Explore foundational project management concepts using a real world case-study to practice both soft and hard skills through individual and group assignments, discussions and presentations. Apply best practices, methodologies and tools using a global standards framework to achieve successful outcomes in environmental project management work. Active learning and networking are incorporated throughout the course to provide a full perspective on project management. Available via Ecampus

ENSC 520, ENVIRONMENTAL ANALYSIS, 3 Credits
Develop analytical thinking, explore analytical approaches, enhance writing skills, and gain experience in oral communication about environmental issues. Available via Ecampus

ENSC 540, ENVIRONMENTAL SCIENCE PERSPECTIVES ON THE FUTURE OF FOOD, 4 Credits
Examines the newest developments in environmental science research and on-the-ground best management practices for achieving food security and sustainability for growing U.S. and global populations in a dynamic environment and climate. Available via Ecampus

ENSC 541, ENVIRONMENTAL SCIENCE, SCIENTISTS, AND SOUND DECISIONS, 4 Credits
Focusing on analyzing the role of environmental science and scientists in decision-making in a variety of professional contexts at various scales (local through global) using a case-study approach and proposing a draft model process. Available via Ecampus

ENSC 542, MANAGEMENT OPPORTUNITIES IN THE NITROGEN CASCADE, 4 Credits
Analyzes the environmental science behind reducing excess reactive nitrogen entering the environment through our provision of food, power, and transportation for future populations. Identifies emerging complementary suites of interventions and legislation innovating management practices at local, regional, national and international scales. Available via Ecampus

ENSC 543, EXCELING IN AN INTERDISCIPLINARY TEAM, 4 Credits
Identifying, examining and practicing the top skills, attributes and leadership dynamics involved in working in interdisciplinary environmental science teams in industry, government, and research organizations, informed by experienced experts across these areas. Available via Ecampus

ENSC 599, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENSC 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ENSC 699, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Geosciences (GEO)

GEO 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.
GEO 004, INTERNSHIP, 0 Credits
Provides basic personal and professional skills that can be used within and outside of a work setting. Through practice, this experience guides students in building and maintaining positive professional relationships, networking/mentoring relationships, and enhances students’ understanding of the connection between theory and practice in their respective disciplines.

GEO 100, *NATURAL DISASTERS: HOLLYWOOD VERSUS REALITY, 4 Credits
Introduction to natural hazards, as seen through the lens of popular media. Course will explore the causes and consequences of natural disasters via in-class exercises and activities designed to develop students’ skills in scientific analysis and problem solving. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 101, *THE SOLID EARTH, 4 Credits
Solid earth processes and materials. Earthquakes, volcanoes, earth structure, rocks, minerals, ores. Solid earth hazard prediction and planning. Geologic time. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

GEO 199, SPECIAL STUDIES, 1-16 Credits
Equivalent to: GEO 199H
This course is repeatable for 16 credits.

GEO 201, *PHYSICAL GEOLOGY, 4 Credits
Study of earth’s interior. Tectonic processes and their influence on mountains, volcanoes, earthquakes, minerals, and rocks. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus
Equivalent to: GEO 201H

GEO 202, *EARTH SYSTEMS SCIENCE, 4 Credits
Surficial processes (glaciers, rivers), climate, soils, vegetation, and their interrelationships. Field trip(s) required; transportation fee charged. Lec/ lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: GEO 201H, GEO 202H

GEO 203, *EVOLUTION OF PLANET EARTH, 4 Credits
History of earth and life as interpreted from fossils and the rock record. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science

GEO 205, INTRODUCTION TO FIELD GEOLOGY, 3 Credits
Two-week course taught in the fall program in various locations throughout the west. Collect field data to make geological maps, cross-sections, columns, and reports. Serves as an introduction to upper-level course work for Geology degree. Lec/lab.
Prerequisite: GEO 201 with C- or better

GEO 207, *EVOLUTION OF PLANET EARTH, 3 Credits
History of earth and life as interpreted from fossils and the rock record. Field trip(s) required; transportation fee charged. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

GEO 221, *ENVIRONMENTAL GEOLOGY, 4 Credits
Introductory geology emphasizing geologic hazards (volcanoes, earthquakes, landslides, flooding), geologic resources (water, soil, air, mineral, energy), and associated environmental problems and mitigation strategies. Lec/lab. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Available via Ecampus

GEO 305, *LIVING WITH ACTIVE CASCADE VOLCANOES, 3 Credits
The impact of volcanic activity on people, infrastructure, and natural resources: how and why volcanic activity in the Cascade Range occurs; volcano monitoring and hazard assessment. Field trip required, transportation fee charged. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

GEO 306, *MINERALS, ENERGY, WATER AND THE ENVIRONMENT, 3 Credits
Formation, occurrence, and use of earth resources including metallic minerals, building materials, energy resources including fossil fuels and nuclear energy, and water resources. Environmental consequences of resource use including surface and groundwater pollution, waste disposal, air pollution and acid rain, and global climate change. Implications of resource use and availability for economic development and geopolitical relations.
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

GEO 307, *NATIONAL PARK GEOLOGY AND PRESERVATION, 3 Credits
National parks as classrooms to study geological processes and the importance of preserving natural landscapes. Field trip(s) required; transportation fee charged. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus
Equivalent to: GEO 307H

GEO 308, *GLOBAL CHANGE AND EARTH SCIENCES, 3 Credits
Study of global change over different time scales during the history of the earth, with emphasis on evolution of its atmosphere, plate tectonics, paleoclimates, and mass extinctions. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Available via Ecampus

GEO 309, *ENVIRONMENTAL JUSTICE, 3 Credits
Technical and social issues surrounding the unequal exposure to environmental hazards based on race and the environmental justice movement that has grown to address charges of such environmental racism. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Prerequisite: WR 121 with C- or better or WR 121H with C- or better
Available via Ecampus
GEO 310, EARTH MATERIALS I: MINERALOGY, 4 Credits
Principles of crystal morphology, and structure. Characteristics, identification, and origins of minerals. Lec/lab.
Prerequisite: (GEO 201 with D- or better or GEO 221 with D- or better) and ((CH 121 with D- or better or (CH 231 with D- or better and CH 261 [D-]) or (CH 231H [D-] and CH 261H [D-])

GEO 315, EARTH MATERIALS II: PETROLOGY, 4 Credits
Origin, identification and classification of igneous, sedimentary, and metamorphic rocks. Field trip(s) required, transportation fee charged. Lec/lab.
Prerequisite: GEO 310 with D- or better

GEO 322, SURFACE PROCESSES, 4 Credits
Examination of surficial processes and terrestrial landforms of the earth, including slopes, rivers, glaciers, deserts, and coastlines. Field trip(s) required; transportation fee charged. Lec/lab.
Prerequisite: (GEO 102 with D- or better or GEO 102H with D- or better or GEO 202 with D- or better) and (MTH 251 [C-] or MTH 251H [C-]) and (PH 201 [D-] or PH 201H [D-] or PH 211 [D-] or PH 211H [D-])

GEO 331, *ASTROBIOLOGY: LIFE BEYOND EARTH, 3 Credits
Evaluates the potential distribution of life in the Universe, presents the science and technology used to search for life, and explores the societal impacts of its discovery.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Completion of 12 credits of biological and physical science in the Bacc Core

GEO 340, STRUCTURAL GEOLOGY, 4 Credits
Analysis of geometry and kinematics of geologic structures including brittle and ductile faults, folds, joints, deformation fabrics. Field trip(s) required; transportation fee charged. Lec/lab.
Prerequisite: GEO 201 with D- or better
Equivalent to: GEO 450

GEO 352, *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE, 4 Credits
Provides an overview of the geology of Oregon in the context of the Pacific Northwest including tectonic setting, geologic features and landscapes, as well as topics and concepts of interest to society in general. Lessons will include discussion of the relationship between people and the landscape, incorporating the concept of ethnographic landscapes–geologic structures, natural resources and geologic hazards that are part of the identity of a place. Emphasizes written and graphic communication skills. Field trip required, transportation fee charged. Lec/lab. (Bacc core course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: GEO 352H

GEO 352H, *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE, 4 Credits
Provides an overview of the geology of Oregon in the context of the Pacific Northwest including tectonic setting, geologic features and landscapes, as well as topics and concepts of interest to society in general. Lessons will include discussion of the relationship between people and the landscape, incorporating the concept of ethnographic landscapes–geologic structures, natural resources and geologic hazards that are part of the identity of a place. Emphasizes written and graphic communication skills. Field trip required, transportation fee charged. Lec/lab. (Bacc core course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: GEO 352

GEO 370, STRATIGRAPHY AND SEDIMENTOLOGY, 4 Credits
Basic principles of sedimentology and stratigraphy. Stratigraphy is largely concerned with classifying and interpreting the origin of sedimentary rocks. Stratigraphy provides formal rules and strategies for organizing sedimentary (and other) rocks into a temporal framework. Reconstruction of Earth history with various approaches centered on paleoclimatology, paleogeography, paleooceanography, and tectonics. Lec/lab.
Prerequisite: GEO 201 with C- or better and GEO 203 [C-]
Equivalent to: GEO 470

GEO 380, *EARTHQUAKES IN THE PACIFIC NORTHWEST, 3 Credits
Earthquake hazards in the Northwest; responses to reducing earthquake risk at state, local, and personal levels. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

GEO 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: GEO 399H, GEO 399H
This course is repeatable for 16 credits.

GEO 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: GEO 399
This course is repeatable for 16 credits.

GEO 400, FIELD TRIPS, 1-16 Credits
Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. Graded P/N.
This course is repeatable for 48 credits.

GEO 401, RESEARCH, 1-16 Credits
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEO 403, THESIS, 1-16 Credits
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.
GEO 405, READING AND CONFERENCE, 1-16 Credits
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for 16 credits.

GEO 407, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: GEO 407H
This course is repeatable for 12 credits.

GEO 407H, SEMINAR, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: GEO 407
This course is repeatable for 12 credits.

GEO 408, WORKSHOP, 1-16 Credits
This course is repeatable for 12 credits.

GEO 410, INTERNSHIP, 1-15 Credits
Pre-career professional experience under joint faculty and employer supervision. Graded P/N. This course is repeatable for 48 credits.

GEO 412, IGNEOUS PETROLOGY, 4 Credits
Petrogenesis of igneous rocks. Petrographic analysis using polarizing microscopes. Field trip may be required, transportation fee charged. Lec/lab.
Prerequisite: GEO 315 with D- or better
Recommended: GEO 415 [C-]

GEO 415, EARTH MATERIALS III: PETROGRAPHY, 4 Credits
Microscope-based study of minerals and igneous, sedimentary and metamorphic rocks. Representation and interpretation of geological processes based on microscopic observation. Lec/lab.
Prerequisite: GEO 201 with D- or better and GEO 310 [D-] and GEO 315 [D-]
Equivalent to: GEO 320

GEO 427, VOLCANOLOGY, 4 Credits
A survey of volcanoes: their distribution, forms, composition, eruptive products, eruptive styles, and associated phenomena. Field trip may be required; transportation fee charged. Offered alternate years. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: GEO 315 with D- or better

GEO 431, ENVIRONMENTAL GEOCHEMISTRY, 3 Credits
An introduction to natural processes at and near the earth’s surface, as well as an examination of the impact of human activities on the natural environment. Study includes discussion of the sources, transformations, transport, and fate of contaminants. Field trip(s) required; transportation fee charge.
Prerequisite: (CH 121 with D- or better and CH 122 [D-] and CH 123 [D-]) or ((CH 231 [D-] or CH 231H [D-]) and (CH 232 [D-] or CH 232H [D-]) and (CH 233 [D-] or CH 233H [D-]))

GEO 432, APPLIED GEOMORPHOLOGY, 3 Credits
Effect of landform processes upon human activity; consequences of resource management strategies on erosional balance within landscape; identification of mitigation of natural hazards; role of geomorphic process studies in environmental planning. Taught as seminar, themes TBA. Field trip(s) may be required; transportation fee charged.
Equivalent to: GEO 449
Recommended: GEO 322

GEO 433, COASTAL GEOMORPHOLOGY, 3 Credits
Morphodynamic approach to coastal landforms, processes and evolution including the impacts and response of humans to coastal change.
Prerequisite: (PH 211 with D- or better or PH 211H with D- or better) and (PH 212 [D-] or PH 212H [D-]) and GEO 322 [D-]
Recommended: MTH 251 [D-] and MTH 252 [D-]

GEO 440, ECONOMIC GEOLOGY, 4 Credits
Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Lec/lab.
Prerequisite: GEO 315 with D- or better
Recommended: GEO 340 [C-]

GEO 461, GEOLOGY OF EARTHQUAKES, 3 Credits
Tectonics of the present day as based on surface geology, geodesy, seismicity, and crustal structure; description of active faults and folds; use of neotectonics in evaluation of earthquake hazard. Field trip(s) may be required; transportation fee charged. Offered alternate years.
Prerequisite: GEO 340 with D- or better

GEO 463, GEOPHYSICS AND TECTONICS, 4 Credits
Geophysical observations as constraints on geologic interpretation. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MTH 251 [D-] and (PH 202 [D-] or PH 212 [D-])
Equivalent to: GPH 463
Recommended: MTH 251 [D-] and (PH 202 [D-] or PH 212 [D-])

GEO 481, GLACIAL GEOLOGY, 4 Credits
Mass balance of glaciers, physics of glacial flow, processes of glacial erosion and deposition, glacial meltwater, glacial isotasy and eustasy, and Quaternary stratigraphy. Field trip(s) may be required; transportation fee charged. Lec/lab. Offered alternate years.
Recommended: GEO 202 [C-]
GEO 484, INTRODUCTION TO BIOGEOCHEMISTRY, 3 Credits
Interdisciplinary course, applying concepts from chemistry, physics, biology and geology to Earth systems including terrestrial, ocean and freshwater environments; water and energy cycles; carbon, nitrogen, phosphorus and sulfur cycles; biogeochemical cycles through Earth history.
Prerequisite: MTH 111 with D- or better and ((CH 121 with D- or better and CH 122 [D-]) or (CH 231 [D-] and CH 261 [D-] and CH 232 [D-] and CH 262 [D-]))

GEO 486, QUATERNARY PALEOClimatology, 3 Credits
Introduction to geochronology, climate proxies, climate forcing, and climate modeling applied to paleoclimate problems. Emphasis on Quaternary climate history.
Prerequisite: GEO 202 with D- or better or GEO 203 with D- or better and (CH 122 [D-] or CH 222 [D-] or (CH 232 [D-] or CH 232H [D-]) and (CH 262 [D-] or CH 262H [D-] or CH 272 [D-]))

GEO 487, HYDROGEOLOGY, 4 Credits
Prerequisite: MTH 252 with D- or better or MTH 252H with D- or better

GEO 488, QUATERNARY STRATIGRAPHY OF NORTH AMERICA, 3 Credits
Stratigraphic principles applied to Quaternary deposits. Survey Quaternary dating methods. Proxy records of glaciation and climate change. Quaternary stratigraphy of North America, emphasizing stratigraphic records of ice sheets, glaciers, and pluvial lakes. Offered alternate years.
Recommended: GEO 481 or GEO 581

GEO 495, ADVANCED FIELD GEOLOGY, 6 Credits
Six-week summer program in central Oregon. Collect field data to make geological maps, cross-sections, columns, and reports. Fee charged.
Prerequisite: GEO 295 with C- or better and GEO 315 [C-] and GEO 340 [C-] and GEO 370 [C-]

GEO 497, FIELD MAPPING OF ORE DEPOSITS, 3 Credits
Eight-day field trip over spring vacation to a mineral district in the western United States, emphasizing detailed mapping of outcrops, trenches, and underground workings. Students prepare final maps and a report suitable for presentation to management or publication during spring term. Transportation fee charged. Not offered every year.
Recommended: GEO 440 [C-] and GEO 495 [C-]

GEO 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: GEO 499H
This course is repeatable for 16 credits.

GEO 500, FIELD TRIPS, 1-16 Credits
Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. Graded P/N. This course is repeatable for 48 credits.

GEO 501, RESEARCH, 1-16 Credits
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged. This course is repeatable for 24 credits.

GEO 503, THESIS, 1-16 Credits
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged. This course is repeatable for 999 credits.

GEO 505, READING AND CONFERENCE, 1-16 Credits
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for 16 credits.

GEO 507, SEMINAR, 1-16 Credits
Graded P/N. This course is repeatable for 48 credits.

GEO 508, WORKSHOP, 1-16 Credits
This course is repeatable for 24 credits.

GEO 510, INTERNSHIP, 1-15 Credits
Pre-career professional experience under joint faculty and employer supervision. May not be used to meet minimum credit hour requirements for graduate degrees in geosciences. Graded P/N. This course is repeatable for 16 credits.

GEO 512, IGNEOUS PETROLOGY, 4 Credits
Petrogenesis of igneous rocks. Petrographic analysis using polarizing microscopes. Field trip may be required; transportation fee charged. Offered alternate years. Lec/lab.

GEO 516, INTERPRETATION OF GEOLOGIC MAPS, 3 Credits
Development of skills in formulating geologic problems, using geologic maps, and developing solutions by the scientific method.

GEO 518, GEOSCIENCE COMMUNICATION, 3 Credits
Professional development of the skills of technical editing and writing for geoscientists. Practice the craft of presentation development and delivery, and the broader issues of problem development, and manuscript and proposal writing specific to geoscience graduate students.

GEO 527, VOLCANOLOGY, 4 Credits
A survey of volcanoes: their distribution, forms, composition, eruptive products, eruptive styles, and associated phenomena. Field trip may be required, transportation fee charged. Offered alternate years. Lec/lab.

GEO 530, GEOCHEMISTRY, 4 Credits
Principles of geochemistry applied to problems of earth science.
GEO 531, ENVIRONMENTAL GEOCHEMISTRY, 3 Credits
An introduction to natural processes at and near the earth's surface, as well as an examination of the impact of human activities on the natural environment. Study includes discussion of the sources, transformations, transport, and fate of contaminants. Field trip(s) required; transportation fee charged.

GEO 532, APPLIED GEOMORPHOLOGY, 3 Credits
Effect of landform processes upon human activity; consequences of resource management strategies on erosional balance within landscape; identification of mitigation of natural hazards; role of geomorphic process studies in environmental planning. Taught as seminar; themes TBA. Field trip(s) may be required; transportation fee charged. 
Equivalent to: GEOG 549

GEO 533, COASTAL GEOMORPHOLOGY, 3 Credits
Morphodynamic approach to coastal landforms, processes and evolution including the impacts and response of humans to coastal change.

GEO 535, GEOCHEMICAL ANALYSIS TECHNIQUES, 3 Credits
An introduction to the theory, techniques and instrumentation used for the chemical analysis of earth materials, with emphasis on analysis of solid earth material samples (predominantly, but not restricted to, rocks). Includes discussions of laboratory safety, relevant statistical approaches, basic physical and chemical principles of analysis, sample preparation techniques and data processing and reporting. Course also includes a large component of hands-on experience with instrumentation available in-house in the College of Earth, Ocean, and Atmospheric Sciences. Lec/lab. 
Prerequisite: GEO 530 with C or better

GEO 536, STRUCTURAL AND NEOTECTONIC FIELD METHODS, 3 Credits
Field-intensive mapping experience emphasizing a topical issue in active tectonics, neotectonics, earthquake geology, or structural geology. One-week field trip required; transportation fee charged. Weekly discussions during quarter. Offered alternate years.

GEO 537, TECTONIC GEOMORPHOLOGY, 3 Credits
Exploration of linkages between patterns of erosion, crustal deformation, and landscape evolution from geomorphic, geologic, geophysical, and modeling perspectives. Field trip required; transportation fee charged. Offered alternate years.

GEO 540, ECONOMIC GEOLOGY, 4 Credits
Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Lec/lab.

GEO 550, COASTAL HAZARDS: PROCESSES, RESPONSE, AND ADAPTATION, 3 Credits
Coastal hazards and the associated risks they pose to rapidly expanding coastal communities. Examination of coastal hazards from a trans-disciplinary perspective including the physical processes, the coastal response, and coastal adaptation/management options for dealing with the hazards. Emphasizes probabilistic and other user-inspired approaches for assessing coastal vulnerability to the various hazards.

GEO 561, GEOLOGY OF EARTHQUAKES, 3 Credits
Tectonics of the present day as based on surface geology, geodesy, seismicity, and crustal structure; description of active faults and folds; use of neotectonics in evaluation of earthquake hazard. Field trip(s) may be required; transportation fee charged. Offered alternate years.

GEO 563, GEOPHYSICS AND TECTONICS, 4 Credits
Geophysical observations as constraints on geologic interpretation. Lec/lab. 
Equivalent to: GPH 563

GEO 581, GLACIAL GEOLOGY, 4 Credits
Mass balance of glaciers, physics of glacial flow, processes of glacial erosion and deposition, glacial meltwater, glacial isostasy and eustasy, and Quaternary stratigraphy. Field trip(s) may be required; transportation fee charged. Lec/lab. Offered alternate years.

GEO 586, QUATERNARY PALEOCLIMATOLOGY, 3 Credits
Introduction to geochronology, climate proxies, climate forcing, and climate modeling applied to paleoclimate problems. Emphasis on Quaternary climate history.

GEO 588, QUATERNARY STRATIGRAPHY OF NORTH AMERICA, 3 Credits
Stratigraphic principles applied to Quaternary deposits. Survey Quaternary dating methods. Proxy records of glaciation and climate change. Quaternary stratigraphy of North America, emphasizing stratigraphic records of ice sheets, glaciers, and pluvial lakes. Offered alternate years.

GEO 597, FIELD MAPPING OF ORE DEPOSITS, 3 Credits
Eight-day field trip over spring vacation to a mineral district in the western United States, emphasizing detailed mapping of outcrops, trenches, and underground workings. Students prepare final maps and a report suitable for presentation to management or publication during spring term. Transportation fee charged. Not offered every year. 
Recommended: GEO 440 [C-] or GEO 540 [C-]

GEO 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 24 credits.
GEO 600, FIELD TRIPS, 1-16 Credits
Participation in group field trips that are not part of any other course. Transportation fee charged. Students may prepare guide for trips. Faculty sponsors must be arranged. Graded P/N. This course is repeatable for 84 credits.

GEO 601, RESEARCH, 1-16 Credits
This course is repeatable for 36 credits.

GEO 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

GEO 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

GEO 606, PROJECTS, 1-16 Credits
This course is repeatable for 84 credits.

GEO 607, SEMINAR, 1-16 Credits
Graded P/N. This course is repeatable for 48 credits.

GEO 608, WORKSHOP, 1-16 Credits
This course is repeatable for 24 credits.

GEO 622, IGNEOUS PETROLOGY, 3 Credits
Controls on the distribution of major and trace elements; theory, applications, and examples. Field trip(s) may be required; transportation fee charged. Offered alternate years. Recommended: GEO 412 [C-] or GEO 512 [C-]

GEO 633, GEOCHRONOLOGY AND ISOTOPE GEOLOGY, 3 Credits
Measurements of cosmic and geologic time by radioactive decay. Use of radiogenic and stable isotopic tracers in geology. Offered alternate years. Equivalent to: OC 633

GEO 666, STABLE ISOTOPE GEOCHEMISTRY, 3 Credits
Study of the principles governing terrestrial stable isotope distributions, with application to geologic, oceanographic, atmospheric and planetary processes. The primary focus is on isotopes of the light elements such as oxygen, hydrogen, carbon and sulfur, but may include other isotope systems, including Sr/Nd isotopes as geochemical tracers, noble gases, and metal isotopes (eg. Mo, Cu, Fe).

GEO 684, GLOBAL BIOGEOCHEMICAL CYCLES, 4 Credits
An in-depth treatment of global biogeochemical cycles, focusing on cycles of carbon, oxygen, nitrogen, phosphorus, and sulfur in the atmosphere, hydrosphere, and lithosphere. CROSSLISTED as GEO 684/SOIL 684. Equivalent to: SOIL 684

GEO 691, MASS AND HEAT TRANSPORT IN THE ENVIRONMENT, 4 Credits
Quantitative treatment of processes affecting transport in lakes, streams, and groundwater: advection; diffusion; dispersion. Lec/lab. Offered alternate years.

GEO 694, TOPICS IN ORE GENESIS, 1-3 Credits
In-depth examination of published research on selected mineral deposits to build an understanding of environments and processes of ore formation. Offered alternate years. This course is repeatable for 6 credits.

GEO 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 24 credits.

Geography (GEOG)

GEOG 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

GEOG 004, INTERNSHIP, 0 Credits
Provides basic personal and professional skills that can be used within and outside of a work setting. Through practice, this experience guides students in building and maintaining positive professional relationships, networking/mentoring relationships, and enhances students’ understanding of the connection between theory and practice in their respective disciplines.

GEOG 100, *CLIMATE JUSTICE, 3 Credits
Unequal distribution of social, economic and political power that creates winners and losers from climate change. Case studies of climate-change-related environmental degradation, conflict, conservation, climate denial, renewable energy, and investment. Concepts and actions to promote climate justice. Lec/rec. (Bacc Core Course) Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

GEOG 102, *PHYSICAL GEOGRAPHY, 4 Credits
Processes that shape the earth's surface. Weathering, mass movement, landforms, river systems, groundwater, biogeography, human effects on the landscape. Use of maps and imagery. (Bacc Core Course) Attributes: CPPS – Core, Pers, Physical Science Equivalent to: GEO 102 Available via Ecampus

GEOG 103, *THE HUMAN PLANET, 3 Credits
Introduces the study of human activities, patterns, processes and institutions–globally and in specific places. Examines human behaviors and relationships, among cultures and with the environment. Demonstrates the importance of places, networks and patterns in a range of human and environmental processes. (Bacc Core Course) Attributes: CPCD – Core, Pers, Cult Diversity Available via Ecampus
GEOG 105, *GEOGRAPHY OF THE NON-WESTERN WORLD, 3 Credits
An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economies in Africa, the Middle East, and Asia. Lec/lab/rec. (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity
Equivalent to: GEO 105
Available via Ecampus

GEOG 106, *GEOGRAPHY OF THE WESTERN WORLD, 3 Credits
An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economics in Europe and Russia, Australia and Oceania, and the Americas. Lec/rec. (SS) (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture; LACS – Liberal Arts Social Core
Equivalent to: GEO 106
Available via Ecampus

GEOG 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

GEOG 201, *FOUNDATIONS OF GEOSPATIAL SCIENCE AND GIS, 4 Credits
Basic physical science principles underlying geospatial technologies such as GPS, mobile devices, and online mapping and navigation tools used in GIS, remote sensing, and geovisualization. Concepts and applications in government, business, and the environment. (Bacc Core Course)
Attributes: CPPS – Core, Pers, Physical Science
Equivalent to: GEO 301
Available via Ecampus

GEOG 203, *HUMAN-ENVIRONMENT GEOGRAPHY, 3 Credits
How human societies manage resources, physical limits to sustainability, role of science in the use and management of resources, and how societal resource use adversely affects other societies, in human history and across spatial scales. Lec/rec. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination
Available via Ecampus

GEOG 240, *HUMAN DIMENSIONS OF CLIMATE CHANGE, 3 Credits
Examine theories regarding human institutions and behavior. Apply these theories to understand how human behavior and institutions can change to: (1) reduce vulnerability to climate change impacts through adaptation and (2) reduce greenhouse gas emissions through climate change mitigation and societal transformation at multiple scales. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst

GEOG 241, *TRANSFORMING ENVIRONMENTAL CONFLICTS, 3 Credits
Explores the geography of environmental conflicts; an examination of how social processes and institutions influence access and use of natural resources; and the social constructs from which difference, power, and discrimination emerge. Examines the experiences of women, minority, and under-represented communities to contemplate more integrated, equitable and sustainable approaches to resources management, in the United States and beyond. Personal skills in transforming conflicts, as well as the concepts of distributive, procedural, and restorative justice, will be explored. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

GEOG 250, *LAND USE PLANNING FOR SUSTAINABLE COMMUNITIES, 3 Credits
Overview of the history and current practices of land use and community planning. Use basic geospatial tools to assess land use patterns and planning processes. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Available via Ecampus

GEOG 251, *GEOGRAPHY OF DISASTER MANAGEMENT, 3 Credits
Introduction to the geographic concepts and processes for effective disaster management, including response, recovery, mitigation and preparedness. Risk assessment and evidence-based best practices to prepare and respond to emergencies in a variety of geographic contexts. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst
Equivalent to: GEO 205

GEOG 295, GEOGRAPHIC FIELD RESEARCH, 3 Credits
Introduction to field research in geography. Practice skills including observation, posing of questions, and collection and analysis of data. Focus on theory-based geographic study design, proposal development, and research critiques.
Recommended: GEOG 102 or GEOG 103 or GEOG 201 or GEOG 203
Available via Ecampus

GEOG 299, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

GEOG 300, *SUSTAINABILITY FOR THE COMMON GOOD, 3 Credits
Geography of human relationships to the earth’s systems with an emphasis on individual impacts and collective efforts to achieve environmental sustainability. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Equivalent to: GEO 300, GEOG 300H
Available via Ecampus
GEOG 300H, *SUSTAINABILITY FOR THE COMMON GOOD, 3 Credits
Geography of human relationships to the earth’s systems with an emphasis on individual impacts and collective efforts to achieve environmental sustainability. (SS) (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; LACS – Liberal Arts Social Core
Equivalent to: GEO 300, GEOG 300

GEOG 311, *GEOGRAPHY OF AFRICA, 3 Credits
An introduction to the physical, historical, cultural, political, and development geography of Africa south of the Sahara. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: GEO 325

GEOG 313, *GEOGRAPHY OF ASIA, 3 Credits
Geographic analysis of Asia’s lands and peoples. Emphasis on regional physical environments, resources and development potentials, population trends, and international importance to the United States. Offered once every other year. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: GEO 327

GEOG 314, *GEOGRAPHY OF LATIN AMERICA, 3 Credits
Focuses on the diverse landscapes, peoples and cultural traditions of Latin America, a vast region extending from the United States-Mexican border to the southern tip of South America. (NC) (Bacc Core Course)
Attributes: CPCD – Core, Pers, Cult Diversity; LACN – Liberal Arts Non-Western Core
Equivalent to: GEO 328
Available via Ecampus

GEOG 323, ^CLIMATOLOGY, 4 Credits
Systematic analysis of global and regional climates. Physical principles of climate, climate classifications, and distribution and characteristics of climate regimes. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: GEOG 102 with D- or better or GEO 202 with D- or better or GEO 221 with D- or better or ATS 201 with D- or better or OC 201 with C- or better
Equivalent to: GEO 323
Available via Ecampus

GEOG 324, ^ECOLOGICAL BIOGEOGRAPHY, 4 Credits
Spatial distributions and change over time of species, communities, and biomes. Effect of climate, tectonics, disturbance on evolution, extinction, and succession. Implications for conservation. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: GEOG 102 with D- or better or (BI 370 with C- or better or BI 370H with C- or better)
Equivalent to: GEO 324

GEOG 330, *GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION, 3 Credits
Introduction to the geography of global wealth and inequality with a focus on contemporary development, underdevelopment, and globalization problems in Asian, African, Caribbean, Latin American, and Pacific Island countries. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

GEOG 331, *POPULATION, CONSUMPTION, AND ENVIRONMENT, 3 Credits
An examination of population patterns and trends, emphasizing historical growth and more recent demographic changes; using geographic tools to understand patterns of spatial distribution, to use and analyze data sources, and to gain experience interpreting and displaying data about population structure and dynamics; and developing the ability to evaluate the relationship between population, consumption, resources, and quality of life. Patterns of consumption, as individuals and societies will be examined and different future scenarios will be examined with reference to environmental, social and economic sustainability. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: GEO 350
Available via Ecampus

GEOG 340, *INTRODUCTION TO WATER SCIENCE AND POLICY, 3 Credits
Policy and science of the hydrologic cycle. Emphasis on interaction between water’s natural time-space fluctuations and human uses. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: CSS 335, CSS 335H, GEO 335, GEO 335H, GEOG 340H, SOIL 335
Available via Ecampus

GEOG 340H, *INTRODUCTION TO WATER SCIENCE AND POLICY, 3 Credits
Policy and science of the hydrologic cycle. Emphasis on interaction between water’s natural time-space fluctuations and human uses. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: CSS 335, CSS 335H, GEO 335, GEO 335H, GEOG 340, SOIL 335

GEOG 350, *GEOGRAPHY OF NATURAL HAZARDS, 3 Credits
Introduction to the geography of risk, natural hazards, and disasters, focusing on concepts of vulnerability, adaptation and resilience of human society in the Pacific Northwest and globally.
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: GEO 304
Available via Ecampus
GEOG 360, GISCIENCE I: GEOGRAPHIC INFORMATION SYSTEMS AND THEORY, 4 Credits
Fundamentals of spatial data, geographic information systems (GIS), and introductory spatial analysis, programming, and modeling.
Equivalent to: GEO 365
Available via Ecampus

GEOG 361, GISCIENCE II: ANALYSIS AND APPLICATIONS, 4 Credits
Applications-based course. Development and conduct of geospatial analyses using various spatial data structures, techniques and models. Acquire, clean, integrate, manipulate, visualize and analyze geospatial data through laboratory work.
Prerequisite: GEOG 360 with C- or better and (MTH 112 [C-] or MTH 241 [C-] or MTH 251 [C-]) and ST 351 [C-]
Available via Ecampus

GEOG 370, CARTOGRAPHY, 4 Credits
Creation, evaluation, and critique of maps using cartographic theories for effective geovisual communication and geospatial thinking.
Prerequisite: GEOG 201 with C- or better
Available via Ecampus

GEOG 371, WEB MAPPING, 4 Credits
Concepts and techniques of web programming, digital storytelling, online project management, and web-based cartographic principles for developing, evaluating, and using web maps.
Prerequisite: GEOG 201 with C- or better

GEOG 399, SPECIAL STUDIES, 1-16 Credits
Equivalent to: GEOG 399H
This course is repeatable for 16 credits.

GEOG 399H, SPECIAL STUDIES, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: GEOG 399
This course is repeatable for 16 credits.

GEOG 400, FIELD TRIPS, 1-16 Credits
Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged.
This course is repeatable for 48 credits.

GEOG 401, RESEARCH, 1-16 Credits
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEOG 403, THESIS, 1-16 Credits
Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEOG 405, READING AND CONFERENCE, 1-16 Credits
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged.
This course is repeatable for 16 credits.

GEOG 407, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.
Available via Ecampus

GEOG 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

GEOG 410, INTERNSHIP, 1-16 Credits
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 16 credits.
Recommended: 12 credits of upper-division geography
Available via Ecampus

GEOG 423, SNOW HYDROLOGY, 3 Credits
Fundamentals of snow hydrology. Physical principles of snow formation, snowpack accumulation, energy balance, snowcover-climate interactions, snow metamorphism, snowpack ablation, snowpack/snowmelt chemistry, remote sensing of snow, avalanches, field methods, snowmelt/runoff modeling techniques, and watershed processes.
Equivalent to: GEO 483

GEOG 424, HYDROLOGY FOR WATER RESOURCES MANAGEMENT, 3 Credits
A quantitative introduction to surface and subsurface hydrology with a focus on decision making for the water resource professional
Prerequisite: MTH 251 with C- or better

GEOG 430, RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT, 3 Credits
Causes and consequences of conflict over natural resource management at local to global scales; principles for managing social-ecological systems for resilience. Field trip(s) may be required; transportation fee charged.
Equivalent to: GEO 420

GEOG 431, GLOBAL RESOURCES AND DEVELOPMENT, 3 Credits
Examines resource development issues and strategies in the Global South. Issues and strategies from agriculture, forestry, fisheries, energy, wildlife management, mineral development, land use, and health are examined.
Equivalent to: GEO 426
GEOG 432, *GEOGRAPHY OF FOOD AND AGRICULTURE, 3 Credits
Overview of food and agriculture in relation to production and consumption regions as a basis for distinguishing different types of food and agricultural systems. Local and global examination of the geographic aspects of breeding, location in agricultural systems, and adaptation in agro-ecosystems using field study, explorations of literature, and lecture. Field trip required, transportation fee charged. (Bacc Core Course) 
**Attributes:** CSST – Core, Synthesis, Science/Technology/Society 
**Equivalent to:** GEO 449

GEOG 433, CLIMATE CHANGE IMPACTS, ADAPTATION AND VULNERABILITY, 3 Credits
Climate change poses challenges for human security and well-being, and for social and economic development. Evaluate how climate change impacts vary based on vulnerability, exposure, sensitivity, adaptive capacity, and risk. 
**Prerequisite:** ATS 201 with C- or better or GEOG 240 with C- or better or GEOG 323 with C- or better

GEOG 440, CONFLICT, COOPERATION, AND CONTROL OF WATER IN THE US, 3 Credits
Examine why nations rise and fall based on water availability and investigate why the United States is no exception. Explore how the US develops, protects, governs and manages its water resources and how it will cope with climate change and conflict. Discover resilience and sustainability through case studies. 
**Available via Ecampus**

GEOG 441, THE WORLD'S WATER, 3 Credits
Investigate why water is a critical resource that supports life, livelihoods, and the environment. Understand that where rivers crosses political boundaries, the sharing of water presents challenges and opportunities. Interpret how international basins are governed; Evaluate how dams and water development affect ecology and people, and apply water conflict management frameworks to emerging international water issues. 
**Available via Ecampus**

GEOG 450, LAND USE IN THE AMERICAN WEST, 3 Credits
Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation. 
**Equivalent to:** GEO 423

GEOG 452, ENVIRONMENTAL ASSESSMENT, 3 Credits
Environmental site assessment is a primary tool for environmental science professionals. Apply environmental science concepts to evaluate features of a specific natural area and conduct a land suitability analysis. Create a conceptual site design and management plan that complies with federal, state, and local regulations and environmental laws. CROSSLISTED as ENSC 452/GEOG 452 and GEOG 552. 
**Equivalent to:** ENSC 452 
**Available via Ecampus**

GEOG 462, GISCIENCE III: PROGRAMMING FOR GEOSPATIAL ANALYSIS, 4 Credits
Introduction to the extension of geographic information systems (GIS) through programming. No prior programming experience is expected. Teaches a pragmatic approach to design and write programs for geospatial analysis. 
**Prerequisite:** GEOG 361 with C- or better 
**Available via Ecampus**

GEOG 463, GISCIENCE IV: SPATIAL MODELING, 4 Credits
Introduction to spatial simulation models representing attraction, segregation, individual entities, and processes of spread, applied to contemporary problems in human and physical geography. 
**Prerequisite:** GEOG 462 with C- or better or GEOG 552 with C- or better or GEO 578 with C- or better

GEOG 464, GEOSPATIAL PERSPECTIVES ON INTELLIGENCE, SECURITY AND ETHICS, 3 Credits
Applications and implications of geospatial science (GIS, remote sensing, and spatial analysis) in intelligence, human, environmental, and ethical domains. Concepts and practices of ethics in geospatial science, including data access, management, visualization, and decision-making. 
**Prerequisite:** GEOG 360 with C- or better 
**Recommended:** Senior standing 
**Available via Ecampus**

GEOG 472, GEOPHYSICAL ANALYSIS: GEOVISUAL ANALYTICS, 3 Credits
Concepts and techniques underlying the production of maps by computer. Practical experience with a variety of computer mapping packages. Lec/lab. 
**Prerequisite:** GEOG 370 with C- or better or GEOG 371 with C- or better or GEO 360 with C- or better 
**Equivalent to:** GEO 445

GEOG 480, REMOTE SENSING I: PRINCIPLES AND APPLICATIONS, 4 Credits
Fundamentals of satellite remote sensing and image analysis. Topics include physical principles of remote sensing from the ultraviolet to the microwave, sensors and sensor technology, and environmental applications of remote sensing through image analysis. 
**Prerequisite:** GEOG 201 with C- or better 
**Available via Ecampus**
GEOG 481, SATELLITE IMAGE ANALYSIS, 4 Credits
Intermediate concepts and techniques for satellite image processing including image enhancement, clustering, classification, machine learning, change detection, and time series analysis. Hands-on experience with open-source, large volume data and geospatial programming within Google Earth engine.
Prerequisite: GEOG 480 with C- or better and (ST 314 [C-] or ST 351 [C-] or ST 351H [C-])

GEOG 495, FIELD GEOGRAPHY SYNTHESIS, 3 Credits
Explore how geographers use field work to investigate landscapes such as mountains, forests, coasts, tundra and desert to understand how they were formed and explain how they have changed over time. Learn techniques for finding out how landscape processes impact humans and, in turn, how humans impact the environment around them. Apply geographic theories and concepts to synthesize, analyze and interpret the relationship between human communities and the environment through the planning and execution of field work.
Prerequisite: GEOG 295 with C- or better
Available via Ecampus

GEOG 499, SPECIAL STUDIES, 0-16 Credits
This course is repeatable for 16 credits.

GEOG 500, FIELD TRIPS, 1-16 Credits
Participation in group field trips that are not a part of any other course. Transportation fee charged. Students may prepare guides for trips. Faculty sponsor must be prearranged.
This course is repeatable for 48 credits.

GEOG 501, RESEARCH, 1-16 Credits
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged.
This course is repeatable for 24 credits.

GEOG 503, THESIS, 1-16 Credits
Independent, original study that culminates in a thesis. Faculty sponsor must be prearranged.
This course is repeatable for 999 credits.

GEOG 505, READING AND CONFERENCE, 1-16 Credits
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged.
This course is repeatable for 16 credits.

GEOG 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

GEOG 510, INTERNSHIP, 1-15 Credits
Pre-career professional experience under joint faculty and employer supervision. Graded P/N.
This course is repeatable for 16 credits.
Available via Ecampus

GEOG 511, HISTORY AND PHILOSOPHY OF GEOGRAPHY, 3 Credits
The historical development of research traditions in the discipline of geography. This includes an examination of changes in conceptual structures and current trends.
Equivalent to: GEO 515

GEOG 512, SOCIAL-ECOLOGICAL SYSTEMS, 3 Credits
Exploration of critical debates surrounding theories associated with social-ecological systems, resilience, vulnerability, adaptation, social learning, transformation, adaptive governance.
Equivalent to: GEO 554
Recommended: 9 credits of graduate study.

GEOG 523, SNOW HYDROLOGY, 3 Credits
Fundamentals of snow hydrology. Physical principles of snow formation, snowpack accumulation, energy balance, snowcover-climate interactions, snow metamorphism, snowpack ablation, snowpack/snowmelt chemistry, remote sensing of snow, avalanches, field methods, snowmelt/ runoff modeling techniques, and watershed processes.
Equivalent to: GEO 583

GEOG 524, HYDROLOGY FOR WATER RESOURCES MANAGEMENT, 3 Credits
A quantitative introduction to surface and subsurface hydrology with a focus on decision making for the water resource professional.
Recommended: MTH 251

GEOG 530, RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT, 3 Credits
Causes and consequences of conflict over natural resource management at local to global scales; principles for managing social-ecological systems for resilience. Field trip(s) may be required; transportation fee charged.
Equivalent to: GEO 520

GEOG 531, GLOBAL RESOURCES AND DEVELOPMENT, 3 Credits
Examines resource development issues and strategies in the Global South. Issues and strategies from agriculture, forestry, fisheries, energy, wildlife management, mineral development, land use, and health are examined.
Equivalent to: GEO 526
GEOG 532, GEOGRAPHY OF FOOD AND AGRICULTURE, 3 Credits
Overview of food and agriculture in relation to production and consumption regions as a basis for distinguishing different types of food and agricultural systems. Local and global examination of the geographic aspects of breeding, location in agricultural systems, and adaptation in agro-ecosystems using field study, explorations of literature, and lecture. Field trip required, transportation fee charged.
Equivalent to: GEO 549

GEOG 533, CLIMATE CHANGE IMPACTS, ADAPTATION AND VULNERABILITY, 3 Credits
Climate change poses challenges for human security and well-being, and for social and economic development. Evaluate how climate change impacts vary based on vulnerability, exposure, sensitivity, adaptive capacity, and risk.

GEOG 540, CONFLICT, COOPERATION, AND CONTROL OF WATER IN THE US, 3 Credits
Examine why nations rise and fall based on water availability and investigate why the United States is no exception. Explore how the US develops, protects, governs and manages its water resources and how it will cope with climate change and conflict. Discover resilience and sustainability through case studies.
Available via Ecampus

GEOG 541, THE WORLD’S WATER, 3 Credits
Investigate why water is a critical resource that supports life, livelihoods, and the environment. Understand that where rivers crosses political boundaries, the sharing of water presents challenges and opportunities. Interpret how international basins are governed; Evaluate how dams and water development affect ecology and people; and apply water conflict management frameworks to emerging international water issues.
Available via Ecampus

GEOG 546, ADVANCED LANDSCAPE AND SEASCAPE ECOLOGY, 4 Credits
Pattern-process interactions in large scale ecological and physical systems, including terrestrial, aquatic, and marine/ocean ecosystems. Principles of pattern-process interactions from genetic to community levels of ecological organization applied to design of conservation reserves. Hypothesis testing, field techniques, spatial models/statistics, GIS/remote sensing.
Equivalent to: GEO 546

GEOG 550, LAND USE IN THE AMERICAN WEST, 3 Credits
Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation.
Equivalent to: GEO 523

GEOG 551, PLANNING PRINCIPLES AND PRACTICES FOR RESILIENT COMMUNITIES, 4 Credits
Applies GIS skills and techniques to determine and analyze future land uses. Determine suitable land uses that incorporate community goals, site constraints and minimize use conflicts. Regulatory and market-based implementation strategies for land uses will also be discussed.
Prerequisite: GEOG 560 with C or better
Available via Ecampus

GEOG 552, ENVIRONMENTAL ASSESSMENT, 3 Credits
Environmental site assessment is a primary tool for environmental science professionals. Apply environmental science concepts to evaluate features of a specific natural area and conduct a land suitability analysis. Create a conceptual site design and management plan that complies with federal, state, and local regulations and environmental laws.
CROSSLISTED as ENSC 452/GEOG 452 and GEOG 552.
Available via Ecampus

GEOG 553, CLIMATE CHANGE IMPACTS, ADAPTATION AND VULNERABILITY, 3 Credits
Climate change poses challenges for human security and well-being, and for social and economic development. Evaluate how climate change impacts vary based on vulnerability, exposure, sensitivity, adaptive capacity, and risk.

GEOG 540, CONFLICT, COOPERATION, AND CONTROL OF WATER IN THE US, 3 Credits
Examine why nations rise and fall based on water availability and investigate why the United States is no exception. Explore how the US develops, protects, governs and manages its water resources and how it will cope with climate change and conflict. Discover resilience and sustainability through case studies.
Available via Ecampus

GEOG 541, THE WORLD’S WATER, 3 Credits
Investigate why water is a critical resource that supports life, livelihoods, and the environment. Understand that where rivers crosses political boundaries, the sharing of water presents challenges and opportunities. Interpret how international basins are governed; Evaluate how dams and water development affect ecology and people; and apply water conflict management frameworks to emerging international water issues.
Available via Ecampus

GEOG 546, ADVANCED LANDSCAPE AND SEASCAPE ECOLOGY, 4 Credits
Pattern-process interactions in large scale ecological and physical systems, including terrestrial, aquatic, and marine/ocean ecosystems. Principles of pattern-process interactions from genetic to community levels of ecological organization applied to design of conservation reserves. Hypothesis testing, field techniques, spatial models/statistics, GIS/remote sensing.
Equivalent to: GEO 546

GEOG 550, LAND USE IN THE AMERICAN WEST, 3 Credits
Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation.
Equivalent to: GEO 523

GEOG 551, PLANNING PRINCIPLES AND PRACTICES FOR RESILIENT COMMUNITIES, 4 Credits
Applies GIS skills and techniques to determine and analyze future land uses. Determine suitable land uses that incorporate community goals, site constraints and minimize use conflicts. Regulatory and market-based implementation strategies for land uses will also be discussed.
Prerequisite: GEOG 560 with C or better
Available via Ecampus

GEOG 552, ENVIRONMENTAL ASSESSMENT, 3 Credits
Environmental site assessment is a primary tool for environmental science professionals. Apply environmental science concepts to evaluate features of a specific natural area and conduct a land suitability analysis. Create a conceptual site design and management plan that complies with federal, state, and local regulations and environmental laws.
CROSSLISTED as ENSC 452/GEOG 452 and GEOG 552.
Available via Ecampus

GEOG 553, CLIMATE CHANGE IMPACTS, ADAPTATION AND VULNERABILITY, 3 Credits
Climate change poses challenges for human security and well-being, and for social and economic development. Evaluate how climate change impacts vary based on vulnerability, exposure, sensitivity, adaptive capacity, and risk.

GEOG 540, CONFLICT, COOPERATION, AND CONTROL OF WATER IN THE US, 3 Credits
Examine why nations rise and fall based on water availability and investigate why the United States is no exception. Explore how the US develops, protects, governs and manages its water resources and how it will cope with climate change and conflict. Discover resilience and sustainability through case studies.

GEOG 546, ADVANCED LANDSCAPE AND SEASCAPE ECOLOGY, 4 Credits
Pattern-process interactions in large scale ecological and physical systems, including terrestrial, aquatic, and marine/ocean ecosystems. Principles of pattern-process interactions from genetic to community levels of ecological organization applied to design of conservation reserves. Hypothesis testing, field techniques, spatial models/statistics, GIS/remote sensing.
Equivalent to: GEO 546

GEOG 550, LAND USE IN THE AMERICAN WEST, 3 Credits
Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation.
Equivalent to: GEO 523
GEOG 564, GEOSPATIAL PERSPECTIVES ON INTELLIGENCE, SECURITY AND ETHICS, 3 Credits
Applications and implications of geospatial science (GIS, remote sensing, and spatial analysis) in intelligence, human, environmental, and ethical domains. Concepts and practices of ethics in geospatial science, including data access, management, visualization, and decision-making.
Prerequisite: GEOG 560 with C or better
Available via Ecampus

GEOG 565, SPATIO-TEMPORAL VARIATION IN ECOLOGY AND EARTH SCIENCE, 4 Credits
Objectives and techniques of spatial and temporal analysis. Point patterns, geostatistics, spectral analysis, wavelet analysis, interpolation, and mapping.
Equivalent to: GEO 541

GEOG 566, ADVANCED SPATIAL STATISTICS AND GISCIENCE, 4 Credits
Provides advanced graduate students from a variety of disciplines in earth science and ecology the opportunity to structure and conduct spatio-temporal analyses using available software tools and their own datasets for their graduate research.
Equivalent to: GEO 584

GEOG 571, ADVANCED WEB MAPPING, 4 Credits
Advanced concepts and techniques of web programming, digital storytelling, online project management, and web-based cartographic principles for developing, evaluating, and using web maps.

GEOG 572, GEOVISUALIZATION: GEOVISUAL ANALYTICS, 3 Credits
Concepts and techniques underlying the production of maps by computer. Practical experience with a variety of computer mapping packages. Lec/lab.
Equivalent to: GEO 545
Recommended: GEOG 370 or GEOG 371

GEOG 580, REMOTE SENSING I: PRINCIPLES AND APPLICATIONS, 4 Credits
Fundamentals of satellite remote sensing and image analysis. Topics include physical principles of remote sensing from the ultraviolet to the microwave, sensors and sensor technology, and environmental applications of remote sensing through image analysis.
Recommended: GEOG 201
Available via Ecampus

GEOG 581, SATELLITE IMAGE ANALYSIS, 4 Credits
Intermediate concepts and techniques for satellite image processing including image enhancement, clustering, classification, machine learning, change detection, and time series analysis. Hands-on experience with open-source, large volume data and geospatial programming within Google Earth engine.
Prerequisite: GEOG 580 with C- or better

GEOG 585, REMOTE SENSING II: APPLICATIONS, 4 Credits
Intermediate and advanced topics in remote sensing with an emphasis on applications. Includes case studies and projects.
Equivalent to: GEO 542

GEOG 595, FIELD GEOGRAPHY OF OREGON, 3 Credits
Investigate how geographers use field work to study landscapes such as mountains, forests, coasts, tundra and desert to understand how they were formed and explain how they have changed over time. Apply techniques for finding out how landscape processes impact humans and, in turn, how humans impact the environment around them. Apply geographic theories and concepts to synthesize, analyze and interpret the relationship between human communities and the environment through the planning and execution of field work in Oregon.

GEOG 596, FIELD RESEARCH IN GEOMORPHOLOGY AND LANDSCAPE ECOLOGY, 3 Credits
Natural history interpretation of disturbance and recovery processes and management implications in forest-stream landscapes of western Oregon. Course consists of field experience and several seminars. Transportation and lodging fee charged.
Equivalent to: GEO 548
Recommended: 9 graduate credits in sciences or engineering.

GEOG 599, SPECIAL STUDIES, 0-16 Credits
This course is repeatable for 24 credits.

GEOG 600, FIELD TRIPS, 1-16 Credits
Participation in group field trips that are not a part of any other course. Transportation fee charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. This course is repeatable for 48 credits.

GEOG 601, RESEARCH, 1-16 Credits
Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged. This course is repeatable for 36 credits.

GEOG 603, THESIS, 1-16 Credits
Independent, original study that culminates in a thesis. Faculty sponsor must be prearranged. This course is repeatable for 999 credits.

GEOG 605, READING AND CONFERENCE, 1-16 Credits
Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for 16 credits.
GEOG 607, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

GEOG 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

GEOG 699, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 24 credits.

Geophysics (GPH)

GPH 501, RESEARCH, 1-16 Credits
Original research work that will not be part of the data used in a thesis.
Graded P/N.
This course is repeatable for 24 credits.

GPH 503, THESIS, 1-16 Credits
Thesis research and writing.
This course is repeatable for 999 credits.

GPH 505, READING AND CONFERENCE, 1-16 Credits
Independent reading and library research on specialized topics in geophysics, guided by discussions with supervising faculty. A written report may be required.
This course is repeatable for 16 credits.

GPH 507, SEMINAR, 1-16 Credits
This course is repeatable for 48 credits.

GPH 601, RESEARCH, 1-16 Credits
Original research work that will not be part of the data used in a thesis.
Graded P/N.
This course is repeatable for 36 credits.

GPH 603, THESIS, 1-16 Credits
Thesis research and writing.
This course is repeatable for 999 credits.

GPH 605, READING AND CONFERENCE, 1-16 Credits
Independent reading and library research on specialized topics in geophysics, guided by discussions with supervising faculty. A written report may be required.
This course is repeatable for 16 credits.

GPH 607, SEMINAR, 1-16 Credits
This course is repeatable for 48 credits.

GPH 630, ELEMENTS OF SEISMOLOGY, 4 Credits
Survey of basic concepts in global seismology: world seismicity; elastic structure of the earth; seismic wave paths in the earth; locating earthquakes; earthquake focal mechanisms, magnitudes, stress drop, energy; stress and strain, elasticity, wave equation, plane waves in homogeneous and layered media, surface waves, free oscillations; ray theory; seismomety; earthquake prediction. Laboratory exercises include interpretation and analysis of seismograms from global seismographic networks.
Recommended: Differential equations.

GPH 632, CRUSTAL SEISMOLOGY, 3 Credits
Structure of the earth's crust and upper mantle from seismic reflection and large offset (refraction, wide-angle reflection) data. Methods of data collection, data processing theory and practice, modeling and interpretation techniques, correlation of seismic results with laboratory measurements of rock properties, and regional case studies.
Prerequisite: GPH 630 with C or better

GPH 640, GEODESY, 4 Credits
Physical and observational geodesy, including the Earth's gravity field and potential and determination of the Earth's geoid. Interpretation of geoid, geoid anomalies, and isostatic compensation. Gravity, point-position and remote sensing geodetic measurement techniques, including GPS, InSAR, VLBI, leveling, triangulation/trilateration, and low-Earth orbit gravity satellite missions are covered as are geodetic reference frames. Offered alternate years.

GPH 641, ELECTROMAGNETIC METHODS IN GEOPHYSICS, 3 Credits
Survey of electromagnetic (EM) methods in geophysics. Review of electromagnetic theory, Maxwell's equations in the quasi-static limit, the diffusion of EM fields in a layered conductor, qualitative discussion of EM fields in 2- and 3-D conductors. EM techniques, including DC resistivity, magnetotellurics, controlled source EM, induced polarization, and long-period magnetometer array methods. Applications to exploration, to basic research on crustal structure and to studies of upper-mantel conductivity.
Recommended: Upper-division EM course.

GPH 642, EARTH MAGNETISM, 3 Credits
Geomagnetism and magnetic potential: general morphology and secular change; internal and external sources; principles of paleomagnetism, including field and laboratory procedures; origin of remnant magnetism in rocks and the controlling physical and chemical processes; the origin of the Earth's magnetic field.

GPH 650, GEOPHYSICAL INVERSE THEORY, 4 Credits
Survey of the theory and applications of inverse methods currently used in the geophysical sciences for the interpretation of inaccurate and inadequate data. Backus-Gilbert inverse theory, resolution, regularization methods (such as damped least squares) for linear and non-linear problems, stochastic inversion, and extremal models. Applications to seismic, gravity, magnetic and electromagnetic data.
Recommended: Linear algebra
GPH 651, GEODYNAMICS I, 3 Credits
Application of the techniques of continuum mechanics to geological problems. Thermal and subsidence history of the lithosphere; stress and strain in the earth; elasticity and flexure of the lithosphere; gravitational compensation. Lec. Offered odd years on Corvallis campus in fall term (subject to change).

GPH 665, GEOPHYSICAL FIELD TECHNIQUES, 3 Credits
Instrumentation, field methods and interpretation of gravimetric, magnetic, electrical and seismic prospecting techniques. Students will be required to collect, reduce, analyze, and interpret data.

GPH 689, SPECIAL TOPICS IN GEOPHYSICS, 1-4 Credits
Special topics of current interest in geophysics, not covered in detail in other courses. May be repeated on different topics for credit. This course is repeatable for 16 credits.

Marine Resource Management (MRM)

MRM 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Graded P/N. This course is repeatable for 24 credits.

MRM 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

MRM 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

MRM 506, PROJECTS, 1-16 Credits
This course is repeatable for 72 credits.

MRM 507, SEMINAR, 1-16 Credits
This course is repeatable for 48 credits.

MRM 508, WORKSHOP, 1-16 Credits
This course is repeatable for 24 credits.

MRM 510, INTERNSHIP, 1-9 Credits
Planned and supervised resource management experience with selected cooperating governmental agencies, private organizations, or business firms. Supplementary conferences, reports and evaluations. Graded P/N. This course is repeatable for 16 credits.

MRM 525, SPECIAL TOPICS IN MARINE RESOURCE MANAGEMENT, 1-4 Credits
Subjects of current interest in marine resource management not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for 24 credits.

MRM 530, PRINCIPLES AND PRACTICE OF MARINE RESOURCE MANAGEMENT, 3 Credits
Introduces learners to the core concepts/skills required for guiding the management of the interactions between human and natural marine systems. Particular attention is given to the concept and framework of Ecosystem-Based Management, the goal of which is to conserve, maintain and restore ecosystem functions to promote the economic and ecological sustainability of marine ecosystems and human communities that depend on the services they provide. Tomorrow’s marine resource managers must be capable of identifying, requesting, analyzing, synthesizing, and combining natural and social science with experiential knowledge and human/social capital to generate meaningful policy and management recommendations and strategies.

MRM 534, OCEANS IN CRISIS, 3 Credits
Explores the state of the world’s oceans and coasts, whether or not they are indeed in crisis, and what, if any management responses can be reasonably expected to halt and restore our oceans.

MRM 535, RIGHTS-BASED FISHERIES MANAGEMENT, 3 Credits
Clear, appropriate and enforceable fishing entitlements and responsibilities are a cornerstone of sustainable fisheries management. Rights-based management tools such as dedicated access privileges, community quotas, co-management and cost recovery will be explored as ways of promoting individual and collective responsibility for sustainable fisheries management. High seas fisheries will also be addressed.

MRM 552, MARINE ECONOMICS, 3 Credits
Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. CROSSLISTED as AEC 552/VRM 552. Equivalent to: AEC 552, AREC 552
Recommended: AEC 351 or AEC 352 or AREC 351 or AREC 352

MRM 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 24 credits.

Oceanography (OC)

OC 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

OC 004, INTERNSHIP, 0 Credits
Provides basic personal and professional skills that can be used within and outside of a work setting. Through practice, this experience guides students in building and maintaining positive professional relationships, networking/mentoring relationships, and enhances students’ understanding of the connection between theory and practice in their respective disciplines.
**OC 103, *EXPLORING THE DEEP: GEOGRAPHY OF THE WORLD’S OCEANS, 4 Credits**

Introduces non-science students to the oceans, including marine geology and chemistry, ocean currents, coastal and biological processes. Field trip required, transportation fee charged. Lec/lab. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science

Equivalent to: GEO 103H, OC 103H

Available via Ecampus

---

**OC 199, SPECIAL TOPICS IN OCEANOGRAPHY, 1-4 Credits**

Introduction to topics of current interest in oceanography for lower-division undergraduates. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

---

**OC 201, *OCEANOGRAPHY, 4 Credits**

Plate tectonics and the geological structure of ocean basins; physical and chemical properties of seawater; Earth's energy budget; large-scale circulation of the atmosphere and ocean; marine sediment properties and transport; Earth history recorded in marine sediments; the carbon cycle in the atmosphere and sea; and the ecology of pelagic and benthic systems. Lec/lab. (Bacc Core Course)

Attributes: CPPS – Core, Pers, Physical Science

Equivalent to: OC 331H

Available via Ecampus

---

**OC 202, *INTRODUCTION TO BIOLOGICAL OCEANOGRAPHY, 4 Credits**

Explores critical topics to biological oceanography, including: the interaction of ocean life, past and present, with its chemical, physical, and geological environment; how ocean life captures energy to produce food and affect climate; and how historical sea-faring observations shaped our understanding of ocean life relative to current technological advances.

Attributes: CPBS – Core, Pers, Biological Science

---

**OC 295, INTRODUCTION TO FIELD OCEANOGRAPHY - LAND, 1 Credit**

OC 295 is preparatory for the intensive OC 296 field portion at sea. Students will learn about the collection of samples and data using methods and instruments that are common in sea-going oceanography and help plan the cruise.

Prerequisite: OC 201 (may be taken concurrently) with D- or better

---

**OC 296, INTRODUCTION TO FIELD OCEANOGRAPHY - SEA, 2 Credits**

The sea-going field portion of OC 295 onboard a large research vessel. During the multi-day cruise students will collect oceanographic data and samples from the coastal ocean. Students who complete OC 295 and OC 296 will learn how to collect data and samples on the high seas, conduct preliminary analyses of data, and contribute to the development of scientific knowledge. Serves as an introduction to upper-division course work in oceanography.

Prerequisite: OC 295 with P or better

---

**OC 332, COASTAL OCEANOGRAPHY, 3 Credits**

Physics, geology, biology and hydrology of coastal oceans. How coastal waters respond to forcing by heating, cooling, winds, tides, waves, rain, evaporation, river runoff and freezing. Geography and geology of coastlines: erosion and deposition processes, beach dynamics. Coastal equilibrium cells as sources and sinks of sediment. Rocky shore, beach, mudflat, estuarine, and coastal biotic communities; animal migrations. Law of the Sea rights and responsibilities of coastal states. Fisheries and mariculture in coastal seas. Pollution and coastal ocean resources. Using a matrix to define environmental problems; pathways that pollutants take through the coastal ecosystem. Offered annually.

Equivalent to: OC 332H

---

**OC 333, OCEANS, COASTS, AND PEOPLE, 3 Credits**

Contemporary issues related to human interactions with the oceans and coastal zones, including living and energy resources, geohazards and impacts of global change. Content presented in lectures, readings and group discussions, with project oral presentations.

Recommended: OC 201

---

**OC 334, ^POLAR OCEANOGRAPHY, 3 Credits**

Explores the physical, chemical and biological oceanography of the Arctic and Antarctic and examines the impacts of man's activities both directly through resource utilization, and indirectly through climate change. Introduction to polar oceanography through a series of lectures, interactive classes, written assignments and a case study. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

Prerequisite: OC 201 with D- or better

---

**OC 399, SPECIAL TOPICS IN OCEANOGRAPHY, 1-4 Credits**

This course is repeatable for 16 credits.

---

**OC 399H, SPECIAL TOPICS IN OCEANOGRAPHY, 1-4 Credits**

Attributes: HNRS – Honors Course Designator

Equivalent to: OC 399

This course is repeatable for 16 credits.

---

**OC 401, RESEARCH PROJECTS, 1-16 Credits**

Field and laboratory research in oceanography for undergraduates, resulting in a written report.

This course is repeatable for 24 credits.

---

**OC 403, THESIS, 1-16 Credits**

Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged. Graded P/N.

This course is repeatable for 24 credits.
OC 405, READING AND CONFERENCE, 1-4 Credits
Independent library research and reading in specialized topics in oceanography for undergraduates, guided by discussions in conferences with faculty. A written report may be required. This course is repeatable for 16 credits.

OC 407, SEMINAR, 1-3 Credits
Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required. Equivalent to: OC 407H This course is repeatable for 12 credits.

OC 407H, SEMINAR, 1-3 Credits
Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required. Attributes: HNRS – Honors Course Designator Equivalent to: OC 407 This course is repeatable for 12 credits.

OC 410, INTERNSHIP, 1-16 Credits
Pre-career professional experience under joint faculty and employer supervision. Graded P/N. This course is repeatable for 48 credits. Recommended: 12 credits of upper-division college courses

OC 430, PRINCIPLES OF PHYSICAL OCEANOGRAPHY, 4 Credits
Fundamental principles of physical oceanography; conservation of mass, heat, momentum and vorticity; equations governing motion in the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Descriptive oceanography; application of the fundamental principles to the ocean; examination of the major current systems; water mass analysis. Offered annually. Recommended: One year each of college physics and college calculus.

OC 433, COASTAL AND ESTUARINE OCEANOGRAPHY, 3 Credits
Circulation of the coastal ocean including continental shelf circulation, upwelling, coastal jets, undertorrents, coastal-trapped waves. Fundamentals of surface waves and tides; tsunamis, wind generation, breaking waves. Estuary classification and circulation patterns; shallow-water processes and beach morphology. Offered alternate years. Recommended: One year of college physics and one year of calculus.

OC 434, ESTUARINE ECOLOGY, 4 Credits
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as FW 434/OC 434 and FW 534/OC 534. Equivalent to: FW 434
Available via Ecampus

OC 440, BIOLOGICAL OCEANOGRAPHY, 4 Credits
An advanced examination of the ocean as an ecosystem with emphasis on the processes affecting the production and structure of oceanic communities. Starting with the physical and chemical characteristics of the ocean environment, lectures and labs examine the flow of energy and matter from primary producers through primary consumers up to higher trophic levels. Microbial and benthic processes are examined. Current topics, such as hypoxia, ocean acidification and harmful algal blooms are discussed. Lec/lab. Prerequisite: OC 201 with C- or better Recommended: Two terms of college-level biology

OC 449, ECOLOGICAL THEORIES IN BIOLOGICAL AND FISHERIES OCEANOGRAPHY DATA, 4 Credits
Students will learn the ecological theories applied in fisheries oceanography research and analytical techniques used to quantify fisheries oceanography processes. The lecture and lab sessions will be presented in the context of fundamental ecological research, including effects of environmental and climate variability on production and distribution of species and communities. A specific emphasis is toward analyses of large spatio-temporal data. Lec/Lab. Prerequisite: (MTH 252 with C or better or MTH 252H with C or better or MTH 228 with C or better) and (ST 351 [C] or ST 351H [C]) and (OC 440 (may be taken concurrently) [C] or BI 370 [C] or BI 370H [C])

OC 450, CHEMICAL OCEANOGRAPHY, 4 Credits
Chemical properties and processes in the oceans. Composition, origin and evolution of sea water; thermodynamic and kinetic predictions for reactions in sea water; major and minor element reservoirs and fluxes; vertical and horizontal transport of materials; isotopic clocks and tracers; nutrients; chemical processes and fluxes across major marine interfaces, including estuaries, atmosphere, sediments, suspended particles and hydrothermal systems. Lec/Lab. Prerequisite: CH 122 with D- or better or CH 232 with D- or better or CH 232H with D- or better Recommended: one year of college-level general chemistry.

OC 460, GEOLOGICAL OCEANOGRAPHY, 4 Credits
Explores the (primarily) sedimentary processes in the ocean and their stratigraphic significance. Topics include how sediment is delivered to (or produced in) in the ocean; how waves, currents, and gravity redistribute it; and how it accumulates in various depositional environments to form the stratigraphic record. The challenge of deciphering sedimentary archives to better understand Earth history on time scales of events to millions of years will also be explored. Prerequisite: OC 201 with C- or better and GEO 201 [C-]
Recommended: One year each of physics and chemistry or science background.
OC 495X, ADVANCED FIELD OCEANOGRAPHY 1, 2 Credits
Design a ship-based research project and contribute to the preparation and planning for a related oceanographic cruise.
Prerequisite: (OC 430 with C- or better or OC 440 with C- or better or OC 450 with C- or better or OC 460 with C- or better) and (OC 430 [C-] or OC 440 [C-] or OC 450 [C-] or OC 460 [C-])
Recommended: Senior standing

OC 496X, ADVANCED FIELD OCEANOGRAPHY 2, 4 Credits
Participate in an oceanographic cruise to collect data and samples. Analyze data and samples and prepare a written report of findings.
Prerequisite: OC 495X with C- or better
Recommended: Senior standing

OC 499, SPECIAL TOPICS IN OCEANOGRAPHY, 0-4 Credits
Subjects of current interest in oceanography, not covered in depth in other courses. May be repeated for credit when topic varies.
Equivalent to: OC 499H
This course is repeatable for 16 credits.

OC 501, RESEARCH, 1-16 Credits
Original research work that will not be part of the data used in a thesis. Graded P/N.
This course is repeatable for 24 credits.

OC 503, THESIS, 1-16 Credits
Thesis research and writing.
This course is repeatable for 999 credits.

OC 505, READING AND CONFERENCE, 1-16 Credits
Independent reading and library research on specialized topics in oceanography, guided by discussions with supervising faculty. A written report may be required.
This course is repeatable for 16 credits.

OC 506, PROJECTS, 1-16 Credits
This course is repeatable for 72 credits.

OC 507, SEMINAR, 1-3 Credits
Student presentations and discussions of current research literature or personal research results. Original research presentations by visiting scientists, OSU faculty and graduate students presenting final thesis results. Other sections and specific topics by arrangement.
This course is repeatable for 48 credits.

OC 508, WORKSHOP, 1-16 Credits
This course is repeatable for 24 credits.

OC 512, BASIC MATLAB FOR ENVIRONMENTAL SCIENTISTS AND ENGINEERS, 2 Credits
MATLAB desktop environment will be introduced and basic programming and data analysis skills will be developed, with an emphasis on writing optimized routines to analyze data sets utilizing matrix algebra and vectorization of functions. Basic graphics and visualization will be covered, including two-dimensional and three-dimensional graphing, contouring and movies.

OC 515, OREGON COAST MATH CAMP, 3 Credits
Selected topics from differential calculus, integral calculus, ordinary and partial differential equations, statistics, linear algebra and vector calculus. Two-week course taught at Hatfield Marine Science Center in Newport, Oregon, before fall term begins. Graded P/N.
Recommended: Differential and integral calculus and linear algebra

OC 521, APPLICATIONS IN OCEAN ECOLOGY AND BIOGEOCHEMISTRY, 4 Credits
Methodological underpinnings of marine ecology and biogeochemistry. Students will learn about both new and traditional methods of seawater analysis and biological rate determinations. They will evaluate methods by analyzing observations and samples, and assessing the interpretive effectiveness of approaches. Lec/lab.
Prerequisite: OEAS 540 with C or better
Corequisites: OC 522, OC 523
Equivalent to: G 521

OC 522, OCEAN BIOGEOCHEMICAL DYNAMICS, 4 Credits
Examines what keeps ocean systems in balance, and determines their response to perturbation. The course relies on connections between physical transport and biogeochemical reaction rates and energetics, taught from the perspective of key ocean biogeochemical cycles.
Corequisites: OC 521, OC 523

OC 523, OCEAN ECOLOGICAL DYNAMICS, 4 Credits
Major characteristics of ocean biota and ocean ecosystems. Main themes will be centered on the bioenergetics of marine systems at levels ranging from the individual to ocean biomes, and on how ocean biota facilitates diverse marine biogeochemical processes. Lec/rec.

OC 528, MICROPROBE ANALYSIS, 3 Credits
Theory and application of electron microprobe analysis to problems in geology, engineering, chemistry, physics, and biology.
Equivalent to: GEO 528
OC 533, COASTAL AND ESTUARINE OCEANOGRAPHY, 3 Credits
Circulation of the coastal ocean including continental shelf circulation, upwelling, coastal jets, undercurrents, coastal-trapped waves. Fundamentals of surface waves and tides; tsunamis, wind generation, breaking waves; shallow-water processes and beach morphology. Offered alternate years.
Recommended: One year of college physics and one year of calculus.

OC 534, ESTUARINE ECOLOGY, 4 Credits
Integrated and synthetic training in the ecological processes of estuarine environments, with emphases on ecological interactions among organisms and the biogeochemical cycling of carbon and nitrogen. Topics include geomorphology, estuarine physics and chemistry, primary and secondary producers, ecosystem metabolism, element cycling, food webs, fisheries, restoration, management, and impacts of climate. Field trip required, transportation fee charged. CROSSLISTED as FW 434/OC 434 and FW 534/OC 534.
Equivalent to: FW 534
Available via Ecampus

OC 549, ECOLOGICAL THEORIES IN BIOLOGICAL AND FISHERIES OCEANOGRAPHY DATA, 4 Credits
Students will learn the ecological theories applied in fisheries oceanography research and analytical techniques used to quantify fisheries oceanography processes. The lecture and lab sessions will be presented in the context of fundamental ecological research, including effects of environmental and climate variability on production and distribution of species and communities. A specific emphasis is toward analyses of large spatio-temporal data. Lec/Lab.
Recommended: (MTH 252 or MTH 252H or MTH 228) and (ST 351 or ST 351H) and (OC 440 or BI 370 or BI 370H)

OC 561, IGNEOUS AND TECTONIC PROCESSES IN THE OCEAN, 3 Credits
An integrated view of the igneous and tectonic processes responsible for the formation and evolution of the ocean basins. The course is organized by tectonic environment including ridge crest, ridge flank, ocean basins, seamounts, and active and passive margins.
Recommended: One year each physics, calculus and geology.

OC 562, SEDIMENTARY PROCESSES IN THE OCEAN BASINS, 3 Credits
An integrated view of sediment processes in the ocean basins from a source to sink perspective, with a special emphasis on the interpretation of the historical record.
Recommended: OC 550 and one year each physics and calculus and geology.

OC 574, EARLY LIFE HISTORY OF FISHES, 4 Credits
Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years.
CROSSLISTED as FW 574/OC 574.
Equivalent to: FW 574
Recommended: FW 315

OC 599, SPECIAL TOPICS IN OCEANOGRAPHY, 0-4 Credits
Subjects of current interest in oceanography, not covered in depth in other courses. May be repeated for credit when topic varies.
This course is repeatable for 12 credits.

OC 601, RESEARCH, 1-16 Credits
Original research work that will not be part of the data used in a thesis. Graded P/N.
This course is repeatable for 36 credits.

OC 603, THESIS, 1-16 Credits
Thesis research and writing.
This course is repeatable for 999 credits.

OC 605, READING AND CONFERENCE, 1-16 Credits
Independent reading and library research on specialized topics in oceanography, guided by discussions with supervising faculty. A written report may be required.
This course is repeatable for 16 credits.

OC 606, PROJECTS, 1-16 Credits
This course is repeatable for 84 credits.

OC 607, SEMINAR, 1-3 Credits
Student presentations and discussion of current research literature or personal research results. Original research presentations by visiting scientists, OSU faculty and graduate students presenting final thesis results. Other sections and specific topics by arrangement.
This course is repeatable for 48 credits.

OC 608, WORKSHOP, 1-16 Credits
This course is repeatable for 24 credits.

OC 630, OCEAN WAVE MECHANICS I, 3 Credits
Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiching, and storm surge. CROSSLISTED as CE 630/OC 630.
Equivalent to: CE 630

OC 631, OCEAN WAVE MECHANICS II, 3 Credits
Second in the sequence of ocean wave engineering mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics.
CROSSLISTED as CE 631/OC 631.
Prerequisite: CE 630 with C or better or OC 630 with C or better
Equivalent to: CE 631
OC 634, LONG WAVE MECHANICS, 3 Credits
Theory of long waves. Depth-integrated Euler's equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSLISTED as CE 634/OC 634.
Prerequisite: OC 630 with C or better and CE 631 [C]
Equivalent to: CE 634
Recommended: OC 670

OC 635, APPLIED MODELING OF NEARSHORE PROCESSES, 4 Credits
An introduction to numerical modeling of the nearshore ocean, providing hands-on experience with state-of-the-art numerical models for wave propagation, nearshore circulation, planform shoreline evolution and bathymetric profile evolution. The focus is on review of model requirements, detailed study of several specific models for several domains of interest, application to coastal phenomena, and the interpretation of model results. Offered alternate years.
Equivalent to: CE 635

OC 646, PHYSICAL/BIOLOGICAL INTERACTIONS IN THE UPPER OCEAN, 4 Credits
Variability in physical oceanic processes in the upper ocean and relationship to spatial and temporal variations in biomass, growth rates, and other biological patterns in the organisms of ocean surface waters. The relationship between variability in ocean physical phenomena and ecosystem dynamics, including the requirements of sampling design for upper ocean ecological studies. Time and space scales of physical and biological phenomena in the upper ocean. Offered alternate years. Offered alternate years, typically fall term.
Prerequisite: OEAS 530 with C or better and OEAS 540 [C]

OC 649, SPECIAL TOPICS IN BIOLOGICAL OCEANOGRAPHY, 1-4 Credits
Special topics of current interest in biological oceanography not covered in detail in other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 657, SEDIMENT BIOGEOCHEMISTRY, 3 Credits
An overview of early diagenetic processes in marine sediments and the interdisciplinary approaches used to quantify material transformations at the seafloor.
Recommended: OC 550

OC 659, SPECIAL TOPICS IN CHEMICAL OCEANOGRAPHY, 1-4 Credits
Special topics of current interest in chemical oceanography not covered in detail by other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 660, PALEOCEANOGRAPHY, 3 Credits
Large-scale changes in the oceanic and atmospheric system, as recorded in marine sediments, and their implications for understanding global environment changes. Chemical, physical, and biological proxies for oceanic and atmospheric processes in the geologic record period. Evidence for changing global climate at time scales longer than the historical record; the oceanic history of the Late-Cenozoic ice ages, long term evolution of climate change patterns, catastrophic global environmental events, and application of quantitative models to the past. Current research topics in paleoceanography. Offered alternate years.
Recommended: OC 560

OC 662, NEARSHORE HYDRODYNAMICS, 3 Credits
Briefly reviews wave processes in the nearshore, and concentrates on the wave-averaged circulation with an eye towards it potential effects on bathymetric change.
Recommended: Previous courses related to water wave mechanics and differential equations

OC 664, NEARSHORE SEDIMENT TRANSPORT, 3 Credits
To study the dynamics of a nearshore wave field propagating over a shoaling bathymetry, the response of sediments and morphology to those motions, emergent morphology due to the coupled system, anthropogenic influences and mitigation.
Recommended: General physics, integral and differential calculus; nearshore hydrodynamics.

OC 668, THEORETICAL PETROLOGY, 3 Credits
Recommended: Petrology.

OC 669, SPECIAL TOPICS IN GEOLOGICAL OCEANOGRAPHY, 1-4 Credits
Subjects of current interest in geological oceanography not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for 16 credits.

OC 670, FLUID DYNAMICS, 4 Credits
Fundamentals of fluid dynamics: conservation laws of mass, momentum, and energy; inviscid and viscous flows; boundary layers; vorticity dynamics; irrotational and potential flow. Offered annually.
Recommended: One year of college physics; mathematics through differential equations and vector calculus.

OC 671, GEOPHYSICAL FLUID DYNAMICS, 4 Credits
Dynamics of rotating and stratified fluids, potential vorticity, geostrophic motion; inviscid shallow-water theory, Poincare, Kelvin, and Rossby waves; geostrophic adjustment, quasigeostrophic approximation, Ekman layers, two-layer and continuously stratified models. Offered annually.
Prerequisite: OC 670 with C or better
OC 672, THEORY OF OCEAN CIRCULATION, 4 Credits
Theory of steady and time-dependent large-scale circulation in ocean basins. Effects of earth's curvature: the beta-plane approximation. The wind-driven Sverdrup circulation, western boundary currents, eastern boundary upwelling; the effects of friction. Linear theory and nonlinear theory; inertial gyres. Effects of buoyancy forcing; heating, cooling, evaporation, precipitation; density stratification. Wind- and buoyancy-forced circulation in the thermocline; ventilation. Potential vorticity conservation and homogenization. Offered annually.
Prerequisite: OC 670 with C or better and OC 671 [C]

OC 673, DESCRIPTIVE PHYSICAL OCEANOGRAPHY, 4 Credits
Fundamental mass, force, and energy balances of the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation; vorticity; air-sea fluxes of heat, salt, moisture and momentum. Application of these balances through descriptive examination of the ocean-global heat budget; surface current systems; abyssal circulation. Study of variability on a variety of time and space scales. Instrumentation and platforms used for observing the ocean. Offered annually.
Prerequisite: OC 530 with C or better or OC 670 with C or better or ATS 515 with C or better

OC 674, TURBULENCE, 4 Credits
Governing equations, turbulent kinetic energy, vorticity dynamics; turbulent transports of mass and momentum; statistical description of turbulent flows, spectral dynamics; turbulent boundary layers, planetary boundary layers in the atmosphere and ocean, convective mixed layers, stable boundary layers; deep ocean turbulence. Offered alternate years.
Prerequisite: OC 670 with C or better

OC 675, NUMERICAL MODELING IN OCEAN CIRCULATION, 4 Credits
Review of theoretical models of ocean circulation, including shallow water, barotropic, quasigeostrophic, and primitive equation models; adjustment times, internal length and time scales; the role of advection, bathymetry, and coastlines; global models, basin models, regional models and models of jets, eddies and boundary currents. Review of numerical techniques and problems specific to ocean modeling. Local facilities are used to develop models on remote supercomputers.
Prerequisite: OC 670 with C or better
Recommended: Working knowledge of FORTRAN

OC 676, INVERSE MODELING AND DATA ASSIMILATION, 4 Credits
Survey of methods for combining oceanographic observations and observing systems with numerical models of ocean circulation. Topics include: finite-dimensional least squares theory with inequality constraints; optimal interpolation; the representation theory of smoothing; the Kalman smoother and filter; gradient descent methods for minimization; spatial and temporal regularity of filters and smoothers; linear theory of array design; nonlinear optimization, practical assimilation methods.
Recommended: Strong background in linear algebra and advanced calculus, geophysical fluid dynamics, numerical modeling of ocean circulation.

OC 678, OCEAN REMOTE SENSING, 4 Credits
Theory and applications of satellite remote sensing observations of the ocean with emphasis on strengths and limitations in the measurements. Topics include review of electricity and magnetism, absorption and scattering in the atmosphere (radiative transfer), satellite orbital mechanics, measurements of ocean color, infrared remote sensing, microwave radiometry, scatterometry, and satellite altimetry. Offered alternate years.
Recommended: MTH 252 and PH 212

OC 679, SPECIAL TOPICS IN PHYSICAL OCEANOGRAPHY, 1-4 Credits
Subjects of current interest in physical oceanography, not covered in depth in other courses. May be repeated for credit when topic varies.
This course is repeatable for 16 credits.

OC 680, STABILITY OF GEOPHYSICAL FLUID FLOWS, 4 Credits
Linear perturbation analysis applied to geophysical flows. These methods provide both quantitative and conceptual insight into the formative stages of turbulent flow. Emphasis is on practical numerical methods for the solution of differential eigenvalue problems. Examples are drawn from a wide range of geophysical flow instabilities, based in part upon student interests.
Prerequisite: OC 670 with C or better
Recommended: Multivariate calculus, matrix calculus, Matlab and concurrent enrollment in OC 670

OC 681, GEOPHYSICAL WAVES, 4 Credits
Fundamentals of wave dynamics applied to geophysical fluids. Hyperbolic waves–linear and nonlinear; characteristics; shock waves. Dispersive waves–linear waves, dispersion relations, group velocity; isotropic and anisotropic dispersion; nonlinear solitary waves. Application to geophysical waves–surface gravity, capillary, internal gravity, Kelvin, planetary, coastal. Offered alternate years.
Prerequisite: OC 670 with C or better

OC 682, DATA ANALYSIS IN THE TIME AND SPACE DOMAINS, 4 Credits
Theory of classical and modern techniques for analysis of data in the time and space domains with applications to real oceanographic and atmospheric data. Topics include correlation analysis, regression analysis, EOF analysis, objective mapping, interpolation, filtering, sampling errors, and confidence tests. Offered alternate years.
Recommended: MTH 341 and MTH 342 and MTH 418 and OC 608 and ST 314 and a working knowledge of Matlab, IDL, or FORTRAN
OC 683, DATA ANALYSIS IN THE FREQUENCY AND WAVE NUMBER DOMAINS, 4 Credits

Theory of classical and modern techniques for analysis of data in the frequency and wavenumber domains with applications to real oceanographic and atmospheric data. Topics include sampling theory, one-dimensional autospectral analysis, multidimensional autospectral analysis, coherence and phase analysis, bi-spectral analysis, wavelet analysis, and confidence tests. Offered alternate years.
Equivalent to: ATS 683
Recommended: MTH 341 and MTH 342 and MTH 418 and OC 608 and ST 314 and a working knowledge of Matlab, IDL, or FORTRAN

OC 691, PROPOSAL WRITING, 3 Credits

Teaches the use of NSF Fastlane. Includes a discussion of ethics and fairness in reviewing, a review of real proposals by faculty, a simulated NSF funding panel, and then development of a real proposal, for review purposes. This will relate directly to the student's current thesis or project. The course enables graduate students from all disciplines to develop rigorous, well thought-out proposals. It should be taken early enough in the program so that the proposal process contributes to their research progress.

OC 808, WORKSHOP, 1-16 Credits

This course is repeatable for 16 credits.

Ocean, Earth, and Atmospheric Sciences (OEAS)

OEAS 500, CASCADE FIELD TRIP, 2-4 Credits

A field course to various locations within the Cascade volcanic arc, Coast Range and Oregon Coast. Introduction to the range of physical and biological science topics to be covered in OEAS 520, OEAS 530 and OEAS 540 in field settings; the linkages between these topics, and their impact on humans, with case examples. Students will practice math skills, and collect samples and data to be used in laboratory sessions in the later courses. Offered annually. Transportation fee charged. Graded P/N.
This course is repeatable for 4 credits.

OEAS 511X, PROFESSIONAL INSTRUCTION IN CEOAS, 1 Credit

Provides graduate teaching assistants and potential teaching assistants in the College of Earth, Ocean, and Atmospheric Sciences with an introduction to effective instruction techniques, including the expectations of instructors, teaching pedagogy, use of technology, ethical instruction, inclusivity in the classroom and other topics.

OEAS 520, THE SOLID EARTH, 4 Credits

Movement of mass and energy within the Earth and into/out of its outer surface, expressed as plate tectonics, earthquakes, heat flow, volcanoes, geomagnetic field; composition, structure, hydrology and aging of ocean crust; lithosphere creation, recycling and mantle overturn. Marine sedimentation, sources and transport, continental weathering, tectonics-climate interactions, glacial history and sea level response. Geohazards, storm events, beach and estuary processes. Offered annually. Lec/lab.
Recommended: One year each of physics, chemistry and calculus

OEAS 530, THE FLUID EARTH, 4 Credits

Fundamental principles of fluid circulation in the atmosphere and ocean. Atmospheric chemistry, radiation, thermodynamics, and dynamics. Conservation of mass, heat, momentum and vorticity in the ocean; equations governing motion; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Air-sea fluxes and global circulation models; climate change. Offered annually. Lec/lab.
Recommended: One year each of physics, chemistry, calculus, or science and a field course

OEAS 540, THE BIOGEOCHEMICAL EARTH, 4 Credits

Integrating fundamental concepts in biological and chemical oceanography to understand energy and material transformations in estuarine, coastal and open ocean habitats. Topics include structure and function of marine ecosystems, biogeochemical cycles, and human impacts. Offered annually. Lec/lab.
Recommended: One year of physics, chemistry, and calculus

Earth Sciences Minor

Also offered via Ecampus.

The Earth Sciences minor is designed for students who have a broad interest in Earth Sciences. Earth Science majors and Environmental Sciences majors are restricted from taking this minor.

Minor Code: 835

Students must complete a minimum of 14 unique credits in the minor that do not fulfill requirements of other majors, minors, options or certificates. Students cannot S/U minor requirements.

Climate Science Option

This option is offered within the following major(s):

- Earth Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 442)

Karen Shell, Director
Climate Science Undergraduate Program
104 CEOAS Administration Building
Oregon State University
Corvallis, OR 97331
541-737-0980
Email: karen.shell@oregonstate.edu (kshell@coas.oregonstate.edu)
Website: https://ceoas.oregonstate.edu/climate

The Climate Science Option centers around the physical science of climate and climate change, with a smaller number of courses studying the intersection of climate with biological, social, political, and economic systems. The program is interdisciplinary, with coursework spanning atmospheric science, oceanography, geology, and geography. Students gain hands-on experience through a field course to multiple sites in Oregon, as well as independent research or an internship. A focus of the program is on transferrable skills, such as programming, data analysis and visualization, and written and oral communication, which are integrated in courses throughout the curriculum. Electives allow students to pursue additional coursework to prepare them in their specific career interests. Graduates of the program will be prepared for positions in state and local governments, utilities, consulting firms, non-profits, and private industry, as well as further study in graduate school. The need for climate scientists is expected to increase as governments and businesses incorporate more specialized climate planning related to mitigation and adaptation solutions.

Experiential Learning

Select 6 credits of the following:

- ATS 401 RESEARCH
- ATS 403 THESIS
- ATS 410 INTERNSHIP

Electives

Select at least one course in Climate Impacts, Adaptation, or Mitigation:

Experiential Learning

Select 6 credits of the following:

- CH 374 TECHNOLOGY, ENERGY, AND RISK
- ENGR 363 ENERGY MATTERS
- FW 325 GLOBAL CRISIS IN RESOURCE ECOLOGY
- GEOG 240 HUMAN DIMENSIONS OF CLIMATE CHANGE
- GEOG 441 INTERNATIONAL WATER RESOURCES MANAGEMENT
- GEOG 440 WATER RESOURCES MANAGEMENT IN THE UNITED STATES
- OC 333 OCEANS, COASTS, AND PEOPLE
- PH 313 ENERGY ALTERNATIVES
- WISE 473 BIODENERGY AND ENVIRONMENTAL IMPACT

Select at least one course in Policy or Economics:

- AEC 352 ENVIRONMENTAL ECONOMICS AND POLICY
- PS 455 THE POLITICS OF CLIMATE CHANGE
- PS 473 US ENERGY POLICY
- PS 478 RENEWABLE ENERGY POLICY

Select an additional 15 credits of electives listed above or below:

- ATS 411 THERMODYNAMICS AND CLOUD MICROPHYSICS
- ATS 412 ATMOSPHERIC RADIATION
- ATS 413 ATMOSPHERIC CHEMISTRY
- ATS 475 PLANETARY ATMOSPHERES
- GEO 433 COASTAL GEOMORPHOLOGY
- GEO 481 GLACIAL GEOLOGY
- GEO 488 QUATERNARY STRATIGRAPHY OF NORTH AMERICA
- GEOG 423 SNOW HYDROLOGY
- OC 334 POLAR OCEANOGRAPHY
- OC 430 PRINCIPLES OF PHYSICAL OCEANOGRAPHY
- OC 440 BIOLOGICAL OCEANOGRAPHY
- OC 450 CHEMICAL OCEANOGRAPHY
- OC 460 GEOLOGICAL OCEANOGRAPHY

No more than two of the following may be used toward the 15 additional elective credits:

- GEOG 480 REMOTE SENSING I: PRINCIPLES AND APPLICATIONS
- GEOG 481 SATELLITE IMAGE ANALYSIS
- MTH 256 APPLIED DIFFERENTIAL EQUATIONS

Total Credits: 80-81

1 Students taking PH 211 in this option are required to take PH 221 concurrently
* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

Option Code: 836

Geology Option

This option is offered within the following major(s):

- Earth Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 442)

Frank Tepley, Director
Geology Undergraduate Program
104 CEOAS Administration Building
Oregon State University
Corvallis, OR 97331
541-737-9350
Email: frank.tepley@oregonstate.edu (adam.kent@oregonstate.edu)
Website: https://ceoas.oregonstate.edu/geology-earth-sciences/

Geology is the scientific study of the Earth and seeks to understand Earth's composition and internal structure, history, and how this history reflects the processes operating within the planet and at its surface. The Geology Option is built on a foundation of basic sciences, and students employ core concepts in physics, chemistry, and mathematics to study a range of fundamental Earth systems, including the processes of mineral and rock formation, the evolution of climate, earthquakes and mountain building, surface processes and landscape evolution, and mineral resources.

Experiential learning lies at the core of a geologist's education in CEOAS, and practical field experiences are integrated throughout the curriculum. Geology students apply state-of-the-art field and laboratory techniques to study geologic phenomenon in Oregon and around the world.

Geology students are mentored by, and often engage in research with, dedicated faculty with a broad range of expertise. The college is a vibrant research hub visited by scientists from around the world, complementing the world class research done by our own Geology faculty.

The Geology option is suitable for students interested in careers in environmental sciences, science education, applied geology, and in research. The Geology option includes the topics covered by the test for the state Geologist Practice Examination (http://www.oregon.gov/osbge/Pages/) conducted by the Board of Geologist Examiners.

Option Code: 262

Code | Title                                    | Credits |
-----|------------------------------------------|---------|
CH 232 | GENERAL CHEMISTRY                        | 5       |
& CH 262 | and LABORATORY FOR CHEMISTRY 232       |         |
CH 122 | *GENERAL CHEMISTRY                       |         |
PH 212 | *GENERAL PHYSICS WITH CALCULUS          | 4-5     |

- Select at least one course in Policy or Economics:
- Select an additional 15 credits of electives listed above or below:
Ocean Science Option

This option is offered within the following major(s):

- Earth Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 442)

Robert Wheatcroft, Director
Ocean Science Undergraduate Program

The Ocean Science Option is a rigorous interdisciplinary major that focuses on understanding the ocean in its entirety and how it interacts with and influences planet Earth including humankind. The curriculum is broad with instruction in ecology, chemistry, physics and geology of diverse marine environments. Students gain hands-on experience through cruises in the NE Pacific and Yaquina Bay using our regional and coastal research vessels, as well as have opportunities for independent research or internships. A focus of the program is on transferrable skills, such as data analysis and visualization, teamwork, and written and oral communication, which are integrated in courses throughout the curriculum. Electives allow students to pursue additional coursework to prepare them in their specific career interests. Graduates of the program will be prepared for positions in state and local governments, consulting firms, non-profits, and private industry, as well as further study in graduate school.

- OC 401 RESEARCH PROJECTS
- OC 403 THESIS
- OC 410 INTERNSHIP

Select 2 credits of the following for two terms of enrollment in a marine-oriented seminar series: 2

* Baccalaureate Core Course
^ Writing Intensive Course (WIC)
Environmental Sciences Minor

Also available via Ecampus.

The interdisciplinary field of Environmental Sciences integrates the biological and physical sciences with the social sciences for the study of human interactions with natural systems, especially with the goal of addressing environmental problems. The Environmental Sciences minor provides an opportunity for students to develop a basic background in the natural environmental systems, selecting courses in the categories of atmosphere, biosphere, geosphere, and hydrosphere; in addition, the minor requires selection of courses on the relationship between humans and the environment in the categories of economics and policy, ethics, human environment, and management.

Option Code: 659
Select one course from the following:

ANTH 481  *NATURAL RESOURCES AND COMMUNITY VALUES
CH 374  *TECHNOLOGY, ENERGY, AND RISK
ES 448/PHL 448/REL 448  NATIVE AMERICAN PHILOSOPHIES
FES 435/TOX 435  *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK
FES 485  *CONSSENSUS AND NATURAL RESOURCES
FW 340  *MULTICULTURAL PERSPECTIVES IN NATURAL RESOURCES
GEO 309  *ENVIRONMENTAL JUSTICE
PHL 325  *SCIENTIFIC REASONING
PHL 440  *ENVIRONMENTAL ETHICS
PHL 443  *WORLD VIEWS AND ENVIRONMENTAL VALUES
PS 461  ENVIRONMENTAL POLITICAL THEORY
SOC 456  *SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT
SOC 480  ENVIRONMENTAL SOCIOLOGY
SOC 481  *SOCIETY AND NATURAL RESOURCES
WGS 440  *WOMEN AND NATURAL RESOURCES

Human Environment

Select one course from the following:

AG 301  *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS
BI 301  *HUMAN IMPACTS ON ECOSYSTEMS
BI 347  *OCEANS IN PERIL
BI 348  *HUMAN ECOLOGY
ENS 479  *ENVIRONMENTAL CASE STUDIES
FW 325  *GLOBAL CRISIS IN RESOURCE ECOLOGY
GEO 308  *GLOBAL CHANGE AND EARTH SCIENCES
GEOG 300  *SUSTAINABILITY FOR THE COMMON GOOD
GEOG 350  *GEOGRAPHY OF NATURAL HAZARDS
GEOG 431  GLOBAL RESOURCES AND DEVELOPMENT
GEOG 450  LAND USE IN THE AMERICAN WEST
HST 481  *ENVIRONMENTAL HISTORY OF THE UNITED STATES
OC 333  *OCEANS, COASTS, AND PEOPLE
SOC 381  SOCIAL DIMENSIONS OF SUSTAINABILITY
SU 102  *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY
SU 350  *SUSTAINABLE COMMUNITIES
WGS 440  *WOMEN AND NATURAL RESOURCES
Z 349  *BIODIVERSITY CAUSES, CONSEQUENCES, AND CONSERVATION

Environmental Management

Select one course from the following:

BOT 413/FORE 413  FOREST PATHOLOGY
FES 350/HORT 350  URBAN FORESTRY
FES 355  MANAGEMENT FOR MULTIPLE RESOURCE VALUES
FES 365  *ISSUES IN NATURAL RESOURCES CONSERVATION
FES 412  FOREST ENTOMOLOGY
FES 445/FW 445  ECOLOGICAL RESTORATION
FOR 346  TOPICS IN WILDLAND FIRE
FW 251  PRINCIPLES OF FISH AND WILDLIFE CONSERVATION
FW 323  MANAGEMENT PRINCIPLES OF PACIFIC SALMON IN THE NORTHWEST
FW 326  INTEGRATED WATERSHED MANAGEMENT
FW 435  *WILDLIFE IN AGRICULTURAL ECOSYSTEMS
FW 464  MARINE CONSERVATION BIOLOGY
GEO 306  *MINERALS, ENERGY, WATER, AND THE ENVIRONMENT
GEOG 430  RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT
GEOG 431  GLOBAL RESOURCES AND DEVELOPMENT
GEOG 440  WATER RESOURCES MANAGEMENT IN THE UNITED STATES
GEOG 441  INTERNATIONAL WATER RESOURCES MANAGEMENT
GEOG 452  SUSTAINABLE SITE PLANNING
HORT 331  POLLINATORS IN PERIL
NR 455  NATURAL RESOURCE DECISION MAKING
RNG 341  RANGELAND ECOLOGY AND MANAGEMENT
RNG 355  DESERT WATERSHED MANAGEMENT
RNG 421  WILDLAND RESTORATION AND ECOLOGY
RNG 455  RIPARIAN ECODYNAMICS AND MANAGEMENT
RNG 490  RANGELAND MANAGEMENT PLANNING

Total Credits 27-33

Minor Code: 758

Environmental Sciences Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Alternative Energy (p. 449)
- Applied Ecology (p. 450)
- Aquatic Biology (p. 450)
- Chemistry and the Environment (p. 451)
- Conservation, Resources, and Sustainability (p. 451)
- Earth Systems (p. 452)
- Environmental Agriculture (p. 453)
- Environmental Policy and Economics (p. 454)
- Environmental Science Education (p. 454)
- Environmental Water Resources (p. 455)

Also available at OSU-Cascades and via Ecampus.

Larry C. Becker, Director
Environmental Sciences Undergraduate Program
104 CEOAS Administration Building
Oregon State University
Corvallis, OR 97331
541-737-1201
Email: ceoas.undergrad@oregonstate.edu
Website: https://ceoas.oregonstate.edu/environmental-sciences-undergraduate-program

An Environmental Sciences undergraduate degree provides a rigorous education that can lead to helping to understand and resolve some of today’s most challenging scientific and policy issues—including global climate change, pollution, biodiversity conservation, sustainability, and balancing resource use and preservation. To help reach these objectives, the Bachelor of Science in Environmental Sciences offers an interdisciplinary approach to environmental problem solving. As an Environmental Sciences major, a student completes course work in four general areas:

1. OSU’s general education courses (the baccalaureate core)
2. Basic science and math
3. Environmental sciences and humanities core
4. A specialization area

In addition, each student completes a minimum of 3 credits of experiential learning as an internship, research, study abroad, or field
course. The BS degree in Environmental Sciences provides excellent training for a variety of careers—including work with federal, state, and local agencies, industry, non-profits, and education—or for graduate school. Students can pursue the BS degree either at the Corvallis campus or online through OSU Ecampus.

**Major Code:** 657

- Identify and define concepts in the natural sciences (e.g. chemistry, atmospheric sciences, ecology, geology, oceanography, soil science).
- Identify and define concepts in the humanities and social sciences (e.g. economics, environmental law, ethics, resource policy, and human-environment interaction fields like agronomy and geography).
- Integrate concepts in the natural sciences with those in the humanities and social sciences.
- Demonstrate a rigorous cross-disciplinary science base (biological, physical, and social sciences) with a deeper knowledge in a specialization area by using quantitative tools to analyze and interpret data.
- Communicate ideas clearly—orally, graphically, or in writing—to address environmental sciences issues.
- Engage in and experience the application of the environmental sciences beyond the classroom through fieldwork, participation in an internship, research, study abroad, or other forms of experiential learning.

**Major Curriculum**

The Environmental Sciences major requires credits in seven categories: 48 credits of baccalaureate core; 51−53 credits of basic science and math; 27−36 credits of environmental sciences and humanities; 27−31 credits of specialization; 3 credits writing intensive course; 3 credits math; 27−36 credits of environmental sciences and humanities; 27−31 credits of specialization; 3 credits writing intensive course; 3 credits math; 27−36 credits of environmental sciences and humanities; 27−31 credits of specialization; 3 credits writing intensive course; 3 credits math. The BS degree in Environmental Sciences provides excellent training for a variety of careers—including work with federal, state, and local agencies, industry, non-profits, and education—or for graduate school. Students can pursue the BS degree either at the Corvallis campus or online through OSU Ecampus.

**Baccalaureate Core**

The university baccalaureate core course (BCC) requirement is met with 48 credits and a writing intensive course (WIC). The environmental sciences student satisfies the general education requirement by selecting 27 unrestricted credits from the general list of approved courses and 21 credits from a restrictive list of BCC courses, which simultaneously satisfy requirements for the Environmental Sciences major. The WIC and Synthesis requirements are satisfied by courses taken as part of the environmental sciences core curriculum.

- Scientific, Technical, and Professional Communication Certificate

Approved Options (All options under the Environmental Sciences major):

- Alternative Energy
- Applied Ecology
- Aquatic Biology
- Chemistry and the Environment
- Conservation, Resources, and Sustainability
- Earth Systems
- Environmental Agriculture
- Environmental Policy and Economics
- Environmental Science Education
- Environmental Water Resources
Baccalaureate Core Course (BCC)

Available at OSU-Cascades

Available via Ecampus

Writing Intensive Course (WIC)

The program must contain at least one internship, research, or study abroad experience that provides opportunities for hands-on experience in design and collection of observations in the physical, biological or social environment. Students are urged to work with advisors at an early stage in their study to identify experiences that are appropriate, or discuss alternative approved experiential courses

This requirement can be met by completing an approved certificate, option, or minor from a participating program in the environmental or closely related sciences, or working with advisors to develop an innovative course cluster to analyze environmental systems

Alternative Energy Option

This option is offered within the following major(s):

• Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 446)

The Alternative Energy option draws from a variety of disciplines that offer courses in energy-related topics, not engineering. Students in this option will be well-informed about energy alternatives for work in urban and regional planning, city government, NGOs promoting energy alternatives to fossil fuels sources, power companies working with the public, policy-making in the energy field, and law school with an aim toward environmental law.

Option Code: 842

Applied Ecology Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 446)

Also available at OSU-Cascades and via Ecampus.

The Applied Ecology option is for Environmental Sciences students who seek to orient their studies around ecology. This is applied ecology and therefore includes geographic methods for measuring and data collection in ecological change. Students seeking a concentration in policy and management are encouraged to consider the Conservation, Resources, and Sustainability option.

Option Code: 845

### Conservation, Resources, and Sustainability Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 446)

Also available at OSU-Cascades and via Ecampus.

The Conservation, Resources, and Sustainability option helps students to think in terms of conservation approaches, resource management, and sustainability as science and policy that combine as both personal endeavor and profession.

**Option Code: 843**

**Conservation**

Students should first complete the following course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 370</td>
<td>ECOLOGY</td>
<td>3</td>

- HST 481: *Environmental History of the United States*
- NR 455: Natural Resource Decision Making ¹
- OC 333: *Oceans, Coasts, and People*

---

**Option Code: 843**

### Earth Systems Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 446)

Also available via Ecampus (http://ecampus.oregonstate.edu/).

With the Earth Systems option, students will obtain a solid base in the sciences and they would be able to apply that base in an integrative way in order to build a strong knowledge traditionally referred to as natural history.

Environmental Science Education Option

This option is offered within the following major(s):

- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 446)

The Environmental Science Education option in Environmental Sciences prepares students for entry into OSU’s Education Double Degree Program or the MS Professional Teacher Education Program. Environmental Sciences students preparing to teach in secondary school can choose
either to pursue a state endorsement in Integrated Science (to teach any middle school science class or high school environmental science, earth science, or another course that is not biology, chemistry, or physics) or Biology, for all secondary biology classes. Students should consult the Content Mastery Sheets for these subjects that are provided by the OSU College of Education. The courses required are subject to change.

**Option Code: 846**

**Environmental Science Education Core**

Select 3 credits of the following:
- SED 406 PROJECTS
- ED 309 FIELD PRACTICUM
- ED 409 PRACTICUM/CLINICAL EXPERIENCE

**Education Courses**

Select 6 credits of the following:
- ED 216 *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY
- ED 219 *SOCIAL JUSTICE, CIVIL RIGHTS & MULTICULTURALISM IN EDUCATION
- SED 412 TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE
- SED 413 INQUIRY IN SCIENCE AND SCIENCE EDUCATION

**Human Development Course**

Select 3-4 credits of the following:
- ED 253 LEARNING ACROSS THE LIFESPAN
- HDFS 313 ADOLESCENT DEVELOPMENT

**Special Course Requirement**

Select one of the following:
- HDFS 313 ADOLESCENT DEVELOPMENT
- ED 253 LEARNING ACROSS THE LIFESPAN

**Double Degree Program**

- ED 216 *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY
- ED 219 *SOCIAL JUSTICE, CIVIL RIGHTS & MULTICULTURALISM IN EDUCATION
- ED 253 LEARNING ACROSS THE LIFESPAN
- SED 412 TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE
- SED 413 INQUIRY IN SCIENCE AND SCIENCE EDUCATION

**Upper-Division Science**

Select 14-15 upper-division science credits
- BI 311 GENETICS (recommended but not required)
- BI 445 EVOLUTION (recommended but not required)

Environmental Sciences students preparing to teach in secondary school can choose either to pursue a state endorsement in Integrated Science (to teach any middle school science class or high school environmental science, earth science, or another course at is not biology, chemistry, or physics) or Biology, for all secondary biology classes. Students should consult the Content Mastery Sheets for these subjects that are provided by the OSU College of Education. The courses required are subject to change.

**Option Code: 846**

**Environmental Water Resources Option**

This option is offered within the following major(s):
- Environmental Sciences - College of Earth, Ocean, and Atmospheric Sciences (p. 446)

**Also available via Ecampus (http://ecampus.oregonstate.edu/).**

The Environmental Sciences BS with the option in Water Resources provides a solid science base for domestic and international work related to water.

**Option Code: 847**

**Core Courses**

- FE 430 WATERSHED PROCESSES
- FE 434 FOREST WATERSHED MANAGEMENT
- GEO 487 HYDROLOGY
- GEO 424 HYDROLOGY FOR WATER RESOURCES MANAGEMENT

**Sciences**

Select a minimum of two courses from the following:
- BEE 458 NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL
- FW 456 FRESHWATER ECOLOGY AND CONSERVATION
- FW 479 WETLANDS AND RIPARIAN ECOLOGY
- GEO 322 SURFACE PROCESSES
- GEO 432 APPLIED GEOMORPHOLOGY
- GEO 433 CLIMATOLOGY
- GEO 423 SNOW HYDROLOGY

**Resources and Policy**

Select a minimum of two courses from the following:
- AEC 351 *NATURAL RESOURCE ECONOMICS AND POLICY
- AEC 352/ECON 352 *ENVIRONMENTAL ECONOMICS AND POLICY
- ENS 456 SUSTAINABLE WATER RESOURCES DEVELOPMENT
- GEOG 430 RESILIENCE-BASED NATURAL RESOURCE MANAGEMENT
- GEOG 440 WATER RESOURCES MANAGEMENT IN THE UNITED STATES
- GEOG 441 INTERNATIONAL WATER RESOURCES MANAGEMENT
- GEOG 452 SUSTAINABLE SITE PLANNING
- OC 333 *OCEANS, COASTS, AND PEOPLE
- RNG 355 DESERT WATERSHED MANAGEMENT
- RNG 455 RIPARIAN ECODYROLOGY AND MANAGEMENT

---

1. In consultation with your advisor, select additional upper-division science courses from Atmospheric Sciences (ATS), Biochemistry and Biophysics (BB), Botany (BOT), Geology (GEO), History of Science (HSTS), Microbiology (MB), Oceanography (OC) or Zoology (Z).
Oregon State University offers an undergraduate and graduate certificate in Geographic Information Science. Geographic Information Science (GIScience) is a discipline that combines theory and principles underlying:

- geospatial data collection (remotely sensed imagery from satellites, aircraft, and drones, social media, telemetry, GPS, etc.);
- technologies to manage, analyze, and visualize geospatial data (geographic information systems);
- computational, statistical, and mathematical methods to analyze and model geospatial data (machine learning, Big Data, spatial statistics, spatial modeling, geovisual analytics, etc.);
- digital cartography and geovisualization (the science and practice of creating maps); and
- cognitive, social, and environmental implications of GIScience (professional ethics, privacy, digital divide, etc.).

The OSU GIScience certificate can help lead to certification as a nationally-recognized geographic information systems (GIS) professional (GISP). GIS professionals are in high demand for jobs in government, NGOs, and the private sector, and have rewarding careers in natural resource management, online and interactive mapping, business, planning, and many others.

Geography and Geospatial Science Undergraduate Major (BS, HBS)

Also available via Ecampus.

Kuuipo Walsh, Director
GIScience Program
134 Wilkinson Hall
College of Earth, Ocean, and Atmospheric Sciences
Oregon State University
Corvallis, OR 97331
541-737-3795
Email: kuuipo.walsh@oregonstate.edu
Website: https://ceoas.oregonstate.edu/geography-and-geospatial-science (https://ceoas.oregonstate.edu/geography-and-geospatial-science/)

Geography is a scientific approach to understanding people's relationship with their environment and resources. Geography is central to many important issues, including planning for land-use change, global studies, and adaptation to climate change. Geospatial science applies techniques, including web mapping, geovisualization, remote sensing, and geographic information systems (GIS), to address these issues. Geographic thinking and geospatial technology are present in every aspect of modern life, and career opportunities abound for students trained in geography and geospatial science.

Major Code: 896

• Use terminology and basic principles to describe and explain (a) physical geography, (b) human geography, and (c) geospatial science and technology.
• Apply spatial reasoning and critical thinking to create, synthesize and analyze data; model human-environment interactions; and evaluate contemporary issues in geography.
• Communicate findings and their implications, including ethical aspects, in visual, oral and written form.

Students majoring in Geography and Geospatial Science complete work in five major areas:

1. OSU’s baccalaureate core
2. Basic statistics and math
3. Geography and Geospatial Science core
4. Electives
5. Experiential learning (field courses and internship or research)

The major consists of 85 credits of course work. In addition to baccalaureate core courses, the major consists of:

<table>

Geography Graduate Major (MS, PhD)

Graduate Areas of Concentration
Geographic information science, physical geography, resource geography

Julia Jones, Director
Geography Graduate Program
104 CEOAS Administration Building
Oregon State University
Corvallis, OR 97331
541-737-1224
Email: julia.jones@oregonstate.edu

Geography is the study of human use and interaction with the Earth and the identification of spatial and temporal variation in natural and human processes. Geography uses principles of mathematics, social science, and natural science to analyze and interpret change in the environment. Many geographic studies require a combination of field, laboratory, and computational work. Geography plays an important role in urban and land use planning, resource evaluation, environmental analysis, education, and cartography.

Majors in geography develop a background in regional geography, resource geography, geographic information science, and physical geography and in statistics and disciplines related to geography such as geology, forestry, and anthropology. Course offerings combined with excellent facilities and supportive electives allow students to develop particular interests such as resource management, environmental analysis, land use planning and cartography/geographic information systems/remote sensing.

The program has an applied orientation, placing emphasis on the application of geographic information science to environmental and resource utilization and problem solution. Master's degree candidates may elect a thesis or nonthesis option. No foreign language is required for the MS degree. One foreign language is required for the PhD degrees.

Major Code: 5450

Geography Graduate Minor

A Geography graduate minor consists of a minimum of 15 credits of Geography graduate coursework, including courses in physical geography and resource geography. A student interested in Geographic Information Science should pursue the Graduate Certificate in Geographic Information Science.

Contact Program Director Julia Jones, 541-737-1224 or julia.jones@oregonstate.edu for more information.

Minor Code: 5450

Geography Minor

Also available via Ecampus.

The Geography minor will allow interested non-majors to explore:

• how the Earth works,
• the people who live on its surface,
• the value of accessing and properly using geographic information, and
• how to bring concepts of relative location, pattern, and spatial process to bear on key societal questions.

Minor Code: 545

The minor consists of 14 credits of core courses and at least 13 credits of elective courses for a total of 27 credits. Students must complete a minimum of 14 unique credits in the minor that do not fulfill requirements of majors, minors, options or certificates.

</table>
Geology is the study of the materials, processes, and history of the solid Earth and its fluid envelopes. Geology is an integrative field, drawing on mathematics, chemistry, physics and biology to understand the interactions of the lithosphere, biosphere, atmosphere and hydrosphere. Studies in geology commonly combine observations and measurements from field, laboratory, and computational studies. Geology plays an important role in decisions about resource use, slope stability and the safety of building projects, natural hazards standards, mineral exploration and extraction, the basic workings of the Earth, and the understanding of the effects and rates of natural and human-induced change in the environment.

Students who seek training in a combination of field and laboratory techniques applying a variety of scientific problems will find very few places with the number of opportunities or the variety of facilities that are available at Oregon State. Most graduate research in the geology program includes field study. An approved field course of at least 9 quarter credits or equivalent experience is prerequisite to candidacy for a graduate degree. No foreign language is required.

Major Code: 5500

Master of Science (MS) and Master of Arts (MA) Degrees

The master's degree requires successful completion of at least 45 credits of appropriate courses including a thesis. The thesis presents a written summary of research findings and conclusions. All master's programs include a final oral examination. Each graduate program is supervised by a committee of at least three members of the graduate faculty who collaborate with the student in developing a program of study and research leading to the final oral examination. The examination is conducted and approved by the student's graduate committee.

The MA degree requires a foreign language proficiency equivalent to that attained at the end of a second-year university course in that language with a grade of C (2.00) or better.

Doctor of Philosophy (PhD) Degree

The doctor of philosophy (PhD) degree is granted for proven ability in research and mastery of an area within the discipline of geology. This is demonstrated through successful performance in at least 108 credits of appropriate course work and research. The pursuit of the PhD also requires passing qualifying exams that advance a student to candidacy. The doctoral program includes original research in a major topic in one of the department's areas of specialization submitted as a dissertation that is presented and defended orally. A committee of at least four members of the graduate faculty assist the major professor in supervising and examining the PhD student. PhD candidates must complete at least three of four consecutive terms with at least 36 credits taken on the OSU campus.

Graduate Minor

Advanced degree programs in geology may include an optional minor subject area. It may be in a single discipline or an integrated grouping of courses organized around a theme. In developing minors, students commonly combine courses from several campus departments.

Major Code: 5500

Geology Graduate Minor

Contact Program Director Frank Tepley, 541-737-9350 or frank.tepley@oregonstate.edu for more information.

Minor Code: 5500

Geology Minor

The undergraduate Geology minor provides a pathway for students majoring in physics, chemistry, civil engineering, forest engineering, and related fields to develop a strong geology background as part of their program.

Minor Code: 5500
Students must complete a minimum of 14 unique credits in the minor that do not fulfill requirements of majors, minors, options or certificates.

**Marine Resource Management Graduate Certificate**

The management of our marine resources encompasses both biophysical and human dimensions. Marine management professionals need to understand these dimensions, utilizing both physical and social sciences to tackle challenging issues, and effectively communicate best management practices to scientists, decision makers, and stakeholders.

The Marine Resource Management graduate certificate offers a blend of science- and management-oriented courses that prepare participants (professionals, decision-makers, and graduate students) to become leaders in marine resource management.

- Current graduate students must notify the Marine Resource Management program of their intention to pursue this certificate. Upon consultation with MRM faculty, they will be given instructions regarding listing courses on their programs of study and obtaining the required signature for that form.
- Professionals and other students must notify the Marine Resources Management program of their intention to pursue this certificate.

The Marine Resource Management graduate certificate is not eligible for federal financial aid if it is not part of a master’s degree-seeking program. The certificate is not eligible if taken as a stand-alone program. The MRM graduate certificate is eligible for federal financial aid if it is part of a master’s degree-seeking program.

Contact Robert Allan, 541-737-1340 or robert.allan@oregonstate.edu (rallan@coas.oregonstate.edu) for more information.

**Certificate Code:** CG07

**Certificate Overview**
- Completion of core courses in marine policy and law,
- Two courses from the human dimensions area, and
- Two courses from the ocean and coastal science area.

**Course Examples**
- Ocean Law
- Rights-Based Fisheries Management
- Ecological Policy
- Physical Oceanography
- Marine Pollution

**Human Dimensions Subject Area**

Select at least 6 credits from the following: 6

- AEC 534  
  ENVIRONMENTAL AND RESOURCE ECONOMICS
- ANTH 581  
  NATURAL RESOURCES AND COMMUNITY VALUES
- COMM 540  
  THEORIES OF CONFLICT AND CONFLICT MANAGEMENT
- COMM 542  
  BARGAINING AND NEGOTIATION PROCESSES
- COMM 544  
  THIRD PARTIES IN DISPUTE RESOLUTION: MEDIATION/ARBITRATION
- FW 564  
  MARINE CONSERVATION BIOLOGY
- FW 620  
  ECOLOGICAL POLICY
- MRM 530  
  PRINCIPLES AND PRACTICE OF MARINE RESOURCE MANAGEMENT
- PS 575  
  ENVIRONMENTAL POLITICS AND POLICY
- PS 577  
  INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY
- SOC 580  
  ENVIRONMENTAL SOCIOLOGY
- SOC 581  
  SOCIETY AND NATURAL RESOURCES

**Ocean and Atmospheric Systems Science Subject Area**

Select at least 6 credits from the following: 6

- ATS 520  
  CLIMATE PHYSICS
- OC 533  
  COASTAL AND ESTUARINE OCEANOGRAPHY
- OEAS 520  
  THE SOLID EARTH
- OEAS 530

1 Other courses may be substituted upon approval of the certificate director

**Certificate Code:** CG07

**Marine Resource Management Graduate Major (MA, MS)**

**Graduate Areas of Concentration**

*Marine resource management*

Flaxen Conway, **Director**
Marine Resource Management Program
104 CEOAS Administration Building
Marine Resource Management (MRM) is a science-based, interdisciplinary master's program based in College of Earth, Ocean, and Atmospheric Sciences (CEOAS). The program provides students with the interdisciplinary training necessary to function confidently and effectively in professional resource management positions. Marine and coastal issues are technically and politically complex, involving many interests, perspectives and stakeholders. To deal effectively with these issues, marine resource managers need a broad-based background in both physical and social sciences. Graduates from the program are trained to bridge the gap between science and policy.

The program offers two tracks, professional and a thesis:

**Professional track** students develop a project and defend a report on that work, based on either an internship or a research project.

**Thesis track** students are expected to produce a more extensive and rigorous piece of original work and analysis, and must meet additional requirements set by the Graduate School and advisor. Applicants must meet the general admission requirements of the college.

More than 40 faculty members from CEOAS, other university departments, and outside institutions participate in MRM. These partnerships include departments of Fisheries and Wildlife, Applied Economics, and Anthropology; the School of Public Policy; Sea Grant Extension specialists; and scientists and management professionals from state and federal agencies. The program consists of required courses in oceanography, atmospheric science, and marine law. Typical elective courses include resource economics, fisheries science, political science, anthropology, sociology, and communications. Each program of study is adjusted to the needs of the individual. Applicants must meet the general admission requirements of the college.

**Major Code:** 6550

**Minor Code:** 6550

**Minor Code:** 6550

**Ocean, Earth and Atmospheric Sciences Graduate Major (MA, MS, PhD)**

**Graduate Areas of Concentration**

*Atmospheric sciences, geological oceanography, geophysics, ocean ecology and biogeochemistry, physical oceanography*

George Waldbusser, *Director*

Ocean, Earth, and Atmospheric Sciences Program
104 CEOAS Administration Building
Oregon State University
Corvallis, OR 97331
541-737-8964
Email: george.waldbusser@oregonstate.edu

OEAS is a multi-disciplinary, competitive degree program that values: 1) innovative, comprehensive and broad training and study of the ocean, earth, and atmosphere, including their interconnections, 2) engagement with thought leaders and communities to apply research toward meeting the environmental challenges of the 21st century, 3) an inclusive and welcoming environment where all individuals, viewpoints, and styles of scholarship are respected, and 4) opportunities for professional and personal growth including leadership development through shared college governance.

Students within OEAS focus in one of five concentrations and are expected to produce a high-quality, publication ready research thesis or dissertation. After completing 12-15 credits of foundational coursework with all OEAS students, students pursue specific courses in their area of concentration. The OEAS program is designed to help forge strong year to year student cohorts across disciplinary boundaries facilitating a strong peer network and ability to collaborate in an increasingly multi-disciplinary world. Depth of training comes through advanced coursework and production of a research thesis or dissertation under supervision of a faculty advisor and graduate committee members.

Students matriculating in OEAS must pursue one of the following concentrations in: 1) Atmospheric Sciences, 2) Marine Geology (Geological Oceanography), 3) Geophysics, 4) Ocean Ecology and Biogeochemistry, or 5) Physical Oceanography. The concentration will depend largely on the research focus of the student, as determined with their faculty advisor. For this and many other reasons, we advise all applicants to initiate conversations with potential faculty advisors well in advance of the application deadline.

**Major Code:** 5001

Ocean, Earth and Atmospheric Sciences (OEAS) is an interdisciplinary graduate major that first introduces students to the elements of the Earth system and the processes of mass and energy flow among them through a set of core/breadth courses:

<table>

</tr>
</tbody>
</table>

Students then pursue focused graduate course work and research in the following concentration areas, directed by their program committee.

**OEAS Concentration Areas**

**Atmospheric Sciences**

The atmospheric sciences are concerned with dynamics, physics and processes, including the interactions of the atmosphere with soil physics, hydrology and oceanic circulation. The atmospheric sciences concentration in the College of Earth, Ocean, and Atmospheric Sciences prepares students for careers in teaching and research through advanced study and participation in research projects directed by faculty members. MA, MS and PhD degrees are offered.
Applicants should have an undergraduate degree in physics, mathematics, engineering, chemistry or atmospheric science, with strength in mathematics. All applicants should have completed one year each of chemistry and physics with calculus, and courses in vector calculus and in differential equations.

Students perform thesis research on a wide range of problems including the study of global climate change, clouds and the earth's radiation budget, the structure and dynamics of turbulent flows, air-sea interaction, planetary atmospheres, the optimal use and economic value of weather and climate forecasts, and the study of acid rain and its effects on terrestrial ecosystems. In addition to theoretical, numerical, and observational methods of analysis, approximately one-fourth of the research projects either use or are developing methods for obtaining meteorological information from satellites.

Opportunities exist for PhD candidates to conduct some of their thesis research in Europe or at the National Center for Atmospheric Research. Most research projects involve collaboration with other scientists, either on the Oregon State University campus or at major domestic or international research centers.

**Geophysics**

Geophysics is concerned with physical processes within and on Earth, especially the internal physical constitution of the planet, and seismic, gravitational, geothermal, geoelectrical, geomagnetic phenomena and their relation to geological processes. The geophysics concentration offers graduate work toward MA, MS, and PhD degrees. Candidates should have an undergraduate degree in physics, mathematics, engineering, geology, or geophysics. Mathematics through differential equations is required and mathematical physics is desirable. Graduate Record Exam scores are required of all applicants. Opportunities for research exist on a wide range of geophysical problems in marine and continental regimes, emphasizing experimental, applied, and theoretical aspects.

**Oceanography**

Oceanography, the application of the sciences to the study of the oceans, is an interdisciplinary environmental science concerned with all processes: biological, chemical, geological, and physical, as well as the interactions between the ocean. The College of Earth, Ocean, and Atmospheric Sciences graduate major offers MA, MS, and PhD degrees with a concentration in oceanography.

For all areas in oceanography, applicants should have a strong quantitative background and an undergraduate degree in a relevant field of science or engineering and one year each of chemistry, physics, and calculus. Prior background in oceanography is not essential.

In geological oceanography (marine geology), a broad range of geological processes that influence the ocean is studied. Fields of interest include plate tectonics and the structure of the ocean basins, igneous petrology and geochemistry, paleoceanography and paleoclimatology, and coastal sedimentary processes. Candidates show strength in one or more of these fields: earth science, chemistry, physics, biology or mathematics.

Physical oceanography research covers the physical processes in the sea, exchange of energy and momentum at the air-sea interface, and the transmission and absorption of energy in the sea (e.g., light, heat, and sound). Circulation, tides, waves, heat content and density distributions are some of the other phenomena of particular interest. Candidates should have an undergraduate major in physics, mathematics, or engineering.

Contact Robert Allan, 541-737-1340, rallan@coas.oregonstate.edu, for more information.

1 Select from the listed courses (or the two other 400-level courses above) to bring the credit total to 27. Courses are grouped by focus area, but students may choose courses from one or more areas.
Risk and Uncertainty Quantification in Earth Systems Graduate Minor

Marine and coastal scientific and management issues are technically and socially complex, involving many forms of science, interests, perspectives, and stakeholders. There is much uncertainty in modeling forecast and policy outcomes associated with climate change and global markets. This interdisciplinary graduate minor will provide students with knowledge and skills to quantify and communicate risk and uncertainty derived from the analyses of large data in earth system science.

The graduate minor focuses on marine science and resource management, yet will be relevant to students from a variety of fields. Students will extend their ability to perceive and solve problems in a transdisciplinary context related to statistical inference, uncertainty quantification, risk analyses, earth system science, and social systems. Students will also acquire professional skills in communication and collaboration. The world is changing. Join us in becoming more resilient. The graduate minor is open to all OSU graduate students.

Learning Goals

Social Systems

The “social or human system” component is one of the key elements of a coupled natural human system. Specifically, it encompasses the social, cultural, economic, management, and policy aspects of the system, and how they interact with each other and with their environment. Disciplinary approaches to the human system include anthropology, sociology, policy, economics, etc. The goal of the “social systems” training component of the graduate R&U minor is to learn about social science methods, theory and/or applications as they relate to a marine, coupled natural human system. Risk and Uncertainty graduate minor students are expected to complete the requirements by taking at least one course in this area. The course must allow students to: (1) Recognize the perspective of the particular discipline or area of study, (2) Understand and respect the various methodological approaches used in the social sciences (qualitative and/or quantitative), their possibilities and limitations, and how these may be best integrated to the earth systems, big data or R&U component of the minor, (3) Explain and extract the scalar nature of the course material, whether it is related to cultural, social, institutional, management, or policy aspects of a system, (4) Critically assess gaps or opportunities for inclusion of social, cultural, or economic elements of a natural system, and vice versa.

Risk and Uncertainty

The goal of the risk and uncertainty quantification training component of the graduate R&U minor is to understand and acquire mastery of some of the fundamental mathematical/computational and statistical methods for quantifying uncertainty and analyzing risk for decision making. NRT (National Research Traineeship) students seeking the graduate minor are expected to acquire (mathematical/computational/statistical) tools that can be used to describe and assess risk and uncertainty in problems related to the marine, coupled natural human system. Students have options to choose from a variety of courses dealing with the mathematical foundations of risk and uncertainty involving mathematical techniques in (i) decision making under uncertainty, (ii) ruin probabilities, (iii) measures of variability, (iv) probabilities of rare events and large deviations, (v) Monte Carlo simulation, (vi) optimization and dynamic programming, (vii) stochastic models in biology pertaining to spread of disease and related phenomena. Students are expected to acquire experience in a combination of computational, simulation and/or theoretical approaches. NRT students with a social science or human dimension component will be expected to understand and become literate and conversant in the quantitative aspects of risk and uncertainty quantification.

Earth Systems

Students will develop an integrated understanding of the Earth System, including biological, physical and geological mechanisms that affect Earth climate, species dynamics and interactions, elemental cycles and ecosystem services. The emphasis will be on understanding the linkages between physics, biology, geology, and chemistry from a system theory perspective, and on how these linkages affect Earth's biogeochemical processes. Disciplinary components of the Earth System module include biological, chemical and physical oceanography, biogeochemistry, geology, climate and atmospheric sciences, and ecology.

Big Data

Issues surrounding massive data sets ('big' data) are intertwined with data-enabled science and engineering. The goals of the big data training component are for students

1. to acquire computational and data-management skills necessary for handling and processing large data sets, and
2. to assess the value of information obtained from big data with respect to such issues as observation bias, signal versus noise, spurious relationships, and incidental endogeneity.

Much of the training in big data management and processes is acquired through hands-on experiences. Specific components of the big data module include handling and processing massive datasets; being able to identify and articulate the limitations of big data sets; implementing classification, clustering and/or network analyses as appropriate.

Contact Lorenzo Ciannelli, 541-737-3142 or lciannelli@coas.oregonstate.edu for more information or visit the website (http://marinerisk.ceoas.oregonstate.edu).

Mentoring Requirements

There must be a minor professor in the student's committee. The minor professor is in any of the fields where course designators fall but must not be from the student's major.
Classes for Minor

Graduate PhD students are required to complete at least 18 credits, MS students are required to complete at least 15 credits for the minor.

PhD students take one course from each of the four remaining areas: Big data and Uncertainty Quantification, Risk Analyses, Earth Systems, and Social Systems.

MS students take one course in Social Systems and one in Earth Systems and choose one course from either Big Data and Uncertainty Quantification or Risk Analysis.

Water Conflict Management and Transformation Graduate Certificate

Also available via Ecampus.

Lynette de Silva, Director
Program in Water Conflict Management and Transformation
Oregon State University
College of Earth, Ocean, and Atmospheric Sciences
256 Wilkinson Hall
Corvallis, OR 97333
Phone: 541-737-7013
Fax: 541-737-1200
Email: Lynette.deSilva@oregonstate.edu
Website: http://transboundarywaters.science.oregonstate.edu/

Non-degree students, and those requiring additional information and advising, should contact the program director.

The graduate certificate in Water Conflict Management and Transformation is an 18-credit interdisciplinary program. It is designed to provide graduate students, non-degree students, water professionals and decision-makers with the required specialized resources and skills to address the water demands and challenges of the 21st Century, in Oregon, across the United States and internationally.

The curriculum centers around case-based, interactive course and field work to provide an in-depth look at water conflict, conflict transformation, and prevention issues and strategies across four distinct and overlapping themes:

- Water Governance
- Water and Ecosystems
- Water and Society
- Water and Economics

Each theme incorporates several topics critical to understanding water conflicts.

Certificate Code: CG06

Advisor guidance and approval is required for each student’s certificate program of study. All students seeking a graduate certificate are subject to all general policies governing the courses for the master’s degree. As such, these students will be required to take a minimum of 50% graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

### Water Conflict Management and Transformation Graduate Minor

**Graduate Areas of Concentration**

**Water conflict management and transformation**

The graduate minor in Water Conflict Management and Transformation is designed to accommodate the needs of professionals and graduate students. It offers an integrative approach that explicitly integrates human and policy dimensions of water resources within the framework of scientific and technological solutions. The graduate minor is a flexible, coherent program that offers critical and underemphasized skills essential to preventing and resolving water conflicts. It helps facilitate dialogue on critical water issues across diverse values and perspectives, and it serves OSU students, citizens and officials in Oregon, the United States and internationally.

The curriculum centers around case-based, interactive course and field work to provide an in-depth look at water conflict, conflict transformation, and prevention issues and strategies across four distinct and overlapping themes: water governance, water and ecosystems, water and society, and water and economics. Each theme incorporates several topics critical to understanding water conflicts. A highlight of the minor is the capstone course coupled with an intersession practicum working with watershed councils, landowners, and agencies in Northeast Oregon; and a guided internship in a watershed or basin at risk of, or in, water conflict.

Through this minor, students will learn about and practice conflict transformation skills, explore what new institutional networks and relationships are needed, and how these can be achieved through role-playing, in-class exercises, and guest lectures. Students will also be introduced to leadership skills for guiding this type of change.

Contact Lynette de Silva, 541-737-7013 or lynette.desilva@oregonstate.edu for more information.

College of Education (CoEd)
The College of Education offers undergraduate and graduate degrees to prepare teachers, counselor educators, educational researchers, and other educational professionals for careers in K-12 schools, community colleges/universities, business and industry, and other post secondary settings. In addition, there are electives for undergraduate students who wish to explore education as a career choice. All programs reflect research-based approaches to education and counseling developed by university faculty.

Authorization and Accreditation
The College of Education is authorized by the State Board of Higher Education to offer teacher education and counseling programs and by the Oregon Teacher Standards and Practices Commission (TSPC) to recommend teacher and counselor candidates for initial licensure. Refer to the listing of endorsements (http://www.tspsc.state.or.us/program_list.asp) that OSU is authorized to approve.

All teacher education programs are fully accredited by the Council for the Accreditation of Educator Preparation (CAEP) and by the Oregon Teacher Standards and Practices Commission. Counselor education programs are fully accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Applicants for teacher and counselor licensure must meet TSPC requirements in effect at the time of admission to a licensure program. Licensure rules are regulated by TSPC and may change. Students should consult regularly with their advisor.

Advising
Early and continuous advising is an important aspect of an education in both the undergraduate and graduate programs in the College of Education.

Scholarships
The College of Education offers a variety of scholarships and fellowships to deserving students. A listing of the many opportunities can be found on the College of Education website (http://education.oregonstate.edu/education-scholarships-and-fellowships/). Additional state and private scholarship information are available at the OSU Office of Financial Aid and Scholarships.

Faculty
Professors Alexander, Buxton, Crisp, Dierking, Dykeman, Ng, Storksdieck

Equivalent to: CSSA 502
This course is repeatable for 16 credits.

AHE 503, THESIS, 1-16 Credits
Equivalent to: CSSA 503
This course is repeatable for 999 credits.

AHE 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CSSA 505
This course is repeatable for 16 credits.

AHE 506, PROJECTS, 1-16 Credits
Equivalent to: CSSA 506
This course is repeatable for 16 credits.
Available via Ecampus

AHE 507, SEMINAR, 1-5 Credits
Equivalent to: CSSA 507
This course is repeatable for 16 credits.

AHE 508, WORKSHOP, 1-3 Credits
Equivalent to: CSSA 508
This course is repeatable for 16 credits.

AHE 509, PRACTICUM, 1-16 Credits
Equivalent to: ED 509
This course is repeatable for 16 credits.

