploring current hypotheses and tools for the study of invertebrate evolution.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Available via Ecampus

Z 365, BIOLOGY OF INSECTS, 4 Credits
Introduction to the study of insects, focusing on the biological attributes responsible for the success and dominance of insects. Emphasis on taxonomy, morphology, behavior, ecology, and coevolutionary interrelationships. Required field trips. Lec/lab.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 371, VERTEBRATE BIOLOGY, 3 Credits
Overview of vertebrate origins and phylogeny integrating several disciplines (anatomy, ecology, genetics, developmental biology, physiology, behavior, and evolution) to explore the structural and functional adaptations and evolutionary history of vertebrates. Lec.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Recommended: Completion or concurrent enrollment in Z 372

Z 372, VERTEBRATE BIOLOGY LABORATORY, 2 Credits
Classification, identification, and natural history of vertebrates. Includes laboratory examination of specimens and frequent field trips (fee charged) emphasizing Oregon fauna. Lab fee.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and Z 371 (may be taken concurrently) [D-]

Z 374, DIVERSITY OF LIFE: VERTEBRATES, 5 Credits
Examination of vertebrate origins and phylogeny, integrating several disciplines (molecular biology, anatomy, behavioral ecology, and evolution). Emphasizes critical thinking and the scientific process to explore the structural/functional adaptations and evolutionary history of vertebrates. Laboratory activities build scientific skills by exploring current hypotheses and tools for the study of vertebrate evolution.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 422, COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY, 5 Credits
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) and (CH 332 (may be taken concurrently) [D-] or CH 335 (may be taken concurrently) [D-])

Z 423, ENVIRONMENTAL PHYSIOLOGY, 3 Credits
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Available via Ecampus

Z 425, EMBRYOLOGY AND DEVELOPMENT, 5 Credits
Prerequisite: (BI 311 with D- or better or BI 311H with D- or better) and (BI 314 [D-] or BI 314H [D-] or BI 314H [D-] or BI 314H [D-])
Z 431, VERTEBRATE PHYSIOLOGY I, 4 Credits
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in Z 431, Z 432/Z 442 series. Lec/rec.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))) and (CH 332 (may be taken concurrently) [C-] or CH 335 (may be taken concurrently) [C-])

Z 432, VERTEBRATE PHYSIOLOGY II, 3 Credits
Systems/concepts covered include blood, immune, lymphatic, cardiovascular, and pulmonary. Second in the Z431, 432/442 series. Prerequisite: Z 431 with C- or better

Z 438, BEHAVIORAL NEUROBIOLOGY, 3 Credits
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or (BI 212 [C-] or BI 212H [C-] or BI 213H [C-]) or CH 332 (may be taken concurrently) [C-] or CH 335 (may be taken concurrently) [C-])

Z 442, VERTEBRATE PHYSIOLOGY LABORATORY, 2 Credits
Experiments and exercises in vertebrate physiology covering systems studied in Z 431 and Z 432. Available to biology majors. Lab fee.
Prerequisite: Z 431 with C- or better and Z 432 (may be taken concurrently) [C-]

Z 461, MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY, 4 Credits
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))) or (CH 332 (may be taken concurrently) [C-] or CH 335 (may be taken concurrently) [C-])

Z 477, AQUATIC ENTOMOLOGY, 4 Credits
Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Available via Ecampus

Z 473, HERPETOLOGY, 4 Credits
Exploration of global herpetofauna focusing on taxa of the Pacific Northwest of North America. Identification and natural history of amphibians and reptiles are emphasized, along with a phylogenetic framework, to explore and discuss ideas involving their behavior, evolution, ecology, and conservation. Student projects examine important topics in the field.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary. Equivalent to: Z 499H
This course is repeatable for 16 credits.

Z 499H, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary. Equivalent to: Z 499
This course is repeatable for 16 credits.

Biochemistry and Biophysics

The Department of Biochemistry and Biophysics (BB) is part of the School of Life Sciences.

The Department has world-class faculty, a tradition of interdisciplinary research, teaching excellence and extraordinary laboratories to facilitate undergraduate and graduate learning. The department ranks high nationally and internationally in many research areas of biochemistry and molecular biophysics, including structural biology, genetic code expansion technology, metabolic regulation, signal transduction, protein chemistry, gene expression, epigenetics, cell cycle control and cell movement and adhesion.

Undergraduate Degrees

Biochemists explore the chemical structure of living matter and the chemical reactions occurring in living cells. Biophysicists use the methods of physical science to study the structure and functions of macromolecules. The Department offers two BS degrees, both accredited by the American Society for Biochemistry and Molecular Biology (ASBMB):

- Biochemistry and Biophysics (BB)
- Biochemistry and Molecular Biology (BMB) with options in Advanced Molecular Biology, Computational Molecular Biology, and Pre-Medicine.

Both degrees provide students a foundation in the physical and biological sciences. They are designed to help students prepare for careers in the health sciences, for technical employment at the BS level, or for graduate study in the life sciences. Graduates of the
department's programs have found rewarding careers in medicine, dentistry, clinical chemistry, biotechnology, genetics, cell biology, forensic science, pharmacology, physiology, toxicology, and nutrition, as well as in biochemistry or biophysics. Others have used the degree as a springboard to nontechnical careers that benefit from a broad scientific background, including business, intellectual property law, journalism, and health care administration. Both majors benefit from the wealth of departmental course offerings and faculty research programs. Because of the interdisciplinary nature of the program, students majoring in Biochemistry and Biophysics and Biochemistry and Molecular Biology cannot seek a dual major or double degree in both majors or in the BioHealth Sciences, Biology, Zoology and Microbiology majors.

High school students interested in careers in biochemistry or biophysics should prepare for college by taking four years of mathematics and at least one year each of physics, chemistry, and biology. Students transferring from a community college should have completed one year each of the following by the end of the sophomore year, if they plan to graduate in four years’ total time: general chemistry, organic chemistry, calculus-based physics, general biology and three semesters or four quarters of calculus, including vector calculus. An excellent advising program is available to undergraduates, and prospective students are encouraged to consult with a departmental advisor or with faculty members working in an area of interest to them. Undergraduate students are also encouraged to participate in research in the laboratory of a faculty member.

Graduate Degrees
The Biochemistry and Biophysics department also oversees an internationally recognized graduate program that offers PhD and MS degrees, including a “4+1” Accelerated Masters Program degree. Faculty in the program include departmental faculty and also a group of affiliate faculty from other departments who have research programs in the molecular life sciences. Graduate program faculty have diverse research expertise including protein and DNA structural biology, redox biology, protein homeostasis, aging, single molecule studies, molecular motors, genetic code expansion, molecular neuroscience, bioinformatics and computational biophysics, metabolic regulation, signal transduction, vitamin D and innate immunity, gene expression, epigenetics, cell cycle control, membrane dynamics and repair, biomineralization, and cell movement and adhesion. Detailed information on the graduate faculty and program is available from the Department of Biochemistry and Biophysics website (https://biochem.oregonstate.edu/).

Undergraduate Programs
Majors
- Biochemistry and (p. 1638)Biophysics (p. 1633)
  Options:
  - Advanced B (p. 1635)/Idiophysics
  - N (p. 1636)/Idiophysics
  - Pre-Medicine/Biochemistry and B (p. 1636)/Idiophysics
- Biochemistry and Molecular Biology (p. 1638)
  Options:
  - Advanced Molecular Biology
  - Computational Molecular Biology
  - Pre-Medicine/Biochemistry and Molecular Biology

Graduate Programs
Major
- Biochemistry and Biophysics (p. 1632)

Minor
- Biochemistry and Biophysics (p. 1633)

Faculty
Professors: Ahern, Barbar, Beckman, Freitag, Gombart, Hagen, Karplus, Mehl
Associate Professors: Hendrix, Hsu, Johnson, McFadden, Perez
Assistant Professors: Nyarko, Qiu
Senior Instructors: van Zee
Instructor: Dalton
Assistant Professor, Senior Research: Cooley, Franco
Associate Professor, Senior Research: Estevez

BB 100, THE MOLECULES OF LIFE, 2 Credits
A brief introduction to molecular biology for nonspecialists. Subjects vary, but have included biochemical basis of the origin of life, biochemical genetics, biochemical aspects of memory and behavior, mutagenesis, bioenergetics and nutrition, and environmental biochemistry.
Equivalent to: BB 100H

BB 111, INTRODUCTION TO BIOCHEMISTRY AND BIOPHYSICS RESEARCH, 1 Credit
Designed to introduce biochemistry and biophysics students to departmental research opportunities and advisors.

BB 211, PROFESSIONAL DEVELOPMENT II: MOLECULAR, MICROBIAL, BIOHEALTH, 1 Credit
Develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N. CROSSLISTED as BB 211/BHS 211.
Equivalent to: BHS 211
BB 314, CELL AND MOLECULAR BIOLOGY, 4 Credits
Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])
Equivalent to: BB 314H, BI 314, BI 314H
Available via Ecampus

BB 314H, CELL AND MOLECULAR BIOLOGY, 4 Credits
Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 331 (may be taken concurrently) [C-] or CH 334 (may be taken concurrently) [C-])
Equivalent to: BB 314, BI 314, BI 314H

BB 315, MOLECULAR BIOLOGY LABORATORY, 3 Credits
Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BI 315

BB 317, *SCIENTIFIC THEORY AND PRACTICE, 3 Credits
Teaches students the practice of biological science. Topics cover scientific theory, communications, ethics and critical evaluation. CROSSLISTED as BB 317/BI 317. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) )
Equivalent to: BI 317

BB 331, *INTRODUCTION TO MOLECULAR BIOLOGY, 3 Credits
Course dealing with the molecular basis of cellular function, with emphasis upon modern developments, and the foundation for practical applications of this knowledge. The course will involve the conceptual background necessary to appreciate the applications of molecular biology. Throughout the course opportunities will be given to discuss public policy issues and questions: What are the moral and practical problems that flow from identification of an individual as being at risk for a late-appearing genetic disorder, such as Huntington’s disease or certain cancers? Does the scientific or public value of knowing the entire DNA sequence of the human genome justify a situation in which individual or small-scale research cannot be supported? What issues arise when the fruits of biological research, mostly publicly funded, are commercialized? Should a novel organism be patented? How can biotechnology be applied to environmental problems? (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: CH 122 with D- or better or CH 202 with D- or better or CH 222 with D- or better or CH 225H with D- or better or ((CH 232 with D- or better or CH 232H with D- or better) or (CH 262 with D- or better or CH 262H with D- or better or CH 272 with D- or better))
Available via Ecampus

BB 332, *MOLECULAR MEDICINE, 3 Credits
Provides students an understanding of medical advances from a rapidly evolving molecular point of view. Advances in knowledge of the human genome arising from DNA sequencing efforts and major leaps in understanding of the regulating cellular growth and division are presented in an easy-to-understand fashion appropriate for students in all majors. Course discussions and assignments will cover implications of advances in molecular medicine from ethical, economic, technical and societal standpoints. The aim of the course is to present technical material in a way that non-scientists will understand and conversely to summarize ethical, economic, and philosophical considerations in a way that the scientists understand the implications of these technologies. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Any biology course.

BB 334, INTRODUCTION TO BIOLOGICAL SEQUENCE ANALYSIS, 2 Credits
Introduction to computer-based analyses of biomolecular data, particularly nucleic acid and protein sequences, with the Python programming language. Topics include reading and writing of sequence files, subsequences, reverse complement, finding sequence patterns, subroutines, control structures, and parsing complex data files.

BB 350, ELEMENTARY BIOCHEMISTRY, 4 Credits
Service course for students desiring a short introduction to biochemistry. Four lectures weekly.
Prerequisite: CH 331 with D- or better and CH 332 (may be taken concurrently) [D-]
Available via Ecampus
BB 360, INTRODUCTION TO NEUROSCIENCE, 3 Credits
An introduction to the field of neuroscience. Topics include structure of neurons, outline of signaling in the central nervous system, Nernst equation, action potentials, synaptic transmission, chemical signaling in vision, disease and drugs.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) and (CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-])
Available via Ecampus

BB 361, NEUROSCIENCE OF SENSORY AND MOTOR SYSTEMS, 3 Credits
Provides advanced knowledge and understanding of the structure and function of the sensory and motor systems and the interactions between them. These systems will be considered in the context of human physiology.
Prerequisite: BB 360 with C- or better

BB 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: BB 399H
This course is repeatable for 16 credits.

BB 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 399
This course is repeatable for 16 credits.

BB 401, UNDERGRADUATE RESEARCH, 1-16 Credits
Equivalent to: BB 401H
This course is repeatable for 16 credits.

BB 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

BB 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BB 405H
This course is repeatable for 16 credits.

BB 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BB 405
This course is repeatable for 16 credits.

BB 407, BIOCHEMISTRY/BIOPHYSICS SEMINAR, 1-16 Credits
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. Graded P/N.
Equivalent to: BB 407H
This course is repeatable for 99 credits.

BB 407H, BIOCHEMISTRY/BIOPHYSICS SEMINAR, 1-16 Credits
Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. Attributes: HNRS – Honors Course Designator
Equivalent to: BB 407
This course is repeatable for 99 credits.

BB 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

BB 450, GENERAL BIOCHEMISTRY, 4 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures.
Prerequisite: CH 332 with D- or better or CH 336 with D- or better
Equivalent to: BB 450H
Available via Ecampus

BB 451, GENERAL BIOCHEMISTRY, 3 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures.
Prerequisite: BB 450 with D- or better or BB 450H with D- or better
Equivalent to: BB 451H
Available via Ecampus

BB 453, BIOCHEMISTRY AND MOLECULAR BIOLOGY LABORATORY TECHNIQUES, 4 Credits
Laboratory course for non-majors that introduces students to biochemistry and molecular biology techniques used to investigate the functional relationship between nucleic acid sequence, gene expression, and protein function.
Prerequisite: BB 451 with C- or better

BB 460, ADVANCED CELL BIOLOGY, 3 Credits
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology. Offered every other fall in odd years.
Prerequisite: BB 314 with C- or better or BI 314 with C- or better or BI 314H with C- or better or BB 451 with C- or better or BB 492 with C- or better
BB 481, MACROMOLECULAR STRUCTURE, 3 Credits
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.
Prerequisite: BB 450 with D- or better or BB 490 with D- or better
Available via Ecampus

BB 482, BIOPHYSICS, 3 Credits
Examines quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
Prerequisite: BB 481 with D- or better and CH 440 [D-]

BB 483, ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE, 3 Credits
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
Prerequisite: BB 482 with D- or better or BB 582 with D- or better

BB 484, CHROMATIN AND EPIGENETICS, 3 Credits
An in-depth look at 'chromatin' (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of 'epigenetic' gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.
Prerequisite: ((BI 314 with C- or better or BI 314H with C- or better or BB 314 with C- or better or BB 314H with C- or better and (BI 315 [C-] or BB 315 [C-] or BB 493 [C-] or BB 493H [C-])))

BB 485, APPLIED BIOINFORMATICS, 3 Credits
Fundamental concepts needed to understand the software and methods used in bioinformatics. Includes contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Available via Ecampus

BB 486, ADVANCED MOLECULAR GENETICS, 3 Credits
Covers aspects of transmission genetics (Mendel's laws, mapping strategies) informed by the machineries required for genetic information storage, transcription, translation, and protein processing. Analyses of state-of-the-art primary literature and lectures give a perspective on important “model” organisms, including examples from among bacteria, plants, fungi, and animals.
Prerequisite: (BB 314 with C- or better or BB 314H with C- or better and (BB 492 [C-] or BB 451 [C-I])

BB 490, BIOCHEMISTRY 1: STRUCTURE AND FUNCTION, 3 Credits
Examines how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.
Prerequisite: (CH 332 with C- or better or CH 336 with C- or better) and ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-] or BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) or (BI 223 [C-] or BI 223H [C-])))

BB 491, BIOCHEMISTRY 2: METABOLISM, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisite: BB 490 with D- or better or BB 590 with D- or better

BB 492, BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisite: (BB 490 with D- or better or BB 590 with D- or better) and (BB 491 [D-] or BB 591 [D-])

BB 493, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, 3 Credits
Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisite: (BB 451 with D- or better or BB 451H with D- or better) or BB 492 with D- or better
Equivalent to: BB 493H

BB 494, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, 3 Credits
Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Prerequisite: BB 493 with D- or better or BB 593 with D- or better or BB 315 with D- or better or BI 315 with D- or better
Equivalent to: BB 494H
BB 498, ASBMB CERTIFICATION EXAM, 0 Credits
A comprehensive, standardized test administered by the American Society of Biochemistry and Molecular Biology and used as a direct assessment of the discipline specific knowledge of seniors in the majors administered by the Biochemistry and Biophysics department. A pass will be given to all students who complete the exam. Contact the Biochemistry and Biophysics Program for more information.

BB 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
This course is repeatable for 16 credits.

BB 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BB 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BB 507, SEMINAR, 1-2 Credits
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented.
This course is repeatable for 16 credits.

BB 550, GENERAL BIOCHEMISTRY, 4 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.
Recommended: CH 332
Available via Ecampus

BB 551, GENERAL BIOCHEMISTRY, 3 Credits
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures.
Recommended: BB 550
Available via Ecampus

BB 560, ADVANCED CELL BIOLOGY, 3 Credits
History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology
Recommended: BB 314 or BI 314 or BI 314H or BB 492 or BB 451

BB 581, MACROMOLECULAR STRUCTURE, 3 Credits
An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules—especially proteins and nucleic acids—and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project.
Recommended: BB 450 or BB 490
Available via Ecampus

BB 582, BIOPHYSICS, 3 Credits
Examines quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics.
Prerequisite: BB 581 with D- or better

BB 583, ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE, 3 Credits
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions.
Prerequisite: BB 582 with C or better

BB 584, CHROMATIN AND EPIGENETICS, 3 Credits
An in-depth look at ‘chromatin’ (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of ‘epigenetic’ gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students.
Recommended: (BI 314 or BI 314H) and BI 315

BB 585, APPLIED BIOINFORMATICS, 3 Credits
Fundamental concepts needed to understand the software and methods used in bioinformatics. Includes contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction.
Recommended: BB 314 or BB 314H
Available via Ecampus
BB 586, ADVANCED MOLECULAR GENETICS, 3 Credits
Covers aspects of transmission genetics (Mendel's laws, mapping strategies) informed by the machineries required for genetic information storage, transcription, translation, and protein processing. Analyses of state-of-the-art primary literature and lectures give a perspective on important "model" organisms, including examples from among bacteria, plants, fungi, and animals.
Recommended: (BI 314 or BI 314H) and BI 315 and BB 492

BB 590, BIOCHEMISTRY 1: STRUCTURE AND FUNCTION, 3 Credits
Examines how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions.

BB 591, BIOCHEMISTRY 2: METABOLISM, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites.
Prerequisite: BB 590 with C or better

BB 592, BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY, 3 Credits
Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification.
Prerequisite: BB 590 with C or better and BB 591 [C]

BB 593, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 1, 3 Credits
Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Recommended: (BB 451 or BB 451H) or BB 492

BB 594, BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2, 3 Credits
Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab.
Recommended: BB 493 or BB 593 or BB 315 or BI 315

BB 599, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
This course is repeatable for 16 credits.

BB 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BB 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

BB 605, READING & CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BB 607, SEMINAR, 1-2 Credits
Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented.
This course is repeatable for 16 credits.

BB 650, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, cell cycle and cancer, neurochemistry, oxidative stress, cell adhesion and motility. Most courses offered alternate years.
This course is repeatable for 18 credits.

BB 651, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include cell surfaces, enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years.
This course is repeatable for 18 credits.

BB 652, SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS, 3 Credits
Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years.
This course is repeatable for 18 credits.

BB 699, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

Biochemistry and Biophysics Graduate Major (MA, MS, PhD)
Graduate Areas of Concentration
Biochemistry, biophysics

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.
The Department of Biochemistry and Biophysics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Most graduate students are admitted for study toward the PhD.

The PhD program requires course work in biochemistry and biophysics, passing written and oral examinations, participating in the departmental seminar program, and research leading to a doctoral thesis. Although most students in the department receive financial support in the form of research assistantships, all students are expected to participate to a limited degree in the teaching program of the department, regardless of the source of support. In general, financial support is provided for PhD candidates only.

**Major Code: 5060**

**Biochemistry and Biophysics Graduate Minor**

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.

**Minor Code: 5060**

**Major Code: 5060**

**Biochemistry and Biophysics Undergraduate Major (BS, HBS)**

This major offers the following option(s):

- Advanced Biophysics (p. 1635)
- Neuroscience (p. 1636)
- Pre-Medicine/Biochemistry and Biophysics (p. 1636)

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.

Accredited by the American Society for Biochemistry and Molecular Biology (https://www.asmbmb.org/Accreditation/Schools/).

The BS degree in Biochemistry and Biophysics provides a degree path centered on the chemistry and physics of life processes with training that integrates the principles of chemistry, physics, mathematics, statistics, biochemistry, cell and molecular biology, and biological sequence analysis. Biochemists explore the chemical structure of living matter and the chemical reactions occurring in living cells. Biophysicists use the methods of physical science to study the structure and functions of macromolecules. Biochemistry and Biophysics majors receive excellent training for careers in medicine and related health professions, biotechnology and pharmaceutical industries, or for graduate study in biochemistry and biophysics. Training in biophysics is especially valuable for students who are interested in drug design. Majors must select an option either in Advanced Biophysics (p. 1635), Neuroscience (p. 1636), or Pre-Medicine/Biochemistry and Biophysics (p. 1636). The first two options are designed for students interested in careers in the biotechnology and pharmaceutical industries or graduate work in biochemistry and biophysics, with the second especially well-suited for students interested in neuroscience. The third option is ideal for students interested in careers in medicine and related health professions.

**Major Code: 506**

- Demonstrate a core knowledge base in the theory and practice of modern Biochemistry and Biophysics.
- Function successfully in the laboratory and use safe laboratory practices.
- Critically evaluate data and design experiments to test hypotheses relevant to the practice of Biochemistry and Biophysics.
- Read and evaluate primary literature in the discipline.
- Effectively communicate scientific data and ideas, using various formats appropriate for different target audiences.
- Use databases, computational tools and other online resources effectively.
- Demonstrate awareness of ethical issues in the practice of science.

Students majoring in Biochemistry and Biophysics cannot seek a double major in Biochemistry and Molecular Biology, Biology, Biohealth Sciences, Botany, Microbiology or Zoology.

The major sections and courses within them are arranged in the order they are generally completed. Students are required to declare one of
The Biochemistry and Biophysics Undergraduate Major (BS, HBS) requires the completion of a set of core courses and a minimum of 180 total credits. Three options are available in Advanced Biophysics, Neuroscience, or Pre-medicine/Biochemistry and Biophysics. For more information, see MyDegrees or the Department of Biochemistry and Biophysics website (https://biochem.science.oregonstate.edu/).

### Students in the Biochemistry and Biophysics major must complete the following biology courses with a C- or better to continue on to upper division Biology (Bi).

## Advanced Biophysics Option

The Advanced Biophysics Option is designed for students interested in pursuing graduate work in biophysics or entering the workforce in biophysics and pharmaceutical industries. It provides advanced training in physical chemistry and physics, bioinformatics, statistics, mathematics, and other areas of current research in biophysics, in addition to the core courses in the major. Students are strongly encouraged to participate in undergraduate research, and up to three research credits can be applied to the Upper-Division Science Elective requirements. Faculty advisors work with students to help them identify electives, research opportunities, and professional internships that align with their interests.

### Option Code: 927

Options in the Biochemistry and Biophysics major require a minimum of twenty-one credits to complete in addition to the Biochemistry and Biophysics major. Most students can complete the major and Advanced Biophysics option requirements in four years.

Students may pursue either the Advanced Biophysics, Neuroscience, or Pre-medicine/Biochemistry and Biophysics option with the Biochemistry and Biophysics major—no dual combinations are permitted.

For further information, see MyDegrees or the Department of Biochemistry and Biophysics (https://biochem.science.oregonstate.edu/) website (https://biochem.science.oregonstate.edu/).

### Code Title Credits

**Option Core**  
- CH 441 PHYSICAL CHEMISTRY and CH 442 PHYSICAL CHEMISTRY
- PH 423 PARADIGMS IN PHYSICS: ENERGY AND ENTROPY and PH 425 PARADIGMS IN PHYSICS: QUANTUM FUNDAMENTALS

**Electives**  
Select a minimum of 15 credits from the following:
- BB 401 UNDERGRADUATE RESEARCH (1-3 credits allowed with approval of the Lead Advisor)
- BB 485 APPLIED BIOINFORMATICS
- BOT 460 FUNCTIONAL GENOMICS or BOT 476 INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES
- CS 161 INTRODUCTION TO COMPUTER SCIENCE
- MTH 256 APPLIED DIFFERENTIAL EQUATIONS or MTH 253 INFINITE SERIES AND SEQUENCES or MTH 264 INTRODUCTION TO MATRIX ALGEBRA
- PH 591 BIOLOGICAL PHYSICS
- ST 352 INTRODUCTION TO STATISTICAL METHODS

### Third Year

#### Fall
- BB 345 INTRODUCTION TO BIOLOGICAL SEQUENCE ANALYSIS 2
- BB 490 BIOCHEMISTRY 1: STRUCTURE AND FUNCTION 3
- CH 361 EXPERIMENTAL CHEMISTRY I 3
- CH 440 PHYSICAL CHEMISTRY 3

#### Winter
- BB 317 *SCIENTIFIC THEORY AND PRACTICE 3
- BB 491 BIOCHEMISTRY 2: METABOLISM 3
- CH 362 EXPERIMENTAL CHEMISTRY I 3
- Bacc Core or Elective 3

#### Spring
- BB 314 CELL AND MOLECULAR BIOLOGY 4
- BB 492 BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY 3
- ST 351 INTRODUCTION TO STATISTICAL METHODS 4

### Fourth Year

#### Fall
- BB 481 MACROMOLECULAR STRUCTURE 3
- BB 493 BIOCHEMISTRY LABORATORY莫olecular TECHNIQUES 3

#### Winter
- BB 482 BIOPHYSICS 3
- BB 494 BIOCHEMISTRY LABORATORY莫olecular TECHNIQUES 3
- BB 498 ASMBB CERTIFICATION EXAM 0

#### Spring
- BB 483 ADVANCED BIOCHEMISTRY AND BIOPHYSICS: CAPSTONE 3

---

* Baccalaureate Core Course (BCC)  
^ Writing Intensive Course (WIC)
Neuroscience Option

This option is offered within the following major(s):

- Biochemistry and Biophysics - College of Science (p. 1633)

The Neuroscience option is designed for students interested in combining foundational training in chemistry, biology, mathematics, physics, biochemistry, and biophysics with training in psychology, neuroscience, and anatomy and physiology to deepen their understanding of the brain and the nervous system. This option supports students who want to pursue graduate work in neuroscience, biophysics, bioinformatics, and pharmaceutical research as well as work in health professions. Students are strongly encouraged to participate in undergraduate research, and up to three research credits can be applied to the Upper-division Science Elective requirements. Faculty advisors work with students to help them identify electives, research opportunities, and professional internships that align with their interests.

Option Code: 926

Options in the Biochemistry and Biophysics major require a minimum of twenty-one credits to complete in addition to the Biochemistry and Biophysics major. Most students can complete the major and Neuroscience option requirements in four years.

Students may either pursue the Neuroscience, Advanced Biophysics, or Pre-medicine/Biochemistry and Biophysics option with the Biochemistry and Biophysics major - no dual combinations are permitted.

For further information, see MyDegrees or the Department of Biochemistry and Biophysics website (https://biochem.science.oregonstate.edu/).

Pre-Medicine/Biochemistry and Biophysics Option

This option is offered within the following major(s):

- Biochemistry and Biophysics - College of Science (p. 1633)

Biochemistry and Biophysics students interested in a career in medicine should choose this option. It may also be suitable for students interested in some other health professions, and these students should first consult with their advisor. In addition to offering a rigorous foundation in general chemistry, organic chemistry, mathematics, physics, biology, biochemistry, cell and molecular biology, biophysics, statistics, and biological sequence analysis, the Pre-medicine option meets the requirements for most medical schools in the U.S. by providing students with training in genetics, psychology, ethics, and social sciences. Students have a wide choice of medically relevant electives in areas such as anatomy and physiology, microbiology, neuroscience, and immunology. Students are strongly encouraged to participate in undergraduate research. Faculty pre-medical advisors guide students to integrate undergraduate research and other relevant professional opportunities into their undergraduate experience and to prepare themselves as strong candidates for admission to the professional schools of their interest.

Option Code: 926

Options in the Biochemistry and Biophysics major require a minimum of twenty-one credits to complete in addition to the Biochemistry and Biophysics major. Most students can complete the major and Pre-medicine/Biochemistry and Biophysics option requirements in four years.

Students may pursue either the Pre-medicine/Biochemistry and Biophysics, Advanced Biophysics, or Neuroscience option with the Biochemistry and Biophysics major – no dual combinations are permitted.

For further information, see MyDegrees or the Department of Biochemistry and Biophysics website (https://biochem.science.oregonstate.edu/).

Science Electives

Select a minimum of 10 credits:

- BB 332 *MOLECULAR MEDICINE
- BB 360 INTRODUCTION TO NEUROSCIENCE
- BB 361 NEUROSCIENCE OF SENSORY AND MOTOR SYSTEMS
- BB 401 UNDERGRADUATE RESEARCH (1-3 credits allowed)
- BI 311 GENETICS
- BI 331 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
- BI 341 ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
- MB 302 GENERAL MICROBIOLOGY
- MB 303 GENERAL MICROBIOLOGY LABORATORY
- MB 310 BACTERIAL MOLECULAR GENETICS
- MB 416 IMMUNOLOGY
- MB 430 BACTERIAL PATHOGENESIS
- MB 434 VIROLOGY
- MB 436 THE HUMAN MICROBIOME

Total Credits 21

* Baccalaureate Core Course (BCC)
1 Must include a minimum of 15 upper-division credits
2 Z 431 or Z 437 may be taken in place of (BI 331 and BI 341)
Biochemistry and Molecular Biology Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Advanced Molecular Biology (p. 1639)
- Computational Molecular Biology (p. 1640)
- Pre-Medicine/Biochemistry and Molecular Biology (p. 1640)

Administered by the Department of Biochemistry and Biophysics under the School of Life Sciences.

The BS degree in Biochemistry and Molecular Biology provides a degree path centered on the molecular basis of living systems with training in molecular genetics, biochemistry, and cell biology, as well as in rapidly developing areas such as bioinformatics. Majors must select an option either in Advanced Molecular Biology (p. 1639), Computational Molecular Biology (p. 1640), or Pre-Medicine/Biochemistry and Molecular Biology (p. 1640). The first two options are designed for students interested in careers in the biotechnology and pharmaceutical industries or graduate work in the molecular life sciences, with the second especially well-suited for students interested in computational aspects of molecular biology. The third option is ideal for students interested in careers in medicine and related health professions.

Major Code: 971

- Demonstrate a core knowledge base in the theory and practice of modern Biochemistry and Molecular Biology (BMB).
- Function successfully in the laboratory and use safe laboratory practices.
- Critically evaluate data and design experiments to test hypotheses relevant to the practice of Biochemistry and Molecular Biology.
- Read and evaluate primary literature in the discipline.
- Effectively communicate scientific data and ideas, using various formats appropriate for different target audiences.
- Use databases, computational tools and other online resources effectively.
- Demonstrate awareness of ethical issues in the practice of science.

Students majoring in Biochemistry and Molecular Biology cannot seek a double major in Biochemistry and Biophysics, Biology, Biohealth Sciences, Botany, Microbiology or Zoology.

Completion of one of the following options is required to earn a degree in Biochemistry and Molecular Biology: Advanced Molecular Biology (p. 1639), Computational Molecular Biology (p. 1640), or Pre-Medicine/Biochemistry and Molecular Biology (p. 1640). For further information, see MyDegrees or the Department of Biochemistry and Biophysics website (https://biochem.science.oregonstate.edu/).

**Advanced Molecular Biology Option**

This option is offered within the following major(s):
- Biochemistry and Molecular Biology - College of Science (p. 1638)

The Advanced Molecular Biology option is designed for students interested in pursuing graduate work in molecular life sciences or entering the workforce in the biotechnology and pharmaceutical industries. It provides advanced training in genomics, epigenetics and other areas of current research in molecular biology, in addition to the core courses in the major. Students are strongly encouraged to participate in undergraduate research, and up to six research credits can be applied to the Upper-division Science Elective requirements. Faculty advisors work with students to help them identify electives, research opportunities, and professional internships that align with their interests.

students interested in some other health professions and these students should first consult with their advisor. In addition to offering a rigorous foundation in biochemistry, molecular and cellular biology, chemistry, and genetics, the Pre-medicine option meets the requirements for most medical schools in the U.S. by providing students with training in psychology, ethics and social sciences. Students have a wide choice of medically relevant electives in areas such as physiology, microbiology, and immunology. Students are strongly encouraged to participate in undergraduate research. Faculty pre-med advisors guide students to integrate undergraduate research and other relevant professional opportunities into their undergraduate experience and to prepare themselves as strong candidates for admission to the professional schools of their interest.

Integrative Biology

The Department of Integrative Biology (IB) is part of the School of Life Sciences and receives support for its academic program from the College of Science. In addition to the faculty’s activities in research and service, it has teaching responsibilities in the graduate Integrative Biology major, as well as the undergraduate Biology and Zoology majors and Biology...
minor. Biology and Zoology courses are also part of the education of most undergraduate majors at Oregon State University (OSU).

