Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, and ethics. Course readings concern what professional technical writers do and what theories govern their actions, bridging the gap between real-world problems and academic research. Organized with an eye towards future action and solving real-world writing and communication problems with empirical research, usability testing, and information design.

WR 575, RHETORICS OF RACE, 4 Credits
By exploring the interrelated concepts of race, racialization, and racism, Rhetorics of Race problematizes race as a taken-for-granted phenomenon. Through reading, writing, and discussion, class participants study racial formations as historically specific and analyze contemporary forms of racism in the US. Readings and discussion pay close attention to how rhetoric and discourse have the power to reproduce and challenge white supremacy and race-based oppressions. Emphasizing the intersectionality of oppression—that racism necessarily takes place at intersections with other forms of subordination including sexism, homophobia, ableism, etc.—Rhetorics of Race draws from Queer Black Feminism, Chican@ Feminism, and Critical Race Theory.

WR 585, CONTEMPORARY RHETORIC THEORY, 4 Credits
Familiarizes students with a range of theories that have significantly contributed to or influenced the field of modern and contemporary rhetorical research. The course examines scholars, concepts, and methodologies that are central to contemporary rhetorical theory, while touching on key critical theorists who, although may be considered outside the field of rhetoric studies, impact the ways in which language, persuasion, and communication are currently understood. From this work, students develop their own perspectives and generate evidence-based arguments concerning those same issues.

**Monthly Art Exhibitions**

The Art Area of the School of Arts and Communication, based in Fairbanks Hall, features monthly exhibitions by nationally and internationally recognized artists in the Fairbanks Gallery. The school is also the sponsor of the Visiting Artists and Scholars Lecture Series, which has brought in renowned artists including Philip Pearlstein, Ann Hamilton, Marina Abromovic, Bill Viola, and Do Ho Suh. In 1995, the school created the JumpstART (https://liberalarts.oregonstate.edu/sac/sac-academy/precollege-summer-programs/jumpstart/) Precollege Visual and Performing Arts Workshop held each summer for talented high school students in art, music and theater.

**Music**

The Music Area of the School of Arts and Communication offers programs leading to the Bachelor of Arts (BA) or Bachelor of Science (BS) degree, a variety of baccalaureate core courses for students with little or no background in music, and opportunities for qualified students to perform in bands, choirs, and the symphony orchestra. Students wishing a greater curricular choice may wish to combine music study with courses in another school or department in the College of Liberal Arts for a liberal studies major. The Music Area also offers minors in Music and Popular Music Studies.

The Music Area also teaches graduate courses in music education, literature and history, conducting, performance and special projects. Graduate students may pursue the Master of Arts in Teaching: Music Education (MAT) degree or the Master of Arts in Interdisciplinary Studies (MAIS) degree in a broad range of fields. OSU's graduate programs in music have been approved by Oregon's Teacher Standards and Practices Commission and the National Council for Accreditation of Teacher Education. Programs are available for individuals seeking both the initial and/or continuing license in music at all levels of authorization.

Performance instruction at the intermediate and advanced levels is available with instructor consent. Students should contact the school office for application procedures and fee schedules.

Auditions and interviews take place in February and March each year. Selection is based on musical and academic achievement.

The Sound Design Lab in Community Hall includes state-of-the-art digital recording and editing hardware and software and is open to all OSU students. Work-study students are available to help students learn how to use the facilities.

Career possibilities in music include teaching in the schools, private instruction, performing in orchestras or ensembles, music librarianship, arts management, music business, and recording engineering.

**New Media Communications**

The New Media Communications (NMC) Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees in Digital Communication Arts. There is also a minor in New Media Communications. Course work explores the storytelling capacity of contemporary media and technologies. When pursuing an NMC degree students acquire the skills they need to use today’s media effectively in sharing knowledge, imagination, and information. Students also learn to anticipate how future changes in the media are likely to influence their lives. In NMC courses, students explore how to make abstract concepts or hidden processes visible, how to anticipate people’s reactions to innovation, how to write professionally, how to recognize the influence of media, how to produce creative content in a variety of media formats, and much more.

A New Media Communications major prepares students for a lifetime of change and involvement in the digital world.

NMC courses are taught in multiple venues on campus including the Motion-Capture and Gaming labs, both currently located on the fourth floor of Strand Ag Hall.

Each year numerous New Media students participate in internships with on-campus organizations and off campus with local and regional companies. Selected students participate in the National Association
of Broadcasters annual convention and other regional and national organizations and events.

Speech Communication
The Communication Area of the School of Arts and Communication offers a major program leading to a Bachelor of Arts (BA) or Bachelor of Science (BS) degree. The degree examines both theoretical and practical aspects of human communication as a liberal art, as a social science, as background for further study, or as pre-professional experience. All students initially pursuing a Speech Communication major with an option in Communication take basic courses in public speaking, argumentation, and interpersonal communication. Further studies focus on areas such as rhetorical and communication theory, methods of criticism and research, and history. Students pursuing an option in Communication enhance the skills inherent in all human interactions, preparing themselves for a range of potential vocational pursuits, avocations, and graduate study. The area also offers a Communication minor.

The Communication Area is located in cottage-esque Shepard Hall on Campus Way. Communication Area students are active in Lambda Pi Eta, the National Communication Association’s honor society for four-year colleges and universities. Students from across the university also compete on the nationally-recognized OSU Forensics Team in individual events and debate. Faculty and graduate students participate regularly in national and regional conferences as well as area-sponsored colloquia on campus.

The Communication Area also takes part in the Master of Arts in Interdisciplinary Studies (MAIS), with many master’s students pursuing two areas of concentration within the area’s graduate curriculum.