AHE 510, INTERNSHIP, 1-18 Credits
By special permission and arrangement.
Equivalent to: ED 510
This course is repeatable for 18 credits.
Available via Ecampus
AHE 517, EDUCATION AND WORK, 3 Credits
Issues related to work in the U.S. and other countries. The role of public, private, corporate, government, military and other education and training programs in meeting changing individual, corporate, and social work-related needs.
Equivalent to: ED 517

AHE 520, MULTICULTURAL ISSUES IN HIGHER EDUCATION, 3 Credits
Developing understanding, knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.
Equivalent to: CSSA 520

AHE 522, INSTRUCTIONAL TECHNOLOGY I, 1 Credit
Explores technologies used in distance education to deliver content and facilitate active learning through learner creation of digital portfolios and artifacts using online tools and apps.
Corequisites: AHE 553
Available via Ecampus

AHE 523, INSTRUCTIONAL TECHNOLOGY II, 1 Credit
An overview of best practices in digital-age learning design, including implementation of backward design principles.
Prerequisite: AHE 522 with C or better
Corequisites: AHE 533
Available via Ecampus

AHE 524, INSTRUCTIONAL TECHNOLOGY III, 1 Credit
Students will develop the knowledge and skills needed to design and create complete online teachings/courses within a learning management system.
Prerequisite: (AHE 522 with C or better and AHE 523 [C])
Corequisites: AHE 531
Available via Ecampus

AHE 525, INSTRUCTIONAL TECHNOLOGY IV, 1 Credit
Learners will research and demonstrate how to use a current innovative instructional technology, as well as develop skills in understanding trends and preparing for future innovations in instructional technology.
Prerequisite: (AHE 522 with C or better and AHE 523 [C] and AHE 524 [C])
Corequisites: AHE 547
Available via Ecampus

AHE 531, INSTRUCTIONAL DESIGN, 4 Credits
Designed for instructors, trainers, managers, organizational consultants or others who are responsible for the development of programs and courses in community colleges, the workplace or other settings. Using systems concepts and methods, students will learn to design learner-centered instructional programs and courses.
Equivalent to: ED 531
Available via Ecampus

AHE 532, PROGRAM EVALUATION, 4 Credits
Assessing outcomes in college curriculum and workplace training programs from a systems perspective and evaluation of program effectiveness. Particular emphasis on formative and summative evaluation, frameworks for program evaluation, quantitative and qualitative methods and analysis, communicating and reporting evaluation findings, and the ethics and standards of evaluation practice.
Equivalent to: ED 532
Available via Ecampus

AHE 533, NEEDS ASSESSMENT AND RESEARCH, 4 Credits
Introduces workplace learning needs assessment (WLNA) and research principles and practices for individual and collaborative learning groups.
Prerequisite: AHE 553 with C or better
Equivalent to: ED 533
Available via Ecampus

AHE 534, ORGANIZATIONS AND SYSTEMS THEORY, 4 Credits
Introduces principles and practices underlying individual and collaborative work group learning. Participants will learn how to create an environment that promotes effective and efficient workplace learning.
Available via Ecampus

AHE 547, INSTRUCTIONAL STRATEGIES FOR ADULT LEARNERS, 4 Credits
Exploration of and practice using instructional strategies to enhance adult learning. Acquisition of an instructional strategy tool kit as well as a method for evaluating adult learning events.
Equivalent to: ED 547
This course is repeatable for 60 credits.
Available via Ecampus

AHE 549, ETHICAL AND PROFESSIONAL ISSUES, 4 Credits
Focuses on issues facing professionals working with adult learners as well as ethical issues relevant to the practice and scholarship in the field. Combines instruction in inquiry-based teaching methods and learning theory with work in professional settings, such as for-profit and non-profit organizations and government agencies.
Available via Ecampus

AHE 553, ADULT LEARNING & DEVELOPMENT, 4 Credits
Introduce participants to key theories, orientations, models, and principles of learning and development in adulthood.
Equivalent to: ED 553
Available via Ecampus

AHE 567, LEADERSHIP DEVELOPMENT AND HUMAN RELATIONS, 4 Credits
Exploration of multiple theories of leadership in different organizational contexts; synthesize theory with experience to construct a personal framework for leadership practice.
Equivalent to: ED 567
Available via Ecampus
AHE 575, EDUCATIONAL FINANCE, 3 Credits
Finance, budgeting and accounting for sources of revenue; deferral, state and local financing, budgeting and accounting models, practical experience combined with examination of theory, trends and issues. Focus in either public schools, community colleges or higher education through practical experience.
Equivalent to: ED 575
Available via Ecampus

AHE 582, LEGAL ISSUES IN HIGHER EDUCATION, 3 Credits
A comprehensive presentation and discussion of the law governing administration within community colleges and college/universities with a special emphasis on student services administration.
Available via Ecampus

AHE 599, SPECIAL TOPICS, 1-16 Credits
Equivalent to: CSSA 599, ED 599
This course is repeatable for 16 credits.

AHE 601, RESEARCH, 1-16 Credits
Equivalent to: ED 601
This course is repeatable for 16 credits.
Available via Ecampus

AHE 602, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: ED 602
This course is repeatable for 16 credits.
Available via Ecampus

AHE 603, THESIS, 1-16 Credits
Equivalent to: ED 603
This course is repeatable for 999 credits.
Available via Ecampus

AHE 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: ED 605
This course is repeatable for 16 credits.
Available via Ecampus

AHE 606, PROJECTS, 1-16 Credits
Equivalent to: CSSA 606
This course is repeatable for 16 credits.

AHE 607, SEMINAR, 1-16 Credits
Equivalent to: ED 607
This course is repeatable for 16 credits.

AHE 608, WORKSHOP, 1-16 Credits
Equivalent to: ED 608
This course is repeatable for 16 credits.

AHE 609, PRACTICUM CLINICAL EXPERIENCE, 1-16 Credits
Equivalent to: ED 609
This course is repeatable for 16 credits.

AHE 610, INTERNSHIP, 1-15 Credits
Equivalent to: ED 610
This course is repeatable for 15 credits.
Available via Ecampus

AHE 611, QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH I, 3 Credits
Foundational course to methods and statistics used in quantitative educational research. Examines data analysis, statistical procedures, and interpretation of results within postsecondary environments.

AHE 612, RESEARCH PERSPECTIVES IN EDUCATION, 3 Credits
Research perspectives, how they are influenced by worldviews, and how these worldviews influence research.
Equivalent to: ED 612
Recommended: AHE 562 and completion or concurrent enrollment in an introductory statistics course

AHE 613, RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION, 3 Credits
Critical analysis of scholarly studies in education from a variety of research perspectives.
Equivalent to: ED 613
Recommended: AHE 612 and completion or concurrent enrollment in an intermediate statistics course

AHE 614, ADVANCED RESEARCH METHODS IN EDUCATION, 1-3 Credits
Selected topics in research methods as appropriate for research perspectives in education. May be repeated.
Equivalent to: ED 614
This course is repeatable for 6 credits.
Recommended: AHE 613

AHE 615, RESEARCH ISSUES, 3 Credits
A core course in the College of Education’s doctoral program that focuses on research issues.
Prerequisite: (AHE 612 with C or better and AHE 613 [C] and AHE 614 [C])

AHE 616, QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH II, 3 Credits
Develop conceptual and practical understanding of research and evaluation in higher education. Course topics include basic statistics, survey design, data analysis, and assessment issues. As an advanced statistics course, students will have the opportunity to apply concepts and gain direct research experience by conducting an original research project.
Prerequisite: AHE 611 with C or better
AHE 618, QUALITATIVE ANALYSIS IN EDUCATIONAL RESEARCH, 3 Credits
Introduces learners to a variety of qualitative research perspectives and methodologies. Participants will examine these approaches by critiquing a scholarly article containing qualitative methods; formulating qualitative questions; writing a short proposal; collecting, coding, and analyzing data; and writing a final synthesis paper.
Available via Ecampus

AHE 621, LEADERSHIP IN STUDENT SERVICES, 3 Credits
Exploration of significant issues in design and delivery of student services in community college and higher education settings. Group discussion, model building, problem posing, issues analysis, and theory applications are employed. Students will reflect on current and future practices in student services, including emerging approaches to leadership.
Equivalent to: ED 621

AHE 638, HISTORY OF HIGHER EDUCATION, 3 Credits
Surveys American higher education across 200-plus years of American history, with a specific emphasis in this section on the American community college.

AHE 640, HIGHER EDUCATION ADMINISTRATION, 3 Credits
Current leadership and management theories and models, systems of organization, patterns of internal and external governance, and issues in institutional planning and advancement in higher education.
Equivalent to: ED 640

AHE 643, ORGANIZATION THEORY-HIGHER EDUCATION, 3 Credits
An introduction to organizational theory (OT). The texts allow us to explore how systems thinking is applied to our world, and how we can use it to better understand the nature of human social engagement. Both OT and living systems theories are deeply associated with improvement and change theories in higher education settings and business.

AHE 645, ETHICAL PRACTICE, 3 Credits
Reviews major ethical theories with an emphasis on practical applications related to community college professional practice.
Available via Ecampus

AHE 653, INSTRUCTIONAL LEADER I, 3 Credits
A core course in the College of Education’s doctoral program. Introduces major theories, theorists, and theoretical principles that will assist the learner in the understanding and development of systemic frameworks for instructional leadership.

AHE 672, RESEARCH PERSPECTIVES IN FOUR-YEAR HIGHER EDUCATION, 3 Credits
An overview of the extensive research related to four-year colleges and universities, with an emphasis on the role of research in understanding and interpreting the nature of higher education. Explore research epistemologies, theories, and approaches related to social science and higher education, and how these ideas influence worldview and subsequent research. Identify a significant research topic/problem statement which will carry forward into the second year research courses in moving toward the dissertation topic for research related to four-year higher education.

AHE 673, RESEARCH INTERPRETATION IN FOUR-YEAR HIGHER EDUCATION, 3 Credits
Critical analysis and interpretation of journal articles and scholarly research related to a problem statement in four-year higher education organization, learning, and/or leadership. Refinement of Sections 1 (Research Focus and Problem Statement) and II (Manuscript and Literature Review) of a Dissertation Proposal in four-year higher education.
Prerequisite: AHE 672 with C or better

AHE 674, ADVANCED RESEARCH METHODS IN FOUR-YEAR HIGHER EDUCATION, 3 Credits
Identification and evaluation of an appropriate quantitative or qualitative study focused on four-year higher education. This includes a requirement that students demonstrate the ability to analyze and interpret data associated with their research question(s) as identified in their research proposal and that they outline the methodology that will be used to answer their research question(s)/proposal.
Prerequisite: AHE 673 with C or better

AHE 675, FOUR-YEAR HIGHER EDUCATION RESEARCH ISSUES, 3 Credits
Finalize a dissertation proposal related to a research question on four-year education institutions that reflects research epistemologies, theories and approaches. Develop a dissertation draft for review by the student’s dissertation committee outlining: (a) Purpose of the student’s study and its significance within the context of research on four-year colleges and universities, (b) Review of related literature on the specific topic of the dissertation, and (c) Design of the dissertation study.
Prerequisite: AHE 674 with C or better

AHE 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

AHE 805, READING AND CONFERENCE, 1-16 Credits
Equivalent to: ED 805
This course is repeatable for 16 credits.

AHE 808, WORKSHOP, 1-4 Credits
Equivalent to: ED 808
This course is repeatable for 16 credits.
Counseling (COUN)

**COUN 421, PERSONAL GROWTH AND WELLNESS IN THE MODERN WORLD, 3 Credits**
Explores social and emotional adjustment, growth, and wellness within current social contexts. Examines challenges to wellness and the role of normal development, self-help, and the helping professions in the growth process. **Available via Ecampus**

**COUN 431, SOCIAL CHANGE: ADDICTIONS AND TREATMENT, 3 Credits**
Explores the etiology of addictions in modern society including the history and development of addictions work. Studies many aspects of addiction including historical origins, risk factors, biological and psychological functioning, counseling issues, skills, theories, assessment, treatment, relapse prevention, research, cultural and social justice issues, co-occurring disorders and population-specific information. **Available via Ecampus**

**COUN 441, INTRODUCTION TO PROFESSIONAL COUNSELING, 3 Credits**
Provides students with an overview of the counseling profession that includes the history and philosophical foundations of the profession and roles and functions of professional counselors. The course content will critically engage the privilege and responsibility of the counseling profession in a multicultural society. **Available via Ecampus**

**COUN 499, SPECIAL TOPICS, 1-16 Credits**
This course is repeatable for 18 credits. **Available via Ecampus**

**COUN 501, RESEARCH, 1-16 Credits**
Equivalent to: TCE 501
This course is repeatable for 16 credits.

**COUN 502, INDEPENDENT STUDY, 1-16 Credits**
Equivalent to: TCE 502
This course is repeatable for 16 credits.

**COUN 503, THESIS, 1-16 Credits**
Equivalent to: TCE 503
This course is repeatable for 999 credits.

**COUN 505, READING AND CONFERENCE, 1-3 Credits**
Equivalent to: TCE 505
This course is repeatable for 16 credits.

**COUN 506, PROJECTS, 1-3 Credits**
Equivalent to: TCE 506
This course is repeatable for 16 credits.

**COUN 507, SEMINAR, 1-3 Credits**
Equivalent to: TCE 507
This course is repeatable for 16 credits.

**COUN 508, WORKSHOP, 1-16 Credits**
Equivalent to: TCE 508
This course is repeatable for 16 credits.

**COUN 509, PRACTICUM, 1-16 Credits**
Designed to develop competencies in basic skills, facilitative dimensions, and counseling process. Self-critique, peer-critique, and supervisor-critique of videotaped interview. Written self-critique, oral case presentation and charting skills are learned. Graded P/N. **Equivalent to: TCE 509**
This course is repeatable for 16 credits.

**COUN 510, INTERNSHIP, 1-18 Credits**
The internship is the culminating field experience of the MS in Counseling program. It is designed to provide students with an on-site placement in a public or private mental health or school setting that will create the necessary bridge between training and professionalism. Students are expected to function per the expectations of other full-time employees and counseling staff at the internship site. Graded P/N. **Equivalent to: TCE 510**
This course is repeatable for 16 credits.

**COUN 513, COUNSELING PRE-PRACTICUM, 3 Credits**
Designed to develop competencies in basic counseling skills and processes. Self critique, peer critique, and supervisor critique of videotaped interviews with peer clients. A pass requires at least B level work. Graded P/N. **Equivalent to: TCE 513**
This course is repeatable for 6 credits.

**COUN 514, PRACTICUM IN COUNSELING, 1-3 Credits**
Designed to develop competencies in basic skills, facilitative dimensions, and counseling process. Self-critique, peer-critique, and supervisor-critique of videotaped interview. Written self-critique, oral case presentation and charting skills are learned. A pass requires at least B level work. Graded P/N. **Equivalent to: TCE 514**
This course is repeatable for 9 credits.

**COUN 515, COUNSELING INTERNSHIP, 1-15 Credits**
The internship is the culminating field experience of the MS in Counseling program. It is designed to provide the student with an on-site placement in a public or private mental health or school setting that will create the necessary bridge between training and professionalism. Graded P/N. **Equivalent to: TCE 515**
This course is repeatable for 24 credits.
COUN 530, FUNDAMENTALS OF COUNSELING, 3 Credits
Exploration of basic helping processes appropriate in a variety of settings. Designed for students planning on working in a human service profession, such as counseling, teaching, nursing, medicine, law. A variety of skills and techniques are demonstrated and practiced through videotape and role play, and review of ethical standards of conduct. Equivalent to: CSSA 530, TCE 530

COUN 531, DEVELOPMENTAL PERSPECTIVES IN COUNSELING, 3 Credits
A study of affective, behavioral, cognitive, physical, and moral development for human growth and maturation. Theories of personality and learning that affect normal and non-normal development. Relationship of understanding human development to the counseling profession. Equivalent to: TCE 531

COUN 532, SOCIAL AND CULTURAL PERSPECTIVES IN COUNSELING, 3 Credits
Social and cultural factors effecting counseling. Includes studies of change, ethnic groups, subcultures, changing roles of women, sexism, urban and rural societies, population patterns, cultural mores, use of leisure time, and differing life patterns. Equivalent to: TCE 532

COUN 533, ADDICTIVE BEHAVIOR COUNSELING, 3 Credits
Techniques for addictive behavior assessment and counseling. Specific addictions covered include substance abuse, gambling, and eating disorders. Equivalent to: TCE 533

COUN 536, APPLIED PSYCHOPHARMACOLOGY FOR COUNSELORS, 3 Credits
Acquaints counseling students with the fundamentals of psychotropic drugs. Basics of pharmacology, adverse effects, indications, and drug interactions will be discussed. Boundaries of practice and practical issues of assessment and referral will be covered. The overall aim of the course is to provide information about psychopharmacology to the non-medical mental health care provider so that she or he can be a more informed member of the mental health care team. This course does not purport to prepare the student to be any part of the pharmacological prescriptive process. That is the purview of the medically trained person. Equivalent to: TCE 536

COUN 540, NEW VISION SCHOOL COUNSELING: ACADEMIC ACHIEVEMENT, 3 Credits
Participants will be able to implement research-based educational practices in: 1. Individual and group academic achievement counseling. 2. Consulting with parents, teachers, and schools regarding academic achievement. 3. Utilizing culturally competent practices in addressing academic achievement issues. 4. Applying the appropriate legal and ethical guidelines to work in the academic domain. Equivalent to: TCE 540

COUN 541, THE COUNSELING PROFESSION, 3 Credits
Provides the foundation for becoming a counselor and explores the psychological and philosophical ramifications of the counselor in a changing world. Topics will include values in counseling, ethical and legal issues in counseling, research in counseling, and maintaining a professional identity. Equivalent to: TCE 541

COUN 546, LEADERSHIP OF SCHOOL COUNSELING PROGRAMS, 3 Credits
Designed to prepare school counselors to lead teams in the development and implementation of comprehensive school counseling programs. Principles of leadership, system change, and advocacy are introduced. State and National Comprehensive School Counseling models are examined. Equivalent to: TCE 546

COUN 548, SPECIAL EDUCATION ISSUES IN COUNSELING, 3 Credits
Addresses various educational disability categories, the fundamentals of special education law, the special education assessment process, the special education definition of emotional/behavioral disorders, and the counselor’s role in supporting children with special emotional needs. Equivalent to: TCE 548

COUN 550, FOUNDATIONS OF MENTAL HEALTH COUNSELING, 3 Credits
Addresses the foundations of mental health counseling: (1) historical, philosophical, societal, cultural, economic, and political dimensions of, and current trends in, the mental health movement; (2) roles, functions, preparation standards, credentialing, licensure and professional identity of mental health counselors, (3) policies, laws, legislation, recognition, reimbursement, right-to-practice, and other issues relevant to mental health counseling. Equivalent to: TCE 550

COUN 551, THEORY AND TECHNIQUES OF COUNSELING I, 3 Credits
Basic concepts and facilitative skills of helping relationships. Introduction and overview of counseling theories and their related processes and techniques. Equivalent to: TCE 551
COUN 552, THEORY AND TECHNIQUES OF COUNSELING II, 3 Credits
Continued development of the theories and techniques of counseling including identification of the counseling process. Emphasis on personality development and affective, behavioral and cognitive approaches.
Equivalent to: TCE 552
Recommended: COUN 551

COUN 562, INTRODUCTION TO RESEARCH METHODS IN COUNSELING, 3 Credits
An introductory course for master’s level students. Explains basic evaluation, quantitative and qualitative research methods in the counseling profession; action research and the fundamental statistical procedures used in the interpretation and use of research studies.

COUN 567, APPRAISAL OF THE INDIVIDUAL, 3 Credits
Development of framework for understanding the individual; methods for data gathering and assessment; individual and group testing; case study approaches; observational, sociometric, and environmental procedures; study of individual differences. Ethnic, cultural, and sex factors are emphasized.
Equivalent to: TCE 567
Recommended: Basic statistics course.

COUN 568, LIFESTYLE AND CAREER DEVELOPMENT, 3 Credits
Major theoretical approaches to career development; available resources for educational and occupational assessment; procedures to enhance career exploration, planning and placement. Emphasis is on the decision-making process and issues of career counseling with special populations.
Equivalent to: TCE 568

COUN 571, GROUP COUNSELING PROCEDURES, 3 Credits
A conceptual and experiential introduction to group dynamics. Group counseling approaches and models; issues of group leadership; styles of leadership and group facilitation skills. Consideration is given to group counseling goals, composition, phases and research.
Equivalent to: TCE 571

COUN 575, FAMILY COUNSELING, 3 Credits
An overview of the major theoretical approaches to family counseling will be covered. Through the use of readings, demonstrations, and videos the student will become familiar with systems foundations, the history of family counseling, family roles, interaction patterns, and decision-making processes.
Equivalent to: TCE 575

COUN 577, APPLIED PSYCHOPATHOLOGY AND PSYCHODIAGNOSTICS, 3 Credits
Addresses the principles of diagnosis of psychopathology and the use of current diagnostic tools, including the current edition of the Diagnostic and Statistical Manual (DSM). Includes psychiatric terminology, treatment, current research, cross cultural impact, ethical implications, and goal planning related to mental health processes and case management.
Equivalent to: TCE 577
Recommended: COUN 541 and COUN 551 and COUN 552.

COUN 578, CRISIS, TRAUMA, AND GRIEF COUNSELING, 3 Credits
The theory and pragmatics of crisis, trauma and grief counseling are addressed.
Equivalent to: TCE 578

COUN 579, TRAUMA-INFORMED COUNSELING, 3 Credits
Trauma-informed counseling methods for promoting client wellness and resilience are addressed.
Prerequisite: COUN 578 with C or better
Recommended: COUN 509

COUN 581, CROSS-CULTURAL COUNSELING, 3 Credits
Cognitive and experimental study of social and psychological variables influencing the cross-cultural counseling relationship. Social and psychological experiences of selected subcultures. Relevant assessment instruments and current literature, methods and outcome studies.
Equivalent to: TCE 581

COUN 582, MULTICULTURAL COUNSELING II, 3 Credits
Further explores multicultural counseling by studying in-depth the experience of specific student populations and their unique strengths and needs. Students will gain understanding of the specialized school programs and state and national regulations that support a variety of learners as well as the theories and research related to language acquisition to support ELL and bilingual students in the PK-12 system. Students will engage in authentic experiences and assignments to enrich their understanding of sub-populations of students and their families to enhance their cultural responsiveness with those specific groups of learners.
Prerequisite: COUN 581 with C or better

COUN 591, INSTRUCTIONAL STRATEGIES FOR SCHOOL COUNSELORS, 3 Credits
Students will gain understanding in research-based classroom teaching practices including classroom planning and evaluation. Students will refine their educational beliefs of classroom practice and gain insight into the administrative structure of public schools as it relates to the teacher and school counselor.
Equivalent to: TCE 591
Available via Ecampus
COUN 592, CLASSROOM INSTRUCTION FOR COUNSELORS, 3 Credits
75 hours of supervised instruction in a public school setting.
Equivalent to: TCE 592
Recommended: COUN 591.

COUN 595, GROUP COUNSELING II, 3 Credits
Group counseling theories and pragmatics for clients with mental and emotional disorders.
Equivalent to: TCE 595
Available via Ecampus

COUN 597, INTRODUCTION TO COUNSELOR SUPERVISION, 3 Credits
Introduction to the theory and pragmatics of counselor supervision.
Equivalent to: TCE 597
Available via Ecampus

COUN 598, COUNSELOR CONSULTATION, 3 Credits
Development of consultation skills as a supervisor and counselor educator. Consultation theory and practice are studied. Students practice consultation skills and receive feedback.
Equivalent to: TCE 598
Available via Ecampus

COUN 599, SPECIAL TOPICS, 1-4 Credits
Equivalent to: TCE 599
This course is repeatable for 90 credits.

COUN 601, RESEARCH, 1-16 Credits
Equivalent to: TCE 601
This course is repeatable for 16 credits.
Available via Ecampus

COUN 602, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: TCE 602
This course is repeatable for 16 credits.

COUN 603, THESIS, 1-16 Credits
Equivalent to: TCE 603
This course is repeatable for 999 credits.
Available via Ecampus

COUN 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: TCE 605
This course is repeatable for 16 credits.

COUN 606, PROJECTS, 1-16 Credits
Equivalent to: TCE 606
This course is repeatable for 16 credits.

COUN 607, SEMINAR, 1-16 Credits
Equivalent to: TCE 607
This course is repeatable for 16 credits.
Available via Ecampus

COUN 608, WORKSHOP, 1-16 Credits
Equivalent to: TCE 608
This course is repeatable for 16 credits.

COUN 609, PRACTICUM IN COUNSELING, 1-12 Credits
Specialized counseling experiences supervised by a professional.
Emphasis is on development of advanced skills in counseling specific to a population.
Equivalent to: TCE 609
This course is repeatable for 16 credits.

COUN 610, INTERNSHIP IN COUNSELING, 1-15 Credits
Designed to provide experiences in development of teaching and supervision skills in preparation as a counselor educator and supervisor.
Equivalent to: TCE 610
This course is repeatable for 15 credits.

COUN 612, RESEARCH PERSPECTIVES IN EDUCATION, 3 Credits
Research perspectives, how they are influenced by worldviews, and how these worldviews influence research.
Equivalent to: TCE 612
Recommended: COUN 562 and completion or concurrent enrollment in an introductory statistics course

COUN 613, RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION, 3 Credits
Critical analysis of scholarly studies in education from a variety of research perspectives.
Equivalent to: TCE 613
Recommended: (TCE 612 or COUN 612) and completion or concurrent enrollment in an intermediate statistics course

COUN 614, ADVANCED RESEARCH METHODS IN EDUCATION, 1-3 Credits
Selected topics in research methods as appropriate for research perspectives in education.
Equivalent to: TCE 614
This course is repeatable for 6 credits.
Recommended: COUN 613

COUN 616, UNIVERSITY LEVEL INSTRUCTIONAL THEORY AND METHODS, 3 Credits
Addresses general university level instructional theory and methods as well as pedagogy specific to counselor education.
Equivalent to: TCE 616
COUN 617, ADVANCED COUNSELOR SUPERVISION, 3 Credits
Advanced theory and techniques in counselor supervision. Pedagogical issues in training supervisors are addressed.
Equivalent to: TCE 617

COUN 618, PRACTICUM IN COUNSELING, 1-12 Credits
Specialized counseling experiences supervised by a professional. Emphasis is on development of advanced skills in counseling specific to a population.
Equivalent to: TCE 618
This course is repeatable for 16 credits.

COUN 619, INTERNSHIP IN COUNSELING, 1-12 Credits
Designed to provide experiences in development of teaching and supervision skills in preparation as a counselor educator and supervisor.
Equivalent to: TCE 619
This course is repeatable for 16 credits.
Available via Ecampus

COUN 621, ADVANCED TOPICS IN EDUCATION, 3 Credits
Advanced critical study of theory and research related to specific topics of counseling and counselor education.
Equivalent to: TCE 621
This course is repeatable for 16 credits.

COUN 634, ADVANCED COUNSELING PRACTITIONER II, 3 Credits
Addresses the theory, science, pragmatics and pedagogy of evidence-based practices in professional counseling.
Equivalent to: TCE 634

COUN 662, COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS I, 3 Credits
Part I of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course I include application of the following in counselor education research: (1) data scales and scale transformation, (2) frequency distributions and histograms, (3) measures of central position, (4) variability, (5) characteristics of data curves, (6) normality, (7) measures of variability, (8) the statistical hypothesis, (9) statistical errors (Type I/Type II), (10) power analysis, and (11) statistical correlation.
Equivalent to: TCE 662
Recommended: COUN 562.

COUN 663, COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS II, 3 Credits
Part II of a three-part course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course II include application of the following in counselor education research: (1) a review of the dependent variable, normal curve, Type I and Type II errors, power analysis, and criteria for selecting statistical tools, (2) significance tests, including Chi-square t-test, one-factor analysis of variance, multiple comparison tests (L.S.D. and Tukey’s HSD), two-factor analysis of variance, statistical interaction (ordinal and disordinal), linear regression, factor analysis, and analysis of covariance.
Equivalent to: TCE 663

COUN 664, COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS III, 3 Credits
Part III of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course III include application of the following in counselor education research: (1) multiple regression, (2) path analysis, (3) confirmatory factor analysis, analysis, (4) logistic regression, (5) reliability and generalizability theory, (6) cluster analysis, (7) structural equation modeling, and (8) single subject designs.
Equivalent to: TCE 664

COUN 665, PUBLICATION METHODS IN COUNSELOR EDUCATION, 3 Credits
Teaches doctoral students how to write theses, grant reports, peer-reviewed journal articles, and textbook chapters.
Equivalent to: TCE 665

COUN 667, ADVANCED ASSESSMENT IN COUNSELING, 3 Credits
Explores current issues in the use of assessment in counseling, best practices in instrument development, and best practices in assessment pedagogy.
Equivalent to: TCE 667

COUN 668, ADVANCED CAREER DEVELOPMENT AND CONSULTATION IN COUNSELING, 3 Credits
An advanced course surveying past, current, and possible future technical and philosophical perspectives concerning career development and counseling. Issues in consultation, social change theory, and advocacy action planning are also reviewed in light of their impact on future counseling practitioners. Pedagogical methods for presenting current issues in career development, consultation, social change theory and advocacy action planning are a major focus of the class.
Equivalent to: TCE 668
Recommended: COUN 568 and COUN 598.
Available via Ecampus
COUN 671, ADVANCED GROUP COUNSELING, 3 Credits
Provides learning experiences beyond the entry level in group counseling. Theoretical and pedagogical innovations in this area are discussed. 
Equivalent to: TCE 671

COUN 681, ADVANCED DIVERSITY AND SOCIAL JUSTICE IN COUNSELOR EDUCATION, 3 Credits
Addresses pedagogy relevant to multicultural, diversity, and social justice issues and the role of racial, ethnic, and cultural heritage, nationality, socioeconomic status, family structure, age, gender, sexual orientation, religious and spiritual beliefs, occupation, physical, and mental status, local, regional, national, international perspective, and issues of equity such as oppression, power and privilege in counselor education. 
Equivalent to: TCE 681

Recommended: COUN 581

COUN 696, COUNSELOR EDUCATION, 3 Credits
Orientation to the profession of counselor education. Specific topics include: (1) history and organization of the profession, (2) program accreditation standards and practices, (3) instructional theory and methods relevant to counselor education, and (4) ethical and legal considerations in counselor education. 
Equivalent to: TCE 696

COUN 697, COUNSELOR SUPERVISION, 3 Credits
Practical experience for counseling professionals who have responsibility directing personal and professional development of counselors, promoting counselor competency, and developing and implementing counseling services and programs. Theoretical models of supervision are utilized to develop supervisor roles. 
Equivalent to: TCE 697

Education (ED)

ED 199, SPECIAL TOPICS, 1-16 Credits
Students in this course receive training and experience in one-on-one and group tutoring in varied courses. They are then assigned tutees. 
Equivalent to: TCE 199
This course is repeatable for 16 credits.

ED 216, *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY, 3 Credits
Introduction to the historical, social, philosophical, political, legal and economic foundations of education in Oregon, the United States, and other countries in order to provide a framework from which to analyze contemporary educational and environmental issues in various schools, communities, and workplaces. (Bacc Core Course) 
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination; HNRS – Honors Course Designator 
Equivalent to: ED 216
Available via Ecampus

ED 219, *SOCIAL JUSTICE, CIVIL RIGHTS & MULTICULTURALISM IN EDUCATION, 3 Credits
Covers examination of equity and injustice based on social groupings such as race, gender, language, and ability. Discusses equitable approaches and power in systems and institutions of society (e.g., schooling, curriculum, educational policy) and how to actively make change. Reviews contemplation of multiculturalism and personal experiences through a wholeness approach. (Bacc Core Course) 
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination 
Equivalent to: TCE 219
Available via Ecampus

ED 253, LEARNING ACROSS THE LIFESPAN, 3 Credits
An exploration of how learning occurs at all ages from early childhood through adulthood. Covers major and emerging theories and styles, self-reflection on implications of how learning occurs for self and others, and the impact of these issues on the development and delivery of instruction. 
Equivalent to: TCE 253
Available via Ecampus

ED 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ED 309, FIELD PRACTICUM, 3-6 Credits
Placement in either an elementary, middle or secondary school. To assist students to develop competencies in dealing with children or adolescents according to the individual major of the university student. 
Equivalent to: TCE 309
This course is repeatable for 18 credits. 
Available via Ecampus

ED 310, INTERNSHIP/WORK EXPERIENCE, 1-18 Credits
This course is repeatable for 18 credits.
ED 340, SUPPORTIVE DIFFERENTIATED ENVIRONMENTS, 3 Credits
Addresses special abilities and needs of learners and helps prepare teachers to develop strategies and instructional practices for diverse learners and students with exceptionalities in a supportive and inclusive classroom. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: TCE 340

ED 394, DIFFERENTIATION IN THE ELEMENTARY CLASSROOM, 2 Credits
The role of culture, language, and group identification in learning will be examined and applied to the consideration of differentiated instructional strategies in grades K-5. Students will learn strategies teachers use to help differentiate instruction to meet the diverse needs of students in the elementary classroom.

ED 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: TCE 399
This course is repeatable for 16 credits.

ED 401, RESEARCH, 1-16 Credits
Equivalent to: TCE 401
This course is repeatable for 16 credits.

ED 402, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: TCE 402
This course is repeatable for 16 credits.
Available via Ecampus

ED 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ED 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: TCE 405
This course is repeatable for 16 credits.

ED 406, PROJECTS, 1-3 Credits
Equivalent to: TCE 406
This course is repeatable for 16 credits.

ED 407, SEMINAR, 1-16 Credits
Equivalent to: ED 407H, TCE 407
This course is repeatable for 16 credits.
Available via Ecampus

ED 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ED 407, TCE 407
This course is repeatable for 16 credits.

ED 408, WORKSHOP, 1-3 Credits
Equivalent to: ED 408H, TCE 408
This course is repeatable for 16 credits.

ED 408H, WORKSHOP, 1-3 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ED 408, TCE 408H
This course is repeatable for 16 credits.

ED 409, PRACTICUM/CLINICAL EXPERIENCE, 1-16 Credits
Equivalent to: TCE 409
This course is repeatable for 16 credits.

ED 410, INTERNSHIP/WORK EXPERIENCE, 1-18 Credits
Equivalent to: TCE 410
This course is repeatable for 18 credits.
Available via Ecampus

ED 411, EDUCATIONAL PSYCHOLOGY, LEARNING AND DEVELOPMENT, 3 Credits
An opportunity to begin the transition from student to teacher. Explores the relationship between human development and learning through the life cycle.
Equivalent to: TCE 411
Available via Ecampus

ED 412, LEARNING STYLES AND NEEDS IN ADOLESCENCE, 2 Credits
Exploration of the particular learning styles and needs of the adolescent, major and emerging learning theories, individual learning styles including one’s own learning styles, self-reflection on implications of how learning occurs, and the impact of these issues on the development and delivery of instruction.
Equivalent to: TCE 412

ED 413, LEARNING ENVIRONMENTS I: FOSTERING CLASS ENGAGEMENT, 3 Credits
Creating a positive culture in the classroom, managing student behavior, and engaging students in critical learning discourse are challenges faced by all educators. Students will learn to develop the components of a productive and safe learning environment.

ED 414, LEARNING ENVIRONMENTS II: ADVANCING EVERY STUDENT, 2 Credits
Students will expand their knowledge about constructing a positive K-12 classroom environment to a productive learning environment accommodated to fit the needs of a diversified student population.
Prerequisite: ED 413 with D- or better

ED 420, CLASSROOM MANAGEMENT, 3 Credits
Build knowledge and learn techniques for cultivating a positive learning environment and for managing classrooms. Learn through examining the literature and observing relevant learning environments and classrooms. Explore factors that influence student behavior, including those associated with social and or multicultural student populations.
Available via Ecampus
ED 424, TEACHER AS REFLECTIVE PRACTITIONER, 2 Credits
Designed to help teachers make complex judgments based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment.
Prerequisite: ED 407 with C- or better and ED 410 [C-]

ED 425, CURRICULUM IMPLEMENTATION AND INSTRUCTIONAL STRATEGIES 7-12, 4 Credits
The relationship of theory to practice in teaching the content areas in grades 7-12 is examined. General curriculum trends as well as content selection in specific endorsement/subject areas are explored. This course is preparation for and is coordinated with part-time student teaching.
Equivalent to: TCE 425

ED 427, ASSESSMENT FOR K-12 INSTRUCTION, 2 Credits
Students study and practice the administration, interpretation, and design of assessments for groups and individuals within the content area. Students will develop an understanding of a variety of assessment strategies for K-12 education that will enhance their understandings of the role of assessment in learning and curriculum design.
Equivalent to: TCE 427

ED 429, CURRICULUM, INSTRUCTION, AND ASSESSMENT FOR CTE, 3 Credits
Build knowledge and skills in curriculum design, instructional strategies, and assessment for successful teaching in a Career and Technical Education and other specialty areas: (a) Agriculture Food and Natural Resource Systems, (b) Arts, Information and Communications, (c) Business Management, (d) Health Sciences (e) Human Resources, (f) Industrial and Engineering Systems, (g) Family and Consumer Sciences, (h) Career Trades.
Available via Ecampus

ED 440, HUMAN DEVELOPMENT AND PSYCHOLOGY OF THE ADOLESCENT, 3 Credits
Examines research from psychology, human development, and neuroscience to provide a holistic understanding of adolescents and learning with a focus on the middle/secondary student. Investigates the influence of family, neighborhood, peer, and school contexts on brain development; identity formation; and the challenges and opportunities of adolescence.
Available via Ecampus

ED 448, STUDENTS WITH SPECIAL NEEDS, 2 Credits
Explores the broad range of special needs represented in today's classrooms. Addresses various types and characteristics of disabilities as well as collaborating with specialists and families with children with special needs. Discusses strategies and instructional practices to enhance the learning of diverse students in the inclusive classroom.

ED 450, FOUNDATIONS OF EDUCATION AND PLANNING, 4 Credits
The first of three courses examining the iterative cycle of curriculum planning, instruction and assessment. An introduction to learning theory and the relationship between teaching and learning provide the foundation. An overview of the complete teaching cycle leads to a focus on curriculum planning based on state standards.

ED 451, ASSESSMENT, 4 Credits
Assessment for and of learning and its importance to student engagement and advancement. Formal and informal writing derived from multiple revisions will result in documents intended for different audiences including parents, school administrators, and national assessment prompts citing research-based practices.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ED 450 with C or better

ED 452, USING DATA TO SUPPORT ALL STUDENTS, 3 Credits
Teacher candidates will gather and analyze student data to inform instructional practice devoted to enhancing student learning; develop data literacy skills; differentiate instruction for targeted groups and individualized student learners while continuing to foster higher-order thinking and communication skills in the whole class: analyze patterns and gaps in individualized student learning; apply differentiated instruction and assessment strategies to support student growth; engage learners in goal setting; and identify teaching and assessment strategies to work with students with exceptional needs.
Prerequisite: ED 451 with C or better

ED 456, STRATEGIES FOR TEACHING LANGUAGE ARTS AND SOCIAL STUDIES, 3 Credits
Exploration of language arts and social studies programs (e.g., children's literature, writing, special needs, spelling, and cultural factors). Development of research-based teaching strategies and assessment. Focuses on the development of inquiry approaches that reflect interdisciplinary curriculum as well as subject-specific pedagogy in the teaching of both social studies and language arts.
Equivalent to: TCE 456
Recommended: ED 216 and ED 219 and ED 253

ED 457, TEACHING ELEMENTARY MATHEMATICS FOR UNDERSTANDING, 3 Credits
Part of the Education Double Degree. Explores the teaching of mathematics in K/8 classrooms in a manner consistent with state and national standards. Students learn teaching strategies that incorporate the development of mathematical models and mental constructs.
Equivalent to: TCE 457
Recommended: MTH 211 and MTH 212 and MTH 390
ED 458, STRATEGIES FOR TEACHING WELLNESS AND FINE ARTS, 2 Credits
Exploration of recent trends and research-based practices in the teaching of wellness, physical education, and fine arts. Includes strategies, assessments, special needs, integrating curriculum through developmentally appropriate practices, content standards, and the value of developing holistic learners though an effective wellness and fine arts program.
Equivalent to: TCE 458
Recommended: ED 216 and ED 219 and ED 253

ED 463, STRATEGIES FOR TEACHING PHYSICAL EDUCATION HEALTH & WELLNESS, 1 Credit
Exploration of recent trends and research-based practices in the teaching of physical education, health, and wellness in elementary school. Includes instructional strategies for developing holistic learners though an effective wellness program.

ED 465, ELEMENTARY METHODS: LITERACY, 2-4 Credits
Understanding the theoretical and developmental foundations for literacy programs K-5; targeted reading, writing, listening, vocabulary, and speaking skill needs assessments; organizational strategies for teaching literacy; understanding dyslexia and how to differentiate instruction for students with dyslexia; and the integration of cultural diversity and social justice into literacy learning.
This course is repeatable for 4 credits.

ED 466, ELEMENTARY METHODS II: MATHEMATICS, 4 Credits
Exploration of the teaching of early childhood/elementary school mathematics with emphases on problem solving, connections, representation, communication, reasoning and proof. Course will incorporate the development of mathematical models and mental constructs. Research-based, developmentally appropriate and culturally relevant practices will be incorporated into lessons.

ED 467, ELEMENTARY METHODS III: NATURAL AND SOCIAL SCIENCE, 4 Credits
Inquiry approaches to the teaching and learning of the natural and social sciences are used to explore the structure of the disciplines and support the creation of instructional units that develop disciplinary knowledge and practices/skills while highlighting cross-cutting themes. Scientific literacy and civic competence are emphasized.

ED 468, ELEMENTARY METHODS IV: LANGUAGE ARTS, 4 Credits
This course will build on ED 465: Elementary Methods I: Literacy. Development of pedagogy in teaching of reading to elementary-aged students, including the teaching of vocabulary, comprehension, phonics, fluency and motivation to read. Use of children's literature, assessment approaches, and special needs students are also addressed. Students will gain a deeper level of understanding in how to differentiate the teaching of reading at grades K-5, how to run a Writers' Workshop, and how to integrate literacy into other content areas.
Prerequisite: ED 465 with C or better

ED 469, STRATEGIES FOR TEACHING THE FINE ARTS, 1 Credit
Exploration of recent trends and research-based practices in the teaching of performing arts (dance, music, theater) and the visual arts in elementary school. Includes instructional strategies for developing holistic learners though an effective fine arts program.

ED 470, BILITERACY INSTRUCTION, 3 Credits
Explores literacy development in Spanish and English. Examines differences in literacy development across the two languages, as well as pedagogical approaches that leverage students’ home language and literacy practices. Explores equity and bias in classroom language practices. Taught bilingually in Spanish and English.
Prerequisite: ED 472 (may be taken concurrently) with C or better
Available via Ecampus

ED 471, MULTILINGUAL LINGUISTICS, 3 Credits
Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on academic language development and teaching implications for emergent bilingual students in Spanish-English K-12 dual language programs. Taught bilingually in Spanish and English.
Prerequisite: ED 472 (may be taken concurrently) with C or better
Available via Ecampus

ED 472, FOUNDATIONS OF ESOL EDUCATION, 3 Credits
Examines characteristics of English language learners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.
Equivalent to: TCE 472
Available via Ecampus

ED 473, INSTRUCTIONAL APPROACHES FOR ESOL EDUCATION, 3 Credits
Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroom-based assessment, and use of technology to support student learning.
Prerequisite: ED 472 with C or better
Equivalent to: TCE 473

ED 474, PROJECT-BASED MATHEMATICS, 3 Credits
Building on the foundational concepts covered in ED 457 and ED 466/ED 566, students will plan and apply project-based lessons. Students will transfer knowledge and skills of mathematics to real-world problems and will learn to teach with a project-based approach.

Prerequisite: ED 465 with C or better
ED 475, INTEGRATED STEM, 3 Credits
Students will continue to develop their pedagogical content knowledge in science, technology, engineering, mathematics, and integrated STEM. Students will develop a deeper understanding of the crosscutting concepts common to all science endeavors and will learn how to use these concepts to bridge across science or STEM curriculum units. Students will also examine and develop expertise in using science and engineering practices to lead students in authentic inquiry. Integrating crosscutting concepts, science and engineering practices, and disciplinary core ideas, students will learn and practice the development of curriculum and instruction utilizing the engineering design process.

ED 476, PARTNERSHIPS AND IDEOLOGIES IN ESOL EDUCATION, 3 Credits
Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple ideologies in ESOL and building partnerships across schools, families, and communities. 
Prerequisite: ED 472 with C or better
Equivalent to: TCE 476

ED 477, DIFFERENTIATION FOR STUDENTS WITH SPECIAL NEEDS, 3 Credits
Building on the foundational concepts covered in HDFS 431, this course goes into greater depth on how to provide students with a range of exceptionalities with education in the least restrictive environment. Teacher candidates will explore differentiated instruction techniques for students with special needs that can be used in both the regular education and pull out Special Education resource classrooms.

ED 478, SPECIAL EDUCATION LAW RIGHTS AND REGULATIONS, 3 Credits
In-depth review of special education law and regulations that protect and provide educational rights for students with disabilities. Teacher candidates will leave the class understanding both the historical and current legal rights of students receiving special education and how to best meet those rights in both the regular and special education resource classrooms.
Available via Ecampus

ED 479, LINGUISTICS FOR TEACHERS, 3 Credits
Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications—from psycholinguistic, sociolinguistic, and critical perspectives—for emergent bilingual students in P-12 contexts.
Prerequisite: ED 472 with C or better
Equivalent to: TCE 479

ED 480, TEACHING MATH TO SECONDARY LEARNERS IN CONTEXT, 3 Credits
Enhance and reinforce mathematics embedded within occupational-specific curricula taught at the secondary level to prepare Career and Technical Education teachers for licensure.

ED 481, READING AND WRITING FOR SECONDARY LEARNERS IN CONTEXT, 3 Credits
Enhance and reinforce the authentic reading and writing embedded within occupationally relevant materials to prepare Career and Technical Education teachers for licensure.
Available via Ecampus

ED 483, DEVELOPMENTAL READING, 3 Credits
Development of pedagogy in teaching of reading to elementary-aged students, including teaching of vocabulary, comprehension, phonics, fluency and motivation to read. Use of children’s literature, assessment approaches, and special needs students are also addressed. This is a PTCE course in the elementary Double Degree Program.
Equivalent to: TCE 483

ED 484, INTRODUCTION TO CAREER AND TECHNICAL EDUCATION, 3 Credits
A study of the history of Career and Technical Education, the impact of the educational reform on Career and Technical Education and workforce development. Topics include leaders in vocational education; legislative initiatives, social issues, and organizations involved in and impacting Career and Technical Education.
Available via Ecampus

ED 492, TECHNOLOGY TOOLS FOR TEACHING, 1 Credit
Develops technology skills needed to be successful as a classroom teacher. Explores how digital tools can be used in instruction, assessment, communication, and collaboration in educational settings to bring vibrant energy into student learning and engagement. Covers responsible digital citizenship, responsible use and ethics of technology in the classroom.

ED 493, READING, LITERATURE, AND LANGUAGE DEVELOPMENT IN THE CONTENT, 2 Credits
Examination of reading, literature, and language development methods that can be used by middle school and high school teachers to support students’ learning of content area information. Development of specific reading strategies in content areas.
Equivalent to: TCE 493

ED 494, CONTENT STANDARDS AND CURRICULUM DEVELOPMENT FOR HIGH SCHOOL, 3 Credits
Exploration of content standards, materials and methods appropriate for high school students. Develops skills in work sample methodology through the design of effective instruction, integrating a variety of methods with existing understandings of content area, how people learn, and the diverse communities in which they work.
Equivalent to: TCE 494
ED 496, TECHNOLOGY FOR EDUCATORS, 3 Credits
Explore the integration of current and emerging technologies into K-12 content areas by engaging learners in real world issues and learning in a social context. Integrate technologies that promote critical thinking, communication, collaboration, and creativity. Discuss technologies in terms of cultural linguistic diversity. Gain transferable skills. Taught via Ecampus only.
Recommended: Basic computer literacy.
Available via Ecampus

ED 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: TCE 499
This course is repeatable for 16 credits.

ED 501, RESEARCH, 1-16 Credits
Equivalent to: TCE 501
This course is repeatable for 16 credits.

ED 502, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: TCE 502
This course is repeatable for 16 credits.
Available via Ecampus

ED 503, THESIS, 1-16 Credits
Equivalent to: TCE 503
This course is repeatable for 999 credits.

ED 505, READING & CONFERENCE, 1-16 Credits
Equivalent to: TCE 505
This course is repeatable for 16 credits.

ED 506, PROJECTS, 1-3 Credits
Equivalent to: TCE 506
This course is repeatable for 16 credits.

ED 507, SEMINAR, 1-16 Credits
Equivalent to: TCE 507
This course is repeatable for 16 credits.
Available via Ecampus

ED 508, WORKSHOP, 1-16 Credits
Equivalent to: TCE 508
This course is repeatable for 16 credits.

ED 509, PRACTICUM, 1-16 Credits
Equivalent to: TCE 509
This course is repeatable for 16 credits.
Available via Ecampus

ED 510, INTERNSHIP, 1-18 Credits
By special permission and arrangement.
Equivalent to: TCE 510
This course is repeatable for 40 credits.
Available via Ecampus

ED 513, LEARNING ENVIRONMENTS I: FOSTERING CLASS ENGAGEMENT, 3 Credits
Creating a positive culture in the classroom, managing student behavior, and engaging students in critical learning discourse are challenges faced by all educators. Students will learn to develop the components of a productive and safe learning environment.

ED 514, LEARNING ENVIRONMENTS II: ADVANCING EVERY STUDENT, 2 Credits
Students will expand their knowledge about constructing a positive K-12 classroom environment to a productive learning environment accommodated to fit the needs of a diversified student population.
Prerequisite: ED 513 with B or better

ED 515, LEARNING ENVIRONMENTS III: CULTURES AND COMMUNITIES, 2 Credits
The third in a series of courses to assist the Teacher candidate in developing a classroom culture of learning that challenges every student to succeed and thrive. Teacher candidates will understand the important role that culture and community play in the teaching and learning process, and develop culturally responsive teaching practices.
Prerequisite: ED 513 with B or better and ED 514 [B]

ED 518, PROFESSIONAL PRACTICE IN THE TEACHING COMMUNITY, 2 Credits
The professional themes of communication, collaboration, reflection, knowledge of learners, professional ethics, social justice and cultural understanding will be explored and applied to teaching contexts, behaviors, dispositions, and actions.

ED 519, CAPSTONE: TEACHING AS A PROFESSION, 3 Credits
Capstone course for the MAT in which teacher candidates further develop their educational philosophy and analyze their professional growth in alignment with national standards.

ED 520, CLASSROOM MANAGEMENT, 3 Credits
Build knowledge and learn techniques for cultivating a positive learning environment and for managing classrooms. Learn through examining the literature and observing relevant learning environments and classrooms. Explore factors that influence student behavior, including those associated with social and/or multicultural student populations.
Equivalent to: TCE 520
Available via Ecampus

ED 521, FUNDS OF KNOWLEDGE IN EDUCATION, 3 Credits
An introduction to multicultural education and developing cultural competence by using a funds of knowledge approach. This approach helps educators combine fieldwork and ethnographic research methods to gain cultural competence about the students they serve. Educators explore their own funds of knowledge as well as the children’s through exploring their community and developing activities centered on children’s own connections and resources.
ED 522, RACIAL AND CULTURAL HARMONY IN THE K-12 CLASSROOM, 3 Credits
An overview of many issues relevant to the increasingly diverse student population in public schools today. It explores how a culturally competent perspective can be incorporated into curriculum design, teaching strategies, and interactions with students and parents. The course is both self-directed and communal, requiring students to respond to the materials and each other, yet at their own pace.
Equivalent to: TCE 522
Available via Ecampus

ED 524, TEACHER AS REFLECTIVE PRACTITIONER, 2-3 Credits
Designed to help teachers make complex judgements based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment.
Equivalent to: TCE 524
Available via Ecampus

ED 528, ASSESSMENT FOR LEARNING, 3 Credits
Applies the formative learning cycle to through development of an assessment plan. Examines various formative assessment practices that promote higher order thinking and empower students to show evidence of their learning through self-assessment and feedback.
Equivalent to: TCE 528
Available via Ecampus

ED 531, SCIENCE METHODS I: INQUIRY AND THE NATURE OF SCIENCE, 4 Credits
Introduction to (1) fundamentals of science teaching including the nature of science and inquiry, (2) designing instructional sequences and selecting curriculum resources aligned to state science standards and research-based learning progressions, (3) effective teaching moves, (4) supporting acquisition of academic language, and (5) productive and safe science learning environments.
Equivalent to: SED 513

ED 532, SCIENCE METHODS II: SUPPORTING STUDENTS’ CONCEPTUAL CHANGE, 4 Credits
Development of skill in identifying and addressing misconceptions or naive conceptions as part of the individualized conceptual change process. Integration of technology tools for instruction and assessment. Development of high-leverage science teaching practices with a focus on enhancing classroom discourse and evidence-based argumentation with a survey of science curriculum models.
Prerequisite: ED 531 with B or better

ED 533, SCIENCE METHODS III: SCIENCE FOR ALL LEARNERS, 4 Credits
Teaching science as a community of practice means addressing the needs of all learners, particularly those underrepresented in science. Uses technology to enhance high-leverage teaching practices and practices safe and effective laboratory teaching methods. Explores contextualized and interdisciplinary approaches to science education.
Prerequisite: ED 531 with B or better and ED 532 [B]

ED 537, MATHEMATICAL METHODS I: FOUNDATIONS OF NUMERICAL THOUGHT, 4 Credits
Introduction to the fundamentals of mathematics teaching including the nature and goals of mathematical thinking, numeracy, inquiry, and related academic language of mathematics. Students are introduced to the high high-leverage practices of ambitious mathematics teaching, designing instructional sequences and selecting curriculum resources aligned to state science standards and research-based learning progressions.
Equivalent to: SED 514

ED 538, MATHEMATICS METHODS II: CYCLES OF ENACTMENT, 4 Credits
Teacher candidates create instructional units based on student knowledge and skill while attending to needed accommodations. Designed to help the teacher candidate select or modify instructional materials based on student prior knowledge, experience, and interests; make accommodations for students; and provide for multiple representations across a unit of instruction.
Prerequisite: ED 537 with B or better

ED 539, MATHEMATICAL METHODS III: MATHEMATICS FOR EVERY LEARNER, 4 Credits
Teacher candidates will develop practices that support all students, regardless of background or ability. The teacher candidate will design a unit of instruction with complex learning goals that are cross- and multi-disciplinary, draw on multiple perspectives, and invoke higher order thinking and communication skills.
Prerequisite: ED 537 with B or better and ED 538 [B]

ED 540, HUMAN DEVELOPMENT AND PSYCHOLOGY OF THE ADOLESCENT, 3 Credits
Examines research from psychology, human development, and neuroscience to provide a holistic understanding of adolescents and learning with a focus on the middle/secondary student. Investigates the influence of family, neighborhood, peer, and school contexts on brain development; identity formation; and the challenges and opportunities of adolescence.
Available via Ecampus

ED 542, TEACHER LEADERSHIP, 3 Credits
Examines current conceptions, research, and philosophies of educational leadership. The goal is to promote teacher-leadership in effective teaching and learning and influence in local educational policies and programs.
Equivalent to: TCE 542
ED 544, TEACHING CRITICAL LITERACY, 3 Credits
Examines literacy curriculum and teaching practices in various real world contexts, such as critical literacy, supporting second language learners, argumentation, reading engagement and social justice. While still addressing technical dimensions of literacy education, students write critical literacy curricula, take turns leading critical book discussions, and learn to critique text bias. Course challenges students to develop critical consciousness as teachers of literacy in a democracy.

ED 548, STUDENTS WITH SPECIAL NEEDS, 2 Credits
Explores the broad range of special needs represented in today’s classrooms. Addresses various types and characteristics of disabilities as well as collaborating with specialists and families with children with special needs. Discusses strategies and instructional practices to enhance the learning of diverse students in the inclusive classroom.
Available via Ecampus

ED 549, TEACHING IN A DIFFERENTIATED AND DIVERSE CLASSROOM, 3 Credits
Addresses the philosophical framework, strategies, and assessment of differentiation to meet the needs of all students in the classroom.
Equivalent to: TCE 549

ED 550, THE EFFECTIVE TEACHING CYCLE I: FOUNDATIONS AND PLANNING, 4 Credits
The first of three courses examining the iterative cycle of curriculum planning, instruction, and assessment. An introduction to learning theory and the relationship between teaching and learning provides the foundation. An overview of the complete teaching cycle leads to a focus on curriculum planning based on state standards.

ED 551, THE EFFECTIVE TEACHING CYCLE II: ASSESSMENT, 4 Credits
The second of three courses examining the iterative cycle of curriculum planning, instruction, and assessment. Learning in this class will concentrate on assessment for and of learning and its importance to student engagement and advancement.
Prerequisite: ED 550 with B or better

ED 558, STRATEGIES FOR TEACHING WELLNESS AND FINE ARTS, 2 Credits
Exploration of recent trends and research-based practices in the teaching of wellness, physical education, and fine arts. Includes strategies, assessments, special needs, integrating curriculum through developmentally appropriate practices, content standards, and the value of developing holistic learners through an effective wellness and fine arts program.

ED 559, STRATEGIES FOR TEACHING HUMANITIES, 3 Credits
Pedagogical approaches to teaching language arts and social studies in K-5, multiple subject classrooms. Focus on developing research-based daily lessons and unit plans that integrate curriculum, support national standards, and use an inquiry approach for student learning.

ED 560, CHANGES IN ESOL EDUCATION, 3 Credits
Explores recent developments in education for K-12 emergent bilingual students, examining changes in theory, policy, and instruction. Practice-based projects draw on new language acquisition theories to address both language and content-knowledge development. Course work intended for K-12 teachers who earned an ESOL endorsement more than five years ago, as well as those with equivalent background knowledge.
Recommended: K-12 teaching license with ESOL endorsement
Available via Ecampus

ED 561, ACTION RESEARCH, 1-3 Credits
Examines action research as a vehicle for teacher and administrator professional development. Specific topics of study include problem posing, data collection and analysis, theory building, and writing the report.
Equivalent to: TCE 561
This course is repeatable for 3 credits.

ED 562, INTRODUCTION TO EDUCATIONAL RESEARCH, 3 Credits
Explores the purpose and use of social science research in education with emphasis on action and applied research. Designed to help teachers and informal educators to critically read, interpret, and apply research findings to the diverse contexts in which they work, and to become informed consumers of educational research.
Equivalent to: TCE 562

ED 563, STRATEGIES FOR TEACHING PHYSICAL EDUCATION HEALTH & WELLNESS, 1 Credit
Exploration of recent trends and research-based practices in the teaching of physical education, health, and wellness in elementary school. Includes instructional strategies for developing holistic learners though an effective wellness program.

ED 565, ELEMENTARY METHODS: LITERACY, 2-4 Credits
Understanding the theoretical and developmental foundations for literacy programs K-5; targeted reading, writing, listening, vocabulary, and speaking skill needs assessments; organizational strategies for teaching literacy; understanding dyslexia and how to differentiate instruction for students with dyslexia; and the integration of cultural diversity and social justice into literacy learning.
This course is repeatable for 4 credits.

ED 566, ELEMENTARY METHODS: MATHEMATICS, 4 Credits
Exploration of the teaching of early childhood/elementary school mathematics with emphases on problem solving, connections, representation, communication, reasoning and proof. Course will incorporate the development of mathematical models and mental constructs. Research-based, developmentally appropriate and culturally relevant practices will be incorporated into lessons.
ED 567, ELEMENTARY METHODS: NATURAL AND SOCIAL SCIENCE, 4 Credits
Inquiry approaches to the teaching and learning of the natural and social sciences are used to explore the structure of the disciplines and support the creation of instructional units that develop disciplinary knowledge and practices/skills while highlighting cross-cutting themes. Scientific literacy and civic competence are emphasized.

ED 569, STRATEGIES FOR TEACHING THE FINE ARTS, 1 Credit
Exploration of recent trends and research-based practices in the teaching of performing arts (dance, music, theater) and the visual arts in elementary school. Includes instructional strategies for developing holistic learners through an effective fine arts program.

ED 570, BILITERACY INSTRUCTION, 3 Credits
Explores literacy development in Spanish and English. Examines differences in literacy development across the two languages, as well as pedagogical approaches that leverage students' home language and literacy practices. Explores equity and bias in classroom language practices. Taught bilingually in Spanish and English.
Prerequisite: ED 572 (may be taken concurrently) with C or better
Available via Ecampus

ED 571, MULTILINGUAL LINGUISTICS, 3 Credits
Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on academic language development and teaching implications for emergent bilingual students in Spanish-English K-12 dual language programs. Taught bilingually in Spanish and English.
Prerequisite: ED 572 (may be taken concurrently) with C or better
Available via Ecampus

ED 572, FOUNDATIONS OF ESOL EDUCATION, 3 Credits
Examines characteristics of English language learners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.
Equivalent to: TCE 572
Available via Ecampus

ED 573, INSTRUCTIONAL APPROACHES FOR ESOL EDUCATION, 3 Credits
Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroom-based assessment, and use of technology to support student learning.
Prerequisite: ED 572 with C or better
Equivalent to: TCE 573
Available via Ecampus

ED 574, PROJECT-BASED MATHEMATICS, 3 Credits
Building on the foundational concepts covered in ED 457 and ED 466/ED 566, students will plan and apply project-based lessons. Students will transfer knowledge and skills of mathematics to real world problems and will learn to teach with a project-based approach.

ED 575, INTEGRATED STEM, 3 Credits
Students will continue to develop their pedagogical content knowledge in science, technology, engineering, mathematics, and integrated STEM. Students will develop a deeper understanding of the crosscutting concepts common to all science endeavors and will learn how to use these concepts to bridge across science or STEM curriculum units. Students will also examine and develop expertise in using science and engineering practices to lead students in authentic inquiry. Integrating crosscutting concepts, science and engineering practices, and disciplinary core ideas, students will learn and practice the development of curriculum and instruction utilizing the engineering design process.

ED 576, PARTNERSHIPS AND IDEOLOGIES IN ESOL EDUCATION, 3 Credits
Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple ideologies in ESOL and building partnerships across schools, families, and communities.
Prerequisite: ED 572 with C or better
Equivalent to: TCE 576
Available via Ecampus

ED 577, DIFFERENTIATION FOR STUDENTS WITH SPECIAL NEEDS, 3 Credits
Building on the foundational concepts covered in HDFS 431, this course goes into greater depth on how to provide students with a range of exceptionalities with education in the least restrictive environment. Teacher candidates will explore differentiated instruction techniques for students with special needs that can be used in both the regular education and pull out Special Education resource classrooms.

ED 578, SPECIAL EDUCATION LAW RIGHTS AND REGULATIONS, 3 Credits
In-depth review of special education law and regulations that protect and provide educational rights for students with disabilities. Teacher candidates will leave the class understanding both the historical and current legal rights of students receiving special education and how to best meet those rights in both the regular and special education resource classrooms.

ED 579, LINGUISTICS FOR TEACHERS, 3 Credits
Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications—from psycholinguistic, sociolinguistic, and critical perspectives—for emergent bilingual students in P-12 contexts.
Prerequisite: ED 572 with C or better
Equivalent to: TCE 579
Available via Ecampus
ED 582, STRATEGIES FOR DEVELOPING LITERACY, 3 Credits
Focus on teaching of reading to K-5 students. Instruction in pedagogical techniques and assessment on teaching vocabulary, comprehension, phonics and fluency. Strategies related to motivation to read, integration of cultural diversity and social justice and the needs of diverse learners in literacy development are also addressed.

ED 584, LANGUAGE ARTS METHODS I: ADOLESCENT LITERACY, 4 Credits
Teaching language arts to middle and high school students requires a deep understanding of how reading and writing to learn occur. Guided by current professional and state literacy standards, students will learn to assess and advance adolescent reading comprehension, and writing and speaking skills.

ED 585, LANGUAGE ARTS METHODS II: STRATEGIES FOR GRADES 5-12, 4 Credits
Explores the integration and implementation of curriculum and high leverage instructional practices that respond to the learning needs of adolescents in language arts classrooms. Examines the importance of metacognitive strategies in the teaching of content-related skills and concepts, and how to create school cultures that support high achievement.

ED 586, LANGUAGE ARTS METHODS III: CURRICULUM AND THE PROFESSION, 4 Credits
Learning to teach language arts as a community of practice including the development of high-leverage instructional practices. Focus on enhancing classroom discourse and building student comprehension, meaning construction, interpretation, and response to complex text. Integration of technology tools for instruction and assessment.
Prerequisite: ED 584 with B or better and ED 585 [B]

ED 587, SOCIAL STUDIES METHODS I: ADOLESCENT LITERACY, 4 Credits
Teaching social studies to middle and high school students requires a deep understanding of how reading and writing to learn occur. Guided by current professional and state literacy standards, students will learn to assess and advance adolescent content reading comprehension, writing and speaking skills.

ED 588, SOCIAL STUDIES METHODS II: STRATEGIES FOR GRADES 5-12, 4 Credits
Explores the integration and implementation of curriculum and high leverage instructional practices that respond to the learning needs of adolescents in secondary social studies classrooms. Examines the importance of metacognitive strategies in the teaching of content-related skills and concepts, and how to create school cultures that support high achievement.

ED 589, SOCIAL STUDIES METHODS III: CURRICULUM AND THE PROFESSION, 4 Credits
Learning to teach social studies as a community of practice including the development of high-leverage instructional practices. Focus on curriculum strategies that provide opportunities for learners to develop and use facts, concepts, interpretations, and analyses to build and support arguments. Integration of technology tools for instruction and assessment.
Prerequisite: ED 587 with B or better and ED 588 [B]

ED 590, SOCIAL JUSTICE IN EDUCATION, 3 Credits
Examines social, environmental and ecological justice in educational settings focusing on bias critique in text, development of social justice curriculum, and creation of an action related to a social justice issue. The interconnectedness of social and ecological justice is also explored. Various international justice standards are used to ground students' work in curriculum development.
Equivalent to: TCE 590
Available via Ecampus

ED 592, TECHNOLOGY TOOLS FOR TEACHING, 1 Credit
Develops technology skills needed to be successful as a classroom teacher. Explores how digital tools can be used in instruction, assessment, communication, and collaboration in educational settings to bring vibrant energy into student learning and engagement. Covers responsible digital citizenship, responsible use and ethics of technology in the classroom.

ED 594, DIFFERENTIATION, 2 Credits
Issues of K-12 learner and the role of culture, language, and group identification in learning will be examined and applied to the consideration of differentiated instructional strategies.

ED 595, EDUCATIONAL DEVELOPMENT, 2 Credits
Issues of K-12 learner social/emotional/cognitive development across multiple areas of learning will be examined, with consideration given to impact on classroom pedagogy.

ED 596, TECHNOLOGY FOR EDUCATORS, 3 Credits
Explore the integration of current and emerging technologies into K-12 content areas by engaging learners in real world issues and learning in a social context. Integrate technologies that promote critical thinking, communication, collaboration, and creativity. Discuss technologies in terms of cultural linguistic diversity. Gain transferable skills. Taught via Ecampus only.
Equivalent to: TCE 596
Recommended: Basic computer literacy.
Available via Ecampus
ED 597, K-5 STEM INTEGRATION IN DIVERSE CLASSROOMS, 2 Credits
An investigation of theory and practice related to science teaching and learning in diverse classrooms through integration of science, math, literacy and social studies.
Available via Ecampus

ED 599, SPECIAL TOPICS, 1-4 Credits
Equivalent to: TCE 599
This course is repeatable for 90 credits.

ED 601, RESEARCH, 1-16 Credits
Equivalent to: TCE 601
This course is repeatable for 16 credits.

ED 602, INDEPENDENT STUDY, 1-16 Credits
Equivalent to: TCE 602
This course is repeatable for 16 credits.

ED 603, THESIS, 1-16 Credits
Equivalent to: TCE 603
This course is repeatable for 999 credits.

ED 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: TCE 605
This course is repeatable for 16 credits.

ED 606, PROJECTS, 1-16 Credits
Equivalent to: TCE 606
This course is repeatable for 16 credits.

ED 607, SEMINAR, 1-16 Credits
Equivalent to: TCE 607
This course is repeatable for 16 credits.

ED 608, WORKSHOP, 1-16 Credits
Equivalent to: TCE 608
This course is repeatable for 16 credits.

ED 609, PRACTICUM/CLINICAL EXPERIENCE, 1-16 Credits
Equivalent to: TCE 609
This course is repeatable for 16 credits.

ED 610, INTERNSHIP, 1-15 Credits
Equivalent to: TCE 610
This course is repeatable for 15 credits.

ED 620, RESEARCH DESIGN AND EPISTEMOLOGIES, 3 Credits
Analysis of multiple research designs and epistemologies in education research. Development of critical reading of research and synthesis across related literature. Consideration of epistemologies and theoretical traditions in educational scholarship and how they shape research design. Exploration of the historical and ethical contexts of empirical research in related educational fields.
Equivalent to: SED 580

ED 622, QUALITATIVE RESEARCH TECHNIQUES IN EDUCATION, 3 Credits
A study of qualitative research designs and analytical procedures with specific applications in education.
Prerequisite: SED 580 with C or better or ED 620 with C or better
Equivalent to: SED 622

ED 624, QUANTITATIVE RESEARCH DESIGN AND CRITICAL ANALYSIS, 3 Credits
A study of quantitative research designs and analytical procedures with specific applications in education.
Prerequisite: ED 620 with C or better or SED 580 with C or better
Equivalent to: SED 612

ED 650, EQUITY AND EDUCATION POLICY, 3 Credits
Introduces students to key educational policy debates, with a particular focus on attempts to use education policy to advance equity. Examines different visions for the purpose of education and different definitions of equity. Explores the roles of different actors within education policy, including legislators, courts, and non-governmental organizations. Provides students with frameworks for analyzing education policy, which students will then apply to analyze a current policy debate that is of interest to them.

ED 651, RESEARCH BILINGUALISM AND MULTILINGUALISM, 3 Credits
Develops critical research skills to create new knowledge in the field of multilingualism. Examines interdisciplinary and intersectional perspectives to consider notions of identity among multilinguals and explore the historical trajectory of bilingualism and multilingualism research. Provides a broad understanding of the theoretical and methodological frameworks used to study bilingualism and multilingualism in globalized contexts.

ED 652, ETHNOGRAPHIC METHODS, 3 Credits
As an advanced qualitative method class, this course introduces theory and ethnographic research methods by presenting the various ways by which socio-cultural anthropologists observe and analyze phenomena, groups or individuals in everyday language and social practices in their local and global contexts, taking into account issues of language, equity and educational policy. Students will carry out an ethnographic research project of a particular phenomenon they wish to learn more about.
Prerequisite: SED 622 with B or better

ED 653, DISCOURSE, IDENTITY AND EDUCATION, 3 Credits
Builds a foundation in discourse theory and its applications to identity and education. Includes empirical studies that draw from particular lenses of discourse theory, exemplifying how these scholars organize the design, implementation, and discussion of research around discourse theory. Develops knowledge of discourse theory to propose a study that could be conducted drawing from discourse analytic perspectives.
ED 808, WORKSHOP, 1-4 Credits
Equivalent to: TCE 808
This course is repeatable for 16 credits.

Science and Mathematics Education (SED)
SED 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
SED 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
SED 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
SED 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
SED 409, FIELD PRACTICUM: SCIENCE AND MATHEMATICS, 3 Credits
Placement in middle or high school (grades 7-12) to assist in developing competencies with adolescents in science/mathematics classes.
This course is repeatable for 18 credits.
SED 412, TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE, 3 Credits
Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century.
Equivalent to: SED 412H
SED 419, TEACHING MATHEMATICAL MODELING IN STEM, 3 Credits
Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of mathematical modeling. Students experience content lessons and lessons focused on supporting students in developing understanding of that content.
Recommended: Background in an educational setting or as a pre-service teacher at any level, a K-12 teacher or free-choice learning educator

SED 413, INQUIRY IN SCIENCE AND SCIENCE EDUCATION, 3 Credits
Investigation of inquiry and the nature of inquiry in science as it relates to science education. Students will examine issues relating to integrating scientific understandings and practice into K-12 instruction.
Available via Ecampus
SED 414, INQUIRY IN MATHEMATICS AND MATHEMATICS EDUCATION, 3 Credits
Investigation of mathematics as it relates to mathematics education. Students will examine issues related to integrating mathematical understanding, mathematics standards/curricula, and mathematics-specific strategies in K-12 instruction. Lec/lab.
SED 416, INQUIRY IN SCIENCE AND MATHEMATICS EDUCATION, 3 Credits
Investigation of inquiry and the nature of inquiry in mathematics and science as it relates to education. Students will examine issues relating to integrating mathematical and scientific understandings and practices into K-12 education.
SED 431, OVERVIEW OF FREE-CHOICE LEARNING, 3 Credits
Examines learning that occurs when people believe they have choices over what and how they learn, how much time they spend learning, and what their sources of information are. Covers current research on learning in museums, aquariums, zoos, botanical gardens, science centers, after-school programs, media and apprenticeships.
SED 435, COMMUNICATING OCEAN SCIENCES TO INFORMAL AUDIENCES, 3 Credits
For students interested in improving their ability to communicate their scientific knowledge by helping general public and student audiences learn about ocean sciences in a wide variety of learning settings. Combines instruction in inquiry-based teaching methods and learning theory with work in student’s local informal learning settings like museums, zoos, aquariums and libraries.
SED 459, SCIENCE AND THE NATURE OF INQUIRY, 3 Credits
Focuses on inquiry approaches to the teaching and learning of science. Development of teaching strategies including materials and resources for teaching science using an inquiry approach as well as more teacher-directed approaches.
SED 473, SCIENCE PEDAGOGY AND TECHNOLOGY I, 4 Credits
Development of pedagogical content knowledge in grades 6-12 science instruction: learning theory, nature of science, technology integration, and reform recommendations. Lec/lab/rec.
SED 474, MATHEMATICS PEDAGOGY AND TECHNOLOGY I, 4 Credits
Development of pedagogical content knowledge in grades 6-12 mathematics instruction: learning theory, nature of mathematics, technology integration, and reform recommendations. Recommended: Investigation of mathematics as it relates to mathematics education and SED 414
SED 476, MATHEMATICS PEDAGOGY AND TECHNOLOGY II, 4 Credits
Development of additional pedagogical content knowledge in grades 6-12; stress on dominant themes of the school mathematics curriculum including problem solving, reasoning, communication, and connections as well as the integration of technology into the mathematics classroom.
Prerequisite: SED 474 with D- or better
SED 477, SCIENCE PEDAGOGY AND TECHNOLOGY II, 4 Credits
Development of pedagogical content knowledge in grades 6-12; science instruction; learning theory, nature of science, technology integration, and reform recommendations.
Prerequisite: SED 473 with C or better

SED 499, SPECIAL TOPICS, 3 Credits
PREREQ: Provisional acceptance to Education Double Degree program. This course is repeatable for 18 credits.

SED 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

SED 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

SED 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SED 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits. Available via Ecampus

SED 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SED 508, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

SED 509, PRACTICUM, 1-16 Credits
This course is repeatable for 16 credits.

SED 510, PROFESSIONAL INTERNSHIP: SCIENCE OR MATHEMATICS EDUCATION, 1-16 Credits
Supervised teaching experience at the elementary, middle or high school level; students experience general classroom and professional responsibilities common to the regular science or mathematics teacher. This course is repeatable for 16 credits. Available via Ecampus

SED 511, ANALYSIS OF CLASSROOMS I, 3 Credits
Observation and analysis of the complex science/mathematics classroom (grades 3-12) and school culture and their impact on student learning.

SED 512, TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE, 3 Credits
Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century.

SED 513, INQUIRY IN SCIENCE AND SCIENCE EDUCATION, 3 Credits
Investigation of inquiry and the nature of inquiry in science as it relates to science education. Students will examine issues relating to integrating scientific understandings and practice into K-12 instruction.

SED 514, INQUIRY IN MATHEMATICS AND MATHEMATICS EDUCATION, 3 Credits
Investigation of mathematics as it relates to mathematics education. Students will examine issues related to integrating mathematical understanding, mathematics standards/curricula, and mathematics-specific strategies in K-12 instruction. Lec/lab.

SED 516, INQUIRY IN SCIENCE AND MATHEMATICS EDUCATION, 3 Credits
Investigation of inquiry and the nature of inquiry in mathematics and science as it relates to education. Students will examine issue relating to integrating mathematical and scientific understandings and practices into K-12 education.

SED 519, TEACHING MATHEMATICAL MODELING IN STEM, 3 Credits
Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of mathematical modeling. Students experience content lessons and lessons focused on supporting students in developing understanding of that content.
Recommended: Background in an educational setting or as a pre-service teacher at any level, a K-12 teacher or free-choice learning educator

SED 520, TECHNOLOGY FOR MATH AND SCIENCE EDUCATION, 3 Credits
Explore current and emerging technologies applied to math and science learning that promote critical thinking, communication, collaboration, and creativity. Gain technology skills and resources that can be transferred to formal and informal learning environments.
Recommended: Basic computer literacy.

SED 531, OVERVIEW OF FREE-CHOICE LEARNING, 3 Credits
Examines learning that occurs when people believe they have choices over what and how they learn, how much time they spend learning, and what their sources of information are. Covers current research on learning in museums, aquariums, zoos, botanical gardens, science centers, after-school programs, media and apprenticeships.

SED 535, Communicating Ocean Sciences to Informal Audiences, 3 Credits
For students interested in improving their ability to communicate their scientific knowledge by helping general public and student audiences learn about ocean sciences in a wide variety of learning settings. Combines instruction in inquiry-based teaching methods and learning theory with work in student's local informal learning settings like museums, zoos, aquariums and libraries.
SED 541, WEATHER CONCEPTS FOR SCIENCE AND MATH TEACHING, 3 Credits
Science content and pedagogy in learning and teaching basic weather concepts.
Recommended: Background in an educational setting or as a K-12 teacher or free-choice learning educator

SED 550, HIGH QUALITY SCIENCE AND MATHEMATICS INSTRUCTION, 3 Credits
Explores high quality science and mathematics instruction to prepare professional teachers in science and mathematics. Develops skills in high-leverage instructional practices and reviews research literature that supports these practices. Investigates social justice issues related to systems of schooling in the United States.

SED 552, MATHEMATICS METHODS: PRACTICUM I, 3 Credits
Theoretical background, practical knowledge, and skills for teaching in mathematics classrooms (grades 3-12). Instructional methods/ modes, classroom management, contemporary curriculum goals and instructional planning.

SED 553, SCIENCE METHODS/PRACTICUM I, 3 Credits
Theoretical background, practical knowledge, and skills for teaching in science classrooms (grades 3-12). Instructional methods/ modes, classroom management, contemporary curriculum goals and instructional planning.

SED 564, ENGINEERING AND SCIENCE IN THE LIVES OF STUDENTS, 3 Credits
Explore the use of construction engineering as a vehicle to make science and math more relevant and useful for the everyday life of students.
Recommended: Background in an educational setting or as a K-12 teacher or free-choice learning educator (eg. museum, science camp)

SED 566, FOSTERING REFLECTIVE DISCOURSE IN SCIENCE AND MATH CONTEXTS, 3 Credits
Examines ways of speaking that foster learning in science and mathematics contexts such as K-16 classrooms and free-choice learning settings (i.e., museums, zoos, science camps, etc.). Assignments assume the participant is a K-12 teacher or free-choice learning educator enrolled in a graduate licensure program or has access to an educational setting.

SED 573, SCIENCE PEDAGOGY AND TECHNOLOGY I, 4 Credits
Development of pedagogical content knowledge in grades 6-12 science instruction: learning theory, nature of science, technology integration, and reform recommendations. Lec/lab/rec.

SED 574, MATHEMATICS PEDAGOGY AND TECHNOLOGY I, 4 Credits
Development of pedagogical content knowledge in grades 6-12 mathematics instruction: learning theory, nature of mathematics, technology integration, and reform recommendations.
Recommended: Investigation of mathematics as it relates to mathematics education and SED 414

SED 576, MATHEMATICS PEDAGOGY AND TECHNOLOGY II, 4 Credits
Development of additional pedagogical content knowledge in grades 6-12; stress on dominant themes of the school mathematics curriculum including problem solving, reasoning, communication, and connections as well as the integration of technology into the mathematics classroom.
Prerequisite: SED 574 with C or better

SED 577, SCIENCE PEDAGOGY AND TECHNOLOGY II, 4 Credits
Development of pedagogical content knowledge in grades 6-12; science instruction: learning theory, nature of science, technology integration, and reform recommendations.
Prerequisite: SED 573 with C or better

SED 581, PROFESSIONAL DEVELOPMENT AND PRACTICUM IN MATHEMATICS, 3 Credits
Developing and implementing a program for continuing learning and evaluation in mathematics education.

SED 582, PERSONAL DIMENSIONS OF FREE-CHOICE LEARNING, 3 Credits
Investigates the fundamental roles that identity, motivation, interest, prior knowledge and experience, and choice and control play in supporting learning and how learning leaders can build on these dimensions of learning in order to successfully engage lifelong learners.
Available via Ecampus

SED 583, SOCIO-CULTURAL DIMENSIONS OF FREE-CHOICE LEARNING, 3 Credits
Investigates connections between theories of free-choice learning and the fundamental concepts of sociology, social psychology and anthropology; social stratification, social structure and interaction, social institutions, and cultural background. Real world examples will be included to support learning leaders’ efforts to facilitate the socio-cultural dimensions of lifelong science and mathematics learning.
Available via Ecampus

SED 584, PHYSICAL DIMENSIONS OF FREE-CHOICE LEARNING, 3 Credits
Learning is influenced by the interaction of variables within three contexts—personal, socio-cultural and physical. This course focuses on how macro-scale environmental factors (e.g. space, crowding, novelty) and micro-scale environmental factors (e.g. design elements, real objects, different media) support free-choice learning.
Available via Ecampus
SED 592, PROFESSIONAL DEVELOPMENT AND PRACTICUM IN SCIENCE, 3 Credits
Developing and implementing a program for continuing learning and evaluation in science education.

SED 594, ADVANCED INSTRUCTIONAL STRATEGIES IN SCIENCE AND MATHEMATICS, 3 Credits
Explore instructional strategies and skills for K-12 science and math teachers to support student learning rigorous content.

SED 595, ASSESSMENT AND EVALUATION, 3 Credits
Examines education assessment focusing on formative assessment in multiple contexts across learning environments.

SED 597, PROFESSIONAL DEVELOPMENT IN MATHEMATICS AND SCIENCE EDUCATION, 3 Credits
Development of strategies and skills for developing, implementing and evaluating a program of professional development for mathematics or science educators considering various choices of program settings.

SED 598, MATHEMATICS AND SCIENCE CURRICULUM, 3 Credits
Current trends, history of these trends, and rationale for mathematics and science curriculum reform across learning environments.

SED 599, TOPICS IN SCIENCE EDUCATION, 3 Credits
Current issues, trends, and topics in science education. May be repeated for credit with different topics.

SED 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

SED 603, DISSERTATION, 1-16 Credits
This course is repeatable for 999 credits.

SED 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

SED 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

SED 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

SED 608, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

SED 611, SURVEY OF RESEARCH ON TEACHING, 3 Credits
Critical analysis of perspectives of research in science/math education with a focus on teaching as the unit of analysis.
Prerequisite: SED 580 with C or better

SED 613, LEARNING THEORY, 3 Credits
Provides a critical overview and analysis of current theories of learning and development, beginning with a discussion about what learning is, how it has been viewed and studied over time, and how seminal theories inform an understanding of lifelong learning and its facilitation.
Prerequisite: SED 580 (may be taken concurrently) with C or better

SED 615, PRACTICUM IN MATHEMATICS/SCIENCE IN COLLEGE TEACHING, 3 Credits
Supervised field practicum in college mathematics/science teaching. This course is repeatable for 9 credits.

SED 621, SURVEY OF RESEARCH ON LEARNING, 3 Credits
Critical analysis of perspectives on student thinking and learning in science/math education.
Prerequisite: SED 580 (may be taken concurrently) with C or better

SED 623, CURRICULUM THEORY, 3 Credits
Establishes theoretical grounding of curriculum. Includes theoretical background, practical knowledge, and skills related to science and mathematics curriculum, including the history, curriculum theory and practice.
Prerequisite: SED 580 (may be taken concurrently) with C or better

SED 625, CRITICAL PEDAGOGY, 3 Credits
Builds a foundation in critical pedagogy theory and practice. Includes reading of classic and contemporary literature by recognized thinkers in the fields of critical pedagogical studies, requiring careful evaluation of empirical research and synthesis to develop a coherent point of view. Develops methodologies for analyzing data using critical pedagogical theories and intersectional perspectives.

SED 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

SED 808, WORKSHOP, 1-16 Credits
This course is repeatable for 99 credits.
Available via Ecampus

Adult and Higher Education Graduate Major (EDD, EDM, PhD)

This major offers the following option(s):

- Community College Leadership (p. 494)
- Leadership in Higher Education (p. 495)

EdM available only via Ecampus.

The College of Education offers graduate programs leading to a major in Adult and Higher Education with degrees in Master of Education (EdM),
Doctor of Education (EdD), and Doctor of Philosophy (PhD), as well as Masters of Arts in Interdisciplinary Studies (MAIS).

**Master of Education (EdM)**

The Master of Education (EdM) degree in Adult and Higher Education is designed for working professionals to enhance their knowledge, skills, and abilities to serve adult learners in a number of settings. These can include for-profit corporations, not-for-profit agencies, community organizations, and various higher education settings. This program is guided by the Academy of Human Resource Development Standards, a professional organization recognized internationally.

**Doctoral Degrees (EdD, PhD)**

The Adult and Higher Education doctoral degrees offer two options in Community College Leadership (CCL) and Leadership in Higher Education (LHE). Candidates pursue their chosen option either in an EdD or PhD degree, depending upon the purpose and approach of their research study and the intended role to be sought after successful completion of the degree. Both options require completion of courses in foundational and research cores, internship hours, and thesis/dissertation.

**Doctor of Education (EdD) Degree**

The Doctor of Education degree prepares professionals for faculty/ administrative leadership roles in a variety of positions in community colleges or other higher education settings. Candidates must have appropriate professional experience that enables them to benefit from the stated program outcomes. Examples of experience include teaching, student services, administration, finance, curriculum specialist, support staff, or supervisor in an educational related setting.

**Doctor of Philosophy (PhD) Degree**

The Doctor of Philosophy degree prepares professionals for research, administration, and professorial roles in higher education settings. Candidates must have significant experience in an education or education-related setting such as teaching, leadership administration, curriculum specialist, supervisor; etc., where the primary function is education. Knowledge of educational research methodology is highly desirable.

**Major Code: 2075**

The EdM in Adult and Higher Education Masters degree requires a minimum of 45 quarter credits.

**Community College Leadership Graduate Option**

This option is offered within the following major(s):

- Adult and Higher Education - College of Education (p. 493)

An overview of the growing literature related to community colleges, with an emphasis on the role of research in understanding and interpreting the unique nature of community college leadership. The option is committed to developing tomorrow's leaders based on the principle that leadership can be learned and enhanced. Effective leadership is a combination of commitment, management, and vision related to the role and mission of community colleges. This option is dedicated to developing student
competencies in communications, resource management, organizational strategy, collaboration, leadership, and community college advocacy. Ethics and a commitment to social justice are critical foundations that undergird all course work.

This option is designed for the scholar-practitioner wanting to examine through research particular elements of community college organization, learning, and/or leadership.

**Leadership in Higher Education Graduate Option**

This option is offered within the following major(s):

- Adult and Higher Education - College of Education (p. 493)

An overview of the extensive literature related to four-year colleges and universities, with an emphasis on the role of research in understanding and interpreting the nature of higher education leadership. The option of leadership in higher education is committed to developing tomorrow’s leaders based on the principle that leadership can be learned and enhanced. Effective leadership is a combination of commitment, management, and vision related to the role and mission of higher education institutions. This option is dedicated to developing student competencies in communications, resource management, organizational strategy, collaboration, leadership, and higher education advocacy. Ethics and a commitment to social justice are critical foundations that undergird all course work.

This option is designed for the scholar-practitioner wanting to examine through research particular elements of higher education organization, learning, and/or leadership.

**Counseling Graduate Major (MCOUN, PhD)**

This major offers the following option(s):

- Clinical Mental Health Counseling (p. 496)
- Counselor Education (p. 496)
- School Counseling (p. 497)

Available only at OSU-Cascades and via Ecampus.

The mission of the Oregon State University graduate program in counseling is to prepare counseling professionals who promote the social, psychological and physical well-being of individuals, families, communities and organizations. We believe that such professional leaders stand for social, economic and political justice and therefore must be prepared to be proactive educators, change agents and advocates in the face of injustice. Counseling professionals are sensitive to life span developmental issues, demonstrate multicultural awareness and recognize a global perspective as integral to the preparation of counselors and counselor educators.

Two graduate degrees are offered in counseling: the Master of Counseling (Mcoun) and the Doctor of Philosophy (PhD). The Master of Counseling has two transcript-visible graduate options, Clinical Mental Health Counseling and School Counseling. The Counseling PhD degree has a graduate option in Counselor Education.

OSU’s counselor education degree programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The School Counseling graduate option is approved by the Oregon’s Teacher Standards and Practices Commission (TSPC).
Clinical Mental Health Counseling Graduate Option

**Master of Counseling (MCoun)**

Students seeking a MCoun degree are required to complete 54 credits in core courses and additional credits in a content specialty, either the Clinical Mental Health Counseling graduate option or the School Counseling graduate option.

Total Credits 94

**Doctor of Philosophy (PhD)**

A minimum of 150 credits is required beyond the baccalaureate degree. Completion of the Counselor Education (p. 496) option is a requirement of the COUN PhD.

**Major Code: 2970**

**Clinical Mental Health Counseling Graduate Option**

This option is offered within the following major(s):

- Counseling - College of Education (https://catalog.oregonstate.edu/college-departments/education/counseling-mcoun-phd/)

Available only at OSU-Cascades and via Ecampus.

The Master of Counseling (MCoun) degree offers a Clinical Mental Health Counseling (CMHC) option for individuals who want to work in community agencies, treatment programs, community colleges and other counseling centers.

**Option Code: 2975**

Students enrolled in the CMHC option must complete 54 credits of MCOUN core courses, 27 credits of specialty courses, and a minimum of 9 credits of CMHC elective courses.

**School Counseling Graduate Option**

This option is offered within the following major(s):

- Counseling - College of Education (https://catalog.oregonstate.edu/college-departments/education/counseling-mcoun-phd/)

Available only at OSU-Cascades and via Ecampus.

The Master of Counseling (MCOUN) degree with a School Counseling option uses a competency-based approach to preparing school counselors. The program prepares the counselor to provide comprehensive school counseling programs that serve all students. Counselors will learn to utilize strategies to work with their students’ academic, personal/social, and career development needs. Preparation consists of a sequential program that integrates academic knowledge and theory with closely supervised counseling practice. Self-exploration and personal development are integral components of the program.

Graduates are eligible for an Oregon School Counselor License upon completion of additional steps required by the Oregon Teacher Standards and Practices Commission. These steps may include completion of COUN 582 and/or COUN 591.

**Option Code: 2980**

**Counseling Graduate Minor**

Minor Code: 2970

**Dual Language Education Graduate Certificate**

Available only via Ecampus.

This program enables Oregon’s kindergarten through 12th grade (K-12) teachers to effectively educate students in dual language settings. This specialization follows a standards-based curriculum, addressing the six domains specified in Oregon Administrative Rule 584-420-0630:

1. Language
2. Culture
3. Planning, Implementing, and Managing Instruction
4. Assessment
5. Professionalism
6. Community and Family Engagement

In addition to being recognized by state teacher licensing agencies, including Oregon, dual language education is an academic discipline drawing from linguistics, language pedagogy, second language acquisition, multicultural education, education policy, and program administration.

**Education Graduate Major (EDD, EDM, MS, PhD)**

This major offers the following option(s):

- Advanced Science and Mathematics Education (p. 499)
- Agricultural Education (p. 499)
- Free-Choice Learning (p. 499)
- Language Equity and Educational Policy (p. 499)
- Mathematics Education (p. 500)
- PK-12 English to Speakers of Other Languages (ESOL) (p. 500)
- Science Education (p. 500)
- Science/Mathematics Education (p. 500)
- Social Justice Education (p. 501)

The College of Education offers graduate work leading to the Master of Education (EdM), Master of Science in Education (MS), Doctor of Education (EdD; not available at this time), and Doctor of Philosophy (PhD) degrees with a major in education.

**Master of Education (EdM) Degree**

The EdM program through Ecampus has been suspended effective Summer 2019 (202000).

The Master of Education (EdM) degree advances the knowledge and teaching of PK–12 teachers and other educators who are interested in continued professional development in the field of education in order to create inclusive, supportive learning environments that contribute to student learning and growth. Candidates take courses in educational research, technology, cultural competency, and leadership. They also further their pedagogical content knowledge and instruction in a specific area/option.

**Master of Science (MS) Degree**

The Master of Science (MS) in Education prepares candidates to be secondary science or mathematics teachers who are skilled professionals drawing upon current educational research to create innovative and inclusive science or math learning environments. Candidates work within a cohort of peers in science and mathematics education and are taught by faculty who specialize in and conduct educational research in science, mathematics, and equity.
Doctor of Philosophy (PhD) Degree

The Doctor of Philosophy (PhD) in Education provides advanced theory and methods in educational research and in specific content areas. This is a research-oriented degree intended for doctoral candidates interested in becoming educational researchers and assume professional positions in a variety of settings, including colleges and universities, non-profit organizations, and government agencies. This degree aims to prepare professional researchers, scholars, or other scholar practitioners. Candidates develop competencies in educational scholarship and research that focus on acquiring new knowledge.

Major Code: 2310

Master of Education (EdM) Degree

The EdM program through Ecampus has been suspended effective Summer 2019 (202000).

The Master of Education degree requires completion of one graduate option for a total of 45 quarter credits. All options require completion of 18 credits of core courses, 12–15 credits of content specialty courses, and 12–15 credits of elective courses from the other EdM options or OSU Colleges. Up to 15 graduate credits may be transferred if they meet OSU Graduate School requirements.

Note: Completion of this degree does not lead to initial (preliminary) teaching licensure; it is an advanced degree for continued professional development in targeted areas.

There are four EdM options, all online and approved by the Oregon Teacher Standards and Practices Commission (TSPC) and nationally accredited by NCATE.

1. Advanced Science and Mathematics Education
2. Free-Choice Learning
3. PK–12 English to Speakers of Other Languages (ESOL)
4. Social Justice in Education

Applicants to the EdM program must possess teaching experience in a K–12 classroom or in an education-related setting. Because this major is practitioner-based, it requires access to a classroom or informal learning environment to apply educational research, theory, and pedagogical practices, and for completion of a final project.

Doctor of Philosophy (PhD) Degree

The Education PhD degree is designed for candidates already possessing education beyond the undergraduate level (master's degree or equivalent). Applicants to the PhD program must have significant experience in an education-related setting such as teaching, leadership administration, curriculum specialist, supervisor, or in a setting where the primary function is education. Some knowledge of educational research methodology is highly desirable.

This degree requires a core courses in quantitative and qualitative research, practicum, and dissertation/thesis, and additional credits in a specialty area/option. Additional research methods and elective courses are approved by the major professor.

Candidates select from three PhD options. All options are offered on-campus at OSU in Corvallis:

1. Agricultural Education
2. Language Equity and Educational Policy
3. Science/Mathematics Education

Option Code: 2311

Agricultural Education Graduate Option

This option is offered within the following major(s):

- Education - College of Education (p. 497)

This option is for the PhD degree.

The Agricultural Education doctoral option has a primary focus of preparing candidates to assume faculty positions in colleges or universities in agricultural education programs. Candidates assemble an individual program of study that provides a comprehensive knowledge of the teaching and learning process with a strong theoretical foundation and practical research experience in agricultural education.

Option Code: 2312

Language Equity and Educational Policy Graduate Option

This option is offered within the following major(s):

- Education - College of Education (p. 497)

This option is for the PhD degree.

The Language Equity and Educational Policy (LEEP) PhD option has a primary focus of preparing candidates to assume various positions in post-secondary education, leadership in community education, faculty positions in colleges or universities, or teacher education programs. Working with faculty advisors, candidates create and implement a program of study that provides comprehensive knowledge of research with bi/multilingual communities, equity in education contexts, and educational policies.

Option Code: 2313
Mathematics Education Graduate Option

This option is offered within the following major(s):

- Education - College of Education (p. 497)

This option is for the MS degree.

This graduate option is for students wanting to earn both a Master's of Science degree in Education and qualify for an Oregon teaching license in advanced mathematics.

Option Code: 2314

PK-12 English to Speakers of Other Languages (ESOL) Graduate Option

This option is offered within the following major(s):

- Education - College of Education (p. 497)

This EdM option focuses on how to effectively work with children and adolescents who are learning English as an additional language. It is designed for pre-kindergarten through twelfth grade (PK–12) teachers in the United States. Courses incorporate state and national learning standards for PK–12 students, as well as state and national ESOL standards for PK–12 teacher preparation programs.

Candidates who wish to add the ESOL endorsement to a current Oregon teaching license need to contact the ESOL endorsement program coordinator in the College of Education regarding additional licensure requirements.

Option Code: 2315

Science Education Graduate Option

This option is offered within the following major(s):

- Education - College of Education (p. 497)

This option is for the MS degree.

This option is for students wanting to earn both a Master's of Science degree in Education and qualify for an Oregon teaching license in one or more of the following endorsements: biology, chemistry, integrated science, physics.

Option Code: 2316

Science/Mathematics Education Graduate Option

This option is offered within the following major(s):

- Education - College of Education (p. 497)

The Science/Mathematics Education PhD option has a primary focus of preparing candidates to assume various positions in collegiate/university, K–12, or free-choice education organizations. Working with faculty advisors, candidates create and implement a program of study that fosters theory-based knowledge and skills and practical research experience necessary for future career ambitions in STEM education.

Option Code: 2317
Select two research methods courses and other courses approved by the major professor

Total Credits 30-32

Option Code: 2317

Social Justice Education Graduate Option

This option is offered within the following major(s):

• Education - College of Education (p. 497)

This option is for the EdM degree.

This EdM option prepares PK–12 teachers and educators in informal settings to be agents of change for equity and social justice. Candidates will learn about social justice curriculum and teaching, will engage in effective collaboration with schools and community, and will become advocates for the educational success of all students.

For more details, see an advisor in the College of Education, 104 Furman Hall, 541-734-6661 or email the advisor at askcoed@oregonstate.edu

Minor Code: 2310

Minor Code: 2310

Education Minor

Also offered via Ecampus.

The Education undergraduate minor is composed of a selection of courses that represent careers and key topics in education-related fields. The minor is open and intended for majors outside of Education to obtain an overview of educational careers and concepts. An undergraduate minor in Education would be valuable to anyone interested in education and workplace training in their chosen field or in doing outreach education. Some, but not all, courses in this minor are required in the Double Degree in Education UG. The minor does not result in a teaching or counseling license, but does provide the course work for a Career and Technical Education License in Oregon.

Minor Code: 495

A grade of C– or better is required for all courses used to complete minor requirements. Such courses cannot be taken for an S/U grade.

* Baccalaureate Core Course (BCC)

Minor Code: 495

Education Undergraduate Major (BA, BS, HBA, HBS)

This major offers the following option(s):

• Advanced Mathematics Teaching (p. 503)
• Biology Teaching (p. 503)
• Chemistry Teaching (p. 504)
• Elementary Teaching (p. 504)
• Family and Consumer Sciences Teaching (p. 505)
• Foundational Mathematics (p. 506)
• Health Teaching (p. 506)
• Integrated Science Teaching (p. 507)
• Language Arts Teaching (p. 508)
• Physics Teaching (p. 509)
• Social Studies Teaching (p. 509)

The Education Double Degree (DD) program in the College of Education is an undergraduate pathway to teacher preparation available to all OSU students. The Education DD program enables students to earn two
undergraduate degrees concurrently—one in their chosen field and the second in Education (BA or BS degree) including a recommendation to obtain an Oregon teaching license (in a specific content area/endorsement). The BA/BS in Education is a concurrent degree subject to Academic Regulation 26a (p. 16).

Students in the DD must complete two stages. Level I: Pre-Education consists of foundational courses in education which serve as pre-requisites for Level II: Professional Education. The pre-requisite courses also meet baccalaureate core requirements and elective credits in students’ first degree. Students must complete all Level I required courses, pass required exams, and meet other entrance requirements before applying to Level II. The Education Double Degree (https://education.oregonstate.edu/program-requirements/) website details program requirements and application information.

The second stage, Level II Professional Level, focuses on teacher preparation courses in Elementary Education or one of many options in Secondary Education (Middle/High School), such as advanced mathematics, biology, chemistry, English language arts, Family & Consumer Sciences, foundational mathematics, health, integrated science, social studies and physics. Students enter Level II in a cohort to complete pedagogy classes and participate in student teaching.

It is strongly recommended that students meet with the College of Education advisor in Level I: Pre-Education and at least a year prior to their application to Level II: Professional Education.

Contact the Double Degree program advisor for further information: 541-737-4661.

**Major Code: 233**

**Pre-Education Major Code: 232**

- Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and design and implement developmentally appropriate and challenging learning experiences.
- Understand the central concepts, tools of inquiry, and structures of the discipline(s) they teach and create learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
- Plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
- Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.
- Practices ongoing reflection and use evidence to continually evaluate their practice, particularly the effects of their choices and actions on others, and adapts their practice/choices accordingly. The teacher candidate will avail professional resources and/or professional development beyond university coursework.

---

**Education (Double Degree) K–12 Classrooms Pathway**

**Level I: Pre-Education**

These courses must be completed before admission to Level II: Professional Education including courses listed in the option(s) selected in a specific content area.

- If you have taken HDFS 311, HDFS 313, HDFS 314 and have a 3.0 GPA or higher, you do not need to take ED 253
- Spring term courses are offered exclusively through Ecampus to accommodate all student teaching placements
- Baccalaureate Core Course (BCC)
- Writing Intensive Course (WIC)

**Major Code:** 233

**Pre-Education Major Code:** 232

**Advanced Mathematics Teaching Option**

This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wanting to earn their bachelor’s degree in Education and qualify for an Oregon Teaching License to teach advanced mathematics at the middle school (grades 5–9) and high school (grades 9–12) levels.

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.

**Option Code:** 60

Students must meet every standard for this option by completing all required courses prior to beginning the Professional Level. Note: Most of these classes will also meet requirements for the student’s first degree.

Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted.
- All required courses must be letter graded (A–F); courses graded Pass/No Credit (P/N) or Satisfactory/Unsatisfactory (S/U) are not accepted.

Elementary Teaching Option

This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wanting to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach multiple subjects at the early childhood/elementary (grade PreK-6 in a self-contained classroom) levels.

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.
Option Code: 58

Completed prior to Professional Level. These requirements are based on the National Board for Professional Teaching Standards/Generalist, Standard II: Knowledge of Content and Curriculum. Most of these courses will also meet requirements for the student's first degree.

Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted
- All required courses must be letter graded (A–F); courses graded on Pass/No Credits (P/N) or Satisfactory/Unsatisfactory (S/U) basis are not accepted

Health Teaching Option

This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wanting to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach health at the middle school (grades 6–9) and/or the high school (grades 9–12) levels.

Health students are encouraged to add a Career and Technical Education (CTE) endorsement in Health Sciences. This endorsement qualifies one to teach specialized career training courses at the secondary level. The CTE endorsement is earned with 1,800 hours working in the health industry or 600 working hours in a variety of health industry work settings including job shadows, internships, volunteer work, and paid work. This endorsement can be added during or after the degree program so one can begin working on it at any time.

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.

Option Code: 59

Students must meet all standards in this option by completing the required courses prior to beginning the Professional Level. Note: Most of the required courses in this option will also meet a student's first degree requirements.
Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted.
- All required courses must be letter graded (A–F); courses graded on Pass/No Credits (P/N) or Satisfactory/ Unsatisfactory (S/U) basis are not accepted.
- Work or volunteer experiences in these standards may be considered in place of course work.

Integrated Science Teaching Option

This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wishing to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach integrated science at the middle school (grades 6–9) and/or high school (grades 9–12) levels.

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.

Option Code: 67

Students must meet all standards in this option by completing the required courses prior to beginning the Professional Level. Note: Most of these courses will also meet requirements in a student's first degree. Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted.
- All required courses must be letter graded (A–F); courses graded on Pass/No Credits (P/N) or Satisfactory/Unsatisfactory (S/U) basis are not accepted.

Standard 3. Biology Sequence
Select one of the following biology series: 12

Series 1
- BI 101 *ENVIRONMENTAL BIOLOGY: ECOLOGY, CONSERVATION, GLOBAL CHANGE
- BI 102 and *ANIMAL BIOLOGY: GENES, BEHAVIOR AND EVOLUTION OF LIFE
- BI 103 and *HUMAN BIOLOGY: ANATOMY, PHYSIOLOGY AND DISEASE

Series 2
- BI 221 *PRINCIPLES OF BIOLOGY CELLS
- BI 222 and *PRINCIPLES OF BIOLOGY ORGANISMS
- BI 223 and *PRINCIPLES OF BIOLOGY POPULATIONS

Standard 4. Earth and Space Science
Select a minimum of 15 credits from at least two areas below:

Astronomy
- PH 104 *DESCRIPTIVE ASTRONOMY
- PH 205 *SOLAR SYSTEM ASTRONOMY
- PH 206 *STARS AND STELLAR EVOLUTION
- PH 207 *GALAXIES, QUASARS, AND COSMOLOGY

Atmospheric Sciences
- ATS 201 *CLIMATE SCIENCE
- ATS 310 *METHODOLOGY

Geology
- GED 201 *PHYSICAL GEOLOGY
- GED 202 *EARTH SYSTEMS SCIENCE
- GED 203 *EVOLUTION OF PLANET EARTH
- GED 221 *ENVIRONMENTAL GEOLOGY
- GED 305 *LIVING WITH ACTIVE CASCADE VOLCANOES
- GED 306 *MINERALS, ENERGY, WATER, AND THE ENVIRONMENT
- GED 307 *NATIONAL PARK GEOLOGY AND PRESERVATION
- GED 308 *GLOBAL CHANGE AND EARTH SCIENCES
- GED 352 *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE

Oceanography
- OC 201 *OCEANOGRAPHY
- OC 332 COASTAL OCEANOGRAPHY

Standard 5. Science Education
SED 413 INQUIRY IN SCIENCE AND SCIENCE EDUCATION 3

Total Credits 45

* Baccalaureate Core Course (BCC)

Language Arts Teaching Option
This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wanting to earn a bachelor’s degree in Education and qualify for an Oregon Teaching License to teach English language arts at the middle school (grades 6–9) and/or high school (grades 9–12) levels.

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.

Option Code: 68
Physics Teaching Option

This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wanting to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach physics at the high school level (grades 9–12).

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.

Option Code: 68

Students must meet all standards in this option by completing the required courses prior to beginning the Professional Level. Note: Most of these courses will also meet requirements in a student's first degree.

Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted.

- All required courses must be letter graded (A–F); courses graded on Pass/No Credits (P/N) or Satisfactory/Unsatisfactory (S/U) basis are not accepted.

Standard 3. Paradigms in Physics

Select at least 12 credits from the following:

PH 422  PARADIGMS IN PHYSICS: STATIC FIELDS
PH 423  PARADIGMS IN PHYSICS: ENERGY AND ENTROPY
PH 424  PARADIGMS IN PHYSICS: OSCILLATIONS AND WAVES
PH 425  PARADIGMS IN PHYSICS: QUANTUM FUNDAMENTALS
PH 426  PARADIGMS IN PHYSICS: CENTRAL FORCES
PH 427  PARADIGMS IN PHYSICS: PERIODIC SYSTEMS

Standard 4. Modern Physics Electives

Select at least 3 credits from the following:

PH 315  PHYSICS OF CONTEMPORARY CHALLENGES
PH 335  TECHNIQUES OF THEORETICAL MECHANICS
PH 411  ELECTRONICS
PH 415  COMPUTER INTERFACING AND INSTRUMENTATION
PH 465  COMPUTATIONAL PHYSICS
PH 481  PHYSICAL OPTICS
PH 482/ECE 482  OPTICAL ELECTRONIC SYSTEMS
PH 483/ECE 483  GUIDED WAVE OPTICS

Social Studies Teaching Option

This option is offered within the following major(s):

- Education - College of Education (p. 501)

This option is for students wanting to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach social studies at the middle school (grades 6–9) and/or the high school (grades 9–12) levels.

For more information, contact the College of Education Student Services Advisor, 104 Furman Hall, 541-737-4661.

Option Code: 69

Students must meet all standards in this option by completing the required courses prior to beginning the Professional Level. Note: Most of these courses will also meet requirements in a student's first degree.

Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted.

- All required courses must be letter graded (A–F); courses graded on Pass/No Credits (P/N) or Satisfactory/Unsatisfactory (S/U) basis are not accepted.

These Standards are based on the National Council for the Social Studies (http://www.socialstudies.org/) (revised 2010). Most of these courses will also meet requirements for student's first degree.

Additional option requirements:

- A cumulative 3.0 GPA is preferred for all required courses. Grades below C- are not accepted.

- All required courses must be letter graded (A–F); courses graded on Pass/No Credits (P/N) or Satisfactory/Unsatisfactory (S/U) basis are not accepted.

You need depth and breadth of knowledge including both analytical and methodological expertise in at least one social studies discipline. Met with a major in one of the following disciplines:
### Elementary Education Undergraduate Major (BS, HBS)

- Anthropology
- Economics
- Ethnic Studies
- Geography
- History
- Liberal Studies
- Political Science
- Psychology
- Sociology

Any ES course 3-4

#### Standard 5: Individuals, Groups, and Institutions

Select one course from the following:

- PS 206 *INTRODUCTION TO POLITICAL THOUGHT
- or PS 365 *AMERICAN POLITICAL THOUGHT

#### Standard 6: Power, Authority, and Governance

Select one course from the following:

- ANTH 373/ES 373/WLC *APPROACHES TO SOCIAL JUSTICE
- HST 336 *TWENTIETH-CENTURY EUROPE
- HST 338 *WITLER'S EUROPE
- HST 351 *MODERN LATIN AMERICA
- HST 386 *MODERN IRAN: REVOLUTION AND ITS AFTERMATH
- HST 392 *MODERN CHINA AND JAPAN
- HST 485/REL 485 *POLITICS AND RELIGION IN THE MODERN MIDDLE EAST
- PS 204 *INTRODUCTION TO COMPARATIVE POLITICS
- PS 313 *CAMPAIGNS AND ELECTIONS
- PS 331 *STATE AND LOCAL POLITICS
- SOC 426 *SOCIAL INEQUALITY
- SOC 448 *LAW AND SOCIETY

#### Option Code: 70

**Elementary Education Undergraduate Major (BS, HBS)**

Available only at OSU-Cascades.

This program is purposefully and specifically designed to attract and prepare diverse teachers in Central Oregon. Students will select one of three emphasis areas that are considered high need in both Central Oregon and the nation: English as a Second Language; Special Education; or Science, Technology, Engineering, and Mathematics (STEM). Students will complete one course in each of the three emphasis areas as a foundational part of their core coursework and take an additional two courses in one area. The program requirement will result in 9 credits that can support future endorsement completion and/or job placement.

**Major Code: 923**

**Pre-Elementary Education Major Code: 924**

- Demonstrates impact on P-12 student learning (InTASC Dimension 1, Standards 1-3).
- Demonstrate mastery of subject material (InTASC Dimension 2, Standards 4-5).
- Demonstrate understanding of pedagogical content knowledge and skills (InTASC Dimension 3, Standards 6-8).
- Conduct scholarly or professional activities in an ethical manner (InTASC Dimension 4, Standards 9-10).

English for Speakers of Other Languages Graduate Certificate

Available only via Ecampus.

This program enables Oregon’s kindergarten through 12th grade (K-12) teachers to effectively educate students who are learning English as an additional language. This specialization follows a standards-based curriculum, addressing the six domains specified in Oregon Administrative Rule 584-420-0360:

1. Language
2. Culture
3. Planning, Implementing, and Managing Instruction
4. Assessment
5. Professionalism
6. Technology

In addition to being recognized by state teacher licensing agencies, including Oregon, ESOL is an academic discipline drawing from linguistics, language pedagogy, second language acquisition, multicultural education, education policy, and program administration.

Mathematics Education Graduate Minor

Graduate Areas of Concentration

Elementary school science, free-choice learning, middle school science, science education, secondary science

Minor Code: 5620
Minor Code: 5620
Science Education Graduate Minor

Graduate Areas of Concentration

Elementary school science, free-choice learning, middle school science, science education, secondary science

Minor Code: 6100

Teaching Graduate Major (MAT)

This major offers the following option(s):

• Clinically Based Elementary (p. 513)
• Elementary (p. 514)
• Language Arts (p. 514)
• Mathematics (p. 514)
• Music (p. 515)
• Science (p. 515)
• Social Studies (p. 515)

Also available at OSU-Cascades and via Ecampus.

The Master of Arts in Teaching is an intensive professional degree program intended to prepare teachers for careers in public school education. Students who successfully complete the MAT can be recommended for an Oregon teaching license in the following subject areas:

• Mathematics
• Science: Biology, Chemistry, Integrated Science, Physics
• Elementary - Multiple Subjects
• Language Arts
• Music
• Social Studies

Major Code: 2100

Clinically Based Elementary Graduate Option

This option is offered within the following major(s):

• Teaching - College of Education (p. 513)

Available only via Ecampus.

The Clinically Based Elementary option in the Masters of Arts in Teaching (MAT) is a two-year program that features culturally literate education, teaching for social justice, and science and math topics leading to an Oregon preliminary teaching license in multiple subjects (elementary education). This option takes advantage of a partnership between a school district and the College of Education to put teacher candidates in district classrooms. Each term course work includes fully online courses, hybrid courses that are a combination of online and face-to-face learning in local districts, and field practicums in school district classrooms.

Only school districts that have entered into a formal partnership with OSU are available for student placement. Please check with the program lead for a list of participating schools.

Instructional Practice
Our program has a long history of graduating world-class engineers who have made major impacts on civilization through significant contributions in science and technology. Alumni achievements include breakthrough innovations such as the first artificial heart valve, the computer mouse, and the concept of email.

By emphasizing authentic, experiential engineering experiences within our curriculum, we equip students with the knowledge, skills, and passion to advance innovative solutions to today’s most complex engineering challenges. Through nearly 30 unique degree programs at the graduate and undergraduate level, we produce top-notch engineers who are grounded in integrity, ingenuity, and a keen understanding of the interrelatedness of global economies, cultures, and natural systems. Our faculty collaborates across disciplines to leverage synergies in teaching, research, and innovation. And we cultivate strategic partnerships to turn research results into new companies and products that create jobs while helping people to lead better lives.

The College of Engineering offers degrees in engineering, computer science, construction engineering management, energy systems engineering, and radiation health physics. Students may choose engineering majors from biological, chemical, civil, ecological, electrical and computer, environmental, industrial, manufacturing, mechanical, and nuclear engineering. Educational preparation for land surveying, a licensed profession in all states, is offered through civil engineering. Forest engineering is offered by the College of Forestry.

### The Engineering Profession

Engineering is the profession in which knowledge of the mathematical and natural sciences gained through education and practice is applied with judgment to develop ways to economically utilize the materials and forces of nature for the benefit of humankind. It is a licensed profession in all of the states of the USA, and educational programs must meet high professional standards. Engineers are not only responsible for planning, designing, manufacturing, construction, and management, but also for the safety and welfare of the public that relies on their work.

### Mission and Goals

The college’s undergraduate educational mission is to provide high quality engineering programs that prepare students for successful careers, lifelong learning, and service to their profession and society. OSU engineering graduates will be known for their technical competence and creativity; for their ability to apply, adapt, and extend their knowledge to solve a wide variety of problems; and for their effective communication skills. Their education will provide them with an understanding of the ways in which the humanities, social sciences, basic sciences, and technology interact to affect society. These programs will foster an environment that stimulates learning and promotes diversity.

The college’s undergraduate programs have four goals:

1. Educate students thoroughly in mathematics, basic science and engineering sciences relevant to their discipline’s professional work, including fundamental concepts, experimental techniques, methods of analysis, and computational applications.
2. Develop the ability of students to communicate effectively and to work collaboratively in diverse team environments.
3. Develop in students an awareness of the historical evolution of knowledge and technical applications, the state of current professional practice, their need for lifelong learning, contemporary issues, and the impact of engineering actions and solutions in a societal and global context; and to develop an understanding of their professional and ethical responsibilities.
4. Develop the ability of students to formulate and solve problems, to integrate and synthesize knowledge, and to think creatively, leading to the capability to analyze and design components, processes, or systems; plan and carry out experiments effectively; and troubleshoot and modify processes and systems.

Preparation for an Engineering Career
To prepare for the practice of engineering, students complete an accredited program of study leading to a bachelor of science degree in an established engineering field. Most engineering curricula require 180 credits; exceptions include programs in chemical, ecological, environmental, and bioengineering. All programs include a balance of course work in mathematics, science, liberal arts, engineering science, and engineering design.

Upon graduation, engineering students are eligible to take the Fundamentals of Engineering Examination of the State Board of Engineering Examiners in any state. After passing the examination and completing four years of progressively responsible engineering work, graduates are eligible to take the professional engineering license examination of the state in which they intend to practice.

Although some fields of industrial and government employment do not require formal professional licensure, the educational preparation for the bachelor's degree is a necessity for virtually all such employment.

Preparation for the professional practice of land surveying follows a pattern of education, experience, examination, and professional licensure similar to that required for professional engineering practice.

Students completing the BS in Radiation Health Physics degree will be eligible to take part I of the Certified Health Physics (CHP) Examination of the American Board of Health Physics after one year of applied health physics practice. After six years of responsible professional experience in health physics, graduates will be eligible to take part II of the CHP examination.

Admission Requirements
Admission to the college requires that students meet general university admission requirements, as published in the OSU Academic Catalog. Students are assigned to the department or school of their choice after their first year for advising and program planning. Information on policies and programs is available from the College of Engineering.

FOREST ENGINEERING
See College of Forestry. Also see College of Forestry for information on the Forest Engineering-Civil Engineering (p. 820) program.

GENERAL ENGINEERING
The first year of the General Engineering curriculum meets the requirements of all engineering curricula except bioengineering, chemical engineering, environmental engineering, and ecological engineering, which require a different chemistry sequence. To meet requirements for bioengineering, chemical engineering, environmental engineering, and ecological engineering, CH 201 and CH 202 may be substituted for CH 231/CH 261, CH 232/CH 262 and CH 233/CH 263. Students who have not decided upon a major prior to enrolling are encouraged to register for General Engineering.

CURRICULUM
The General Engineering curriculum below will prepare students to enter many of the engineering programs. Students may transfer into any program at any time during the first year; they must transfer by the end of the year.

* Baccalaureate Core Course

1 Must be selected to satisfy the requirements of the baccalaureate core

College of Engineering Grading and GPA Requirements
All technical, writing and communications courses must be taken for letter grades (A through F). C or better grades are passing.

SATISFACTORY ACADEMIC PROGRESS FOR ENGINEERING STUDENTS
A student in good academic standing satisfies university, college, and program academic requirements. The university may change a student's status to warning, probation, or suspension following guidelines contained in the Schedule of Classes. The College of Engineering has a similar, but independent, process.

At the conclusion of each term, term and cumulative GPA are calculated and academic standings are determined for students according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors. Students who fail to improve may be removed from the college.

1. COE Warning: Students with either an OSU term GPA below 2.5 or an OSU term completion percentage below 65% will be placed on College of Engineering Warning. Students must meet with their academic program advisor before they can register for subsequent terms.

2. COE Probation: Students who are on College of Engineering Warning, and have attempted 24 or more credits at OSU, and either have an OSU cumulative GPA below 2.5 or an OSU cumulative completion percentage below 65%, will be placed on College of Engineering Probation. Students must meet with their program advisor and complete an Academic Success Agreement before they can register for subsequent terms. To get off COE Probation, the student will need to meet the terms of the academic success agreement.
3. **COE Suspension**: Students who are on College of Engineering Probation and have a subsequent term of OSU term GPA below 2.5, or have a subsequent OSU term completion percentage below 65% will be suspended from the College of Engineering (removed from their major), and unable to take major restricted courses in the College.

4. **Reinstatement to the College**: Suspended students may be reinstated to the program after one year, or completion of a minimum of 24 quarter credits of acceptable transferable college-level work at an accredited college or university, with a GPA of 2.5 or above. These 24 credits must be pre-approved in writing by the program head advisor. Students reinstated to the program who are subsequently suspended may only apply for reinstatement under the ‘one year’ option.

Reinstatement requests from students will be considered by the College Committee on Reinstatement (CCR) made up of three College of Engineering school advisors and college head advisor (or their designee). Reinstatement guidelines are available electronically in the College of Engineering Undergraduate Policy Manual (http://engineering.oregonstate.edu/undergraduate-policy-manual/).

**Graduation Requirements**

To graduate with a baccalaureate degree in any of the engineering or computer science majors, a student must complete 180 credits; exceptions include programs in chemical, environmental, ecological, and bioengineering, which require 192 credits. In addition, students must have a minimum 2.5 institutional GPA and minimum 2.5 GPA in all required and elective classes in their chosen major. A student must also meet all university degree requirements published each year in the Academic Regulations (p. 16).

**Academic Dishonesty Policy**

Students that violate the academic honesty policy a second time will be suspended from the College of Engineering for a period of one year.

**Aeronautical & Astronautical Engineering (AAE)**

**AAE 210, INTRODUCTION TO AEROSPACE ENGINEERING, 3 Credits**

Topics will include the engineering fundamentals of aeronautics and astronautics, including an introduction to aerodynamics, propulsion, structures, orbital mechanics and mission planning. Current industry practices in aerospace vehicle specifications, manufacturing, flight testing and certification will be presented.

**Prerequisite**: ENGR 211 with C or better

**AAE 411, AEROSPACE APPLICATIONS IN MECHANICAL ENGINEERING, 4 Credits**

Explores the fundamentals of mechanical engineering applications to aerospace. Features an overview of modern aircraft and spacecraft analysis, with an emphasis on performance, stability, structures, materials, FAA and FAR standards. Applies current professional practices in the conceptual design of aerospace vehicles.

**Prerequisite**: ME 316 (may be taken concurrently) with C- or better

**Equivalent to**: ME 411

**Recommended**: ME 311

**AAE 412, SPACE SYSTEMS ENGINEERING, 4 Credits**

Introduction to space systems engineering. Topics will include the fundamentals of astronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized.

**Prerequisite**: (ME 317 with C or better or ME 317H with C or better) and (ME 373 [C] or ME 373H [C])

**AAE 413, AERO VEHICLES COMPONENTS DESIGN, 4 Credits**

Develop mechanical design of aircraft subcomponents. Analyze and model aircraft components and evaluate their integration on aircraft. Apply real-world aircraft component design project with associated deliverables to customer, including basic requirements for Federal Aviation Administration (FAA) certification.

**Prerequisite**: ME 316 with C or better and ME 317 [C] and ME 331 [C] and ME 373 [C]

**AAE 415, UAV ENGINEERING, 4 Credits**

Develop a strong foundation in Unmanned Aerial Vehicles (UAV) systems technologies. Engineering evaluation of UAV systems, subcomponents, aircraft missions, operations and Federal Aviation Administration (FAA) requirements. Apply actual UAV models and subsystems to a real-world project on UAV deployment for humanitarian and environmental missions. Write a technical report as a team-project, developing and demonstrating critical thinking and engineering reporting skills in the subject. CROSSLISTED as AAE 415/HEST 415.

**Prerequisite**: ME 316 with C or better and ME 317 [C] and ME 331 [C] and ME 373 [C]

**Equivalent to**: HEST 415

**AAE 512, SPACE SYSTEMS ENGINEERING, 4 Credits**

Introduction to space systems engineering. Topics will include the fundamentals of astronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized.

**Recommended**: (ME 373 or ME 373H) and (ME 317 or ME 317H)

**Architectural Engineering (ARE)**

**ARE 301, ARE JUNIOR SEMINAR, 1 Credit**

Professional practices of architectural engineering.

**ARE 352, DESIGN OF ELECTRICAL AND ILLUMINATION SYSTEMS FOR BUILDINGS, 0-4 Credits**

Design of electrical and illumination systems in buildings, including consideration of energy usage.

**Prerequisite**: CEM 471 with C or better
ARE 353, DESIGN OF HVAC SYSTEMS FOR BUILDINGS, 4 Credits
Design and engineering of heating, ventilating, and air conditioning (HVAC) systems in buildings, including consideration of energy usage and indoor environmental conditions.
Prerequisite: CEM 472 with C or better

ARE 418, ARCHITECTURAL ENGINEERING PROFESSIONAL PRACTICE, 4 Credits
Principles and methods of solving architectural engineering problems in a studio setting, with considerations of space, form, function, and technology. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ARE 351 with C or better and ARE 352 [C] and CE 382 [C]

ARE 419, ARCHITECTURAL ENGINEERING DESIGN, 3 Credits
A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of architectural engineering. Use of Building Information Modeling (BIM) in design, construction management, and integration of architectural, structural, mechanical, electrical and lighting systems. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ARE 418 with C or better

ARE 451, ADVANCED BUILDING CONSTRUCTION METHODS, 4 Credits
Advanced building construction methods, including integration of building components in building envelopes. Lec/rec.
Prerequisite: CEM 442 with C or better

ARE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ARE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ARE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ARE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ARE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ARE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ARE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ARE 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Biological & Ecological Engineering (BEE)

BEE 101, ECOLOGICAL ENGINEERING I, 3 Credits
Introduction to engineering at OSU and the field of ecological engineering. Topics include engineering analysis and problem solving, professional ethics, the design process and teamwork.
Recommended: MTH 112

BEE 102, ECOLOGICAL ENGINEERING II, 3 Credits
Introduction to common problems and solutions in ecological engineering, emphasizing the multiplicity of approaches to constraining, analyzing, and resolving challenges of ecosystem management. Two overnight field trips to local ecological monitoring and engineering sites will be required.

BEE 103, ECOLOGICAL ENGINEERING III, 3 Credits
Programming hardware/software for sensing and control with applications in Ecological Engineering. Introduction to computational thinking strategies.

BEE 199, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BEE 221, FUNDAMENTALS OF ECOLOGICAL ENGINEERING, 3 Credits
Introduction to the concepts and practice of ecological engineering. Covers chemical behavior and cycling in the environment, chemical kinetics, and unit processes of conventional treatment systems. Topics are applied to develop ecological treatment alternatives that meet the needs of human societies.

BEE 222, ECOLOGICAL ENGINEERING COMPUTATION, 2 Credits
Develops programming skills in Python, including basic programming tasks, data analysis, data visualization, and optimization, with applications in Ecological Engineering. Builds computational thinking skills.

BEE 270, ECOLOGY FOR ENGINEERS, 3 Credits
The study of ecology in the context of engineering. Develops an understanding of the patterns associated with species distribution in the natural world. Examines the theories of competition, predation, disease and mutualism that help explain the functioning of biological communities. Discusses interactions between abiotic and organismal factors, the environment, and ecological properties and processes.

BEE 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
BEE 311, ECOLOGICAL FLUID MECHANICS, 4 Credits
Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, ecological engineering applications. Lec/rec.
Prerequisite: (PH 212 with C or better or PH 212H with C or better) and (MTH 254 [C] or MTH 254H [C]) and (ENGR 211 [C] or ENGR 211H [C])

BEE 312, ECOHYDRAULICS, 4 Credits
Theory and design of hydraulic systems for ecological engineering applications. Lec/rec.
Prerequisite: BEE 311 with C or better or CE 311 with C or better or CHE 331 with C or better or CHE 331H with C or better

BEE 313, ECOHYDROLOGY, 4 Credits
Provides a quantitative description of fundamental ecohydrologic processes, the interactions of between water and the atmosphere, soils, and plants, as well as techniques for estimating the movement of water in the though ecosystems.
Prerequisite: BEE 312 with C or better and BEE 320 [C]

BEE 320, BIOSYSTEMS ANALYSIS AND MODELING, 4 Credits
An introduction to simulation modeling and analysis of a variety of biological and ecological systems. Systems approaches to describing ecological systems.
Prerequisite: BEE 222 with C or better and (MTH 256 [C] or MTH 256H [C])
Recommended: MTH 256

BEE 322, ECOLOGICAL ENGINEERING THERMODYNAMICS AND TRANSFER PROCESS, 4 Credits
A study of the transport processes of fluid flow, heat transfer and mass transfer applied to biological organisms and ecological systems.
Prerequisite: BEE 320 with C or better

BEE 361, ECOLOGICAL ENGINEERING LABORATORY, 3 Credits
Introduction to modern measurement methods for ecological and environmental applications includes sensors and systems for measuring soil, water and atmospheric properties. No final exam; field trip required. Lec/lab.
Prerequisite: BEE 312 with C or better

BEE 362, ECOLOGICAL ENGINEERING MICROBIAL PROCESSES, 3 Credits
Applies ecological engineering principles to the modeling, analysis and design of microbial processes in the environment.
Prerequisite: BEE 320 with C or better or ENVE 322 with C or better

BEE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BEE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.
BEE 438, ECOLOGICAL SYSTEMS ANALYSIS, 4 Credits
An introduction to sustainability with a focus on case studies that are relevant to biological and ecological engineers. An introduction to tools that perform technical feasibility analysis, economic viability analysis, environmental risk assessment, resource sustainability assessment and life cycle assessment (LCA). Course will consist of theory and case studies highlighting the use of LCA methods to assess sustainability.
Prerequisite: ENGR 391 with C or better or ENGR 391H with C or better

BEE 439, IRRIGATION PRINCIPLES AND PRACTICES, 4 Credits
Survey of irrigation systems, system configurations, factors that influence irrigation efficiency, crop water requirements, energy requirements, pumps, irrigation scheduling. For non-engineers. Lec/lab/rec.
Prerequisite: MTH 111 with C or better
Equivalent to: BRE 439

BEE 446, RIVER ENGINEERING, 4 Credits
Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years.
Prerequisite: BEE 312 with C or better or CE 313 with C or better
Recommended: CE 313

BEE 458, NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL, 3 Credits
Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of Non-Point Source (NPS) pollutants in agricultural and urban environments.
Prerequisite: BEE 313 with C or better or CE 412 with C or better

BEE 468, BIOREMEDIATION ENGINEERING, 4 Credits
Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. Lec/lab.
Prerequisite: BEE 221 with C or better or ENVE 322 with C or better
Available via Ecampus

BEE 469, ^ECOLOGICAL ENGINEERING DESIGN I, 4 Credits
Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: BEE 322 with C or better
Recommended: ENGR 391 or ENGR 391H

BEE 470, ECOLOGICAL ENGINEERING DESIGN II, 4 Credits
Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
Prerequisite: BEE 469 with C or better

BEE 472, INTRODUCTION TO FOOD ENGINEERING PRINCIPLES, 5 Credits
Fundamental engineering principles for scientists and non-process engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of food engineering principles.
Prerequisite: MTH 112 with C or better and (MTH 227 [C] or MTH 251 [C]) or MTH 251H [C] and PH 201 [C]
Equivalent to: BEE 452

BEE 473, INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN, 3 Credits
Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec.
Equivalent to: BEE 453
Recommended: BEE 472 or BEE 572

BEE 481, ^ECOLOGICAL ENGINEERING DESIGN I, 4 Credits
Explores engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: BEE 322 with C or better
Equivalent to: BEE 469

BEE 482, ECOLOGICAL ENGINEERING DESIGN II, 3 Credits
Designs engineering processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
Prerequisite: BEE 481 with C or better
Equivalent to: BEE 469

BEE 483, ECOLOGICAL ENGINEERING DESIGN III, 2 Credits
Designs engineering processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
Prerequisite: BEE 482 with C or better

BEE 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: BEE 499H, BRE 499
This course is repeatable for 16 credits.

BEE 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BEE 499
This course is repeatable for 16 credits.

BEE 501, RESEARCH, 1-16 Credits
Equivalent to: BRE 501
This course is repeatable for 16 credits.
BEE 503, THESIS, 1-16 Credits  
Equivalent to: BRE 503  
This course is repeatable for 999 credits.

BEE 505, READING AND CONFERENCE, 1-16 Credits  
Equivalent to: BRE 505  
This course is repeatable for 16 credits.

BEE 506, PROJECTS, 1-16 Credits  
Equivalent to: BRE 506  
This course is repeatable for 16 credits.

BEE 507, SEMINAR, 1 Credit  
Section 1: Graduate Student Orientation Seminar to acquaint new graduate students with graduate school and departmental requirements, policies and expectations, and departmental research programs.  
Section 2: Graduate Research Publication Seminar to expose students to requirements for successful proposals and publication of research results.  
Section 3: Oral Presentation Improvement--A highly participatory educational effort designed to improve performance in presenting research reports, technical papers and in responding to oral examination questions. Graded P/N.  
Equivalent to: BRE 507  
This course is repeatable for 99 credits.

BEE 511, GLOBAL ENVIRONMENTAL CHANGE: USING DATA TO INFORM DECISIONS, 3 Credits  
Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.  
Available via Ecampus

BEE 512, PHYSICAL HYDROLOGY, 3 Credits  
Principles of hydrologic processes and the integration of these processes into the hydrologic cycle. Topics include atmospheric processes, precipitation and runoff, storm response in streamflow on a watershed scale, and major concepts in groundwater systems.  
Equivalent to: BRE 512  
Recommended: One year of calculus.  
Available via Ecampus

BEE 522, DATA ANALYSIS AND VISUALIZATION USING PYTHON, 3 Credits  
Foundation course in computational thinking and computational skills relevant to data analysis and visualization of environmental data.

BEE 525, STOCHASTIC HYDROLOGY, 3 Credits  
Introduction to fundamental concepts that are needed for stochastic modeling of hydrologic processes in presence of nonstationarity and uncertainty. CROSSLISTED as BEE 525/CE 525.  
Prerequisite: CE 512 with C or better or BEE 512 with C or better  
Equivalent to: CE 525

BEE 529, BIOSYS MODELING TECHNIQUES, 3 Credits  
Development of mathematical models of biological and ecological systems; linear and nonlinear systems analysis; stochastic modeling and random processes; model solution and analysis techniques.

BEE 533, IRRIGATION SYSTEM DESIGN, 4 Credits  
Principles of soil and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years.  
Equivalent to: BRE 533  
Recommended: ENGR 391 or ENGR391H

BEE 538, ECOLOGICAL SYSTEMS ANALYSIS, 4 Credits  
An introduction to sustainability with a focus on case studies that are relevant to biological and ecological engineers. An introduction to tools that perform technical feasibility analysis, economic viability analysis, environmental risk assessment, resource sustainability assessment and life cycle assessment (LCA). Course will consist of theory and case studies highlighting the use of LCA methods to assess sustainability.  
Recommended: ENGR 391 or ENGR391H

BEE 540, ENVIRONMENTAL TRANSPORT PROCESSES, 3 Credits  
Mixing and transport processes in the environment.

BEE 542, VADOSE ZONE TRANSPORT, 4 Credits  
Introduction to the physical and hydraulic properties involved in flow from the soil surface to groundwater. Classical infiltration equations will be derived and presented with exact and approximate solutions. Attention is focused on application to pollutant transport and recent advances in non-ideal flow.  
Equivalent to: BRE 542  
Recommended: MTH 254

BEE 544, OPEN CHANNEL HYDRAULICS, 4 Credits  
Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods. Offered alternate years.  
Equivalent to: BRE 544, CE 544  
Recommended: CE 313

BEE 545, SEDIMENT TRANSPORT, 4 Credits  
Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as BEE 545/FE 545.  
Equivalent to: BRE 545, FE 545  
Recommended: CE 313 or FE 330
BEE 546, RIVER ENGINEERING, 4 Credits
Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years.
Equivalent to: CE 546
Recommended: CE 313

BEE 549, REGIONAL HYDROLOGIC MODELING, 3 Credits
Challenges in regional-scale water resource analysis and management with emphasis on application to production agriculture. Application of geostatistical techniques to spatially variable systems and remote sensing to large-scale water resource systems. Development of soil-water-atmosphere-plant models. Analysis of evapotranspiration estimating methods. Offered alternate years.
Equivalent to: BRE 549
Recommended: BEE 512 and MTH 256

BEE 558, NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL, 3 Credits
Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of Non-Point Source (NPS) pollutants in agricultural and urban environments.
Available via Ecampus

BEE 568, BIOREMEDIATION ENGINEERING, 4 Credits
Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. Lec/lab.
Available via Ecampus

BEE 572, INTRODUCTION TO FOOD ENGINEERING PRINCIPLES, 5 Credits
Fundamental engineering principles for scientists and non-process engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of process engineering principles.
Recommended: MTH 112 and (MTH 227 or MTH 251 or MTH 251H) and PH 201

BEE 573, INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN, 3 Credits
Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec.
Equivalent to: BEE 553
Recommended: BEE 472 or BEE 572

BEE 585, METABOLIC SYSTEMS ENGINEERING, 3 Credits
Quantitative and experimental approaches for describing and engineering biological networks and an introduction to the principles and methodologies of metabolic engineering and synthetic biology.
Equivalent to: BIOE 585
Recommended: Statistics, biology, biochemistry or microbiology.