**Undergraduate Degrees**

IB offers undergraduate BS degrees in Biology and Zoology. The Biology major is offered at the Corvallis and Cascades campuses. The major was created for students who wish to obtain broad, interdisciplinary training in the biological sciences. Biology is a common destination for students interested in health professions and provides excellent training for graduate programs in the life sciences. It also offers undergraduate options in Ecology, Genetics, Marine Biology, Pre-Dentistry, Pre-Education, Pre-Medicine, and Pre-Veterinary Medicine. The Zoology major is offered at the Corvallis campus and via Ecampus. This major includes diverse electives for students interested in the diversity, organismal biology, ecology, and evolution of animals. Zoology prepares students for a wide range of careers from animal care to research. Both majors benefit from the wealth of departmental course offerings and faculty field and laboratory research. Students majoring in Biology or Zoology cannot seek a dual major or double degree in both majors.

**Graduate Degrees**

IB is a vertically integrated department with an internationally recognized graduate program. Faculty work at the level of the cell, organism, and community and have expertise in areas of behavioral ecology, marine biology and ecology, disease ecology, evolutionary biology, conservation biology, environmental physiology, population genetics, genomics, chemical ecology, cell and developmental biology, symbiosis and paleobiology. Detailed information on the graduate faculty and program is available from the Department of Integrative Biology website. IB offers MS and PhD degrees.

**Faculty**

**Professors** Blaustein, Blouin, De Leenheer, Denver, Hacker, Lubchenco, Lytle, Maddison, Mason, Menge, Sponaugle, Warrick, Weis
**Associate Professors** Henkel, Jolles, Novak, Terry
**Associate Professor, Senior Research** Chan
**Assistant Professors** Barreto, Burke, Cornelius, Dalziel
**Assistant Professors, Senior Research** Grorud-Colvert
**Senior Instructors II** Blair, Lavery
**Senior Instructors I** Biga, Bouwma, Cheung, Kayes, Quick
**Instructors** Chouinard, Harjoe, Kirk, Landys, Rose
**Professional Faculty** Duncan, Leong-Kee, Marshall, McLeod, Meyer, Palmer
**Adjunct Faculty** Warren

**Biology (BI)**

**BI LD1, GENERAL CREDIT, 1-16 Credits**

**BI LD2, GENERAL CREDIT, 1-16 Credits**

**BI 003, UNDERGRADUATE RESEARCH, 0 Credits**

Engage in research activities appropriate to the discipline, and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

**BI 101, *ENVIRONMENTAL BIOLOGY: ECOLOGY, CONSERVATION, GLOBAL CHANGE, 4 Credits**

Introduction to ecosystems, including biodiversity, species interactions, human impacts, and conservation biology. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 102 or 103. Lec/lab/rec. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science
**Available via Ecampus**
**BI 102, *ANIMAL BIOLOGY: GENES, BEHAVIOR AND EVOLUTION OF LIFE, 4 Credits**

Introduction to how genetics shapes life on Earth, including how understandings of DNA and environmental factors are leading to biotechnological advances. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 103. Lec/lab/rec. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Equivalent to:** BI 102H

Available via Ecampus

**BI 103, *HUMAN BIOLOGY: ANATOMY, PHYSIOLOGY AND DISEASE, 4 Credits**

Introduction to the biology of humans, including aspects of human health and disease. Lectures introduce biological themes and research in the context of current issues in science and society. Hands-on laboratories focus on using organisms and technologies to explore biology and develop skills for lifelong learning. No previous science courses are required, intended for non-biological science majors. This course can be taken alone or in any combination with BI 101 and BI 102. Lec/lab/rec. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

**Equivalent to:** BI 103H

**BI 109, HEALTH PROFESSIONS: MEDICAL, 1 Credit**

Discussion of matters relating to a medical career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education, and related matters. Speakers are included. Graded P/N.

**BI 111, INTRODUCTION TO MARINE LIFE IN THE SEA: MARINE HABITATS, 1 Credit**

A field-focused learning experience exploring the varied marine life and habitats on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays and estuaries. Students will also be introduced to the breadth of marine science course offerings and research at Oregon State University’s Hatfield Marine Science Center located in Newport, Oregon. Graded P/N.

**Equivalent to:** FW 111

Available via Ecampus

**BI 150, INTRODUCTION TO MARINE BIOLOGY, 3 Credits**

Survey of marine organisms, the environments they inhabit, and their evolutionary adaptations for thriving in those environments. The course will also highlight current conservation challenges that threaten marine life, such as climate change, overfishing, and pollution.

**BI 175, *GENOMES, IDENTITIES AND SOCIETIES, 3 Credits**

DNA’s roles in shaping our senses of identity, individuality, and societal interconnectivity will be analyzed. New advances in genetic technology will be explored, along with their potential impacts on society. The relationships between genetics and discrimination will be examined with focus on cases from Oregon, America, and the world. (Bacc Core Course)

**Attributes:** CPDP – Core, Perspective, Difference/Power/Discrimination

**BI 197, PROFESSIONAL DEVELOPMENT I: HEALTH PROFESSIONS, 1 Credit**

Integrative Biology faculty and other professionals introduce a variety of human health professions including dentistry, medicine, pharmacy and others (veterinary medicine students take BI 198). Emphasizes professional development through exploring relevant social and cognitive concepts, as well as engaging in experiential learning and networking. Departmental and campus student success resources are highlighted. Graded P/N.

**BI 198, PROFESSIONAL DEVELOPMENT I: BIOLOGY AND ZOOLOGY, 1 Credit**

Integrative Biology faculty and biology professionals introduce life science careers outside of human health professions (human health profession students take BI 197). Emphasizes professional development through exploring relevant social and cognitive concepts, as well as engaging in experiential learning and networking. Departmental and campus student success resources are highlighted. Graded P/N.

Available via Ecampus

**BI 199, SELECTED TOPICS, 1-16 Credits**

Field Ecology.

**Equivalent to:** BI 199H

This course is repeatable for 16 credits.

**BI 199H, SELECTED TOPICS, 1-16 Credits**

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** BI 199

This course is repeatable for 16 credits.

**BI 204, *INTRODUCTORY BIOLOGY I, 4 Credits**

Foundations of biological sciences including scientific inquiry, genetics, evolution, and ecology. Significant emphasis throughout on the application of core concepts to solve human and environmental problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)

**Attributes:** CPBS – Core, Pers, Biological Science

Available via Ecampus
BI 205, *INTRODUCTORY BIOLOGY II, 4
Credits
Fundamental concepts in molecular and cellular biology, beginning with biomolecules and the origin of life, and ending with genomics. Significant emphasis throughout on applications of biotechnology to solve human problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-] or CH 271H (may be taken concurrently) [D-]))
Available via Ecampus

BI 206, *INTRODUCTORY BIOLOGY III, 4
Credits
Basic plant and animal physiology from an evolutionary perspective. Significant emphasis on topics of importance to human society, including human and plant disease. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health professional students. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-] or CH 271H (may be taken concurrently) [D-]))
Available via Ecampus

BI 211, *PRINCIPLES OF BIOLOGY, 4
Credits
Origins of life, energy transformations, plant and animal diversity. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BI 211

BI 211H, *PRINCIPLES OF BIOLOGY, 4
Credits
Origins of life, energy transformations, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: BI 211

BI 212, *PRINCIPLES OF BIOLOGY, 4
Credits
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or (CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-] or CH 271H (may be taken concurrently) [D-]))
Equivalent to: BI 212H

BI 212H, *PRINCIPLES OF BIOLOGY, 4
Credits
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better or CH 221 (may be taken concurrently) with D- or better or CH 224H (may be taken concurrently) with D- or better or (CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-] or CH 271H (may be taken concurrently) [D-]))
Equivalent to: BI 212

BI 213, *PRINCIPLES OF BIOLOGY, 4
Credits
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213H

BI 213H, *PRINCIPLES OF BIOLOGY, 4
Credits
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: CH 121 with D- or better or CH 201 with D- or better or CH 221 with D- or better or CH 224H with D- or better or ((CH 231 with D- or better or CH 231H with D- or better) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-]))
Equivalent to: BI 213
BI 221, *PRINCIPLES OF BIOLOGY: CELLS, 4 Credits
Introduction to fundamental biological concepts and theories about the chemical and molecular basis of life, structure and function, transformation of energy and matter and information flow at a cellular and molecular level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])
Equivalent to: BI 221H

BI 221H, *PRINCIPLES OF BIOLOGY: CELLS, 4 Credits
Introduction to fundamental biological concepts and theories about the chemical and molecular basis of life, structure and function, transformation of energy and matter and information flow at a cellular and molecular level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Prerequisite: (CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-])
Equivalent to: BI 221

BI 222, *PRINCIPLES OF BIOLOGY: ORGANISMS, 4 Credits
Introduction to fundamental biological concepts and theories about plant, and animal physiology, evolution, structure and function, transformation of energy and matter and systems at an organismal level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with D- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 222H

BI 222H, *PRINCIPLES OF BIOLOGY: ORGANISMS, 4 Credits
Introduction to fundamental biological concepts and theories about plant, and animal physiology, evolution, structure and function, transformation of energy and matter and systems at an organismal level. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 223

BI 223, *PRINCIPLES OF BIOLOGY: POPULATIONS, 4 Credits
Introduction to fundamental biological concepts and theories about diversity, evolution, and ecology; specifically, evolutionary relationship, transformation of energy and matter, information flow and systems at a population level or above. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with D- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 223H

BI 223H, *PRINCIPLES OF BIOLOGY: POPULATIONS, 4 Credits
Introduction to fundamental biological concepts and theories about diversity, evolution, and ecology; specifically, evolutionary relationship, transformation of energy and matter, information flow and systems at a population level or above. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Prerequisite: BI 221 with C- or better and ((CH 121 (may be taken concurrently) with D- or better or CH 201 (may be taken concurrently) with D- or better) or ((CH 231 (may be taken concurrently) with D- or better or CH 231H (may be taken concurrently) with D- or better) and (CH 261 (may be taken concurrently) [D-] or CH 261H (may be taken concurrently) [D-] or CH 271 (may be taken concurrently) [D-]))
Equivalent to: BI 223

BI 231, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The first of a three-term introductory series. Using a strong gross anatomy focus, course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeleton, muscular and integumentary systems. BI 231 is a required prerequisite to BI 232 and BI 233. The BI 241 Lab is optional but prerequisite for either of the subsequent BI 242 or BI 243 lab courses in the series. Lec.
BI 232, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The second of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the human nervous, endocrine and reproductive systems. Lec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better

BI 233, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The third of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Lec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better

BI 241, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The first of a three-term introductory series. Using the human cadaver (prosection), course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeletal, muscular and integumentary systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better

BI 242, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The second of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better and BI 232 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 243, INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The third of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec.
Prerequisite: BI 231 (may be taken concurrently) with C- or better and BI 233 (may be taken concurrently) [C-] and BI 241 (may be taken concurrently) [C-]

BI 298, PROFESSIONAL DEVELOPMENT FOR BIOLOGISTS II, 1 Credit
Students will develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N.
Equivalent to: BI 298H
Available via Ecampus

BI 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BI 301, *HUMAN IMPACTS ON ECOSYSTEMS, 3 Credits
Selected human impacts on ecosystems are examined in depth, including air quality, global climate change, management of agricultural and forest resources, and threats to biological diversity. The causes, approaches to investigating, and potential solutions for each issue are discussed from a scientific and social perspective. Adverse effects on ecosystems that result from each environmental problem are examined. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Recommended: One year of college biology or chemistry

BI 306, *ENVIRONMENTAL ECOLOGY, 3 Credits
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: BI 306H
Recommended: One year of college biology and chemistry

BI 306H, *ENVIRONMENTAL ECOLOGY, 3 Credits
Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; HNRS – Honors Course Designator
Equivalent to: BI 306
Recommended: One year of college biology and chemistry

BI 309, TEACHING PRACTICUM, 1-6 Credits
Introductory experience for students assisting with instruction in Biology or Zoology courses. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.
BI 311, GENETICS, 4 Credits
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))
Equivalent to: BI 311H
Available via Ecampus

BI 311H, GENETICS, 4 Credits
Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 315, MOLECULAR BIOLOGY LABORATORY, 3 Credits
Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular localization. Lec/lab.
Prerequisite: BB 314 with C- or better or BB 314H with C- or better
Equivalent to: BI 315

BI 319, THEORY, PRACTICE AND DISCOURSE IN THE LIFE SCIENCES, 3 Credits
The practice of science and the critical evaluation of scientific claims are explored through writings, discussions and presentations. Topics including the scientific method, ethics and the role of science in society are examined along with implications for professionals ranging from health care to environmental biology. Strategies for effectively communicating science with diverse audiences are emphasized. (Writing Intensive Course).
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 331, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The first of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the skeletal, muscular and integumentary systems. Lec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (CH 123 [C-] or (CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-]))) and BI 341 (may be taken concurrently) [C-]

BI 332, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The second of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Lec.
Prerequisite: BI 331 with C- or better and BI 342 (may be taken concurrently) [C-]

BI 333, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY, 3 Credits
The third part of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the cardiovascular, respiratory, urinary and digestive systems. Lec.
Prerequisite: BI 332 with C- or better and BI 343 (may be taken concurrently) [C-]

BI 334, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The first of a three-term advanced series. Using the human cadaver (prosection) and physiological data acquisition equipment, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the human skeletal, muscular and integumentary systems. Lab.
Corequisites: BI 331

BI 342, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The second of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human nervous, endocrine and reproductive systems. Lab.
Corequisites: BI 332
BI 343, ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY, 2 Credits
The third of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human cardiovascular, respiratory, urinary and digestive systems. Lab.
Corequisites: BI 333

BI 345, *INTRODUCTION TO EVOLUTION, 3 Credits
Elements of evolutionary theory; origin and history of life; evolutionary controversy; origins of species, sex, and humans. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: Z 345
Available via Ecampus

BI 347, *OCEANS IN PERIL, 3 Credits
The interactions of society and the marine environment, emphasizing the ecological, biogeochemical, economic, sociological, and political significance of the oceans. Topics of current critical importance will include marine pollution, protecting marine habitats, conserving marine biodiversity, fisheries and aquaculture, ocean energy, biogeochemical change, global warming, ocean acidification, and sea level rise. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 101 with C- or better or BI 102 with C- or better or BI 211 with C- or better or BI 211H with C- or better or BI 213 with C- or better or BI 213H with C- or better or BI 204 with C- or better or BI 150 with C- or better or BI 221 with C- or better or BI 221H with C- or better
Available via Ecampus

BI 348, *HUMAN ECOLOGY, 3 Credits
The impact of humans on the environment, emphasizing the political, sociological, and ecological consequences of human population growth. Topics of current critical importance will include global warming trends, destruction of the ozone layer, consequences of pollution, habitat destruction, the loss of biodiversity, and conservation biology. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 101 with C- or better or BI 211H with C- or better and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Available via Ecampus

BI 351, MARINE ECOLOGY, 3 Credits
Ecological interactions and principles in different marine habitats. Topics include the organisms (plants, invertebrates, vertebrates) found in major habitats and interactions between organisms. Habitats discussed include coral reefs, rocky shores, kelp forests, near-shore waters, open-ocean waters, and the deep sea. Emphasis is placed on how organism-organism interactions produce varying patterns of distribution, abundance, body size, diversity, stability, and succession.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: Z 351
Available via Ecampus

BI 353, PACIFIC NORTHWEST COASTAL ECOSYSTEMS, 4 Credits
A field-based introduction to the diversity of ecosystems of the Pacific Northwest coast. Biological and physical processes affecting the distribution, structure, community composition and physical features of these systems are explored through a variety of lectures and field trips. Ecosystem services and human impacts are examined.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 358, SYMBIOSES AND THE ENVIRONMENT, 3 Credits
Overview of the diversity of mutualistic symbioses and their roles in the natural environment. Integrative approach, from ecosystem to molecule, to the examination of certain key mutualisms. Lec. Offered alternate years.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 123 [C-] or (CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-]))

BI 370, ECOLOGY, 3 Credits
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 123 [C-] or (CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-])))

BI 370H, ECOLOGY, 3 Credits
The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization.
Prerequisite: (((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]))

BI 371, *ECOLOGICAL METHODS, 3 Credits
Experimental design, data collection, analysis and synthesis in ecological studies; local ecosystems emphasized. May have field trip fee. Lec/lab.
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: BI 370 with D- or better or BI 370H with D- or better
BI 373, *FIELD METHODS IN MARINE ECOLOGY, 3 Credits
Exposure to research methods used in field studies of the marine rocky intertidal ecosystem. Research projects and writing exercises provide students with hands-on experience of collecting, analyzing, and presenting marine ecological data. Field trip fee. Lab fee. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (BI 351 (may be taken concurrently) with D- or better or BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])
Recommended: ST 352

BI 375, FIELD METHODS IN ECOLOGICAL RESTORATION, 4 Credits
Observation and application of theory and practice in ecological restoration. Using site visits and hands-on research, explores the roles in restoration of fire, local adaptation, disturbance history, natural history, beaver, and soils, including visits to several active and completed restoration projects and overnights in the field. Lab.
Prerequisite: (BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

BI 399, SPECIAL TOPICS, 0-16 Credits
May be repeated for 16 total credits.
Equivalent to: BI 399H
This course is repeatable for 16 credits.

BI 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: BI 401H
This course is repeatable for 16 credits.

BI 401H, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 401
This course is repeatable for 16 credits.

BI 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BI 405H
This course is repeatable for 16 credits.

BI 406, PROJECTS: CURATORIAL ASSISTANT, 1-6 Credits
Students assist with curatorial projects in OSU biological collections. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 407, SEMINAR, 1 Credit
Departmental seminar. Graded P/N.
Equivalent to: BI 407H, BI 407H, BOT 407, BOT 407H
This course is repeatable for 16 credits.

BI 407H, SEMINAR, 1 Credit
Departmental seminar. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BI 407
This course is repeatable for 16 credits.

BI 409, ADVANCED TEACHING PRACTICUM, 1-6 Credits
Advanced practicum experience for students assisting in Biology or Zoology courses. Includes advanced training in course content and development of instructional materials. Admission is by application. See Cordley 3029 for details.
This course is repeatable for 6 credits.

BI 410, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.
Available via Ecampus

BI 420, *VIRUSES IN MODERN SOCIETY, 3 Credits
Impact of viruses on modern civilization. Molecular mechanisms of viral infectivity. Approaches to the prevention and cure of viral diseases. Role of viruses in agriculture and industry. Offered alternate years. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Prerequisite: BI 311 with D- or better or BI 311H with D- or better or BI 314 with D- or better or BI 314H with D- or better

BI 427, PALEOBIOLOGY, 4 Credits
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Equivalent to: Z 427

BI 445, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Prerequisite: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445H

BI 445H, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Attributes: HNRS – Honors Course Designator
Prerequisite: BI 311 with D- or better or BI 311H with D- or better
Equivalent to: BI 445

BI 450, *MARINE BIOLOGY AND ECOLOGY, 15 Credits*

A comprehensive lecture and laboratory introduction to the flora and fauna of the marine environment approached from the level of the organism to ecosystem. Ecological patterns and processes characteristic of marine communities will be emphasized. Lec/lab. Taught at Hatfield Marine Science Center, Newport, OR. (Writing Intensive Course)

**Attributes:** CWIC – Core, Skills, WIC

**Prerequisite:** (BI 370 with D- or better or BI 370H with D- or better) and (ST 351 [D-] or ST 351H [D-])

**Recommended:** ST 352

Available via Ecampus

---

BI 451, FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM, 4 Credits

In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. BI 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.

**Prerequisite:** ((BI 231 with D- or better and BI 241 [D-]) or (BI 331 [D-] and BI 341 [D-])) and ((BI 232 [D-] and BI 242 [D-]) or (BI 332 [D-] and BI 342 [D-])) and ((BI 233 [D-] and BI 243 [D-]) or (BI 333 [D-] and BI 343 [D-]))

**Equivalent to:** Z 451

---

BI 454, EVOLUTIONARY GENOMICS, 3 Credits

Examines the evolutionary forces that have produced such varied and complex genomes across the tree of life. The processes by which genomes can be structured, maintained, and remodeled (by nature or by humans) are explored through scientific literature. Special emphasis will be given to recent technological advances in genomics, along with their potential impacts on individuals and society.

**Prerequisite:** BI 311 with D- or better or BI 311H with D- or better

---

BI 456, PHYLOGENETICS, 4 Credits

Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.

**Prerequisite:** (ST 351 with D- or better or ST 351H with D- or better) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-] or ST 411H (may be taken concurrently) [D-]) and (BI 311 [D-] or BI 311H [D-] or BI 370 [D-] or BI 370H [D-])

**Equivalent to:** Z 456

---

BI 481, BIOGEOGRAPHY, 3 Credits

Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today's rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.

**Prerequisite:** BI 370 with D- or better or BI 370H with D- or better

**Equivalent to:** Z 481

---

BI 483, POPULATION BIOLOGY, 3 Credits

Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.

**Prerequisite:** (MTH 241 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better or MTH 227 with D- or better) and (ST 351 [D-] or ST 351H [D-]) and (ST 352 (may be taken concurrently) [D-] or ST 411 (may be taken concurrently) [D-]) and (BI 311 [D-] or BI 311H [D-] or BI 370 [D-] or BI 370H [D-])

Available via Ecampus

---

BI 485, MONSTER BIOLOGY, 3 Credits

Scientists seek to explain what exists and why things are. An alternative approach is to ask why things are not. Biological and physical laws are used to critically and rigorously assess why monsters from literature, television and film are not possible in the real world.

**Prerequisite:** (BI 311 (may be taken concurrently) with D- or better or BI 311H (may be taken concurrently) with D- or better) and (BI 370 (may be taken concurrently) [D-] or BI 370H (may be taken concurrently) [D-])

---

BI 495, DISEASE ECOLOGY, 3 Credits

An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.

**Prerequisite:** BI 370 with C- or better or BI 370H with C- or better

---

BI 498, SENIOR BIOLOGY FIELD TEST, 0 Credits

A comprehensive, two-hour exam to assess the biological knowledge of Biology and Zoology seniors. Students must complete the exam in their final undergraduate term or during spring term if graduating during summer when it is not offered. A pass will be given to all students who complete the exam. More details at http://ib.oregonstate.edu/advising/MFT-info.

Available via Ecampus

---

BI 499, SPECIAL TOPICS, 0-16 Credits

Topics and credits vary.

**Equivalent to:** BI 499H

*This course is repeatable for 16 credits.*

---

BI 499H, SPECIAL TOPICS, 1-16 Credits

Topics and credits vary.

**Attributes:** HNRS – Honors Course Designator

**Equivalent to:** BI 499

*This course is repeatable for 16 credits.*

---

Integrative Biology (IB)

**IB 501, RESEARCH, 1-16 Credits**

Graduate-level research completed under faculty supervision.

**Equivalent to:** Z 501

*This course is repeatable for 16 credits.*

---

**IB 503, THESIS, 1-16 Credits**

Master's thesis, completed under faculty supervision.

**Equivalent to:** Z 503

*This course is repeatable for 999 credits.*
IB 505, READING AND CONFERENCE, 1-16
Credits
For graduate students working toward a master’s degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest.
Equivalent to: Z 505
This course is repeatable for 16 credits.

IB 506, PROJECTS: OUTREACH, 1-16
Credits
Graded P/N.
Equivalent to: BI 506
This course is repeatable for 16 credits.

IB 507, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: Z 507
This course is repeatable for 16 credits.

IB 510, INTERNSHIP, 1-16 Credits
Equivalent to: Z 510
This course is repeatable for 16 credits.

IB 511, INTEGRATIVE BIOLOGY GRADUATE STUDENT ORIENTATION, 2 Credits
Introduction to the graduate program in Integrative Biology and at OSU in general. Class introduces students to various skills for success in graduate school and beyond. Exploration of career options for those holding a degree in IB are explored. Graded P/N.

IB 512, INTEGRATIVE BIOLOGY GTA TRAINING AND DEVELOPMENT, 1 Credit
Provides instructional support and professional development for first year graduate teaching assistants (GTAs) in Integrative Biology. Focuses on developing a foundation for quality instruction, facilitation, and leadership as GTAs and professionals. Best practices, skills, theory and knowledge necessary for effective teaching, facilitation, and assessment of student learning are explored.
This course is repeatable for 3 credits.

IB 513, GRANT WRITING AND ETHICS, 3 Credits
Participants will write and submit a grant proposal by the end of the term. We discuss the main components of a typical grant proposal. Participants read and critique proposal drafts written by participants. Ethical issues are discussed as they are encountered.
Equivalent to: Z 585
This course is repeatable for 6 credits.

IB 515, SCIENCE COMMUNICATION: MAKING YOUR SCIENCE MATTER, 2 Credits
A practical, hands-on course designed to help science graduate students build knowledge and skills for engaging with audiences beyond their scientific peers. The science of science communication, the cultures of journalism and public policy, the changing roles of scientists in society, and science advocacy will be explored through lectures, invited talks, in-class discussions and exercises.

IB 518, SCIENCE AND POLICY, 2 Credits
An introduction to the science-policy interface in a ‘post-truth’ society. The formulation of state and federal public policy is examined, as well as and role of science and scientist in informing policy, management decisions and public understanding. Current topics are emphasized.

IB 522, COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY, 5 Credits
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
Equivalent to: Z 522

IB 523, ENVIRONMENTAL PHYSIOLOGY, 3 Credits
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
Equivalent to: Z 523

IB 525, EMBRYOLOGY AND DEVELOPMENT, 5 Credits
Equivalent to: Z 525

IB 527, PALEOBIOLOGY, 0-4 Credits
Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A process-based study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
Equivalent to: BI 527

IB 531, VERTEBRATE PHYSIOLOGY I, 4 Credits
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in IB 531, IB 532 series.

IB 532, VERTEBRATE PHYSIOLOGY II, 3 Credits
Systems/concepts covered include blood, immune, lymphatic, cardiovascular, and pulmonary. Second in the IB 531, IB 532 series.
Equivalent to: Z 532
IB 538, BEHAVIORAL NEUROBIOLOGY, 3 Credits
Equivalent to: Z 538

IB 540, INSECT PHYSIOLOGY, 3 Credits
Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. The contributions of insect physiology to general physiological principles and biorational methods of insect pest control are discussed.
Equivalent to: Z 540

IB 545, EVOLUTION, 3 Credits
Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution.
Equivalent to: BI 545

IB 551, FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM, 4 Credits
In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. IB 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab.
Equivalent to: BI 551
Recommended: (BI 231 and 241) or (BI 331 and 341) and ((BI 232 and 242) or (BI 332 and 342)) and ((BI 233 and 243) or (BI 333 and 343))

IB 554, EVOLUTIONARY GENOMICS, 3 Credits
Examines the evolutionary forces that have produced such varied and complex genomes across the tree of life. The processes by which genomes can be structured, maintained, and remodeled (by nature or by humans) are explored through scientific literature. Special emphasis will be given to recent technological advances in genomics, along with their potential impacts on individuals and society.
Equivalent to: BI 554

IB 556, PHYLOGENETICS, 4 Credits
Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab.
Equivalent to: BI 556

IB 561, MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY, 4 Credits
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center.
Equivalent to: Z 561

IB 573, HERPETOLOGY, 3 Credits
World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature.
Equivalent to: Z 573

IB 574, SYSTEMATIC HERPETOLOGY, 2 Credits
A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab.
Equivalent to: Z 574

IB 577, AQUATIC ENTOMOLOGY, 4 Credits
Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab.
Equivalent to: Z 577

IB 581, BIOGEOGRAPHY, 3 Credits
Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today’s rapidly changing world. The course format includes lecture, computer-based activities, and discussion. Offered winter term in odd years.
Equivalent to: BI 581

IB 583, POPULATION BIOLOGY, 3 Credits
Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec.
Equivalent to: BI 583

IB 592, THEORETICAL ECOLOGY, 4 Credits
A treatment of the central concepts of theoretical ecology, with emphasis on the analysis and modeling of single populations and multispecies communities. Topics include discrete- and continuous-time models of population growth, stochastic and deterministic processes, and the response of populations and communities to pulse and press perturbations.
Equivalent to: BI 592

IB 593, BEHAVIORAL ECOLOGY, 5 Credits
Behavioral ecology with emphasis on both theoretical and empirical approaches. Offered alternate years.
Equivalent to: Z 593
IB 594, COMMUNITY ECOLOGY, 5 Credits

Theory and analysis of multispecies associations. Emphasis on extent to which existing ecological theory is supported by natural phenomena. Course considers how biotic and abiotic mechanisms interact to regulate community organization and stability in marine, freshwater, and terrestrial habitats. Offered alternate years.

Equivalent to: Z 594

IB 595, DISEASE ECOLOGY, 3 Credits

An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases.

Equivalent to: BI 350

IB 599, SPECIAL TOPICS, 1-16 Credits

Topics and credits vary. Grading mode TBA. Taught at Hatfield Marine Science Center and Corvallis campus.

Equivalent to: Z 599

This course is repeatable for 16 credits.

IB 601, RESEARCH, 1-16 Credits

Doctoral-level research under faculty supervision. Graded P/N.

Equivalent to: Z 601

This course is repeatable for 16 credits.

IB 603, THESIS, 1-16 Credits

Doctoral thesis completed under faculty supervision.

Equivalent to: Z 603

This course is repeatable for 999 credits.

IB 605, READING AND CONFERENCE, 1-16 Credits

For graduate students working toward doctoral degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest.

Equivalent to: Z 605

This course is repeatable for 16 credits.

Zoology (Z)

Z 349, *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION, 3 Credits

The earth's biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth's ecosystems, and methods used to conserve biodiversity for future generations. (Bacc Core Course)

Attributes: CSGI – Core, Synth, Global Issues

Equivalent to: BI 349

Available via Ecampus

Z 350, ANIMAL BEHAVIOR, 3 Credits

Concepts of behavior; sensory receptors, internal mechanisms governing responses; learning and habituation; social organization and communication.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Equivalent to: BI 350

Available via Ecampus

Z 361, INVERTEBRATE BIOLOGY, 3 Credits

Exploration of the diversity and evolutionary relationships among major invertebrate phyla with an emphasis on morphological features, functional aspects, and life history for each phylum.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 362, INVERTEBRATE BIOLOGY LABORATORY, 2 Credits

Morphology and anatomy of representative invertebrates introduced in Z 361; diversity within phyla. Study is by dissections and both microscopic and macroscopic examination; field trip fee. Lab fee. Lec/lab.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) and Z 361 (may be taken concurrently [C-])

Z 364, DIVERSITY OF LIFE: INVERTEBRATES, 5 Credits

Exploration of the diversity and evolutionary relationships among major invertebrate groups with an emphasis on building and interpreting phylogenetic trees as well as comparing and contrasting morphology, function, and life history within each group. Laboratory activities build scientific skills by exploring current hypotheses and tools for the study of invertebrate evolution.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 365, BIOLOGY OF INSECTS, 4 Credits

Introduction to the study of insects, focusing on the biological attributes responsible for the success and dominance of insects. Emphasis on taxonomy, morphology, behavior, ecology, and coevolutionary interrelationships. Required field trips. Lec/lab.

Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Z 371, VERTEBRATE BIOLOGY, 3 Credits
Overview of vertebrate origins and phylogeny integrating several disciplines (anatomy, ecology, genetics, developmental biology, physiology, behavior, and evolution) to explore the structural and functional adaptations and evolutionary history of vertebrates. Lec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Recommended: Completion or concurrent enrollment in Z 372

Z 372, VERTEBRATE BIOLOGY
LABORATORY, 2 Credits
Classification, identification, and natural history of vertebrates. Includes laboratory examination of specimens and frequent field trips (fee charged) emphasizing Oregon fauna. Lab fee.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and Z 371 (may be taken concurrently) [D-]

Z 374, DIVERSITY OF LIFE: VERTEBRATES,
5 Credits
Examination of vertebrate origins and phylogeny, integrating several disciplines (molecular biology, anatomy, behavioral ecology, and evolution). Emphasizes critical thinking and the scientific process to explore the structural/functional adaptations and evolutionary history of vertebrates. Laboratory activities build scientific skills by exploring current hypotheses and tools for the study of vertebrate evolution.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Recommended: Completion or concurrent enrollment in Z 372

Z 422, COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY, 5 Credits
Phylogenetically-based study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through non-invasive experimentation. Lec/lab.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) and (CH 332 (may be taken concurrently) [D-] or CH 335 (may be taken concurrently) [D-])

Z 423, ENVIRONMENTAL PHYSIOLOGY, 3 Credits
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 123 [C-] or CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-])
Available via Ecampus

Z 425, EMBRYOLOGY AND DEVELOPMENT,
5 Credits
Prerequisite: (BI 311 with D- or better or BI 311H with D- or better) and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-] or BB 314H [D-])

Z 431, VERTEBRATE PHYSIOLOGY I, 4 Credits
Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in Z 431, Z 432/Z 442 series. Lec/rec.
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) and (CH 332 (may be taken concurrently) [C-] or CH 335 (may be taken concurrently) [C-])

Z 432, VERTEBRATE PHYSIOLOGY II, 3 Credits
Prerequisite: Z 431 with C- or better

Z 438, BEHAVIORAL NEUROBIOLOGY, 3 Credits
Prerequisite: ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and (CH 123 [C-] or CH 233 [C-] or CH 233H [C-]) and (CH 263 [C-] or CH 263H [C-])
Z 442, VERTEBRATE PHYSIOLOGY LABORATORY, 2 Credits
Experiments and exercises in vertebrate physiology covering systems studied in Z 431 and Z 432. Available to Biology majors. Lab fee.
**Prerequisite:** Z 431 with C- or better and Z 432 (may be taken concurrently) [C-]

Z 461, MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY, 4 Credits
Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center.
**Prerequisite:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 473, HERPETOLOGY, 4 Credits
Exploration of global herpetofauna focusing on taxa of the Pacific Northwest of North America. Identification and natural history of amphibians and reptiles are emphasized, along with a phylogenetic framework, to explore and discuss ideas involving their behavior, evolution, ecology, and conservation. Student projects examine important topics in the field.
**Prerequisite:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
*Available via Ecampus*

Z 477, AQUATIC ENTOMOLOGY, 4 Credits
Comparative survey of aquatic insects. Two required Saturday field trips. Lec/lab.
**Prerequisite:** ((BI 211 with C- or better or BI 211H with C- or better) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
*Available via Ecampus*

Z 499, SPECIAL TOPICS, 0-16 Credits
Topics and credits vary.
**Equivalent to:** Z 499H
*This course is repeatable for 16 credits.*

Z 499H, SPECIAL TOPICS, 1-16 Credits
Topics and credits vary.
**Equivalent to:** Z 499
*This course is repeatable for 16 credits.*

Biology Minor
Also available at OSU-Cascades and via Ecampus.