Theatre Arts
The Theatre Arts Area offers a Bachelor of Arts (BA) or Bachelor of Science (BS) degree option in theatre within the Speech Communication major. The Theatre Arts option emphasizes a liberal arts approach to theatre history, practice, and production. All students pursuing the degree complete a core of classes designed to introduce them to fundamental elements of the art. The large remaining portion of the option is split between courses in history/theory/literature and those focusing on design/technical/performance matters. Students select specific classes within each disciplinary area to match their interests (performance, design, literature, etc.) while meeting key degree requirements. The result is a theatre education grounded in a liberal arts perspective and emphasizing a basic knowledge of all theatre elements. The area offers a similarly structured minor in Theatre Arts.

The Theatre Arts Area facilities are located in Withycombe Hall. The Main Stage Theatre seats approximately 250 in a modified-proscenium arrangement while the flexible Laboratory Theatre seats around 100. Both spaces function as classrooms as well as performance venues.

The University Theatre (UT) is the producing arm of the Theatre Arts Area. Students from across campus collaborate with UT faculty, staff, and guest artists to create theatre productions throughout the academic year and summer. Students from all colleges and departments across campus are encouraged and welcome to participate.

The Theatre Arts Area also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program.

Digital Communication Arts
Undergraduate Major (BA, BFA, BS, HBA, HBFA, HBS)

Also available via Ecampus (BA/BS only).

Students have the opportunity to focus their studies on a particular part of the discipline of New Media Communications.

BA/BS/HBA/HBS

The BA/BS/HBA/HBS of Digital Communication Arts studies the intersection of media and social life. Throughout history, new media have produced profound changes in human interaction. Family life, politics, commerce, religion, and the distribution of privileges have all been subject to fundamental revision in the wake of new technologies for communication. This provides students with a theoretical and practical understanding of the nature of these changes and prepares them to anticipate and manage inevitable future changes as the media landscape continues to evolve. This is particularly appropriate for students who seek careers in media research and criticism, graduate studies in media, work in media policy, and gain skills needed to manage media communications enterprises.

BFA

The BFA in Digital Communication Arts focuses on media production. The BFA is designed to provide a foundation in media aesthetics, story conceptualization and preproduction planning for linear and nonlinear/interactive projects, video production, sound design and 3D modeling and animation. Students are encouraged to explore their own creativity within a carefully constructed curriculum that serves as a basis for independent work and portfolio development. Faculty members include artists, videographers, editors and composers from professional production environments. A BFA can be earned by completing the Core Requirements, Foundation Course Work and the Production Specialty Requirements.

Major Code: 473

- Appraise the relative merits of media technologies on multiple grounds, including: their potential for individual creative expression; their potential to connect individuals to one another; their potential as investments their efficiency in pursuit of grounds 1-4; and their potential to promote community; their potential for collective human creative expression.
- Choose media appropriate to a given task.
- Evaluate & recommend public policy regarding media.
- Manage change in the media environment.
- Criticize media content using historic and emerging standards.
- Communicate effectively in a variety of media, such as digital animation, website design, video production, and writing.

The Digital Communication Arts major requires a 2.0 GPA for admittance and a 2.3 GPA for graduation. Students must receive a C– or better in all degree coursework. Classes for the major must be A–F grading and not S/U. Transfer students may apply a maximum of 12 credits of lower-division NMC credits toward a degree in Digital Communication Arts.
The Production Foundations Experience is a non-credit requirement that should be completed within the first two terms of declaring the major.

**BA/BS/HBA/HBS in Digital Communication Arts**

A BA/BS/HBA/HBS of Digital Communication Arts can be earned by completing the core requirements as well as the intermediate and advanced levels of study.

All students receiving a BA degree shall have proficiency in a second language, including American Sign Language (ASL), equivalent to that attained at the end of the second year sequence with a grade of C— or better as certified by the School of Language, Culture, and Society.

The BS degree is conferred for focused curricula that emphasize scientific ways of knowing and quantitative approaches to understanding in the sciences and the social sciences and for curricula in professional fields. Students satisfying BS degree requirements shall have completed additional math, science and computer science courses beyond the University Baccalaureate Core.

Both the BA and BS degrees require completion of the College of Liberal Arts Core.

The BA/BS major is 45-56 credits. A minimum of 180 credits are required to earn the degree.

- Music Production (p. 1119)

This program provides a music studies preparation for students interested in music applications outside of music education, pedagogy, and performance. It is also designed for those students interested in a double major, combining music skills and knowledge with other areas, such as engineering, business, biological sciences, pre-law, or other disciplines where music studies would augment their specific professional or graduate school pathway. The program provides core courses in music theory, and music history and culture, while allowing the student flexibility in choosing electives that most benefit their specific specialization and career goals. The degree includes one option in Music Production, a 24-credit program for students interested in music applications involving music technology, production, and recording and editing. Completion of the program will be possible from courses offered at the Corvallis campus, although some online courses may be used to satisfy requirements.

Major Code: 950

A grade of C– or better is required for all courses used to complete music major requirements. These courses cannot be taken with S/U grading.

Transfer students must demonstrate competency in the areas of music history, music theory, aural skills, and piano skills. Placement examinations in each of these areas must be completed by Wednesday of the first week of classes.

New Media Communications Minor

New Media Communications (NMC) minor focuses on mediated storytelling and the new media technology that makes it possible. This focus within the broader discipline of mediated communications capitalizes on the historic strengths of Oregon State University. NMC takes an innovative approach to the study of mediated communications. New Media Communications is devoted to the study of mediated communications and its impact on culture, technology and society.