BEE 586, PROBLEM SOLVING FOR METABOLIC SYSTEMS ENGINEERING, 1 Credit
Corequisites: BEE 585
Recommended: MTH 251 and MTH 252

BEE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BIOE 199, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 340, BIOMEDICAL ENGINEERING PRINCIPLES, 3 Credits
Application of engineering concepts (mass and energy conservation, thermodynamics, and transport phenomena) to cellular- and system-level human physiology; design considerations for biomedical interventions and devices.
Prerequisite: BI 231 with C or better and BI 233 (may be taken concurrently) [C] and CBEE 213 (may be taken concurrently) [C] and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])
Recommended: Completion or concurrent enrollment in BI 233 and (CHE 333 or CHE 333H)
BIOE 351, BIOMATERIALS AND BIOINTERFACES, 3 Credits
Material interactions with human tissue, with emphasis on the role of interfacial chemistry and physics in cell adhesion, infection, blood coagulation and thrombosis. Preparation of functional hydrogels, material coatings, and deritizations, including immobilized bio-active molecules. Issues surrounding regulation of implants and device failure.
Prerequisite: (BB 451 (may be taken concurrently) with C or better or BB 451H (may be taken concurrently) with C or better) and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])

BIOE 399, SPECIAL TOPICS, 0-16 Credits
Equivalent to: BIOE 399H
This course is repeatable for 16 credits.

BIOE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 415, BIOENGINEERING LABORATORY, 3 Credits
Laboratory experimentation with unit operations and processes in bioengineering; preparation of technical reports.
Prerequisite: CBEE 414 with C or better

BIOE 420, SOCIAL JUSTICE, ETHICS, AND ENGINEERING, 3 Credits
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.
Prerequisite: CBEE 320 with C or better

BIOE 440, BIOCONJUGATION, 3 Credits
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.
Prerequisite: BB 450 with C or better

BIOE 445, SURFACE ANALYSIS, 3 Credits
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.
Prerequisite: BIOE 351 (may be taken concurrently) with C or better

BIOE 457, BIOREACTORS, 3 Credits
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Prerequisite: (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

BIOE 459, CELL ENGINEERING, 3 Credits
Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g., cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells.
Prerequisite: (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])
Recommended: BB 451 and CHE 333

BIOE 462, BIOSEPARATIONS, 3 Credits
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.
Prerequisite: (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

BIOE 490, BIOENGINEERING PROCESS DESIGN, 4 Credits
Prerequisite: BIOE 415 with C or better and BIOE 457 [C] and BIOE 462 [C]

BIOE 491, BIOENGINEERING PRODUCT DESIGN, 4 Credits
Design of biomedical and biotechnology-based products by a structured design process that considers customer and regulatory needs.
Prerequisite: BIOE 340 with C or better and (BB 451 [C] or BB 451H [C])

BIOE 492, BIOENGINEERING CAPSTONE DESIGN, 4 Credits
Culminating experience in bioengineering design of processes and devices. Includes capstone project prototyping, testing and documentation, and constraints in ethics, intellectual property, standards, regulatory, and manufacturing.
Prerequisite: BIOE 491 with C or better

BIOE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

BIOE 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 3 credits.
BIOE 511, CELLULAR AND MOLECULAR BIOENGINEERING, 3 Credits
Fundamentals of mammalian cell biology, with an emphasis on biomedical applications and engineering approaches to study and manipulate cells and tissues.

Recommended: A working knowledge of cell biology and biochemistry

BIOE 512, MODELING OF PHYSIOLOGICAL SYSTEMS, 4 Credits
Integration of engineering principles and human physiology in the areas of: transport phenomena in the cardiopulmonary and renal systems, bioelectricity in the nervous system, and mechanics of the musculoskeletal system.

Available via Ecampus

BIOE 520, SOCIAL JUSTICE, ETHICS, AND ENGINEERING, 3 Credits
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.

BIOE 540, BIOCONJUGATION, 3 Credits
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.

Recommended: BB 450

BIOE 545, SURFACE ANALYSIS, 3 Credits
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.

Recommended: BIOE 351

BIOE 557, BIOREACTORS, 3 Credits
Design and analysis of bioreactors using suspension and immobilized microbial cultures.

Recommended: (BB 451 or BB 451H) and (CHE 333 or CHE 333H)

BIOE 562, BIOSEPARATIONS, 3 Credits
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.

Recommended: BB 451 and CHE 332

BIOE 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 603, THESIS, 1-16 Credits
Graded P/N. This course is repeatable for 999 credits.

Chemical, Biological & Environmental Engineering (CBEE)

CBEE 101, CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION, 3 Credits
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies.
Equivalent to: CBEE 101H

CBEE 101H, CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION, 3 Credits
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies.
Attributes: HNRS – Honors Course Designator
Equivalent to: CBEE 101

CBEE 102, ENGINEERING PROBLEM SOLVING AND COMPUTATIONS, 3 Credits
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Prerequisite: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: BIOE 102, CBEE 102H, CHE 102, ENVE 102

CBEE 102H, ENGINEERING PROBLEM SOLVING AND COMPUTATIONS, 3 Credits
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: CBEE 102

CBEE 111, ENGINEERING PROBLEM SOLVING FUNDAMENTALS, 3 Credits
Engineering problem solving, dimensional analysis, sketches and drawings, algorithmic thinking, arrays and indexing, understanding the operating system and file handling, the concepts of programming languages and syntax, troubleshooting approaches to coding. Lec/Studio
This course is repeatable for 3 credits.
CBEE 211, MATERIAL BALANCES AND STOICHIOMETRY, 3 Credits
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: BIOE 211, CBEE 211H, CHE 211, ENVE 211
Recommended: General chemistry and second-year standing in engineering

CBEE 211H, MATERIAL BALANCES AND STOICHIOMETRY, 3 Credits
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: CBEE 211
Recommended: General chemistry and second-year standing in engineering

CBEE 212, ENERGY BALANCES, 3 Credits
Energy balances, thermophysical and thermochemical calculations. Lec/rec.
Prerequisite: (CBEE 211 with C or better or CBEE 211H with C or better) and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: BIOE 212, CBEE 212H, CHE 212, ENVE 212
Recommended: One year general chemistry and second-year standing in engineering

CBEE 212H, ENERGY BALANCES, 3 Credits
Energy balances, thermophysical and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (CBEE 211 with C or better or CBEE 211H with C or better) and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: CBEE 212
Recommended: One year general chemistry and second-year standing in engineering

CBEE 213, PROCESS DATA ANALYSIS, 4 Credits
Applications of material and energy balances, with an emphasis on data analysis important to chemical engineers, bioengineers, and environmental engineers. Contextual learning is emphasized through the laboratory component and the use of process flow simulation modeling and analysis software.
Prerequisite: CBEE 212 (may be taken concurrently) with C or better or CBEE 212H (may be taken concurrently) with C or better
Equivalent to: BIOE 213, CHE 213, ENVE 213

CBEE 280, MATERIAL AND ENERGY BALANCES, 0-6 Credits
Material balances, thermophysical, and thermochemical calculations. Energy balances, thermophysical and thermochemical calculations.
Prerequisite: MTH 256 (may be taken concurrently) with C or better or MTH 256H (may be taken concurrently) with C or better
This course is repeatable for 6 credits.
Available via Ecampus

CBEE 320, PROFESSIONALISM AND ENGINEERING ETHICS, 3 Credits
Introduction to engineering ethics. Topics include ethical theory, professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, risk and safety, loyalty and dissent, as well as overarching professional concerns.
Prerequisite: CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better
Equivalent to: BIOE 320

CBEE 414, ^PROCESS ENGINEERING LABORATORY, 3 Credits
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: BIOE 414, CBEE 414H, CHE 414, CHE 414H, ENVE 414

CBEE 414H, ^PROCESS ENGINEERING LABORATORY, 3 Credits
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisite: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: CBEE 414

CBEE 416, CBBE LABORATORY II, 3 Credits
Integration of overall knowledge of chemical, biological, and environmental engineering through group project activities culminating with public demonstration or display of project results.
Prerequisite: CHE 415 with C or better or CHE 415H with C or better or BIOE 415 with C or better or ENVE 415 with C or better
Equivalent to: CHE 416

CBEE 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 6 credits.

Civil & Construction Engineering (CCE)
CCE 101, CIVIL AND CONSTRUCTION ENGINEERING ORIENTATION, 2 Credits
Introduction to civil and construction engineering professions; problem solving, communication skills. This course is required by the CE, CEM and FE programs.
Equivalent to: CE 101
Recommended: MTH 111 and completion or concurrent enrollment in MTH 112 or MTH 251
CCE 102, CIVIL AND CONSTRUCTION ENGINEERING: PROBLEM-SOLVING AND TECHNOLOGY, 3 Credits
A skills-based course that focuses on introducing freshman students to the use of hand calculation and computer technology in solving civil engineering and construction engineering problems. Topics to be covered include structured approach to problem solving, use of Excel for engineering applications, internet tools and data bases, homework professionalism. Opportunities for involvement with ASCE and AGC student chapters. Lec/lab.
Equivalent to: CE 102
Recommended: Completion or concurrent enrollment in MTH 112 or MTH 251

CCE 201, CIVIL AND CONSTRUCTION ENGINEERING GRAPHICS AND DESIGN, 3 Credits
Introduces the engineering design process and graphic skills that are used by civil and construction engineers. Topics include design process, geometric construction, multiviews, auxiliary views, sections, dimensioning, tolerances and engineering drawing standards. Students participate in team design projects and presentations. Graphic and design projects from the areas of civil and construction engineering. Lec/lab.
Prerequisite: MTH 111 with C or better or MTH 241 (may be taken concurrently) with C or better or MTH 251 (may be taken concurrently) with C or better
Equivalent to: CE 201

CCE 203, INTRODUCTION TO VIRTUAL DESIGN AND CONSTRUCTION, 3 Credits
Basic principles of virtual design and construction (VDC) focusing on skills required for generating design and construction information models. Parametric modeling and design constraints are introduced. Students will utilize construction drawings and documentation to create accurate 3D models. Use of design and construction information models for making estimates of quantities and cost, and for determination of constructability problems. Lec/lab.
Prerequisite: CCE 201 with C or better or ENGR 248 with C or better

CCE 207, CCE SEMINAR, 1 Credit
Professional practices of civil and construction engineering.
Prerequisite: CCE 102 with C or better or ENGR 112 with C or better or CBEE 102 with C or better or NSE 115 with C or better or CS 162 with C or better or BEE 102 with C or better
Recommended: Sophomore standing

CCE 321, CIVIL AND CONSTRUCTION ENGINEERING MATERIALS, 4 Credits
Highway materials; aggregate, concrete and asphalt. Standard test methods.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and (ST 314 [C] or BA 276 [C])
Equivalent to: CCE 321H, CE 321

CCE 422, GREEN BUILDING MATERIALS, 3 Credits
Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material 'green', long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.
Prerequisite: CE 321 with C or better or CCE 321 with C or better
Recommended: (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314
Available via Ecampus

CCE 423, CONCRETE FUNDAMENTALS, 4 Credits
Portland cement hydration, microstructural development, fresh and hardened properties, testing standards, durability, alternative cements.
Prerequisite: CCE 321 with C or better

CCE 424, ASPHALT FUNDAMENTALS, 3 Credits
Focuses on characterization of asphalt materials and mixtures, current laboratory testing technology for asphalt binders and mixes, engineering of asphalt mixes to meet design requirements, asphalt recycling process, environmental impacts of asphalt pavements, and recent developments in asphalt technology.
Prerequisite: CCE 321 with C or better

CCE 520, SELECTED TOPICS IN INFRASTRUCTURE MATERIALS, 0-4 Credits
A critical examination of in-depth topics selected by the instructor from among topics not covered in other infrastructure materials courses.
This course is repeatable for 16 credits.

CCE 522, GREEN BUILDING MATERIALS, 3 Credits
Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material 'green', long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.
Recommended: (CE 321 or CCE 321) and (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314
Available via Ecampus
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CCE 523</td>
<td>CONCRETE FUNDAMENTALS</td>
<td>4</td>
<td>Portland cement hydration, microstructural development, fresh and hardened properties, testing standards, durability, alternative cements. Recommended: CCE 321 or similar introductory materials course or CCE 421</td>
</tr>
<tr>
<td>CCE 524</td>
<td>ASPHALT FUNDAMENTALS</td>
<td>3</td>
<td>Focuses on characterization of asphalt materials and mixtures, current laboratory testing technology for asphalt binders and mixes, engineering of asphalt mixes to meet design requirements, asphalt recycling process, environmental impacts of asphalt pavements, and recent developments in asphalt technology.</td>
</tr>
<tr>
<td>CCE 525</td>
<td>CONSTRUCTION SITE SYSTEMS ENGINEERING</td>
<td>3</td>
<td>Design and planning of construction site field operations and engineered systems. Systems analysis and design as it applies to civil engineering projects. Design of construction systems: blasting; rock crushing and conveying; dewatering; cranes, pile driving, and rigging; and concrete pumping and placement. Construction site design and process design.</td>
</tr>
<tr>
<td>CCE 526</td>
<td>DESIGN FOR SAFETY</td>
<td>3</td>
<td>Theoretical concepts and industry practices used to model, evaluate, and improve construction worker safety through the design of the project features, construction operations, and site safety program elements. Causes of construction site accidents, hazard recognition and comprehension, safety risk valuation and mitigation, and the true costs of injuries and fatalities.</td>
</tr>
<tr>
<td>CCE 528</td>
<td>ADVANCED VIRTUAL DESIGN AND CONSTRUCTION</td>
<td>4</td>
<td>Focusing on the skills and information needed to effectively use an existing Building Information Model (BIM) in plan execution for a building construction project. This is a project based course where students gain knowledge on the implementation of BIM concepts throughout the lifecycle of a building, from planning and design, to construction and operations. Recommended: CCE 203 [D-]</td>
</tr>
<tr>
<td>CCE 529</td>
<td>LEAN CONSTRUCTION</td>
<td>3</td>
<td>Introduction to the basics of lean production management, especially about how they are applied to the AEC industry to improve the operation management and product development. Class topics include theory of manufacturing science, principles of the lean production system, application of production management to project management, variability management in design and construction, improving project performance in the AEC industry, data gathering and process evaluation for productivity improvement.</td>
</tr>
<tr>
<td>CCE 552</td>
<td>PROJECT RISK MANAGEMENT</td>
<td>4</td>
<td>An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as CCE 552/IE 586. Equivalent to: IE 586 Available via Ecampus</td>
</tr>
<tr>
<td>CCE 554</td>
<td>PROFESSIONAL RESPONSIBILITY AND ETHICS</td>
<td>3</td>
<td>An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as CCE 554/IE 589. Equivalent to: IE 589 Available via Ecampus</td>
</tr>
<tr>
<td>CCE 561</td>
<td>HYDROGRAPHIC SURVEYING</td>
<td>3</td>
<td>Covers the fundamentals of hydrographic surveys performed to measure the depth and bottom configuration of water bodies in support of nautical charting and other areas of marine geomatics, as well as marine construction, benthic habitat mapping, marine spatial planning, and bathymetric mapping of rivers and lakes. Topics include underwater acoustics, sound velocity, the sonar equation, types of sonar systems (e.g., single-beam, multibeam, side scan sonar), water levels and tidal datums, positioning and motion sensing for hydrographic surveying, bathymetric lidar, and applications of hydrographic surveying.</td>
</tr>
<tr>
<td>CCE 599</td>
<td>SPECIAL TOPICS</td>
<td>1-16</td>
<td>This course is repeatable for 16 credits.</td>
</tr>
<tr>
<td>CCE 621</td>
<td>DURABILITY AND CONDITION ASSESSMENT OF REINFORCED CONCRETE</td>
<td>4</td>
<td>Concrete durability including freeze-thaw attack, sulfate attack, corrosion, alkali-silica reaction, long-term performance, durability modeling, durability of alternative cements. Non-destructive condition assessment; model-assisted testing; corrosion detection and monitoring; multi-scale assessment; service/remaining life predictions. Prerequisite: CCE 523 with C or better Recommended: CCE 321</td>
</tr>
</tbody>
</table>
CCE 623, CORROSION OF METALS AND CORROSION CONTROL, 4 Credits
Recommended: CH 202 or CH 231 or CH 231H or CCE 321

CCE 624, SERVICE LIFE MODELING OF INFRASTRUCTURE MATERIALS, 4 Credits
Recommended: Undergraduate level calculus and chemistry courses

Civil Engineering (CE)

CE 199, SPECIAL TOPICS, 1-4 Credits

CE 202, CIVIL ENGINEERING: GEOSPATIAL INFORMATION AND GIS, 3 Credits
Introductory design principles presented with the use of GIS and geospatial information (remote sensing, GPS, surveying, and aerial photography) for civil engineering problem solving. Introduction to the integration of geospatial data and analysis for decision making and management for site selection, mitigation, change analysis, modeling and assessment. Standard software and custom programming used in course. Students participate in both individual and team projects and presentations. Projects from the area of civil engineering. Lec/lab.
Prerequisite: CCE 201 with C or better or ENGR 248 with C or better

CE 299, SPECIAL TOPICS, 1-4 Credits
Graded P/N.
Equivalent to: CE 299H

CE 299H, SPECIAL TOPICS, 1-4 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 299

CE 301, CE JUNIOR SEMINAR, 1 Credit
Professional practices of civil engineering.

CE 311, FLUID MECHANICS, 4 Credits
Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, civil engineering applications.
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and PH 213 [C] and ENGR 213 [C] and ENGR 212 [C]

CE 313, HYDRAULIC ENGINEERING, 4 Credits
Analysis of large civil engineering fluid systems including conduit flow, multiple reservoirs, pipe networks, pumps, turbines, open channel flow, and hydraulic structures.
Prerequisite: CE 311 with C or better or CHE 331 with C or better or CHE 331H with C or better

CE 361, SURVEYING THEORY, 4 Credits
Use of surveying equipment, Gaussian error theory applied to measurements, calculations of position on spherical and planar surfaces, state plane coordinate systems, introduction to global positioning systems.
Prerequisite: (CCE 201 with C or better or CE 202 with C or better) and ENGR 213 [C] and PH 213 [C] and ST 314 [C]

CE 365, HIGHWAY LOCATION AND DESIGN, 3 Credits
Curve problems in highway design, including circular, vertical, compound curves and spirals; earth distribution analysis; preliminary office studies; paper location procedures and field layout problems.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 372, GEOTECHNICAL ENGINEERING I, 4 Credits
Basic soil mechanics including the identification and classification of soil, principles of compaction and consolidation, flow through porous media, effective stress, and shear strength. Lec/lab.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better and (CE 311 (may be taken concurrently) [C] or CHE 331H (may be taken concurrently) [C] or CHE 331 (may be taken concurrently) [C] or CHE 331H (may be taken concurrently) [C] and CH 201 [C] and PH 212 [C]

CE 373, GEOTECHNICAL ENGINEERING II, 4 Credits
Application of fundamental soil mechanics principles to analyses of slope stability, retaining structures, and foundation support. Lec/rec.
Prerequisite: CE 372 with C or better or FE 315 with C or better

CE 381, STRUCTURAL THEORY I, 4 Credits
Analysis of statically determinate structures (beams, frames, trusses, arches, and cables). Approximate analysis, influence lines, deflections.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better

CE 382, STRUCTURAL THEORY II, 4 Credits
Analysis of statically indeterminate structures (beams, frames, trusses). Deflections. Energy methods, introduction to matrix methods.
Prerequisite: CE 381 with C or better and (MTH 306 [C] or MTH 306H [C] or (MTH 264 [C] and MTH 265 [C]))

CE 383, DESIGN OF STEEL STRUCTURES, 4 Credits
Introduction to design of steel members, connections and structural systems. Lec/lab.
Prerequisite: CE 382 with C or better
CE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CE 407, SEMINAR, 1-3 Credits
Understanding complexity and systems thinking.
Equivalent to: CE 407H
This course is repeatable for 16 credits.

CE 407H, SEMINAR, 1-3 Credits
Understanding complexity and systems thinking.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 407
This course is repeatable for 16 credits.

CE 408, WORKSHOP, 1-3 Credits
This course is repeatable for 3 credits.

CE 410, INTERNSHIP, 1-12 Credits
This course is repeatable for 16 credits.

CE 411, OCEAN ENGINEERING, 4 Credits
Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design.
Prerequisite: CE 313 with C or better or CEM 311 with C or better

CE 412, HYDROLOGY, 4 Credits
Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.
Prerequisite: CE 313 with C or better

CE 413, GIS IN WATER RESOURCES, 3 Credits
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered.
Recommended: Senior standing or a previous introductory GIS course

CE 415, COASTAL INFRASTRUCTURE, 3 Credits
Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design.
Prerequisite: CE 313 with C or better

CE 417, HYDRAULIC ENGINEERING DESIGN, 4 Credits
Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems.
Prerequisite: CE 313 with C or better

CE 418, ^CIVIL ENGINEERING PROFESSIONAL PRACTICE, 3 Credits
Engineering career paths; ethics and professionalism, project planning, execution and delivery; team building/management; marketing proposals; engineering overseas; dispute resolution; partnering; effective decision making; uncertainty and risk analysis; and current industry design and construction methods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CE 382 with C or better and CE 313 [C] and (CE 372 [C] or FE 315 [C])
Equivalent to: CE 454

CE 419, ^CIVIL INFRASTRUCTURE DESIGN, 3 Credits
A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of civil engineering. Students should have completed ALL other required courses in their degree program prior to registering for this course. Lec/rec.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CE 418 with C or better

CE 420, ENGINEERING PLANNING, 4 Credits
The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; evaluation and optimization. Project management using precedence node diagramming, resource allocation and leveling; time-cost trade-off; and PERT.

CE 424, CONTRACTS AND SPECIFICATIONS, 4 Credits
Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.
Prerequisite: CEM 442 with C or better

CE 427, TEMPORARY CONSTRUCTION STRUCTURES, 4 Credits
Design and construction of temporary structures including formwork, shoring, and earth retaining structures.
Prerequisite: (CE 321 with C or better or CCE 321 with C or better) and (FE 315 [C] or CE 372 [C]) and (CEM 383 [C] or CE 383 [C])
CE 429, OPTIMIZATION IN WATER RESOURCES ENGINEERING, 3 Credits
Introduction to problem formulation and optimization techniques for design of complex water resources systems.
Recommended: CE 412

CE 461, PHOTOGRAMMETRY, 3 Credits
Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 463, CONTROL SURVEYING, 4 Credits
Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 465, OREGON LAND SURVEY LAW, 3 Credits
Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 469, PROPERTY SURVEYS, 3 Credits
U.S. public land survey: restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 471, FOUNDATIONS FOR STRUCTURES, 3 Credits
Criteria, theory, design, and construction for foundations of structures; use of in-situ tests for geotechnical engineering; computer applications.
Prerequisite: CE 373 with C or better or FE 316 with C or better

CE 479, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579.
Prerequisite: CE 373 with C or better or FE 316 with C or better
Equivalent to: FE 479

CE 481, REINFORCED CONCRETE I, 4 Credits
Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices.
Prerequisite: CE 382 with C or better

CE 482, MASONRY DESIGN, 3 Credits
A critical examination in depth of masonry design topics.
Prerequisite: CE 481 with C or better

CE 484, WOOD DESIGN, 4 Credits
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab.
Equivalent to: WSE 458

CE 486, PRESTRESSED CONCRETE, 3 Credits
Prestressed concrete analysis and design, systems of prestressing, materials, economics.
Prerequisite: CE 481 with C or better

CE 489, SEISMIC DESIGN FUNDAMENTALS, 3 Credits
Fundamentals of earthquake engineering, introduction to structural dynamics principles, response spectra, and ASCE 7 design and analysis provisions.
Prerequisite: CE 481 with C- or better and CE 383 [C-]

CE 491, TRANSPORTATION ENGINEERING, 3 Credits
Introduction to transportation engineering systems characteristics, traffic estimation, comprehensive transportation planning, highway economics, driver and vehicle characteristics, highway operations and capacity, signalization and control. Introduction to intelligent transportation.
Prerequisite: CE 392 with C or better and ST 314 [C]

CE 492, PAVEMENT STRUCTURES, 3 Credits
Design and rehabilitation of pavement structures for streets, highways, and airports.
Prerequisite: CE 392 with C or better

CE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

CE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
CE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CE 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

CE 508, WORKSHOP, 1-3 Credits
Graded P/N.
This course is repeatable for 3 credits.

CE 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CE 511, OCEAN ENGINEERING, 4 Credits
Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design. Recommended: CE 313 or CEM 311

CE 512, HYDROLOGY, 4 Credits
Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.

CE 513, GIS IN WATER RESOURCES, 3 Credits
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. Recommended: Senior standing or a previous introductory GIS course

CE 514, GROUNDWATER HYDRAULICS, 4 Credits
Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design of dewatering and contaminant recovery systems. Prerequisite: CE 547 with B or better Equivalent to: BEE 514 Recommended: CE 313 and MTH 252

CE 515, COASTAL INFRASTRUCTURE, 3 Credits
Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design. Recommended: CE 313

CE 516, STORMWATER DESIGN AND MANAGEMENT, 4 Credits
Introduction to urban stormwater drainage systems; urban hydrologic analysis; water quality in urban storm water; design of stormwater control systems; low impact development; storm water monitoring; and computer modeling of urban storm water systems. Prerequisite: CE 512 with C or better or BEE 512 with C or better

CE 517, HYDRAULIC ENGINEERING DESIGN, 4 Credits
Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems. Recommended: CE 313

CE 518, GROUNDWATER MODELING, 4 Credits
Application of numerical methods to the solution of water flow and solute transport through saturated and unsaturated porous media. Analysis of confined and unconfined aquifers. Computer solution of large-scale field problems including groundwater contamination and aquifer yield. Prerequisite: CE 514 with C or better

CE 520, ENGINEERING PLANNING, 4 Credits
The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; and evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 524, CONTRACTS AND SPECIFICATIONS, 4 Credits
Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.

CE 525, STOCHASTIC HYDROLOGY, 3 Credits
Introduction to fundamental concepts that are needed for stochastic modeling of hydrologic processes in presence of nonstationarity and uncertainty. CROSSLISTED as BEE 525/CE 525. Prerequisite: CE 512 with C or better or BEE 512 with C or better Equivalent to: BEE 525

CE 527, TEMPORARY CONSTRUCTION STRUCTURES, 4 Credits
Design and construction of temporary structures including formwork, shoring, and earth retaining structures. Recommended: (CE 321 or CCE 321) and (FE 315 or CE 372) and (CEM 383 or CE 383)

CE 529, OPTIMIZATION IN WATER RESOURCES ENGINEERING, 3 Credits
Introduction to problem formulation and optimization techniques for design of complex water resources systems. Recommended: CE 512 or BEE 512
CE 530, SELECTED TOPICS IN STRUCTURAL ANALYSIS AND MECHANICS, 3 Credits
A critical, in-depth examination of topics selected by the instructor from among topics not covered in other structural analysis and mechanics courses.
Prerequisite: CE 585 with C or better
This course is repeatable for 16 credits.

CE 531, STRUCTURAL MECHANICS, 3 Credits
Theories of failure, multi-axial stress conditions, torsion, shear distortions, energy methods of analysis, beams on elastic foundations. Nonlinear and inelastic behavior.

CE 532, FINITE ELEMENT ANALYSIS, 4 Credits
Applications of the finite element method to structural analysis, fluid flow and elasticity problems. Use and development of large finite element computer programs.
Prerequisite: (CE 585 with C or better or ME 520 with C or better)

CE 533, STRUCTURAL STABILITY, 3 Credits
Stability theory and applications, with emphasis on design of steel structures.
Recommended: CE 383

CE 534, STRUCTURAL DYNAMICS, 4 Credits
Analytical and numerical solutions for single, multi-degree of freedom and continuous vibrating systems. Behavior of structures, dynamic forces and support motions. Seismic response spectra analysis.
Recommended: CE 382

CE 535, INTRODUCTION TO RANDOM VIBRATIONS, 4 Credits
Introduction to probability theory and stochastic processes. Correlation and spectral density functions. Response of linear systems to random excitations. First excursion and fatigue failures. Applications in structural and mechanical system analysis and design.
Prerequisite: CE 534 with C or better or ME 522 with C or better

CE 536, MATRIX METHODS OF STRUCTURAL ANALYSIS, 4 Credits
Equivalent to: CE 585
Recommended: CE 382 with a minimum grade of C
Available via Ecampus

CE 537, NONLINEAR STRUCTURAL ANALYSIS, 4 Credits
Available via Ecampus

CE 538, STRUCTURAL RELIABILITY AND RISK ANALYSIS, 4 Credits
Application of probability and statistics in the reliability-based analysis and design of civil and mechanical engineering systems. Probabilistic modeling of loading and resistance including load and resistance factor design. Introduction to risk analysis and robustness.
Prerequisite: (CE 536 with C or better or ME 520 with C or better)
Recommended: ST 314

CE 540, SPECIAL TOPICS IN HYDRAULIC ENGINEERING, 3-4 Credits
Introduction to the tools and methods employed to characterize hydrologic properties of subsurface systems. Hands-on use of GPR, TDR, resistivity, and methods of determining hydraulic conductivity, sorptivity, bulk density, and other fundamental hydrologic properties.
Equivalent to: BRE 540
This course is repeatable for 16 credits.

CE 543, APPLIED HYDROLOGY, 4 Credits
Advanced treatment of hydrology covering major components of the hydrological cycle with special emphasis on surface water; hydrologic analysis and design of water resource systems; runoff prediction; and simulation of surface water systems. Offered alternate years.
Equivalent to: BRE 543
Recommended: BEE 512 and CE 412

CE 544, OPEN CHANNEL FLOW, 3 Credits
Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods.
Equivalent to: BEE 544, BRE 544
Recommended: (CE 311 and CE 313) or CE 547

CE 547, WATER RESOURCES ENGINEERING I: PRINCIPLES OF FLUID MECHANICS, 4 Credits
Fluid mechanics for water resources engineers, classifications of fluid flows; fluid statics and dynamics, incompressible viscous flows; dimensional analysis; applications to fluid machinery, flow through porous media, fluid motion in rivers, lakes, oceans.

CE 552, ISOLATED SIGNALIZED INTERSECTIONS, 3 Credits
Relationships between signal display, user response, vehicle detection, and signal timing parameters are examined in detail. Traffic simulation is introduced to visualize and design the various elements of isolated signalized intersections.
Recommended: CE 595
CE 553, RAILROAD ENGINEERING, 3 Credits
The principal subject of this course is the railway infra-structure and operational issues related to high speed passenger rail and freight rail (class 1 and regional rail). The course will cover the techniques used to design, construct, monitor and maintain railway track. Class will include field trips.
Corequisites: CE 392

CE 554, DRIVING SIMULATION, 3 Credits
Relationships between the functional elements of driving simulation (simulation computer processing, sensory feedback generation, sensory display devices, and the human operator) are examined in detail. The role of driving simulation in transportation engineering research and practice is also considered in depth. Students will design experiments, analyze and interpret data, and extrapolate simulator results to real-world scenarios.
Recommended: CE 595

CE 556, TRANSPORTATION SAFETY ANALYSIS, 3 Credits
Provides students with a general knowledge of major transportation safety issues and a general background in the application of various statistical and econometric safety analysis techniques. In addition, this course presents a number of model-estimation methods used in transportation safety data analysis, and other subject areas that deal with safety analysis.
Recommended: CE 392 with a minimum grade of C and ST 511

CE 557, NETWORK FLOW ANALYSIS AND OPTIMIZATION, 3 Credits
Acquaints students with the basic elements of operations research through transportation networks, optimal paths in transportation networks, vehicle routing and scheduling problems on networks, facility location problems, transportation network design problems, transportation network flows, and to indicate the directions for future research in this area. Although the course utilizes examples from transportation, the techniques and models are generalizable to other areas of engineering, e.g., water networks, computer networks, energy networks, agricultural, power, telecommunication, etc.
Recommended: CE 392 with a minimum grade of C

CE 560, SELECTED TOPICS IN GEOMATICS ENGINEERING, 0-4 Credits
Selected topics on contemporary problems in geomatics engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for 16 credits.

CE 561, PHOTOGRAMMETRY, 3 Credits
Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras.
Recommended: CE 361 or CEM 263 or FE 208

CE 562, DIGITAL TERRAIN MODELING, 4 Credits
Fundamentals of LIDAR and creating digital terrain models. Computational geometry, Delaunay triangulations, spline interpolations, statistical gridding methods, ground filtering, data optimizations, and advanced topics in 3D modeling.
Recommended: CE 361 or CEM 263 or equivalent surveying or GIS course

CE 563, CONTROL SURVEYING, 4 Credits
Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments.
Recommended: CE 361 or CEM 263 or FE 208

CE 564, GLOBAL NAVIGATION SATELLITE SYSTEM, 4 Credits
Theories and applications of surveying using satellites, focusing on the use of Global Navigation Satellite System (GNSS). The course will begin with the comprehensive overviews of the GNSS, reference and time systems as well as basic orbital mechanics. A description of the satellite signals and the data collected by GNSS receivers will also be covered. Different positioning and navigation techniques for using GNSS data (absolute/relative positioning, static/kinematic positioning, standalone/network based positioning) and different user applications will be reviewed, followed by practices of data collections and processing techniques.
Recommended: CE 361 or CE 202

CE 565, OREGON LAND SURVEY LAW, 3 Credits
Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions.
Recommended: CE 361 or CEM 263 or FE 208

CE 566, 3D LASER SCANNING AND IMAGING, 4 Credits
Fundamentals of lidar acquisition, registration, processing, modeling, analysis, and verification. Use of sensor platforms for 3D acquisition. Effective data management procedures. Introduction to other imaging techniques including structure from motion and structured light. Lec/lab.

CE 567, COASTAL REMOTE SENSING, 4 Credits
Application of remote sensing technologies (e.g., unmanned aircraft systems, multi- and hyperspectral imagery, high-resolution commercial satellite imagery, synthetic-aperture radar, and topographic and bathymetric lidar) to coastal mapping and charting, coastal engineering and coastal zone management. Both the theory and applications of advanced remote sensing technologies are covered. Lec/lab.
Recommended: An undergraduate surveying course, such as CE 361, CEM 263 or FE 208 and some exposure to MATLAB
CE 568, LEAST SQUARES ADJUSTMENTS, 3 Credits
Examines the theory of random error and statistical testing. Discusses the propagation of error in both indirect observations and direct observations from survey. Studies weights of observations and the principles of least squares. Explains how to adjust redundant observations in level nets, horizontal surveys, GNSS networks, and GNSS and terrestrial survey networks by least squares. Estimates the error ellipses of the adjusted observations. Evaluates methods for performing coordinate transformations.
Recommended: CE 361 or CEM 263 or FE 208

CE 569, PROPERTY SURVEYS, 3 Credits
U.S. public land survey; restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy.
Recommended: CE 361 and CEM 263 or FE 208

CE 570, GEOTECHNICAL SPECIAL TOPICS, 1-16 Credits
Development and management of actual projects through the examination of case histories; evaluation of geotechnical data; development of design recommendations and preparation of project reports.
This course is repeatable for 16 credits.

CE 571, ADVANCED FOUNDATION ENGINEERING, 4 Credits
Presents the planning, analysis, and design of shallow and deep foundations from the geotechnical engineering perspective. Topics supporting course objectives include planning and execution of subsurface investigations, interpretation of in-situ tests, analysis and design of deep and shallow foundations, including geotechnical capacity, and immediate settlement. Assessment of deep foundation installation, axial and lateral loading tests, and group effects is presented. Evaluation of foundation performance is conducted under deterministic and probabilistic frameworks.
Recommended: CE 373 and CE 471

CE 572, ADVANCED GEOTECHNICAL LABORATORY, 4 Credits
Examination of soil composition and engineering properties of soils including volume change, pore pressure generation, strength, and deformation behavior of soils in the laboratory. Advanced static and cyclic shear strength testing of soils will also be discussed. Lec/lab.
Recommended: CE 373 and CE 471

CE 575, EARTH RETENTION AND SUPPORT, 4 Credits
Presents the theory and practice of design and construction of earth retaining structures. Topics include rigid and flexible retaining structures, ranging from gravity and cantilever systems, cantilever and anchored sheet piling, tied-back shoring elements, soil nailing, and mechanically stabilized earth walls. These topics are developed with a view on compaction stresses and surface loading, and involves approaches that range from the static equations of equilibrium to empirical rules of thumb.
Recommended: CE 373

CE 576, GROUND IMPROVEMENT, 3 Credits
Presents the analysis and design of ground improvement techniques. Topics supporting course objectives include design for accelerated settlement (surcharge design) with and without pre-fabricated vertical drains, vibro-compaction, vibro-replacement (stone columns) and aggregate piers, deep soil mixing, jet grouting, EPS geofoam, and other improvement techniques for improving soil strength and stability, and limiting deformations and the effects of liquefaction.
Prerequisite: CE 572 with C or better and CE 577 [C]

CE 577, STATIC AND DYNAMIC SOIL BEHAVIOR, 3 Credits
An advanced coverage of volume change and strength behavior of soil. Specific course topics include effective stress, one-dimensional compression of soil, rate of soil consolidation, Mohr circle analysis, shear strength of sands, clays, and silts, and dynamic soil properties, strength, and testing.
Recommended: CE 372 and CE 373

CE 578, GEOTECHNICAL EARTHQUAKE ENGINEERING, 4 Credits
Major course topics include engineering seismology, strong ground motion, seismic hazard analysis, soil dynamics, seismic site response, earthquake motion selection, liquefaction, and seismic slope stability. Attention will be given to earthquakes created by the Cascadia Subduction Zone. Lec/lab.
Recommended: CE 373 and CE 471

CE 579, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579.
Equivalent to: FE 579
Recommended: CE 373 or FE 316

CE 580, SELECTED TOPICS IN STRUCTURAL DESIGN, 3 Credits
A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses.
This course is repeatable for 18 credits.

CE 581, REINFORCED CONCRETE I, 4 Credits
Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices.
Recommended: CE 382

CE 582, MASONRY DESIGN, 3 Credits
A critical examination in depth of masonry design topics.
Recommended: CE 581
CE 583, BRIDGE DESIGN, 3 Credits
AASHTO specifications for bridge design; load models; design for moving loads; design and analysis of bridge decks and simple and continuous bridge spans.
Recommended: Completion of CE 381 and CE 382 and (CE 481 or CE 581) and concurrent enrollment in CE 383

CE 584, WOOD DESIGN, 4 Credits
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSTIZED as CE 584/WSE 558.
Equivalent to: WSE 558
Recommended: CE 383 or CE 481 with a minimum grade of C

CE 586, PRESTRESSED CONCRETE, 3 Credits
Prestressed concrete analysis and design, systems of prestressing, materials, economics.
Recommended: CE 581

CE 589, SEISMIC DESIGN, 4 Credits
Design of structures to resist the effects of earthquakes. Introduction to structural dynamics, dynamic analysis, seismic design philosophy, code requirements, and detailing for steel and reinforced concrete.
Recommended: CE 383 or CE 481

CE 590, SELECTED TOPICS IN TRANSPORTATION ENGINEERING, 1-3 Credits
Selected topics on contemporary problems in transportation engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for 9 credits.

CE 591, TRANSPORTATION SYSTEMS ANALYSIS, PLANNING, AND POLICY, 3 Credits

CE 592, PAVEMENT STRUCTURES, 3 Credits
Design and rehabilitation of pavement structures for streets, highways, and airports.
Recommended: CE 392

CE 593, TRAFFIC FLOW ANALYSIS AND CONTROL, 4 Credits
Traffic operations and control systems; traffic flow theory and stream characteristics; capacity analysis; traffic models and simulation; accident and safety improvement. Offered alternate years.

CE 594, TRANSPORT FACILITY DESIGN, 4 Credits
Location and design of highways, and other surface transportation terminals; design for safety, energy efficiency, and environmental quality. Offered alternate years. Lec/rec.
Recommended: CE 392

CE 595, TRAFFIC OPERATIONS AND DESIGN, 3 Credits
Traffic operations and engineering; human and vehicular characteristics; traffic stream characteristics; highway capacity analysis; intersection operation, control and design.
Recommended: Completion or concurrent enrollment in CE 491

CE 596, PAVEMENT EVALUATION AND MANAGEMENT, 3 Credits
Advanced topics in pavement evaluation techniques and pavement management procedures.
Recommended: CE 492

CE 597, PUBLIC TRANSPORTATION, 3 Credits
Characteristics and nature of public transportation systems, including bus, light and heavy rail; financing policy considerations; planning transit service; managing and operating transit systems for small and large urban areas. Offered alternate years.

CE 598, AIRPORT PLANNING AND DESIGN, 3 Credits
Characteristics and nature of the air transport system. Airport financing, air traffic control. Analysis and design of airports and the airport planning processes. Airport appurtenances. Airport pavement design, environmental facilities and drainage. Offered alternate years.

CE 599, INTELLIGENT TRANSPORTATION SYSTEMS, 3 Credits
Introduction to intelligent transportation systems, including enabling surveillance, navigation, communication and computer technologies. Application of technologies for monitoring, analysis evaluation and prediction of transportation system performance. Intervention strategies, costs and benefits, safety, human factors, institutional issues and case studies. Offered alternate years.
Recommended: CE 491 for new graduate students

CE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
CE 607, OCEAN ENGINEERING SEMINAR, 1 Credit
Presentations from on-campus and off-campus speakers discussing state of technology topics in ocean engineering research, development, and construction. Graded P/N. This course is repeatable for 16 credits.

CE 630, OCEAN WAVE MECHANICS I, 3 Credits
Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiching, and storm surge. CROSSLISTED as CE 630/OC 630.
Equivalent to: CE 630

CE 631, OCEAN WAVE MECHANICS II, 3 Credits
Second in the sequence of ocean wave engineering mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. CROSSLISTED as CE 631/OC 631.
Prerequisite: (CE 630 with C or better or OC 630 with C or better)
Equivalent to: OC 631

CE 634, LONG WAVE MECHANICS, 3 Credits
Theory of long waves. Depth-integrated Euler's equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSLISTED as CE 634/OC 634.
Prerequisite: (CE 630 with C or better and CE 631 [C])
Equivalent to: OC 634
Recommended: OC 670

CE 639, DYNAMICS OF OCEAN STRUCTURES, 3 Credits
Dynamic response of fixed and compliant structures to wind, wave and current loading; Morison equation and diffraction theory for wave and current load modeling, time and frequency domain solution methods; application of spectral and time series analyses; system parameter identification; and stochastic analysis of fatigue and response to extreme loads. Offered alternate years.

CE 640, SELECTED TOPICS IN OCEAN AND COASTAL ENGINEERING, 1-3 Credits
Selected topics on contemporary problems in ocean and coastal engineering; application of ongoing research from resident and visiting faculty. Offered alternate years. This course is repeatable for 9 credits.
Recommended: CE 630

CE 642, RANDOM WAVE MECHANICS, 3 Credits
Random wave theories, probability and statistics of random waves and wave forces, time series analyses of stochastic processes, ocean wave spectra. Offered alternate years.
Prerequisite: CE 630 with C or better

CE 643, COASTAL ENGINEERING, 3 Credits
Coastal sediment transport including nearshore currents, longshore onshore-offshore transport, and shoreline configuration; equilibrium beach profile concept with application to shore protection; shoreline modeling; tidal inlet hydrodynamics and inlet stabilization; design criteria for soft structures. Offered alternate years.
Prerequisite: CE 630 with C or better

CE 645, WAVE FORCES ON STRUCTURES, 3 Credits
Wave forces on small and large members, dimensional analyses and scaling of equations, identification and selection of force coefficients for Morison equation; compatibility of wave kinematics and force coefficients in Morison equation, diffraction and radiation of surface gravity waves by large floating bodies, wavemaker problem, and reciprocity relations.
Prerequisite: CE 630 with C or better

CE 647, OCEAN AND COASTAL ENGINEERING MEASUREMENTS, 3 Credits
Hands-on experience in the conduct of field and laboratory observations, including waves, currents, wind, tides, tsunami, sediments, bathymetry, shore profiles, wave forces on structures, and structural response. Online data archival and retrieval systems.
Prerequisite: CE 630 with C or better

CE 661, KINEMATIC POSITIONING AND NAVIGATION, 3 Credits
Application of Global Navigation Satellite System (GNSS) aided Inertial Navigation Systems (INS) to directly georeference survey data acquired from a moving platform, such as an unmanned aircraft system (UAS), conventional aircraft, survey boat, or all-terrain vehicle. Topics include 3D coordinate transformations, dead-reckoning, inertial navigation, kinematic GNSS, Kalman filtering, and sensor modeling.
Recommended: Undergraduate surveying course, such as CE 361, CE 263 or FE 208, and some exposure to MATLAB

CE 663, GEODESY, 4 Credits
Covers the geometrical aspects of terrestrial and celestial reference systems as well as modern realizations of these coordinate systems. In addition, an introductory level of the physical geodesy is also included, such as gravitational and gravity fields in order to deal with the geoid and heights. From this course, students are expected to understand the core elements of geometric and physical earth, which will assist them to have a solid background for other geospatial related studies.
Recommended: CE 202 or CE 361

CE 808, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.
Construction Engineering Management (CEM)

CEM 263, PLANE SURVEYING, 3 Credits
Use of field surveying equipment; error analysis; plane surveying methods applied to construction; plane coordinate computations; topographic mapping; and introduction to GPS. Lec/lab.
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better

CEM 311, HYDRAULICS, 4 Credits
Pressure and energy concepts of fluids, fluid measurements, flow in pipes and open channels.
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better

CEM 326, CONSTRUCTION SAFETY, 3 Credits
Training in construction safety with emphasis on hazard identification, avoidance, control, and prevention. Lec/rec.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 341, CONSTRUCTION ESTIMATING I, 4 Credits
Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating.
Prerequisite: CEM 442 with C or better
Recommended: CCE 102 and CCE 201

CEM 342, CONSTRUCTION ESTIMATING II, 4 Credits
Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating.
Prerequisite: CEM 341 with C or better

CEM 343, CONSTRUCTION PLANNING AND SCHEDULING, 4 Credits
Principles of construction planning, scheduling, and resource optimization; scheduling techniques and calculations; methods for integrating project resources (materials, equipment, personnel, and money) into the schedule.
Prerequisite: CEM 342 (may be taken concurrently) with C or better

CEM 381, STRUCTURES I, 4 Credits
Introduction to statically determinate analysis and design of steel structures. Lec/rec.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better
Available via Ecampus

CEM 383, STRUCTURES II, 4 Credits
Analysis and design of building elements of concrete and timber; detailing and fabrication. Lec/rec.
Prerequisite: CCE 321 (may be taken concurrently) with C or better and CEM 381 [C]

CEM 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CEM 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CEM 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CEM 407, SEMINAR, 1 Credit
Professional practices of construction engineering management.

CEM 431, OBTAINING CONSTRUCTION CONTRACTS, 4 Credits
Preparation and effectively presenting detailed and complete proposals for the execution of construction projects.
Prerequisite: CEM 341 with C or better
Equivalent to: CEM 432

CEM 432, CONSTRUCTION PROJECT PLANNING, 3 Credits
Planning and preparing cost estimates, schedules, site logistics plans for executing construction projects; presenting written and oral construction proposals.
Prerequisite: CEM 341 with C or better
Equivalent to: CEM 431

CEM 441, HEAVY CIVIL CONSTRUCTION MANAGEMENT, 4 Credits
Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites.
Prerequisite: FE 315 with C or better or CE 372 with C or better

CEM 442, BUILDING CONSTRUCTION MANAGEMENT, 4 Credits
Building construction management and methods.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 443, PROJECT MANAGEMENT FOR CONSTRUCTION, 4 Credits
Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CEM 341 with C or better and CEM 343 [C]

CEM 471, ELECTRICAL FACILITIES, 4 Credits
Principles and applications of electrical components of constructed facilities; basic electrical circuit theory, power, motors, controls, codes, and building distribution systems. Lec/lab.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better
CEM 472, MECHANICAL FACILITIES, 3 Credits
Principles and applications of mechanical components of constructed facilities; heating, ventilating, air conditioning, plumbing, fire protection, and other mechanical construction.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 541, HEAVY CIVIL CONSTRUCTION MANAGEMENT, 4 Credits
Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites.
Recommended: FE 315 or CE 372

CEM 543, PROJECT MANAGEMENT FOR CONSTRUCTION, 4 Credits
Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement.

CEM 550, CONTEMPORARY TOPICS IN CONSTRUCTION ENGINEERING MANAGEMENT, 4 Credits
Contemporary topics of emerging technologies and processes, construction engineering and management, how industry environmental change causes development of new technologies, and the applications of the technologies in the field.

CEM 551, PROJECT CONTROLS, 4 Credits
Advanced methods of project controls including advanced technologies and methodologies for quality, time, and cost management; project management organization models, and intra-organizational relationships.

Chemical Engineering (CHE)
CHE 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: CHE 199H
This course is repeatable for 99 credits.

CHE 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 199

CHE 299, PROFESSIONAL WORKSKILLS, 1-16 Credits
Equivalent to: CHE 299H
This course is repeatable for 99 credits.
Available via Ecampus

CHE 311, THERMODYNAMICS, 3 Credits
Entropy, the second law of thermodynamics, equations of state, and thermodynamic network.
Prerequisite: (CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better) and (MTH 256 [C] or MTH 256H [C])

CHE 312, CHEMICAL ENGINEERING THERMODYNAMICS, 3 Credits
Thermodynamic mixtures, fugacity, phase equilibrium, and chemical reactions equilibrium.
Prerequisite: CHE 311 with C or better

CHE 320, SAFETY, ENGINEERING ETHICS AND PROFESSIONALISM, 3 Credits
Introduction to engineering ethics and safety concepts. Topics include professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, loyalty and dissent, life-long learning, hazard identification, risk and safety, and process safety management. Lec/rec.
Prerequisite: CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better

CHE 331, TRANSPORT PHENOMENA I, 4 Credits
Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment.
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (CHE 212 (may be taken concurrently) [C] or CBEE 212H (may be taken concurrently) [C])
Equivalent to: CHE 323, CHE 331H

CHE 331H, TRANSPORT PHENOMENA I, 4 Credits
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Attributes: HNRS – Honors Course Designator
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (CHE 212 (may be taken concurrently) [C] or CBEE 212H (may be taken concurrently) [C])
Equivalent to: CHE 331

CHE 332, TRANSPORT PHENOMENA II, 3 Credits
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Prerequisite: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332H

CHE 332H, TRANSPORT PHENOMENA II, 3 Credits
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Attributes: HNRS – Honors Course Designator
Prerequisite: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332
**CHE 333, TRANSPORT PHENOMENA III, 3 Credits**
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio.
**Prerequisite:** CHE 331 with C or better or CHE 331H with C or better or CHE 332 with C or better or CHE 332H with C or better
**Equivalent to:** CHE 333H

**CHE 333H, TRANSPORT PHENOMENA III, 3 Credits**
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio.
**Attributes:** HNRS – Honors Course Designator
**Prerequisite:** CHE 331 with C or better or CHE 331H with C or better or CHE 332 with C or better or CHE 332H with C or better
**Equivalent to:** CHE 333

**CHE 334, TRANSPORT PHENOMENA LABORATORY, 3 Credits**
Engineering lab practices and the application of the macroscopic balances of mass, energy, and chemical species; fluid flow, heat and mass transfer experiments by teams for demonstrations of principles established in previous transport phenomena courses.
**Prerequisite:** CBEE 213 (may be taken concurrently) with C or better and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])

**CHE 361, CHEMICAL PROCESS DYNAMICS AND SIMULATION, 3 Credits**
Fundamental principles for process dynamic modeling used in the control of process variables such as pressure, temperature, flow rate and chemical composition.
**Prerequisite:** (MTH 256 with C or better or MTH 256H with C or better) and (CHE 331 [C] or CHE 331H [C])
**Recommended:** CBEE 102 and completion of concurrent enrollment in (CHE 331 or CHE 331H)

**CHE 399, SPECIAL TOPICS, 0-16 Credits**
This course is repeatable for 16 credits.

**CHE 401, RESEARCH, 1-16 Credits**
**Equivalent to:** CHE 401H
This course is repeatable for 16 credits.

**CHE 403, THESIS, 1-16 Credits**
This course is repeatable for 16 credits.

**CHE 405, READING AND CONFERENCE, 1-16 Credits**
**Equivalent to:** CHE 405H
This course is repeatable for 16 credits.

**CHE 405H, READING AND CONFERENCE, 1-16 Credits**
**Attributes:** HNRS – Honors Course Designator
**Equivalent to:** CHE 405
This course is repeatable for 16 credits.

**CHE 406, PROJECTS, 1-16 Credits**
This course is repeatable for 16 credits.

**CHE 408, WORKSHOP, 1-16 Credits**
This course is repeatable for 16 credits.

**CHE 410, INTERNSHIP, 1-16 Credits**
Available via Ecampus

**CHE 411, MASS TRANSFER OPERATIONS, 4 Credits**
Mass transfer operations; design of separation processes. Lec/rec.
**Prerequisite:** CHE 312 with C or better and (CHE 333 [C] or CHE 333H [C])

**CHE 415, CHEMICAL ENGINEERING LABORATORY I, 3 Credits**
Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec.
**Prerequisite:** CBEE 414 with C or better and CHE 411 [C] and CHE 443 [C] and CHE 361 (may be taken concurrently) [C]
**Equivalent to:** CHE 415H, ENVE 415

**CHE 417, INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGINEERING, 4 Credits**
Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
**Prerequisite:** CH 332 with C or better or CH 335 with C or better
**Recommended:** (CH 231 or CH 231H) and (CH 261 or CH 261H) and (CH 232 or CH 232H) and (CH 262 or CH 262H) and (CH 233 or CH 233H) and (CH 263 or CH 263H)

**CHE 431, CHEMICAL PLANT DESIGN I, 3 Credits**
Short-cut techniques and other abbreviated and useful methods for specifying equipment sufficient for the preliminary design of processes and equipment; estimating capital and manufacturing costs based on equipment specifications.
**Prerequisite:** CHE 312 with C or better and CHE 411 [C] and CHE 443 [C]

**CHE 432, CHEMICAL PLANT DESIGN II, 3 Credits**
Transformation of preliminary design to detailed design; introduction to safety, ethical, economical, and environmental considerations in chemical plant design.
**Prerequisite:** CHE 431 with C or better
CHE 443, CHEMICAL REACTION ENGINEERING, 4 Credits
Design of chemical reactors for economical processes and waste minimization. Contacting patterns, kinetics and transport rate effects in single phase and catalytic systems.
**Prerequisite:** CHE 312 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 444, THIN FILM MATERIALS PROCESSING, 4 Credits
Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec.
**Prerequisite:** CHE 443 (may be taken concurrently) with C or better
**Recommended:** CHE 443

CHE 445, POLYMER ENGINEERING AND SCIENCE, 4 Credits
Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec.
**Recommended:** CH 334 and CH 335 and CH 336 and (MTH 256 or MTH 256H) and/or junior standing in engineering or science

CHE 450, CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS, 3 Credits
Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.
**Prerequisite:** CHE 311 (may be taken concurrently) with C or better or ME 311 (may be taken concurrently) with C or better or ME 311H (may be taken concurrently) with C or better or CH 440 (may be taken concurrently) with C or better

CHE 451, SOLAR ENERGY TECHNOLOGIES, 3 Credits
A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems.
**Prerequisite:** CHE 311 (may be taken concurrently) with C or better or ME 311 (may be taken concurrently) with C or better or ME 311H (may be taken concurrently) with C or better or CH 440 (may be taken concurrently) with C or better
**Recommended:** CHE 311

CHE 452, ELECTROCHEMICAL ENERGY SYSTEMS, 3 Credits
Introduces principles and processes of electrochemical energy storage and conversion systems. Topics include fundamentals of electrochemistry and concepts of electrochemical energy storage systems. Examples from batteries, fuel cells, supercapacitors devices will be discussed. Lec/rec.
**Prerequisite:** CHE 311 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 461, PROCESS CONTROL, 3 Credits
Principles of PID feedback control based on models of chemical processes; analysis and implementation of proportional, integral and derivative tuning; cascade, feedforward, ratio and deadtime compensation; multivariable control and control system design issues and methods.
**Prerequisite:** (CHE 331 with C or better or CHE 331H with C or better) and (CHE 332 (may be taken concurrently) [C] or CHE 332H (may be taken concurrently) [C]) and CHE 361 [C]

CHE 499, SPECIAL TOPICS, 0-4 Credits
This course is repeatable for 8 credits.

CHE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CHE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CHE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CHE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CHE 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CHE 514, FLUID FLOW, 4 Credits
Fundamentals of fluid dynamics for Newtonian and non-Newtonian fluids; flow through porous media; two-phase flow. Lec/rec.

CHE 517, INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGINEERING, 4 Credits
Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
**Recommended:** (CH 231 and CH 261 and CH 232 and CH 262 and CH 233 and CH 263)

CHE 520, MASS TRANSFER I, 4 Credits
CHE 525, CHEMICAL ENGINEERING ANALYSIS, 4 Credits
Modeling of physical and chemical processes; mathematical analysis of models with appropriate advanced techniques.

CHE 537, CHEMICAL ENGINEERING THERMODYNAMICS I, 4 Credits
Applications of the fundamental laws of thermodynamics to complex systems. Properties of solutions of non-electrolytes. Phase and chemical equilibrium.

CHE 540, CHEMICAL REACTORS I, 4 Credits
Catalysis, reactions coupled with transport phenomena. Reactors for high tech applications.

CHE 541, CATALYSIS, 3 Credits
Introduction to topics related to catalysts and catalytic reactions. Course covers catalytic reaction mechanisms and kinetics, catalyst characterization and testing, and catalyst preparation and manufacturing processes.

CHE 542, MOLECULAR ASPECTS OF HETEROGENEOUS CATALYSIS, 3 Credits
Introducing the principles of heterogeneous catalysis from the molecular aspect with emphasis on computational molecular approaches and surface science. The role of surface structure in heterogeneous catalytic reactions and surface interactions, development and analysis of reaction kinetics through microkinetic modeling approaches will be covered. A class project will utilize Density Functional Theory software to calculate catalytic properties of model systems.
Prerequisite: CHE 540 with C or better

CHE 544, THIN FILM MATERIALS PROCESSING, 4 Credits
Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization.
Lec/lab/rec.
Recommended: CHE 443 or CHE 543

CHE 545, POLYMER ENGINEERING AND SCIENCE, 4 Credits
Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec.
Recommended: CH 334 and CH 335 and CH 336 and MTH 256

CHE 550, CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS, 3 Credits
Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.
Recommended: CHE 311 or ME 311 or ME 311H

CHE 551, SOLAR ENERGY TECHNOLOGIES, 3 Credits
A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems.
Recommended: CHE 311

CHE 552, ELECTROCHEMICAL ENERGY SYSTEMS, 3 Credits
Introduces principles and processes of electrochemical energy storage and conversion systems. Topics include fundamentals of electrochemistry and concepts of electrochemical energy storage systems. Examples from batteries, fuel cells, supercapacitors devices will be discussed. Lec/rec.
Recommended: CHE 311 AND (CHE 333 or CHE 333H)

CHE 581, SELECTED TOPICS, 3 Credits
Non-sequence course designed to acquaint students with recent advances in chemical engineering. Topics vary from term to term and from year to year. May be repeated for credit.
This course is repeatable for 9 credits.
Available via Ecampus

CHE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CHE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CHE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CHE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CHE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
CHE 611, ELECTRONIC MATERIALS PROCESSING, 3 Credits
Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as CHE 611/ECE 611.
Equivalent to: CHE 571, ECE 611

CHE 612, PROCESS INTEGRATION, 3 Credits
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as CHE 612/ECE 612.
Equivalent to: CHE 572, ECE 612
Recommended: CHE 611 or ECE 611

CHE 613, ELECTRONIC MATERIALS AND CHARACTERIZATION, 3 Credits
Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as CHE 613/ECE 613.
Equivalent to: CHE 573, ECE 613

Computer Science (CS)

CS 101, COMPUTERS: APPLICATIONS AND IMPLICATIONS, 4 Credits
The varieties of computer hardware and software. The effects, positive and negative, of computers on human lives. Ethical implications of information technology. Hands-on experience with a variety of computer applications. Lec/lab.

Available via Ecampus

CS 160, COMPUTER SCIENCE ORIENTATION, 3 Credits
Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Approaches to teaching course topics vary across sections. Lec/lab.
Equivalent to: CS 160H
Available via Ecampus

CS 160H, COMPUTER SCIENCE ORIENTATION, 3 Credits
Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Approaches to teaching course topics vary across sections. Lec/lab.
Attributes: HNRS - Honors Course Designator
Equivalent to: CS 160

CS 161, INTRODUCTION TO COMPUTER SCIENCE I, 4 Credits
Overview of fundamental concepts of computer science. Introduction to problem solving, software engineering, and object-oriented programming. Includes algorithm design and program development. Lec/lab/rec.
Prerequisite: MTH 112 (may be taken concurrently) with C or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 061
Equivalent to: EECS 161
Available via Ecampus

CS 162, INTRODUCTION TO COMPUTER SCIENCE II, 4 Credits
Basic data structures. Computer programming techniques and application of software engineering principles. Introduction to analysis of programs. Lec/lab/rec.
Prerequisite: CS 161 with C or better or EECS 161 with C or better
Equivalent to: EECS 162
Available via Ecampus

CS 165, ACCELERATED INTRODUCTION TO COMPUTER SCIENCE, 8 Credits
Overview of the fundamental concepts of computer science. Introduction to problem solving, algorithm development, data types, and basic data structures. Introduction to analysis of algorithms and principles of software engineering. System development and computer programming using procedural/object-oriented paradigms. Offered via Ecampus only.
Prerequisite: MTH 112 with C or better or Math Placement - ALEKS with a score of 075
Available via Ecampus

CS 175, *COMMUNICATIONS SECURITY AND SOCIAL MOVEMENTS, 3 Credits
Equipping students with the theory and practice of communications security, this course explores how social movements can remain effective in the context of mass surveillance and state repression. Lec/rec. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

CS 195, WEBSITE DESIGN, 4 Credits
How to design and publish a static website using an existing publishing platform: Techniques and tools for designing and publishing on the World Wide Web; hypertext and HTML; site and page design; media integration; issues raised by Internet publishing.
Equivalent to: CS 295
Available via Ecampus

CS 199, SPECIAL TOPICS/COMPUTER SCIENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

CS 201, COMPUTER PROGRAMMING FOR NON-CS MAJORS, 3 Credits
Covers a variety of fundamental topics in computer programming relevant to anyone who wants to write or work with computer code in their work or studies. Teaches basic computational thinking and programming skills which will allow students to solve a variety of real-world problems. In addition, students will learn more advanced topics such as how some basic algorithms work and can be written in computer code.
Prerequisite: MTH 111 with C- or better
Available via Ecampus
CS 225, DISCRETE STRUCTURES IN COMPUTER SCIENCE, 4 Credits
An introduction to the discrete mathematics of computer science, including logic, set and set operations, methods of proof, recursive definitions, combinatorics, and graph theory. (Note: Students may take either MTH 231 or CS 225, but cannot receive credit for both.)
Prerequisite: MTH 111 with C or better or Math Placement Test with a score of 24 or Math Placement - ALEKS with a score of 061 or MTH 112 (may be taken concurrently) with C or better
Available via Ecampus

CS 261, DATA STRUCTURES, 4 Credits
Abstract data types, dynamic arrays, linked lists, trees and graphs, binary search trees, hash tables, storage management, complexity analysis of data structures. Lec/rec.
Prerequisite: (CS 162 with C or better or CS 165 with C or better) and (CS 225 [C] or MTH 231 [C])
Equivalent to: EECS 261
Available via Ecampus

CS 262, PROGRAMMING PROJECTS IN C++, 4 Credits
Learning a second computer programming language. Elements of C++. Object-oriented programming. Experience team work on a large programming project.
Prerequisite: CS 261 with C or better

CS 271, COMPUTER ARCHITECTURE AND ASSEMBLY LANGUAGE, 4 Credits
Introduction to functional organization and operation of digital computers. Coverage of assembly language; addressing, stacks, argument passing, arithmetic operations, decisions, macros, modularization, linkers and debuggers.
Prerequisite: CS 151 with C or better or CS 161 with C or better or CS 165 with C or better
Available via Ecampus

CS 290, WEB DEVELOPMENT, 4 Credits
How to design and implement a multi-tier application using web technologies: Creation of extensive custom client- and server-side code, consistent with achieving a high-quality software architecture.
Prerequisite: CS 162 with C or better or CS 165 with C or better
Equivalent to: CS 494
Available via Ecampus

CS 295, WEBSITE MANAGEMENT, 4 Credits
How to create and promote a dynamic website using existing frameworks/libraries: Designing, developing, publishing, maintaining, and marketing dynamic websites; web security and privacy issues; emerging web technologies; running a website marketing campaign.
Prerequisite: CS 195 with C or better
Recommended: Basic HTML and CSS

CS 299, SPECIAL TOPICS, 0-4 Credits
This course is repeatable for 99 credits.

CS 312, SYSTEM ADMINISTRATION, 4 Credits
Prerequisite: (CS 311 with C or better or CS 344 with C or better) and CS 372 [C]

CS 321, INTRODUCTION TO THEORY OF COMPUTATION, 3 Credits
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321H
Available via Ecampus

CS 321H, INTRODUCTION TO THEORY OF COMPUTATION, 3 Credits
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Attributes: HNRS – Honors Course Designator
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321

CS 325, ANALYSIS OF ALGORITHMS, 4 Credits
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325H
Available via Ecampus

CS 325H, ANALYSIS OF ALGORITHMS, 4 Credits
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Attributes: HNRS – Honors Course Designator
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325

CS 331, INTRODUCTION TO ARTIFICIAL INTELLIGENCE, 4 Credits
Fundamental concepts in artificial intelligence using the unifying theme of an intelligent agent. Topics include agent architectures, search, games, logic and reasoning, and Bayesian networks.
Prerequisite: CS 325 with C or better or CS 325H with C or better

CS 340, INTRODUCTION TO DATABASES, 4 Credits
Design and implementation of relational databases, including data modeling with ER or UML, diagrams, relational schema, SQL queries, relational algebra, user interfaces, and administration.
Prerequisite: CS 290 with C or better
Equivalent to: CS 275
Available via Ecampus
CS 344, OPERATING SYSTEMS I, 4 Credits
Introduction to operating systems using UNIX as the case study. System calls and utilities, fundamentals of processes and interprocess communication.
Prerequisite: CS 261 with C or better and (CS 271 [C] or ECE 271 [C])
Equivalent to: CS 311
Recommended: Experience programming in the C language
Available via Ecampus

CS 352, INTRODUCTION TO USABILITY ENGINEERING, 4 Credits
Basic principles of usability engineering methods for the design and evaluation of software systems. Includes the study of human-machine interactions, user interface characteristics and design strategies, software evaluation methods, and related guidelines and standards.
Prerequisite: CS 151 with C or better or CS 161 with C or better or CS 165 with C or better or CS 295 with C or better or ECE 151 with C or better
Equivalent to: CS 252
Available via Ecampus

CS 361, SOFTWARE ENGINEERING I, 4 Credits
Introduction to the 'front end' of the software engineering lifecycle; requirements analysis and specification; design techniques; project management.
Prerequisite: CS 261 with C or better
Available via Ecampus

CS 362, SOFTWARE ENGINEERING II, 4 Credits
Introduction to the 'back end' of the software engineering lifecycle implementation; verification and validation; debugging; maintenance.
Prerequisite: CS 261 with C or better
Recommended: Experience with object-oriented programming and data structures (e.g., CS 161, CS 162, CS 361)
Available via Ecampus

CS 370, INTRODUCTION TO SECURITY, 4 Credits
Introductory course on computer security with the objective to introduce concepts and principles of computer systems security. Notions of security, basic cryptographic primitives and their applications, basics of authentication and access control, basics of key-management, basics of malware and software security.
Prerequisite: CS 344 (may be taken concurrently) with C or better
Available via Ecampus

CS 372, INTRODUCTION TO COMPUTER NETWORKS, 4 Credits
Computer network principles, fundamental networking concepts, packet-switching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. CROSSLISTED as CS 372/ ECE 372.
Prerequisite: CS 261 with C or better and (ECE 271 [C] or CS 271 [C])
Equivalent to: ECE 372
Recommended: C programming and Unix familiarity.
Available via Ecampus

CS 373, DEFENSE AGAINST THE DARK ARTS, 4 Credits
Introduction to the current state of the art in anti-malware, computer forensics, and networking, messaging, and web security. Broad introduction to the field of computer security.
Prerequisite: CS 344 with C or better and CS 340 [C] and CS 372 [C]
Available via Ecampus

CS 381, PROGRAMMING LANGUAGE FUNDAMENTALS, 4 Credits
An introduction to the concepts found in a variety of programming languages. Programming languages as tools for problem solving. A brief introduction to languages from a number of different paradigms.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Available via Ecampus

CS 391, *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE, 3 Credits
In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: CS 391H, CS 391H
Recommended: CS 101 or computer literacy.
Available via Ecampus

CS 391H, *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE, 3 Credits
In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: CS 391
Recommended: CS 101 or computer literacy

CS 395, WEBSITE MULTIMEDIA, 4 Credits
How to create and deploy interactive digital multimedia through static websites: Technological, aesthetic, and pedagogical issues of communication using interactive multimedia and hypermedia; techniques for authoring interactive multimedia projects using a variety of digital media roots.
Prerequisite: CS 195 with C or better or (ART 120 with C or better and (CS 162 [C] or CS 165 [C]))

CS 399, SPECIAL TOPICS, 0-4 Credits
This course is repeatable for 99 credits.

CS 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CS 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CS 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
CS 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

CS 407, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: CS 407H
This course is repeatable for 16 credits.

CS 407H, SEMINAR, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 407
This course is repeatable for 16 credits.

CS 410, OCCUPATIONAL INTERNSHIP, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

CS 419, SELECTED TOPICS IN COMPUTER SCIENCE, 0-5 Credits
Topics of special and current interest not covered in other courses.
Equivalent to: CS 419H
This course is repeatable for 99 credits.
Available via Ecampus

CS 419H, SELECTED TOPICS IN COMPUTER SCIENCE, 1-5 Credits
Topics of special and current interest not covered in other courses.
Attributes: HNRS – Honors Course Designator
Equivalent to: CS 419
This course is repeatable for 99 credits.

CS 420, GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE, 3 Credits
Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling.
Prerequisite: (CS 325 with C or better or CS 325H with C or better)

CS 427, CRYPTOGRAPHY, 4 Credits
Introduction to the theory and practice of modern cryptography. Fundamental primitives including pseudorandom generators, block ciphers, hash functions. Symmetric-key cryptography for privacy and authenticity. Public-key cryptography based on number-theoretic problems.
Prerequisite: CS 261 with C or better or MTH 355 with C or better
Available via Ecampus

CS 434, MACHINE LEARNING AND DATA MINING, 4 Credits
Introduction to machine learning and data mining algorithms (supervised learning, unsupervised learning, and reinforcement learning) tools that are widely employed in industrial and research settings.
Prerequisite: CS 325 with C or better or CS 325H with C or better

CS 440, DATABASE MANAGEMENT SYSTEMS, 4 Credits
Relational database design, normalization, file structures, disk storage, query processing and optimization, team development of database applications.
Prerequisite: CS 261 with C or better and CS 340 [C]

CS 444, OPERATING SYSTEMS II, 4 Credits
Explores principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking.
Prerequisite: CS 344 with C or better and (CS 271 [C] or ECE 375 [C])
Equivalent to: CS 411

CS 446, NETWORKS IN COMPUTATIONAL BIOLOGY, 3 Credits
Prerequisite: CS 261 with C or better or BOT 476 with C or better
Recommended: Completion or concurrent enrollment in CS 325

CS 447, WIRELESS EMBEDDED SYSTEMS, 4 Credits
A hands-on introduction to programming wireless embedded systems (aka the 'Internet of Things'). Topics include sensors, actuators, state machines, scheduling, wireless communications, time synchronization, localization, fault tolerance, and security related to cyber-physical systems.
Prerequisite: CS 344 with C or better

CS 450, INTRODUCTION TO COMPUTER GRAPHICS, 4 Credits
Theoretical and practical treatment of 3D computer graphics using OpenGL: geometric modeling, transformations, viewing, lighting, texture mapping, shading, rendering, and animation.
Prerequisite: CS 261 with C or better

CS 453, SCIENTIFIC VISUALIZATION, 4 Credits
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization.
Prerequisite: CS 261 with C or better
Recommended: Prior experience with Unix or Windows, programming experience.
CS 457, COMPUTER GRAPHICS SHADERS, 4 Credits
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages.
**Recommended:** Previous graphics pipeline programming experience.

CS 458, INTRODUCTION TO INFORMATION VISUALIZATION, 4 Credits
Tools and techniques for designing, developing, and deploying interactive visualizations of abstract data sources. Discusses techniques based on principles from design, cognitive science, and perceptual psychology. Topics include 1D, 2D, 3D, multivariate representations, time-series, graphs and trees, text and documents, and interaction techniques.
**Prerequisite:** CS 361 with C or better

CS 461, ^SENIOR SOFTWARE ENGINEERING PROJECT I, 3 Credits
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. (Writing Intensive Course)
**Attributes:** CWIC – Core, Skills, WIC
**Prerequisite:** CS 361 with C or better and CS 325 [C] and CS 362 [C]
**Available via Ecampus**

CS 462, ^SENIOR SOFTWARE ENGINEERING PROJECT II, 3 Credits
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. (Writing Intensive Courses)
**Attributes:** CWIC – Core, Skills, WIC
**Prerequisite:** CS 362 with C or better and CS 461 [C]

CS 463, SENIOR SOFTWARE ENGINEERING PROJECT, 2 Credits
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required.
**Prerequisite:** CS 462 with C or better

CS 464, OPEN SOURCE SOFTWARE, 4 Credits
Provides a theoretical foundation of the history, key concepts, technologies, and practices associated with modern Free and Open Source Software (FOSS) projects, and gives students an opportunity to explore and make contributions to FOSS projects with some mentoring and guidance.
**Prerequisite:** CS 261 with C or better and CS 361 [C]
**Available via Ecampus**

CS 466, WEB-BASED START-UP PROJECT, 4 Credits
Real-world, hands-on learning in a high-tech web/mobile-based company environment. Research in the development of product ideas, hypotheses, and business models to create customer experiments. Prototyping and statistical analysis to develop, optimize, and evaluate solutions. Rapid iteration/refactoring based on customer input, web analytics, and user engagement metrics. Offered at OSU-Cascades only.
**Corequisites:** CS 461

CS 467, ONLINE CAPSTONE PROJECT, 4 Credits
Real-world team-based experience with the software engineering design and delivery cycle, including requirements analysis and specification, design techniques, and requirements and final project written documentation. For students in the online CS double-degree program only.
**Prerequisite:** CS 344 with C or better and CS 361 [C] and CS 362 [C]
**Available via Ecampus**

CS 468, INCLUSIVE DESIGN (HCI), 4 Credits
Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer.
**Prerequisite:** CS 352 with C or better
**Recommended:** CS 565 with a minimum grade of C

CS 472, COMPUTER ARCHITECTURE, 4 Credits
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 470/ECE 472 and CS 572/ECE 572.
**Prerequisite:** ECE 375 with C or better
**Equivalent to:** CS 470, ECE 472

CS 475, INTRODUCTION TO PARALLEL PROGRAMMING, 4 Credits
Theoretical and practical survey of parallel programming, including a discussion of parallel architectures, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language.
**Prerequisite:** CS 261 with C or better
**Available via Ecampus**
CS 476, ADVANCED COMPUTER NETWORKING, 4 Credits
Prerequisite: (CS 372 with C or better or ECE 372 with C or better) and (ECE 353 [C] or ST 314 [C] or ST 314H [C])
Equivalent to: ECE 476, EEC 476

CS 477, INTRODUCTION TO DIGITAL FORENSICS, 4 Credits
Introduces concepts related to digital forensics, its role and importance, and tools and techniques for collecting and curating digital evidence. The course will also discuss the role of evidence in the justice system and some legal aspects as they pertain to digital forensics. It will introduce tools and techniques for computer and network forensics.
Prerequisite: CS 344 with C or better and CS 370 [C]
Available via Ecampus

CS 478, NETWORK SECURITY, 4 Credits
Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/TLS, IPSec, firewalls and intrusion detection CROSSLISTED as CS 478/ECE 478.
Prerequisite: CS 372 with C or better or ECE 372 with C or better
Recommended: CS 370
Available via Ecampus

CS 480, TRANSLATORS, 4 Credits
Explores content on the subject of compilers; attribute grammars, syntax-directed translation, lex, yacc, LR(1) parsers, symbol tables, semantic analysis, and peep-hole optimization.
Prerequisite: CS 344 with C or better and CS 381 [C] and (CS 321 [C] or CS 321H [C])

CS 491, COMPUTER SCIENCE SKILLS FOR SIMULATION AND GAME PROGRAMMING, 4 Credits
Game and simulation development is very much a data and math-intensive activity. A certain number of actions must be produced, and producing them by hand is hard. This is a middleware CS course that fills in many of the missing pieces for those wanting to enter the simulation and game development worlds in a software tool-building capacity.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C]) and MTH 252 [C]

CS 492, MOBILE SOFTWARE DEVELOPMENT, 4 Credits
Introduction to concepts and techniques for developing mobile applications. Students will become familiar with modern mobile structure, implementation, development tools, and workflow.
Prerequisite: CS 344 with C or better
Available via Ecampus

CS 493, CLOUD APPLICATION DEVELOPMENT, 4 Credits
Covers developing RESTful cloud services, an approach based on representational state transfer technology, an architectural style and approach to communications used in modern cloud services development.
Prerequisite: CS 290 with C or better and CS 340 [C] and CS 372 [C]
Available via Ecampus

CS 495, INTERACTIVE MULTIMEDIA PROJECTS, 4 Credits
Students apply principles and procedures of digital art, design, communication, and software authoring while working on large integrated media projects.
Recommended: CS 395

CS 496, MOBILE AND CLOUD SOFTWARE DEVELOPMENT, 4 Credits
Introduction to the concepts and techniques for developing mobile and cloud applications.
Prerequisite: CS 344 with C or better or CS 311 with C or better
Recommended: Working knowledge of at least one operating system

CS 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CS 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

CS 503, COMPUTER SCIENCE MS THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CS 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 20 credits.

CS 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

CS 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

CS 510, OCCUPATIONAL INTERNSHIP, 1-4 Credits
This course is repeatable for 99 credits.
Available via Ecampus
CS 511, PROGRAMMING AND DATA STRUCTURES, 4 Credits
Computer programming, problem solving, data structures, object-oriented programming, recursion, sorting, dynamic programming, asymptotic time complexity
Recommended: College algebra, plus the ability to navigate an operating system, manipulate files, and use a command line.
Available via Ecampus

CS 512, DATA SCIENCE TOOLS AND PROGRAMMING, 4 Credits
Accessing and distributing data in the cloud, relational and non-relational databases; map reduction; cloud data processing; load balancing; types of data-stores used in the cloud.
Recommended: CS 511 or an equivalent course or programming experience in a high-level language like Python, Java or C++.
Available via Ecampus

CS 515, ALGORITHMS AND DATA STRUCTURES, 4 Credits
Greedy algorithms, divide and conquer, dynamic programming, network flow, data structures.
Recommended: Undergraduate course in algorithms

CS 516, THEORY OF COMPUTATION AND FORMAL LANGUAGES, 4 Credits

CS 517, THEORY OF COMPUTATION, 4 Credits
Turing machines, decidability, NP-completeness, complexity classes, randomized computation, relativization, circuit complexity, interactive proof systems, lower bounds, cryptography.

CS 519, SELECTED TOPICS IN COMPUTER SCIENCE, 0-5 Credits
Topics of special and current interest not covered in other courses. May not be offered every year.
This course is repeatable for 99 credits.
Available via Ecampus

CS 520, GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE, 3 Credits
Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling.
Recommended: CS 325 and MTH 232

CS 523, ADVANCED ALGORITHMS, 4 Credits
Approximation algorithms, randomized and probabilistic algorithms, online algorithms.
Recommended: CS 515

CS 527, ERROR-CORRECTING CODES, 4 Credits
Hamming codes, linear codes, cyclic codes, BCH and Reed-Solomon codes. Introduction to Galois fields. Encoding and decoding algorithms. Burst error correcting codes, asymmetric and unidirectional codes. Applications of codes for computer systems.
Recommended: Discrete math and probability

CS 529, SELECTED TOPICS IN THEORETICAL COMPUTER SCIENCE, 1-5 Credits
Topics of interest in algorithms and theory of computation. Topics include approximation algorithms, planar graph algorithms, distributed algorithms, combinatorial optimization, computational geometry. This course is repeatable for 99 credits.
Recommended: CS 515

CS 531, ARTIFICIAL INTELLIGENCE, 4 Credits

CS 533, INTELLIGENT AGENTS AND DECISION MAKING, 4 Credits
Recommended: CS 531

CS 534, MACHINE LEARNING, 4 Credits

CS 535, DEEP LEARNING, 4 Credits
Prerequisite: CS 534 with C or better or ROB 537 with C or better
CS 536, PROBABILISTIC GRAPHICAL MODELS, 4 Credits
Representation of probabilistic graphical models, both directed (Bayesian networks) and undirected (Markov networks). Exact and approximate inference techniques. Parameter and structure learning from data.
Recommended: Strong programming skills

CS 537, COMPUTER VISION I, 3 Credits
An introduction to low-level computer vision and visual geometry. Topics of interest include the following: detection of interest points and edges, matching points and edges, color models, projective geometry, camera calibration, epipolar geometry, homography, image stitching, and multitarget tracking.
Recommended: Undergraduate-level statistics, probability, calculus, linear algebra, good programming skills, machine learning or AI

CS 539, SELECTED TOPICS IN ARTIFICIAL INTELLIGENCE, 0-5 Credits
Advanced topics in artificial intelligence. Typical topics include machine learning for sequential and spatial data, knowledge representation and inference, probabilistic modeling of complex systems, data mining and information extraction.
This course is repeatable for 99 credits.

CS 540, DATABASE MANAGEMENT SYSTEMS, 4 Credits
Purpose of database systems, levels of data representation. Entity-relationship model. Relational systems: data definition, data manipulation, query language (SQL), relational calculus and algebra, data dependencies and normal forms. DBTG network model. Query optimization, recovery, concurrency control.
Recommended: CS 261

CS 544, OPERATING SYSTEMS II, 4 Credits
Principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking. Lec/rec.
Equivalent to: CS 511
Recommended: (CS 311 or CS 344) and (CS 271 or ECE 375)

CS 546, NETWORKS IN COMPUTATIONAL BIOLOGY, 3 Credits
Recommended: Completion or concurrent enrollment in CS 325

CS 549, SELECTED TOPICS ON DATA SCIENCE & SYSTEMS, 0-5 Credits
Current topics in data science and systems, e.g., querying, inference, and learning over large datasets; reasoning and learning on graph, heterogeneous, and multi-modal data; data curation; knowledge representation; systems for large data exploration and analytics; distributed data systems; human-centered data science; fairness and responsibility in data science.
This course is repeatable for 99 credits.
Recommended: CS 540

CS 550, INTRODUCTION TO COMPUTER GRAPHICS, 4 Credits
Theoretical and practical treatment of 3D computer graphics using OpenGL: geometric modeling, transformations, viewing, lighting, texture mapping, shading, rendering, and animation.
Recommended: CS 261

CS 551, COMPUTER GRAPHICS, 4 Credits
3-D graphics hardware: Line and polygon scan conversion, modeling transformations, viewing transformations, matrix stacks, hierarchical models, perspective and orthographic projections, visible surface determination, illumination models, shading models, texture mapping, ray tracing.
Recommended: CS 450 or CS 550

CS 552, COMPUTER ANIMATION, 4 Credits
Traditional animation concepts: production pipeline, keyframing implementation, interpolation, point-mass dynamics, spring-mass systems, rigid body dynamics, forward and inverse kinematics, human motion control, motion capture.
Recommended: CS 551

CS 553, SCIENTIFIC VISUALIZATION, 4 Credits
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization.
Recommended: Prior experience with Unix or Windows, programming experience.

CS 554, GEOMETRIC MODELING IN COMPUTER GRAPHICS, 4 Credits
Advanced topics in computer graphics focusing on representation and processing of polygonal models and their application. Surface fundamentals; discrete differential geometry and topology; data structures for representing 3-D surfaces; surface subdivision and smoothing; mesh simplification and multi-resolution representation of 3-D surfaces; geometry compression; surface parameterization; geometry remeshing; topological simplification; implicit surfaces.
Recommended: CS 450
CS 557, COMPUTER GRAPHICS SHADERS, 4 Credits
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages.
Recommended: Previous graphics pipeline programming experience.

CS 559, SELECTED TOPICS IN COMPUTER GRAPHICS AND VISION, 0-5 Credits
Advanced topics in graphics, animation, and vision. Topics include distribution ray tracing, global-illumination, radiosity, image-based modeling and rendering, vision-assisted image and video editing, 3-D vision, 3-D virtual environments, 3-D interaction, control for physical simulation, motion graphs, computational geometry, etc. This course is repeatable for 99 credits.

CS 560, DATA-DRIVEN SOFTWARE ENGINEERING, 4 Credits
An overview of data-driven empirical research methods that can be used to understand the different aspects of software engineering.
Prerequisite: CS 561 with C or better

CS 561, SOFTWARE ENGINEERING METHODS, 4 Credits
Master software engineering methods and supporting tools in the context of agile processes. Teams will engage in all aspects of software development including design, testing, implementation, deployment and maintenance. 3 hours of lecture per week plus one-hour independent lab per week.
Recommended: CS 362

CS 562, SOFTWARE PROJECT MANAGEMENT, 4 Credits
Master software project management with an emphasis on timely, cost-effective delivery of high-quality systems. Learn about existing techniques and supporting tools, with a particular focus on coordination and project management. 3 hours of lecture per week plus one-hour independent lab per week.
Recommended: CS 561

CS 563, SOFTWARE MAINTENANCE AND EVOLUTION, 4 Credits
Contribute to the cutting-edge of software engineering. Learn about existing techniques and supporting tools, with a particular focus on maintenance and evolution. Identify opportunities to support software maintenance and evolution more effectively, by creating new knowledge and supporting systems through research and innovation. 3 hours of lecture per week plus one-hour independent lab per week.
Prerequisite: CS 561 with C or better

CS 564, FIELD STUDIES IN SE AND HCI, 4 Credits
Deals with the type of empirical study known as the 'case' study. These are studies that collect data from natural software development situations as they really occur in the field, in which the researcher does not manipulate or 'control' anything. The course is an end-to-end coverage of the process. Mainly focuses on case studies involving human software developers in the field. The student will conduct a field study as part of this course.

CS 565, HUMAN-COMPUTER INTERACTION, 4 Credits
Basic principles of Human-Computer Interaction (HCI) for the design and evaluation of software systems. Includes research methods for studying human-machine interactions and user interfaces, design strategies, software evaluation methods, and related guidelines and standards.

CS 566, LABORATORY STUDIES IN SE AND HCI, 4 Credits
Empirical lab studies of software development. Covers how to go about designing, preparing for, running, analyzing, and writing-for-publication lab experiments of programming situations involving human subjects. This is an end-to-end coverage of the entire process, and will put students in a position to conduct lab studies of their own with human subjects.

CS 568, INCLUSIVE DESIGN (HCL), 4 Credits
Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer.
Recommended: CS 352 [C] or CS 565 [C]

CS 569, SELECTED TOPICS IN SOFTWARE ENGINEERING, 0-5 Credits
Topics include new programming methodologies, productivity, software development, software complexity metrics.
This course is repeatable for 99 credits.
Recommended: CS 561

CS 570, HIGH PERFORMANCE COMPUTER ARCHITECTURE, 4 Credits
Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as CS 570/ECE 570.
Equivalent to: ECE 570
Recommended: ECE 472 or ECE 572
CS 572, COMPUTER ARCHITECTURE, 4 Credits
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/ECE 472 and CS 572/ECE 572.
Equivalent to: ECE 572
Recommended: ECE 375

CS 575, INTRODUCTION TO PARALLEL PROGRAMMING, 4 Credits
Theoretical and practical survey of parallel programming, including a discussion of parallel architecture, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language.
Available via Ecampus

CS 576, ADVANCED COMPUTER NETWORKING, 4 Credits
Equivalent to: ECE 576
Recommended: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)

CS 578, CYBER-SECURITY, 4 Credits
A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPsec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as CS 578/ECE 578.
Equivalent to: ECE 578

CS 579, TOPICS IN COMPUTER ARCHITECTURE AND PARALLEL PROCESSING, 0-5 Credits
Current topics in advanced computer architecture and parallel processing.
This course is repeatable for 99 credits.
Recommended: CS 575 or CS 572 or ECE 572

CS 581, PROGRAMMING LANGUAGES I, 4 Credits
Graduate-level introduction to functional programming and programming language theory. Strongly typed functional programming in Haskell, abstract syntax and grammars, interpreters, denotational semantics, domain theory, and lambda calculus.

CS 582, PROGRAMMING LANGUAGES II, 4 Credits
Essentials of programming language theory for understanding and conducting programming language research. Dependent type programming in Agda, Coq, or Idris; operational semantics; type systems; unification and type inference.
Prerequisite: CS 581 with C or better

CS 583, ADVANCED FUNCTIONAL PROGRAMMING, 4 Credits
Advanced functional programming concepts and strategies, with a focus on techniques useful for the design and implementation of programming languages. Includes higher-order abstract syntax, functors and monads, generalized algebraic data types, functional data structures, and graph reduction.
Prerequisite: CS 581 with C or better

CS 585, DOMAIN-SPECIFIC LANGUAGES, 4 Credits
Graduate-level introduction to the design and implementation of domain-specific languages (DSLs). Domain analysis; review and revision of language designs; binding constructs to support abstraction; definition of syntax and semantics of DSLs; prototype implementation of embedded DSL.
Prerequisite: CS 581 with C or better

CS 589, SELECTED TOPICS IN PROGRAMMING LANGUAGES, 1-5 Credits
An in-depth examination of a specific topic of interest in programming language design and implementation. Example topics include object-oriented programming, parallel programming, compiler optimization, programming language semantics.
This course is repeatable for 99 credits.

CS 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CS 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

CS 603, COMPUTER SCIENCE PHD THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CS 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CS 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.
CS 637, COMPUTER VISION II, 4 Credits
An introduction to recent advances in visual recognition, including object detection, semantic segmentation, multimodal parsing of images and text, image captioning, face recognition, and human activity recognition. The course covers common formulations of these problems, including energy minimization on graphical models, and supervised machine learning approaches to low- and high-level recognition tasks.
Prerequisite: CS 535 with B+ or better or CS 537 with B- or better
Recommended: CS 519

Electrical & Computer Engineering (ECE)

ECE 111, INTRODUCTION TO ECE: TOOLS, 3 Credits
Introduction to the electrical and computer engineering professional practice. Covers the foundations of engineering problem solving and other skills necessary for success. Students will be taught engineering practice through hands-on approaches. Recommended for electrical and computer engineering majors, and for those interested in engineering as a profession. Lec/lab. Has extra fees.
Recommended: Completion or concurrent enrollment in MTH 111

ECE 112, INTRODUCTION TO ECE: CONCEPTS, 3 Credits
Basic electrical and computer engineering concepts, problem solving and hands-on laboratory project. Topics include electronic circuit and device models, digital logic, circuit analysis, and simulation tools. Lec/lab. Has extra fees.
Prerequisite: MTH 111 with C or better or MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better or Math Placement Test with a score of 23

ECE 199, SPECIAL STUDIES, 0-16 Credits
One-credit section. Graded P/N. This course is repeatable for 16 credits.

ECE 271, DIGITAL LOGIC DESIGN, 3 Credits
A first course in digital logic design. Data types and representations, Boolean algebra, state machines, simplification of switching expressions, and introductory computer arithmetic. Lec/rec.
Prerequisite: MTH 251 (may be taken concurrently) with C or better or MTH 251H (may be taken concurrently) with C or better or MTH 231 (may be taken concurrently) with C or better

ECE 272, DIGITAL LOGIC DESIGN LABORATORY, 1 Credit
This laboratory course accompanies ECE 271, Digital Logic Design. This also illustrates topics covered in the lectures of ECE 271 using computer-aided design, verification tools, and prototyping hardware.
Recommended: Completion or concurrent enrollment in ECE 271

ECE 322, ELECTRONICS I, 3 Credits
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.
Prerequisite: ENGR 203 with C or better
Equivalent to: ECE 322H

ECE 322H, ELECTRONICS I, 3 Credits
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 203 with C or better
Equivalent to: ECE 322

ECE 323, ELECTRONICS II, 3 Credits
Transient operation of MOSFETs and bipolar transistors; multistage amplifiers; frequency response; feedback and stability.
Prerequisite: ECE 322 with C or better

ECE 331, ELECTROMECHANICAL ENERGY CONVERSION, 4 Credits
Energy conversion principles for electric machines. Steady state characteristics of direct current, induction, and synchronous machines. Application of stepper and servo motors and synchronous generators.
Prerequisite: (ENGR 202 with C or better or ENGR 202H with C or better) and MTH 256 [C] and PH 213 [C]

ECE 332, LABORATORY ON ELECTROMECHANICAL ENERGY CONVERSION, 1 Credit
DC, PMAC, and induction machine testing, operation, and control.
Prerequisite: ENGR 202 with C or better or ENGR 202H with C or better
Corequisites: ECE 331

ECE 341, JUNIOR DESIGN I, 3 Credits
Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group.
Prerequisite: CS 261 (may be taken concurrently) with C or better and ENGR 203 [C]

ECE 342, JUNIOR DESIGN II, 3 Credits
Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group.
Prerequisite: ECE 341 with C or better

ECE 351, SIGNALS AND SYSTEMS I, 3 Credits
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis. Lec.
Prerequisite: ENGR 203 with C or better and (MTH 256 [C] or MTH 256H [C])

ECE 352, SIGNALS AND SYSTEMS II, 3 Credits
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis.
Prerequisite: ECE 351 with C or better and (MTH 306 [C] or MTH 306H [C])
ECE 353, INTRODUCTION TO PROBABILITY AND RANDOM SIGNALS, 3 Credits
Explores discrete and continuous probability concepts, single and multiple random variable distributions, expectation, introductory stochastic processes, correlation and power spectral density properties of random signals, random signals through linear filters.
Prerequisite: ECE 351 with C or better

ECE 372, INTRODUCTION TO COMPUTER NETWORKS, 4 Credits
Computer network principles, fundamental networking concepts, packet-switching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. CROSSLISTED as CS 372/ECE 372.
Prerequisite: CS 261 with C or better and (ECE 271 [C] or CS 271 [C])
Equivalent to: CS 372
Recommended: C programming and Unix familiarity.

ECE 375, COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE PROGRAMMING, 4 Credits
Introduction to computer organization, how major components in a computer system function together in executing a program, and assembly language programming. Lec/lab.
Prerequisite: ECE 271 with C or better
Recommended: CS 261 or C/C++ programming

ECE 390, ELECTRIC AND MAGNETIC FIELDS, 4 Credits
Static and quasi-static electric and magnetic fields.
Prerequisite: (MTH 255 with C or better or MTH 255H with C or better) and ENGR 203 (may be taken concurrently) [C] and PH 213 [C]

ECE 391, TRANSMISSION LINES, 3 Credits
Transient and steady-state analysis of transmission line circuits with application to engineering problems.
Prerequisite: ECE 322 (may be taken concurrently) with C or better and ENGR 203 [C] and (MTH 254 [C] or MTH 254H [C]) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ECE 391X

ECE 399, SPECIAL TOPICS, 1-16 Credits
Course work to meet students' needs in advanced or specialized areas and to introduce new, important topics in electrical and computer engineering at the undergraduate (junior/senior) level.
Equivalent to: ECE 399H
This course is repeatable for 16 credits.

ECE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ECE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ECE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ECE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ECE 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ECE 411, ENGINEERING MAGNETICS, 3 Credits
Application of magnetic materials in the design of magnetic devices. Properties of magnetic materials; engineering design of actuators, sensors and data storage devices. Introduction to spintronics.
Prerequisite: ECE 390 with C or better

ECE 413, SENSORS, 3 Credits
Overview of sensor technologies including materials, physics of operation, applications and system integration.
Prerequisite: ECE 323 with C or better and PH 213 [C] and (CH 201 [C] or CH 231 [C]) or (CH 121 [C] and CH 122 [C]) or (CH 231 [C] and CH 261 [C])

ECE 415, MATERIAL SCIENCE OF NANOTECHNOLOGY, 3 Credits
Introductory physical chemistry of solid surfaces, thermodynamics, and kinetics applied to synthesis of nanomaterials such as nanoparticles, nanowires, thin films, carbon nanotubes, fullerenes, graphene, etc. Characterization of nanomaterials, applications of nanomaterials, nanosynthesis techniques, integration of nanotechnology, and emerging nanotechnology topics.
Prerequisite: ECE 416 with C or better or ENGR 321 with C or better or ENGR 321H with C or better

ECE 416, ELECTRONIC MATERIALS AND DEVICES, 4 Credits
Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes.
Prerequisite: ENGR 201 with C or better and PH 213 [C] and (CH 201 [C] or CH 231 [C]) or (CH 121 [C] and CH 122 [C]) or (CH 231 [C] and CH 261 [C])
Equivalent to: ECE 317

ECE 417, BASIC SEMICONDUCTOR DEVICES, 4 Credits
Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec.
Prerequisite: ECE 416 with C or better

ECE 418, SEMICONDUCTOR PROCESSING, 4 Credits
Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec.
Prerequisite: ECE 416 with C or better
ECE 422, CMOS INTEGRATED CIRCUITS I, 4 Credits
Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation.
Prerequisite: ECE 322 with C or better and ECE 323 (may be taken concurrently) [C]

ECE 423, CMOS INTEGRATED CIRCUITS II, 4 Credits
Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion. Lec/lab.
Prerequisite: ECE 422 with C or better

ECE 431, POWER ELECTRONICS, 4 Credits
Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab.
Prerequisite: ECE 322 with C or better and ECE 323 (may be taken concurrently) [C] and ECE 351 [C]
Corequisites: ECE 431

ECE 432, DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION, 4 Credits
Generalized machine theory. Techniques for dynamic analysis of electromechanical machines including arbitrary reference frame theory. Lec/lab.
Prerequisite: ECE 331 with C or better and ENGR 203 [C]

ECE 433, POWER SYSTEM ANALYSIS, 4 Credits
Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis.
Prerequisite: ECE 323 with C or better and ECE 352 [C] and (ENGR 202 [C] or ENGR 202H [C]) and MTH 254 [C] and MTH 306 [C]
Recommended: Three-phase power

ECE 437, SMART GRID, 3 Credits
Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security.
Prerequisite: ECE 433 with C or better
Recommended: Background in power systems analysis equivalent to ECE 433

ECE 438, ELECTRIC AND HYBRID ELECTRIC VEHICLES, 4 Credits
Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls.
Prerequisite: ECE 331 with C or better and ECE 431 [C]

ECE 441, ENGINEERING DESIGN PROJECT, 3 Credits
Exposes problem situations and issues in engineering design similar to those encountered in industry through an extended team design project. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ECE 342 with C or better and WR 327 [C]

ECE 442, ENGINEERING DESIGN PROJECT, 3 Credits
Exposes problem situations and issues in engineering design similar to those encountered in industry through an extended team design project. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ECE 441 with C or better

ECE 443, ENGINEERING DESIGN PROJECT, 2 Credits
Exposes problem situations and issues in engineering design similar to those encountered in industry through an extended team design project. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ECE 442 with C or better

ECE 451, SYSTEMS DYNAMICS AND CONTROL, 4 Credits
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ECE 451/ME 430.
Prerequisite: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C]))
Equivalent to: ME 430, ME 430H
Available via Ecampus

ECE 461, INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS, 4 Credits
Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec.
Prerequisite: ECE 351 with C or better and ECE 352 [C] and ECE 353 [C]

ECE 462, DIGITAL COMMUNICATIONS AND CHANNEL CODING, 4 Credits
Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec.
Prerequisite: ECE 461 with C or better and ECE 351 [C] and ECE 352 [C] and ECE 353 [C]
ECE 463, WIRELESS COMMUNICATIONS NETWORK, 4 Credits

Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffic, RF coverage for a certain propagation environment.) Lec.
Prerequisite: ECE 351 with C or better and ECE 352 [C]
Recommended: Probability background and ECE 461

ECE 464, DIGITAL SIGNAL PROCESSING, 4 Credits

Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures.
Prerequisite: ECE 351 with C or better and ECE 352 [C]

ECE 468, DIGITAL IMAGE PROCESSING, 3 Credits

Introduction to digital image processing including fundamental concepts of visual perception, image sampling and quantization, image enhancement in spatial and frequency domains (through 2D Fourier transform), image restoration, and color image processing. Implementation of algorithms using Matlab Image Processing Toolbox.
Prerequisite: ECE 351 with C or better and ECE 352 [C]

ECE 471, ENERGY-EFFICIENT VLSI DESIGN, 4 Credits

Combinational and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab.
Prerequisite: ECE 271 with C or better and ECE 322 [C] and ECE 323 (may be taken concurrently) [C]

ECE 472, COMPUTER ARCHITECTURE, 4 Credits

Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/ECE 472 and CS 572/ECE 572.
Prerequisite: ECE 375 with C or better
Equivalent to: CS 472

ECE 473, MICROCONTROLLER SYSTEM DESIGN, 4 Credits

Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. Lec/lab.
Prerequisite: ECE 322 with C or better and ECE 375 [C] and CS 261 [C]

ECE 474, VLSI SYSTEM DESIGN, 4 Credits

Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced.
Prerequisite: ECE 322 with C or better and ECE 375 [C]

ECE 476, ADVANCED COMPUTER NETWORKING, 4 Credits

Prerequisite: (CS 372 with C or better or ECE 372 with C or better) and (ECE 353 [C] or ST 314 [C] or ST 314H [C])
Equivalent to: CS 476, EECS 476

ECE 477, MULTIMEDIA SYSTEMS, 4 Credits

Design of multimedia systems used in information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec.
Recommended: ECE 375

ECE 478, NETWORK SECURITY, 4 Credits

Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/TLS, IPSec, firewalls and intrusion detection. CROSSLISTED as CS 478/ECE 478.
Prerequisite: CS 372 with C or better or ECE 372 with C or better
Equivalent to: CS 478
Recommended: CS 370

ECE 482, OPTICAL ELECTRONIC SYSTEMS, 4 Credits

Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582.
Equivalent to: PH 482
Recommended: ECE 391 or (PH 481 or PH 581)
ECE 483, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab.
CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583.
Prerequisite: ECE 391 (may be taken concurrently) with C or better or PH 481 (may be taken concurrently) with C or better
Equivalent to: PH 483

ECE 484, ANTENNAS AND PROPAGATION, 4 Credits
Introduction to antennas and radiowave propagation. Offered alternate years.
Prerequisite: (ECE 390 with C or better and ECE 391 [C])

ECE 485, MICROWAVE DESIGN TECHNIQUES, 4 Credits
Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.
Prerequisite: ECE 390 with C or better and ECE 391 [C]

ECE 499, SPECIAL TOPICS, 0-16 Credits
Course work to meet students’ needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the undergraduate level.
This course is repeatable for 16 credits.

ECE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ECE 503, ECE MS THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ECE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ECE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ECE 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ECE 510, OCCUPATIONAL INTERNSHIP, 1-4 Credits
This course is repeatable for 99 credits.
Available via Ecampus

ECE 516, ELECTRONIC MATERIALS AND DEVICES, 4 Credits
Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes.
Equivalent to: ECE 317
Recommended: ENGR 201

ECE 517, BASIC SEMICONDUCTOR DEVICES, 4 Credits
Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec.
Recommended: ECE 416

ECE 518, SEMICONDUCTOR PROCESSING, 4 Credits
Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec.
Recommended: ECE 416

ECE 520, ANALOG CMOS INTEGRATED CIRCUITS, 4 Credits
Principles and techniques of design of electronic circuits with focus on a design methodology for analog integrated circuits. Practical aspects of using CAD tools in analyzing and laying out circuits will be discussed.

ECE 521, ANALOG CIRCUIT SIMULATION, 4 Credits
Formulation/solution of circuit equations; sparse matrix techniques; DC, transient, sensitivity, noise and Fourier analyses; RF circuit simulation.
Recommended: ECE 423 or ECE 520

ECE 522, CMOS INTEGRATED CIRCUITS I, 4 Credits
Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation.
Recommended: ECE 322 and completion or concurrent enrollment in ECE 323

ECE 523, CMOS INTEGRATED CIRCUITS II, 4 Credits
Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion. Lec/lab.
Recommended: ECE 422 or ECE 522

ECE 530, CONTEMPORARY ENERGY APPLICATIONS, 4 Credits
Contemporary energy issues and applications; fundamental physics of renewable energy sources (e.g. wind, wave, and solar), devices used to harvest energy from these sources, state-of-the-art renewable energy technology, power transmission, transformers, and energy storage.
Recommended: Matlab, basic circuit analysis with RLC components and diode

ECE 531, POWER ELECTRONICS, 4 Credits
Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab.
Recommended: ECE 322 and ECE 351 and completion or concurrent enrollment in ECE 323
ECE 532, DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION, 4 Credits
Generalized machine theory. Techniques for dynamic analysis of electromechanical machines including arbitrary reference frame theory. Lec/lab.
Corequisites: ECE 531
Recommended: ECE 331

ECE 533, POWER SYSTEM ANALYSIS, 4 Credits
Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis.
Recommended: ECE 323 and ECE 352 and three-phase power

ECE 535, ADJUSTABLE SPEED DRIVES AND MOTION CONTROL, 3 Credits
Adjustable speed drives, associated power electronic converters, simulation and control. Lec.
Equivalent to: ECE 647
Recommended: ECE 530

ECE 536, POWER SYSTEM PROTECTION, 3 Credits
Recommended: ECE 433 or ECE 533

ECE 537, SMART GRID, 3 Credits
Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security.
Recommended: Background in power systems analysis equivalent to ECE 433

ECE 538, ELECTRIC AND HYBRID ELECTRIC VEHICLES, 4 Credits
Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls.
Equivalent to: ECE 534
Recommended: ECE 331 and ECE 431

ECE 550, LINEAR SYSTEMS, 4 Credits
Linear dynamic systems theory and modeling.
Recommended: ECE 351 and ECE 352

ECE 560, STOCHASTIC SIGNALS AND SYSTEMS, 4 Credits
Stochastic processes, correlation functions, spectral analysis applicable to communication and control systems.
Recommended: ECE 461 or ECE 561

ECE 561, INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS, 4 Credits
Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec.
Recommended: ECE 351 and ECE 352 and ECE 353

ECE 562, DIGITAL COMMUNICATIONS AND CHANNEL CODING, 4 Credits
Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec.
Recommended: ECE 461 and ECE 351 and ECE 352 and ECE 353

ECE 563, WIRELESS COMMUNICATIONS NETWORK, 4 Credits
Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffics, RF coverage for a certain propagation environment.) Lec.
Recommended: Probability background and ECE 461

ECE 564, DIGITAL SIGNAL PROCESSING, 4 Credits
Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures.
Recommended: ECE 351 and ECE 352

ECE 565, ESTIMATION, FILTERING, AND DETECTION, 4 Credits
Principles of estimation, linear filtering, and detection.
Recommended: ECE 353

ECE 566, INFORMATION THEORY, 4 Credits
Introduction to information theory: entropy, differential entropy, entropy rates, mutual information, data compression, channel capacity, source coding, channel coding, network information theory.
Recommended: ECE 353 and strong mathematical background
ECE 569, CONVEX OPTIMIZATION, 4 Credits
Introduces the fundamental concepts, theories of convex and nonconvex optimization, and the algorithmic solutions as well as applications to many research disciplines including signal processing, networking, communications, and machine learning. Emphasis will be on (i) convex analysis and optimality conditions, (ii) first-order large-scale algorithms (gradient, proximal gradient, ADMM, Frank-Wolfe, stochastic gradient, block coordinate descent), and (iii) convergence analysis. Recommended: Linear algebra and ECE 599 Matrix Analysis for Signal Processing

ECE 570, HIGH PERFORMANCE COMPUTER ARCHITECTURE, 4 Credits
Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as CS 570/ECE 570. Equivalent to: CS 570 Recommended: ECE 472 or ECE 572

ECE 571, ENERGY-EFFICIENT VLSI DESIGN, 4 Credits
Combinational and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency and scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab. Recommended: ECE 271 and ECE 322 and completion or concurrent enrollment in ECE 323 (all with a minimum grade of C)

ECE 572, COMPUTER ARCHITECTURE, 4 Credits
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/ECE 472 and CS 572/ECE 572. Equivalent to: CS 572 Recommended: ECE 375

ECE 573, MICROCONTROLLER SYSTEM DESIGN, 4 Credits
Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. Lec/lab. Equivalent to: ECE 571 Recommended: ECE 322 and ECE 375 and CS 261

ECE 574, VLSI SYSTEM DESIGN, 4 Credits
Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced. Recommended: ECE 322 or ECE 375

ECE 576, ADVANCED COMPUTER NETWORKING, 4 Credits
Advanced networking concepts: source/channel coding, queuing theory, router design, network architectures (Intserv, Diffserv, MPLS), multimedia protocols (TFRC, RTP), overlay networks, and wireless standards (Bluetooth 802.11b, 3/4G). CROSSLISTED as CS 476/ECE 476 and CS 576/ECE 576. Equivalent to: CS 576, ECE 566 Recommended: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)

ECE 577, MULTIMEDIA SYSTEMS, 4 Credits
Design of multimedia systems for information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec. Recommended: ECE 375

ECE 578, CYBER-SECURITY, 4 Credits
A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPsec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as CS 578/ECE 578. Equivalent to: CS 578

ECE 580, NETWORK THEORY, 4 Credits
Linear graphs, multiport networks, and other topics in advanced network theory.

ECE 582, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582. Equivalent to: PH 582 Recommended: PH 481 or PH 581

ECE 583, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583. Equivalent to: PH 583 Recommended: Completion or concurrent enrollment in (ECE 391 or PH 481 or PH 581)

ECE 584, ANTENNAS AND PROPAGATION, 4 Credits
Introduction to antennas and radiowave propagation. Offered alternate years.
ECE 585, MICROWAVE DESIGN TECHNIQUES, 4 Credits
Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.

ECE 590, ANALYTICAL TECHNIQUES IN ELECTROMAGNETIC FIELDS, 4 Credits
Basic analytical techniques required to solve meaningful field problems in engineering.

ECE 591, ADVANCED ELECTROMAGNETICS, 3 Credits
Advanced techniques for analyzing problems in electromagnetics, primarily numerical. Offered alternate years.
Recommended: ECE 590

ECE 593, RF MICROWAVE CIRCUIT DESIGN, 3 Credits
Active/passive RF and microwave circuit design with emphasis to wireless systems.
Recommended: ECE 390 and ECE 391

ECE 599, SPECIAL TOPICS, 0-16 Credits
Course work to meet students’ needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the graduate level.
This course is repeatable for 99 credits.

ECE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ECE 603, ECE PhD THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ECE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ECE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ECE 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ECE 611, ELECTRONIC MATERIALS PROCESSING, 3 Credits
Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as CHE 611/ECE 611.
Equivalent to: CHE 611, ECE 511

ECE 612, PROCESS INTEGRATION, 3 Credits
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as CHE 612/ECE 612.
Equivalent to: CHE 612, ECE 512
Recommended: ECE 611 or CHE 611

ECE 613, ELECTRONIC MATERIALS AND CHARACTERIZATION, 3 Credits
Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as CHE 613/ECE 613.
Equivalent to: CHE 613, ECE 513

ECE 614, SEMICONDUCTORS, 3 Credits
Essential aspects of semiconductor physics relevant for an advanced understanding of semiconductor materials and devices. Offered alternate years.
Equivalent to: ECE 514
Recommended: Exposure to quantum mechanics and solid state physics.

ECE 615, SEMICONDUCTOR DEVICES I, 3 Credits
Advanced treatment of two-terminal semiconductor electronic devices. Offered alternate years.
Equivalent to: ECE 515
Recommended: ECE 614

ECE 616, SEMICONDUCTOR DEVICES II, 3 Credits
Advanced treatment of three-terminal semiconductor electronic devices. Offered alternate years.
Equivalent to: ECE 516
Recommended: ECE 615

ECE 617, THIN FILM TRANSISTORS, 4 Credits
Thin-film electronics typically necessitate semiconducting materials lacking long-range order (disordered semiconductors), and hence provide a range of challenges and opportunities for device engineers. Provides a comprehensive review of the device physics and materials science of thin film electronics – in particular thin-film transistors. Provides students with the theoretical and practical knowledge to be successful in the development and study of thin film transistors, in both academic and industrial environments.
Recommended: ECE 390, ECE 416/ECE516, ECE 417/ECE 517, ECE 614

ECE 619, SELECTED TOPICS IN SOLID STATE, 3 Credits
Special courses taught on various topics in solid state as interests and demands vary.
This course is repeatable for 99 credits.

ECE 621, RADIO FREQUENCY IC DESIGN, 3 Credits
Radio frequency (RF) circuits. Principles, analysis, and design of bipolar and MOS RF IC building blocks: low noise amplifiers, mixers, oscillators, frequency synthesizers.
Recommended: (ECE 422 or ECE 522) and (ECE 423 or ECE 523) or ECE 520

ECE 626, ANALOG CMOS CIRCUIT DESIGN, 3 Credits
Switched-capacitor circuit design, on-chip filters, data converters. Practical aspects of analog CMOS IC design.
ECE 627, OVERSAMPLED DELTA-SIGMA DATA CONVERTERS, 3 Credits
Noise-shaping theory in first, second, and higher-order modulators. Design, simulation, and realization in hardware of converters using this popular architecture.

ECE 629, SELECTED TOPICS IN MICROELECTRONICS, 3 Credits
Course work to meet student's needs in advanced or specialized areas and to introduce the newest important results in microelectronics.

ECE 659, SELECTED TOPICS IN SYSTEMS AND CONTROL, 3 Credits
Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in systems and control. This course is repeatable for 18 credits.

ECE 669, SELECTED TOPICS IN COMMUNICATIONS AND SIGNAL PROCESSING, 3 Credits
Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in signal processing. This course is repeatable for 18 credits.

ECE 679, SELECTED TOPICS IN COMPUTER ENGINEERING, 1-16 Credits
Topics to be presented at various times include information storage and retrieval, computer architecture, fault-tolerant computing, asynchronous sequential circuits, automata, data transmission, coding theory. This course is repeatable for 99 credits.

ECE 699, SPECIAL TOPICS, 3 Credits
Advanced studies in field and wave theories and special devices. Topic examples are microwave and acoustic devices, advanced lasers and masers, electron beam interactions with traveling waves, MHD device dynamics. This course is repeatable for 99 credits.

Engineering Science (ENGR)
ENGR 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

ENGR 101, DESIGN OF COFFEE, 2 Credits
Roast coffee beans and brew and taste coffee while using engineering design to create the perfect cup of coffee using the least amount of electricity. Lec/rec. Available via Ecampus.

ENGR 111, ENGINEERING ORIENTATION I, 3 Credits
Engineering as a profession, historical development, ethics, curricula and engineering careers. Introduction to problem analysis and solution, data collection, accuracy and variability. Lec/rec.
Equivalent to: ENGR 111H

ENGR 112, INTRODUCTION TO ENGINEERING COMPUTING, 3 Credits
Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.
Equivalent to: ENGR 112H, ENGR 112H
Available via Ecampus

ENGR 112H, INTRODUCTION TO ENGINEERING COMPUTING, 3 Credits
Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 112

ENGR 199, SPECIAL TOPICS, 0-16 Credits
Graded P/N.
Equivalent to: ENGR 199H
This course is repeatable for 16 credits.

ENGR 201, ELECTRICAL FUNDAMENTALS I, 3 Credits
Prerequisite: (MTH 251 with C or better or MTH 251H with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: ENGR 201H
Available via Ecampus

ENGR 201H, ELECTRICAL FUNDAMENTALS I, 3 Credits
Attributes: HNRS – Honors Course Designator
Prerequisite: (MTH 251 with C or better or MTH 251H with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: ENGR 201

ENGR 202, ELECTRICAL FUNDAMENTALS II, 3 Credits
Sinusoidal steady-state analysis and phasors. Application of circuit analysis to solve single-phase and three-phase circuits including power, mutual inductance, transformers and passive filters. Lec/lab.
Prerequisite: ENGR 201 with C or better or ENGR 201H with C or better
Equivalent to: ENGR 202H
Available via Ecampus
ENGR 203, ELECTRICAL FUNDAMENTALS III, 3 Credits
Laplace transforms, Fourier series, Bode plots, and their application to circuit analysis.
Prerequisite: (ENGR 201 with C or better or ENGR 201H with C or better) and (ENGR 202 [C] or ENGR 202H [C]) and (MTH 256 [C] or MTH 256H [C])

ENGR 211, STATICS, 3 Credits
Analysis of forces induced in structures and machines by various types of loading. Lec/rec.
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: ENGR 211
Available via Ecampus

ENGR 211H, STATICS, 3 Credits
Analysis of forces induced in structures and machines by various types of loading. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: ENGR 211

ENGR 212, DYNAMICS, 3 Credits
Kinematics, Newton’s laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec.
Prerequisite: (ENGR 211 with C or better or ENGR 211H with C or better) and (PH 211 [C] or PH 211H [C])
Equivalent to: ENGR 212

ENGR 212H, DYNAMICS, 3 Credits
Kinematics, Newton’s laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 211 with C or better or ENGR 211H with C or better) and (PH 211 [C] or PH 211H [C])
Equivalent to: ENGR 212

ENGR 213, STRENGTH OF MATERIALS, 3 Credits
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec.
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better
Equivalent to: ENGR 213

ENGR 213H, STRENGTH OF MATERIALS, 3 Credits
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better
Equivalent to: ENGR 213

ENGR 221, THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY, 3 Credits
Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSLISTED as ENG 221/ MATS 221.
Equivalent to: MATS 221
Recommended: One year of college science.

ENGR 248, ENGINEERING GRAPHICS AND 3-D MODELING, 3 Credits
Introduction to graphical communication theory, including freehand sketching techniques, geometric construction, multi-view, pictorial, sectional and auxiliary view representation and dimensioning techniques. Practical application of theoretical concepts using solid modeling software to capture design intent and generate engineering drawings. Lec/Lab.
Available via Ecampus

ENGR 299, SPECIAL TOPICS, 0-16 Credits
Equivalent to: ENGR 299H
This course is repeatable for 16 credits.

ENGR 299H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 299
This course is repeatable for 16 credits.

ENGR 350, *SUSTAINABLE ENGINEERING, 3 Credits
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ENGR 350H
Available via Ecampus

ENGR 350H, *SUSTAINABLE ENGINEERING, 3 Credits
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 350
ENGR 352, *CREATIVE COLLABORATION: DESIGNING AND BUILDING, 3 Credits
Working in multi-disciplinary teams, design, implement, and document a piece of public art work or science museum display. Projects may be made of any media, but must demonstrate creativity both in the engineering used to create them and the technology and society message they convey. CROSSLISTED as ART 352/ENGR 352. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: ART 352

ENGR 363, *ENERGY MATTERS, 3 Credits
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy use and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ENGR 363H
Recommended: MTH 112 or higher

ENGR 363H, *ENERGY MATTERS, 3 Credits
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 363
Recommended: MTH 112 or higher

ENGR 390, ENGINEERING ECONOMY, 3 Credits
Time value of money; economic study techniques, depreciation, taxes, retirement, and replacement of engineering facilities.
Available via Ecampus

ENGR 391, ENGINEERING ECONOMICS AND PROJECT MANAGEMENT, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Equivalent to: ENGR 391H
Available via Ecampus

ENGR 391H, ENGINEERING ECONOMICS AND PROJECT MANAGEMENT, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 391

ENGR 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: ENGR 399H
This course is repeatable for 16 credits.
Available via Ecampus

ENGR 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 399
This course is repeatable for 16 credits.

ENGR 407, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: ENGR 407H
This course is repeatable for 16 credits.

ENGR 407H, SEMINAR, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 407
This course is repeatable for 16 credits.

ENGR 415, ^ENGINEERING CAPSTONE DESIGN I, 4 Credits
Utilizes engineering methodologies in a team environment to develop real-world solutions to an engineering problem. Develops all phases of system development, including project planning, requirements analysis, design, testing, configuration management, quality assurance, documentation, and delivery. First course/term of a two term design project.
Attributes: CWIC – Core, Skills, WIC

ENGR 416, ^ENGINEERING CAPSTONE DESIGN II, 4 Credits
Utilizes engineering methodologies in a team environment to develop real-world solutions to an engineering problem. Teams will be responsible for all phases of system development, including project planning, requirements analysis, design, testing, configuration management, quality assurance, documentation, and delivery. Second course/term of a two term design project.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ENGR 415 with C- or better

ENGR 450, PROFESSIONAL PREPARATION FOR BEGINNING LEVEL ENGINEERS, 1 Credit
Practical training on professional skills essential for a career as a practicing engineer. Covers development of networking and interviewing skills, preparation of a resume, job search strategies and guidance on future professional development.

ENGR 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: ENGR 499H
This course is repeatable for 16 credits.
ENGR 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 499
This course is repeatable for 16 credits.

ENGR 520, MENG INTRODUCTION TO PORTFOLIO, 1 Credit
Explores OSU resources, Graduate School, and College of Engineering requirements to prepare for work on an MEng final portfolio. Engages in writing skills necessary to complete the final portfolio. Investigates communication styles, Imposter Syndrome, understanding and coping mechanisms, and professional ethics as they relate to an MEng final portfolio.

ENGR 521, MENG PORTFOLIO COMPLETION, 1 Credit
Demonstrate how graduate learning outcomes have been met. Formulate clear and reasonable professional goals and articulate how the program has helped prepare for achievement of those goals. Create a final portfolio document summarizing core knowledge and its integration with other fields.
Prerequisite: ENGR 520 with C or better

ENGR 531, APPLIED IMAGING AND IMAGE PROCESSING, 3 Credits
Explore image formats, storage issues, characteristics and significance of histograms; define and explain image artifacts such as random and periodic noise. Implement different image processing operations such as filters, registration, and mathematical algorithms to enhance an image and facilitate subsequent segmentation such as histogram thresholding, cluster analysis, watershed analysis, etc. Make quantitative measurements from images, such as length, area, orientation, connectivity, anisotropy, and perimeter of objects, as well as porosities, surface areas and curvatures. Apply advanced image analysis via skeletonization, morphological/ topological analysis, surface generation/ triangulation etc.
This course is repeatable for 3 credits.
Recommended: Introductory preparation in mathematical analysis, vectors, matrices, probability, statistics, linear systems, and computer programming

ENGR 550, PROFESSIONAL PREPARATION FOR ENGINEERS, 1 Credit
Practical training on professional skills essential for a career as a practicing engineer. Covers development of networking and interviewing skills, preparation of a resume and related online media, and guidance on future professional development. As this is a graduate-level course, it will include guidance on how students can develop and present themselves in ways that differentiate their abilities from those of more junior engineers. Available via Ecampus

ENGR 555, FOUNDATIONS OF ENGINEERING EDUCATION RESEARCH AND PRACTICE, 3 Credits
An examination as to why engineering education is practiced and researched the way that it is through reading, discussion and writing. The focus of the course will be on written and verbal interactions informed by careful reading of assigned texts.

ENGR 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Environmental Engineering (ENVE)
ENVE 199, SPECIAL TOPICS, 0-16 Credits
Equivalent to: ENVE 199H
This course is repeatable for 16 credits.

ENVE 299, SPECIAL TOPICS, 0-16 Credits
Equivalent to: ENVE 299H
This course is repeatable for 16 credits.

ENVE 299H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENVE 299
This course is repeatable for 16 credits.

ENVE 321, ENVIRONMENTAL ENGINEERING FUNDAMENTALS, 4 Credits
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution.
Prerequisite: MTH 256 with C or better or MTH 256H with C or better

ENVE 322, FUNDAMENTALS OF ENVIRONMENTAL ENGINEERING, 4 Credits
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution.
Prerequisite: ((CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 225H with C or better) and (MTH 256 [C] or MTH 256H [C]))

ENVE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
ENVE 406, SPECIAL PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 407, SEMINAR, 1-16 Credits
Equivalent to: ENVE 407H
This course is repeatable for 16 credits.

ENVE 407H, SEMINAR, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENVE 407
This course is repeatable for 16 credits.

ENVE 410, OCCUPATIONAL INTERNSHIP, 1-12 Credits
This course is repeatable for 12 credits.

ENVE 415, ENVIRONMENTAL ENGINEERING LABORATORY, 3 Credits
Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec.
Prerequisite: CBEE 414 with C or better
Equivalent to: CHE 415

ENVE 421, DRINKING WATER TREATMENT PROCESSES, 4 Credits
Characterization and treatment of drinking water sources including engineering principles for the selection and design of treatment processes. Lec/rec/lab.
Prerequisite: ENVE 322 with C or better

ENVE 422, WASTEWATER TREATMENT PROCESSES, 4 Credits
Characterization and treatment of municipal and industrial wastewaters including engineering principles for the selection and design of treatment processes. Lec/rec.
Prerequisite: ENVE 421 with C or better

ENVE 425, AIR POLLUTION CONTROL, 3 Credits
Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec.
Prerequisite: ENVE 321 with C or better or ENVE 322 with C or better

ENVE 431, FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS, 4 Credits
Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec.
Prerequisite: (CH 123 with C or better or CH 223 with C or better or CH 226H with C or better or CH 233 with C or better) and (CH 440 [C] or CHE 331 [C] or CHE 331H [C]) and (ENVE 321 [C] or ENVE 322 [C] and ENVE 421 [C])

ENVE 456, SUSTAINABLE WATER RESOURCES DEVELOPMENT, 3 Credits
Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 457, BIOREACTORS, 3 Credits
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Prerequisite: CHE 333 with C or better and ENVE 322 [C]

ENVE 490, ENVIRONMENTAL ENGINEERING DESIGN, 4 Credits
Open-ended design of environmental processes including development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. Lec/rec.
Prerequisite: ENVE 421 with C or better and ENVE 422 [C]

ENVE 499, SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING, 1-4 Credits
A critical examination of topics selected by the instructor from among topics not covered in other environmental engineering courses.
This course is repeatable for 4 credits.

ENVE 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENVE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 507, SEMINAR, 1-16 Credits
One-credit seminar. Graded P/N.
This course is repeatable for 16 credits.

ENVE 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 521, DRINKING WATER TREATMENT PROCESSES, 4 Credits
Characterization and treatment of drinking water sources including engineering principles for the selection and design of treatment processes. Lec/rec/lab.
Recommended: ENVE 322
ENVE 522, WASTEWATER TREATMENT PROCESSES, 4 Credits
Characterization and treatment of municipal and industrial wastewaters including engineering principles for the selection and design of treatment processes. Lec/rec.
Recommended: ENVE 421

ENVE 525, AIR POLLUTION CONTROL, 3 Credits
Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec.
Recommended: ENVE 321 or ENVE 322

ENVE 531, FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS, 4 Credits
Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec.
Recommended: (CH 123 or CH 223 or CH 226H or CH 233) and (CH 440 or CHE 331 or CHE 331H) and (ENVE 321 or ENVE 322) and ENVE 421

ENVE 532, AQUATIC CHEMISTRY: NATURAL AND ENGINEERED SYSTEMS, 4 Credits
Low temperature thermodynamic and selective kinetic treatments primarily of the inorganic chemistry groups, but also organic ligands and surface active groups, of natural and engineered waters; thermodynamic principles and computational techniques for prediction of equilibrium speciation; comparison of predictions to observations; computer laboratory. Lec/rec.
Equivalent to: OC 532
Recommended: One year of college-level chemistry (CH 221 and CH 222 and CH 223) or (CH 231 or CH 231H) and (CH 232 or CH 232H) and (CH 233 or CH 233H); a minimum of one year organic or physical chemistry; and concurrent enrollment in ENVE 536 and/or OC 652

ENVE 535, PHYSICAL AND CHEMICAL TREATMENT PROCESSES, 4 Credits
Fundamental principles of physical and chemical processes relevant for the treatment of contaminants in environmental matrices (e.g. water, air and soil).
Prerequisite: ENVE 532 with C or better
Equivalent to: ENVE 538

ENVE 541, MICROBIAL PROCESSES IN ENVIRONMENTAL SYSTEMS, 4 Credits
Energetics kinetics and stoichiometry of microbial transformations of organic and inorganic compounds. Mathematical models of biodegradation.

ENVE 545, MICROBIAL METHODS IN ENVIRONMENTAL ENGINEERING, 3 Credits
Covers the principles of microbiological methods pertinent to environmental engineers with an emphasis on applications in drinking water treatment, wastewater treatment, and soil remediation. The course is targeted at engineering students that do not have much experience with culture-based and molecular-based techniques.
Prerequisite: ENVE 541 with C+ or better

ENVE 554, GROUNDWATER REMEDIATION, 4 Credits

ENVE 556, SUSTAINABLE WATER RESOURCES DEVELOPMENT, 3 Credits
Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ENVE 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENVE 699, SELECTED TOPICS IN ENVIRONMENTAL ENGINEERING, 1-4 Credits
A critical examination of topics selected by the instructors from among topics not covered in other environmental engineering courses.
Equivalent to: ENVE 611
This course is repeatable for 8 credits.

Science of Engineering (ESC)
ESC 111, INTRODUCTION TO ENGINEERING, 3 Credits
Describes different fields of engineering; Performs calculations and synthesize results; Develops critical thinking skills and apply to engineering problems; Applies engineering specific technical and soft skills.
Equivalent to: MIME 101
ESC 340, INTRO TO EXPERIMENTATION, 4 Credits
Theory and application of instrumentation and measurement techniques are covered. Course topics include fundamentals of sampling theory, error and uncertainty analysis, signal conditioning, sensor fundamentals, and data analysis. Laboratory exercises provide experience utilizing data acquisition hardware and software, as well as a variety of sensors for measuring parameters from mechanical and electrical engineering systems.
Prerequisite: CS 162 with C or better and ENGR 202 [C] and PH 213 [C] and ST 314 [C]

ESC 350, ENGINEERING MATERIALS, 4 Credits
An introduction to materials and their structures and properties. The physical and chemical phenomena responsible for the electrical, mechanical, and thermal behavior of solids will be studied.
Prerequisite: PH 213 with C or better and CH 232 [C]

ESC 401, RESEARCH, 1-16 Credits
Equivalent to: ESE 401
This course is repeatable for 4 credits.

ESC 497, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSTLISTED as ESC 497/ESE 497. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (ENGR 390 with C or better or BA 360 with C or better) and ME 312 [C] and ME 312H [C] and ESE 355 [C] and ESC 360 [C] and ST 314 [C] and ST 314H [C] and WR 327 [C]
Equivalent to: ESE 497, MIME 497

ESC 498, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ESE 497 with C or better or IE 497 with C or better or ME 497 with C or better or MIME 497 with C or better
Equivalent to: ESE 498, IE 498, ME 498

ESC 499, SPECIAL TOPICS, 4 Credits
This course is repeatable for 16 credits.

Energy Systems Engineering (ESE)

ESE 330, MODELING AND ANALYSIS OF DYNAMIC SYSTEMS, 4 Credits
Presents basic concepts of dynamic behavior, and the analytical and computational techniques for predicting and assessing dynamic behavior. Modeling a basic system, compound system, dynamic stability, and natural behavior to continuing and abrupt inputs are presented.
Prerequisite: ENGR 202 with C or better and ENGR 212 [C] and MTH 256 [C] and MTH 306 [C]

ESE 355, ENERGY REGULATION, 4 Credits
Introductory course to the policies and laws governing energy generation and transmission in the United States with a focus on electricity. History of regulations give context to understand current regulation and potential future policies. Laws regulating the use of alternative energy resources covered in a practical setting. Offered at OSU-Cascades only.
Prerequisite: BA 360 (may be taken concurrently) with C or better or ENGR 390 (may be taken concurrently) with C or better

ESE 360, ENERGY CONSUMPTION ANALYSIS, 4 Credits
Analysis of energy use in transportation, residential and industrial sectors to understand how new technologies improve energy efficiency. Tradeoff techniques applied to decide between less efficient, less expensive systems versus more efficient, more expensive systems. International energy consumption compared, and energy losses evaluated for heating, cooling and electronic systems. Offered at OSU-Cascades only.
Prerequisite: (BA 360 (may be taken concurrently) with C or better or ENGR 390 (may be taken concurrently) with C or better and ME 311 [C]

ESE 401, RESEARCH, 1-16 Credits
Equivalent to: ESC 401
This course is repeatable for 4 credits.

ESE 430, FEEDBACK CONTROL SYSTEMS, 4 Credits
Modeling and analysis of linear, continuous-time systems in the time and frequency domains. Fundamentals of single-input-single-output control system design using both time-domain and frequency-domain techniques.
Prerequisite: ESE 330 with C or better

ESE 450, ENERGY GENERATION SYSTEMS, 4 Credits
Survey of technical fundamentals and operational principles of conventional and renewable energy conversion systems to understand the environmental and sustainable issues for energy systems currently in use or may be used in the future to power our industrial society. Offered at OSU-Cascades only.
Prerequisite: ME 312 with C or better
ESE 470, ENERGY DISTRIBUTION SYSTEMS, 4 Credits
Detailed coverage of the electrical energy distribution system, its operation, control and design. Design considerations and impacts to meet emerging and evolving customer needs. Broader understanding of natural gas and oil pipeline distribution for these infrastructure commodities. Offered at OSU-Cascades only.
Prerequisite: ENGR 202 with C or better and ME 311 [C]

ESE 471, ENERGY STORAGE SYSTEMS, 4 Credits
Coverage of energy storage techniques involving electrochemical, mechanical and emerging options. Integration of the energy storage media, its effects on the bulk power system, and design tradeoffs to understand environmental impacts, cost, reliabilities, and efficiencies for commercialization of bulk energy storage. Offered at OSU-Cascades only.
Prerequisite: ENGR 202 with C or better and ME 312 [C]

ESE 497, MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESC 497/ESE 497. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ENGR 390 with C or better or BA 360 with C or better) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331 [C] or ME 331H [C]) and ESE 355 [C] and ESE 360 [C] and (ST 314 [G] or ST 314H [C]) and WR 327 [C]
Equivalent to: ESE 497, ME 497, MIME 497

ESE 498, MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ESE 497 with C or better or IE 497 with C or better or ME 497 with C or better or MIME 497 with C or better
Equivalent to: ESE 498, IE 498, ME 498

ESE 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

Humanitarian Engineering Science & Technology (HEST)

HEST 199, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.

HEST 201, INNOVATION FOR SOCIAL IMPACT, 3 Credits
Introduces methods for designing solutions to address needs of low-resource or other vulnerable peoples using tools from engineering and social sciences, and investigates techniques to bring ideas to market sustainably through social entrepreneurship. Multidisciplinary teams will step through the design process, including detailed needs assessment and customer discovery, critique and application of theoretical frameworks, exploration of the diffusion process and relevant system/institutions, prototyping, plans for technical and user experience testing, and considering implementation. CROSSLISTED as ANTH 201/HEST 201.
Equivalent to: ANTH 201

HEST 241, HOUSEHOLD ENERGY IN GUATEMALA: BACKGROUND, 1 Credit
An introduction to the technical, social, environmental, and economic issues surrounding energy needs for households in developing countries and the technologies and policies needed to help address them. Students are introduced to concepts about global development, needs assessment and co-design, qualitative and quantitative evaluation, and local socioeconomic conditions. This course is preparation for the 10-day Summer HEST 242 faculty-led study abroad course in Guatemala. Students from any major are invited to participate in this multidisciplinary course series.