Administered by the Department of Integrative Biology under the School of Life Sciences.

Minor Code: 509

Students majoring in Biochemistry and Biophysics, Biochemistry and Molecular Biology, Biohealth Sciences, Biology, Botany, Microbiology and Zoology cannot declare the Biology minor. The courses below may be shared with other majors outside of those listed above.

The Biology minor includes a required introductory biology sequence with a chemistry prerequisite or corequisite for the second term of each series. A term of organic chemistry, CH 331 or CH 334, is required to take BB 314 and some of the listed physiology courses. A C– or better in the BI 2xx series is required to complete the minor.

**Electives**
Select one course from each of the following subject areas: 12-16

**Cellular and Molecular Biology**
- BB 314: CELL AND MOLECULAR BIOLOGY
- BB 331: *INTRODUCTION TO MOLECULAR BIOLOGY

**Ecology**
- BI 348: *HUMAN ECOLOGY
- BI 351: MARINE ECOLOGY
- BI 370: ECOLOGY
- BOT 341: PLANT ECOLOGY
- MB 448: MICROBIAL ECOLOGY
- Z 349: *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION

**Evolution**
- BI 345: *INTRODUCTION TO EVOLUTION
- BI 445: EVOLUTION

**Organismal and Physiology**
- BI 231: INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY
- BI 331: ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
  & BI 341: and ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
- BOT 321: PLANT SYSTEMATICS
- BOT 331: PLANT PHYSIOLOGY
- MB 302: GENERAL MICROBIOLOGY
- Z 350: ANIMAL BEHAVIOR
- Z 361: INVERTEBRATE BIOLOGY (Z 362 is optional)
- Z 364: DIVERSITY OF LIFE: INVERTEBRATES
- Z 365: BIOLOGY OF INSECTS
- Z 371: VERTEBRATE BIOLOGY (Z 372 is optional)
- Z 374: DIVERSITY OF LIFE: VERTEBRATES
- Z 423: ENVIRONMENTAL PHYSIOLOGY
- Z 431: VERTEBRATE PHYSIOLOGY I
- Z 438: BEHAVIORAL NEUROBIOLOGY
- Z 473: HERPETOLOGY
- Z 477: AQUATIC ENTOMOLOGY

Total Credits: 28-32

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Biology Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Ecology (p. 1660)
- Genetics (p. 1661)
- Marine Biology (p. 1661)
- Physiology and Behavior (p. 1662)
- Pre-Dentistry/Biology (p. 1663)
- Pre-Education Biology (p. 1663)
- Pre-Medicine/Biology (p. 1664)
- Pre-Veterinary Medicine (p. 1665)

Also available at OSU-Cascades.

Administered by the Department of Integrative Biology under the School of Life Sciences.

The undergraduate BS degree in Biology is designed for students seeking an interdisciplinary background in the life sciences. The major couples a comprehensive biological, physical and quantitative sciences core with a variety of electives that can be catered to meet diverse professional goals. Undergraduate research, internship, teaching and study abroad experience are strongly recommended, and credits can be integrated with major requirements. Biology majors receive excellent training for graduate and professional programs.

Corvallis Campus students may choose to complete one transcript-visible option in Ecology (p. 1660), Genetics (p. 1661), Marine Biology (p. 1661), Physiology and Behavior (p. 1662), Pre-Dentistry/Biology (p. 1663), Pre-Education Biology (p. 1663), Pre-Medicine/Biology (p. 1664), or Pre-Veterinary Medicine (p. 1665). Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional option course work in four years.

Major Code: 509

- Explain and apply the fundamental concepts of the biological sciences, including inquiry in these four areas: PO1-A Cell Biology and Biochemistry; PO1-B Molecular Biology and Genetics; PO1-C Organismal Biology; and PO1-D Ecology and Evolution.
- Explain and apply the fundamental concepts in cell biology and biochemistry.
- Explain and apply the fundamental concepts in molecular biology and genetics.
- Explain and apply fundamental concepts in organismal biology.
- Explain and apply fundamental concepts in population genetics, evolution and ecology.
- Apply the process of science through three different aspects.
- Access primary literature, identify relevant works for a particular topic, and evaluate the scientific content of these works.
- Formulate testable hypotheses based on observation, gather data to address these hypotheses and analyze those data to assess the degree to which their hypothesis is supported.
- Employ fundamental quantitative and statistical principles to present and critique scientific findings.
- Communicate scientific information through effective formal and informal writing and speaking in a format used by practicing scientists.
- Integrate and analyze information across levels of organization ranging from biochemistry and molecular biology to ecosystems within the biological sciences to formulate arguments and critically evaluate scientific claims.
- Conduct background research and apply fundamental biological science principles to make informed decisions on socio-scientific issues.

Students in the Biology major must complete BI 221, BI 222 and BI 223 (or the honors version of this series) with a C– or better to continue on to upper-division Biology (BI) and Zoology (Z) coursework. Students must also complete CH 231/CH 261, CH 232/CH 262 or CH 233/CH 263 and CH 331 and CH 332 with a C– or better to continue on to upper-division Chemistry (CH) coursework.

Students majoring in Biology cannot seek a dual or double major in Biochemistry and Biophysics, Biochemistry and Molecular Biology, Biohealth Sciences, Microbiology or Zoology.

Declaring an option can modify the statistics and elective areas of the major. For further information, see MyDegrees or the Integrative Biology (http://ib.oregonstate.edu) website.

These courses are arranged in the order they are generally taken.

- PRINCIPLES OF BIOLOGY CELLS
- PRINCIPLES OF BIOLOGY: ORGANISMS
- PRINCIPLES OF BIOLOGY: POPULATIONS (or the honors version of this series)
Select two additional courses from the following:

- **Track II Computer Science and Quantitative Applications**
- **Track I Physics**

Select one of the following tracks or see option:

- **Experiential Learning or Integrative Biology Elective**

Select one course from the following or see option:

**Organismal Biology**

- BI 427  
  PALEOBIOLOGY
- BOT 321  
  PLANT SYSTEMATICS
- BOT 416  
  AQUATIC BOTANY
- BOT 461  
  MYCOLOGY
- Z 361  
  INVERTEBRATE BIOLOGY
- & Z 362  
  and INVERTEBRATE BIOLOGY LABORATORY
- Z 371  
  VERTEBRATE BIOLOGY
- & Z 372  
  and VERTEBRATE BIOLOGY LABORATORY
- Z 461  
  MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY
  (taught at Hatfield Marine Science Center)
- Z 477  
  AQUATIC ENTOMOLOGY

**Physiology**

Select one course from the following or see option:

- BI 331  
  ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
- & BI 341  
  and ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
- & BI 332  
  and ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
- BOT 331  
  PLANT PHYSIOLOGY
- BOT 488  
  ENVIRONMENTAL PHYSIOLOGY OF PLANTS
- Z 423  
  ENVIRONMENTAL PHYSIOLOGY
- Z 425  
  EMBRYOLOGY AND DEVELOPMENT
- Z 431  
  VERTEBRATE PHYSIOLOGY I

**Writing Intensive Course (WIC)**

Select one course from the following or see option:

- BI 319  
  *THEORY, PRACTICE AND DISCOURSE IN THE LIFE SCIENCES
- BI 371  
  *ECOLOGICAL METHODS
- BI 373  
  *FIELD METHODS IN MARINE ECOLOGY
- BOT 323  
  *FLOWERING PLANTS OF THE WORLD
- MB 385  
  *EMERGING INFECTIOUS DISEASES AND EPIDEMICS

**Experiential Learning or Integrative Biology Elective**

Select one of the following two tracks or an option:

**Track I Experiential Learning Credits**

Select any combination of three credits from the following:

- BI 309  
  TEACHING PRACTICUM (by approval)
- BI 401  
  RESEARCH AND SCHOLARSHIP (by approval)
- BI 406  
  PROJECTS: CURATORIAL ASSISTANT (by approval)
- BI 409  
  ADVANCED TEACHING PRACTICUM (by approval)
- BI 410  
  INTERNSHIP (by approval)
- OSU international internships (INTL credits) by approval

**Track II Integrative Biology Course**

Select one course from the following:

- BI 333  
  ADVANCED HUMAN ANATOMY AND PHYSIOLOGY
- & BI 343  
  and ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY
- BI 353  
  PACIFIC NORTHWEST COASTAL Ecosystems (taught at Hatfield Marine Science Center)
- BI 358  
  SYMBIOSES AND THE ENVIRONMENT
- BI 375  
  FIELD METHODS IN ECOSYSTEMS AND RESTORATION (taught at OSU Cascades)
- BI 427  
  PALEOBIOLOGY (if not used above)
- BI 450  
  *MARINE BIOLOGY AND GEOLOGY (taught at Hatfield Marine Science Center)
- BI 456  
  PHYLOGENETICS (if not used above)
- BI 481  
  BIOGEOGRAPHY
- BI 483  
  POPULATION BIOLOGY (if not used above)
- BI 485  
  MONSTER BIOLOGY
- BI 495  
  DISEASE ECOLOGY

**Electives**

Select one BCC course from the following or see option:

- BI 498  
  SENIOR BIOLOGY FIELD TEST

**Biology Undergraduate Major (BS, HBS)**

Z 365  BIOLOGY OF INSECTS
Z 371  VERTEBRATE BIOLOGY
& Z 372  and VERTEBRATE BIOLOGY LABORATORY (if not used above)
Z 425  EMBRYOLOGY AND DEVELOPMENT (if not used above)
Z 432  VERTEBRATE PHYSIOLOGY II
& Z 442  and VERTEBRATE PHYSIOLOGY LABORATORY
Z 438  BEHAVIORAL NEUROBIOLOGY
Z 473  HERPETOLOGY

Total credits required for graduation 180

*  Baccalaureate Core Course (BCC)
^  Writing Intensive Course (WIC)
1  Alternative series is ST 351, ST 411 and ST 412
2  Biology majors are required to take BI 498, a comprehensive, two-
   hour Biology Major Field Test (http://ib.oregonstate.edu/advising/  
   MFT-info/), in their final OSU term (or spring term if they will graduate
   in summer) in order to graduate
3  Declaring an option will alter the elective categories below, and all
   options automatically clear the upper-division science electives
   requirement. See the individual options or MyDegrees for details.
   Biology and Society electives also count as BCC
4  BI 450 (taught at Hatfield Marine Science Center) is by application
   only and may count for other major requirements

Ecology Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Biology major Ecology option is designed to provide students with a strong background in the theory and applications of ecology and environmental studies. It couples the core biological sciences background from the Biology major with required ecology, conservation, field methods, and environmental policy course work. A variety or upper-division ecology and organismal biology electives can be chosen based on individual interests. Undergraduate research and internship experience are strongly recommended for option students, and three credits can be applied to the Electives. The Ecology option provides excellent preparation for graduate programs in ecology.

Option Code: 715

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Ecology option course work in four years. Courses used to satisfy the Ecology option requirements also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course and Experiential Learning or Integrative Biology Elective requirements for the Biology major.

It is recommended that Ecology option students take ST 411 and ST 412 in place of ST 352 for the major statistics requirement.

Several Ecology option courses may also be used to satisfy areas of the baccalaureate core.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

**Population Ecology**

Select one course from the following: 3-4

- BI 483  POPULATION BIOLOGY
- BOT 442 PLANT POPULATION ECOLOGY
- FW 320 INTRODUCTORY POPULATION DYNAMICS

**Community and Ecosystem Ecology**

Select one course from the following: 3-5

- BI 306  *ENVIRONMENTAL ECOLOGY*
- BI 351  MARINE ECOLOGY
- BI 353  PACIFIC NORTHWEST COASTAL ECOSYSTEMS
- BI 481  BIOPHYSIOLOGY
- FES 341  FOREST ECOLOGY
- FW 321  APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY
- FW 456  FRESHWATER ECOLOGY AND CONSERVATION
- FW 479  WETLANDS AND RIPARIAN ECOLOGY
- GEO 484  INTRODUCTION TO BIOGEOCHEMISTRY
- OC 434/FW 434  ESTUARINE ECOLOGY

**Conservation and Human Impacts**

Select one course from the following: 3

- BI 301  *HUMAN IMPACTS ON ECOSYSTEMS*
- BI 348  *HUMAN ECOLOGY*
- Z 249  *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION*

**Environmental Policy**

Select one course from the following: 3-4

- AEC 250  *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY*
- AEC 253  *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS*
- AEC 351  *NATURAL RESOURCE ECONOMICS AND POLICY*
- AEC 352/ECON 352  *ENVIRONMENTAL ECONOMICS AND POLICY*
- FES 435/TOX 435  *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK*
- FES 485  *CONSSENSUS AND NATURAL RESOURCES*
- FW 350  *ENDANGERED SPECIES, SOCIETY AND SUSTAINABILITY*

**Experiential Learning or Ecology Elective Courses**

Select both tracks or two courses from Track II: 6-8

**Track I: Experiential Learning Credits**

Select any combination of three credits from the following:

- BI 401  RESEARCH AND SCHOLARSHIP (by approval)
- BI 406  PROJECTS: CURATORIAL ASSISTANT (by approval)
- BI 410  INTERNSHIP (by approval or international internships approved by the Integrative Biology Lead Advisor)

**Track II: Ecology Elective**

Select one course from the following: 5-6

- BI 353  PACIFIC NORTHWEST COASTAL ECOSYSTEMS (if not taken above)
- BI 358  SYMBIOSIS AND THE ENVIRONMENT
- BI 375  FIELD METHODS IN ECOLOGICAL RESTORATION (taught at OSU Cascades)
- BI 427  PALEOBIOLOGY
- BI 481  BIOPHYSIOLOGY (if not taken above)
- BI 485  MONSTER BIOLOGY
- BI 495  DISEASE ECOLOGY
- BOT 341  PLANT ECOLOGY
- BOT 458  ECOSYSTEMS GENOMICS
- CH 390  ENVIRONMENTAL CHEMISTRY
- FES 440  WILDLAND FIRE ECOLOGY

**Plant Organismal Biology**

Select one course from the following: 4

- BOT 321  PLANT SYSTEMATICS
- BOT 416  AQUATIC BOTANY
- RNG 353  WILDLAND PLANT IDENTIFICATION

**Animal Organismal Biology**

Select one course from the following: 4-5

- Z 361  INVERTEBRATE BIOLOGY
- & Z 362  INVERTEBRATE BIOLOGY LABORATORY
- Z 371  VERTEBRATE BIOLOGY
- & Z 372  VERTEBRATE BIOLOGY LABORATORY
- Z 477  AQUATIC ENTOMOLOGY

**Winter**

Select one of the following: 3

- Biology and Society
- Organismal Biology
- Physiology
- Writing Intensive Course

Experiential Learning or Integrative Biology Elective: 3

Electives: 5-10

**Spring**

Electives: 15

Total Credits: 180
For further information, see MyDegrees or the option also complete half of the Biology major statistics requirement. The statistics courses in the Genetics Option, Writing Intensive and Experiential Learning or Integrative Biology Elective Physics/Computer Science and Quantitative Applications, Physiology, Courses used to satisfy the Genetics option requirements also satisfy the additional course work in the Genetics option in four years. Most students can complete the additional Marine Biology option course work in four years. Courses used to satisfy the Marine Biology option also satisfy the Biology and Ecology minor.

The Biology major Genetics option is designed to provide a solid background in genetic theory and methods, as well as their application to evolutionary questions. Option students couple the core biological sciences background from the Biology major with genetics laboratory-intensive course work in addition to genetics and bioinformatics electives. Undergraduate research or internship experience is strongly recommended for option students, and three credits can be applied to the Upper-division Science Elective requirements. The Genetics option is an excellent way to prepare for graduate programs in genetics and evolutionary biology.

Option Code: 715

Genetics Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Biology major Genetics option requires 15-42 credits and includes the following courses:

**Baccalaureate Core Course (BCC)**

**Writing Intensive Course (WIC)**

Option Code: 517

Marine Biology Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Marine Biology option is designed to give students a strong background in the biology of marine organisms and their habitats. The core biological sciences background of the Biology major is coupled with field and laboratory course work in marine biology, ecology, conservation, and oceanography. The option emphasizes research and includes experiential courses completed in residence at the OSU Hatfield Marine Science Center in Newport, Oregon. Additional research or internship experience is strongly recommended for option students, and three credits can be applied to the option electives. The Marine Biology option provides excellent preparation for graduate programs in marine biology. Students completing the Marine Biology option cannot seek the Marine Biology and Ecology minor.

Option Code: 572

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Marine Biology option course work in four years. Courses used to satisfy the Marine Biology option also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course, Physics/Computer Science and Quantitative Applications, and Experiential Learning or Integrative Biology electives in the Biology major.

At least one term in residence at Hatfield Marine Science Center is required (spring or summer). The 15-credit BI 450 Marine Biology and...
Ecology course is taught each spring term at Hatfield Marine Science Center and is by application only. The course covers marine invertebrates, algae and fishes, as well as sections on marine ecology, conservation and policy. It also includes an undergraduate research project. Students apply to, and are accepted, the fall term before the spring they plan to attend. Applications are available in the Integrative Biology Office, Cordley Hall 3029. The summer term (https://hmsc.oregonstate.edu/academics/courses-hmsc/summer-term/) at Hatfield does not require an application and includes a variety of courses.

BI 111 is an optional weekend experiential course at Hatfield Marine Science Center that complements other option coursework, particularly for students with little or no previous marine experience.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

Hatfield Marine Science Center Tracks

Select one of the following tracks: 15-18

Spring Track admission by application only

- BI 450 | *MARINE BIOLOGY AND ECOLOGY (taught at Hatfield Marine Science Center) | 3 |

Summer Track not all courses are taught in summer

- BI 351 | MARINE ECOLOGY | 3 |
- BI 353 | PACIFIC NORTHWEST COASTAL ECOSYSTEMS (taught at Hatfield Marine Science Center) | 3 |
- BI 373 | *FIELD METHODS IN MARINE ECOLOGY | 3 |
- BOT 416 | AQUATIC BOTANY | 3 |
- or FW 315 | ICHTHYOLOGY | 3 |
- Z 461 | MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY | 3 |

Marine Elective Courses

Select one of the following tracks: 1

1. 3

Track I Experimental Learning Credits

Select any combination of three credits from the following:

- BI 401 | RESEARCH AND SCHOLARSHIP (by approval) | 3 |
- BI 406 | PROJECTS: CURATORIAL ASSISTANT (by approval) | 3 |
- BI 410 | INTERNSHIP (by approval) | 3 |

Track II Marine Elective

Select one course from the following:

- BI 353 | PACIFIC NORTHWEST COASTAL ECOSYSTEMS (if not used for requirements above - taught at Hatfield Marine Science Center) | 3 |
- BI 358 | SYMBIOSIS AND THE ENVIRONMENT | 3 |
- BI 485 | MONSTER BIOLOGY | 3 |
- BOT 416 | AQUATIC BOTANY (if not used for requirements above) | 3 |
- FW 302 | BIOLOGY AND CONSERVATION OF MARINE MAMMALS (taught at Hatfield Marine Science Center) | 3 |
- or FW 315 | ICHTHYOLOGY | 3 |
- or FW 316 | SYSTEMATICS OF FISHES | 3 |
- or FW 331 | ECOLOGY OF MARINE AND ESTUARINE BIRDS | 3 |
- or FW 421 | AQUATIC BIOLOGICAL INVASIONS | 3 |
- or FW 434/OC 434 | ESTUARINE ECOLOGY | 3 |
- or FW 469 | METHODS IN PHYSIOLOGY AND BEHAVIOR OF MARINE MEGAFANA | 3 |
- or FW 476 | FISH PHYSIOLOGY | 3 |
- MB 314 | AQUATIC MICROBIOLOGY (MB 422 is optional) | 3 |

Total Credits 31-34

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

1. If you did not complete BI 150, select a Marine Elective to replace it
2. FW 302, FW 331, FW 421 and FW 469 are all taught at Hatfield Marine Science Center

FW 315 may only be selected if not used for the summer track requirement

Option Code: 572

**Physiology and Behavior Option**

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Biology major Physiology and Behavior option is designed to provide a rigorous foundation in the comparative physiology and behavior of animals. Core biological sciences from the Biology major are coupled with course work in behavior, physiology and organismal biology. Undergraduate research or internship experience is strongly recommended for option students, and three credits can be applied to the electives for the option. The Physiology and Behavior option provides excellent preparation for graduate programs in animal behavior, physiology and other areas of organismal biology.

Option Code: 743

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional course work in the Physiology and Behavior option in four years. Courses used to satisfy the Physiology and Behavior option requirements also satisfy the Organismal Biology, Physiology, Writing Intensive Course and Experimental Learning or Integrative Biology Elective requirements for the Biology major.

Students may not pursue either the Physiology and Behavior, Pre-Dental, Pre-Medical or Pre-Veterinary Medicine options with the Biology major—no dual combinations are permitted.

It is recommended that Physiology and Behavior option students take PH 201-PH 203. Students should also consider taking PSY 202 which is optional but required for some of the Psychology elective courses.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Option Code: 713**

**Pre-Education Biology Option**

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Biology major Pre-Education option is designed to complete the requirements for the Science Education option in the OSU Education master’s degree and other U.S. graduate licensure programs for secondary education. Students should consult the requirements for specific schools before they apply because requirements can change.
Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Education option course work in four years. Courses used to satisfy the Pre-Education option requirements also satisfy the Physics/Computer Science and Quantitive Applications and Experiential Learning or Integrative Biology Elective requirements in the Biology major.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

Option Code: 226

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Education option course work in four years. Courses used to satisfy the Pre-Education option requirements also satisfy the Physics/Computer Science and Quantitive Applications and Experiential Learning or Integrative Biology Elective requirements in the Biology major.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

**Pre-Medicine/Biology Option**

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Pre-Medicine/Biology option is designed to meet the requirements for most medical schools in the U.S., but students should consult the requirements for specific schools before they apply because requirements can change. The option can also be used to meet the requirements for physician assistant, pharmacy and some other health professions. The option couples the comprehensive biological sciences background of the Biology major with intensive physiology laboratory experiences and important social science requirements. Dedicated health profession advisors work with Pre-Medicine/Biology option students to integrate essential professional experiences during their time at OSU.

**Option Code: 714**

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Medicine/Biology option course work in four years. The Pre-Medicine option requires a 3.0 or higher cumulative GPA in major and option course work. Courses used to satisfy the Pre-Medicine option requirements also satisfy the Biology and Society, Physics/Computer Science and Quantitive Applications, Physiology, Writing Intensive Course and Experiential Learning or Integrative Biology Elective requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.
Students may not pursue either the Pre-Medicine, Pre-Dentistry, Pre-Veterinary Medicine or Physiology and Behavior options within the Biology major—no dual combinations of these options are permitted.

Students interested in private practice should also consider taking Biology major—no dual combinations of these options are permitted.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

Select any combination of three credits from the following or GS 410 Medical Preceptorship credits by approval:

- BI 309  TEACHING PRACTICUM (by approval)
- BI 401  RESEARCH AND SCHOLARSHIP (by approval)
- BI 409  ADVANCED TEACHING PRACTICUM (by approval)

Track II Biological Science/Psychology Elective

Select one course from the following:

- BB 460  ADVANCED CELL BIOLOGY
- BI 451  FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM (by application only - limited summer enrollment)
- BI 485  MONSTER BIOLOGY
- BI 495  DISEASE ECOLOGY
- BHS 415/VMB 415  ONE HEALTH IN PRACTICE
- MB 416  IMMUNOLOGY (MB 417 is optional)
- MB 436  THE HUMAN MICROBIOME
- MB 480  GENERAL PARASITOLOGY
- PSY 350  HUMAN LIFESPAN DEVELOPMENT
- PSY 381  ABNORMAL PSYCHOLOGY
- PSY 433  PSYCHOPHARMACOLOGY
- TOX 411  FUNDAMENTALS OF TOXICOLOGY
- Z 425  EMBRYOLOGY AND DEVELOPMENT (if not used to complete a requirement above)
- Z 438  BEHAVIORAL NEUROBIOLOGY

or BB 360  INTRODUCTION TO NEUROSCIENCE

** Pre-Veterinary Medicine Option

This option is offered within the following major(s):

- Biology - College of Science (p. 1655)

The Biology major Pre-Veterinary Medicine option is designed to meet OSU College of Veterinary Medicine prerequisites and other U.S. veterinary schools, but students should consult the requirements for specific schools before they apply because requirements can change. The Pre-Veterinary Medicine option couples the strong biological sciences background of the Biology major with core animal anatomy and physiology laboratories and animal-focused science electives. Dedicated professional advisors work with Pre-Veterinary Medicine option students to integrate animal handling and other essential professional experiences during their time at OSU.

** Option Code: 714

Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Veterinary Medicine option course work in four years. Completion of the Pre-Veterinary Medicine option requires a 3.0 cumulative GPA in major and option course work. Courses used to satisfy the Pre-Veterinary Medicine option requirements also satisfy the Physics/Computer Science and Quantitative Applications, Organismal Biology, Physiology, Writing Intensive Course and Experiential Learning or Integrative Biology Elective requirements in the Biology major. Several courses may also be used to satisfy areas of the Baccalaureate Core.
Students may not pursue either the Pre-Veterinary Medicine, Pre-Dentistry, Pre-Medicine or Physiology and Behavior options within the Biology major—no dual combinations of these options are permitted.

Students interested in private practice should also consider taking BA 215 or BA 260.

For further information, see MyDegrees or the Integrative Biology website (http://ib.oregonstate.edu).

| Z 473    | HERPETOLOGY                              |         |

Total Credits: 43-45

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Option Code: 584

Integrative Biology Graduate Major (MS, PhD)

Graduate Areas of Concentration

Behavioral ecology, behavioral endocrinology, cell biology, chemical ecology, conservation biology, developmental biology, evolutionary biology, genetics, genomics, host-microbe interactions, marine ecology, paleontology, physiology, population biology

Administered by the Department of Integrative Biology under the School of Life Sciences.

The Department of Integrative Biology offers graduate work leading toward the Master of Science and Doctor of Philosophy degrees in all areas of biology ranging from molecular to community levels.

At present there are active research programs involving graduate students in the study of comparative immunobiology and pathology; cellular interactions and tissue differentiation; neuronal development; cytogenetics; behavioral biology at the neurophysiological, endocrinological, and ecological levels; environmental physiology; vertebrate functional morphology; reproductive biology; natural products chemistry; marine biology; physiologic and biochemical adaptation; genetics and evolution of populations; experimental marine, terrestrial, and freshwater population and community ecology; biodiversity and conservation biology.

Research is conducted in laboratories on campus, at the Malheur Field Station in southeastern Oregon, at the Hatfield Marine Science Center in Newport, the H.J. Andrews Experimental Forest, and in natural areas of the Cascade Mountains and Willamette Valley. Students also have entered into cooperative research programs in other departments, with the Oregon Health and Science University in Portland, and with the Primate Research Center in Beaverton.

As part of their training, all students participate in the departmental seminar program, and doctoral students spend at least one year as teaching assistants. Most students are supported by graduate teaching or research assistantships. Students are expected to have broad competency in biology. The master's program leads to a thesis or research report (nonthesis option) on a specific problem; the PhD program emphasizes independent thesis research on a major topic at the forefront of the chosen field.

Major Code: 6300

Integrative Biology Graduate Minor

Minor Code: 6310

Marine Biology and Ecology Minor

Administered by the Department of Integrative Biology under the School of Life Sciences.

Minor Code: 695

The courses in the minor may be shared with major requirements. Students with a Biology major cannot declare the Marine Biology and Ecology minor (they instead complete the Marine Biology option in that major), and students cannot receive any combination of the Biology minor, Marine Biology and Ecology minor or the Marine Biology option. The minor requires the BI 221, BI 222 or BI 223 series and ST 201 or ST 351 for required course work. A term or year of chemistry is required depending on elective course choices.

The Marine Biology and Ecology minor requires one or more terms in residence at Hatfield Marine Science Center, typically during junior year. Most students take a variety of courses during the summer term (https://hmsc.oregonstate.edu/academics/courses-hmsc/summer-term/)
summer-courses) at Hatfield Marine Science Center. The 15-credit BI 450 course taught each spring term at Hatfield Marine Science Center is an alternative to some core courses in the minor but is by application only. The applications for BI 450 are available the fall term before attending in the Integrative Biology Office, Cordley Hall 3029.

BI 111 is an optional weekend experiential course at Hatfield Marine Science Center that complements the minor, particularly for students with little or no previous marine experience.

Select two courses from the following or three courses if you did not take BI 150: 6-8

- BI 358 SYMBIOSES AND THE ENVIRONMENT
- FW 302 BIOLOGY AND CONSERVATION OF MARINE MAMMALS (taught at Hatfield Marine Science Center)
- FW 315 ICHTHYOLOGY
- FW 331 ECOLOGY OF MARINE AND ESTUARINE BIRDS (taught at Hatfield Marine Science Center)
- FW 421 AQUATIC BIOLOGICAL INVASIONS
- FW 493 FIELD METHODS FOR MARINE RESEARCH (taught at Hatfield Marine Science Center)
- MB 314 AQUATIC MICROBIOLOGY
- OC 201 *OCEANOGRAPHY

Total Credits 30-32

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

BI 450 (by application only) may be taken in place of BI 351, BI 373, BOT 416 and Z 461

Minor Code: 695

**Zoology Undergraduate Major (BS, HBS)**

Also available via Ecampus.

Administered by the Department of Integrative Biology under the School of Life Sciences.

The Zoology major offers scientific training in the diversity, organismal biology, ecology, and evolution of animals. The major core provides a solid foundation in the biological sciences while electives allow students to cater course work to meet specific interests in animal biology. Undergraduate research, internship, teaching and study abroad experience are strongly recommended, and credits can be integrated with major requirements.

Zoology majors enter such varied fields as animal care and husbandry, curatorial and museum management, laboratory animal research, field biology and conservation, and environmental management and policy.

The Zoology major is not suitable for pre-veterinary medicine students as it does not include the required prerequisite course work (see the option in Pre-Veterinary Medicine in the Biology major).

**Major Code: 620**

- Explain and apply the fundamental concepts of the zoological sciences including these four disciplinary areas: Animal diversity; Ecology and Evolution; Organismal Biology; and, Cell Biology and Genetics.
- Explain and apply the fundamental concepts of animal diversity.
- Explain and apply the fundamental concepts of ecology and evolution.
- Explain and apply the fundamental concepts of organismal biology.
- Explain and apply the fundamental concepts of cell biology and genetics.
- Apply the process of science.
- Apply the process of science through accessing primary literature, identifying relevant works for a particular topic, and evaluating the scientific content of these works.
- Apply the process of science through formulating testable hypotheses based on observation, gathering data to address these hypotheses and analyzing those data to assess the degree to which their hypothesis is supported. Employing fundamental quantitative and statistical principles to present and critique scientific findings.
- Communicate scientific information through effective formal and informal writing and speaking in a format used by practicing scientists.
- Integrate and analyze information across levels of organization ranging from cells to ecosystems within the zoological sciences to formulate arguments and critically evaluate scientific claims.
- Conduct background research and apply fundamental zoological science principles to make informed decisions on socio-scientific issues.

Students in the Biology major must complete BI 221 or BI 221H, BI 222 or BI 222H, and BI 223 or BI 223H with a C– or better to continue on to upper-division Biology (BI) and Zoology (Z) coursework. Students must also complete their General Chemistry series and CH 331 with a C– in each term to move on to other Chemistry (CH) coursework.

Students majoring in Biology, BioHealth Sciences, Fisheries and Wildlife Sciences, or Zoology cannot seek a dual or double major in any combination of these four majors. Zoology majors cannot seek the Biology minor.

For further information, see MyDegrees or the Integrative Biology (http://ib.oregonstate.edu) website.