Courses in the New Media Communications minor are designed to prepare students for a variety of careers in media and allied fields in which knowledge of and skills in mediated communications are an integral part of professional activity. Photography Minor

The Photography minor creates an opportunity for non-Photography majors to study and practice photography, digital imaging and collaborative digital arts practices. Through the study of a diverse range of photographic genres and techniques, students actively practice photography, develop critical-thinking skills, study the histories of photography and key photographic practitioners, have the option to experience other time-based media genres, and further their photography skills by creating professional-level projects.

The role of photography to improve creative thinking skills is invaluable for students studying in other fields where the role of creativity as an aspect of inventiveness and independent project generation is encouraged. Furthermore, a photography minor is an ideal companion to students majoring in the design fields or in Digital Communication Arts students in these areas already share several courses in common with art/photography students.

To qualify as a Photography minor, students must declare the minor when filing the application for graduation, and must have 27 credits in photography and art history, at least 12 of which must be upper division. For further information, please contact the academic advisor.

#### School of History, Philosophy, and Religion

**History**

The School of History, Philosophy, and Religion offers a BA or BS degree in History. Courses provide fundamental background for the social sciences and humanities and are of special value to students of government, education, law, science, journalism, and business. History majors go on to careers in teaching and many jobs benefiting from a liberal arts background.

BA candidates must have proficiency at the second-year college level of a foreign language.

The school also offers a minor program for undergraduates with majors in other fields.

**Philosophy**

The School of History, Philosophy, and Religion offers a BA or BS degree in Philosophy, a Philosophy minor, an undergraduate and postbaccalaureate certificate in Applied Ethics, an MA or MS in Applied Ethics, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) program with a focus on applied ethics and other areas of philosophy. The school's Program for Ethics, Science, and the Environment (PESE) supports multidisciplinary education and scholarship on ethical and policy issues that are raised by advances in scientific knowledge, biotechnology, and natural resource use.

The Spring Creek Project seeks to bring together the practical wisdom of the environmental sciences, the clarity of philosophical analysis, and the creative, expressive power of the written word, to find new ways to understand and re-imagine our relation to the natural world.

Baccalaureate core courses are taught for students interested in broadening their intellectual horizons, developing their abilities for intellectual criticism, and enlarging their understanding of social, ethical, religious, political, and aesthetic values in contemporary society and world cultures. Many philosophy courses have content that is relevant to the interests of women and minority students.

The school invites non-majors to combine the study of philosophy with their major program by enrolling in the philosophy minor or the Applied Ethics certificate program.

Students interested in philosophy programs should contact or visit the school's undergraduate advisor or director of graduate studies.

**History and Philosophy of Science**

The School of History, Philosophy, and Religion offers the degrees of Master of Arts (MA), Master of Science (MS) and Doctor of Philosophy (PhD) in History and Philosophy of Science. The History and Philosophy
of Science graduate program provides professional training in the interdisciplinary subject of the history and philosophy of science. The program connects the humanities, social sciences, and natural sciences by studying and interpreting the development of the sciences within particular historical settings and analyzing the changing roles of the sciences within modern cultures. The emphasis in the program is on scientific traditions since the sixteenth century in Europe and North America, in the physical, earth, biological, medical, and social sciences, as well as on environmental history and the history of the environmental sciences.

MA or MS in Applied Ethics Degree

The MA or MS in Applied Ethics provides students skills in moral reasoning and an understanding of the ethical values and dilemmas in today’s world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

MAIS Degree

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, philosophy may be used as a minor. See the graduate section of this catalog for details.

Medical Humanities Certificate

Also available via Ecampus.

This certificate is available as a standalone program (https://registrar.oregonstate.edu/standalone-certificates/).

The undergraduate certificate in Medical Humanities offers OSU students a multi-disciplinary integrated program to study health, medicine, and the healing professions. The certificate relies on key courses in medical anthropology, literature and medicine, medical history, and biomedical ethics for its core content foundations. Courses from additional different disciplines—biology; ethnic studies; human development; kinesiology; philosophy; psychology; public health; religious studies; sociology; and women, gender, and sexuality studies—can fulfill complementary elective courses. The certificate program emphasizes skills in professional identity, reflective writing, cultural competency, and diversity as a complement to the scientific features of the healing professions. The certificate prepares students to empathize with the sufferings of others, reflect critically on medical knowledge and discourse, create new understandings of the medical experience, and confront moral, psychological, and ethical dilemmas.

Yoga Studies and Yoga Teacher Training Certificate

This certificate is available as a standalone program (https://registrar.oregonstate.edu/standalone-certificates/).

The program combines yoga praxis and instruction with academic accountability and a scholarly approach to yoga made possible by OSU’s expertise in the academic study of yoga. Students will develop proficiency in instructing the postural and contemplative dimensions of yoga through cultivating their knowledge of yoga biomechanics, yogic philosophy, contemplative methods and techniques, and theoretically-grounded teaching methods. Knowledge acquisition will be paired with ample practical opportunities to support both disciplinary and teaching competencies. More broadly, students will be encouraged to reflect upon their relationship to self, to their communities, and the world, as relationality and interdependence are central tenets of yoga’s philosophical worldview.

School of Language, Culture, and Society

Anthropology

Anthropology offers courses to meet the needs of students interested in a comprehensive understanding of human societies and cultures past and present. Prehistoric, historic, ethnographic, and linguistic study provides the basis for understanding how a variety of societies solve common problems. The anthropology curriculum provides a cross-cultural perspective, a sound basis for later professional or graduate education.

An anthropology degree enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media, and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts, and management of cultural resources.

Anthropology bridges sciences and the humanities and develops critical thinking, communication skills, facility with group processes, and the ability to work independently. It can help students succeed in an increasingly interconnected and complex world.