HEST 242, HOUSEHOLD ENERGY IN GUATEMALA: APPLICATIONS, 3 Credits
Through immersion in rural communities during this 10-day interdisciplinary study abroad course, students will gain a deeper understanding of household energy needs in developing countries, as well as the social, environmental, technical, and economic issues surrounding technologies and policies to help meet these needs. The outcomes produced by a variety of household technologies such as biomass cookstoves will be evaluated through qualitative and quantitative data gathering, including experiments, observations, and surveys, giving students the chance to practice their research and cross-cultural communication skills under a variety of circumstances.
Recommended: HEST 241

HEST 299, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.

HEST 310, INTRO TO COMMUNITY ENGAGEMENT AND COMMUNITY-BASED DESIGN, 3 Credits
Includes study of civic problems and issues, design-thinking concepts and application to co-design of engineering, science and technology-based solutions with social impact, and development of dispositions for effective community engagement through field study and service-learning. Recommended course for student wanting to complete a HEST internship. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
HEST 320, *ENGINEERING FOR GLOBAL HEALTH SOLUTIONS, 3 Credits
An introduction to the critical processes and drivers involved in the development of engineering solutions to address global health problems. Topics include world health challenges, accessing and interpreting health and economic data, basic healthcare systems around the world, the importance of ethical guidelines in ensuring the protection of human subjects, the process of cost effectiveness assessment of a technology, and the timescale and hurdles to adoption of a technology. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

HEST 399, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.

HEST 411, ENGINEERING DESIGN FOR EMERGENCY & LOW-RESOURCE ENVIRONMENTS, 3 Credits
Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure. Recommended: Completion of an undergraduate engineering fluid mechanics course

HEST 412, *MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY, 3 Credits
Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

HEST 415, UAV ENGINEERING, 4 Credits
Develop a strong foundation in Unmanned Aerial Vehicles (UAV) systems technologies. Engineering evaluation of UAV systems, subcomponents, aircraft missions, operations and Federal Aviation Administration (FAA) requirements. Apply actual UAV models and subsystems to a real-world project on UAV deployment for humanitarian and environmental missions. Write a technical report as a team-project, developing and demonstrating critical thinking and engineering reporting skills in the subject. CROSSLISTED as AAE 415/HEST 415.
Prerequisite: ME 316 with C or better and ME 317 [C] and ME 331 [C] and ME 373 [C]
Equivalent to: AAE 415

HEST 499, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.

HEST 511, ENGINEERING DESIGN FOR EMERGENCY & LOW-RESOURCE ENVIRONMENTS, 3 Credits
Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure. Recommended: Completion of an undergraduate engineering fluid mechanics course

HEST 512, MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY, 3 Credits
Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.
Available via Ecampus

HEST 541, HOUSEHOLD ENERGY IN GUATEMALA: BACKGROUND, 1 Credit
An introduction to the technical, social, environmental, and economic issues surrounding energy needs for households in developing countries and the technologies and policies needed to help address them. Students are introduced to concepts about global development, needs assessment and co-design, qualitative and quantitative evaluation, and local socioeconomic conditions. This course is preparation for the 10-day Summer HEST 542 faculty-led study abroad course in Guatemala. Students from any major are invited to participate in this multidisciplinary course series.

HEST 542, HOUSEHOLD ENERGY IN GUATEMALA: APPLICATIONS, 3 Credits
Through immersion in rural communities during this 10-day interdisciplinary study abroad course, students will gain a deeper understanding of household energy needs in developing countries, as well as the social, environmental, technical, and economic issues surrounding technologies and polices to help meet these needs. The outcomes produced by a variety of household technologies such as biomass cookstoves will be evaluated through qualitative and quantitative data gathering, including experiments, observations, and surveys, giving students the chance to practice their research and cross-cultural communication skills under a variety of circumstances.
Recommended: HEST 541

HEST 599, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.
Industrial & Manufacturing Engineering (IE)

IE 199, SPECIAL TOPICS, 1-16 Credits
Special topics in industrial engineering.
This course is repeatable for 16 credits.

IE 212, COMPUTATIONAL METHODS FOR INDUSTRIAL ENGINEERING, 4 Credits
Prerequisite: ENGR 112 with C or better and IE 112 (may be taken concurrently) [C]
Recommended: Algebra, calculus, differentiation and integration

IE 255, INTRODUCTORY QUANTITATIVE ANALYSIS OF INDUSTRIAL AND MANUFACTURING SYSTEMS, 3 Credits
An introduction to basic analysis concepts that will be utilized in subsequent industrial and manufacturing engineering courses. Emphasis will be placed on fundamental concepts such as data collection, commonly applied quantitative analysis methods, and how these are utilized to support decisions in different industrial and manufacturing system applications. Examples include resource utilization calculations, equipment fraction equations, queuing models, basic statistical inference procedures, and probability models used in discrete event simulation.
Prerequisite: MTH 252 with C or better

IE 285, INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING, 3 Credits
Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. CROSSLISTED as IE 285/MFGE 285.
Prerequisite: IE 112 (may be taken concurrently) with C or better or FOR 112 (may be taken concurrently) with C or better
Equivalent to: MFGE 285

IE 355, STATISTICAL QUALITY CONTROL, 4 Credits
Control of quality through the use of statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Lec/lab.
Prerequisite: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 351

IE 356, EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES, 4 Credits
Systematic analysis of processes through the use of statistical analysis, methods, and procedures. Application of statistical techniques including use of classic process analysis techniques, regression and design of experiments. Lec/rec.
Prerequisite: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 352

IE 366, WORK SYSTEMS ENGINEERING, 4 Credits
Principles and techniques of work measurement, methods engineering, workplace design, work sampling, and predetermined time systems. Basic human factors engineering and ergonomics principles applied to workplace design. The work systems engineering process. Lec/lab/rec.
Prerequisite: (IE 255 with C or better or ST 314 with C or better) and PH 212 [C] and PH 213 [C]
Equivalent to: IE 341

IE 367, PRODUCTION PLANNING AND CONTROL, 4 Credits
Forecasting techniques, inventory analysis, master production scheduling, material and capacity requirements, planning and scheduling methods.
Prerequisite: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 362

IE 368, FACILITY DESIGN AND OPERATIONS MANAGEMENT, 4 Credits
Design and analysis of industrial facilities including just-in-time systems, queuing, material handling systems, material flow analysis, line balancing, systematic layout planning, design of warehouse facilities, and facilities location.
Prerequisite: ENGR 248 with C or better and (IE 255 [C] or ST 314 [C])
Equivalent to: IE 365

IE 380, *THE RESPONSIBLE ENGINEER, 3 Credits
The idea of responsibility and the ethical responsibilities of the engineer. Introduction to value, ethics, and ethical systems. Engineering as value creation and the ethical ramifications of engineering. Codes of engineering ethics. Recognizing and addressing ethical dilemmas in engineering. Examination of the individual, social, and environmental effects of engineering and technology. (Baccalaureate Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

IE 399, SPECIAL TOPICS, 1-16 Credits
Special topics in industrial engineering.
This course is repeatable for 16 credits.
IE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

IE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

IE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

IE 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

IE 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

IE 411, VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS, 4 Credits
Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management.
Prerequisite: IE 212 with C or better
Equivalent to: IE 414

IE 412, INFORMATION SYSTEMS ENGINEERING, 4 Credits
Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.
Prerequisite: IE 212 with C or better

IE 415, SIMULATION AND DECISION SUPPORT SYSTEMS, 4 Credits
Analysis of operations and production systems through the application of computer simulation modeling techniques. Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab.
Prerequisite: IE 112 with C or better and (IE 255 [C] or ST 314 [C])

IE 418, TELECOMMUNICATION CONCEPTS, 3 Credits
Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years.
Prerequisite: IE 212 with C or better
Recommended: Previous programming experience

IE 419, WIRELESS NETWORKS, 3 Credits
RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks.
Prerequisite: IE 418 with C or better

IE 425, INDUSTRIAL SYSTEMS OPTIMIZATION, 4 Credits
A first course in operations research. Topics include mathematical programming formulations and solutions, the simplex method, network optimization, introduction to metaheuristics, and linear programming under uncertainty.
Prerequisite: (IE 255 with C or better or ST 314 with C or better) and (MTH 306 [C] or MTH 341 [C])
Equivalent to: IE 421, IE 422

IE 426, STOCHASTIC MODELS OF INDUSTRIAL SYSTEMS, 4 Credits
The application of probabilistic and stochastic modeling methodologies to analyze the performance of production and service systems. Major topics include probability models for space planning, Poisson arrival processes, discrete and continuous time Markov chain models of machine cycle times, and queuing models applied to various industrial systems. Other applications of these tools to model inventories, process behavior, and equipment reliability is illustrated.
Prerequisite: (IE 255 with C or better or ST 314 with C or better) and IE 425 [C]

IE 470, MANAGEMENT SYSTEMS ENGINEERING, 4 Credits
Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies.
Prerequisite: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C]
Equivalent to: IE 474

IE 471, PROJECT MANAGEMENT IN ENGINEERING, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included.
Prerequisite: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C]

IE 475, ADVANCED MANUFACTURING COSTING TECHNIQUES, 3 Credits
Costing techniques applicable in advanced manufacturing enterprises: activity-based costing, economic value added, Japanese cost management techniques, life cycle costing, throughput accounting, cost of quality, and financial versus operational performance measures. Emphasis on linkages to such advanced manufacturing systems as cellular manufacturing, flexible manufacturing, JIT, Lean, and ERP.
Prerequisite: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C]
Equivalent to: IE 495
IE 499, SPECIAL TOPICS, 1-5 Credits
Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term.
This course is repeatable for 99 credits.

IE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

IE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

IE 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

IE 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

IE 511, VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS, 4 Credits
Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management.
Equivalent to: IE 514
Recommended: IE 212

IE 512, INFORMATION SYSTEMS ENGINEERING, 4 Credits
Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.

IE 515, SIMULATION AND DECISION SUPPORT SYSTEMS, 4 Credits
Analysis of operations and production systems through the application of computer simulation modeling techniques. Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab.
Recommended: ST 314

IE 518, TELECOMMUNICATION CONCEPTS, 3 Credits
Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years.
Recommended: IE 212 and previous programming experience.

IE 519, WIRELESS NETWORKS, 3 Credits
RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks.
Prerequisite: IE 518 with C or better

IE 521, INDUSTRIAL SYSTEMS OPTIMIZATION I, 3 Credits
Techniques for analysis and solution of problems in industrial and management systems. Emphasis on application of linear and integer programming and extensions.
Equivalent to: IE 525
Recommended: MTH 341

IE 522, INDUSTRIAL SYSTEMS OPTIMIZATION II, 3 Credits
Techniques for analysis and solution of problems in industrial and management systems. Emphasis on applications of dynamic programming. Markovian processes, and questions as applied to industrial problems.
Recommended: ST 314

IE 523, INTEGER PROGRAMMING, 3 Credits
Classic models and algorithms for discrete optimization. Includes intuition and theory about computational strategies for solution of integer programming and combinatorial optimization problems.
Prerequisite: IE 521 with C or better

IE 533, HUMAN ANALYTICS AND BEHAVIORAL OPERATIONS, 3 Credits
Introduces several quantitative applications related to determining workforce size, skill-sets, and multi-functionality in service and manufacturing systems based on measurable quality and productivity performance, at the intersection of human factors engineering and production planning. Modeling and solving problems in a context of the speed and accuracy trade-off. Models include learning, forgetting, teamwork, fatigue, procrastination, and individual difference measures.
Recommended: Introductory math programming

IE 542, DESIGN OF HUMAN FACTORS / ERGONOMICS EXPERIMENTS, 4 Credits
Designed to provide graduate students with introductions to a broad range of methods appropriate for studying humans, tasks, environments and their interaction along with various topics in the area of Human Factors/Ergonomics. Reading/discussion format.
Recommended: Graduate level statistics course

IE 545, HUMAN FACTORS ENGINEERING, 4 Credits
Analysis and design of work systems considering human characteristics, capabilities and limitations. Analysis and design of displays, controls, tools, and workstations. Human performance analysis. Human factors research methods.
Equivalent to: IE 541
IE 546, HUMAN-MACHINE SYSTEMS ENGINEERING, 3 Credits
Development of safe, high performance human-machine systems. System/function/task analysis, function allocation, design, mockups and rapid prototyping, human factors test and evaluation. Critical examination of the human-factors and domain-specific literature to identify human factors problems, and knowledge and methods to address those problems.
Equivalent to: IE 542
Recommended: IE 545

IE 548, COGNITIVE ENGINEERING, 3 Credits
Theories and models of human sensory, cognitive, and motor performance pertaining to the operation of complex systems. Applications to human-machine systems engineering. Research topics and methods related to cognitive engineering.
Recommended: IE 545

IE 552, DESIGN OF INDUSTRIAL EXPERIMENTS, 3 Credits
A first course in design of experiments with an emphasis on applications and fundamental data analysis methods. Basic statistical inference, analysis of variance, blocking, general factorial designs, and two-level factorial designs are covered.
Recommended: ST 314

IE 553, DESIGN OF INDUSTRIAL EXPERIMENTS II, 3 Credits
This second course in design of experiments is a continuation of IE 552. The same textbook is used. Topics covered include two-level fractional factorial designs, regression models, response surface methods, rules for expected sum of squares and expected mean squares, a summary of the 'no-name' approach to DOE, and analysis of experiments with unbalanced data (time permitting).
Prerequisite: IE 552 with C or better

IE 563, ADVANCED PRODUCTION PLANNING AND CONTROL, 3 Credits
Recommended: IE 521 and ST 314

IE 564, DESIGN AND SCHEDULING OF Cellular MANUFACTURING SYSTEMS, 3 Credits
Recommended: Computer experience

IE 570, MANAGEMENT SYSTEMS ENGINEERING, 4 Credits
Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies.
Equivalent to: IE 574

IE 571, PROJECT MANAGEMENT IN ENGINEERING, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included.
Available via Ecampus

IE 575, SYSTEMS THINKING THEORY AND PRACTICE, 4 Credits
An introduction to systems science theory and practice. Systems science theory is explored through the fundamentals of systems thinking theory, and theory of knowledge. Systems science practice is explored through system dynamics modeling techniques for simulating socio-technical systems, structures, and processes.

IE 581, OPERATIONS MANAGEMENT, 4 Credits
Critical and current issues on the implementation of operations management strategies for the engineering manager. Includes aspects of operations in an engineering management environment such as work systems design, forecasting, strategy, facilities location and design, management of quality and resources planning and management.
Prerequisite: IE 582 with B or better
Recommended: IE 571
Available via Ecampus

IE 582, INTRODUCTION TO MANAGEMENT FOR ENGINEERS AND SCIENTISTS, 4 Credits
An introduction to concepts, tools, and practices necessary for a broad understanding of the roles of engineering and technical managers. A mix of research results, case studies, and experiential learning is used to bolster theories of management, with focus on technical organizations.
Available via Ecampus

IE 583, ADVANCED ENGINEERING ECONOMICS ANALYSIS, 4 Credits
Examines the economics dimension of engineering management, from costing techniques to financial analysis. Topics include industrial cost analysis and estimation, economic planning, forecasting, and budgeting, and financial analysis for engineering and engineering management.
Prerequisite: IE 582 with B or better
Recommended: Basic courses in engineering economic analysis (ENGR 390)
Available via Ecampus
IE 584, SYSTEMS ENGINEERING, 4 Credits
An overview of systems engineering within engineering management practice. Principles of systems engineering are explored through traditional and contemporary hard and soft systems of engineering techniques and practices, and through current future developments in the field.
Prerequisite: IE 582 with B- or better
Recommended: IE 581 and IE 583 and IE 586 and IE 587
Available via Ecampus

IE 585, LEGAL ASPECT OF ENGINEERING MANAGEMENT, 3 Credits
A survey of legal topics relevant to engineers, including basic of legal system, labor law, intellectual property, torts, and contracts. This is an introductory course, emphasizes on legal principles that can provide engineers with the ability to recognize legal issues that are likely to arise in the engineering profession and engineering management. Note: This is an introductory class and will in no way make a student a lawyer. Students are advised to seek legal representation if he/she encounters a legal issue.
Prerequisite: IE 582 with B or better
Recommended: IE 581 and IE 583 and (IE 586 or CCE 552)
Available via Ecampus

IE 586, PROJECT RISK MANAGEMENT, 4 Credits
An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as CCE 552/IE 586.
Equivalent to: CCE 552
Available via Ecampus

IE 587, MANAGEMENT OF INFORMATION SYSTEMS, 4 Credits
An introduction to the management of information systems and their strategic importance in business. Topics covered include global e-business and collaboration, databases and information management, basics of telecommunications and wireless technology, security vulnerabilities of information systems, basics of business intelligence and business analytics, knowledge management and enhanced decision making.
Prerequisite: IE 582 with B or better
Available via Ecampus

IE 588, MANAGEMENT OF NEW PRODUCT DEVELOPMENT, 4 Credits
Introduces the new product development (NPD) process with the objective of understanding the underlying structure in NPD and exploring the methods to manage NPD processes by applying them to case studies and term project. The NPD process is investigated through its five key phases: (1) Opportunity identification/selection, (2) Concept generation, (3) Concept/project evaluation, (4) Development, and (5) Launch.
Prerequisite: IE 581 with B or better and IE 582 [B] and IE 583 [B]
Recommended: IE 584
Available via Ecampus

IE 589, PROFESSIONAL RESPONSIBILITY AND ETHICS, 3 Credits
An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as CCE 554/IE 589.
Equivalent to: CCE 554
Available via Ecampus

IE 590, STRATEGIC PLANNING IN ENGINEERING ORGANIZATIONS, 4 Credits
Provides an overview the strategic planning process from a variety engineering perspective. Variety engineering is explored via key management control theory concepts and through applying students’ work experience.
Prerequisite: IE 581 with B or better and IE 582 [B] and IE 583 [B]
Available via Ecampus

IE 591, STATISTICAL CONCEPTS FOR ENGINEERING MANAGERS, 4 Credits
Provides a first review of basic probability and statistical inference concepts and methods relevant for engineering managers. This is followed by a presentation of frequently utilized statistical methods in industry. These include process control, regression analysis, and experimental design. For each method, the fundamental ideas will be covered, and simple examples will be presented to provide engineering managers with the background needed to initiate and manage applications of these methods in industry. The course will end with an overview of process optimization, and robust parameter design.
Prerequisite: IE 582 with B or better
Available via Ecampus

IE 592, RESEARCH METHODS IN ENGINEERING MANAGERS, 4 Credits
Introduction to research methodologies including surveys, interviews, quasi-experimentation, and case studies. Methods for research design, and collection and analysis of data.
Equivalent to: IE 574

IE 593, SPECIAL TOPICS, 1-5 Credits
Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term.
Equivalent to: IE 592
This course is repeatable for 99 credits.
Available via Ecampus

IE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

IE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
IE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

IE 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

Materials Science (MATS)

MATS 221, THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY, 3 Credits
Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSLISTED as ENG 221/ MATS 221.
Equivalent to: ENGR 221
Recommended: One year of college science.

MATS 321, INTRODUCTION TO MATERIALS SCIENCE, 4 Credits
Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria.
Prerequisite: CH 202 with C or better or CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 224H with C or better
Equivalent to: ENGR 321, ENGR 321H, MATS 321H
Available via Ecampus

MATS 321H, INTRODUCTION TO MATERIALS SCIENCE, 4 Credits
Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria.
Attributes: HNRS – Honors Course Designator
Prerequisite: CH 202 with C or better or CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 224H with C or better
Equivalent to: ENGR 321, ENGR 321H, MATS 321

MATS 322, MECHANICAL PROPERTIES OF MATERIALS, 3 Credits
Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C])
Equivalent to: ENGR 322

MATS 413, THERMODYNAMICS AND PHASE EQUILIBRIA OF MATERIALS, 4 Credits
Explores the statistical interpretation of entropy, heat capacity, enthalpy of condensed phases, solution thermodynamics, liquid-solid and solid-solid phase equilibria. Considers the principles of thermodynamics governing phase stability with a focus on liquid-solid and solid-solid equilibria, and phase stability in two-component systems. Examines the relationship of Gibbs free energy to phase stability.
Prerequisite: MATS 321 with C or better and (ME 311 [C] or NSE 311 [C] or CHE 311 [C])

MATS 441, PHYSICAL METALLURGY, 3 Credits
Introduction to properties of metals and alloys including solidification, diffusion, solid solutions, intermediate phases, annealing, heat treatment and phase transformation with a focus on ferrous and non-ferrous metal systems. Identifies relationships between material composition, structure, and properties resulting from synthesis, processing or service. Explores the knowledge of ferrous and non-ferrous alloy systems and their significant metallurgical properties and applications.
Prerequisite: MATS 321 with C or better

MATS 445, WELDING METALLURGY, 4 Credits
Theory-based course focused on the metallurgy of welds. Topics covered include welding/joining processes, heat input, diffusion, solidification, phase transformation, materials compatibility and welding defects. This is NOT a practical welding class.
Prerequisite: (MATS 321 with C or better or ENGR 321 with C or better or ENGR 321H with C or better) or MATS 570 with C or better

MATS 455, EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE, 4 Credits
Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab.
Prerequisite: (ENGR 321 with C or better or ENGR 321H with C or better)
Equivalent to: ME 455
This course is repeatable for 8 credits.
Recommended: ME 570

MATS 478, THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES, 4 Credits
Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films.
Prerequisite: (ME 311 with C or better or ME 311H with C or better) and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C]) and (ENGR 322 [C] or MATS 322 [C])
Equivalent to: ME 478

MATS 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
MATS 545, WELDING METALLURGY, 4 Credits
Theory-based course focused on the metallurgy of welds. Topics covered include welding/joining processes, heat input, diffusion, solidification, phase transformation, materials compatibility and welding defects. This is NOT a practical welding class.
Recommended: (MATS 321 or ENGR 321 or ENGR 321H) or MATS 570

MATS 555, EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE, 4 Credits
Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab.
Prerequisite: ME 570 with C or better
Equivalent to: ME 555
This course is repeatable for 8 credits.
Recommended: ENGR 321 or ENGR 321H

MATS 570, STRUCTURE-PROPERTY RELATIONS IN MATERIALS, 4 Credits
Equivalent to: ME 570

MATS 571, ELECTRONIC PROPERTIES OF MATERIALS, 4 Credits
Equivalent to: ME 571
Recommended: CH 545 or ME 570

MATS 578, THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES, 4 Credits
Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films.
Equivalent to: ME 578

MATS 581, THERMODYNAMICS OF SOLIDS, 4 Credits
Equivalent to: ME 581

MATS 582, RATE PROCESSES IN MATERIALS, 3 Credits
Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development.
Prerequisite: MATS 581 with C or better or ME 581 with C or better
Equivalent to: ME 582

MATS 584, ADVANCED FRACTURE OF MATERIALS, 4 Credits
Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data.
Equivalent to: ME 584
Recommended: ENGR 322

MATS 587, DISLOCATIONS, DEFORMATION, AND CREEP, 4 Credits
The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies.
Equivalent to: ME 587
Recommended: ENGR 322

MATS 588, COMPUTATIONAL METHODS IN MATERIALS SCIENCE, 4 Credits
A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo methods. Learning is through a mixture of lecture and hands-on lab projects in which students use computational methods to explore and reinforce fundamental concepts in materials science. Lec/lab.
Equivalent to: ME 588
Recommended: Experience with Matlab or Mathematica or an equivalent numerical and programming environment.

MATS 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

MATS 659, PRINCIPLES OF TRANSMISSION ELECTRON MICROSCOPY, 4 Credits
This lecture-only course covers basic principles of transmission electron microscopy (TEM) including instrument components, electron optics, electron diffraction, and the origins and interpretation of image contrast. Spectroscopic techniques are covered, but diffraction and imaging techniques are emphasized. Coverage of experimental techniques will focus on those useful for addressing problems in materials science.
Recommended: MATS 570 and (CH 616 or MATS 555)
MATS 671, ELECTRONIC PROPERTIES OF OXIDES, 3 Credits
Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides.
Equivalent to: ME 671
Recommended: MATS 571 or PH 575

Mechanical Engineering (ME)

ME 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ME 250, INTRODUCTION TO MANUFACTURING PROCESSES, 1 Credit
Use of measuring and layout tools, interpretation of blueprints and drawings, identification of engineering materials. Operation of machine tools, including calculation of machining parameters. Operation of gas and MIG welding equipment. Lec/lab. Graded P/N.
Prerequisite: ENGR 248 with C or better and (PH 211 [C] or PH 211H [C])

ME 299, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
Equivalent to: ME 299H
This course is repeatable for 16 credits.

ME 299H, SPECIAL STUDIES, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 299
This course is repeatable for 16 credits.

ME 306, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ME 311, INTRODUCTION TO THERMAL-FLUID SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311/NSE 311.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ENGR 311, ENGR 311H, ME 311H, NE 311, NE 311H, NSE 311, NSE 311H

ME 311H, INTRODUCTION TO THERMAL-FLUID SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311/NSE 311.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ENGR 311, ENGR 311H, ME 311, NE 311, NE 311H, NSE 311, NSE 311H

ME 312, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312H, NE 312, NE 312H, NSE 312, NSE 312H

ME 312H, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312H, NE 312, NE 312H, NSE 312, NSE 312H

ME 316, MECHANICS OF MATERIALS, 3 Credits
Determination of stresses, deflections, and stability of deformable bodies with an introduction to finite element analysis.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and (MTH 256 [C] or MTH 256H [C])

ME 317, INTERMEDIATE DYNAMICS, 4 Credits
Continues the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 112 [C] or CS 161 [C] or CBEE 102 [C] or NSE 115 [C])
Equivalent to: ME 317H

ME 317H, INTERMEDIATE DYNAMICS, 4 Credits
Continues the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 112 [C] or CS 161 [C] or CBEE 102 [C] or NSE 115 [C])
Equivalent to: ME 317
ME 331, INTRODUCTORY FLUID MECHANICS, 4 Credits
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.
Prerequisite: ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 331, ENGR 331H, ME 331, NE 331, NSE 331, NSE 331H

ME 331H, INTRODUCTORY FLUID MECHANICS, 4 Credits
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 331, ENGR 331H, ME 331, NE 331, NSE 331, NSE 331H

ME 332, HEAT TRANSFER, 4 Credits
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.
Prerequisite: ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better
Equivalent to: ME 332H, NE 332, NE 332H, NSE 332, NSE 332H

ME 332H, HEAT TRANSFER, 4 Credits
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better
Equivalent to: ME 332, NE 332, NE 332H, NSE 332, NSE 332H

ME 351, INTRODUCTION TO INSTRUMENTATION AND MEASUREMENT SYSTEMS, 4 Credits
Illustrates the function, operation, and application of common mechanical engineering instruments, measurement principles, and statistical analysis. Demonstrates elements of measurement systems, including transduction, signal conditioning, and data recording. Examines function and operation of digital data acquisition systems.
Prerequisite: (ENGR 202 with C or better or ENGR 202H with C or better) and (ENGR 212 [C] or ENGR 212H [C]) and (ENGR 213 [C] or ENGR 213H [C])
Equivalent to: ME 451

ME 373, MECHANICAL ENGINEERING METHODS, 4 Credits
Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec.
Prerequisite: (ENGR 112 with C or better or ENGR 112H with C or better) and (MTH 256 [C] or MTH 256H [C]) and MTH 341 [C]
Equivalent to: ME 373H

ME 373H, MECHANICAL ENGINEERING METHODS, 4 Credits
Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 112 with C or better or ENGR 112H with C or better) and (MTH 256 [C] or MTH 256H [C]) and MTH 341 [C]
Equivalent to: ME 373

ME 382, INTRODUCTION TO DESIGN, 4 Credits
Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab.
Prerequisite: ENGR 248 with C or better and ME 250 (may be taken concurrently) [C] and ENGR 212 [C] and ENGR 213 [C]
Equivalent to: ME 382H

ME 382H, INTRODUCTION TO DESIGN, 4 Credits
Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 248 with C or better and ME 250 (may be taken concurrently) [C] and (PH 211 [C] or PH 211H [C])
Equivalent to: ME 382

ME 383, MECHANICAL COMPONENT DESIGN, 4 Credits
Failure analysis and design of machine components. Lec/lab.
Prerequisite: ME 316 with C or better and ME 250 (may be taken concurrently) [C] and (ENGR 212 [C] or ENGR 212H [C]) and ENGR 213 [C]
Equivalent to: ME 383H
ME 383H, MECHANICAL COMPONENT DESIGN, 4 Credits
Failure analysis and design of machine components. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 316 with C or better and ME 250 (may be taken concurrently) [C] and (ENGR 212 [C] or ENGR 212H [C]) and ENGR 213 [C]
Equivalent to: ME 383

ME 401, RESEARCH, 1-16 Credits
This course is repeatable for 9 credits.

ME 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ME 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: ME 405H
This course is repeatable for 9 credits.

ME 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 405
This course is repeatable for 9 credits.

ME 406, PROJECTS, 1-16 Credits
This course is repeatable for 15 credits.

ME 407, SEMINAR, 1-16 Credits
Equivalent to: ME 407H
This course is repeatable for 2 credits.

ME 410, INTERNSHIP, 1-16 Credits
Credits may not apply toward BS degree in Mechanical Engineering.
Graded P/N.
This course is repeatable for 16 credits.

ME 412, DESIGN OF MECHANISMS, 4 Credits
Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab.
Prerequisite: (ME 317 with C or better or ME 317H with C or better) and ME 383 [C]

ME 420, APPLIED STRESS ANALYSIS, 4 Credits
Elasticity theory, failure theories, energy methods, finite element analysis.
Prerequisite: ME 316 with C or better

ME 422, MECHANICAL VIBRATIONS, 4 Credits
Dynamic response of single and multiple degree-of-freedom systems.
Prerequisite: ME 317 with C or better or ME 317H with C or better
Equivalent to: ME 422H

ME 422H, MECHANICAL VIBRATIONS, 4 Credits
Dynamic response of single and multiple degree-of-freedom systems.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 317 with C or better or ME 317H with C or better
Equivalent to: ME 422

ME 424, FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS, 3 Credits
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab.
Prerequisite: ME 420 with C or better or ME 520 with C or better

ME 430, SYSTEMS DYNAMICS AND CONTROL, 4 Credits
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSTLISTED as ECE 451/ME 430.
Prerequisite: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C])
Equivalent to: ECE 451, ME 430H
Available via Ecampus
ME 430H, SYSTEMS DYNAMICS AND CONTROL, 4 Credits
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ECE 451/ME 430.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C]))
Equivalent to: ECE 451, ME 430

ME 443, RENEWABLE ENERGY: THERMAL FLUID SYSTEMS, 4 Credits
Evaluates several thermal/fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences.
Prerequisite: (ME 311 with C or better or ME 311H with C or better or NE 311 with C or better or NE 331 [C] or NE 331H [C]) and (ME 332 [C] or ME 332H [C] or ME 333 [C] or ME 333H [C])

ME 444, THERMAL SYSTEMS DESIGN AND ANALYSIS, 4 Credits
Integration of the concepts, laws, and methodologies from fluid mechanics, heat transfer, and thermodynamics, into a set of practical tools for thermal energy systems design and analysis.
Prerequisite: (ME 332 with C or better or ME 332H with C or better or NSE 332 with C or better or NSE 332H with C or better) and (ME 312 (may be taken concurrently) [C] or ME 312H (may be taken concurrently) [C] or NSE 312 (may be taken concurrently) [C])

ME 445, INTRODUCTION TO COMBUSTION, 4 Credits
Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions.
Prerequisite: (ME 312 with C or better or ME 312H with C or better) and (ME 332 [C] or ME 332H [C])

ME 450, APPLIED HEAT TRANSFER, 4 Credits
An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week.
Prerequisite: ME 332 with C or better or ME 332H with C or better

ME 452, THERMAL AND FLUIDS SCIENCES LABORATORY, 4 Credits
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Prerequisite: (ME 311 with C or better or ME 311H with C or better) and (ME 331 [C] or ME 331H [C]) and (ME 332 [C] or ME 332H [C])
Equivalent to: ME 452

ME 452H, THERMAL AND FLUIDS SCIENCES LABORATORY, 4 Credits
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ME 311 with C or better or ME 311H with C or better) and (ME 331 [C] or ME 331H [C]) and (ME 332 [C] or ME 332H [C])
Equivalent to: ME 452

ME 453, STRUCTURE AND MECHANICS LABORATORY, 4 Credits
Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials.
Prerequisite: ME 451 with C or better

ME 460, INTERMEDIATE FLUID MECHANICS, 4 Credits
Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence.
Prerequisite: ME 331 with C or better or ME 331H with C or better

ME 461, GAS DYNAMICS, 4 Credits
Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems.
Prerequisite: (ME 312 with C or better or ME 312H with C or better) and (ME 331 [C] or ME 331H [C])

ME 480, MATERIALS SELECTION, 3 Credits
Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection.
Prerequisite: MATS 322 with C or better or ENGR 322 with C or better
ME 484, FRACTURE OF MATERIALS, 3 Credits
Fracture mechanics and fatigue mechanisms: mechanisms of ductile and brittle fracture. Environmentally induced fracture and fatigue. Considerations in design of engineering materials and structures will be discussed.
Prerequisite: MATS 322 with C or better or ENGR 322 with C or better

ME 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: ME 499H
This course is repeatable for 16 credits.

ME 499H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 499
This course is repeatable for 16 credits.

ME 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ME 502, INDEPENDENT STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

ME 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ME 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ME 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ME 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ME 508, THERMAL FLUID SCIENCE SEMINAR, 1 Credit
Student participation seminar experience for 1 course credit. Students will present and listen to seminars concerning ongoing research within the thermal fluid sciences.

ME 509, MATERIALS SCIENCE SEMINAR, 1 Credit
Student participation seminar experience for one credit; students will listen to seminars concerning ongoing research activities within materials science. Students will also have the opportunity to present their own research results periodically. Graded P/N.
Equivalent to: MATS 509

ME 511, PRECISION MACHINE DESIGN, 3 Credits
Tolerance analysis and application in design/manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as ME 511/MFGE 511.
Equivalent to: MFGE 511
Recommended: An understanding of mechanical component design and solid mechanics.

ME 512, DESIGN OF MECHANISMS, 4 Credits
Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab.
Recommended: (ME 317 or ME 317H) and ME 383

ME 513, BIO-INSPIRED DESIGN, 4 Credits
Intersection of design and biology that seeks to systematically mine biological knowledge to solve design problems. Investigates inspiration from nature from three different types: visual, conceptual, and computational. Includes design rules, heuristics, principles or patterns to solve engineering problems. Algorithmic bio-inspiration emulates natural algorithms for control or optimization problems.

ME 515, RISK AND RELIABILITY ANALYSIS IN ENGINEERING DESIGN, 4 Credits
Fundamentals of risk, uncertainty, and reliability. Methods to analyze and quantify the risk of failures, and the reliability of complex systems, including fault tree analysis, reliability block diagrams, probabilistic risk assessment. Introduction to research methods for risk and reliability analysis during the early design stages.

ME 516, MODELING AND ANALYSIS OF COMPLEX SYSTEMS, 4 Credits
Introduction to challenges and considerations when designing complex systems. Fundamentals of systems engineering and methods used in practice. Models and tools used to enable the use of models for trade studies during the design of complex systems. Model-based design environments and methodologies. Introduction to decision support tools in design.

ME 517, OPTIMIZATION IN DESIGN, 4 Credits
Optimization methods as applied to engineering design, theory and application of nonlinear optimization techniques for multivariate unconstrained and constrained problems. Model boundedness and sensitivity.
ME 519, SELECTED TOPICS IN DESIGN, 3-4 Credits
Topics in mechanical design selected from the following: design processes, quality engineering, design for assembly, statistical machine design, the Taguchi method, and parametric design. This course is repeatable for 32 credits.

ME 520, APPLIED STRESS ANALYSIS, 4 Credits
Elasticity theory, failure theories, energy methods, finite element analysis.
Recommended: ME 316

ME 521, LINEAR ELASTICITY, 4 Credits
A general introduction to the theory of elasticity. The solution of 2-D problems using the Airy stress function in rectangular and polar coordinates. The solution of 3-D problems using the Galerkin vector, the Papkovich-Neuber solution, and complex variable methods. Applications to asymptotic fields at discontinuities, contact and crack problems, and thermoelasticity.
Recommended: ME 316

ME 522, MECHANICAL VIBRATIONS, 4 Credits
Dynamic response of single and multiple degree-of-freedom systems.
Recommended: ME 317

ME 523, ADVANCED STRESS ANALYSIS, 4 Credits
An introduction to the mechanics of nonlinear elastic, plastic, and viscoelastic material behavior including large deformations.
Recommended: ME 316

ME 524, FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS, 3 Credits
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab.
Prerequisite: ME 520 with C or better

ME 526, NUMERICAL METHODS FOR ENGINEERING ANALYSIS, 3 Credits
Equivalent to: NE 526, NSE 526
Recommended: Programming experience and previous exposure to numerical methods

ME 529, SELECTED TOPICS IN SOLID MECHANICS, 3-4 Credits
Advanced topics in solid mechanics emphasizing research applications of current interest. This course is repeatable for 32 credits.

ME 531, LINEAR MULTIVARIABLE CONTROL SYSTEMS I, 4 Credits
Theoretical design of control systems for systems modeled by linear multivariable differential equations. Topics covered include controllability, observability, state feedback control, pole placement, output feedback, estimator design, and control designs that include both estimators and regulators.

ME 532, LINEAR MULTIVARIABLE CONTROL SYSTEMS II, 4 Credits
Focuses on designing control systems where the device to be controlled is an uncertain system, yet can be described by a set of linear differential equations. Lec.
Prerequisite: ME 531 with C or better

ME 533, NONLINEAR DYNAMIC ANALYSIS, 4 Credits
Course focuses on understanding the behavior of nonlinear dynamic systems of interest to mechanical engineers. Lec.
Recommended: ME 317

ME 534, NONLINEAR MULTIVARIABLE CONTROL SYSTEMS, 4 Credits
Focuses on designing control systems when the device to be controlled is mathematically described by a nonlinear set of differential equations. Lec.
Prerequisite: ME 533 with C or better

ME 539, SELECTED TOPICS IN DYNAMICS, 1-16 Credits
Advanced topics in dynamics emphasizing research applications of current interest. This course is repeatable for 30 credits.

ME 540, INTERMEDIATE THERMODYNAMICS, 4 Credits
Students are expected to master classical thermodynamics by way of solving extended problems using software tools. Statistical thermodynamics concepts are also introduced and exercised.
Recommended: ME 312

ME 541, LIQUID-VAPOR PHASE CHANGE AND HEAT TRANSFER, 4 Credits
Advanced treatment of underlying physics and engineering modeling approaches for heat transfer associated with vapor/liquid phase change processes. Topics include thermodynamics and mechanical aspects of phase change processes, pool boiling, filmwise and dropwise condensation, internal convective boiling and condensation, and other emerging areas in phase change heat transfer.
ME 543, RENEWABLE ENERGY: THERMAL FLUID SYSTEMS, 4 Credits
Evaluates several thermal/fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences.
Recommended: (ME 311 or ME 311H or NE 311 or NE 311H) and (ME 331 or ME 331H or NE 331 or NE 331H) and (ME 332 or ME 332H or NE 332 or NE 332H)

ME 544, ADVANCED POWER GENERATION SYSTEMS, 4 Credits
Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/rec.
Recommended: ME 312 and (ME 332 or ME 332H)

ME 545, INTRODUCTION TO COMBUSTION, 4 Credits
Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions.
Recommended: ME 312 and (ME 332 or ME 332H)

ME 546, CONVECTION HEAT TRANSFER, 3 Credits
An advanced treatment of forced and natural convection heat transfer processes emphasizing underlying physical phenomena. Current topical literature will be considered; analytical and numerical problem solving is included.
Recommended: (ME 332 or ME 332H) and ME 373

ME 547, CONDUCTIVE HEAT TRANSFER, 3 Credits
Analytical and numerical solutions to steady state and transient conduction problems.
Recommended: (ME 332 or ME 332H) and ME 373

ME 548, RADIATION HEAT TRANSFER, 3 Credits
Analytical and numerical methods of solution of thermal radiation problems.
Recommended: (ME 332 or ME 332H) and ME 373

ME 549, SELECTED TOPICS IN HEAT TRANSFER, 3 Credits
Topics in heat transfer including advanced problems in conduction, radiation, and convection. Additional examination of heat transfer in multiphase systems, inverse problems, combined modes, equipment design, solution techniques and other topics of current interest considered, including extensive use of current literature. Not all topics covered each year.
This course is repeatable for 9 credits.

ME 550, APPLIED HEAT TRANSFER, 4 Credits
An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week.
Recommended: ME 332 or ME 332H

ME 552, MEASUREMENTS IN FLUID MECHANICS AND HEAT TRANSFER, 4 Credits
Course emphasis is on measurement techniques and data analysis methods related to fluid mechanics and heat transfer. Proper experimental methods, data and uncertainty analyses related to thermal and fluids measurements are discussed. Local and spatial mapping of fluid and thermal fields are highlighted.
Recommended: (ME 331 or ME 331H) and (ME 332 or ME 332H) and ME 451.

ME 553, STRUCTURE AND MECHANICS LABORATORY, 4 Credits
Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials.
Recommended: ME 451

ME 560, INTERMEDIATE FLUID MECHANICS, 4 Credits
Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence.
Recommended: ME 331

ME 561, GAS DYNAMICS, 4 Credits
Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems.
Recommended: ME 312 and (ME 331 or ME 331H)

ME 564, TURBULENCE MODELING, 3 Credits
An introductory course on theory of different turbulence modeling techniques such as Reynolds Averaged Navier Stokes (RANS), Large Eddy Simulation (LES), and Direct Numerical Simulation (DNS) applied to a range of turbulent flows including free shear flows, boundary layers, and internal flows.
Prerequisite: ME 560 with C or better and (ME 565 [C] or ME 566 [C])

ME 565, INCOMPRESSIBLE FLUID MECHANICS, 3 Credits
Generalized fluid mechanics; kinematics; methods of description, geometry of the vector field, dynamics of nonviscous fluids, potential motion, two-dimensional potential flow with vorticity.
ME 566, VISCIOUS FLOW, 3 Credits
Boundary layer, stability, transition prediction methods, computational methods in fluid mechanics, recent developments.

ME 567, ENGINEERING APPLICATIONS OF COMPUTATIONAL FLUID DYNAMICS, 4 Credits
Basic concepts of computational fluid dynamics, a technique used for solving fully three-dimensional fluid flow problems with no exact solution, will be discussed and applied to general engineering applications using commercially available software. Lec.
Recommended: ME 312 and (ME 331 or ME 331H)

ME 568, TURBULENT FLOW DYNAMICS, 4 Credits
An introductory course of the basic physics of turbulent flows, coverage will include statistical methods and physical interpretation of a range of flows including boundary layer flows, internal flows, and environmental flows.
Prerequisite: ME 560 with C or better
Recommended: A first course in fluid mechanics such as ME 331

ME 569, SELECTED TOPICS IN FLUID MECHANICS, 2-4 Credits
Topics in fluid mechanics emphasizing research applications of current interest.
This course is repeatable for 32 credits.

ME 580, MATERIALS SELECTION, 3 Credits
Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. Lec/lab.
Equivalent to: MATS 580
Recommended: MATS 322 or ENGR 322

ME 583, COMPOSITE MATERIALS, 3 Credits
Explores fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications.
Recommended: ME 420 and ME 483 with a minimum grade of C

ME 585, FATIGUE OF MATERIALS, 4 Credits
Analyzes the failure of materials by fatigue including how fatigue behavior is characterized, how fatigue failure is predicted, the physical mechanisms responsible for fatigue failure of various materials, and how such behavior is related to the atomic structure and microstructure of the material.
Prerequisite: ME 570 with C or better or MATS 570 with C or better

ME 589, SELECTED TOPICS IN MATERIALS, 3 Credits
Topics in materials science to correspond to areas of graduate research. Topics will be chosen from the following list: optical materials, dielectrics, oxidation and corrosion, ceramics, thermophysical properties, polymers and viscoelasticity, coatings and thin films. Lec/rec.
This course is repeatable for 32 credits.

ME 596, SELECTED TOPICS IN THERMODYNAMICS, 3 Credits
Topics in thermodynamics including advanced problems in classical thermodynamics and statistical thermodynamics of current interest. Topics will likely be considered, including extensive use of literature. Not all topics covered each year.
This course is repeatable for 32 credits.

ME 597, PRECISION MOTION GENERATION, 4 Credits
Introduces fundamental knowledge in mechatronic systems used in manufacturing equipment such as CNC machine tools, and their computer numerical controls. Students will be exposed to sensors and actuators utilized in machine tools, industrial robots and for process automation. Fundamental knowledge to model and identify dynamics of motion delivery systems, design and analysis of accurate position control algorithms for precision motion generation will be covered. Digital motion control design will be introduced. Motion planning and real-time path interpolation algorithms will be covered. Students will be able to design NC systems for 2D motion platforms.
Recommended: ME 430

ME 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 32 credits.

ME 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ME 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ME 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ME 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ME 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ME 611, MODERN PRODUCT DESIGN, 4 Credits
Modern product development, design and prototyping are covered. Product development and prototyping is examined from a research standpoint in this course. Customer outcomes gathering, functional modeling, product architecture, modern techniques for concept generation and selection are explored. Also covered are recently developed theories and techniques for prototyping. The topics’ place in the overall design process is shown through a product development and prototyping project.
ME 613, SUSTAINABLE PRODUCT DESIGN, 4 Credits
Graduate students will work in multidisciplinary design teams to develop innovative and environmentally friendly products. Combining the principles of integrated product development and sustainable design thinking, students will (a) advance their knowledge of the design process by creating a patent-quality new product, (b) learn and employ environmentally-minded design theory and methods, including various software packages and online tools, and (c) further enhance teamwork skills by working collaboratively in a professional design team. Sustainable Product Development is conducted as a collaborative design experience, in that lectures, discussion, and team working time will be integrated into class sessions.

ME 615, DESIGN UNDER UNCERTAINTY, 4 Credits
Tackles the problem of decision making in engineering design. The fundamental challenge faced in making decisions in engineering designs is that they are almost exclusively decisions made under uncertainty. Sources of uncertainty could result from engineering models, experiments conducted, or lack of knowledge of future events. The course will cover three basic topics 1) how do we quantify uncertainty, 2) how do we account for the uncertainty in decision making, and 3) how do we make design selection decisions about products or systems we design.
Prerequisite: ME 517 with C or better

ME 617, DESIGN AUTOMATION, 4 Credits
Design automation is the field of study whereby advanced numerical methods are used to automate difficult or tedious design decisions. Typically, such methods are based on numerical optimization and artificial intelligence. They work in tandem with other engineering digital tools like computer-aided design, computer-aided manufacturing, and finite-element analysis. This course builds upon a fundamental understanding of optimization to introduce students to a range of different techniques that may be used to support engineering decision-making. This includes heuristic methods, AI tree-search, discrete and stochastic algorithms. The course concludes with discussion of recent innovations in multi-objective, multi-disciplinary and robust optimization.
Prerequisite: ME 517 with C or better

ME 667, COMPUTATIONAL FLUID DYNAMICS, 3 Credits
Application of modern computational techniques to solve a wide variety of fluid dynamics problems including both potential and viscous flow with requirements for computer code development.
Prerequisite: (ME 560 with C or better or ME 565 with C or better or ME 566 with C or better) and (ME 526 [C] or ME 575 [C])

Manufacturing Engineering (MFGE)

MFGE 241, INTRODUCTION TO MECHATRONICS, 3 Credits
Explores the fundamentals of mechatronics: electronic circuits, tools, and basic sensors/actuators commonly used in the manufacturing process monitoring. Examines the operation and use of these instruments and tools for mechatronics design and prototyping. Examines the fundamentals of five types of sensors: distance, movement, proximity, stress/strain, and temperature, with a focus on the mathematical modeling of the sensors when they are embedded in a mechanical system. Apply basic programming in LabVIEW software to support the operation of data sampling through a data acquisition card. Integrate mechanical design with electronics controlled by a computer in an open loop fashion in the lab.
Prerequisite: ENGR 202 with C or better

MFGE 285, INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING, 3 Credits
Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. CROSSLISTED as IE 285/MFGE 285.
Prerequisite: IE 112 (may be taken concurrently) with C or better or FOR 112 (may be taken concurrently) with C or better
Equivalent to: IE 285

MFGE 336, PRODUCTION ENGINEERING, 4 Credits
Provides a general understanding of the production engineering function within industry and the means by which to achieve tight tolerances through machining. Geometric dimensioning and tolerancing, fixture and gage design, and fundamentals of metal cutting mechanics are introduced, and their interactions are explored. Lec/lab.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and ENGR 248 [C] and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C] or MATS 321H [C] and ME 250 [C])
Equivalent to: IE 336

MFGE 337, MATERIALS AND MANUFACTURING PROCESSES, 4 Credits
Introduces mechanical manufacturing methods by which materials are economically shaped into valuable products. The overall goal is to develop an understanding of how the functionality, shape, materials, cost and sustainability of a product influence manufacturing process selection and design. Lec/lab.
Prerequisite: (ENGR 321 with C or better or ENGR 321H with C or better or MATS 321 with C or better or MATS 321H with C or better) and ME 250 [C] and MFGE 336 [C])
Equivalent to: IE 337
MFGE 341, LOGICAL CONTROL FOR MECHATRONICS SYSTEMS, 4 Credits
Explore embedded software and hardware infrastructures used in mechatronics systems. Examine binary number and Boolean algebra using AND, OR, and XOR operators in microcontroller-controlled systems, and flip-flops and other basic components that realize binary control functions. Explore the working principles of AVR microcontroller systems, including the internal structure of clock timers, memory space, and IO addresses. Implement basic microcontroller operations using Assembly language. Demonstrate functions such as open loop control and wired/wireless communication in labs by programming a commercial microcontroller platform with assembly language.
Prerequisite: MFGE 241 with C or better

MFGE 413, COMPUTER AIDED DESIGN AND MANUFACTURING, 4 Credits
Introduces students to the application of computer aided engineering tools across the extended product design and manufacturing cycle. Students become familiar with new product development and working in a sustaining engineering environment with an emphasis on using computer-aided design (CAD) and computer-aided manufacturing (CAM) tools to gain competitive advantage.
Prerequisite: ENGR 248 with C or better and (IE 366 [C] or ME 382 [C] or ME 382H [C])
Equivalent to: ME 413

MFGE 436, LEAN MANUFACTURING SYSTEMS ENGINEERING, 4 Credits
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/control, product design, supply chain resource management. Lec/lab.
Prerequisite: ENGR 390 with C or better or ENGR 391 with C or better
Equivalent to: IE 436

MFGE 437, COMPUTER CONTROL OF MANUFACTURING PROCESSES, 4 Credits
Introduces fundamental knowledge in the automation of manufacturing systems and processes. Automated manufacturing system design and operations–computer numerical control (CNC) technology; NC part programming; sensors and actuators, their modeling and dynamic simulation; feedback motion delivery systems design and tuning; programmable logic controls (PLC) for industrial control systems, and path planning for numerical controlled (NC) machinery. Lec/lab.
Prerequisite: (ME 317 with C or better or ME 317H with C or better or MFGE 336 with C or better) and (ENGR 212 [C] or ENGR 212H [C])
Equivalent to: IE 437

MFGE 438, COMPOSITES MANUFACTURING, 4 Credits
Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better

MFGE 441, DIGITAL CONTROL OF MECHATRONICS SYSTEMS, 4 Credits
Explores modeling and control of mechatronics systems. Review Laplace and Fourier transforms and then examine Industrial Proportional (P), Derivative (D), Integral (I)-based, PD, P-PI, PID, lead-lag and pole placement feedback control strategies, and their design principles based on time and frequency domain performance metrics. Explores the frequency domain loop-shaping control design approach, and reference command generation and feedforward control for motion control. Examines digital control and real-time implementation of feedback control laws on real-time micro-processor systems. Implement and test feedback control algorithms on a servo motor setup in the labs.
Prerequisite: ENGR 212 with C or better and MFGE 341 [C]

MFGE 442, ADVANCED SIGNAL PROCESSING FOR MECHATRONICS SYSTEMS, 4 Credits
Examine continuous and discrete Fourier Transforms, and Fast Fourier Transform algorithm concepts. Explore the design of low, high and band-pass filtering based on Finite (FIR) and Infinite (IIR) Impulse Response filters, and 1D and 2D image signal processing basics. Apply Artificial Neural Network (ANN) Basics for pattern recognition, regression and classification. Implement digital filtering on micro-processor systems, and apply ANN for image processing in the labs.
Prerequisite: MFGE 441 with C or better

MFGE 499, SPECIAL TOPICS, 0-5 Credits
This course is repeatable for 99 credits.

MFGE 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MFGE 511, PRECISION MACHINE DESIGN, 3 Credits
Tolerance analysis and application in design/manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSTLISTED as ME 511/MFGE 511.
Equivalent to: ME 511
Recommended: An understanding of mechanical component design and solid mechanics.

MFGE 531, MICROMANUFACTURING, 4 Credits
Introduction to microsystem platforms, scaling laws and size effects in micromanufacturing techniques with an emphasis on microchannel arrays, microchannel lamination and micro-scale characterization. Lec/lab.
Equivalent to: IE 531
MFGE 535, INDUSTRIAL SUSTAINABILITY ANALYSIS, 3 Credits
Students are exposed to the role of business and engineering in the design and implementation of sustainable industrial systems. Drivers, metrics, and analysis concepts, methods, and tools are introduced. Students incorporate business and engineering considerations in making product, manufacturing process, and supply chain design considerations.

MFGE 536, LEAN MANUFACTURING SYSTEMS ENGINEERING, 4 Credits
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/control, product design, supply chain resource management. Lec/lab.
Equivalent to: IE 536
Available via Ecampus

MFGE 538, COMPOSITES MANUFACTURING, 4 Credits
Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab.
Recommended: (ENGR 213 or ENGR 213H)

MFGE 551, ADDITIVE MANUFACTURING, 3 Credits
Introduces basic principles and process physics for additive manufacturing as compared with subtractive manufacturing. Various processes in AM (extrusion, jetting, photopolymerization, powder bed fusion, direct energy deposition and sheet lamination) and laser AM are discussed. Materials selection in AM (metals, polymers, ceramics and composites), powder metallurgy and metallurgical phenomena in additive manufacturing will be covered.

MFGE 599, SPECIAL TOPICS, 0-5 Credits
This course is repeatable for 99 credits.

MIME 101, INTRODUCTION TO MIME, 3 Credits
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
Equivalent to: ME 101, MIME 101H

MIME 101H, INTRODUCTION TO MIME, 3 Credits
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: MIME 101

MIME 199, SPECIAL TOPICS, 0-4 Credits
Equivalent to: MIME 101

MIME 299, SPECIAL TOPICS, 0-4 Credits
This course is repeatable for 4 credits.

MIME 399, SPECIAL TOPICS, 0-4 Credits
Special topics in mechanical, industrial, and manufacturing engineering.
This course is repeatable for 16 credits.

MIME 497, ^MIME CAPSTONE DESIGN, 4 Credits
Integrates engineering knowledge and experience by applying skills to work on real-world engineering project. Involves product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; and long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (IE 355 with C or better and IE 356 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C] and WR 327 [C]) or (MATS 322 [C] and ENGR 390 [C] and ME 250 [C] and (ME 312 [C] or ME 312H [C]) and (ME 317 [C] or ME 317H [C]) and (ME 382 [C] or ME 382H [C]) and (ME 383 [C] or ME 383H [C]) and (ST 314 [C] or ST 314H [C]) and WR 327 [C])
Equivalent to: ESE 497, IE 497, ME 497

MIME 498, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MIME 497 with C or better or ESE 497 with C or better
Equivalent to: ESE 498, IE 498, ME 498

MIME 504, WRITING AND CONFERENCE/EXPLORATION, 1-9 Credits
Students will be allowed to register for a variable number of MIME 504 credits to bring their registration up to full-time status (9 credits). Graded P/N.
Equivalent to: IE 504, ME 504, ROB 504
This course is repeatable for 15 credits.
MIME 507, SEMINAR/NEW STUDENT ORIENTATION, 1 Credit

Nuclear Science & Engineering (NSE)

NSE 114, INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS I, 3 Credits
Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
Equivalent to: NE 114, RHP 114

NSE 115, INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS II, 3 Credits
Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
Equivalent to: NE 115, RHP 115

NSE 233, MATHEMATICAL METHODS FOR NSE, 3 Credits
Development and application of analytical and numerical methods with applications to problems in the NE/RHP field. Major topics will include solution of ODEs and systems of ODEs, root finding techniques and numerical integration and differentiation. Major applications will include solution of the Bateman Equations and solution of the diffusion equation.
Prerequisite: MTH 256 with C or better or MTH 256H with C or better

NSE 234, NUCLEAR AND RADIATION PHYSICS I, 3 Credits
Relativistic dynamics; basic nuclear physics; basic quantum mechanics; radioactivity; electromagnetic waves; interaction of ionizing radiation with matter; cross sections; basic atomic structure.
Prerequisite: MTH 251 with C or better or MTH 251H with C or better
Equivalent to: NE 234, RHP 234

NSE 235, NUCLEAR AND RADIATION PHYSICS II, 3 Credits
Radioactivity; radioactive decay modes; decay kinetics, interaction of neutrons with matter; nuclear reactions; fission and fusion basics; cross sections.
Prerequisite: (NSE 234 with C or better or NE 234 with C or better or RHP 234 with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: NE 235, RHP 235

NSE 236, NUCLEAR RADIATION DETECTION AND INSTRUMENTATION, 4 Credits
Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation; experimental investigation of interactions of radiation with matter. Lec/lab.
Prerequisite: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 236, RHP 236

NSE 311, INTRODUCTION TO THERMAL-FLUID SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as NE 311/NSE 311.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C])
Equivalent to: ME 311, ME 311H, NE 311, NE 311H, NSE 311H

NSE 311H, INTRODUCTION TO THERMAL-FLUID SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311/NSE 311.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 311, ME 311H, NE 311H, NSE 311

NSE 312, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312, ME 312H, NE 312, NE 312H, NSE 312

NSE 312H, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312, ME 312H, NE 312, NE 312H, NSE 312

NSE 319, *SOCIETAL ASPECTS OF NUCLEAR TECHNOLOGY, 3 Credits
Description and discussion of nuclear-related issues as they impact society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: NE 319
NSE 331, INTRODUCTORY FLUID MECHANICS, 4 Credits
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.
Prerequisite: ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better.
Equivalent to: ENGR 331, ENGR 331H, ME 331, ME 331H, NSE 331, NSE 331H

NSE 331H, INTRODUCTORY FLUID MECHANICS, 4 Credits
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better.
Equivalent to: ENGR 331, ENGR 331H, ME 331, ME 331H, NSE 331, NSE 331H

NSE 332, HEAT TRANSFER, 4 Credits
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.
Prerequisite: ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better.
Equivalent to: ME 332, ME 332H, NE 332, NE 332H, NSE 332

NSE 332H, HEAT TRANSFER, 4 Credits
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better.
Equivalent to: ME 332, ME 332H, NE 332, NE 332H, NSE 332

NSE 401, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: NE 401
This course is repeatable for 99 credits.

NSE 403, THESIS/DISSERTATION, 1-16 Credits
Equivalent to: NE 403
This course is repeatable for 16 credits.

NSE 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: NE 405
This course is repeatable for 16 credits.

NSE 406, PROJECTS, 1-16 Credits
Equivalent to: NE 406
This course is repeatable for 16 credits.

NSE 407, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: RHP 407
This course is repeatable for 16 credits.

NSE 410, INTERNSHIP, 1-12 Credits
Supervised technical work experience at approved organizations. Graded P/N.
Equivalent to: RHP 410
This course is repeatable for 12 credits.

NSE 415, NUCLEAR RULES AND REGULATIONS, 2 Credits
An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
Prerequisite: NSE 236 with C or better
Equivalent to: NE 415, RHP 415
Recommended: NSE 481 or NE 481 or RHP 481

NSE 429, SELECTED TOPICS IN NUCLEAR ENGINEERING, 1-3 Credits
Topics associated with nuclear engineering not covered in other undergraduate courses; topics may vary from year to year.
Equivalent to: NE 429
This course is repeatable for 45 credits.

NSE 435, RADIATION SHIELDING AND EXTERNAL DOSIMETRY, 4 Credits
Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.
Prerequisite: (NSE 234 with C or better or NE 234 with C or better or RHP 234 with C or better) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C]) and (NSE 481 [C] or NE 481 [C] or RHP 481 [C])
Equivalent to: NE 435

NSE 440, NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT, 4 Credits
Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.
Prerequisite: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 440
NSE 450, PRINCIPLES OF NUCLEAR MEDICINE, 3 Credits

Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

NSE 451, NEUTRONIC ANALYSIS I, 3 Credits

Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.

Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C]) and (NSE 333 [C] or NE 333 [C] or RHP 333 [C])

Equivalent to: NE 451

NSE 452, NEUTRONIC ANALYSIS II, 3 Credits

Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. Lec/lab.

Prerequisite: NSE 451 with C or better or NE 451 with C or better

Equivalent to: NE 452

NSE 455, REACTOR OPERATOR TRAINING I, 3 Credits

The Oregon State University TRIGA reactor Operator Training I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NSE 455/NSE 555 and NSE 456/NSE 556 classes taught during spring and summer terms. Students successfully completing the NSE 455/NSE 555 and NSE 456/NSE 556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.

Prerequisite: (NSE 236 with C or better or NE 235 with C or better or RHP 236 with C or better) and (MTH 256 [C] or MTH 256H [C])

Equivalent to: NE 455

NSE 456, REACTOR OPERATOR TRAINING II, 4 Credits

The Oregon State University TRIGA reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NSE 555. Students successfully completing NSE 455/NSE 555 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.

Prerequisite: NSE 455 with C or better or NE 455 with C or better

Equivalent to: NE 456

NSE 457, NUCLEAR REACTOR LABORATORY, 2 Credits

Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab.

Prerequisite: (NSE 451 with C or better or NE 451 with C or better or NE 551 with C or better or NE 551 with C or better or NE 452 [C] or NE 452 [C] or NSE 552 [C] or NE 552 [C])

Equivalent to: NE 457

NSE 467, NUCLEAR REACTOR THERMAL HYDRAULICS, 4 Credits

Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes.

Prerequisite: ME 332 with C or better or ME 332H with C or better or NSE 332 with C or better or NSE 332H with C or better or NE 332 with C or better or NE 332H with C or better

Equivalent to: NE 467

NSE 473, NUCLEAR REACTOR SYSTEMS ANALYSIS, 3 Credits

Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs.

Prerequisite: NSE 452 with C or better or NE 452 with C or better

Equivalent to: NE 473

NSE 474, NUCLEAR SYSTEMS DESIGN I, 4 Credits

Part I of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

Prerequisite: NSE 481 with C or better

Equivalent to: NE 474, RHP 474

NSE 475, NUCLEAR SYSTEMS DESIGN II, 4 Credits

Part II of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC

Prerequisite: (NSE 452 with C or better or NE 452 with C or better) and (NSE 457 [C] or NE 474 [C] or RHP 474 [C])

Equivalent to: RHP 475
NSE 481, RADIATION PROTECTION, 4 Credits

Fundamental principles and theory of radiation protection; regulatory agencies, dose units; source of radiation; biological effects and risk; dose limits; applications of external and internal dosimetry; shielding and atmospheric dispersion.

Prerequisite: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 481, RHP 481

NSE 483, RADIATION BIOLOGY, 3 Credits

Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.

Prerequisite: NSE 481 with C or better or RHP 481 with C or better or MP 481 with C or better
Equivalent to: MP 483

NSE 488, RADIOECOLOGY, 3 Credits

Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals.

Prerequisite: NSE 481 with C or better or RHP 481 with C or better or NE 481 with C or better
Equivalent to: RHP 488

NSE 499, SPECIAL TOPICS, 0-16 Credits

This course is repeatable for 16 credits.
Equivalent to: NE 499

NSE 501, RESEARCH, 1-16 Credits

This course is repeatable for 99 credits.
Available via Ecampus

NSE 503, THESIS, 1-16 Credits

This course is repeatable for 99 credits.
Available via Ecampus

NSE 505, READING AND CONFERENCE, 1-16 Credits

This course is repeatable for 16 credits.
Available via Ecampus

NSE 506, PROJECTS, 1-16 Credits

This course is repeatable for 16 credits.
Available via Ecampus

NSE 507, SEMINAR, 1 Credit

Graded P/N.
Equivalent to: MP 507
This course is repeatable for 16 credits.
Available via Ecampus

NSE 510, INTERNSHIP, 1-12 Credits

Supervised technical work experience at approved organizations. Graded P/N.
Equivalent to: MP 510
This course is repeatable for 16 credits.

NSE 515, NUCLEAR RULES AND REGULATIONS, 2 Credits

An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
Equivalent to: NE 515, RHP 515
Available via Ecampus

NSE 516, RADIOCHEMISTRY, 4 Credits

Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. CROSSLISTED as CH 516/NSE 516.

Prerequisite: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C])
Equivalent to: CH 516, RHP 516
Available via Ecampus

NSE 517, RADIONUCLIDES IN LIFE SCIENCES, 4 Credits

Chemistry of actinides and fission products, radioseparations, selected medical generators, radiolabeling of organic molecules. Designed for majors in medical physics, radiation health physics, chemistry, pharmacy.

Prerequisite: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C])
Equivalent to: MP 517, RHP 517

NSE 519, RADIOCHEMICAL ANALYSIS, 4 Credits

Hands-on learning of radiochemistry, practical training with open radiation sources for preparation of irradiation targets, counting samples from contaminated soils or separation of medical radionuclides. Fundamentals of chemical dosimetry are also covered. Designed for a broad range of majors in chemistry, nuclear engineering, radiation health physics, radioecology, chemical and environmental engineering. Lec/lab. The lecture part of the course also is delivered online as video stream via Canvas.

Prerequisite: NSE 536 with C or better or NE 536 with C or better or RHP 536 with C or better
Equivalent to: NE 519, RHP 519
Recommended: NSE 516

NSE 521, RADIOLOGICAL ANATOMY AND PHYSIOLOGY, 4 Credits

Anatomy and physiology with correlating images for use by medical physicists, therapists, dosimetrists. This course adheres to the AAMD requirements for Cross Sectional Anatomy.
Equivalent to: MP 521, RHP 521
### NSE 522, NUCLEAR SECURITY SCIENCE, 4 Credits
Explores the nuclear fuel cycle from the perspective of nuclear security and safeguards and in the context of current international nuclear policies. Nuclear threats are balanced with the past history of nuclear weapons use, current nonproliferation technology, and the future international growth of the nuclear industry. Critical thinking will be assessed by way of in-class discussions, journal article reviews, written analysis of fuel cycle signatures, and conducting research. Signatures including radiological and morphological characteristics of nuclear material is introduced as well as the techniques for the detection of special nuclear materials.

### NSE 525, NUCLEAR SECURITY SYSTEM DESIGN, 3 Credits
Studies the science and engineering associated with the design, evaluation, and implementation of systems to secure nuclear and radiological materials. Topics include adversary characterization, target categorization and the consequences of failure to protect targets, detection and delay technologies, on-site and off-site response and response strategies, insider threat evaluation, and mathematical methods for evaluating risk due to the threat and the security system design. Students will become familiar with the components of a sustainable nuclear security program and their interconnections, and learn about the planning of nuclear security activities at both the state and facility level.

### NSE 526, NUMERICAL METHODS FOR ENGINEERING ANALYSIS, 3 Credits
Equivalent to: ME 526, NE 526
Recommended: Programming experience and previous exposure to numerical methods

### NSE 531, RADIOPHYSICS, 3 Credits
Expands understanding of concepts and applications of atomic and nuclear physics to enable continued study in nuclear engineering and health physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and the characteristics of fission.
Equivalent to: MP 531
Available via Ecampus

### NSE 533, DETECTION OF SPECIAL NUCLEAR MATERIALS, 3 Credits
Designed for students interested in radiation measurements and nuclear security, especially those considering PhD-level work in this area. Covers topics including special nuclear material characteristics, radiation background and it interferences with SNM, an introduction to MCNPX, a brief introduction to Geant4, detection of SNM via counting or imaging, localization of SNM; and characterization of SNM.
Prerequisite: NSE 536 with C or better
Recommended: MTH 251 or MTH 251H

### NSE 534, APPLIED DETECTION FOR NUCLEAR SECURITY, 3 Credits
Applied detection techniques currently being deployed globally for nuclear security are presented in lectures and explored in practical exercises. A prominent feature of this class is the unique opportunity to complete the Nuclear Security Education Program (NSEP) Training program hosted at the HAMMER federal training center.
Prerequisite: NSE 536 with C or better

### NSE 535, RADIATION SHIELDING AND EXTERNAL DOSIMETRY, 4 Credits
Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.
Equivalent to: MP 535, NE 535, RHP 535
Available via Ecampus

### NSE 536, ADVANCED RADIATION DETECTION AND MEASUREMENT, 4 Credits
Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab.
Prerequisite: NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better or MP 531 with C or better
Equivalent to: MP 536

### NSE 537, DIGITAL RADIATION MEASUREMENT AND SPECTROSCOPY, 3 Credits
Principles of digital spectroscopy; application of digital filters in digital processing of detector pulses; hardware implementation of a typical digital spectrometer; introduction of Field-Programmable Gate Array (FPGA) devices programming a digital spectrometer using Hardware Description Language (VHDL); simulation, synthesis and spectroscopy; experimental design tests and evaluation. Lec/lab.
Prerequisite: NSE 536 with C or better or NE 536 with C or better or RHP 536 with C or better
Equivalent to: NE 537

### NSE 539, SELECTED TOPICS IN INTERACTION OF NUCLEAR RADIATION, 1-6 Credits
Topics associated with interactions of nuclear radiation not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 539
NSE 540, NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT, 4 Credits

Minning, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.

Equivalent to: NE 540
Available via Ecampus

NSE 541, DIAGNOSTIC IMAGING PHYSICS I, 3 Credits

An introduction to the production and usage of ionizing radiation in medicine. The course will cover x-ray production, x-ray spectrum, characteristics and manipulation, and how x-rays are utilized to obtain anatomical information in diagnostics imaging. Imaging modalities to be covered in this course are general and portable planar radiography, mammography, and fluoroscopy (including interventional radiography).

Prerequisite: NSE 531 with C or better or MP 531 with C or better or RHP 531 with C or better

Equivalent to: MP 541

NSE 542, DIAGNOSTIC IMAGING PHYSICS II, 3 Credits

An introduction to Computed Tomography (CT) and Ultrasound (US) imaging, and their applications in medicine. The course will cover x-ray production, detection, and image processing as it relates specifically to CT, as well as general acoustic physics principles and how they are applied to US imaging. Additionally, clinical radiation protection and dosimetry in diagnostic imaging will be taught.

Prerequisite: NSE 531 with C or better or PP 531 with C or better or RHP 531 with C or better

Equivalent to: MP 542

NSE 543, ADVANCED DIAGNOSTIC IMAGING PHYSICS, 3 Credits

An introduction to the areas of health informatics and magnetic resonance imaging (MRI). The health informatics portion of the course will specifically cover picture archiving and communication systems (PACS), including DICOM standards, data transfer and storage, digital image displays, and clinical implementation of PACS systems. The MRI portion of the course will provide instruction on the physical principles behind nuclear magnetic response (NMR) and how these phenomenon are exploited in MRI. Advanced MRI techniques and applications, along with clinical testing requirements, will also be covered.

Prerequisite: NSE 531 with C or better or MP 531 with C or better or RHP 531 with C or better

Equivalent to: MP 543

NSE 544, NUCLEAR MEDICINE IMAGING, 3 Credits

An introduction to the uses of radionuclides in medical imaging. The theory and application of detectors and imaging systems in nuclear medicine including collimators, scintillation probes, cameras, SPECT, PET, and hybrid technologies (SPECT/CT, PET/CT, and PET/MRI) will be covered.

Prerequisite: (NSE 541 with C or better or MP 541 with C or better) and (NSE 531 [C] or RHP 531 [C])

Equivalent to: MP 544

NSE 545, DIAGNOSTIC IMAGING PRACTICUM, 3 Credits

Provides an introduction to the medical physicist's role in a clinical department; an opportunity to integrate principles learned throughout the graduate program as they apply to diagnostic imaging physics. Observations of procedures in radiography, fluoroscopy, ED, OR, interventional radiology, CT, MRI, ultrasound, and nuclear medicine. Experience in regulatory testing of x-ray equipment; observations of testing of CT and other x-ray modalities. Graded P/N.

Prerequisite: (NSE 541 with C or better or MP 541 with C or better) and (NSE 531 [C] or MP 531 [C] or RHP 531 [C])

Equivalent to: MP 545

NSE 549, SELECTED TOPICS IN NUCLEAR FUEL CYCLE ANALYSIS, 1-6 Credits

Topics associated with the nuclear fuel cycle not covered in other graduate courses; topics may vary from year to year.

Equivalent to: NE 549

This course is repeatable for 45 credits.

NSE 550, PRINCIPLES OF NUCLEAR MEDICINE, 3 Credits

Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

Equivalent to: RHP 550

NSE 551, NEUTRONIC ANALYSIS I, 3 Credits

Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.

Equivalent to: NE 551

NSE 552, NEUTRONIC ANALYSIS II, 3 Credits

Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.

Prerequisite: NSE 551 with C or better or NE 551 with C or better

Equivalent to: NE 552

NSE 553, ADVANCED NUCLEAR REACTOR PHYSICS, 3 Credits

Advanced analytic and numerical techniques for the prediction of the neutron population in nuclear reactor systems. Topic will include long characteristic neutron transport, collision probabilities, nodal methods, equivalence theory, and perturbation theory.

Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C])

Equivalent to: NE 553

Recommended: Computer programming experience
NSE 555, REACTOR OPERATOR TRAINING I, 3 Credits
The Oregon State University TRIGA Reactor Operator I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NSE 455/555 and NSE 456/556 classes taught during spring and summer terms. Students successfully completing the NSE 455/555 and NSE 456/556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Equivalent to: NE 555

NSE 556, REACTOR OPERATOR TRAINING II, 4 Credits
The Oregon State University TRIGA Reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NSE 555. Students successfully completing NSE 456/NSE 556 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisite: NSE 555 with C or better or NE 555 with C or better
Equivalent to: NE 556

NSE 557, NUCLEAR REACTOR LABORATORY, 2 Credits
Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab.
Prerequisite: (NSE 551 with C or better or NE 550 with C or better) and (NSE 552 [C] or NE 552 [C])
Equivalent to: NE 557

NSE 559, SELECTED TOPICS IN NUCLEAR REACTOR ANALYSIS, 1-3 Credits
Topics associated with nuclear reactor theory not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 559
This course is repeatable for 45 credits.

NSE 561, NUCLEAR REACTOR SYSTEMS LABORATORY, 3 Credits
Operational aspects of nuclear reactor systems; neutronic and thermal-hydraulic characterization of nuclear reactors; examination of design basis accident prevention and mitigation; loss of coolant accidents; loss of flow accidents; station blackouts. Lec/lab.
Prerequisite: (NSE 553 with C or better or NE 553 with C or better) and (NSE 567 [C] or NE 567 [C])
Equivalent to: NE 561

NSE 562, RADIATION THERAPY, 3 Credits
The physics of radiation generation and delivery relevant to the field of clinical radiation oncology. Topics will include external beam radiation therapy; dosimetric calculations; high dose-rate and low dose-rate brachytherapy; electron beam dosimetry and treatment planning; special techniques in radiotherapy; and clinical radiation protection and quality assurance.
Prerequisite: NSE 531 with C or better or MP 531 with C or better or NE 531 with C or better or RHP 531 with C or better
Equivalent to: MP 562

NSE 563, APPLIED RADIATION THERAPY PHYSICS LABORATORY I, 3 Credits
The applied practice of therapeutic radiation physics for clinical radiation oncology. Topics will include current methodologies in treatment delivery and planning algorithms, best practices and protocols for quality assurance, special techniques in radiotherapy, and oncology.
Prerequisite: NSE 562 with C or better or MP 562 with C or better
Equivalent to: MP 563

NSE 564, APPLIED RADIATION THERAPY PHYSICS LABORATORY II, 3 Credits
Covers the applied practice of therapeutic radiation physics for clinical radiation oncology. Topics include current methodologies in SRS and ARC QA, treatment planning QA, adaptive radiotherapy, eye plaque brachytherapy and HDR braytherapy.
Equivalent to: MP 564

NSE 565, APPLIED THERMAL HYDRAULICS, 3 Credits
Advanced topics in the computational modeling of the hydrodynamic and heat transfer phenomena of nuclear reactors. Steady-state and transient solutions of one-dimensional nuclear reactor thermal hydraulic models. Nuclear reactor behavior analysis during various accident scenarios.
Equivalent to: NE 565

NSE 567, NUCLEAR REACTOR THERMAL HYDRAULICS, 4 Credits
Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes.
Equivalent to: NE 567

NSE 568, NUCLEAR REACTOR SAFETY, 3 Credits
Focused on probability risk assessment and system reliability analysis techniques applied to nuclear reactor safety. Application of these methods will be performed specifically through examination of neutronics and thermal hydraulic transients, effectiveness of emergency systems, accident prevention and mitigation, and assessment of radioactive release to the environment.
Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 567 [C] or NE 567 [C])
Equivalent to: NE 568

NSE 569, SELECTED TOPICS IN NUCLEAR REACTOR ENGINEERING, 1-6 Credits
Advanced nuclear engineering design concepts, reactor systems analysis techniques and innovative nuclear engineering applications. Artificial intelligence and expert system applications to nuclear engineering problems. Topics may vary from year to year.
Equivalent to: NE 569
This course is repeatable for 30 credits.
NSE 573, NUCLEAR REACTOR SYSTEMS ANALYSIS, 3 Credits
Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs.
Prerequisite: NSE 552 with C or better or NE 552 with C or better
Equivalent to: NE 573

NSE 574, NUCLEAR SYSTEMS DESIGN I, 4 Credits
Part I of a two-part series aimed at developing the student's ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills.
Equivalent to: RHP 574

NSE 575, NUCLEAR SYSTEMS DESIGN II, 4 Credits
Part II of a two-part series aimed at developing the student's ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills.
Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C]) and (NSE 574 [C] or NE 574 [C])
Equivalent to: RHP 575

NSE 582, APPLIED RADIATION SAFETY, 4 Credits
Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce health hazards at each of the following stages: design, prevention, assessment, and post-incident. A history of key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab.
Equivalent to: MP 582
Available via Ecampus

NSE 583, RADIATION BIOLOGY, 3 Credits
Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.
Equivalent to: MP 583
Available via Ecampus

NSE 584, RADIATION BIOLOGY II, 3 Credits
Application of radiobiological models in radiation therapy. Some background in radiation biology is strongly recommended.
Equivalent to: MP 584, RHP 584
Available via Ecampus

NSE 588, RADIOECOLOGY, 3 Credits
Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals.
Equivalent to: RHP 588
Recommended: NSE 481 or RHP 481 or NE 481
Available via Ecampus

NSE 590, INTERNAL DOSIMETRY, 3 Credits
Further development and more in-depth treatment of internal dosimetry concepts, theoretical basis of energy deposition, biokinetics, and estimation of radiation risk from ingested, inhaled, or injected radionuclides.
Prerequisite: NSE 531 with C or better and NSE 535 [C]
Equivalent to: NE 590, RHP 590
Available via Ecampus

NSE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

NSE 601, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: MP 601
This course is repeatable for 99 credits.

NSE 603, THESIS, 1-16 Credits
Equivalent to: MP 603
This course is repeatable for 999 credits.

NSE 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: MP 601
This course is repeatable for 16 credits.

NSE 606, PROJECTS, 1-16 Credits
Equivalent to: MP 606
This course is repeatable for 16 credits.

NSE 607, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: MP 607
This course is repeatable for 16 credits.

NSE 610, INTERNSHIP, 1-16 Credits
Equivalent to: MP 610
This course is repeatable for 16 credits.

NSE 654, COMPUTATIONAL PARTICLE TRANSPORT, 3 Credits
Properties of and methods for solution of the linear Boltzmann equation for nuclear reactors; spherical and double-spherical harmonics; integral equation methods; Monte Carlo methods.
Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C])
Equivalent to: NE 654
NSE 667, ADVANCED THERMAL HYDRAULICS, 3 Credits
Advanced topics in single- and two-phase hydrodynamics and heat transfer for nuclear reactors. Two-phase flow patterns, flow instabilities, condensation induced transients, convective boiling heat transfer, and current topics in reactor safety thermal hydraulics. Offered alternate years.
Prerequisite: NSE 567 with C or better or NE 567 with C or better
Equivalent to: NE 667

NSE 699, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

NSE 808, WORKSHOP, 1-4 Credits
This course is repeatable for 16 credits.

Outdoor Products (OP)
OP 101, INTRODUCTION TO THE OUTDOOR PRODUCTS INDUSTRY, 4 Credits

OP 231, EXPERIENCE OUTDOOR PRODUCTS - WATER, 2 Credits
Hands-on experience with multiple water-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

OP 232, EXPERIENCE OUTDOOR PRODUCTS - WINTER, 2 Credits
Hands-on experience with multiple winter-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

OP 233, EXPERIENCE OUTDOOR PRODUCTS - LAND, 2 Credits
Hands-on experience with multiple land-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

OP 301, OUTDOOR PRODUCTS PROCESS CONNECTIONS, 4 Credits
The interrelated processes and connections of product commercialization. How product design decisions impacts business considerations such as margin, inventory, supply chain, cash flow, and profitability. How design thinking and nurturing a design culture that promotes innovation is necessary for business success and growth. Challenges of product sales and distribution related to design.
Prerequisite: OP 231 with C- or better or OP 232 with C- or better or OP 233 with C- or better

OP 307, OUTDOOR PRODUCTS PRE-PRACTICUM SEMINAR, 1 Credit
Prerequisite: OP 101 with C- or better

OP 309, OUTDOOR PRODUCTS PRACTICUM, 1-6 Credits
This course is repeatable for 6 credits.

OP 351, OUTDOOR PRODUCTS DESIGN AND DEVELOPMENT I, 4 Credits
Explores needs-based design for Outdoor Products. Experiential-based projects related to function and design and understanding Design in context of Consumer Needs. Investigates design-choices impact upstream and downstream commercialization processes.
Prerequisite: OP 301 with C- or better

OP 352, OUTDOOR PRODUCTS DESIGN AND DEVELOPMENT II, 4 Credits
Exploration of development and product creation cycles for Outdoor Products. Bridging the design and operations phases of commercialization. Investigate quality, sample production, product testing, and costing. Managing how development decisions impact upstream and downstream commercialization processes.
Prerequisite: OP 351 with C- or better

OP 360, OUTDOOR PRODUCTS BRANDING, MERCHANDISING AND SALES, 4 Credits
Consumer behavior, emerging markets, building and nurturing brands, strategic communication. Content curation, merchandising and communication. Traditional and non-traditional sales channels.
Prerequisite: OP 352 with C- or better

OP 410, OUTDOOR PRODUCTS INTERNSHIP, 1-8 Credits
This course is repeatable for 8 credits.
ROB 421, APPLIED ROBOTICS, 4 Credits
Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/lab.
Prerequisite: ME 430 with C or better
Equivalent to: ENGR 421

ROB 456, INTELLIGENT ROBOTS, 4 Credits
Foundations of probabilistic reasoning for robotics. Topics include state estimation, robot motion, perception, localization and decision making under uncertainty.
Prerequisite: ST 314 with C or better
Recommended: CS 331, CS 361, ECE 353, or other programming experience

ROB 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

ROB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ROB 505, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ROB 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ROB 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ROB 514, INTRODUCTION TO ROBOTICS, 4 Credits
A broad introduction to the field of robotics, and to the graduate Robotics program. The goal of the class is to take students with different backgrounds (mechanical engineering, computer science, electrical engineering, physics, etc.) and give them a common base in the fundamentals of robotics. A secondary goal is to introduce students to the Robotics program, and to give them some of the skills that will make them successful, both in the program and as a professional roboticist.

ROB 521, RESEARCH ROBOTICS, 4 Credits
Multidisciplinary teams of students will use the backdrop of a robotics competition to generate a research question, then design, build, and demonstrate a robotic system that is used to answer this research question. An example may be a Jenga-playing robot, where students try a new computer vision algorithm, or test a theory on force control. This directly parallels graduate research in robotics, where systems-building is necessary, and toy problems can illustrate research results, but the important focus is a core research question. The specific competition task changes each year, and robots will compete at the end of the term. Lec/lab.
Equivalent to: ENGR 521

ROB 534, SEQUENTIAL DECISION MAKING IN ROBOTICS, 4 Credits
Examines sequential decision making in robotics with a focus on motion planning and related optimization problems applied to fielded systems in marine, aerial, and ground domains. Discussions regarding both fundamental background material as well as cutting edge research in the following areas: discrete planning, sampling-based planning, planning under uncertainty, multi-robot systems, optimization, and performance guarantees.

ROB 537, LEARNING-BASED CONTROL, 4 Credits
Provides an introduction to learning systems and their application to the control of nonlinear systems. Covered topics include neural networks, reinforcement learning, and evolutionary algorithms. Includes project component in which students write a technical paper and give a conference style presentation based on their project.
Equivalent to: ME 537

ROB 538, MULTIAGENT SYSTEMS, 4 Credits
Provides an introduction to multiagent systems. In particular, it focuses on how to coordinate agents using different approaches. Covered topics include multiagent learning, game theory, swarms, social choice, and auctions. Includes significant reading and critiquing of assigned papers.
Equivalent to: ME 538

ROB 541, GEOMETRIC MECHANICS, 4 Credits
An introduction to geometric methods in the analysis of dynamic systems. Using the kinematics of simple robotic systems as a motivating example, we explore topics such as manifolds and Lie groups, representations of velocity, holonomic and nonholonomic constraints, constraint curvature and response to cyclic inputs, distance metrics.
Recommended: Prior exposure to linear algebra and differential equations

ROB 542, ACTUATOR DYNAMICS, 4 Credits
Focuses on how inertia, spring compliance, and other passive dynamics affect highly dynamic, software-controlled systems. Examples include robotic manipulation tasks, robot-human interaction, CNC machines, or legged locomotion. Lec/lab.
Recommended: Prior courses on dynamics and control such as ME 531, ME 533, ME 535

ROB 545, ROBOTIC MANIPULATION, 4 Credits
Introduction to the mechanical processes governing manipulation with a focus on the kinematics, statics, and dynamics of interacting rigid bodies. Topics include numerical inverse kinematics, dynamics of open chains, and interaction control. Some manipulation problems considered include grasping, picking and placing, and assembly.
ROB 562, HUMAN CONTROL SYSTEMS, 4 Credits
Covers mechanisms of human motor systems and control of the neuromusculoskeletal anatomy followed by functional analysis of these system components. Then all the components are integrated to study feedback control dynamics. Covers classic to modern theories of motor control, adaptation, cognitive involvement, and rehabilitation techniques. 
Equivalent to: ME 539
Recommended: Basic feedback control systems, linear algebra, differential equations

ROB 564, SOFT ROBOTICS, 4 Credits
Soft robotics researchers propose building intelligent machines purely out of stretchable compressible soft materials. The course is centered on term-long projects that will result in real soft robots with the goal of presenting to the international community. The topics covered include rapid digital manufacturing, soft actuators, soft sensors, soft logic, soft energy, applications of soft robotics, and modeling soft mechanics.

ROB 567, HUMAN ROBOT INTERACTION, 4 Credits
The field of human-robot interaction brings together research and application of methodology from robotics, human factors, human-computer interaction, interaction design, cognitive psychology, education and other fields to enable robots to have more natural and more rewarding interactions with humans throughout their spheres of functioning.
Recommended: Background in one of human factors, usability/hci, programming experience, design

ROB 568, SOCIAL ROBOTICS, 4 Credits
In-depth exploration of the leading research, design principles, and challenges in Human-Robot Interaction (HRI), with an emphasis on socially interactive robots. Topics include social embodiment, multi-modal communication, human-robot teamwork, social learning, aspects of social psychology and cognition, as well as applications and evaluation with human subjects. Requires participation, lightning talks, student-led lectures, written critiques of class readings, and a group project involving a hypothetical social robotics project.

ROB 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 32 credits.

ROB 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

ROB 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ROB 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

Software Engineering (SE)

SE 201, SOFTWARE DEVELOPMENT I, 4 Credits
Introduction to collaborative software development of larger, object-oriented systems. Overview of software architecture, and the tools, principles and practice of modern software development.
Prerequisite: CS 162 with C or better

SE 299, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

SE 303, SOFTWARE ENGINEERING III, 4 Credits
Introduction to refactoring techniques and improving the quality and maintainability of software. Applying continuous integration and deployment tools; containers and virtual development environments.
Prerequisite: CS 362 with C or better

SE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

SE 467, BUSINESS OF SOFTWARE II, 4 Credits
Become an entrepreneur. Start a real software business, from ideation to sales. Real-world, hands-on learning in a fast-paced startup environment. Development of product ideas, hypotheses, and business models to discover customers. Teamwork, management, and positioning for investment.
Prerequisite: CS 466 with C or better

SE 468, BUSINESS OF SOFTWARE III, 4 Credits
Become an entrepreneur. Start a real software business, from ideation to sales. Real-world, hands-on learning in a fast-paced startup environment. Development of product ideas, hypotheses, and business models to discover customers. Teamwork, management, and positioning for investment.
Prerequisite: SE 467 with C or better

SE 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

Biological and Ecological Engineering

The Department of Biological and Ecological Engineering at OSU is involved in teaching, research and extended education relevant to the application of engineering analysis to biological, ecological and hydrological systems. The department has strength in graduate training and research and offers both an MS and PhD degree in Biological and Ecological Engineering. The graduate degree program is focused on the professional development of engineers and the analysis of environmental systems, hydrology and water resources. Activities within the department include water resource analysis, fate and transport of biologically relevant chemicals, bioreactor design and analysis, watershed analysis and resource management, simulation modeling of ecological and biological systems, regional and global hydrology, geographical information systems for environmental modeling, and the development of bio-based products and fuels.
Undergraduate Programs

Major
• Ecological Engineering (p. 605)

Minor
• Irrigation Engineering (p. 608)

Graduate Programs

Major
• Biological and Ecological Engineering (p. 603)

Minor
• Biological and Ecological Engineering (p. 604)

John P. Bolte, Director

Faculty

Professors Bolte, Godwin, Liu, Murthy, Selker, Tullos
Associate Professors Bachelet, Chaplen, Ely, Higgins
Assistant Professors Good, Jones, Udell, Vache

1 Licensed Professional Engineer.

BEE 101, ECOLOGICAL ENGINEERING I, 3 Credits
Introduction to engineering at OSU and the field of ecological engineering. Topics include engineering analysis and problem solving, professional ethics, the design process and teamwork.
Recommended: MTH 112

BEE 102, ECOLOGICAL ENGINEERING II, 3 Credits
Introduction to common problems and solutions in ecological engineering, emphasizing the multiplicity of approaches to constraining, analyzing, and resolving challenges of ecosystem management. Two overnight field trips to local ecological monitoring and engineering sites will be required.

BEE 103, ECOLOGICAL ENGINEERING III, 3 Credits
Programming hardware/software for sensing and control with applications in Ecological Engineering. Introduction to computational thinking strategies.

BEE 199, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BEE 221, FUNDAMENTALS OF ECOLOGICAL ENGINEERING, 3 Credits
Introduction to the concepts and practice of ecological engineering. Covers chemical behavior and cycling in the environment, chemical kinetics, and unit processes of conventional treatment systems. Topics are applied to develop ecological treatment alternatives that meet the needs of human societies.

BEE 222, ECOLOGICAL ENGINEERING COMPUTATION, 2 Credits
Develops programming skills in Python, including basic programming tasks, data analysis, data visualization, and optimization, with applications in Ecological Engineering. Builds computational thinking skills.

BEE 270, ECOLOGY FOR ENGINEERS, 3 Credits
The study of ecology in the context of engineering. Develops an understanding of the patterns associated with species distribution in the natural world. Examines the theories of competition, predation, disease and mutualism that help explain the functioning of biological communities. Discusses interactions between abiotic and organismal factors, the environment, and ecological properties and processes.

BEE 299, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BEE 311, ECOLOGICAL FLUID MECHANICS, 4 Credits
Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, ecological engineering applications. Lec/rec.
Prerequisite: (PH 212 with C or better or PH 212H with C or better) and (MTH 254 [C] or MTH 254H [C]) and (ENGR 211 [C] or ENGR 211H [C])

BEE 312, ECOHYDRAULICS, 4 Credits
Theory and design of hydraulic systems for ecological engineering applications. Lec/rec.
Prerequisite: BEE 311 with C or better or CE 311 with C or better or CHE 331 with C or better or CHE 331H with C or better

BEE 313, ECOHYDROLOGY, 4 Credits
Provides a quantitative description of fundamental ecohydrologic processes, the interactions of between water and the atmosphere, soils, and plants, as well as techniques for estimating the movement of water in the though ecosystems.
Prerequisite: BEE 312 with C or better and BEE 320 [C]

BEE 320, BIOSYSTEMS ANALYSIS AND MODELING, 4 Credits
An introduction to simulation modeling and analysis of a variety of biological and ecological systems. Systems approaches to describing ecological systems.
Prerequisite: BEE 222 with C or better and (MTH 256 [C] or MTH 256H [C])
Recommended: MTH 256
BEE 322, ECOLOGICAL ENGINEERING THERMODYNAMICS AND TRANSFER PROCESS, 4 Credits
A study of the transport processes of fluid flow, heat transfer and mass transfer applied to biological organisms and ecological systems.
Prerequisite: BEE 320 with C or better

BEE 361, ECOLOGICAL ENGINEERING LABORATORY, 3 Credits
Introduction to modern measurement methods for ecological and environmental applications includes sensors and systems for measuring soil, water and atmospheric properties. No final exam; field trip required.
Lec/lab.
Prerequisite: BEE 312 with C or better

BEE 362, ECOLOGICAL ENGINEERING MICROBIAL PROCESSES, 3 Credits
Applies ecological engineering principles to the modeling, analysis and design of microbial processes in the environment.
Prerequisite: BEE 320 with C or better or ENVE 322 with C or better

BEE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

BEE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

BEE 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BRE 405
This course is repeatable for 16 credits.

BEE 407, SEMINAR, 1-16 Credits
Departmental seminars. Graded P/N.
Equivalent to: BEE 407H, BRE 407
This course is repeatable for 16 credits.

BEE 407H, SEMINAR, 1-16 Credits
Departmental seminars. Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: BEE 407
This course is repeatable for 16 credits.

BEE 410, ECOLOGICAL ENGINEERING INTERNSHIP, 1-12 Credits
Internship in ecological engineering to provide students with an opportunity to apply course work and theory to the real world. Requires internship opportunity identification by student.
This course is repeatable for 12 credits.

BEE 411, GLOBAL ENVIRONMENTAL CHANGE: USING DATA TO INFORM DECISIONS, 3 Credits
Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.
Prerequisite: FE 257 with C or better
Available via Ecampus

BEE 415, PROFESSIONAL DEVELOPMENT, 1 Credit
Preparation for student professional careers. Students will interact with and hear seminars from professionals working in the ecological engineering field to learn from their experiences.
Corequisites: BEE 469

BEE 433, IRRIGATION SYSTEM DESIGN, 4 Credits
Principles of soil physics and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years.
Prerequisite: BEE 312 with C or better or CE 313 with C or better
Equivalent to: BRE 433

BEE 438, ECOLOGICAL SYSTEMS ANALYSIS, 4 Credits
An introduction to sustainability with a focus on case studies that are relevant to biological and ecological engineers. An introduction to tools that perform technical feasibility analysis, economic viability analysis, environmental risk assessment, resource sustainability assessment and life cycle assessment (LCA). Course will consist of theory and case studies highlighting the use of LCA methods to assess sustainability.
Prerequisite: ENGR 391 with C or better or ENGR 391H with C or better

BEE 439, IRRIGATION PRINCIPLES AND PRACTICES, 4 Credits
Survey of irrigation systems, system configurations, factors that influence irrigation efficiency, crop water requirements, energy requirements, pumps, irrigation scheduling. For non-engineers. Lec/lab/rec.
Prerequisite: MTH 111 with C or better
Equivalent to: BRE 439

BEE 446, RIVER ENGINEERING, 4 Credits
Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years.
Prerequisite: BEE 312 with C or better or CE 313 with C or better
Recommended: CE 313
BEE 458, NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL, 3 Credits
Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of Non-Point Source (NPS) pollutants in agricultural and urban environments.
Prerequisite: BEE 313 with C or better or CE 412 with C or better
Available via Ecampus

BEE 468, BIOREMEDIATION ENGINEERING, 4 Credits
Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. Lec/lab.
Prerequisite: BEE 221 with C or better or ENVE 322 with C or better
Available via Ecampus

BEE 469, ^ECOLOGICAL ENGINEERING DESIGN I, 4 Credits
Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
(Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: BEE 322 with C or better
Recommended: ENGR 391 or ENGR 391H

BEE 470, ECOLOGICAL ENGINEERING DESIGN II, 4 Credits
Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
Prerequisite: BEE 469 with C or better

BEE 472, INTRODUCTION TO FOOD ENGINEERING PRINCIPLES, 5 Credits
Fundamental engineering principles for scientists and non-process engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of food engineering principles.
Prerequisite: MTH 112 with C- or better and (MTH 227 [C-] or MTH 251 [C-]) or MTH 251H [C-]) and PH 201 [C-]
Equivalent to: BEE 452

BEE 473, INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN, 3 Credits
Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec.
Equivalent to: BEE 453
Recommended: BEE 472 or BEE 572

BEE 481, ^ECOLOGICAL ENGINEERING DESIGN I, 4 Credits
Explores engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: BEE 322 with C or better
Equivalent to: BEE 469

BEE 482, ECOLOGICAL ENGINEERING DESIGN II, 3 Credits
Designs engineering processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
Prerequisite: BEE 481 with C or better

BEE 483, ECOLOGICAL ENGINEERING DESIGN III, 2 Credits
Designs engineering processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.
Prerequisite: BEE 482 with C or better

BEE 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: BEE 499H, BRE 499
This course is repeatable for 16 credits.

BEE 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: BEE 499
This course is repeatable for 16 credits.

BEE 501, RESEARCH, 1-16 Credits
Equivalent to: BRE 501
This course is repeatable for 16 credits.

BEE 503, THESIS, 1-16 Credits
Equivalent to: BRE 503
This course is repeatable for 999 credits.

BEE 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BRE 505
This course is repeatable for 16 credits.

BEE 506, PROJECTS, 1-16 Credits
Equivalent to: BRE 506
This course is repeatable for 16 credits.
BEE 507, SEMINAR, 1 Credit
Section 1: Graduate Student Orientation Seminar to acquaint new graduate students with graduate school and departmental requirements, policies and expectations, and departmental research programs. Section 2: Graduate Research Publication Seminar to expose students to requirements for successful proposals and publication of research results. Section 3: Oral Presentation Improvement—A highly participatory educational effort designed to improve performance in presenting research reports, technical papers and in responding to oral examination questions. Graded P/N.
Equivalent to: BRE 507
This course is repeatable for 99 credits.

BEE 511, GLOBAL ENVIRONMENTAL CHANGE: USING DATA TO INFORM DECISIONS, 3 Credits
Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.
Available via Ecampus

BEE 512, PHYSICAL HYDROLOGY, 3 Credits
Principles of hydrologic processes and the integration of these processes into the hydrologic cycle. Topics include atmospheric processes, precipitation and runoff, storm response in streamflow on a watershed scale, and major concepts in groundwater systems.
Equivalent to: BRE 512
Recommended: One year of calculus.
Available via Ecampus

BEE 522, DATA ANALYSIS AND VISUALIZATION USING PYTHON, 3 Credits
Foundation course in computational thinking and computational skills relevant to data analysis and visualization of environmental data.

BEE 525, STOCHASTIC HYDROLOGY, 3 Credits
Introduction to fundamental concepts that are needed for stochastic modeling of hydrologic processes in presence of nonstationarity and uncertainty. CROSSLISTED as BEE 525/CE 525.
Prerequisite: CE 512 with C or better or BEE 512 with C or better
Equivalent to: CE 525

BEE 529, BIOSYS MODELING TECHNIQUES, 3 Credits
Development of mathematical models of biological and ecological systems; linear and nonlinear systems analysis; stochastic modeling and random processes; model solution and analysis techniques.

BEE 533, IRRIGATION SYSTEM DESIGN, 4 Credits
Principles of soil and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years.
Equivalent to: BRE 533
Recommended: ENGR 332

BEE 538, ECOLOGICAL SYSTEMS ANALYSIS, 4 Credits
An introduction to sustainability with a focus on case studies that are relevant to biological and ecological engineers. An introduction to tools that perform technical feasibility analysis, economic viability analysis, environmental risk assessment, resource sustainability assessment and life cycle assessment (LCA). Course will consist of theory and case studies highlighting the use of LCA methods to assess sustainability.
Recommended: ENGR 391 or ENGR391H

BEE 540, ENVIRONMENTAL TRANSPORT PROCESSES, 3 Credits
Mixing and transport processes in the environment.

BEE 544, OPEN CHANNEL HYDRAULICS, 4 Credits
Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods. Offered alternate years.
Equivalent to: BRE 544, CE 544
Recommended: MTH 254

BEE 545, SEDIMENT TRANSPORT, 4 Credits
Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as BEE 545/FE 545.
Equivalent to: BRE 545, FE 545
Recommended: CE 313 or FE 330

BEE 546, RIVER ENGINEERING, 4 Credits
Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years.
Equivalent to: CE 546
Recommended: CE 313
BEE 549, REGIONAL HYDROLOGIC MODELING, 3 Credits
Challenges in regional-scale water resource analysis and management with emphasis on application to production agriculture. Application of geostatistical techniques to spatially variable systems and remote sensing to large-scale water resource systems. Development of soil-water-atmosphere-plant models. Analysis of evapotranspiration estimating methods. Offered alternate years.
Equivalent to: BRE 549
Recommended: BEE 512 and MTH 256

BEE 558, NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL, 3 Credits
Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of Non-Point Source (NPS) pollutants in agricultural and urban environments.
Available via Ecampus

BEE 568, BIOREMEDIATION ENGINEERING, 4 Credits
Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. Lec/lab.
Available via Ecampus

BEE 572, INTRODUCTION TO FOOD ENGINEERING PRINCIPLES, 5 Credits
Fundamental engineering principles for scientists and non-process engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of process engineering principles.
Recommended: MTH 112 and (MTH 227 or MTH 251 or MTH 251H) and PH 201

BEE 573, INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN, 3 Credits
Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec.
Equivalent to: BEE 553
Recommended: BEE 472 or BEE 572

BEE 585, METABOLIC SYSTEMS ENGINEERING, 3 Credits
Quantitative and experimental approaches for describing and engineering biological networks and an introduction to the principles and methodologies of metabolic engineering and synthetic biology.
Equivalent to: BIOE 585
Recommended: Statistics, biology, biochemistry or microbiology.

BEE 586, PROBLEM SOLVING FOR METABOLIC SYSTEMS ENGINEERING, 1 Credit
Corequisites: BEE 585
Recommended: MTH 251 and MTH 252

BEE 599, SPECIAL TOPICS, 0-16 Credits
Equivalent to: BRE 599
This course is repeatable for 16 credits.

BEE 601, RESEARCH, 1-16 Credits
Equivalent to: BRE 601
This course is repeatable for 16 credits.

BEE 603, THESIS, 1-16 Credits
Equivalent to: BRE 603
This course is repeatable for 999 credits.

BEE 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: BRE 605
This course is repeatable for 16 credits.

BEE 606, PROJECTS, 1-16 Credits
Equivalent to: BRE 606
This course is repeatable for 16 credits.

BEE 607, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: BRE 607
This course is repeatable for 16 credits.

BEE 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Biological and Ecological Engineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration
Bio-based products and fuels, bioprocessing, biological systems analysis, ecosystems analysis and modeling, water quality, water resources

The Department of Biological and Ecological Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees.

The Biological and Ecological Engineering program serves at the interface of life sciences and engineering. Bioresource engineering is the application of engineering and life science principles and problem-solving techniques to the optimum use and sustainability of biological resources. The curriculum is engineering-based with a strong emphasis on the life sciences. Courses focus on biological systems modeling, bioprocess engineering, thermophysical and molecular properties of biological materials, regional hydrologic analysis, groundwater systems, irrigation and water resource optimization. The department
concentrates its research effort on two major thrusts: bioprocess engineering and water resources engineering. Specific research topics include biosensors, molecular-level biosystems analysis, nanosensors, microbial fuel cells, biological hydrogen production, and bio-based products and fuels. Research topics in water resources engineering include constructed wetland treatment systems, crop growth modeling, optimum irrigation management, crop-water requirements, groundwater and subsurface contaminant transport, hydrologic modeling, agricultural and ecological systems analysis, geographical information systems, artificial intelligence technologies, livestock production odor control, livestock waste treatment, and non-point source water pollution control.

For more information contact: Biological and Ecological Engineering Graduate Program, info-bee@oregonstate.edu, 541-737-2041.

**Biological and Ecological Engineering Graduate Minor**

The Biological and Ecological Engineering program serves at the interface of life sciences and engineering. Bioresource engineering is the application of engineering and life science principles and problem-solving techniques to the optimum use and sustainability of biological resources. The curriculum is engineering-based with a strong emphasis on the life sciences. Courses focus on biological systems modeling, bioprocess engineering, thermophysical and molecular properties of biological materials, regional hydrologic analysis, groundwater systems, irrigation and water resource optimization. The department concentrates its research effort on two major thrusts: bioprocess engineering and water resources engineering. Specific research topics include biosensors, molecular-level biosystems analysis, nanosensors, microbial fuel cells, biological hydrogen production, and bio-based products and fuels. Research topics in water resources engineering include constructed wetland treatment systems, crop growth modeling, agricultural and ecological systems analysis, geographical information systems, artificial intelligence technologies, livestock production odor control, livestock waste treatment, and non-point source water pollution control.

For more information contact: Biological and Ecological Engineering Graduate Program, info-bee@oregonstate.edu, 541-737-2041.

**Minor Code: 4500**

A graduate minor must be in an academic area that clearly supports the major. On a MS or PhD program, a minor may be:

1. An academic area available only as a minor
2. The same major with a different area of concentration
An approved major at another institution in the Oregon University System

An integrated minor

An integrated minor consists of a series of cognate courses from two or more areas. These courses must be outside the major area of concentration, with most of the courses being outside the major department. The graduate faculty member representing the integrated minor must be from outside the major department. Graduate minors are listed on the student’s transcript.

If a minor is declared, approximately two-thirds of the work must be in the major field and one-third in the minor field. The student’s advisory committee must include a member from the minor department.

A MS Graduate minor requires a minimum of 15 credits. A PhD Graduate minor requires a minimum of 18 credits.

Minor Code: 4500

Ecological Engineering Undergraduate Major (BS, HBS)

Ecological engineering (EcoE) is the design of sustainable systems consistent with ecological principles that integrate human activities into the natural environment to the benefit of both. Our systems-approach to engineering emphasizes diversity, resilience, and adaptation to maintain sustainability. Ecological engineering deals with both fundamental processes and engineering applications on scales that range from microscopic to watersheds and beyond. This discipline is rapidly developing as an important new area of engineering based on the science of ecological systems, with a number of dedicated journals, national and international professional societies, and new application areas emerging over the last decade. The Biological and Ecological Engineering Department at OSU has considerable expertise in this area and is among the national leaders in this discipline.

The Bachelor of Science and Honors Bachelor of Science degrees in Ecological Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The EcoE program is the first of its kind nationally, reflecting Oregon’s leadership in this new and exciting multidisciplinary field. The curriculum is divided into an ecological engineering core and a set of upper-division science and engineering electives. The ecological engineering core contains the introductory and upper-division course work that provides the common engineering and scientific basis for our students. The core consists of pre-professional courses, baccalaureate core requirements, required upper-division engineering courses, and required science courses. Selections are made to a total of 23 credits of engineering and science/public policy electives. This organization provides students with considerable flexibility in selecting their degree path.

Graduates with an Ecological Engineering degree will work to optimize the interface between humankind and the environment. Example activities undertaken might include river and wetland restoration, optimizing sensor arrays for ecological monitoring, improving productivity at agricultural and aquaculture facilities, managing the quality and quantity of water leaving farms, urban areas, landfills and industrial sites, and projection and adaptation of natural and anthropogenic systems to global climate and land use changes.

Oregon State University has strong programs in many of the basic and engineering sciences that underpin the Ecological Engineering degree program.

Graduates with an ecological engineering skill set may find employment with industrial clients, engineering consulting companies, governmental agencies, and entrepreneurial start-ups.

Program Educational Objectives and Student Outcomes are posted on the BEE website: https://bee.oregonstate.edu/biological-and-ecological-engineering/programs/undergraduate

Major Code: 450

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.
| MTH 253 | INFINITE SERIES AND SEQUENCES & MTH 341 | LINEAR ALGEBRA I |
| PH 211 | *GENERAL PHYSICS WITH CALCULUS & PH 212 | and *GENERAL PHYSICS WITH CALCULUS & PH 213 | and *GENERAL PHYSICS WITH CALCULUS |
| WR 121 | *ENGLISH COMPOSITION |

**Additional Courses**
- BEE 101: ECOLOGICAL ENGINEERING I
- BEE 221: FUNDAMENTALS OF ECOLOGICAL ENGINEERING
- BEE 222: ECOLOGICAL ENGINEERING COMPUTATION
- BEE 270: ECOLOGY FOR ENGINEERS

Select one of the following:
- CH 232 & CH 262: GENERAL CHEMISTRY and *LABORATORY FOR CHEMISTRY 232
- CH 122: *GENERAL CHEMISTRY

Select one of the following:
- CH 233 & CH 263: GENERAL CHEMISTRY and *LABORATORY FOR CHEMISTRY 233
- CH 123: *GENERAL CHEMISTRY

- HHS 231 & HHS 241: *LIFETIME FITNESS FOR HEALTH and *LIFETIME FITNESS (or any PAC course)

- SOIL 205 & SOIL 206: SOIL SCIENCE and *SOIL SCIENCE LABORATORY FOR SOIL 205

- ST 314 or ST 421: INTRODUCTION TO STATISTICS FOR ENGINEERS or INTRODUCTION TO MATHEMATICAL STATISTICS
- ST 422: INTRODUCTION TO MATHEMATICAL STATISTICS

- WR 237: *TECHNICAL WRITING

**Total Credits:** 88-94

**Code** | **Title** | **Credits**
--- | --- | ---
**Baccalaureate Core**

Select 51 credits

**Professional Core Courses (62 credits)**
- BEE 311: ECOLOGICAL FLUID MECHANICS
- BEE 312: ECODYNAMICS
- BEE 313: ECODYNAMICS
- BEE 320: BIOSYSTEMS ANALYSIS AND MODELING
- BEE 322: ECOLOGICAL ENGINEERING THERMODYNAMICS AND TRANSFER PROCESS
- BEE 361: ECOLOGICAL ENGINEERING LABORATORY
- BEE 362: ECOLOGICAL ENGINEERING MICROBIAL PROCESSES
- BEE 458: BIOREMEDIATION ENGINEERING
- BEE 481: *ECOLOGICAL ENGINEERING DESIGN I
- BEE 482: *ECOLOGICAL ENGINEERING DESIGN II
- BEE 483: *ECOLOGICAL ENGINEERING DESIGN III

**Upper-Division Science and Engineering Electives (23 credits)**

**Professional Skills Courses**
- BEE 415: PROFESSIONAL DEVELOPMENT
- FE 208: FOREST SURVEYING
- FE 257: GIS AND FOREST ENGINEERING APPLICATIONS

**Science and Public Policy**
- AEC 250: *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY or ECON 201: *INTRODUCTION TO MICROECONOMICS

**Ethics**
- Select one course from the following:
  - IE 380: *THE RESPONSIBLE ENGINEER
  - PHL 205/PHL 205H: *ETHICS
  - PHL 440/PHL 440H: *ENVIRONMENTAL ETHICS
  - PHL 443/PHL 443H: *WORLD VIEWS AND ENVIRONMENTAL VALUES

**Additional Perspectives and Synthesis Courses**
- Cultural Diversity
- Difference, Power, and Discrimination

**Upper-Division Science and Engineering Electives (23 credits)**

**Engineering Electives**
Select at least 10 non-blanket credits from the following:
- BEE 401: RESEARCH
- BEE 410: ECOLOGICAL ENGINEERING INTERNSHIP
- BEE 433: IRRIGATION SYSTEM DESIGN
- BEE 446: RIVER ENGINEERING
- BEE 458: NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL
- CE 411: OCEAN ENGINEERING
- CE 413: GIS IN WATER RESOURCES
- CE 415: COASTAL INFRASTRUCTURE
- CE 417: HYDRAULIC ENGINEERING DESIGN
- CE 465: OREGON LAND SURVEY LAW
- CE 469: PROPERTY SURVEYS
- CCE 201: CIVIL AND CONSTRUCTION ENGINEERING GRAPHICS AND DESIGN
- ENVE 421: DRINKING WATER TREATMENT PROCESSES
- ENVE 422: WASTEWATER TREATMENT PROCESSES
- ENVE 425: AIR POLLUTION CONTROL
- ENVE 431: FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS
- ENVE 456: SUSTAINABLE WATER RESOURCES DEVELOPMENT
- FE 310: FOREST ROUTE SURVEYING
- FE 315: SOIL ENGINEERING
- FE 316: SOIL MECHANICS
- FE 371: HARVESTING PROCESS ENGINEERING
- FE 423: UNMANNED AIRCRAFT SYSTEM REMOTE SENSING
- FE 430: WATERSHED PROCESSES
- FE 434: FOREST WATERSHED MANAGEMENT
- FE 457/CE 457: *TECHNIQUES FOR FOREST RESOURCE ANALYSIS
- FE 478/CE 479: *SLOPE AND EMBANKMENT DESIGN

**Science and Public Policy Electives**
Select at least 9 non-blanket credits from the following courses:
- AEC 351: *NATURAL RESOURCE ECONOMICS AND POLICY
- AEC 432: ENVIRONMENTAL LAW
- ANS 121: *INTRODUCTION TO ANIMAL SCIENCES
- ANS 251: PRINCIPLES OF ANIMAL FOODS TECHNOLOGY
- ANS 315: *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE
- ANS 351: ADVANCED PRINCIPLES OF ANIMAL FOODS TECHNOLOGY
- BA 262: SOCIAL ENTREPRENEURSHIP AND SOCIAL INITIATIVES
- BA 432: *ENVIRONMENTAL LAW, SUSTAINABILITY AND BUSINESS
- BB 350: ELEMENTARY BIOCHEMISTRY

### Irrigation Engineering Minor

The Irrigation Engineering minor is available to any undergraduate student accepted into the Ecological Engineering, Environmental Engineering, or Civil Engineering professional engineering programs. It exposes engineering students to agricultural, biological, and engineering sciences needed to specialize in agricultural and food-related industries.

**Minor Code:** 304

Total Credits **27**

* Baccalaureate Core Course (BCC)

### Other Degrees & Programs within the College of Engineering

#### Undergraduate Programs

**MAJORS**

- Engineering Science (p. 613)
- Outdoor Products (p. 617)

**Minors**

- Humanitarian Engineering (p. 614)
- International Engineering (p. 616)
- Outdoor Products (p. 616)

**Engineering Science (ENGR)**

**ENGR 003, UNDERGRADUATE RESEARCH, 0 Credits**

Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

**ENGR 101, DESIGN OF COFFEE, 2 Credits**

Roast coffee beans and brew and taste coffee while using engineering design to create the perfect cup of coffee using the least amount of electricity. Lec/rec.

*Available via Ecampus*
ENGR 111, ENGINEERING ORIENTATION I, 3 Credits
Engineering as a profession, historical development, ethics, curricula and engineering careers. Introduction to problem analysis and solution, data collection, accuracy and variability. Lec/rec.
Equivalent to: ENGR 111H

ENGR 112, INTRODUCTION TO ENGINEERING COMPUTING, 3 Credits
Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.
Equivalent to: ENGR 112H, ENGR 112H
Available via Ecampus

ENGR 112H, INTRODUCTION TO ENGINEERING COMPUTING, 3 Credits
Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 112

ENGR 199, SPECIAL TOPICS, 0-16 Credits
Graded P/N.
Equivalent to: ENGR 199H
This course is repeatable for 16 credits.

ENGR 201, ELECTRICAL FUNDAMENTALS I, 3 Credits
Prerequisite: (MTH 251 with C or better or MTH 251H with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: ENGR 201H
Available via Ecampus

ENGR 201H, ELECTRICAL FUNDAMENTALS I, 3 Credits
Attributes: HNRS – Honors Course Designator
Prerequisite: (MTH 251 with C or better or MTH 251H with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: ENGR 201

ENGR 202, ELECTRICAL FUNDAMENTALS II, 3 Credits
Sinusoidal steady-state analysis and phasors. Application of circuit analysis to solve single-phase and three-phase circuits including power, mutual inductance, transformers and passive filters. Lec/lab.
Prerequisite: ENGR 201 with C or better or ENGR 201H with C or better
Equivalent to: ENGR 202H
Available via Ecampus

ENGR 203, ELECTRICAL FUNDAMENTALS III, 3 Credits
Laplace transforms, Fourier series, Bode plots, and their application to circuit analysis.
Prerequisite: (ENGR 201 with C or better or ENGR 201H with C or better) and (ENGR 202 [C] or ENGR 202H [C]) and (MTH 256 [C] or MTH 256H [C])

ENGR 211, STATICS, 3 Credits
Analysis of forces induced in structures and machines by various types of loading. Lec/rec.
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: ENGR 211H
Available via Ecampus

ENGR 211H, STATICS, 3 Credits
Analysis of forces induced in structures and machines by various types of loading. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: ENGR 211

ENGR 212, DYNAMICS, 3 Credits
Kinematics, Newton’s laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec.
Prerequisite: (ENGR 211 with C or better or ENGR 211H with C or better) and (PH 211 [C] or PH 211H [C])
Equivalent to: ENGR 212H
Available via Ecampus

ENGR 212H, DYNAMICS, 3 Credits
Kinematics, Newton’s laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 211 with C or better or ENGR 211H with C or better) and (PH 211 [C] or PH 211H [C])
Equivalent to: ENGR 212

ENGR 213, STRENGTH OF MATERIALS, 3 Credits
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec.
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better
Equivalent to: ENGR 213H
Available via Ecampus

ENGR 213H, STRENGTH OF MATERIALS, 3 Credits
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better
Equivalent to: ENGR 213
ENGR 221, *THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY, 3 Credits
Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSTIED as ENGR 221/MATS 221.
Equivalent to: MATS 221
Recommended: One year of college science.

ENGR 248, ENGINEERING GRAPHICS AND 3-D MODELING, 3 Credits
Introduction to graphical communication theory, including freehand sketching techniques, geometric construction, multi-view, pictorial, sectional and auxiliary view representation and dimensioning techniques. Practical application of theoretical concepts using solid modeling software to capture design intent and generate engineering drawings. Lec/Lab.
Available via Ecampus

ENGR 299, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ENGR 299H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
This course is repeatable for 16 credits.

ENGR 350, *SUSTAINABLE ENGINEERING, 3 Credits
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

ENGR 350H, *SUSTAINABLE ENGINEERING, 3 Credits
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Available via Ecampus

ENGR 352, *CREATIVE COLLABORATION: DESIGNING AND BUILDING, 3 Credits
Working in multi-disciplinary teams, design, implement, and document a piece of public art work or science museum display. Projects may be made of any media, but must demonstrate creativity both in the engineering used to create them and the technology and society message they convey. CROSSTIED as ART 352/ENGR 352. (Bacc Core Course)
Attributes: CPLA – Core, Pers, Lit and Arts
Equivalent to: ART 352

ENGR 353, *ENERGY MATTERS, 3 Credits
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy use and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: ENGR 353H
Recommended: MTH 112 or higher

ENGR 353H, *ENERGY MATTERS, 3 Credits
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy use and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
Equivalent to: ENGR 353
Recommended: MTH 112 or higher

ENGR 360, ENGINEERING ECONOMY, 3 Credits
Time value of money; economic study techniques, depreciation, taxes, retirement, and replacement of engineering facilities.
Available via Ecampus

ENGR 361, ENGINEERING ECONOMICS AND PROJECT MANAGEMENT, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Equivalent to: ENGR 361H
Available via Ecampus

ENGR 361H, ENGINEERING ECONOMICS AND PROJECT MANAGEMENT, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 361
ENGR 399, SPECIAL TOPICS, 1-16 Credits
Equivalent to: ENGR 399H
This course is repeatable for 16 credits.
Available via Ecampus

ENGR 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 399
This course is repeatable for 16 credits.

ENGR 407, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: ENGR 407H
This course is repeatable for 16 credits.

ENGR 407H, SEMINAR, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 407
This course is repeatable for 16 credits.

ENGR 415, ENGINEERING CAPSTONE DESIGN I, 4 Credits
Utilizes engineering methodologies in a team environment to develop real-world solutions to an engineering problem. Develops all phases of system development, including project planning, requirements analysis, design, testing, configuration management, quality assurance, documentation, and delivery. First course/term of a two term design project.
Attributes: CWIC – Core, Skills, WIC

ENGR 416, ENGINEERING CAPSTONE DESIGN II, 4 Credits
Utilizes engineering methodologies in a team environment to develop real-world solutions to an engineering problem. Teams will be responsible for all phases of system development, including project planning, requirements analysis, design, testing, configuration management, quality assurance, documentation, and delivery. Second course/term of a two term design project.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ENGR 415 with C- or better

ENGR 450, PROFESSIONAL PREPARATION FOR BEGINNING LEVEL ENGINEERS, 1 Credit
Practical training on professional skills essential for a career as a practicing engineer. Covers development of networking and interviewing skills, preparation of a resume, job search strategies and guidance on future professional development.

ENGR 499, SPECIAL TOPICS, 1-16 Credits
Equivalent to: ENGR 499H
This course is repeatable for 16 credits.

ENGR 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ENGR 499
This course is repeatable for 16 credits.

ENGR 520, MENG INTRODUCTION TO PORTFOLIO, 1 Credit
Explores OSU resources, Graduate School, and College of Engineering requirements to prepare for work on an MEng final portfolio. Engages in writing skills necessary to complete the final portfolio. Investigates communication styles, Imposter Syndrome, understanding and coping mechanisms, and professional ethics as they relate to an MEng final portfolio.

ENGR 521, MENG PORTFOLIO COMPLETION, 1 Credit
Demonstrate how graduate learning outcomes have been met. Formulate clear and reasonable professional goals and articulate how the program has helped prepare for achievement of those goals. Create a final portfolio document summarizing core knowledge and its integration with other fields.
Prerequisite: ENGR 520 with C or better

ENGR 531, APPLIED IMAGING AND IMAGE PROCESSING, 3 Credits
Explore image formats, storage issues, characteristics and significance of histograms; define and explain image artifacts such as random and periodic noise. Implement different image processing operations such as filters, registration, and mathematical algorithms to enhance an image and facilitate subsequent segmentation such as histogram thresholding, cluster analysis, watershed analysis, etc. Make quantitative measurements from images, such as length, area, orientation, connectivity, anisotropy, and perimeter of objects, as well as porosities, surface areas and curvatures. Apply advanced image analysis via skeletonization, morphological/ topological analysis, surface generation/ triangulation etc.
This course is repeatable for 3 credits.
Recommended: Introductory preparation in mathematical analysis, vectors, matrices, probability, statistics, linear systems, and computer programming

ENGR 550, PROFESSIONAL PREPARATION FOR ENGINEERS, 1 Credit
Practical training on professional skills essential for a career as a practicing engineer. Covers development of networking and interviewing skills, preparation of a resume and related online media, and guidance on future professional development. As this is a graduate-level course, it will include guidance on how students can develop and present themselves in ways that differentiate their abilities from those of more junior engineers.
Available via Ecampus
ENGR 555, FOUNDATIONS OF ENGINEERING EDUCATION RESEARCH AND PRACTICE, 3 Credits
An examination as to why engineering education is practiced and researched the way that it is through reading, discussion and writing. The focus of the course will be on written and verbal interactions informed by careful reading of assigned texts.

ENGR 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Outdoor Products (OP)
OP 101, INTRODUCTION TO THE OUTDOOR PRODUCTS INDUSTRY, 4 Credits

OP 231, EXPERIENCE OUTDOOR PRODUCTS - WATER, 2 Credits
Hands-on experience with multiple water-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

OP 232, EXPERIENCE OUTDOOR PRODUCTS - WINTER, 2 Credits
Hands-on experience with multiple winter-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

OP 233, EXPERIENCE OUTDOOR PRODUCTS - LAND, 2 Credits
Hands-on experience with multiple land-related outdoor products in classroom and outdoor settings. Identifying key characteristics for consumers and implications for design, development, marketing, business, and sustainability. Evaluating product performance and developing ideas for objective improvements. Includes one mandatory weekend outdoor-experience outing.

OP 301, OUTDOOR PRODUCTS PROCESS CONNECTIONS, 4 Credits
The interrelated processes and connections of product commercialization. How product design decisions impacts business considerations such as margin, inventory, supply chain, cash flow, and profitability. How design thinking and nurturing a design culture that promotes innovation is necessary for business success and growth. Challenges of product sales and distribution related to design.
Prerequisite: OP 231 with C- or better or OP 232 with C- or better or OP 233 with C- or better

Science of Engineering (ESC)
ESC 111, INTRODUCTION TO ENGINEERING, 3 Credits
Describes different fields of engineering; Performs calculations and synthesize results; Develops critical thinking skills and apply to engineering problems; Applies engineering specific technical and soft skills.
Equivalent to: MIME 101
ESC 340, INTRO TO EXPERIMENTATION, 4 Credits
Theory and application of instrumentation and measurement techniques are covered. Course topics include fundamentals of sampling theory, error and uncertainty analysis, signal conditioning, sensor fundamentals, and data analysis. Laboratory exercises provide experience utilizing data acquisition hardware and software, as well as a variety of sensors for measuring parameters from mechanical and electrical engineering systems.
Prerequisite: CS 162 with C or better and ENGR 202 [C] and PH 213 [C] and ST 314 [C]

ESC 350, ENGINEERING MATERIALS, 4 Credits
An introduction to materials and their structures and properties. The physical and chemical phenomena responsible for the electrical, mechanical, and thermal behavior of solids will be studied.
Prerequisite: PH 213 with C or better and CH 232 [C]

ESC 401, RESEARCH, 1-16 Credits
Equivalent to: ESE 401
This course is repeatable for 4 credits.

ESC 497, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESC 497/ESE 497. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (ENGR 390 with C or better or BA 360 with C or better) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331 [C] or ME 331H [C]) and ESE 355 [C] and ESE 360 [C] and (ST 314 [C] or ST 314H [C]) and WR 327 [C]
Equivalent to: ESE 497, MIME 497

ESC 498, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ESE 497 with C or better or IE 497 with C or better or ME 497 with C or better or MIME 497 with C or better
Equivalent to: ESE 498, MIME 498

ESC 499, SPECIAL TOPICS, 4 Credits
This course is repeatable for 16 credits.

Engineering Science Undergraduate Major (BS, HBS)
Available only at OSU-Cascades.

The Engineering Science program is designed to provide students with a strong foundation in engineering fundamentals. The base of the T-shaped curriculum is a common core built from select courses across several engineering disciplines (industrial, electrical, and mechanical) as well as the science and mathematics courses required by those programs. The depth of the curriculum is provided by technical electives. Electives from a variety of different engineering disciplines are offered, and students can specialize by taking courses focused in a single area. Some of the many fields students graduating from this program will be ready to work in are industrial, electrical, mechanical, design, and process engineering. Additionally, they will be eligible for graduate studies in any of these fields.

Major Code: 072

Humanitarian Engineering Minor

The Humanitarian Engineering minor provides multidisciplinary academic course work for students interested in the application of engineering, science, and technology-based solutions to global development challenges such as access to basic resources (e.g., clean water, clean energy), improved quality of life, and increased ability to earn a livelihood particularly in rural, resource-limited or low-to-middle income settings. A core of course work in humanitarian engineering, science and technology (HEST) is required. Both in the core course work and in the electives, there is an emphasis on context including social, cultural, economic, resource, political, and environmental.

There are two categories of baccalaureate core courses that will count for thematic electives.

**Baccalaureate Core Playlist for Thematic Electives**

There are two categories of baccalaureate core courses that will count for thematic electives.

1. List I shows courses that are particularly recommended because of the relevance of material and/or instructor affiliation with the program.
2. List II contains all of the courses that will fulfill thematic elective credits for the minor.

- Baccalaureate Core Course (BCC)
  - 12 upper-division credits, taken as core, thematic electives and/or service learning courses, and a total of 27 credits are required to achieve the minor
- Pending approval by a humanitarian engineering advisor or faculty member
- Any additional credits beyond 12 taken from the HEST core and/or courses that are listed on the HEST Baccalaureate Core Playlist may count as thematic electives. Electives related to HEST outside of the Baccalaureate Core Playlist can be approved on a case-by-case basis based on relevance to HEST and the student’s interest in HEST. Case-by-case approvals may be granted, for example, for non-Baccalaureate-core courses in political science, public health, anthropology, sociology, engineering, economics, business, geography or others
- Study or work abroad, HEST 310, HEST 410, relevant undergraduate research or capstone design project, BA 367, Engineers Without Borders (EWB) or other service-learning/civic engagement as approved by the humanitarian engineering adviser. OSU’s Office of Civic Engagement can serve to connect students with opportunities

International Engineering Minor

The International Engineering minor offers undergraduate engineering students an opportunity to certify their global competencies and demonstrate their understanding of the intercultural needs of modern engineers. By combining an engineering experience abroad, courses from a generalized global core, thematic elective courses, and the signature course for the minor, students may demonstrate their readiness for the increasingly global field of engineering.

1 Each course in the global core also satisfies a baccalaureate core requirement. Students may complete some of these courses to fulfill their baccalaureate core while also applying those credits to the International Engineering minor if they choose.

* Baccalaureate Core Course (BCC)

^ Writing Intensive Course (WIC)

**Outdoor Products Minor**

Available only at OSU-Cascades.

The Outdoor Products program combines product commercialization, lands stewardship, and experiential learning to educate and inspire future leaders for the opportunities and challenges in the outdoor industry. Graduates of the program will lead by balancing product, profits, people, and the planet.

School of Chemical, Biological and Environmental Engineering

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE).

The Bachelor of Science and Honors Bachelor of Science degrees in Bioengineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The Bachelor of Science and Honors Bachelor of Science degrees in Chemical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The Bachelor of Science and Honors Bachelor of Science degrees in Environmental Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The Bachelor of Arts degrees in CHE, BIOE, and ENVE are not accredited by ABET.

The goals of the CBEE undergraduate program are consistent with the mission and goals of the College of Engineering, and focus on creating work- and leadership-ready graduates who will be successful in professional careers as a chemical engineer, bioengineer, or environmental engineer in the private or public sectors, including industry, government, and consulting, as well as for continued graduate study in the same or closely related fields.

Chemical engineering (CHE) is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products on a manufacturing scale.

Bioengineering (BIOE) is an interdisciplinary field that applies scientific and engineering principles to the development of new biologics, materials, devices, and processes in the broad areas of bioprocess, biomedical, and bioenvironmental technology.

Environmental engineering (ENVE) is the engineering discipline that applies scientific and engineering principles to improve the natural environment, to provide healthy water, air, and land, and to remediate polluted sites.

The educational objectives and curriculum are described separately for each CHE, BIOE, and ENVE program. The school has a core undergraduate curriculum where CHE, BIOE, and ENVE students take common courses in first through senior years, including first-year engineering, process material and energy balances, thermodynamics and transport phenomena, and senior year laboratory.

The school also offers graduate programs in bioengineering, chemical engineering, and environmental engineering leading to MEng, MS, and PhD degrees.

Undergraduate Programs

Majors

• Bioengineering (p. 628)
• Chemical Engineering (p. 631)
• Environmental Engineering (p. 635)

Minor

• Environmental Engineering (p. 635)

Graduate Programs

Majors

• Bioengineering (p. 628)
• Chemical Engineering (p. 630)
• Environmental Engineering (p. 634)

Minors

• Chemical Engineering (p. 631)
• Environmental Engineering (p. 635)

Faculty

Professors Chang, Herman, Jovanovic, Koretsky, Rorrer, Semprini, Wildenschild, Wood
Associate Professors Bothwell, Dolan, Harper, Higgins, Kelly, Nason, Rocheffort
Assistant Professors AuYeung, Arnadottir, Baio, Feng, Fu, Giers, Goulas, Montfort, Navab Daneshmand, Radniecki, Schilke, Simon, Stoerzinger
Professional Practice Engineers Carlisle, Mallette
Linus Pauling Engineer Harding

1 Licensed professional engineer

**Biological Engineering (BIOE)**

**BIOE 199, SPECIAL TOPICS, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 299, SPECIAL TOPICS, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 340, BIOMEDICAL ENGINEERING PRINCIPLES, 3 Credits**
Application of engineering concepts (mass and energy conservation, thermodynamics, and transport phenomena) to cellular- and system-level human physiology; design considerations for biomedical interventions and devices.

**Prerequisite:** BI 231 with C or better and BI 233 (may be taken concurrently) [C] and CBEE 213 (may be taken concurrently) [C] and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])

**Recommended:** Completion or concurrent enrollment in BI 233 and (CHE 333 or CHE 333H)

**BIOE 351, BIOMATERIALS AND BIOINTERFACES, 3 Credits**
Material interactions with human tissue, with emphasis on the role of interfacial chemistry and physics in cell adhesion, infection, blood coagulation and thrombosis. Preparation of functional hydrogels, material coatings, and derivitizations, including immobilized bio-active molecules. Issues surrounding regulation of implants and device failure.

**Prerequisite:** BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

**Recommended:** BB 451 and CHE 333

**BIOE 399, SPECIAL TOPICS, 0-16 Credits**
Equivalent to: BIOE 399H
This course is repeatable for 16 credits.

**BIOE 401, RESEARCH, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 403, THESIS, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 405, READING AND CONFERENCE, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 406, PROJECTS, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 407, SEMINAR, 1-16 Credits**
This course is repeatable for 16 credits.

**BIOE 415, BIOENGINEERING LABORATORY, 3 Credits**
Laboratory experimentation with unit operations and processes in bioengineering; preparation of technical reports.

**Prerequisite:** CBEE 414 with C or better

**BIOE 420, SOCIAL JUSTICE, ETHICS, AND ENGINEERING, 3 Credits**
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.

**Prerequisite:** CBEE 320 with C or better

**BIOE 440, BIOCONJUGATION, 3 Credits**
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.

**Prerequisite:** BB 450 with C or better

**BIOE 445, SURFACE ANALYSIS, 3 Credits**
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.

**Prerequisite:** BIOE 351 (may be taken concurrently) with C or better

**BIOE 457, BIOREACTORS, 3 Credits**
Design and analysis of bioreactors using suspension and immobilized microbial cultures.

**Prerequisite:** (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

**BIOE 459, CELL ENGINEERING, 3 Credits**
Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g., cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells.

**Prerequisite:** (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

**Recommended:** BB 451 and CHE 333

**BIOE 462, BIOSEPARATIONS, 3 Credits**
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.

**Prerequisite:** (BB 451 with C or better or BB 451H with C or better) and (CHE 333 [C] or CHE 333H [C])

**BIOE 490, BIOENGINEERING PROCESS DESIGN, 4 Credits**

**Prerequisite:** BIOE 415 with C or better and BIOE 457 [C] and BIOE 462 [C]

**BIOE 491, BIOENGINEERING PRODUCT DESIGN, 4 Credits**
Design of biomedical and biotechnology-based products by a structured design process that considers customer and regulatory needs.

**Prerequisite:** BIOE 340 with C or better and (BB 451 [C] or BB 451H [C])
BIOE 492, BIOENGINEERING CAPSTONE DESIGN, 4 Credits
Culminating experience in bioengineering design of processes and devices. Includes capstone project prototyping, testing and documentation, and constraints in ethics, intellectual property, standards, regulatory, and manufacturing.
Prerequisite: BIOE 491 with C or better

BIOE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

BIOE 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 3 credits.