**Baccalaureate Core Writing II Course**

- WR 227 *TECHNICAL WRITING 3
  - or WR 362 *SCIENCE WRITING 3

**Quantitative and Physical Sciences Core**

Select one of the following MTH series: 8
Organismal Physiology and Systematics Electives

Select one course from the following:

- Writing Intensive Course (WIC)
- BI 483
- BI 445
- Z 423 & Z 372
- Z 371

Series 1

- CH 231: GENERAL CHEMISTRY
- & CH 261: LABORATORY FOR CHEMISTRY 231
- CH 232: GENERAL CHEMISTRY
- & CH 262: LABORATORY FOR CHEMISTRY 232
- CH 233: GENERAL CHEMISTRY
- & CH 263: LABORATORY FOR CHEMISTRY 233

Series 2

- CH 121: GENERAL CHEMISTRY
- & CH 122: *GENERAL CHEMISTRY
- & CH 123: *GENERAL CHEMISTRY

Organic Chemistry Core

Select one of the following CH series:

Series 1

- CH 331: ORGANIC CHEMISTRY
- & CH 332: ORGANIC CHEMISTRY
- CH 337: ORGANIC CHEMISTRY LABORATORY

Series 2

- ST 351: INTRODUCTION TO STATISTICAL METHODS
- & ST 352: INTRODUCTION TO STATISTICAL METHODS

Select two 3+ credit courses from the following:

- TRAL 352
- PS 477
- PS 475
- GEOG 450
- FW 462
- FW 451
- FW 350
- FOR 436
- FES 485
- FES 452/FW 452
- Z 483

Ecology, Evolution and Conservation Electives

Select two 3+ credit courses from the following:

- BI 301: HUMAN IMPACTS ON ECOSYSTEMS
- or BI 348: HUMAN ECOLOGY
- or BI 351: MARINE ECOLOGY
- or BI 450: *MARINE BIOLOGY AND ECOLOGY
- or BI 453: PACIFIC NORTHWEST COASTAL ECOSYSTEMS (taught at Hatfield Marine Science Center)
- BI 375: FIELD METHODS IN ECOLOGICAL RESTORATION (taught at OSU-Cascades)
- BI 427: PALEOBIOLOGY
- BI 481: BIOGEOGRAPHY
- BI 495: DISEASE ECOLOGY
- BOT 341: PLANT ECOLOGY
- FES 440: WILDLAND FIRE ECOLOGY
- or FES 445: ECOLOGICAL RESTORATION
- or FW 445: ECOLOGICAL RESTORATION
- FW 320: INTRODUCTORY POPULATION DYNAMICS
- or FW 421: AQUATIC BIOLOGICAL INVASIONS
- or FW 427: PRINCIPLES OF WILDLIFE DISEASES
- or FW 479: WETLANDS AND RIPARIAN ECOLOGY
- Z 349: *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION

Natural Resource, Management and Policy Electives

Select 2+ credit courses from the following:

- AEC 250: *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY
- or AEC 253: *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS
- AEC 432: ENVIRONMENTAL LAW
- ANS 280: COMPANION ANIMAL MANAGEMENT
- BI 347: *OCEANS IN PERIL
- BI 348: *HUMAN ECOLOGY
- or BI 301: *HUMAN IMPACTS ON ECOSYSTEMS
- FES 355: MANAGEMENT FOR MULTIPLE RESOURCE VALUES
- FES 412: FOREST ECOLOGY
- FES 452/FW 452: BIODIVERSITY CONSERVATION IN MANAGED FORESTS
- FES 485: *CONSENSUS AND NATURAL RESOURCES
- FOR 436: WILDLAND FIRE SCIENCE AND MANAGEMENT
- FOR 462: NATURAL RESOURCE POLICY AND LAW
- FW 350: *ENDANGERED SPECIES, SOCIETY AND SUSTAINABILITY
- FW 451: AVIAN CONSERVATION AND MANAGEMENT
- FW 458: MAMMAL CONSERVATION AND MANAGEMENT
- FW 462: ECO SYSTEM SERVICES
- GEOG 450: LAND USE IN THE AMERICAN WEST
- PS 475: ENVIRONMENTAL POLITICS AND POLICY
- PS 477: INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY
- SOC 481: *SOCIETY AND NATURAL RESOURCES
- TRAL 352: WILDERNESS MANAGEMENT
- or TRAL 357: *PARKS AND PROTECTED AREAS MANAGEMENT

Select one of the following two tracks:

- Experiential Learning or Skills Elective
- or Natural Resource, Management and Policy Electives

Organismal Physiology and Systematics Electives

Select two 3+ credit courses from the following:

- BI 351: SYMBIOSIS AND THE ENVIRONMENT
- BI 485: MONSTER BIOLOGY
- BOT 321: PLANT SYSTEMATICS
- FW 302: BIOLOGY AND CONSERVATION OF MARINE MAMMALS
- or FW 311: ORNITHOLOGY
- or FW 315: ICHTHYOLGY
- or FW 317: MAMMALOGY
- or FW 331: ECOLOGY OF MARINE AND ESTUARINE BIRDS
- MB 480: GENERAL PARASITOLOGY
- Z 350: ANIMAL BEHAVIOR
- Z 365: BIOLOGY OF INSECTS
- Z 422: COMPARATIVE/FUNCTIONAL VERTEBRATE ANATOMY
- Z 431: VERTEBRATE PHYSIOLOGY
- Z 438: BEHAVIORAL NEUROBIOLOGY
- Z 473: HERPETOLOGY
- Z 477: AQUATIC ENTOMOLOGY

Select one of the following two tracks:

- Experiential Learning or Skills Elective
- or Natural Resource, Management and Policy Electives
**Track I Experiential Learning Credits**

The Department of Microbiology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. Major fields of study in the program include molecular biology, microbial physiology, genetics, virology, soil and aquatic microbiology, immunology, pathogenic microbiology, and microbial genomes. The department also participates in the Master of Arts in Interdisciplinary Studies program. Students in both the master's and PhD programs are required to complete a research project leading to a thesis. Students pursuing the PhD degree must complete both written and oral qualifying examinations. Teaching and research assistantships are available.

For additional information, contact the department head or other faculty members conducting research in areas that are of interest.

**Undergraduate Programs**

**Major**
- BioHealth Sciences (p. 1678)
  - Options:
    - Pre-Clinical Laboratory Science
    - Pre-Dentistry
    - Pre-Medicine/Pre-Podiatry
    - Pre-Optometry
    - Pre-Pharmacy
    - Pre-Physical Therapy
    - Pre-Physician Assistant
- Microbiology (p. 1685)
  - Options:
    - Aquatic Microbiology
    - Pre-Medicine/Microbiology

**Minor**
- Microbiology (p. 1684)

**Graduate Programs**

**Major**
- Microbiology (p. 1683)

---

**Microbiology**

The Department of Microbiology is part of the School of Life Sciences.

Microbiology is concerned with the forms and activities of bacteria, archaea, fungi, protozoa, and viruses. It plays varied roles in the practical applications of technology and medicine, as well as in the most theoretical problems of biology. Microbiologists are involved in activities as different as the study of gene structure, the control of disease, and the industrial processes based on the ability of microorganisms to decompose and synthesize complex organic molecules. Microbiology is one of the most rewarding of professions because it provides the opportunity to be in contact with all the other natural sciences and thus to contribute in many different ways to the betterment of life.

**Undergraduate Studies in Microbiology**

Many fields of microbiology are available to students and research workers. These include fundamental areas such as the physiology, ecology, and genetics of microorganisms; and the applications of microbiology concerned with soil and water quality, food safety, immunology, and human, animal and plant diseases. Undergraduate studies prepare students for admission to professional schools, graduate programs in microbiology, and for positions in education and as health officers, sanitarians and biotechnicians in private industry, state and federal government.

High school students or community college transferees considering a career in microbiology will find it helpful to have a strong background in mathematics and chemistry. An excellent advising program is available to undergraduates, and prospective students are encouraged to consult with a departmental advisor or with faculty members working in an area of interest to them. Upper-division students are also encouraged to carry out a research project in the laboratory of a faculty member and/or to serve as an undergraduate teaching assistant. Several partial scholarships are available for microbiology majors. For more information, contact a microbiology advisor.

**Undergraduate Studies in BioHealth Sciences**

Specialized programs are offered to students who wish to pursue careers in health-related fields. Such programs provide excellent academic preparation for students who plan to enter medical, pharmacy, or dental school, and for those choosing careers in physician assistant, physical therapy, optometry, clinical laboratory science, and podiatry. The curricula of the BioHealth Sciences major and accompanying options generally fulfills requirements at the respective professional schools. Because specific requirements vary from school to school, it is the student's responsibility to check requirements for any school to which the student plans to apply.

**Graduate Studies**

The Department of Microbiology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. Major fields of study in the program include molecular biology, microbial physiology, genetics, virology, soil and aquatic microbiology, immunology, pathogenic microbiology, and microbial genomes. The department also participates in the Master of Arts in Interdisciplinary Studies program. Students in both the master's and PhD programs are required to complete a research project leading to a thesis. Students pursuing the PhD degree must complete both written and oral qualifying examinations. Teaching and research assistantships are available.

For additional information, contact the department head or other faculty members conducting research in areas that are of interest.

BioHealth Sciences (BHS)

**BHS 107, HEALTH PROFESSIONS: DENTAL, 1 Credit**
Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.

**BHS 110, BIOHEALTH SCIENCES ORIENTATION, 1 Credit**
Introduction of incoming BioHealth Sciences students to college life with an emphasis on faculties, facilities, services, and curricula in BHS. Exposure to career opportunities for students interested in the BioHealth Sciences. Graded P/N.

**BHS 199, SPECIAL TOPICS, 1-16 Credits**
Graded P/N.
Equivalent to: GS 199
This course is repeatable for 16 credits.

**BHS 211, PROFESSIONAL DEVELOPMENT II: MOLECULAR, MICROBIAL, BIOHEALTH, 1 Credit**
Develop awareness of the elements of professional development, identify strategic areas for growth, and design an exploration plan. Emphasis is placed on being able to analyze career opportunities to determine the best mix of technical and professional skills needed for success as a biological science professional. Graded P/N. CROSSLISTED as BB 211/BHS 211.
Equivalent to: BB 211
Available via Ecampus

**BHS 255, *ALLIED HEALTH MICROBIOLOGY, 4 Credits**
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSLISTED as BHS 255/MB 255.
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 255
Available via Ecampus

**BHS 316, PRINCIPLES OF IMMUNOLOGY, 3 Credits**
Interactions of the innate and adaptive immune responses in the context of infectious diseases, autoimmune diseases, immunodeficiencies and immunotherapies. This course is designed for non-microbiology majors.
Prerequisite: MB 230 with C- or better or ((BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C-] or BI 213H [C-])) or (BI 204 [C-] and BI 205 [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

**BHS 320, HUMAN BACTEROIOLOGY, 4 Credits**
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: MB 320
Available via Ecampus

**BHS 323, ^MICROBIAL INFLUENCES ON HUMAN HEALTH, 3 Credits**
How microorganisms contribute in beneficial and detrimental ways to human health. Emphasis on microbial contributions to cancer, gut health, chronic infection and autoimmune diseases. This course is part of the Writing Intensive Curriculum for the BioHealth Sciences major. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MB 302 with D- or better or (BB 314 with D- or better or BB 314H with D- or better) or BB 450 with D- or better
Available via Ecampus

**BHS 329, MECHANISMS OF DISEASE: INTRODUCTION TO GENERAL PATHOLOGY, 3 Credits**
An introduction to basic principles of disease, focused on structural and functional changes of cells, tissues and organs, and their relationships to clinical disease. The emphasis of the course is at the cellular to organ level, but will cover some on molecular mechanisms as pertinent.
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-])) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Available via Ecampus

**BHS 340, HUMAN VIROLOGY, 4 Credits**
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]) and (BI 223 [C-] or BI 223H [C-]))
Equivalent to: MB 340
Available via Ecampus

**BHS 401, RESEARCH, 1-16 Credits**
Equivalent to: GS 401
This course is repeatable for 16 credits.

**BHS 403, THESIS, 1-16 Credits**
Equivalent to: GS 403
This course is repeatable for 16 credits.

**BHS 405, READING AND CONFERENCE, 1-16 Credits**
Equivalent to: GS 405
This course is repeatable for 16 credits.
BHS 406, PROJECTS, 1-16 Credits
Graded P/N.
*This course is repeatable for 16 credits.*

BHS 407, SEMINAR, 1-16 Credits
Graded P/N.
*Equivalent to: GS 407
This course is repeatable for 16 credits.*

BHS 410, SCIENCE INTERNSHIP, 1-12 Credits
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
*Equivalent to: BHS 410
This course is repeatable for 12 credits.*

BHS 415, ONE HEALTH IN PRACTICE, 3 Credits
One health is the concept that human, animal and environmental health are all intertwined. Utilizes current one health issues such as disease outbreaks and antimicrobial resistance to encourage students from diverse fields to develop interdisciplinary collaboration and communication skills. CROSSTRADE as BHS 415/VMB 415.
*Equivalent to: VMB 415
Recommended: At least third-year standing.*

BHS 499, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
*This course is repeatable for 16 credits.*

General Science (GS)

GS 199, SPECIAL STUDIES, 1-16 Credits
*Equivalent to: BHS 199
This course is repeatable for 16 credits.*

GS 399, SPECIAL TOPICS, 1-16 Credits
*This course is repeatable for 16 credits.*

GS 401, RESEARCH, 1-16 Credits
*Equivalent to: BHS 401
This course is repeatable for 16 credits.*

GS 403, THESIS, 1-16 Credits
*Equivalent to: BHS 403
This course is repeatable for 16 credits.*

GS 405, READING AND CONFERENCE, 1-16 Credits
*Equivalent to: BHS 405
This course is repeatable for 16 credits.*

GS 407, SEMINAR, 1-16 Credits
One-credit sections. Graded P/N.
*Equivalent to: BHS 407
This course is repeatable for 16 credits.*

GS 410, SCIENCE INTERNSHIP, 1-12 Credits
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N.
*Equivalent to: BHS 410
This course is repeatable for 12 credits.*

Microbiology (MB)

MB 110, ORIENTATION TO MICROBIOLOGY, 1 Credit
Introduction of incoming microbiology students to college life with an emphasis on faculties, facilities, services, and curricula in microbiology. Exposure to career opportunities in microbiology. Graded P/N.

MB 201, LABORATORY SKILLS, 1-16 Credits
These credits are designed for students who are doing experiential learning in a research laboratory on campus, performing basic laboratory tasks that are not elevated to the level of an independent research project. Graded P/N.
*This course is repeatable for 16 credits.*

MB 230, *INTRODUCTORY MICROBIOLOGY, 4 Credits
Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
*Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: MB 230H
Available via Ecampus*

MB 255, *ALLIED HEALTH MICROBIOLOGY, 4 Credits
General properties of cellular microbes and viruses, microbial biochemistry and genetics, pathogenesis and disease, immunity, and microbial infections. Lecture and lab emphasis is on medical microbiology, infectious diseases, and public health. Not intended for biological sciences majors. Lec/lab. CROSSTRADE as BHS 255/MB 255.
*Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: BHS 255
Available via Ecampus*

MB 290, SUCCESS IN MICROBIOLOGY, 1 Credit
Science skills, science literacy, ethics, and professional development to build a successful career in Microbiology. Learn the process of research, access and analyze primary literature, evaluate user-generated science content, practice professional skills, and identify and plan for experience-building opportunities such as jobs, research and internships. Sophomore standing or higher.

MB 299, SPECIAL TOPICS, 1-16 Credits
May be repeated for credit when topic varies.
*Equivalent to: MB 299H
This course is repeatable for 16 credits.*
MB 299H, SPECIAL TOPICS, 1-16 Credits
May be repeated for credit when topic varies.
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 299
This course is repeatable for 16 credits.

MB 302, GENERAL MICROBIOLOGY, 3 Credits
Emphasis on cytology, physiology, virology, growth and control of growth with coverage of the role of microorganisms in nature, in disease, and as useful tools.
Prerequisite: (CH 332 with C- or better or CH 335 with C- or better) and ((BI 212 with C- or better or BI 212H with C- or better) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

MB 303, GENERAL MICROBIOLOGY LABORATORY, 2 Credits
Development of laboratory techniques; exercises designed to reinforce concepts covered in MB 302. MB 303 is a prereq that may be taken prior to or concurrently with MB 303. Lec/lab.
Prerequisite: MB 302 (may be taken concurrently) with D- or better
Equivalent to: MB 303H
Recommended: Two terms organic chemistry

MB 310, BACTERIAL MOLECULAR GENETICS, 3 Credits
Introductory concepts of bacterial molecular genetics. Topics include DNA replication, mutation, DNA repair, DNA recombination, transposons, bacteriophages, genetic manipulation, and gene regulation.
Prerequisite: MB 302 with D- or better and (BB 314 [D-] or BB 314H [D-]) and (BB 450 [D-] or BB 490 [D-]) and (BB 451 (may be taken concurrently) [D-] or BB 491 (may be taken concurrently) [D-])
Equivalent to: MB 306

MB 311, ^MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE, 3 Credits
Scientific writing, laboratory notebook composition, experimental design, and laboratory experiments in bacterial molecular biology. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 310 (may be taken concurrently) [D-]
Equivalent to: MB 307

MB 312, BACTERIAL PHYSIOLOGY AND METABOLISM, 3 Credits
Molecular structure and function, macromolecular assembly, energy production and use, and cellular growth.
Prerequisite: MB 310 with D- or better and BB 451 [D-]
Equivalent to: MB 304
Recommended: BB 450

MB 314, AQUATIC MICROBIOLOGY, 3 Credits
A survey of the diversity, ecology, and physiology of microbes in aquatic systems, with emphasis on their roles in food webs, chemical cycling, and human health. Provides the background knowledge and quantitative/analytical skills necessary to interpret and critique current and historical research in the fields of general aquatic microbiology.
Prerequisite: (CH 231 with D- or better or CH 231H with D- or better or CH 121 with D- or better) and (CH 232 [D-] or CH 232H [D-] or CH 122 [D-]) and (CH 233 [D-] or CH 233H [D-] or CH 123 [D-])

MB 320, HUMAN BACTERIOLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-] and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

MB 330, ^DISEASE AND SOCIETY, 3 Credits
Infectious disease has many effects on the development of society, and likewise, human interactions affect the development of disease. The course examines these interactions with a focus on the role of race, class, and economic status in the development of epidemics. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

MB 340, HUMAN VIROLOGY, 4 Credits
Prerequisite: (BI 204 with C- or better and BI 205 [C-] and BI 206 [C-]) or ((BI 211 [C-] or BI 211H [C-] and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-])) or ((BI 221 [C-] or BI 221H [C-]) and (BI 222 [C-] or BI 222H [C-]))
Available via Ecampus

MB 385, ^EMERGING INFECTIOUS DISEASES AND EPIDEMICS, 3 Credits
Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ((BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-])) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]))
Equivalent to: BI 385
MB 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: MB 399H
This course is repeatable for 16 credits.

MB 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: MB 399
This course is repeatable for 16 credits.

MB 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

MB 405, READING AND CONFERENCE, 1-16 Credits
Conference: Instruction in microbiology.
This course is repeatable for 16 credits.

MB 406, SPECIAL PROJECTS, 1-16 Credits
Reading and Conference/Instructor in Microbiology.
This course is repeatable for 16 credits.

MB 407, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MB 410, OCCUPATIONAL INTERNSHIP, 1-10 Credits
Supervised work experience at selected cooperating institutions, agencies, laboratories, clinics or companies. Maximum of 10 credits allowed but no more than 3 credits may be used to satisfy microbiology major requirement of 36 credits. Graded P/N.
This course is repeatable for 10 credits.

MB 416, IMMUNOLOGY, 3 Credits
Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.
Prerequisite: BB 450 with D- or better or BB 490 with D- or better

MB 417, IMMUNOLOGY LABORATORY, 2 Credits
Laboratory on the applications of current immunological techniques.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 416 (may be taken concurrently) [D-]

MB 420, MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY, 3 Credits
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust.
Prerequisite: BB 451 with D- or better

MB 422, AQUATIC MICROBIOLOGY LABORATORY, 2 Credits
Examine patterns of microbiological communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.
Prerequisite: MB 303 with D- or better
Corequisite: MB 314

MB 430, BACTERIAL PATHOGENESIS, 3 Credits
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection.
Prerequisite: MB 302 with D- or better and MB 310 [D-] and (BB 451 [D-] or BB 491 [D-])

MB 434, VIROLOGY, 3 Credits
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease.
Prerequisite: ((BB 450 with D- or better or BB 450H with D- or better) and (BB 451 [D-] or BB 451H [D-]) or (BB 490 [D-] and BB 491 [D-] and BB 492 [D-]))

MB 435, PATHOGENIC MICROBES LABORATORY, 2 Credits
Laboratory experiments to illustrate concepts presented in MB 430 and/ or MB 434, focusing on pathogenic microorganisms.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 302 [D-] and (MB 430 (may be taken concurrently) [D-] or MB 434 (may be taken concurrently) [D-])

MB 436, THE HUMAN MICROBIOME, 3 Credits
Examines the biodiversity, function, and medical importance of the communities of microorganisms that inhabit the human body. A diverse array of topics will be discussed, including how the human microbiome is studied, case studies of specific aspects of the human microbiome, and emerging theories of how the microbiome influences human health.
Prerequisite: BI 314 with D- or better or BB 314 with D- or better or BI 314H with D- or better or MB 302 with D- or better

MB 440, FOOD MICROBIOLOGY, 3 Credits
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption.
Prerequisite: MB 302 with D- or better

MB 441, FOOD MICROBIOLOGY LABORATORY, 2 Credits
Laboratory techniques to accompany MB 440/MB 540.
Prerequisite: (MB 303 with D- or better or MB 303H with D- or better) and MB 440 (may be taken concurrently) [D-]
Recommended: MB 302
**MB 448, MICROBIAL ECOLOGY, 3 Credits**
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life.
**Prerequisite:** MB 302 with D- or better

**MB 456, MICROBIAL GENETICS AND BIOTECHNOLOGY, 3 Credits**
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized.
**Prerequisite:** MB 302 with D- or better and (BB 450 [D-] or BB 490 [D-]) and (BB 451 [D-] or BB 491 [D-]) and (MB 310 [D-] or BB 492 [D-])

**MB 479, FERMENTATION MICROBIOLOGY, 3 Credits**
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. CROSSTLISTED as FST 479/MB 479 and FST 579/MB 579.
**Prerequisite:** (BI 212 with C- or better or BI 212H with C- or better) or ((BI 221 with C- or better or BI 221H with C- or better) and (BI 223 [C-] or BI 223H [C-])) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
**Equivalent to:** FST 479

**MB 480, GENERAL PARASITOLOGY, 3 Credits**
Covers a broad overview of parasitology with emphasis on medical parasitology. Explores important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals.
**Prerequisite:** (BI 211 with D- or better or BI 211H with D- or better) and (BI 212 [D-] or BI 212H [D-]) and (BI 213 [D-] or BI 213H [D-]) or ((BI 221 [D-] or BI 221H [D-]) and (BI 222 [D-] or BI 222H [D-]) and (BI 223 [D-] or BI 223H [D-]) or (BI 204 [D-] and BI 205 [D-] and BI 206 [D-])
**Available via Ecampus**

**MB 490, MICROBIOLOGY CAPSTONE EXPERIENCE, 2 Credits**
Capstone experience for microbiology students to practice professional skills necessary to sustain a career in science. Students will work in teams to analyze research data and communicate this analysis, in addition to explore career opportunities and learn how to successfully compete for jobs. Graded P/N.
**Prerequisite:** MB 302 with D- or better

**MB 491, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits**
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSTLISTED as FW 491/MB 491 and FW 591/MB 591.
**Equivalent to:** FW 491
**Recommended:** 9 credits of upper-division fisheries or biology.

**MB 496, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits**
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSTLISTED as FW 496/MB 496 and FW 596/MB 596.
**Equivalent to:** FW 496
**Recommended:** MB 303 or other upper-division laboratory course

**MB 499, SPECIAL TOPICS, 0-16 Credits**
This course is repeatable for 16 credits.
**Recommended:** One term of biology

**MB 501, RESEARCH, 1-16 Credits**
This course is repeatable for 16 credits.

**MB 503, THESIS, 1-16 Credits**
This course is repeatable for 99 credits.

**MB 505, READING AND CONFERENCE, 1-16 Credits**
This course is repeatable for 16 credits.

**MB 506, SPECIAL PROJECTS, 1-6 Credits**
This course is repeatable for 6 credits.

**MB 507, SEMINAR, 1 Credit**
Graded P/N.
**This course is repeatable for 99 credits.**

**MB 510, INTERNSHIP, 1-16 Credits**
This course is repeatable for 16 credits.

**MB 511, SCIENTIFIC SKILLS, 1 Credit**
Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.

**MB 512, HIGHLIGHTS OF MICROBIOLOGY, 1 Credit**
Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.

**MB 513, MICROBIAL SYSTEMS, 3 Credits**
Presentation of a modern view of microbiology through the lens of microbes' influences on our planet's habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many cross-disciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.

**MB 516, IMMUNOLOGY, 3 Credits**
Basic theory and applications of immunohistochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases.
**Recommended:** BB 450 or BB 490
MB 517, IMMUNOLOGY LABORATORY, 2 Credits
Laboratory on the applications of current immunological techniques. Recommended: (MB 303 or MB 303H) and completion or concurrent enrollment in MB 516

MB 520, MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY, 3 Credits
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. Recommended: BB 451 or BB 451H

MB 522, AQUATIC MICROBIOLOGY LAB, 2 Credits
Examine patterns of microbial communities and how those patterns relate to environmental factors. Collect and process samples, analyze the resultant data and present those results. Focus on the microbial ecology of freshwater and marine systems as a foundation for discovery and learning using current analytical techniques.

MB 530, BACTERIAL PATHOGENESIS, 3 Credits
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. Recommended: MB 302 and MB 310 and (BB 451 or BB 491)

MB 534, VIROLOGY, 3 Credits
Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. Recommended: ((BB 450 or BB 450H) and (BB 451 or BB 451H)) or (BB 490 and BB 491 and BB 492)

MB 540, FOOD MICROBIOLOGY, 3 Credits
Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption. Recommended: MB 302

MB 541, FOOD MICROBIOLOGY LABORATORY, 2 Credits
Laboratory techniques to accompany MB 440/MB 540. Prerequisite: MB 540 (may be taken concurrently) with C or better Recommended: MB 302 and MB 303

MB 548, MICROBIAL ECOLOGY, 3 Credits
A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. Recommended: MB 302

MB 555, BIOLOGY OF THE PROKARYOTES, 3 Credits
An integrative graduate course examining bacterial and archaeal life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term. Recommended: BB 450 and MB 310 and MB 312

MB 556, MICROBIAL GENETICS AND BIOTECHNOLOGY, 3 Credits
General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized. Recommended: MB 302 and (BB 450 or BB 490) and (BB 451 or BB 491) and (MB 310 or BB 492)

MB 579, FERMENTATION MICROBIOLOGY, 3 Credits
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. Equivalent to: FST 579
Recommended: ((BI 212 or BI 212H) or ((BI 221 or BI 221H) and (BI 223 or BI 223H))) and CH 331, CH 332, (BB 350 or BB 450) and MB 302

MB 580, GENERAL PARASITOLOGY, 3 Credits
Covers a broad overview of parasitology with emphasis on medical parasitology. Explores important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. Available via Ecampus

MB 591, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE, 3 Credits
Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/MB 491 and FW 591/MB 591. Equivalent to: FW 591
Recommended: 9 credits of upper-division fisheries or biology.

MB 596, FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB, 2 Credits
This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/MB 496 and FW 596/MB 596. Equivalent to: FW 596
Recommended: MB 303 or other upper-division laboratory course.
MB 599, SELECTED TOPICS, 0-6 Credits
This course is repeatable for 24 credits.

MB 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

MB 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

MB 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MB 607, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 99 credits.

MB 610, INTERNSHIP, 1-9 Credits
This course is repeatable for 16 credits.

MB 668, MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION, 4 Credits
Theoretical and practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.
Equivalent to: MCB 668

MB 699, SPECIAL TOPICS, 0-16 Credits
Lec/lab.
This course is repeatable for 16 credits.

BioHealth Sciences Undergraduate Major (BS, HBS)
This major offers the following option(s):

- Pre-Clinical Laboratory Science (p. 1680)
- Pre-Dentistry (p. 1681)
- Pre-Medicine/Pre-Podiatry (p. 1681)
- Pre-Optometry (p. 1682)
- Pre-Pharmacy (p. 1682)
- Pre-Physical Therapy (p. 1682)
- Pre-Physician Assistant (p. 1683)

Administered by the Department of Microbiology under the School of Life Sciences.

The undergraduate BS degree in BioHealth Sciences is designed for students seeking an interdisciplinary background in the life sciences, public health, and social sciences. The major consists of a comprehensive core with a strong biological and physical science foundation combined with a variety of health and social science courses in a unique blend formulated to meet the needs of students interested in a career in the healthcare field. BioHealth Sciences majors receive excellent training for a variety of professional programs.

Students may elect to complete one transcript-visible option in Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Medicine/Pre-Podiatry, Pre-Optometry, Pre-Pharmacy, Pre-Physical Therapy, or Pre-Physician Assistant. An option is not required. Options in the BHS major require additional credits beyond the basic BHS major, although most students can complete the BHS core plus the additional course work in four years.

Major Code: 606

- Apply scientific knowledge from multiple fields to critically analyze health-related problems.
- Communicate science and health concepts, data, and analytical arguments clearly, professionally, and concisely; both verbally and in writing.
- Practice flexible professional skills needed for careers in health sciences professional fields.
- Recognize, evaluate, and respond appropriately to the needs of a diverse demographic population.

Students in the BHS major must complete the following courses (or the honors version) with a C– or better:

### Pre-Clinical Laboratory Science Option

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1678)

Clinical laboratory scientists (also known as medical laboratory scientists or medical technologists) perform routine and highly specialized diagnostic procedures in clinical laboratories. They must be certified by the American Society of Clinical Pathologists (ASCP) or the National Certification Agency (N.C.A.). Certification requires 12 to 15 months of training at an accredited professional school of clinical laboratory science. Oregon currently has one such school jointly administered by the Oregon Health and Science University (OHSU) and Oregon Institute of Technology (OIT); Washington and California have several. Most clinical laboratory science schools require a bachelor of science degree for admission to their educational program; however, some schools (notably OHSU/OIT) accept students who have had three years of appropriate college work. Most pre-clinical laboratory science students complete the BS degree in BioHealth Sciences/Pre-CLS option before attending a clinical laboratory science program (4+1 program).

The BioHealth Sciences major combined with the Pre-Clinical Laboratory Science option is designed to meet most or all of the requirements for admission to CLS programs across the U.S. Satisfactory completion of the pre-CLS option facilitates, but does not guarantee, admission to a CLS program; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Clinical Laboratory Science option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

#### Option Code: 576

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Clinical Laboratory Sciences option, MB 416 will meet the BHS core requirement for an immunology course.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Pre-Dentistry Option

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1678)

The BioHealth Sciences major combined with the Pre-Dentistry option is designed to meet most or all of the requirements for admission to dentistry schools across the U.S. Satisfactory completion of the pre-dentistry option facilitates, but does not guarantee, admission to dental school; applicants are selected on a competitive basis. Students are typically selected on the basis of grades, DAT scores, dental experience, and apparent motivation for dentistry. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements. A member of the pre-dental committee is assigned to each student as an advisor to assist them in the process.

Students may not combine the Pre-Dentistry/BioHealth Sciences option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

Option Code: 595

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Dentistry option, MTH 251 and MTH 252 will meet the BHS core requirement for two MTH courses at the bacc core. MTH 251 and MTH 252 will meet the BHS core requirement for a statistics course. BHS 323, if chosen, will meet the BHS core requirement for a Writing Intensive Course (WIC).

- BHS 323 *MICROBIAL INFLUENCES ON HUMAN HEALTH
- H 425 FOUNDATIONS OF EPIDEMIOLOGY
- MB 436 THE HUMAN MICROBIOME
- NUTR 225 GENERAL HUMAN NUTRITION

Total Credits 27

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

Graduation in BioHealth Sciences with the Pre-Dentistry option requires a total of 40 credits of upper-division courses in science.

Option Code: 595

Pre-Medicine/Pre-Podiatry Option

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1678)

Physicians diagnose illness and injury, prescribe and administer treatment and advise patients about how to prevent and manage wellbeing. There are two traditional paths to becoming a doctor: allopathic medicine, which leads to Doctor of Medicine (MD), or osteopathic medicine, which leads to a Doctor of Osteopathy (DO). Both provide the education and training necessary to practice medicine. A podiatrist is a Doctor of Podiatric Medicine (DPM), trained specifically to diagnose and treat conditions of the foot, ankle, and related structures of the leg.

The BioHealth Sciences major combined with the Pre-Medicine/Pre-Podiatry option is designed to meet most or all of the requirements for admission to allopathic, osteopathic, or podiatric medical schools across the U.S. Satisfactory completion of the Pre-Medicine/Pre-Podiatry option facilitates, but does not guarantee, admission to any medical school. The BioHealth Sciences major is also suited for postbaccalaureate students who already have a bachelor's degree in another subject and need science course work to apply to medical school.

The book, Medical School Admission Requirements, published by the Association of American Medical Colleges (https://www.aamc.org/), lists specific entrance requirements for allopathic (MD) schools. The American Association of Colleges of Osteopathic Medicine (http://www.aacom.org/) lists requirements for osteopathic (DO) schools. The American Association of College of Podiatric Medicine (http://www.aacpm.org/) lists requirements for podiatric (DPM) schools. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

Admission to medical school is very competitive. Students are chosen according to grades, MCAT scores, medical experience, and apparent motivation for medicine. A member of the premedical committee is assigned to each student as an advisor.