Ethnic Studies

Ethnic studies is an established academic discipline traditionally defined by a concentration on the experiences and concerns of the four major ethnic minority groups historically under-represented in United States political and institutional life and in university curricula. Ethnic studies faculty bring a variety of methodological approaches to bear on the exploration of issues affecting African American, Asian American, Chicano/a-Latino/a, and American Indian and Alaskan Native
communities. A degree in ethnic studies provides a sound basis for future work in graduate or professional programs and is of value to students interested in careers in a broad range of jobs requiring a liberal arts background and an understanding of race, ethnicity, and cultural competency.

World Languages
World languages and cultures (WLC) offers major programs leading to a BA degree in French, German, or Spanish, as well as minor programs in Asian Languages and Cultures, French, German, and Spanish for undergraduate students with majors in other disciplines. The major and minor programs provide students with the opportunity to develop language skills and to raise their understanding of and appreciation for world literatures and cultures.

Proficiency in a world language and knowledge of another culture can enhance career possibilities in fields that range from business, library work, and government service to park service, oceanography, agriculture, and forestry. Students often find it possible to combine languages with another major such as business administration, psychology, political science, sociology, and professional training to prepare for an exciting, internationally oriented career.

Study of a language other than English can help students improve communication skills in English, become more linguistically aware, develop analytical skills, and communicate on an equal basis with non-English-speaking people. Through language courses, students can gain a global perspective, more fully understand different cultures and value systems, and enhance their general knowledge of world development. An undergraduate academic major (French, German, or Spanish) is required as a prerequisite to the Fifth-Year Teacher Education Program designed to prepare students for licensure and/or other graduate programs in education.

WLC cooperates with institutions of the Oregon University System and with other Northwest institutions of higher education in administering overseas study centers at Beijing and Fujian, China; Quito, Ecuador; Angers, Lyon, and Poitiers, France; Baden-Wurttemberg and Cologne, Germany; Tokyo, Japan; Seoul, Korea; Puebla, Mexico; Santander, Oviedo, and Segovia, Spain. Students may also study at different institutions in Russia and in the former Soviet republics. See the International Programs section of this catalog.

Liberal Studies
The BA degree in Liberal Studies offers area studies that allow students to use language and culture courses taken in the School of Language, Culture, and Society to fulfill core course requirements. Students majoring in liberal studies can elect to complete their undergraduate degree using prestructured programs in the following areas: Asian studies, Chinese studies, European studies and Japanese studies.

A minimum of 45 credits of course work in the concentration area is required to complete the Liberal Studies major.

Women, Gender, and Sexuality Studies
The Women, Gender, and Sexuality Studies Program at OSU relies on multi-disciplinary approaches to the study of gender and sexuality, particularly as they intersect with race, ethnicity, class, culture, religion, nation, and ability. Our program emphasizes academic excellence, the use of feminist and anti-racist pedagogies, and scholarship that contributes to social change and justice. We are committed to challenging all forms of oppression, and we center queer, transnational, and women of color feminisms in our curriculum. We encourage creative, innovative, and collaborative frameworks of study, and we work to meet the needs of a wide range of students, developing curriculum that is meaningful for students who wish to pursue careers in academia, as well as those who may be interested in community organizing, feminist nonprofit work, and/or other professional areas. The Women, Gender, and Sexuality Studies Program offers an undergraduate major, minor, and certificate, as well as the MA in Women, Gender, and Sexuality Studies and the opportunity to declare Women, Gender, and Sexuality Studies as a primary and/or secondary area in the MAIS. We also offer undergraduate and graduate minors in Queer Studies.

Certificate Programs
The School of Language, Culture, and Society participates in the Languages in Culture and Latin American Affairs certificate programs. These interdisciplinary programs are designed for students who wish to combine their school major with a broad knowledge of Latin American or Russian affairs, past and present, or who wish to explore how languages and cultures interact. Core courses are typically taken in language, in the humanities and social sciences.

Graduate Programs
The School of Language, Culture, and Society offers master’s of arts and doctor of philosophy degrees in Applied Anthropology, College Student Services Administration; Contemporary Hispanic Studies; and Women, Gender, and Sexuality Studies. Graduate minors are offered in Anthropology; Applied Anthropology; Contemporary Hispanic Studies; Ethnic Studies; Food in Culture and Social Justice; Foreign Languages and Literatures; and Women, Gender, and Sexuality Studies.

Students may earn the Master of Arts in Interdisciplinary Studies (MAIS) degree in the areas of anthropology, applied anthropology, ethnic studies, foreign languages and literatures, French, German, Spanish, and women studies. Typically, candidates who select French, German or Spanish as one of their primary areas complete graduate course work in language, linguistics, literature and culture studies. To be admitted to a world language component of the MAIS degree, students must meet the Graduate School's general entrance requirements and obtain the consent of a graduate faculty member of the School of Language, Culture, and Society who agrees to serve as the field advisor. A maximum of 6 graduate credits completed at an overseas study center may be used to satisfy requirements for any one of three fields of the MAIS degree.

Anthropology Undergraduate Major (BA, BS, HBA, HBS)

This major offers the following option(s):

• Archaeology (p. 1242)
• Biocultural (p. 1242)
• Cultural/Linguistic (p. 1242)
• General Anthropology (p. 1243)

Also available via Ecampus.

Anthropology seeks to promote awareness of the complexity and diversity of humanity and the human experience—past and present—in its cultural, biological, and ecological contexts. An Anthropology degree emphasizes cultural sensitivity and enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts and management of cultural resources. Anthropology curriculum provides a sound basis for later professional or graduate education. Four options are available: archaeology, biocultural, cultural/linguistic, and general anthropology. Completion of an option is required to earn a degree in Anthropology.