BIOE 511, CELLULAR AND MOLECULAR BIOENGINEERING, 3 Credits
Fundamentals of mammalian cell biology, with an emphasis on biomedical applications and engineering approaches to study and manipulate cells and tissues.
Recommended: A working knowledge of cell biology and biochemistry

BIOE 512, MODELING OF PHYSIOLOGICAL SYSTEMS, 4 Credits
Integration of engineering principles and human physiology in the areas of: transport phenomena in the cardiopulmonary and renal systems, bioelectricity in the nervous system, and mechanics of the musculoskeletal system.

BIOE 513, DRUG AND MEDICAL DEVICE REGULATIONS IN TECHNOLOGY DEVELOPMENT, 2 Credits
Overview of the processes by which drugs and devices are regulated by the Food and Drug Administration. Topics include drug and device classifications, approval routes for different classes of drugs and devices, current good manufacturing practices, process validation, and quality assurance and control.
Available via Ecampus

BIOE 520, SOCIAL JUSTICE, ETHICS, AND ENGINEERING, 3 Credits
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.

BIOE 540, BIOCONJUGATION, 3 Credits
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.
Recommended: BB 450

BIOE 545, SURFACE ANALYSIS, 3 Credits
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.
Recommended: BIOE 351

BIOE 557, BIOREACTORS, 3 Credits
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Recommended: (BB 451 or BB 451H) and (CHE 333 or CHE 333H)

BIOE 562, BIOSEPARATIONS, 3 Credits
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.
Recommended: BB 451 and CHE 332

BIOE 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 603, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

Chemical, Biological and Environmental Engineering (CBEE)

CBEE 101, CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION, 3 Credits
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies.
Equivalent to: CBEE 101H

CBEE 101H, CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION, 3 Credits
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies.
Attributes: HNRS – Honors Course Designator
Equivalent to: CBEE 101

CBEE 102, ENGINEERING PROBLEM SOLVING AND COMPUTATIONS, 3 Credits
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Prerequisite: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: BIOE 102, CBEE 102H, CHE 102, ENVE 102

BIOE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 503, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

BIOE 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 3 credits.

BIOE 511, CELLULAR AND MOLECULAR BIOENGINEERING, 3 Credits
Fundamentals of mammalian cell biology, with an emphasis on biomedical applications and engineering approaches to study and manipulate cells and tissues.
Recommended: A working knowledge of cell biology and biochemistry

BIOE 512, MODELING OF PHYSIOLOGICAL SYSTEMS, 4 Credits
Integration of engineering principles and human physiology in the areas of: transport phenomena in the cardiopulmonary and renal systems, bioelectricity in the nervous system, and mechanics of the musculoskeletal system.

BIOE 513, DRUG AND MEDICAL DEVICE REGULATIONS IN TECHNOLOGY DEVELOPMENT, 2 Credits
Overview of the processes by which drugs and devices are regulated by the Food and Drug Administration. Topics include drug and device classifications, approval routes for different classes of drugs and devices, current good manufacturing practices, process validation, and quality assurance and control.
Available via Ecampus

BIOE 520, SOCIAL JUSTICE, ETHICS, AND ENGINEERING, 3 Credits
Examination of difference, power, and discrimination in engineering education and practice. Lec/rec.

BIOE 540, BIOCONJUGATION, 3 Credits
Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis.
Recommended: BB 450

BIOE 545, SURFACE ANALYSIS, 3 Credits
The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature.
Recommended: BIOE 351

BIOE 557, BIOREACTORS, 3 Credits
Design and analysis of bioreactors using suspension and immobilized microbial cultures.
Recommended: (BB 451 or BB 451H) and (CHE 333 or CHE 333H)

BIOE 562, BIOSEPARATIONS, 3 Credits
Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors.
Recommended: BB 451 and CHE 332

BIOE 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

BIOE 603, THESIS, 1-16 Credits
Graded P/N.
This course is repeatable for 999 credits.

Chemical, Biological and Environmental Engineering (CBEE)

CBEE 101, CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION, 3 Credits
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies.
Equivalent to: CBEE 101H

CBEE 101H, CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION, 3 Credits
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies.
Attributes: HNRS – Honors Course Designator
Equivalent to: CBEE 101

CBEE 102, ENGINEERING PROBLEM SOLVING AND COMPUTATIONS, 3 Credits
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Prerequisite: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: BIOE 102, CBEE 102H, CHE 102, ENVE 102
CBEE 102H, ENGINEERING PROBLEM SOLVING AND COMPUTATIONS, 3 Credits
Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better
Equivalent to: CBEE 102

CBEE 111, ENGINEERING PROBLEM SOLVING FUNDAMENTALS, 3 Credits
Engineering problem solving, dimensional analysis, sketches and drawings, algorithmic thinking, arrays and indexing, understanding the operating system and file handling, the concepts of programming languages and syntax, troubleshooting approaches to coding. Lec/Studio
This course is repeatable for 3 credits.

CBEE 211, MATERIAL BALANCES AND STOICHIOMETRY, 3 Credits
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: BIOE 211, CBEE 211H, CHE 211, ENVE 211
Recommended: General chemistry and second-year standing in engineering

CBEE 211H, MATERIAL BALANCES AND STOICHIOMETRY, 3 Credits
Material balances, thermophysical, and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: MTH 252 with C or better or MTH 252H with C or better
Equivalent to: CBEE 211
Recommended: General chemistry and second-year standing in engineering

CBEE 212, ENERGY BALANCES, 3 Credits
Energy balances, thermophysical and thermochemical calculations. Lec/rec.
Prerequisite: CBEE 211 with C or better or CBEE 211H with C or better and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: BIOE 212, CBEE 212H, CHE 212, ENVE 212
Recommended: One year general chemistry and second-year standing in engineering

CBEE 212H, ENERGY BALANCES, 3 Credits
Energy balances, thermophysical and thermochemical calculations. Lec/rec.
Attributes: HNRS – Honors Course Designator
Prerequisite: (CBEE 211 with C or better or CBEE 211H with C or better) and (MTH 256 (may be taken concurrently) [C] or MTH 256H (may be taken concurrently) [C])
Equivalent to: CBEE 212
Recommended: One year general chemistry and second-year standing in engineering

CBEE 213, PROCESS DATA ANALYSIS, 4 Credits
Applications of material and energy balances, with an emphasis on data analysis important to chemical engineers, bioengineers, and environmental engineers. Contextual learning is emphasized through the laboratory component and the use of process flow simulation modeling and analysis software.
Prerequisite: CBEE 212 (may be taken concurrently) with C or better or CBEE 212H (may be taken concurrently) with C or better
Equivalent to: BIOE 213, CHE 213, ENVE 213

CBEE 280, MATERIAL AND ENERGY BALANCES, 0-6 Credits
Material balances, thermophysical, and thermochemical calculations. Energy balances, thermophysical and thermochemical calculations.
Prerequisite: MTH 256 (may be taken concurrently) with C or better or MTH 256H (may be taken concurrently) with C or better
This course is repeatable for 6 credits.
Available via Ecampus

CBEE 320, PROFESSIONALISM AND ENGINEERING ETHICS, 3 Credits
Introduction to engineering ethics. Topics include ethical theory, professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, risk and safety, loyalty and dissent, as well as overarching professional concerns.
Prerequisite: CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better
Equivalent to: BIOE 320

CBEE 414, PROCESS ENGINEERING LABORATORY, 3 Credits
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: BIOE 414, CBEE 414H, CHE 414, CHE 414H, ENVE 414
CBEE 414H, ^PROCESS ENGINEERING LABORATORY, 3 Credits
Unit operations and unit processes; preparation of technical reports. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC; HNRS – Honors Course Designator
Prerequisite: CBEE 213 (may be taken concurrently) with C or better and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C])
Equivalent to: CBEE 414

CBEE 416, CBEE LABORATORY II, 3 Credits
Integration of overall knowledge of chemical, biological, and environmental engineering through group project activities culminating with public demonstration or display of project results.
Prerequisite: CHE 415 with C or better or CHE 415H with C or better or BIOE 415 with C or better or ENVE 415 with C or better
Equivalent to: CHE 416

CBEE 507, SEMINAR, 1 Credit
Graded P/N.
This course is repeatable for 6 credits.

Chemical Engineering (CHE)
CHE 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: CHE 199H
This course is repeatable for 99 credits.

CHE 199H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 199

CHE 299, PROFESSIONAL WORKSKILLS, 1-16 Credits
Equivalent to: CHE 299H
This course is repeatable for 99 credits.
Available via Ecampus

CHE 311, THERMODYNAMICS, 3 Credits
Entropy, the second law of thermodynamics, equations of state, and thermodynamic network.
Prerequisite: (CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better) and (MTH 256 [C] or MTH 256H [C])

CHE 312, CHEMICAL ENGINEERING THERMODYNAMICS, 3 Credits
Thermodynamic mixtures, fugacity, phase equilibrium, and chemical reactions equilibrium.
Prerequisite: CHE 311 with C or better

CHE 320, SAFETY, ENGINEERING ETHICS AND PROFESSIONALISM, 3 Credits
Introduction to engineering ethics and safety concepts. Topics include professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, loyalty and dissent, life-long learning, hazard identification, risk and safety, and process safety management. Lec/rec.
Prerequisite: CBEE 212 with C or better or CBEE 212H with C or better or CBEE 280 with C or better

CHE 331, TRANSPORT PHENOMENA I, 4 Credits
Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment.
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (CBEE 212 (may be taken concurrently) [C] or CBEE 212H (may be taken concurrently) [C])
Equivalent to: CHE 323, CHE 331H

CHE 331H, TRANSPORT PHENOMENA I, 4 Credits
Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment.
Attributes: HNRS – Honors Course Designator
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (CBEE 212 (may be taken concurrently) [C] or CBEE 212H (may be taken concurrently) [C])
Equivalent to: CHE 331

CHE 332, TRANSPORT PHENOMENA II, 3 Credits
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Prerequisite: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332H

CHE 332H, TRANSPORT PHENOMENA II, 3 Credits
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations.
Attributes: HNRS – Honors Course Designator
Prerequisite: CHE 311 with C or better and (CHE 331 [C] or CHE 331H [C])
Equivalent to: CHE 332

CHE 333, TRANSPORT PHENOMENA III, 3 Credits
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio.
Prerequisite: CHE 331 with C or better or CHE 331H with C or better or CHE 332 with C or better or CHE 332H with C or better
Equivalent to: CHE 333H

CHE 333H, TRANSPORT PHENOMENA III, 3 Credits
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio.
Attributes: HNRS – Honors Course Designator
Prerequisite: CHE 331 with C or better or CHE 331H with C or better or CHE 332 with C or better or CHE 332H with C or better
Equivalent to: CHE 333
2020-2021.pdf

CHE 334, TRANSPORT PHENOMENA LABORATORY, 3 Credits
Engineering lab practices and the application of the macroscopic balances of mass, energy, and chemical species; fluid flow, heat and mass transfer experiments by teams for demonstrations of principles established in previous transport phenomena courses.
Prerequisite: CBEE 213 (may be taken concurrently) with C or better and (CHE 333 (may be taken concurrently) [C] or CHE 333H (may be taken concurrently) [C])

CHE 361, CHEMICAL PROCESS DYNAMICS AND SIMULATION, 3 Credits
Fundamental principles for process dynamic modeling used in the control of process variables such as pressure, temperature, flow rate and chemical composition.
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (CHE 331 [C] or CHE 331H [C])
Recommended: CBEE 102 and completion of concurrent enrollment in (CHE 331 or CHE 331H)

CHE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CHE 401, RESEARCH, 1-16 Credits
Equivalent to: CHE 401H
This course is repeatable for 16 credits.

CHE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CHE 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: CHE 405H
This course is repeatable for 16 credits.

CHE 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: CHE 405
This course is repeatable for 16 credits.

CHE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CHE 408, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

CHE 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

CHE 411, MASS TRANSFER OPERATIONS, 4 Credits
Mass transfer operations; design of separation processes. Lec/rec.
Prerequisite: CHE 312 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 415, CHEMICAL ENGINEERING LABORATORY I, 3 Credits
Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec.
Prerequisite: CBEE 414 with C or better and CHE 411 [C] and CHE 443 [C] and CHE 361 (may be taken concurrently) [C]
Equivalent to: CHE 415H, ENVE 415

CHE 417, INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGINEERING, 4 Credits
Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
Prerequisite: CH 332 with C or better or CH 335 with C or better
Recommended: (CH 231 or CH 231H) and (CH 261 or CH 261H) and (CH 232 or CH 232H) and (CH 262 or CH 262H) and (CH 233 or CH 233H) and (CH 263 or CH 263H)

CHE 431, CHEMICAL PLANT DESIGN I, 3 Credits
Short-cut techniques and other abbreviated and useful methods for specifying equipment sufficient for the preliminary design of processes and equipment; estimating capital and manufacturing costs based on equipment specifications.
Prerequisite: CHE 312 with C or better and CHE 411 [C] and CHE 443 [C]

CHE 432, CHEMICAL PLANT DESIGN II, 3 Credits
Transformation of preliminary design to detailed design; introduction to safety, ethical, economical, and environmental considerations in chemical plant design.
Prerequisite: CHE 431 with C or better

CHE 443, CHEMICAL REACTION ENGINEERING, 4 Credits
Design of chemical reactors for economical processes and waste minimization. Contacting patterns, kinetics and transport rate effects in single phase and catalytic systems.
Prerequisite: CHE 312 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 444, THIN FILM MATERIALS PROCESSING, 4 Credits
Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec.
Prerequisite: CHE 443 (may be taken concurrently) with C or better
Recommended: CHE 443
CHE 445, POLYMER ENGINEERING AND SCIENCE, 4 Credits
Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec.
Recommended: CH 334 and CH 335 and CH 336 and (MTH 256 or MTH 256H) and/or junior standing in engineering or science

CHE 450, CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS, 3 Credits
Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.
Prerequisite: CHE 311 (may be taken concurrently) with C or better or ME 311 (may be taken concurrently) with C or better or ME 311H (may be taken concurrently) with C or better or CH 440 (may be taken concurrently) with C or better

CHE 451, SOLAR ENERGY TECHNOLOGIES, 3 Credits
A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems.
Prerequisite: CHE 311 (may be taken concurrently) with C or better or ME 311 (may be taken concurrently) with C or better or ME 311H (may be taken concurrently) with C or better or CH 440 (may be taken concurrently) with C or better
Recommended: CHE 311

CHE 452, ELECTROCHEMICAL ENERGY SYSTEMS, 3 Credits
Introduces principles and processes of electrochemical energy storage and conversion systems. Topics include fundamentals of electrochemistry and concepts of electrochemical energy storage systems. Examples from batteries, fuel cells, supercapacitors devices will be discussed. Lec/rec.
Prerequisite: CHE 311 with C or better and (CHE 333 [C] or CHE 333H [C])

CHE 461, PROCESS CONTROL, 3 Credits
Principles of PID feedback control based on models of chemical processes; analysis and implementation of proportional, integral and derivative tuning; cascade, feedforward, ratio and deadtime compensation; multivariable control and control system design issues and methods.
Prerequisite: (CHE 331 with C or better or CHE 331H with C or better) and (CHE 332 (may be taken concurrently) [C] or CHE 332H (may be taken concurrently) [C]) and CHE 361 [C]

CHE 499, SPECIAL TOPICS, 0-4 Credits
This course is repeatable for 8 credits.

CHE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CHE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CHE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CHE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CHE 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CHE 514, FLUID FLOW, 4 Credits
Fundamentals of fluid dynamics for Newtonian and non-Newtonian fluids; flow through porous media; two-phase flow. Lec/rec.

CHE 517, INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGINEERING, 4 Credits
Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
Recommended: (CH 231 and CH 261 and CH 232 and CH 262 and CH 233 and CH 263)

CHE 520, MASS TRANSFER I, 4 Credits

CHE 525, CHEMICAL ENGINEERING ANALYSIS, 4 Credits
Modeling of physical and chemical processes; mathematical analysis of models with appropriate advanced techniques.

CHE 537, CHEMICAL ENGINEERING THERMODYNAMICS I, 4 Credits
Applications of the fundamental laws of thermodynamics to complex systems. Properties of solutions of non-electrolytes. Phase and chemical equilibrium.

CHE 540, CHEMICAL REACTORS I, 4 Credits
Catalysis, reactions coupled with transport phenomena. Reactors for high tech applications.

CHE 541, CATALYSIS, 3 Credits
Introduction to topics related to catalysts and catalytic reactions. Course covers catalytic reaction mechanisms and kinetics, catalyst characterization and testing, and catalyst preparation and manufacturing processes.
CHE 542, MOLECULAR ASPECTS OF HETEROGENEOUS CATALYSIS, 3 Credits
Introducing the principles of heterogeneous catalysis from the molecular aspect with emphasis on computational molecular approaches and surface science. The role of surface structure in heterogeneous catalytic reactions and surface interactions, development and analysis of reaction kinetics through microkinetic modeling approaches will be covered. A class project will utilize Density Functional Theory software to calculate catalytic properties of model systems.
Prerequisite: CHE 540 with C or better

CHE 544, THIN FILM MATERIALS PROCESSING, 4 Credits
Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization.
Recommended: CHE 443 or CHE 543

CHE 545, POLYMER ENGINEERING AND SCIENCE, 4 Credits
Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec.
Recommended: CH 334 and CH 335 and CH 336 and MTH 256

CHE 550, CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS, 3 Credits
Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.
Recommended: CHE 311 or ME 311 or ME 311H

CHE 551, SOLAR ENERGY TECHNOLOGIES, 3 Credits
A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems.
Recommended: CHE 311

CHE 552, ELECTROCHEMICAL ENERGY SYSTEMS, 3 Credits
Introduces principles and processes of electrochemical energy storage and conversion systems. Topics include fundamentals of electrochemistry and concepts of electrochemical energy storage systems. Examples from batteries, fuel cells, supercapacitors devices will be discussed. Lec/rec.
Recommended: CHE 311 AND (CHE 333 or CHE 333H)

CHE 581, SELECTED TOPICS, 3 Credits
Non-sequence course designed to acquaint students with recent advances in chemical engineering. Topics vary from term to term and from year to year. May be repeated for credit.
This course is repeatable for 9 credits.
Available via Ecampus

CHE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CHE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CHE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CHE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CHE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CHE 611, ELECTRONIC MATERIALS PROCESSING, 3 Credits
Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as CHE 611/ECE 611.
Equivalent to: CHE 571, ECE 611

CHE 612, PROCESS INTEGRATION, 3 Credits
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as CHE 612/ECE 612.
Equivalent to: CHE 572, ECE 612
Recommended: CHE 611 or ECE 611

CHE 613, ELECTRONIC MATERIALS AND CHARACTERIZATION, 3 Credits
Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as CHE 613/ECE 613.
Equivalent to: CHE 573, ECE 613

Environmental Engineering (ENVE)

ENVE 199, SPECIAL TOPICS, 1-16 Credits
Seminar course that includes invited speakers. Open to all students interested in learning about the Environmental Engineering undergraduate program and potential career opportunities. Graded P/N. This course is repeatable for 16 credits.

ENVE 299, SPECIAL TOPICS, 0-16 Credits
Equivalent to: ENVE 299H
This course is repeatable for 16 credits.
ENVE 299H, SPECIAL TOPICS, 0-16 Credits  
Attributes: HNRS – Honors Course Designator  
Equivalent to: ENVE 299  
This course is repeatable for 16 credits.

ENVE 321, ENVIRONMENTAL ENGINEERING FUNDAMENTALS, 4 Credits  
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution.  
Prerequisite: MTH 256 with C or better or MTH 256H with C or better

ENVE 322, FUNDAMENTALS OF ENVIRONMENTAL ENGINEERING, 4 Credits  
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution.  
Prerequisite: (CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 225H with C or better) and (MTH 256 [C] or MTH 256H [C])

ENVE 401, RESEARCH, 1-16 Credits  
This course is repeatable for 16 credits.

ENVE 403, THESIS, 1-16 Credits  
This course is repeatable for 16 credits.

ENVE 405, READING AND CONFERENCE, 1-16 Credits  
This course is repeatable for 16 credits.

ENVE 406, SPECIAL PROJECTS, 1-16 Credits  
This course is repeatable for 16 credits.

ENVE 407, SEMINAR, 1-16 Credits  
Equivalent to: ENVE 407H  
This course is repeatable for 16 credits.

ENVE 407H, SEMINAR, 1-16 Credits  
Attributes: HNRS – Honors Course Designator  
Equivalent to: ENVE 407  
This course is repeatable for 16 credits.

ENVE 410, OCCUPATIONAL INTERNSHIP, 1-12 Credits  
This course is repeatable for 12 credits.

ENVE 415, ENVIRONMENTAL ENGINEERING LABORATORY, 3 Credits  
Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec.  
Prerequisite: CBEE 414 with C or better  
Equivalent to: CHE 415

ENVE 421, DRINKING WATER TREATMENT PROCESSES, 4 Credits  
Characterization and treatment of drinking water sources including engineering principles for the selection and design of treatment processes. Lec/rec/lab.  
Prerequisite: ENVE 322 with C or better

ENVE 422, WASTEWATER TREATMENT PROCESSES, 4 Credits  
Characterization and treatment of municipal and industrial wastewaters including engineering principles for the selection and design of treatment processes. Lec/rec.  
Prerequisite: ENVE 421 with C or better

ENVE 425, AIR POLLUTION CONTROL, 3 Credits  
Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec.  
Prerequisite: ENVE 321 with C or better or ENVE 322 with C or better

ENVE 431, FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS, 4 Credits  
Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec.  
Prerequisite: (CH 123 with C or better or CH 223 with C or better or CH 226H with C or better or CH 233 with C or better) and (CH 440 [C] or CHE 331 [C] or CHE 331H [C]) and (ENVE 321 [C] or ENVE 322 [C]) and (ENVE 421 [C])

ENVE 456, SUSTAINABLE WATER RESOURCES DEVELOPMENT, 3 Credits  
Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 457, BIOREACTORS, 3 Credits  
Design and analysis of bioreactors using suspension and immobilized microbial cultures.  
Prerequisite: CHE 333 with C or better and ENVE 322 [C]

ENVE 490, ENVIRONMENTAL ENGINEERING DESIGN, 4 Credits  
Open-ended design of environmental processes including development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. Lec/rec.  
Prerequisite: ENVE 421 with C or better and ENVE 422 [C]

ENVE 499, SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING, 1-4 Credits  
A critical examination of topics selected by the instructor from among topics not covered in other environmental engineering courses.  
This course is repeatable for 4 credits.
ENVE 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENVE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 507, SEMINAR, 1-16 Credits
One-credit seminar. Graded P/N. This course is repeatable for 16 credits.

ENVE 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 521, DRINKING WATER TREATMENT PROCESSES, 4 Credits
Characterization and treatment of drinking water sources including engineering principles for the selection and design of treatment processes. Lec/rec/lab.
Recommended: ENVE 322

ENVE 522, WASTEWATER TREATMENT PROCESSES, 4 Credits
Characterization and treatment of municipal and industrial wastewaters including engineering principles for the selection and design of treatment processes. Lec/rec.
Recommended: ENVE 421

ENVE 525, AIR POLLUTION CONTROL, 3 Credits
Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec.
Recommended: ENVE 321 or ENVE 322

ENVE 531, FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS, 4 Credits
Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec.
Recommended: (CH 123 or CH 223 or CH 226H or CH 233) and (CH 440 or CHE 331 or CHE 331H) and (ENVE 321 or ENVE 322) and ENVE 421

ENVE 532, AQUATIC CHEMISTRY: NATURAL AND ENGINEERED SYSTEMS, 4 Credits
Low temperature thermodynamic and selective kinetic treatments primarily of the inorganic chemistry groups, but also organic ligands and surface active groups, of natural and engineered waters; thermodynamic principles and computational techniques for prediction of equilibrium speciation; comparison of predictions to observations; computer laboratory. Lec/rec.
Equivalent to: OC 532
Recommended: One year of college-level chemistry (CH 221 and CH 222 and CH 223) or ((CH 231 or CH 231H) and (CH 232 or CH 232H) and (CH 233 or CH 233H)); a minimum of one year organic or physical chemistry; and concurrent enrollment in ENVE 536 and/or OC 652

ENVE 535, PHYSICAL AND CHEMICAL TREATMENT PROCESSES, 4 Credits
Fundamental principles of physical and chemical processes relevant for the treatment of contaminants in environmental matrices (e.g. water, air and soil).
Prerequisite: ENVE 532 with C or better
Equivalent to: ENVE 538

ENVE 536, AQUEOUS ENVIRONMENTAL CHEMISTRY LABORATORY, 1 Credit
Laboratory investigation of acid/base equilibria, coordination chemistry, and precipitation/dissolution chemistry.
Corequisites: ENVE 532

ENVE 541, MICROBIAL PROCESSES IN ENVIRONMENTAL SYSTEMS, 4 Credits
Energetics kinetics and stoichiometry of microbial transformations of organic and inorganic compounds. Mathematical models of biodegradation.

ENVE 545, MICROBIAL METHODS IN ENVIRONMENTAL ENGINEERING, 3 Credits
Covers the principles of microbiological methods pertinent to environmental engineers with an emphasis on applications in drinking water treatment, wastewater treatment, and soil remediation. The course is targeted at engineering students that do not have much experience with culture-based and molecular-based techniques.
Prerequisite: ENVE 541 with C+ or better

ENVE 554, GROUNDWATER REMEDIATION, 4 Credits
ENVE 556, SUSTAINABLE WATER RESOURCES DEVELOPMENT, 3 Credits
Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ENVE 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

ENVE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ENVE 699, SELECTED TOPICS IN ENVIRONMENTAL ENGINEERING, 1-4 Credits
A critical examination of topics selected by the instructors from among topics not covered in other environmental engineering courses.
Equivalent to: ENVE 611
This course is repeatable for 8 credits.

Bioengineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

Biomaterials, biomedical devices and instrumentation, human performance engineering, medical imaging, systems and computation biology

The School of Chemical, Biological, and Environmental Engineering offers Master of Engineering (MEng), Master of Science (MS), and Doctor of Philosophy (PhD) degrees in Bioengineering. Students can choose from among the following areas of concentration: Biomaterials, Biomedical devices and Instrumentation, Human Performance Engineering, Medical Imaging, and Systems and Computational Biology. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between CBEE and other engineering departments and research centers on campus, makes tailored individual programs possible. The department originates and encourages programs ranging from those that are classically bioengineering to those that are distinctly interdisciplinary.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Major Code: 3080

Students in all Bioengineering graduate programs (MEng, MS and PhD) will be required to complete the program core curriculum for a total of 12 credits. The remaining credits required for completion of the degree program will be electives, and may include courses in science, mathematics, engineering or other topics (e.g., entrepreneurship).

All students submit a program of study during their first quarter in the program specifying the elective courses they plan to take to complete their degree requirements. Programs of study will be reviewed by a committee of BIOE program faculty to ensure that the program has sufficient breadth and depth in the context of the student’s planned research activities.

Total Hours: 45

Bioengineering Undergraduate Major (BA, BS, HBA, HBS)

The Bachelor of Science and Honors Bachelor of Science degrees in Bioengineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

Bioengineering is an interdisciplinary field that applies engineering principles and quantitative methods to the development of new and novel biologicals, materials, devices, and processes. In practice, bioengineers address issues surrounding the broad areas of bioprocess, biomedical, and bioenvironmental technology.

The bioengineering undergraduate program provides a solid background in biology, chemistry, physics and math, in addition to the engineering sciences. Upper-level course work in bioengineering includes the analysis and design of processes involving immobilized or suspended microbial cultures and the recovery of therapeutic products from bioreactors, as well as course work in biomedical materials engineering, biomedical engineering principles, and selected course work in cell engineering, surface analysis and bioconjugation. All students complete a capstone-design experience that integrates drug and medical device regulation.

Bioengineering graduates are prepared to contribute to the rapidly growing sector of bioscience-based industries, and to have the ability to formulate and solve problems pertaining to enzyme and microbial process technologies, mammalian cell culture, and downstream processing in biotechnology. They also generate solutions to problems with medical relevance, including the design of devices and systems to replace lost organ function, deliver therapeutic agents, and otherwise improve human health.

Alumni of the bioengineering program will be work-ready engineers, problem solvers, responsible professionals, and interdisciplinary collaborators. Program educational objectives can be found here.
Major Code: 298

- Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Ability to communicate effectively with a range of audiences.
- Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemical Engineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

Chemical engineering

The School of Chemical, Biological and Environmental Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between the school and other engineering departments and schools and research centers on campus, makes tailored individual programs possible. The school originates and encourages programs ranging from those that are classically chemical engineering to those that are distinctly interdisciplinary.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Chemical Engineering Undergraduate Program

The Bachelor of Science and Honors Bachelor of Science degrees in Chemical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

Chemical engineering is the discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products at a manufacturing scale. These include products found in everyday life such as transportation and heating fuels, plastics, pharmaceuticals, household and paper products (soaps, cosmetics, health care and cleaning products, etc.), as well as more advanced products like solar cells, computer chips, and advanced composites for jet aircraft.

Chemical engineers find employment in traditional chemical industries such as pulp and paper manufacturing and petroleum refining, high-tech industries such as semiconductor device manufacturing, biopharmaceutical production, aerospace, and emerging industries, particularly sustainable energy.

Alumni of the chemical engineering program will be work-ready engineers, problem solvers, responsible professionals, and interdisciplinary collaborators. Program educational objectives can be found here.

The chemical engineering undergraduate curriculum is designed to meet the student objectives through relevant course content, structured collaborative learning experiences, and hands-on laboratory and design experiences at the first year through senior levels. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, material and energy balances, thermodynamics, transport phenomena, and senior year laboratory.

Chemical engineering students have opportunities to obtain internships offered through the School of CBE, and through the Multiple Engineering Cooperative Program (MECOP). Many scholarships are available on a competitive basis for chemical engineering undergraduate students. More detailed descriptions of the curriculum and requirements may be viewed here.

Major Code: 3030

Chemical Engineering Graduate Minor

The Graduate Minor in Chemical Engineering is for masters and doctoral level students who seek additional formal training and mentoring in chemical engineering. Students pursuing a Minor in Chemical Engineering must include at least one Chemical Engineering faculty member on their committee. This faculty member must be engaged in the development of the student’s Program of Study and in the case of Doctoral students, their dissertation research; therefore, it is recommended that this faculty member be identified early in the doctoral program.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Courses approved by student’s MS Committee on Graduate Program of Study | minimum 13

**Prerequisite and Corequisite Coursework for Non-engineering Undergraduates**

MEng or MS students without undergraduate degrees in chemical engineering or a related engineering discipline, or PhD students without undergraduate degrees or graduate degrees in chemical engineering or a related engineering discipline, must take the following courses in addition to the CHE core:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 312</td>
<td>CHEMICAL ENGINEERING THERMODYNAMICS</td>
<td>3</td>
</tr>
<tr>
<td>CHE 331</td>

<td>4</td>
</tr>
<tr>
<td>CHE 332</td>
<td>TRANSPORT PHENOMENA II</td>
<td>3</td>
</tr>
<tr>
<td>CHE 443</td>
<td>CHEMICAL REACTION ENGINEERING</td>
<td>4</td>
</tr>
</tbody>
</table>

In addition to Graduate School mandated preliminary and final exams, PhD students in chemical engineering must successfully complete a qualifying exam, the details and timing of which can be found in the chemical engineering graduate student handbook.

Major Code: 3030
- Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Ability to communicate effectively with a range of audiences.
- Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Environmental Engineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

Bioremediation, environmental fluid mechanics, environmental microbiology, environmental modeling, multiphase phenomena, subsurface flow and transport, water and wastewater treatment.

The School of Chemical, Biological and Environmental Engineering offers graduate curricula leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Environmental Engineering. The ENVE program prepares individuals to apply mathematical and scientific principles to the design, development and operational evaluation of systems for controlling contained living environments and for monitoring and controlling factors in the external natural environment. Specific application areas include pollution control, waste and hazardous material disposal, health and safety protection, conservation, life support, and requirements for protection of special materials and related work environments, as well as emerging areas including sustainability, detection and treatment of emerging contaminants and their fate in the natural environment, water supply for a growing world population, and mitigation of the effects of climate change, among others. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between the school and other engineering departments and schools and research centers on campus, make tailored individual programs possible.

For more information, contact the Graduate Programs Coordinator, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, 541-737-0479 or email cbee-gradinfo@engr.orst.edu

Environmental Engineering Undergraduate Major (BA, BS, HBA, HBS)

The Bachelor of Science and Honors Bachelor of Science degrees in Environmental Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

Alumni of the environmental engineering program will be work-ready engineers prepared with the knowledge and skills necessary to solve contemporary environmental engineering problems. Program educational objectives can be found here.

The environmental engineering undergraduate curriculum is designed to meet the student objectives through relevant course content, structured collaborative learning experiences, and hands-on laboratory and design experiences in the first year through senior levels. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena, and senior year unit operations.

Environmental engineering students have opportunities to obtain internships offered through the School of CBEE, and through the College of Engineering Multiple Engineering Cooperative Program (MECOP). Many scholarships are available on a competitive basis for environmental engineering undergraduate students. More detailed descriptions of the curriculum and requirements may be viewed here.

Total Credits 32

Major Code: 311

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
• Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• Acquire and apply new knowledge as needed, using appropriate learning strategies.

### Total Credits required for graduation is 192

### Major Code: 311

### School of Civil and Construction Engineering

The mission of the School of Civil and Construction Engineering is that of the College of Engineering (see college statement on mission and goals), as well as providing a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering and constructor positions with business, industry, consulting firms, or government.

Education in the basic sciences occurs primarily in the freshman and sophomore years. Engineering science is introduced at the sophomore year and continues through to graduation with a combination of required courses and technical electives. Completion of the OSU Baccalaureate Core provides experience in the humanities, social sciences, and other nontechnical areas as additional preparation for a student’s profession and life.

The CCE School offers an undergraduate option in environmental engineering that provides education in water pollution, air pollution, solid wastes, and hazardous wastes.

The growing complexity of modern engineering practice requires further specialization in one or more engineering disciplines. This is generally attained through postgraduate study. The CCE School offers MEng, MS, and PhD programs with concentrations in civil engineering, coastal and ocean engineering, construction engineering management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering.

Areas of concentration may be combined to form an integrated civil engineering MS program, MEng program, or MEng, MS, and PhD minors.

The school also participates in the Master of Arts in Interdisciplinary Studies program.
Undergraduate Programs

Majors
- Architectural Engineering (p. 650)
- Civil Engineering (p. 653)
- Construction Engineering Management (p. 654)

Graduate Programs

Major
- Civil Engineering (p. 652)

Minor
- Civil Engineering (p. 653)

W. Jason Weiss, School Head
Shane Brown, Associate Head for Undergraduate Affairs
Merrick Haller, Associate Head for Graduate Affairs

Faculty

Professors Ashford\(^1\), Bell\(^1\), Cox, Gambatese\(^1\), Higgins\(^1\), Istok\(^1\), Liu, Ozkan-Haller, Schultz\(^1\), Trejo\(^1\), Yeh\(^1\), Weiss, Yim\(^1\)
Associate Professors Brown\(^1\), Evans, Haller, Hill, Hunter-Zaworski\(^1\), Isgor\(^1\), Lundy\(^1\), Miller\(^1\), Ozkan-Haller, Parrish, Scott, Sillars\(^1\)
Assistant Professors Arocho, Babbar-Sebens, Barbosa\(^1\), Coleri, Borello, Gillins, Hernandez, Hurwitz, Ideker, Lee, Leon, Mason, Olsen, Park\(^1\), Stuedlein\(^1\), Wang
Adjuncts Gupta, Sinha
Senior Instructors Arras, Fradella\(^1\)
Instructors Berger\(^1\), Martin
Academic Advisors Nave-Abele, Whitehead
Emeritus Bell\(^1\), Bella\(^1\), Huber\(^1\), Hudspeth\(^1\), Klingeman\(^1\), Layton\(^1\), Pritchett\(^1\), Rogge\(^1\), Schroeder\(^1\), Sollitt

\(^1\) Licensed Professional Engineer

Architectural Engineering (ARE)

ARE 301, ARE JUNIOR SEMINAR, 1 Credit
Professional practices of architectural engineering.

ARE 352, DESIGN OF ELECTRICAL AND ILLUMINATION SYSTEMS FOR BUILDINGS, 0-4 Credits
Design of electrical and illumination systems in buildings, including consideration of energy usage.
Prerequisite: CEM 471 with C or better

ARE 353, DESIGN OF HVAC SYSTEMS FOR BUILDINGS, 4 Credits
Design and engineering of heating, ventilating, and air conditioning (HVAC) systems in buildings, including consideration of energy usage and indoor environmental conditions.
Prerequisite: CEM 472 with C or better

ARE 418, ARCHITECTURAL ENGINEERING PROFESSIONAL PRACTICE, 4 Credits
Principles and methods of solving architectural engineering problems in a studio setting, with considerations of space, form, function, and technology. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ARE 351 with C or better and ARE 352 [C] and CE 382 [C]

ARE 419, ARCHITECTURAL ENGINEERING DESIGN, 3 Credits
A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of architectural engineering. Use of Building Information Modeling (BIM) in design, construction management, and integration of architectural, structural, mechanical, electrical and lighting systems. Lec/rec. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ARE 418 with C or better

ARE 451, ADVANCED BUILDING CONSTRUCTION METHODS, 4 Credits
Advanced building construction methods, including integration of building components in building envelopes. Lec/rec.
Prerequisite: CEM 442 with C or better

ARE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

ARE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ARE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ARE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ARE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

ARE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ARE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ARE 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
Civil Engineering (CE)

CE 199, SPECIAL TOPICS, 1-4 Credits

CE 202, CIVIL ENGINEERING: GEOSPATIAL INFORMATION AND GIS, 3 Credits
Introductory design principles presented with the use of GIS and geospatial information (remote sensing, GPS, surveying, and aerial photography) for civil engineering problem solving. Introduction to the integration of geospatial data and analysis for decision making and management for site selection, mitigation, change analysis, modeling and assessment. Standard software and custom programming used in course. Students participate in both individual and team projects and presentations. Projects from the area of civil engineering. Lec/lab.
Prerequisite: CCE 201 with C or better or ENGR 248 with C or better

CE 299, SPECIAL TOPICS, 1-4 Credits
Graded P/N.
Equivalent to: CE 299H

CE 299H, SPECIAL TOPICS, 1-4 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 299

CE 301, CE JUNIOR SEMINAR, 1 Credit
Professional practices of civil engineering.

CE 311, FLUID MECHANICS, 4 Credits
Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, civil engineering applications.
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and PH 213 [C] and ENGR 213 [C] and ENGR 212 [C]

CE 313, HYDRAULIC ENGINEERING, 4 Credits
Analysis of large civil engineering fluid systems including conduit flow, multiple reservoirs, pump networks, pipes, turbines, open channel flow, and hydraulic structures.
Prerequisite: CE 311 with C or better or CHE 331 with C or better or CHE 331H with C or better

CE 361, SURVEYING THEORY, 4 Credits
Use of surveying equipment, Gaussian error theory applied to measurements, calculations of position on spherical and plane surfaces, state plane coordinate systems, introduction to global positioning systems.
Prerequisite: (CCE 201 with C or better or CE 202 with C or better) and ENGR 213 [C] and PH 213 [C] and ST 314 [C]

CE 365, HIGHWAY LOCATION AND DESIGN, 3 Credits
Curve problems in highway design, including circular, vertical, compound curves and spirals; earth distribution analysis; preliminary office studies; paper location procedures and field layout problems.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 372, GEOTECHNICAL ENGINEERING I, 4 Credits
Basic soil mechanics including the identification and classification of soil, principles of compaction and consolidation, flow through porous media, effective stress, and shear strength. Lec/lab.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better and (CE 311 (may be taken concurrently) [C] or CEM 311 (may be taken concurrently) [C] or CHE 331 (may be taken concurrently) [C] or CHE 331H (may be taken concurrently) [C]) and CH 201 [C] and PH 212 [C]

CE 373, GEOTECHNICAL ENGINEERING II, 4 Credits
Application of fundamental soil mechanics principles to analyses of slope stability, retaining structures, and foundation support. Lec/rec.
Prerequisite: CE 372 with C or better or FE 315 with C or better

CE 381, STRUCTURAL THEORY I, 4 Credits
Analysis of statically determinate structures (beams, frames, trusses, arches, and cables). Approximate analysis, influence lines, deflections.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better

CE 382, STRUCTURAL THEORY II, 4 Credits
Analysis of statically indeterminate structures (beams, frames, trusses). Deflections. Energy methods, introduction to matrix methods.
Prerequisite: CE 381 with C or better and (MTH 306 [C] or MTH 306H [C] or (MTH 264 [C] and MTH 265 [C]))

CE 383, DESIGN OF STEEL STRUCTURES, 4 Credits
Introduction to design of steel members, connections and structural systems. Lec/lab.
Prerequisite: CE 382 with C or better

CE 392, INTRODUCTION TO HIGHWAY ENGINEERING, 4 Credits
Highway engineering standards, geometric design, cross section and roadside design, highway surfaces, pavement design, highways and the environment, highway construction and maintenance.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and CE 361 [C]

CE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.
CE 407, SEMINAR, 1-3 Credits
Understanding complexity and systems thinking.
Equivalent to: CE 407H
This course is repeatable for 16 credits.

CE 407H, SEMINAR, 1-3 Credits
Understanding complexity and systems thinking.
Attributes: HNRS – Honors Course Designator
Equivalent to: CE 407
This course is repeatable for 16 credits.

CE 408, WORKSHOP, 1-3 Credits
This course is repeatable for 3 credits.

CE 410, INTERNSHIP, 1-12 Credits
This course is repeatable for 16 credits.

CE 411, OCEAN ENGINEERING, 4 Credits
Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design.
Prerequisite: CE 313 with C or better or CEM 311 with C or better

CE 412, HYDROLOGY, 4 Credits
Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.
Prerequisite: CE 313 with C or better

CE 413, GIS IN WATER RESOURCES, 3 Credits
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered.
Recommended: Senior standing or a previous introductory GIS course

CE 415, COASTAL INFRASTRUCTURE, 3 Credits
Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design.
Prerequisite: CE 313 with C or better

CE 417, HYDRAULIC ENGINEERING DESIGN, 4 Credits
Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems.
Prerequisite: CE 313 with C or better

CE 418, CIVIL ENGINEERING PROFESSIONAL PRACTICE, 3 Credits
Engineering career paths; ethics and professionalism, project planning, execution and delivery; team building/management; marketing proposals; engineering overseas; dispute resolution; partnering; effective decision making; uncertainty and risk analysis; and current industry design and construction methods. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CE 382 with C or better and CE 313 [C] and (CE 372 [C] or FE 315 [C])
Equivalent to: CE 454

CE 419, CIVIL INFRASTRUCTURE DESIGN, 3 Credits
A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of civil engineering. Students should have completed ALL other required courses in their degree program prior to registering for this course. Lec/rec.
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CE 418 with C or better

CE 420, ENGINEERING PLANNING, 4 Credits
The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 424, CONTRACTS AND SPECIFICATIONS, 4 Credits
Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.
Prerequisite: CEM 442 with C or better

CE 427, TEMPORARY CONSTRUCTION STRUCTURES, 4 Credits
Design and construction of temporary structures including formwork, shoring, and earth retaining structures.
Prerequisite: (CE 321 with C or better or CCE 321 with C or better) and (FE 315 [C] or CE 372 [C]) and (CEM 383 [C] or CE 383 [C])

CE 429, OPTIMIZATION IN WATER RESOURCES ENGINEERING, 3 Credits
Introduction to problem formulation and optimization techniques for design of complex water resources systems.
Recommended: CE 412

CE 461, PHOTOGRAMMETRY, 3 Credits
Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better
CE 463, CONTROL SURVEYING, 4 Credits
Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 465, OREGON LAND SURVEY LAW, 3 Credits
Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 469, PROPERTY SURVEYS, 3 Credits
U.S. public land survey: restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy.
Prerequisite: CE 361 with C or better or CEM 263 with C or better or FE 208 with C or better

CE 471, FOUNDATIONS FOR STRUCTURES, 3 Credits
Criteria, theory, design, and construction for foundations of structures; use of in-situ tests for geotechnical engineering; computer applications.
Prerequisite: CE 373 with C or better or FE 316 with C or better

CE 479, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579.
Prerequisite: CE 373 with C or better or FE 316 with C or better
Equivalent to: FE 479

CE 481, REINFORCED CONCRETE I, 4 Credits
Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices.
Prerequisite: CE 382 with C or better

CE 482, MASONRY DESIGN, 3 Credits
A critical examination in depth of masonry design topics.
Prerequisite: CE 481 with C or better

CE 484, WOOD DESIGN, 4 Credits
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab.
Prerequisite: CE 383 with C or better or CE 481 with C or better
Equivalent to: WSE 458

CE 486, PRESTRESSED CONCRETE, 3 Credits
Prestressed concrete analysis and design, systems of prestressing, materials, economics.
Prerequisite: CE 481 with C or better

CE 489, SEISMIC DESIGN FUNDAMENTALS, 3 Credits
Fundamentals of earthquake engineering, introduction to structural dynamics principles, response spectra, and ASCE 7 design and analysis provisions.
Prerequisite: CE 481 with C or better and CE 383 [C-]

CE 491, TRANSPORTATION ENGINEERING, 3 Credits
Introduction to transportation engineering systems characteristics, traffic estimation, comprehensive transportation planning, highway economics, driver and vehicle characteristics, highway operations and capacity, signalization and control. Introduction to intelligent transportation.
Prerequisite: CE 392 with C or better and ST 314 [C]

CE 492, PAVEMENT STRUCTURES, 3 Credits
Design and rehabilitation of pavement structures for streets, highways, and airports.
Prerequisite: CE 392 with C or better

CE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

CE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CE 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

CE 508, WORKSHOP, 1-3 Credits
Graded P/N.
This course is repeatable for 3 credits.

CE 510, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

CE 511, OCEAN ENGINEERING, 4 Credits
Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design.
Recommended: CE 313 or CEM 311
CE 512, HYDROLOGY, 4 Credits
Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.

CE 513, GIS IN WATER RESOURCES, 3 Credits
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. Recommended: Senior standing or a previous introductory GIS course

CE 514, GROUNDWATER HYDRAULICS, 4 Credits
Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design of dewatering and contaminant recovery systems. Prerequisite: CE 547 with B or better Equivalent to: BEE 514 Recommended: CE 313 and MTH 252

CE 515, COASTAL INFRASTRUCTURE, 3 Credits
Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design. Recommended: CE 313

CE 516, STORMWATER DESIGN AND MANAGEMENT, 4 Credits
Introduction to urban stormwater drainage systems; urban hydrologic analysis; water quality in urban storm water; design of stormwater control systems; low impact development; storm water monitoring; and computer modeling of urban storm water systems. Prerequisite: CE 512 with C or better or BEE 512 with C or better

CE 517, HYDRAULIC ENGINEERING DESIGN, 4 Credits
Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems. Recommended: CE 313

CE 518, GROUNDWATER MODELING, 4 Credits
Application of numerical methods to the solution of water flow and solute transport through saturated and unsaturated porous media. Analysis of confined and unconfined aquifers. Computer solution of large-scale field problems including groundwater contamination and aquifer yield. Prerequisite: CE 514 with C or better

CE 520, ENGINEERING PLANNING, 4 Credits
The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; and evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 524, CONTRACTS AND SPECIFICATIONS, 4 Credits
Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.

CE 525, STOCHASTIC HYDROLOGY, 3 Credits
Introduction to fundamental concepts that are needed for stochastic modeling of hydrologic processes in presence of nonstationarity and uncertainty. CROSSLISTED as BEE 525/CE 525. Prerequisite: CE 512 with C or better or BEE 512 with C or better Equivalent to: BEE 525

CE 527, TEMPORARY CONSTRUCTION STRUCTURES, 4 Credits
Design and construction of temporary structures including formwork, shoring, and earth retaining structures. Recommended: (CE 321 or CCE 321) and (FE 315 or CE 372) and (CEM 383 or CE 383)

CE 529, OPTIMIZATION IN WATER RESOURCES ENGINEERING, 3 Credits
Introduction to problem formulation and optimization techniques for design of complex water resources systems. Recommended: CE 512 or BEE 512.

CE 530, SELECTED TOPICS IN STRUCTURAL ANALYSIS AND MECHANICS, 3 Credits
A critical, in-depth examination of topics selected by the instructor from among topics not covered in other structural analysis and mechanics courses. Prerequisite: CE 585 with C or better This course is repeatable for 16 credits.

CE 531, STRUCTURAL MECHANICS, 3 Credits
Theories of failure, multi-axial stress conditions, torsion, shear distortions, energy methods of analysis, beams on elastic foundations. Nonlinear and inelastic behavior.

CE 532, FINITE ELEMENT ANALYSIS, 4 Credits
Applications of the finite element method to structural analysis, fluid flow and elasticity problems. Use and development of large finite element computer programs. Prerequisite: (CE 585 with C or better or ME 520 with C or better)
CE 533, STRUCTURAL STABILITY, 3 Credits
Stability theory and applications, with emphasis on design of steel structures.
Recommended: CE 383

CE 534, STRUCTURAL DYNAMICS, 4 Credits
Analytical and numerical solutions for single, multi-degree of freedom and continuous vibrating systems. Behavior of structures, dynamic forces and support motions. Seismic response spectra analysis.
Recommended: CE 382

CE 535, INTRODUCTION TO RANDOM VIBRATIONS, 4 Credits
Introduction to probability theory and stochastic processes. Correlation and spectral density functions. Response of linear systems to random excitations. First excursion and fatigue failures. Applications in structural and mechanical system analysis and design.
Prerequisite: CE 534 with C or better or ME 522 with C or better

CE 536, MATRIX METHODS OF STRUCTURAL ANALYSIS, 4 Credits
Equivalent to: CE 585
Recommended: CE 382 with a minimum grade of C
Available via Ecampus

CE 537, NONLINEAR STRUCTURAL ANALYSIS, 4 Credits
Available via Ecampus

CE 538, STRUCTURAL RELIABILITY AND RISK ANALYSIS, 4 Credits
Application of probability and statistics in the reliability-based analysis and design of civil and mechanical engineering systems. Probabilistic modeling of loading and resistance including load and resistance factor design. Introduction to risk analysis and robustness.
Prerequisite: (CE 536 with C or better or ME 520 with C or better)
Recommended: ST 314

CE 540, SPECIAL TOPICS IN HYDRAULIC ENGINEERING, 3-4 Credits
Introduction to the tools and methods employed to characterize hydrologic properties of subsurface systems. Hands-on use of GPR, TDR, resistivity, and methods of determining hydraulic conductivity, sorptivity, bulk density, and other fundamental hydrologic properties.
Equivalent to: BRE 540
This course is repeatable for 16 credits.

CE 543, APPLIED HYDROLOGY, 4 Credits
Advanced treatment of hydrology covering major components of the hydrological cycle with special emphasis on surface water; hydrologic analysis and design of water resource systems; runoff prediction; and simulation of surface water systems. Offered alternate years.
Equivalent to: BRE 543
Recommended: BRE 512 and CE 412

CE 544, OPEN CHANNEL FLOW, 3 Credits
Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods.
Equivalent to: BRE 544, BRE 544
Recommended: (CE 311 and CE 313) or CE 547

CE 547, WATER RESOURCES ENGINEERING I: PRINCIPLES OF FLUID MECHANICS, 4 Credits
Fluid mechanics for water resources engineers, classifications of fluid flows; fluid statics and dynamics, incompressible viscous flows; dimensional analysis; applications to fluid machinery, flow through porous media, fluid motion in rivers, lakes, oceans.

CE 552, ISOLATED SIGNALIZED INTERSECTIONS, 3 Credits
Relationships between signal display, user response, vehicle detection, and signal timing parameters are examined in detail. Traffic simulation is introduced to visualize and design the various elements of isolated signalized intersections.
Recommended: CE 595

CE 553, RAILROAD ENGINEERING, 3 Credits
The principal subject of this course is the railway infra-structure and operational issues related to high speed passenger rail and freight rail (class 1 and regional rail). The course will cover the techniques used to design, construct, monitor and maintain railway track. Class will include field trips.
Corequisites: CE 392

CE 554, DRIVING SIMULATION, 3 Credits
Relationships between the functional elements of driving simulation (simulation computer processing, sensory feedback generation, sensory display devices, and the human operator) are examined in detail. The role of driving simulation in transportation engineering research and practice is also considered in depth. Students will design experiments, analyze and interpret data, and extrapolate simulator results to real-world scenarios.
Recommended: CE 595

CE 556, TRANSPORTATION SAFETY ANALYSIS, 3 Credits
Provides students with a general knowledge of major transportation safety issues and a general background in the application of various statistical and econometric safety analysis techniques. In addition, this course presents a number of model-estimation methods used in transportation safety data analysis, and other subject areas that deal with safety analysis.
Recommended: CE 392 with a minimum grade of C and ST 511
CE 557, NETWORK FLOW ANALYSIS AND OPTIMIZATION, 3 Credits
Acquaints students with the basic elements of operations research through transportation networks, optimal paths in transportation networks, vehicle routing and scheduling problems on networks, facility location problems, transportation network design problems, transportation network flows, and to indicate the directions for future research in this area. Although the course utilizes examples from transportation, the techniques and models are generalizable to other areas of engineering, e.g., water networks, computer networks, energy networks, agricultural, power, telecommunication, etc.
Recommended: CE 392 with a minimum grade of C

CE 560, SELECTED TOPICS IN GEOMATICS ENGINEERING, 0-4 Credits
Selected topics on contemporary problems in geomatics engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for 16 credits.

CE 561, PHOTOGRAMMETRY, 3 Credits
Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras.
Recommended: CE 361 or CEM 263 or FE 208

CE 562, DIGITAL TERRAIN MODELING, 4 Credits
Fundamentals of LIDAR and creating digital terrain models. Computational geometry, Delaunay triangulations, spline interpolations, statistical gridding methods, ground filtering, data optimizations, and advanced topics in 3D modeling.
Recommended: CE 361 or CEM 263 or equivalent surveying or GIS course.

CE 563, CONTROL SURVEYING, 4 Credits
Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments.
Recommended: CE 361 or CEM 263 or FE 208

CE 564, GLOBAL NAVIGATION SATELLITE SYSTEM, 4 Credits
Theories and applications of surveying using satellites, focusing on the use of Global Navigation Satellite System (GNSS). The course will begin with the comprehensive overviews of the GNSS, reference and time systems as well as basic orbital mechanics. A description of the satellite signals and the data collected by GNSS receivers will also be covered. Different positioning and navigation techniques for using GNSS data (absolute/relative positioning, static/kinematic positioning, stand-alone/network based positioning) and different user applications will be reviewed, followed by practices of data collections and processing techniques.
Recommended: CE 361 or CE 202

CE 565, OREGON LAND SURVEY LAW, 3 Credits
Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions.
Recommended: CE 361 or CEM 263 or FE 208

CE 566, 3D LASER SCANNING AND IMAGING, 4 Credits
Fundamentals of lidar acquisition, registration, processing, modeling, analysis, and verification. Use of sensor platforms for 3D acquisition. Effective data management procedures. Introduction to other imaging techniques including structure from motion and structured light. Lec/lab.

CE 567, COASTAL REMOTE SENSING, 4 Credits
Application of remote sensing technologies (e.g., unmanned aircraft systems, multi- and hyperspectral imagery, high-resolution commercial satellite imagery, synthetic-aperture radar, and topographic and bathymetric lidar) to coastal mapping and charting, coastal engineering and coastal zone management. Both the theory and applications of advanced remote sensing technologies are covered. Lec/lab.
Recommended: An undergraduate surveying course, such as CE 361, CEM 263 or FE 208 and some exposure to MATLAB

CE 568, LEAST SQUARES ADJUSTMENTS, 3 Credits
Examines the theory of random error and statistical testing. Discusses the propagation of error in both indirect observations and direct observations from survey. Studies weights of observations and the principles of least squares. Explains how to adjust redundant observations in level nets, horizontal surveys, GNSS networks, and GNSS and terrestrial survey networks by least squares. Estimates the error ellipses of the adjusted observations. Evaluates methods for performing coordinate transformations.
Recommended: CE 361 or CEM 263 or FE 208

CE 569, PROPERTY SURVEYS, 3 Credits
U.S. public land survey restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy.
Recommended: CE 361 and CEM 263 or FE 208

CE 570, GEOTECHNICAL SPECIAL TOPICS, 1-16 Credits
Development and management of actual projects through the examination of case histories; evaluation of geotechnical data; development of design recommendations and preparation of project reports. This course is repeatable for 16 credits.
CE 571, ADVANCED FOUNDATION ENGINEERING, 4 Credits
Presents the planning, analysis, and design of shallow and deep foundations from the geotechnical engineering perspective. Topics supporting course objectives include planning and execution of subsurface investigations, interpretation of in-situ tests, analysis and design of deep and shallow foundations, including geotechnical capacity, and immediate settlement. Assessment of deep foundation installation, axial and lateral loading tests, and group effects is presented. Evaluation of foundation performance is conducted under deterministic and probabilistic frameworks.
Recommended: CE 373 and CE 471

CE 572, ADVANCED GEOTECHNICAL LABORATORY, 4 Credits
Examination of soil composition and engineering properties of soils including volume change, pore pressure generation, strength, and deformation behavior of soils in the laboratory. Advanced static and cyclic shear strength testing of soils will also be discussed. Lec/lab.
Recommended: CE 373 and CE 471

CE 575, EARTH RETENTION AND SUPPORT, 4 Credits
Presents the theory and practice of design and construction of earth retaining structures. Topics include rigid and flexible retaining structures, ranging from gravity and cantilever systems, cantilever and anchored sheet piling, tied-back shoring elements, soil nailing, and mechanically stabilized earth walls. These topics are developed with a view on compaction stresses and surface loading, and invokes approaches that range from the static equations of equilibrium to empirical rules of thumb.
Recommended: CE 373

CE 576, GROUND IMPROVEMENT, 3 Credits
Presents the analysis and design of ground improvement techniques. Topics supporting course objectives include design for accelerated settlement (surcharge design) with and without pre-fabricated vertical drains, vibro-compaction, vibro-replacement (stone columns) and aggregate piers, deep soil mixing, jet grouting, EPS geofoam, and other improvement techniques for improving soil strength and stability, and limiting deformations and the effects of liquefaction.
Prerequisite: CE 572 with C or better and CE 577 [C]

CE 577, STATIC AND DYNAMIC SOIL BEHAVIOR, 3 Credits
An advanced coverage of volume change and strength behavior of soil. Specific course topics include effective stress, one-dimensional compression of soil, rate of soil consolidation, Mohr circle analysis, shear strength of sands, clays, and silts, and dynamic soil properties, strength, and testing.
Recommended: CE 372 and CE 373

CE 578, GEOTECHNICAL EARTHQUAKE ENGINEERING, 4 Credits
Major course topics include engineering seismology, strong ground motion, seismic hazard analysis, soil dynamics, seismic site response, earthquake motion selection, liquefaction, and seismic slope stability. Attention will be given to earthquakes created by the Cascadia Subduction Zone. Lec/lab.
Recommended: CE 373 and CE 471

CE 579, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579.
Equivalent to: FE 579
Recommended: CE 373 or FE 316

CE 580, SELECTED TOPICS IN STRUCTURAL DESIGN, 3 Credits
A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses. This course is repeatable for 18 credits.

CE 581, REINFORCED CONCRETE I, 4 Credits
Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices.
Recommended: CE 382

CE 582, MASONRY DESIGN, 3 Credits
A critical examination in depth of masonry design topics.
Recommended: CE 581

CE 583, BRIDGE DESIGN, 3 Credits
AASHTO specifications for bridge design; load models; design for moving loads; design and analysis of bridge decks and simple and continuous bridge spans.
Recommended: Completion of CE 381 and CE 382 and (CE 481 or CE 581) and concurrent enrollment in CE 383

CE 584, WOOD DESIGN, 4 Credits
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as CE 584/WSE 558.
Equivalent to: WSE 558
Recommended: CE 383 or CE 481 with a minimum grade of C

CE 586, PRESTRESSED CONCRETE, 3 Credits
Prestressed concrete analysis and design, systems of prestressing, materials, economics.
Recommended: CE 581
CE 589, SEISMIC DESIGN, 4 Credits
Design of structures to resist the effects of earthquakes. Introduction to structural dynamics, dynamic analysis, seismic design philosophy, code requirements, and detailing for steel and reinforced concrete.
Recommended: CE 383 or CE 481

CE 590, SELECTED TOPICS IN TRANSPORTATION ENGINEERING, 1-3 Credits
Selected topics on contemporary problems in transportation engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for 9 credits.

CE 591, TRANSPORTATION SYSTEMS ANALYSIS, PLANNING, AND POLICY, 3 Credits

CE 592, PAVEMENT STRUCTURES, 3 Credits
Design and rehabilitation of pavement structures for streets, highways, and airports.
Recommended: CE 392

CE 593, TRAFFIC FLOW ANALYSIS AND CONTROL, 4 Credits
Traffic operations and control systems; traffic flow theory and stream characteristics; capacity analysis; traffic models and simulation; accident and safety improvement. Offered alternate years.

CE 594, TRANSPORT FACILITY DESIGN, 4 Credits
Location and design of highways, and other surface transportation terminals; design for safety, energy efficiency, and environmental quality. Offered alternate years. Lec/rec.
Recommended: CE 392

CE 595, TRAFFIC OPERATIONS AND DESIGN, 3 Credits
Traffic operations and engineering: human and vehicular characteristics; traffic stream characteristics; highway capacity analysis; intersection operation, control and design.
Recommended: Completion or concurrent enrollment in CE 491

CE 596, PAVEMENT EVALUATION AND MANAGEMENT, 3 Credits
Advanced topics in pavement evaluation techniques and pavement management procedures.
Recommended: CE 492

CE 597, PUBLIC TRANSPORTATION, 3 Credits
Characteristics and nature of public transportation systems, including bus, light and heavy rail; financing policy considerations; planning transit service; managing and operating transit systems for small and large urban areas. Offered alternate years.

CE 598, AIRPORT PLANNING AND DESIGN, 3 Credits
Characteristics and nature of the air transport system. Airport financing, air traffic control. Analysis and design of airports and the airport planning processes. Airport appurtenances. Airport pavement design, environmental facilities and drainage. Offered alternate years.

CE 599, INTELLIGENT TRANSPORTATION SYSTEMS, 3 Credits
Introduction to intelligent transportation systems, including enabling surveillance, navigation, communication and computer technologies. Application of technologies for monitoring, analysis evaluation and prediction of transportation system performance. Intervention strategies, costs and benefits, safety, human factors, institutional issues and case studies. Offered alternate years.
Recommended: CE 491 for new graduate students

CE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

CE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CE 607, OCEAN ENGINEERING SEMINAR, 1 Credit
Presentations from on-campus and off-campus speakers discussing state of technology topics in ocean engineering research, development, and construction. Graded P/N. This course is repeatable for 16 credits.

CE 630, OCEAN WAVE MECHANICS I, 3 Credits
Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiching, and storm surge. CROSSLISTED as CE 630/OC 630. Equivalent to: OC 630
CE 631, OCEAN WAVE MECHANICS II, 3 Credits
Second in the sequence of ocean wave engineering mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. CROSSTLISTED as CE 631/OC 631.
Prerequisite: (CE 630 with C or better or OC 630 with C or better)
Equivalent to: OC 631

CE 634, LONG WAVE MECHANICS, 3 Credits
Theory of long waves. Depth-integrated Euler's equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSTLISTED as CE 634/OC 634.
Prerequisite: (CE 630 with C or better and CE 631 [C])
Equivalent to: OC 634
Recommended: OC 670

CE 639, DYNAMICS OF OCEAN STRUCTURES, 3 Credits
Dynamic response of fixed and compliant structures to wind, wave and current loading; Morison equation and diffraction theory for wave and current load modeling, time and frequency domain solution methods; application of spectral and time series analyses; system parameter identification; and stochastic analysis of fatigue and response to extreme loads. Offered alternate years.

CE 640, SELECTED TOPICS IN OCEAN AND COASTAL ENGINEERING, 1-3 Credits
Selected topics on contemporary problems in ocean and coastal engineering; application of ongoing research from resident and visiting faculty. Offered alternate years.
This course is repeatable for 9 credits.
Recommended: CE 630

CE 642, RANDOM WAVE MECHANICS, 3 Credits
Random wave theories, probability and statistics of random waves and wave forces, time series analyses of stochastic processes, ocean wave spectra. Offered alternate years.
Prerequisite: CE 630 with C or better

CE 643, COASTAL ENGINEERING, 3 Credits
Coastal sediment transport including nearshore currents, longshore onshore-offshore transport, and shoreline configuration; equilibrium beach profile concept with application to shore protection; shoreline modeling; tidal inlet hydrodynamics and inlet stabilization; design criteria for soft structures. Offered alternate years.
Prerequisite: CE 630 with C or better

CE 645, WAVE FORCES ON STRUCTURES, 3 Credits
Wave forces on small and large members, dimensional analyses and scaling of equations, identification and selection of force coefficients for Morison equation; compatibility of wave kinematics and force coefficients in Morison equation, diffraction and radiation of surface gravity waves by large floating bodies, wavemaker problem, and reciprocity relations.
Prerequisite: CE 630 with C or better

CE 647, OCEAN AND COASTAL ENGINEERING MEASUREMENTS, 3 Credits
Hands-on experience in the conduct of field and laboratory observations, including waves, currents, wind, tides, tsunami, sediments, bathymetry, shore profiles, wave forces on structures, and structural response. Online data archival and retrieval systems.
Prerequisite: CE 630 with C or better

CE 661, KINEMATIC POSITIONING AND NAVIGATION, 3 Credits
Application of Global Navigation Satellite System (GNSS) aided Inertial Navigation Systems (INS) to directly georeference survey data acquired from a moving platform, such as an unmanned aircraft system (UAS), conventional aircraft, survey boat, or all-terrain vehicle. Topics include 3D coordinate transformations, dead-reckoning, inertial navigation, kinematic GNSS, Kalman filtering, and sensor modeling.
Recommended: Undergraduate surveying course, such as CE 361, CE 263 or FE 208, and some exposure to MATLAB

CE 663, GEODESY, 4 Credits
Covers the geometrical aspects of terrestrial and celestial reference systems as well as modern realizations of these coordinate systems. In addition, an introductory level of the physical geodesy is also included, such as gravitational and gravity fields in order to deal with the geoid and heights. From this course, students are expected to understand the core elements of geometric and physical earth, which will assist them to have a solid background for other geospatial related studies.
Recommended: CE 202 or CE 361

CE 808, WORKSHOP, 1-16 Credits
This course is repeatable for 16 credits.

Civil and Construction Engineering (CCE)

CCE 101, CIVIL AND CONSTRUCTION ENGINEERING ORIENTATION, 2 Credits
Introduction to civil and construction engineering professions; problem solving, communication skills. This course is required by the CE, CEM and FE programs.
Equivalent to: CE 101
Recommended: MTH 111 and completion or concurrent enrollment in MTH 112 or MTH 251
CCE 102, CIVIL AND CONSTRUCTION ENGINEERING: PROBLEM-SOLVING AND TECHNOLOGY, 3 Credits
A skills-based course that focuses on introducing freshman students to the use of hand calculation and computer technology in solving civil engineering and construction engineering problems. Topics to be covered include structured approach to problem solving, use of Excel for engineering applications, internet tools and data bases, homework professionalism. Opportunities for involvement with ASCE and AGC student chapters. Lec/lab.
Equivalent to: CE 102
Recommended: Completion or concurrent enrollment in MTH 112 or MTH 251

CCE 201, CIVIL AND CONSTRUCTION ENGINEERING GRAPHICS AND DESIGN, 3 Credits
Introduces the engineering design process and graphic skills that are used by civil and construction engineers. Topics include design process, geometric construction, multiviews, auxiliary views, sections, dimensioning, tolerances and engineering drawing standards. Students participate in team design projects and presentations. Graphic and design projects from the areas of civil and construction engineering. Lec/lab.
Prerequisite: MTH 111 with C or better or MTH 112 (may be taken concurrently) with C or better or MTH 241 (may be taken concurrently) with C or better
Equivalent to: CE 201

CCE 203, INTRODUCTION TO VIRTUAL DESIGN AND CONSTRUCTION, 3 Credits
Basic principles of virtual design and construction (VDC) focusing on skills required for generating design and construction information models. Parametric modeling and design constraints are introduced. Students will utilize construction drawings and documentation to create accurate 3D models. Use of design and construction information models for making estimates of quantities and cost, and for determination of constructability problems. Lec/lab.
Prerequisite: CCE 201 with C or better or ENGR 248 with C or better

CCE 207, CCE SEMINAR, 1 Credit
Professional practices of civil and construction engineering.
Prerequisite: CCE 102 with C or better or ENGR 112 with C or better or CBEE 102 with C or better or NSE 115 with C or better or CS 162 with C or better or BEE 102 with C or better
Recommended: Sophomore standing

CCE 321, CIVIL AND CONSTRUCTION ENGINEERING MATERIALS, 4 Credits
Highway materials; aggregate, concrete and asphalt. Standard test methods.
Prerequisite: ((ENGR 213 with C or better or ENGR 213H with C or better) and (ST 314 [C] or BA 276 [C]))
Equivalent to: CCE 321H, CE 321

CCE 321H, CIVIL AND CONSTRUCTION ENGINEERING MATERIALS, 4 Credits
Highway materials; aggregate, concrete and asphalt. Standard test methods.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and (ST 314 [C] or BA 276 [C])
Equivalent to: CCE 321

CCE 422, GREEN BUILDING MATERIALS, 3 Credits
Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material ‘green’, long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.
Prerequisite: CE 321 with C or better or CCE 321 with C or better
Recommended: (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314
Available via Ecampus

CCE 423, CONCRETE FUNDAMENTALS, 4 Credits
Portland cement hydration, microstructural development, fresh and hardened properties, testing standards, durability, alternative cements.
Recommended: CCE 321

CCE 424, ASPHALT FUNDAMENTALS, 3 Credits
Focuses on characterization of asphalt materials and mixtures, current laboratory testing technology for asphalt binders and mixes, engineering of asphalt mixes to meet design requirements, asphalt recycling process, environmental impacts of asphalt pavements, and recent developments in asphalt technology.
Prerequisite: CCE 321 with C or better

CCE 520, SELECTED TOPICS IN INFRASTRUCTURE MATERIALS, 0-4 Credits
A critical examination of in-depth topics selected by the instructor from among topics not covered in other infrastructure materials courses. This course is repeatable for 16 credits.

CCE 522, GREEN BUILDING MATERIALS, 3 Credits
Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material ‘green’, long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.
Recommended: (CE 321 or CCE 321) and (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314
Available via Ecampus
CCE 523, CONCRETE FUNDAMENTALS, 4 Credits
Portland cement hydration, microstructural development, fresh and hardened properties, testing standards, durability, alternative cements. Recommended: CCE 321 or similar introductory materials course or CCE 421

CCE 524, ASPHALT FUNDAMENTALS, 3 Credits
Focuses on characterization of asphalt materials and mixtures, current laboratory testing technology for asphalt binders and mixes, engineering of asphalt mixes to meet design requirements, asphalt recycling process, environmental impacts of asphalt pavements, and recent developments in asphalt technology.

CCE 525, CONSTRUCTION SITE SYSTEMS ENGINEERING, 3 Credits
Design and planning of construction site field operations and engineered systems. Systems analysis and design as it applies to civil engineering projects. Design of construction systems: blasting; rock crushing and conveying; dewatering; cranes, pile driving, and rigging; and concrete pumping and placement. Construction site design and process design.

CCE 526, DESIGN FOR SAFETY, 3 Credits
Theoretical concepts and industry practices used to model, evaluate, and improve construction worker safety through the design of the project features, construction operations, and site safety program elements. Causes of construction site accidents, hazard recognition and comprehension, safety risk valuation and mitigation, and the true costs of injuries and fatalities.

CCE 528, ADVANCED VIRTUAL DESIGN AND CONSTRUCTION, 4 Credits
Focusing on the skills and information needed to effectively use an existing Building Information Model (BIM) in plan execution for a building construction project. This is a project based course where students gain knowledge on the implementation of BIM concepts throughout the lifecycle of a building, from planning and design, to construction and operations. Recommended: CCE 203 [D-]

CCE 529, LEAN CONSTRUCTION, 3 Credits
Introduction to the basics of lean production management, especially about how they are applied to the AEC industry to improve the operation management and product development. Class topics include theory of manufacturing science, principles of the lean production system, application of production management to project management, variability management in design and construction, improving project performance in the AEC industry, data gathering and process evaluation for productivity improvement.

CCE 552, PROJECT RISK MANAGEMENT, 4 Credits
An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as CCE 552/IE 586. Equivalent to: IE 586 Available via Ecampus

CCE 554, PROFESSIONAL RESPONSIBILITY AND ETHICS, 3 Credits
An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as CCE 554/IE 589. Equivalent to: IE 589 Available via Ecampus

CCE 561, HYDROGRAPHIC SURVEYING, 3 Credits
Covers the fundamentals of hydrographic surveys performed to measure the depth and bottom configuration of water bodies in support of nautical charting and other areas of marine geomatics, as well as marine construction, benthic habitat mapping, marine spatial planning, and bathymetric mapping of rivers and lakes. Topics include underwater acoustics, sound velocity, the sonar equation, types of sonar systems (e.g., single-beam, multibeam, side scan sonar), water levels and tidal datums, positioning and motion sensing for hydrographic surveying, bathymetric lidar, and applications of hydrographic surveying.

CCE 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

CCE 621, DURABILITY AND CONDITION ASSESSMENT OF REINFORCED CONCRETE, 4 Credits
Concrete durability including freeze-thaw attack, sulfate attack, corrosion, alkali-silica reaction, long-term performance, durability modeling, durability of alternative cements. Non-destructive condition assessment; model-assisted testing; corrosion detection and monitoring; multi-scale assessment; service/remaining life predictions. Prerequisite: CCE 523 with C or better Recommended: CCE 321
CCE 623, CORROSION OF METALS AND CORROSION CONTROL, 4 Credits
Recommended: CH 202 or CH 231 or CH 231H or CCE 321

CCE 624, SERVICE LIFE MODELING OF INFRASTRUCTURE MATERIALS, 4 Credits
Recommended: Undergraduate level calculus and chemistry courses

Construction Engineering Management (CEM)

CEM 263, PLANE SURVEYING, 3 Credits
Use of field surveying equipment; error analysis; plane surveying methods applied to construction; plane coordinate computations; topographic mapping; and introduction to GPS. Lec/lab.
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better

CEM 311, HYDRAULICS, 4 Credits
Pressure and energy concepts of fluids, fluid measurements, flow in pipes and open channels.
Prerequisite: ENGR 211 with C or better or ENGR 211H with C or better

CEM 326, CONSTRUCTION SAFETY, 3 Credits
Training in construction safety with emphasis on hazard identification, avoidance, control, and prevention. Lec/rec.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 341, CONSTRUCTION ESTIMATING I, 4 Credits
Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating.
Prerequisite: CEM 442 with C or better
Recommended: CCE 102 and CCE 201

CEM 342, CONSTRUCTION ESTIMATING II, 4 Credits
Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating.
Prerequisite: CEM 341 with C or better

CEM 343, CONSTRUCTION PLANNING AND SCHEDULING, 4 Credits
Principles of construction planning, scheduling, and resource optimization; scheduling techniques and calculations; methods for integrating project resources (materials, equipment, personnel, and money) into the schedule.
Prerequisite: CEM 342 (may be taken concurrently) with C or better

CEM 381, STRUCTURES I, 4 Credits
Introduction to statically determinate analysis and design of steel structures. Lec/rec.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better
Available via Ecampus

CEM 383, STRUCTURES II, 4 Credits
Analysis and design of building elements of concrete and timber; detailing and fabrication. Lec/rec.
Prerequisite: CCE 321 (may be taken concurrently) with C or better and CEM 381 [C]

CEM 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

CEM 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CEM 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

CEM 407, SEMINAR, 1 Credit
Professional practices of construction engineering management.

CEM 431, OBTAINING CONSTRUCTION CONTRACTS, 4 Credits
Preparing and effectively presenting detailed and complete proposals for the execution of construction projects.
Prerequisite: CEM 341 with C or better
Equivalent to: CEM 432

CEM 432, CONSTRUCTION PROJECT PLANNING, 3 Credits
Planning and preparing cost estimates, schedules, site logistics plans for executing construction projects; presenting written and oral construction proposals.
Prerequisite: CEM 341 with C or better
Equivalent to: CEM 431
CEM 441, HEAVY CIVIL CONSTRUCTION MANAGEMENT, 4 Credits
Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites.
Prerequisite: FE 315 with C or better or CE 372 with C or better

CEM 442, BUILDING CONSTRUCTION MANAGEMENT, 4 Credits
Building construction management and methods.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 443, PROJECT MANAGEMENT FOR CONSTRUCTION, 4 Credits
Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CEM 341 with C or better and CEM 343 [C]

CEM 471, ELECTRICAL FACILITIES, 4 Credits
Principles and applications of electrical components of constructed facilities; basic electrical circuit theory, power, motors, controls, codes, and building distribution systems. Lec/lab.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 472, MECHANICAL FACILITIES, 3 Credits
Principles and applications of mechanical components of constructed facilities; heating, ventilating, air conditioning, plumbing, fire protection, and other mechanical construction.
Prerequisite: CCE 207 with C or better or CEM 407 with C or better

CEM 541, HEAVY CIVIL CONSTRUCTION MANAGEMENT, 4 Credits
Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites.
Recommended: FE 315 or CE 372

CEM 543, PROJECT MANAGEMENT FOR CONSTRUCTION, 4 Credits
Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement.

CEM 550, CONTEMPORARY TOPICS IN CONSTRUCTION ENGINEERING MANAGEMENT, 4 Credits
Contemporary topics of emerging technologies and processes, construction engineering and management, how industry environmental change causes development of new technologies, and the applications of the technologies in the field.

CEM 551, PROJECT CONTROLS, 4 Credits
Advanced methods of project controls including advanced technologies and methodologies for quality, time, and cost management; project management organization models, and intra-organizational relationships.

Architectural Engineering Undergraduate Major (BS, HBS)
This program provides students with breadth and depth in the engineering sciences of buildings and their systems: structural systems; heating, ventilation and air-conditioning (HVAC) systems; electrical and lighting systems; construction engineering and management.
The program emphasizes integration across architectural engineering disciplines as well as with the existing civil engineering and construction engineering programs. This program allows students to specialize in a chosen discipline while gaining the knowledge and skills to become leaders in the design and construction of green, energy efficient and more complex buildings.

Major Code: 826

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply the engineering design process to produce solutions that meet specified needs with consideration for public health and safety, and global, cultural, social, environmental, economic, and other factors as appropriate to the discipline.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Recognize the ongoing need to acquire new knowledge, to choose appropriate learning strategies, and to apply this knowledge.
- Function effectively as a member or leader of a team that establishes goals, plans tasks, meets deadlines, and creates a collaborative and inclusive environment.

Civil Engineering Graduate Major (MENG, MS, PhD)

Graduate Areas of Concentration

Civil engineering, coastal and ocean engineering, construction, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering

The School of Civil and Construction Engineering offers graduate work leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. The MEng, MS, and PhD degrees offer concentrations in civil engineering, coastal and ocean engineering, construction, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, water resources engineering, and interdisciplinary areas. Areas of concentration can also be combined to form an integrated civil engineering MS program or MS and PhD minors. The MEng is a course work-only degree requiring a final oral exam. For the MS degree, a thesis or project is required. The PhD degree requires a dissertation.

Degree programs prepare the student for advanced-level entry into professional engineering practice and for careers in research and teaching. Majors within the department constitute approximately two-thirds of the total program. Minor fields may be selected from departmental offerings in different subject areas, from other engineering disciplines, or from other fields of study that support the major. The school also participates in the Master of Arts in Interdisciplinary Studies program.

For more information, contact the CCE Graduate Program Coordinator, 541-737-4934, or cce.school@oregonstate.edu

The mission of the civil engineering program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering positions with business, industry, consulting firms or government.

**Program Educational Objectives—Civil Engineering**

**Note:** The Bachelor of Science and Honors Bachelor of Science degrees in Civil Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org, which requires stated program educational objectives and student outcomes to support these.

OSU Civil Engineering graduates receive a compelling education, and within 3 to 5 years of graduation will have:

1. Assembled, analyzed and synthesized/evaluated information to solve engineering problems and perform modern civil engineering design by applying mathematics, engineering sciences and fundamentals of civil engineering.

2. Participated in modern professional practice or a graduate program in a specialty area of civil engineering, demonstrating effective communication, collaborative work and leadership in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.

3. Recognized the importance of professional licensure and have achieved or prepared to achieve this significant accomplishment. In this endeavor, consideration of the public health, welfare and safety is seen as the paramount priority.

4. Applied an understanding of public policy and contemporary societal issues with sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

Design is the essence of civil engineering. Junior and senior level courses include extensive design content, culminating in a team approach to the solution of open-ended, realistic problems, including capstone design and professional practice courses. Courses with design content include those with 'design' in their titles. A more detailed explanation of the design experience and design course sequences is contained in the 'Civil Engineering Advising Guide,' which may be viewed on the school's website.

**Civil Engineering Graduate Minor**

The School of Civil and Construction Engineering offers graduate minor degrees in Civil Engineering. The Graduate minor in Civil Engineering is for masters and doctoral level students who seek additional formal training and mentoring in civil engineering.

For more information, contact the CCE Graduate Program Coordinator, 541-737-4934, or cce.school@oregonstate.edu

**Minor Code: 3060**

Master's program minors must include a minimum of 15 quarter credits of graduate course work as approved by the minor faculty advisor. Doctoral minors must include a minimum of 18 quarter credits of graduate course work as approved by the minor faculty advisor. Additional credits may be required as determined by the minor faculty advisor or advising committee.

CCE coursework in the minor should be selected in concert with Minor Professor.

**Minor Code: 3060**

**Civil Engineering Undergraduate Major (BA, BS, HBA, HBS)**

The Bachelor of Science and Honors Bachelor of Science degrees in Civil Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

Civil engineering is a diverse professional field with discipline specialties in structures, transportation, water supply and water pollution control, geotechnical engineering, hydrology, hydraulics and water resources, geomatics, ocean engineering, construction, and engineering planning and economics. All civil engineering students receive basic instruction in the various disciplines, with the option for additional elective courses in desired areas. The program is supported by highly qualified faculty and staff that maintain the programs and facilities at the highest level of quality.

The civil engineering curriculum within the School of Civil and Construction Engineering (CCE) includes the basic sciences, social sciences, humanities, communication skills, engineering sciences, and engineering design to teach students an integrated approach to finding practical solutions.
• Acquire and apply new knowledge as needed, using appropriate learning strategies.

A student may also earn a concurrent Bachelor of Arts (BA) or Honors Bachelor of Arts (HBA) degree by completing 32 additional credits in residence including language proficiency equivalent to that attained at the end of the second year of a foreign language as certified by the School of Language, Culture, and Society. Neither the BA nor the HBA degree in civil engineering is accredited by the Engineering Commission of ABET.

Civil Engineering-Forest Engineering

A five-year dual-degree program in civil engineering and forest engineering is offered jointly by the School of Civil and Construction Engineering in the College of Engineering and Forest Engineering in the College of Forestry. Advising is done through either academic unit. See Forest Engineering, Resources and Management in the College of Forestry.

Geomatics (Surveying and Mapping)

Graduates of civil engineering are eligible to take the Fundamentals of Land Surveying Examination in pursuit of the Professional Land Surveying license by selecting courses as follows.

Construction Engineering Management Undergraduate Major (BA, BS, HBA, HBS)

The School of Civil and Construction Engineering offers BA and BS degrees in Construction Engineering Management (CEM). This unique program blends principles of basic science, engineering, and technology with a strong component of business subjects to prepare graduates for
a productive career in the construction industry. The BS in Construction Engineering Management is ACCE accredited.

The CEM program is built on a rigorous four-year curriculum that emphasizes practical applications as well as basic principles. Students are given hands-on experiences in the laboratory and are involved in field trips as a supplement to their classroom activities. A more detailed explanation of the CEM Program is contained in the ‘Construction Engineering Management Advising Guide,’ which may be viewed on the school’s Engineering Management Advising Guide, which may be viewed on the school's website (http://cce.oregonstate.edu/academic-advising/).

The mission of the CEM program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible constructor positions with business, industry, consulting firms or government. The program’s educational objectives are to:

1. Provide a compelling education based in the natural sciences, mathematics, engineering sciences, and business, and in the fundamental paradigms, concepts, understandings, applications, and knowledge of civil and construction engineering and construction management.

2. Develop students’ abilities through their education to analyze, synthesize, and evaluate information, solve engineering problems, and be prepared to effectively perform project engineering and management tasks for effective execution of construction projects.

3. Provide education for modern professional practice including the abilities for effective communication, collaborative work in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.

4. Prepare our graduates for either immediate employment or for graduate school opportunities in construction or business.

5. Provide students with knowledge of contemporary societal issues and a sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

**Major Code: 338**

- Create written communications appropriate to the construction discipline.
- Create oral presentations appropriate to the construction discipline.
- Create a construction project safety plan.
- Create construction project cost estimates.
- Create construction project schedules.
- Analyze professional decisions based on ethical principles.
- Analyze construction documents for planning and management of construction processes.
- Analyze methods, materials, and equipment used to construct projects.
- Apply construction management skills as an effective member of a multi-disciplinary team.
- Apply electronic-based technology to manage the construction process.
- Apply basic surveying techniques for construction layout and control.
- Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
- Understand construction risk management.
- Understand construction accounting and cost control.
- Understand construction quality assurance and control.
- Understand construction project control processes.
- Understand the legal implications of contract, common, and regulatory law to manage a construction project.
- Understand the basic principles of sustainable construction.
- Understand the basic principles of structural behavior.
- Understand the basic principles of mechanical, electrical, and plumbing systems.

School of Electrical Engineering and Computer Science

Consistent with the mission of the university and college, the mission of the School of Electrical Engineering and Computer Science (EECS) at Oregon State University is to provide a comprehensive, state-of-the-art education that prepares our students to be successful in engineering and computing practice and advanced studies.

The school has a tradition of strong undergraduate programs and one of the largest graduate programs within the university, with internationally recognized research programs in the areas of mixed-signal integration, artificial intelligence and machine learning, computer graphics and vision, energy systems, multimedia and networking, materials and devices, end-user software, human-computer interaction, and signal processing and communications systems.

The School of EECS faculty, advising procedures, undergraduate programs’ educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school’s (http://eecs.oregonstate.edu/#website). The Multiple Engineering Cooperative Program (MECOP) offers internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

Electrical and Computer Engineering

The School of EECS offers programs leading to the BS, MS, MEng, and Ph.D. degrees in Electrical and Computer Engineering (ECE).

Electrical and computer engineers engage in the design, construction and programming, and applications of electronic and integrated circuits, digital computers and embedded systems, power generation and utilization, communication and computer networks, electronic materials and devices, electromagnetic, microwave and optical circuits and systems, control systems, and signal processing and conditioning.

Course work leading to the BS degree consists of courses in many of these topics as well as courses in the supporting disciplines of mathematics, physical sciences, and computer science. Students select further study beyond the required courses for either more depth in a subdiscipline or further breadth across engineering. Students fulfill humanities and social science requirements as specified by the university's baccalaureate core program. The BS program is supported by well-equipped laboratories providing#hands-on#experience with electronic circuits, digital logic, electronic and photonic materials, electric machines, IC design, optoelectronics, RF techniques, instrumentation, and microprocessors.

The program incorporates engineering design principles throughout the undergraduate curriculum. This includes the integration of societal, economic, legal, regulatory, ethical, environmental, and other factors into the technical aspects of engineering design. Design activities begin in the freshman orientation sequence, which incorporates open-ended design problems and continues throughout the curriculum. The design experience culminates with a yearlong senior design project. During the senior design experience, students working in teams complete all phases of a design project under the supervision of a faculty member.

Graduates of this program are prepared to either seek industrial employment or pursue advanced graduate degrees.

The Bachelor of Science and Honors Bachelor of Science degrees in Electrical & Computer Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The ECE graduate program provides opportunities for both MS and Ph.D. thesis programs and an MEng coursework-based program in the following areas: analog/mixed signals, communications and signal processing, networking and computer systems, energy systems, materials and devices, and RF/microwave/mmWave and photonics. Graduate work is supported by the school’s well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs’ educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school’s (http://eecs.oregonstate.edu/#website).

The Multiple Engineering Cooperative Program (MECOP) offers industrial internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

Computer Science

The School of EECS offers programs leading to BA, BS, MA, MAIS, MEng, MS, and Ph.D. degrees in Computer Science (CS).

Computer science is the heart of cutting-edge computing software. Computer scientists invent software that enables computers to do new things. They design programming languages, compilers, operating systems, games, databases, computer networks, and user interfaces. They solve complex challenging problems in a wide range of fields that can make a positive difference in the world.

Computer science majors learn skills to create realistic graphics, design new problem-solving tools that anyone can use, and create new solutions for business, medicine, and entertainment. Their programming skills enable computers to ‘learn’ as they process data as well as assist in social communication and technologies to improve the lives of disadvantaged persons.

Computer science offers a foundation that allows graduates to make software work well, make it fast, make it work correctly, find where innovation is needed, and understand the people who will be using it, so as to make it genuinely useful and compelling to people. Much of computer science course work is carried out in teams, and students gain experience in teamwork, professionalism in writing, working with clients, and making presentations of their teams’ efforts.

Course work leading to the BS degree consists of required courses in many of these topics, as well as courses in supporting disciplines such as mathematics. The BS program is supported by well-equipped computer laboratories. Students select further study beyond the required core courses, opting for more depth in computer science, more breadth in business and entrepreneurship, or grounding in an application area for their computing skills. The BS program culminates with a yearlong senior
capstone project, where students working in teams complete all phases of a software project under the supervision of a faculty member.

Graduates of this program are prepared either to pursue advanced graduate degrees or seek employment in business, industry or government.

The Bachelor of Science (BS) and Honors Bachelor of Science (HBS) degrees for the Computer Systems Option (CSO) of the Computer Science program are accredited by the Computing Accreditation Commission of ABET, http://www.ABET.org.

The CS graduate program provides opportunities for MS and Ph.D. thesis, MS non-thesis, and MEng coursework-based degrees in the following areas: artificial intelligence, machine learning & data sciences, computer graphics, visualization & vision, cybersecurity & cryptogrophy, networking & computer systems, human-computer interaction, programming languages, software engineering, and theoretical computer science. Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs' educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school's (http://eecs.oregonstate.edu/) website.

The Multiple Engineering Cooperative Program (MECOP) offers internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

### Faculty

**Distinguished Professor** Dietterich

**Professors** Adams, Allstot, Bailey, Bose, Brekken, Burnett, Conley, Cull (Emeritus), Dhadag, Erwig, A. Fern, Hamdaoui, Lee, Liu, Mathews, Mayaram, Moon, Nguyen, Pancake (Emeritus), Tadepalli, Temes, Wager (Emeritus), Weller, Weisshaar, E. Zhang

**Associate Professors** Borradaile, Budd (Emeritus), Chiang, Cotilla-Sanchez, de Amicsis, Dig, X. Fern, Jander, Jensen, Magaña, Minoura (Emeritus), Natarajan, Plant (Emeritus), Raich, Sarma, Scaffidi, Todorovic, Wang, Wong

**Assistant Professors** T. Anand, Bobba, Cao, L. Chen, Cheng, Fu, Hendrix, L. Huang, Hutchinson, Jang, Johnston, Kim, Knight, Labram, F. Li, Natarajan, Nayyeri, Parham-Mocello, Ramsey, Rosulek, Termehchy, Wanklingshaw

**Senior Instructor** Traylor, McGrath

**Instructors** Alcon, Bakos, Brewster, Cate, Ehsan, Goins, Redfield, Rooker, Schutffort, Shuman, Sweet, Van Londen, Winters, Wolford, L. Zhang

**Faculty Research Assistant** Heer, Irvine

**Associate Professor Senior Research** Y. Zhang

### Computer Science (CS)

**CS 101, COMPUTERS: APPLICATIONS AND IMPLICATIONS, 4 Credits**

The varieties of computer hardware and software. The effects, positive and negative, of computers on human lives. Ethical implications of information technology. Hands-on experience with a variety of computer applications. Lec/lab.

*Available via Ecampus*

**CS 160, COMPUTER SCIENCE ORIENTATION, 3 Credits**

Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Approaches to teaching course topics vary across sections. Lec/lab.

*Equivalent to: CS 160H*

*Available via Ecampus*

**CS 160H, COMPUTER SCIENCE ORIENTATION, 3 Credits**

Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Approaches to teaching course topics vary across sections. Lec/lab.

*Attributes: HNRS – Honors Course Designator*

*Equivalent to: CS 160*
CS 161, INTRODUCTION TO COMPUTER SCIENCE I, 4 Credits
Overview of fundamental concepts of computer science. Introduction to problem solving, software engineering, and object-oriented programming. Includes algorithm design and program development. Lec/lab/rec.
Prerequisite: MTH 112 (may be taken concurrently) with C or better or Math Placement Test with a score of 33 or Math Placement - ALEKS with a score of 061
Equivalent to: EECS 161
Available via Ecampus

CS 162, INTRODUCTION TO COMPUTER SCIENCE II, 4 Credits
Basic data structures. Computer programming techniques and application of software engineering principles. Introduction to analysis of programs. Lec/lab/rec.
Prerequisite: CS 161 with C or better or EECS 161 with C or better
Equivalent to: EECS 162
Available via Ecampus

CS 165, ACCELERATED INTRODUCTION TO COMPUTER SCIENCE, 8 Credits
Overview of the fundamental concepts of computer science. Introduction to problem solving, algorithm development, data types, and basic data structures. Introduction to analysis of algorithms and principles of software engineering. System development and computer programming using procedural/object-oriented paradigms. Offered via Ecampus only.
Prerequisite: MTH 112 with C or better or Math Placement - ALEKS with a score of 075
Available via Ecampus

CS 175, *COMMUNICATIONS SECURITY AND SOCIAL MOVEMENTS, 3 Credits
Equipping students with the theory and practice of communications security, this course explores how social movements can remain effective in the context of mass surveillance and state repression. Lec/rec. (Bacc Core Course)
Attributes: CPDP – Core, Perspective, Difference/Power/Discrimination

CS 195, WEBSITE DESIGN, 4 Credits
How to design and publish a static website using an existing publishing platform: Techniques and tools for designing and publishing on the World Wide Web; hypertext and HTML; site and page design; media integration; issues raised by Internet publishing.
Equivalent to: CS 295

CS 199, SPECIAL TOPICS/COMPUTER SCIENCE, 1-16 Credits
This course is repeatable for 16 credits.
Available via Ecampus

CS 201, COMPUTER PROGRAMMING FOR NON-CS MAJORS, 3 Credits
Covers a variety of fundamental topics in computer programming relevant to anyone who wants to write or work with computer code in their work or studies. Teaches basic computational thinking and programming skills which will allow students to solve a variety of real-world problems. In addition, students will learn more advanced topics such as how some basic algorithms work and can be written in computer code.
Prerequisite: MTH 111 with C- or better
Available via Ecampus

CS 225, DISCRETE STRUCTURES IN COMPUTER SCIENCE, 4 Credits
An introduction to the discrete mathematics of computer science, including logic, set and set operations, methods of proof, recursive definitions, combinatorics, and graph theory. (Note: Students may take either MTH 231 or CS 225, but cannot receive credit for both.)
Prerequisite: MTH 111 with C or better or Math Placement Test with a score of 061 or MTH 112 (may be taken concurrently) with C or better
Available via Ecampus

CS 261, DATA STRUCTURES, 4 Credits
Abstract data types, dynamic arrays, linked lists, trees and graphs, binary search trees, hash tables, storage management, complexity analysis of data structures. Lec/rec.
Prerequisite: (CS 162 with C or better or CS 165 with C or better) and (CS 225 [C] or MTH 231 [C])
Equivalent to: EECS 261
Available via Ecampus

CS 262, PROGRAMMING PROJECTS IN C++, 4 Credits
Learning a second computer programming language. Elements of C++. Object-oriented programming. Experience team work on a large programming project.
Prerequisite: CS 261 with C or better

CS 271, COMPUTER ARCHITECTURE AND ASSEMBLY LANGUAGE, 4 Credits
Introduction to functional organization and operation of digital computers. Coverage of assembly language; addressing, stacks, argument passing, arithmetic operations, decisions, macros, modularization, linkers and debuggers.
Prerequisite: CS 151 with C or better or CS 161 with C or better or CS 165 with C or better
Available via Ecampus

CS 290, WEB DEVELOPMENT, 4 Credits
How to design and implement a multi-tier application using web technologies: Creation of extensive custom client- and server-side code, consistent with achieving a high-quality software architecture.
Prerequisite: CS 162 with C or better or CS 165 with C or better
Equivalent to: CS 494
Available via Ecampus
CS 295, WEBSITE MANAGEMENT, 4 Credits
How to create and promote a dynamic website using existing frameworks/libraries: Designing, developing, publishing, maintaining, and marketing dynamic websites; web security and privacy issues; emerging web technologies; running a website marketing campaign.
Prerequisite: CS 195 with C or better
Recommended: Basic HTML and CSS

CS 299, SPECIAL TOPICS, 0-4 Credits
This course isrepeatable for 99 credits.

CS 312, SYSTEM ADMINISTRATION, 4 Credits
Prerequisite: (CS 311 with C or better or CS 344 with C or better) and CS 372 [C]

CS 321, INTRODUCTION TO THEORY OF COMPUTATION, 3 Credits
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321H
Available via Ecampus

CS 321H, INTRODUCTION TO THEORY OF COMPUTATION, 3 Credits
Survey of models of computation including finite automata, formal grammars, and Turing machines.
Attributes: HNRS – Honors Course Designator
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 321

CS 325, ANALYSIS OF ALGORITHMS, 4 Credits
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325H
Available via Ecampus

CS 325H, ANALYSIS OF ALGORITHMS, 4 Credits
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness.
Attributes: HNRS – Honors Course Designator
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
Equivalent to: CS 325

CS 331, INTRODUCTION TO ARTIFICIAL INTELLIGENCE, 4 Credits
Fundamental concepts in artificial intelligence using the unifying theme of an intelligent agent. Topics include agent architectures, search, games, logic and reasoning, and Bayesian networks.
Prerequisite: CS 325 with C or better or CS 325H with C or better

CS 340, INTRODUCTION TO DATABASES, 4 Credits
Design and implementation of relational databases, including data modeling with ER or UML, diagrams, relational schema, SQL queries, relational algebra, user interfaces, and administration.
Prerequisite: CS 290 with C or better
Equivalent to: CS 275
Available via Ecampus

CS 344, OPERATING SYSTEMS I, 4 Credits
Introduction to operating systems using UNIX as the case study. System calls and utilities, fundamentals of processes and interprocess communication.
Prerequisite: CS 261 with C or better and (CS 271 [C] or ECE 271 [C])
Equivalent to: CS 311
Recommended: Experience programming in the C language
Available via Ecampus

CS 352, INTRODUCTION TO USABILITY ENGINEERING, 4 Credits
Basic principles of usability engineering methods for the design and evaluation of software systems. Includes the study of human-machine interactions, user interface characteristics and design strategies, software evaluation methods, and related guidelines and standards.
Prerequisite: CS 151 with C or better or CS 161 with C or better or CS 165 with C or better or CS 295 with C or better or ECE 151 with C or better
Equivalent to: CS 252
Available via Ecampus

CS 361, SOFTWARE ENGINEERING I, 4 Credits
Introduction to the 'front end' of the software engineering lifecycle; requirements analysis and specification; design techniques; project management.
Prerequisite: CS 261 with C or better
Available via Ecampus

CS 362, SOFTWARE ENGINEERING II, 4 Credits
Introduction to the 'back end' of the software engineering lifecycle; implementation; verification and validation; debugging; maintenance.
Prerequisite: CS 261 with C or better
Recommended: Experience with object-oriented programming and data structures (eg. CS 161, CS 162, CS 361)
Available via Ecampus

CS 370, INTRODUCTION TO SECURITY, 4 Credits
Introductory course on computer security with the objective to introduce concepts and principles of computer systems security. Notions of security, basic cryptographic primitives and their application, basics of authentication and access control, basics of key-management, basics of malware and software security.
Prerequisite: CS 344 (may be taken concurrently) with C or better
Available via Ecampus
**CS 372, INTRODUCTION TO COMPUTER NETWORKS, 4 Credits**

Computer network principles, fundamental networking concepts, packet-switching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. CROSSLISTED as CS 372/ECE 372.

**Prerequisite:** CS 261 with C or better and (ECE 271 [C] or CS 271 [C])
**Equivalent to:** ECE 372
**Recommended:** C programming and Unix familiarity.
**Available via Ecampus**

**CS 373, DEFENSE AGAINST THE DARK ARTS, 4 Credits**

Introduction to the current state of the art in anti-malware, computer forensics, and networking, messaging, and web security. Broad introduction to the field of computer security.

**Prerequisite:** CS 344 with C or better and CS 340 [C] and CS 372 [C]
**Available via Ecampus**

**CS 381, PROGRAMMING LANGUAGE FUNDAMENTALS, 4 Credits**

An introduction to the concepts found in a variety of programming languages. Programming languages as tools for problem solving. A brief introduction to languages from a number of different paradigms.

**Prerequisite:** CS 261 with C or better and (CS 225 [C] or MTH 231 [C])
**Available via Ecampus**

**CS 391, *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE, 3 Credits**

In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course)

**Attributes:** CSST – Core, Synthesis, Science/Technology/Society
**Equivalent to:** CS 391H, CS 391H
**Recommended:** CS 101 or computer literacy.
**Available via Ecampus**

**CS 391H, *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE, 3 Credits**

In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course)

**Attributes:** CSST – Core, Synthesis, Science/Technology/Society; HNRS – Honors Course Designator
**Equivalent to:** CS 391
**Recommended:** CS 101 or computer literacy

**CS 395, WEBSITE MULTIMEDIA, 4 Credits**

How to create and deploy interactive digital multimedia through static websites: Technological, aesthetic, and pedagogical issues of communication using interactive multimedia and hypermedia; techniques for authoring interactive multimedia projects using a variety of digital media roots.

**Prerequisite:** CS 195 with C or better or (ART 120 with C or better and (CS 162 [C] or CS 165 [C]))

**CS 399, SPECIAL TOPICS, 0-4 Credits**

*This course is repeatable for 99 credits.*

**CS 401, RESEARCH, 1-16 Credits**

*This course is repeatable for 16 credits.*

**CS 403, THESIS, 1-16 Credits**

*This course is repeatable for 16 credits.*

**CS 405, READING AND CONFERENCE, 1-16 Credits**

*This course is repeatable for 16 credits.*

**CS 406, PROJECTS, 1-16 Credits**

*This course is repeatable for 16 credits.*

**CS 407, SEMINAR, 1-16 Credits**

Graded P/N.
**Equivalent to:** CS 407H
*This course is repeatable for 16 credits.*

**CS 407H, SEMINAR, 1-16 Credits**

Graded P/N.
**Attributes:** HNRS – Honors Course Designator
**Equivalent to:** CS 407
*This course is repeatable for 16 credits.*

**CS 410, OCCUPATIONAL INTERNSHIP, 1-16 Credits**

Graded P/N.
*This course is repeatable for 16 credits.*

**CS 419, SELECTED TOPICS IN COMPUTER SCIENCE, 0-5 Credits**

Topics of special and current interest not covered in other courses.
**Equivalent to:** CS 419H
*This course is repeatable for 99 credits.*
**Available via Ecampus**

**CS 419H, SELECTED TOPICS IN COMPUTER SCIENCE, 1-5 Credits**

Topics of special and current interest not covered in other courses.
**Attributes:** HNRS – Honors Course Designator
**Equivalent to:** CS 419
*This course is repeatable for 99 credits.*

**CS 420, GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE, 3 Credits**

Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling.

**Prerequisite:** (CS 325 with C or better or CS 325H with C or better)
CS 427, CRYPTOGRAPHY, 4 Credits
Introduction to the theory and practice of modern cryptography. Fundamental primitives including pseudorandom generators, block ciphers, hash functions. Symmetric-key cryptography for privacy and authenticity. Public-key cryptography based on number-theoretic problems.
Prerequisite: CS 261 with C or better or MTH 355 with C or better
Available via Ecampus

CS 434, MACHINE LEARNING AND DATA MINING, 4 Credits
Introduction to machine learning and data mining algorithms (supervised learning, unsupervised learning, and reinforcement learning) tools that are widely employed in industrial and research settings.
Prerequisite: CS 325 with C or better or CS 325H with C or better

CS 440, DATABASE MANAGEMENT SYSTEMS, 4 Credits
Relational database design, normalization, file structures, disk storage, query processing and optimization, team development of database applications.
Prerequisite: CS 261 with C or better and CS 340 [C]

CS 444, OPERATING SYSTEMS II, 4 Credits
Explores principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking.
Prerequisite: CS 344 with C or better and (CS 271 [C] or ECE 375 [C])
Equivalent to: CS 411

CS 446, NETWORKS IN COMPUTATIONAL BIOLOGY, 3 Credits
Prerequisite: CS 261 with C or better or BOT 476 with C or better
Recommended: Completion or concurrent enrollment in CS 325

CS 447, WIRELESS EMBEDDED SYSTEMS, 4 Credits
A hands-on introduction to programming wireless embedded systems (aka the 'Internet of Things'). Topics include sensors, actuators, state machines, scheduling, wireless communications, time synchronization, localization, fault tolerance, and security related to cyber-physical systems.
Prerequisite: CS 344 with C or better

CS 450, INTRODUCTION TO COMPUTER GRAPHICS, 4 Credits
Theoretical and practical treatment of 3D computer graphics using OpenGL: geometric modeling, transformations, viewing, lighting, texture mapping, shading, rendering, and animation.
Prerequisite: CS 261 with C or better

CS 453, SCIENTIFIC VISUALIZATION, 4 Credits
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization.
Prerequisite: CS 261 with C or better
Recommended: Prior experience with Unix or Windows, programming experience.

CS 457, COMPUTER GRAPHICS SHADERS, 4 Credits
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages.
Recommended: Previous graphics pipeline programming experience.

CS 458, INTRODUCTION TO INFORMATION VISUALIZATION, 4 Credits
Tools and techniques for designing, developing, and deploying interactive visualizations of abstract data sources. Discusses techniques based on principles from design, cognitive science, and perceptual psychology. Topics include 1D, 2D, 3D, multivariate representations, time-series, graphs and trees, text and documents, and interaction techniques.
Prerequisite: CS 361 with C or better

CS 461, SENIOR SOFTWARE ENGINEERING PROJECT I, 3 Credits
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CS 361 with C or better and CS 325 [C] and CS 362 [C]
Available via Ecampus

CS 462, SENIOR SOFTWARE ENGINEERING PROJECT II, 3 Credits
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. (Writing Intensive Courses)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: CS 362 with C or better and CS 461 [C]
CS 463, SENIOR SOFTWARE ENGINEERING PROJECT, 2 Credits
Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. 
Prerequisite: CS 462 with C or better

CS 464, OPEN SOURCE SOFTWARE, 4 Credits
Provides a theoretical foundation of the history, key concepts, technologies, and practices associated with modern Free and Open Source Software (FOSS) projects, and gives students an opportunity to explore and make contributions to FOSS projects with some mentoring and guidance. 
Prerequisite: CS 261 with C or better and CS 361 [C]
Available via Ecampus

CS 466, WEB-BASED START-UP PROJECT, 4 Credits
Real-world, hands-on learning in a high-tech web/mobile-based company environment. Research in the development of product ideas, hypotheses, and business models to create customer experiments. Prototyping and statistical analysis to develop, optimize, and evaluate solutions. Rapid iteration/refactoring based on customer input, web analytics, and user engagement metrics. Offered at OSU-Cascades only. 
Corequisites: CS 461

CS 467, ONLINE CAPSTONE PROJECT, 4 Credits
Real-world team-based experience with the software engineering design and delivery cycle, including requirements analysis and specification, design techniques, and requirements and final project written documentation. For students in the online CS double-degree program only. 
Prerequisite: CS 344 with C or better and CS 361 [C] and CS 362 [C]
Available via Ecampus

CS 468, INCLUSIVE DESIGN (HCI), 4 Credits
Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer. 
Prerequisite: CS 352 with C or better
Recommended: CS 565 with a minimum grade of C

CS 472, COMPUTER ARCHITECTURE, 4 Credits
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/ECE 472 and CS 572/ECE 572.
Prerequisite: ECE 375 with C or better
Equivalent to: CS 470, ECE 472

CS 475, INTRODUCTION TO PARALLEL PROGRAMMING, 4 Credits
Theoretical and practical survey of parallel programming, including a discussion of parallel architectures, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language. 
Prerequisite: CS 261 with C or better
Available via Ecampus

CS 476, ADVANCED COMPUTER NETWORKING, 4 Credits
Prerequisite: (CS 372 with C or better or ECE 372 with C or better) and (ECE 353 [C] or ST 314 [C] or ST 314H [C])
Equivalent to: ECE 476, EECS 476

CS 477, INTRODUCTION TO DIGITAL FORENSICS, 4 Credits
Introduces concepts related to digital forensics, its role and importance, and tools and techniques for collecting and curating digital evidence. The course will also discuss the role of evidence in the justice system and some legal aspects as they pertain to digital forensics. It will introduce tools and techniques for computer and network forensics. 
Prerequisite: CS 344 with C or better and CS 370 [C]
Available via Ecampus

CS 478, NETWORK SECURITY, 4 Credits
Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/TLS, IPsec, firewalls and intrusion detection CROSSLISTED as CS 478/ECE 478. 
Prerequisite: CS 372 with C or better or ECE 372 with C or better
Equivalent to: ECE 478
Recommended: CS 370
Available via Ecampus

CS 480, TRANSLATORS, 4 Credits
Explores content on the subject of compilers; attribute grammars, syntax-directed translation, lex, yacc, LR(1) parsers, symbol tables, semantic analysis, and peep-hole optimization. 
Prerequisite: CS 344 with C or better and CS 381 [C] and (CS 321 [C] or CS 321H [C])
CS 491, COMPUTER SCIENCE SKILLS FOR SIMULATION AND GAME PROGRAMMING, 4 Credits
Game and simulation development is very much a data and math-intensive activity. A certain number of actions must be produced, and producing them by hand is hard. This is a middleware CS course that fills in many of the missing pieces for those wanting to enter the simulation and game development worlds in a software tool-building capacity.
Prerequisite: CS 261 with C or better and (CS 225 [C] or MTH 231 [C]) and MTH 252 [C]

CS 492, MOBILE SOFTWARE DEVELOPMENT, 4 Credits
Introduction to concepts and techniques for developing mobile applications. Students will become familiar with modern mobile structure, implementation, development tools, and workflow.
Prerequisite: CS 344 with C or better
Available via Ecampus

CS 493, CLOUD APPLICATION DEVELOPMENT, 4 Credits
Covers developing RESTful cloud services, an approach based on representational state transfer technology, an architectural style and approach to communications used in modern cloud services development.
Prerequisite: CS 290 with C or better and CS 340 [C] and CS 372 [C]
Available via Ecampus

CS 495, INTERACTIVE MULTIMEDIA PROJECTS, 4 Credits
Students apply principles and procedures of digital art, design, communication, and software authoring while working on large integrated media projects.
Recommended: CS 395

CS 496, MOBILE AND CLOUD SOFTWARE DEVELOPMENT, 4 Credits
Introduction to the concepts and techniques for developing mobile and cloud applications.
Prerequisite: CS 344 with C or better or CS 311 with C or better
Recommended: Working knowledge of at least one operating system

CS 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CS 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

CS 503, COMPUTER SCIENCE MS THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CS 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 20 credits.

CS 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

CS 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

CS 510, OCCUPATIONAL INTERNSHIP, 1-4 Credits
This course is repeatable for 99 credits.
Available via Ecampus

CS 511, PROGRAMMING AND DATA STRUCTURES, 4 Credits
Computer programming, problem solving, data structures, object-oriented programming, recursion, sorting, dynamic programming, asymptotic time complexity
Recommended: College algebra, plus the ability to navigate an operating system, manipulate files, and use a command line.
Available via Ecampus

CS 512, DATA SCIENCE TOOLS AND PROGRAMMING, 4 Credits
Accessing and distributing data in the cloud: relational and non-relational databases; map reduction; cloud data processing; load balancing; types of data-stores used in the cloud.
Recommended: CS 511 or an equivalent course or programming experience in in a high-level language like Python, Java or C++.
Available via Ecampus

CS 515, ALGORITHMS AND DATA STRUCTURES, 4 Credits
Greedy algorithms, divide and conquer, dynamic programming, network flow, data structures.
Recommended: Undergraduate course in algorithms

CS 516, THEORY OF COMPUTATION AND FORMAL LANGUAGES, 4 Credits

CS 517, THEORY OF COMPUTATION, 4 Credits
Turing machines, decidability, NP-completeness, complexity classes, randomized computation, relativization, circuit complexity, interactive proof systems, lower bounds, cryptography.

CS 519, SELECTED TOPICS IN COMPUTER SCIENCE, 0-5 Credits
Topics of special and current interest not covered in other courses. May not be offered every year.
This course is repeatable for 99 credits.
Available via Ecampus
CS 520, GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE, 3 Credits
Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling.
Recommended: CS 325 and MTH 232

CS 523, ADVANCED ALGORITHMS, 4 Credits
Approximation algorithms, randomized and probabilistic algorithms, online algorithms.
Recommended: CS 515

CS 527, ERROR-CORRECTING CODES, 4 Credits
Hamming codes, linear codes, cyclic codes, BCH and Reed-Solomon codes. Introduction to Galois fields. Encoding and decoding algorithms. Burst error correcting codes, asymmetric and unidirectional codes. Applications of codes for computer systems.
Recommended: Discrete math and probability

CS 529, SELECTED TOPICS IN THEORETICAL COMPUTER SCIENCE, 1-5 Credits
Topics of interest in algorithms and theory of computation. Topics include approximation algorithms, planar graph algorithms, distributed algorithms, combinatorial optimization, computational geometry.
This course is repeatable for 99 credits.
Recommended: CS 515

CS 531, ARTIFICIAL INTELLIGENCE, 4 Credits

CS 533, INTELLIGENT AGENTS AND DECISION MAKING, 4 Credits
Recommended: CS 531

CS 534, MACHINE LEARNING, 4 Credits

CS 535, DEEP LEARNING, 4 Credits
Prerequisite: CS 534 with C or better or ROB 537 with C or better

CS 536, PROBABILISTIC GRAPHICAL MODELS, 4 Credits
Representation of probabilistic graphical models, both directed (Bayesian networks) and undirected (Markov networks). Exact and approximate inference techniques. Parameter and structure learning from data.
Recommended: Strong programming skills

CS 537, COMPUTER VISION I, 3 Credits
An introduction to low-level computer vision and visual geometry. Topics of interest include the following: detection of interest points and edges, matching points and edges, color models, projective geometry, camera calibration, epipolar geometry, homography, image stitching, and multitarget tracking.
Recommended: Undergraduate-level statistics, probability, calculus, linear algebra, good programming skills, machine learning or AI

CS 539, SELECTED TOPICS IN ARTIFICIAL INTELLIGENCE, 0-5 Credits
Advanced topics in artificial intelligence. Typical topics include machine learning for sequential and spatial data, knowledge representation and inference, probabilistic modeling of complex systems, data mining and information extraction.
This course is repeatable for 99 credits.

CS 540, DATABASE MANAGEMENT SYSTEMS, 4 Credits
Purpose of database systems, levels of data representation. Entity-relationship model. Relational systems: data definition, data manipulation, query language (SQL), relational calculus and algebra, data dependencies and normal forms. DBTG network model. Query optimization, recovery, concurrency control.
Recommended: CS 261

CS 544, OPERATING SYSTEMS II, 4 Credits
Principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking. Lec/rec.
Equivalent to: CS 511
Recommended: (CS 311 or CS 344) and (CS 271 or ECE 375)
CS 546, NETWORKS IN COMPUTATIONAL BIOLOGY, 3 Credits
Recommended: Completion or concurrent enrollment in CS 325

CS 549, SELECTED TOPICS ON DATA SCIENCE & SYSTEMS, 0-5 Credits
Current topics in data science and systems, e.g. querying, inference, and learning over large datasets; reasoning and learning on graph, heterogeneous, and multi-modal data; data curation; knowledge representation; systems for large data exploration and analytics; distributed data systems; human-centered data science; fairness and responsibility in data science.
This course is repeatable for 99 credits.
Recommended: CS 540

CS 550, INTRODUCTION TO COMPUTER GRAPHICS, 4 Credits
Theoretical and practical treatment of 3D computer graphics using OpenGL: geometric modeling, transformations, viewing, lighting, texture mapping, shading, rendering, and animation.
Recommended: CS 261

CS 551, COMPUTER GRAPHICS, 4 Credits
3-D graphics hardware: Line and polygon scan conversion, modeling transformations, viewing transformations, matrix stacks, hierarchical models, perspective and orthographic projections, visible surface determination, illumination models, shading models, texture mapping, ray tracing.
Recommended: CS 450 or CS 550

CS 552, COMPUTER ANIMATION, 4 Credits
Traditional animation concepts: production pipeline, keyframing implementation, interpolation, point-mass dynamics, spring-mass systems, rigid body dynamics, forward and inverse kinematics, human motion control, motion capture.
Recommended: CS 551

CS 553, SCIENTIFIC VISUALIZATION, 4 Credits
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delaunay triangulation; and volume visualization.
Recommended: Prior experience with Unix or Windows, programming experience.

CS 554, GEOMETRIC MODELING IN COMPUTER GRAPHICS, 4 Credits
Advanced topics in computer graphics focusing on representation and processing of polygonal models and their application. Surface fundamentals; discrete differential geometry and topology; data structures for representing 3-D surfaces; surface subdivision and smoothing; mesh simplification and multi-resolution representation of 3-D surfaces; geometry compression; surface parameterization; geometry remeshing; topological simplification; implicit surfaces.
Recommended: CS 450

CS 557, COMPUTER GRAPHICS SHADERS, 4 Credits
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages.
Recommended: Previous graphics pipeline programming experience.

CS 559, SELECTED TOPICS IN COMPUTER GRAPHICS AND VISION, 0-5 Credits
Advanced topics in graphics, animation, and vision. Topics include distribution ray tracing, global-illumination, radiosity, image-based modeling and rendering, vision-assisted image and video editing, 3-D vision, 3-D virtual environments, 3-D interaction, control for physical simulation, motion graphs, computational geometry, etc.
This course is repeatable for 99 credits.

CS 560, DATA-DRIVEN SOFTWARE ENGINEERING, 4 Credits
An overview of data-driven empirical research methods that can be used to understand the different aspects of software engineering.
Prerequisite: CS 561 with C or better

CS 561, SOFTWARE ENGINEERING METHODS, 4 Credits
Master software engineering methods and supporting tools in the context of agile processes. Teams will engage in all aspects of software development including design, testing, implementation, deployment and maintenance. 3 hours of lecture per week plus one-hour independent lab per week.
Recommended: CS 362

CS 562, SOFTWARE PROJECT MANAGEMENT, 4 Credits
Master software project management with an emphasis on timely, cost-effective delivery of high-quality systems. Learn about existing techniques and supporting tools, with a particular focus on coordination and project management. 3 hours of lecture per week plus one-hour independent lab per week.
Recommended: CS 561
CS 563, SOFTWARE MAINTENANCE AND EVOLUTION, 4 Credits
Contribute to the cutting-edge of software engineering. Learn about existing techniques and supporting tools, with a particular focus on maintenance and evolution. Identify opportunities to support software maintenance and evolution more effectively, by creating new knowledge and supporting systems through research and innovation. 3 hours of lecture per week plus one-hour independent lab per week.
Prerequisite: CS 561 with C or better

CS 564, FIELD STUDIES IN SE AND HCI, 4 Credits
Deals with the type of empirical study known as the 'case' study. These are studies that collect data from natural software development situations as they really occur in the field, in which the researcher does not manipulate or 'control' anything. The course is an end-to-end coverage of the process. Mainly focuses on case studies involving human software developers in the field. The student will conduct a field study as part of this course.

CS 565, HUMAN-COMPUTER INTERACTION, 4 Credits
Basic principles of Human-Computer Interaction (HCI) for the design and evaluation of software systems. Includes research methods for studying human-machine interactions and user interfaces, design strategies, software evaluation methods, and related guidelines and standards.

CS 567, LABORATORY STUDIES IN SE AND HCI, 4 Credits
Empirical lab studies of software development. Covers how to go about designing, preparing for, running, analyzing, and writing-for-publication lab experiments of programming situations involving human subjects. This is an end-to-end coverage of the entire process, and will put students in a position to conduct lab studies of their own with human subjects.

CS 568, INCLUSIVE DESIGN (HCL), 4 Credits
Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer.
Recommended: CS 352 [C] or CS 565 [C]

CS 569, SELECTED TOPICS IN SOFTWARE ENGINEERING, 0-5 Credits
Topics include new programming methodologies, productivity, software development, software complexity metrics. This course is repeatable for 99 credits.
Recommended: CS 561

CS 570, HIGH PERFORMANCE COMPUTER ARCHITECTURE, 4 Credits
Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as CS 570/ECE 570.
Equivalent to: ECE 570
Recommended: ECE 472 or ECE 572

CS 572, COMPUTER ARCHITECTURE, 4 Credits
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/ECE 472 and CS 572/ECE 572.
Equivalent to: ECE 572
Recommended: ECE 375

CS 575, INTRODUCTION TO PARALLEL PROGRAMMING, 4 Credits
Theoretical and practical survey of parallel programming, including a discussion of parallel architecture, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language.
Available via Ecampus

CS 576, ADVANCED COMPUTER NETWORKING, 4 Credits
Equivalent to: ECE 576
Recommended: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)

CS 578, CYBER-SECURITY, 4 Credits
A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPsec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as CS 578/ECE 578.
Equivalent to: ECE 578

CS 579, TOPICS IN COMPUTER ARCHITECTURE AND PARALLEL PROCESSING, 0-5 Credits
Current topics in advanced computer architecture and parallel processing. This course is repeatable for 99 credits.
Recommended: CS 575 or CS 572 or ECE 572

CS 581, PROGRAMMING LANGUAGES I, 4 Credits
Graduate-level introduction to functional programming and programming language theory. Strongly typed functional programming in Haskell, abstract syntax and grammars, interpreters, denotational semantics, domain theory, and lambda calculus.
CS 582, PROGRAMMING LANGUAGES II, 4 Credits
Essentials of programming language theory for understanding and conducting programming language research. Dependently typed programming in Agda, Coq, or Idris; operational semantics; type systems; unification and type inference.
Prerequisite: CS 581 with C or better

CS 583, ADVANCED FUNCTIONAL PROGRAMMING, 4 Credits
Advanced functional programming concepts and strategies, with a focus on techniques useful for the design and implementation of programming languages. Includes higher-order abstract syntax, functors and monads, generalized algebraic data types, functional data structures, and graph reduction.
Prerequisite: CS 581 with C or better

CS 585, DOMAIN-SPECIFIC LANGUAGES, 4 Credits
Graduate-level introduction to the design and implementation of domain-specific languages (DSLs). Domain analysis; review and revision of language designs; binding constructs to support abstraction; definition of syntax and semantics of DSLs; prototype implementation of embedded DSL.
Prerequisite: CS 581 with C or better

CS 589, SELECTED TOPICS IN PROGRAMMING LANGUAGES, 1-5 Credits
An in-depth examination of a specific topic of interest in programming language design and implementation. Example topics include object-oriented programming, parallel programming, compiler optimization, programming language semantics.
This course is repeatable for 99 credits.

CS 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

CS 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

CS 603, COMPUTER SCIENCE PHD THESIS, 1-16 Credits
This course is repeatable for 999 credits.

CS 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

CS 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

CS 637, COMPUTER VISION II, 4 Credits
An introduction to recent advances in visual recognition, including object detection, semantic segmentation, multimodal parsing of images and text, image captioning, face recognition, and human activity recognition. The course covers common formulations of these problems, including energy minimization on graphical models, and supervised machine learning approaches to low- and high-level recognition tasks.
Prerequisite: CS 535 with B+ or better or CS 537 with B- or better
Recommended: CS 519

Electrical and Computer Engineering (ECE)

ECE 111, INTRODUCTION TO ECE: TOOLS, 3 Credits
Introduction to the electrical and computer engineering professional practice. Covers the foundations of engineering problem solving and other skills necessary for success. Students will be taught engineering practice through hands-on approaches. Recommended for electrical and computer engineering majors, and for those interested in engineering as a profession. Lec/lab. Has extra fees.
Recommended: Completion or concurrent enrollment in MTH 111

ECE 112, INTRODUCTION TO ECE: CONCEPTS, 3 Credits
Basic electrical and computer engineering concepts, problem solving and hands-on laboratory project. Topics include electronic circuit and device models, digital logic, circuit analysis, and simulation tools. Lec/lab. Has extra fees.
Prerequisite: MTH 111 with C or better or MTH 112 with C or better or MTH 251 with C or better or MTH 251H with C or better or Math Placement Test with a score of 23

ECE 199, SPECIAL STUDIES, 0-16 Credits
One-credit section. Graded P/N.
This course is repeatable for 16 credits.

ECE 271, DIGITAL LOGIC DESIGN, 3 Credits
A first course in digital logic design. Data types and representations, Boolean algebra, state machines, simplification of switching expressions, and introductory computer arithmetic. Lec/rec.
Prerequisite: MTH 251 (may be taken concurrently) with C or better or MTH 251H (may be taken concurrently) with C or better or MTH 231 (may be taken concurrently) with C or better
Equivalent to: ECE 322H

ECE 272, DIGITAL LOGIC DESIGN LABORATORY, 1 Credit
This laboratory course accompanies ECE 271, Digital Logic Design. This also illustrates topics covered in the lectures of ECE 271 using computer-aided design, verification tools, and prototyping hardware.
Recommended: Completion or concurrent enrollment in ECE 271

ECE 322, ELECTRONICS I, 3 Credits
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.
Prerequisite: ENGR 203 with C or better
ECE 322H, ELECTRONICS I, 3 Credits
Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits.  
Attributes: HNRS – Honors Course Designator  
Prerequisite: ENGR 203 with C or better  
Equivalent to: ECE 322

ECE 323, ELECTRONICS II, 3 Credits
Transient operation of MOSFETs and bipolar transistors; multistage amplifiers; frequency response; feedback and stability.  
Prerequisite: ECE 322 with C or better

ECE 331, ELECTROMECHANICAL ENERGY CONVERSION, 4 Credits
Energy conversion principles for electric machines. Steady state characteristics of direct current, induction, and synchronous machines. Application of stepper and servo motors and synchronous generators.  
Prerequisite: (ENGR 202 with C or better or ENGR 202H with C or better) and MTH 256 [C] and PH 213 [C]

ECE 332, LABORATORY ON ELECTROMECHANICAL ENERGY CONVERSION, 1 Credit
DC, PMAC, and induction machine testing, operation, and control.  
Prerequisite: ENGR 202 with C or better or ENGR 202H with C or better  
Corequisites: ECE 331

ECE 341, JUNIOR DESIGN I, 3 Credits
Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group.  
Prerequisite: CS 261 (may be taken concurrently) with C or better and ENGR 203 [C]

ECE 342, JUNIOR DESIGN II, 3 Credits
Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group.  
Prerequisite: ECE 341 with C or better

ECE 351, SIGNALS AND SYSTEMS I, 3 Credits
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis. Lec.  
Prerequisite: ENGR 203 with C or better and (MTH 256 [C] or MTH 256H [C])

ECE 352, SIGNALS AND SYSTEMS II, 3 Credits
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis.  
Prerequisite: ECE 351 with C or better and (MTH 306 [C] or MTH 306H [C])

ECE 353, INTRODUCTION TO PROBABILITY AND RANDOM SIGNALS, 3 Credits
Explores discrete and continuous probability concepts, single and multiple random variable distributions, expectation, introductory stochastic processes, correlation and power spectral density properties of random signals, random signals through linear filters.  
Prerequisite: ECE 351 with C or better

ECE 372, INTRODUCTION TO COMPUTER NETWORKS, 4 Credits
Computer network principles, fundamental networking concepts, packet-switching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. CROSSLISTED as CS 372/ ECE 372.  
Prerequisite: CS 261 with C or better and (ECE 271 [C] or CS 271 [C])  
Equivalent to: CS 372  
Recommended: C programming and Unix familiarity

ECE 375, COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE PROGRAMMING, 4 Credits
Introduction to computer organization, how major components in a computer system function together in executing a program, and assembly language programming. Lec/lab.  
Prerequisite: ECE 271 with C or better  
Recommended: CS 261 or C/C++ programming

ECE 390, ELECTRIC AND MAGNETIC FIELDS, 4 Credits
Static and quasi-static electric and magnetic fields.  
Prerequisite: (MTH 255 with C or better or MTH 255H with C or better) and ENGR 203 (may be taken concurrently) [C] and PH 213 [C]

ECE 391, TRANSMISSION LINES, 3 Credits
Transient and steady-state analysis of transmission line circuits with application to engineering problems.  
Prerequisite: ECE 322 (may be taken concurrently) with C or better and ENGR 203 [C] and (MTH 254 [C] or MTH 254H [C]) and (MTH 256 [C] or MTH 256H [C])  
Equivalent to: ECE 391X

ECE 399, SPECIAL TOPICS, 1-16 Credits
Course work to meet students' needs in advanced or specialized areas and to introduce new, important topics in electrical and computer engineering at the undergraduate (junior/senior) level.  
Equivalent to: ECE 399H  
This course is repeatable for 16 credits.

ECE 401, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ECE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

<tr>
<td>ECE 422</td>
<td>CMOS INTEGRATED CIRCUITS I, 4 Credits</td>
<td></td>
<td>Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation. Prerequisite: ECE 322 with C or better and ECE 323 (may be taken concurrently) [C]</td>
<td></td>
</tr>
<tr>
<td>ECE 423</td>
<td>CMOS INTEGRATED CIRCUITS II, 4 Credits</td>
<td></td>
<td>Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion. Lec/lab. Prerequisite: ECE 422 with C or better</td>
<td></td>
</tr>
<tr>
<td>ECE 431</td>
<td>POWER ELECTRONICS, 4 Credits</td>
<td></td>
<td>Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab. Prerequisite: ECE 322 with C or better and ECE 323 (may be taken concurrently) [C] and ECE 351 [C]</td>
<td></td>
</tr>
<tr>
<td>ECE 432</td>
<td>DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION, 4 Credits</td>
<td></td>
<td>Generalized machine theory. Techniques for dynamic analysis of electromechanical machines including arbitrary reference frame theory. Lec/lab. Prerequisite: ECE 331 with C or better and ENGR 203 [C] Corequisites: ECE 431</td>
<td></td>
</tr>
<tr>
<td>ECE 433</td>
<td>POWER SYSTEM ANALYSIS, 4 Credits</td>
<td></td>
<td>Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis. Prerequisite: ECE 323 with C or better and ECE 352 [C] or (ENGR 202 [C] or ENGR 202H [C]) and MTH 254 [C] and MTH 306 [C]</td>
<td>Recommended: Three-phase power</td>
</tr>
<tr>
<td>ECE 437</td>
<td>SMART GRID, 3 Credits</td>
<td></td>
<td>Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security. Prerequisite: ECE 433 with C or better Recommended: Background in power systems analysis equivalent to ECE 433</td>
<td></td>
</tr>
<tr>
<td>ECE 438</td>
<td>ELECTRIC AND HYBRID ELECTRIC VEHICLES, 4 Credits</td>
<td></td>
<td>Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls. Prerequisite: ECE 331 with C or better and ECE 431 [C]</td>
<td></td>
</tr>
</tbody>
</table>
**ECE 353, INFORMATION THEORY AND CHANNEL CODING**
Prerequisites: ECE 342 with C or better and WR 327

**ECE 351, SYSTEMS DYNAMICS AND CONTROL**
Prerequisites: (ME 317 with C or better or ME 317H with C or better or ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C]))
Equivalent to: ME 430, ME 430H
Available via Ecampus

**ECE 352, DIGITAL COMMUNICATIONS AND CHANNEL CODING**
Prerequisites: ECE 342 with C or better

**ECE 461, INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS**
Prerequisites: ECE 351 with C or better and ECE 352 [C] and ECE 353 [C]

**ECE 462, DIGITAL COMMUNICATIONS AND CHANNEL CODING**
Prerequisites: ECE 461 with C or better and ECE 351 [C] and ECE 352 [C] and ECE 353 [C]

**ECE 463, WIRELESS COMMUNICATIONS NETWORK**
Prerequisites: ECE 351 with C or better and ECE 352 [C]
Recommended: Probability background and ECE 461

**ECE 464, DIGITAL SIGNAL PROCESSING**
Prerequisites: ECE 351 with C or better and ECE 352 [C]

**ECE 468, DIGITAL IMAGE PROCESSING**
Prerequisites: ECE 351 with C or better and ECE 352 [C]

**ECE 471, ENERGY-EFFICIENT VLSI DESIGN**
Prerequisites: ECE 271 with C or better and ECE 322 [C] and ECE 323 (may be taken concurrently) [C]

**ECE 472, COMPUTER ARCHITECTURE**
Prerequisites: ECE 375 with C or better
Equivalent to: CS 472
ECE 473, MICROCONTROLLER SYSTEM DESIGN, 4 Credits
Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. Lec/lab.
Prerequisite: ECE 322 with C or better and ECE 375 [C] and CS 261 [C]

ECE 474, VLSI SYSTEM DESIGN, 4 Credits
Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced.
Prerequisite: ECE 322 with C or better and ECE 375 [C]

ECE 476, ADVANCED COMPUTER NETWORKING, 4 Credits
Prerequisite: (CS 372 with C or better or ECE 372 with C or better) and (ECE 353 [C] or ST 314 [C] or ST 314H [C])
Equivalent to: CS 476, ECECS 476

ECE 477, MULTIMEDIA SYSTEMS, 4 Credits
Design of multimedia systems used in information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec.
Recommended: ECE 375

ECE 478, NETWORK SECURITY, 4 Credits
Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/TLS, IPSec, firewalls and intrusion detection CROSSLISTED as CS 478/ECE 478.
Prerequisite: CS 372 with C or better or ECE 372 with C or better
Equivalent to: CS 478
Recommended: CS 370

ECE 482, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582.
Equivalent to: PH 482
Recommended: ECE 391 or (PH 481 or PH 581)

ECE 483, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab.
CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583.
Prerequisite: ECE 391 (may be taken concurrently) with C or better or PH 481 (may be taken concurrently) with C or better
Equivalent to: PH 483

ECE 484, ANTENNAS AND PROPAGATION, 4 Credits
Introduction to antennas and radiowave propagation. Offered alternate years.
Prerequisite: (ECE 390 with C or better and ECE 391 [C])

ECE 485, MICROWAVE DESIGN TECHNIQUES, 4 Credits
Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.
Prerequisite: ECE 390 with C or better and ECE 391 [C]

ECE 499, SPECIAL TOPICS, 0-16 Credits
Course work to meet students’ needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the undergraduate level.
This course is repeatable for 16 credits.

ECE 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ECE 503, ECE MS THESIS, 1-16 Credits
This course is repeatable for 99 credits.

ECE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ECE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ECE 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ECE 510, OCCUPATIONAL INTERNSHIP, 1-4 Credits
This course is repeatable for 99 credits.
Available via Ecampus

ECE 516, ELECTRONIC MATERIALS AND DEVICES, 4 Credits
Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes.
Equivalent to: ECE 317
Recommended: ENGR 201
ECE 517, BASIC SEMICONDUCTOR DEVICES, 4 Credits
Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec.
Recommended: ECE 416

ECE 518, SEMICONDUCTOR PROCESSING, 4 Credits
Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec.
Recommended: ECE 416

ECE 520, ANALOG CMOS INTEGRATED CIRCUITS, 4 Credits
Principles and techniques of design of electronic circuits with focus on a design methodology for analog integrated circuits. Practical aspects of using CAD tools in analyzing and laying out circuits will be discussed.