Students may not combine the Pre-Medicine/Pre-Podiatry option with any other option offered with the BioHealth Sciences major (Pre-Physician Assistant, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy).

Option Code: 775

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Medicine/Pre-Podiatry option, MB 416 will meet the BHS core requirement for an immunology course, the combination of MTH 251/MTH 252 or MTH 227/MTH 228 will meet the BHS core requirement for two MTH courses, and ST 351 will meet the BHS core requirement for a statistics course. PHL 444, if chosen, will meet the bacc core requirement for a Science, Technology, and Society synthesis course. ANTH 383, if chosen, will meet the bacc core requirement for a Contemporary Global Issues synthesis course.

**Pre-Optometry Option**

This option is offered within the following major(s):  
- BioHealth Sciences - College of Science (p. 1678)

The BioHealth Sciences major combined with the Pre-Optometry option is designed to meet most or all of the requirements for admission to optometry programs across the U.S. Satisfactory completion of the pre-optometry option facilitates, but does not guarantee, admission to an optometry program; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Pharmacy/BioHealth Sciences option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Dentistry, Pre-Clinical Laboratory Science, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

**Option Code: 775**

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Optometry option, MTH 251 and MTH 252 meet the BHS core requirement of two MTH courses at MTH 111 or higher.

**Pre-Pharmacy Option**

This option is offered within the following major(s):  
- BioHealth Sciences - College of Science (p. 1678)

The Pre-Pharmacy/BioHealth Sciences option is designed to meet most or all of the requirements for admission to pharmacy schools across the U.S., including OSU's Doctor of Pharmacy (PharmD) professional program. Satisfactory completion of the pre-pharmacy option facilitates, but does not guarantee, admission to pharmacy school; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Pharmacy/BioHealth Sciences option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Dentistry, Pre-Clinical Laboratory Science, Pre-Optometry, Pre-Physical Therapy, Pre-Physician Assistant).

**Option Code: 603**

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Pharmacy option, MTH 251 will meet the BHS core requirements for one MTH class at MTH 111 or higher.

**Pre-Physical Therapy Option**

This option is offered within the following major(s):  
- BioHealth Sciences - College of Science (p. 1678)

The BioHealth Sciences major combined with the Pre-Physical Therapy option is designed to meet most or all of the requirements for admission to PT programs across the U.S. Satisfactory completion of the pre-PT option facilitates, but does not guarantee, admission to a PT program;
applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all current requirements.

Students may not combine the Pre-Physical Therapy option with any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physician Assistant).

Option Code: 585

Courses may be used to meet requirements for the BHS core and/or bacc core.

Option Code: 585

Pre-Physician Assistant Option

This option is offered within the following major(s):

- BioHealth Sciences - College of Science (p. 1678)

The BioHealth Sciences major with the Pre-Physician Assistant option is designed to meet most or all of the requirements for admission to PA programs across the U.S. Satisfactory completion of the pre-PA option facilitates, but does not guarantee, admission to a PA program. Admission to physician assistant school is very competitive and student selection is based on grades, GRE scores, clinical experiences and more. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

Students may not study the Pre-Physician Assistant option alongside any other option offered with the BioHealth Sciences major (Pre-Medicine/Pre-Podiatry, Pre-Pharmacy, Pre-Clinical Laboratory Science, Pre-Dentistry, Pre-Optometry, Pre-Physical Therapy).

Option Code: 597

Courses may be used to meet requirements for the BHS core and/or bacc core. For the Pre-Physician Assistant option, ST 201 meets the BHS core requirement for a statistics course. H 312, if chosen, will meet the bacc core requirement for a synthesis class in the Contemporary Global Issues category.

Microbiology Graduate Major (MA, MS, PhD)

Graduate Areas of Concentration

Environmental microbiology, food microbiology, genomics, immunology, microbial ecology, microbial evolution, parasitology, pathogenic microbiology, virology

Administered by the Department of Microbiology under the School of Life Sciences in the College of Science

The Department of Microbiology offers graduate degrees leading to the Doctor of Philosophy, Master of Science (thesis) and Master of Science (non-thesis) degrees. Major fields of study are diverse, and include Basic and Applied Virology, Bacteriology and Immunology; Pathogenic Microbiology; Aquatic, Ecological and Environmental Microbiology; Microbial Evolution; and Microbiome Sciences. Students may minor in a variety of related disciplines in the Life Sciences, such as Biological Data Sciences, Biochemistry and Biophysics, Chemistry, or obtain certificates in areas such as College and University Teaching (CERT).

The principal objective of the Doctoral Program in Microbiology is the completion of a comprehensive research project and preparation of a dissertation. Student programs and research projects are developed with the major professor and are subject to approval by a committee of graduate faculty members. Examples of research areas may include, but are not limited to, Human Gut Microbiome/Gut-Brain Axis, Bioinformatics Applied to Microbiome Data, Microbial Interactions, Microbial Drug Resistance and Food Safety, and Aquatic Microbiology. Microbiology research facilities are excellent, well-equipped, well-funded and employ state of the art technology. The Master Program in Microbiology can be pursued as thesis or through two non-thesis tracks, Microbiome Analytics or BioHealth Sciences.

For more information, contact Jerri Bartholomew, Professor, Department of Microbiology, 226 Nash Hall, OSU, Corvallis OR 97331-3804 or email: jerri.bartholomew@oregonstate.edu.

Major Code: 5700

The Department of Microbiology offers the following graduate degrees: Ph.D., M.S. (thesis), and M.S. (non-thesis). The Ph.D. and M.S. (thesis) degrees contain a rigorous research component, in addition to coursework. The M.S. (non-thesis) degree is comprised of coursework and allows specialization through two tracks: 1) Microbiome Analytics,
and 2) BioHealth Sciences. M.A. (Master of Arts) degree is not offered at this time.

All students in the Microbiology Graduate Program are required to take the following seven credit core sequence of four courses during their first year of enrollment in the program:

In addition to the seven credit core sequence of four courses, the requirements for each degree are as follows:

**PhD**

- 108 total graduate credits consisting of at least 27 coursework credits and at least 36 thesis credits.
- A comprehensive preliminary examination consisting of a written non-thesis proposal and an oral exam.
- An initial program of study meeting and subsequent annual progress meetings with a graduate committee.
- An overall GPA of 3.0 at the graduate level, and a 3.0 GPA in program of study courses.
- Completion of one term as a graduate teaching assistant.
- A written Doctoral thesis that is orally defended at the end of the degree program.
- Two public presentations of their original research, including the final oral defense.

**MS (Thesis)**

- 45 total graduate credits consisting of at least 24 coursework credits and 6 to 12 thesis credits.
- An initial program of study meeting and subsequent annual progress meetings with a graduate committee.
- An overall GPA of 3.0 at the graduate level, and a 3.0 GPA in program of study courses.
- Completion of one term as a graduate teaching assistant.
- A written Masters thesis that is orally defended at the end of the degree program.

**MS (Non-thesis)**

- 45 total graduate course credits.
- An initial program of study meeting and subsequent annual progress meetings with a graduate committee.
- An overall GPA of 3.0 at the graduate level, and a 3.0 GPA in program of study courses.
- Completion of an additional 13 core credits to replace the thesis credits:

**Microbiology Graduate Minor**

Administered by the Department of Microbiology under the School of Life Sciences.

**Minor Code: 5700**

**Microbiology Minor**

Also available via Ecampus.

Administered by the Department of Microbiology (https://catalog.oregonstate.edu/college-departments/science/school-life-sciences/microbiology/) under the School of Life Sciences.

The Microbiology minor is designed for students from other majors who have an additional interest in the field of microbiology. Student majoring in Biology (BI) or BioHealth Sciences (BHS) cannot declare the
Microbiology minor. The courses used for the MB minor may be shared with other majors, options, and minors.

**Minor Code: 570**

Some of the courses required for the Microbiology minor have additional prerequisites or grade requirements that are separate from the MB minor. At a minimum students will need to take the BI 2xx course series.

**Electives**

Select 23 credits from the courses in Category I and Category II. No more than 9 credits can come from Category II.

**Category I Electives**

Select 14-23 credits from the following courses:

- BHS 316 PRINCIPLES OF IMMUNOLOGY
- BHS 320/MB 320 HUMAN BACTERIOLOGY
- BHS 323 *MICROBIAL INFLUENCES ON HUMAN HEALTH
- BHS 329 MECHANISMS OF DISEASE: INTRODUCTION TO GENERAL PATHOLOGY
- BHS 340/MB 340 HUMAN VIROLOGY
- BOT 350 INTRODUCTORY PLANT PATHOLOGY
- BOT 461 MYCOLOGY
- MB 385 *EMERGING INFECTIOUS DISEASES AND EPIDEMICS
- MB 310 BACTERIAL MOLECULAR GENETICS
- MB 311 *MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE
- MB 312 BACTERIAL PHYSIOLOGY AND METABOLISM
- MB 314 AQUATIC MICROBIOLOGY
- MB 401 RESEARCH
- MB 406 SPECIAL PROJECTS
- MB 416 IMMUNOLOGY
- MB 417 IMMUNOLOGY LABORATORY
- MB 420 MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY
- MB 422 AQUATIC MICROBIOLOGY LABORATORY
- MB 430 BACTERIAL PATHOGENESIS
- MB 434 VIROLOGY
- MB 435 PATHOGENIC MICROBES LABORATORY
- MB 436 THE HUMAN MICROBIOME
- MB 440 FOOD MICROBIOLOGY
- MB 441 FOOD MICROBIOLOGY LABORATORY
- MB 448 MICROBIAL ECOLOGY
- MB 456 MICROBIAL GENETICS AND BIOTECHNOLOGY
- MB 479/FST 479 FERMENTATION MICROBIOLOGY
- MB 480 GENERAL PARASITOLOGY
- MB 491/FW 491 FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE
- MB 496/FW 496 FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB

**Category II Electives**

Select 0-9 credits from the following courses:

- ANS 302 COMMON DISEASES OF COMPANION ANIMALS
- BB 485 APPLIED BIOINFORMATICS
- BI 420 *VIRUSES IN MODERN SOCIETY
- BI 495 DISEASE ECOLOGY
- BOT 324 *FUNGI IN SOCIETY
- BOT 480 PHOTOSYNTHESIS AND PHOTOBIOLOGY
- FST 360 FOOD SAFETY AND SANITATION

**Microbiology Undergraduate Major (BS, HBS)**

This major offers the following option(s):

- Aquatic Microbiology (p. 1687)
- Pre-Medicine/Microbiology (p. 1688)

Administered by the Department of Microbiology under the School of Life Sciences.

The undergraduate BS degree in Microbiology (MB) is designed for students seeking a focused education in the field of microbiology. The major consists of a comprehensive core with a strong biological and physical science foundation combined with select fundamental courses in microbiology, followed by the completion of a number of upper division microbiology courses selected by each student based on their specific interests. The Microbiology major integrates a number of laboratory classes, providing students with a wide variety of hands-on experiences. Students can also choose to do microbiology research in a number of laboratories on campus. Microbiology majors receive excellent training for a variety of professional programs, such as medical, dental, and pharmacy programs, as well as graduate school.

The Microbiology major has a built-in Chemistry minor. Students may also elect to complete one transcript-visible option in Pre-Medicine or Aquatic Microbiology. An option is not required. Options in the MB major require additional credits beyond the basic MB major, although most students can complete the MB degree requirements plus the additional course work for either option in four years. The Pre-Medicine option will help prepare a student for taking the standardized test required for medical school application (MCAT), as well as provide an additional perspective in the humanities that is valued by medical programs. The Aquatic Microbiology option takes advantage of an area of expertise by various researchers at OSU, exposing students to both fundamental concepts as well as unique perspectives related to microbiology in both freshwater and ocean systems.

For more information, write to the Head of the Department of Microbiology, 226 Nash Hall, Oregon State University, Corvallis, OR 97331-3804 or visit the departmental website (https://microbiology.science.oregonstate.edu) for specific contact information.

**Major Code: 570**
• Apply specialized microbiology knowledge from multiple fields to critically analyze and evaluate microbiological, environmental, and health-related problems.

• Demonstrate competency in routine and specialized microbiological laboratory skills applicable to microbiological research or clinical methods, including laboratory safety and accurately reporting observations and analysis.

• Communicate scientific concepts, experimental results and analytical arguments clearly and concisely, both verbally and in writing.

• Practice flexible professional skills needed for careers in microbiology and related scientific and professional fields.

To receive the BS degree in Microbiology, a student must complete all university baccalaureate core requirements plus departmental requirements listed below. All departmental requirements must be taken for a grade, with the exception of CH 324, which may be taken S/U; however, if taken S/U the student will not receive the chemistry minor.

Microbiology majors planning advanced professional training in medicine, dentistry, pharmacy, etc should consult an appropriate advisor.

Baccalaureate Core Course (BCC)

+ Writing Intensive Course (WIC)

+ MB majors must complete the following courses with a grade of C- or better: MTH 227 (or MTH 251), CH 231, CH 232, CH 233, CH 261, CH 262, CH 263 and CH 331

++ MB majors must have a minimum 2.0 GPA in microbiology classes. This includes courses in the Microbiology Sciences Core, Microbiology Laboratory, and Microbiology Electives

1 Additional upper division MB lab credits may count towards the Upper-division Microbiology Electives credits

2 No more than 3 credits may come from the following courses: MB 401, MB 403, MB 405, MB 410. No more than 3 credits may come from MB 406

Major Code: 570
**Aquatic Microbiology Option**

This option is offered within the following major(s):
- Microbiology - College of Science (p. 1685)

The Aquatic Microbiology option encompasses a core of oceanography and microbiology courses heavy in coverage of aquatic systems, combined with a selection of elective courses offered by various departments. The option is designed to provide a microbiology major with a detailed understanding of the role that microbes play in aquatic systems and for aquatic organisms, as well as an understanding of aquatic systems in general. The option complements the Marine Studies Initiative, which should stimulate interest in aquatic systems by students across campus.

**Option Code: 736**

Courses used to satisfy the Aquatic Microbiology option requirements may also satisfy the Upper-Division Microbiology Electives and Upper-Division Microbiology laboratory requirements in the Microbiology major.

**Required courses**

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Pre-Medicine/Microbiology Option

This option is offered within the following major(s):

- Microbiology - College of Science (p. 1685)

The Pre-Medicine/Microbiology option for the Microbiology major is designed to meet the current requirements for application to most medical schools in the U.S. (although students are advised to consult the requirements for specific schools before they apply, in the case of changes). Students pursuing a Microbiology degree receive a broad education in microbiological topics. The option focuses some of that education at the 400-level to ensure that students pursuing medicine take microbiology courses of interest to the medical field. In addition, the option adds important social science requirements and medical humanities electives that are not part of the general microbiology degree, but that are important for students pursuing a degree in medicine.

Option Code: 607

Courses used to satisfy the Pre-Medicine option requirements may also satisfy the Upper-Division Microbiology Electives and Upper-Division Microbiology laboratory requirements in the Microbiology major. Courses may also be used to satisfy areas of the baccalaureate core.

Statistics

The Department of Statistics offers undergraduate service courses and an undergraduate minor, as well as graduate courses and programs leading to the MA, MS, and PhD degrees or to a minor for an advanced degree in other fields. Students planning to major in statistics at the graduate level should have a minimum of mathematics through multivariable calculus, linear algebra, and an upper-division sequence in mathematical statistics.

Survey Research Center

Established in 1973, the Oregon State University Survey Research Center (http://stat.oregonstate.edu/src/survey-research-center/) (OSU-SRC) provides comprehensive survey services including proposal development, questionnaire design and layout, survey administration and data collection, survey analysis and professional report writing. Our staff offers customized options, working with our clients to determine the best approach to collect survey data based on the study objectives, population of interest, and budgetary concerns. Our past and current clients include federal, state, and local agencies, national non-profit organizations, and OSU-affiliated entities. The OSU-SRC maintains several contracts with clients to provide our services on a recurrent basis, from monthly, annually, to ever few years.

Operating as a center for research in survey methodology, the OSU-SRC routinely conducts experiments using self-administered surveys with an aim to contribute to survey methodology research. The OSU-SRC subsequently publishes related material in scientific journals and presents experimental findings at professional meetings. The OSU-SRC provides expertise using survey best practices to maximize response rates and reduce non-response bias. Various sampling plans are examined for each survey to minimize total survey error. The OSU-SRC also offers consulting for OSU community members on research-based survey design and analysis.

Senior Instructor II Kollath
Instructors Jager, Moore

ST 199, SPECIAL TOPICS, 3 Credits
This course can only be taken once unless instructor permission is provided.

ST 201, PRINCIPLES OF STATISTICS, 4 Credits
Study design, descriptive statistics, the use of probability in statistical arguments, sampling, hypothesis tests and confidence intervals for means and proportions. Lec/rec.
Equivalent to: ST 201H
Recommended: High school algebra
Available via Ecampus

ST 202, PRINCIPLES OF STATISTICS, 4 Credits
Comparisons of means and proportions between two populations (t-tests, chi-square tests, nonparametric tests), simple linear regression, correlation. Lec/rec.
Prerequisite: ST 201 with D- or better
Equivalent to: ST 209
Available via Ecampus

ST 314, INTRODUCTION TO STATISTICS FOR ENGINEERS, 3 Credits
Probability, common probability distributions, sampling distributions, estimation, hypothesis testing, control charts, regression analysis, experimental design.
Prerequisite: MTH 252 with D- or better or MTH 252H with D- or better
Equivalent to: ST 314H
Available via Ecampus

ST 351, INTRODUCTION TO STATISTICAL METHODS, 4 Credits
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Equivalent to: ST 351H
Recommended: High school algebra with statistics
Available via Ecampus

ST 351H, INTRODUCTION TO STATISTICAL METHODS, 4 Credits
Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab.
Attributes: HNRS – Honors Course Designator
Equivalent to: ST 351
Recommended: High school algebra with statistics

ST 352, INTRODUCTION TO STATISTICAL METHODS, 4 Credits
Randomization tests and other nonparametric tests for one- and two-sample inference, simple and multiple linear regression, correlation, one- and two-way analysis of variance, logistic regression. Lec/lab.
Prerequisite: ST 351 with D- or better or ST 351H with D- or better
Available via Ecampus

ST 406, PROJECTS, 1-16 Credits
Section 1: Projects, graded P/N. Section 2: Teaching Experience, graded P/N. Section 3: Directed Work, graded P/N.
This course is repeatable for 16 credits.

ST 407, SEMINAR, 1 Credit
Attendance at consulting practicum. Graded P/N.

ST 410, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ST 411, METHODS OF DATA ANALYSIS, 4 Credits
Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab.
Recommended: ST 351

ST 412, METHODS OF DATA ANALYSIS, 4 Credits
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab.
Recommended: ST 351

ST 413, METHODS OF DATA ANALYSIS, 4 Credits
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab.
Prerequisite: ST 412 with D- or better
Recommended: ST 351
ST 415, DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS, 3 Credits
Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components.
Prerequisite: ST 352 with D- or better or ST 411 with D- or better or ST 511 with D- or better

ST 421, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions.
Recommended: MTH 253

ST 422, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing.
Prerequisite: ST 421 with D- or better
Recommended: MTH 253

ST 431, SAMPLING METHODS, 3 Credits
Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods.
Recommended: ST 411 or ST 511

ST 435, QUANTITATIVE ECOLOGY, 3 Credits
Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year.
Prerequisite: ST 412 with D- or better or ST 512 with D- or better

ST 439, SURVEY METHODS, 3 Credits
Survey design, data collection and analysis, general methodology.
Prerequisite: ST 201 with D- or better or ST 351 with D- or better
Available via Ecampus

ST 441, PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS, 4 Credits
Prerequisite: ST 422 with D- or better or ST 522 with D- or better

ST 443, APPLIED STOCHASTIC MODELS, 3 Credits
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques.
Prerequisite: ST 421 with D- or better or ST 521 with D- or better
Recommended: Experience with a high-level programming language or mathematical computation package

ST 499, SPECIAL TOPICS, 1-4 Credits
May be repeated for credit.
This course is repeatable for 8 credits.

ST 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ST 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ST 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ST 506, PROJECTS, 1-16 Credits
Section 1: Projects. Section 2: Teaching Experience. Section 3: Directed Work.
This course is repeatable for 16 credits.

ST 507, SEMINAR, 1 Credit
Section 1: Attendance at consulting practicum, 1 credit. Section 3: Research Seminar, 1 credit. Section 4: Computing Facilities, 1 credit. All sections graded P/N.
This course is repeatable for 99 credits.

ST 509, CONSULTING PRACTICUM, 2 Credits
The student provides statistical advice, under faculty guidance, on university-related research projects.
This course is repeatable for 99 credits.

ST 510, INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ST 511, METHODS OF DATA ANALYSIS, 4 Credits
Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab.
Recommended: ST 351
ST 512, METHODS OF DATA ANALYSIS, 4 Credits
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab.
Prerequisite: ST 511 with C or better
Recommended: ST 351

ST 513, METHODS OF DATA ANALYSIS, 4 Credits
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab.
Prerequisite: ST 512 with C or better
Recommended: ST 351

ST 515, DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS, 3 Credits
Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components.
Recommended: ST 352 or (ST 411 or ST 511)
Available via Ecampus

ST 516, FOUNDATIONS OF DATA ANALYTICS, 4 Credits
Foundations of estimation and hypothesis testing; desirable properties of estimators; maximum likelihood; one- and two-sample problems; theoretical results are explored through simulations and analysis using R. Offered via Ecampus only.
Recommended: ST 351
Available via Ecampus

ST 517, DATA ANALYTICS I, 4 Credits
Methods for modeling quantitative data and statistical learning—simple and multiple linear regression; linear mixed effects models; data imputation; prediction and cross-validation; scaling up to large datasets. Simulations and data analysis using R. Offered via Ecampus only.
Prerequisite: ST 516 with C+ or better
Available via Ecampus

ST 518, DATA ANALYTICS II, 4 Credits
Statistical methods and data analysis techniques for count data. Topics include tests for tables of counts, logistic regression, log-linear regression, generalized linear mixed models, and issues for large datasets. Data analysis in R.
Prerequisite: ST 517 with C+ or better
Available via Ecampus

ST 522, INTRODUCTION TO MATHEMATICAL STATISTICS, 4 Credits
Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing.
Prerequisite: ST 521 with C or better
Recommended: MTH 253

ST 525, APPLIED SURVIVAL ANALYSIS, 3 Credits
Statistical methods for analyzing survival data or time-to-event data, which may be censored and/or truncated. Specific topics can vary term to term, and could include Kaplan-Meier estimator; K-sample hypothesis tests for survival data; Accelerated failure time model; Cox proportional hazard regression model.
Prerequisite: ST 516 with C or better and ST 517 [C] and ST 518 [C]
Available via Ecampus

ST 531, SAMPLING METHODS, 3 Credits
Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods.
Recommended: ST 411 or ST 511

ST 535, QUANTITATIVE ECOLOGY, 3 Credits
Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year.
Recommended: ST 412 or ST 512

ST 537, DATA VISUALIZATION, 3 Credits
Perceptual principles for displaying data; critique and improvement of data visualizations; use of color in visualization; principles of tidy data; strategies for data exploration; select special topics.
Prerequisite: ST 512 with C or better or ST 517 with C or better or ST 552 with C or better
Recommended: Familiarity with linear regression and using R
Available via Ecampus

ST 538, MODERN STATISTICAL METHODS FOR LARGE AND COMPLEX DATA SETS, 3 Credits
Provides students with the tools and experience to analyze big and messy data and work effectively in a data science team. Covers the tools to handle big data and answer statistical questions based on the data. Includes three big data analysis projects that students work on in groups. Focuses on proper use of modern data analysis techniques related to regression, classification and clustering for data coming from a variety of application fields. R will be the lingua franca.
Prerequisite: ST 512 with C or better or ST 517 with C or better or ST 552 with C or better or ST 412 with C or better
Available via Ecampus
ST 539, SURVEY METHODS, 3 Credits
Survey design, data collection and analysis, general methodology.
Recommended: ST 201 or ST 351
Available via Ecampus

ST 541, PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS, 4 Credits
Recommended: ST 422 or ST 522

ST 543, APPLIED STOCHASTIC MODELS, 3 Credits
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques.
Recommended: (ST 421 or ST 521) and experience with a high-level programming language or mathematical computation package.

ST 551, STATISTICAL METHODS, 4 Credits
Properties of t, chi-square and F tests; randomized experiments; sampling distributions and standard errors of estimators, delta method, comparison of several groups of measurements; two-way tables of measurements.
Recommended: Concurrent enrollment in MTH 341 and (ST 422 or ST 522)

ST 552, STATISTICAL METHODS, 4 Credits
Simple and multiple linear regression including polynomial regression, indicator variables, weighted regression, and influence statistics; nonlinerar regression and linear models for binary data.
Prerequisite: ST 551 with C or better
Recommended: ST 422 or ST 522.

ST 553, STATISTICAL METHODS, 4 Credits
Principles and analysis of designed experiments, including factorial experiments, analysis of covariance, random and mixed effect models.
Prerequisite: ST 552 with C or better

ST 555, ADVANCED EXPERIMENTAL DESIGN, 3 Credits
Designs leading to mixed models including split plots, repeated measures, crossovers and incomplete blocks. Introduction to experimental design in industry including confounding, fractional factorials and response surface methodology. Analysis of unbalanced data.
Prerequisite: ST 553 with C or better

ST 557, APPLIED MULTIVARIATE ANALYSIS, 3 Credits
Multivariate data structures, linear combinations; principal components, factor and latent structure analysis, canonical correlations, discriminant analysis; cluster analysis, multidimensional scaling. Not offered every year.
Recommended: (ST 412 or ST 512) and (MTH 252 or MTH 245)

ST 558, MULTIVARIATE ANALYTICS, 3 Credits
Basics of matrix algebra, principal components analysis, cluster analysis, factor analysis, multidimensional scaling.
Prerequisite: ST 518 with C- or better
Available via Ecampus

ST 559, BAYESIAN STATISTICS, 3 Credits
Bayesian statistics for data analysis. Characterizations of probability; comparative (Bayesian versus frequentist) inference; prior, posterior and predictive distributions; hierarchical modeling. Computational methods include Markov Chain Monte Carlo for posterior simulation.
Recommended: ST 562

ST 561, THEORY OF STATISTICS, 4 Credits
Distributions of functions of random variables, joint and conditional distributions, sampling distributions, convergence concepts, order statistics. Lec/rec.
Recommended: ST 422 or ST 522

ST 562, THEORY OF STATISTICS, 4 Credits
Sufficiency, exponential families, location and scale families; point estimation: maximum likelihood, Bayes, and unbiased estimators; asymptotic distributions of maximum likelihood estimators; Taylor series approximations.
Prerequisite: ST 561 with C or better
Recommended: ST 422 or ST 522.

ST 563, THEORY OF STATISTICS, 4 Credits
Hypothesis testing: likelihood ratio, Bayesian, and uniformly most powerful tests; similar tests in exponential families; asymptotic distributions of likelihood ratio test statistics; confidence intervals.
Prerequisite: ST 562 with C or better
This course is repeatable for 4 credits.
Recommended: ST 422 or ST 522

ST 565, TIME SERIES, 3 Credits
Analysis of serially correlated data in both time and frequency domains. Autocorrelation and partial autocorrelation functions, autoregressive integrated moving average models, model building, forecasting; filtering, smoothing, spectral analysis, frequency response studies. Offered winter term in even years.
Recommended: (ST 412 or ST 512) and (ST 422 or ST 522)
ST 566, TIME SERIES ANALYTICS, 3 Credits
Focuses on statistical and analytical tools for analyzing data that are observed sequentially over time. Specific topics can vary term to term, and could include methods for exploratory time series analysis, linear time series models (ARIMA, ARMA), forecasting, spectral analysis and state-space models. The focus will be on applied problems, though some mathematical statistics is necessary for a solid understanding of the statistical issues. This course is designed for students in Data Analytics MS and Certificate programs.
Prerequisite: ST 516 with C or better and ST 517 [C] and ST 518 [C]
Available via Ecampus

ST 567, SPATIAL STATISTICS, 3 Credits
The analysis of spatial data. Graphical tools for exploring spatial data, geostatistics, variogram estimation, kriging, areal models, hierarchical spatial models, and spatio-temporal modelling. Offered winter term in odd years.
Recommended: (ST 412 or ST 512) and (ST 422 or ST 522)

ST 591, INTRODUCTION TO QUANTITATIVE GENOMICS, 3 Credits
Provides an overview of how genomic data is generated and analyzed. It focuses on the underlying biological motivation, theoretical concepts, and analytical challenges associated with genomic research, especially the generation of statistics that summarize genomic data. The class is organized as a combination of lectures and group literature review discussions. Students are expected to actively participate in the class. Students from diverse backgrounds, including quantitative, biological, and computations sciences, are encouraged to enroll.
Recommended: ST 411 or ST 511
Available via Ecampus

ST 592, STATISTICAL METHODS FOR GENOMICS RESEARCH, 3 Credits
Lectures include an overview of statistical methods commonly applied in genomics research. Specific methods can vary term to term, and could include cluster analysis, decision trees, dimension reduction tools, regression models, multiple testing adjustment, variable selection methods, etc. Journal clubs include team-based review and presentations of landmark papers in both statistical methodology and genomics research. Research experience includes whole-term collaboration between students from statistics and other disciplines on real projects.
Recommended: ST 411 or ST 511 or a higher level course such as ST 551
Available via Ecampus

ST 595, CAPSTONE PROJECT, 3 Credits
Provides an opportunity for students to integrate and apply the analytics skills learned in MS in Data Analytics program to solve real-world problems and to interpret and communicate their results. Student teams will engage in the entire process of solving data science projects in realistic settings, from placing the problem into appropriate statistical framework to applying suitable analytic methods to the problem. Problem solving, written and oral communication skills will be emphasized.
Prerequisite: ST 516 with C or better and ST 517 [C] and ST 518 [C] and ST 558 [C]
Available via Ecampus

ST 599, SPECIAL TOPICS, 1-4 Credits
May be repeated for credit when topic varies.
This course is repeatable for 16 credits.

ST 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ST 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ST 606, PROJECTS, 1-16 Credits
Section 1: Projects; Section 2: Teaching Experience, graded P/N; Section 3: Directed Work, graded P/N.
This course is repeatable for 16 credits.

ST 623, GENERALIZED REGRESSION MODELS, 3 Credits
Maximum likelihood analysis for frequency data; regression-type models for binomial and Poisson data; iterative weighted least squares and maximum likelihood; analysis of deviance and residuals; over-dispersion and quasi-likelihood models; log-linear models for multidimensional contingency tables.
Prerequisite: ST 553 with C or better and ST 563 [C]

ST 625, SURVIVAL ANALYSIS, 3 Credits
Prepares students to understand and analyze survival data. Concepts to be discussed include: hazard function (failure rate function); nonparametric likelihood; empirical processes; empirical distribution function; censoring (mostly right independent censoring); Kaplan-Meier estimator; Bias of the KM estimator; Cox proportional hazards model; Accelerated Failure Time Model; Partial Likelihood; log-rank test.
Prerequisite: ST 553 with C or better or ST 563 with C or better

ST 651, LINEAR MODEL THEORY, 3 Credits
Least squares estimation, best linear unbiased estimation, parameterizations, multivariate normal distributions, distributions of quadratic forms, testing linear hypotheses, simultaneous confidence intervals. Offered alternate years.
Recommended: ST 553 and ST 563

ST 652, LINEAR MODEL THEORY, 3 Credits
Advanced topics including classification models, mixed-effects models and multivariate models. Offered alternate years.
Prerequisite: ST 651 with C or better
Recommended: ST 553 and ST 563

ST 661, ADVANCED THEORY OF STATISTICS, 3 Credits
Exponential families, sufficient statistics; unbiased, equivariant, Bayes, and admissible estimation. Offered alternate years.
Recommended: ST 563 and MTH 511

ST 662, ADVANCED THEORY OF STATISTICS, 3 Credits
Uniformly most powerful, unbiased, similar, and invariant tests. Offered alternate years.
Prerequisite: ST 661 with C or better
Recommended: ST 563 and MTH 511
**ST 663, ADVANCED THEORY OF STATISTICS, 3 Credits**

First-order and higher-order asymptotics; likelihood ratio, score, and Wald tests; Edgeworth and saddlepoint approximations. Offered alternate years.

**Prerequisite:** ST 662 with C or better

**Recommended:** ST 563 and MTH 511

---

**Data Analytics Graduate Certificate**

Available only via Ecampus.

**Certificate Code:** CG17

**Code** | **Title** | **Credits**

**Statistics Graduate Major (MA, MS, PhD)**

**Graduate Areas of Concentration**

**Statistics**

The Department of Statistics offers Master of Arts, Master of Science, and Doctor of Philosophy degrees in Statistics. Students can concentrate on theory or applications, and programs can be tailored to emphasize such areas of interest as ecology, engineering, forestry, finance, mathematics, or oceanography. The thesis is optional for MS and MA degrees. Statistical consulting is part of the program, enabling the student to gain a deeper appreciation of the need, power, and applicability of statistical tools through exposure to real problems.

**Major Code:** 6150

**MS in Statistics**

The MS program is designed to prepare a candidate for a career in industry or government or for further study at the PhD level. Recent MS graduates have found employment with the U.S. Environmental Protection Agency, U.S. Census Bureau, Abt Associates, state of Oregon, Fred Hutchinson Cancer Research Center, Kaiser Permanente, Mayo Clinic, Bureau of Labor Statistics, Department of Veteran's Affairs, NOAA,MRI Global, and Capital One.