Major Code: 860

Degree Type Proficiencies

For the Master of Arts degree, the student must show second proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of 'C' (2.00) or better. Students who have successfully completed at least two years of high school in a language other than English will have fulfilled this requirement.

The Master of Science degree is an option for students specializing in archaeology and biocultural anthropology, where appropriate, pending approval of the major professor. The student must show technical proficiency in areas that emphasize scientific methodological skills (e.g., GIS, statistics, and epidemiology). The MS student is encouraged to undertake the 15 credits of proficiency as part of their outside skills/
minor requirements. This will be in lieu of the language proficiency required for MA. The courses for the MS degree must be completed and approved by the student's Committee before the student takes the final oral examination for the degree. Students specializing in cultural/linguistic anthropology are not eligible for the MS.

**MAIS Degree**

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, anthropology may be used as a minor. See the Graduate School for details.

**PhD Requirements**

1. **Students must have MA or MS in Anthropology or related discipline (34 credits)**
   Students must bring in graduate credits to cover the equivalent of the courses central to the MA/MS in Applied Anthropology at Oregon State University (20 credits, see below) plus 14 credits of graduate level Anthropology courses or graduate courses in relevant disciplines as agreed upon by the major professor. If these requirements are not met upon entrance to the program, they must be earned after admittance. Students will work with their major professors in consultation with the Director of Graduate Studies to assess what can be accepted from past work and what must be made up at OSU.

2. **Specialization Courses (25 credits)**
   Specialization courses are those that enable students to develop their knowledge in order to do effective comprehensive exams and dissertation work in their particular field of expertise. Students work with their major professor and their Committee to determine what courses will be most helpful for them.

   Specializations courses must include ANTH 695 for developing their dissertation research project, two courses in Anthropology, and 2 credits of 'Tan Sack' (ANTH 607). All other specialization courses may be within or outside of Anthropology.

3. **Second Language Proficiency**
   Evidenced by passing two years of university-level second language study or by passing the proficiency exam. Must be completed before Comprehensive Exams are taken. A substitution of skill sets is possible for archaeology students in consultation with the major professor and the Director of Graduate Studies.

College Student Services Administration Graduate Major (EDM, MS)

Graduate Areas of Concentration

College and university characteristics and environments; history, development, and current issues in higher education; leadership and management of administrative departments; program oversight in specialized administrative areas such as financial aid, student activities, career services, multicultural affairs, recreational sports, and student housing; student development theory and application

Also available via Ecampus (http://ecampus.oregonstate.edu/).

The College Student Services Administration program offers preparation in the organization, leadership and administration of programs, services, and facilities in postsecondary education, including college union/centers, recreational sports, student government and activities, residence life programs, student housing, financial aid, career services, and general student advising and academic support.

CSSA students have two degree tracks from which to select:

This first degree track, the Master of Education (EdM), is earned through successful completion of all required program course work and successful completion and defense of a capstone portfolio. The capstone portfolio is a cumulative, comprehensive, and reflective form of student assessment. Completing a portfolio requires that the student address each program competency in a comprehensive, meaningful, and creative way. The portfolio “product” can be shared in any number of formats, including, but not limited to, writings, pictures, audio or video clips, and electronic media (websites, PowerPoint documents, etc.). Final portfolios are distributed to and evaluated in writing by a committee just prior to the last term of course work. A public, formal committee meeting with oral presentation and defense serves as the second method of evaluation.

The second degree track, the Master of Science (MS), is earned through successful completion of all required program course work and successful completion and defense of thesis. In addition to required course work and the thesis, students pursuing the MS degree must also demonstrate adequate evidence of competence and learning in each of the five CSSA competency areas. Demonstration of this evidence may take the form of an extended/detailed competency plan with select work samples or other methods approved by the major professor. This demonstration need not be a portfolio, but it should clearly show evidence of competency mastery. Thesis research should be reflected in the demonstration.

For thesis work, CSSA and university policies require students to convene

a. a proposal meeting to present their research plan (generally spring of the first year for full-time students or fall/winter of the second year for part-time students) and
b. a final defense for presentation and evaluation of the research and competency demonstration (final term of course work).

Students who wish to pursue the MS should decide this early in their graduate program, ideally during the first term, since such research requires careful and lengthy planning. Major professors should be made aware of this decision.

Graduation from the program requires the following

- Successful completion of at least 54 credits of graduate-level course work, the majority of which are required in the major field of study (CSSA). Additionally, a minor or area of specialization is chosen and completed by the individual student; and
- Successful completion and presentation of a capstone project (EdM degree) or a thesis capstone (MS degree) during the final year.

Additional information is available online (http://liberalarts.oregonstate.edu/school-language-culture-and-society/cssa/cssa-admission-prospective-students/).

Ethnic Studies Graduate Minor

Graduate Areas of Concentration

Ethnic studies

Graduate work in the School of Language, Culture, and Society may serve as a field of study for the Master of Arts in Interdisciplinary Studies degree or as a minor in other advanced degree programs. The program offers an interdisciplinary exploration of the critical areas of race, class, ethnicity, and gender in American life, as well as focused study of the four major ethnic minority groups in the United States (African Americans, Asian Americans, Chicano/Latinos and Native Americans).

Students applying for graduate work in ethnic studies must meet the following requirements:

1. a minimum GPA of 3.00 in the last 90 credits of graded undergraduate work on the first baccalaureate degree plus all work completed thereafter;
2. appropriate undergraduate or postgraduate work in ethnic studies. Applicants are urged to speak with an advisor prior to submitting their materials.

Minor Code: 8940

Ethnic Studies Minor

Also available via Ecampus.