ECE 521, ANALOG CIRCUIT SIMULATION, 4 Credits
Formulation/solution of circuit equations; sparse matrix techniques; DC, transient, sensitivity, noise and Fourier analyses; RF circuit simulation.
Recommended: ECE 423 or ECE 520

ECE 522, CMOS INTEGRATED CIRCUITS I, 4 Credits
Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation.
Recommended: ECE 322 and completion or concurrent enrollment in ECE 323

ECE 523, CMOS INTEGRATED CIRCUITS II, 4 Credits
Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion.
Recommended: ECE 422 or ECE 522

ECE 530, CONTEMPORARY ENERGY APPLICATIONS, 4 Credits
Contemporary energy issues and applications; fundamental physics of renewable energy sources (e.g. wind, wave, and solar), devices used to harvest energy from these sources, state-of-the-art renewable energy technology, power transmission, transformers, and energy storage.
Recommended: Matlab, basic circuit analysis with RLC components and diode

ECE 532, DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION, 4 Credits
Generalized machine theory. Techniques for dynamic analysis of electromechanical machines including arbitrary reference frame theory. Lec.
Corequisites: ECE 531
Recommended: ECE 331

ECE 533, POWER SYSTEM ANALYSIS, 4 Credits
Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis.
Recommended: ECE 323 and ECE 352 and three-phase power

ECE 535, ADJUSTABLE SPEED DRIVES AND MOTION CONTROL, 3 Credits
Adjustable speed drives, associated power electronic converters, simulation and control. Lec.
Equivalent to: ECE 647
Recommended: ECE 530

ECE 536, POWER SYSTEM PROTECTION, 3 Credits
Recommended: ECE 433 or ECE 533

ECE 537, SMART GRID, 3 Credits
Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security.
Recommended: Background in power systems analysis equivalent to ECE 433

ECE 538, ELECTRIC AND HYBRID ELECTRIC VEHICLES, 4 Credits
Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls.
Equivalent to: ECE 534
Recommended: ECE 331 and ECE 431

ECE 550, LINEAR SYSTEMS, 4 Credits
Linear dynamic systems theory and modeling.
Recommended: ECE 351 and ECE 352

ECE 560, STOCHASTIC SIGNALS AND SYSTEMS, 4 Credits
Stochastic processes, correlation functions, spectral analysis applicable to communication and control systems.
Recommended: ECE 461 or ECE 561
ECE 561, INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS, 4 Credits
Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec. Recommended: ECE 351 and ECE 352 and ECE 353

ECE 562, DIGITAL COMMUNICATIONS AND CHANNEL CODING, 4 Credits
Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec. Recommended: ECE 461 and ECE 351 and ECE 352 and ECE 353

ECE 563, WIRELESS COMMUNICATIONS NETWORK, 4 Credits
Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffic; RF coverage for a certain propagation environment.) Lec. Recommended: Probability background and ECE 461

ECE 564, DIGITAL SIGNAL PROCESSING, 4 Credits
Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures. Recommended: ECE 351 and ECE 352

ECE 565, ESTIMATION, FILTERING, AND DETECTION, 4 Credits
Principles of estimation, linear filtering, and detection. Recommended: ECE 353

ECE 566, INFORMATION THEORY, 4 Credits
Introduction to information theory: entropy, differential entropy, entropy rates, mutual information, data compression, channel capacity, source coding, channel coding, network information theory. Recommended: ECE 353 and strong mathematical background

ECE 569, CONVEX OPTIMIZATION, 4 Credits
Introduces the fundamental concepts, theories of convex and nonconvex optimization, and the algorithmic solutions as well as applications to many research disciplines including signal processing, networking, communications, and machine learning. Emphasis will be on (i) convex analysis and optimality conditions, (ii) first-order large-scale algorithms (gradient, proximal gradient, ADMM, Frank-Wolfe, stochastic gradient, block coordinate descent), and (iii) convergence analysis. Recommended: Linear algebra and ECE 599 Matrix Analysis for Signal Processing

ECE 570, HIGH PERFORMANCE COMPUTER ARCHITECTURE, 4 Credits
Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as CS 570/ECE 570. Equivalent to: CS 570 Recommended: ECE 472 or ECE 572

ECE 571, ENERGY-EFFICIENT VLSI DESIGN, 4 Credits
Combination and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency and scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab. Equivalent to: ECE 573 Recommended: ECE 271 and ECE 322 and completion or concurrent enrollment in ECE 323 (all with a minimum grade of C)

ECE 572, COMPUTER ARCHITECTURE, 4 Credits
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/ECE 472 and CS 572/ECE 572. Equivalent to: CS 572 Recommended: ECE 375

ECE 573, MICROCONTROLLER SYSTEM DESIGN, 4 Credits
Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. Lec/lab. Equivalent to: ECE 571 Recommended: ECE 322 and ECE 375 and CS 261
ECE 574, VLSI SYSTEM DESIGN, 4 Credits
Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced.
Recommended: ECE 322 or ECE 375

ECE 576, ADVANCED COMPUTER NETWORKING, 4 Credits
Equivalent to: CS 576, ECE 566
Recommended: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)

ECE 577, MULTIMEDIA SYSTEMS, 4 Credits
Design of multimedia systems for information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec.
Recommended: ECE 375

ECE 578, CYBER-SECURITY, 4 Credits
A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPsec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as CS 578/ECE 578.
Equivalent to: CS 578

ECE 580, NETWORK THEORY, 4 Credits
Linear graphs, multiport networks, and other topics in advanced network theory.

ECE 582, OPTICAL ELECTRONIC SYSTEMS, 4 Credits
Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/PH 482 and ECE 582/PH 582.
Equivalent to: PH 582
Recommended: PH 481 or PH 581

ECE 583, GUIDED WAVE OPTICS, 4 Credits
Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/PH 483 and ECE 583/PH 583.
Equivalent to: PH 583
Recommended: Completion or concurrent enrollment in (ECE 391 or PH 481 or PH 581)

ECE 584, ANTENNAS AND PROPAGATION, 4 Credits
Introduction to antennas and radiowave propagation. Offered alternate years.

ECE 585, MICROWAVE DESIGN TECHNIQUES, 4 Credits
Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.

ECE 590, ANALYTICAL TECHNIQUES IN ELECTROMAGNETIC FIELDS, 4 Credits
Basic analytical techniques required to solve meaningful field problems in engineering.

ECE 591, ADVANCED ELECTROMAGNETICS, 3 Credits
Advanced techniques for analyzing problems in electromagnetics, primarily numerical. Offered alternate years.
Recommended: ECE 590

ECE 593, RF MICROWAVE CIRCUIT DESIGN, 3 Credits
Active/passive RF and microwave circuit design with emphasis to wireless systems.
Recommended: ECE 390 and ECE 391

ECE 599, SPECIAL TOPICS, 0-16 Credits
Course work to meet students’ needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the graduate level. This course is repeatable for 99 credits.

ECE 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ECE 603, ECE PhD THESIS, 1-16 Credits
This course is repeatable for 99 credits.

ECE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ECE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ECE 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ECE 611, ELECTRONIC MATERIALS PROCESSING, 3 Credits
Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as CHE 611/ECE 611.
Equivalent to: CHE 611, ECE 511

ECE 612, PROCESS INTEGRATION, 3 Credits
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as CHE 612/ECE 612.
Equivalent to: CHE 612, ECE 512
Recommended: ECE 611 or CHE 611
ECE 613, ELECTRONIC MATERIALS AND CHARACTERIZATION, 3 Credits
Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as CHE 613/ECE 613.
Equivalent to: CHE 613, ECE 513

ECE 614, SEMICONDUCTORS, 3 Credits
Essential aspects of semiconductor physics relevant for an advanced understanding of semiconductor materials and devices. Offered alternate years.
Equivalent to: ECE 514
Recommended: Exposure to quantum mechanics and solid state physics.

ECE 615, SEMICONDUCTOR DEVICES I, 3 Credits
Advanced treatment of two-terminal semiconductor electronic devices. Offered alternate years.
Equivalent to: ECE 515
Recommended: ECE 614

ECE 616, SEMICONDUCTOR DEVICES II, 3 Credits
Advanced treatment of three-terminal semiconductor electronic devices. Offered alternate years.
Equivalent to: ECE 516
Recommended: ECE 615

ECE 617, THIN FILM TRANSISTORS, 4 Credits
Thin-film electronics typically necessitate semiconducting materials lacking long-range order (disordered semiconductors), and hence provide a range of challenges and opportunities for device engineers. Provides a comprehensive review of the device physics and materials science of thin film electronics — in particular thin-film transistors. Provides students with the theoretical and practical knowledge to be successful in the development and study of thin film transistors, in both academic and industrial environments.
Recommended: ECE 390, ECE 416/ECE516, ECE 417/ECE 517, ECE 614

ECE 619, SELECTED TOPICS IN SOLID STATE, 3 Credits
Special courses taught on various topics in solid state as interests and demands vary.
This course is repeatable for 99 credits.

ECE 621, RADIO FREQUENCY IC DESIGN, 3 Credits
Radio frequency (RF) circuits. Principles, analysis, and design of bipolar and MOS RF IC building blocks: low noise amplifiers, mixers, oscillators, frequency synthesizers.
Recommended: (ECE 422 or ECE 522) and (ECE 423 or ECE 523) or ECE 520

ECE 626, ANALOG CMOS CIRCUIT DESIGN, 3 Credits
Switched-capacitor circuit design, on-chip filters, data converters. Practical aspects of analog CMOS IC design.

ECE 627, OVERSAMPLED DELTA-SIGMA DATA CONVERTERS, 3 Credits
Noise-shaping theory in first, second, and higher-order modulators. Design, simulation, and realization in hardware of converters using this popular architecture.

ECE 629, SELECTED TOPICS IN MICROELECTRONICS, 3 Credits
Course work to meet student's needs in advanced or specialized areas and to introduce the newest important results in microelectronics.

ECE 659, SELECTED TOPICS IN SYSTEMS AND CONTROL, 3 Credits
Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in systems and control.
This course is repeatable for 18 credits.

ECE 669, SELECTED TOPICS IN COMMUNICATIONS AND SIGNAL PROCESSING, 3 Credits
Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in signal processing.
This course is repeatable for 18 credits.

ECE 679, SELECTED TOPICS IN COMPUTER ENGINEERING, 1-16 Credits
Topics to be presented at various times include information storage and retrieval, computer architecture, fault-tolerant computing, asynchronous sequential circuits, automata, data transmission, coding theory.
This course is repeatable for 99 credits.

ECE 699, SPECIAL TOPICS, 3 Credits
Advanced studies in field and wave theories and special devices. Topic examples are microwave and acoustic devices, advanced lasers and masers, electron beam interactions with traveling waves, MHD device dynamics.
This course is repeatable for 99 credits.

Humanitarian Engineering Science and Technology (HEST)
HEST 199, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.

HEST 201, INNOVATION FOR SOCIAL IMPACT, 3 Credits
Introduces methods for designing solutions to address needs of low-resource or other vulnerable peoples using tools from engineering and social sciences, and investigates techniques to bring ideas to market sustainably through social entrepreneurship. Multidisciplinary teams will step through the design process, including detailed needs assessment and customer discovery, critique and application of theoretical frameworks, exploration of the diffusion process and relevant system/institutions, prototyping, plans for technical and user experience testing, and considering implementation. CROSSLISTED as ANTH 201/HEST 201.
Equivalent to: ANTH 201
HEST 241, HOUSEHOLD ENERGY IN GUATEMALA: BACKGROUND, 1 Credit
An introduction to the technical, social, environmental, and economic issues surrounding energy needs for households in developing countries and the technologies and policies needed to help address them. Students are introduced to concepts about global development, needs assessment and co-design, qualitative and quantitative evaluation, and local socioeconomic conditions. This course is preparation for the 10-day Summer HEST 242 faculty-led study abroad course in Guatemala. Students from any major are invited to participate in this multidisciplinary course series.

HEST 242, HOUSEHOLD ENERGY IN GUATEMALA: APPLICATIONS, 3 Credits
Through immersion in rural communities during this 10-day interdisciplinary study abroad course, students will gain a deeper understanding of household energy needs in developing countries, as well as the social, environmental, technical, and economic issues surrounding technologies and policies to help meet these needs. The outcomes produced by a variety of household technologies such as biomass cookstoves will be evaluated through qualitative and quantitative data gathering, including experiments, observations, and surveys, giving students the chance to practice their research and cross-cultural communication skills under a variety of circumstances.

Recommended: HEST 241

HEST 299, SPECIAL TOPICS, 1-6 Credits
*This course is repeatable for 9 credits.

HEST 310, *INTRO TO COMMUNITY ENGAGEMENT AND COMMUNITY-BASED DESIGN, 3 Credits
Includes study of civic problems and issues, design-thinking concepts and application to co-design of engineering, science and technology-based solutions with social impact, and development of dispositions for effective community engagement through field study and service-learning. Recommended course for student wanting to complete a HEST internship. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

HEST 320, *ENGINEERING FOR GLOBAL HEALTH SOLUTIONS, 3 Credits
An introduction to the critical processes and drivers involved in the development of engineering solutions to address global health problems. Topics include world health challenges, accessing and interpreting health and economic data, basic healthcare systems around the world, the importance of ethical guidelines in ensuring the protection of human subjects, the process of cost effectiveness assessment of a technology, and the timescale and hurdles to adoption of a technology. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society

HEST 399, SPECIAL TOPICS, 1-6 Credits
*This course is repeatable for 9 credits.

HEST 411, ENGINEERING DESIGN FOR EMERGENCY & LOW-RESOURCE ENVIRONMENTS, 3 Credits
Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure.

Recommended: Completion of an undergraduate engineering fluid mechanics course

HEST 412, *MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY, 3 Credits
Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.

Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

HEST 415, UAV ENGINEERING, 4 Credits
Develop a strong foundation in Unmanned Aerial Vehicles (UAV) systems technologies. Engineering evaluation of UAV systems, subcomponents, aircraft missions, operations and Federal Aviation Administration (FAA) requirements. Apply actual UAV models and subsystems to a real-world project on UAV deployment for humanitarian and environmental missions. Write a technical report as a team-project, developing and demonstrating critical thinking and engineering reporting skills in the subject. CROSSLISTED as AAE 415/HEST 415.

Prerequisite: ME 316 with C or better and ME 317 [C] and ME 331 [C] and ME 373 [C]

Equivalent to: AAE 415

HEST 499, SPECIAL TOPICS, 1-6 Credits
*This course is repeatable for 9 credits.

HEST 511, ENGINEERING DESIGN FOR EMERGENCY & LOW-RESOURCE ENVIRONMENTS, 3 Credits
Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure.

Recommended: Completion of an undergraduate engineering fluid mechanics course
HEST 512, MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY, 3 Credits
Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.

Available via Ecampus

HEST 541, HOUSEHOLD ENERGY IN GUATEMALA: BACKGROUND, 1 Credit
An introduction to the technical, social, environmental, and economic issues surrounding energy needs for households in developing countries and the technologies and policies needed to help address them.

Students are introduced to concepts about global development, needs assessment and co-design, qualitative and quantitative evaluation, and local socioeconomic conditions. This course is preparation for the 10-day Summer HEST 542 faculty-led study abroad course in Guatemala. Students from any major are invited to participate in this multidisciplinary course series.

HEST 542, HOUSEHOLD ENERGY IN GUATEMALA: APPLICATIONS, 3 Credits
Through immersion in rural communities during this 10-day interdisciplinary study abroad course, students will gain a deeper understanding of household energy needs in developing countries, as well as the social, environmental, technical, and economic issues surrounding technologies and policies to help meet these needs. The outcomes produced by a variety of household technologies such as biomass cookstoves will be evaluated through qualitative and quantitative data gathering, including experiments, observations, and surveys, giving students the chance to practice their research and cross-cultural communication skills under a variety of circumstances.

Recommended: HEST 541

HEST 599, SPECIAL TOPICS, 1-6 Credits
This course is repeatable for 9 credits.

Software Engineering (SE)

SE 199, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

SE 201, SOFTWARE DEVELOPMENT I, 4 Credits
Introduction to collaborative software development of larger, object-oriented systems. Overview of software architecture, and the tools, principles and practice of modern software development.

Prerequisite: CS 162 with C or better

SE 299, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

SE 303, SOFTWARE ENGINEERING III, 4 Credits
Introduction to refactoring techniques and improving the quality and maintainability of software. Applying continuous integration and deployment tools; containers and virtual development environments.

Prerequisite: CS 362 with C or better

SE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

SE 467, BUSINESS OF SOFTWARE II, 4 Credits
Become an entrepreneur. Start a real software business, from ideation to sales. Real-world, hands-on learning in a fast-paced startup environment. Development of product ideas, hypotheses, and business models to discover customers. Teamwork, management, and positioning for investment.

Prerequisite: CS 466 with C or better

SE 468, BUSINESS OF SOFTWARE III, 4 Credits
Become an entrepreneur. Start a real software business, from ideation to sales. Real-world, hands-on learning in a fast-paced startup environment. Development of product ideas, hypotheses, and business models to discover customers. Teamwork, management, and positioning for investment.

Prerequisite: SE 467 with C or better

SE 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

Computer Science Graduate Major (MENG, MS, PhD)
The master’s program provides advanced instruction beyond the undergraduate degree. It prepares students for careers in which a higher level of experience is required. The PhD program prepares students for work in government or industry research laboratories or industry research laboratories or for careers at universities.

Additional areas of concentration may be arranged with other departments, for example, numerical analysis or computer algebra with the Department of Mathematics.

</table>

1. At least a 3.0 GPA must be achieved over these six courses. Other courses may be used instead of the courses above to satisfy this requirement by approval of the student's committee.

2. 1 term of CS 507-001 (EECS Colloquium) with a minimum P grade in the first year of study. This seminar cannot be used toward the program of study.

3. 3 terms of CS 507-001 (EECS Colloquium) with a minimum P grade in the first year of study. This seminar cannot be used on the program of study.

4. The selection of courses will be made in consultation with, and must be approved by, the student's major professor. 2 of the 6 courses used to satisfy the above requirement may also be used to satisfy this one.

**Major Code: 3070**

**Computer Science Graduate Minor**

A Computer Science minor can add additional technical skills to a graduate degree. The flexibility of requirements allows students to tailor the interests to the skills they feel are necessary and complementary to their current graduate degree.

**Minor Code: 3070**

- CS 515 or another graduate-level algorithms course with permission of the minor advisor.
- CS graduate courses or graduate courses crosslisted with CS graduate courses to meet the minimum credit requirement per degree:
  - Masters degree requires 15 credits
  - PhD degree requires 18 credits
  - A cumulative, minimum GPA of 3.0 across all minor courses

**Computer Science Minor**

Also available at OSU-Cascades and Ecampus.

Computing has become pervasive, touching nearly every aspect of our lives. A minor in Computer Science can open up opportunities for employment in the software development industry, but also in many areas including healthcare, business, science, medicine, graphics, utilities and education. Courses will teach theory, problem-solving skills, and programming.

**Minor Code: 249**

To earn the minor upon graduation, students must meet all of the following:

1. Earn a C in each of their minor courses (all courses must be taken A–F grading)

2. Have a minimum 2.25 GPA in all required minor course work (32 credits)

**Code | Title | Credits**
-------|-------|---------|
| Lower Division Requirements |
| CS 161 | INTRODUCTION TO COMPUTER SCIENCE I | 4 |
| CS 162 | INTRODUCTION TO COMPUTER SCIENCE II | 4 |
| CS 261 | DATA STRUCTURES | 4 |
| MTH 231 | ELEMENTS OF DISCRETE MATHEMATICS | 4 |
| or CS 225 | DISCRETE STRUCTURES IN COMPUTER SCIENCE | |

**Electives**

Select 4 credits from the following:

- CS 271 | COMPUTER ARCHITECTURE AND ASSEMBLY LANGUAGE | 4 |
- CS 290 | WEB DEVELOPMENT | |
- ECE 271 & ECE 272 | DIGITAL LOGIC DESIGN and DIGITAL LOGIC DESIGN LABORATORY | |

Select 12 credits from the following:

- Any CS 3xx or CS 4xx level course
- ROB 421 | APPLIED ROBOTICS | |
- ROB 456 | INTELLIGENT ROBOTS | |

**The following cannot be used for minor requirements:**

- CS 391 | *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE | |
- CS 395 | WEBSITE MULTIMEDIA | |
- CS 401 | RESEARCH | |
- CS 403 | THESIS | |
- CS 405 | READING AND CONFERENCE | |
- CS 406 | PROJECTS | |
- CS 407 | SEMINAR | |
- CS 410 | OCCUPATIONAL INTERNSHIP | |
- CS 461 | *SENIOR SOFTWARE ENGINEERING PROJECT I | |
- CS 462 | *SENIOR SOFTWARE ENGINEERING PROJECT II | |
- CS 463 | SENIOR SOFTWARE ENGINEERING PROJECT | |
- CS 495 | INTERACTIVE MULTIMEDIA PROJECTS | |

Total Credits: 32

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

**Minor Code: 249**

**Computer Science Undergraduate Major (BA, BS, HBA, HBS)**

The computer science (CS) undergraduate curriculum has the following Program Educational Objectives (PEOs) (see the ABET Accreditation for CS website).

1. Graduates of the program will have successful careers.
2. Graduates of the program will continue to learn and adapt to a changing world.
3. Graduates of the program will practice ethical and inclusive principles that foster collaborative environments.

Entering undergraduate students must choose and complete options 1 or 2 to earn a degree in CS. Entering post-baccalaureate students may select options 1 and 2 that are offered on campus or the online Computer Science Double Degree option offered by Ecampus.

1. Applied Computer Science (BA, BS, HBA, HBS) - on campus and via Ecampus
2. Computer Systems (BA, BS, HBA, HBS) - on campus only
3. Computer Science Double Degree (BS, HBS) - via Ecampus only

For students entering the undergraduate program, the recommended high school preparation is four years of mathematics, science, and English. High school programming or computer applications courses should not be taken in place of other college preparatory courses.

Major Code: 307

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Each option has its own requirements. Please select a specific option for details.

Major Code: 307

Applied Computer Science Option

This option is offered within the following major(s):

- Computer Science - College of Engineering (p. 680)

Also available at OSU-Cascades and via Ecampus.

The Applied Computer Science option is for students who want to combine the study of computer science with an in-depth examination of a field in which computer science plays an important role. This option requires an approved program of study for each student. Students build their own program of study to include their choice of CS electives plus an Applied CS program. The Computer Science Undergraduate Curriculum Committee reviews these programs of study for approval. Existing OSU minors may be proposed for use both as an Applied CS program and as a minor.

Option Code: 354

Unrestricted Electives 4-12

$^*$ Baccalaureate Core Course (BCC)
$^*$ Writing Intensive Course (WIC)

Option Code: 354

Computer Science Double Degree Option

This option is offered within the following major(s):

- Computer Science - College of Engineering (p. 680)

The Computer Science Double Degree option is for students who want to combine a bachelor's degree in computer science with a bachelor's degree in another field. Since computer science is relevant in so many diverse disciplines, students can obtain a computer science degree in
combination with virtually any other degree. Those who already hold a bachelor’s degree—a BA or BS—from an accredited institution can add to their existing skill set and enhance their job prospects by earning a computer science degree online from OSU. The program of study includes the core courses in computer science, and also includes courses at the leading edge of computing technologies, software design, web development, and mobile/cloud computing.

All of the courses in the Double Degree option are offered through Ecampus, and most of the courses are also offered on-campus. This degree requires students to be enrolled as online students selecting DSC-Distance Degree Corvallis as their campus.

Students who choose the Computer Science Double Degree option may pursue a degree in computer science concurrently while earning a second bachelor’s degree, or may pursue the computer science degree as a post-baccalaureate degree.

**Option Code: 297**

**Restricted Electives**

Select 3 electives for a minimum of 12 credits<br>12

**Total Credits**<br>60-68

---

1. CS 300 – 400 level courses offered online, excluding the required CS courses for the double degree and CS 410

**Option Code: 297**

## Computer Systems Option

This option is offered within the following major(s):

- Computer Science - College of Engineering (p. 680)

The Computer Systems option is for students who want to take up computer science as a career and seek an in-depth understanding of computer science as an academic discipline. This option provides excellent preparation for those who plan to work for companies developing systems software or embedded systems. It also provides excellent preparation for those who plan to pursue an MS or PhD in computer science.

**Option Code: 334**
Certificate Code: C300

CyberSecurity Certificate

Also available at OSU-Portland and via Ecampus.

This certificate is available as a standalone program (https://registrar.oregonstate.edu/standalone-certificates/).

As computer systems have become part of the fabric of modern society, system security has grown essential to the well-being of individuals, companies, the economy and life as we know it. A single security breach can expose the passwords, financial data and private personal information of hundreds of millions of people. This Undergraduate Certificate in Cybersecurity enables students to understand common threats to system security, assess security requirements for a new or existing system, implement secure solutions to counter threats, and evaluate systems to identify and address weaknesses. These skills will support future careers as cybersecurity analyst, cybersecurity engineer, information assurance technician, and security administrator. In addition, these skills will enable students to perform other jobs, such as software engineer and requirements analyst, with a higher level of proficiency and a lower risk of creating security flaws that threaten their users, their employers, their livelihoods, and their nation.

For more information, visit the School of Electrical Engineering and Computer Science (https://eecs.oregonstate.edu/).

Electrical and Computer Engineering Graduate Minor

The School of Electrical Engineering & Computer Science offers graduate minor degrees in Electrical & Computer Engineering. The Graduate minor in Electrical & Computer Engineering is for masters and doctoral level students who seek additional formal training and mentoring in electrical and computer engineering.

For more details, contact the EECS Graduate Program Coordinator, 541-737-3617, or eecs.gradinfo@oregonstate.edu

Minor Code: 3110

Master’s program minors must include a minimum of 15 quarter credits of graduate course work as approved by the minor faculty advisor. Doctoral minors must include a minimum of 18 quarter credits of graduate course work as approved by the minor faculty advisor. Additional credits may be required as determined by the minor faculty advisor or advising committee.

Minor Code: 3110

Electrical and Computer Engineering Undergraduate Major (BS, HBS)

The curriculum in Electrical and Computer Engineering (ECE) provides a wide range of opportunities in undergraduate study in the electrical engineering areas of communications, signal processing and controls, electronics and integrated circuits, power electronics and energy systems, materials and devices, electromagnetism, microwaves and optics, and the computer engineering areas of computer architecture, digital hardware design, and computer networks.

The Bachelor of Science and Honors Bachelor of Science degree programs in ECE are accredited by the Computing Accreditation Commission of ABET, http://www.ABET.org. The ECE undergraduate program has the following Program Educational Objectives (PEOs) (see the ABET Accreditation for ECE website (http://eecs.oregonstate.edu/about-eecs/accreditation/electrical-computer-engineering/)).

1. Graduates of the program will have successful careers.
2. Graduates of the program will continue to learn and adapt to a changing world.
3. Graduates of the program will practice ethical and inclusive principles that foster collaborative environments.

The ECE undergraduate degree program includes a common set of core courses that provides a solid foundation as well as 29-credits of restricted electives. The restricted electives allow students to prepare for industry, graduate study, or other career paths, specializing or broadening further their knowledge and skills. Elective course work is available focusing on sustainability and renewable energy, computers and networks, energy systems, integrated circuits, systems signals and communications, materials and devices, RF/microwaves and optoelectronics, and robotics. The sustainability and renewable energy focus addresses global technological challenges balancing societal needs with environmental and economic tradeoffs. Further details on restricted electives can be found on the EECS website.

Major Code: 039

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Except as approved by the ECE curriculum committee, the 29 credits of restricted electives must include either CS 344 or ECE 390, plus four ECE 400-level electives and one additional 400-level elective from the approved list.

The ECE curriculum has been designed to meet the following minimum requirements, which still must be met if specific courses are waived:

1 Must be selected from approved restricted elective list
2 Prerequisite for required upper-division courses
3 Must be selected to satisfy the requirements of the baccalaureate core

**Major Code: 039**
School of Mechanical, Industrial, and Manufacturing Engineering

The School of Mechanical, Industrial, and Manufacturing Engineering (MIME) at OSU offers undergraduate degrees in Mechanical Engineering, Industrial Engineering, and Manufacturing Engineering at the Corvallis campus and Energy Systems Engineering at the OSU-Cascades campus.

The Bachelor of Science and Honors Bachelor of Science degrees in Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The Bachelor of Science and Honors Bachelor of Science degrees in Industrial Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The Bachelor of Science and Honors Bachelor of Science degrees in Manufacturing Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The Bachelor of Science and Honors Bachelor of Science degrees in Energy Systems Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The mission of the School of MIME is two-fold:

- To prepare our students as entrepreneurial, team-oriented, work-ready graduates and lifelong learners in mechanical, industrial and manufacturing engineering, and
- To engage in collaborative, cutting-edge research whose applications lead to greater prosperity and a sustainable future for Oregon and the world.

MIME Program Objectives

ABET (http://www.ABET.org) requires that each program establishes educational objectives defined as 'broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.' While each program has specific objectives, all MIME programs' program objectives may be summarized by the following statements in three broad areas of student participation and graduate achievement:

1. **Our graduates will be systems thinkers.** MIME graduates will be able to analyze, evaluate, improve, and design engineered systems and processes using modern engineering tools (hardware and software) and approaches. They will demonstrate in-depth knowledge of mechanical, industrial and/or manufacturing systems.

2. **Our graduates will be global collaborators.** MIME graduates will be able to communicate effectively across disciplines and cultures. They will provide management and leadership skills within their organizations and work effectively in diverse environments.

3. **Our graduates will be innovative designers and problem solvers.** MIME graduates will use both structured and unstructured methodologies to innovate systems and processes. They will apply technical knowledge and creativity in solving real-world problems. They will demonstrate a sound understanding of engineering and project management fundamentals and breadth of experience with engineering design and problem-solving processes.

Mechanical Engineering

Mechanical engineers design and develop small devices, large equipment, and processes for society. They play major roles in the design, testing and operation of mechanisms, machines, and systems, including processes for energy conversion and equipment used in households, businesses, transportation, and manufacturing.

In addition to the university baccalaureate core, the mechanical engineering curriculum has its base in mathematics, science, engineering science, and design. Mathematics and science courses occur primarily in the first two years. Engineering science is a major component, which is treated from the sophomore year to graduation in a combination of required and technical elective sources.

OSU's Mechanical Engineering Program has all the attributes needed for the best learning environment: ABET accredited curriculum, excellent faculty, modern facilities, quality students, and strong industrial interaction.

Engineering design is an integral element of the program. The philosophy is to 'plant the seed' for design at the freshman level and grow it throughout the program. Most of the skills are developed at the junior and senior levels when students have achieved proficiency in the basic technical requirements. At the junior level, the design process is extensively developed in three courses. At the senior year, design experiences occur in several areas, culminating in the two-term senior project in which students in small teams carry out the design of some product or process under the supervision of a faculty advisor. Attention to hands-on activity adds a very desirable 'feel' for many aspects of the design process.

A good choice of senior electives enables students to achieve a degree of specialization and depth to match their interests. The areas include applied stress analysis; design, dynamics, and analysis of mechanical and thermal/fluid systems; concurrent engineering; control system design; mechatronics; heat transfer; and metallurgy and materials.

The faculty encourages a vibrant extracurricular program for professional and leadership experiences. Students are encouraged to obtain at least three months of work experience through an industrial or research internship or to participate in a foreign exchange program. The school’s goal is to have more than 95 percent of its students graduate with such experience. In addition to students having general internships, many of the professional-level students participate in the industry-driven Multiple Engineering Cooperative Program (MECOP). This program provides two paid six-month internships at over 60 Pacific Northwest companies where interns work with a company mentor and improve their capabilities for the work environment.

Mechanical engineers can be found in a wide variety of industries including aerospace, electronics, biomedical, transportation, manufacturing, energy, automotive, and government labs. Because of the increasing complexity of mechanical engineering, graduate study for the MS and PhD degrees is advisable for students who wish to specialize in depth in any of the above areas. The undergraduate curriculum provides an excellent foundation for graduate study.

Industrial Engineering

Industrial engineers (IEs) apply science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are often large and complex, IEs utilize knowledge and skills in a wide variety of disciplines, have the ability
School of Mechanical, Industrial, and Manufacturing Engineering

to work well with people, and take a broad, systems perspective. The Industrial Engineering degree is a very flexible degree that allows students to tailor their program of study to meet their individual career goals.

A large number of restricted elective credits allows students to pursue the Business Engineering option or to customize their program to a field of interest.

IEs are key players in the integration and operation of systems in all sectors of industry and government including the following (with examples):

- aerospace (NASA space shuttle pre-launch processing systems)
- automotive (automobile final assembly plants)
- communications (telephone services)
- computers (factory information systems)
- electronics/semiconductors (silicon wafer fabrication facilities)
- food (canneries and fast food restaurant chains)
- government (department of motor vehicles service centers)
- health care (hospital central stores and operating rooms)
- manufacturing (circuit board fabrication facilities)
- retail (product distribution centers)
- transportation (airlines, overnight delivery services)

In their role as system integrators, IEs analyze and design systems. For example:

- facilities layout,
- material handling systems,
- manufacturing and other production systems,
- information systems,
- individual and group workplaces.

In the operations realm, IEs analyze, design and manage processes. For example:

- manufacturing processes-service processes,
- production system planning and control,
- resource allocation and scheduling,
- personnel assignment and scheduling,
- quality assurance,
- inventory control,
- system and personnel safety.

Energy Systems Engineering

Energy systems engineers oversee complex energy conversion and distribution systems, work to improve energy storage systems, and manage the efficient use of energy in building, manufacturing, and processing systems. ESE professionals also study the secondary effects of energy usage from a local environmental impact, regional and national economic impact, and global climate change perspective.

Energy systems engineers pursue a variety of jobs and occupations. For example, they might be hired to do any of the following:

- Manage operations of a wind turbine farm
- Analyze efficiency of hydroelectric power systems
- Oversee production of innovative fuel-cell technologies
- Evaluate the economic viability of new solar power installations
- Assess the environmental impact of alternative energy systems

Manufacturing Engineering

The Manufacturing Engineering degree is a more specialized degree, focusing on both high-tech manufacturing and traditional manufacturing. In particular, it is a specialization of industrial engineering that focuses on the making of physical products. The Manufacturing Engineering degree offers a hands-on education, and manufacturing engineering students are encouraged to participate in the college’s MECOP program, a nationally recognized industrial cooperative education program.

Students who complete the requirements for the Manufacturing Engineering degree plus 32 additional credits (at least 16 of these credits must be from the list of industrial engineering restricted electives) can earn two separate degrees, one in manufacturing engineering and the other in industrial engineering. The additional 32 credits typically take two additional quarters to complete.

Undergraduate Programs

Majors

- Energy Systems Engineering (p. 711)
- Industrial Engineering (p. 714)

  Option:
  - Business Engineering
- Manufacturing Engineering (p. 716)

  Options:
  - Manufacturing Systems
  - Product Development
  - Mechanical Engineering (p. 723)

Minor

- Aerospace Engineering (p. 711)
- Humanitarian Engineering (p. 614)
- Materials Science (p. 720)

Graduate Programs

Majors

- Industrial Engineering (p. 712)

  Options:
Aeronautical & Astronautical Engineering (AAE)

AAE 210, INTRODUCTION TO AEROSPACE ENGINEERING, 3 Credits
Topics will include the engineering fundamentals of aeronautics and astronautics, including an introduction to aerodynamics, propulsion, structures, orbital mechanics and mission planning. Current industry practices in aerospace vehicle specifications, manufacturing, flight testing and certification will be presented.
Prerequisite: ENGR 211 with C or better

AAE 411, AEROSPACE APPLICATIONS IN MECHANICAL ENGINEERING, 4 Credits
Explores the fundamentals of mechanical engineering applications to aerospace. Features an overview of modern aircraft and spacecraft analysis, with an emphasis on performance, stability, structures, materials, FAA and FAR standards. Applies current professional practices in the conceptual design of aerospace vehicles.
Prerequisite: ME 316 (may be taken concurrently) with C- or better
Equivalent to: ME 411
Recommended: ME 311

AAE 412, SPACE SYSTEMS ENGINEERING, 4 Credits
Introduction to space systems engineering. Topics will include the fundamentals of astronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized.
Prerequisite: (ME 317 with C or better or ME 317H with C or better) and (ME 373 [C] or ME 373H [C])

AAE 413, AERO VEHICLES COMPONENTS DESIGN, 4 Credits
Develop mechanical design of aircraft subcomponents. Analyze and model aircraft components and evaluate their integration on aircraft. Apply real-world aircraft component design project with associated deliverables to customer, including basic requirements for Federal Aviation Administration (FAA) certification.
Prerequisite: ME 316 with C or better and ME 317 [C] and ME 331 [C] and ME 373 [C]

AAE 415, UAV ENGINEERING, 4 Credits
Develop a strong foundation in Unmanned Aerial Vehicles (UAV) systems technologies. Engineering evaluation of UAV systems, subcomponents, aircraft missions, operations and Federal Aviation Administration (FAA) requirements. Apply actual UAV models and subsystems to a real-world project on UAV deployment for humanitarian and environmental missions. Write a technical report as a team-project, developing and demonstrating critical thinking and engineering reporting skills in the subject. CROSSTIED as AAE 415/HEST 415.
Prerequisite: ME 316 with C or better and ME 317 [C] and ME 331 [C] and ME 373 [C]
Equivalent to: HEST 415

Faculty

Professors: Apte, Batten, M. Campbell, Cann, Dong, Doolen, Gibbons, Kim, Liburdy, D. Nembhard, Paasch, B. Paul, Pence, Porter, Sharp, Smart, Stone, I. Tumer, K. Tumer
Associate Professors: Albertani, Balasubramanian, Bay, Blunck, Calvo-Amodio, DuPont, Grimm, Haapala, Hagen, Hatton, Hollinger, Hoyle, Hurst, Kawasaki, Parmigiani, Tucker, Vergara
Assistant Professors: Abbasi, Agor, Camburn, Davidson, Demirel, Eseonu, Fan, Frank, Gess, MacCarty, Fitter, Ng, Niemeyer, Pasebani, Santala, Sencer, Tabei, Xu, Zhu
Instructors: S. Campbell, De Szoeke, Greene, Hoffman, Squires, Worley

Professional Faculty
Barber, Brakke, Ekstedt, Grigar, Jensen, Huffman, Leeds, L. Paul, Pitkin, Olson, Thompson
AAE 512, SPACE SYSTEMS ENGINEERING, 4 Credits
Introduction to space systems engineering. Topics will include the fundamentals of aeronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized. Recommended: (ME 373 or ME 373H) and (ME 317 or ME 317H)

Energy Systems Engineering (ESE)

ESE 330, MODELING AND ANALYSIS OF DYNAMIC SYSTEMS, 4 Credits
Presents basic concepts of dynamic behavior, and the analytical and computational techniques for predicting and assessing dynamic behavior. Modeling a basic system, compound system, dynamic stability, and natural behavior to continuing and abrupt inputs are presented. Prerequisite: ENGR 202 with C or better and ENGR 212 [C] and MTH 256 [C] and MTH 306 [C]

ESE 355, ENERGY REGULATION, 4 Credits
Introductory course to the policies and laws governing energy generation and transmission in the United States with a focus on electricity. History of regulations give context to understand current regulation and potential future policies. Laws regulating the use of alternative energy resources covered in a practical setting. Offered at OSU-Cascades only. Prerequisite: BA 360 (may be taken concurrently) with C or better or ENGR 390 (may be taken concurrently) with C or better

ESE 360, ENERGY CONSUMPTION ANALYSIS, 4 Credits
Analysis of energy use in transportation, residential and industrial sectors to understand how new technologies improve energy efficiency. Tradeoff techniques applied to decide between less efficient, less expensive systems versus more efficient, more expensive systems. International energy consumption compared, and energy losses evaluated for heating, cooling and electronic systems. Offered at OSU-Cascades only. Prerequisite: (BA 360 (may be taken concurrently) with C or better or ENGR 390 (may be taken concurrently) with C or better) and ME 311 [C]

ESE 401, RESEARCH, 1-16 Credits
Equivalent to: ESC 401
This course is repeatable for 4 credits.

ESE 430, FEEDBACK CONTROL SYSTEMS, 4 Credits
Modeling and analysis of linear, continuous-time systems in the time and frequency domains. Fundamentals of single-input-single-output control system design using both time-domain and frequency-domain techniques. Prerequisite: ESE 330 with C or better

ESE 450, ENERGY GENERATION SYSTEMS, 4 Credits
Survey of technical fundamentals and operational principles of conventional and renewable energy conversion systems to understand the environmental and sustainable issues for energy systems currently in use or may be used in the future to power our industrial society. Offered at OSU-Cascades only. Prerequisite: ME 312 with C or better

ESE 470, ENERGY DISTRIBUTION SYSTEMS, 4 Credits
Detailed coverage of the electrical energy distribution system, its operation, control and design. Design considerations and impacts to meet emerging and evolving customer needs. Broader understanding of natural gas and oil pipeline distribution for these infrastructure commodities. Offered at OSU-Cascades only. Prerequisite: ENGR 202 with C or better and ME 311 [C]

ESE 471, ENERGY STORAGE SYSTEMS, 4 Credits
Coverage of energy storage techniques involving electrochemical, mechanical and emerging options. Integration of the energy storage media, its effects on the bulk power system, and design tradeoffs to understand environmental impacts, cost, reliabilities, and efficiencies for commercialization of bulk energy storage. Offered at OSU-Cascades only. Prerequisite: ENGR 202 with C or better and ME 312 [C]

ESE 497, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESC 497/ESE 497. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC Prerequisite: (ENGR 390 with C or better or BA 360 with C or better) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331 [C] or ME 331H [C]) and ESE 355 [C] and ESE 360 [C] and (ST 314 [C] or ST 314H [C]) and WR 327 [C] Equivalent to: IE 497, ME 497, MIME 497

ESE 498, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course) Attributes: CWIC – Core, Skills, WIC Prerequisite: ESE 497 with C or better or IE 497 with C or better or ME 497 with C or better or MIME 497 with C or better Equivalent to: ESC 498, IE 498, ME 498

ESE 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.
Industrial and Manufacturing Engineering (IE)

IE 112, SPREADSHEET SKILLS FOR INDUSTRIAL & MANUFACTURING ENGINEERS, 1 Credit
Basic spreadsheet functionality needed to create spreadsheet applications for common industrial and manufacturing engineering information processing tasks, including simple databases, statistical analysis, quality control, forecasting, production planning and control, and operations analysis and improvement. Topics include creating spreadsheets, formatting, data types, formulas, charts, user-defined functions, and pivot tables.

IE 199, SPECIAL TOPICS, 1-16 Credits
Special topics in industrial engineering. This course is repeatable for 16 credits.

IE 212, COMPUTATIONAL METHODS FOR INDUSTRIAL ENGINEERING, 4 Credits
Prerequisite: ENGR 112 with C or better and IE 112 (may be taken concurrently) [C]
Recommended: Algebra, calculus, differentiation and integration

IE 255, INTRODUCTORY QUANTITATIVE ANALYSIS OF INDUSTRIAL AND MANUFACTURING SYSTEMS, 3 Credits
An introduction to basic analysis concepts that will be utilized in subsequent industrial and manufacturing engineering courses. Emphasis will be placed on fundamental concepts such as data collection, commonly applied quantitative analysis methods, and how these are utilized to support decisions in different industrial and manufacturing system applications. Examples include resource utilization calculations, equipment fraction equations, queuing models, basic statistical inference procedures, and probability models used in discrete event simulation.
Prerequisite: MTH 252 with C or better

IE 285, INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING, 3 Credits
Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. CROSSLISTED as IE 285/MFGE 285.
Prerequisite: IE 112 (may be taken concurrently) with C or better or FOR 112 (may be taken concurrently) with C or better
Equivalent to: MFGE 285

IE 299, SPECIAL TOPICS, 1-16 Credits
Special topics in industrial engineering. This course is repeatable for 16 credits.

IE 355, STATISTICAL QUALITY CONTROL, 4 Credits
Control of quality through the use of statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Lec/lab.
Prerequisite: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 351

IE 356, EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES, 4 Credits
Systematic analysis of processes through the use of statistical analysis, methods, and procedures. Application of statistical techniques including use of classic process analysis techniques, regression and design of experiments. Lec/rec.
Prerequisite: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 352

IE 366, WORK SYSTEMS ENGINEERING, 4 Credits
Principles and techniques of work measurement, methods engineering, workplace design, work sampling, and predetermined time systems. Basic human factors engineering and ergonomics principles applied to workplace design. The work systems engineering process. Lec/lab/rec.
Prerequisite: (IE 255 with C or better or ST 314 with C or better) and PH 212 [C] and PH 213 [C]
Equivalent to: IE 341

IE 367, PRODUCTION PLANNING AND CONTROL, 4 Credits
Forecasting techniques, inventory analysis, master production scheduling, material and capacity requirements, planning and scheduling methods.
Prerequisite: IE 255 with C or better or ST 314 with C or better
Equivalent to: IE 362

IE 368, FACILITY DESIGN AND OPERATIONS MANAGEMENT, 4 Credits
Design and analysis of industrial facilities including just-in-time systems, queuing, material handling systems, material flow analysis, line balancing, systematic layout planning, design of warehouse facilities, and facilities location.
Prerequisite: ENGR 248 with C or better and (IE 255 [C] or ST 314 [C])
Equivalent to: IE 365

IE 380, *THE RESPONSIBLE ENGINEER, 3 Credits
The idea of responsibility and the ethical responsibilities of the engineer. Introduction to value, ethics, and ethical systems. Engineering as value creation and the ethical ramifications of engineering. Codes of engineering ethics. Recognizing and addressing ethical dilemmas in engineering. Examination of the individual, social, and environmental effects of engineering and technology. (Baccalaureate Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society

IE 399, SPECIAL TOPICS, 1-16 Credits
Special topics in industrial engineering. This course is repeatable for 16 credits.
IE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

IE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

IE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

IE 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

IE 410, INTERNSHIP, 1-16 Credits
This course is repeatable for 16 credits.

IE 411, VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS, 4 Credits
Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management.
Prerequisite: IE 212 with C or better
Equivalent to: IE 414

IE 412, INFORMATION SYSTEMS ENGINEERING, 4 Credits
Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.
Prerequisite: IE 212 with C or better

IE 415, SIMULATION AND DECISION SUPPORT SYSTEMS, 4 Credits
Analysis of operations and production systems through the application of computer simulation modeling techniques. Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab.
Prerequisite: IE 112 with C or better and (IE 255 [C] or ST 314 [C])

IE 418, TELECOMMUNICATION CONCEPTS, 3 Credits
Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years.
Prerequisite: IE 212 with C or better
Recommended: Previous programming experience

IE 419, WIRELESS NETWORKS, 3 Credits
RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks.
Prerequisite: IE 418 with C or better

IE 425, INDUSTRIAL SYSTEMS OPTIMIZATION, 4 Credits
A first course in operations research. Topics include mathematical programming formulations and solutions, the simplex method, network optimization, introduction to metaheuristics, and linear programming under uncertainty.
Prerequisite: (IE 255 with C or better or ST 314 with C or better) and (MTH 306 [C] or MTH 341 [C])
Equivalent to: IE 421, IE 422

IE 426, STOCHASTIC MODELS OF INDUSTRIAL SYSTEMS, 4 Credits
The application of probabilistic and stochastic modeling methodologies to analyze the performance of production and service systems. Major topics include probability models for space planning, Poisson arrival processes, discrete and continuous time Markov chain models of machine cycle times, and queuing models applied to various industrial systems. Other applications of these tools to model inventories, process behavior, and equipment reliability is illustrated.
Prerequisite: (IE 255 with C or better or ST 314 with C or better) and IE 425 [C]

IE 470, MANAGEMENT SYSTEMS ENGINEERING, 4 Credits
Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies.
Prerequisite: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C]
Equivalent to: IE 474

IE 471, PROJECT MANAGEMENT IN ENGINEERING, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included.
Prerequisite: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C]

IE 475, ADVANCED MANUFACTURING COSTING TECHNIQUES, 3 Credits
Costing techniques applicable in advanced manufacturing enterprises: activity-based costing, economic value added, Japanese cost management techniques, life cycle costing, throughput accounting, cost of quality, and financial versus operational performance measures. Emphasis on linkages to such advanced manufacturing systems as cellular manufacturing, flexible manufacturing, JIT, Lean, and ERP.
Prerequisite: ENGR 390 with C or better and IE 355 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C]
Equivalent to: IE 495
IE 499, SPECIAL TOPICS, 1-5 Credits
Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term. This course is repeatable for 99 credits.

IE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

IE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

IE 506, PROJECTS, 1-16 Credits
Graded P/N. This course is repeatable for 16 credits.

IE 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

IE 511, VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS, 4 Credits
Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management. Equivalent to: IE 514 Recommended: IE 212

IE 512, INFORMATION SYSTEMS ENGINEERING, 4 Credits
Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab. Equivalent to: IE 514

IE 515, SIMULATION AND DECISION SUPPORT SYSTEMS, 4 Credits
Analysis of operations and production systems through the application of computer simulation modeling techniques. Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab. Recommended: ST 314

IE 518, TELECOMMUNICATION CONCEPTS, 3 Credits
Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years. Recommended: IE 212 and previous programming experience.

IE 519, WIRELESS NETWORKS, 3 Credits
RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks. Prerequisite: IE 518 with C or better

IE 521, INDUSTRIAL SYSTEMS OPTIMIZATION I, 3 Credits
Techniques for analysis and solution of problems in industrial and management systems. Emphasis on application of linear and integer programming and extensions. Equivalent to: IE 525
Recommended: MTH 341

IE 522, INDUSTRIAL SYSTEMS OPTIMIZATION II, 3 Credits
Techniques for analysis and solution of problems in industrial and management systems. Emphasis on applications of dynamic programming. Markovian processes, and questions as applied to industrial problems. Recommended: ST 314

IE 523, INTEGER PROGRAMMING, 3 Credits
Classic models and algorithms for discrete optimization. Includes intuition and theory about computational strategies for solution of integer programming and combinatorial optimization problems. Prerequisite: IE 521 with C or better

IE 533, HUMAN ANALYTICS AND BEHAVIORAL OPERATIONS, 3 Credits
Introduces several quantitative applications related to determining workforce size, skill-sets, and multi-functionality in service and manufacturing systems based on measurable quality and productivity performance, at the intersection of human factors engineering and production planning. Modeling and solving problems in a context of the speed and accuracy trade-off. Models include learning, forgetting, teamwork, fatigue, procrastination, and individual difference measures. Recommended: Introductory math programming

IE 542, DESIGN OF HUMAN FACTORS / ERGONOMICS EXPERIMENTS, 4 Credits
Designed to provide graduate students with introductions to a broad range of methods appropriate for studying humans, tasks, environments and their interaction along with various topics in the area of Human Factors/Ergonomics. Reading/discussion format. Recommended: Graduate level statistics course

IE 545, HUMAN FACTORS ENGINEERING, 4 Credits
Analysis and design of work systems considering human characteristics, capabilities and limitations. Analysis and design of displays, controls, tools, and workstations. Human performance analysis. Human factors research methods. Equivalent to: IE 541
IE 546, HUMAN-MACHINE SYSTEMS ENGINEERING, 3 Credits
Development of safe, high performance human-machine systems. System/function/task analysis, function allocation, design, mockups and rapid prototyping, human factors test and evaluation. Critical examination of the human-factors and domain-specific literature to identify human factors problems, and knowledge and methods to address those problems.
Equivalent to: IE 542
Recommended: IE 545

IE 548, COGNITIVE ENGINEERING, 3 Credits
Theories and models of human sensory, cognitive, and motor performance pertaining to the operation of complex systems. Applications to human-machine systems engineering. Research topics and methods related to cognitive engineering.
Recommended: IE 545

IE 552, DESIGN OF INDUSTRIAL EXPERIMENTS, 3 Credits
A first course in design of experiments with an emphasis on applications and fundamental data analysis methods. Basic statistical inference, analysis of variance, blocking, general factorial designs, and two-level factorial designs are covered.
Recommended: ST 314

IE 553, DESIGN OF INDUSTRIAL EXPERIMENTS II, 3 Credits
This second course in design of experiments is a continuation of IE 552. The same textbook is used. Topics covered include two-level fractional factorial designs, regression models, response surface methods, rules for expected sum of squares and expected mean squares, a summary of the 'no-name' approach to DOE, and analysis of experiments with unbalanced data (time permitting).
Prerequisite: IE 552 with C or better

IE 563, ADVANCED PRODUCTION PLANNING AND CONTROL, 3 Credits
Recommended: IE 521 and ST 314

IE 564, DESIGN AND SCHEDULING OF CELLULAR MANUFACTURING SYSTEMS, 3 Credits
Recommended: Computer experience

IE 570, MANAGEMENT SYSTEMS ENGINEERING, 4 Credits
Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies.
Equivalent to: IE 574

IE 571, PROJECT MANAGEMENT IN ENGINEERING, 3 Credits
Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included.
Available via Ecampus

IE 575, SYSTEMS THINKING THEORY AND PRACTICE, 4 Credits
An introduction to systems science theory and practice. Systems science theory is explored through the fundamentals of systems thinking theory, and theory of knowledge. Systems science practice is explored through system dynamics modeling techniques for simulating socio-technical systems, structures, and processes.

IE 581, OPERATIONS MANAGEMENT, 4 Credits
Critical and current issues on the implementation of operations management strategies for the engineering manager. Includes aspects of operations in an engineering management environment such as work systems design, forecasting, strategy, facilities location and design, management of quality and resources planning and management.
Prerequisite: IE 582 with B or better
Recommended: IE 571
Available via Ecampus

IE 582, INTRODUCTION TO MANAGEMENT FOR ENGINEERS AND SCIENTISTS, 4 Credits
An introduction to concepts, tools, and practices necessary for a broad understanding of the roles of engineering and technical managers. A mix of research results, case studies, and experiential learning is used to bolster theories of management, with focus on technical organizations.
Available via Ecampus

IE 583, ADVANCED ENGINEERING ECONOMICS ANALYSIS, 4 Credits
Examines the economics dimension of engineering management, from costing techniques to financial analysis. Topics include industrial cost analysis and estimation, economic planning, forecasting, and budgeting, and financial analysis for engineering and engineering management.
Prerequisite: IE 582 with B or better
Recommended: Basic courses in engineering economic analysis (ENGR 390)
Available via Ecampus
IE 584, SYSTEMS ENGINEERING, 4 Credits
An overview of systems engineering within engineering management practice. Principles of systems engineering are explored through traditional and contemporary hard and soft systems of engineering techniques and practices, and through current future developments in the field.
Prerequisite: IE 582 with B- or better
Recommended: IE 581 and IE 583 and IE 586 and IE 587
Available via Ecampus

IE 585, LEGAL ASPECT OF ENGINEERING MANAGEMENT, 3 Credits
A survey of legal topics relevant to engineers, including basic of legal system, labor law, intellectual property, torts, and contracts. This is an introductory course, emphasizes on legal principles that can provide engineers with the ability to recognize legal issues that are likely to arise in the engineering profession and engineering management. Note: This is an introductory class and will in no way make a student a lawyer. Students are advised to seek legal representation if he/she encounters a legal issue.
Prerequisite: IE 582 with B or better
Recommended: IE 581 and IE 583 and (IE 586 or CCE 552)
Available via Ecampus

IE 586, PROJECT RISK MANAGEMENT, 4 Credits
An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as CCE 552/IE 586.
Equivalent to: CCE 552
Available via Ecampus

IE 587, MANAGEMENT OF INFORMATION SYSTEMS, 4 Credits
An introduction to the management of information systems and their strategic importance in business. Topics covered include global e-business and collaboration, databases and information management, basics of telecommunication and wireless technology, security vulnerabilities of information systems, basics of business intelligence and business analytics, knowledge management and enhanced decision making.
Prerequisite: IE 582 with B or better
Available via Ecampus

IE 588, MANAGEMENT OF NEW PRODUCT DEVELOPMENT, 4 Credits
Introduces the new product development (NPD) process with the objective of understanding the underlying structure in NPD and exploring the methods to manage NPD processes by applying them to case studies and term project. The NPD process is investigated through its five key phases: (1) Opportunity identification/selection, (2) Concept generation, (3) Concept/project evaluation, (4) Development, and (5) Launch.
Prerequisite: IE 581 with B or better and IE 582 [B] and IE 583 [B]
Recommended: IE 584
Available via Ecampus

IE 589, PROFESSIONAL RESPONSIBILITY AND ETHICS, 3 Credits
An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as CCE 554/IE 589.
Equivalent to: CCE 554
Available via Ecampus

IE 590, STRATEGIC PLANNING IN ENGINEERING ORGANIZATIONS, 4 Credits
Provides an overview the strategic planning process from a variety engineering perspective. Variety engineering is explored via key management control theory concepts and through applying students’ work experience.
Prerequisite: IE 581 with B or better and IE 582 [B] and IE 583 [B]
Available via Ecampus

IE 591, STATISTICAL CONCEPTS FOR ENGINEERING MANAGERS, 4 Credits
Provides a first review of basic probability and statistical inference concepts and methods relevant for engineering managers. This is followed by a presentation of frequently utilized statistical methods in industry. These include process control, regression analysis, and experimental design. For each method, the fundamental ideas will be covered, and simple examples will be presented to provide engineering managers with the background needed to initiate and manage applications of these methods in industry. The course will end with an overview of process optimization, and robust parameter design.
Prerequisite: IE 582 with B or better
Available via Ecampus

IE 594, RESEARCH METHODS IN ENGINEERING MANAGERS, 4 Credits
Introduction to research methodologies including surveys, interviews, quasi-experimentation, and case studies. Methods for research design, and collection and analysis of data.
Equivalent to: IE 574

IE 599, SPECIAL TOPICS, 1-5 Credits
Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term.
Equivalent to: IE 592
This course is repeatable for 99 credits.
Available via Ecampus

IE 603, THESIS, 1-16 Credits
This course is repeatable for 99 credits.

IE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.
IE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

IE 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

Materials Science (MATS)

MATS 221, THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY, 3 Credits
Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSTLISTED as ENG 221/ MATS 221.
Equivalent to: ENGR 221
Recommended: One year of college science.

MATS 321, INTRODUCTION TO MATERIALS SCIENCE, 4 Credits
Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria.
Prerequisite: CH 202 with C or better or CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 224H with C or better
Equivalent to: ENGR 321, ENGR 321H, MATS 321H
Available via Ecampus

MATS 321H, INTRODUCTION TO MATERIALS SCIENCE, 4 Credits
Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria.
Attributes: HNRS – Honors Course Designator
Prerequisite: CH 202 with C or better or CH 222 with C or better or CH 232 with C or better or CH 232H with C or better or CH 224H with C or better
Equivalent to: ENGR 321, ENGR 321H, MATS 321

MATS 322, MECHANICAL PROPERTIES OF MATERIALS, 3 Credits
Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C])
Equivalent to: ENGR 322

MATS 413, THERMODYNAMICS AND PHASE EQUILIBRIA OF MATERIALS, 4 Credits
Explores the statistical interpretation of entropy, heat capacity, enthalpy of condensed phases, solution thermodynamics, liquid-solid and solid-solid phase equilibria. Considers the principles of thermodynamics governing phase stability with a focus on liquid-solid and solid-solid equilibria, and phase stability in two-component systems. Examines the relationship of Gibbs free energy to phase stability.
Prerequisite: MATS 321 with C or better and (ME 311 [C] or NSE 311 [C] or CHE 311 [C])

MATS 441, PHYSICAL METALLURGY, 3 Credits
Introduction to properties of metals and alloys including solidification, diffusion, solid solutions, intermediate phases, annealing, heat treatment and phase transformation with a focus on ferrous and non-ferrous metal systems. Identifies relationships between material composition, structure, and properties resulting from synthesis, processing or service. Explores the knowledge of ferrous and non-ferrous alloy systems and their significant metallurgical properties and applications.
Prerequisite: MATS 321 with C or better

MATS 445, WELDING METALLURGY, 4 Credits
Theory-based course focused on the metallurgy of welds. Topics covered include welding/joining processes, heat input, diffusion, solidification, phase transformation, materials compatibility and welding defects. This is NOT a practical welding class.
Prerequisite: (MATS 321 with C or better or ENGR 321 with C or better or ENGR 321H with C or better) or MATS 570 with C or better

MATS 455, EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE, 4 Credits
Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab.
Prerequisite: (ENGR 321 with C or better or ENGR 321H with C or better)
Equivalent to: ME 455
This course is repeatable for 8 credits.
Recommended: ME 570

MATS 478, THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES, 4 Credits
Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films.
Prerequisite: (ME 311 with C or better or ME 311H with C or better) and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C]) and (ENGR 322 [C] or MATS 322 [C])
Equivalent to: ME 478

MATS 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.
MATS 545, WELDING METALLURGY, 4 Credits
Theory-based course focused on the metallurgy of welds. Topics covered include welding/joining processes, heat input, diffusion, solidification, phase transformation, materials compatibility and welding defects. This is NOT a practical welding class.
Recommended: (MATS 321 or ENGR 321 or ENGR 321H) or MATS 570

MATS 555, EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE, 4 Credits
Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab.
Prerequisite: ME 570 with C or better
Equivalent to: ME 555
This course is repeatable for 8 credits.
Recommended: ENGR 321 or ENGR 321H

MATS 570, STRUCTURE-PROPERTY RELATIONS IN MATERIALS, 4 Credits
Equivalent to: ME 570

MATS 571, ELECTRONIC PROPERTIES OF MATERIALS, 4 Credits
Equivalent to: ME 571
Recommended: CH 545 or ME 570

MATS 578, THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES, 4 Credits
Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films.
Equivalent to: ME 578

MATS 581, THERMODYNAMICS OF SOLIDS, 4 Credits
Equivalent to: ME 581

MATS 582, RATE PROCESSES IN MATERIALS, 3 Credits
Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development.
Prerequisite: MATS 581 with C or better or ME 581 with C or better
Equivalent to: ME 582

MATS 584, ADVANCED FRACTURE OF MATERIALS, 4 Credits
Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data.
Equivalent to: ME 584
Recommended: ENGR 322

MATS 587, DISLOCATIONS, DEFORMATION, AND CREEP, 4 Credits
The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies.
Equivalent to: ME 587
Recommended: ENGR 322

MATS 588, COMPUTATIONAL METHODS IN MATERIALS SCIENCE, 4 Credits
A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo methods. Learning is through a mixture of lecture and hands-on lab projects in which students use computational methods to explore and reinforce fundamental concepts in materials science. Lec/lab.
Equivalent to: ME 588
Recommended: Experience with Matlab or Mathematica or an equivalent numerical and programming environment.

MATS 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

MATS 659, PRINCIPLES OF TRANSMISSION ELECTRON MICROSCOPY, 4 Credits
This lecture-only course covers basic principles of transmission electron microscopy (TEM) including instrument components, electron optics, electron diffraction, and the origins and interpretation of image contrast. Spectroscopic techniques are covered, but diffraction and imaging techniques are emphasized. Coverage of experimental techniques will focus on those useful for addressing problems in materials science.
Recommended: MATS 570 and (CH 616 or MATS 555)
MATS 671, ELECTRONIC PROPERTIES OF OXIDES, 3 Credits
Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides.
Equivalent to: ME 671
Recommended: MATS 571 or PH 575

ME 206, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ME 250, INTRODUCTION TO MANUFACTURING PROCESSES, 1 Credit
Use of measuring and layout tools, interpretation of blueprints and drawings, identification of engineering materials. Operation of machine tools, including calculation of machining parameters. Operation of gas and MIG welding equipment. Lec/lab. Graded P/N.
Prerequisite: ENGR 248 with C or better and (PH 211 [C] or PH 211H [C])

ME 299, SPECIAL TOPICS, 1-16 Credits
Graded P/N.
Equivalent to: ME 299H
This course is repeatable for 16 credits.

ME 299H, SPECIAL STUDIES, 1-16 Credits
Graded P/N.
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 299
This course is repeatable for 16 credits.

ME 306, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ME 311, INTRODUCTION TO THERMAL-FLUID SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311/NSE 311.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ENGR 311, ENGR 311H, ME 311H, NE 311, NE 311H, NSE 311, NSE 311H

ME 311H, INTRODUCTION TO THERMAL-FLUID SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311/NSE 311.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ENGR 311, ENGR 311H, ME 311, NE 311, NE 311H, NSE 311, NSE 311H

ME 312, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312H, NE 312, NSE 312, NSE 312H

ME 312H, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312, NE 312, NSE 312, NSE 312H

ME 316, MECHANICS OF MATERIALS, 3 Credits
Determination of stresses, deflections, and stability of deformable bodies with an introduction to finite element analysis.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and (MTH 256 [C] or MTH 256H [C])

ME 317, INTERMEDIATE DYNAMICS, 4 Credits
Continues the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 112 [C] or CS 161 [C] or CBEE 102 [C] or NSE 115 [C])
Equivalent to: ME 317H

ME 317H, INTERMEDIATE DYNAMICS, 4 Credits
Continues the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (ENGR 112 [C] or CS 161 [C] or CBEE 102 [C] or NSE 115 [C])
Equivalent to: ME 317
**ME 331, INTRODUCTORY FLUID MECHANICS, 4 Credits**
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.

**Prerequisite:** ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better

**Equivalent to:** ENGR 331, ENGR 331H, ME 331, ME 331H, NSE 331, NSE 331H

**ME 331H, INTRODUCTORY FLUID MECHANICS, 4 Credits**
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better

**Equivalent to:** ENGR 331, ENGR 331H, ME 331, ME 331H, NSE 331, NSE 331H

**ME 332, HEAT TRANSFER, 4 Credits**
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.

**Prerequisite:** ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better

**Equivalent to:** ME 332H, ME 332H, NSE 332, NSE 332H

**ME 332H, HEAT TRANSFER, 4 Credits**
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better

**Equivalent to:** ME 332, ME 332H, NSE 332, NSE 332H

**ME 351, INTRODUCTION TO INSTRUMENTATION AND MEASUREMENT SYSTEMS, 4 Credits**
Illustrates the function, operation, and application of common mechanical engineering instruments, measurement principles, and statistical analysis. Demonstrates elements of measurement systems, including transduction, signal conditioning, and data recording. Examines function and operation of digital data acquisition systems.

**Prerequisite:** (ENGR 202 with C or better or ENGR 202H with C or better) and (MTH 256 [C] or MTH 256H [C]) and (MTH 341 [C])

**Equivalent to:** ME 451

**ME 373, MECHANICAL ENGINEERING METHODS, 4 Credits**
Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec.

**Prerequisite:** (ENGR 112 with C or better or ENGR 112H with C or better) and (MTH 256 [C] or MTH 256H [C]) and MTH 341 [C]

**Equivalent to:** ME 373H

**ME 373H, MECHANICAL ENGINEERING METHODS, 4 Credits**
Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** (ENGR 112 with C or better or ENGR 112H with C or better) and (MTH 256 [C] or MTH 256H [C]) and MTH 341 [C]

**Equivalent to:** ME 373

**ME 382, INTRODUCTION TO DESIGN, 4 Credits**
Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab.

**Prerequisite:** ENGR 248 with C or better and ME 250 (may be taken concurrently) [C] and ENGR 212 [C] and ENGR 213 [C]

**Equivalent to:** ME 382H

**ME 382H, INTRODUCTION TO DESIGN, 4 Credits**
Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab.

**Attributes:** HNRS – Honors Course Designator

**Prerequisite:** ENGR 248 with C or better and ME 250 (may be taken concurrently) [C] and (PH 211 [C] or PH 211H [C])

**Equivalent to:** ME 382

**ME 383, MECHANICAL COMPONENT DESIGN, 4 Credits**
Failure analysis and design of machine components. Lec/lab.

**Prerequisite:** ME 316 with C or better and ME 250 (may be taken concurrently) [C] and (ENGR 212 [C] or ENGR 212H [C]) and ENGR 213 [C]

**Equivalent to:** ME 383H
ME 383H, MECHANICAL COMPONENT DESIGN, 4 Credits
Failure analysis and design of machine components. Lec/lab.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 316 with C or better and ME 250 (may be taken concurrently) [C] and (ENGR 212 [C] or ENGR 212H [C]) and ENGR 213 [C]
Equivalent to: ME 383

ME 401, RESEARCH, 1-16 Credits
This course is repeatable for 9 credits.

ME 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

ME 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: ME 405H
This course is repeatable for 9 credits.

ME 405H, READING AND CONFERENCE, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 405
This course is repeatable for 9 credits.

ME 406, PROJECTS, 1-16 Credits
This course is repeatable for 15 credits.

ME 407, SEMINAR, 1-16 Credits
Equivalent to: ME 407H
This course is repeatable for 2 credits.

ME 410, INTERNSHIP, 1-16 Credits
Credits may not apply toward BS degree in Mechanical Engineering. Graded P/N.
This course is repeatable for 16 credits.

ME 411, AEROSPACE APPLICATIONS IN MECHANICAL ENGINEERING, 4 Credits
Provides students with the fundamentals of mechanical engineering applications to aerospace. Topics covered include an overview of modern aircraft and spacecraft analysis, with an emphasis on performance, stability, structures, materials, FAA and FAR standards and current professional practices in the conceptual design of aerospace vehicles. Student projects will integrate course topics.
Prerequisite: (ME 316 with C or better and (ME 317 [C] or ME 317H [C]) and (ME 331 [C] or ME 331H [C]) and (ME 373 [C] or ME 373H [C]))

ME 412, DESIGN OF MECHANISMS, 4 Credits
Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab.
Prerequisite: (ME 317 with C or better or ME 317H with C or better) and ME 383 [C]

ME 420, APPLIED STRESS ANALYSIS, 4 Credits
Elasticity theory, failure theories, energy methods, finite element analysis.
Prerequisite: ME 316 with C or better

ME 422, MECHANICAL VIBRATIONS, 4 Credits
Dynamic response of single and multiple degree-of-freedom systems.
Prerequisite: ME 317 with C or better or ME 317H with C or better
Equivalent to: ME 422H

ME 422H, MECHANICAL VIBRATIONS, 4 Credits
Dynamic response of single and multiple degree-of-freedom systems.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 317 with C or better or ME 317H with C or better
Equivalent to: ME 422

ME 424, FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS, 3 Credits
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab.
Prerequisite: ME 420 with C or better or ME 520 with C or better

ME 430, SYSTEMS DYNAMICS AND CONTROL, 4 Credits
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ECE 451/ME 430.
Prerequisite: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C])))
Equivalent to: ECE 451, ME 430H
Available via Ecampus
ME 430H, SYSTEMS DYNAMICS AND CONTROL, 4 Credits
Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ECE 451/ME 430.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ME 317 with C or better or ME 317H with C or better or (ECE 351 with C or better and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C])))
Equivalent to: ECE 451, ME 430

ME 443, RENEWABLE ENERGY: THERMAL FLUID SYSTEMS, 4 Credits
Evaluates several thermal/fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences.
Prerequisite: (ME 311 with C or better or ME 311H with C or better or NE 311 with C or better or NE 331H [C] or NE 331 [C] or NE 331H [C]) and (ME 332 [C] or ME 332H [C] or NE 332 [C] or NE 332H [C])

ME 444, THERMAL SYSTEMS DESIGN AND ANALYSIS, 4 Credits
Integration of the concepts, laws, and methodologies from fluid mechanics, heat transfer, and thermodynamics, into a set of practical tools for thermal energy systems design and analysis.
Prerequisite: (ME 332 with C or better or ME 332H with C or better or NSE 332 with C or better or NSE 332H with C or better) and (ME 312 (may be taken concurrently) [C] or ME 312H (may be taken concurrently) [C] or NSE 312 (may be taken concurrently) [C] or NSE 312H (may be taken concurrently) [C])

ME 445, INTRODUCTION TO COMBUSTION, 4 Credits
Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions.
Prerequisite: (ME 312 with C or better or ME 312H with C or better) and (ME 332 [C] or ME 332H [C])

ME 450, APPLIED HEAT TRANSFER, 4 Credits
An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week.
Prerequisite: ME 332 with C or better or ME 332H with C or better

ME 452, THERMAL AND FLUIDS SCIENCES LABORATORY, 4 Credits
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Prerequisite: (ME 311 with C or better or ME 311H with C or better) and (ME 331 [C] or ME 331H [C] and (ME 332 [C] or ME 332H [C])
Equivalent to: ME 452

ME 452H, THERMAL AND FLUIDS SCIENCES LABORATORY, 4 Credits
Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
Attributes: HNRS – Honors Course Designator
Prerequisite: (ME 311 with C or better or ME 311H with C or better) and (ME 331 [C] or ME 331H [C] and (ME 332 [C] or ME 332H [C])
Equivalent to: ME 452

ME 453, STRUCTURE AND MECHANICS LABORATORY, 4 Credits
Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials.
Prerequisite: ME 451 with C or better

ME 460, INTERMEDIATE FLUID MECHANICS, 4 Credits
Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence.
Prerequisite: ME 331 with C or better or ME 331H with C or better

ME 461, GAS DYNAMICS, 4 Credits
Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems.
Prerequisite: (ME 312 with C or better or ME 312H with C or better) and (ME 331 [C] or ME 331H [C])

ME 480, MATERIALS SELECTION, 3 Credits
Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection.
Prerequisite: MATS 322 with C or better or ENGR 322 with C or better
ME 484, FRACTURE OF MATERIALS, 3 Credits
Fracture mechanics and fatigue mechanisms: mechanisms of ductile and brittle fracture. Environmentally induced fracture and fatigue. Considerations in design of engineering materials and structures will be discussed.
Prerequisite: MATS 322 with C or better or ENGR 322 with C or better

ME 499, SPECIAL TOPICS, 0-16 Credits
Equivalent to: ME 499H
This course is repeatable for 16 credits.

ME 499H, SPECIAL TOPICS, 0-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: ME 499
This course is repeatable for 16 credits.

ME 501, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ME 502, INDEPENDENT STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

ME 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ME 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ME 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ME 507, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ME 508, THERMAL FLUID SCIENCE SEMINAR, 1 Credit
Student participation seminar experience for 1 course credit. Students will present and listen to seminars concerning ongoing research within the thermal fluid sciences.

ME 509, MATERIALS SCIENCE SEMINAR, 1 Credit
Student participation seminar experience for one credit; students will listen to seminars concerning ongoing research activities within materials science. Students will also have the opportunity to present their own research results periodically. Graded P/N.
Equivalent to: MATS 509

ME 511, PRECISION MACHINE DESIGN, 3 Credits
Tolerance analysis and application in design/manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as ME 511/MFGE 511.
Equivalent to: MFGE 511
Recommended: An understanding of mechanical component design and solid mechanics.

ME 512, DESIGN OF MECHANISMS, 4 Credits
Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab.
Recommended: (ME 317 or ME 317H) and ME 383

ME 513, BIO-INSPIRED DESIGN, 4 Credits
Intersection of design and biology that seeks to systematically mine biological knowledge to solve design problems. Investigates inspiration from nature from three different types: visual, conceptual, and computational. Includes design rules, heuristics, principles or patterns to solve engineering problems. Algorithmic bio-inspiration emulates natural algorithms for control or optimization problems.

ME 515, RISK AND RELIABILITY ANALYSIS IN ENGINEERING DESIGN, 4 Credits
Fundamentals of risk, uncertainty, and reliability. Methods to analyze and quantify the risk of failures, and the reliability of complex systems, including fault tree analysis, reliability block diagrams, probabilistic risk assessment. Introduction to research methods for risk and reliability analysis during the early design stages.

ME 516, MODELING AND ANALYSIS OF COMPLEX SYSTEMS, 4 Credits
Introduction to challenges and considerations when designing complex systems. Fundamentals of systems engineering and methods used in practice. Models and tools used to enable the use of models for trade studies during the design of complex systems. Model-based design environments and methodologies. Introduction to decision support tools in design.

ME 517, OPTIMIZATION IN DESIGN, 4 Credits
Optimization methods as applied to engineering design, theory and application of nonlinear optimization techniques for multivariate unconstrained and constrained problems. Model boundedness and sensitivity.
ME 519, SELECTED TOPICS IN DESIGN, 3-4 Credits
Topics in mechanical design selected from the following: design processes, quality engineering, design for assembly, statistical machine design, the Tagucchi method, and parametric design.
This course is repeatable for 32 credits.

ME 520, APPLIED STRESS ANALYSIS, 4 Credits
Elasticity theory, failure theories, energy methods, finite element analysis.
Recommended: ME 316

ME 521, LINEAR ELASTICITY, 4 Credits
A general introduction to the theory of elasticity. The solution of 2-D problems using the Airy stress function in rectangular and polar coordinates. The solution of 3-D problems using the Galerkin vector, the Papkovich-Neuber solution, and complex variable methods. Applications to asymptotic fields at discontinuities, contact and crack problems, and thermoelasticity.
Recommended: ME 316

ME 522, MECHANICAL VIBRATIONS, 4 Credits
Dynamic response of single and multiple degree-of-freedom systems.
Recommended: ME 317

ME 523, ADVANCED STRESS ANALYSIS, 4 Credits
An introduction to the mechanics of nonlinear elastic, plastic, and viscoelastic material behavior including large deformations.
Recommended: ME 316

ME 524, FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS, 3 Credits
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab.
Prerequisite: ME 520 with C or better

ME 526, NUMERICAL METHODS FOR ENGINEERING ANALYSIS, 3 Credits
Equivalent to: ME 526, NSE 526
Recommended: Programming experience and previous exposure to numerical methods

ME 529, SELECTED TOPICS IN SOLID MECHANICS, 3-4 Credits
Advanced topics in solid mechanics emphasizing research applications of current interest.
This course is repeatable for 32 credits.

ME 531, LINEAR MULTIVARIABLE CONTROL SYSTEMS I, 4 Credits
Theoretical design of control systems for systems modeled by linear multivariable differential equations. Topics covered include controllability, observability, state feedback control, pole placement, output feedback, estimator design, and control designs that include both estimators and regulators.

ME 532, LINEAR MULTIVARIABLE CONTROL SYSTEMS II, 4 Credits
Focuses on designing control systems where the device to be controlled is an uncertain system, yet can be described by a set of linear differential equations. Lec.
Prerequisite: ME 531 with C or better

ME 533, NONLINEAR DYNAMIC ANALYSIS, 4 Credits
Course focuses on understanding the behavior of nonlinear dynamic systems of interest to mechanical engineers. Lec.
Recommended: ME 317

ME 534, NONLINEAR MULTIVARIABLE CONTROL SYSTEMS, 4 Credits
Focuses on designing control systems when the device to be controlled is mathematically described by a nonlinear set of differential equations. Lec.
Prerequisite: ME 533 with C or better

ME 539, SELECTED TOPICS IN DYNAMICS, 1-16 Credits
Advanced topics in dynamics emphasizing research applications of current interest.
This course is repeatable for 30 credits.

ME 540, INTERMEDIATE THERMODYNAMICS, 4 Credits
Students are expected to master classical thermodynamics by way of solving extended problems using software tools. Statistical thermodynamics concepts are also introduced and exercised.
Recommended: ME 312

ME 541, LIQUID-VAPOR PHASE CHANGE AND HEAT TRANSFER, 4 Credits
Advanced treatment of underlying physics and engineering modeling approaches for heat transfer associated with vapor/liquid phase change processes. Topics include thermodynamics and mechanical aspects of phase change processes, pool boiling, filmwise and dropwise condensation, internal convective boiling and condensation, and other emerging areas in phase change heat transfer.
ME 543, RENEWABLE ENERGY: THERMAL FLUID SYSTEMS, 4 Credits
Evaluates several thermal/fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences.
Recommended: (ME 311 or ME 311H or NE 311 or NE 311H) and (ME 331 or ME 331H or ME 331 or ME 331H) and (ME 332 or ME 332H or ME 332 or ME 332H)

ME 544, ADVANCED POWER GENERATION SYSTEMS, 4 Credits
Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/rec.
Recommended: ME 312 and (ME 332 or ME 332H)

ME 545, INTRODUCTION TO COMBUSTION, 4 Credits
Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions.
Recommended: ME 312 and (ME 332 or ME 332H)

ME 546, CONVECTION HEAT TRANSFER, 3 Credits
An advanced treatment of forced and natural convection heat transfer processes emphasizing underlying physical phenomena. Current topical literature will be considered; analytical and numerical problem solving is included.
Recommended: (ME 332 or ME 332H) and ME 373

ME 547, CONDUCTIVE HEAT TRANSFER, 3 Credits
Analytical and numerical solutions to steady state and transient conduction problems.
Recommended: (ME 332 or ME 332H) and ME 373

ME 548, RADIATION HEAT TRANSFER, 3 Credits
Analytical and numerical methods of solution of thermal radiation problems.
Recommended: (ME 332 or ME 332H) and ME 373

ME 549, SELECTED TOPICS IN HEAT TRANSFER, 3 Credits
Topics in heat transfer including advanced problems in conduction, radiation, and convection. Additional examination of heat transfer in multiphase systems, inverse problems, combined modes, equipment design, solution techniques and other topics of current interest considered, including extensive use of current literature. Not all topics covered each year.
This course is repeatable for 9 credits.

ME 550, APPLIED HEAT TRANSFER, 4 Credits
An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week.
Recommended: ME 332 or ME 332H

ME 552, MEASUREMENTS IN FLUID MECHANICS AND HEAT TRANSFER, 4 Credits
Course emphasis is on measurement techniques and data analysis methods related to fluid mechanics and heat transfer. Proper experimental methods, data and uncertainty analyses related to thermal and fluids measurements are discussed. Local and spatial mapping of fluid and thermal fields are highlighted.
Recommended: (ME 331 or ME 331H) and (ME 332 or ME 332H) and ME 451.

ME 553, STRUCTURE AND MECHANICS LABORATORY, 4 Credits
Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials.
Recommended: ME 451

ME 560, INTERMEDIATE FLUID MECHANICS, 4 Credits
Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence.
Recommended: ME 331

ME 561, GAS DYNAMICS, 4 Credits
Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems.
Recommended: ME 312 and (ME 331 or ME 331H)

ME 564, TURBULENCE MODELING, 3 Credits
An introductory course on theory of different turbulence modeling techniques such as Reynolds Averaged Navier Stokes (RANS), Large Eddy Simulation (LES), and Direct Numerical Simulation (DNS) applied to a range of turbulent flows including free shear flows, boundary layers, and internal flows.
Prerequisite: ME 560 with C or better and (ME 565 [C] or ME 566 [C])

ME 565, INCOMPRESSIBLE FLUID MECHANICS, 3 Credits
Generalized fluid mechanics; kinematics; methods of description, geometry of the vector field, dynamics of nonviscous fluids, potential motion, two-dimensional potential flow with vorticity.
ME 566, VISCOUS FLOW, 3 Credits
Boundary layer, stability, transition prediction methods, computational methods in fluid mechanics, recent developments.

ME 567, ENGINEERING APPLICATIONS OF COMPUTATIONAL FLUID DYNAMICS, 4 Credits
Basic concepts of computational fluid dynamics, a technique used for solving fully three-dimensional fluid flow problems with no exact solution, will be discussed and applied to general engineering applications using commercially available software. Lec.
Recommended: ME 312 and (ME 331 or ME 331H)

ME 568, TURBULENT FLOW DYNAMICS, 4 Credits
An introductory course of the basic physics of turbulent flows, coverage will include statistical methods and physical interpretation of a range of flows including boundary layer flows, internal flows, and environmental flows.
Prerequisite: ME 560 with C or better
Recommended: A first course in fluid mechanics such as ME 331

ME 569, SELECTED TOPICS IN FLUID MECHANICS, 2-4 Credits
Topics in fluid mechanics emphasizing research applications of current interest.
This course is repeatable for 32 credits.

ME 580, MATERIALS SELECTION, 3 Credits
Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. Lec/lab.
Equivalent to: MATS 580
Recommended: MATS 322 or ENGR 322

ME 583, COMPOSITE MATERIALS, 3 Credits
Explores fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications.
Recommended: ME 420 and ME 483 with a minimum grade of C

ME 585, FATIGUE OF MATERIALS, 4 Credits
Analyzes the failure of materials by fatigue including how fatigue behavior is characterized, how fatigue failure is predicted, the physical mechanisms responsible for fatigue failure of various materials, and how such behavior is related to the atomic structure and microstructure of the material.
Prerequisite: ME 570 with C or better or MATS 570 with C or better

ME 589, SELECTED TOPICS IN MATERIALS, 3 Credits
Topics in materials science to correspond to areas of graduate research. Topics will be chosen from the following list: optical materials, dielectrics, oxidation and corrosion, ceramics, thermophysical properties, polymers and viscoelasticity, coatings and thin films. Lec/rec.
This course is repeatable for 32 credits.

ME 596, SELECTED TOPICS IN THERMODYNAMICS, 3 Credits
Topics in thermodynamics including advanced problems in classical thermodynamics and statistical thermodynamics of current interest. Topics will likely be considered, including extensive use of literature. Not all topics covered each year.
This course is repeatable for 32 credits.

ME 597, PRECISION MOTION GENERATION, 4 Credits
Introduces fundamental knowledge in mechatronic systems used in manufacturing equipment such as CNC machine tools, and their computer numerical controls. Students will be exposed to sensors and actuators utilized in machine tools, industrial robots and for process automation. Fundamental knowledge to model and identify dynamics of motion delivery systems, design and analysis of accurate position control algorithms for precision motion generation will be covered. Digital motion control design will be introduced. Motion planning and real-time path interpolation algorithms will be covered. Students will be able to design NC systems for 2D motion platforms.
Recommended: ME 430

ME 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 32 credits.

ME 601, RESEARCH, 1-16 Credits
This course is repeatable for 16 credits.

ME 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ME 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ME 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

ME 607, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

ME 611, MODERN PRODUCT DESIGN, 4 Credits
Modern product development, design and prototyping are covered. Product development and prototyping is examined from a research standpoint in this course. Customer outcomes gathering, functional modeling, product architecture, modern techniques for concept generation and selection are explored. Also covered are recently developed theories and techniques for prototyping. The topics’ place in the overall design process is shown through a product development and prototyping project.
ME 613, SUSTAINABLE PRODUCT DESIGN, 4 Credits
Graduate students will work in multidisciplinary design teams to develop innovative and environmentally friendly products. Combining the principles of integrated product development and sustainable design thinking, students will (a) advance their knowledge of the design process by creating a patent-quality new product, (b) learn and employ environmentally-minded design theory and methods, including various software packages and online tools, and (c) further enhance teamwork skills by working collaboratively in a professional design team. Sustainable Product Development is conducted as a collaborative design experience, in that lectures, discussion, and team working time will be integrated into class sessions.

ME 615, DESIGN UNDER UNCERTAINTY, 4 Credits
Tackles the problem of decision making in engineering design. The fundamental challenge faced in making decisions in engineering designs is that they are almost exclusively decisions made under uncertainty. Sources of uncertainty could result from engineering models, experiments conducted, or lack of knowledge of future events. The course will cover three basic topics 1) how do we quantify uncertainty, 2) how do we account for the uncertainty in decision making, and 3) how do we make design selection decisions about products or systems we design.
Prerequisite: ME 517 with C or better

ME 617, DESIGN AUTOMATION, 4 Credits
Design automation is the field of study whereby advanced numerical methods are used to automate difficult or tedious design decisions. Typically, such methods are based on numerical optimization and artificial intelligence. They work in tandem with other engineering digital tools like computer-aided design, computer-aided manufacturing, and finite-element analysis. This course builds upon a fundamental understanding of optimization to introduce students to a range of different techniques that may be used to support engineering decision-making. This includes heuristic methods, AI tree-search, discrete and stochastic algorithms. The course concludes with discussion of recent innovations in multi-objective, multi-disciplinary and robust optimization.
Prerequisite: ME 517 with C or better

ME 667, COMPUTATIONAL FLUID DYNAMICS, 3 Credits
Application of modern computational techniques to solve a wide variety of fluid dynamics problems including both potential and viscous flow with requirements for computer code development.
Prerequisite: (ME 560 with C or better or ME 565 with C or better or ME 566 with C or better) and (ME 526 [C] or ME 575 [C])

Manufacturing Engineering (MFGE)

MFGE 241, INTRODUCTION TO MECHATRONICS, 3 Credits
Explores the fundamentals of mechatronics: electronic circuits, tools, and basic sensors/actuators commonly used in the manufacturing process monitoring. Examines the operation and use of these instruments and tools for mechatronics design and prototyping. Examines the fundamentals of five types of sensors: distance, movement, proximity, stress/strain, and temperature, with a focus on the mathematical modeling of the sensors when they are embedded in a mechanical system. Apply basic programming in LabVIEW software to support the operation of data sampling through a data acquisition card. Integrate mechanical design with electronics controlled by a computer in an open loop fashion in the lab.
Prerequisite: ENGR 202 with C or better

MFGE 285, INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING, 3 Credits
Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. CROSSLISTED as IE 285/MFGE 285.
Prerequisite: IE 112 (may be taken concurrently) with C or better or FOR 112 (may be taken concurrently) with C or better
Equivalent to: IE 285

MFGE 336, PRODUCTION ENGINEERING, 4 Credits
Provides a general understanding of the production engineering function within industry and the means by which to achieve tight tolerances through machining. Geometric dimensioning and tolerancing, fixture and gage design, and fundamentals of metal cutting mechanics are introduced, and their interactions are explored. Lec/lab.
Prerequisite: (ENGR 213 with C or better or ENGR 213H with C or better) and ENGR 248 [C] and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C] or MATS 321H [C]) and ME 250 [C]
Equivalent to: IE 336

MFGE 337, MATERIALS AND MANUFACTURING PROCESSES, 4 Credits
Introduces mechanical manufacturing methods by which materials are economically shaped into valuable products. The overall goal is to develop an understanding of how the functionality, shape, materials, cost and sustainability of a product influence manufacturing process selection and design. Lec/lab.
Prerequisite: (ENGR 321 with C or better or ENGR 321H with C or better or MATS 321 with C or better or MATS 321H with C or better) and ME 250 [C] and MFGE 336 [C]
Equivalent to: IE 337
MFGE 341, LOGICAL CONTROL FOR MECHATRONICS SYSTEMS, 4 Credits
Explore embedded software and hardware infrastructures used in mechatronics systems. Examine binary number and Boolean algebra using AND, OR, and XOR operators in microcontroller-controlled systems, and flip-flops and other basic components that realize binary control functions. Explore the working principles of AVR microcontroller systems, including the internal structure of clock timers, memory space, and IO addresses. Implement basic microcontroller operations using Assembly language. Demonstrate functions such as open loop control and wired/wireless communication in labs by programming a commercial microcontroller platform with assembly language.
Prerequisite: MFGE 241 with C or better

MFGE 413, COMPUTER AIDED DESIGN AND MANUFACTURING, 4 Credits
Introduces students to the application of computer aided engineering tools across the extended product design and manufacturing cycle. Students become familiar with new product development and working in a sustaining engineering environment with an emphasis on using computer-aided design (CAD) and computer-aided manufacturing (CAM) tools to gain competitive advantage.
Prerequisite: ENGR 248 with C or better and (IE 366 [C] or ME 382 [C] or ME 382H [C])
Equivalent to: ME 413

MFGE 436, LEAN MANUFACTURING SYSTEMS ENGINEERING, 4 Credits
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/control, product design, supply chain resource management. Lec/lab.
Prerequisite: ENGR 390 with C or better or ENGR 391 with C or better
Equivalent to: IE 436

MFGE 437, COMPUTER CONTROL OF MANUFACTURING PROCESSES, 4 Credits
Introduces fundamental knowledge in the automation of manufacturing systems and processes. Automated manufacturing system design and operations–computer numerical control (CNC) technology; NC part programming; sensors and actuators, their modeling and dynamic simulation; feedback motion delivery systems design and tuning; programmable logic controls (PLC) for industrial control systems, and path planning for numerical controlled (NC) machinery. Lec/lab.
Prerequisite: (ME 317 with C or better or ME 317H with C or better or MFGE 336 with C or better) and (ENGR 212 [C] or ENGR 212H [C])
Equivalent to: IE 437

MFGE 438, COMPOSITES MANUFACTURING, 4 Credits
Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab.
Prerequisite: ENGR 213 with C or better or ENGR 213H with C or better

MFGE 441, DIGITAL CONTROL OF MECHATRONICS SYSTEMS, 4 Credits
Explores modeling and control of mechatronics systems. Review Laplace and Fourier transforms and then examine Industrial Proportional (P), Derivative (D), Integral (I)-based, PD, P-PI, PID, lead-lag and pole placement feedback control strategies, and their design principles based on time and frequency domain performance metrics. Explores the frequency domain loop-shaping control design approach, and reference command generation and feedforward control for motion control. Examines digital control and real-time implementation of feedback control laws on real-time micro-processor systems. Implement and test feedback control algorithms on a servo motor setup in the labs.
Prerequisite: ENGR 212 with C or better and MFGE 341 [C]

MFGE 442, ADVANCED SIGNAL PROCESSING FOR MECHATRONICS SYSTEMS, 4 Credits
Examine continuous and discrete Fourier Transforms, and Fast Fourier Transform algorithm concepts. Explore the design of low, high and band-pass filtering based on Finite (FIR) and Infinite (IIR) Impulse Response filters, and 1D and 2D image signal processing basics. Apply Artificial Neural Network (ANN) Basics for pattern recognition, regression and classification. Implement digital filtering on micro-processor systems, and apply ANN for image processing in the labs.
Prerequisite: MFGE 441 with C or better

MFGE 449, SPECIAL TOPICS, 0-5 Credits
This course is repeatable for 99 credits.

MFGE 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

MFGE 511, PRECISION MACHINE DESIGN, 3 Credits
Tolerance analysis and application in design/manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as ME 511/MFGE 511.
Equivalent to: ME 511
Recommended: An understanding of mechanical component design and solid mechanics.

MFGE 531, MICROMANUFACTURING, 4 Credits
Introduction to microsystem platforms, scaling laws and size effects in micromanufacturing techniques with an emphasis on microchannel arrays, microchannel lamination and micro-scale characterization. Lec/lab.
Equivalent to: IE 531
MFGE 535, INDUSTRIAL SUSTAINABILITY ANALYSIS, 3 Credits
Students are exposed to the role of business and engineering in the design and implementation of sustainable industrial systems. Drivers, metrics, and analysis concepts, methods, and tools are introduced. Students incorporate business and engineering considerations in making product, manufacturing process, and supply chain design considerations.

MFGE 536, LEAN MANUFACTURING SYSTEMS ENGINEERING, 4 Credits
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/control, product design, supply chain resource management. Lec/lab.
Equivalent to: IE 536
Available via Ecampus

MFGE 538, COMPOSITES MANUFACTURING, 4 Credits
Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab.
Recommended: (ENGR 213 or ENGR 213H)

MFGE 551, ADDITIVE MANUFACTURING, 3 Credits
Introduces basic principles and process physics for additive manufacturing as compared with subtractive manufacturing. Various processes in AM (extrusion, jetting, photopolymerization, powder bed fusion, direct energy deposition and sheet lamination) and laser AM are discussed. Materials selection in AM (metals, polymers, ceramics and composites), powder metallurgy and metallurgical phenomena in additive manufacturing will be covered.

MFGE 599, SPECIAL TOPICS, 0-5 Credits
This course is repeatable for 99 credits.

MIME 101H, INTRODUCTION TO MIME, 3 Credits
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
Attributes: HNRS – Honors Course Designator
Equivalent to: MIME 101

MIME 199, SPECIAL TOPICS, 0-4 Credits
This course is repeatable for 4 credits.

MIME 299, SPECIAL TOPICS, 0-4 Credits
Special topics in mechanical, industrial, and manufacturing engineering. This course is repeatable for 16 credits.

MIME 497, ^MIME CAPSTONE DESIGN, 4 Credits
Integrates engineering knowledge and experience by applying skills to work on real-world engineering project. Involves product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; and long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MIME 497 with C or better or ESE 497 with C or better
Equivalent to: ESE 497, IE 497, ME 497

MIME 498, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: MIME 497 with C or better or ESE 497 with C or better
Equivalent to: ESE 498, IE 498, ME 498

MIME 504, WRITING AND CONFERENCE/EXPLORATION, 0-9 Credits
Students will be allowed to register for a variable number of MIME 504 credits to bring their registration up to full-time status (9 credits). Graded P/N.
Equivalent to: IE 504, ME 504, ROB 504
This course is repeatable for 15 credits.
MIME 507, SEMINAR/NEW STUDENT ORIENTATION, 1 Credit

Robotics (ROB)

ROB 421, APPLIED ROBOTICS, 4 Credits
Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/lab.
Prerequisite: ME 430 with C or better
Equivalent to: ENGR 421

ROB 456, INTELLIGENT ROBOTS, 4 Credits
Foundations of probabilistic reasoning for robotics. Topics include state estimation, robot motion, perception, localization and decision making under uncertainty.
Prerequisite: ST 314 with C or better
Equivalent to: ME 456
Recommended: CS 331, CS 361, ECE 353, or other programming experience

ROB 501, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

ROB 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ROB 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

ROB 506, PROJECTS, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ROB 507, SEMINAR, 1-16 Credits
Graded P/N.
This course is repeatable for 16 credits.

ROB 514, INTRODUCTION TO ROBOTICS, 4 Credits
A broad introduction to the field of robotics, and to the graduate Robotics program. The goal of the class is to take students with different backgrounds (mechanical engineering, computer science, electrical engineering, physics, etc.) and give them a common base in the fundamentals of robotics. A secondary goal is to introduce students to the Robotics program, and give them some of the skills that will make them successful, both in the program and as a professional roboticist.

ROB 521, RESEARCH ROBOTICS, 4 Credits
Multidisciplinary teams of students will use the backdrop of a robotics competition to generate a research question, then design, build, and demonstrate a robotic system that is used to answer this research question. An example may be a Jenga-playing robot, where students try a new computer vision algorithm, or test a theory on force control. This directly parallels graduate research in robotics, where systems-building is necessary, and toy problems can illustrate research results, but the important focus is a core research question. The specific competition task changes each year, and robots will compete at the end of the term. Lec/lab.
Equivalent to: ENGR 521

ROB 534, SEQUENTIAL DECISION MAKING IN ROBOTICS, 4 Credits
Examines sequential decision making in robotics with a focus on motion planning and related optimization problems applied to fielded systems in marine, aerial, and ground domains. Discussions regarding both fundamental background material as well as cutting edge research in the following areas: discrete planning, sampling-based planning, planning under uncertainty, multi-robot systems, optimization, and performance guarantees.

ROB 537, LEARNING-BASED CONTROL, 4 Credits
Provides an introduction to learning systems and their application to the control of nonlinear systems. Covered topics include neural networks, reinforcement learning, and evolutionary algorithms. Includes project component in which students write a technical paper and give a conference style presentation based on their project.
Equivalent to: ME 537

ROB 538, MULTIAGENT SYSTEMS, 4 Credits
Provides an introduction to multiagent systems. In particular, it focuses on how to coordinate agents using different approaches. Covered topics include multiagent learning, game theory, swarms, social choice, and auctions. Includes significant reading and critiquing of assigned papers.
Equivalent to: ME 538

ROB 541, GEOMETRIC MECHANICS, 4 Credits
An introduction to geometric methods in the analysis of dynamic systems. Using the kinematics of simple robotic systems as a motivating example, we explore topics such as manifolds and Lie groups, representations of velocity, holonomic and nonholonomic constraints, constraint curvature and response to cyclic inputs, distance metrics.
Recommended: Prior exposure to linear algebra and differential equations

ROB 542, ACTUATOR DYNAMICS, 4 Credits
Focuses on how inertia, spring compliance, and other passive dynamics affect highly dynamic, software-controlled systems. Examples include robotic manipulation tasks, robot-human interaction, CNC machines, or legged locomotion. Lec/lab.
Recommended: Prior courses on dynamics and control such as ME 531, ME 533, ME 535
ROB 545, ROBOTIC MANIPULATION, 4 Credits
Introduction to the mechanical processes governing manipulation with a focus on the kinematics, statics, and dynamics of interacting rigid bodies. Topics include numerical inverse kinematics, dynamics of open chains, and interaction control. Some manipulation problems considered include grasping, picking and placing, and assembly.

ROB 562, HUMAN CONTROL SYSTEMS, 4 Credits
Covers mechanisms of human motor systems and control of the neuromusculoskeletal anatomy followed by functional analysis of these system components. Then all the components are integrated to study feedback control dynamics. Covers classic to modern theories of motor control, adaptation, cognitive involvement, and rehabilitation techniques.
Equivalent to: ME 539
Recommended: Basic feedback control systems, linear algebra, differential equations

ROB 564, SOFT ROBOTICS, 4 Credits
Soft robotics researchers propose building intelligent machines purely out of stretchable compressible soft materials. The course is centered on term-long projects that will result in real soft robots with the goal of presenting to the international community. The topics covered include rapid digital manufacturing, soft actuators, soft sensors, soft logic, soft energy, applications of soft robotics, and modeling soft mechanics.

ROB 567, HUMAN ROBOT INTERACTION, 4 Credits
The field of human-robot interaction brings together research and application of methodology from robotics, human factors, human-computer interaction, interaction design, cognitive psychology, education and other fields to enable robots to have more natural and more rewarding interactions with humans throughout their spheres of functioning.
Recommended: Background in one of human factors, usability/hci, programming experience, design

ROB 568, SOCIAL ROBOTICS, 4 Credits
In-depth exploration of the leading research, design principles, and challenges in Human-Robot Interaction (HRI), with an emphasis on socially interactive robots. Topics include social embodiment, multi-modal communication, human-robot teamwork, social learning, aspects of social psychology and cognition, as well as applications and evaluation with human subjects. Requires participation, lightning talks, student-led lectures, written critiques of class readings, and a group project involving a hypothetical social robotics project.

ROB 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 32 credits.

ROB 601, RESEARCH, 1-16 Credits
Graded P/N.
This course is repeatable for 99 credits.

ROB 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

ROB 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

Science of Engineering (ESC)
ESC 111, INTRODUCTION TO ENGINEERING, 3 Credits
Describes different fields of engineering; Performs calculations and synthesizes results; Develops critical thinking skills and apply to engineering problems; Applies engineering specific technical and soft skills.
Equivalent to: MIME 101

ESC 340, INTRO TO EXPERIMENTATION, 4 Credits
Theory and application of instrumentation and measurement techniques are covered. Course topics include fundamentals of sampling theory, error and uncertainty analysis, signal conditioning, sensor fundamentals, and data analysis. Laboratory exercises provide experience utilizing data acquisition hardware and software, as well as a variety of sensors for measuring parameters from mechanical and electrical engineering systems.
Prerequisite: CS 162 with C or better and ENGR 202 [C] and PH 213 [C] and ST 314 [C]

ESC 350, ENGINEERING MATERIALS, 4 Credits
An introduction to materials and their structures and properties. The physical and chemical phenomena responsible for the electrical, mechanical, and thermal behavior of solids will be studied.
Prerequisite: PH 213 with C or better and CH 232 [C]

ESC 401, RESEARCH, 1-16 Credits
Equivalent to: ESE 401
This course is repeatable for 4 credits.

ESC 497, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESC 497/ESE 497. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (ENGR 390 with C or better or BA 360 with C or better) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331 [C] or ME 331H [C]) and ESE 355 [C] and ESE 360 [C] and (ST 314 [C] or ST 314H [C]) and WR 327 [C]
Equivalent to: ESE 497, MIME 497
ESC 498, ^MIME CAPSTONE DESIGN, 4 Credits
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: ESE 497 with C or better or IE 497 with C or better or ME 497 with C or better or MIME 497 with C or better
Equivalent to: ESE 498, IE 498, ME 498
ESC 499, SPECIAL TOPICS, 4 Credits
This course is repeatable for 16 credits.

Aerospace Engineering Minor
A minor in Aerospace Engineering (AAE) provides opportunities for students to take technical engineering courses relevant to aviation and astronautics fields, and to gain the experiential knowledge that industry seeks, through lab and senior capstone design courses. Advances in aerospace technologies in the aviation field make air travel safer and less expensive while leaving a smaller carbon footprint. Within astronautics, the most advanced launch vehicles send communication and space, earth and solar-science satellites, and manned spacecraft, into orbit. The AAE minor is a unique, transcript-visible opportunity for engineering students to prepare for a career in the aviation and astronautics industry.

Energy Systems Engineering Undergraduate Major (BS, HBS)
Available only at OSU-Cascades.

At Oregon State University, the Energy Systems Engineering degree program combines engineering fundamentals with energy-focused technical courses and business management classes. This multidisciplinary curriculum provides students with a strong foundation in the core principles of mechanical, electrical and industrial engineering.

Program Educational Objectives—Energy Systems Engineering
Note: The Bachelor of Science and Honors Bachelor of Science degrees in Energy Systems Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org, which requires stated program educational objectives and student outcomes to support these.

OSU Energy Systems Engineering graduates receive an innovative education, and within 3 to 5 years of graduation will have:

1. Created value to organizations through the analysis, evaluation, and improvement of engineered systems and processes using appropriate systems engineering methods and tools.
2. Communicated effectively across disciplines and cultures to manage and/or lead activities in support of organizational goals and objectives.
3. Innovated systems and processes, in response to organizational challenges, though the application of structured and unstructured systems engineering methodologies, including engineering design and problem-solving.

Major Code: 293

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

This program focuses on the application of engineering principles to the planning and operational management of industrial and manufacturing operations, and prepares individuals to plan and manage such operations. It includes instruction in accounting, engineering economy, financial management, industrial and human resources management, industrial psychology, management information systems, mathematical modeling and optimization, quality control, operations research, safety and health issues, and environmental program management.

**Certificate Code: CG22**

**Industrial Engineering Graduate Major (MENG, MS, PhD)**

This major offers the following option(s):
- Advanced Manufacturing (p. 713)
- Engineering Management (p. 713)
- Human Systems Engineering (p. 713)
- Information Systems Engineering (p. 713)
- Manufacturing Systems Engineering (p. 714)

Also available via Ecampus.

Industrial engineering is the application of science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are so large and complex, industrial engineers (IEs) must develop expertise in a wide variety of disciplines, the ability to work well with people, and a broad, systems perspective. All IE graduate students learn advanced methods of system integration and operation. As practitioners, MEng and MS graduates analyze and design facilities, material handling systems, manufacturing processes, information systems, and workstations. They also develop, apply, and oversee policies, procedures, and algorithms for production planning, inventory control, resource allocation and scheduling, quality assurance, and supply chain management. As researchers, MS and PhD graduates advance the field of industrial and manufacturing engineering by their work in industrial corporations and government agencies. As educators, PhD graduates teach and perform research in industrial and manufacturing engineering in universities around the world.

**Major Code: 293**

**Engineering Management Graduate Certificate**

Available only via Ecampus.

This program focuses on the application of engineering principles to the planning and operational management of industrial and manufacturing operations, and prepares individuals to plan and manage such operations. It includes instruction in accounting, engineering economy, financial management, industrial and human resources management, industrial psychology, management information systems, mathematical modeling and optimization, quality control, operations research, safety and health issues, and environmental program management.

Advanced Manufacturing Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 712)
- Mechanical Engineering - College of Engineering (p. 721)

The Advanced Manufacturing graduate option is offered under both the Industrial Engineering and Mechanical Engineering majors. Advanced Manufacturing (AM) focuses on the integration of nanomaterial synthesis and microfabrication techniques and conventional macroscale manufacturing technologies to produce nano- and microscale systems in an economically, environmentally, and socially sustainable manner.

Option Code: 3191

A minimum of 12 credits from the following set of specific courses will be required of students wishing to declare the IE Advanced Manufacturing (AM) graduate option.

Engineering Management Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 712)
- Mechanical Engineering - College of Engineering (p. 721)

Also available via Ecampus.

The graduate option in Engineering Management at Oregon State University is designed for engineers who are conversant in the language and methods of engineering and technology who are motivated to become managers and leaders. The curriculum will equip engineers with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

This option is shared with the Mechanical Engineering graduate major.

Human Systems Engineering Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 712)

This graduate option within the Industrial Engineering major distinguishes an area of specialization, human systems engineering, within the broader discipline of industrial engineering. Human Systems Engineering (HSE) uses engineering methods and knowledge from the physical, biological, information, social, and management sciences to develop, implement, operate, evaluate, and improve human-machine, human-human, and human-organization systems. Topical areas include management systems engineering and human factors and ergonomics.

Information Systems Engineering Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 712)

This graduate option within the Industrial Engineering major distinguishes an area of specialization, information systems engineering, within the broader discipline of industrial engineering. Information Systems Engineering (ISE) uses information systems to integrate organizational mechanisms, people, and processes for purposes of improving organizational performance. Typical ISE technologies include database management systems, networks, wireless
communications, Web-enabled technologies, and automatic identification and data collection using bar codes, RFID, EDI, and other such devices.

Option Code: 3193

Manufacturing Engineering Undergraduate Major (BS, HBS)

The Bachelor of Science and Honors Bachelor of Science degrees in Manufacturing Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

The curriculum in Manufacturing Engineering supports a range of career paths in the areas of manufacturing process development, manufacturing systems analysis, and new product development, among others. The degree prepares students for industry, graduate study, or other career paths, specializing or broadening further their knowledge and skills.

Program Educational Objectives—Manufacturing Engineering

Note: The Bachelor of Science and Honors Bachelor of Science degrees in Manufacturing Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org, which requires stated program educational objectives and student outcomes to support these.

OSU Manufacturing Engineering graduates receive an innovative education, and within 3 to 5 years of graduation will have:

1. Created value to organizations through the analysis, evaluation, and improvement of engineered systems and processes using appropriate manufacturing engineering methods and tools.

2. Communicated effectively across disciplines and cultures to manage and/or lead activities in support of organizational goals and objectives.

3. Innovated systems and processes, in response to organizational challenges, though the application of structured and unstructured manufacturing engineering methodologies, including engineering design and problem solving.

Major Code: 317

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.
- Design products and the equipment, tooling, and environment necessary for their manufacture.
- Create competitive advantage through manufacturing planning, strategy, quality, and control.
• Analyze, synthesize, and control manufacturing operations using statistical methods.
• Measure manufacturing process variables and develop technical inferences about the process.

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
1 Prerequisite for several upper-division courses
Manufacturing Systems Option

This option is offered within the following major(s):

- Manufacturing Engineering - College of Engineering (p. 716)

This option, taken in conjunction with the BS in Manufacturing Engineering, will prepare students for careers in manufacturing industry that focus on production system design, analysis, and improvement.

Option Code: 957

### Code | Title | Credits
--- | --- | ---
ENGR 390 | ENGINEERING ECONOMY | 3
IE 112 | SPREADSHEET SKILLS FOR INDUSTRIAL & MANUFACTURING ENGINEERS | 1
IE 212 | COMPUTATIONAL METHODS FOR INDUSTRIAL ENGINEERING | 4
IE 285/MFGE 285 | INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING | 3
IE 355 | STATISTICAL QUALITY CONTROL | 4
IE 356 | EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES | 4
IE 366 | WORK SYSTEMS ENGINEERING | 4
IE 367 | PRODUCTION PLANNING AND CONTROL | 4
IE 368 | FACILITY DESIGN AND OPERATIONS MANAGEMENT | 4
Restricted Electives
Select a minimum of 8 credits from the following:
CHE 445 | POLYMER ENGINEERING AND SCIENCE | 4

Option Code: 833

**Product Development Option**

This option is offered within the following major(s):

- Manufacturing Engineering - College of Engineering (p. 716)

This option, taken in conjunction with the BS in Manufacturing Engineering, will prepare students for careers in manufacturing industry that focus on the development of new products and equipment.

### Code | Title | Credits
--- | --- | ---
ENGR 202 | ELECTRICAL FUNDAMENTALS II | 3
ENGR 391 | ENGINEERING ECONOMICS AND PROJECT MANAGEMENT | 3
MATS 322/ENGR 322 | MECHANICAL PROPERTIES OF MATERIALS | 3
ME 312/NSE 312 | THERMODYNAMICS | 4
ME 316 | MECHANICS OF MATERIALS | 3
ME 317 | INTERMEDIATE DYNAMICS | 4
ME 331 | INTRODUCTORY FLUID MECHANICS | 4
ME 332/NSE 332 | HEAT TRANSFER | 4
ME 373 | MECHANICAL ENGINEERING METHODS | 4
ME 383 | MECHANICAL COMPONENT DESIGN | 4
Restricted Electives
Select four credits from the following courses:
CHE 445 | POLYMER ENGINEERING AND SCIENCE | 4
ECE 418 | SEMICONDUCTOR PROCESSING | 4
IE 355 | STATISTICAL QUALITY CONTROL | 4
IE 356 | EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES | 4
IE 366 | WORK SYSTEMS ENGINEERING | 4
IE 367 | PRODUCTION PLANNING AND CONTROL | 4
IE 368 | FACILITY DESIGN AND OPERATIONS MANAGEMENT | 4
IE 411 | VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS | 4
IE 412 | INFORMATION SYSTEMS ENGINEERING | 4
IE 415 | SIMULATION AND DECISION SUPPORT SYSTEMS | 4
IE 418 | TELECOMMUNICATION CONCEPTS | 4
Materials Science Graduate Major (MS, PhD)

The discipline of materials science is inherently interdisciplinary, involving fundamental aspects of chemistry, physics, biology, geoscience, agriculture, mathematics.

Reflecting this characteristic, the Materials Science Program at Oregon State University, initiated in the 1980s, involves over 60 tenured and tenure-track faculty members spanning the OSU Colleges of Engineering, Science and Forestry. This allows students to earn MS and PhD degrees in Materials Science in many different areas of concentration, including all classes of materials over a wide spectrum of materials behavior. The coursework requirements are extremely flexible to allow students to tailor their program of study to directly support their research activities.

For more information, visit the website (http://matsci.oregonstate.edu/), or contact the Materials Science Graduate Program, School of Mechanical & Industrial Engineering, info-mime@oregonstate.edu, 541-737-3441.

Total Hours

108

1 At least one credit of ME 507 must be the section titled 'Materials Science Seminar'

2 XXX represents the subject area that corresponds to the major professor’s academic area (eg. ME 503 for MS or ME 603 for PhD)

Major Code: 3200

Materials Science Graduate Minor

The discipline of materials science is inherently interdisciplinary, involving fundamental aspects of chemistry, physics, biology, geoscience, agricultural science, mathematics, and engineering.

Reflecting this characteristic, the Materials Science Program at Oregon State University, initiated in the 1980s, is distributed over nine departments spanning three OSU colleges. This allows students to earn
MS and PhD degrees in Materials Science in many different areas of concentration, including all classes of materials, and in a wide range of materials behavior. The course work requirements are extremely flexible to allow students to tailor their program of study to directly support their research activities.

For more information, visit the website (http://matsci.oregonstate.edu/) or contact the Materials Science Graduate Program, School of Mechanical & Industrial Engineering, info-mime@oregonstate.edu, 541-737-3441.

Minor Code: 3200

Materials Science Minor

Materials Science is a unique blend of disciplines spanning engineering, science, and forestry at OSU.

The Materials Science minor is aimed at students with a wide range of materials-related interests including composites, ceramics, polymers, metallurgy, electronic materials and devices, solid-state chemistry, and solid-state physics.

Minor Code: 764

Mechanical Engineering Graduate Major (MENG, MS, PhD)

This major offers the following option(s):

- Advanced Manufacturing (p. 721)
- Design (p. 721)
- Engineering Management (p. 722)
- Materials Mechanics (p. 722)
- Renewable Energy (p. 722)
- Thermal Fluid Sciences (p. 722)

The School of Mechanical, Industrial, and Manufacturing Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. Master's degree candidates may pursue thesis or nonthesis options; students in the nonthesis option must complete additional course work where an individual project may be included.

The mechanical engineering field is diverse, therefore, research activities in the school encompass a broad range of technical endeavors. Areas of research include applied mechanics, solid mechanics, biomechanics, dynamics, stress analysis, design, systems and control, energy, applied thermodynamics, heat transfer, fluid mechanics, metallurgy, and materials science.

In addition, research activities have been directed toward areas of current interest and need, including wind energy, microscale energy conversion, combustion, composite materials, superconductors, advanced materials, impact dynamics, mechatronics, microscale fluid mechanics, diagnostics in design, design for manufacture and computer-aided design and manufacturing, design and control of complex systems.

Major Code: 3210

Major Code: 3210

Advanced Manufacturing Graduate Option

This option is offered within the following major(s):  
- Industrial Engineering - College of Engineering (p. 712)
- Mechanical Engineering - College of Engineering (p. 721)

The Advanced Manufacturing graduate option is offered under both the Industrial Engineering and Mechanical Engineering majors. Advanced Manufacturing (AM) focuses on the integration of nanomaterial synthesis and microfabrication techniques and conventional macroscale manufacturing technologies to produce nano- and microscale systems in an economically, environmentally, and socially sustainable manner.

Option Code: 3191

Design Graduate Option

This option is offered within the following major(s):

- Mechanical Engineering - College of Engineering (p. 721)

Option Code: 3215

Dynamics and Controls Graduate Option

This option is offered within the following major(s):

- Mechanical Engineering - College of Engineering (p. 721)

OSU's Mechanical Engineering major offers graduate options in five areas. Dynamics and Controls (D&C) is one of those five areas.

The D&C option includes courses which prepare students to have graduate level mastery in the mechanical engineering principles of the analysis of the dynamics of mechanical systems and the design of control systems to regulate and modify these dynamics.

Option Code: 3226
### Renewable Energy Graduate Option

This option is offered within the following major(s):

- Mechanical Engineering - College of Engineering (p. 721)

This graduate option within the Mechanical Engineering graduate major distinguishes an area of interdisciplinary specialization, Renewable Energy (RE).

Renewable Energy is inherently interdisciplinary and thus is being proposed as an interdisciplinary option within ME which requires students to select 16 credits of ME courses from across all four ME primary graduate options and then choose from a set of courses which equip students to understand the underlying physical phenomena governing renewable energy technologies and be able to understand overarching themes in US energy policy pertaining to renewables.

Students wishing to declare the ME Renewable Energy (RE) graduate option must first fulfill core mechanical engineering requirements in one of two ways:

1. Declare an interdisciplinary option in mechanical engineering, or
2. Fulfill the requirements of one of the four ME Primary Options.

#### Engineering Management Graduate Option

This option is offered within the following major(s):

- Industrial Engineering - College of Engineering (p. 712)
- Mechanical Engineering - College of Engineering (p. 721)

Also available via Ecampus.

The graduate option in Engineering Management at Oregon State University is designed for engineers who are conversant in the language and methods of engineering and technology who are motivated to become managers and leaders. The curriculum will equip engineers with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

### Mechanical Engineering Graduate Minor

#### Minor Code: 3210

#### Mechanical Engineering Undergraduate Major (BS, HBS)

The Bachelor of Science and Honors Bachelor of Science degrees in Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

At Oregon State University, the mechanical engineering focal areas include design, mechanics materials, robotics & control, and thermal–fluid sciences.

**Program Educational Objectives—Mechanical Engineering**

**Note:** The Bachelor of Science and Honors Bachelor of Science degrees in Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org, which requires stated program educational objectives and student outcomes to support these.

OSU Mechanical Engineering graduates receive an innovative education, and within 3 to 5 years of graduation will have:

1. Created value to organizations through the analysis, evaluation, and improvement of engineered systems and processes using appropriate mechanical engineering methods and tools.
2. Communicated effectively across disciplines and cultures to manage and/or lead activities in support of organizational goals and objectives.
3. Innovated systems and processes, in response to organizational challenges, through the application of structured and unstructured mechanical engineering methodologies, including engineering design and problem solving.

#### Major Code: 321

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusion.

- Acquire and apply new knowledge as needed, using appropriate learning strategies.
- Apply principles of engineering, basic science, and mathematics (including multivariate calculus and differential equations).
- Model, analyze, design, and realize physical systems, components or processes.
- Prepare students to work professionally in either thermal or mechanical systems areas.

## Robotics Graduate Major (MENG, MS, PhD)

### Graduate Areas of Concentration

Assistive robots, autonomous robots, human-robot interaction, legged locomotion, manipulation, mobile robots, multi-robot coordination

The interdisciplinary robotics program offers Master of Engineering (MEng), Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Robotics.

MS degree candidates may pursue thesis or nonthesis options. A coursework-only MEng degree may only be pursued with special permission from a Robotics faculty member. The PhD program prepares students for careers in industry, research laboratories or universities. Students are encouraged to develop programs of study in close cooperation with the faculty members in their areas of interest.

The program includes core areas of robotics, including actuation, locomotion, manipulation, dynamics, control, sensing, artificial intelligence, and human/robot interactions.
Additional information concerning courses, advising procedures, faculty, and many other aspects of the program may be found in the programs’ website (https://engineering.oregonstate.edu/robotics/).

**Robotics Graduate Minor**

For additional information about the Robotics graduate minor, please visit the program website (http://robotics.oregonstate.edu/).

**Minor Code: 3255**

**School of Nuclear Science and Engineering**

The School of Nuclear Science and Engineering provides world-class education so students can become industry, academic, and policy leaders driving the future of nuclear science worldwide.

The School offers BS, MEng, MS, and PhD degrees in Nuclear Engineering as well as BS, MHP, MS, and PhD degrees in Radiation Health Physics. A premedical option is available for those seeking a BS in Radiation Health Physics.

World-class facilities are utilized as a part of students’ education to further gain an understanding on relevant nuclear engineering and radiation health physics subject matters. These facilities reside within the Radiation Center Building on the Oregon State University campus and comprise a 1 MWth TRIGA Reactor, the Advanced Thermal Hydraulic Laboratory, the Advanced Nuclear Science and Engineering Laboratory, Advanced Nuclear Instrumentation Development Laboratory, and a Radiological Research Laboratory. Instruction is integrated with an extensive research program and opportunities to participate at both the undergraduate and graduate levels.

The goals of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management.

Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, an emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

**Undergraduate Programs**

**Majors**

- Nuclear Engineering (p. 736)
- Radiation Health Physics (p. 739)

**Option:**

- Radiation Health Physics–Pre Med

**Minors**

- Nuclear Engineering (p. 735)
- Radiation Health Physics (p. 738)

**Graduate Programs**

**Majors**

- Medical Physics (p. 734)
- Nuclear Engineering (p. 734)
- Radiation Health Physics (p. 737)

**Minors**

- Nuclear Engineering (p. 735)
- Radiation Health Physics (p. 738)

**Faculty**

**Professors** Hamby, Higginbotham¹, Higley¹, Marcum, Meyer, T. Palmer, Paulenova, Woods, Wu

**Associate Professors** Farsoni, C. Palmer, Reese¹, Yang

**Assistant Professors** Briggs, Chen, Gutowksa, Mignot

**Instructors** Crilly, Keller, Kishore, Laub, Merz, Pillai, Ranjarb, Schickler, Tanyi, Zhang

**Emeriti** Binney¹,², Klein², Ringle, Reyes², Robinson²

1 Certified Health Physicist
2 Licensed Professional Engineer

**NSE 114, INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS I, 3 Credits**

Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.

**Equivalent to:** NE 114, RHP 114
NSW 115, INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS II, 3 Credits
Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
Equivalent to: NE 115, RHP 115

NS 233, MATHEMATICAL METHODS FOR NSE, 3 Credits
Development and application of analytical and numerical methods with applications to problems in the NE/RHP field. Major topics will include solution of ODEs and systems of ODEs, root finding techniques and numerical integration and differentiation. Major applications will include solution of the Bateman Equations and solution of the diffusion equation.
Prerequisite: MTH 256 with C or better or MTH 256H with C or better

NSW 234, NUCLEAR AND RADIATION PHYSICS I, 3 Credits
Relativistic dynamics; basic nuclear physics; basic quantum mechanics; radioactivity; electromagnetic waves; interaction of ionizing radiation with matter; cross sections; basic atomic structure.
Prerequisite: MTH 251 with C or better or MTH 251H with C or better
Equivalent to: NE 234, RHP 234

NSW 235, NUCLEAR AND RADIATION PHYSICS II, 3 Credits
Radioactivity; radioactive decay modes; decay kinetics, interaction of neutrons with matter; nuclear reactions; fission and fusion basics; cross sections.
Prerequisite: (NSE 234 with C or better or NE 234 with C or better or RHP 234 with C or better) and (MTH 252 [C] or MTH 252H [C])
Equivalent to: NE 235, RHP 235

NSW 236, NUCLEAR RADIATION DETECTION AND INSTRUMENTATION, 4 Credits
Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation; experimental investigation of interactions of radiation with matter. Lec/lab.
Prerequisite: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 236, RHP 236

UE 311, INTRODUCTION TO THERMAL-FLOW SCIENCES, 4 Credits
Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311/NSE 311.
Prerequisite: (ENGR 212 with C or better or ENGR 212H with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: ME 311, ME 311H, NE 311, NE 311H, NSE 311

NSW 312, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312, ME 312H, NE 312, NE 312H, NSE 312

NSW 312H, THERMODYNAMICS, 4 Credits
Analyzes exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312/NSE 312.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 312, ME 312, ME 312H, NE 312, NE 312H, NSE 312

NS 319, *SOCIETAL ASPECTS OF NUCLEAR TECHNOLOGY, 3 Credits
Description and discussion of nuclear-related issues as they impact society. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: NE 319

NS 331, INTRODUCTORY FLUID MECHANICS, 4 Credits
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/NSE 331.
Prerequisite: ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 331, ENGR 331H, ME 331, ME 331H, NE 331, NE 331H, NSE 331H
NSE 331H, INTRODUCTORY FLUID MECHANICS, 4 Credits
Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331/ NSE 331.
Attributes: HNRS – Honors Course Designator
Prerequisite: ENGR 311 with C or better or ENGR 311H with C or better or ME 311 with C or better or ME 311H with C or better or NSE 311 with C or better or NSE 311H with C or better or NE 311 with C or better or NE 311H with C or better
Equivalent to: ENGR 331, ENGR 331H, ME 331, ME 331H, NSE 331, NSE 331H

NSE 332, HEAT TRANSFER, 4 Credits
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.
Prerequisite: ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better
Equivalent to: ME 332, ME 332H, ME 332E, ME 332H, NSE 332

NSE 332H, HEAT TRANSFER, 4 Credits
Analyzes conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332/NSE 332.
Attributes: HNRS – Honors Course Designator
Prerequisite: ME 331 with C or better or ME 331H with C or better or NSE 331 with C or better or NSE 331H with C or better or NE 331 with C or better or NE 331H with C or better
Equivalent to: ME 332, ME 332H, ME 332E, ME 332H, NSE 332

NSE 401, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: NE 401
This course is repeatable for 99 credits.

NSE 403, THESIS/DISSERTATION, 1-16 Credits
Equivalent to: NE 403
This course is repeatable for 16 credits.

NSE 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: NE 405
This course is repeatable for 16 credits.

NSE 406, PROJECTS, 1-16 Credits
Equivalent to: NE 406
This course is repeatable for 16 credits.

NSE 407, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: RHP 407
This course is repeatable for 16 credits.

NSE 410, INTERNSHIP, 1-12 Credits
Supervised technical work experience at approved organizations. Graded P/N.
Equivalent to: RHP 410
This course is repeatable for 12 credits.

NSE 415, NUCLEAR RULES AND REGULATIONS, 2 Credits
An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
Prerequisite: NSE 236 with C or better
Equivalent to: NE 415, RHP 415
Recommended: NSE 481 or NE 481 or RHP 481

NSE 429, SELECTED TOPICS IN NUCLEAR ENGINEERING, 1-3 Credits
Topics associated with nuclear engineering not covered in other undergraduate courses; topics may vary from year to year.
Equivalent to: NE 429
This course is repeatable for 45 credits.

NSE 435, RADIATION SHIELDING AND EXTERNAL DOSIMETRY, 4 Credits
Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.
Prerequisite: (NSE 234 with C or better or NE 234 with C or better or RHP 234 with C or better) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C]) and (NSE 481 [C] or NE 481 [C] or RHP 481 [C])
Equivalent to: NE 435

NSE 440, NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT, 4 Credits
Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.
Prerequisite: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 440

NSE 450, PRINCIPLES OF NUCLEAR MEDICINE, 3 Credits
Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.
NSE 451, NEUTRONIC ANALYSIS I, 3 Credits
Physic models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory, numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.
Prerequisite: (MTH 256 with C or better or MTH 256H with C or better) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C]) and (NSE 333 [C] or NE 333 [C] or RHP 333 [C])
Equivalent to: NE 451

NSE 452, NEUTRONIC ANALYSIS II, 3 Credits
Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory, numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. Lec/lab.
Prerequisite: NSE 451 with C or better or NE 451 with C or better
Equivalent to: NE 452

NSE 455, REACTOR OPERATOR TRAINING I, 3 Credits
The Oregon State University TRIGA reactor Operator Training I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NSE 455/NSE 555 and NSE 456/NSE 556 classes taught during spring and summer terms. Students successfully completing the NSE 455/NSE 555 and NSE 456/NSE 556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisite: (NSE 236 with C or better or NE 236 with C or better or RHP 236 with C or better) and (MTH 256 [C] or MTH 256H [C])
Equivalent to: NE 455

NSE 456, REACTOR OPERATOR TRAINING II, 4 Credits
The Oregon State University TRIGA reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NSE 555. Students successfully completing NSE 455/NSE 555 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisite: NSE 455 with C or better or NE 455 with C or better
Equivalent to: NE 456

NSE 457, NUCLEAR REACTOR LABORATORY, 2 Credits
Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab.
Prerequisite: (NSE 451 with C or better or NE 451 with C or better or NSE 551 with C or better or NE 551 with C or better) and (NSE 452 [C] or NE 452 [C] or NSE 552 [C] or NE 552 [C])
Equivalent to: NE 457

NSE 467, NUCLEAR REACTOR THERMAL HYDRAULICS, 4 Credits
Hydrodynamics and conductive, convective and radiant heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes.
Prerequisite: ME 332 with C or better or ME 332H with C or better or NSE 332 with C or better or NSE 332H with C or better or NE 332 with C or better or NE 332H with C or better
Equivalent to: NE 467

NSE 473, NUCLEAR REACTOR SYSTEMS ANALYSIS, 3 Credits
Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs.
Prerequisite: NSE 452 with C or better or NE 452 with C or better
Equivalent to: NE 473

NSE 474, ^NUCLEAR SYSTEMS DESIGN I, 4 Credits
Part I of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: NSE 481 with C or better
Equivalent to: NE 474, RHP 474

NSE 475, ^NUCLEAR SYSTEMS DESIGN II, 4 Credits
Part II of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Prerequisite: (NSE 452 with C or better or NE 452 with C or better) and (NSE 474 [C] or NE 474 [C] or RHP 474 [C])
Equivalent to: RHP 475

NSE 481, RADIATION PROTECTION, 4 Credits
Fundamental principles and theory of radiation protection; regulatory agencies, dose units; source of radiation; biological effects and risk; dose limits; applications of external and internal dosimetry; shielding and atmospheric dispersion.
Prerequisite: NSE 235 with C or better or NE 235 with C or better or RHP 235 with C or better
Equivalent to: NE 481, RHP 481
NSE 483, RADIATION BIOLOGY, 3 Credits
Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.
Prerequisite: NSE 481 with C or better or RHP 481 with C or better or MP 481 with C or better
Equivalent to: MP 483

NSE 488, RADIOECOLOGY, 3 Credits
Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals.
Prerequisite: NSE 481 with C or better or RHP 481 with C or better or NE 481 with C or better
Equivalent to: NE 499
This course is repeatable for 16 credits.

NSE 501, RESEARCH, 1-16 Credits
Equivalent to: MP 501
This course is repeatable for 99 credits.
Available via Ecampus

NSE 503, THESIS, 1-16 Credits
Equivalent to: MP 503
This course is repeatable for 999 credits.
Available via Ecampus

NSE 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: MP 505
This course is repeatable for 16 credits.
Available via Ecampus

NSE 506, PROJECTS, 1-16 Credits
Equivalent to: MP 506
This course is repeatable for 16 credits.
Available via Ecampus

NSE 507, SEMINAR, 1 Credit
Graded P/N.
Equivalent to: MP 507
This course is repeatable for 16 credits.
Available via Ecampus

NSE 510, INTERNSHIP, 1-12 Credits
Supervised technical work experience at approved organizations. Graded P/N.
Equivalent to: MP 510
This course is repeatable for 16 credits.

NSE 515, NUCLEAR RULES AND REGULATIONS, 2 Credits
An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
Equivalent to: NE 515, RHP 515
Available via Ecampus

NSE 516, RADIOCHEMISTRY, 4 Credits
Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab.
CROSSLISTED as CH 516/NSE 516
Prerequisite: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C])
Equivalent to: CH 516, RHP 516
Available via Ecampus

NSE 517, RADIONUCLIDES IN LIFE SCIENCES, 4 Credits
Chemistry of actinides and fission products, radioseparations, selected medical generators, radiolabeling of organic molecules. Designed for majors in medical physics, radiation health physics, chemistry, pharmacy.
Prerequisite: (NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C])
Equivalent to: MP 517, RHP 517

NSE 519, RADIOCHEMICAL ANALYSIS, 4 Credits
Hands-on learning of radiochemistry, practical training with open radiation sources for preparation of irradiation targets, counting samples from contaminated soils or separation of medical radionuclides. Fundamentals of chemical dosimetry are also covered. Designed for a broad range of majors in chemistry, nuclear engineering, radiation health physics, radioecology, chemical and environmental engineering. Lec/lab. The lecture part of the course also is delivered online as video stream via Canvas.
Prerequisite: NSE 536 with C or better or NE 536 with C or better or RHP 536 with C or better
Equivalent to: NE 519, RHP 519
Recommended: NSE 516

NSE 521, RADIOLOGICAL ANATOMY AND PHYSIOLOGY, 4 Credits
Anatomy and physiology with correlating images for use by medical physicists, therapists, dosimetrists. This course adheres to the AAMD requirements for Cross Sectional Anatomy.
Equivalent to: MP 521, RHP 521

NSE 522, NUCLEAR SECURITY SCIENCE, 4 Credits
Explores the nuclear fuel cycle from the perspective of nuclear security and safeguards and in the context of current international nuclear policies. Nuclear threats are balanced with the past history of nuclear weapons use, current nonproliferation technology, and the future international growth of the nuclear industry. Critical thinking will be assessed by way of in-class discussions, journal article reviews, written analysis of fuel cycle signatures, and conducting research. Signatures including radiological and morphological characteristics of nuclear material is introduced as well as the techniques for the detection of special nuclear materials.
NSE 525, NUCLEAR SECURITY SYSTEM DESIGN, 3 Credits
Studies the science and engineering associated with the design, evaluation, and implementation of systems to secure nuclear and radiological materials. Topics include adversary characterization, target categorization and the consequences of failure to protect targets, detection and delay technologies, on-site and off-site response and response strategies, insider threat evaluation, and mathematical methods for evaluating risk due to the threat and the security system design. Students will become familiar with the components of a sustainable nuclear security program and their interconnections, and learn about the planning of nuclear security activities at both the state and facility level.

NSE 526, NUMERICAL METHODS FOR ENGINEERING ANALYSIS, 3 Credits
Equivalent to: ME 526, NE 526
Recommended: Programming experience and previous exposure to numerical methods

NSE 531, RADIOPHYSICS, 3 Credits
Expands understanding of concepts and applications of atomic and nuclear physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and the characteristics of fission.
Equivalent to: MP 531

NSE 533, DETECTION OF SPECIAL NUCLEAR MATERIALS, 3 Credits
Designed for students interested in radiation measurements and nuclear security, especially those considering PhD-level work in this area. Covers topics including special nuclear material characteristics, radiation background and it interferences with SNM, an introduction to MCNPX, a brief introduction to Geant4, detection of SNM via counting or imaging, localization of SNM, and characterization of SNM.
Prerequisite: NSE 536 with C or better
Recommended: MTH 251 or MTH 251H

NSE 534, APPLIED DETECTION FOR NUCLEAR SECURITY, 3 Credits
Applied detection techniques currently being deployed globally for nuclear security are presented in lectures and explored in practical exercises. A prominent feature of this class is the unique opportunity to complete the Nuclear Security Education Program (NSEP) Training program hosted at the HAMMER federal training center.
Prerequisite: NSE 536 with C or better

NSE 535, RADIATION SHIELDING AND EXTERNAL DOSIMETRY, 4 Credits
Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.
Equivalent to: MP 535, NE 535, RHP 535

NSE 536, ADVANCED RADIATION DETECTION AND MEASUREMENT, 4 Credits
Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab.
Prerequisite: NSE 531 with C or better or NE 531 with C or better or RHP 531 with C or better or MP 531 with C or better
Equivalent to: MP 536

NSE 537, DIGITAL RADIATION MEASUREMENT AND SPECTROSCOPY, 3 Credits
Principles of digital spectroscopy; application of digital filters in digital processing of detector pulses; hardware implementation of a typical digital spectrometer; introduction of Field-Programmable Gate Array (FPGA) devices; programming a digital spectrometer using Hardware Description Language (VHDL); simulation, synthesis and spectroscopy; experimental design tests and evaluation. Lec/lab.
Prerequisite: NSE 536 with C or better or NE 536 with C or better or RHP 536 with C or better
Equivalent to: NE 537

NSE 539, SELECTED TOPICS IN INTERACTION OF NUCLEAR RADIATION, 1-6 Credits
Topics associated with interactions of nuclear radiation not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 539

NSE 540, NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT, 4 Credits
Mineral, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.
Equivalent to: NE 540
Available via Ecampus

NSE 541, DIAGNOSTIC IMAGING PHYSICS I, 3 Credits
An introduction to the production and usage of ionizing radiation in medicine. The course will cover x-ray production, x-ray spectrum, characteristics and manipulation, and how x-rays are utilized to obtain anatomical information in diagnostics imaging. Imaging modalities to be covered in this course are general and portable planar radiography, mammography, and fluoroscopy (including interventional radiography).
Prerequisite: NSE 531 with C or better or MP 531 with C or better or RHP 531 with C or better
Equivalent to: MP 541
**NSE 542, DIAGNOSTIC IMAGING PHYSICS II, 3 Credits**

An introduction to Computed Tomography (CT) and Ultrasound (US) imaging, and their applications in medicine. The course will cover x-ray production, detection, and image processing as it relates specifically to CT, as well as general acoustic physics principles and how they are applied to US imaging. Additionally, clinical radiation protection and dosimetry in diagnostic imaging will be taught.