**Prerequisites**

- Single-variable and multivariable calculus (approximately 4 quarters).
- Linear algebra.
- One or more applied statistics courses (recommended, but not required).

Students who meet all of the requirements except for one or two courses may be granted provisional admission so they can begin their graduate studies while completing the remaining required courses. When the remedial course work is completed the Graduate School will remove the provisional status.

**Requirements**

**Code** | **Title** | **Credits**
---|---|---
ST 501 | RESEARCH | 3
ST 506 | PROJECTS (Sect 2: Teaching Experience) | 1
ST 507 | SEMINAR (Sect 1: Attendance at Consulting Seminar) | 1
ST 507 | SEMINAR (Sect 3: Attendance at Research Seminar) | 2
ST 509 | CONSULTING PRACTICUM | 2
ST 541 | PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS | 4
ST 551 | STATISTICAL METHODS & ST 552 | 12
& ST 553 | and STATISTICAL METHODS | 12
ST 561 | THEORY OF STATISTICS & ST 562 | 12
& ST 563 | and THEORY OF STATISTICS | 12
ST 623 | GENERALIZED REGRESSION MODELS | 3

**Additional approved courses**

**Total Credits** | 55
Approved courses include all 500- and 600-level courses in the Statistics Department except:
ST 511, ST 512, ST 513
ST 515
ST 521, ST 522

Courses with a zero middle digit and courses in other departments may be used only with the consent of the major professor (and minor professor if the course is listed in the minor).

A student intending to pursue the PhD in Statistics should review the mathematics prerequisites and requirements for that program and plan a course of study to satisfy them.

Other Requirements
- Pass written comprehensive exams in statistical methods and in statistical theory. These exams are given each year in September.
- Pass a final oral exam.

PhD in Statistics
The PhD program is designed to prepare a candidate for a career in teaching and research. Recent PhD graduates have found employment with US Geological Survey, Chase Bank, Bureau of Labor Statistics, USDA Forest Service, Weyerhauser, as well as with universities in the U.S. and abroad.

Prerequisites
- Equivalent to the OSU Master’s degree in Statistics.
- Pass the MS comprehensive exams in methods and theory.
- Apply for admission to PhD program. (Evaluation is by the entire faculty. The evaluation criteria for admission are: course work, grades, MS comprehensive exam results, and any information you provide in your application giving evidence of capability to do original research.)
- Course work equivalent to MTH 311 and MTH 312.

Select 30 credits to total about 120 credits of course work

Total Credits 123

Credits completed for an MS degree as well as the 36 or more credits of ST 603 count toward this total. The specific courses to be taken are decided at a meeting of the PhD committee.

Other Requirements
- Pass the preliminary exam over PhD course work.
- Write a thesis describing the results of original research.
- Pass the final examination over thesis and related material.

Major Code: 6150
Statistics Minor

Minor Code: 615

1 The student and/or minor professor may wish to add one or two additional courses.
2 If ST 551, ST 552, and ST 553 are taken, the additional courses should total at least 3 credits. If ST 511, ST 512, and ST 513 are taken, they should total at least 6 credits.
The undergraduate minor in Statistics requires a minimum of 27 credits in statistics.

^ Writing Intensive Course (WIC)

Other statistics-related courses may be substituted, subject to departmental approval

**Minor Code:** 615

**College of Veterinary Medicine**

The Carlson College of Veterinary Medicine at Oregon State University was established in 1975 with three major areas of responsibility—teaching, research, and public service. The college is fully accredited by the American Veterinary Medical Association's Council on Education.

200 Magruder Hall
Oregon State University
Corvallis, OR 97331-4801
Phone: 541-737-2098
Email: cvmproginfo@oregonstate.edu
Website: http://vetmed.oregonstate.edu/

**Administration**

Susan J. Tornquist, Lois Bates Acheson Dean, 541-737-6943, susan.tornquist@oregonstate.edu

Luiz Bermudez, Head, Department of Biomedical Sciences, 541-737-6532, luiz.bermudez@oregonstate.edu
Chris Cebra, Chair, Department of Clinical Sciences, 541-737-4456, chris.cebra@oregonstate.edu
Helio de Morais, Director, Veterinary Teaching Hospital, 541-737-4458, helio.demorais@oregonstate.edu
Mark Ackermann, Director, Veterinary Diagnostic Laboratory, 541-737-6964, mark.ackermann@oregonstate.edu

**Teaching**

The college was established in 1975 and began its professional education program in 1979. Approximately 40 residents of Oregon and 32 nonresident students are selected to enter the OSU Carlson College of Veterinary Medicine. These students will complete all four years of their professional education in Corvallis. Completion of the professional program leads to the Doctor of Veterinary Medicine (DVM) degree.

There are two departments supporting the DVM doctoral program: Biomedical Sciences and Clinical Sciences.

Comprehensive research training is provided through graduate programs leading to the MS degree in Comparative Health Sciences.

Post-DVM residency training leading to board eligibility in several clinical disciplines and pathology is also available.

**Research**

Biomedical research is conducted in the college, supported by federal agencies such as NIH, USDA, DOE, as well as by a number of foundations. Collaboration with the OSU Agricultural Experiment Station, colleges of Pharmacy, Public Health and Human Sciences, Engineering and many other colleges, is part of the program. The research is of economic and public health significance, aimed at improving the health of animals and people.

The college emphasizes research of infectious diseases, such as those caused by Mycobacteria, Chlamydia, Clostridia, Vibrio, Mycoplasma, Cryptosporidium, herpesvirus, respiratory syncytial virus, influenza virus, and HIV-1 virus. Research is also conducted on immunity and nutrition, neuroscience, cancer, cardiovascular diseases, diabetes, reproductive diseases, and diseases of terrestrial and aquatic wildlife.

**Public Service**

The service programs focus on the diagnosis, prevention, treatment, and control and prevention of animal diseases. The college assists veterinary practitioners, animal owners, and the general public through the Oregon Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital.

The Oregon Veterinary Diagnostic Laboratory is a full-service facility providing a wide range of animal disease diagnostic testing services to veterinarians, animal owners, and public agencies. The laboratory offers testing and expertise in pathology, clinical pathology, bacteriology, and virology, and is accredited by the American Association of Veterinary Laboratory Diagnosticians.

The Veterinary Teaching Hospital is designed and equipped for diagnosis and medical and surgical treatment of canine, feline, equine, food animal, and camelid patients. Patients are admitted directly from animal owners and through referrals from practicing veterinarians in Oregon and the Pacific Northwest. Imaging (radiology, ultrasonography, fluoroscopy, CAT...
scan, MRI, and scintigraphy), anesthesiology, pharmacy, intensive care, and other services are available to support the hospital functions.

The Oregon Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital serve as learning centers where senior veterinary students and residents study animal disease, diagnosis, treatment, and prevention.

Providing continuing education for veterinarians is also considered a major responsibility of the college. One- to three-day intensive courses of instruction on specific topics are offered periodically.

Career Opportunities in Veterinary Medicine

Opportunities for employment in veterinary medicine are excellent. Nearly 80 percent of the professionally active veterinarians in the United States are engaged in private practice. Some practices are limited to types of animals, such as food animal, equine, or companion animal practices. Others involve specialties such as surgery, ophthalmology, cardiology, or radiology. In addition to private practice, there are numerous teaching and research opportunities in academic, government, and industrial settings. Expanding areas include laboratory animal medicine and public health.

Veterinary Student Expenses

Oregon resident students registered in the Carlson College of Veterinary Medicine will pay tuition and fees of approximately $8,507 per term. Students from the WICHE (http://www.wiche.edu/states/) states will pay the same fees as Oregon resident students. Nonresident student fees currently are $16,263 per term.

Veterinary students must provide required professional attire, as well as dissection, surgical, and diagnostic instruments, and notes and books.

Occasional field trips are scheduled in the veterinary curriculum. Transportation is provided by the university for required trips, but students must provide their own food and lodging. For optional trips, the student is usually expected to provide transportation, lodging, and food. All other expenses, such as residence hall and living expenses, are the same as for students in other colleges of the university.

Students desiring additional information about veterinary medicine should write to the Office of the Dean, Carlson College of Veterinary Medicine, Oregon State University, 200 Magruder Hall, Corvallis, Oregon 97331-4801, email cvmproginfo@oregonstate.edu or see our website (http://vetmed.oregonstate.edu/).

Policy on Laboratory and Duty Hours

During the professional curriculum, several laboratory exercises in the preclinical years require the use of five animals. The exercises are designed to complement didactic lectures and demonstrations through hands-on experience with various species of animals. In all instances, the animals are humanely treated and anesthetized if the procedures are potentially painful.

During the clinical years, animals are used in laboratory exercises in the teaching of basic surgical skills and medical procedures. In most instances, the animals are anesthetized. Strict protocol is enforced regarding the animals' well-being in exercises requiring post-operative recovery. All use of animals in teaching is approved by the university's Institutional Animal Care and Use committee.

During the fourth year of the veterinary curriculum, students complete rotations in sections of the Veterinary Teaching Hospital and Oregon Veterinary Diagnostic Laboratory. Emergency services are offered to the public on a 24-hour basis, seven days a week. Student assignments in the clinical blocks are demanding, and students are required to spend time at night, weekends, and holidays in the delivery of health care to patients. Hospital operations continue seven days per week, and students are responsible for their assigned tasks regardless of time and day of the week.

DVM and MPH Dual Degree

Students enrolled in the Doctor of Veterinary Medicine (DVM) degree program wishing also to complete a Master's of Public Health Degree may do so if successfully admitted to the Graduate School and the College of Public Health and Human Sciences (CPHHS). Using pre-approved and cross-listed courses as electives, veterinary students may complete the MPH degree (http://health.oregonstate.edu/degrees/graduate/public-health/mpd/dvm-mpd-dual-degree/) with an additional (5th) year of study.

The CPHHS offers an MPH degree in six tracks: Biostatistics; Epidemiology; Environment, Safety and Health; Health Management and Policy; Health Promotion and Health Behavior; and International Health.

In order to maximize use of elective courses in the dual degree program, it is important that veterinary students enter the dual degree option as early in their studies as possible.

The five core MPH courses are offered through distance education. In consultation with the student's MPH adviser, internships, culminating activities and senior papers should be coordinated as well. The student's MPH adviser must approve all veterinary courses counted toward the graduate (MPH) degree.

Biomedical Sciences

Luiz E. Bermudez, Head
105 Dryden Hall
Oregon State University
Corvallis, OR 97331-4801
Phone: 541-737-6532
Email: cvm.biomed@oregonstate.edu
Website: https://vetmed.oregonstate.edu/biomed (https://vetmed.oregonstate.edu/biomed/)

Faculty
Professors Ackermann, Bermudez, Bildfell, Hall, Häse, Jin, Kent, Löhr, Magnusson, Rockey, Sarker, Tornquist
Associate Professors Danielshvili, Dolan, Gorman, Jolles, Medlock, Moulton, O'Reilly, Pastey, Ramsey, Russell, Shulzenko
Assistant Professors Beechler, Chappell, J. Johns, Miller-Morgan, Nigussie, Puttachary, Sanders, Schubiger, Spagnoli
Instructors Alcantar, Mansouri, Sona
Adjunct Fu, Uehling
Emeriti Blythe, Gelberg, Heidel, Valentine
Courtesy Alnajjar, Banawas, Esfandiari, Steinauer, Trevejo, White, Constance

Clinical Sciences

Chris Cebra, Chair
Department of Clinical Sciences
272 Magruder Hall
Oregon State University
Corvallis, OR 97331-4801
Faculty
Professors: Cebra, de Morais, Estill, Huber, McKenzie, Riebold, Semevolos
Associate Professors: Baltzer, Gordon, Mandsager, Milovancev, Parker, Ruaux, Scollan, Stieger-Vanegas, Warnock, Zellmer
Assistant Professors: Biskup, Bracha, Cooley, Curran, Holder, Klopfenstein, LeBlanc, Lueer, Mecham, Montilla, Nemanic, Pacheco, Palmer, Schlipf, Townsend, Vanegas, Whitler
Instructor: Husby, Miller
Emeriti: Crisman, Pearson, Sisson, Watrous
Adjunct: Campbell

Professional Programs
- Doctor of Veterinary Medicine (p. 1708)

VMB 110, PREVETERINARY MEDICINE, 1 Credit
Introduction to the profession's role in society. Graded P/N.
Equivalent to: VM 110

VMB 112, THE ONE HEALTH PARADIGM AND AUDIENCE CONNECTIONS, 3 Credits
Present, discuss and communicate current research papers and ongoing projects in concise, audience appropriate formats using techniques from entrepreneurship, grant proposal writing and Hollywood storytelling. This course is repeatable for 6 credits.

VMB 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

VMB 415, ONE HEALTH IN PRACTICE, 3 Credits
One health is the concept that human, animal and environmental health are all intertwined. Utilizes current one health issues such as disease outbreaks and antimicrobial resistance to encourage students from diverse fields to develop interdisciplinary collaboration and communication skills. CROSSLISTED as BHS 415/VMB 415.
Equivalent to: BHS 415

VMB 499, SPECIAL TOPICS, 1-16 Credits
Special studies course to allow different instructors the ability to teach a new class or one time class. Graded P/N. This course is repeatable for 16 credits.

VMB 501, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: VM 501
This course is repeatable for 16 credits.

VMB 503, THESIS, 1-12 Credits
Equivalent to: VM 503
This course is repeatable for 999 credits.

VMB 504, WRITING AND CONFERENCE (NON-THONESIS), 1-9 Credits
This course is repeatable for 9 credits.

VMB 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: VM 505
This course is repeatable for 16 credits.

VMB 507, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: VM 507
This course is repeatable for 16 credits.

VMB 512, THE ONE HEALTH PARADIGM AND AUDIENCE CONNECTIONS, 3 Credits
Present, discuss and communicate current research papers and ongoing projects in concise, audience appropriate formats using techniques from entrepreneurship, grant proposal writing and Hollywood storytelling. This course is repeatable for 6 credits.

VMB 517, VETERINARY PHYSIOLOGY, 5 Credits
Physiology of body fluids, muscles, membranes, intermediary metabolism, cardiovascular system, and metabolism.
Equivalent to: VM 517

VMB 518, VETERINARY PHYSIOLOGY, 5 Credits
Physiology of gastrointestinal, endocrine and reproductive systems.
Prerequisite: VMB 517 with C or better
Equivalent to: VM 518

VMB 519, VETERINARY PHYSIOLOGY, 4 Credits
Physiology of respiratory and renal systems and acid-base balance.
Prerequisite: VMB 518 with C or better
Equivalent to: VM 519

VMB 521, ANIMAL MODELS, 3 Credits
Selection/use criteria for models describing animal or human diseases or processes with emphasis on experimental design, validation, transgenic technology, population dynamics, husbandry, and ethics.

VMB 523, ZOOONOSES, 3 Credits
Interactive examination of the molecular basis of diseases that are transmissible between animals and humans. Emphasis on bacterial, viral and parasitic pathogens of animals and humans.

VMB 601, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: VM 601
This course is repeatable for 16 credits.

VMB 603, THESIS, 1-16 Credits
Equivalent to: VM 603
This course is repeatable for 999 credits.
VMB 604, WRITING AND CONFERENCE (NON-THESIS), 1-9 Credits
This course is repeatable for 9 credits.

VMB 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: VM 605
This course is repeatable for 16 credits.

VMB 606, PROJECTS, 1-16 Credits
Graded P/N.
Equivalent to: VM 606
This course is repeatable for 16 credits.

VMB 607, SEMINAR, 1-16 Credits
One-credit section; VMB 607 Sect. 1. Graded P/N.
Equivalent to: VM 607
This course is repeatable for 16 credits.

VMB 611, VETERINARY GROSS ANATOMY, 4 Credits
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.
Equivalent to: VM 611

VMB 612, VETERINARY GROSS ANATOMY, 4 Credits
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.
Equivalent to: VM 612

VMB 613, VETERINARY GROSS ANATOMY, 4 Credits
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.
Equivalent to: VM 613

VMB 614, VETERINARY MICROSCOPIC ANATOMY, 4 Credits
Structure and development of cells, tissues, organs, and organ systems of animals.
Equivalent to: VM 614

VMB 615, VETERINARY MICROSCOPIC ANATOMY, 3 Credits
Structure and development of cells, tissues, organs, and organ systems of animals.
Equivalent to: VM 615

VMB 616, VETERINARY NEUROSCIENCES, 4 Credits
Structural and functional relationships of the nervous system and organs of special sense with emphasis on general clinical application.

VMB 620, VETERINARY IMMUNOLOGY, 5 Credits
Clinical and diagnostic aspects of immunological mechanisms, serological reactions; hypersensitivity, allergy, and disorders of the immune system.
Equivalent to: VM 620

VMB 621, GENERAL PATHOLOGY, 4 Credits
General principles of pathology, cell injury and death, inflammation and tissue repair, abnormalities of cell growth, and structures and mechanisms of disease.
Equivalent to: VM 621

VMB 622, PATHOLOGY LABORATORY, 1 Credit
Labaratory instruction to complement VMB 621.
Prerequisite: VMB 611 (may be taken concurrently) with C or better
Equivalent to: VM 622

VMB 624, ANTIBIOTIC STEWARDSHIP, 1 Credit
Elective course for students to learn about significant aspects of antibiotic resistance. Intended to become part of the "One Health Program", resulting in the ability to create a plan for effective antibiotic stewardship as it relates to human, animal, and environmental health.

VMB 627, ORNAMENTAL FISH MEDICINE, 2 Credits
An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. This is a 1-week intensive course held at the Hatfield Marine Science Center in Newport, Oregon. Graded P/N.

VMB 630, MECHANISMS OF DISEASE, 3 Credits
Cellular and molecular events that contribute to the pathogenesis of disease in animals, including humans. Host interactions with infectious agents and the environment.
Equivalent to: VM 630

VMB 631, MATHEMATICAL MODELING OF BIOLOGICAL SYSTEMS, 3 Credits
The use of mathematical modeling in biological sciences is studied. A variety of modeling techniques are covered including implementing the methods computationally.

VMB 640, SEMINARS IN LABORATORY ANIMAL MEDICINE, 2 Credits
Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment of research animals.
VMB 641, SEMINARS IN LABORATORY ANIMAL MEDICINE, 2 Credits
Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals.

VMB 642, SEMINARS IN LABORATORY ANIMAL MEDICINE, 2 Credits
Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals.

VMB 651, SELECTED TOPICS IN VETERINARY MEDICINE, 3 Credits
Topics vary; check Schedule of Classes for particular topics. Equivalent to: VM 651

VMB 652, CANCER SYSTEMS BIOLOGY, 3 Credits
Overview of systems biology approaches that are being used to study cancer, with an emphasis on omics techniques and fundamental mechanisms in the origination and progression of cancer. Discussion-based, with each class session focused on a contemporary research article in the field of cancer systems biology.

VMB 653, VETERINARY VIROLOGY, 4 Credits
Virology for the professional and graduate student.

VMB 659, VETERINARY BACTERIOLOGY AND MYCOLOGY, 5 Credits
Veterinary bacteriology and mycology for the veterinary graduate student.

VMB 660, VETERINARY PARASITOLOGY, 5 Credits
A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered.

VMB 663, VETERINARY DIAGNOSTIC PATHOLOGY, 6 Credits
Practical hands-on course training students in the diagnostic pathology utilizing case material received at the OSU Veterinary Diagnostic Lab. Graded P/N.

VMB 664, COMPARATIVE MICROSCOPIC PATHOLOGY, 1 Credit
Case-based discussion course to train participants in the recognition, description, and pathogenesis of a wide variety of disease processes with an emphasis on microscopic features. Graded P/N. This course is repeatable for 4 credits.

VMB 665, READINGS IN VETERINARY PATHOLOGY, 1 Credit
Group discussions of assigned readings central to understanding of veterinary pathology, including recent advances. Graded P/N. This course is repeatable for 6 credits.

VMB 666, VETERINARY MEDICINE AND PUBLIC HEALTH, 3 Credits
Covers aspects of veterinary medicine that affect human health. An understanding of the contribution of the veterinary profession to human (public) health will enable students to play an effective role in this area, regardless of career direction.

VMB 669, INTRODUCTION TO GRANT PROPOSAL WRITING, 2 Credits
To introduce students to the fundamentals of writing grant proposals to the National Institute of Health (NIH), different funding mechanisms, as well as the grant reviewing process. CROSSLISTED as PHAR 669/VMB 669. Equivalent to: PHAR 669 This course is repeatable for 20 credits.

VMB 670, INTRODUCTION TO SYSTEMS BIOLOGY, 2 Credits
Students will gain a high-level overview of systems biology and bioinformatics, with an emphasis on biomedical applications, integration of 'omics' approaches, and biological networks.

VMB 671, MOLECULAR TOOLS, 3 Credits
Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. CROSSLISTED as MCB 671/VMB 671. Equivalent to: MCB 671 Available via Ecampus

VMB 672, MOLECULAR APPROACH TO CANCER, 1 Credit
Overview of cancer pathogenesis and current molecular techniques to diagnose and treat various neoplasms is provided. Content will include both veterinary and human data and concepts. Discussion/Lab. Graded P/N.

VMB 673, COMPARATIVE IMMUNOLOGY, 3 Credits
Examines immune system function in animals other than mice and men with a focus on adapting cutting-edge technologies.

VMB 674, VACCINES AND NEW THERAPIES, 3 Credits
Provides students with a cohesive understanding of the basic research behind the discovery of new therapeutic targets and scientific advancements used in development of vaccines and new therapies.

VMB 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 99 credits.
VMB 701, RESEARCH, 1-16 Credits  
Equivalent to: VM 701  
This course is repeatable for 16 credits.

VMB 705, READING AND CONFERENCE,  
1-16 Credits  
Equivalent to: VM 705  
This course is repeatable for 16 credits.

VMB 706, PROJECTS, 1-16 Credits  
Equivalent to: VM 706  
This course is repeatable for 16 credits.

VMB 707, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.  
Equivalent to: VM 707

VMB 708, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.  
Equivalent to: VM 708

VMB 709, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. Lec/lab.  
Equivalent to: VM 709

VMB 710, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. Lec/lab.  
Equivalent to: VM 710

VMB 711, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.  
Equivalent to: VM 711

VMB 712, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken.  
Equivalent to: VM 712

VMB 713, VETERINARY GROSS ANATOMY,  
4 Credits  
Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. Lec/lab.  
Equivalent to: VM 713

VMB 714, VETERINARY MICROSCOPIC ANATOMY, 4 Credits  
Structure and development of cells, tissues, organs, and organ systems of animals.  
Equivalent to: VM 714

VMB 716, VETERINARY NEUROSCIENCES,  
4 Credits  
Structural and functional relationships of the nervous system and organs of special sense with emphasis on general clinical application.  
Equivalent to: VM 716

VMB 717, VETERINARY PHYSIOLOGY, 5 Credits  
Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation.  
Equivalent to: VM 717

VMB 718, VETERINARY PHYSIOLOGY, 5 Credits  
Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation.  
Equivalent to: VM 718

VMB 719, VETERINARY PHYSIOLOGY, 4 Credits  
Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. Lec/lab.  
Equivalent to: VM 719

VMB 720, VETERINARY IMMUNOLOGY, 5 Credits  
Clinical and diagnostic aspects of immunological mechanisms, serological reactions, hypersensitivity, allergy, and disorders of the immune system. Lec/lab.  
Equivalent to: VM 720

VMB 721, VETERINARY PATHOLOGY, 5 Credits  
Basic mechanisms and concepts relating to reaction of cells and tissues to disease, with emphasis on cellular and tissue degeneration, inflammatory reaction, circulatory disturbance and neoplasia. Lec/lab.  
Equivalent to: VM 721

VMB 722, RESEARCH READING SKILLS FOR VETERINARY STUDENTS, 1 Credit  
Training in critical evaluation of biomedical and clinical research studies, and understanding of laboratory diagnostic methods.

VMB 723, VETERINARY LEADERSHIP: INCLUSION, REFLECTION, DEVELOPMENT, 1 Credit  
Focusing on diversity and inclusion, self-compassion, and effective interpersonal communication in relationship to fostering leadership in veterinary medicine. Graded P/N.  
This course is repeatable for 10 credits.

VMB 724, ANTIBIOTIC STEWARDSHIP, 1 Credit  
Elective course for students to learn about significant aspects of antibiotic resistance. Intended to become part of the “One Health Program”, resulting in the ability to create a plan for effective antibiotic stewardship as it relates to human, animal, and environmental health.

VMB 726, PET BIRD AND SMALL MAMMAL MEDICINE AND SURGERY, 2 Credits  
Medicine and surgery of pet birds and small animals. Graded P/N.

VMB 727, ORNAMENTAL FISH MEDICINE, 2 Credits  
An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. Graded P/N.
VMB 728, SPECIAL ANIMAL MEDICINE, 4 Credits
Diagnosis, treatment, and management of special animals, including the common laboratory animals.
Equivalent to: VM 728
This course is repeatable for 8 credits.

VMB 729, LAB ANIMAL/PRIMATE MEDICINE AND SURGERY, 3-12 Credits
Designed to provide hands-on experience with a variety of laboratory animal species including primates, rodents, ungulates, fish, and reptiles. May be repeated up to 4 times for 3, 6, 9 or 12 credits per term. 12 credits maximum apply toward graduation. Graded P/N. This course is repeatable for 12 credits.

VMB 736, DIAGNOSTIC CLINICAL PATHOLOGY, 2 Credits
One week clinical experience in clinical pathology, cytology, urinalysis, clinical chemistry interpretation and hematology. Lec/lab.
Equivalent to: VM 736

VMB 740, VETERINARY INTEGRATED PROBLEM SOLVING, 1 Credit
The first of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum.
Equivalent to: VM 740

VMB 742, VETERINARY INTEGRATED PROBLEM SOLVING, 1 Credit
The third of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Graded P/N.
Equivalent to: VM 742

VMB 745, COMMUNICATIONS FOR VETERINARIANS, 1 Credit
Communications and problem solving for the third-year veterinary student. Graded P/N.

VMB 749, WILDLIFE SAFARI, 2 Credits
Clinical training in the care of exotic and zoo animal species. Graded P/N.

VMB 750, SYSTEMIC PATHOLOGY I, 4 Credits
Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host.
Equivalent to: VM 7500

VMB 751, SYSTEMIC PATHOLOGY II, 5 Credits
Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host.
Equivalent to: VM 751

VMB 753, VETERINARY VIROLOGY, 4 Credits
Virology for the professional DVM student.
Equivalent to: VM 753

VMB 756, ADVANCED CLINICAL PATHOLOGY, 1 Credit
One-week rotation in advanced clinical pathology: cytology, hematology and clinical chemistry interpretation. Graded P/N.
Prerequisite: VMB 736 with C or better

VMB 759, VETERINARY BACTERIOLOGY AND MYCOLOGY, 5 Credits
Bacteriology and mycology for the professional DVM student.
Equivalent to: VM 759

VMB 760, VETERINARY PARASITOLOGY, 5 Credits
A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered.
Equivalent to: VM 760

VMB 761, VETERINARY PHARMACOLOGY, 2 Credits
Fundamentals of pharmacology as related to veterinary medicine presented in a systems-oriented approach with drug therapy in domestic animals.
Equivalent to: VM 761

VMB 762, VETERINARY PHARMACOLOGY II, 4 Credits
Fundamentals of pharmacology as related to veterinary medicine presented in a systems-oriented approach with drug therapy in domestic animals.
Equivalent to: VM 762

VMB 763, VETERINARY CLINICAL PATHOLOGY, 4 Credits
Clinical pathology for the professional DVM student.
Equivalent to: VM 763

VMB 765, VETERINARY TOXICOLOGY, 4 Credits
A study of toxic agents, mechanisms of action, toxicosis and treatments, especially as related to domestic and wild animals, with principles of toxicity testing, clinical diagnosis, and identification of poisonous plants. Lec/lab.
Equivalent to: VM 765

VMB 766, EPIDEMIOLOGY AND PUBLIC HEALTH, 3 Credits
Examination of the application of epidemiology to the field of veterinary medicine and the study of important veterinary public health issues.
Equivalent to: VM 766
VMB 768, BASIC HISTOPATHOLOGY, 1 Credit
A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. Graded P/N. 
Prerequisite: VMB 751 with C or better

VMB 769, ANIMAL GENOMICS, 1 Credit
Discussion about the dog and cow genomes, susceptibility to diseases, and the possibilities and techniques for treatment of medical conditions by gene transfer and modification.

VMB 772, INTERNATIONAL VETERINARY MEDICINE, 2 Credits
Veterinary students work with veterinarians and domestic animals in international settings. Graded P/N. 
This course is repeatable for 4 credits.

VMB 774, LABORATORY ANIMAL MEDICINE, 6 Credits
Clinical experience related to diagnosis, treatment, and management of laboratory animals. Graded P/N. 
Equivalent to: VM 774

VMB 778, ADVANCED HISTOPATHOLOGY, 2 Credits
A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species.

VMB 795, DIAGNOSTIC SERVICES, 2 Credits
Students will perform service duty in the necropsy area of the Veterinary Diagnostic Laboratory and will perform necropsies on delivered specimens. Other activities.

Veterinary Medicine Clinical (VMC)

VMC 501, RESEARCH, 1-16 Credits
Graded P/N. 
Equivalent to: VM 501
This course is repeatable for 16 credits.

VMC 503, THESIS, 1-12 Credits
Equivalent to: VM 503
This course is repeatable for 999 credits.

VMC 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N. 
Equivalent to: VM 505
This course is repeatable for 16 credits.

VMC 507, SEMINAR, 1-16 Credits
Graded P/N. 
Equivalent to: VM 507
This course is repeatable for 16 credits.

VMC 509, TEACHING PRACTICUM FOR VETERINARY PROFESSIONAL CURRICULUM, 1-6 Credits
Provides veterinary specialty residents and graduate students a mentored experience in teaching of veterinary medical students. Experience can be gained with teaching of lecture and/or laboratory courses. 
This course is repeatable for 6 credits.

VMC 601, RESEARCH, 1-16 Credits
Graded P/N. 
Equivalent to: VM 601
This course is repeatable for 16 credits.

VMC 603, THESIS, 1-16 Credits
Equivalent to: VM 603
This course is repeatable for 999 credits.

VMC 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: VM 605
This course is repeatable for 16 credits.

VMC 606, PROJECTS, 1-16 Credits
Graded P/N. 
Equivalent to: VM 606
This course is repeatable for 16 credits.

VMC 607, SEMINAR, 1-16 Credits
One-credit section; VMC 607 Sect. 1. Graded P/N. 
Equivalent to: VM 607
This course is repeatable for 16 credits.

VMC 632, POSTGRADUATE MEDICINE, 3-7 Credits
An interactive, practical course on the role of scholarship in clinical medicine, including techniques to develop and conduct research in a clinical setting. 
This course is repeatable for 16 credits.

VMC 634, POSTGRADUATE SURGERY, 3-7 Credits
An interactive, practical course on the role of scholarship in clinical surgery, including techniques to develop and conduct research in a clinical setting. 
This course is repeatable for 16 credits.

VMC 637, POSTGRADUATE CARDIOLOGY, 3-7 Credits
An interactive, practical course on the role of scholarship in clinical cardiology, including techniques to develop and conduct research in a clinical setting. 
This course is repeatable for 16 credits.
VMC 682, TOPICS IN INTERNAL MEDICINE, 2-4 Credits
In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of internal medicine through investigation of primary literature and recent reviews. This course is repeatable for 16 credits.

VMC 684, TOPICS IN SURGERY, 2-4 Credits
In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of surgery through investigation of primary literature and recent reviews. This course is repeatable for 16 credits.

VMC 701, RESEARCH, 1-16 Credits
Equivalent to: VM 701
This course is repeatable for 16 credits.

VMC 705, READING AND CONFERENCE, 1-16 Credits
Equivalent to: VM 705
This course is repeatable for 16 credits.

VMC 706, PROJECTS, 1-16 Credits
Equivalent to: VM 706
This course is repeatable for 16 credits.

VMC 711, CLINICAL CARDIOLOGY, 1-4 Credits
A one-week clinical elective rotation in cardiology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. Fourth-year standing in Veterinary Medicine required. This course is repeatable for 4 credits.

VMC 712, CLINICAL ONCOLOGY, 1-4 Credits
A one-week clinical elective rotation in clinical oncology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. Fourth-year standing in Veterinary Medicine required. Prerequisite: VMC 778 with C or better This course is repeatable for 4 credits.

VMC 714, SMALL ANIMAL DENTISTRY, 1 Credit
A clinical course designed to provide students with hands-on training in diagnosis, treatment and prophylaxis of dental diseases of dogs and cats.

VMC 715, CASE STUDIES IN SMALL ANIMAL MEDICINE I, 1 Credit
A case-based course involving diseases and conditions of the endocrine, gastrointestinal and hepatobiliary systems as well as neoplastic and infectious diseases of small animals.

VMC 716, CASE STUDIES IN SMALL ANIMAL MEDICINE II, 1 Credit
A case-based course involving diseases and conditions of the cardiovascular, respiratory and urogenital systems as well as emergent diseases and conditions.

VMC 717, CASE STUDIES IN SMALL ANIMAL MEDICINE III, 1 Credit
A case-based course involving diseases and conditions of the dermatologic, neurologic, ophthalmologic, and hemolymphatic systems.