Ethnic Studies is an interdisciplinary field focused on critical engagement with the historical and ongoing ways in which race and ethnicity shape everyday life in the United States, but also within a global context. A minor in Ethnic Studies provides students with a strong background and set of analytical skills to address issues of difference and inequality in a wide range of areas, from policy, to institutions and community settings, to pop culture, media, and literature, and is a valuable complement to any major.

Ethnic Studies is an interdisciplinary field critically engaging the historical and ongoing impact of race and ethnicity primarily in the US but within a global context. A major in Ethnic Studies provides students with a strong background and set of analytical skills to address issues of difference and inequity in a wide range of areas, from state policy and institutions to pop culture, media, and literature.

**Minor Code:** 894

- Describe the experiences and histories of people of color in the United States, not as separate histories, but as intrinsic to U.S. and world history.
- Analyze ways in which oppressions such as racism, sexism, and heterosexism not only involve individual acts and attitudes but function systematically.
- Identify ways in which racialized ethnic groups and indigenous peoples have engaged in community formation, activism, resistance, coalition-building, and movements for self-empowerment.
- Compare the experiences of racialized groups in the United States and the ways in which they have been incorporated or excluded from national agendas.
- Evaluate social and cultural theories which explore the construction and articulation of race, class, gender, sexuality, indigeneity, ethnicity, immigration status, and citizenship.

Food in Culture and Social Justice Certificate

Also available via Ecampus.

*This certificate is available as a standalone program ([https://registrar.oregonstate.edu/standalone-certificates/](https://registrar.oregonstate.edu/standalone-certificates/)).*

Food is more than simple nourishment. It is part of a system of communication firmly rooted in individual and group identities within cultures around the world. When and how we eat, what is considered acceptable to eat, how we prepare it, and how we learn about producing and eating food are all fascinating questions to explore by humanists and social scientists. Histories of particular food commodities and changes in the way people think about sustaining healthy bodies richly contextualize our present practices. Cultural analyses of food and food production lead us to question the level of social justice within the local and global food systems. Community food security is a condition in which all community residents obtain a safe, culturally acceptable, nutritionally adequate diet through a sustainable food system that maximizes community self-reliance and social justice. Students who complete this certificate will not only have a clear idea of the cultural bases of food and food production but will obtain some experience working towards community food security.

Global Development Studies Minor

“Development” refers to the expansion of economic activity, integration into global flows of information and commerce, and improvement of the quality of life. The undergraduate minor program in Global Development Studies at OSU is designed to help students understand the challenges faced by developing communities and countries, including economic inequality, poverty, health and wellness, and the sustainable use of natural resources. Emphasis is placed on interdisciplinary and practical solutions to international development problems.

Courses address both thematic and regional dimensions of international development. Some required and elective courses may also count toward fulfillment of baccalaureate core requirements in categories such as ‘Contemporary Global Issues,’ “Cultural Diversity,” “Science, Technology and Society,” and “Social Processes and Institutions.” Courses will be offered on campus, with the potential for some instruction via Ecampus. Students will be encouraged to participate in research projects, international experiences, and applied work (e.g., internships, service learning, etc.).

Minor Code: 711

Students putting together a program of study in Global Development Studies should consult their academic advisor. Students are required to take a minimum of 27 credits, as follows.

* Baccalaureate Core Course (BCC). You can double count courses for your BCC requirement and your certificate requirement
To develop a sense of linguistic diversity, certificate students must study two languages other than English. End-of-second-year proficiency is required in one language and end-of-first-year proficiency in another language. One of these languages must be outside the Indo-European language family. Students should work with a Language in Culture advisor to identify an appropriate mode of assessment. It is highly recommended that students participate in a study abroad program.

Some electives used for the certificate may have prerequisites.

Social Justice Minor

The Social Justice minor provides interdisciplinary academic classes in which students think critically about social justice and experiential learning activities in which students engage in the work of social justice. The program addresses local, national and international issues of social justice. A core of theory, case studies, and practice is combined with elective courses from across the College of Liberal Arts that address the following areas: histories, cultures and geographies of dominance; experiences of oppression; theories of justice; policies, institutions, and structures that promote or hinder equity; and collective action or processes of change leading to social justice.

The Social Justice minor is a collaboration of the School of Language, Culture, and Society, the School of History, Philosophy, and Religion, and the School of Public Policy.

Women, Gender, and Sexuality Studies programs grew out of the women’s movement,
incorporates a social activism component, and students are encouraged with race, ethnicity, class, culture, nation, and ability. The curriculum incorporates feminist social justice theory and strategies for social change. An internship or field placement in an agency that is concerned with gender issues or women’s role and status in society is required and is designed to help students integrate classroom knowledge with practical experience. The graduate program is beneficial for any work experience in which gender is negotiated or women are affected. Women, Gender, and Sexuality Studies graduates are employed in human service agencies and programs, advocacy organizations such as battered women’s shelters and women’s resource centers and community organizing, teaching, business, administration, and cultural work. Many students have used their degree as a preparatory base for doctoral work.

Women, Gender, and Sexuality Studies faculty are drawn from colleges across the university. Many teach Women, Gender, and Sexuality Studies program courses in their home departments and are involved in research projects that give them different perspectives on the challenges in Women, Gender, and Sexuality Studies. These courses and faculty are not listed in this entry.

Contemplative Studies Minor
This minor combines courses from several areas to foster an objective understanding of contemplative practices and philosophies by studying them in the context of psychology, philosophy, religion, history, health, and other academic areas. In addition to coursework, Contemplative Studies includes first-person experience with practicing contemplation,
adding an increasingly-valued complement to theory-based learning. This approach qualifies as experiential learning, which is an OSU emphasis. A large research literature has shown that contemplative practice has a variety of beneficial effects for people, including enhanced attentional ability, increased compassion, better physical and mental health, and increased personal insight. Other benefits of contemplative practices include cultivating the ability to be resilient in the face of challenges, reducing our experience of stress, and improving relationships.