**Prerequisite:** NSE 531 with C or better or PP 531 with C or better or RHP 531 with C or better

**Equivalent to:** MP 542

**NSE 543, ADVANCED DIAGNOSTIC IMAGING PHYSICS, 3 Credits**

An introduction to the areas of health informatics and magnetic resonance imaging (MRI). The health informatics portion of the course will specifically cover picture archiving and communication systems (PACS), including DICOM standards, data transfer and storage, digital image displays, and clinical implementation of PACS systems. The MRI portion of the course will provide instruction on the physical principles behind nuclear magnetic response (NMR) and how these phenomenon are exploited in MRI. Advanced MRI techniques and applications, along with clinical testing requirements, will also be covered.

**Prerequisite:** NSE 531 with C or better or MP 531 with C or better or RHP 531 with C or better

**Equivalent to:** NE 551

**NSE 544, NUCLEAR MEDICINE IMAGING, 3 Credits**

An introduction to the uses of radionuclides in medical imaging. The theory and application of detectors and imaging systems in nuclear medicine including collimators, scintillation probes, cameras, SPECT, PET, and hybrid technologies (SPECT/CT, PET/CT, and PET/MRI) will be covered.

**Prerequisite:** (NSE 541 with C or better or MP 541 with C or better) and (NSE 531 [C] or RHP 531 [C])

**Equivalent to:** MP 544

**NSE 545, DIAGNOSTIC IMAGING PRACTICUM, 3 Credits**

Provides an introduction to the medical physicist’s role in a clinical department; an opportunity to integrate principles learned throughout the graduate program as they apply to diagnostic imaging physics. Observations of procedures in radiography, fluoroscopy, ED, OR, interventional radiology, CT, MRI, ultrasound, and nuclear medicine. Experience in regulatory testing of x-ray equipment; observations of testing of CT and other x-ray modalities. Graded P/N.

**Prerequisite:** (NSE 541 with C or better or MP 541 with C or better) and (NSE 531 [C] or MP 531 [C] or RHP 531 [C])

**Equivalent to:** MP 545

**NSE 549, SELECTED TOPICS IN NUCLEAR FUEL CYCLE ANALYSIS, 1-6 Credits**

Topics associated with the nuclear fuel cycle not covered in other graduate courses; topics may vary from year to year.

**Equivalent to:** NE 549

*This course is repeatable for 45 credits.*

**NSE 550, PRINCIPLES OF NUCLEAR MEDICINE, 3 Credits**

Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

**Equivalent to:** RHP 550

**NSE 551, NEUTRONIC ANALYSIS I, 3 Credits**

Physical models of neutron systems; nuclear physics; steady state and transient neutron system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.

**Equivalent to:** NE 551

**NSE 552, NEUTRONIC ANALYSIS II, 3 Credits**

Physical models of neutron systems; nuclear physics; steady state and transient neutron system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions.

**Prerequisite:** NSE 551 with C or better or NE 551 with C or better

**Equivalent to:** NE 552

**NSE 553, ADVANCED NUCLEAR REACTOR PHYSICS, 3 Credits**

Advanced analytic and numerical techniques for the prediction of the neutron population in nuclear reactor systems. Topic will include long characteristic neutron transport, collision probabilities, nodal methods, equivalence theory, and perturbation theory.

**Prerequisite:** (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C])

**Equivalent to:** NE 553

**Recommended:** Computer programming experience

**NSE 555, REACTOR OPERATOR TRAINING I, 3 Credits**

The Oregon State University TRIGA Reactor Operator I class is one of a two-course series. Student interested in participating in this course are expected to enroll in both the NSE 455/555 and NSE 456/556 classes taught during spring and summer terms. Students successfully completing the NSE 455/555 and NSE 456/556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.

**Equivalent to:** NE 555
NSE 556, REACTOR OPERATOR TRAINING II, 4 Credits
The Oregon State University TRIGA Reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NSE 555. Students successfully completing NSE 456/NSE 556 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
Prerequisite: NSE 555 with C or better or NE 555 with C or better
Equivalent to: NE 556

NSE 557, NUCLEAR REACTOR LABORATORY, 2 Credits
Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab.
Prerequisite: (NSE 551 with C or better or NE 550 with C or better) and (NSE 552 [C] or NE 552 [C])
Equivalent to: NE 557

NSE 559, SELECTED TOPICS IN NUCLEAR REACTOR ANALYSIS, 1-3 Credits
Topics associated with nuclear reactor theory not covered in other graduate courses; topics may vary from year to year.
Equivalent to: NE 559
This course is repeatable for 45 credits.

NSE 561, NUCLEAR REACTOR SYSTEMS LABORATORY, 3 Credits
Operational aspects of nuclear reactor systems; neutron and thermal-hydraulic characterization of nuclear reactors; examination of design basis accident prevention and mitigation; loss of coolant accidents; loss of flow accidents; station blackouts. Lec/lab.
Prerequisite: (NSE 553 with C or better or NE 553 with C or better) and (NSE 567 [C] or NE 567 [C])
Equivalent to: NE 561

NSE 562, RADIATION THERAPY, 3 Credits
The physics of radiation generation and delivery relevant to the field of clinical radiation oncology. Topics will include external beam radiation therapy; dosimetric calculations; high dose-rate and low dose-rate brachytherapy; electron beam dosimetry and treatment planning; special techniques in radiotherapy; and clinical radiation protection and quality assurance.
Prerequisite: NSE 531 with C or better or MP 531 with C or better or NE 531 with C or better or RHP 531 with C or better
Equivalent to: MP 562

NSE 563, APPLIED RADIATION THERAPY PHYSICS LABORATORY I, 3 Credits
The applied practice of therapeutic radiation physics for clinical radiation oncology. Topics will include current methodologies in treatment delivery and planning algorithms, best practices and protocols for quality assurance, special techniques in radiotherapy, and oncology.
Prerequisite: NSE 562 with C or better or MP 562 with C or better
Equivalent to: MP 563

NSE 564, APPLIED RADIATION THERAPY PHYSICS LABORATORY II, 3 Credits
Covers the applied practice of therapeutic radiation physics for clinical radiation oncology. Topics include current methodologies in SRS and ARC QA, treatment planning QA, adaptive radiotherapy, eye plaque brachytherapy and HDR brachytherapy.
Equivalent to: MP 564

NSE 565, APPLIED THERMAL HYDRAULICS, 3 Credits
Advanced topics in the computational modeling of the hydrodynamic and heat transfer phenomena of nuclear reactors. Steady-state and transient solutions of one-dimensional nuclear reactor thermal hydraulic models. Nuclear reactor behavior analysis during various accident scenarios.
Equivalent to: NE 565

NSE 566, NUCLEAR REACTOR THERMAL HYDRAULICS, 4 Credits
Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes.
Equivalent to: NE 567

NSE 568, NUCLEAR REACTOR SAFETY, 3 Credits
Focused on probability risk assessment and system reliability analysis techniques applied to nuclear reactor safety. Application of these methods will be performed specifically through examination of neutronics and thermal hydraulic transients, effectiveness of emergency systems, accident prevention and mitigation, and assessment of radioactive release to the environment.
Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 567 [C] or NE 567 [C])
Equivalent to: NE 568

NSE 569, SELECTED TOPICS IN NUCLEAR REACTOR ENGINEERING, 1-6 Credits
Advanced nuclear engineering design concepts, reactor systems analysis techniques and innovative nuclear engineering applications. Artificial intelligence and expert system applications to nuclear engineering problems. Topics may vary from year to year.
Equivalent to: NE 569
This course is repeatable for 30 credits.

NSE 573, NUCLEAR REACTOR SYSTEMS ANALYSIS, 3 Credits
Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs.
Prerequisite: NSE 552 with C or better or NE 552 with C or better
Equivalent to: NE 573
NSE 574, NUCLEAR SYSTEMS DESIGN I, 4 Credits
Part I of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills.
Equivalent to: RHP 574

NSE 575, NUCLEAR SYSTEMS DESIGN II, 4 Credits
Part II of a two-part series aimed at developing the student’s ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills.
Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C]) and (NSE 574 [C] or NE 574 [C])
Equivalent to: RHP 575

NSE 582, APPLIED RADIATION SAFETY, 4 Credits
Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce health hazards at each of the following stages: design, prevention, assessment, and post-incident. A history of key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab.
Equivalent to: MP 582
Available via Ecampus

NSE 583, RADIATION BIOLOGY, 3 Credits
Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.
Equivalent to: MP 583
Available via Ecampus

NSE 584, RADIATION BIOLOGY II, 3 Credits
Application of radiobiological models in radiation therapy. Some background in radiation biology is strongly recommended.
Equivalent to: MP 584, RHP 584
Available via Ecampus

NSE 588, RADIOECOLOGY, 3 Credits
Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals.
Equivalent to: RHP 588
Recommended: NSE 481 or RHP 481 or NE 481
Available via Ecampus

NSE 590, INTERNAL DOSIMETRY, 3 Credits
Further development and more in-depth treatment of internal dosimetry concepts, theoretical basis of energy deposition, biokinetics, and estimation of radiation risk from ingested, inhaled, or injected radionuclides.
Prerequisite: NSE 531 with C or better and NSE 535 [C]
Equivalent to: NE 590, RHP 590
Available via Ecampus

NSE 599, SPECIAL TOPICS, 0-16 Credits
Equivalent to: MP 599
This course is repeatable for 16 credits.

NSE 601, RESEARCH, 1-16 Credits
Graded P/N.
Equivalent to: MP 601
This course is repeatable for 99 credits.

NSE 603, THESIS, 1-16 Credits
Equivalent to: MP 603
This course is repeatable for 99 credits.

NSE 605, READING AND CONFERENCE, 1-16 Credits
Graded P/N.
Equivalent to: MP 607
This course is repeatable for 16 credits.

NSE 606, PROJECTS, 1-16 Credits
Equivalent to: MP 606
This course is repeatable for 16 credits.

NSE 607, SEMINAR, 1-16 Credits
Graded P/N.
Equivalent to: MP 607
This course is repeatable for 16 credits.

NSE 610, INTERNSHIP, 1-16 Credits
Equivalent to: MP 610
This course is repeatable for 16 credits.

NSE 654, COMPUTATIONAL PARTICLE TRANSPORT, 3 Credits
Properties of and methods for solution of the linear Boltzmann equation for nuclear reactors; spherical and double-spherical harmonics; integral equation methods; Monte Carlo methods.
Prerequisite: (NSE 551 with C or better or NE 551 with C or better) and (NSE 552 [C] or NE 552 [C])
Equivalent to: NE 654
**NSE 667, ADVANCED THERMAL HYDRAULICS, 3 Credits**

Advanced topics in single- and two-phase hydrodynamics and heat transfer for nuclear reactors. Two-phase flow patterns, flow instabilities, condensation induced transients, convective boiling heat transfer, and current topics in reactor safety thermal hydraulics. Offered alternate years.

**Prerequisite:** NSE 567 with C or better or NE 567 with C or better

**NSE 699, SPECIAL TOPICS, 0-16 Credits**

Equivalent to: NE 699

This course is repeatable for 16 credits.

**NSE 808, WORKSHOP, 1-4 Credits**

Equivalent to: NE 808

This course is repeatable for 16 credits.

---

**Medical Physics Graduate Major (MMP, MS, PhD)**

**Graduate Areas of Concentration**

*Medical health physics, therapeutic radiologic physics*

Medical physics examines and applies numerous aspects of nuclear science to medicine. Graduates can move to clinical residencies or research jobs which apply physics to medicine in imaging and radiation therapy.

For more information, please contact:

**Dr. Krystina Tack, PhD, DABR**

Director
100 Radiation Center
Oregon State University
Corvallis, OR 97331-5902
541-737-2343
541-737-0480 (fax)
tackk@ohsu.edu

**Major Code:** 3770

The programs consist of a minimum of 45 credits, 39 of which must be didactic. The following courses are required and the remaining credits can be compiled of any 500- or 600-level course taught in the department or from outside the department if approved by an advisor. A comprehensive oral exam must be passed to complete the degree. MS students, in addition to the exam, must present their work to a committee of graduate faculty.

**Major Code:** 3770

---

**Nuclear Engineering Graduate Major (MENG, MS, PhD)**

**Graduate Areas of Concentration**

*Application of nuclear techniques, arms control technology, nuclear instrumentation and applications, nuclear medicine, nuclear power generation, nuclear reactor engineering, nuclear systems design and modeling, nuclear waste management, numerical methods for reactor analysis, radiation shielding, radioisotope production, space nuclear power, thermal hydraulics*

The School of Nuclear Science and Engineering offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering.

The Nuclear Engineering graduate degree is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. Nuclear engineering professions are essential to society’s well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. We are one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering Nuclear Engineering and Radiation Health Physics at OSU.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, contact the School of Nuclear Science & Engineering, NSE.Office@oregonstate.edu, 541-737-2343.

**Thesis**
The Nuclear Engineering Graduate Minor

The School of Nuclear Science and Engineering offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering.

The Nuclear Engineering graduate degree is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. Nuclear engineering professions are essential to society’s well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. We are one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering Nuclear Engineering and Radiation Health Physics at OSU.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, contact the School of Nuclear Science & Engineering, NSE.Office@oregonstate.edu, 541-737-2343.

Major Code: 3270

The Nuclear Engineering program is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. The Nuclear Engineering program is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. Nuclear engineering professions are essential to society’s well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

This undergraduate curricula is designed for students with professional interests in the field of nuclear engineering and technology. This specialized field involves an integrated study of the physical aspects
of ionizing and nonionizing radiation, nuclear power and alternative technology development and application, through theoretical and methodologic development.

Competitive scholarships are available to incoming undergraduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of scholarship programs each year.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the Advanced Nuclear Systems Engineering Laboratory, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

Minor Code: 327

Students not majoring in nuclear engineering or radiation health physics may earn a Nuclear Engineering minor, which consists of the following courses:

Nuclear Engineering Undergraduate Major (BS, HBS)

The Bachelor of Science and Honors Bachelor of Science degrees in Nuclear Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

The goals of the nuclear engineering curriculum are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply engineering principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management.

Program Educational Objectives – Nuclear Engineering

The OSU Nuclear Engineering Program effectively prepares students for careers and professional accomplishments in the nuclear engineering industry through its established Program Educational Objectives.

The Program Educational Objectives for the Nuclear Engineering Program may be found at the following link (https://ne.oregonstate.edu/accreditation/).

Major Code: 327

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.
- Apply knowledge of atomic and nuclear physics to nuclear and radiological systems and processes.
- Apply knowledge of transport and interaction of radiation with matter to nuclear and radiation processes.
- Measure nuclear and radiation processes.
- Work professionally in one or more of the nuclear or radiological fields of specialization.

The Radiation Health Physics program is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. The Radiation Health Physics profession is essential to society’s well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

This graduate curricula and research programs are designed for students with professional interests in the field of radiation protection. This specialized field involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to protect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive materials.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. Oregon State University is one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering nuclear engineering and radiation health physics at OSU. Research and teaching assistant opportunities are also available for students to support the educational and research programs conducted by the department.

World-class facilities are available for the instructional and research programs of the school. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, contact the School of Nuclear Science & Engineering, NSE.Office@oregonstate.edu, 541-737-2343.

### Radiation Health Physics Graduate Major (MHP, MS, PhD)

#### Graduate Areas of Concentration

Application of nuclear techniques, boron neutron capture therapy, emergency response planning, environmental monitoring, environmental pathways assessment, nuclear medicine, radiation detection and instrumentation, radiation dosimetry, radiation shielding, radioactive material transport, radioactive waste management, research reactor health physics, risk assessment

Also available via Ecampus.

The School of Nuclear Science and Engineering offers graduate work leading toward the Master of Health Physics, Master of Science, and Doctor of Philosophy degrees in Radiation Health Physics.

The Radiation Health Physics program is designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. Radiation Health Physics

Undergraduate Major (BS, HBS)

The Bachelor of Science and Honors Bachelor of Science degrees in Radiation Health Physics are accredited by the Applied and Natural Science Accreditation Commission (ANSAC) of ABET, http://www.ABET.org (http://www.abet.org/).

The goals of the radiation health physics curriculum are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials.

Program Educational Objectives – Radiation Health Physics

The OSU Radiation Health Physics Program effectively prepares students for careers and professional accomplishments in the radiation health physics industry through its established Program Educational Objectives.

The Program Educational Objectives for the Radiation Health Physics Program may be found at the following link (https://ne.oregonstate.edu/accreditation/).

Major Code: 326

- Identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
- Formulate or design a system, process, procedure or program to meet desired needs.
- Develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
- Communicate effectively with a range of audiences.
- Understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.
- Function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.
- Apply knowledge of atomic and nuclear physics to nuclear and radiological systems and processes.
- Apply knowledge of transport and interaction of radiation with matter to nuclear and radiation processes.
- Measure nuclear and radiation processes.
- Apply knowledge of ionizing radiation risk in terms of decision-making and policy.

The College of Forestry

Ranked as one of the premier forestry and natural resources schools in the world, the College of Forestry at Oregon State University provides graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them. Our students learn to work with nature to keep land healthy for future generations; to know the science, technology, and business associated with managing and using forests; and to work effectively with others in a culturally diverse, global society.

George W. Peavy Forest Science Center
Oregon State University
Corvallis, OR 97331-5704

Anthony Davis, Executive Associate Dean, 541-737-5097, anthony.davis@oregonstate.edu
Jim Johnson, Senior Associate Dean for Outreach and Engagement, 541-737-8954, jim.johnson@oregonstate.edu
Katy Kavanagh, Associate Dean for Research, 541-737-8954, kathy.kavanagh@oregonstate.edu@oregonstate.edu (jim.johnson@oregonstate.edu)
Randall S. Rosenberger, Associate Dean for Student Success, 541-737-4425, r.r.rosenberger@oregonstate.edu
Nicole Kent, Head Advisor, 541-737-1592, nicole.kent@oregonstate.edu

College of Forestry (CoF)

The OSU College of Forestry has educated students for over 100 years. We offer undergraduate and graduate degrees that prepare students for a variety of careers in the public and private sectors. Our programs feature world-class faculty and modern facilities. We provide remarkable access to local forests, private industries, government agencies, international travel, and research through paid internships and mentored work experiences. Our students graduate with the necessary knowledge and skills for fulfilling careers.

Degrees and Accreditations

Bachelor of Science (BS) and Honors Bachelor of Science (HBS) Degrees and (campus offered):
- Forestry (Corvallis)
- Forest Engineering (Corvallis)
- Forest/Civil Engineering Double Degree (Corvallis)
- Natural Resources (Corvallis, Cascades, Ecampus)

- Renewable Materials (Corvallis)
- Tourism, Recreation & Adventure Leadership (Corvallis, Cascades)

BS degrees in Forestry, Forest Engineering, and Forest-Civil Engineering are accredited by the Society of American Foresters (SAF). In addition, the BS degree in Forest Engineering and the BS double degree in Forest-Civil Engineering are accredited by the Engineering Accreditation Commission of ABET (https://www.abet.org/). The BS degree in Renewable Materials is accredited by the Society of Wood Science and Technology (SWST).

Graduate Degrees including Master of Forestry (MF), Masters of Natural Resources (MNR), Master of Science (MS), and Doctor of Philosophy (Ph.D.):
- Forest Ecosystems & Society (MF, MS, Ph.D.) Corvallis campus
- Natural Resources (MNR) Ecampus
- Sustainable Forest Management (MF, MS, Ph.D.) Corvallis campus
- Wood Science & Engineering (MS, Ph.D.) Corvallis campus

Master of Arts in Interdisciplinary Studies (MAIS) is available in each department.

Graduate Certificates:
- Forests & Climate Change (Ecampus)
- Sustainable Natural Resources (Ecampus)
- Urban Forestry (Ecampus)

Undergraduate Minors:
- Forestry (Corvallis)
- Natural Resources (Corvallis, Cascades, Ecampus)
- Renewable Materials (Corvallis)
- Tourism, Recreation & Adventure Leadership (Cascades)

Double Degrees

Undergraduates with majors in the College of Forestry also can earn secondary degrees in education, innovation management, or sustainability. See the College of Education, College of Business, or College of Agricultural Sciences sections of this catalog for more information.

High School Preparation

Students planning to study at Oregon State University should include the following subjects in their high school programs: English, 4 years; mathematics, 3 years; science, 3 years (to include at least one year each of two different sciences—biology, chemistry, physics, etc.); social studies, 3 years; and foreign language, 2 years.

Transfer Students

Because of the technical and professional nature of the college’s curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college’s curricular requirements. In general, equivalent college-level courses successfully completed at a regionally accredited college or university are accepted.

Advising

The College of Forestry is committed to helping students succeed. Students are required to meet with an advisor each term. Advisors are valuable sources of information about degree programs, mentoring, and other special opportunities in line with students’ interests. The Student Services team is available to help with university rules and
regulations, job placement, exchange programs, and referrals to cross-campus programs and services. Students are encouraged to take an active role in their program planning, and to use their time at OSU to develop themselves both academically and professionally.

The college and the OSU Career Development Center provide up-to-date information for both seasonal and permanent work and offer a full array of career services to prepare undergraduates and graduates for jobs.

Education Facilities
The George W. Peavy Forest Science Center and Richardson Hall contain modern classrooms, laboratories, computing, and study facilities. The FERN Center offers students access to educational materials, computers, and group study space. The A.A. “Red” Emmerson Advanced Wood Products Laboratory features 15,000 square-feet of structural testing space and a 2,500 square-foot advanced wood products manufacturing area.

Classes use the nearby college forests for field instruction and research projects. In addition to the 11,500 acres in the McDonald-Dunn Forests, the college manages other forests in Oregon for education and research.

Students benefit from the college’s relationships with public and private programs and facilities. Field trips to forests, wood processing, and manufacturing operations, recreation facilities, and research sites enable students to observe contemporary problems and practices.

Corvallis is one of the largest forestry and wood science research centers in the world. An innovative research program is conducted by the college through its Forest Research Laboratory and by the campus-based Forest Sciences Laboratory of the U.S. Forest Service. These organizations offer state-of-the-art facilities for educational and employment opportunities for students.

The Forest Products Collection contains approximately 2,500 species of wood, primarily from North and South America, Southeast Asia, and Africa, while the grounds around the college are planted with an extensive collection of Pacific Northwest trees and shrubs.

Student Activities
Students participate in social and academic activities related to forestry and natural resources, forest products, sports logging, and more. Clubs and student chapters of several professional societies are active in the college, as well as Xi Sigma Pi, a national honor society. These clubs offer students the chance to develop friendships, leadership and team-building skills. Students may also gain academic and professional experience abroad through the college’s Office of International Programs.

Scholarships
The College of Forestry offers over $500,000 in undergraduate scholarships annually. Many scholarships are merit based, and awards range from between $1,000 and $10,000 per year. Online applications (http://studentservices.forestry.oregonstate.edu/sre/scholarships/) are available in late fall, and are due February 15 of each year.

Graduate students are commonly supported with teaching and research assistantships, as well as fellowships with awards totaling over $300,000 per year. More information is available on the College of Forestry website (http://www.forestry.oregonstate.edu/graduate-programs/funding/).

Scholarships and fellowships are awarded each spring for the following academic year.

Academic Requirements
To earn a bachelor of science degree, a student must complete at least 180 quarter credits of university-level courses for the Forestry; Natural Resources; Renewable Materials; and Tourism, Recreation, and Adventure Leadership programs. At least 192 quarter credits of university-level courses are required for the BS in Forest Engineering, and 242 credits are required for the double degree in Forest Engineering and Civil Engineering. These curricula include:

- Written and oral communications, 12–13 credits including a senior writing intensive course.
- OSU Baccalaureate Core curriculum.
- Completion of an approved departmental curriculum.
- Minimum grades:
  - Forestry majors must earn grades of C or better in all courses (or approved substitutions) required for the major and option. No major or option courses may be taken with S/U grading.
  - Forest Engineering majors must earn grades of C or better in all courses (or approved substitutions) required for the major. No major courses may be taken with S/U grading.
  - Forest-Civil Engineering majors must earn grades of C or better in all courses (or approved substitutions) required for the major. No major courses may be taken with S/U grading.
  - Natural Resources majors must achieve grades of C- or high in all COF courses (prefix: FE, FES, FOR, NR, TRAL, or WSE) for the major or option. No major or option courses may be taken with S/U grading.
  - Renewable Materials majors must achieve grades of C or high in all COF courses (prefix: FE, FES, FOR, NR, TRAL, or WSE) for the major or option. No major or option courses may be taken with S/U grading.
  - Tourism, Recreation & Adventure Leadership majors must earn grades of C or high in all COF courses (prefix: FE, FES, FOR, NR, TRAL, or WSE) for the major or option. No major or option courses may be taken with S/U grading.
- Approved work experience as noted below.

Professional and Personal Requirements
Those majoring in Forest Engineering, Forest Engineering-Civil Engineering, Forestry, Renewable Materials, and Tourism, Recreation & Adventure Leadership must complete six months of satisfactory employment in an area related to their major.

Students are personally responsible for fulfilling all curricular requirements in proper sequence. Work performance and personal conduct are thoroughly appraised by the college. Since the professions of forestry and natural resources are highly regarded for their ethical and academic standards, students are responsible for observing the Professional Code of Conduct of the college in its entirety. Departure from these ethical requirements may result in dismissal from the college.
Forest Engineering (FE)

**FE 101, INTRODUCTION TO FOREST ENGINEERING, 2 Credits**
Introduction to the forest engineering discipline. Discussion of critical issues, available resources, career opportunities and professional opportunities. Overview of field instruments and analytical approaches.

**FE 102, FOREST ENGINEERING PROBLEM SOLVING AND TECHNOLOGY, 3 Credits**
A technology applications course designed to introduce students to formulating and implementing computational solutions to engineering analysis and design problems in a digital environment. Students will learn to evaluate engineering problems, formulate one or more solution techniques or algorithms, and code the solution using spreadsheet and/or programming software. Professionalism in completing and presenting laboratory exercises is emphasized. Laboratory examples draw from a variety of engineering topics. This course may be substituted for CE 102, Civil Engineering I: Problem Solving and Technology.
Equivalent to: FE 215
Recommended: Calculus

**FE 206, ENGINEERING FOREST BIKING TRAILS, 2 Credits**
Students will design trails that mitigate impact on the environment and other trail users, while still providing a fun experience for mountain bike riders. Topics include trail classification, trail safety, water management, digital terrain models, and commercial road design software. This course will emphasize field and design work.

**FE 208, FOREST SURVEYING, 4 Credits**
Introduction to theory and practice of surveying methods and measurements as applied to the specifics of forestry problems and their solutions. This is the first of a four-course sequence (FE 208, 209, 310, 311). Together with FE 257 it is designed to prepare students for the Fundamentals of Land Surveying exam, which is necessary to become a professional land surveyor.
Prerequisite: MTH 112 with C or better or MTH 241 with C or better or MTH 251 with C or better or MTH 251H with C or better or MTH 252 with C or better or MTH 252H with C or better
Equivalent to: FE 208
Available via Ecampus

**FE 209, FOREST PHOTOGRAMMETRY AND REMOTE SENSING, 4 Credits**
Management and conservation of natural resources with the fundamentals of spatial data acquisition from airborne and spaceborne sensors. Introduction to theory of spectral reflectance properties of vegetation, the principles of photographic analysis and aerial photo-interpretation and new advances such as LIDAR.
Prerequisite: MTH 112 with C or better or MTH 241 with C or better or MTH 251 with C or better or MTH 251H with C or better or MTH 252 with C or better or MTH 252H with C or better
Equivalent to: FE 209
Available via Ecampus

**FE 257, GIS AND FOREST ENGINEERING APPLICATIONS, 3 Credits**
An introduction to the appropriate use and potential applications of geographic information systems (GIS) and related technologies (GPS and remote sensing) in forest management and operational planning and problem solving. Students are presented with lectures and exercises that cover a wide range of GIS and GIS-related topics and issues including spatial database creation, structure, analysis, and modeling. Lec/lab.
Equivalent to: FE 357
Available via Ecampus

**FE 307, JUNIOR SEMINAR, 1 Credit**
College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. CROSSTLISTED as FE 307/FOR 307.
Equivalent to: FOR 307

**FE 310, FOREST ROUTE SURVEYING, 4 Credits**
Route surveying and site surveying applied to forestry problems. Use of surveying equipment; traversing; computations; leveling; horizontal, vertical, compound, reverse and spiral curves; earthwork; construction staking as applied to new road and existing road P-line survey. Includes rapid survey techniques. Lec/lab.
Prerequisite: (FE 208 with C or better or FE 308 with C or better) or CE 361 with C or better or CEM 263 with C or better

**FE 312, FORESTRY FIELD SCHOOL, 2 Credits**
A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. CROSSTLISTED as FE 312/FOR 312.
Equivalent to: FOR 312

**FE 315, SOIL ENGINEERING, 4 Credits**
Prerequisite: ENGR 213 (may be taken concurrently) with D- or better
Recommended: ENGR 213 (may be taken concurrently) with D- or better

**FE 316, SOIL MECHANICS, 4 Credits**
Soil strength and soil mechanics theories applied to analysis of slope stability, retaining structures, foundations, and pavements. Lec/lab.
Prerequisite: FE 315 (may be taken concurrently) with C- or better or CE 372 (may be taken concurrently) with D- or better

**FE 330, FOREST ENGINEERING FLUID MECHANICS AND HYDRAULICS, 3 Credits**
Fluid properties, pressure, fluid statics, continuity, energy equation, single and series pipe flow, open channel hydraulics, peakflow estimates for culvert design, stream crossing design. Lec/lab.
Prerequisite: ENGR 213 (may be taken concurrently) with D- or better and FE 102 (may be taken concurrently) [C-]
FE 370, HARVESTING OPERATIONS, 4 Credits
Timber harvesting and transport methods from the forest to the mill. Technical feasibility, economic, and environmental relationships in forestry operations. Junior standing in forestry required. For non-forest engineering students.
Prerequisite: PH 201 with C or better or PH 211 with C or better

FE 371, HARVESTING PROCESS ENGINEERING, 4 Credits
Timber harvesting equipment and systems. Harvesting process evaluation and decisions aided by forest engineering analysis. Lec/lab.
Prerequisite: ENGR 211 with C or better and FE 102 [C]
Recommended: Concurrent enrollment in FE 208 and FE 357

FE 403, THESIS, 1-16 Credits
PREREQ: Departmental approval required.
This course is repeatable for 16 credits.

FE 405, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FE 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FE 407, SEMINAR, 1-16 Credits
This course is repeatable for 16 credits.

FE 415, FOREST ROAD ENGINEERING, 3 Credits
Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating.
Prerequisite: FE 310 with C- or better

FE 416, FOREST ROAD SYSTEM MANAGEMENT, 4 Credits
Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management.
Prerequisite: (ENGR 211 with D- or better or ENGR 211H with D- or better) and (ENGR 213 [D-] or ENGR 213H [D-]) and FE 316 [C-] and FE 415 [C-]

FE 423, UNMANNED AIRCRAFT SYSTEM REMOTE SENSING, 3 Credits
Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes.
Prerequisite: FE 309 with C or better or GEOG 480 with C or better or GEOG 481 with C or better or GEO 444 with C or better or GEO 466 with C or better

FE 430, WATERSHED PROCESSES, 4 Credits
Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab.
Available via Ecampus

FE 434, FOREST WATERSHED MANAGEMENT, 4 Credits
Physical hydrology, erosion processes, streams, and riparian areas of forested ecosystems. The material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest.
Prerequisite: (CH 121 with C or better or CH 201 with C or better or CH 231 with C or better) and (SOIL 205 [C] or CSS 305 [C] or CSS 205 [C]) and (MTH 241 [C] or MTH 251 [C] or MTH 251H [C])

FE 436, FOREST DISTURBANCE HYDROLOGY, 3 Credits
Impacts of forest disturbance, including timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams.
Prerequisite: FE 434 with C or better
Equivalent to: FE 435

FE 440, FOREST OPERATIONS ANALYSIS, 4 Credits
Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab.
Prerequisite: FE 102 with C- or better and (FE 370 [C-] or FE 371 [C-])
Recommended: Basic statistics

FE 444, FOREST REMOTE SENSING AND PHOTOGRAMMETRY, 4 Credits
Introduction to spectral reflectance, photogrammetry, image analysis, and point clouds. Fundamentals of data acquisition with passive and active sensors installed on airborne and spaceborne platforms. Radar and lidar in forestry. Lec/lab.
Prerequisite: FE 257 with C or better and (MTH 112 [C] or MTH 241 [C] or MTH 251 [C] or MTH 251H [C] or MTH 252 [C] or MTH 252H [C]) and (PH 201 [C] or PH 211 [C])

FE 456, *INTERNATIONAL FORESTRY, 3 Credits
An introduction to the biological, physical, and sociological factors that shape the world’s forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FE 456/FOR 456. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FOR 456
Recommended: Introductory course in biology.
FE 457, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSTLISTED as FE 457/FOR 457 and FE 557/FOR 557.
Prerequisite: FOR 329 with C or better and FOR 441 [C] and FOR 443 [C]
Equivalent to: FOR 457

FE 459, FOREST MANAGEMENT PLANNING AND DESIGN I, 4 Credits
Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab.
CROSSTLISTED as FE 459/FOR 459.
Prerequisite: FE 457 with C or better or FOR 457 with C or better
Equivalent to: FOR 459

FE 460, FOREST OPERATIONS REGULATIONS AND POLICY ISSUES, 3 Credits
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FE 469, FOREST MANAGEMENT PLANNING AND DESIGN II, 4 Credits
A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab.
CROSSTLISTED as FE 469/FOR 469.
Prerequisite: FE 459 with C or better or FOR 459 with C or better
Equivalent to: FOR 469

FE 470, LOGGING MECHANICS, 4 Credits
Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance.
Prerequisite: (ENGR 211 with D- or better or ENGR 211H with D- or better) and ENGR 213 [D-] and FE 371 [C-]

FE 471, HARVESTING MANAGEMENT, 3 Credits
Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. Lec/lab.
Recommended: FE 371 and FE 470

FE 472, MECHANIZED HARVESTING AND SIMULATION, 2 Credits
Study of harvesters, forwarders, and processing of timber for maximizing stand value. The use of a harvesting simulator will provide for a hands-on approach to learning.
Recommended: FOR 321

FE 479, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSTLISTED as CE 479/FE 479 and CE 579/FE 579.
Prerequisite: CE 373 with C or better or FE 316 with C or better
Equivalent to: CE 479

FE 480, FOREST ENGINEERING PRACTICE AND PROFESSIONALISM, 1 Credit
Personal and professional skills, attributes, and issues in forest engineering practice. Includes topics such as ethics, land stewardship, media relations and risk management.

FE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 8 credits.

FE 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FE 507, SEMINAR, 1-16 Credits
Subject matter as required by graduate programs.
This course is repeatable for 16 credits.

FE 515, FOREST ROAD ENGINEERING, 3 Credits
Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating.
Recommended: Basic surveying

FE 516, FOREST ROAD SYSTEM MANAGEMENT, 4 Credits
Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management.
Recommended: FE 415 or FE 515
FE 523, UNMANNED AIRCRAFT SYSTEM REMOTE SENSING, 3 Credits
Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes.
Prerequisite: GEOG 580 with C or better or GEOG 581 with C or better or GEO 544 with C or better or GEO 566 with C or better or OC 678 with C or better

FE 530, WATERSHED PROCESSES, 4 Credits
Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab.

FE 532, FOREST HYDROLOGY, 4 Credits
Physical hydrology, erosion processes, and attributes of stream ecosystems for forested watersheds. Material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. Lec/rec.
Recommended: BEE 512 or introductory hydrology course

FE 536, FOREST DISTURBANCE HYDROLOGY, 3 Credits
Impacts of forest disturbance, including timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams.
Recommended: FE 434

FE 540, FOREST OPERATIONS ANALYSIS, 4 Credits
Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab.
Recommended: FE 102 and (FE 370 or FE 371) and basic statistics.

FE 544, FOREST REMOTE SENSING AND PHOTOGRAMMETRY, 4 Credits
Introduction to spectral reflectance, photogrammetry, image analysis, and point clouds. Fundamentals of data acquisition with passive and active sensors installed on airborne and spaceborne platforms. Radar and lidar in forestry. Lec/lab.
Recommended: FE 257 and (MTH 112 or MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H)

FE 545, SEDIMENT TRANSPORT, 4 Credits
Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as BEE 545/FE 545.
Equivalent to: BEE 545
Recommended: CE 313 or FE 330

FE 552, FOREST TRANSPORTATION SYSTEMS, 4 Credits
Analysis of interactions between harvesting and road systems. Advanced topics in road and landing spacing, determination of road standards, analysis of logging road networks, transfer and sort yard facility location. Simultaneous resource scheduling and transportation planning.
Recommended: FE 102 and (FE 440 or FE 540)

FE 555, FOREST SUPPLY CHAIN MGMT, 3 Credits
Develop and implement operational planning and logistics scheduling systems to manage a forestry supply chain for typical forest organizations in the Pacific Northwest. Once developed, these supply chain plans will be implemented using simulation software that will allow students to view the results of their forest operations plans.
Recommended: (CS 151 or FE 102) and FE 357 and FOR 457

FE 557, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FOR 457 and FE 557/FOR 557.
Equivalent to: FOR 557
Recommended: FOR 329 and FOR 441 and FOR 443

FE 560, FOREST OPERATIONS REGULATIONS AND POLICY ISSUES, 3 Credits
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players.

FE 570, LOGGING MECHANICS, 4 Credits
Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance.
Recommended: ENGR 211 and ENGR 213 and FE 371

FE 571, HARVESTING MANAGEMENT, 3 Credits
Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs.
Recommended: FE 371 and FE 470
FE 579, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579.
Equivalent to: CE 579
Recommended: CE 373 or FE 316

FE 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

FE 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FE 607, SEMINAR, 1-16 Credits
Subject matter is required by graduate programs.
This course is repeatable for 16 credits.

FE 640, SPECIAL TOPICS IN FOREST ENGINEERING, 1-3 Credits
Recent advances in logging engineering, forest engineering, and forest operations. Content will vary with instructor. May be retaken for credit.
This course is repeatable for 99 credits.

FES 240, *FOREST BIOLOGY, 4 Credits
Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: FES 240H, FOR 240
Available via Ecampus

FES 240H, *FOREST BIOLOGY, 4 Credits
Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course
Designator
Equivalent to: FES 240

FES 241, DENDROLOGY, 3 Credits
Learn to identify the principal forest trees of North America, and the principal trees and shrubs of the Pacific Northwest. Also learn about forested regions of the world. Lec/lab/rec.
Equivalent to: FES 141
Available via Ecampus

FES 242, FOREST PLANTS OF THE PACIFIC NORTHWEST, 3 Credits
Field course on the identification and ecology of forest trees, shrubs, and herbs of the Pacific Northwest. Overnight camping required. Students should be prepared to hike 3-5 miles per day.

FES 341, FOREST ECOLOGY, 3 Credits
Basic physiological characteristics of trees, succession, climax, and related concepts. Vegetation classification. Stand structure, diversity, competition, growth, soils-forests interactions, biomass and nutrient distribution, energy relations, nutrient element dynamics, ecology of disturbances.
Equivalent to: FOR 341
Available via Ecampus

FES 342, FOREST TYPES OF THE NORTHWEST, 3 Credits
Forest trees in nature are aggregated into stable or transitory associations known as forest cover types. Knowledge of forest cover types, their species composition and ecology, is applicable to the fields of forestry, fire management, wildlife management, and forest ecology.
Equivalent to: FOR 342
Available via Ecampus

FES 343, FORESTS OF THE EASTERN UNITED STATES, 3 Credits
Major Southeast US forest types will be visited and morphological, geographic, ecological and economic characteristics of important forest tree species examined.
Prerequisite: FES 141 with C or better or FES 241 with C or better
This course is repeatable for 3 credits.
FES 350, URBAN FORESTRY, 3 Credits
Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. CROSSLISTED as FES 350/HORT 350.
Equivalent to: FOR 350
Recommended: Foundational forestry and horticulture courses
Available via Ecampus

FES 355, MANAGEMENT FOR MULTIPLE RESOURCE VALUES, 3 Credits
Management of a variety of resource attributes in multiple use context, including considerations for recreation, fish, wildlife, aesthetics, watersheds, and forest products.
Equivalent to: FOR 355
Available via Ecampus

FES 365, *ISSUES IN NATURAL RESOURCES CONSERVATION, 3 Credits
Background of major current issues in natural resources conservation with emphasis on forests, soils, and water and potential sustainable carrying capacity. Focus on evaluating facts and opinions related to issues. Basics of terrestrial and aquatic ecology, recent and current issues of soil, water, and forest use and management. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FOR 365
Available via Ecampus

FES 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

FES 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FS 401
This course is repeatable for 16 credits.

FES 403, THESIS, 1-16 Credits
Equivalent to: FS 403
This course is repeatable for 16 credits.

FES 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: FS 405
This course is repeatable for 16 credits.

FES 406, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FES 407, SEMINAR, 1-16 Credits
Some sections graded A-F. This course is repeatable for a maximum of 16 credits.
This course is repeatable for 16 credits.

FES 410, INTERNSHIP, 1-16 Credits
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
This course is repeatable for 16 credits.

FES 412, FOREST ENTOMOLOGY, 3 Credits
Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values.
Prerequisite: BI 204 with C or better or BI 211 with C or better or BI 211H with C or better or BI 212 with C or better or BI 212H with C or better or BI 221 with C or better or BI 221H with C or better

FES 422, RESEARCH METHODS IN SOCIAL SCIENCE, 4 Credits
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Lec/lab.
Prerequisite: ST 201 with D- or better or ST 351 with D- or better or ST 351H with D- or better
Equivalent to: TOL 422
Available via Ecampus

FES 430, FOREST AS CLASSROOM, 4 Credits
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.
Available via Ecampus

FES 433, PLANNING AGROFORESTRY PROJECTS, 2 Credits
Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions.
Prerequisite: BOT 341 with D- or better

FES 435, *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535. (Bacc Core Course)
Attributes: CSSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FES 435H, TOX 435, TOX 435H
Recommended: One quarter each of biology and chemistry
Available via Ecampus
FES 440, WILDLAND FIRE ECOLOGY, 3 Credits
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
Equivalent to: FOR 446
Recommended: Junior or senior standing, with coursework in ecology and natural resource management
Available via Ecampus

FES 444, ECOLOGICAL ASPECTS OF PARK MANAGEMENT, 3 Credits
Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored.
Equivalent to: TOL 444
Recommended: An ecology course or completion or concurrent enrollment in FES 251 or FOR 251

FES 445, ECOLOGICAL RESTORATION, 4 Credits
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSTLISTED as FES 445/FW 445 and FES 455/FW 455.
Equivalent to: FOR 445, FW 445
Recommended: BI 370 or BI 370H
Available via Ecampus

FES 447, ARBORICULTURE, 4 Credits
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSTLISTED as FES 447/HORT 447 and FES 457/HORT 457.
Equivalent to: FOR 447, HORT 447
Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)
Available via Ecampus

FES 450X, LARGE CARNIVORES IN ECOLOGY, 1 Credit
Exploration of interesting effects of large carnivores on other animals and the structure and function of ecosystems. Featured carnivores include gray wolves, grizzly bears, cougars, lions, and others. Investigation of the global conservation status and trends of large carnivores and their prey.

FES 452, BIODIVERSITY CONSERVATION IN MANAGED FORESTS, 3 Credits
Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSTLISTED as FES 452/FW 452.
Equivalent to: FS 453, FW 452
Recommended: FES 240 or FES 341 or BI 370
Available via Ecampus

FES 454, MANAGING AT THE WILDLAND-URBAN INTERFACE, 3 Credits
Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities.
Equivalent to: FOR 454
Recommended: FOR 111 for non-Ecampus students

FES 455, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSTLISTED as FES 455/HORT 455 and FES 555/HORT 555.
Prerequisite: FES 350 with C- or better or HORT 350 with C- or better
Equivalent to: FOR 455, HORT 455
Available via Ecampus

FES 477, *AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSTLISTED as FES 477/ NR 477 and FES 577/RNG 577. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FS 477, NR 477
Recommended: Introductory course in biology.

FES 485, *CONSENSUS AND NATURAL RESOURCES, 3 Credits
Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FS 485
Available via Ecampus

FES 486, *PUBLIC LANDS POLICY AND MANAGEMENT, 3 Credits
Examines public lands policy and management in the Western U.S. Overview of historical and current federal land management agency laws, regulations, and policies. Highlights political, legal, economic, ecological, and social context of public land management decisions. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: Sophomore standing
Available via Ecampus

FES 499, SELECTED TOPICS IN FOREST SCIENCE, 0-16 Credits
In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others.
This course is repeatable for 16 credits.
FES 500, MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS, 3 Credits
Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies. CROSSLISTED as FES 500/MNR 500.
Equivalent to: MNR 500
Recommended: MTH 111
Available via Ecampus

FES 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FS 501
This course is repeatable for 16 credits.

FES 503, THESIS, 1-16 Credits
Equivalent to: FS 503
This course is repeatable for 999 credits.

FES 505, READING AND CONFERENCE, 1-16 Credits
Some sections graded P/N.
Equivalent to: FS 505
This course is repeatable for 16 credits.
Available via Ecampus

FES 506, PROJECTS, 1-16 Credits
Equivalent to: FS 506
This course is repeatable for 16 credits.
Available via Ecampus

FES 507, SEMINAR, 1-16 Credits
Some sections graded A-F.
Equivalent to: FS 507
This course is repeatable for 16 credits.

FES 508, WORKSHOP, 1-16 Credits
Equivalent to: FS 508
This course is repeatable for 16 credits.

FES 511, COMMUNITIES AND NATURAL RESOURCES, 5 Credits
Provides students from diverse backgrounds with interdisciplinary, experiential learning exposure to contemporary community and natural resource issues in rural Oregon. Social science concepts are employed to critically appraise current conditions and future prospects for rural, natural resource-dependent communities.
Equivalent to: FS 511
This course is repeatable for 15 credits.

FES 512, FOREST ENTOMOLOGY, 3 Credits
Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values.
Recommended: BI 204 or BI 211 or BI 211H or BI 212 or BI 212H or equivalent.
FES 526, EFFECTIVE COMMUNICATION & PRESENTATION SKILLS FOR SCIENTISTS, 1 Credit
Provides an overview of communication principles and effective scientific communication skills for producing a seminar on proposed research presented to fellow scientists. Students evaluate strengths and weaknesses of communication styles; develop their ability to provide fair, timely feedback; and apply communication principles to evaluate strengths and weaknesses of presentations and proposed research. This course is repeatable for 3 credits.

FES 527, FOREST CARBON ANALYSIS FOR ASSESSMENTS AND POLICY AGREEMENTS, 3 Credits
Role of forests in mitigating greenhouse gas emissions. International GHG policies and recommendations for monitoring emissions and forest carbon. Measurement, modeling, and projections of forest ecosystem carbon. Evaluation of policies for reducing GHG emissions and increasing forest carbon stores.
Prerequisite: FES 536 with C or better
Recommended: MNR 538 or MNR 550
Available via Ecampus

FES 530, FOREST AS CLASSROOM, 4 Credits
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.
Available via Ecampus

FES 533, PLANNING AGROFORESTRY PROJECTS, 2 Credits
Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions.
Recommended: BOT 341 and/or equivalent course in ecology.

FES 535, GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535.
Equivalent to: BI 535, FS 535, MCB 535, TOX 535
Recommended: One quarter each of biology and chemistry
Available via Ecampus

FES 536, CARBON SEQUESTRATION IN FORESTS, 2 Credits
Examines processes controlling the sequestration of carbon in the forest system including the forest itself and wood products. Also examines how forests can be managed to sequester carbon as well as the important economic, policy, and other constraints. Lectures, readings, discussion, simulation models, and home work will be used to cover the material.
Recommended: Undergraduate-level biology or ecology.
Available via Ecampus

FES 537, BELOWGROUND ECOSYSTEMS, 3 Credits
Physical and biological components and their interactions in different soil ecosystems with description and examination of the relationships between producers and decomposers in the soil.
Recommended: Undergraduate biology or ecology courses

FES 538, VALUATION OF NON-MARKET RESOURCES, 3 Credits
Focuses on the theory and methods for estimating the economic value of non-market resources (e.g. clean air and water, biodiversity, nature-based recreation, etc.). Blends the theory and econometrics of non-market valuation through hands-on applications of methods with real datasets. The valuation of non-market resources is a burgeoning field within applied economics and should continue to grow in both importance and applications.
Recommended: AREC 512 or ECON 512

FES 540, WILDLAND FIRE ECOLOGY, 3 Credits
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
Recommended: Coursework in ecology and natural resource management

FES 542, WILDLIFE LANDSCAPE ECOLOGY, 3 Credits
Explores the interaction between spatial pattern and scale and ecological processes with particular emphasis on biodiversity in forests. The focus is on theory, methods and conservation applications in landscape ecology.
Recommended: Undergraduate courses in ecology and concurrent enrollment in ST 511

FES 543, ADVANCED SILVICULTURE, 3 Credits
The scientific basis of forest regeneration and silvicultural practices and prescriptions in immature and mature stands. Field trips are required.
Lec/lab.
Equivalent to: FS 543
Recommended: FOR 442 and FOR 443
FES 545, ECOLOGICAL RESTORATION, 4 Credits

Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FES 445/FW 445 and FES 545/FW 545.

Equivalent to: FOR 545, FW 545

Recommended: BI 370 or BI 370H

Available via Ecampus

FES 546, ADVANCED FOREST COMMUNITY ECOLOGY, 4 Credits

Fundamental concepts of community including disturbance, diversity and succession. Strong emphasis on field skills and data interpretation. Saturday field trip required. Lec/lab.

FES 547, ARBORICULTURE, 4 Credits

The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSLISTED as FES 447/HORT 447 and FES 547/HORT 547.

Equivalent to: HORT 547

Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)

Available via Ecampus

FES 548, INVASIVE PLANTS: BIOLOGY, ECOLOGY AND MANAGEMENT, 3 Credits

Concepts of plant physiology, genetics and population dynamics are used to understand how plant invasions occur and some communities continue to exist. Management implications are explored.

Equivalent to: FS 548

Available via Ecampus

FES 550, TROPHIC CASCADES, 2-3 Credits

Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. CROSSLISTED as FES 550/FW 550.

Equivalent to: FOR 547, FW 547, FW 550

This course is repeatable for 3 credits.

FES 552, FOREST WILDLIFE HABITAT MANAGEMENT, 4 Credits

Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. CROSSLISTED as FES 552/FW 552.

Equivalent to: FW 552

Recommended: FOR 341 or equivalent course in ecology.

Available via Ecampus

FES 554, MANAGING AT THE WILDLAND-URBAN INTERFACE, 3 Credits

Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities.

Equivalent to: FOR 554

Recommended: FOR 111 for non-Ecampus students

FES 555, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits

Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 455/HORT 455 and FES 555/HORT 555.

Equivalent to: FOR 555, HORT 555

Recommended: FES 350 or HORT 350

Available via Ecampus

FES 558, CONCEPTS OF FOREST RECREATION PLANNING AND MANAGEMENT, 3 Credits

Examines research that forms the conceptual basis for tools, techniques, and approaches used in recreation planning and management.

Equivalent to: FOR 558

FES 560, GREEN INFRASTRUCTURE, 4 Credits

Explores the relationship between the natural and built environments in cities and examines how planning for and managing green infrastructure assets (such as urban tree canopy, watersheds, and natural areas) increases economic health, community livability and ecological resilience in cities.

Available via Ecampus

FES 561, PHYSIOLOGY OF WOODY PLANTS, 3 Credits

The structure, growth and physiological processes of trees and shrubs.

Equivalent to: FS 561

Recommended: (CH 231 or CH 231H) and (CH 232 or CH 232H) and (CH 233 or CH 233H) and CH 331 and CH 332 and BOT 331

FES 565, URBAN FORESTRY LEADERSHIP, 2 Credits

Examines the application of leadership theories and principles to the decision-making, policy creation, and effective administration of urban forestry programs in the public, private, and non-profit sectors. Taught via Ecampus only.

Available via Ecampus
FES 577, AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. Crosslisted as FES 477/ NR 477 and FES 577/RNG 577.
Equivalent to: FS 577, NR 577, RNG 577
Recommended: Introductory course in biology.

FES 580, WRITING SCIENTIFIC MANUSCRIPTS, 1 Credit
Discussion of parts of a scientific manuscript and the submission, review, and publication process. Brief presentations and discussion of examples provided by the instructor and students. Students write their own manuscripts and work in teams to provide feedback on manuscript components.

FES 585, CONSENSUS AND NATURAL RESOURCES, 3 Credits
Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue.
Equivalent to: FS 585
Available via Ecampus

FES 586, PUBLIC LANDS POLICY AND MANAGEMENT, 3 Credits
Examines public lands policy and management in the Western U.S. Overview of historical and current federal land management agency laws, regulations, and policies. Highlights political, legal, economic, ecological, and social context of public land management decisions.
Available via Ecampus

FES 599, SELECTED TOPICS IN FOREST SCIENCE, 0-16 Credits
In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others. This course is repeatable for 16 credits.
Available via Ecampus

FES 600, GLOBAL CHANGE ECOLOGY: IMPACTS, MITIGATION, AND ADAPTATION, 3 Credits
An interdisciplinary discourse on what is known about global change and dynamics of the earth system, including principles of climate, influences on ecosystem functioning and connectivity needed to understand responses of the earth system to human activities.
Equivalent to: FS 600

FES 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FS 601
This course is repeatable for 16 credits.

FES 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FES 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: FS 605
This course is repeatable for 16 credits.

FES 606, PROJECTS, 1-16 Credits
Equivalent to: FS 606
This course is repeatable for 16 credits.

FES 629, TEACHING PRACTICUM IN FOREST SCIENCE, 1 Credit
Preparation of graduate students in forest science and related disciplines for their first teaching experiences. Using concepts and information introduced in the class, students will develop the curriculum for one credit of college-level instruction (or an equivalent approved by the instructor) in a topic of their choice.
Equivalent to: FS 629

FES 646, FOREST ECOSYSTEMS ANALYSIS AND APPLICATION, 4 Credits
The structure and function of forests and associated streams in natural and managed landscapes; application of ecosystem analysis to policy management decisions; roles of models; scaling from individual processes to ecosystems, landscapes, and beyond. Required classroom discussions, field trip.
Equivalent to: FS 646
Recommended: College-level ecology/biology, chemistry, and math; familiarity with Excel.

FES 699, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Forestry (FOR)

FOR 111, INTRODUCTION TO FORESTRY, 3 Credits
Forest resources in the world; forests and human well-being; where and how forests grow; environmental and human values; products, characteristics, and uses; basic elements of use, planning and management. Interpretation of forestry literature; professional origins in the U.S. Field trips required.
Equivalent to: F 111
Available via Ecampus

FOR 112, COMPUTING APPLICATIONS IN FORESTRY, 3 Credits
An overview of computing applications used in all aspects of forestry work, but largely focused on development of intermediate and advanced spreadsheet skills using Microsoft Excel (e.g., complex formulas and functions, charting, and pivot tables). Additionally, the course rounds out essential skills in document formatting and presentation development.

FOR 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.
FOR 206, *FOREST SOILS LABORATORY FOR SOIL 205, 1 Credit
Laboratory exercise and field trips designed to develop student competency in soil processes, description, analysis, and assessment with a particular emphasis on the role of soils in managed and unmanaged forest ecosystems. (Bacc Core Course if taken with SOIL 205)
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Corequisites: SOIL 205

FOR 208, FOREST SOILS RECITATION, 1 Credit
Readings, exercises, discussions designed to develop student competency in forest soil processes, description, analysis, and assessment. A particular emphasis will be placed on the role of soils in managed and unmanaged forest ecosystems.
Recommended: An introductory soils course.
Available via Ecampus

FOR 307, JUNIOR SEMINAR, 1 Credit
College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations.
CROSSLISTED as FE 307/FOR 307.
Equivalent to: FE 307

FOR 312, FORESTRY FIELD SCHOOL, 2 Credits
A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. CROSSLISTED as FE 312/FOR 312.
Equivalent to: FE 312

FOR 321, FOREST MENSURATION, 5 Credits
Encompasses methods used to measure tree, stand and forest-level attributes, and sample and analyze forest resources data. Provides information that support forest management decisions at the stand and forest levels. Focuses mainly on quantitative analysis of forest vegetation. Uses considerable time and effort on measuring other forest resources (e.g., wildlife habitat and riparian zones).
Prerequisite: (FOR 141 with C or better or FES 141 with C or better or FOR 241 with C or better or FES 241 with C or better) and FE 208 [C] and (MTH 241 [C] or MTH 245 [C] or MTH 251 [C] or MTH 251H [C]) and (ST 201 [C] or ST 314 [C] or ST 314H [C] or ST 351 [C] or ST 351H [C])
Equivalent to: F 321

FOR 322, FOREST MODELS, 3 Credits
Introduction to static and dynamic forest models: defining what they are, how they might be used, and, in general terms, how they are developed.
Prerequisite: FOR 321 with C- or better and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])
Equivalent to: F 322

FOR 329, FOREST RESOURCE ECONOMICS I, 4 Credits
Forest products markets, appraisal, rotation, thinning, uneven-aged management and forest regulation. Economics of timber management and harvest scheduling.
Prerequisite: ST 201 with D- or better or ST 351 with D- or better
Equivalent to: FOR 331

FOR 330, FOREST RESOURCE ECONOMICS II, 4 Credits
Basic arithmetic of interest and capital budgeting. Basic wood products markets. Forest resource markets and market failures. Nonmarket valuation and multiple-use forestry. Impacts of forest management and policy decisions on forest resource use. Lec/lab.
Prerequisite: (AEC 250 with C or better or (ECON 201 with C or better or ECON 201H with C or better)) and (MTH 241 [C] or MTH 245 [C] or (MTH 251 [C] or MTH 251H [C])
Equivalent to: FOR 430

FOR 346, TOPICS IN WILDLAND FIRE, 3 Credits
An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy. Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion.
Equivalent to: FW 346, RNG 346
Recommended: Coursework in forest biology or ecology (eg. FOR 240 or FES 240 or FES 341)
Available via Ecampus

FOR 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

FOR 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
This course is repeatable for 16 credits.

FOR 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: F 401
This course is repeatable for 16 credits.

FOR 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

FOR 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: F 405, FRR 405
This course is repeatable for 16 credits.

FOR 406, PROJECTS, 1-16 Credits
Section 4: Integrated Projects, Graded.
Equivalent to: F 406, FRR 406
This course is repeatable for 16 credits.
FOR 407, SEMINAR, 1-16 Credits
Equivalent to: F 407, FRR 407
This course is repeatable for 16 credits.

FOR 408, WORKSHOP, 1-3 Credits
Equivalent to: FRR 408
This course is repeatable for 16 credits.

FOR 410, INTERNSHIP, 1-16 Credits
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
Equivalent to: FRR 410
This course is repeatable for 16 credits.

FOR 413, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 413/FOR 413.
Prerequisite: BI 204 with C or better or BI 212 with C or better or BI 212H with C or better or BI 213 with C or better or BI 213H with C or better or BI 221 with C or better or BI 221H with C or better
Equivalent to: BOT 413

FOR 417, ADVANCED FOREST SOILS, 4 Credits
Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/lab.
Prerequisite: SOIL 205 with C- or better and ((CH 231 with C- or better or CH 231H with C- or better) and (CH 261 [C] or CH 261H [C-]) or CH 201 [C-]) and (MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-] or MTH 252 [C-] or MTH 252H [C-])
Equivalent to: FOR 417X

FOR 431, ECONOMICS AND POLICY OF FOREST WILDLAND FIRE, 3 Credits
General overview of the history of fire and the interaction of people with fire on forested landscapes. Forest fire policy history and current issues in the U.S. Basic legal concepts relevant to forest fire policy. An economic framework for understanding spatial externalities, decision-making under uncertainty, institutional economics, and incentives.
Prerequisite: AEC 351 with C or better or AEC 352 with C or better or FOR 330 with C or better or ECON 352 with C or better
Available via Ecampus

FOR 436, WILDLAND FIRE SCIENCE AND MANAGEMENT, 4 Credits
Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab.
Equivalent to: FW 436, RNG 436
Available via Ecampus

FOR 441, SILVICULTURAL PRACTICES, 4 Credits
Nursery operation, vegetation management, herbivores, fire, seeding and planting techniques. Introduction to principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to forest stand treatments. Lec/lab.
Prerequisite: (FES 240 with C or better or FOR 240 with C or better) and (FES 141 [C] or FES 241 [C])

FOR 442, SILVICULTURE REFORESTATION, 4 Credits
Silvicultural principles and practices needed to successfully regenerate forestlands in North America. Topics include artificial and natural regeneration, genetic improvement, seed orchards, forest tree nurseries, site preparation, seedling quality and handling, vegetation management, animal damage protection, early stand management, and ecological and ecophysiological considerations. Emphasis is placed on regeneration methods applied to plantations in western Oregon. Field trips required.
Prerequisite: SOIL 205 with C or better and (FES 240 [C] or FES 240H [C] or FOR 240 [C])
Corequisites: FOR 443

FOR 443, SILVICULTURAL PRACTICES, 4 Credits
Manipulation of forest stand structure and dynamics to meet various resource management objectives. Covers key concepts and practices associated with vegetation control, thinning, fertilization, even-aged and uneven-aged regeneration systems including social and environmental considerations associated with treatments. Two-day field trip required. Lec/lab.
Prerequisite: (FES 240 with C or better or FES 240H with C or better or FOR 240 with C or better) and FOR 321 [C]
Corequisites: FOR 442

FOR 456, *INTERNATIONAL FORESTRY, 3 Credits
An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FE 456/FOR 456. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FE 456
Recommended: Introductory course in biology.

FOR 457, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FOR 457 and FE 557/FOR 557.
Prerequisite: FOR 329 with C or better and FOR 441 [C] and FOR 443 [C]
Equivalent to: FE 457
FOR 459, FOREST MANAGEMENT PLANNING AND DESIGN I, 4 Credits
Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab. CROSSLISTED as FE 459/FOR 459.
Prerequisite: FE 457 with C or better or FOR 457 with C or better
Equivalent to: FE 459

FOR 460, FOREST POLICY, 4 Credits
Policy formulation and analysis for forest resources. Consideration of policy affecting land management approaches to planning, management, and social and economic development. Major forestry policy areas covered include outdoor recreation, range, timber, wilderness, and wildlife and fish. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FOR 462, NATURAL RESOURCE POLICY AND LAW, 3 Credits
First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory

FOR 469, FOREST MANAGEMENT PLANNING AND DESIGN II, 4 Credits
A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab. CROSSLISTED as FE 469/FOR 469.
Prerequisite: FE 459 with C or better or FOR 459 with C or better
Equivalent to: FE 469

FOR 499, SPECIAL TOPICS, 0-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
This course is repeatable for 16 credits.
Available via Ecampus

FOR 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: F 501
This course is repeatable for 16 credits.

FOR 503, THESIS, 1-16 Credits
Equivalent to: F 503
This course is repeatable for 999 credits.

FOR 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: F 505, FRR 505
This course is repeatable for 16 credits.

FOR 506, PROJECTS, 1-16 Credits
Equivalent to: F 506
This course is repeatable for 16 credits.

FOR 507, SEMINAR, 1-16 Credits
Equivalent to: F 507, FRR 507
This course is repeatable for 16 credits.

FOR 508, WORKSHOP, 1-3 Credits
This course is repeatable for 16 credits.

FOR 510, INTERNSHIP, 1-9 Credits
This course is repeatable for 16 credits.

FOR 513, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 513/FOR 513.
Equivalent to: BOT 513
Recommended: BI 204 or BI 212 or BI 212H or BI 213 or BI 213H

FOR 517, ADVANCED FOREST SOILS, 4 Credits
Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/lab.
Recommended: SOIL 205 and (((CH 231 or CH 231H) and (CH 261 or CH 261H)) or CH 201) and (MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H) all with a minimum grade of C-

FOR 518, MANAGING FOREST NUTRITION, 3 Credits
Synthesize current information on nutrient limitations of forest productivity, long-term forest productivity, and mitigating and managing forest nutrition with emphasis on forests of the Pacific Northwest.

FOR 520, GEOSPATIAL FOREST ANALYSIS, 3 Credits
Prerequisite: FE 444 with C or better or GEOG 480 with C or better

FOR 524, FOREST BIOMETRICS, 3 Credits
Advanced topics in forest biometrics, including measurement of forest structure and dynamics, application of sampling theory and methods, and statistical techniques for interpreting forestry data.
Equivalent to: F 524
Recommended: FOR 322 and ST 511
FOR 525, FOREST MODELING, 3 Credits
Examination of regression techniques and assumptions used to develop static and dynamic equations of tree and stand attributes.
Prerequisite: ST 552 with C or better
Equivalent to: F 525

FOR 528, PROFESSIONAL COMMUNICATION AND ETHICS, 2 Credits
Conventions of written and oral communication in forestry and related disciplines including basic narrative development. Exploration of environmental, professional, and research ethics, and the role they play in effective communication with multiple stakeholders.

FOR 531, ECONOMICS AND POLICY OF FOREST WILDLAND FIRE, 3 Credits
General overview of the history of fire and the interaction of people with fire on forested landscapes. Forest fire policy history and current issues in the U.S. Basic legal concepts relevant to forest fire policy. An economic framework for understanding spatial externalities, decision-making under certainty, institutional economics, and incentives.
Recommended: FOR 330 or AEC 351 or AEC 352 or ECON 352
Available via Ecampus

FOR 534, ECONOMICS OF THE FOREST RESOURCE, 3 Credits
Topics include optimal stand and forest management for timber production, economics of ecosystem services (e.g., recreation, biodiversity, carbon sequestration, water quality and regulation), non-market valuation methods, management under risk and uncertainty, discounting, intergenerational equity, sustainability, international trade and other global issues.
Recommended: FOR 330 and FOR 331

FOR 536, WILDLAND FIRE SCIENCE AND MANAGEMENT, 4 Credits
Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab.
Equivalent to: FW 536, RNG 536

FOR 542, INTERNATIONAL INTENSIVE SILVICULTURE, 2 Credits
Operational and ecological aspects of intensive silvicultural management of planted forests around the world. Guest speakers in different countries will describe the type of silvicultural management that is carried out in the speaker's country from species and genetic selection, to harvest and rotation length, including site preparation and planting techniques. Emphasis on comparing silvicultural practices in each country to the management of plantations in western Oregon.

FOR 543, SILVICULTURAL PRACTICES, 5 Credits
Manipulation of immature and mature forest stands for various resource management objectives. Principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to stand treatments. Two-day field trips required.
Recommended: (FOR 240 or FES 240) and FOR 321 and concurrent enrollment in FOR 429

FOR 549, SILVICULTURAL INFLUENCES ON FOREST ECOSYSTEM DYNAMICS, 3 Credits
Fundamental biological and ecological principles for the design and implementation of silvicultural regimes that achieve a wide diversity of forest ecosystem management objectives.
Recommended: Undergraduate course in silviculture and in forest mensuration.

FOR 550, SUSTAINABLE FOREST MANAGEMENT, 3 Credits
Sustainable forestry as part of the global sustainability movement. History of sustainability and its influence on decision-making in forest management. Current dimensions of sustainability: forest certification, climate change, role of environmental ethics, biodiversity conservation, maintenance of long-term site productivity, conservation of soil and water resources, roles of social institutions, and links to concerns for social justice.

FOR 557, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FOR 457 and FE 557/FOR 557.
Equivalent to: FE 557
Recommended: FOR 329 and FOR 441 and FOR 443

FOR 561, FOREST POLICY ANALYSIS, 3 Credits
Basic elements of forest policy problems, including resource allocation and efficiency, distribution, and interpersonal equity, taxation, regulation, and control, and planning and uncertainty. Emphasis on policy and analysis and its uses in policy decision.

FOR 562, NATURAL RESOURCE POLICY AND LAW, 3 Credits
First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory
FOR 563, ENVIRONMENTAL POLICY AND LAW INTERACTIONS, 3 Credits
Second of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on the arena of regulatory environmental laws. Environmental torts, regulation of point and non-point source pollution under the federal Clean Water Act, wetlands protection, and laws governing agricultural and forest practices will be examined as examples of regulatory frameworks for achieving resource protection. Students will be exposed to the basic framework of federal laws regulating air and hazardous waste pollutants.

FOR 599, SPECIAL TOPICS, 1-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section B: Social aspects of natural resource management (3 credits) graded.
This course is repeatable for 16 credits.
Available via Ecampus

FOR 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: F 601
This course is repeatable for 16 credits.

FOR 603, THESIS, 1-16 Credits
Equivalent to: F 603
This course is repeatable for 999 credits.

FOR 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: F 605
This course is repeatable for 16 credits.

FOR 606, PROJECTS, 1-16 Credits
Equivalent to: F 606
This course is repeatable for 16 credits.

FOR 607, SEMINAR, 1-16 Credits
Equivalent to: F 607
This course is repeatable for 16 credits.

FOR 699, SPECIAL TOPICS, 1-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

FOR 808, WORKSHOP, 1-9 Credits
This course is repeatable for 16 credits.

Master of Natural Resources (MNR)

MNR 500, MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS, 3 Credits
Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies.
CROSSTLISTED as FES 500/MNR 500.
Equivalent to: FES 500
Recommended: MTH 111
Available via Ecampus

MNR 511, INTRODUCTION TO SUSTAINABLE NATURAL RESOURCES, 3 Credits
Overview of economic, environmental, social, cultural, ethical, and policy considerations of sustainable natural resource management.
International collaborative efforts to address global natural resource issues. Key policy drivers, key stressors, balancing competing interests.
Introductory course required for all Master of Natural Resources students; open to other graduate students. Taught via Ecampus only.
Recommended: Undergraduate biology or ecology course
Available via Ecampus

MNR 519, DIVERSITY, EQUITY AND INCLUSION IN NATURAL RESOURCE MGMT, 3 Credits
Explores practical approaches to operationalizing diversity, equity and inclusion (DEI) principles in natural resource management organizational settings, programs and outdoor settings. Examines case studies on topics such as accessibility to recreational places, implicit bias and cultural competency in public communications, and how enhancing workplace diversity increases social capital. Introduces DEI analysis through a research project in their local area.
Available via Ecampus

MNR 522, RESEARCH METHODS SOCIAL SCIENCE, 4 Credits
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Lec/lab.
Equivalent to: FES 522
Recommended: Upper-division or graduate level statistics
Available via Ecampus

MNR 530, TROPICAL FOREST ECOLOGY AND MANAGEMENT: A GLOBAL PERSPECTIVE, 3 Credits
Study of tropical forest ecology and the common ecological patterns found within tropical forests. The threats and challenges that tropical forests face in the 21st century and the issues of human use and their impacts. Developing strategies for sustainable management and restoration approaches to alleviate pressure on remaining tropical forests. Taught via Ecampus only.
MNR 538, ADAPTING FORESTS TO CLIMATE CHANGE, 3 Credits
Climate change is expected to have profound effects on forests. Society can respond by managing in forests in ways that can help mitigate climate change or help forests adapt. Nonetheless, changes in climate and forest responses are uncertain, making management and policy decisions difficult and controversial. We will investigate the effects of climate change on forests, focusing on potential forest management and policy responses.
Available via Ecampus

MNR 550, CLIMATE CHANGE IMPACTS ON FOREST ECOSYSTEMS, 3 Credits
Forest management responses to climate change rely on understanding the mechanisms of interaction between forests and climate, as well as the capacity to evaluate impacts of future climate scenarios on forests. Considers effects of rising CO2 and changing climate at the level of ecophysiological processes, changes in species distribution, changes in disturbance regimes, and ecosystem-level impacts mediated by the water, carbon, and nitrogen cycles. Modeling approaches include statistically-based bioclimatic envelopes, and dynamic global vegetation models that treat ecosystem processes and changes in biome distribution.
Recommended: Basic ecology course
Available via Ecampus

MNR 560, DEVELOPING THE MNR CAPSTONE PROPOSAL, 3 Credits
Applies content from across the MNR degree in developing a capstone project. Explores the types of capstone projects and methodologies. Identifies and evaluates the data needed to address natural resource problems or topics. Develops outlines for students’ individualized MNR capstone projects.
Prerequisite: MNR 511 with C or better
Available via Ecampus

MNR 561, MNR CAPSTONE PROJECT, 1-6 Credits
Students work with their major advisor on the completion of their capstone project at the end of the MNR degree program. Students incorporate knowledge gained from coursework to address a natural resource problem within interconnected ecological, economic and social contexts.
Prerequisite: MNR 560 with C or better or SNR 506 with P or better
This course is repeatable for 12 credits.
Available via Ecampus

Natural Resources (NR)
NR 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

NR 201, MANAGING NATURAL RESOURCES FOR THE FUTURE, 3 Credits
Overview of the complexities involved in managing natural resources of the Pacific Northwest. Exposure to major natural resource issues of the region. Development of critical thinking skills useful in seeking solutions.
Available via Ecampus

NR 202, NATURAL RESOURCE PROBLEMS AND SOLUTIONS, 3 Credits
Exploration of the multiple components (ecological, social, political, ethical) of selected natural resource problems. Uses case studies to illustrate how social and biophysical characteristics of environmental problems influence the methods used to try to solve these problems and their potential for success.
Recommended: NR 201
Available via Ecampus

NR 312, CRITICAL THINKING FOR NATURAL RESOURCE CHALLENGES, 3 Credits
Provides an introduction to critical thinking as it applies to issues and problems in natural resources. Attention is given to formal argument analysis, fallacies of argumentation, and critical scientific and philosophical concepts.
Recommended: Sophomore standing

NR 325, SCIENTIFIC METHODS FOR ANALYZING NATURAL RESOURCE PROBLEMS, 3 Credits
Approaches to disciplinary and interdisciplinary problem analysis in natural resources. Introduces systems thinking and the benefits and limitations of different tools used to integrate information from multiple disciplines and stakeholders. Applications of alternative analysis tools are illustrated through selected forest-related case studies. Lec/lab.
Prerequisite: MTH 111 with C- or better or Math Placement - ALEKS with a score of 060
Recommended: NR 201 and (ST 201 or ST 351)

NR 351, *WHEN SCIENCE ESCAPES THE LAB: SCIENCE AND RESOURCE MANAGEMENT, 3 Credits
Role of science in solving natural resource problems. Selecting the ‘best available science.’ How science is portrayed, filtered, and used by the media and interests groups to affect policy and management. Analysis of case studies on use of science in natural resource decision making.
(Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Sophomore standing and NR 312
NR 380, NATURE IN STORYTELLING OVER THE CENTURIES, 3 Credits
Examines the historic tendency across cultures to mythologize elements of the natural world, resulting in celebrated myths, fables, and stories. The course examines nature-based folklore from past centuries, uncovering early perceptions of landscapes, creatures, and plants held by societies and cultures. Focus then shifts to exploration of how elements of the natural world have been portrayed in contemporary film, television, and advertising, revealing how perceptions of nature have evolved over the past century. Connections between contemporary popular culture and old-world myths, fables, and stories will thus be revealed.
Available via Ecampus

NR 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

NR 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

NR 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

NR 405, READING AND CONFERENCE, 1-9 Credits
This course is repeatable for 18 credits.

NR 406, PROJECTS, 1-9 Credits
This course is repeatable for 16 credits.
Available via Ecampus

NR 407, SEMINAR, 1-9 Credits
This course is repeatable for 18 credits.

NR 410, INTERNSHIP, 1-6 Credits
This course is repeatable for 12 credits.
Available via Ecampus

NR 455, NATURAL RESOURCE DECISION MAKING, 4 Credits
Students will participate on collaborative planning teams that effectively engage stakeholders in the decision making process, and offer sound natural resource decisions that are supported by multiple interests.
Prerequisite: FES 485 with D- or better and (BI 371 [D-] or BI 373 [D-] or ENSC 479 [D-] or FE 460 [D-] or FOR 460 [D-] or FW 435 [D-] or FW 439 [D-] or FW 454 [D-] or FW 497 [D-] or GEOG 323 [D-] or HORT 318 [D-] or SOIL 395 [D-] or WR 462 [D-])
Available via Ecampus

NR 477, *AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/ NR 477 and FES 577/RNG 577. (Bacc Core Course)
Attributes: CSSI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FES 477, FS 477, RNG 477
Recommended: Introductory course in biology.

NR 499, SPECIAL TOPICS, 1-16 Credits
This is a hybrid course when offered by Ecampus.
Equivalent to: NR 499H
This course is repeatable for 16 credits.
Available via Ecampus

NR 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: NR 499
This course is repeatable for 16 credits.

Sustainable Natural Resources (SNR)
SNR 506, INDEPENDENT PROJECT IN NATURAL RESOURCE SUSTAINABILITY, 2 Credits
Students identify, pose, frame, and analyze the various components of an important natural resource sustainability problem within their country, region, or organization and, at the end of term, present a workplan for its resolution. Oral and written reports are expected. Graded P/N.
Prerequisite: SNR 511 with C or better
Available via Ecampus

SNR 511, SUSTAINABLE NATURAL RESOURCE DEVELOPMENT, 1 Credit
Using readings, class discussions, and field trips, we introduce the program sessions and pedagogical methods, familiarize students with basic working definitions of sustainability, and build capacity to work as group on a common project.
Available via Ecampus

SNR 520, SOCIAL ASPECTS OF SUSTAINABLE NATURAL RESOURCES, 3 Credits
Using readings, personal experiences, and class discussions, students explore five principles of socially sustainable natural resource management, and review the role they play in creating natural resource-based sustainable communities.
Recommended: SNR 511
Available via Ecampus

SNR 521, ECONOMICS OF SUSTAINABLE NATURAL RESOURCE MANAGEMENT, 3 Credits
Focuses on the sources of market failure, the means of correcting market failure, and the real-world examples of making progress toward sustainable resource use by means of market mechanisms.
Recommended: SNR 511
Available via Ecampus

SNR 522, BASIC BELIEFS AND ETHICS IN NATURAL RESOURCES, 3 Credits
Examines basic philosophies and ethical systems in American forestry, including Pinchot's agricultural/utilitarian approach and Leopold's biotic/ecological model, compares them to contemporary public attitudes and considers their implications for sustainability.
Available via Ecampus
SNR 530, ECOLOGICAL PRINCIPLES OF SUSTAINABLE NATURAL RESOURCES, 3 Credits
Focus on ecological sustainability and ecological concepts and principles, with examples drawn from forests and arid lands. Exploration of global ecosystems, ecological processes and services, factors that create and maintain diversity, ecosystem health and integrity. Principles for sustainable natural resource management and use.
Recommended: SNR 511 and a basic ecology course
Available via Ecampus

SNR 531, SUSTAINABLE SILVICULTURE AND FOREST CERTIFICATION, 3 Credits
Strategies for sustainable silviculture, and measuring and verifying environmental performance (including certification systems) are examined using classroom lectures, case studies, and field exercises. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years' experience working in a natural resources-related field

SNR 532, PLANNING AGROFORESTRY PROJECTS, 2 Credits
Develop basic understanding and appreciation of agroforestry concepts, systems, technologies and practices as used and applied in tropical and temperate zones of the world.
Recommended: SNR 530 (or equivalent ecology course) and SNR 511
Available via Ecampus

SNR 533, NONTIMBER FOREST PRODUCTS: AN INTERDISCIPLINARY INTRODUCTION, 3 Credits
Interdisciplinary introduction to the culture, history, economy, ecology, policy and management of nontimber forest products (NTFP), e.g., wild foods, medicines, floral greens, craft material and landscaping species. Includes domestic public and private forest and international case studies.
Available via Ecampus

SNR 534, REDUCED IMPACT TIMBER HARVEST, 2 Credits
Explores planning, implementation, monitoring, and evaluation of reduced impact timber harvesting. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years' experience working in a natural resources-related field

SNR 535, SUSTAINABLE MANAGEMENT OF AQUATIC AND RIPARIAN RESOURCES, 3 Credits
Explores integrated strategies for sustainable management of watersheds, estuaries, coastal zones, and aquatic resources. Special emphasis given to links between land uses and aquatic environments. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511
Available via Ecampus

SNR 540, GLOBAL ENVIRONMENTAL CHANGE, 3 Credits
Explore biophysical and social sciences that underlie contemporary global change issues: global biogeochemical cycles, climate system, climate change, threats to biodiversity; human dimensions of climate change, globalization, land cover and land use change, global environmental governance and management tools.
Recommended: Basic biology course
Available via Ecampus

SNR 808, WORKSHOP, 1-4 Credits
Describes the policies, practices, and market mechanisms that enhance ecological, economic, and social sustainability of natural resource production and natural ecosystems. Sustainable natural resource management attempts to meet the needs of the present without compromising the future of people or the ecosystems on which they depend.
This course is repeatable for 4 credits.

Tourism and Outdoor Leadership (TRAL)
TRAL 110, INTRODUCTION TO WHITE WATER KAYAKING, 2 Credits
Students will learn fundamentals of white water kayaking in sheltered & moving water based on the internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Emphasis is on activity and basic skills.

TRAL 111, INTRODUCTION TO CANOEING, 2 Credits
Students will learn fundamentals of canoeing in sheltered & moving water based on the internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Emphasis is on activity and basic skills.

TRAL 115, OUTDOOR LIVING SKILLS, 2 Credits
Educates and introduces students on how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. Classroom and field (lab) experience. Includes one mandatory weekend overnight outing. CROSSLISTED as PAC 115/TRAL 115.
Corequisites: TRAL 118
Equivalent to: PAC 115
This course is repeatable for 4 credits.
TRAL 118, LABORATORY FOR OUTDOOR LIVING SKILLS, 1 Credit
Practical field application of concepts learned in PAC 115/TRAL 115, Outdoor Living Skills. Field (lab) experience includes one mandatory weekend overnight. Introduces how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. CROSSLISTED as PAC 118/TRAL 118.
Corequisites: TRAL 115
Equivalent to: PAC 118
This course is repeatable for 2 credits.

TRAL 130, INTRODUCTION TO OUTDOOR AND ADVENTURE PROFESSIONS, 3 Credits
Outdoor and adventure professions will be explored. Introduces students to practical and conceptual aspects of land and water trips in outdoor tourism, adventure, and educational settings. Innovative people and products will be examined in the context of outdoor and adventure professions and their impact; past, present, and future.
Equivalent to: TOL 130

TRAL 132, *FOUNDATIONS AND HISTORY OF OUTDOOR AND ADVENTURE PROFESSIONS, 3 Credits
History, evolution, and theoretical underpinning of outdoor and adventure professions as an important and evolving feature of Western culture within the United States and beyond. Influential ideas, paradigm shifts, events, and developments that have led to professionalism, institutionalization, dissemination, and impact on other subject areas and professions. Impact of other cultures on current state of the professions. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: TOL 132

TRAL 173, INTERMEDIATE ROCK CLIMBING, 2 Credits
Introduces variety of basic skills, gear and systems that will allow them to safely participate in a single pitch rock climbing environment based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Presents students with various technical skills that will serve as a foundation for future land-based outdoor disciplines. Students will be introduced to gear, such as software (ropes, webbing, harnesses) and hardware (carabiners, friction devices); skills, such as knots, belaying, rappelling, lead climbing, and systems such as anchors and basic rescue techniques. CROSSLISTED as PAC 173/TRAL 173.
Equivalent to: PAC 173
This course is repeatable for 10 credits.

TRAL 215, GROUP FACILITATION, 4 Credits
Introduces facilitation, leadership, and management of groups. Group facilitation theory, techniques, and models for use in a variety of environments and with different populations. Prominent personality types and how to effectively facilitate these. Determining needs, utilizing appropriate techniques, sequencing, and processing to meet specific determined needs of groups.

TRAL 217, INTERMEDIATE ROCK, 2 Credits
 Begins by affirming rock site management foundational skills such as proper equipment, knots, belay techniques, rappelling, and basic climbing anchor systems. Then focuses on building upon those foundational skills by covering more complex anchor systems, belay techniques, vertical rescues, releasable rappels, and movement through various rock specific terrains.
Recommended: TRAL 172 or similar training and equivalent skill level

TRAL 218, ROCK SITE MANAGEMENT, 2 Credits
 Begins by affirming Intermediate Rock foundational skills such as proper equipment, knots, belay & lead climbing techniques, movement, rappelling, and basic climbing anchor systems based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Class will then focus on building upon those foundational skills by covering more complex anchor systems, belay techniques, vertical rescues, releasable rappels and movement through various rock specific terrains.
Prerequisite: TRAL 173 with C or better or PAC 173 with C or better

TRAL 251, RECREATION RESOURCE MANAGEMENT, 4 Credits
Overview of recreation resource management including study of land and water resources used for outdoor recreation. The planning and management of natural and cultural resources for long-term resource productivity, with a focus on rural and wildlife areas of the forest, range and coast.
Equivalent to: FES 251
Available via Ecampus

TRAL 260, INTERMEDIATE PADDLESPORT, 2 Credits
Learn how to successfully paddle as a competent group member within moving water & whitewater environments up to class III. This course will emphasize that the student has a holistic approach to river running, can be an effective group member during river rescues, can contribute to the safety, group skills and leadership of a river descent and showcase the knowledge required of an intermediate whitewater paddler based on internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Uses a variety of diverse whitewater specific kayaks and canoes.
Prerequisite: (TRAL 110 with C or better or PAC 110 with C or better) and (TRAL 111 [C] or PAC 111 [C])
TRAL 270, PRE-INTERNSHIP SEMINAR, 1 Credit
Exploration of career goals, internship opportunities, and the variety of practice areas in the tourism, recreation, and adventure leadership (TRAL) professions. Student preparation in planning, obtaining, and completing TRAL internships. The course is designed to assist undergraduate majors in TRAL prepare for the required internship. Graded P/N.
Equivalent to: TOL 270

TRAL 280, OUTDOOR LEADERSHIP FUNDAMENTALS, 3 Credits
A week-long outdoor expedition focusing on water-based and land-based skills while developing a comprehensive understanding of expedition behavior. Students will meet in the classroom to prepare for the week-long field expedition covering various topics such as risk management, expedition planning, navigation, water safety and other topics. The expedition will expose students to extended travel in the backcountry while further developing technical and interpersonal skills.
Prerequisite: (TRAL 110 with C or better or PAC 110 with C or better) and (TRAL 111 [C] or PAC 111 [C]) and TRAL 115 [C] and TRAL 118 [C] and TRAL 173 [C]

TRAL 299, SPECIAL TOPICS, 0-16 Credits
Topics of current importance in tourism, recreation, and/or adventure leadership education. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

TRAL 309, CERTIFICATION PRACTICUM, 2 Credits
Allows students the opportunity to acquire nationally or internationally recognized certification in one or more disciplines. Will provide an avenue for students to acquire professional faculty guidance and mentoring so they are more able to attain a certification.
This course is repeatable for 6 credits.

TRAL 351, OUTDOOR RECREATION MANAGEMENT ON PUBLIC LANDS, 3 Credits
Explores current issues and problems in outdoor recreation management on public lands and approaches to address these. Emphasis on day-to-day, field-based management of recreation resources, rather than broad-scale planning.
Prerequisite: TRAL 251 with C- or better or FES 251 with C- or better
Equivalent to: FES 351

TRAL 352, WILDERNESS MANAGEMENT, 3 Credits
Wilderness as land use concept. Wilderness history, preservation, planning and management. Wilderness in the context of other land uses.
Equivalent to: FES 352
Available via Ecampus

TRAL 353, NATURE, ECO, AND ADVENTURE TOURISM, 4 Credits
Examines natural resource-based tourism issues in both domestic and international contexts, with examples from around the world. Explores distinctions between nature-based tourism and other forms of tourism (e.g., traditional mass tourism, adventure tourism, ecotourism), positive and negative impacts of natural resource-based tourism (e.g., social, cultural, economic, environmental), and other related issues such as marketing, accreditation and certification, poverty and pro-poor tourism, and sustainable design.
Equivalent to: FES 353

TRAL 354, COMMUNITIES, NATURAL AREAS, AND SUSTAINABLE TOURISM, 3 Credits
Introduces students to macro-level community and regional issues associated with tourism in natural areas. Explores positive and negative community impacts associated with tourism, traditional government-based tourism management and policies; community-based tourism management, and partnerships and stakeholder collaboration. Domestic and international examples are used to illustrate concepts and principles.
Equivalent to: FES 354

TRAL 355, *PARKS AND PROTECTED AREAS MANAGEMENT, 3 Credits
Provides a broad yet comprehensive understanding of the theories, problems, and techniques of managing parks, wild and scenic rivers, wilderness, and other protected areas. Covers the evolution of policies and recent issues in management of these protected areas, in the United States and around the world. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

TRAL 357, NATURE, ECO, AND ADVENTURE TOURISM, 4 Credits
Examines natural resource-based tourism issues in both domestic and international contexts, with examples from around the world. Explores distinctions between nature-based tourism and other forms of tourism (e.g., traditional mass tourism, adventure tourism, ecotourism), positive and negative impacts of natural resource-based tourism (e.g., social, cultural, economic, environmental), and other related issues such as marketing, accreditation and certification, poverty and pro-poor tourism, and sustainable design.
Equivalent to: FES 353

TRAL 370, DESIGN AND MANAGEMENT OF OUTDOOR EXPERIENCES, 4 Credits
Introduction to pedagogical, administrative, and organizational knowledge, skills, and dispositions for effective design and management of effective short and extended duration outdoor experiences in wilderness-like areas. Covers personnel logistics, site planning, itinerary planning, educational and skills progression, communication with volunteers and program contracts, budgets.
Prerequisite: TRAL 280 with C or better or TOL 375 with C or better
Equivalent to: TOL 370
Recommended: Junior standing

TRAL 372, ETHICS AND ADVENTURE LEADERSHIP, 3 Credits
Examines ethical issues and situations inherent in adventure leadership and other experiential education settings. Leading adventure programs entails judgment-laden decisions that are made every hour of every day concerning participants, leaders, and programs. Students will become familiar with predominant ethical theories and apply these theories to practical situations with a view to assessing the values that influence their decisions and subsequent actions. Students will better understand how their decisions influence their professional work and those of others within the context of adventure leadership.
Equivalent to: TOL 372
Recommended: TOL 375 or TRAL 375 or other writing intensive course
TRAL 373, WILDERNESS AND ADVENTURE EDUCATION, 4 Credits
Rationale for and methods used in the application of wilderness and outdoor adventure education programs in education, recreation, corporate and human service settings. Covers historical and contemporary philosophies and practices in adventure education, with a primary emphasis on outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Also explores the role of wilderness in the context of the United States and differing views of what constitutes wilderness from an international perspective.
Equivalent to: TOL 373
Recommended: TRAL 375 or TOL 375

TRAL 374, OUTDOOR ADVENTURE EDUCATION, 3 Credits
Rationale for and methods used in the application of outdoor adventure education programs in education, recreation, corporate and human service settings. Historical and contemporary philosophies and practices in outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Examines outdoor adventure education in the context of the United States and differing paradigms informing the practice in other cultures internationally. Presents current research in outdoor adventure education.
Prerequisite: TRAL 130 with C or better and TRAL 132 [C] and TRAL 215 [C]

TRAL 375, EXPERIENTIAL EDUCATION, 4 Credits
Theory, techniques, and practice of experiential education. Students will define learning objectives, design curriculum, develop teaching materials, and effectively teach a variety of audiences. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: TOL 375

TRAL 377, EXPEDITIONS I WATER, 5 Credits
A field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended water based expedition of one week or longer. Technical skill emphasis is on whitewater kayaks and/or rafts and/or canoes with an additional focus on swift water rescue skills.
Prerequisite: TRAL 370 with C or better and TRAL 260 [C]
Corequisites: TRAL 379
Equivalent to: TOL 377

TRAL 378, TOURISM AND RECREATION DATA ANALYSIS, 3 Credits
Introduces students to descriptive and inferential statistics. The focus is on 1) applying relevant statistical analyses to tourism and recreation data and 2) interpreting results.
Equivalent to: TOL 378
Recommended: MTH 111

TRAL 379, EXPEDITIONS II-LAND, 10 Credits
This is a field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended backcountry expedition of three weeks or longer. Emphasis is on mountaineering skills in a backcountry context.
Prerequisite: TRAL 370 with C or better
Corequisites: TRAL 377
Equivalent to: TOL 379

TRAL 399, SPECIAL TOPICS, 0-16 Credits
Topics of current importance in tourism, recreation, and/or adventure leadership education. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

TRAL 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: TOL 401
This course is repeatable for 16 credits.

TRAL 406, PROJECTS, 1-16 Credits
Equivalent to: TOL 406
This course is repeatable for 16 credits.

TRAL 410, INTERNSHIP, 1-16 Credits
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
Equivalent to: TOL 410
This course is repeatable for 16 credits.

TRAL 432, ECONOMICS OF RECREATION AND TOURISM, 3 Credits
Applications of economic theory, concepts, and methods to outdoor recreation and nature-based tourism resources, projects and plans. Key topics include analyses of economic impacts, benefits and costs, demand and supply, and non-market valuation (e.g., revealed, stated, and benefit transfer methods).
Equivalent to: FES 432
Recommended: (AEC 350, ECON 201 or 201H) and (ST 202 or 202H)

TRAL 456, PLANNING FOR SUSTAINABLE RECREATION, 4 Credits
Concepts related to the creation and design of outdoor recreation plans. Techniques for collecting data pertaining to visitor experiences and preferences. Recreation planning at several levels, both for public and private lands, with emphasis on larger scale site planning where recreation is integrated with other resource uses. Lec/lab.
Prerequisite: TRAL 251 with C- or better or FES 251 with C- or better
Equivalent to: FES 456
TRAL 457, PLANNING FOR SUSTAINABLE TOURISM, 4 Credits
Examines relationships among tourists, tourism developments, and the planning of tourist attractions and services. Focuses on planning tourist resources and programs within a geographic region, as well as at both the destination and site levels. Planning tools and design concepts are reviewed, analyzed, and applied. Lec/lab.
Prerequisite: TRAL 251 with C or better or FES 251 with C or better
Equivalent to: FES 457

TRAL 474, ENTREPRENEURSHIP IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP, 3 Credits
Creation and management of tourism and outdoor leadership businesses. Covers principles of running a successful business and includes special considerations for operations on public lands (e.g., concessionaires).
Equivalent to: TOL 474
Recommended: BA 101

TRAL 476, RISK MANAGEMENT IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP, 3 Credits
Risk management in tourism and outdoor leadership from an operational perspective. Focuses on risk in tourism and outdoor education programs as a contributing factor for learning, growth, and satisfaction of client motivations. Covers the nature of accidents in outdoor settings, addresses the practitioner’s perspective of risk in the field, and describes theories and methods of implementing risk management. Covers the ethics of utilizing risk and potentially dangerous activities as a basis for enhancing client education and experience.
Equivalent to: TOL 476

TRAL 477, ADVENTURE THERAPY, 3 Credits
Provides students with an overview of adventure therapy, including its history, theory, current status and future trends. Includes program design, ethical issues, and best practices in the field.
Equivalent to: TOL 477

TRAL 478, LEGAL ISSUES IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP, 3 Credits
Covers the legal dimensions of tourism and outdoor leadership activities. Students will learn about the civil and criminal judicial system from a tourism and outdoor leadership perspective. They will learn to apply risk management methodologies and instruments, such as contracts, insurance, waivers and releases to address legal liability. The basic principles of intentional and negligent torts will be discussed, with an emphasis on practical applications. Also covers employment issues and general business law, including business structure and the use of entities as liability shields.
Prerequisite: TRAL 375 with C- or better or TOL 375 with C- or better
Equivalent to: TOL 478

TRAL 479, *NATURE AND THE HUMAN EXPERIENCE, 3 Credits
Examines the human experience with (and within) nature from biological, psychological, spiritual, and international/cultural perspectives. Identifies opportunities for fostering the human-nature connection to achieve organizational goals and individual and societal health. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: TOL 479
Recommended: TOL 375 or other equivalent WIC course.

TRAL 493, ENVIRONMENTAL INTERPRETATION, 4 Credits
Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
Equivalent to: FES 493
Available via Ecampus

TRAL 499, SPECIAL TOPICS, 1-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
Equivalent to: TOL 499
This course is repeatable for 16 credits.
Available via Ecampus

TRAL 593, ENVIRONMENTAL INTERPRETATION, 4 Credits
Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
Equivalent to: FES 593
Available via Ecampus

Wood Science & Engineering (WSE)

WSE 111, RENEWABLE MATERIALS FOR A GREEN PLANET, 2 Credits
Renewable materials are an integral part of modern lifestyles, and current societal trends point to increased use of renewable materials. This course provides an overview of renewable materials and their current applications in society. As an overview course, it covers a breadth of renewable material uses and exposes students to life-cycle thinking.

WSE 210, RENEWABLE MATERIALS TECHNOLOGY AND UTILIZATION, 4 Credits
Characteristics and uses of renewable fiber products including wood, bamboo and grasses; manufacturing processes; effect of tree growth and harvesting on renewable products manufacturing and properties. Wood identification. Lec/lab.
Equivalent to: FP 210
WSE 211, WOODTURNING WITH SCIENCE I, 4 Credits
An introduction to scientific woodturning. Students will get a grounding in tools, lathes, sharpening, and set-up, and then will transition into turning basic forms (spindle and bowl). Particular relevance will be placed upon grain orientation, wood moisture content, wood anatomy, wood chemistry, wood species and extractive effects, and how all of these attributed affect both form and function. Class instruction will be entirely studio based. CROSSLISTED as ART 211/WSE 211.
Equivalent to: ART 211
This course is repeatable for 8 credits.

WSE 225, DEVELOPMENTS OF BUILDING DESIGN WITH RENEWABLE MATERIALS, 3 Credits
Introduction to architectural design, considering the different building requirements and the solutions available, with a focus on wood-based products and other ligno-cellulosic materials.

WSE 250, CAD: COMPUTER AIDED DESIGN, 3 Credits
Provides students with the tools and techniques to design and render products, furniture, and structures using Solidworks, as well as create technical drawings that facilitate communication between designers, engineers, and clients. The techniques developed during this course are applicable to a wide variety of industrial CAD and product design industries worldwide. Lec/lab/studio.
Available via Ecampus

WSE 266, *INDUSTRIAL HEMP, 3 Credits
Introduction to the botany, biology and agronomy of the hemp plant, and the origins, historical contexts and implications of contemporary legal and social issues surrounding its use for food, fiber, and building products. Taught via Ecampus only. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture
Available via Ecampus

WSE 299, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

WSE 320, ANATOMY OF RENEWABLE MATERIALS, 3 Credits
Examination of macroscopic and microscopic anatomy of renewable (plant based) materials commonly used by society. Learning activities including lecture and the hands-on study of the various plant materials and their components with naked-eye, hand lens, and microscopic examination. Lec/lab.

WSE 321, CHEMISTRY OF RENEWABLE MATERIALS, 3 Credits
Chemical structures and chemical properties of renewable plant-based materials will be taught at molecular levels. Chemical compositions of different renewable materials will be covered. Chemical and biochemical modifications and applications or renewable materials will be discussed in detail. Lec/lab.
Prerequisite: CH 122 with D- or better or CH 202 with D- or better or CH 232 with D- or better or CH 232H with D- or better

WSE 322, PHYSICAL AND MECHANICAL PROPERTIES OF RENEWABLE MATERIALS, 4 Credits
Introduction to thermodynamics and mechanics of plant fibers, solid wood and bio-based composites: hygroscopicity; heat and mass transport; statics, elasticity and strength of materials; mechanical properties.
Prerequisite: WSE 321 with C- or better

WSE 324, RENEWABLE MATERIALS LABORATORY, 3 Credits
Integrates the knowledge gained in the core science courses (WSE 321 and WSE 322) to help students obtain a deeper understanding of how chemistry, physics, and anatomy affect renewable material properties. The course uses renewable fiber materials such as hardwoods, softwoods, natural fibers, bamboo, composite wood products (e.g. OSB, plywood, MDF, etc.) and fiber-based products (e.g. wood-plastic composites, natural fiber composites, straw panels, paper, etc.) to examine the intricate relationships between fundamental properties and performance. Lec/lab.
Prerequisite: WSE 321 with C- or better and WSE 322 [C-]

WSE 350, WOODWORKING FOR ART AND DESIGN, 3 Credits
Acquaints students with the fundamentals of making art and design objects with wood.

WSE 351, ADVANCED CAD: COMPUTER AIDED DESIGN, 3 Credits
Develop advanced techniques using industry standard CAD software as it relates to wood based product, furniture, and structural design. Build upon the skills acquired during WSE 250 CAD: COMPUTER AIDED DESIGN and learn advanced Solidworks techniques. Introduction to Rhinoceros 3D software and various parametric plugins. Lec/studio.
Prerequisite: WSE 250 with C- or better

WSE 352, CAM FOR THE CNC ROUTER AND LASER ENGRAVER, 3 Credits
Process G-code using CAM software for CNC routing operations, as well as create raster and vector drawings for laser cutting/engraving applications. Each student will work through the design process researching and conceptualizing ideas, 3D modeling designs, developing working prototypes, and fabricating a final product. Lec/lab/studio.
Prerequisite: WSE 350 with C- or better
Recommended: Introductory level CAD course or demonstrated proficiency in industry standard CAD software
WSE 385, *EVALUATING SUSTAINABILITY THROUGH LIFE CYCLE ANALYSIS, 3 Credits
With increased focus on sustainability, it has become important to quantify a sustainability metric of a material, process, or a system. To that end an understanding of life cycle analysis (LCA) is needed that can be used to determine a sustainability metric. This Ecampus course presents the use of LCA to gain insights on the environmental and social impacts of the choices we make. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

WSE 392, *BAMBOOLOOZA: THE FASCINATING WORLD OF BAMBOO, 3 Credits
An exploration of the world of bamboo and its application to renewable products. This course provides an in-depth understanding of a renewable material bamboo from its native form to processed products. Additionally, this course discusses the utilization and perception of bamboo in different societies of the world. Taught via Ecampus only. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

WSE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

WSE 401, RESEARCH, 1-16 Credits
Equivalent to: FP 401
This course is repeatable for 16 credits.

WSE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

WSE 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: FP 405
This course is repeatable for 16 credits.

WSE 406, PROJECTS, 1-16 Credits
Equivalent to: FP 406
This course is repeatable for 16 credits.

WSE 413, WOODTURNING WITH SCIENCE II, 4 Credits
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. CROSSLISTED as ART 413/WSE 413.
Prerequisite: WSE 210 with C- or better and WSE 211 [C-]
Equivalent to: ART 413, FP 413
This course is repeatable for 8 credits.

WSE 414, WSE ART AND DESIGN CAPSTONE, 8 Credits
Brings together the basic collaborative design elements and technical background of each student in the creation of collaborative design projects with the intention of giving students real-world, problem-based design experience.
This course is repeatable for 16 credits.

WSE 425, TIMBER TECTONICS IN THE DIGITAL AGE, 4 Credits
An exploration of the advances in design, construction and fabrication of timber buildings. Includes experimentation with both physical and digital models and a final project, in collaboration with UO Architecture students. Lec/lab/studio.
Recommended: Junior standing and knowledge of CAD

WSE 430, FUNDAMENTALS OF ENGINEERING MECHANICS, 4 Credits
An introduction to fundamentals of engineering mechanics for RM students selecting Science and Engineering option. While in most aspects the course follows standard introductory mechanics courses for engineers, special attention is paid to elasticity and strength in cellular and anisotropic materials like solid wood and bio-based composites. The overall objective of this course is to provide fundamental knowledge and practical skills in the area of engineering mechanics and mechanical principles behind some of the most important methods of characterization, processing, and utilization of renewable biomaterials; commonly used today, emerging and future. Lec/lab.
Prerequisite: MTH 254 with D- or better and WSE 324 [B-]

WSE 444, STRAND-BASED COMPOSITES MANUFACTURE, 1 Credit
The strand-based composites manufacturing process uses the results of research projects and the instructor's mill experience. All aspects of the process from wood procurement through pressing are discussed. This course will be valuable to those interested in a manufacturing career.
Available via Ecampus

WSE 450, ENTREPRENEURIAL PRODUCT DEVELOPMENT I, 3 Credits
Provides an entrepreneurial experience in product development, in which students design, produce, market, and sell a product in a business setting. Working as a team, students will design a product using renewable materials and are expected to perform and understand manufacturing techniques and processes to produce the product in limited quantities.
Prerequisite: WSE 250 with C- or better and WSE 455 [C-]

WSE 451, ENTREPRENEURIAL PRODUCT DEVELOPMENT II, 3 Credits
Provides an entrepreneurial experience in product development, in which students design, produce, market, and sell a product in a business setting. Working as a team, students will design a product using renewable materials and are expected to perform and understand manufacturing techniques and processes to produce the product in limited quantities. Lab/studio.
Prerequisite: WSE 250 with C- or better and WSE 450 [C-] and WSE 455 [C-]
WSE 453, ^FOREST PRODUCTS BUSINESS, 3 Credits
Provides students with the skills necessary to operate effectively in the global forest products industry. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: ECON 201 and ECON 202

WSE 455, INDUSTRIAL MARKETING IN THE FOREST SECTOR, 3 Credits
Marketing relies heavily on effective communication, so this course concentrates on written and oral communication. The course will arm students with the skills necessary to apply basic concepts of marketing of forest products. Application will be highlighted through examples and industry speakers relating course work to the day-to-day work in business.
Equivalent to: FP 455

WSE 458, DESIGN OF WOOD STRUCTURES, 3 Credits
Study of basic wood properties and design considerations. Design of wood connectors, beams, columns, and beam columns. Introduction to plywood and glue laminated members. Design of structural diaphragms and shear walls. Taught via Ecampus only.
Prerequisite: CE 381 with C or better
Equivalent to: CE 484
Available via Ecampus

WSE 461, BIO-BASED PRODUCTS MANUFACTURING, 4 Credits
First of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include the major processing steps for the conversion of raw materials such as wood, bamboo, hemp, and cereal straws into products.
Prerequisite: WSE 210 with C- or better and WSE 321 [C-] and WSE 324 [C-]

WSE 462, ADVANCED MANUFACTURING 1, 4 Credits
Second of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process design elements, quality control, and approaches to continuous process improvement.
Prerequisite: WSE 461 with C- or better

WSE 463, ADVANCED MANUFACTURING 2, 4 Credits
Third of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process control, optimization, automation, and contemporary topics such as Big Data and the Internet of Things and the potential impacts of the trends on manufacturing enterprises.
Prerequisite: WSE 462 with C- or better

WSE 465, RENEWABLE MATERIALS MANUFACTURING EXPERIENCE, 2 Credits
Learning about and visiting a number of renewable materials industrial and commercial operations representing all parts of the renewable materials value chain. The class will meet daily for one 5-day week immediately prior to the start of fall term. During the week, the students and at least one instructor will meet daily. Lectures will precede visits to industrial plants, mills and sites. At the end of the day, an instructor will participate in a debriefing session, reiterating what was learned during the day. Students will then submit a report on the day’s activities. The class includes daily travel and overnight stays.
This course is repeatable for 4 credits.

WSE 470, *FORESTS, WOOD, AND CIVILIZATION, 3 Credits
Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: WSE 470H
Available via Ecampus

WSE 471, RENEWABLE MATERIALS IN BUILDING CONSTRUCTION, 3 Credits
Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced.

WSE 473, BIOENERGY AND ENVIRONMENTAL IMPACT, 3 Credits
Explores world’s use of woody biomass fuels, their potential to contribute to our region’s energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products.
Prerequisite: ((MTH 111 with D- or better or MTH 112 with D- or better or MTH 231 with D- or better or MTH 241 with D- or better or MTH 245 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better) and (CH 122 [D-] or CH 222 [D-] or CH 232 [D-] or CH 232H [D-]))

WSE 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 99 credits.

WSE 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FP 501
This course is repeatable for 16 credits.

WSE 503, THESIS, 1-16 Credits
Equivalent to: FP 503
This course is repeatable for 999 credits.
WSE 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: FP 505
This course is repeatable for 16 credits.

WSE 506, PROJECTS, 1-16 Credits
Equivalent to: FP 506
This course is repeatable for 16 credits.

WSE 507, SEMINAR, 1 Credit
Section 1: Beginning Seminar. Section 2: Seminar. Graded P/N.
Equivalent to: FP 507
This course is repeatable for 99 credits.

WSE 513, WOODTURNING WITH SCIENCE II, 4 Credits
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based.
This course is repeatable for 12 credits.
Recommended: WSE 210 and WSE 211

WSE 514, WSE MASTER OF DESIGN CAPSTONE, 3 Credits
Focuses on preparing MDes students for displaying and marketing their work in competitive studio settings. Become familiar with finding a venue, advertising, designing a space, tracking lighting, hanging or displaying work, administering a show opening, and publicizing work using an artist/designer statement, as well as producing a catalog. Assessment will be via a three party critique of work, composed of one artist, one designer, and one scientist. Assessment will relate to the student’s ability to defend critique, put together a cohesive show, and create an appropriate body of work.
Prerequisite: WSE 522 with C or better

WSE 516, INTRODUCTION TO SCULPTURAL WOODTURNING, 4 Credits
The development of studio/sculptural woodturning has a unique history, and involves a cluster of specialized skills. This course blends historic woodturning practices with modern approaches and aesthetics to bring an understanding of wood science into this very specialized field of woodturning.
Prerequisite: WSE 513 with B or better and WSE 514 [B]
This course is repeatable for 12 credits.

WSE 521, WOOD SCIENCE I, 4 Credits
A comprehensive overview and integration of wood anatomy, wood physics, wood chemistry and wood mechanics; global contemporary issues impacting the wood and fiber sector; integration of basic wood sciences to understand the complex relationships between environment and wood material properties, and the influence of both on the use of wood-based materials.

WSE 522, WOOD SCIENCE II, 4 Credits
Continuation of the comprehensive overview and integration of wood and fiber anatomy, physics, chemistry, and mechanics; integration of basic wood science to understand relationships with wood and fiber properties and their impact on final use. Focus on biological, chemical and physical degradation of wood; adhesion; and physical and engineering properties of wood. Lec/lab.

WSE 525, TIMBER TECTONICS IN THE DIGITAL AGE, 4 Credits
An exploration of the advances in design, construction and fabrication of timber buildings. Includes experimentation with both physical and digital models and a final project, in collaboration with UO Architecture students. Lec/lab/studio.
Recommended: Knowledge of CAD

WSE 526, STRUCTURAL HEALTH ASSESSMENT/MONITORING OF TIMBER BUILDINGS, 3 Credits
Holistic approaches for the evaluation of the performance of timber systems and structures in a building. Learn about the tools available to experts for different analysis purposes, and to understand how data acquired from different techniques can be analyzed and used to inform building management and maintenance, fabrication and construction practices, and future design.

WSE 530, POLYMER COMPOSITES, 3 Credits
A comprehensive survey of the material and mechanical properties of polymer-based composite materials including failure mechanisms, interfacial and nanoscale effects, and transport and thermal properties.
Recommended: CHE 545 and multivariable calculus

WSE 535, POLYMER SYNTHESIS AND STRUCTURE, 3 Credits
A comprehensive overview of various synthetic methods for various synthetic polymers; structures of various synthetic and natural polymers.
Recommended: 3 credits of undergraduate organic chemistry or CH 331 or CH 334

WSE 553, FOREST PRODUCTS BUSINESS, 3 Credits
Provides students with the skills necessary to operate effectively in the global forest products industry.
Recommended: ECON 201 and ECON 202
WSE 555, INDUSTRIAL MARKETING IN THE FOREST SECTOR, 3 Credits
Marketing relies heavily on effective communication, so this course concentrates on written and oral communication. The course will arm students with the skills necessary to apply basic concepts of marketing of forest products. Application will be highlighted through examples and industry speakers relating coursework to the day-to-day work in business.
Equivalent to: FP 555

WSE 558, WOOD DESIGN, 4 Credits
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as CE 584/WSE 558.
Equivalent to: CE 584
Recommended: CE 383 or CE 481 with minimum grade of C

WSE 561, BIO-BASED PRODUCTS MANUFACTURING, 4 Credits
First of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include the major processing steps for the conversion of raw materials such as wood, bamboo, hemp, and cereal straws into products.
Recommended: WSE 210 and WSE 321 and WSE 324

WSE 562, ADVANCED MANUFACTURING 1, 4 Credits
Second of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process design elements, quality control, and approaches to continuous process improvement.
Recommended: WSE 461

WSE 563, ADVANCED MANUFACTURING 2, 4 Credits
Third of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process control, optimization, automation, and contemporary topics such as Big Data and the Internet of Things and the potential impacts of the trends on manufacturing enterprises.
Recommended: WSE 462

WSE 571, RENEWABLE MATERIALS IN BUILDING CONSTRUCTION, 3 Credits
Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced.

WSE 573, BIOENERGY AND ENVIRONMENTAL IMPACT, 3 Credits
Explores world’s use of woody biomass fuels, their potential to contribute to our region’s energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products.
Recommended: (MTH 111 or MTH 112 or MTH 231 or MTH 241 or MTH 245 or MTH 251 or MTH 251H) and (CH 122 or CH 222)

WSE 592, ADVANCED WOOD DESIGN, 4 Credits
Recommended: Understanding of basic concepts in mechanics and timber design

WSE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 99 credits.

WSE 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FP 601
This course is repeatable for 16 credits.

WSE 603, THESIS, 1-16 Credits
Equivalent to: FP 603
This course is repeatable for 999 credits.

WSE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

WSE 606, PROJECTS, 1-16 Credits
Equivalent to: FP 606
This course is repeatable for 16 credits.

WSE 607, SEMINAR, 1 Credit
Section 1: Beginning Seminar. Section 2: Graduate Seminar.
Equivalent to: FP 607
This course is repeatable for 99 credits.

WSE 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Forest Ecosystems and Society
The faculty, staff, and students in the Department of Forest Ecosystems and Society are dedicated to the discovery and dissemination of knowledge related to the interactions among landscapes, forests, and people. Humans are dependent on forests in many ways. We seek to understand the diversity of benefits derived from forests and expand our knowledge of how forests function to provide those benefits. We provide the expertise needed by scientists, managers, and the general public as they jointly decide how these values can be sustained in the face of climate change, land use pressures and economic uncertainties. We contribute scientific understanding to decisions that lead to sustaining
these important values on forestlands in Oregon, in the U.S., and around the globe now and in the future.

The Department of Forest Ecosystems and Society offers a graduate program in Forest Ecosystems and Society. The program includes Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. The department also offers an online-only Master of Natural Resources (MNR) degree and online-only graduate certificates in Sustainable Natural Resources; Urban Forestry; and Forests and Climate Change.

Research
Research in the Department of Forest Ecosystems and Society focuses on fundamental and applied research to help solve complex natural resource challenges. We integrate biophysical and social sciences across scales within natural and managed forest ecosystems. The MS and PhD programs emphasize the ability to define and solve researchable problems and function in interdisciplinary terms. Graduate students are encouraged to participate actively in the department's large, diverse program of seminars, continuing education courses and workshops, international research, and other professional and educational activities.

Forest Ecosystems and Society Graduate Degree Programs

The MS and PhD degrees in Forest Ecosystems and Society are structured specifically for those interested in careers in resource management, research, teaching, and specialized areas of forest science, social science, and interdisciplinary science. The degrees are available in seven areas of concentration: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; the science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; and sustainable recreation and tourism.

The Master of Forestry degree is a non-thesis degree that supports advancement in non-research professional forestry and forestry-related professional positions. Students prepare for careers as professional forest biologists, silviculturists, or other specialists capable of analyzing opportunities for natural resource management for landowners. This degree typically takes 12–15 months to complete and requires the student to complete a capstone project.

The Master of Natural Resources (MNR) degree is offered as a non-thesis option only. The MNR curriculum facilitates learning by natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. The MNR is taught entirely online through OSU Ecampus (although it may be possible for some students to work toward the MNR degree while in residence at OSU).

Certificates in Sustainable Natural Resources, Urban Forestry, and Forests and Climate Change are available independently, or in association with the MNR program.

Interdisciplinary Graduate Degree Programs

The Department of Forest Ecosystems and Society participates in a number of other interdisciplinary graduate degree programs at OSU, including the Master of Arts in Interdisciplinary Studies (MAIS), Master of Environmental Arts and Humanities, PhD in Molecular and Cellular Biology, Environmental Sciences, Water Resources, and Applied Economics.

Undergraduate Programs

Majors

- Natural Resources (p. 790)
- Options:
  - Conservation Law Enforcement (p. 794)
  - Ecological Restoration
  - Fish and Wildlife Conservation
  - Forest Ecosystems
  - Human Dimensions in Natural Resources
  - Individualized Specialty Option
  - Integrated Conservation Analysis
  - Landscape Analysis
  - Natural Resource Education (p. 799)
  - Policy and Management
  - Urban Forest Landscapes
  - Wildland Fire Ecology
- Tourism, Recreation, and Adventure Leadership (p. 802)
- Options:
  - Adventure Leadership Education
  - Nature, Eco- and Adventure Tourism
  - Outdoor Recreation Management
  - Sustainable Tourism Management

Minors

- Natural Resources (p. 789)
- Tourism, Recreation, and Adventure Leadership (p. 802)

Graduate Programs

Majors

- Forest Ecosystems and Society (p. 786)
- Natural Resources (p. 787)

Certificates

- Forests and Climate Change (p. 787)
- Sustainable Natural Resources (p. 801)
- Urban Forestry (p. 809)

Faculty

Professors Betts, Bondi, Duluca, Hall, Johnson, Kavanagh, Needham, Nelson, Puettmann, Ripple, Rosenberger, Still, Strauss
Associate Professors Creighton, Howe, Krawchuk Lindberg, Reuter, Warren, Withrow-Robinson
Assistant Professors Ahrens, D’Antonio, Davis, Hajjar, Munanura, Rosenberg, Schulze, Shen
Senior Instructors Anzinger, Bishaw, Ries, Stenper
Instructors Diebel, Fisher, Jones, Mangla, Perry
Emeritus Adams, Beschta, Bliss, Bond, Cromack, Harmon, Hibbs, Jackson, Jensen, K.N. Johnson, Lachenbruch, Law, McComb, Norris, Oester, Perry, Radosevich, Shelby, Shindler, Simon-Brown, Sollins, Tynon, Waring,

Adjunct Faculty
Bailey, Ganio, Rivers, Shaw

Courtesy/Affiliate Faculty
Alcasena Urdiroz, Alexander, Barros, Bell, Brooks, Charnley, Cheng, Christiansen, Day, Distler, Eisenberg, Gray, Hadley, Hagar, K. Hall, Homayack, Huber-Stearns, Kim, King, Kroll, Luoma, Martin Pinto, Meinzer, Newsome, Perakis, Ross, Sanders, Spies, Swanson, Taylor, Verschuyl, Woodruff, Zhang

Forest Ecosystems and Society (FES)
FES 115, ECOLOGY OF OREGON COAST FOREST, 1 Credit
A combination of lecture, lab, and field exercises to explore the ecology and development of Oregon coastal forests. Lec/lab. Graded P/N. 
Equivalent to: FS 115

FES 199, SPECIAL TOPICS, 1-16 Credits
Equivalent to: FS 199
This course is repeatable for 16 credits.

FES 202, SOFTWARE TOOLS IN QUANTITATIVE SOCIAL SCIENCE RESEARCH, 3 Credits
Develop and apply software skills to analyze quantitative social science data, then interpret and present results. Using software, students will conduct statistical analysis of primary and/or secondary data (for example, their own survey data or data from sources such as the US Census American Community Survey). 
Prerequisite: ST 201 with C or better
Equivalent to: FES 240H, FOR 240
Available via Ecampus

FES 240, *FOREST BIOLOGY, 4 Credits
Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science
Equivalent to: FES 240H, FOR 240
Available via Ecampus

FES 240H, *FOREST BIOLOGY, 4 Credits
Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)
Attributes: CPBS – Core, Pers, Biological Science; HNRS – Honors Course Designator
Equivalent to: FES 240

FES 241, DENDROLOGY, 3 Credits
Learn to identify the principal forest trees of North America, and the principal trees and shrubs of the Pacific Northwest. Also learn about forested regions of the world. Lec/lab/rec. 
Equivalent to: FES 141
Available via Ecampus

FES 242, FOREST PLANTS OF THE PACIFIC NORTHWEST, 3 Credits
Field course on the identification and ecology of forest trees, shrubs, and herbs of the Pacific Northwest. Overnight camping required. Students should be prepared to hike 3-5 miles per day.

FES 341, FOREST ECOLOGY, 3 Credits
Basic physiological characteristics of trees, successional, climax, and related concepts. Vegetation classification. Stand structure, diversity, competition, growth, soils-forests interactions, biomass and nutrient distribution, energy relations, nutrient element dynamics, ecology of disturbances.
Equivalent to: FOR 341
Available via Ecampus

FES 342, FOREST TYPES OF THE NORTHWEST, 3 Credits
Forest trees in nature are aggregated into stable or transitory associations known as forest cover types. Knowledge of forest cover types, their species composition and ecology, is applicable to the fields of forestry, fire management, wildlife management, and forest ecology.
Equivalent to: FOR 342
Available via Ecampus

FES 343, FORESTS OF THE EASTERN UNITED STATES, 3 Credits
Major Southeast US forest types will be visited and morphological, geographic, ecological and economic characteristics of important forest tree species examined.
Prerequisite: FES 141 with C or better or FES 241 with C or better
This course is repeatable for 3 credits.

FES 350, URBAN FORESTRY, 3 Credits
Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. CROSSTLISTED as FES 350/HORT 350.
Equivalent to: FOR 350
Recommended: Foundational forestry and horticulture courses
Available via Ecampus

FES 355, MANAGEMENT FOR MULTIPLE RESOURCE VALUES, 3 Credits
Management of a variety of resource attributes in multiple use context, including considerations for recreation, fish, wildlife, aesthetics, watersheds, and forest products.
Equivalent to: FOR 355
Available via Ecampus
FES 365, "Issues in Natural Resources Conservation, 3 Credits"
Background of major current issues in natural resources conservation with emphasis on forests, soils, and water and potential sustainable carrying capacity. Focus on evaluating facts and opinions related to issues. Basics of terrestrial and aquatic ecology, recent and current issues of soil, water, and forest use and management. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FOR 365
Available via Ecampus

FES 399, "Special Topics, 0-16 Credits"
This course is repeatable for 16 credits.

FES 401, "Research and Scholarship, 1-16 Credits"
Equivalent to: FS 401
This course is repeatable for 16 credits.

FES 403, "Thesis, 1-16 Credits"
Equivalent to: FS 403
This course is repeatable for 16 credits.

FES 405, "Reading and Conference, 1-16 Credits"
Equivalent to: FS 405
This course is repeatable for 16 credits.

FES 406, "Projects, 1-16 Credits"
This course is repeatable for 16 credits.

FES 407, "Seminar, 1-16 Credits"
Some sections graded A-F. This course is repeatable for a maximum of 16 credits.
This course is repeatable for 16 credits.

FES 410, "Internship, 1-16 Credits"
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
This course is repeatable for 16 credits.

FES 412, "Forest Entomology, 3 Credits"
Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values.
Prerequisite: BI 204 with C or better or BI 211 with C or better or BI 211H with C or better or BI 212 with C or better or BI 212H with C or better or BI 221 with C or better or BI 221H with C or better

FES 422, "Research Methods in Social Science, 4 Credits"
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Lec/lab.
Prerequisite: ST 201 with D- or better or ST 351 with D- or better or ST 351H with D- or better
Equivalent to: TOL 422
Available via Ecampus

FES 430, "Forest as Classroom, 4 Credits"
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.
Available via Ecampus

FES 433, "Planning Agroforestry Projects, 2 Credits"
Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions.
Prerequisite: BOT 341 with D- or better

FES 435, "Genes and Chemicals in Agriculture: Value and Risk, 3 Credits"
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSTLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FES 435H, TOX 435, TOX 435H
Recommended: One quarter each of biology and chemistry
Available via Ecampus

FES 440, "Wildland Fire Ecology, 3 Credits"
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
Equivalent to: FOR 446
Recommended: Junior or senior standing, with coursework in ecology and natural resource management
Available via Ecampus
**FES 444, ECOLOGICAL ASPECTS OF PARK MANAGEMENT, 3 Credits**

Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored.

Equivalent to: TOL 444
Recommended: An ecology course and completion or concurrent enrollment in FES 251 or FOR 251

**FES 445, ECOLOGICAL RESTORATION, 4 Credits**

Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FES 445/FW 445 and FES 545/FW 545.

Equivalent to: FOR 445, FW 445
Recommended: BI 370 or BI 370H
Available via Ecampus

**FES 447, ARBORICULTURE, 4 Credits**

The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSLISTED as FES 447/HORT 447 and FES 547/HORT 547.

Equivalent to: FOR 447, HORT 447
Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)
Available via Ecampus

**FES 450X, LARGE CARNIVORES IN ECOLOGY, 1 Credit**

Exploration of interesting effects of large carnivores on other animals and the structure and function of ecosystems. Featured carnivores include gray wolves, grizzly bears, cougars, lions, and others. Investigation of the global conservation status and trends of large carnivores and their prey.

**FES 452, BIODIVERSITY CONSERVATION IN MANAGED FORESTS, 3 Credits**

Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSLISTED as FES 452/FW 452.

Equivalent to: FS 453, FW 452
Recommended: FES 240 or FES 341 or BI 370
Available via Ecampus

**FES 454, MANAGING AT THE WILDLAND-URBAN INTERFACE, 3 Credits**

Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities.

Equivalent to: FOR 454
Recommended: FOR 111 for non-Ecampus students

**FES 455, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits**

Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 455/HORT 455 and FES 555/HORT 555.

Prerequisite: FES 350 with C- or better or HORT 350 with C- or better
Equivalent to: FOR 455, HORT 455
Available via Ecampus

**FES 477, *AGROFORESTRY, 3 Credits**

Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/NS 477 and FES 577/RNG 577. (Bacc Core Course)

Attributes: CSGI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FS 477, NR 477
Recommended: Introductory course in biology.

**FES 485, *CONSENSUS AND NATURAL RESOURCES, 3 Credits**

Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. (Bacc Core Course)

Attributes: CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FS 485
Available via Ecampus

**FES 486, ^PUBLIC LANDS POLICY AND MANAGEMENT, 3 Credits**

Examines public lands policy and management in the Western U.S. Overview of historical and current federal land management agency laws, regulations, and policies. Highlights political, legal, economic, ecological, and social context of public land management decisions. (Writing Intensive Course)

Attributes: CWIC – Core, Skills, WIC
Recommended: Sophomore standing
Available via Ecampus

**FES 499, SELECTED TOPICS IN FOREST SCIENCE, 0-16 Credits**

In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others. This course is repeatable for 16 credits.
FES 500, MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS, 3 Credits
Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies. CROSSLISTED as FES 500/MNR 500.
Equivalent to: MNR 500
Recommended: MTH 111
Available via Ecampus

FES 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FES 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FES 505, READING AND CONFERENCE, 1-16 Credits
Some sections graded P/N.
Equivalent to: FS 505
This course is repeatable for 16 credits.
Available via Ecampus

FES 506, PROJECTS, 1-16 Credits
Equivalent to: FS 506
This course is repeatable for 16 credits.
Available via Ecampus

FES 507, SEMINAR, 1-16 Credits
Some sections graded A-F.
Equivalent to: FS 507
This course is repeatable for 16 credits.

FES 508, WORKSHOP, 1-16 Credits
Equivalent to: FS 508
This course is repeatable for 16 credits.

FES 511, COMMUNITIES AND NATURAL RESOURCES, 5 Credits
Provides students from diverse backgrounds with interdisciplinary, experiential learning exposure to contemporary community and natural resource issues in rural Oregon. Social science concepts are employed to critically appraise current conditions and future prospects for rural, natural resource-dependent communities.
Equivalent to: FS 511
This course is repeatable for 15 credits.

FES 512, FOREST ENTOMOLOGY, 3 Credits
Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values.
Recommended: BI 204 or BI 211 or BI 211H or BI 212 or BI 212H or equivalent.

FES 520, POSING RESEARCH QUESTIONS, 3 Credits
Acquaints beginning graduate students in the natural resources to the scientific method and formation of good researchable questions. The course consists of lectures, readings and discussions. Concepts in the course are reinforced and amplified by discipline-specific companion modules. Students prepare and orally present a researchable question in their area of interest that is critiqued by the class and instructors.
Equivalent to: FS 520

FES 521, NATURAL RESOURCE RESEARCH PLANNING, 3 Credits
Research planning and study plan development, investigative procedures, the principles and ethics of natural resource science, principles and practices in scientific communication.
Equivalent to: FS 521

FES 522, RESEARCH METHODS SOCIAL SCIENCE, 4 Credits
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Lec/lab.
Equivalent to: FOR 522, MNR 522
Recommended: Recent statistics course

FES 523, QUANTITATIVE ANALYSIS IN SOCIAL SCIENCE, 4 Credits
Application and interpretation of statistical approaches to human dimensions of natural resources, recreation, and other social sciences. Emphasis is on an applied approach focusing on understanding data, selecting appropriate statistics for theoretical and managerial problems, using statistical software for analyses, and interpreting findings.
Recommended: (FES 522 or FOR 522) and ST 511

FES 524, NATURAL RESOURCES DATA ANALYSIS, 4 Credits
Hands-on experience in applied statistical modeling and data analysis for natural resources. Emphasis is on understanding of statistical models and the application and actual implementation of statistical analysis techniques, use of statistical software for analyses (e.g., R), and interpretation of findings. Students analyze data from their own research for final projects.
Prerequisite: ST 511 with B or better and ST 512 [B]

FES 525, INTERDISCIPLINARY APPROACHES TO SOCIO-ECOLOGICAL PROBLEMS, 3 Credits
Inter-, multi- and transdisciplinary approaches to socio-ecological problems, including terminology, assumptions, and analytical frameworks of different scientific fields. How disciplines have been integrated to approach specific case studies. Teams apply concepts, tools, and approaches in a final integrated analysis, resulting in proposed actions or policies.
FES 526, EFFECTIVE COMMUNICATION & PRESENTATION SKILLS FOR SCIENTISTS, 1 Credit
Provides an overview of communication principles and effective scientific communication skills for producing a seminar on proposed research presented to fellow scientists. Students evaluate strengths and weaknesses of communication styles; develop their ability to provide fair, timely feedback; and apply communication principles to evaluate strengths and weaknesses of presentations and proposed research. This course is repeatable for 3 credits.

FES 527, FOREST CARBON ANALYSIS FOR ASSESSMENTS AND POLICY AGREEMENTS, 3 Credits
Role of forests in mitigating greenhouse gas emissions. International GHG policies and recommendations for monitoring emissions and forest carbon. Measurement, modeling, and projections of forest ecosystem carbon. Evaluation of policies for reducing GHG emissions and increasing forest carbon stores.
Prerequisite: FES 536 with C or better
Recommended: MNR 538 or MNR 550
Available via Ecampus

FES 530, FOREST AS CLASSROOM, 4 Credits
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.
Available via Ecampus

FES 533, PLANNING AGROFORESTRY PROJECTS, 2 Credits
Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions.
Recommended: BOT 341 and/or equivalent course in ecology.

FES 535, GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK, 3 Credits
A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/TOX 435 and FES 535/MCB 535/TOX 535.
Equivalent to: BI 535, FS 535, MCB 535, TOX 535
Recommended: One quarter each of biology and chemistry
Available via Ecampus

FES 536, CARBON SEQUESTRATION IN FORESTS, 2 Credits
Examines processes controlling the sequestration of carbon in the forest system including the forest itself and wood products. Also examines how forests can be managed to sequester carbon as well as the important economic, policy, and other constraints. Lectures, readings, discussion, simulation models, and home work will be used to cover the material.
Recommended: Undergraduate-level biology or ecology.
Available via Ecampus

FES 537, BELOWGROUND ECOSYSTEMS, 3 Credits
Physical and biological components and their interactions in different soil ecosystems with description and examination of the relationships between producers and decomposers in the soil.
Recommended: Undergraduate biology or ecology courses

FES 538, VALUATION OF NON-MARKET RESOURCES, 3 Credits
Focuses on the theory and methods for estimating the economic value of non-market resources (e.g. clean air and water, biodiversity, nature-based recreation, etc.). Blends the theory and econometrics of non-market valuation through hands-on applications of methods with real datasets. The valuation of non-market resources is a burgeoning field within applied economics and should continue to grow in both importance and applications.
Recommended: AEC 512 or ECON 512

FES 540, WILDLAND FIRE ECOLOGY, 3 Credits
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
Recommended: Coursework in ecology and natural resource management

FES 542, WILDLIFE LANDSCAPE ECODY, 3 Credits
Explores the interaction between spatial pattern and scale and ecological processes with particular emphasis on biodiversity in forests. The focus is on theory, methods and conservation applications in landscape ecology.
Recommended: Undergraduate courses in ecology and concurrent enrollment in ST 511

FES 543, ADVANCED SILVICULTURE, 3 Credits
The scientific basis of forest regeneration and silvicultural practices and prescriptions in immature and mature stands. Field trips are required.
Lec/lab.
Equivalent to: FS 543
Recommended: FOR 442 and FOR 443
FES 545, ECOLOGICAL RESTORATION, 4 Credits
Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSTLISTED as FES 445/FW 445 and FES 545/FW 545.
Equivalent to: FOR 545, FW 545
Recommended: BI 370 or BI 370H
Available via Ecampus

FES 546, ADVANCED FOREST COMMUNITY ECOLOGY, 4 Credits
Fundamental concepts of community including disturbance, diversity and succession. Strong emphasis on field skills and data interpretation. Saturday field trip required. Lec/lab.

FES 547, ARBORICULTURE, 4 Credits
The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. CROSSTLISTED as FES 447/HORT 447 and FES 547/HORT 547.
Equivalent to: HORT 547
Recommended: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)
Available via Ecampus

FES 548, INVASIVE PLANTS: BIOLOGY, ECOLOGY AND MANAGEMENT, 3 Credits
Concepts of plant physiology, genetics and population dynamics are used to understand how plant invasions occur and some communities continue to exist. Management implications are explored.
Equivalent to: FS 548
Available via Ecampus

FES 550, TROPHIC CASCADES, 2-3 Credits
Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. CROSSTLISTED as FES 550/FW 550.
Equivalent to: FOR 547, FW 547, FW 550
This course is repeatable for 3 credits.

FES 552, FOREST WILDLIFE HABITAT MANAGEMENT, 4 Credits
Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. CROSSTLISTED as FES 552/FW 552.
Equivalent to: FW 552
Recommended: FOR 341 or equivalent course in ecology.
Available via Ecampus

FES 554, MANAGING AT THE WILDLAND-URBAN INTERFACE, 3 Credits
Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities.
Equivalent to: FOR 554
Recommended: FOR 111 for non-Ecampus students

FES 555, URBAN FOREST PLANNING, POLICY AND MANAGEMENT, 4 Credits
Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSTLISTED as FES 455/HORT 455 and FES 555/HORT 555.
Equivalent to: FOR 555, HORT 555
Recommended: FES 350 or HORT 350
Available via Ecampus

FES 558, CONCEPTS OF FOREST RECREATION PLANNING AND MANAGEMENT, 3 Credits
Examines research that forms the conceptual basis for tools, techniques, and approaches used in recreation planning and management.
Equivalent to: FOR 558

FES 560, GREEN INFRASTRUCTURE, 4 Credits
Explores the relationship between the natural and built environments in cities and examines how planning for and managing green infrastructure assets (such as urban tree canopy, watersheds, and natural areas) increases economic health, community livability and ecological resilience in cities.
Available via Ecampus

FES 561, PHYSIOLOGY OF WOODY PLANTS, 3 Credits
The structure, growth and physiological processes of trees and shrubs.
Equivalent to: FS 561
Recommended: ((CH 231 or CH 231H) and (CH 232 or CH 232H) and (CH 233 or CH 233H)) and CH 331 and CH 332 and BOT 331

FES 565, URBAN FORESTRY LEADERSHIP, 2 Credits
Examines the application of leadership theories and principles to the decision-making, policy creation, and effective administration of urban forestry programs in the public, private, and non-profit sectors. Taught via Ecampus only.
Available via Ecampus
FES 577, AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/NR 477 and FES 577/RNG 577.
Equivalent to: FS 577, NR 577, RNG 577
Recommended: Introductory course in biology.