VMC 718, SMALL ANIMAL PREVENTIVE MEDICINE, 2 Credits
Introductory course to basic concepts in small animal preventive medicine including vaccine immunology, vaccine strategies, internal/external parasite control, nutrition in disease prevention, and wellness programs for dogs and cats.

VMC 719, CLINICAL CARDIOLOGY I, 2 Credits
Hands-on practical experience in a clinical setting in taking a clinical history, performing a cardiovascular physical examinations, recording electrocardiograms, interpreting thoracic radiographs and echocardiograms, creating problem lists, compiling lists of differential diagnosis, formulating diagnostic and therapeutic plans, discussing treatment options, generating medical records, and discharging patients.

VMC 720, VETERINARY CLINICAL NUTRITION, 2 Credits
To examine the nutritional needs of many species of veterinary importance. Emphasis is placed on designing feeding programs to optimize health and animal performance.

VMC 721, SMALL ANIMAL CLINICAL NUTRITION, 1 Credit
Introduction to the concepts of small animal clinical nutrition and is designed for the third-year veterinary student.

VMC 723, ADVANCED FELINE MEDICINE, 2 Credits
A one-week elective for senior students in the DVM curriculum. The course emphasizes aspects of internal medicine specific to the domestic cat. Graded P/N.

VMC 724, LARGE ANIMAL SURGERY, 4 Credits
Familiarizes students with general surgical principles and common surgical conditions in large animal species. Equivalent to: VM 724 This course is repeatable for 8 credits.

VMC 725, PRINCIPLES OF SURGERY, 4 Credits
A basic course in the principles and techniques of surgery for the professional veterinary student. Lec/lab. Equivalent to: VM 725
VMC 726, SMALL ANIMAL THERIOGENOLOGY, 1 Credit
Advanced clinical experience in small animal (canine) reproduction. Graded P/N.
Prerequisite: VMC 783 with C or better

VMC 727, ADVANCED SMALL ANIMAL SURGERY, 2 Credits
One-week of additional lectures and laboratories to improve surgical skills and acquire more advanced knowledge of specific surgical conditions. Lec/lab. Graded P/N.

VMC 729, CLINICAL THERIOGENOLOGY, 1 Credit
Practical and theoretical training in reproductive management and disorders in all species; routine diagnostic and treatment procedures; clinic rounds. This course is repeatable for 3 credits.

VMC 731, SMALL ANIMAL EMERGENCY CARE-DOVE LEWIS, 3 Credits
A two-week clinical rotation at the Dove Lewis Memorial Emergency Clinic in Portland, OR. Equivalent to: VM 731

VMC 732, CLINICAL LARGE ANIMAL MEDICINE I, 3,6 Credits
Clinical medicine training in diseases of food animals and horses; clinic rounds and diagnostic procedures. Equivalent to: VM 732
This course is repeatable for 24 credits.

VMC 733, LARGE ANIMAL SURGERY LABORATORY, 2 Credits
Apply surgery principles and common surgical procedures of large animal species

VMC 734, CLINICAL LARGE ANIMAL SURGERY I, 3,6 Credits
Clinical surgery, treatment, and care of food animals and horses; clinical rounds; training in surgery, lameness, and diagnostic procedures. Lec/lab. Equivalent to: VM 734
This course is repeatable for 24 credits.

VMC 735, RURAL VETERINARY PRACTICE I, 3,6 Credits
Rural practice training in diseases of food animals and horses. Lec/lab. Equivalent to: VM 735
This course is repeatable for 6 credits.

VMC 736, CLINICAL SKILLS IV: PROFESSIONAL COMMUNICATION AND ETHICS, 2 Credits
Develop communication skills and ethical reasoning for client interactions.

VMC 737, VETERINARY ANESTHESIOLOGY, 4 Credits
A three-week rotation in veterinary anesthesiology utilizing patients presented to the veterinary teaching hospital. Equivalent to: VM 737

VMC 739, VETERINARY MEDICAL ETHICS, 1 Credit
Introduction of ethics in veterinary medicine, with specific attention to ethical theories, ethical decision making, moral status of animals, professional ethics, and practice issues. Equivalent to: VM 739

VMC 740, SHEEP AND GOAT MEDICINE AND SURGERY, 3 Credits
Discussions of economically important sheep and goat diseases, practical surgeries, and a review of nutrition and husbandry. Graded P/N.

VMC 741, LARGE ANIMAL GI SURGERY, 2 Credits
A one-week course for 4th year veterinary students, with particular interest in gastrointestinal surgery. Graded P/N.

VMC 742, CAMELID MEDICINE AND SURGERY, 4 Credits
Designed to give students an in-depth introduction to camelid health care via hands-on work, lectures, and discussion sections. Graded P/N.

VMC 744, ADVANCED LAMENESS IN EQUINE, 3 Credits
Application of anatomy, lameness examination, nerve and joint anesthesia, diagnostic radiology, ultrasound and nuclear scintigraphy to diagnosis of lameness in horses. Graded P/N.

VMC 745, PRACTICE MANAGEMENT, 2 Credits
A course in basic personal and business finances, career skills, and legal aspects of veterinary practice. Graded P/N. Equivalent to: VMB 775

VMC 747, VETERINARY ANESTHESIOLOGY II, 3 Credits
An additional two-week clinical rotation in veterinary anesthesiology utilizing patients presented to the Veterinary Teaching Hospital. Graded P/N.

VMC 748, EQUINE DENTISTRY, 2 Credits
Utilizing modern, motorized equipment, cadaver specimens, and live hospital and client horses, students will learn and perform modern methods of equine dental prophylaxis and treatment. Graded P/N.

VMC 749, CLINICAL IMAGING II, 3 Credits
Advanced clinical course for 4th-year veterinary students in which they will assume additional responsibility for performing common radiographic procedures. Graded P/N. Prerequisite: VMC 796 with C or better
VMC 750, EQUINE CLINICAL NUTRITION, 1 Credit
A one-week course for veterinary students focusing on equine nutrition that can be used in veterinary practice. Graded P/N.

VMC 751, RUMINANT NUTRITION, 2 Credits
An advanced course in clinical ruminant nutrition dealing with nutritional problems of ruminants that might be encountered by a practicing veterinarian. Graded P/N.

VMC 752, CLINICAL LARGE ANIMAL MEDICINE II, 3-6 Credits
Additional clinical medicine training. Graded P/N.
Prerequisite: VMC 732 with C or better
Equivalent to: VM 752
This course is repeatable for 6 credits.

VMC 753, CLINICAL ONCOLOGY I, 2 Credits
Teaches students a realistic approach to the diagnosis and treatment of pets with cancer. Students will participate in rounds, case management and medical records keeping.

VMC 754, CLINICAL LARGE ANIMAL SURGERY II, 3,6 Credits
Additional clinical surgery training. Graded P/N.
Prerequisite: VMC 734 with C or better
Equivalent to: VM 754
This course is repeatable for 6 credits.

VMC 755, RURAL VETERINARY PRACTICE II, 3-6 Credits
One additional rural practice training. Graded P/N.
Prerequisite: VMC 735 with C or better
Equivalent to: VM 755
This course is repeatable for 6 credits.

VMC 756, CLINICAL SKILLS V: TECHNICAL SKILLS AND CLINICAL REASONING, 1 Credit
Development of technical and psychomotor skills and clinical reasoning in preparation for clinical coursework.

VMC 758, CATTLE PRODUCTION MEDICINE, 3 Credits
Clinical application of production medicine practices to dairy and beef cattle practice. Graded P/N.
Prerequisite: VMC 735 with C or better
Equivalent to: VM 758

VMC 759, LARGE ANIMAL PALPATION, 1 Credit
A laboratory for additional experience in rectal palpation of large animals, for third-year veterinary students. Graded P/N.

VMC 760, CLINICAL SKILLS I: INTRO TO ANIMAL CARE AND VETERINARY MED, 3 Credits
Introduction of a variety of topics relevant to veterinary clinical skills including professionalism, inclusion, ethics, and career options. In addition, animal care, handling, restraint, and physical exam skills will begin to be developed.

VMC 761, CLINICAL SKILLS II: PHYSICAL EXAM AND PROBLEM SOLVING SKILLS, 3 Credits
Introduction to problem solving and integration of clinical case and basic science in the veterinary curriculum. Development of physical exam skills on healthy animals and medical records keeping.

VMC 762, CLINICAL SKILLS III: REASONING AND COMMUNICATION, 2 Credits
Develop communication skills and clinical reasoning in preparation for client interactions and evidence-based decision-making.

VMC 763, ADVANCED CLINICAL CARDIOLOGY, 1 Credit
An elective course for junior veterinary students detailing diagnosis and management of the common congenital and acquired cardiac diseases of domestic animals.

VMC 764, DIAGNOSTIC IMAGING, 4 Credits
A lecture and laboratory course in diagnostic imaging covering physics or radiography and ultrasonography, radiation safety and image interpretation for small and large animals, presented by body systems.
Equivalent to: VM 764

VMC 765, ADVANCED CLINICAL RADIOLOGY, 1 Credit
An elective advanced radiology case-based course for Year 3 veterinary medicine students that focuses on radiographic findings of commonly encountered clinical disease.

VMC 766, CLINICAL SMALL ANIMAL ULTRASONOGRAPHY, 2 Credits
A 1-week overview of clinical small animal ultrasonography with particular emphasis on material relevant to a general or emergency practitioner. Students will be able to perform a FAST scan to identify peritoneal fluid. Students will listen to didactic lectures in the morning with practical sessions in the afternoon. At the end of the week, pairs of students will make a short presentation based on a literature search on a topic of interest.
VMC 767, SMALL ANIMAL ABDOMINAL ULTRASOUND, 3 Credits
Introductory course to provide instruction in veterinary ultrasound with an emphasis on image optimization, evaluation of the abdomen, description and interpretation of imaging findings in dogs and cats. This course is intended for students with a background in common small animal disease and imaging anatomy.

VMC 768, PRINCIPLES OF ANESTHESIA, 4 Credits
A basic course in the principles and techniques of surgery and anesthesia for the professional veterinary student. Lec/lab.
Equivalent to: VM 768

VMC 769, GENERAL MEDICINE, 2 Credits
An introduction to medicine with a discussion of the principles of medicine that would be applicable to all species. Physical examination, clinical diagnosis, pathophysiology of signs of disease in domestic animals, therapeutic principles and diagnostic procedures.
Equivalent to: VM 769

VMC 770, LARGE ANIMAL MEDICINE I, 4 Credits
The first of three courses in large animal medicine for third-year professional veterinary students covering diagnosis and treatment of domestic large animals.
Equivalent to: VM 770

VMC 771, LARGE ANIMAL MEDICINE II, 4 Credits
Diagnosis, treatment and control of diseases of large domestic animals, specifically gastrointestinal, hepatobiliary diseases, weight loss, and introduction to production medicine, and some swine diseases.

VMC 772, LARGE ANIMAL MEDICINE III, 4 Credits
Diagnosis, treatment and control of diseases of large domestic animals, specifically central nervous system, mastitis, musculoskeletal, sudden death, skin, and some swine diseases.

VMC 773, MEDICINE LABORATORY I, 1 Credit
Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses.

VMC 774, MEDICINE LABORATORY II, 1 Credit
Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses.

VMC 775, CLINICAL SMALL SPORTS MEDICINE AND REHABILITATION, 3 Credits
Clinical training in small animal rehabilitation in the Veterinary Teaching Hospital.

VMC 776, SMALL ANIMAL MEDICINE I, 5 Credits
A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.
Equivalent to: VM 776

VMC 777, SMALL ANIMAL MEDICINE II, 5 Credits
A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.

VMC 778, SMALL ANIMAL MEDICINE III, 5 Credits
A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.

VMC 779, EQUINE SPORTS MEDICINE, 1 Credit
One-week elective encompassing basic exercise physiology, sports-related injuries, injury rehabilitation, training and nutrition of equine athletes. Graded P/N.
Equivalent to: VM 779

VMC 780, VETERINARY MEDICAL PRECEPTORSHIP, 1-16 Credits
Theory of practice of veterinary medicine in a non-university situation. Graded P/N.
Equivalent to: VM 780
This course is repeatable for 16 credits.

VMC 781, SEMINAR IN VETERINARY MEDICINE, 1-16 Credits
Seminars and case discussions on selected topics by students, staff, and others. Graded P/N.
Equivalent to: VM 781
This course is repeatable for 16 credits.

VMC 782, EMERGENCY CARE, 1 Credit
One-week rotation in the Veterinary Teaching Hospital during non-regular hours. Practice and instruction in caring for critically ill patients.
Equivalent to: VM 782

VMC 783, THERIOGENOLOGY I, 4 Credits
To present the clinical applications of reproductive physiology, anatomy, embryology, pathology and microbiology in domesticated animals.
Equivalent to: VM 783

VMC 785, SMALL ANIMAL SURGERY, 7 Credits
A lecture and laboratory course covering the diagnosis, operative methods, and aftercare of common small animal surgical conditions.
Equivalent to: VM 785
VMC 786, ANIMAL BEHAVIOR, 1 Credit
Diagnosis and treatment of feline, canine and equine problem behaviors including aggression, anxiety, house-soiling and compulsive behaviors.

VMC 787, 3RD YEAR CLINICS, 1 Credit
An introductory clinical experience for third-year veterinary students.

VMC 789, PET PRACTICE, 3 Credits
Additional clinical training in primary care pet practice at a Banfield Pet Hospital. Graded P/N. This course is repeatable for 6 credits.

VMC 790, CLINICAL EXPERIENCE, 1-16 Credits
This course is repeatable for 48 credits.

VMC 791, CLINICAL SMALL ANIMAL MEDICINE, 3,6 Credits
A clinical rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. This course is repeatable for 6 credits.

VMC 792, CLINICAL SMALL ANIMAL MEDICINE II, 3-6 Credits
A two-week, three-credit clinical elective rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. This course is repeatable for 6 credits.

VMC 793, CLINICAL SMALL ANIMAL SURGERY, 3,6 Credits
Clinical training in small animal surgery in the Veterinary Teaching Hospital. Prerequisite: VMC 725 with C or better and VMC 785 [C]
This course is repeatable for 6 credits.

VMC 794, OHS SMALL ANIMAL PRIMARY CARE, 4 Credits
Three-week rotation at OHS to gain experience with an emphasis on surgery, medical case workup, exam room protocol and behavior basics.

VMC 796, CLINICAL IMAGING, 3 Credits
A clinical course for 4th-year veterinary students in which they will assume primary responsibility for performing common radiographic procedures.

VMC 797, SMALL ANIMAL CRITICAL CARE AND HOSPITAL SERVICE ROTATION, 1 Credit
A one-week clinical rotation in small animal critical care managing small animal cases in the intensive care unit at the Veterinary Teaching Hospital.

VMC 798, CLINICAL SMALL ANIMAL SURGERY II, 3-6 Credits
Clinical training in small animal surgery in the College of Veterinary Medicine, Lois B. Acheson Veterinary Teaching Hospital. This course is repeatable for 6 credits.

VMC 799, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Veterinary Medicine Professional Major (DVM)

State of Oregon DVM Licensing Regulations

Oregon Veterinary Medical Examining Board Requirements
1. Graduate of a veterinary medical school accredited by the AVMA, or if a foreign graduate, have a certificate from ECFVG, PAVE or other equivalency program approved by the board.
2. Passed the NBC/CCT or NAVLE and Juris Prudence exams.
3. If you have less than one year’s U.S. experience, you must obtain an intern permit and practice under the supervision of an Oregon-licensed veterinarian for one year (or the balance of a year).

If you meet the following conditions, you may include a letter requesting a waiver of the CCT. Your letter must cite compliance with each of these requirements:

• Graduate of an accredited veterinary school or earned ECFVG certificate prior to 1991;
• Engaged in five contiguous years of active veterinary clinic practice immediately preceding date of application;
• Have held license(s) in good standing in other US states or provinces since graduation; and
• Have continuing education of at least 10 hours per year during the five years immediately preceding the date of application.

Examinations
Scores must be reported directly to the board from VIVA. If you tested in Oregon, you do not need to request a score transfer.

North American Veterinary Licensing Examination (NAVLE): Administered via computer during two periods in spring and winter. Passing score as established by National Board Examination Committee.

NBE/CCT: Passing score before December 1992 is 75.00 based on 1.5 standard deviations. After December 1992, passing score is the criterion-referenced score of 425.

Jurisprudence Exam: An open-book 40-question test on veterinary laws and rules of Oregon. The exam and regulations will be sent to applicants.
upon receipt of the license application and $75 fee. A passing score of 95 percent (38 correct answers) is required.

Licensing
Complete and submit the application and fee. The Jurisprudence Exam will be sent to you to complete and return. When you pass the JP exam, you will be sent an activation form. You may not practice in Oregon until you activate your license or intern permit. Complete and send in the activation form, along with the $100 fee. Your permanent license or intern permit will be issued upon receipt of all necessary documentation.

Permanant Licenses: If you have at least one year's documented veterinary clinical experience, you may activate your permanent license.

Intern Permits: New graduates or veterinarians with less than one year's experience must obtain an intern permit. This permit expires one year after the date of issue or less if prior experience is documented. Renewal notices are sent approximately six weeks prior to expiration date, at which time interns may activate their permanent license or request another intern permit if one year's experience has not been acquired. Current veterinary school seniors may submit application materials prior to graduation; however an intern permit will not be issued until the board receives either a dean's letter confirming graduation or a diploma copy.

Continuing Education: Active licensees are required to report 30 credits of CE every odd year, i.e., '11, '13, '15, etc.

Major Code: 9970

Prevetinary Curriculum
Typical preveterinary curriculum at Oregon State University follows. Oregon State University courses that will meet the preveterinary academic requirements:

Electives must be approved by associate dean

Prestigious programs

Several of our academic units claim top twenty, and even top ten, rankings in the world including Forestry (#2), Oceanography (#3), Mycology (#8), Marine Biology (#8) and Agricultural Sciences (#13). Our top rankings in the United States include Robotics (#4), Natural Resources (#4) and Big Data (#10). Join Oregon State as a graduate student and you will become an integral part of a growing, dynamic, creative and collaborative top-tier institution.

A diverse student body

Our over 5,000 graduate students come from more than 70 countries and every state in the US. Almost 20% of graduate students are from outside the US. Oregon State’s seven cultural resource centers (https://dce.oregonstate.edu/) help give students a place, and a community, to connect with once they arrive on campus, especially for those who may be far from home. The cultural centers include the Asian & Pacific Cultural Center, the Lonnie B. Harris Black Cultural Center, the Centro Cultural César Chávez, the Ettihad Cultural Center, the Native American Longhouse Eena Haws, the Pride Center, and the Hattie Redmond Women & Gender Center.

Services by the Graduate School

The Graduate School provides essential services to students and programs including where you apply to become a student at Oregon State and registering your important academic milestones such as your program of study, committee members, oral prelims, final exams, and graduation. Familiarize yourself with the Graduate School’s website (https://gradschool.oregonstate.edu/) where you will find relevant information for future and current students.

Interdisciplinary programs at the Graduate School

Similar to the 11 academic colleges at Oregon State, the Graduate School is also the academic home for several interdisciplinary programs and the students enrolled in those programs. These programs are unique in their ability to offer an education and training in topic areas spanning multiple colleges and disciplines.

Policies Governing All Graduate Programs

Graduate Major

A graduate major is the area of academic specialization in which the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student’s transcript. Find a list and description of degree types (p. 1723) and graduate majors (https://catalog.oregonstate.edu/programs/#filter-filter_40) in the Catalog.

Graduate Option

Options are for students of a specific major. An option is one of several distinct variants of course aggregations within a major that focus on an area of study designed to provide a student with specialized knowledge, competence, and skills while sharing a minimum core of courses.

A graduate option consists of a minimum of 12 designated quarter credits of related course work (excluding thesis credits), comprised of course work offered by the sponsoring unit as well as by other academic units. The option may be comprised of specific courses, completion of a designated number of credits from a longer list of alternative courses.

Major Code: 9970

Graduate School

Graduate students at Oregon State University can choose from over 55 doctoral programs, over 100 master’s programs and various certificate programs. Listed as a “Very High Research Activity (R1)” institution by the Carnegie Classification of Institutions of Higher Education, Oregon State offers students tremendous opportunities for research and career development beyond their undergraduate degrees.
or a combination of specific and alternative course lists. Approved
options may be added to a graduate program of study, and approved
by the faculty advisor(s) and the director of the sponsoring unit. On the
program of study, there should be no overlap in course credits between
options (the same course cannot be used to satisfy credit requirements
in multiple options). When the unit submits the final examination card to
validate awarding of the major to the Graduate School, the unit will also
validate that the requirements of the option have been completed.

**Graduate Area of Concentration**

A graduate area of concentration is a subdivision of a major or minor in
which a strong graduate program is available. Areas of concentration
may be referenced on the student’s program of study, but they are not
listed on the student’s transcript.

**Graduate Minor**

A graduate minor is an academic area that clearly supports the major.
Master’s program minors must include a minimum of 15 quarter credits
of graduate course work; doctoral minors require a minimum of 18
credits. On a master’s or doctoral program, a minor may be:

1. An academic area available only as a minor
2. A different major
3. The same major with a different area of concentration
4. An integrated minor

An integrated minor consists of a series of cognate courses from
two or more areas. These courses must be outside the major area
of concentration, with most of the courses being outside the major
department. The graduate faculty member representing the integrated
minor must be from outside the major department. Graduate minors are
listed on the student’s transcript.

**Concurrent Master’s Degrees**

Students who earn two master’s degrees at Oregon State University
must complete all degree requirements for each degree. This requires
filing separate programs of study forms for each degree, filing separate
commencement applications for each degree, completing separate
projects or theses for each degree, scheduling separate final oral
examinations for each degree, and passing final oral examinations for
each degree. For additional information, please refer to the Transfer
Credit section of this catalog.

**Dual Majors**

For the M.A., M.S., EdM, MF, or Ph.D. degree, a student may select two
graduate major areas to pursue instead of the traditional single major.
Only one degree is awarded, and the student basically must satisfy all
degree requirements for majors in both areas. For more details, contact
the Graduate School.

**Graduate Certificate**

A graduate certificate program is a structured progression of graduate-
level courses that constitute a coherent body of study with a specific
defined focus within a single discipline or a logical combination of
disciplines. It is designed for a student who has completed a
baccalaureate degree and is in pursuit of advanced-level learning.
Graduate certificates reflect the educational mission of the university.

**Transfer Credit**

Internal transfer credits are credits from courses completed at Oregon
State University prior to full admission to the certificate or degree to
which they will be applied; internal transfer credits may be earned in non-
degree graduate status, undergraduate or post baccalaureate status, in
the Accelerated Masters’ Program, or while the student is enrolled in a
different certificate or degree other than the one to which the student
wants to apply these credits.

Credits from graduate course work completed at institutions other than
OSU are considered for use on OSU credentials as external transfer
credit.

**Students may only transfer course credits from regionally accredited
institutions (or equivalently recognized institutions outside the U.S.).**

Students who wish to transfer graduate credits from other schools must
provide transcripts for courses already completed to the Graduate School
prior to the submission of a study program. Undergraduate students
at OSU may receive credit for graduate courses (500 and 600 level) in
excess of the requirements for a baccalaureate degree. Graduate courses
taken at OSU while the student was a non-degree graduate student,
a post-baccalaureate student, a professional degree-seeking student
(PharmD or DVM), or an undergraduate student, are considered transfer
courses.

Courses to be transferred must be graduate level. It is the responsibility
of the student wishing to transfer the course to provide the necessary
documentation to satisfy the OSU guidelines.

All courses on a program of study require final approval by the student’s
program of study committee and the Graduate School. Committees
are free to deny inclusion of any course if they believe that the earned
grade is not sufficient; the course is not appropriate, sufficiently current,
sufficiently rigorous based on syllabus content; or for any other reason.
To be considered for inclusion on a graduate program of study, OSU
courses whether taken as either an enrolled graduate student or pre-
graduate admission, must have an earned grade of C or better. To be
considered for inclusion on a graduate program of study, courses from
another institution (transfer courses) must have an earned grade of B
minus or better.

If the transfer credit is from a foreign university, the student must
provide copies of the original transcript and an English translation of the
transcript, with the courses to be transferred clearly indicated. Grades
and credits for the courses must be clearly identified. In some countries,
the first university degree, which OSU considers to be equivalent to a
baccalaureate degree, may take five years or more to complete. All of
the course work toward such a degree is considered a requirement for
the first university degree, and hence none of it can be transferred to a
graduate certificate or graduate degree at OSU.

Students may not transfer courses graded on a nonstandard basis (e.g.,
Pass/No Pass, Credit/No Credit, Satisfactory/Unsatisfactory) to their
graduate certificate or degree programs unless it can be verified from the
registrar of the university offering the course that the grade is equivalent
to a B minus or better.

Graduate courses to be transferred from another institution to an OSU
master’s degree must not have been used to satisfy the requirements for
a bachelor’s degree, master’s degree (or equivalent) or a doctoral degree.

Graduate courses to be transferred from an OSU master’s degree to a
second OSU master’s degree must meet the following three requirements:

1. Credits used to satisfy the residency requirements of one master’s
degree may not be used to satisfy the residency requirements of
another master’s degree.
2. Students who earn two master’s degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.

3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of C or higher. Up to 22 graduate credits may be transferred toward a 45-credit master’s degree. Up to 9 graduate credits may be transferred toward an 18-credit graduate certificate.

Graduate courses to be transferred to a doctoral degree program can be courses that were used to satisfy the graduate course requirements for a graduate certificate or a master’s degree (or equivalent). Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee. There is no limit on transfer credit toward the doctoral degree as long as the doctoral residence requirement is satisfied.

Credits earned in fulfillment of a graduate certificate program may be applied to a graduate degree, so long as they meet the appropriate standards for use in the degree and the criteria to transfer credit as defined herein. Courses completed for a degree program may likewise be applied toward a certificate program, so long as they meet the appropriate standards for use in the certificate and the criteria to transfer credit as defined herein.

**Preparation Required for Graduate Major**

Preparation for a graduate major is ordinarily an undergraduate major in the same subject, or a fair equivalent. Preparation for a graduate minor is ordinarily at least one year of upper-division work in addition to foundation courses in the subject.

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, such as practicum courses and internships. The university may find it necessary to evaluate a person’s background to determine his or her likelihood of maintaining standards of professional conduct necessary in the academic discipline or profession. An evaluation may consider current performance as well as past experiences and actions that could affect a student’s ability to perform in the particular course or program.

**Qualifying Examinations**

Some departments and programs require graduate students working for advanced degrees to take oral and/or written examinations in their major and minor fields to determine overall preparation and background. The examination serves as a guidance examination, the results of which are used in setting up the graduate study program. The examination usually is taken during the first quarter of graduate enrollment.

In lieu of their own qualifying examination, departments and programs may accept a satisfactory showing in the Graduate Record Examination (GRE), or some other standardized test. Check with the anticipated major department or program to find out which exams are appropriate.

**Registration Requirements**

**Introduction**

Full-time status as a graduate student is defined by Oregon State University as enrollment in 9 credits per term. The maximum load for a full-time graduate student is 16 credits. A student may exceed this limit only with the approval of the Graduate School. Students receiving approval to exceed 16 credits will be assessed a per-credit overload fee.

Full-time status (i.e., a minimum of 9 credits per term) may not be sufficient to qualify for purposes of veterans’ benefits, visa requirements, external fellowships, or federal financial aid.

Federal regulations require that enrollment statuses are defined for short-term courses for the purpose of distributing VA education benefits. Enrollment statuses in short-term classes (e.g., short-term summer term classes) for this purpose are defined per the table below.

To assure full compliance with visa regulations, international students must consult with the Office of International Services (http://international.oregonstate.edu/ois/) (OIS) for additional information about registration requirements.

**Continuous Enrollment**

1. **Minimum Registration**

Unless on approved leave of absence (see Section 2), all graduate students in graduate degree programs must register continuously for a minimum of 3 graduate credits until their degree is granted or until their status as a credential-seeking graduate student is terminated. This includes students who are taking only preliminary comprehensive or final examinations or presenting terminal projects. Students must register for a minimum of 3 graduate credits and pay fees if they will be using university resources (e.g., facilities, equipment, computing and library services, or faculty or staff time) during any given term, regardless of the student’s location. If degree requirements are completed between terms, the student must have been registered during the preceding term.

Graduate students who have successfully completed all course and non-course requirements in accordance with diploma deadlines are not required to register during the subsequent term. Visit the Graduate School website for a list of deadlines.

Nonthesis master's degree students who complete all degree requirements during a term for which they are registered should not register for the subsequent term.

Doctoral and thesis master's students who fail to meet all deadlines and complete all course and non-course requirements during the term will be required to register for a minimum of 3 graduate credits during the subsequent term. However, only if library copies of the thesis have been submitted to the Graduate School within the first two weeks of the subsequent term and the thesis is the only outstanding requirement remaining for certification of the student's graduate degree may an exception to this rule be considered.
Graduate students who use facilities or faculty/staff time during summer session to engage in academic or research activities in support of their thesis/pursuit of degree are required to register for a minimum of 3 credits during the summer session. Graduate students who use facilities or faculty/staff time during summer session purely in service to the university and not to engage in academic or research activities in support of their thesis/pursuit of degree are not required to register during the summer session.

Graduate students do not need to submit a Leave of Absence form if they do not enroll in summer term.

It should be noted that graduate assistantship eligibility requires enrollment levels that supersede those contained in this continuous enrollment policy. Various agencies and offices maintain their own registration requirements that also may exceed those specified by this continuous enrollment policy (e.g., those of the Veterans Administration, Immigration and Naturalization Service for international students, and those required for federal financial aid programs.) Therefore, it is the student’s responsibility to register for the appropriate number of credits that may be required for funding eligibility and/or compliance as outlined by specific agency regulations under which they are governed.

2. ** Leave of Absence **

On-leave status is available to students who need to suspend their program of study for good cause. Students who desire a leave of absence will work with their major professor, program administrator, and the Graduate School to arrange authorized leave. Students understand that while on leave they will not use university resources. Graduate faculty members are students’ most important resource at the university and will work closely with graduate students to ensure timely completion of academic goals, understanding of the continuous graduate enrollment policy, and that graduate students enroll each term other than when they are on authorized leave. The Graduate School will assist graduate students and graduate faculty members with administrative procedures related to the continuous graduate enrollment policy. The Graduate School recognizes the diverse circumstances and unpredictability of graduate students’ lives and will work in partnership with the graduate community in arranging leaves and responding to unanticipated situations.

A graduate student intending to resume active graduate student status following interruption of his or her study program for one or more terms, excluding summer session, must apply for leave of absence to maintain graduate student standing in his or her degree program. (See Section IV below). The Leave of Absence (https://gradschool.oregonstate.edu/forms/) form must be received by the Graduate School at least 15 working days prior to the first day of the term involved. The time the student spends in approved on-leave status will be included in any time limits relevant to the degree (See Sections C.1. and C.2. below). Students in on-leave status may not a) use any university facilities, b) make demands upon faculty time, c) receive a fellowship or financial aid, or d) take course work of any kind at Oregon State University.

a. ** Eligibility **

Only graduate students in good standing are eligible for leave of absence.

**Leave of Absence Categories**

i. **Regular.** Regular leave of absence is granted on a term-by-term basis in cases where the student demonstrates good cause (e.g., illness, temporary departure from the university for employment, family issues, financial need, personal circumstances). Students who request a leave of absence must:

1. be in good standing,
2. submit the Leave of Absence form (https://gradschool.oregonstate.edu/forms/#resume) indicating each term for which leave is requested, and
3. complete all degree requirements within the time limits established in this catalog.

ii. **Family and Medical Leave.** This leave is different from regular leave in that it is for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. Find the Family and Medical Leave policy. (https://gradschool.oregonstate.edu/forms/#resume)

b. **Limits**

i. **Regular Leave of Absence** is granted for a specified time period that may not exceed three terms, excluding summer session.

ii. Time spent in on-leave status will be included in all time limits pertaining to the student’s degree program.

iii. Students who matriculate fall term 2016 or later may use unlimited leaves as long as time to degree constraints are met (7 years for master’s degrees and graduate certificates; 9 years for doctoral degrees). Leaves of absence may be approved for up to three terms at a time, but must be renewed to retain student status. Failure to renew the leave of absence or register will result in the loss of student status.

iv. **Family and Medical Leave** is available for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. These absences will not be included in time limits pertaining to the student’s degree program. Contact the Graduate School for additional details.

c. **Approval**

Approval of the major professor, department program chair, and graduate dean are required.

d. **Student Fees**

Students with approved on-leave status are not required to pay tuition or fees. However, students who must register as per section I, ‘Minimum Registration,’ must pay both tuition and student fees.

3. **Unauthorized Break in Registration**

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain a leave of absence will relinquish his or her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to apply for readmission and pay the application fee. The readmission application must be approved by the student’s major professor, department school program chair, and graduate dean. Acceptance back into a graduate program is not guaranteed even if the student departed in good standing. The petitioner for readmission will be required to meet university and departmental admission requirements and degree completion requirements that are in effect on the date of readmission. Review of the Application for Graduate Readmission may also result in a change of residency status from resident to nonresident.

4. **Appeal**

In the case of extraordinarily extenuating circumstances, students may appeal the provisions of the continuous graduate enrollment
policy by submitting a detailed request in writing to the dean of the Graduate School.

Implementation of Continuous Enrollment Policy
All graduate students, excluding certificate-only students, including those enrolled prior to fall 2002, are subject to this policy.