Contemplative practices are increasingly being used in a variety of professional and work settings, including education, organizational wellness programs, counseling, and many areas of healthcare. Because of this, Contemplative Studies will be a useful minor to add to many disciplines, including Psychology, HFSciences, BioHealth Sciences, Education, Digital Communication Arts, and others. Business schools at Harvard, Stanford, University of Virginia, and, increasingly, others, value, teach, research, and promote adding studies in contemplation as an important, complementary education and skill set for leadership, productiveness, effectiveness, and well-being of their graduates in preparing them for a career in business and related fields.

Upon completion of a Minor in Contemplative Studies at Oregon State University, you will be able to:

1. Demonstrate effective application of multiple forms of contemplative practice
2. Articulate the research-based benefits of contemplative practice
3. Articulate the connections between contemporary contemplative practices and their historical contexts

**Minor Code: 802**

A minor in Contemplative Studies can be earned by satisfactorily completing 27 credits from the following list of courses, which must include 12 upper division credits (300 and 400 level courses).

Check with your own college's policies to see if the same course can count to meet different degree requirements.

**Psychology Graduate Major (MS, PhD)**

**Graduate Areas of Concentration**

*Applied cognition, engineering psychology, health psychology*

The MS and Ph.D. program is a doctoral program with a Master's degree component that is obtained en route to the Ph.D. The MS portion of the program assures that students have experience designing and conducting research prior to the dissertation stage. The program has a strong research component, ensuring that graduates have the tools to tackle a variety of applied problems. This entails both coursework in research methods and statistics and a continuing emphasis on student research.

The program’s general focus is on the application of psychological research methods, theories, and principles to solving practical problems. The program has three areas of concentration: applied cognition, engineering psychology, and health psychology.

**Applied cognition** is the application of research on thinking, learning, decision-making, perception, social judgment, and other cognitive processes to applied issues. Examples of relevant application areas include the psychology of teaching and learning, the effects of contemplative practice, and risk perception.

**Engineering psychology** refers to research at the intersection of psychology and technology. Relevant topics include such things as the improvement of technology, human-machine interfaces, transportation, information systems, and work and living environments.

**Health psychology** concerns the relations between psychological factors (e.g., cognition, motivation, individual and interpersonal behavior, emotion) and physical and mental health and wellness in diverse populations with regard to age, gender, ethnicity, socioeconomic background, and health status.

**Admission Requirements**

Bachelor’s or Master’s degree from an accredited institution; minimum undergraduate GPA of 3.2/4.0 or graduate GPA of 3.5/4.0; GRE; TOEFL score of at least 600 (paper exam), 250 (computer exam), or 100 (internet exam); three letters of recommendation; personal statement.

**Major Code: 9700**

The Psychology PhD program requires a minimum of 111 credits, including at least 36 credits of dissertation. The program is organized into core requirements for all students, along with additional work in a concentration area composed of electives, the nature of which is defined primarily by the student’s research focus.

The core requirements are in research methods, professional issues, and basic content in psychology. The required core curriculum provides a critical foundation in quantitative and research methods, core theory in psychological science, ethics, and professional issues.

Psychology Minor

Also available at OSU-Cascades, OSU-Portland and via Ecampus.

The School of Psychological Science offers students a variety of educational avenues that provide the necessary tools for competency in, and appreciation for, psychology as a scientific discipline.

Many of our graduates will go straight into the workforce into areas such as human services, human resources, and educational assistants. Many graduates will also continue their education through professional schools such as law, medicine, or optometry. Others will engage in further study in business or in public administration. Some students will continue their study of Psychology at a school with a graduate program in one of the specialty areas of psychology.

The School of Psychological Science offers students a variety of educational avenues that provide the necessary tools for competency in, and appreciation for, psychology as a scientific discipline.

Many of our graduates will go straight into the workforce into areas such as human services, human resources, and educational assistants. Many graduates will also continue their education through professional schools such as law, medicine, or optometry. Others will engage in further study in business or in public administration. Some students will continue their study of Psychology at a school with a graduate program in one of the specialty areas of psychology.
The Liberal Arts core requires at least 15 credits total, but two categories in Liberal Arts core (Social Science and One additional course) are embedded in the Psychology major required courses.

User Experience Research Minor

User experience and research focuses on the psychological aspects of the field of human's interactions with computer technologies. User experience research is a subarea of Human Computer Interaction, which is "an interdisciplinary program that focuses on the study of the interaction between people and technology and how that technology impacts society, and combines disciplines within the fields of computing and information science (information systems, software engineering, artificial intelligence and design) and the behavior sciences (cognitive science, cognitive psychology, sociology, organizational psychology, and social psychology). Includes instruction in information technology, cognitive and behavioral sciences, and systems design." [Integrated Postsecondary Education Data System]. Specifically, User Experience (UX) research focuses not on computing and information science, but cognitive science, cognitive psychology, sociology, organizational psychology, and social psychology, and experimental and statistical methods for testing psychological theories and hypotheses related to user experience.

Target students include students pursuing the Computer Science BS Applied Option, the Psychology BS, or the Digital Communication Arts BS degree who are interested in human factors, user experience research, and the application of human cognition, perception, and decision-making research.

Students in this program gain foundational skills in communication, teamwork, and project management, as well as specialized skills in user testing, user research design, and quantitative data analysis.

Career opportunities include UX design researcher, UX researcher, and UX psychologist.