FES 580, WRITING SCIENTIFIC MANUSCRIPTS, 1 Credit
Discussion of parts of a scientific manuscript and the submission, review, and publication process. Brief presentations and discussion of examples provided by the instructor and students. Students write their own manuscripts and work in teams to provide feedback on manuscript components.

FES 585, CONSENSUS AND NATURAL RESOURCES, 3 Credits
Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue.
Equivalent to: FS 585
Available via Ecampus

FES 586, PUBLIC LANDS POLICY AND MANAGEMENT, 3 Credits
Examines public lands policy and management in the Western U.S. Overview of historical and current federal land management agency laws, regulations, and policies. Highlights political, legal, economic, ecological, and social context of public land management decisions.
Equivalent to: FS 586
Available via Ecampus

FES 599, SELECTED TOPICS IN FOREST SCIENCE, 0-16 Credits
In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others.
This course is repeatable for 16 credits.
Available via Ecampus

FES 600, GLOBAL CHANGE ECOLOGY: IMPACTS, MITIGATION, AND ADAPTATION, 3 Credits
An interdisciplinary discourse on what is known about global change and dynamics of the earth system, including principles of climate, influences on ecosystem functioning and connectivity needed to understand responses of the earth system to human activities.
Equivalent to: FS 600

FES 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FES 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FES 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FES 629, TEACHING PRACTICUM IN FOREST SCIENCE, 1 Credit
Preparation of graduate students in forest science and related disciplines for their first teaching experiences. Using concepts and information introduced in the class, students will develop the curriculum for one credit of college-level instruction (or an equivalent approved by the instructor) in a topic of their choice.
Equivalent to: FS 629

FES 646, FOREST ECOSYSTEMS ANALYSIS AND APPLICATION, 4 Credits
The structure and function of forests and associated streams in natural and managed landscapes; application of ecosystem analysis to policy management decisions; roles of models; scaling from individual processes to ecosystems, landscapes, and beyond. Required classroom discussions, field trip.
Equivalent to: FS 646
Recommended: College-level ecology/biology, chemistry, and math; familiarity with Excel.

FES 669, SELECTED TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Master of Natural Resources (MNR)

MNR 500, MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS, 3 Credits
Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies. CROSSLISTED as FES 500/MNR 500.
Equivalent to: FES 500
Recommended: MTH 111
Available via Ecampus
MNR 511, INTRODUCTION TO SUSTAINABLE NATURAL RESOURCES, 3 Credits
Overview of economic, environmental, social, cultural, ethical, and policy considerations of sustainable natural resource management. International collaborative efforts to address global natural resource issues. Key policy drivers, key stressors, balancing competing interests. Introductory course required for all Master of Natural Resources students; open to other graduate students. Taught via Ecampus only.
Recommended: Undergraduate biology or ecology course
Available via Ecampus

MNR 519, DIVERSITY, EQUITY AND INCLUSION IN NATURAL RESOURCE MGMT, 3 Credits
Explores practical approaches to operationalizing diversity, equity and inclusion (DEI) principles in natural resource management organizational settings, programs and outdoor settings. Examines case studies on topics such as accessibility to recreational places, implicit bias and cultural competency in public communications, and how enhancing workplace diversity increases social capital. Introduces DEI analysis through a research project in their local area.
Available via Ecampus

MNR 522, RESEARCH METHODS SOCIAL SCIENCE, 4 Credits
An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results.
Lec/lab.
Equivalent to: FES 522
Recommended: Upper-division or graduate level statistics

MNR 530, TROPICAL FOREST ECOLOGY AND MANAGEMENT: A GLOBAL PERSPECTIVE, 3 Credits
Study of tropical forest ecology and the common ecological patterns found within tropical forests. The threats and challenges that tropical forests face in the 21st century and the issues of human use and their impacts. Developing strategies for sustainable management and restoration approaches to alleviate pressure on remaining tropical forests. Taught via Ecampus only.

MNR 538, ADAPTING FORESTS TO CLIMATE CHANGE, 3 Credits
Climate change is expected to have profound effects on forests. Society can respond by managing in forests in ways that can help mitigate climate change or help forests adapt. Nonetheless, changes in climate and forest responses are uncertain, making management and policy decisions difficult and controversial. We will investigate the effects of climate change on forests, focusing on potential forest management and policy responses.
Available via Ecampus

MNR 550, CLIMATE CHANGE IMPACTS ON FOREST ECOSYSTEMS, 3 Credits
Forest management responses to climate change rely on understanding the mechanisms of interaction between forests and climate, as well as the capacity to evaluate impacts of future climate scenarios on forests. Considers effects of rising CO2 and changing climate at the level of ecophysiological processes, changes in species distribution, changes in disturbance regimes, and ecosystem-level impacts mediated by the water, carbon, and nitrogen cycles. Modeling approaches include statistically-based bioclimatic envelopes, and dynamic global vegetation models that treat ecosystem processes and changes in biome distribution.
Recommended: Basic ecology course
Available via Ecampus

MNR 560, DEVELOPING THE MNR CAPSTONE PROPOSAL, 3 Credits
Applies content from across the MNR degree in developing a capstone project. Explores the types of capstone projects and methodologies. Identifies and evaluates the data needed to address natural resource problems or topics. Develops outlines for students’ individualized MNR capstone projects.
Prerequisite: MNR 511 with C or better
Available via Ecampus

MNR 561, MNR CAPSTONE PROJECT, 1-6 Credits
Students work with their major advisor on the completion of their capstone project at the end of the MNR degree program. Students incorporate knowledge gained from coursework to address a natural resource problem within interconnected ecological, economic and social contexts.
Prerequisite: MNR 560 with C or better or SNR 506 with P or better
This course is repeatable for 12 credits.
Available via Ecampus

Natural Resources (NR)
NR 003, UNDERGRADUATE RESEARCH, 0 Credits
Engage in research activities appropriate to the discipline; and through the research experience, acquire skills, techniques, and knowledge relevant to the field of study. In consultation with a faculty mentor, engage in research activity, and make and execute a plan for a project.

NR 201, MANAGING NATURAL RESOURCES FOR THE FUTURE, 3 Credits
Overview of the complexities involved in managing natural resources of the Pacific Northwest. Exposure to major natural resource issues of the region. Development of critical thinking skills useful in seeking solutions.
Available via Ecampus
NR 202, NATURAL RESOURCE PROBLEMS AND SOLUTIONS, 3 Credits
Exploration of the multiple components (ecological, social, political, ethical) of selected natural resource problems. Uses case studies to illustrate how social and biophysical characteristics of environmental problems influence the methods used to try to solve these problems and their potential for success.
Recommended: NR 201
Available via Ecampus

NR 312, CRITICAL THINKING FOR NATURAL RESOURCE CHALLENGES, 3 Credits
Provides an introduction to critical thinking as it applies to issues and problems in natural resources. Attention is given to formal argument analysis, fallacies of argumentation, and critical scientific and philosophical concepts.
Recommended: Sophomore standing

NR 325, SCIENTIFIC METHODS FOR ANALYZING NATURAL RESOURCE PROBLEMS, 3 Credits
Approaches to disciplinary and interdisciplinary problem analysis in natural resources. Introduces systems thinking and the benefits and limitations of different tools used to integrate information from multiple disciplines and stakeholders. Applications of alternative analysis tools are illustrated through selected forest-related case studies. Lec/lab.
Prerequisite: MTH 111 with C- or better or Math Placement - ALEKS with a score of 060
Recommended: NR 201 and (ST 201 or ST 351)

NR 351, *WHEN SCIENCE ESCAPES THE LAB: SCIENCE AND RESOURCE MANAGEMENT, 3 Credits
Role of science in solving natural resource problems. Selecting the ‘best available science.’ How science is portrayed, filtered, and used by the media and interests groups to affect policy and management. Analysis of case studies on use of science in natural resource decision making.
(Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Recommended: Sophomore standing and NR 312

NR 380, NATURE IN STORYTELLING OVER THE CENTURIES, 3 Credits
Examines the historic tendency across cultures to mythologize elements of the natural world, resulting in celebrated myths, fables, and stories. The course examines nature-based folklore from past centuries, uncovering early perceptions of landscapes, creatures, and plants held by societies and cultures. Focus then shifts to exploration of how elements of the natural world have been portrayed in contemporary film, television, and advertising, revealing how perceptions of nature have evolved over the past century. Connections between contemporary popular culture and old-world myths, fables, and stories will thus be revealed.
Available via Ecampus

NR 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

NR 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

NR 405, READING AND CONFERENCE, 1-9 Credits
This course is repeatable for 18 credits.

NR 406, PROJECTS, 1-9 Credits
This course is repeatable for 16 credits.
Available via Ecampus

NR 407, SEMINAR, 1-9 Credits
This course is repeatable for 18 credits.

NR 410, INTERNSHIP, 1-6 Credits
This course is repeatable for 12 credits.
Available via Ecampus

NR 455, NATURAL RESOURCE DECISION MAKING, 4 Credits
Students will participate on collaborative planning teams that effectively engage stakeholders in the decision making process, and offer sound natural resource decisions that are supported by multiple interests.
Prerequisite: FES 485 with D- or better and (BI 371 [D-] or BI 373 [D-] or ENSC 479 [D-] or FE 460 [D-] or FE 486 [D-] or FOR 460 [D-] or FW 435 [D-] or FW 439 [D-] or FW 454 [D-] or FW 497 [D-] or GEOG 323 [D-] or HORT 318 [D-] or SOIL 395 [D-] or WR 462 [D-])
Available via Ecampus

NR 477, *AGROFORESTRY, 3 Credits
Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/ NR 477 and FES 577/RNG 577. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues; CSST – Core, Synthesis, Science/Technology/Society
Equivalent to: FES 477, FS 477, RNG 477
Recommended: Introductory course in biology.

NR 499, SPECIAL TOPICS, 1-16 Credits
This is a hybrid course when offered by Ecampus.
Equivalent to: NR 499H

NR 499H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: NR 499
This course is repeatable for 16 credits.
Sustainable Natural Resources (SNR)

SNR 506, INDEPENDENT PROJECT IN NATURAL RESOURCE SUSTAINABILITY, 2 Credits
Students identify, pose, frame, and analyze the various components of an important natural resource sustainability problem within their country, region, or organization and, at the end of term, present a workplan for its resolution. Oral and written reports are expected. Graded P/N.
Prerequisite: SNR 511 with C or better
Available via Ecampus

SNR 511, SUSTAINABLE NATURAL RESOURCE DEVELOPMENT, 1 Credit
Using readings, class discussions, and field trips, we introduce the program sessions and pedagogical methods, familiarize students with basic working definitions of sustainability, and build capacity to work as group on a common project.
Available via Ecampus

SNR 520, SOCIAL ASPECTS OF SUSTAINABLE NATURAL RESOURCES, 3 Credits
Using readings, personal experiences, and class discussions, students explore five principles of socially sustainable natural resource management, and review the role they play in creating natural resource-based sustainable communities.
Recommended: SNR 511
Available via Ecampus

SNR 521, ECONOMICS OF SUSTAINABLE NATURAL RESOURCE MANAGEMENT, 3 Credits
Focuses on the sources of market failure, the means of correcting market failure, and the real-world examples of making progress toward sustainable resource use by means of market mechanisms.
Recommended: SNR 511
Available via Ecampus

SNR 522, BASIC BELIEFS AND ETHICS IN NATURAL RESOURCES, 3 Credits
Examines basic philosophies and ethical systems in American forestry, including Pinchot's agricultural/utilitarian approach and Leopold's biotic/ ecological model, compares them to contemporary public attitudes and considers their implications for sustainability.
Available via Ecampus

SNR 530, ECOLOGICAL PRINCIPLES OF SUSTAINABLE NATURAL RESOURCES, 3 Credits
Focus on ecological sustainability and ecological concepts and principles, with examples drawn from forests and arid lands. Exploration of global ecosystems, ecological processes and services, factors that create and maintain diversity, ecosystem health and integrity. Principles for sustainable natural resource management and use.
Recommended: SNR 511 and a basic ecology course
Available via Ecampus

SNR 531, SUSTAINABLE SILVICULTURE AND FOREST CERTIFICATION, 3 Credits
Strategies for sustainable silviculture, and measuring and verifying environmental performance (including certification systems) are examined using classroom lectures, case studies, and field exercises. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years' experience working in a natural resources-related field

SNR 532, PLANNING AGROFORESTRY PROJECTS, 2 Credits
Develop basic understanding and appreciation of agroforestry concepts, systems, technologies and practices as used and applied in tropical and temperate zones of the world.
Recommended: SNR 530 (or equivalent ecology course) and SNR 511
Available via Ecampus

SNR 533, NONTIMBER FOREST PRODUCTS: AN INTERDISCIPLINARY INTRODUCTION, 3 Credits
Interdisciplinary introduction to the culture, history, economy, ecology, policy and management of nontimber forest products (NTFP), e.g., wild foods, medicines, floral greens, craft material and landscaping species. Includes domestic public and private forest and international case studies.
Available via Ecampus

SNR 534, REDUCED IMPACT TIMBER HARVEST, 2 Credits
Explores planning, implementation, monitoring, and evaluation of reduced impact timber harvesting. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students.
Recommended: SNR 511 and at least two years' experience working in a natural resources-related field
SNR 535, SUSTAINABLE MANAGEMENT OF AQUATIC AND RIPARIAN RESOURCES, 3 Credits
Explores integrated strategies for sustainable management of watersheds, estuaries, coastal zones, and aquatic resources. Special emphasis given to links between land uses and aquatic environments. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. Recommended: SNR 511
Available via Ecampus

SNR 540, GLOBAL ENVIRONMENTAL CHANGE, 3 Credits
Explore biophysical and social sciences that underlie contemporary global change issues: global biogeochemical cycles, climate system, climate change, threats to biodiversity; human dimensions of climate change, globalization, land cover and land use change, global environmental governance and management tools. Recommended: Basic biology course
Available via Ecampus

SNR 808, WORKSHOP, 1-4 Credits
Describes the policies, practices, and market mechanisms that enhance ecological, economic, and social sustainability of natural resource production and natural ecosystems. Sustainable natural resource management attempts to meet the needs of the present without compromising the future of people or the ecosystems on which they depend. This course is repeatable for 4 credits.

Tourism and Outdoor Leadership (TRAL)
TRAL 110, INTRODUCTION TO WHITE WATER KAYAKING, 2 Credits
Students will learn fundamentals of white water kayaking in sheltered & moving water based on the internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Emphasis is on activity and basic skills.

TRAL 111, INTRODUCTION TO CANOEING, 2 Credits
Students will learn fundamentals of canoeing in sheltered & moving water based on the internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Emphasis is on activity and basic skills.

TRAL 115, OUTDOOR LIVING SKILLS, 2 Credits
Educates and introduces students on how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. Classroom and field (lab) experience. Includes one mandatory weekend overnight outing. CROSSLISTED as PAC 115/TRAL 115.
Corequisites: TRAL 118
Equivalent to: PAC 115
This course is repeatable for 4 credits.

TRAL 118, LABORATORY FOR OUTDOOR LIVING SKILLS, 1 Credit
Practical field application of concepts learned in PAC 115/TRAL 115, Outdoor Living Skills. Field (lab) experience includes one mandatory weekend overnight. Introduces how to travel safely in the backcountry through proper preparation, risk awareness, Leave No Trace ethics, terrain recognition, navigation, and camp craft. CROSSLISTED as PAC 118/TRAL 118.
Corequisites: TRAL 115
Equivalent to: PAC 118
This course is repeatable for 2 credits.

TRAL 130, INTRODUCTION TO OUTDOOR AND ADVENTURE PROFESSIONS, 3 Credits
Outdoor and adventure professions will be explored. Introduces students to practical and conceptual aspects of land and water trips in outdoor tourism, adventure, and educational settings. Innovative people and products will be examined in the context of outdoor and adventure professions and their impact, past, present, and future.
Equivalent to: TOL 130

TRAL 132, *FOUNDATIONS AND HISTORY OF OUTDOOR AND ADVENTURE PROFESSIONS, 3 Credits
History, evolution, and theoretical underpinning of outdoor and adventure professions as an important and evolving feature of Western culture within the United States and beyond. Influential ideas, paradigm shifts, events, and developments that have led to professionalism, institutionalization, dissemination, and impact on other subject areas and professions. Impact of other cultures on current state of the professions. (Bacc Core Course)
Attributes: CPWC – Core, Pers, West Culture
Equivalent to: TOL 132

TRAL 173, INTERMEDIATE ROCK CLIMBING, 2 Credits
Introduces variety of basic skills, gear and systems that will allow them to safely participate in a single pitch rock climbing environment based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Presents students with various technical skills that will serve as a foundation for future land-based outdoor disciplines. Students will be introduced to gear, such as software (ropes, webbing, harnesses) and hardware (carabiners, friction devices); skills, such as knots, belaying, rappelling, lead climbing; and systems such as anchors and basic rescue techniques. CROSSLISTED as PAC 173/TRAL 173.
Equivalent to: PAC 173
This course is repeatable for 10 credits.
TRAL 215, GROUP FACILITATION, 4 Credits
Introduces facilitation, leadership, and management of groups. Group facilitation theory, techniques, and models for use in a variety of environments and with different populations. Prominent personality types and how to effectively facilitate these. Determining needs, utilizing appropriate techniques, sequencing, and processing to meet specific determined needs of groups.

TRAL 217, INTERMEDIATE ROCK, 2 Credits
Begins by affirming rock site management foundational skills such as proper equipment, knots, belay techniques, rappelling, and basic climbing anchor systems. Then focuses on building upon those foundational skills by covering more complex anchor systems, belay techniques, vertical rescues, releasable rappels, and movement through various rock specific terrains.

TRAL 218, ROCK SITE MANAGEMENT, 2 Credits
Begins by affirming Intermediate Rock foundational skills such as proper equipment, knots, belay & lead climbing techniques, movement, rappelling, and basic climbing anchor systems based on internationally recognized American Mountain Guides Association (AMGA) teaching and skills certification systems. Class will then focus on building upon those foundational skills by covering more complex anchor systems, belay techniques, vertical rescues, releasable rappels and movement through various rock specific terrains.

TRAL 251, RECREATION RESOURCE MANAGEMENT, 4 Credits
Overview of recreation resource management including study of land and water resources used for outdoor recreation. The planning and management of natural and cultural resources for long-term resource productivity, with a focus on rural and wildlife areas of the forest, range and coast.

Equivalent to: FES 251
Available via Ecampus

TRAL 260, INTERMEDIATE PADDLESPORT, 2 Credits
Learn how to successfully paddle as a competent group member within moving water & whitewater environments up to class III. This course will emphasize that the student has a holistic approach to river running, can be an effective group member during river rescue, can contribute to the safety, group skills and leadership of a river descent and showcase the knowledge required of an intermediate whitewater paddler based on internationally recognized British Canoe (BC) and American Canoe Association (ACA) teaching and skills certification systems. Uses a variety of diverse whitewater specific kayaks and canoes.

Prerequisite: (TRAL 110 with C or better or PAC 110 with C or better) and (TRAL 111 [C] or PAC 111 [C])

TRAL 270, PRE-INTERNSHIP SEMINAR, 1 Credit
Exploration of career goals, internship opportunities, and the variety of practice areas in the tourism, recreation, and adventure leadership (TRAL) professions. Student preparation in planning, obtaining, and completing TRAL internships. The course is designed to assist undergraduate majors in TRAL prepare for the required internship. Graded P/N.

Equivalent to: TOL 270

TRAL 280, OUTDOOR LEADERSHIP FUNDAMENTALS, 3 Credits
A week-long outdoor expedition focusing on water-based and land-based skills while developing a comprehensive understanding of expedition behavior. Students will meet in the classroom to prepare for the week-long field expedition covering various topics such as risk management, expedition planning, navigation, water safety and other topics. The expedition will expose students to extended travel in the backcountry while further developing technical and interpersonal skills.

Prerequisite: (TRAL 110 with C or better or PAC 110 with C or better) and (TRAL 111 [C] or PAC 111 [C]) and TRAL 115 [C] and TRAL 118 [C] and TRAL 173 [C]

TRAL 299, SPECIAL TOPICS, 0-16 Credits
Topics of current importance in tourism, recreation, and/or adventure leadership education. Topics will change from term to term. May be repeated with different topics for credit. This course is repeatable for 16 credits.

TRAL 309, CERTIFICATION PRACTICUM, 2 Credits
Allows students the opportunity to acquire nationally or internationally recognized certification in one or more disciplines. Will provide an avenue for students to acquire professional faculty guidance and mentoring so they are more able to attain a certification.

This course is repeatable for 6 credits.

TRAL 351, OUTDOOR RECREATION MANAGEMENT ON PUBLIC LANDS, 3 Credits
Explores current issues and problems in outdoor recreation management on public lands and approaches to address these. Emphasis on day-to-day, field-based management of recreation resources, rather than broad-scale planning.

Prerequisite: TRAL 251 with C- or better or FES 251 with C- or better

Equivalent to: FES 351

TRAL 352, WILDERNESS MANAGEMENT, 3 Credits
Wilderness as land use concept. Wilderness history, preservation, planning and management. Wilderness in the context of other land uses.

Equivalent to: FES 352
Available via Ecampus
TRAL 353, NATURE, ECO, AND ADVENTURE TOURISM, 4 Credits
Examines natural resource-based tourism issues in both domestic and international contexts, with examples from around the world. Explores distinctions between nature-based tourism and other forms of tourism (e.g., traditional mass tourism, adventure tourism, ecotourism), positive and negative impacts of natural resource-based tourism (e.g., social, cultural, economic, environmental), and other related issues such as marketing, accreditation and certification, poverty and pro-poor tourism, and sustainable design.
Equivalent to: FES 353

TRAL 354, COMMUNITIES, NATURAL AREAS, AND SUSTAINABLE TOURISM, 3 Credits
Introduces students to macro-level community and regional issues associated with tourism in natural areas. Explores positive and negative community impacts associated with tourism, traditional government-based tourism management and policies; community-based tourism management, and partnerships and stakeholder collaboration. Domestic and international examples are used to illustrate concepts and principles.
Equivalent to: FES 354

TRAL 357, *PARKS AND PROTECTED AREAS MANAGEMENT, 3 Credits
Provides a broad yet comprehensive understanding of the theories, problems, and techniques of managing parks, wild and scenic rivers, wilderness, and other protected areas. Covers the evolution of policies and recent issues in management of these protected areas, in the United States and around the world. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FES 357

TRAL 370, DESIGN AND MANAGEMENT OF OUTDOOR EXPERIENCES, 4 Credits
Introduction to pedagogical, administrative, and organizational knowledge, skills, and dispositions for effective design and management of effective short and extended duration outdoor experiences in wilderness-like areas. Covers personnel logistics, site planning, itinerary planning, educational and skills progression, communication with volunteers and program contacts, budgets.
Prerequisite: TRAL 280 with C or better or TOL 375 with C or better
Equivalent to: TOL 370
Recommended: Junior standing

TRAL 372, ETHICS AND ADVENTURE LEADERSHIP, 3 Credits
Examines ethical issues and situations inherent in adventure leadership and other experiential education settings. Leading adventure programs entails judgment-laden decisions that are made every hour of every day concerning participants, leaders, and programs. Students will become familiar with predominant ethical theories and apply these theories to practical situations with a view to assessing the values that influence their decisions and subsequent actions. Students will better understand how their decisions influence their professional work and those of others within the context of adventure leadership.
Equivalent to: TOL 372
Recommended: TOL 375 or TRAL 372 or other writing intensive course

TRAL 373, WILDERNESS AND ADVENTURE EDUCATION, 4 Credits
Rationale for and methods used in the application of wilderness and outdoor adventure education programs in education, recreation, corporate and human service settings. Covers historical and contemporary philosophies and practices in adventure education, with a primary emphasis on outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Also explores the role of wilderness in the context of the United States and differing views of what constitutes wilderness from an international perspective.
Equivalent to: TOL 373
Recommended: TRAL 375 or TOL 375

TRAL 374, OUTDOOR ADVENTURE EDUCATION, 3 Credits
Rationale for and methods used in the application of outdoor adventure education programs in education, recreation, corporate and human service settings. Historical and contemporary philosophies and practices in outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Examines outdoor adventure education in the context of the United States and differing paradigms informing the practice in other cultures internationally. Presents current research in outdoor adventure education.
Prerequisite: TRAL 130 with C or better and TRAL 132 [C] and TRAL 215 [C]

TRAL 375, *EXPERIENTIAL EDUCATION, 4 Credits
Theory, techniques, and practice of experiential education. Students will define learning objectives, design curriculum, develop teaching materials, and effectively teach a variety of audiences. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Equivalent to: TOL 375

TRAL 377, EXPEDITIONS I WATER, 5 Credits
A field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead, and participate in, an extended water based expedition of one week or longer. Technical skill emphasis is on whitewater kayaking and rafting. Students will learn and practice the skills needed to safely navigate through waterways, as well as the skills to safely rescue others. This course is open to students who have successfully completed a technical water skills course, such as Swiftwater Rescue I.
Prerequisite: TRAL 370 with C or better and TRAL 260 [C]
Corequisites: TRAL 379
Equivalent to: TOL 377

TRAL 378, TOURISM AND RECREATION DATA ANALYSIS, 3 Credits
Introduces students to descriptive and inferential statistics. The focus is on 1) applying relevant statistical analyses to tourism and recreation data and 2) interpreting results.
Equivalent to: TOL 378
Recommended: MTH 111
TRAL 379, EXPEDITIONS II-LAND, 10 Credits
This is a field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended backcountry expedition of three weeks or longer. Emphasis is on mountaineering skills in a backcountry context.
Prerequisite: TRAL 370 with C or better
Corequisites: TRAL 377
Equivalent to: TOL 379

TRAL 399, SPECIAL TOPICS, 0-16 Credits
Topics of current importance in tourism, recreation, and/or adventure leadership education. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

TRAL 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: TOL 401
This course is repeatable for 16 credits.

TRAL 406, PROJECTS, 1-16 Credits
Equivalent to: TOL 406
This course is repeatable for 16 credits.

TRAL 410, INTERNSHIP, 1-16 Credits
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
Equivalent to: TOL 410
Recommended: FES 251 and FES 351 and FES 356 and FOR 391 and FOR 407

TRAL 432, ECONOMICS OF RECREATION AND TOURISM, 3 Credits
Applications of economic theory, concepts, and methods to outdoor recreation and nature-based tourism resources, projects and plans. Key topics include analyses of economic impacts, benefits and costs, demand and supply, and non-market valuation (e.g., revealed, stated, and benefit transfer methods).
Equivalent to: FES 432
Recommended: (AEC 350, ECON 201 or 201H) and (ST 202 or 202H)

TRAL 456, PLANNING FOR SUSTAINABLE RECREATION, 4 Credits
Concepts related to the creation and design of outdoor recreation plans. Techniques for collecting data pertaining to visitor experiences and preferences. Recreation planning at several levels, both for public and private lands, with emphasis on larger scale site planning where recreation is integrated with other resource uses. Lec/lab.
Prerequisite: TRAL 251 with C- or better or FES 251 with C- or better
Equivalent to: FES 456

TRAL 457, PLANNING FOR SUSTAINABLE TOURISM, 4 Credits
Examines relationships among tourists, tourism developments, and the planning of tourist attractions and services. Focuses on planning tourist resources and programs within a geographic region, as well as at both the destination and site levels. Planning tools and design concepts are reviewed, analyzed, and applied. Lec/lab.
Prerequisite: TRAL 251 with C or better or FES 251 with C or better
Equivalent to: FES 457

TRAL 474, ENTREPRENEURSHIP IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP, 3 Credits
Creation and management of tourism and outdoor leadership businesses. Covers principles of running a successful business and includes special considerations for operations on public lands (e.g., concessionaires).
Equivalent to: TOL 474
Recommended: BA 101

TRAL 476, RISK MANAGEMENT IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP, 3 Credits
Risk management in tourism and outdoor leadership from an operational perspective. Focuses on risk in tourism and outdoor education programs as a contributing factor for learning, growth, and satisfaction of client motivations. Covers the nature of accidents in outdoor settings, addresses the practitioner’s perspective of risk in the field, and describes theories and methods of implementing risk management. Covers the ethics of utilizing risk and potentially dangerous activities as a basis for enhancing client education and experience.
Equivalent to: TOL 476

TRAL 477, ADVENTURE THERAPY, 3 Credits
Provides students with an overview of adventure therapy, including its history, theory, current status and future trends. Includes program design, ethical issues, and best practices in the field.
Equivalent to: TOL 477

TRAL 478, LEGAL ISSUES IN TOURISM, RECREATION, AND ADVENTURE LEADERSHIP, 3 Credits
Covers the legal dimensions of tourism and outdoor leadership activities. Students will learn about the civil and criminal judicial system from a tourism and outdoor leadership perspective. They will learn to apply risk management methodologies and instruments, such as contracts, insurance, waivers and releases to address legal liability. The basic principles of intentional and negligent torts will be discussed, with an emphasis on practical applications. Also covers employment issues and general business law, including business structure and the use of entities as liability shields.
Prerequisite: TRAL 375 with C- or better or TOL 375 with C- or better
Equivalent to: TOL 478
TRAL 479, *NATURE AND THE HUMAN EXPERIENCE, 3 Credits
Examines the human experience with (and within) nature from biological, psychological, spiritual, and international/cultural perspectives. Identifies opportunities for fostering the human-nature connection to achieve organizational goals and individual and societal health. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: TOL 479
Recommended: TOL 375 or other equivalent WIC course.

TRAL 493, ENVIRONMENTAL INTERPRETATION, 4 Credits
Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
Equivalent to: FES 493
Available via Ecampus

TRAL 499, SPECIAL TOPICS, 1-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
Equivalent to: TOL 499
This course is repeatable for 16 credits.
Available via Ecampus

TRAL 593, ENVIRONMENTAL INTERPRETATION, 4 Credits
Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
Equivalent to: FES 593
Available via Ecampus

Forest Ecosystems and Society Graduate Major (MF, MS, PhD)

Graduate Areas of Concentration
Forest biology; forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; silviculture; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

This graduate program combines a strong social science faculty with a strong biological and ecological science faculty and so provides a rare opportunity to focus on the interface of social science and ecological science. The FES graduate program provides specific disciplinary opportunities in both ecological and social sciences in natural resource settings and also strives to develop interdisciplinary skills and knowledge. Our program objective is to develop interdisciplinary thinkers, highly capable scientists, and natural resource leaders who are prepared to solve complex socio-ecological problems. The students will be able to identify and contribute to collaborative science-based solutions in ecology and natural resources-related social science.

Master of Forestry (MF) in Forest Ecosystems—Areas of Concentration
1. Forest Biology. Management of natural resources is an increasingly complex and technical undertaking. In some cases, breadth or depth of specialization beyond the BS degree is required or is highly desirable in entry-level professional forestry positions or for advancement in non-research professional forestry positions. The MF in Forest Biology program emphasizes graduate course work in one of five areas of emphasis in forest biology, with supporting work in another area. The program can be completed in 12 months, but it may be extended in accordance with personal needs and the policies of the OSU Graduate School.

2. Silviculture. The MF in Silviculture program provides graduate-level preparation in the full range of disciplines essential for analyzing opportunities, solving problems, and making decisions in silviculture and forest resource management. Graduates from this program must demonstrate competence in the preparation of well-documented silvicultural prescriptions and in the supervision of prescription implementation. The program also provides the background for sustained career development in forest resource management.

Master of Science (MS) and Doctor of Philosophy (PHD) in Forest Ecosystems and Society—Areas of Concentration
MS and PhD students may focus their work in one of these areas of concentration or a hybrid of them: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

1. Forest, Wildlife and Landscape Ecology. The many dimensions of biodiversity are the focus of this area of concentration. Species and communities of species, act, react and interact at many spatial and temporal scales. These dynamics take place in an environment that can change gradually or quite rapidly and that can have a large impact on dynamics through direct and indirect effects on species and interspecific relationships.

2. Genetics and Physiology. This concentration explores the genetic and physiological mechanisms, from the scale of molecules and tissues to whole organisms, populations, and species, that determine how plants grow, reproduce, respond to the environment, and are managed and modified for human benefit.

3. Integrated Social and Ecological Systems. Many issues in the broad natural resources arena are truly interdisciplinary across the biophysical and the social sciences. This area of concentration focuses on the integration of these sciences in developing basic concepts and in resolving management issues.

4. Science of Conservation, Restoration and Sustainable Management. The bases for these applied sciences are found in the more basic biophysical and social sciences but their application to these complex goals generates new scientific challenges. This area of concentration seeks to develop these new scientific understandings.

5. Social Science, Policy, and Natural Resources. This concentration involves exploration of social aspects, human dimensions, and policy aspects of natural resource issues by examining linkages among
6. **Soil-Plant-Atmosphere Continuum.** The movement of energy and matter within and among ecosystems controls how these systems function and the services they provide. This area of concentration investigates the mechanisms controlling ecosystem behavior over a range of levels from the whole-plant to the globe.

7. **Sustainable Recreation and Tourism.** This concentration explores social and/or ecological topics in sustainable recreation and tourism including recreation and tourism behavior; social and ecological impacts; and planning, management, and policy.

For more information, contact the head of the department or any faculty member.

**Major Code: 1100**

All graduate students are required to take FES 520 usually in their first year and FES 525 usually in their second year.

In addition to FES 520 and FES 525, graduate students are required to take FES 526. M.S. students are expected to enroll in this 1-credit course for two terms during their course of study. Ph.D students must enroll for three terms, and M.F. students must enroll for one term.

Students will work with their major professor / advisor and advisory committee to select additional courses specific to their area of interest in order to meet the minimum number of credits required for their degree program.

**Major Code: 1100**

### Forests and Climate Change Graduate Certificate

This certificate is delivered primarily by Ecampus though some courses may also be offered on the Corvallis campus.

Forests worldwide have begun to be impacted by global climate change, and over the coming century, they will be profoundly altered by it. The adaptation of managed forests to climate change may require both silvicultural and genetics-based options. Because forests have the capacity to both emit and sequester carbon dioxide, a leading greenhouse gas contributing to climate change, there is tremendous interest in managing forests for the mitigation of climate change. These considerations suggest that a good understanding of the relationship between forests and climate change will be a critical requirement for the sustainable management of forest resources. The Forests and Climate Change (FCC) graduate certificate is designed to provide a thorough grounding in methods for assessing the impacts of climate change on forests, the evaluation of proposed adaptation strategies, and the development of management practices to enhance forest carbon sequestration for the mitigation of climate change.

The Forests and Climate Change graduate certificate is appropriate for many students, especially mid-career, company, industry or agency employees who want more training and experience in natural resources management and climate change.

### Natural Resources Graduate Major (MNR)

**Graduate Areas of Concentration**

Fisheries management, forests and climate change, geographic information science (GIScience), sustainable natural resources, urban forestry, water conflict management, and wildlife management.

**Also available via Ecampus.**

The MNR is a 45-credit online degree program with curriculum organized into three sections: core (18 credits), area of emphasis (18 credits), and capstone project (9 credits). It is taught entirely online through OSU Ecampus, although some students work toward the MNR degree while in-residence at OSU.

The MNR degree is offered as a non-thesis program with a capstone project, rather than a thesis. The MNR's contemporary content is for natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. Integration of multiple disciplines occurs through the curriculum, assignments, and a capstone project. All MNR students integrate concepts and approaches developed throughout the entire program in a final capstone project.

### Area of Emphasis

**Students may select a certificate listed below or design their own option. A certificate may not be used to satisfy core requirements:**

- Geographic Information Science (GIScience)
- Sustainable Natural Resources (SNR)
- Water Conflict Management and Transformation (WCMT)
- Fisheries Management
Natural Resources Minor

Also available at OSU-Cascades and via Ecampus.

Students majoring in other programs at OSU can choose to complete the Natural Resources minor. The minor is intended to provide a broad exposure to the natural resources field. It offers course work that integrates a number of natural resource disciplines.

Minor Code: 643

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NR 201</td>
<td>MANAGING NATURAL RESOURCES FOR THE FUTURE</td>

<tr>
<td>FES 485</td>
<td>*CONSENSUS AND NATURAL RESOURCES</td>
<td>3</td>
</tr>
</tbody>
</table>

Select three courses from the following: 9-11

Major Code: 2430

Capstone Project

Master of Natural Resources students will select one group below depending upon their area of emphasis choice. All students should choose Group 1 unless they have completed SNR 511 and SNR 506 as part of their certificate program. Students are advised not to take MNR 560 (or SNR 506) and MNR 561 during the same term. MNR 561 credits should be taken after MNR 560, and the credits may be broken up over more than one term.

Select one of the following groups: 9

Group 1
- MNR 560 DEVELOPING THE MNR CAPSTONE PROPOSAL
- MNR 561 MNR CAPSTONE PROJECT

Group 2
- SNR 511 SUSTAINABLE NATURAL RESOURCE DEVELOPMENT
- SNR 506 INDEPENDENT PROJECT IN NATURAL RESOURCE SUSTAINABILITY
- MNR 561 MNR CAPSTONE PROJECT

Students who graduate with a BS degree in Natural Resources from OSU should be able to integrate technical field or laboratory skills with analytical skills to solve critical natural resource problems. The curriculum is designed to help students acquire knowledge about a range of natural resource issues, work in interdisciplinary teams, and deal with social and political aspects of resource management.

Students acquire knowledge in biophysical and social sciences, math, and statistics. They will learn holistic resource management approaches that emphasize the interconnectedness of humans and the environment. In addition, students will develop a toolbox of resource management skills such as communication, collaboration, analysis, assessment, and planning. They explore conservation and management of key resources which include fish and wildlife, land and water resources, and a wide range of ecosystems from forests to rangelands. Students develop disciplinary depth in a focused area through a required specialty option, choosing from a number of pre-approved options, or creating an individualized (student designed) specialty option.
The Natural Resources major is also available at the OSU-Cascades campus in Bend and through the OSU Ecampus program. The Natural Resources major is an interdisciplinary program administered by the College of Forestry.

Major Code: 671

- Describe ecological processes, including human impacts that influence ecosystem change, natural succession and the future sustainability of natural resources.
- Characterize natural resources and be able to quantify at least one of these resources.
- Envision desired future conditions in an area to achieve a set of natural resource-related objectives, prescribe management actions needed to achieve those objectives, and evaluate success of these actions.
- Describe how the use, management, and allocation of natural resources are affected by laws, policies, economic factors (both market and non-market), and characteristics (including demographic, cultural, ethnic, and “values” differences) of private and public resource owners and users.
- Communicate effectively, orally and in writing, with audiences of diverse backgrounds.
- Work effectively with, and within, interdisciplinary and diverse groups to resolve management problems and achieve management objectives.

Only two courses used to complete the Natural Resources major requirements may be taken S/U.

The Natural Resources Specialty option requires a minimum GPA of 2.25.

  NATURE, ECO, AND ADVENTURE TOURISM
- **TRAL 354**  
  COMMUNITIES, NATURAL AREAS, AND SUSTAINABLE TOURISM
- **WGSS 440**  
  *WOMEN AND NATURAL RESOURCES*

**Spatial Analysis (3-4 credits)**

Select one course from the following:
- **CROP 414/HORT 414**  
  PRECISION AGRICULTURE
- **FE 257**  
  GIS AND FOREST ENGINEERING APPLICATIONS
- **FW 303**  
  SURVEY OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCE
- **GEOG 201**  
  *FOUNDATIONS OF GEOSPATIAL SCIENCE AND GIS*
- **GEOG 360**  
  GSCIENCE I: GEOGRAPHIC INFORMATION SYSTEMS AND THEORY

**Total credits required for graduation is 180**

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)

---

1. The BI 2XX series is required for some specialty options.
2. SOIL 205 is a Bacc Core course only when taken in conjunction with a laboratory course (FOR 206 or SOIL 206)
3. Completion of an option is required to earn a degree in Natural Resources
Conservation Law Enforcement Option

This option is offered within the following major(s):
- Natural Resources - College of Forestry (p. 790)

Also available via Ecampus (http://ecampus.oregonstate.edu/).

Students will be prepared to enter careers in conservation law enforcement with an understanding of the criminal justice system, environmental law and policy, human dimensions and sustainable resource management.

Option Code: 787

A minimum of 40 credits is required with at least 20 upper-division credits.

Fish and Wildlife Conservation Option

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 790)

Also available at OSU-Cascades and via Ecampus.

This option prepares students for a career in the broad arena of natural resource and wildlife conservation. It emphasizes understanding the relationship between animal species and their habitat requirements and the ability to apply this knowledge to the management of ecosystems as a means of conserving fish and wildlife.

Option Code: 672

Minimum of 40 credits is required with at least 20 upper-division credits.

Forest Ecosystems Option

This option is offered within the following major(s):

• Natural Resources - College of Forestry (p. 790)

This option will assist students in understanding the nature of forest ecosystems and the processes by which they function. Course work includes an understanding of the multiple resources and values associated with forest ecosystems and some of the techniques involved in managing them.

Option Code: 673

Minimum of 40 credits with 20 upper division credits required.

#### Philosophy and Ethics of the Environment (6-7 credits)

Select two courses from the following:
- NR 312: Critical Thinking for Natural Resource Challenges
- NR 380: Nature in Storytelling Over the Centuries
- PHL 440: Environmental Ethics
- PHL 443/REL 443: World Views and Environmental Values
- PHL 470: Philosophy of Science
- SOC 381: Social Dimensions of Sustainability

#### Natural Resource Policy (3-4 credits)

Select one course from the following:
- AEC 253: Environmental Law, Policy, and Economics
- AEC 432: Environmental Law
- PS 475: Environmental Policy and Politics
- PS 477: International Environmental Politics and Policy

### Resource Economics (3-4 credits)

Select one course from the following:
- AEC 351: Natural Resource Economics and Policy
- AEC 352/ECON 352: Environmental Economics and Policy
- TRAL 432: Economics of Recreation and Tourism

#### Management Issues (9-11 credits)

Select a minimum of 9 credits from the following:
- FES 355: Management for Multiple Resource Values
- FES 365: Issues in Natural Resources Conservation
- FES 455/HORT 455: Urban Forest Planning, Policy and Management
- FES 486: Public Lands Policy and Management
- FW 251: Principles of Fish and Wildlife Conservation
- FW 326: Integrated Watershed Management
- FW 350: Endangered Species, Society and Sustainability
- FW 439: Human Dimensions of Fisheries and Wildlife Management
- FW 462: Ecosystem Services
- GEOD 250: Land Use Planning for Sustainable Communities
- GEOD 430: Resilience-Based Natural Resource Management
- GEOD 451: Planning Principles and Practices for Resilient Communities
- GEOD 452: Sustainable Site Planning
- NR 202: Natural Resource Problems and Solutions
- TRAL 351: Outdoor Recreation Management on Public Lands
- TRAL 352: Wilderness Management
- TRAL 354: Communities, Natural Areas, and Sustainable Tourism

### Social Issues (12 credits)

Select 12 credits from the following:
- ANTH 110: Introduction to Cultural Anthropology
- ANTH 477: Ecological Anthropology
- ANTH 481: Natural Resources and Community Values
- FW 340: Multicultural Perspectives in Natural Resources
- GEOD 300: Sustainability for the Common Good
- GEOD 331: Population, Consumption, and Environment
- HST 481: Environmental History of the United States
- NR 351: When Science Escapes the Lab: Science and Resource Management
- SOC 204: Introduction to Sociology
- SOC 381: Social Dimensions of Sustainability
- SOC 480: Environmental Sociology
- SOC 481: Society and Natural Resources
- SUS 350: Sustainable Communities
- SUS 420: Social Dimensions of Sustainability
- WOSS 440: Women and Natural Resources

### Baccalaureate Core Course (BCC)

- Writing Intensive Course (WIC)
- Up to 6 credits of appropriate internships, projects, or study abroad may be used to fulfill credit requirements in this option as approved by petition.
Option Code: 675

**Individualized Specialty Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 790)

Also available at OSU-Cascades and via Ecampus.

A specialty option is a required part of the Natural Resources major that allows the students to develop depth and focus in a particular area of natural resource management.

The Individualized Specialty option is a student-designed option that allows a student to tailor their academic program to specific goals or interests. In consultation with their academic advisor, students will develop a program of study that meets their goals, as well as program requirements. Students should contact their assigned academic advisor for information on developing an Individualized Specialty option.

Option Code: 676

Minimum of 40 credits with 20 credits of upper-division credits required.

Option Code: 676

**Integrated Conservation Analysis Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 790)

Students pursuing this option will learn to recognize, understand, analyze and evaluate complex natural resource problems through a cross disciplinary approach. They will contribute to finding solutions to these critical issues by developing depth of knowledge in a disciplinary focus and by preparing to work on cross disciplinary teams. Students will learn to communicate their findings effectively to diverse groups and apply conflict resolution, leadership, and collaboration skills effectively.

Option Code: 735

**Landscape Analysis Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 790)

Also available via Ecampus.

This option prepares students to work with Geographic Information Science technology in a natural resource field such as wildfire ecology, land use planning, forestry, ecological restoration, and more. The pairing of the technical skills of GIScience with a disciplinary knowledge in a natural resource area will prepare students for the practical application of technical skills in the real world.

In addition, this specialty option will allow students to earn the GIScience Undergraduate Certificate through the College of Earth, Ocean, and Atmospheric Sciences concurrently with their BS degree through the College of Forestry. The student will apply to the GIS Certificate Program as well as the Natural Resources Program.

Students should contact Kuuipo Walsh (kuuipo.walsh@oregonstate.edu), GIScience Certificate Program Director, to enroll in the GIScience Certificate Program.

Option Code: 689

No S/U grades are accepted for the GEO courses that are counted for the GIS Certificate.

A minimum of 40 credits with 20 upper-division credits are required.

GIS Certificate Program Director
**Natural Resource Education Option**

This option is offered within the following major(s):

- Natural Resources • College of Forestry (p. 790)

Also available via Ecampus (http://ecampus.oregonstate.edu/).

This option will prepare students for careers as natural resource educators. Students may choose to focus on teaching in informal settings such as interpretive center, aquariums, museums, and parks or pursue a career in formal education in a K-12 classroom.

Students on the Corvallis campus may wish to explore the Education Double Degree (https://education.oregonstate.edu/education-double-degree/) program offered by the College of Education which allows students to earn a BA or BS in Education as well as their BS in Natural Resources. Courses in this option may be double counted with the Education Double Degree where applicable.

**Option Code: 679**

Minimum of 40 credits with 20 upper-division credits required.

* Baccalaureate Core Course (BCC)

1 Up to 6 credits of appropriate internships, projects or study abroad may be used to fulfill requirements in this option as approved by petition

2 Students may choose a minimum of 14 credits from either category below. Students may choose to focus on teaching in informal education settings or formal classroom instruction/licensure in K–12 schools. Students should work with their advisor to plan an appropriate plan of study to meet their goals.

Urban Forest Landscapes Option

This option is offered within the following major(s):
This option will help students understand the complexities surrounding the culture and management of urban forest ecosystems. It includes an examination of the economic, social, and environmental benefits and values of trees in urban areas, and the relationship between people and trees.

**Option Code: 685**

Minimum of 40 credits with 20 upper-division credits required.

### Footnotes

1. Baccalaureate Core Course (BCC)
2. Writing Intensive Course (WIC)

**Option Code: 685**

**Wildland Fire Ecology Option**

This option is offered within the following major(s):

- Natural Resources - College of Forestry (p. 790)

Also available via Ecampus.

This option will help students understand the nature of fire in wildland ecosystems. It includes an understanding of the dynamics of fire behavior and post-fire response.

**Option Code: 687**

Minimum of 40 credits with 20 credits upper-division required.

**Option Code: 687**

**Sustainable Natural Resources Graduate Certificate**

Available only via Ecampus.

The Sustainable Natural Resources graduate certificate is an 18-credit interdisciplinary program offered online through Ecampus. Students take 5 required courses and two elective courses, all designed to build personal and organizational capacity to examine the many aspects of natural resource problems—environmental, economic, and social—in the search for innovative solutions. The courses are organized into three main sections: integration, human dimensions, and ecology and management of sustainable natural resources. All courses in the certificate program are integrated through a student-designed capstone project that addresses
a specific sustainability problem in the student’s own organization or region. Throughout the program, students will work with faculty members and other students, and under the guidance of an assigned mentor to design and complete the project.

Traditional university training provides rigor in individual disciplines. However, natural resource problems require synthesis of multiple perspectives and fields of knowledge. In addition, natural resource problems can be international in scope. Globalization clearly reveals how decisions and practices in any part of the world affect natural resources elsewhere and highlights a need for natural resource professionals who can apply multidisciplinary systems-thinking to address these complex issues. The SNR graduate certificate program is designed to meet that need.

By offering this program as an online series of courses, it is possible for people from around the world to participate and to receive their graduate certificate without having to take a leave of absence from their work. The opportunity to collaborate with natural resource managers or graduate students from other regions or countries offers all participants a broader perspective on management issues and potential solutions.

Tourism, Recreation, and Adventure Leadership Undergraduate Major (BS, HBS)

This major offers the following option(s):

- Adventure Leadership Education (p. 806)
- Nature, Eco, and Adventure Tourism (p. 807)
- Outdoor Recreation Management (p. 807)
- Sustainable Tourism Management (p. 808)

Also available at OSU-Cascades.

The Bachelor of Science (BS) in Tourism, Recreation and Adventure Leadership (TRAL) explores the importance of tourism and recreation
in natural settings for community development, human health and quality of life, and the sustainable use of natural resources. Students will learn about management practices and public preferences to address contemporary tourism, recreation and outdoor leadership opportunities, and issues in natural settings. Studies include decision making within applicable laws and across cultural contexts, as well as communication to a variety of audiences, and successful supervision of employees and volunteers. The TRAL program covers best practices for planning, developing, and managing recreation resources in natural settings. Students learn to evaluate and integrate experiential, economic, biophysical, and social concepts. They study interaction across natural resources and the consequences of development, management, and marketing decisions.

The following two options are available to Corvallis-based students majoring in TRAL:

1. Outdoor Recreation Management
2. Sustainable Tourism Management

The following two options are available to Cascades-campus students majoring in TRAL:

1. Nature, Eco and Adventure Tourism
2. Adventure Leadership Education

**Major Code: 872**

- Explain the importance of tourism and recreation in natural settings for achieving societal goals, such as community development, human health and quality of life, and sustainable use of natural resources.
- Identify, analyze, and apply the best available information on science, management practices, and public preferences to address contemporary tourism, recreation, and outdoor leadership opportunities and issues.
- Make tourism, recreation, and outdoor leadership decisions within applicable laws, policies, and regulations and across cultural and national contexts.
- Communicate effectively with a variety of audiences in appropriate formats.
- Work effectively and professionally in groups, both as leaders and followers.
- Understand principles and methods for successful supervision of employees and/or volunteers.

Completion of an approved option is required for the Tourism, Recreation, and Adventure Leadership degree. Declaration of the option must be done by the end of the sophomore year, or at least six (6) terms prior to graduation. Courses for an option are in addition to the core curriculum. Some courses may require prerequisites not included in the core curriculum.

- All students pursuing the BS in TRAL must earn grades of C or better in all courses for the major (or approved substitutions)
- All students pursuing the BS in TRAL must complete at least six months of work experience related to the major

Nature, Eco, and Adventure Tourism Option

This option is offered within the following major(s):

- Tourism, Recreation, and Adventure Leadership - College of Forestry (p. 802)

Available only at OSU-Cascades.

Designed for students pursuing careers as managers or owners and guides in outfitter-guide and other natural resource based commercial recreation businesses (i.e., micro-level tourism).

Option Code: 875

Outdoor Recreation Management Option

This option is offered within the following major(s):

- Tourism, Recreation, and Adventure Leadership - College of Forestry (p. 802)

Designed for students pursuing careers as outdoor recreation planners and managers in public land management agencies and non-profit organizations at local, state, and federal levels. Students study land management, the process of permitting, and laws relevant to outdoor recreation. They create monitoring and assessment protocols for recreation resources in natural settings, and they learn to respectfully engage with individuals and groups that may have diverse perspectives and priorities regarding recreation opportunities. Students are trained to facilitate understanding and conflict resolution across these individuals and groups.

Sustainable Tourism Management Option

This option is offered within the following major(s):

- Tourism, Recreation, and Adventure Leadership - College of Forestry (p. 802)

Designed for students pursuing careers as tourism destination planners, developers, and marketers in government, non-profit, or the private sector, in both domestic and international locations. This option applies business concepts to tourism, and explains best practices for planning, developing, and managing sustainable nature-based tourism. Students learn to create a business plan, apply business law principles, create marketing strategies, create financial statements, explain land management goals and permit processes. They learn to plan, develop and manage sustainable nature-based tourism in a manner that integrates experiential, economic, biophysical, and social data. They explore the consequences of development of natural resources in domestic and international tourism.

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)

Plus additional free electives if necessary to meet university requirement of 180 minimum credits.

Note: FOR 460 is listed in two places but may be counted only once. If selected to meet one requirement then a different class must be selected to meet the other requirement.

Option Code: 873
Urban Forestry Graduate Certificate

Available only via Ecampus.

Urban forestry involves the planning, planting, and management of trees and related vegetation in and around cities. The urban forest is made up of the mosaic of the planted landscape and native forest remnants left behind as cities have developed. Urban forestry is an academic discipline that is related to forestry, horticulture, urban planning, landscape architecture, and land use planning. Urban foresters work in municipal governments, non-profit organizations, other public agencies, and the private sector.

The Graduate Certificate in Urban Forestry helps prepare students for leadership roles in a variety of different urban forestry programs. The course work covers important aspects of program management, policy development, and leadership. The capstone study allows the student to tailor the program to a particular interest within the field.

Certificate Code: CG13

Students complete 14 required credits, and take one or two elective courses resulting in a combined credits total of between 18 and 20 depending on the electives selected.

such as the U.S. Forest Service, Bureau of Land Management, National Park Service, and state departments of forestry and natural resources.

The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters.

**Forest Engineering Undergraduate Program**

The Forest Engineering Undergraduate Program provides an engineering education within a strong forestry context. The program is founded on fundamental principles of forest science and engineering science. Forest Engineering program objectives are to prepare graduates to plan and implement complex forestry and natural resource operations that help meet global demands for wood products while sustaining water, habitat, and other forest resources. It provides 'work-ready' graduates for entry into the diverse professional field of forest engineering. Early career accomplishments include harvest unit design, forest road location and design, contract inspection and administration, cost analysis, and forest transportation management. Mid-career accomplishments commonly expand to involve aspects of engineering management, including planning and budgeting, supervision, wood supply procurement, harvest and road design reviews, and scheduling and controlling forest operations.

Specifically, the Forest Engineering Undergraduate Program provides fundamental coverage of the following:

- Fundamental engineering and forestry principles
- Physical and biological aspects of soil and water resources
- Surveying and measurement of land and forest resources
- Analysis and design of the forest transportation system
- Analysis and design of harvesting operations
- Economics and operational planning principles

Integration of these topics enables forest engineering graduates to develop and manage safe, economical, and environmentally sound forest operations. Design experiences that integrate the topics listed above and steadily build on previous course material are distributed throughout the upper-division portion of the program. The Forest Engineering capstone course sequence during the senior year provides an opportunity for students to bring together all the topics from the curriculum in a project framework that includes the field and office engineering tasks associated with the planning and design of forest operations. The capstone course sequence is integrated with the Forestry capstone course sequence to provide realistic interdisciplinary planning and design experience.

Forest engineering graduates are employed by private forestry firms, public forestry agencies, logging and construction companies, engineering consulting firms, and surveying firms. Some graduates establish their own consulting businesses after a few years of field experience. Career progression following graduation can be quite varied. Some graduates gravitate toward technical positions while others move quickly toward management of harvesting and other forest operations, or more broadly defined management of the forest land base.

The Bachelor of Science degree in Forest Engineering can be earned through completion of the Forest Engineering program or the Forest Engineering-Civil Engineering double degree program. The Bachelor of Science and Honors Bachelor of Science degrees in Forest Engineering are accredited by the Engineering Accreditation Commission ABET, http://www.ABET.org.

The BS in Forest Engineering is also accredited by the Society of American Foresters.

Completion of the five-year, double-degree Forest Engineering-Civil Engineering program results in a BS in Forest Engineering and a BS in Civil Engineering, offered by the School of Civil and Construction Engineering. The Bachelor of Science and Honors Bachelor of Science degrees in Civil Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org.

Forest engineering is a licensed profession in the state of Oregon. The BS in Forest Engineering meets the administrative rules established by the Oregon State Board of Examiners for Engineering and Land Surveying (OSBEELS) as evidence of adequate preparation for the Fundamentals of Engineering Examination, the first of two examinations required for professional engineering licensing. The BS in Forest Engineering, with the completion of appropriate program electives, also meets the OSBEELS administrative rules for evidence of adequate preparation for the Fundamentals of Land Surveying Examination, the first of two examinations required for professional land surveyor licensing.

Forest Engineering (FE)

FE 101, INTRODUCTION TO FOREST ENGINEERING, 2 Credits
Introduction to the forest engineering discipline. Discussion of critical issues, available resources, career opportunities and professional opportunities. Overview of field instruments and analytical approaches.

FE 102, FOREST ENGINEERING PROBLEM SOLVING AND TECHNOLOGY, 3 Credits
A technology applications course designed to introduce students to formulating and implementing computational solutions to engineering analysis and design problems in a digital environment. Students will learn to evaluate engineering problems, formulate one or more solution techniques or algorithms, and code the solution using spreadsheet and/or programming software. Professionalism in completing and presenting laboratory exercises is emphasized. Laboratory examples draw from a variety of engineering topics. This course may be substituted for CE 102, Civil Engineering I: Problem Solving and Technology.
Equivalent to: FE 215
Recommended: Calculus

FE 206, ENGINEERING FOREST BIKING TRAILS, 2 Credits
Students will design trails that mitigate impact on the environment and other trail users, while still providing a fun experience for mountain bike riders. Topics include site classification, trail safety, water management, digital terrain models, and commercial road design software. This course will emphasize field and design work.

FE 208, FOREST SURVEYING, 4 Credits
Introduction to theory and practice of surveying methods and measurements as applied to the specifics of forestry problems and their solutions. This is the first of a four-course sequence (FE 208, 209, 310, 311). Together with FE 257 it is designed to prepare students for the Fundamentals of Land Surveying exam, which is necessary to become a professional land surveyor.
Prerequisite: MTH 112 with C or better or MTH 241 with C or better or MTH 251 with C or better or MTH 251H with C or better or MTH 252 with C or better or MTH 252H with C or better
Equivalent to: FE 308
Available via Ecampus

FE 209, FOREST PHOTOGRAMMETRY AND REMOTE SENSING, 4 Credits
Management and conservation of natural resources with the fundamentals of spatial data acquisition from airborne and spaceborne sensors. Introduction to theory of spectral reflectance properties of vegetation, the principles of photographic analysis and aerial photo-interpretation and new advances such as LIDAR.
Prerequisite: MTH 112 with C or better or MTH 241 with C or better or MTH 251 with C or better or MTH 251H with C or better or MTH 252 with C or better or MTH 252H with C or better
Equivalent to: FE 309
Available via Ecampus

FE 257, GIS AND FOREST ENGINEERING APPLICATIONS, 3 Credits
An introduction to the appropriate use and potential applications of geographic information systems (GIS) and related technologies (GPS and remote sensing) in forest management and operational planning and problem solving. Students are presented with lectures and exercises that cover a wide range of GIS and GIS-related topics and issues including spatial database creation, structure, analysis, and modeling. Lec/lab.
Equivalent to: FE 357
Available via Ecampus

FE 307, JUNIOR SEMINAR, 1 Credit
College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations.
CROSSTLISTED as FE 307/FOR 307.
Equivalent to: FOR 307

FE 310, FOREST ROUTE SURVEYING, 4 Credits
Route surveying and site surveying applied to forestry problems. Use of surveying equipment; traversing; computations; leveling; horizontal, vertical, compound, reverse and spiral curves; earthwork; construction staking as applied to new road and existing road P-line survey. Includes rapid survey techniques. Lec/lab.
Prerequisite: (FE 208 with C or better or FE 308 with C or better) or CE 361 with C or better or CEM 263 with C or better

</tr>
</tbody>
</table>
FE 440, FOREST OPERATIONS ANALYSIS, 4 Credits
Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab. 
Prerequisite: FE 102 with C- or better and (FE 370 [C-] or FE 371 [C-])
Recommended: Basic statistics

FE 444, FOREST REMOTE SENSING AND PHOTOGRAMMETRY, 4 Credits
Introduction to spectral reflectance, photogrammetry, image analysis, and point clouds. Fundamentals of data acquisition with passive and active sensors installed on airborne and spaceborne platforms. Radar and lidar in forestry. Lec/lab. 
Prerequisite: FE 257 with C or better and (MTH 112 [C] or MTH 241 [C] or MTH 251 [C] or MTH 251H [C] or MTH 252 [C] or MTH 252H [C] and (PH 201 [C] or PH 211 [C])

FE 456, *INTERNATIONAL FORESTRY, 3 Credits
An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FE 456/FOR 456. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FOR 456
Recommended: Introductory course in biology.

FE 457, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FOR 457 and FE 557/FOR 557. 
Prerequisite: FOR 329 with C or better and FOR 441 [C] and FOR 443 [C]
Equivalent to: FOR 457

FE 459, FOREST MANAGEMENT PLANNING AND DESIGN I, 4 Credits
Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab. CROSSLISTED as FE 459/FOR 459. 
Prerequisite: FE 457 with C or better or FOR 457 with C or better
Equivalent to: FOR 459

FE 460, *FOREST OPERATIONS REGULATIONS AND POLICY ISSUES, 3 Credits
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FE 469, FOREST MANAGEMENT PLANNING AND DESIGN II, 4 Credits
A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab. CROSSLISTED as FE 469/FOR 469.
Prerequisite: FE 459 with C or better or FOR 459 with C or better
Equivalent to: FOR 469

FE 470, LOGGING MECHANICS, 4 Credits
Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance.
Prerequisite: (ENGR 211 with D- or better or ENGR 211H with D- or better) and ENGR 213 [D-] and FE 371 [C-]

FE 471, HARVESTING MANAGEMENT, 3 Credits
Verification of harvesting assessment plans and operational planning/ field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. Lec/lab. 
Recommended: FE 371 and FE 470

FE 472, MECHANIZED HARVESTING AND SIMULATION, 2 Credits
Study of harvesters, forwarders, and processing of timber for maximizing stand value. The use of a harvesting simulator will provide for a hands-on approach to learning.
Recommended: FOR 321

FE 479, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579. 
Prerequisite: CE 373 with C or better or FE 316 with C or better
Equivalent to: CE 479

FE 480, FOREST ENGINEERING PRACTICE AND PROFESSIONALISM, 1 Credit
Personal and professional skills, attributes, and issues in forest engineering practice. Includes topics such as ethics, land stewardship, media relations and risk management.
FE 499, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 8 credits.

FE 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FE 503, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FE 505, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FE 506, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FE 507, SEMINAR, 1-16 Credits
Subject matter as required by graduate programs.
This course is repeatable for 16 credits.

FE 515, FOREST ROAD ENGINEERING, 3 Credits
Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating.
Recommended: Basic surveying

FE 516, FOREST ROAD SYSTEM MANAGEMENT, 4 Credits
Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management.
Recommended: FE 415 or FE 515

FE 523, UNMANNED AIRCRAFT SYSTEM REMOTE SENSING, 3 Credits
Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes.
Prerequisite: GEOG 580 with C or better or GEOG 581 with C or better or GEO 544 with C or better or GEO 566 with C or better or OC 678 with C or better

FE 530, WATERSHED PROCESSES, 4 Credits
Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab.

FE 532, FOREST HYDROLOGY, 4 Credits
Physical hydrology, erosion processes, and attributes of stream ecosystems for forested watersheds. Material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. Lec/rec.
Recommended: BEE 512 or introductory hydrology course

FE 536, FOREST DISTURBANCE HYDROLOGY, 3 Credits
Impacts of forest disturbance, including timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams.
Recommended: FE 434

FE 540, FOREST OPERATIONS ANALYSIS, 4 Credits
Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab.
Recommended: FE 102 and (FE 370 or FE 371) and basic statistics.

FE 544, FOREST REMOTE SENSING AND PHOTOGRAMMETRY, 4 Credits
Introduction to spectral reflectance, photogrammetry, image analysis, and point clouds. Fundamentals of data acquisition with passive and active sensors installed on airborne and spaceborne platforms. Radar and lidar in forestry. Lec/rec.
Recommended: FE 257 and (MTH 112 or MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H)

FE 545, SEDIMENT TRANSPORT, 4 Credits
Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as BEE 545/FE 545.
Equivalent to: BEE 545
Recommended: CE 313 or FE 330

FE 552, FOREST TRANSPORTATION SYSTEMS, 4 Credits
Analysis of interactions between harvesting and road systems. Advanced topics in road and landing spacing, determination of road standards, analysis of logging road networks, transfer and sort yard facility location. Simultaneous resource scheduling and transportation planning.
Recommended: FE 102 and (FE 440 or FE 540)

FE 555, FOREST SUPPLY CHAIN MGMT, 3 Credits
Develop and implement operational planning and logistics scheduling systems to manage a forestry supply chain for typical forest organizations in the Pacific Northwest. Once developed, these supply chain plans will be implemented using simulation software that will allow students to view the results of their forest operations plans.
Recommended: (CS 151 or FE 102) and FE 357 and FOR 457
FE 557, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FOR 457 and FE 557/FOR 557.
Equivalent to: FOR 557
Recommended: FOR 329 and FOR 441 and FOR 443

FE 560, FOREST OPERATIONS REGULATIONS AND POLICY ISSUES, 3 Credits
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players.

FE 570, LOGGING MECHANICS, 4 Credits
Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance.
Recommended: ENGR 211 and ENGR 213 and FE 371

FE 571, HARVESTING MANAGEMENT, 3 Credits
Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs.
Recommended: FE 371 and FE 470

FE 579, SLOPE AND EMBANKMENT DESIGN, 3 Credits
A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/FE 479 and CE 579/FE 579.
Equivalent to: CE 579
Recommended: CE 373 or FE 316

FE 599, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

FE 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
This course is repeatable for 16 credits.

FE 603, THESIS, 1-16 Credits
This course is repeatable for 999 credits.

FE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

FE 606, PROJECTS, 1-16 Credits
This course is repeatable for 16 credits.

FE 607, SEMINAR, 1-16 Credits
Subject matter is required by graduate programs.
This course is repeatable for 16 credits.

FE 640, SPECIAL TOPICS IN FOREST ENGINEERING, 1-3 Credits
Recent advances in logging engineering, forest engineering, and forest operations. Content will vary with instructor. May be retaken for credit.
This course is repeatable for 99 credits.

Forestry (FOR)

FOR 111, INTRODUCTION TO FORESTRY, 3 Credits
Forest resources in the world; forests and human well-being; where and how forests grow; environmental and human values; products, characteristics, and uses; basic elements of use, planning and management. Interpretation of forestry literature; professional origins in the U.S. Field trips required.
Equivalent to: F 111
Available via Ecampus

FOR 112, COMPUTING APPLICATIONS IN FORESTRY, 3 Credits
An overview of computing applications used in all aspects of forestry work, but largely focused on development of intermediate and advanced spreadsheet skills using Microsoft Excel (e.g., complex formulas and functions, charting, and pivot tables). Additionally, the course rounds out essential skills in document formatting and presentation development.

FOR 199, SPECIAL STUDIES, 1-16 Credits
This course is repeatable for 16 credits.

FOR 206, *FOREST SOILS LABORATORY FOR SOIL 205, 1 Credit
Laboratory exercise and field trips designed to develop student competency in soil processes, description, analysis, and assessment with a particular emphasis on the role of soils in managed and unmanaged forest ecosystems. (Bacc Core Course if taken with SOIL 205)
Attributes: CPBS – Core, Pers, Biological Science; CPPS – Core, Pers, Physical Science
Corequisites: SOIL 205

FOR 208, FOREST SOILS RECITATION, 1 Credit
Readings, exercises, discussions designed to develop student competency in forest soil processes, description, analysis, and assessment. A particular emphasis will be placed on the role of soils in managed and unmanaged forest ecosystems.
Recommended: An introductory soils course.
Available via Ecampus
FOR 307, JUNIOR SEMINAR, 1 Credit
College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. CROSSLISTED as FE 307/FOR 307.
Equivalent to: FE 307

FOR 312, FORESTRY FIELD SCHOOL, 2 Credits
A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. CROSSLISTED as FE 312/FOR 312.
Equivalent to: FE 312

FOR 321, FOREST MENSURATION, 5 Credits
Encompasses methods used to measure tree, stand and forest-level attributes, and sample and analyze forest resources data. Provides information that support forest management decisions at the stand and forest levels. Focuses mainly on quantitative analysis of forest vegetation. Uses considerable time and effort on measuring other forest resources (e.g., wildlife habitat and riparian zones).
Prerequisite: (FOR 141 with C or better or FES 141 with C or better or FOR 241 with C or better or FES 241 with C or better) and FE 208 [C] and (MTH 241 [C] or MTH 245 [C] or MTH 251 [C] or MTH 251H [C]) and (ST 201 [C] or ST 314 [C] or ST 314H [C] or ST 351 [C] or ST 351H [C])
Equivalent to: F 321

FOR 322, FOREST MODELS, 3 Credits
Introduction to static and dynamic forest models: defining what they are, how they might be used, and, in general terms, how they are developed.
Prerequisite: FOR 321 with C- or better and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-])
Equivalent to: F 322

FOR 329, FOREST RESOURCE ECONOMICS I, 4 Credits
Forest products markets, appraisal, rotation, thinning, uneven-aged management and forest regulation. Economics of timber management and harvest scheduling.
Prerequisite: ST 201 with D- or better or ST 351 with D- or better
Equivalent to: FOR 331

FOR 330, FOREST RESOURCE ECONOMICS II, 4 Credits
Basic arithmetic of interest and capital budgeting. Basic wood products markets. Forest resource markets and market failures. Nonmarket valuation and multiple-use forestry. Impacts of forest management and policy decisions on forest resource use. Lec/lab.
Prerequisite: (AEC 250 with C or better or (ECON 201 with C or better or ECON 201H with C or better)) and (MTH 241 [C] or MTH 245 [C] or (MTH 251 [C] or MTH 251H [C]))
Equivalent to: FOR 430

FOR 346, TOPICS IN WILDLAND FIRE, 3 Credits
An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy. Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion.
Equivalent to: FW 346, RNG 346
Recommended: Coursework in forest biology or ecology (eg. FOR 240 or FES 240 or FES 341)
Available via Ecampus

FOR 399, SPECIAL TOPICS, 0-16 Credits
Equivalent to: FOR 399H
This course is repeatable for 16 credits.

FOR 399H, SPECIAL TOPICS, 1-16 Credits
Attributes: HNRS – Honors Course Designator
Equivalent to: FOR 399
This course is repeatable for 16 credits.

FOR 401, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: F 401
This course is repeatable for 16 credits.

FOR 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

FOR 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: F 405, FRR 405
This course is repeatable for 16 credits.

FOR 406, PROJECTS, 1-16 Credits
Section 4: Integrated Projects, Graded.
Equivalent to: F 406, FRR 406
This course is repeatable for 16 credits.

FOR 407, SEMINAR, 1-16 Credits
Equivalent to: F 407, FRR 407
This course is repeatable for 16 credits.

FOR 408, WORKSHOP, 1-3 Credits
Equivalent to: FRR 408
This course is repeatable for 16 credits.

FOR 410, INTERNSHIP, 1-16 Credits
Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N.
Equivalent to: FRR 410
This course is repeatable for 16 credits.
FOR 413, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important
groups, prediction of pathogen responses to environmental changes, and
management strategies for protection of forest resources. Field trips.
Lec/lab. CROSSLISTED as BOT 413/FOR 413
Prerequisite: BI 204 with C or better or BI 212 with C or better or BI 212H
with C or better or BI 213 with C or better or BI 213H with C or better or
BI 221 with C or better or BI 221H with C or better
Equivalent to: BOT 413

FOR 417, ADVANCED FOREST SOILS, 4
Credits
Synthesize current information on fundamental properties and processes
of forest soils with emphasis on applications to silviculture, soil
conservation, and sustainable management of forested ecosystems. Lec/
lab.
Prerequisite: SOIL 205 with C- or better and ((CH 231 with C- or better or
CH 231H with C- or better) and (CH 261 [C-] or CH 261H [C-]) or CH 201
[C-]) and (MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-] or MTH 252 [C-]
or MTH 252H [C-])
Equivalent to: FOR 417X

FOR 431, ECONOMICS AND POLICY OF
FOREST WILDLAND FIRE, 3 Credits
General overview of the history of fire and the interaction of people with
fire on forested landscapes. Forest fire policy history and current issues
in the U.S. Basic legal concepts relevant to forest fire policy. An economic
framework for understanding spatial externalities, decision-making under
uncertainty, institutional economics, and incentives.
Prerequisite: AEC 351 with C or better or AEC 352 with C or better or
FOR 330 with C or better or ECON 352 with C or better
Available via Ecampus

FOR 436, WILDLAND FIRE SCIENCE AND
MANAGEMENT, 4 Credits
Principles and applications of fire as a natural resource management
tool; the role of fire in conservation management, restoration, and
preservation of ecosystems. Covers basic techniques and current
research used to describe fire behavior and spread, fuels and fuel
manipulation, and fire effects on the biota. Focus will be on fire as a
natural process in ecosystem dynamics. Lec/lab.
Equivalent to: FW 436, RNG 436
Available via Ecampus

FOR 441, SILVICULTURE PRINCIPLES, 4
Credits
Nursery operation, vegetation management, herbivores, fire, seeding and
planting techniques. Introduction to principles and techniques involving
vegetation control, thinning, fertilizing, and harvesting. Environmental
considerations related to forest stand treatments. Lec/lab.
Prerequisite: (FES 240 with C or better or FOR 240 with C or better) and
(FES 141 [C] or FES 241 [C])

FOR 442, SILVICULTURE REFORESTATION,
4 Credits
Silvicultural principles and practices needed to successfully regenerate
forestlands in North America. Topics include artificial and natural
regeneration, genetic improvement, seed orchards, forest tree nurseries,
site preparation, seedling quality and handling, vegetation management,
animal damage protection, early stand management, and ecological and
ecophysiological considerations. Emphasis is placed on regeneration
methods applied to plantations in western Oregon. Field trips required.
Prerequisite: SOIL 205 with C or better and (FES 240 [C] or FES 240H [C]
or FOR 240 [C])
Corequisites: FOR 443

FOR 443, SILVICULTURAL PRACTICES, 4
Credits
Manipulation of forest stand structure and dynamics to meet various
resource management objectives. Covers key concepts and practices
associated with vegetation control, thinning, fertilization, even-aged and
uneven-aged regeneration systems including social and environmental
considerations associated with treated systems. Two-day field trip required.
Lec/lab.
Prerequisite: (FES 240 with C or better or FES 240H with C or better or
FOR 240 with C or better) and FOR 321 [C]
Corequisites: FOR 442

FOR 456, *INTERNATIONAL FORESTRY, 3
Credits
An introduction to the biological, physical, and sociological factors
that shape the world's forests and the activities used to manage those
forests. What influence these factors have on forest policies, practices,
and outcomes. CROSSLISTED as FE 456/FOR 456. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: FE 456
Recommended: Introductory course in biology.

FOR 457, TECHNIQUES FOR FOREST
RESOURCE ANALYSIS, 4 Credits
Use of linear programming, nonlinear programming, dynamic
programming, and simulation to solve complex forest management
problems, with emphasis on intertemporal multiple-use scheduling.
Forestry transportation problems, multiple-use allocation, and investment
analysis. Field trips required. CROSSLISTED as FE 457/FOR 457 and
FE 557/FOREST 557.
Prerequisite: FOR 329 with C or better and FOR 441 [C] and FOR 443 [C]
Equivalent to: FE 457

FOR 459, FOREST MANAGEMENT
PLANNING AND DESIGN I, 4 Credits
Integration of environmental, economic, and social aspects of forestry in
management planning. Development of strategic and tactical plans using
diverse data types and sources. Senior capstone class projects. Lec/lab.
CROSSLISTED as FE 459/FOREST 459.
Prerequisite: FE 457 with C or better or FOR 457 with C or better
Equivalent to: FE 459
FOR 460, FOREST POLICY, 4 Credits
Policy formulation and analysis for forest resources. Consideration of policy affecting land management approaches to planning, management, and social and economic development. Major forestry policy areas covered include outdoor recreation, range, timber, wilderness, and wildlife and fish. Lec/lab. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC

FOR 462, NATURAL RESOURCE POLICY AND LAW, 3 Credits
First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory

FOR 469, FOREST MANAGEMENT PLANNING AND DESIGN II, 4 Credits
A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab. CROSSLISTED as FE 469/FOR 469.
Prerequisite: FE 459 with C or better or FOR 459 with C or better
Equivalent to: FE 469

FOR 499, SPECIAL TOPICS, 0-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
This course is repeatable for 16 credits.
Available via Ecampus

FOR 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: F 501
This course is repeatable for 16 credits.

FOR 503, THESIS, 1-16 Credits
Equivalent to: F 503
This course is repeatable for 999 credits.

FOR 505, READING AND CONFERENCE, 1-16 Credits
Equivalent to: F 505, FRR 505
This course is repeatable for 16 credits.

FOR 506, PROJECTS, 1-16 Credits
Equivalent to: F 506
This course is repeatable for 16 credits.

FOR 507, SEMINAR, 1-16 Credits
Equivalent to: F 507, FRR 507
This course is repeatable for 16 credits.

FOR 508, WORKSHOP, 1-3 Credits
This course is repeatable for 16 credits.

FOR 510, INTERNSHIP, 1-9 Credits
This course is repeatable for 16 credits.

FOR 513, FOREST PATHOLOGY, 3 Credits
Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 513/FOR 513.
Equivalent to: BOT 513
Recommended: BI 204 or BI 212 or BI 212H or BI 213 or BI 213H

FOR 517, ADVANCED FOREST SOILS, 4 Credits
Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/ lab.
Recommended: SOIL 205 and (((CH 231 or CH 231H) and (CH 261 or CH 261H)) or CH 201) and (MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H) all with a minimum grade of C-

FOR 518, MANAGING FOREST NUTRITION, 3 Credits
Synthesize current information on nutrient limitations of forest productivity, long-term forest productivity, and mitigating and managing forest nutrition with emphasis on forests of the Pacific Northwest.

FOR 520, GEOSPATIAL FOREST ANALYSIS, 3 Credits
Prerequisite: FE 444 with C or better or GEOG 480 with C or better

FOR 524, FOREST BIOMETRICS, 3 Credits
Advanced topics in forest biometrics, including measurement of forest structure and dynamics, application of sampling theory and methods, and statistical techniques for interpreting forestry data.
Equivalent to: F 524
Recommended: FOR 322 and ST 511

FOR 525, FOREST MODELING, 3 Credits
Examination of regression techniques and assumptions used to develop static and dynamic equations of tree and stand attributes.
Prerequisite: ST 552 with C or better
Equivalent to: F 525

FOR 528, PROFESSIONAL COMMUNICATION AND ETHICS, 2 Credits
Conventions of written and oral communication in forestry and related disciplines including basic narrative development. Exploration of environmental, professional, and research ethics, and the role they play in effective communication with multiple stakeholders.
FOR 531, ECONOMICS AND POLICY OF FOREST WILDLAND FIRE, 3 Credits

General overview of the history of fire and the interaction of people with fire on forested landscapes. Forest fire policy history and current issues in the U.S. Basic legal concepts relevant to forest fire policy. An economic framework for understanding spatial externalities, decision-making under uncertainty, institutional economics, and incentives. Recommended: FOR 330 or AEC 351 or AEC 352 or ECON 352 Available via Ecampus

FOR 534, ECONOMICS OF THE FOREST RESOURCE, 3 Credits

Topics include optimal stand and forest management for timber production, economics of ecosystem services (e.g., recreation, biodiversity, carbon sequestration, water quality and regulation), non-market valuation methods, management under risk and uncertainty, discounting, intergenerational equity, sustainability, international trade and other global issues. Recommended: FOR 330 and FOR 331

FOR 536, WILDLAND FIRE SCIENCE AND MANAGEMENT, 4 Credits

Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab. Equivalent to: FW 536, RNG 536

FOR 542, INTERNATIONAL INTENSIVE SILVICULTURE, 2 Credits

Operational and ecological aspects of intensive silvicultural management of planted forests around the world. Guest speakers in different countries will describe the type of silvicultural management that is carried out in the speaker's country from species and genetic selection, to harvest and rotation length, including site preparation and planting techniques. Emphasis on comparing silvicultural practices in each country to the management of plantations in western Oregon.

FOR 543, SILVICULTURAL PRACTICES, 5 Credits

Manipulation of immature and mature forest stands for various resource management objectives. Principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to stand treatments. Two-day field trips required. Recommended: (FOR 240 or FES 240) and FOR 321 and concurrent enrollment in FOR 429

FOR 549, SILVICULTURAL INFLUENCES ON FOREST ECOSYSTEM DYNAMICS, 3 Credits

Fundamental biological and ecological principles for the design and implementation of silvicultural regimes that achieve a wide diversity of forest ecosystem management objectives. Recommended: Undergraduate course in silviculture and in forest mensuration.

FOR 550, SUSTAINABLE FOREST MANAGEMENT, 3 Credits

Sustainable forestry as part of the global sustainability movement. History of sustainability and its influence on decision-making in forest management. Current dimensions of sustainability: forest certification, climate change, role of environmental ethics, biodiversity conservation, maintenance of long-term site productivity, conservation of soil and water resources, roles of social institutions, and links to concerns for social justice.

FOR 557, TECHNIQUES FOR FOREST RESOURCE ANALYSIS, 4 Credits

Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/457/457 and FE 557/557/557.

Equivalent to: FE 557

Recommended: FOR 329 and FOR 441 and FOR 443

FOR 561, FOREST POLICY ANALYSIS, 3 Credits

Basic elements of forest policy problems, including resource allocation and efficiency, distribution, and interpersonal equity, taxation, regulation, and control, and planning and uncertainty. Emphasis on policy and analysis and its uses in policy decision.

FOR 562, NATURAL RESOURCE POLICY AND LAW, 3 Credits

First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory

FOR 563, ENVIRONMENTAL POLICY AND LAW INTERACTIONS, 3 Credits

Second of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on the arena of regulatory environmental laws. Environmental torts, regulation of point and non-point source pollution under the federal Clean Water Act, wetlands protection, and laws governing agricultural and forest practices will be examined as examples of regulatory frameworks for achieving resource protection. Students will be exposed to the basic framework of federal laws regulating air and hazardous waste pollutants.
FOR 599, SPECIAL TOPICS, 1-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded.
This course is repeatable for 16 credits.
Available via ECampus

FOR 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: F 601
This course is repeatable for 16 credits.

FOR 603, THESIS, 1-16 Credits
Equivalent to: F 603
This course is repeatable for 999 credits.

FOR 605, READING AND CONFERENCE, 1-16 Credits
Equivalent to: F 605
This course is repeatable for 16 credits.

FOR 606, PROJECTS, 1-16 Credits
Equivalent to: F 606
This course is repeatable for 16 credits.

FOR 607, SEMINAR, 1-16 Credits
Equivalent to: F 607
This course is repeatable for 16 credits.

FOR 699, SPECIAL TOPICS, 1-16 Credits
Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit.
This course is repeatable for 16 credits.

FOR 808, WORKSHOP, 1-9 Credits
This course is repeatable for 16 credits.

Forest Engineering - Civil Engineering Undergraduate Major (BS, HBS)
The Forest Engineering-Civil Engineering program results in a BS degree in Forest Engineering and a BS degree in Civil Engineering. The BS degree in Forest Engineering and the BS degree in Civil Engineering are both accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org), http://www.abet.org. The BS in Forest Engineering is also accredited by the Society of American Foresters. This unique five-year, double degree program is offered in cooperation with the School of Civil and Construction Engineering. This program begins with basic science and mathematics and progresses on through engineering science and forest science to arrive at professional-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year.

Pre-Professional Program
Admission to the pre-professional forest engineering program requires that a student is admitted as a degree-seeking undergraduate or post-baccalaureate student at Oregon State University. Courses included in the first and second years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior and senior levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU.

Professional Program
Students must be admitted to the professional forest engineering program following completion of the pre-professional forest engineering course work in order to progress to the junior year in forest engineering. Students should consult the College of Engineering for requirements of the Civil Engineering program.

Enrollment in professional forest engineering program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-forest engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional forest engineering program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made at the end of winter term for the following fall term. For admission, students must earn:

1. a grade of ‘C’ or better in all pre-professional courses required for entry into the professional program (marked with 2). Grade repeat (replacement) policy will follow OSU Academic Regulation #20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate student and to the College of Forestry for admission to the professional program. Application forms for the forest engineering professional program and information on policies and programs are available on the College of Forestry website.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted to the professional program. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of ‘C’ or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of ‘C’ or better in remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forest engineering program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program in the fall term of each academic year.
The professional forest engineering program begins with Forestry Field School prior to fall term of the professional program.

**Major Code: 381**

**Pre-Forest Engineering-Civil Engineering Major Code: 361**

Grade standards for the pre-professional program as listed in the program description apply.

All students pursuing the BS in Forest Engineering-Civil Engineering:

1. must earn grades of 'C' or better in all required professional courses, or approved substitutions for majors and options, and
2. must maintain a 2.0 GPA in all major course work, and courses used for substitution of required courses.

**College of Engineering specific requirements:**

1. Must earn grades of "C" or better in all required civil engineering major courses in the pre-professional and professional core.
2. Must maintain a cumulative 2.25 GPA in all civil engineering major course work and an overall OSU GPA of 2.25.

**Forest Engineering Undergraduate Major (BS, HBS)**

The Forest Engineering Undergraduate Program provides an engineering education within a strong forestry context. The program is founded on fundamental principles of forest science and engineering science. Forest Engineering program objectives are to prepare graduates to plan and implement complex forestry and natural resource operations that help meet global demands for wood products while sustaining water, habitat, and other forest resources. It provides 'work-ready' graduates for entry into the diverse professional field of forest engineering. Early career accomplishments include harvest unit design, forest road location and design, contract inspection and administration, cost analysis, and forest transportation management. Mid-career accomplishments commonly expand to involve aspects of engineering management, including planning and budgeting, supervision, wood supply procurement, harvest and road design reviews, and scheduling and controlling forest operations.

**Program Educational Objectives – Forest Engineering**

Specifically, the Forest Engineering Undergraduate Program provides fundamental coverage of the following:

- Fundamental engineering and forestry principles
- Physical and biological aspects of soil and water resources
- Surveying and measurement of land and forest resources
- Analysis and design of the forest transportation system
- Analysis and design of harvesting operations
- Economics and operational planning principles

Integration of these topics enables forest engineering graduates to develop and manage safe, economical, and environmentally sound forest operations. Design experiences that integrate the topics listed above and steadily build on previous course material are distributed throughout the upper-division portion of the program. The Forest Engineering capstone sequence during the senior year provides an opportunity for students to bring together all the topics from the curriculum in a project framework that includes the field and office engineering tasks associated with the planning and design of forest operations. The capstone sequence is integrated with the Forestry capstone sequence to provide realistic interdisciplinary planning and design experience.

Forest engineering graduates are employed by private forestry firms, public forestry agencies, logging and construction companies, engineering consulting firms, and surveying firms. Some graduates establish their own consulting businesses after a few years of field experience. Career progression following graduation can be quite varied. Some graduates gravitate toward technical positions while others move quickly toward management of harvesting and other forest operations, or more broadly defined management of the forest land base.

**Student Outcomes for the Forest Engineering Program**

The Bachelor of Science and Honors Bachelor of Science degrees in Forest Engineering can be earned through completion of the Forest Engineering program or the Forest Engineering-Civil Engineering double degree program. The BS and HBS degrees in Forest Engineering and the BS and HBS Forest Engineering-Civil Engineering dual degrees are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org. The BS in Forest Engineering is also accredited by the Society of American Foresters. The OSU Forest Engineering program prepares its graduates to achieve the Program Educational Objectives above several years into their careers. This is achieved by having students able to perform the following on graduation, well preparing them for active immediate and lifelong service in the profession:

1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
8. Operational understanding of forest ecology and silviculture.
9. Understanding of soil and water resources.
10. Ability to make land and resource measurements.
11. Ability to design the transportation infrastructure.
12. Ability to plan and manage economic and safe forest operations.
13. Understanding of economics and valuation.

Completion of the five-year, double-degree Forest Engineering-Civil Engineering program results in a BS in Forest Engineering and a BS in Civil Engineering, offered by the School of Civil and Construction Engineering. The BS and HBS degrees in Civil Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.ABET.org. A more detailed explanation of the design experience and design course sequences is contained in the 'Forest Engineering Advising Guide,' which may be viewed on the department’s website (https://www.forestry.oregonstate.edu/sites/default/files/upload_files/FE%20Advising%20Guide%20(2019-2020).pdf).

Forest engineering is a licensed profession in the state of Oregon. The BS in Forest Engineering meets the administrative rules established by the Oregon State Board of Examiners for Engineering and Land Surveying (OSBEELS) as evidence of adequate preparation for the Fundamentals of Engineering Examination, the first of two examinations required for professional engineering licensing. The BS in Forest Engineering, with the completion of appropriate program electives, also meets the OSBEELS administrative rules for evidence of adequate preparation for the Fundamentals of Land Surveying Examination, the first of two examinations required for professional land surveyor licensing.

**Major Code: 380**

**Pre-Forest Engineering Major Code: 825**

Grade standards for the professional program as listed in the program description apply.

All students pursuing the BS in Forest Engineering:
1. must earn grades of "C" or better in all courses required for the major;
2. must maintain a 2.0 GPA in all courses required for the major;
3. must accrue a minimum of 192 total credits required for graduation.

* Baccalaureate Core Course (BCC)
* Writing Intensive Course (WIC)

**Forestry Undergraduate Major (BS, HBS)**

The successful forester must understand the biological and physical processes of forest ecosystems, as well as the social, economic, and operational forces that influence forest policies and management actions. The forestry core curriculum includes basic courses in the biological, physical, social sciences, and six months of work experience as well as professional courses designed to prepare students to manage forest resources.

Students are required to select one of the following required options:

- Forest Restoration and Fire
- Forest Management
- Forest Operations Management
The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters (SAF).

Major Code: 820

Pre-Forestry Major Code: 810

- Demonstrate knowledge of forest ecology and silviculture principles to understand how forests and forested watersheds respond to natural disturbances or management activities.
- Develop skills in geospatial analysis, basic surveying, mapping and GIS.
- Demonstrate ability to measure and inventory forest vegetation with precision and accuracy.
- Develop an understanding of forestry investment analysis and be able to evaluate typical financial investments in forestry.
- Demonstrate an understanding of the development and execution of strategic, tactical and operational forest plans that support achievement of desired future stand conditions and strategic goals.
- Demonstrate an understanding of the social and political context of forestry and be able to describe current policies, laws, and regulations governing the management of forest lands.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Six months of forestry or related natural resource work experience and completion of an option is required in the forestry degree program. The option courses complement the forestry core and serve to fulfill the 180 credits for graduation.

Pre-Professional Forestry Program

Admission to the pre-professional program requires that a student be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior and senior levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU.

Professional Forestry Program

Successful completion of the pre-professional program will result in acceptance into the professional program. This requires selection of an option and:

1. a grade of 'C' or better in all pre-professional courses required for entry into the professional program (marked with 2 on the course list). Grade repeat (replacement) policy will follow OSU Academic Regulation 20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is determined based on available resources. Students meeting the minimum Pre-Forestry GPA of 2.25 may or may not be admitted depending on available resources.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate student and to the College of Forestry for admission to the professional program. Application forms and information on policies and programs are available on the College of Forestry website.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted to the professional program. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of 'C' or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain 'C' or better grades in any remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.

All courses required for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program for fall term each academic year.

The professional program begins with Forestry Field School during the two weeks prior to the first fall term of the professional program.

Pre-Forestry

Grade standards for the pre-professional program (as listed in the program description) apply.

Forest Management Option

This option is offered within the following major(s):

• Forestry - College of Forestry (p. 825)

Option Code: 822

Grade standards for the pre-major and professional major also apply to the option.

Second Year

Pre-Professional Forestry
TRAL 251 RECREATION RESOURCE MANAGEMENT 1 4
Credits 4

Third Year

Professional Forestry
FES 341 FOREST ECOLOGY 3
FES 452/FW 452 BIODIVERSITY CONSERVATION IN MANAGED FORESTS 3
FES 477/NR 477 *AGROFORESTRY 3
or GEOG 300 3
or *SUSTAINABILITY FOR THE COMMON GOOD 3
FOR 322 FOREST MODELS 3
Credits 12

Fourth Year

FES 412 FOREST ENTOMOLOGY 3
FOR 413/BOT 413 FOREST PATHOLOGY 3
Select a minimum of 15 credits from the following list of restricted electives: 15
CROP 440 WEED MANAGEMENT
FE 310 FOREST ROUTE SURVEYING
FE 423 UNMANNED AIRCRAFT SYSTEM REMOTE SENSING
**Forest Operations Management Option**

This option is offered within the following major(s):

- Forestry - College of Forestry (p. 825)

The forest operations management option focuses on the business and timber harvesting side of forestry. Students learn how to actively manage lands with an eye to economic efficiency, evolving markets and forest policy in order to provide timber and fiber for the nation and the world. The curriculum includes a traditional forestry foundation with courses in forest biology, economics, management and operations; students also earn a business minor that enhances their skills in accounting, finance, business law and organizational behavior. Graduates often become managers in growing timber companies or land managers of commercially-productive public or private lands. They work outside and with others who care about the health of our forests, economy and people.

**Option Code: 823**

Grade standards for the pre-major and professional major also apply to the option.

**Forest Restoration and Fire Option**

This option is offered within the following major(s):

- Forestry - College of Forestry (p. 825)

The forest restoration and fire option focuses on managing forests in order to be resilient to disturbance processes including wildfire, landslides, insects and disease. Graduates will have the knowledge and the skill set to incorporate these natural processes into active forest management planning. This option prepares students to prevent or mitigate damage resulting from disturbances or to use disturbance processes purposefully to achieve management objectives. These skills will be particularly important for managing forests at the landscape scale and in the face of uncertainty and rapid change including in climate or land use patterns. Many graduates become professional foresters or forest managers, wildland firefighters, prescribed burners or fire ecologists. They actively manage the landscape using both ancient and modern tools to restore and maintain resilient landscapes and protect surrounding communities.

**Option Code: 824**

Grade standards for the pre-major and professional major also apply to the option.

Sustainable Forest Management

Graduate Major (MF, MS, PhD)

Graduate Areas of Concentration
Engineering for sustainable forestry; forest biometrics and geomatics; forest operations planning and management; forest policy analysis and economics; forest soil and watershed processes; silviculture, fire, and forest health

Professional Master of Forestry Programs
Forest business for private landowners; spatial science and analysis; silviculture, fire, and forest health

The Sustainable Forest Management (SFM) graduate program emphasizes the conservation of forest-dominated landscapes to meet a defined set of ecological, economic and social criteria over long time frames. The program follows the sustainable principles outlined by the Montreal Process Criteria and Indicators. These principles have been adopted by the state of Oregon.

The program provides a strong grounding in the principles and techniques of active management of forests to improve forest health and condition while producing a full range of products and ecosystems services. It consists of a common core in the principles and criteria of sustainable forest management; statistics for design and interpretation of experiments; and specialization in one of six areas of concentration. The MF degree requires a project, MS a thesis, and PhD a dissertation.

Areas of Concentration
Engineering for Sustainable Forestry—Designing forest operations to achieve sustainable forest management objectives; ecological restoration operations; road design and construction. Supporting course work often draws from slope and embankment, industrial systems optimization, watershed impacts of forest disturbance, GIScience II: analysis and applications, forest transportation systems, forest hydrology, forest geomatics, forest road engineering, soil measurement and monitoring, advanced silviculture, heuristics for combinatorial optimization, economics of the forest resource, and human factors engineering. Contacts: Belart, Chung, Leshchinsky, Lyons, Olsen, Segura, Sessions, Wing

Forest Biometrics and Geomatics—Modeling tree and stand development; forest data sampling and monitoring methods; forest measurements and assessments; mapping and data management technologies. Supporting course work often draws from forest biometrics, forest geomatics, geospatial data and analysis, digital terrain modeling, GIScience II: analysis and applications, geodesy, spatio-temporal variation in ecology and earth sciences, remote sensing, advanced landscape and seascape ecology, generalized regression modeling, scientific visualization, forest models, statistical methods, forest policy analysis, advanced silviculture, quantitative ecology, GIS in water resources, ecological sampling, theory of statistics, applied multivariate design, advanced experimental design, remote sensing I, time series Contacts: Hailemariam, Kiser, Maquire, Strimbu, Wing

Forest Operations Planning and Management—Planning, organizing, and executing forest plans; enhancing supply chain efficiency and improving international competitiveness. Supporting course work often draws from tactical and operational planning, geospatial data and analysis, forest policy analysis, industrial systems optimization, advanced silviculture, harvesting management, organization leadership and management, marketing and innovation in renewable materials forestry supply chain management, forest geomatics, forest transportation systems, forest operations regulations and policy issues, heuristics for combinatorial optimization, forest wildlife habitat management, industrial systems optimization, statistical methods, forest biometrics, unmanned aircraft system remote sensing, forest transportation systems, techniques for forest resource analysis, forest operations analysis, operations regulations and policy issues, mathematical statistics Contacts: Belart, Chung, Lyons, Sessions, Strimbu

Forest Policy Analysis and Economics—Analyzing tradeoffs in the forest and resource policy decision process; public land use policy; interpretations of regulations; markets for forest products; forest certification; theoretical and applied research related to ecosystem services. Supporting course work often draws from natural resource policy and law, microeconomic theory, environmental policy and law interactions, forest policy analysis, economics of the forest resource, applied and advanced econometrics, heuristics for combinatorial optimization, global context of the forest sector, techniques for forest resource analysis, economics and policy of forest wildland fire, silvicultural influences on forest ecosystem dynamics, wildland fire science management, time series; and work in other fields to support thesis or dissertation research. This area of concentration is jointly sponsored by FERM, the Applied Economics Graduate Program and the Applied Economics Department. Contacts: Belart, Chung, Lyons, Souder

Forest Soil and Watershed Processes—Understanding watershed conditions and processes in forested ecosystems and the effects of management activities; evaluating and improving soil and water quality and related practices and policies for forest operations. Supporting course work often draws from forest hydrology, soil physics, environmental soil chemistry, geomorphology and landscape ecology, geospatial data analyses, principles of fluid mechanics, stream ecology, nutrient cycling, snow hydrology, river engineering, natural resources and forest ecosystems analysis, mineral organic matter interactions, open channel flow, managing forest nutrition, GIS in water resources, ecological restoration stream ecology, mineral-organic matter interactions, limnology, design and analysis of planned experiments, statistical methods, sediment transport, principles of stable isotopes, advanced forest soils, watershed processes, forest hydrology, principles of stable isotopes, environmental soil chemistry, properties and functions of soils, regional hydrologic modeling, mineral organic
matter interactions, soil morphology and classification. **Contacts:** Bladon, Hatten, Segura, Souder

**Silviculture, Fire, and Forest Health**—Manipulating vegetation to achieve management objectives, from restoration to intensive timber production; fire ecology and fire management; forest ecosystem health. Supporting course work often draws from advanced silviculture, geospatial data analysis, forest Pathology, forest entomology, environmental policy and law interactions, natural resource policy and law, plant pathology, community structure and analysis, wildland fire science and management, ecological restoration, forest policy analysis, statistical methods, sampling methods, forest hydrology, water quality and forest land use, natural resource data analysis, advanced forest community ecology, wildland fire ecology, biology of invasive plants, forest wildlife habitat management, global change ecology, weed management, advanced landscape and seascape ecology, quantitative ecology, and ecological sampling. **Contacts:** Bailey, Davis, Fitzgerald, Gonzalez-Benecke, Kiser, LeBoldus, Maguire, Powers, Shaw

**Professional Pathway Foci**

**Forest Business for Private Landowners**—Applying business techniques to assist management decisions for private forest landowners. **Contact:** Cushing

**Spatial Science and Analysis**—Application of spatial science and tools for managing natural resources. **Contact:** Wing

**Silviculture, Fire, and Forest Health**—Managing forest vegetation dynamics and ecosystem processes to achieve a range of management objectives. **Contact:** Powers

**Major Code:** 1090

**Major Code:** 1090

---

**Wood Science and Engineering**

Use of renewable materials is increasing as the world becomes more concerned about climate change and population growth. Americans use huge volumes of renewable materials, such as wood each year—by weight more than we do of steel, cement and plastic combined. To meet the growing demand for renewable materials and to maximize the benefits of bio-energy and renewable products we must be smarter in how and where we use them. New opportunities for the world through renewable materials is the core of wood science and engineering at OSU. The department is a world leader in research, outreach and education related to renewable, wood-based materials and products. It offers an undergraduate degree program in Renewable Materials that prepares students for diverse careers in the private sector that is a major component of the Pacific Northwest economy and around the world. Graduates are in high demand as climate change concerns and advanced technology accelerate the transformation to a globally competitive, green renewable materials-based industry.

The department also offers MS and PhD degrees in Wood Science. These graduate programs ensure a foundation in science that is supplemented with coursework tailored to students’ interest. Many students pursue dual majors in science or engineering fields. Interested students should see the department web page for more information or contact the department head.

B. Leshchinsky (Forest Engineering, Resources and Management), A. Barbosa (Civil and Construction Engineering), T. Miller (Civil and Construction Engineering)¹

¹ Licensed Professional Engineer

**WSE 111, RENEWABLE MATERIALS FOR A GREEN PLANET, 2 Credits**

Renewable materials are an integral part of modern lifestyles, and current societal trends point to increased use of renewable materials. This course provides an overview of renewable materials and their current applications in society. As an overview course, it covers a breadth of renewable material uses and exposes students to life-cycle thinking.
WSE 210, RENEWABLE MATERIALS TECHNOLOGY AND UTILIZATION, 4 Credits
Characteristics and uses of renewable fiber products including wood, bamboo and grasses; manufacturing processes; effect of tree growth and harvesting on renewable products manufacturing and properties. Wood identification. Lec/lab.
Equivalent to: FP 210
WSE 211, WOODTURNING WITH SCIENCE I, 4 Credits
An introduction to scientific woodturning. Students will get a grounding in tools, lathes, sharpening, and set-up, and then will transition into turning basic forms (spindle and bowl). Particular relevance will be placed upon grain orientation, wood moisture content, wood anatomy, wood chemistry, wood species and extractive effects, and how all of these attributed affect both form and function. Class instruction will be entirely studio based. CROSSLISTED as ART 211/WSE 211.
Equivalent to: ART 211
This course is repeatable for 8 credits.
WSE 225, DEVELOPMENTS OF BUILDING DESIGN WITH RENEWABLE MATERIALS, 3 Credits
Introduction to architectural design, considering the different building requirements and the solutions available, with a focus on wood-based products and other ligno-cellulosic materials.
WSE 250, CAD: COMPUTER AIDED DESIGN, 3 Credits
Provides students with the tools and techniques to design and render products, furniture, and structures using Solidworks, as well as create technical drawings that facilitate communication between designers, engineers, and clients. The techniques developed during this course are applicable to a wide variety of industrial CAD and product design industries worldwide. Lec/lab/studio.
Available via Ecampus
WSE 266, *INDUSTRIAL HEMP, 3 Credits
Introduction to the botany, biology and agronomy of the hemp plant, and the origins, historical contexts and implications of contemporary legal and social issues surrounding its use for food, fiber, and building products. Taught via Ecampus only. (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; CPWC – Core, Pers, West Culture
Available via Ecampus
WSE 299, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.
WSE 320, ANATOMY OF RENEWABLE MATERIALS, 3 Credits
Examination of macroscopic and microscopic anatomy of renewable (plant based) materials commonly used by society. Learning activities including lecture and the hands-on study of the various plant materials and their components with naked-eye, hand lens, and microscopic examination. Lec/lab.
WSE 321, CHEMISTRY OF RENEWABLE MATERIALS, 3 Credits
Chemical structures and chemical properties of renewable plant-based materials will be taught at molecular levels. Chemical compositions of different renewable materials will be covered. Chemical and biochemical modifications and applications or renewable materials will be discussed in detail. Lec/lab.
Prerequisite: CH 122 with D- or better or CH 202 with D- or better or CH 232 with D- or better or CH 232H with D- or better
WSE 322, PHYSICAL AND MECHANICAL PROPERTIES OF RENEWABLE MATERIALS, 4 Credits
Introduction to thermodynamics and mechanics of plant fibers, solid wood and bio-based composites: hygroscopicity, heat and mass transport; statics, elasticity and strength of materials; mechanical properties.
Prerequisite: WSE 321 with C- or better
WSE 324, RENEWABLE MATERIALS LABORATORY, 3 Credits
Integrates the knowledge gained in the core science courses (WSE 321 and WSE 322) to help students obtain a deeper understanding of how chemistry, physics, and anatomy affect renewable material properties. The course uses renewable fiber materials such as hardwoods, softwoods, natural fibers, bamboo, composite wood products (e.g. OSB, plywood, MDF, etc.) and fiber-based products (e.g. wood-plastic composites, natural fiber composites, straw panels, paper, etc.) to examine the intricate relationships between fundamental properties and performance. Lec/lab.
Prerequisite: WSE 321 with C- or better and WSE 322 [C-]
WSE 350, WOODWORKING FOR ART AND DESIGN, 3 Credits
Acquaints students with the fundamentals of making art and design objects with wood.
WSE 351, ADVANCED CAD: COMPUTER AIDED DESIGN, 3 Credits
Develop advanced techniques using industry standard CAD software as it relates to wood based product, furniture, and structural design. Build upon the skills acquired during WSE 250 CAD: COMPUTER AIDED DESIGN and learn advanced Solidworks techniques. Introduction to Rhinoceros 3D software and various parametric plugins. Lec/studio.
Prerequisite: WSE 250 with C- or better
WSE 352, CAM FOR THE CNC ROUTER AND LASER ENGRAVER, 3 Credits
Process G-code using CAM software for CNC routing operations, as well as create raster and vector drawings for laser cutting/engraving applications. Each student will work through the design process researching and conceptualizing ideas, 3D modeling designs, developing working prototypes, and fabricating a final product. Lec/lab/studio.
Prerequisite: WSE 350 with C- or better
Recommended: Introductory level CAD course or demonstrated proficiency in industry standard CAD software
WSE 385, *EVALUATING SUSTAINABILITY THROUGH LIFE CYCLE ANALYSIS, 3 Credits
With increased focus on sustainability, it has become important to quantify a sustainability metric of a material, process, or a system. To that end an understanding of life cycle analysis (LCA) is needed that can be used to determine a sustainability metric. This Ecampus course presents the use of LCA to gain insights on the environmental and social impacts of the choices we make. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

WSE 392, *BAMBOOLOOZA: THE FASCINATING WORLD OF BAMBOO, 3 Credits
An exploration of the world of bamboo and its application to renewable products. This course provides an in-depth understanding of a renewable material bamboo from its native form to processed products. Additionally, this course discusses the utilization and perception of bamboo in different societies of the world. Taught via Ecampus only. (Bacc Core Course)
Attributes: CSST – Core, Synthesis, Science/Technology/Society
Available via Ecampus

WSE 399, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 16 credits.

WSE 401, RESEARCH, 1-16 Credits
Equivalent to: FP 401
This course is repeatable for 16 credits.

WSE 403, THESIS, 1-16 Credits
This course is repeatable for 16 credits.

WSE 405, READING AND CONFERENCE, 1-16 Credits
Equivalent to: FP 405
This course is repeatable for 16 credits.

WSE 406, PROJECTS, 1-16 Credits
Equivalent to: FP 406
This course is repeatable for 16 credits.

WSE 413, WOODTURNING WITH SCIENCE II, 4 Credits
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. CROSSLISTED as ART 413/WSE 413.
Prerequisite: WSE 210 with C- or better and WSE 211 [C-]
Equivalent to: ART 413, FP 413
This course is repeatable for 8 credits.

WSE 414, WSE ART AND DESIGN CAPSTONE, 8 Credits
Brings together the basic collaborative design elements and technical background of each student in the creation of collaborative design projects with the intention of giving students real-world, problem-based design experience.
This course is repeatable for 16 credits.

WSE 425, TIMBER TECTONICS IN THE DIGITAL AGE, 4 Credits
An exploration of the advances in design, construction and fabrication of timber buildings. Includes experimentation with both physical and digital models and a final project, in collaboration with UO Architecture students. Lec/lab/studio.
Recommended: Junior standing and knowledge of CAD

WSE 430, FUNDAMENTALS OF ENGINEERING MECHANICS, 4 Credits
An introduction to fundamentals of engineering mechanics for RM students selecting Science and Engineering option. While in most aspects the course follows standard introductory mechanics courses for engineers, special attention is paid to elasticity and strength in cellular and anisotropic materials like solid wood and bio-based composites. The overall objective of this course is to provide fundamental knowledge and practical skills in the area of engineering mechanics and mechanical principles behind some of the most important methods of characterization, processing, and utilization of renewable biomaterials; commonly used today, emerging and future. Lec/lab.
Prerequisite: MTH 254 with D- or better and WSE 324 [B-]

WSE 444, STRAND-BASED COMPOSITES MANUFACTURE, 1 Credit
The strand-based composites manufacturing process uses the results of research projects and the instructor’s mill experience. All aspects of the process from wood procurement through pressing are discussed. This course will be valuable to those interested in a manufacturing career. Available via Ecampus

WSE 450, ENTREPRENEURIAL PRODUCT DEVELOPMENT I, 3 Credits
Provides an entrepreneurial experience in product development, in which students design, produce, market, and sell a product in a business setting. Working as a team, students will design a product using renewable materials and are expected to perform and understand manufacturing techniques and processes to produce the product in limited quantities.
Prerequisite: WSE 250 with C- or better and WSE 455 [C-]

WSE 451, ENTREPRENEURIAL PRODUCT DEVELOPMENT II, 3 Credits
Provides an entrepreneurial experience in product development, in which students design, produce, market, and sell a product in a business setting. Working as a team, students will design a product using renewable materials and are expected to perform and understand manufacturing techniques and processes to produce the product in limited quantities. Lab/studio.
Prerequisite: WSE 250 with C- or better and WSE 450 [C-] and WSE 455 [C-]
WSE 453, *FOREST PRODUCTS BUSINESS, 3 Credits
Provides students with the skills necessary to operate effectively in the global forest products industry. (Writing Intensive Course)
Attributes: CWIC – Core, Skills, WIC
Recommended: ECON 201 and ECON 202

WSE 455, INDUSTRIAL MARKETING IN THE FOREST SECTOR, 3 Credits
Marketing relies heavily on effective communication, so this course concentrates on written and oral communication. The course will arm students with the skills necessary to apply basic concepts of marketing of forest products. Application will be highlighted through examples and industry speakers relating course work to the day-to-day work in business.
Equivalent to: FP 455

WSE 458, DESIGN OF WOOD STRUCTURES, 3 Credits
Study of basic wood properties and design considerations. Design of wood connectors, beams, columns, and beam columns. Introduction to plywood and glue laminated members. Design of structural diaphragms and shear walls. Taught via Ecampus only.
Prerequisite: CE 381 with C or better
Available via Ecampus
Equivalent to: CE 484

WSE 461, BIO-BASED PRODUCTS MANUFACTURING, 4 Credits
First of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include the major processing steps for the conversion of raw materials such as wood, bamboo, hemp, and cereal straws into products.
Prerequisite: WSE 210 with C or better and WSE 321 [C-] and WSE 324 [C-]
Available via Ecampus

WSE 462, ADVANCED MANUFACTURING 1, 4 Credits
Second of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process design elements, quality control, and approaches to continuous process improvement.
Prerequisite: WSE 461 with C or better

WSE 463, ADVANCED MANUFACTURING 2, 4 Credits
Third of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process control, optimization, automation, and contemporary topics such as Big Data and the Internet of Things and the potential impacts of the trends on manufacturing enterprises.
Prerequisite: WSE 462 with C or better

WSE 465, RENEWABLE MATERIALS MANUFACTURING EXPERIENCE, 2 Credits
Learning about and visiting a number of renewable materials industrial and commercial operations representing all parts of the renewable materials value chain. The class will meet daily for one 5-day week immediately prior to the start of fall term. During the week, the students and at least one instructor will visit various sites. Lectures will precede visits to industrial plants, mills, and sites. At the end of the week, an instructor will participate in a debriefing session, reiterating what was learned during this week. Students will then submit a report on the day’s activities. The class includes daily travel and overnight stays.
This course is repeatable for 4 credits.

WSE 470, *FORESTS, WOOD, AND CIVILIZATION, 3 Credits
Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues
Equivalent to: WSE 470H
Available via Ecampus

WSE 471, RENEWABLE MATERIALS IN BUILDING CONSTRUCTION, 3 Credits
Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced.

WSE 473, BIOENERGY AND ENVIRONMENTAL IMPACT, 3 Credits
Explores world’s use of woody biomass fuels, their potential to contribute to our region’s energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products.
Prerequisite: ((MTH 111 with D- or better or MTH 112 with D- or better or MTH 231 with D- or better or MTH 241 with D- or better or MTH 245 with D- or better or MTH 251 with D- or better or MTH 251H with D- or better) and (CH 122 [D-] or CH 222 [D-] or CH 232 [D-] or CH 232D [D-] or CH 232H [D-]))

WSE 499, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 99 credits.

WSE 501, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FP 501
This course is repeatable for 16 credits.

WSE 503, THESIS, 1-16 Credits
Equivalent to: FP 503
This course is repeatable for 999 credits.
WSE 505, READING AND CONFERENCE, 1-16 Credits  
Equivalent to: FP 505  
This course is repeatable for 16 credits.

WSE 506, PROJECTS, 1-16 Credits  
Equivalent to: FP 506  
This course is repeatable for 16 credits.

WSE 507, SEMINAR, 1 Credit  
Section 1: Beginning Seminar. Section 2: Seminar. Graded P/N.  
Equivalent to: FP 507  
This course is repeatable for 99 credits.

WSE 513, WOODTURNING WITH SCIENCE II, 4 Credits  
An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. This course is repeatable for 12 credits.  
Recommended: WSE 210 and WSE 211

WSE 514, WSE MASTER OF DESIGN CAPSTONE, 3 Credits  
Focuses on preparing MDes students for displaying and marketing their work in competitive studio settings. Become familiar with finding a venue, advertising, designing a space, tracking lighting, hanging or displaying work, administering a show opening, and publicizing work using an artist/designer statement, as well as producing a catalog. Assessment will be via a three party critique of work, composed of one artist, one designer, and one scientist. Assessment will relate to the student’s ability to defend critique, put together a cohesive show, and create an appropriate body of work. Prerequisite: WSE 522 with C or better

WSE 516, INTRODUCTION TO SCULPTURAL WOODTURNING, 4 Credits  
The development of studio / sculptural woodturning has a unique history, and involves a cluster of specialized skills. This course blends historic woodturning practices with modern approaches and aesthetics to bring an understanding of wood science into this very specialized field of woodturning. Prerequisite: WSE 513 with B or better and WSE 514 [B]  
This course is repeatable for 12 credits.

WSE 520, THE GLOBAL CONTEXT OF THE FOREST SECTOR, 3 Credits  
Provides a broad knowledge base of business and marketing practices in the global forest industry. Includes a module on research ethics that fulfills OSU Graduate School requirements.

WSE 521, WOOD SCIENCE I, 4 Credits  
A comprehensive overview and integration of wood anatomy, wood physics, wood chemistry and wood mechanics; global contemporary issues impacting the wood and fiber sector; integration of basic wood sciences to understand the complex relationships between environment and wood material properties, and the influence of both on the use of wood-based materials.

WSE 522, WOOD SCIENCE II, 4 Credits  
Continuation of the comprehensive overview and integration of wood and fiber anatomy, physics, chemistry, and mechanics; integration of basic wood science to understand relationships with wood and fiber properties and their impact on final use. Focus on biological, chemical and physical degradation of wood; adhesion; and physical and engineering properties of wood. Lec/lab.

WSE 525, TIMBER TECTONICS IN THE DIGITAL AGE, 4 Credits  
An exploration of the advances in design, construction and fabrication of timber buildings. Includes experimentation with both physical and digital models and a final project, in collaboration with UO Architecture students. Lec/lab/studio.  
Recommended: Knowledge of CAD

WSE 526, STRUCTURAL HEALTH ASSESSMENT/MONITORING OF TIMBER BUILDINGS, 3 Credits  
Holistic approaches for the evaluation of the performance of timber systems and structures in a building. Learn about the tools available to experts for different analysis purposes, and to understand how data acquired from different techniques can be analyzed and used to inform building management and maintenance, fabrication and construction practices, and future design.

WSE 530, POLYMER COMPOSITES, 3 Credits  
A comprehensive survey of the material and mechanical properties of polymer-based composite materials including failure mechanisms, interfacial and nanoscale effects, and transport and thermal properties.  
Recommended: CHE 545 and multivariable calculus

WSE 535, POLYMER SYNTHESIS AND STRUCTURE, 3 Credits  
A comprehensive overview of various synthetic methods for various synthetic polymers; structures of various synthetic and natural polymers.  
Recommended: 3 credits of undergraduate organic chemistry or CH 331 or CH 334

WSE 553, FOREST PRODUCTS BUSINESS, 3 Credits  
Provides students with the skills necessary to operate effectively in the global forest products industry.  
Recommended: ECON 201 and ECON 202
WSE 555, INDUSTRIAL MARKETING IN THE FOREST SECTOR, 3 Credits
Marketing relies heavily on effective communication, so this course concentrates on written and oral communication. The course will arm students with the skills necessary to apply basic concepts of marketing of forest products. Application will be highlighted through examples and industry speakers relating coursework to the day-to-day work in business.
Equivalent to: FP 555

WSE 558, WOOD DESIGN, 4 Credits
Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as CE 584/WSE 558.
Equivalent to: CE 584
Recommended: CE 383 or CE 481 with minimum grade of C

WSE 561, BIO-BASED PRODUCTS MANUFACTURING, 4 Credits
First of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include the major processing steps for the conversion of raw materials such as wood, bamboo, hemp, and cereal straws into products.
Recommended: WSE 210 and WSE 321 and WSE 324

WSE 562, ADVANCED MANUFACTURING 1, 4 Credits
Second of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process design elements, quality control, and approaches to continuous process improvement.
Recommended: WSE 461

WSE 563, ADVANCED MANUFACTURING 2, 4 Credits
Third of a 3-term series exploring technologies and management practices associated with manufacturing products from wood and other renewable materials. Subjects covered include process control, optimization, automation, and contemporary topics such as Big Data and the Internet of Things and the potential impacts of the trends on manufacturing enterprises.
Recommended: WSE 462

WSE 571, RENEWABLE MATERIALS IN BUILDING CONSTRUCTION, 3 Credits
Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced.

WSE 573, BIOENERGY AND ENVIRONMENTAL IMPACT, 3 Credits
Explores world’s use of woody biomass fuels, their potential to contribute to our region’s energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products.
Recommended: (MTH 111 or MTH 112 or MTH 231 or MTH 241 or MTH 245 or MTH 251 or MTH 251H) and (CH 122 or CH 222)

WSE 592, ADVANCED WOOD DESIGN, 4 Credits
Recommended: Understanding of basic concepts in mechanics and timber design

WSE 599, SPECIAL TOPICS, 0-16 Credits
This course is repeatable for 99 credits.

WSE 601, RESEARCH AND SCHOLARSHIP, 1-16 Credits
Equivalent to: FP 601
This course is repeatable for 16 credits.

WSE 603, THESIS, 1-16 Credits
Equivalent to: FP 603
This course is repeatable for 999 credits.

WSE 605, READING AND CONFERENCE, 1-16 Credits
This course is repeatable for 16 credits.

WSE 606, PROJECTS, 1-16 Credits
Equivalent to: FP 606
This course is repeatable for 16 credits.

WSE 607, SEMINAR, 1 Credit
Section 1: Beginning Seminar. Section 2: Graduate Seminar.
Equivalent to: FP 607
This course is repeatable for 99 credits.

WSE 699, SPECIAL TOPICS, 1-16 Credits
This course is repeatable for 16 credits.

Renewable Materials Minor
The minor in Renewable Materials exposes students to the world of renewable materials science and technology and will enable students in other majors to gain a specialization that will make them more competitive for careers associated with green materials and allied industries.

Minor Code: 238

Students must complete a minimum of 27 credits for the minor, at least 12 of which must be upper division.
Demonstrate fundamental knowledge of wood and similar renewable materials that make them challenging to utilize as industrial and building materials.

• Demonstrate command of renewable material moisture content and specific gravity calculations.

• Demonstrate ability to find, compile, analyze and communicate technical information.

• Gain familiarity with the diverse complexity of the Renewable Materials industry, and the challenges it faces with balancing business and environmental goals.

• Demonstrate a combination of technical and business accum that allows effective management of process and people.

• Gain information and knowledge to become a better global citizen.
Option Code: 793

### Total Credits required for graduation: 180

1. Required to fulfill Renewable Materials Core Requirements. These courses must be taken for grades (not S/U).

2. Baccalaureate Core Course (BCC)

3. Writing Intensive Course (WIC)

### Advanced Wood Manufacturing Option

This option is offered within the following major(s):

- Renewable Materials - College of Forestry (p. 838)

This option complements the Renewable Materials core curriculum that develops students' knowledge of properties and behavior of bio-based materials. It adds a strong foundation in how the products are manufactured, as well as how the manufacturing processes are designed, managed, controlled, and optimized. Students will be exposed to important advanced topics such as automation, scanning and optimization systems, computer numerically controlled (CNC) machining, robotics, 3D printing, as well as how emerging topics such as the Internet of Things (IoT) and Big Data may impact the future of manufacturing.

# Art and Design Option

This option is offered within the following major(s):

- Renewable Materials - College of Forestry (p. 838)

The Art and Design (A&D) option prepares students to engage with renewable materials on an aesthetic level, whether as interior designers, fine artists, or entrepreneurs. Students will gain not only an in-depth knowledge of renewable materials but also how these materials can function visually within the human space. In addition to the aesthetic aspect, students will gain an understanding of green building materials and green architecture. Students in the A&D option may also earn a visual arts minor by completing 31 credits of applicable course work.

Total Credits: 93

Plus additional Free Electives sufficient to ensure 180 total credits (60 must be upper division)

Completion of the A&D option and meeting additional studio and grade requirements will fulfill the requirements for a transcript-visible Visual Arts minor.

**Option Code: 478**
Note: Completion of the Management and Marketing option and meeting additional grade requirements of the College of Business will fulfill the requirements for a transcript-visible Business and Entrepreneurship minor. Students who graduate and complete the minor may also apply to the College of Business to enroll in a 58-credit, four-term MBA degree program.

Science and Engineering Option

This option is offered within the following major(s):

- Renewable Materials - College of Forestry (p. 838)

This is a flexible, math- and science-intensive program that allows students to design a personalized curriculum that opens doors to jobs that solve complex problems, create efficiencies, foster intelligent use of renewable materials, or to graduate school. Students select a group of courses (often minors) that complement their interests.

Wood Science Graduate Major (MS, PhD)

Graduate Areas of Concentration

Biodeterioration and materials protection, chemistry and chemical processing, forest products business and marketing, physics and moisture relations, process modeling and analysis, renewable materials science and engineered composites, wood anatomy and quality, wood engineering and mechanics

The Department of Wood Science and Engineering offers graduate programs leading toward the Master of Science and Doctor of Philosophy degrees in Wood Science. Thesis research and academic programs can be developed in the many special disciplines represented by the faculty. Minors are most commonly selected from statistics, engineering, chemistry, or business.

Many students pursue a dual major degree in wood science and a field of engineering or science. A wide variety of science, engineering and business opportunities are available.

Graduate students in wood science come from a wide range of undergraduate degree programs in science, engineering, and business.

Excellent laboratories are available for teaching and research in Richardson Hall, Peavy Hall, Emmerson Advanced Wood Products Laboratory, and the Oak Creek Laboratory. Student research involves seeking solutions to current problems in renewable materials science, other sciences such as chemistry, physics and biology, engineering, business or related fields. Most graduate students are employed as part-time graduate assistants.

Graduates with advanced degrees find employment in research and development, management or technical positions in the private sector, as university faculty or in technical public service positions.

Total Credits: 40-48

1. Course work to be determined by your committee at program of study meeting.
2. Approved courses include all 500- and 600-level courses in Wood Science and Engineering.

Major Code: 3690

Wood Science Graduate Minor

Minor Code: 3690

If a Wood Science minor is desired, you should first select a minor professor within the Wood Science & Engineering department, and work with them to identify an appropriate set of courses within Wood Science to meet or exceed 15 credits.

Minor Code: 3690

College of Liberal Arts

The College of Liberal Arts offers major programs in the arts, humanities, and social sciences that comprise the core of human knowledge. Students can earn degrees and minors in the college’s many disciplines and interdisciplinary programs, as well as certificates of specialized training in seven other fields. Qualified students can also participate in a joint program with the College of Law at Willamette University, in which they can earn their bachelor’s and law degrees in six years.

200 Bexell Hall
Oregon State University
Corvallis, OR 97331-6202
Phone: 541-737-0561
Website: http://liberalarts.oregonstate.edu

Administration

Lawrence R. Rodgers, Dean, 541-737-4581, larry.rodgers@oregonstate.edu
Marion Rossi, Associate Dean, 541-737-4917, mrossi@oregonstate.edu
Suzanne Grey, Executive Assistant, 541-737-8809, suzanne.grey@oregonstate.edu
Double Degrees

Undergraduates with majors in the College of Liberal Arts can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education (https://catalog.oregonstate.edu/college-departments/education/), College of Business (https://catalog.oregonstate.edu/college-departments/business/), International Programs (https://catalog.oregonstate.edu/college-departments/international-programs/) or Department of Forest Ecosystems and Society (https://catalog.oregonstate.edu/college-departments/forestry/forest-ecosystems-society/) sections of this catalog for more information.

Minors

Students throughout the university may elect to pursue the following undergraduate minors: Anthropology; Art History; Asian Languages and Cultures; Asian Studies; Communication; Economics; English; Ethnic Studies; Film Studies; French; German; History; Multimedia; Music; Music Performance; New Media Communications; Philosophy; Photography; Political Science; Popular Music Studies; Psychology; Queer Studies; Religious Studies; Social Justice; Sociology; Spanish; Theatre Arts; Visual Arts; Women, Gender, and Sexuality Studies; and Writing.

The College of Liberal Arts also offers many courses in the arts, humanities, and social sciences that are of value to all students and are basic to a liberal education. Such courses help students in their personal development and enrichment through a deeper understanding of themselves and appreciation of human cultural development.

Teacher Education

The College of Liberal Arts offers excellent undergraduate preparation for elementary, middle or high school teachers. The Liberal Studies pre-education program is ideal for elementary school teachers.

Students wanting to teach at the high school level may major in English, French, German, history/social studies, music or Spanish.

Certificate Programs

Certificate programs in Applied Ethics; Food in Culture and Social Justice; Language in Culture; Latin American Affairs; Medical Humanities; Peace Studies; Religion and Culture; and Women, Gender, and Sexuality Studies are offered to all students and may be taken concurrently with any major degree program.

Pre-Law Preparation

OSU provides opportunities for a complete and rigorous preparation for students interested in attending law school. Our accomplished graduates attend some of the finest schools in the nation.

Law school is one of the few professional schools that do not require a particular set of courses as a prerequisite for admission. Students may major in any subject. Students should choose a major that engages and challenges them, a course of study where they can excel. They are advised to supplement their major courses with a diverse selection of classes that offer depth, rigor, and skill in three areas: written and oral communication, deductive reasoning and logic, and a general knowledge of the institutions and values of our society.

The College of Liberal Arts offers many effective and engaging ways to prepare for law school, rather than one single pre-law program. Students interested in law school may contact Professor Jason Tanenbaum in the School of Public Policy. Call 541-737-3663 for his office hours. Students also may call the CLA Student Services Office, 541-737-0561. Students should also obtain the College of Liberal Arts pre-law advising brochure, which is available online (http://liberalarts.oregonstate.edu/content/pre-law-program/).

Accelerated BA/BS and Law (JD) Program with Willamette University College of Law and Lewis and Clark College Law School

This program enables OSU students to earn a BA or BS degree and a law degree in a total of six years, three years at OSU and three at either the Willamette University College of Law or the Lewis and Clark College Law School.

Students may be admitted to the program any time during their first two years of undergraduate study provided they have a 3.5 high school GPA and a minimum combined SAT score of 1950 or composite ACT score of 29. Students will complete all but 45 credits of upper-division electives for a BA or BS degree in defined majors1 in the College of Liberal Arts. For admission to law school, students must have earned a cumulative GPA of 3.4 or higher and a Law School Admission Test (LSAT) score no lower than the median LSAT for the prior year's entering class.

At Willamette University and at Lewis & Clark College, the students' first-year law courses will satisfy the 45-credit upper-division elective requirements for their OSU degree. After completing the additional two years at Willamette or at Lewis & Clark, students will have completed both the bachelors and JD degrees in six years.

OSU Honors College students are currently not eligible for this program due to the senior year thesis requirement.

1 American Studies (OSU-Cascades Branch Campus in Bend); Anthropology; Economics; English; Ethnic Studies; French; German; History; Philosophy; Political Science; Sociology; Spanish; Speech Communication; Women, Gender, and Sexuality Studies

Academic Advising

Mission Statement: The College of Liberal Arts academic advising is a teaching and learning process dedicated to student success. Academic advising engages students in developing a plan to realize their educational, career and life goals.

Values Statement: The values associated with advising in the College of Liberal Arts are closely aligned with the stated values of the university.

• Accountability: We are committed to providing timely, accurate and intentional advising.
• Diversity: We honor the unique nature and interests of each student. Advising services and delivery methods will be shaped to fit the diverse needs of our campus populations.
• **Respect**: We seek to establish a reciprocal relationship with students based on an ethic of care and shared responsibility.

• **Social Responsibility**: We foster a culture of independent thinking and global awareness so that students make informed, socially responsible choices consistent with their academic, career, and life goals.

• **Integrity**: We seek to engage students in a fair and professional process of meaningful self-reflection and authentic inquiry.

A liberal arts education involves exploration and broad study beyond one's major field. Students are encouraged to understand other cultures, other ways of knowing, and other fields of study. Students are also encouraged to take more courses in areas outside their major field to enhance their experience.

Liberal Arts students are required to satisfy four sets of requirements:

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core
- BA or BS requirements
- Major program requirements

The University Baccalaureate Core course requirements are explained in a separate section (p. 2418). The College of Liberal Arts Core and the BA and BS requirements are explained below. The major program requirements are explained in the appropriate section in the pages that follow. If you want to add a minor program, you will also need to complete the requirements for that minor. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog. Specific requirements for disciplinary minors are usually given in the appropriate school or departmental section; for example see the School of Public Policy section for requirements for the Economics minor.

A single course cannot count towards all three of the Baccalaureate Core, CLA Core, and major requirements. However, a single course can count towards two of them (e.g., both Baccalaureate Core and major). Courses taken to satisfy the baccalaureate core requirements or the liberal arts core may also be used to satisfy requirements for a minor.

**Liberal Arts Core**

The liberal arts core consists of five courses (at least 15 credits) as follows:

- **Humanities (3)**: Critical examination of influential traditions and ideas as defined by major scholarly works (includes English literature; ethnic studies; film studies; foreign language and literatures, including culture; history; and philosophy).

- **Fine Arts (3)**: Participation in or appreciation of different forms (includes art, music, theater, and creative writing in poetry, fiction, creative nonfiction, or drama).

- **Social Science (3)**: Scientific investigation and theory pertaining to human individuals, social groups, institutions, and ideologies (includes anthropology; economics; political science; psychology; sociology; women, gender, and sexuality studies; and selected geography courses).

- **Nonwestern Culture (3)**: Study in any of the following areas focusing outside of Western culture—Africa, Asia, Russia, South America, Central America, Caribbean, Middle East, the Pacific, or Native North Americans.

- **One additional course** from one of the preceding four areas (3).

### BA/BS Requirements

Nearly all liberal arts students graduate with either a bachelor of arts or bachelor of science degree.

- **BA Requirement**: Second-year proficiency in a second language, including ASL, at the college level with at least a C−.

- **BS Requirement**: A minimum 15-credit block of science, computer science, and quantitative studies as follows:
  
  a. Any computer science (CS) course approved by the student’s major school or department (3−4), and
  
  b. Any course from the College of Science approved by the student’s major school or department except math (MTH) or statistics (ST) courses (3−4), and
  
  c. One of the following (8−12):

Many schools or departments require specific courses to satisfy the BS degree requirements; students should consult their academic advisors for details. Courses used to satisfy the BS degree requirements may not also be used to satisfy baccalaureate core requirements.

Bachelor of Fine Arts (BFA) degrees in Digital Communication Arts and Graphic Design are offered by the School of Arts and Communication. BFA degree requirements differ from those in other College of Liberal Arts programs. Students in the BFA degree program must complete the baccalaureate core and a minimum of 105 credits in art or digital communication arts.

Liberal Arts students are required to satisfy four sets of requirements:

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core
- BA or BS requirements
- Major program requirements

The Liberal Arts Core consists of five courses (at least 15 credits) as follows:
• **Humanities (3):** Critical examination of influential traditions and ideas as defined by major scholarly works (includes English literature; ethnic studies; film studies; foreign language and literatures, including culture; history; and philosophy).

• **Fine Arts (3):** Participation in or appreciation of different forms (includes art, music, theater, and creative writing in poetry, fiction, or drama).

• **Social Science (3):** Scientific investigation and theory pertaining to human individuals, social groups, institutions, and ideologies (includes anthropology; economics; political science; psychology; sociology; women, gender, and sexuality studies; and selected geography courses).

• **Nonwestern Culture (3):** Study in any of the following areas focusing outside of Western culture—Africa, Asia, Russia, South America, Central America, Caribbean, Middle East, the Pacific, or Native North Americans.

• **One additional course** from one of the preceding four areas (3).

Below you will find a list of courses that will fulfill each section of our Liberal Arts Core. Students must take a minimum of 3 credits/1 course for each of the five Liberal Arts Core sections.

American Studies Program (AMS)

AMS 311, TOPICS IN AMERICAN STUDIES, 4 Credits
Selected topics, changed annually, that investigate American ideas, regions, events, or periods. Fulfills the requirement for an integrated course in the major. May be repeated as topics vary. Open to nonmajors. This course is repeatable for 99 credits.

AMS 350, *AMERICAN CULTURE AND THE VIETNAM EXPERIENCE, 4 Credits
Examines through literature, film, and popular media the effects of the Vietnam War on American culture. Taught at OSU-Cascades only. (Bacc Core Course)
Attributes: CSGI – Core, Synth, Global Issues

AMS 405, READING AND CONFERENCE, 1-16 Credits
Independent, individual studies supervised by the director, members of the American Studies Board, or assigned professors, as arranged by the student and the director. This course is repeatable for 16 credits.

AMS 406, PROJECTS, 1-16 Credits
Studies of American culture and society centered around topical events or cultural programs of current interest in American studies. This course is repeatable for 16 credits.
AMS 407, *SEMINAR, 1-16 Credits

Anthropology (ANTH)
ANTH 101, *INTRODUCTION TO
ANTHROPOLOGY, 3 Credits
Located at the intersection of the humanities and the sciences,
antropology strives for a holistic understanding of the human condition.
This course introduces students to the basic concepts, theories
and methods of anthropology, including its four main sub-fields:
archeology, biological anthropology, cultural anthropology, and linguistic
anthropology. The course is driven by fundamental questions, including:
What is culture? How do anthropologists study human populations,
both past and present? How can this field help us better understand
contemporary human problems? (Bacc Core Course)
Attributes: CPSI – Core, Pers, Soc Proc & Inst; LACS – Liberal Arts Social
Core
Available via Ecampus
ANTH 110, *INTRODUCTION TO CULTURAL
ANTHROPOLOGY, 3 Credits