All graduate students should be enrolled for a reasonable number of credits sufficient to represent their use of university space, facilities or faculty time.

Registration Requirements for Graduate Assistants
In addition to the above registration requirements, the following requirements apply to graduate teaching assistants (GTA) and graduate research assistants (GRA).

As a condition of their academic appointments, graduate teaching and research assistants are required to register for 3 credits above the minimum full-time load (i.e., a minimum of 12 credits) each term of the appointment during the academic year (fall, winter, and spring.) During summer session, a minimum registration of 3 credits is required for graduate assistants. Students are responsible for determining whether the minimum 3-credit summer registration fulfills their individual immigration, financial aid, tax liability or other specific needs. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy enrollment requirements for graduate assistant salary/stipend, tuition remission, salary supplement or health insurance benefits. Tuition charges associated with INTO OSU enrollment are not covered under graduate assistant tuition remission.

Grade Requirement
A grade-point average of 3.00 (a B average) is required: 1) for the cumulative GPA earned on all courses taken as a degree-seeking graduate student, and 2) for courses included in the graduate degree or graduate certificate program of study. In some cases, a graduate program may allow use of an OSU grade below a B but, grades below C (2.00) cannot be used on a graduate program of study. A grade-point average of 3.00 is required before the final oral or written exam may be undertaken. Enforced graduate-level prerequisite courses must be completed with a minimum grade of C.

Policy on Disallowance of Undergraduate Courses in the Calculation of the Final Graduate Student GPA
Calculation of the final cumulative GPA for graduation for a graduate student will include all 500-, 600- and certain 700-level courses determined to be eligible for use on a graduate program of study. Undergraduate (100 to 400 level) courses taken, even if taken while a graduate student, will not be used in the cumulative GPA calculation for graduation. A graduate student is required to attain a 3.0 GPA in all graduate-level course work, both cumulatively and on the program of study, for graduation.

Course Numbers
Graduate Courses
All graduate courses will be designed around well-defined objectives or student learning outcomes, and instructional opportunities should be designed to help students achieve these outcomes. Student learning outcomes encompass the range of student attributes and abilities that students should be able to demonstrate after successful completion of the course.

500-Level Courses
These courses are graduate courses offered primarily in support of graduate certificate or master's degree programs but which are also available for use on doctoral level degree programs. Undergraduates of superior scholastic achievement may be admitted to these courses on the approval of the instructor, and they may, if admitted, under some conditions, use a limited number of these courses toward a graduate certificate or a graduate degree program. These courses have one or more of the following characteristics:

1. They require upper-division prerequisites in the discipline.
2. They require an extensive theoretical base in the discipline.
3. They increase or re-examine the existing knowledge or database of the discipline.
4. They present core components or important peripheral components of the discipline at an advanced level.

600-Level Courses
These are graduate courses offered principally in support of doctoral level instructional programs but also are available for use on graduate certificate or master's level degree programs. In addition to exhibiting the characteristics of 500-level courses, these courses typically require 500-level prerequisites and they build on and increase the information presented in 500-level courses.

700-Level Courses
These are advanced professional or technical courses that may be applied toward a first professional degree (e.g., DVM, PharmD). They make up the bulk of the course work for these professional degree programs. In general, these courses are not considered graduate-level courses, and may not be applied toward graduate certificate, master's level or doctoral level (PhD or EdD) degree programs. However, selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student's graduate committee and the Graduate School.

800-Level Courses
These courses are in-service courses aimed at practicing professionals in the discipline. These courses have an in-service or retraining focus, and provide the professionals new ways to examine existing situations or new tools to treat existing problems. These courses generally have none of the characteristics of 500-level courses. They are not graduate-level courses, and they may not be applied to graduate certificate or graduate degree programs nor to professional degree programs.

Blanket-Numbered Courses
Blanket-numbered courses have a zero middle digit. Those that carry graduate credit may be repeated up to the maximum totals indicated below.

- Research (501 or 601) is for research that is not part of the thesis. Data obtained from such research should not be incorporated into the thesis.
- Thesis (503 or 603) covers the thesis research and writing. A student may register for thesis credit each term.
- Reading and Conference (505 or 605) and Projects (506 or 606) are used for special work not given under a formal course number.
- Seminar (507 or 607) is used both for departmental seminars and for special group work not given in a formal course.
- Workshop (508 or 608) is usually a special, short-term course covering a variety of topics.
Remote Access for Graduate Committee Meetings

It is generally expected that all members of graduate committees should be physically present at all required graduate committee meetings (i.e., program meetings, preliminary examinations, and final examinations). However, it is permissible for the student, and/or committee members to participate from a remote location provided the conditions listed below are met:

1. Advance agreement of the student and all committee members has been obtained;
2. All participants join in with two-way audio and video connections; audio-only connections must be approved by the major professor if the video connection is not possible. When the student is the remote participant, his or her connection must be an audio and video connection;
3. Any visual aids or other materials have been distributed in advance to the remote participants;
4. The committee members participate in the complete meeting, discussion, presentation, and evaluation; and
5. The student is responsible for making arrangements.

Petitions

A student wishing to deviate from normal Graduate School regulations and procedures may submit a request and the reasons for it to the Graduate School in a letter signed by the student and his or her major professor. In reaching a decision, the Graduate School may seek advice from the Graduate Council. The student will be advised of the decision when it has been made. Action taken on a petition will not be considered precedent for future action.

Diploma Application

Graduate students wishing a printed diploma must complete a Diploma Application form (https://gradschool.oregonstate.edu/forms/). This form should be submitted prior to taking the final examination, indicating the term the student intends to graduate. Participation in Commencement ceremonies requires earlier submission of this form.

Institutional Review Board Approval of Human Subjects Research

It is Oregon State University policy that the OSU Institutional Review Board (IRB) must review all research that involves human subjects. The results from studies conducted without obtaining IRB review and approval may not be published or widely distributed, nor can such data be used to satisfy master’s thesis or doctoral dissertation requirements.

The requirements for IRB review of research involving human subjects is based upon research ethics and federal law, and the implications of conducting human subjects research without IRB approval are significant. Failure to follow this policy places both the individual and the institution at risk: the individual may be subject to university sanctions and/or incur personal liability for negligence and harm; the university could lose access to federal funding or be forced to cease all human subjects research. For more information, please send an email to irb@oregonstate.edu or visit the IRB website. (https://research.oregonstate.edu/irb/)

Institutional Animal Care and Use Committee IACUC

The Oregon State University Institutional Animal Care and Use Committee (IACUC) (http://research.oregonstate.edu/iacuc/) requires prior review and approval for all live vertebrate animal use in research, teaching, testing, per the IACUC Scope of Work Policy (http://research.oregonstate.edu/iacuc/policies-guidelines/). An eligible principal investigator must be identified in order to submit an ACUP to the committee, per PI Eligibility Policy, (https://research.oregonstate.edu/iacuc/policies-guidelines/) Review leading to approval is accomplished via submission of an Animal Care and Use Protocol form (ACUP (http://research.oregonstate.edu/iacuc/iacuc-forms/)) to the IACUC.

The requirements for IACUC review are based on the ethics of animal use, and our assurances to agencies that provide federal oversight, funding, and program accreditation. Implications regarding conduct of animal research without IACUC approval and oversight are significant. Failure to secure and maintain approval can result in the student’s inability to continue research or publish data. In addition, OSU could lose accreditation, lose access to funding and/or be required to pay significant fines. Please contact APOffice@oregonstate.edu for more information.
OSU Scientific Diving and Scientific Boating
Student who work underwater or on a boat are required to meet standards set by the Research Office. For more information please visit the boating (https://research.oregonstate.edu/boating/) or diving (https://research.oregonstate.edu/diving/) websites.

Graduate Work by Faculty Members
The Faculty as Student policy specifies that one may not simultaneously be an Oregon State University faculty member and an OSU graduate student. This policy pertains to all OSU faculty members (both ranked and professional), is consistent with practices at most universities, and is in keeping with recognized appropriate graduate education practice.

Although faculty members are eligible to enroll for courses at staff fee rates, such course work may not be applied to a graduate certificate or graduate degree without prior approval from the graduate dean.

Graduate Student Teaching
Appointment as Instructor of Record. For a graduate student to be appointed as the Instructor of Record for a graduate course (including the 500-level component of a slash course):

- The unit/program of employment must be separate and distinct from the unit/program of enrollment.
- The instructor must be appointed to the graduate faculty based on their academic/professional qualification by the unit/program of employment.
- In the event that graduate students from the instructor’s unit/program of enrollment are enrolled in the course, alternative arrangements must be made for evaluating the work of those graduate students.

Appointment as Teaching Assistant. For a graduate student to be appointed as the Teaching Assistant for a graduate course (including the 500-level component of a slash course), the Director of the Graduate Program must ensure that potential conflicts of interest are avoided to the maximum extent possible. This may include:

- Making alternative arrangements to evaluate the work of graduate students from the same unit/program as the Teaching Assistant, OR
- Ensuring that the Teaching Assistant has advanced to candidacy status (after prelims) and all graduate students in the class have not advanced to candidacy

If neither of these criteria are met, the program must have a conflict of interest plan approved by the Graduate School.

Graduate Appointments
Graduate assistants are represented by the Coalition of Graduate Employees, American Federation of Teachers Local 6069 (CGE). Terms and conditions of employment for service not performed as a requirement for their degrees are prescribed in the collective bargaining agreement (http://hr.oregonstate.edu/policies-procedures/administrators/graduate-employee-cge-contract-resources/) between OSU, and CGE.

Persons interested in assistantships should write directly to the department or program concerned.

To qualify for appointment as a graduate assistant the student must:

1. Be a regularly admitted, conditionally admitted, or provisionally admitted graduate student at Oregon State University (i.e., not a graduate nondegree-seeking, post-baccalaureate student, Accelerated Master’s Platform (AMP) student, or PharmD or DVM student).
2. Be enrolled as a full-time degree-seeking graduate student at Oregon State University, completing a minimum of 12 credits of instruction each term (3 credits during summer session). Audit registrations, course withdrawals, and enrollment in INTO OSU may not be used to satisfy these minimum enrollment requirements.
3. Be making satisfactory progress toward an advanced degree.

Graduate assistants may be appointed on an academic term basis, an academic-year basis (nine months) or a full-year basis (12 months). No appointment can be for less than .30 FTE or more than .49 FTE per term.

Teaching assistants are expected to provide duties related to the university’s instructional program (e.g., teaching laboratories or discussion sections, grading papers, advising). Research assistants provide duties related to the research function of the university.

The work schedule and the duties to be performed by the graduate assistant shall be established by the department or program sponsoring the assistantship.

Graduate assistants must register for and complete a minimum of 12 credits each term except during summer session, when a minimum of 3 credits is required. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy these minimum enrollment requirements. (See section on ‘Registration Requirements for Graduate Assistants’ for complete details.)

Persons interested in assistantships should write directly to the department or program concerned.

International Graduate Teaching Assistant English Language Requirement
If the Graduate School determines that an applicant or current student’s native language is not English, the proposed IGTA is required to take the Internet Based TOEFL (iBT) test before being appointed as a graduate teaching assistant.

Potential IGTA scores below 22 on the speaking section of the iBT can be appointed, but will be required to undertake further English language training.

If a department wishes to offer a student with an iBT speaking score of 18 to 21 an assistantship, the unit must:

1. Affirm that the graduate student will be enrolled in IEPA 098NC Communication for IGTA with the unit paying the cost of this training.
2. If at all possible, assign the graduate student assignments (such as paper grading, reagent preparation, etc.) that do not require personal contact with undergraduate students.
3. If (b) above is not possible, and if possible, pair the IGTA in the laboratory or classroom with another TA who is a native speaker of English.
4. Monitor the quality of IGTA performance using student evaluations and the evaluations of the supervising professors. The unit will document for each student the results of their evaluation of the student’s performance as a GTA.
If the unit agrees to meet these conditions, the IGTA appointment can be made.

The scheduling of IEPA 098NC will be coordinated with the units so that students can attend the course and conduct teaching assistantship duties. Please check the online schedule of classes (https://classes.oregonstate.edu/) for confirmation of the time and date.

Students with an iBT speaking score of less than 18 cannot be assigned teaching assistantships.

Students Who Fail to Find a Major Advisor

There are times when students are making satisfactory academic progress, but are unable to complete graduate studies with their initial major professor. Oregon State University has an ethical responsibility to assist such students in identifying a new major professor. The Graduate Council and Faculty Senate policy for establishing major advisors and committees for students in this situation provides guidance and can be obtained by contacting the Graduate School.

Dismissal from Graduate School

Advanced-degree students (regularly, conditionally, and provisionally admitted) are expected to make satisfactory progress toward an academic degree. This includes maintaining a GPA of 3.00 or better for all courses taken as a graduate student and for courses included in the graduate program, meeting departmental or program requirements, and participating in a creative activity such as a thesis.

If a student is failing to make satisfactory progress toward an academic degree, as determined by the major department/program or the Graduate School, the student may be dismissed from the Graduate School.

Any doctoral student who fails the preliminary oral examination with a committee recommendation that the student’s work toward this degree be terminated may be dismissed from the Graduate School.

Any student who fails a final oral examination may be dismissed from the Graduate School.

Academic dishonesty and other violations of the Student Conduct Code (https://studentlife.oregonstate.edu/studentconduct/) may serve as grounds for dismissal from the Graduate School.

Student Conduct Regulations

Graduate students enrolled at Oregon State University are expected to conform to basic regulations and policies developed to govern the behavior of students as members of the university community. The regulations have been formulated by the Student Conduct Committee, the Student Activities Committee, the university administration, and the State Board of Higher Education. Violations of the regulations subject a student to appropriate disciplinary or judicial action. The regulations and the procedures for disciplinary action and appeal are available via the Office of Student Conduct and Community Standards website. (https://studentlife.oregonstate.edu/studentconduct/)

Grievance Procedure

All students desiring to appeal matters relating to their graduate education should request a copy of Grievance Procedures for Graduate Students at Oregon State University (https://gradschool.oregonstate.edu/progress/grievance-procedures/) from the Graduate School. Graduate assistants whose terms and conditions of employment are prescribed by the collective bargaining agreement between OSU and the Coalition of Graduate Employees, American Federation of Teachers Local 6069, should also refer to that document.

Policies Governing Graduate Certificate Programs

General Requirements

The Graduate Certificate Program at Oregon State University is a structured progression of graduate-level courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university. Students desiring a graduate certificate must be admitted to the university as a credential-seeking graduate student. There is no formal committee requirement for graduate certificates. Certificate students are subject to all general policies governing the courses for the master’s degree, unless specified within the Graduate Catalog.

Graduate Certificate Study Program

The graduate certificate curriculum consists of a minimum of 18 graduate credits, and may include a final project, portfolio, or report for integration of the sequence of course materials. All graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone credits. The remaining credits may be the 500 component of 400/500 slash courses. No final examination is required.

Time Limits

Courses completed no more than seven years prior to the graduate certificate award may be used to satisfy certificate requirements. Students enrolled in certificates without concurrent enrollment in a graduate degree program are not subject to the continuous enrollment policy during the time allowed for certificate completion.

Financial Aid Eligibility

Students enrolled in only graduate certificate programs may qualify for federal loan and work-study financial aid. Students must complete the federal FAFSA form to begin the financial aid application process.

Transfer Credit

If all other requirements for transfer course eligibility are met,

1. Up to 9 quarter credits maybe transferred into an OSU Certificate Program.
2. No more than half of the credits used for a certificate program may be counted in any other certificate program.
3. Capstone courses (whether numbered as blanket or not) can be counted toward capstone credits only once. Credits from capstone courses may be transferred into any other certificate or graduate program but would not count toward a capstone requirement.

Policies Governing Master’s Degree Programs

General Requirements

All master’s degree programs require a minimum of 45 graduate credits including thesis (6 to 12 credits), research-in-lieu-of-thesis (3 to 6 credits), or an integrative capstone experience (3 to 6 credits). Exceptions to this capstone requirement are specified under the degree descriptions
that follow these universal master’s degree requirements. All graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses. General regulations for all master’s programs are cited here, with certain exceptions provided for master’s degrees in the professional areas listed on the following pages.

All master’s students must:

1. Conduct research, produce some other form of creative work, or participate in an integrative capstone experience; and
2. Demonstrate mastery of subject material; and
3. Be able to conduct scholarly or professional activities in an ethical manner

The assessment of these outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

Residence Requirements

Beginning with fall 2020 the academic residence requirement for the master’s degree is 23 graduate Oregon State University credits after admission as a degree-seeking graduate student. A minimum of 23 resident credits are required on a master’s program. Thus, up to 22 credits taken at Oregon State University or elsewhere prior to acceptance into a 45-credit master’s program, may transfer into the master’s program. (This does not include graduate credits taken as an undergraduate, post-baccalaureate, graduate certificate or graduate nondegree seeking student, nor transfer courses.)

Language Requirements

For the master of arts degree, the student must show foreign language proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of ‘C’ (2.00) or better. English is not considered a foreign language for purposes of this requirement. There is no language requirement for the Master of Arts in Interdisciplinary Studies degree. For other master’s degrees, there is no foreign language requirement unless a language is required in the individual student’s program. A student must be enrolled to complete their foreign language requirement before they take the final oral examination for the degree.

Graduate Program of Study

A regular master’s degree student must complete a program of study in consultation with an advisor/advisory committee before completing 18 graduate credits. This includes credits earned as a post-baccalaureate, graduate nondegree-seeking student, or graduate student.

Students who wish to transfer credit to OSU must submit a Transfer Credit Request form (https://gradschool.oregonstate.edu/forms/) before they submit their program of study.

The final program of study must be submitted to the Graduate School at least 15 weeks prior to the date of the student’s final examination.

Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

If a minor is declared, approximately two-thirds of the work (30 graduate credits) should be listed in the major field and one-third (a minimum of 15 graduate credits) in the minor field. In such cases, the student’s advisory committee must include a member from the minor department.

The program is developed under the guidance of the major professor, and minor professor when a minor is included, and signed by those professors and the chair of the academic unit before filing in the Graduate School. Each candidate’s program should include substantial work with at least three faculty members offering graduate instruction. Changes in the program may be made by submitting a Petition for Change in Program form (https://gradschool.oregonstate.edu/forms/).

Time Limit

All work toward a master’s degree, including transferred credits, coursework, thesis (if required), and all examinations, must be completed within seven years. Time in which the student is on a leave of absence is included in the seven year limit with the exception of approved Family Medical leaves.

Thesis

When scheduling their final oral examinations, thesis option master’s students are required to submit the pretext pages of their thesis to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright, title page, acknowledgment page, approval page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies to all their committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student’s final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, students must upload one PDF copy of the thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are completed after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School’s thesis guide (https://gradschool.oregonstate.edu/progress/thesis-guide/) for complete details.

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master’s thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website. (https://research.oregonstate.edu/irb/)

The credit allowed for the thesis, including research and preparation of the manuscript, varies from 6 to 12 credits. In certain departments and programs, the M.S. or M.A. thesis is optional, to be determined in each case by the department/school/program and the major professor. See departmental descriptions.
Final Examination

Successful completion of a final oral examination is required for all master’s degrees with the exception of the following graduate programs:

- EdM students who complete the nonthesis option must take a final written examination.
- MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes.
- MCoun students admitted to the degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery of the MCoun learning outcomes.
- MCoun students admitted to the program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty.
- MEng students in most majors may complete degree requirements by successfully completing a portfolio course and earning a passing grade on a portfolio in lieu of a final oral examination.
- MPH students must complete final assessments or oral examinations based upon the academic option in which they are enrolled.

Some departments also require the student to pass a written exam prior to the oral exam.

The final oral examination for master’s candidates may, at the discretion of the graduate program, consist of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

For master’s candidates whose programs require a thesis, not more than half of the examination period should be devoted to the presentation and defense of the thesis; the remaining time can be spent on questions relating to the student’s knowledge of the major field, and minor field if a minor is included in the program of study. Graduate faculty serving on thesis-oriented master’s degree programs may contribute to the direction of the student’s thesis, will assess the student’s thesis and his or her defense of it in the final oral examination, will vote to pass or fail the student, and may sign the thesis when it is in acceptable final form. The examining committee consists of at least four members of the graduate faculty—two in the major field, one in the minor field if a minor is included, and a Graduate Council representative. When a minor is not included, the fourth member may be from the graduate faculty at large. All members of the student’s graduate committee must approve the scheduling of the final examination.

Students writing a thesis must have a Graduate Council representative on their committee. It is the student’s responsibility to obtain his or her own Graduate Council representative from a list provided by the Graduate School. This must be done prior to scheduling the final exam.

When no thesis is involved, not more than half of the examination period should be devoted to the presentation of the research project; the remaining time can be spent on questions relating to the student’s knowledge of the major field, and minor field if one is included in the program. For nonthesis master’s degree programs, the major professor is responsible for directing and assigning a final grade for the research or culminating project. Other members of the nonthesis committee will assess the student’s defense of the project in the final oral examination, as well as the student’s knowledge of his or her field, and vote to pass or fail the student. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-

examinations. The examining committee consists of three members of the graduate faculty—two in the major field and one in the minor field if a minor is included. When a minor is not included, the third member may be from the graduate faculty at large.

Policies Governing Doctoral Degree Programs

General Requirements

The doctor of philosophy degree is granted primarily for creative attainments. There is no rigid credit requirement; however, the equivalent of at least three years of full-time graduate work beyond the bachelor’s degree (at least 108 graduate credits) is required. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

After admission into the doctoral program, a minimum of one full-time academic year (at least 36 graduate credits) should be devoted to the preparation of the thesis. A minimum of 27 regular non-blanket credits must be included on a doctoral program.

By completing the requirements necessary for the PhD, students shall: (a) produce and defend an original significant contribution to knowledge; (b) demonstrate mastery of subject material; and (c) be able to conduct scholarly activities in an ethical manner. Additional program specific learning outcomes, the assessment of all outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

Graduate Program of Study

The student’s doctoral program of study is formulated and approved subject to departmental policies at a formal meeting of his or her doctoral committee. The committee is comprised of a minimum of five members of the graduate faculty, including two from the major department and a representative of the Graduate Council. If a minor is declared, it must consist of at least 18 credits (15 credits for an integrated minor) and the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student’s committee.

Doctoral students must complete the program of study in consultation with their advisory committee. This signed plan must be submitted to the Graduate School by the end of the fifth term of study.

The student must be registered for a minimum of 3 credits for the term in which the program meeting is held. When the program is approved by the doctoral committee, the departmental chair, and the dean of the Graduate School, it becomes the obligation of the student to complete the requirements as formulated. Changes in the program may be made by submitting a Petition for Change of Program form (https://gradschool.oregonstate.edu/forms/) available in the Graduate School.

Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student’s graduate committee.

No more than 15 credits of blanket-numbered courses, other than thesis, may be included in the minimum 108-credit program.
Students who wish to transfer credit must submit a Transfer Credit Request form (https://gradschool.oregonstate.edu/forms/) before submitting their program of study to the Graduate School.

**Time Limit**

Effective beginning with students matriculating fall term 2016, all work toward a doctoral degree, including course work, thesis (if required), and all examinations, must be completed within nine years of the indicated start term on the Departmental Action Form. Extensions of this time limit may be requested by submitting a petition to the Graduate School.

**Residence**

For the doctoral degree, the residence requirement consists of two parts:

1. a minimum of 36 graduate Oregon State University credits must be completed; and
2. the student must spend at least three terms of full-time graduate academic work (at least 9 credits per term) on campus or at an off-campus site approved by the Graduate School. The latter requirement of three terms of full-time enrollment does not have to take place in consecutive terms.

Adequate fulfillment of the residence requirement shall be determined by the Graduate School.

**Language Requirements**

The foreign language requirement is determined by the student’s doctoral committee, subject to the same approval required for the graduate study program, and is so designated in the official doctoral program. Foreign language requirements must be completed before the oral preliminary examination.

**Preliminary Examinations**

The student working toward a doctoral degree must pass a comprehensive preliminary examination. The purpose of this exam is to determine the student's understanding of their major and minor fields and also to assess the student's capability for research. Students must enroll for a minimum of 3 credits during terms in which they undertake departmental written or oral preliminary examinations.

**Written Comprehensive Examination**

Most programs require a written comprehensive examination to be taken before the oral preliminary examination. If a written examination is required, it must be completed prior to the oral preliminary examination. The content, length, timing, passing standard, and repeatability of this examination are at the discretion of the major department. The general rules and structure of this examination, however, must be provided in writing to all candidates for this examination and a current copy of these guidelines must be on file with the Graduate School. Copies of the written examination (questions and student's answers) must be available to all members of the student's doctoral committee at least one week prior to the oral preliminary examination.

**Oral Preliminary Examination**

The oral preliminary examination is taken near the completion of the student's course work. The oral examination is conducted by the student's doctoral committee, and should cover the student's knowledge in his or her major and minor subjects. The exam may cover the student's proposed research topic, although no more than one-half the time should be devoted to specific aspects of the proposal. The examination should be scheduled for at least two hours, and the exam date must be scheduled in the Graduate School at least two weeks in advance. If more than one negative vote is recorded by the examining committee, the candidate will have failed the oral examination. No more than two re-examinations are permitted by the Graduate School, although academic units may allow fewer re-examinations.

At least one complete academic term must elapse between the time of the preliminary oral examination and the final oral examination. If more than five years elapse between these two examinations, the candidate will be required to take another preliminary oral examination.

**Thesis**

Each candidate for the Ph.D. degree must submit a thesis embodying the results of research and giving evidence of originality and ability in independent investigation. The thesis must be a real contribution to knowledge based on the candidate's own investigation. It must show a mastery of the literature of the subject and be written in creditable literary form. The preparation of an acceptable thesis will require at least one full-time academic year. The Thesis Guide (https://gradschool.oregonstate.edu/progress/thesis-guide/) provides formatting rules and pretext pages.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master's thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website. (https://research.oregonstate.edu/irb/)

A formal thesis proposal meeting is recommended but not required by the Graduate School. It is required for some majors. This meeting should be held with the student’s doctoral committee prior to the start of any substantial doctoral thesis research.

When scheduling their final oral examinations, doctoral students are required to submit the pretext pages of their dissertations to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright (optional), title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies of their thesis to all committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student's final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, upload one PDF copy of your thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School’s thesis guide (https://gradschool.oregonstate.edu/progress/thesis-guide/) for complete details.

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

**Final Examination**

After completion of or while concurrently registered for all work required by the program, the student must pass a final doctoral examination that may be written in part but must include an oral examination. The final oral examination must be scheduled in the Graduate School office at least
two weeks prior to the date of the examination. All incomplete course work appearing on the program of study must be completed prior to scheduling the final oral examination.

The final oral examination consists of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

All members of the student’s graduate committee must approve the scheduling of the final examination.

It is expected that the thesis defense portion of the final oral exam be open to all interested persons and should be limited to one hour. After the open portion of the exam, the examining committee should exclude all other persons and continue with the examination of the candidate’s knowledge of his or her field and the evaluation of the candidate’s performance.

If the department favors a more elaborate presentation, it should be scheduled as a separate seminar. In any case, the time involved for the open presentation may not impinge upon time required for the examining committee to conduct appropriate, iterative oral inquiry with the candidate, to evaluate the candidate’s performance, and to deliberate fully within the time constraints of the scheduled oral examination.

The examining committee consists of the student’s doctoral committee and any additional members, including professors from other institutions, whom the major department may recommend. In the oral examination, the candidate is expected to defend the thesis and show a satisfactory knowledge of his or her field. If more than one negative vote is recorded by the examining committee, the candidate will have failed the examination. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-examinations.

The final oral examination must be taken within five years after the oral preliminary examination. If more than five years elapse, the candidate will be required to take another oral preliminary examination.

Leadership

The Graduate School oversees admission standards, and degree requirements; enforces current regulations; recommends changes in graduate policy to the Graduate Council; acts on petitions to deviate from existing regulations; and is responsible for the efficient and effective operation of the Graduate School.

- **Philip Mote**, *Vice Provost and Dean*, 541-737-1458
- **Steph Bemell**, *Associate Dean*, 541-737-9162
- **Rosemary Garagnani**, *Assistant Dean for Enrollment Management and Student Services*, 541-737-1465
- **Jessica Beck**, *Assistant Dean*, 541-737-8576
- **Nick Fleury**, *Director of Financial Support*, 541-737-0450
- **Karen Hanson**, *Director of Graduate Success*, 541-737-1464
- **John Henry**, *Director of Information Technology*, 541-737-7619
- **Lindsay Loebig**, *Director of Graduate Recruitment*, 541-737-2046
- **Kim LeMay**, *Executive Assistant to the Dean*, 541-737-1456
- **Maureen Childers**, *Assistant to the Associate Deans and Assistant to the Office of Postdoc Programs*, 541-737-2033

Mission

In partnership with the graduate faculty, the Graduate School plays a leadership and advocacy role to ensure that Oregon State attracts the best graduate students and delivers a compelling and high-quality graduate experience that prepares students to create new ideas and knowledge, to educate others, to make positive impacts on society, and to lead innovation.

Graduate Council

The Graduate Council guides the development and revision of policies, procedures and requirements related to graduate education, within the general authority granted by the State Board of Higher Education. The council establishes admission standards, basic degree requirements, and general policies; approves all graduate faculty members, new programs, and courses; and periodically reviews all existing graduate programs. Graduate Council members are appointed by the Executive Committee of the Faculty Senate, with each academic college having one representative. Major actions of the Graduate Council are referred to the Faculty Senate for review and approval.

Find current and past Graduate Council membership and information. (http://senate.oregonstate.edu/graduate-council/)

Graduate Faculty

Graduate faculty members are chosen from the university faculty based on their academic training, experience, demonstrated potential for scholarship, and evidence of their ability and competency to direct and supervise graduate students in the pursuit of advanced knowledge.

Each graduate faculty member is authorized to perform specific activities within a particular graduate program. The head and academic dean of each unit are responsible for nominating faculty members for these activities, subject to review and approval by the Graduate Council.

Academic Units

An academic unit is the administrative unit responsible for directing and managing a graduate major or minor field of study. An academic unit may be an academic program, department, school, or college, or composite of these. The chief administrative officer of the academic unit is responsible for managing the graduate programs in that unit and is responsible to the dean of the Graduate School for all graduate work performed by the unit.

Academic units have a major role in the success of graduate education. Within the general rules of the Graduate School, the academic units establish and teach courses, maintain a graduate faculty to teach and supervise research, establish their own admission standards and specific graduate certificate and degree requirements, make graduate student appointments, and provide advice and supervision for their graduate students.

Address

**Heckart Lodge**
2900 SW Jefferson Way
Oregon State University
Corvallis, OR 97331-2121
Phone: 541-737-4881
Fax: 541-737-3213
Website: https://gradschool.oregonstate.edu
**Graduate tuition and fees**

The official Graduate Tuition and Fee Schedule can be found on the OSU Business Affairs website. ([https://fa.oregonstate.edu/budget/tuition-fees/](https://fa.oregonstate.edu/budget/tuition-fees/)) Tuition and fees for the next year are usually finalized during the month of July prior to the academic year start.

**Residency**

For questions about what qualifies for Oregon residency status, please visit the Office of Admissions’ residency website. ([http://admissions.oregonstate.edu/residency/](http://admissions.oregonstate.edu/residency/))

**Graduate fellowships and scholarships**

A number of Oregon State University fellowships and scholarships are available to students for graduate study in various graduate programs at Oregon State. For a listing of many of these fellowships and scholarships, visit Scholar Dollars. ([https://scholarships.oregonstate.edu/scholardollars/](https://scholarships.oregonstate.edu/scholardollars/))

For more information about scholarships and fellowships in the database above, including application instructions, as well as additional opportunities, contact the individual program of interest.

Additionally, the Graduate School offers a number of fellowship and scholarship opportunities, many of which require nomination by the student’s academic unit. For information about these opportunities or general information about graduate student funding, please visit the Financing Your Education section ([https://gradschool.oregonstate.edu/finance/](https://gradschool.oregonstate.edu/finance/)) of our website.

**Graduate student assistantships and hourly employment**

Each year, Oregon State receives grants from federal and state agencies, public and private foundations, and business and industry to support institutional and individual projects. Funding is awarded to various units in academic colleges and to other research organizations on campus, including experiment stations, centers and institutes. Many of these grants include financial support for graduate students. Interested students should direct inquiries and applications to the unit concerned.

Graduate students may be employed as graduate teaching or graduate research assistants by units on campus. In addition to monthly stipends, graduate assistants appointed at .30 FTE or above are eligible for a tuition and fee subsidy plus health insurance. ([https://www.google.com/url?q=https://hr.oregonstate.edu/graduate-student-insurance-plans](https://www.google.com/url?q=https://hr.oregonstate.edu/graduate-student-insurance-plans)) Graduate assistants are represented by the Coalition of Graduate Employees (CGE) and covered by the Collective Bargaining Agreement. ([https://hr.oregonstate.edu/employees/administrators-supervisors/graduate-employee-cge-contract-resources/](https://hr.oregonstate.edu/employees/administrators-supervisors/graduate-employee-cge-contract-resources/))

In addition to graduate assistantships, graduate students may be hired for hourly student positions on campus. These appointments are not eligible for a tuition or fee subsidy.

The maximum combined appointment FTE for all jobs on campus is .49 FTE.

For more information on student employment, contact the academic unit of interest or the Office of Human Resources. ([https://hr.oregonstate.edu/](https://hr.oregonstate.edu/))