Minor Code: 073

- Describe key concepts, principles and practices associated with the human-computer interaction and user experience with an emphasis on psychological science.
- Articulate how human factors, cognitive models and implementation constraints influence design and usability.
- Use effective writing skills for different purposes.
- Demonstrate effective presentation skills for different purposes.
- Function effectively as part of a team.
- Apply HCI content and user experience research skills to meaningful career goals.
- Demonstrate project management skills.
- Apply appropriate research methods to identify meaningful insights about people's needs, behaviors and experiences.
- Develop and apply specialized skills relevant to user experience, including iterative design and testing, prototyping, and creating wireframes and mockups.
- Students should consult their major advisors to see if specific courses are required for their major.
- Students must receive a grade of C– or better in any course applied toward the minor. Such courses cannot be taken with S/U grading.
- No more than 12 credits can count for both the User Experience Research minor and Psychology major.
- Courses in this minor may be double counted with the Applied Computer Science Option in the Computer Science Undergraduate Major.

School of Public Policy

Policy is about the way we make decisions in both private and public contexts. Faculty and students in the School of Public Policy are interested in a wide variety of decision contexts and are particularly interested in advancing the social and policy-related dimensions of OSU’s three areas of distinction: sustainable ecosystems, health and wellness, and economic growth and progress. The School of Public Policy offers undergraduate majors and minors in economics, political science, public policy, and sociology, as well as the Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in political science and sociology. School faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

Undergraduate Programs

The School of Public Policy offers undergraduate major programs in economics, political science, public policy, and sociology; it offers minor programs in economics, political science, and sociology.

Economics Program

The economics program is an excellent choice for students interested in:

- Law school or graduate programs in business, economics, public administration or other social sciences.
- Careers in business or public management.
- Becoming wiser consumers and better-informed citizens.

The study of economics provides a framework for logical thought that can be used to address a wide variety of practical problems and situations. It can provide uncommon insights into society itself. Indeed, people holding degrees in economics are increasingly sought for positions of responsibility and authority in government, business, and industry. The economics major is useful preparation for various careers and for graduate study in many fields, primarily because it does not lead simply to the accumulation of facts but rather develops analytical skills that can be used in many ways.

Political Science Program

Graduates of the political science program pursue:

- Careers in all levels of government, foreign service, national and international nongovernmental organizations, journalism, business or public management.
- Law school or graduate programs in political science, public administration, public policy, business, or other social sciences.
- Elected office.

Students can focus their interests in different subfields, including American politics, public law, political theory, international relations, and comparative politics (for example, Asia, Latin America, Western Europe, Russia). Political science majors are encouraged to incorporate a minor in other social science fields such as economics, psychology, or sociology, or in a field of interest related to their specialization in political science. For example, students with an interest in international relations or comparative politics may choose to minor in a language or in history, emphasizing a specific part of the world. Political science majors also are encouraged to consider the International Degree and IE3 Global Internships.

public policy program

Graduates of the public policy program pursue:

- Careers in public policy analysis, public administration, lobbying and advocacy, nonprofit organizations, community organizing, consulting, research, and more.
- Graduate studies in public policy, public administration, law, urban planning, and other social sciences.

OSU’s public policy major is an interdisciplinary program that draws primarily from economics, political science, and sociology to provide graduates with a full toolkit for analyzing and addressing the complex policy issues of this generation. Some of these issues include climate change, demographic and population shifts, rapid development of technology, and an increasingly globalized economy. Students select a major specialization in Environmental Policy, Rural Policy, or Social Policy to deepen their understanding in a policy area that best suits their interests. In a time of tight budgets and high skepticism of government, this program prepares graduates who can develop and implement innovative, evidence-based solutions focused on serving the public good.

Sociology Program

Graduates of the sociology program pursue:

- Careers in community development, criminal justice, business, public policy and administration, social services, non-profit organizations, and research and teaching.
- Graduate programs in sociology, criminology, public policy, social services, human resources, law, social work and other social sciences.

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one’s education and strengthens the base of understanding from which one can pursue a career or further education. Two options are currently available for Corvallis campus students — Crime and Justice, and Environmental and Natural Resource Sociology — with the Environmental and Natural Resource option also available for Ecampus students.

Graduate Programs

The School of Public Policy offers a Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in Political Science and Sociology, and courses applicable toward the graduate degree in Applied Economics. Faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

Master of Public Policy (MPP)

Graduates of the MPP program:

- Are employed at all levels of government as policy analysts, project managers, and managers.
- Work in national and international nongovernmental organizations like the United Nations.
Policy students at OSU focus their studies around environmental and natural resource policy, international policy, social policy, and rural policy, working with strong researchers around campus. Internships with agencies and organizations give policy students real world experience and networks to enhance their classroom education.

**PhD in Public Policy**
The PhD in Public Policy prepares students for academic or nonacademic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. Like the MPP, the PhD program offers concentrations in energy policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy.

**Master of Arts in Interdisciplinary Studies (MAIS)**
The MAIS program is designed to meet the particular needs and interests of individual students and features collaborative work in any two or three pertinent departments or schools. Sociology faculty members may serve as advisors to students selecting sociology as either a major field or minor field of concentration.

**Graduate Minors**

**Political Science**
Master’s or PhD students interested in adding a Political Science minor should follow the guidelines within their major program in declaring a minor. All students declaring political science as a graduate minor must contact the program coordinator prior to doing so. See the Political Science website (http://gradschool.oregonstate.edu/programs/9600/) for a listing of requirements for the minor concentration.

**Sociology**
Master’s or PhD students interested in adding a Sociology minor should follow the guidelines within their major program in declaring a minor. All students declaring sociology as a graduate minor must contact the program coordinator prior to doing so. See the Sociology website (http://liberalarts.oregonstate.edu/spp/sociology/students/sociology-advising/) for a listing of requirements for the minor concentration.
